The inference from these facts supports the conclusion that the unions' unilateral organizational activities were very successful. Even if this circumstantial evidence can be said to give rise to an inference of some union-employer scheme, it simply does not rise to the level of "significant probative evidence" which is required to demonstrate that a genuine issue of fact exists as to the conspiracy charged in Count I.

Although we are cognizant of [*84] a party's right to have a jury resolve disputed facts, "a party resisting a motion [for summary judgment] cannot expect to rely merely upon bare assertions, conclusory allegations or suspicions." O'Brien v. Eli Lilly Co., 668 F.2d 704, 712 (3rd Cir. 1981) (quoting Ness v. Marshall, 660 F.2d 517, 519 (3rd Cir. 1981)). That is the cumulative nature of the extensive evidence in this case. We conclude, therefore, that in absence of any proof of knowledge or intentional participation in an illegal combination or common scheme of the union with non-labor entities, summary judgment must be granted with respect to Count I.

⁹⁴ There are no antitrust consequences from the fact that the union tactics included violence directed at Altemose and other subcontractors since the Sherman Act "draws no distinction between restraints effected by violence and those achieved by peaceful means," Apex Hosiery; supra, 310 U.S. at 513. To the extent that Altemose Const. Co. v. Atlantic Cape May, Etc., 493 F.Supp. 1181, 1188 (D.N.J. 1980), differs with this conclusion, we note that its disregard of Apex Hosiery is at odds with its subsequent citation with approval by the Court in Allen Bradley, supra, 325 U.S. at 810. See also, Schnabel v. Building & Const. Trades Council of Phila., Etc., supra, at 45.

IV. CONCLUSION

We hold that the evidence in support of Count I is insufficient as a matter of law to provide an inference of conspiracy to violate [Sections 1](#) or [2](#) of the Sherman Act. We also hold that based on the evidence of record in support of Count II, any concerted action is solely among the union defendants, such union activity is protected by a statutory exemption to the antitrust laws. Alternatively, we find that the subcontracting agreements at issue have sufficient indicia of organizational intent to establish they were negotiated and enforced [[*85](#)] in a collective bargaining context and, not being in violation of [29 U.S.C. § 158\(e\)](#), enjoy non-statutory exemption from the antitrust laws. For these reasons, defendants' cross-motion for summary judgment must be granted.

HN6 **Practices Governed by Per Se Rule, Boycotts**

710 F.2d 1366, *1366LÁ1983 U.S. App. LEXIS 26121, **1

The Supreme Court has, in antitrust cases, applied the per se rule to four categories of restraints: horizontal and vertical price fixing, horizontal market division, group boycotts or concerted refusals to deal, and tying arrangements.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN7 Price Fixing & Restraints of Trade, Vertical Restraints

Agreements among vertically integrated organizations are not per se illegal.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN8 Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Restraints solicited by a distributor but implemented by a manufacturer are not automatically per se violations. Restraints of this type come within the per se rule only if they clearly had, or were likely to have, a pernicious effect on competition and lacked any redeeming virtue.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN9 Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

The critical inquiry in deciding whether to extend per se condemnation to conduct which does not fit easily within the limits of previously recognized per se categories is whether the practice facially appears to be one that would always or almost always tend to restrict competition and decrease output.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN10 Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Under the Sherman Act, [15 U.S.C.S. § 1 et seq.](#), departure from the rule-of-reason standard must be based upon demonstrable economic effect.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN11 [blue document icon] Price Fixing & Restraints of Trade, Horizontal Refusals to Deal

The critical question in refusal to deal cases is whether the refusal to deal, manifested by a combination or conspiracy, is so anticompetitive, in purpose or effect, or both, as to be an unreasonable restraint of trade.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN12 [blue document icon] Per Se Rule & Rule of Reason, Sherman Act

Rule of reason analysis under the Sherman Act, [15 U.S.C.S. § 1 et seq.](#), calls for a thorough investigation of the industry at issue and a balancing of the arrangement's positive and negative effects on competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN13 [blue document icon] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

The fact that no competitive benefits are advanced in favor of a restraint does not automatically constitute it unreasonable under the Sherman Act, [15 U.S.C.S. § 1 et seq.](#). It must first be established to be a restraint on competition and this involves a consideration of the impact of the restraint on the competitive conditions within the field of commerce in which the plaintiff was engaged and upon those commercially engaged in competition with it.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

HN14 [blue document icon] Sherman Act, Claims

To establish a cause of action for an unreasonable restraint of trade in violation of the Sherman Act, [15 U.S.C.S. § 1](#), under the rule of reason, the plaintiff must show the following elements: (1) an agreement among two or more persons or distinct business entities; (2) which is intended to harm or unreasonably restrain competition; and (3) which actually causes injury to competition.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Acts & Mental States > Mens Rea > Specific Intent

HN15 [blue icon] Sherman Act, Claims

In order to establish a claim for attempted monopolization under the Sherman Act, [15 U.S.C.S. § 2](#), a plaintiff must show: (1) a specific intent to control prices or destroy competition in the relevant market; (2) predatory or anticompetitive conduct directed to accomplishing this unlawful purpose; and (3) a dangerous probability of success.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN16 [blue icon] Monopolies & Monopolization, Attempts to Monopolize

In an antitrust action, in the absence of direct evidence of specific intent to monopolize, however, the level of proof required to establish the conduct element increases. In this situation, the plaintiff must introduce evidence of conduct amounting to a substantial claim of restraint of trade or conduct clearly threatening to competition or clearly exclusionary.

Counsel: Carl H. Hagens, Seattle, Washington, for Plaintiff-Appellant.

Terrence C. Brown, Seattle, Washington, for Defendants-Appellees.

Judges: Wallace, Anderson, and Schroeder, Circuit Judges.

Opinion by: WALLACE

Opinion

[*1368] WALLACE, Circuit Judge:

Cascade Cabinet Company (Cascade) appeals from a summary judgment. The district court held that Cascade had failed, as a matter of law, to establish a violation of either [section 1](#) or [section 2](#) of the Sherman Act. [15 U.S.C. §§ 1, 2](#). We affirm.

I

Viewing the evidence in the light most favorable to Cascade, we accept as true the following version of the facts. Timberland Industries, Inc. (Timberland)¹ controls a substantial part of the market for modular kitchen and vanity cabinets in western Washington. During a period of remarkable [*1369] success in the late 1970s, Timberland outgrew its cabinet manufacturing plant in Kirkland, Washington and constructed a larger plant in Woodinville, Washington. Timberland vacated the Kirkland plant, and American Prefinish Corporation (American), a manufacturer of interior [**2] millwork and lumber, leased the premises. The president of American, McDonald, was formerly the chairman of the board and president of Timberland. McDonald's brother is currently president of Timberland. Because the new Woodinville plant was constructed with state of the art technology, Timberland left most of the leasehold improvements in the Kirkland plant intact.

¹ While there is some confusion in the record, it was indicated at oral argument that Western Cabinet Company is a division of Timberland and that Timberland is the proper defendant.

Cascade, a newly formed producer of modular kitchen cabinets, obtained its first order in late 1980, a \$330,000 contract which had to be completed in February 1981. Anxious to find a site from which to conduct business, Holan, president of Cascade, visited the Kirkland plant and spoke with McDonald about subleasing the space. The facilities were ideally suited for Cascade's needs because they already contained many improvements required for the manufacture of modular **[**3]** cabinets, such as dust collecting systems, paint booths, fire sprinkling equipment, loading docks, and special wiring.

Negotiations followed, and Holan and McDonald reached an oral agreement upon all material terms. Before they reduced the agreement to writing, however, Timberland intervened. Skutle, president of the Western Cabinet and Millwork division of Timberland, telephoned McDonald and advised him that Timberland would prefer that the abandoned plant not be sublet to Cascade and that Timberland might be interested in leasing the premises again. After the telephone conversation, McDonald told Holan that American would not lease the facilities to Cascade. Holan objected, but to no avail. Cascade alleges that the refusal to lease the premises was motivated by American's desire to maintain the goodwill of Timberland, its largest customer. Timberland did not lease the plant and Cascade alleges Timberland never intended to lease it. Cascade has produced some evidence tending to show that Timberland pressured American not to sublease to Cascade because Timberland did not want a new competitor to gain such an advantageous lease.

Cascade obtained an alternate site, but was **[**4]** unable to take possession until late January and incurred substantial expenses in installing improvements. It fulfilled its order on time, but only by subcontracting out parts of the project at a higher rate than it would have cost had Cascade handled those portions of the project itself. Cascade claims that American's refusal to lease the Kirkland facilities has damaged it in the amount of \$500,000.

Cascade filed this action in federal district court against Timberland, Skutle and his wife, American, and McDonald and his wife. It alleged a concerted refusal to deal and attempted monopolization in violation of [sections 1 and 2](#) of the Sherman Act. Cascade also alleged pendent state claims for violation of Washington antitrust, contract, and tort law. A summary judgment of dismissal as to all claims was entered in favor of the defendants, and Cascade filed a timely notice of appeal. Cascade appeals only the federal antitrust claims. Our jurisdiction rests on [28 U.S.C. § 1291](#).

II

We must determine whether the conduct by Timberland and American in denying Cascade an advantageous lease violated the Sherman Act. **[**5]** [HN1](#)[↑] Summary judgment is appropriate when the moving party demonstrates that there is no genuine issue as to any material fact and that it is entitled to judgment as a matter of law. *E.g., Mutual Fund Investors, Inc. v. Putnam Management Co.*, [553 F.2d 620, 624 \(9th Cir. 1977\)](#) (*Mutual Fund Investors*). [HN2](#)[↑] We must view the evidence in the light most favorable to the party opposing the motion for summary judgment. [Klamath-Lake Pharmaceutical Association v. Klamath Medical Service Bureau](#), [\[*1370\] 701 F.2d 1276, 1281 \(9th Cir. 1983\)](#) (*Klamath-Lake*).

III

We begin by analyzing Cascade's claim under [section 1](#) of the Sherman Act. [Section 1](#), which prohibits concerted activity "in restraint of trade," has been analyzed under both the "rule of reason" and the "per se" rule. [HN3](#)[↑] The rule of reason, "as its name suggests, . . . requires the factfinder to decide whether under all the circumstances of the case the restrictive practice **[**6]** imposes an unreasonable restraint on competition." [Arizona v. Maricopa County Medical Society](#), [457 U.S. 332, 343, 102 S. Ct. 2466, 2472, 73 L. Ed. 2d 48 \(1982\)](#) (footnote omitted). [HN4](#)[↑] The per se rule's conclusive presumption of illegality is not applied to a challenged practice until "experience with [the] particular kind of restraint enables the Court to predict with confidence that the rule of reason will condemn it." *Id. at 344, 102 S. Ct. at 2473*. [HN5](#)[↑] The Supreme Court described the per se violations of the Sherman Act in [Northern Pacific Railway v. United States](#), [356 U.S. 1, 5, 78 S. Ct. 514, 518, 2 L. Ed. 2d 545 \(1958\)](#), as "agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise

harm they have caused or the business excuse for their use." Cascade challenges the defendants' conduct [**7] under both the rule of reason and the per se rule.

A.

Thus far, [HN6](#)¹ the Supreme Court and this court have applied the per se rule to four categories of restraints: horizontal and vertical price fixing, horizontal market division, group boycotts or concerted refusals to deal, and tying arrangements. [A.H. Cox & Co. v. Star Machinery Co., 653 F.2d 1302, 1305 \(9th Cir.1981\)](#); [Gough v. Rossmoor Corp., 585 F.2d 381, 386 \(9th Cir.1978\)](#), cert. denied, 440 U.S. 936, 99 S. Ct. 1280, 59 L. Ed. 2d 494 (1979).² Cascade argues that the defendants' conduct constitutes a concerted refusal to deal.

American did refuse to deal with Cascade in the [**8] sense that it refused to lease Cascade the Kirkland facilities, and we may assume, for purposes of this appeal, that a concert of action between Timberland and American caused this refusal to deal. Cascade and Timberland agree that they are horizontal competitors; Cascade concedes that American is not a horizontal competitor of either Timberland or Cascade. Concerted activity between Timberland and American thus does not fit within the limits of a conventional boycott:

In a conventional boycott, traders at one level (let us say wholesalers) seek to protect themselves from competition from nongroup members who are competing or who are seeking to compete at that level. They do this by taking concerted action aimed at depriving the excluded wholesalers of some trade relationship which they would need to compete effectively at the wholesale level.

L. Sullivan, *Handbook of the Law of Antitrust* 230 (1977).

In prior cases, we limited the per se rule against concerted refusals to deal to concerted activity between two or more horizontal competitors and refused to apply the rule to concerted activity between vertically related companies, even though one of them [**9] may have been the plaintiff's horizontal competitor. For example, in *Gough v. Rossmoor Corp.* a single horizontal competitor (Crestmark) of the plaintiff (Rosen) in the market for selling carpets to residents of Rossmoor Leisure World, a housing development for retired adults, conspired with the publisher of the Leisure World News, a [*1371] community newspaper, to prevent Rosen from advertising in the paper. Although the plan was clearly intended to harm Crestmark's competitor, we analyzed the practice as follows:

Such concert of action may suffice to create a conspiracy but it cannot suffice to constitute such a concerted refusal to deal as has so far been held to be *per se* unreasonable. In all cases so far holding such restraints to be *per se* unreasonable, there has been some horizontal concert of action taken against the victims of the restraint. In [Mutual Fund Investors v. Putnam Management Co., supra](#), this court rejected the contention that the refusal to deal there under fire constituted a *per se* illegal group boycott, stating "At issue is an alleged conspiracy among vertically integrated organizations and [**10] agreements among them are not *per se* illegal." [553 F.2d at 626](#).

[585 F.2d at 387](#) (footnote omitted).

Not surprisingly, defendants rely on *Gough v. Rossmoor Corp.* Although we have stated that vertical concert of activity is not *per se* unreasonable, some recent cases have carved out a limited exception to this rule. Recently, we stated that "to establish a *per se* violation of [section 1](#) [for refusal to deal], a plaintiff *generally* must show that the defendant engaged in concerted anticompetitive activity with others at the same level of market organization." [General Business Systems v. North American Philips Corp., 699 F.2d 965, 978 \(9th Cir.1983\)](#) (*General Business Systems*) (emphasis added). The word "generally" is significant because we then stated that a refusal to deal instigated by a single horizontal competitor and a vertically related company, in appropriate circumstances, may come within the *per se* rule:

² For a list of the Supreme Court precedents in each category, see [Gough v. Rossmoor Corp., 585 F.2d 381, 386](#) nn. 3-6 (9th Cir.1978), cert. denied, [440 U.S. 936, 99 S. Ct. 1280, 59 L. Ed. 2d 494](#) (1979).

HN8 [↑] Restraints solicited by a distributor but implemented [**11] by a manufacturer are not automatically per se violations. [\[A. H. Cox & Co. v. Star Machinery Co., 653 F.2d at 1302, 1306 \(9th Cir. 1981\)\]](#). Restraints of this type come within the per se rule only if they "clearly had, or [were] likely to have, a pernicious effect on competition and lacked any redeeming virtue." [Ron Tonkin Gran Turismo, Inc. v. Fiat Distributors, 637 F.2d 1376, 1386-87](#) (9th Cir.), cert. denied, 454 U.S. 831, 102 S. Ct. 128, 70 L. Ed. 2d 109 (1981), see, e.g., [Betaseed, Inc. v. U & I Inc., 681 F.2d 1203, 1235 \(9th Cir. 1982\)](#).

[General Business Systems, 699 F.2d at 978.](#)

The per se rule should never be applied automatically when the concerted refusal to deal is vertical rather than horizontal. See [A. H. Cox & Co. v. Star Machinery Co., 653 F.2d at 1306](#). Indeed, generally, it will not be applied. [General Business Systems, 699 F.2d at 978](#). To determine whether a case fits within the limited exception to the general rule, we must ask whether the particular restraint has such a "pernicious effect on competition and [is so lacking] [**12] of any redeeming virtue." [Northern Pacific Railway v. United States, 356 U.S. at 5, 78 S. Ct. at 518](#), that the conclusive presumption of the per se rule is warranted.

Following the guidelines we established in [Northrop Corp. v. McDonnell Douglas Corp., 705 F.2d 1030](#), Slip op. at 910 (9th Cir. 1983) (*Northrop*), we conclude that it is inappropriate to apply the per se rule to the circumstances of this case. **HN9** [↑] The critical inquiry in deciding whether to extend per se condemnation to conduct which does not fit easily within the limits of previously recognized per se categories is whether the "practice facially appears to be one that would always or almost always tend to restrict competition and decrease output." [Northrop, 705 F.2d at 1052](#), Slip op. at 936, quoting [Broadcast Music, Inc. v. Columbia Broadcasting System, Inc., 441 U.S. 1, 19-20, 99 S. Ct. 1551, 1562, 60 L. Ed. 2d 1 \(1979\)](#). In conducting this inquiry, we follow the Supreme Court's admonition that "**HN10** [↑] [**13] departure from the rule-of-reason standard must be based upon demonstrable economic effect . . ." [Northrop, 705 F.2d 1052](#), Slip op. at 936, quoting [Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 58-59, 97 S. Ct. 2549, 2562, 53 L. Ed. 2d 568 \(1977\)](#).

[*1372] It is at this juncture that Cascade fails in its bid to establish a per se violation of [section 1](#) of the Sherman Act. Cascade has failed to show any adverse effect upon competition. It is undisputed that Cascade was able to enter the market for modular kitchen cabinets and even completed its first contract on time. Although Cascade claims damages as a result of the conduct of American and Timberland, injury to a single competitor does not constitute injury to competition. E.g., [Klamath-Lake, 701 F.2d at 1292](#); [Gough v. Rossmoor Corp., 585 F.2d at 386](#); cf. [Murphy Tugboat Co. v. Crowley, 658 F.2d 1256, 1259 \(9th Cir. 1981\)](#) (holding that plaintiff's injury was not the result of conduct forbidden by the antitrust laws), cert. denied, 455 U.S. 1018, 102 S. Ct. 1713, 72 L. Ed. 2d 135 (1982). Cascade does not [**14] allege that it was unable to lease other commercial space or that Timberland interfered with its attempts to lease other space. Indeed, Cascade does not allege that Timberland had market power in the real estate market. To apply the per se rule, we would have to conclude that Timberland's successful effort to prevent Cascade from leasing the Kirkland plant is the kind of restraint that "facially appears to be one that would always or almost always tend to restrict competition and decrease output." [Northrop, 705 F.2d at 1052](#), Slip op. at 936, quoting [Broadcast Music, Inc. v. Columbia Broadcasting System, Inc., 441 U.S. at 19-20, 99 S. Ct. at 1562](#). We cannot make such a generalization, particularly in a case in which no harm to competition is shown.

Even if Cascade had shown that the restraint had injured competition, we would be reluctant to apply the per se rule because of the lack of judicial experience with the challenged conduct. "It is only after considerable experience with certain business relationships that courts classify them as per se violations." [Broadcast Music, Inc. v. Columbia Broadcasting System, Inc., 441 U.S. at 9, 99 S. Ct. at 1557](#); [**15] quoting [United States v. Topco Associates, Inc., 405 U.S. 596, 607-08, 92 S. Ct. 1126, 1133, 31 L. Ed. 2d 515 \(1972\)](#).

Cascade argues that it need not prove anticompetitive effect and that it is sufficient to show anticompetitive purpose. We have stated that "**HN11** [↑] the critical question in refusal to deal cases is 'whether the refusal to deal, manifested by a combination or conspiracy, is so anticompetitive, in purpose or effect, or both, as to be an unreasonable restraint of trade.'" [Mutual Fund Investors, 553 F.2d at 626](#), quoting [Alpha Distributing Co. v. Jack Daniel Distillery, 454 F.2d 442, 452 \(9th Cir. 1972\)](#). Cascade, however, misperceives the meaning of this statement.

When the plaintiff establishes that the defendants engaged in conduct clearly falling within one of the categories to which the per se rule applies, it is not necessary to show actual anticompetitive effect; such effect is presumed. See *Northern Pacific Railway v. United States*, 356 U.S. at 5, 78 S. Ct. at 518. Thus, in establishing that the challenged [**16] conduct fits within one of the per se categories, it is often enough for the plaintiff to show that the defendants acted with anti-competitive purpose or, in other words, that the defendants intentionally engaged in conduct which, if carried out as planned, would always or almost always adversely affect competition, thus warranting application of the per se rule. Cf. *Joseph E. Seagram & Sons, Inc. v. Hawaiian Oke & Liquors, Ltd.*, 416 F.2d 71, 76-78 (9th Cir. 1969) (interpreting anticompetitive purpose as acting with the objective to accomplish some anticompetitive effect), cert. denied, 396 U.S. 1062, 90 S. Ct. 752, 24 L. Ed. 2d 755 (1970). Although Timberland may have acted with the motive of making things difficult for Cascade, such subjective intent does not constitute anticompetitive purpose within the meaning of our prior cases.

None of the cases cited by Cascade supports application of the per se rule to these circumstances. The group boycott in *Com-Tel, Inc. v. DuKane Corp.*, 669 F.2d 404 (6th Cir. 1982), injured competition by eliminating one of the companies who wanted to compete on the bid for a school project. *Id. at 409*. [**17] The conspiracy alleged in *Klor's, Inc. v. Broadway-Hale Stores, Inc.*, 359 U.S. 207, 79 S. Ct. 705, 3 L. Ed. 2d 741 (1959), also was shown to have an adverse effect on competition because it effectively eliminated the plaintiff from the relevant market. Likewise, in *Cernuto, Inc. v. United Cabinet Corp.*, 595 F.2d 164 (3d Cir. 1979), the court found that the refusal to deal eliminated a competitor at the retail level of the relevant market and that the motivating factor of the conspiracy was to reduce price competition. *Id. at 168*.

B.

Conduct that is not conclusively presumed to be illegal under the per se rule must be proved to be unreasonable under the rule of reason test. **HN12**[¹⁵] Rule of reason analysis calls for a "thorough investigation of the industry at issue and a balancing of the arrangement's positive and negative effects on competition." *Northrop*, 705 F.2d 1050, slip op. at 934. Cascade argues that material issues of fact remain and that the district court erred in granting summary judgment against [**18] it on its *section 1* claim under the rule of reason. Because no competitive benefits can be asserted on behalf of a conspiracy to deny a new competitor an advantageous lease, Cascade argues that the competitive evils of the restraint outweigh the competitive benefits and that it was therefore entitled to have the jury rule on its *section 1* claim under the rule of reason. We rejected this very argument in *Gough v. Rossmoor Corp.*:

HN13[¹⁶] The fact that no competitive benefits are advanced in favor of a restraint . . . does not automatically constitute it unreasonable under the Sherman Act. As we have already noted, it must first be established to be a restraint on competition and this involves a consideration of the impact of the restraint on the competitive conditions within the field of commerce in which the plaintiff was engaged and upon those commercially engaged in competition with it.

585 F.2d at 389. The balancing process of the rule of reason is not applied to a particular agreement or practice until after the plaintiff has established that the challenged [**19] conduct constitutes a restraint on competition. *Id.* **HN14**[¹⁷] To establish a cause of action for an unreasonable restraint of trade in violation of *section 1* under the rule of reason, the plaintiff must show the following elements: "(1) an agreement among two or more persons or distinct business entities; (2) which is intended to harm or unreasonably restrain competition; and (3) which actually causes injury to competition." *Reid Brothers Logging Co. v. Ketchikan Pulp Co.*, 699 F.2d 1292, 1296 (9th Cir. 1983).

Cascade's attempt to establish a rule of reason violation fails for the same reason as its attempt to establish a per se violation: there is no evidence of injury to competition. Although Cascade complains of its business losses, economic injury to a competitor does not equal injury to competition. See *Klamath-Lake, 701 F.2d at 1292*; *Mutual Fund Investors, 553 F.2d at 627*. We have stressed that "it is injury to the market, not to individual firms, that is significant." *Klamath-Lake, 701 F.2d at 1292*. We hold that [**20] Cascade has failed to produce sufficient evidence to prevent summary judgment against it on its *section 1* claim.

IV

Cascade's final argument is that the district court erred in awarding summary judgment against it on its claim for attempted monopolization in violation of *section 2* of the Sherman Act. *HN15* [↑] In order to establish a claim for attempted monopolization, a plaintiff must show (1) a specific intent to control prices or destroy competition in the relevant market, (2) predatory or anticompetitive conduct directed to accomplishing this unlawful purpose, and (3) a dangerous probability of success. *Foremost Pro Color, Inc. v. Eastman Kodak Co., 703 F.2d 534, 543-44 (9th Cir.1983)* (*Foremost*); *Janich Brothers, Inc. v. American Distilling Co., 570 F.2d 848, 853 (9th Cir.1977)*, cert. denied, 439 U.S. 829, 99 S. Ct. 103, 58 L. Ed. 2d 122 (1978) (*Janich Brothers*).

[*1374] Cascade attempts to prove the required specific intent by direct evidence as well as by inference from the challenged conduct. Cascade's direct evidence does [**21] not show that Timberland had a specific intent to control prices or destroy competition. Although the facts, viewed most favorably to Cascade, show that Timberland may have been motivated by a desire to prevent a new competitor from leasing its abandoned plant, such an intent falls short of the requisite intent to monopolize. The single act of excluding Cascade from the vacant Kirkland facilities did not prevent Cascade from entering the market.

The conduct element of an attempted monopolization claim is closely related to the other two elements. Certain types of conduct may be relied upon to imply the necessary intent and dangerous probability of success. *Foremost, 703 F.2d at 544*; *Janich Brothers, 570 F.2d at 853-54*. *HN16* [↑] In the absence of direct evidence of specific intent to monopolize, however, the level of proof required to establish the conduct element increases. In this situation, the "plaintiff must introduce evidence of conduct amounting to a substantial claim of restraint of trade or conduct clearly threatening to competition or clearly exclusionary. [**22]" *William Inglis & Sons Baking Co. v. ITT Continental Baking Co., 668 F.2d 1014, 1030 (9th Cir.1981)* (footnote omitted), cert. denied, 459 U.S. 825, 103 S. Ct. 57, 74 L. Ed. 2d 61, 103 S. Ct. 58 (1982). Our analysis under this standard proceeds generally under the standards developed in Sherman Act *section 1* cases.³ As we have already pointed out, Cascade has failed to establish a substantial claim of restraint of trade. Thus, even if the challenged practice could satisfy the conduct element of attempted monopolization, it cannot supply an inference of the other two elements. Summary judgment was therefore appropriate.

[**23] In conclusion, we find no genuine issues of material fact relating to Cascade's antitrust claims under the Sherman Act. The antitrust laws were not intended to reach the type of conduct of which Cascade complains. The Sherman Act was enacted to protect competition in the marketplace. See *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 82 S. Ct. 1502, 1521, 8 L. Ed. 2d 510 (1962)*; *Murphy Tugboat Co. v. Crowley, 658 F.2d at 1259*. It was not designed, and has never been interpreted, to reach all business practices, unfair or otherwise, damaging to individual companies. The district court correctly granted the defendants' motion for summary judgment.

AFFIRMED.

³We depart from the standards under *section 1* to the extent necessary to evaluate the conduct of a single firm that would escape liability under *section 1* because of that section's limitation to concerted or contractual activity. When, as here, the plaintiff challenges concerted activity, and we hold that the conduct does not amount to a substantial claim of restraint of trade under *section 1*, our holding precludes us from finding that the conduct is the type of conduct necessary to support an inference of the other two elements of an attempted monopolization claim under *section 2*. See *Foremost Pro Color, Inc. v. Eastman Kodak Co., 703 F.2d 534, 544 (9th Cir.1983)*; *California Computer Products, Inc. v. IBM Corp., 613 F.2d 727, 736 (9th Cir.1979)*; *Janich Brothers, Inc. v. American Distilling Co., 570 F.2d 848, 853-54 (9th Cir.1977)*, cert. denied, 439 U.S. 829, 99 S. Ct. 103, 58 L. Ed. 2d 122 (1978).

Opinion

[*944] SEYMOUR, Circuit Judge.

Plaintiffs Colorado High School Activities Association, Boulder Valley School District No. RE-2, and Jefferson County School District No. R-1 (hereinafter collectively referred to as CHSAA) brought this action alleging that defendants' television broadcasts of particular professional football games in 1977, 1978, and 1979 were antitrust

* Honorable William H. Timbers, Senior Judge, United States Court of Appeals for the Second Circuit, sitting by designation.

violations under [section 2](#) of the Sherman Act, [15 U.S.C. § 2 \(1976\)](#), and the Colorado Restraint of Trade and Commerce Act, [Colo. Rev. Stat. § 6-4-101](#) (1973). Defendants are the National Football League, Commissioner Pete Rozelle, CBS, National Broadcasting Company, McGraw-Hill Broadcasting Company, and General Electric Broadcasting Company of Colorado (hereinafter collectively referred to as the NFL). The district court granted the NFL's motion for summary judgment, concluding that CHSAA had failed to state a claim under the federal statute. [Colorado \[**3\] High School Activities Association v. National Football League, 524 F. Supp. 60, 63 \(D. Colo. 1981\)](#). We affirm.

The disposition of this case requires us to construe a term found in a statutory limitation to the antitrust exemption for joint professional football television broadcast agreements.¹ The antitrust exemption, [15 U.S.C. § 1291 \(1976\)](#),² enables the member clubs of a professional football league "to pool their separate rights in the sponsored telecasting of their games and to permit the league to sell the resulting package of pooled rights to a purchaser, such as a television network, without violating the antitrust laws." S. Rep. No. 1087, 87th Cong., 1st sess., *reprinted in* 1961 U.S. Code Cong. & Ad. News 3042, 3042. However, this exemption is limited by [15 U.S.C. § 1293 \(1976\)](#), which was enacted to prevent such package contracts from impairing "college football gate receipts through network telecasts of professional football games at times when college games are normally played." *Id.* The limitation in [section 1293](#) was extended to cover interscholastic high school football games in 1966. [**4] [Section 1293](#) provides in relevant part:

HN1[] "The first sentence of [section 1291](#) of this title shall not apply to any joint agreement described in such section which permits the telecasting of all or a substantial part of any professional football game on any Friday after six o'clock postmeridian or on any Saturday during the period beginning on the second Friday in September and ending on the second Saturday in December in any year from any telecasting station located within seventy-five miles of the *game site* of any intercollegiate or interscholastic football contest scheduled to be played on such a date if --

...

[*945] (2) in the case of an interscholastic football contest, such contest is between secondary schools, both of which are accredited or certified under the laws of the State or States in which they are situated and offer courses continuing through the twelfth grade of the standard school curriculum, or the equivalent, and

(3) such intercollegiate or interscholastic football contest and such *game site* were announced through publication in a newspaper of general [**5] circulation prior to August 1 of such year as being regularly scheduled for such day and place."

¹ For a general discussion of the events culminating in the enactment of this legislation, see [WTWV, Inc. v. National Football League, 678 F.2d 142, 144 \(11th Cir. 1982\)](#).

² [Section 1291](#) provides:

HN2[] "The antitrust laws, as defined in section 1 of the Act of October 15, 1914, as amended (38 Stat. 730) [[15 U.S.C. 12](#)], or in the Federal Trade Commission Act, as amended (38 Stat. 717) [[15 U.S.C. 41 et seq.](#)], shall not apply to any joint agreement by or among persons engaging in or conducting the organized professional team sports of football, baseball, basketball, or hockey, by which any league of clubs participating in professional football, baseball, basketball, or hockey contests sells or otherwise transfers all or any part of the rights of such league's member clubs in the sponsored telecasting of the games of football, baseball, basketball, or hockey, as the case may be, engaged in or conducted by such clubs. In addition, such laws shall not apply to a joint agreement by which the member clubs of two or more professional football leagues, which are exempt from income tax under [section 501\(c\)\(6\) of the Internal Revenue Code of 1954](#) [[26 U.S.C. 501\(c\)\(6\)](#)], combine their operations in expanded single league so exempt from income tax, if such agreement increases rather than decreases the number of professional football clubs so operating, and the provisions of which are directly relevant thereto."

15 U.S.C. § 1293 (emphasis added). At issue in this case is the construction of the term "game site" as used in this statute.

[**6] In 1977, CHSAA attempted to comply with the requirements of section 1293(3) by timely publishing an announcement that the Colorado state 4A football championship would be played "in Denver" on the second Saturday in December. In fact, the game was played in Boulder. In 1978 and 1979, CHSAA announced that the "game site" would be "in the Denver metropolitan area." The 1978 game was held in Boulder and the 1979 game in Lakewood, both on the second Saturday in December. Professional football games were telecast in the Denver area on all three Saturdays.

CHSAA contends that it identified the game site with sufficient specificity to invoke the limitation provided in section 1293, and that the broadcasts of the professional football games were therefore not exempt from the antitrust laws under section 1291. It points out that the championship games have traditionally been played on the home field of one of the finalists. Under the CHSAA playoff system, the championship finalists are not known until shortly before the final game is to be played. Thus CHSAA argues that it gave the best game site designation possible by August 1 of the relevant years. It vigorously asserts that a statutory [**7] construction requiring a more specific game site identification than CHSAA is able to give would frustrate the Congressional purpose of protecting high school football gate receipts.

Defendants contend that the plain meaning of "game site" is the particular location where the game is to be played. They argue that this meaning is required by the function that "game site" plays in the statutory scheme, and that there is no legislative history supporting a contrary construction. The district court agreed, holding that "the term 'game site' is as plain, common and clear as the term 'construction site' in a mechanics lien case or 'work site' in a labor dispute." 524 F. Supp. at 62.

This is a case of first impression. Resolution of the issue is governed by well-established principles of statutory construction. "In HN3[[↑]] determining the scope of a statute, we look first to its language. If the statutory language is unambiguous, in the absence of 'a clearly expressed legislative intent to the contrary, that language must ordinarily be regarded as conclusive.'" United States v. Turkette, 452 U.S. 576, 580, 69 L. Ed. 2d 246, 101 S. Ct. 2524 (1981) [**8] (quoting Consumer Product Safety Commission v. GTE Sylvania, Inc., 447 U.S. 102, 108, 64 L. Ed. 2d 766, 100 S. Ct. 2051 (1980)). "A HN4[[↑]] fundamental canon of statutory construction is that, unless otherwise defined, words will be interpreted as taking their ordinary, contemporary, common meaning." Perrin v. United States, 444 U.S. 37, 42, 62 L. Ed. 2d 199, 100 S. Ct. 311 (1979).

"Site" is defined as "the scene of an action . . . or specified activity," *Webster's Third New International Dictionary* 2129 (1976), or "the area or plot of ground on which anything has been or is to be located." *The Random House College Dictionary* 1230 (rev. ed. 1980). Therefore, the common sense, unambiguous meaning of "game site" is that particular football field or stadium where the game is to be played. This construction fulfills the function which "game site" is to perform in the statutory scheme, i.e., to provide a specific, fixed point from which to establish the 75-mile blackout radius.

We find no clearly expressed legislative intent contrary to this plain meaning. [**9] Indeed, the legislative history does not address the issue, presumably because Congress [^{*946}] did not consider the peculiar facts now before us. We note that "the HN5[[↑]] plain words and meaning of a statute cannot be overcome by a legislative history which, through strained processes of deduction from events of wholly ambiguous significance, may furnish dubious bases for inference in every direction. " Ex Parte Collett, 337 U.S. 55, 61, 93 L. Ed. 1207, 69 S. Ct. 944 (1949) (quoting Gemsco, Inc. v. Walling, 324 U.S. 244, 260, 89 L. Ed. 921, 65 S. Ct. 605 (1945)); see TVA v. Hill, 437 U.S. 153, 184 n.29, 98 S. Ct. 2279, 57 L. Ed. 2d 117 (1978).

In sum, we are not inclined to ignore the plain meaning of the statute and readjust the balance of competing interests struck by Congress. See, e.g., TVA v. Hill, 437 U.S. at 194-95. The judgment is affirmed.

Judges: Greene, J.

Opinion by: GREENE

Opinion

[***114] [*1061] Section I(A) of the decree entered on August 24, 1982, provides that "[not] later than six months after the effective date of [the decree], defendant AT&T shall submit to the Department of Justice for its approval, and thereafter implement, a plan of reorganization," and section VIII(J) specifies that the plan of reorganization "shall not be implemented until approved by the Court as being consistent with the provisions and principles of the decree." In accordance with these provisions, AT&T has submitted its plan to the Court following approval by the Department of Justice.¹ The intervenors were thereafter given the opportunity to raise objections; a considerable number of such objections were, in fact, filed with the Court; and AT&T and the Department of Justice, in turn, filed their own responses.

Following receipt of these papers, the [***2] Court designated certain issues for more intensive briefing and for oral argument.² Voluminous briefs were received on these issues, and argument was had thereon on June 2, 1983.

³ [***3] At that hearing, the Court [*1062] also heard testimony from three of the designated chief executives⁴ of the seven newly-established Regional Companies.⁵ Additional documents were submitted after the hearing, including one -- a letter with attachments from AT&T (see slip op. at p. 16 *infra*) -- as late as June 29, 1983.

[**4] The Court has considered all issues raised with respect to the plan of reorganization on [***115] the basis of the written materials, the oral hearing, the testimony, and the entire record herein, and it has concluded that the plan of reorganization will be approved⁶ [***5] provided that certain inconsistencies with the provisions and principles of the decree are corrected.⁷

¹ The Department required certain modifications which AT&T accepted.

² The Court, of course, considered all the provisions of the plan, including those which were not set down for hearing.

³ The four issues addressed by counsel were the allocation of the costs of equal access, the distribution of contingent liabilities arising from antitrust suits against AT&T, assignment of the Bell name and logo, and assignment of patents. Three opponents of the plan of reorganization focused on the first two issues: MCI Communications Corp., the Church of Christ *et al.*, and the National Association of Regulatory and Utility Commissioners (NARUC); three opponents focused on the last two issues: Tandy Corp., Black Citizens for a Fair Media *et al.*, and NARUC. AT&T and the Department of Justice argued in favor of the plan of reorganization on all four issues.

⁴ Zane Barnes, chief executive-designate of the Southwestern Region, testified about the costs of equal access and the assignment of switching systems. William Weiss, chief executive-designate of the Midwest Region, testified about the apportionment of contingent liabilities and the proposed Central Staff Organization. Thomas Bolger, chief executive-designate of the Mid-Atlantic Region, testified about assignment of the Bell name and logo, and assignment of patents.

⁵ The seven Regional Companies will be holding companies for the twenty-two Bell Operating Companies. The Northeast Region will include New England Telephone Co. and New York Telephone Co. The Mid-Atlantic Region will include New Jersey Bell Telephone Co., the Bell Telephone Company of Pennsylvania, the Diamond State Telephone Company, and the Chesapeake and Potomac Telephone Companies of Washington, D.C., Virginia, Maryland, and West Virginia. The Southern Region will include Southern Bell Telephone and Telegraph Co. and South Central Bell Telephone Company. The Midwest Region will include the Ohio Bell Telephone Co., Michigan Bell Telephone Co., Indiana Bell Telephone Co., Illinois Bell Telephone Co., and Wisconsin Telephone Co. The Mountain-Northwest Region will include Northwestern Bell Telephone Co., the Mountain States Telephone and Telegraph Co., and Pacific Northwest Bell Telephone Co. The Far West Region will include the Pacific Telephone and Telegraph Co. and Bell Telephone Company of Nevada. The Southwest Region will include Southwestern Bell Telephone Co. Although the Regional Companies have been identified by geographic designations throughout these proceedings, they will subsequently be adopting formal corporate names. For instance, the Northeast Region has announced that it will call itself NYNEX, while the Mountain-Northwest Region has chosen U.S. West. Except where the distinction appears to be significant, the Regional Companies and the Operating Companies will be referred to herein as the Operating Companies.

⁶ On April 20, 1983, the Court tentatively approved the Local Access and Transport Areas (LATAs) within which the Operating Companies' telecommunications services will be confined. See *United States v. Western Electric Co. and American Telephone & Telegraph Co.*, 569 F. Supp. 990 (D.D.C. 1983). The LATA applications were technically the first phase of the plan of reorganization. The parties proposed, and the Court accepted, that review of the plan of reorganization be undertaken in two

I

Equal Access

The decree requires the Operating Companies to "provide to all interexchange carriers and information service providers exchange access, information access, and exchange services for such access . . . that is equal in type, quality, and price to that provided to AT&T and its affiliates." Section II(A).⁸ As the stepping stone to increased competition in the field of intercity telecommunications, the decree's equal access requirements and the implementing provisions of the plan of reorganization have generated substantial controversy. Comments filed by Operating Company executives, interexchange carriers, regulatory [*1063] commissions, consumer groups, and telecommunications associations indicate that at this stage of the proceedings⁹ there is a need to resolve three primary questions relating to equal access:¹⁰ what is it, how is it to be achieved, and who will pay for it? [**6]

[**7] A. *What Does "Equal" Mean?*

A number of the Operating Companies propose to connect AT&T's interexchange competitors to the homes or businesses of local telephone subscribers by using facilities built or upgraded specially for that purpose; AT&T, on the other hand, will in numerous LATAs gain access to subscriber lines through different facilities, many of which are already extant.¹¹ For that reason, the access provided AT&T's competitors will not be identical to that given AT&T in all places; rather, it will be technically different in certain areas and at certain times.

The Operating Companies assert that any such technical deviations will be so slight as to be imperceptible to all customers, whether [**8] of voice or of data.¹² Accordingly, they [HN1](#) urge the Court to accept a definition of "equal access" as access whose "overall quality in a particular area is equal within a reasonable range which is applicable to all carriers,"¹³ and to reject a more stringent definition which would demand access that yields

stages for the sake of speed and convenience and because the drawing of geographic boundaries naturally preceded any division of assets between AT&T and the Operating Companies. Remaining issues with respect to the LATAs are considered in Part VII *infra*.

⁷ Both AT&T and the Department have filed motions for approval of the plan of reorganization. Those motions will be acted upon after the required modifications are submitted to the Court.

⁸ The equal access obligation takes effect on September 1, 1984, and it will be phased in over a two-year period. By September 1, 1985, the Operating Companies must provide equal access to one-third of their respective access lines, and by September 1, 1986, to the remaining access lines. See Appendix B to the decree.

⁹ Under Section II(C) of the decree, the Operating Companies are not required to file their precise plans for providing equal access until six months after divestiture. That date may be unrealistically late because much of the preparation that must be completed by September 1984 cannot be undertaken by the Operating Companies until they are told whether their initial plans are acceptable. See Response of the United States to Public Comments and Action on AT&T's Proposed Plan of Reorganization, filed March 24, 1983 (hereinafter Department of Justice Response to Comments) at 187-88.

¹⁰ These issues bear, *inter alia*, on the assignment of assets and liabilities between AT&T and the Operating Companies, and they are therefore properly considered as part of the plan of reorganization.

¹¹ In only one of the seven telephone regions will this not occur. In the Northeast Region, which encompasses New York and New England, AT&T and its competitors will be served from the same switches in the same LATAs. Response of the Northeast Region to the Court's May 17, 1983 Memorandum at 2 n. **.

¹² It is asserted that even the interexchange carriers will not be able to detect any qualitative difference.

¹³ Statement of the Operating Companies Supplementing their Responses to the Court's Memorandum of May 17, 1983 Regarding the No. 4ESS Switching Systems (hereinafter Operating Company Supplement) at 2.

identical [***116] technical quality (*i.e.*, identical values for loss, noise, and echo, and identical possibility of blocking).¹⁴

[**9] The Court accepts the Operating Companies' definition and will not insist on absolute technical equality. To do otherwise would necessitate substantial dismantling and reconstruction of local telephone networks without any real benefits either to the consuming public or to AT&T's intercity competitors. This ruling, however, is based squarely upon the Operating Companies' representations that both voice and data customers will perceive no qualitative differences between AT&T transmissions and those of its competitors -- at least with respect to those portions of the transmissions carried by an Operating Company.¹⁵ The Operating Companies are well aware, however, that the Department of Justice will be monitoring the quality of the access they will provide and that the price of falling short of their assurance of equal quality will be enforcement proceedings brought by the Department.¹⁶

[**10] [*1064] The interexchange competitors, as noted, would not be disadvantaged if the Operating Companies meet the standard they have proposed. Their real complaint is that the Operating Companies will be unable to meet that standard in many of the LATAs by the means they propose¹⁷ -- a subject to which the Court now turns.

B. Which Switches Should Be Used for Access Arrangements?

First. Since the initial comments were filed regarding the first, or LATA, phase of the plan of reorganization, a number of intervenors have expressed concern over the kinds of switches the Operating Companies will use to route traffic from an interexchange carrier's point of presence in a LATA to a local Class 5 end office.¹⁸

[**11] The Court initially shared this concern, primarily because so little information about equal access planning for individual LATAs had been made available. In May of 1983, it therefore requested the Regional Companies to report in detail regarding their plans for equal access and their need in this respect for the efficient, state-of-the-art No. 4ESS switches.¹⁹ [**12] The Court asked to be apprised of any instances where an Operating Company

¹⁴ The Operating Companies state that identical per call access would be impossible, even if a uniform access configuration were imposed in each LATA, because of "normal variations of electrical characteristics of facility components and installation line-up variations . . ." Operating Company Supplement at 3.

¹⁵ The Operating Companies are not responsible, of course, for correcting any quality deficiencies that may result from an interexchange carrier's own facilities.

¹⁶ See Department of Justice Response to Comments at 187.

¹⁷ The skepticism of the interexchange competitors relates largely to the kinds of switches the Operating Companies will employ to connect the competing interexchange networks with the local Operating Company networks. See [569 F. Supp. 990](#).

¹⁸ An end office is the plant into which individual subscribers' telephone access lines feed. It is typically the point of concentration of telecommunications traffic closest to the subscriber -- *i.e.*, the point of origination or termination -- and it is decidedly local in character and function. In the Bell System hierarchy of functions, this is the facility which performs the Class 5 function, meaning that from the Class 5 end office a call is either routed directly to another end office through a Class 5 trunk (a "local" call) or it is routed to a Class 4 facility for interconnection with the "toll" network. In a number of sites, the Class 4 and Class 5 functions are located in the same facility. Under the plan of reorganization, all such facilities will be owned by the Operating Companies because of the local nature of the Class 5 function. Plan of reorganization at 16-17.

¹⁹ There are 91 such switches in the Bell System. They were first introduced in 1976 and are large, four-wire digital switches with the capacity to handle almost 700,000 call attempts per hour. Memorandum of the Midwest Regional Holding Company, May 31, 1983, at 3. The DMS-200, DMS-100/200, and the No. 5ESS switches are smaller than the No. 4ESS, but they "provide equivalent transmission and switching characteristics as the No. 4ESS." Response of Donald E. Guinn to the Court's Memorandum of May 17, 1983, at 3 n. *. These four switches are the most advanced of all switches in use today.

* To the extent that network reconfiguration costs relate to the BOCs' provision of other services (such as intra-LATA toll), rather than to carrier access services, the BOCs will be required to include such costs in tariffs for those other services which are filed

believed that a particular switch should be assigned to it for equal access purposes even though that switch would belong to AT&T under the predominant use test.²⁰ The responses [***17] were extremely helpful. Their detail and the varied recommendations made with respect to each region revealed that, contrary to some speculation, the Operating Companies had carefully studied the alternatives for the provision of access within their respective territories, and that they had concluded, independent of pressure from AT&T, which arrangements would be most economical and efficient for them.

Most of the LATAs will be served by four-wire digital tandems, [**13]²¹ [**14] if not in 1984, [*1065] then within two years.²² The Operating Companies are not planning to make as much use of the existing No. 4ESS switches, however, as might have been anticipated. The basis of that choice appears reasonable.

Because of the large capacity of the No. 4ESS switch, the cost to an Operating Company of leasing part of it would be, in most cases, greater than would be that of constructing a smaller-scale switch directly for that company. The other alternative -- vesting ownership of the No. 4ESS switch in the Operating Company, in the expectation that it will be able to lease substantial capacity to AT&T -- is problematic in many cases because AT&T may choose instead to build a new switch (and even if it did not, it would be required in any event under the plan to terminate the lease after eight years). In either event, the Operating Company would thus be left with the expense of stranded capacity.

For these reasons, the Operating [**15] Companies will instead engage in a substantial amount of new construction, and they have persuaded the Court that this is an appropriate decision. In some instances they will thereby be merely accelerating construction which would have occurred in any event, and new construction, as opposed to leasing, will have the advantage of facilitating network separation between AT&T and the Operating Companies.

Given the care which went into the Operating Companies' studies, the Court will not second-guess them by imposing upon them an assignment of switches which they do not endorse. The Court therefore rejects the position

and allowed to become effective in accordance with this proviso, and any amounts thus recovered shall count toward reimbursement of the BOCs' costs of network reconfiguration.

²⁰ Bell System assets will be distributed according to the function they perform. [552 F. Supp. at 206](#). Those assets performing exchange and exchange access functions will be owned by the Operating Companies; those performing interexchange functions by AT&T and its affiliates. Section I(A)(1). About eighty percent of the Bell System's assets perform one function or the other and hence are classifiable with relative ease. The remaining 20 percent are multifunction assets, providing both exchange and interexchange services. The government proposed, and the Court accepted, that the predominant use test be applied to these assets, that is, the asset will be assigned to the entity whose use predominates. [552 F. Supp. at 207](#). The Court noted, however, that in certain cases the test would be inappropriate ([552 F. Supp. at 207 n.317](#)) as where a facility primarily used in connection with interexchange services was necessary for the provision of equal access by an Operating Company. See [552 F. Supp. at 200-01](#); section VIII(G) of the decree.

²¹ These are the advanced switches of the type described in note 19 *supra* and are the switches most readily connected to the four-wire trunks which the interexchange carriers primarily use in their own networks. Pacific and Nevada Bell will use "state of the art digital, four-wire tandems for more than 99 percent of [their] requirements." Response of Donald E. Guinn at 8 n. *. This appears to be true for New York and New England as well. In the remaining five regions, it appears that all switches to be constructed will be four-wire digital tandems. Only in a relatively small number of LATAs do the companies propose to provide access via two-wire switches. This, and the fact that the Department of Justice will continue to study whether two-wire switches can provide suitable access, largely moots the concerns of Satellite Business Systems, Southern Pacific Communications Corp., and MCI Communications Corp. that the Operating Companies would make larger scale use of two-wire switches, necessitating the use of adapters to connect them to the four-wire trunks of the interexchange competitors.

²² AT&T has consistently maintained that requiring interexchange competitors to hook into two-wire switches via adaptors would not impair the quality of the transmissions, a point which AT&T's competitors have just as consistently challenged. Since the Operating Companies have decided to offer mainly four-wire connections, this dispute is largely moot. See note 21 *supra*.

of some²³ that all No. 4ESS switches should be divested from AT&T and assigned instead to the Operating Companies.

Second. The New England Telephone Co. (NET) has suggested that it could provide access more economically if the Court were to override the predominant use test in its territory with respect to three advanced switching systems. [**16] NET wishes to make extensive use of No. 4ESS switches -- which apparently would be more appropriate in its region than elsewhere because of existing population densities -- and it states that it could benefit from the allocation of three existing No. 4ESS switches (in Manchester, New Hampshire; Springfield, Massachusetts; and Cambridge, Massachusetts).²⁴ NET has further informed the Court that if it were to receive the existing switches in these locations, the net present value advantage to it would range from \$20 to \$25 million with respect to the Cambridge switch and from zero to \$8 million [*1066] per switch with respect to the Manchester and Springfield facilities.²⁵

[**17] Although it accepted the predominant use test, the Court has stated that this test would be waived where particular equipment was needed by an Operating Company for the provision of equal access. See note 20 *supra*. Clearly that need is present with respect to [**118] the Cambridge switch,²⁶ and the Court will therefore require that AT&T assign that switch to NET. The matter is not as clear with regard to the Manchester and Springfield switches. If NET wishes to make a formal proposal for the transfer of these switches, it should submit a motion explaining under what circumstances the savings would amount to zero and under what circumstances they would amount to \$8 million,²⁷ [**18] and AT&T and the Department of Justice may respond to the motion. The Court will order no other changes in the assignment of switches.²⁸

C. [**19] How Should the Operating Companies Recover the Costs of Becoming Equal Access Providers and of Reconfiguring Local Networks to Conform to LATA Boundaries?

AT&T estimates that it will cost the Operating Companies \$73 million to reconfigure their networks²⁹ and \$2.47 billion to provide equal access.³⁰ The plan of reorganization does not directly address the issue of who should pay

²³ E.g., Black Citizens for a Fair Media, *et al.*

²⁴ NET states that owning the switches, and presumably leasing space to AT&T, would in these instances be the cheapest alternative. The next best option would be for NET to build its own 4ESS switches, with the most costly alternative being to lease space from AT&T. Response of the Northeast Region, May 31, 1983, at 5-6.

²⁵ Different values are achieved depending upon the assumptions used.

²⁶ The expenditure of \$20 to \$25 million required for the construction of a new switch is not an acceptable alternative.

²⁷ NET should also indicate whether assignment to it of the Cambridge switch would alter its analysis of the impact of a separate Worcester LATA. Specifically, if NET owns the Cambridge switch would it also want to build a Framingham No. 4ESS switch?

²⁸ The Court notes that Bell of Pennsylvania has supplanted its proposal to use a 1AESS switch to offer access in Harrisburg (the "Capital" LATA) with a plan to build a DMS-200, 4ESS or comparable four-wire switch by September 1985. Response of the Mid-Atlantic Bell Telephone Companies, May 31, 1983, at 6 n.6. Bell of Pennsylvania also intends to offer access to the Philadelphia LATA through the existing 4ESS until its own digital switch is in place, assuming that "billing software develops satisfactorily." *Id.* These plans are hereby approved. The Court accepts Pacific Northwest Bell's proposal to build its own digital switch in Seattle and use direct trunking to provide access pending completion of the switch. See Appendix A to Response of Operating Companies in Mountain-Northwest Region to Court's Memorandum of May 17, 1983.

The suggestion of the Department of Justice that the date for the Operating Companies' formal equal access filings be advanced is a sound one. The Department should consult with the Operating Companies with regard to the timing of an accelerated schedule.

²⁹ It is obvious that this figure is somewhat low, as is indicated, for example, by the claim of the Mid-Atlantic Region that the estimate of \$73 million does not include any of the \$30 million it expects to spend on network reconfiguration. Response of the Mid-Atlantic Bell Telephone Companies, May 31, 1983, at 9 n.10.

these costs but seems to proceed on the premise that equal access is exclusively an Operating Company responsibility with which the plan, and AT&T, need not be concerned. That approach is improperly simplistic.

[20]** Section I(A)(1) of the decree states that AT&T shall

transfer from AT&T and its affiliates to the BOCs . . . sufficient facilities [and] systems . . . to permit the BOCs to perform, independently of AT&T, exchange telecommunications and exchange access functions . . . and [which are] *sufficient to enable the BOCs to meet the equal exchange access requirements* of Appendix B (emphasis added).

There can be no doubt, then, that AT&T has a significant responsibility ³¹ to see to it **[*1067]** that the Operating Companies are left in a position, as of divestiture, that will enable them to offer equal access to AT&T's competitors. ³² The only question is what obligations attach to this responsibility.

[21]** The intervenors have proposed various ways to assign the costs of network configuration and equal access directly to AT&T, from requiring AT&T to give the Operating Companies more switches to requiring it to finance all equal access projects. The former has the disadvantage of imposing switch assignments on the Operating Companies which they do not want; the latter is problematic in that it will perpetuate a liaison between AT&T and the Operating Companies where none should exist. AT&T, for its part, **[**119]** while it rejects any suggestion that it should have to pay these costs, in effect concedes that it bears some share of the responsibility since it asserts that the access charges paid by interexchange carriers will reimburse the Operating Companies, and that it, as the dominant interexchange carrier, will pay the lion's share of such charges.

All the parties have agreed that these costs are properly to be recovered from the interexchange carriers, rather than through access charges levied on local ratepayers, because the expenditures represent improvements to the long distance network. AT&T's assurances to the contrary notwithstanding, it is unsettled at present by what methodology **[**22]** the interexchange carriers could be made to bear the costs of equal access and network reconfiguration through interstate access charges. Under existing procedures for allocating property costs, revenues, expenses, and reserves between intrastate and interstate jurisdictions for rate making purposes (see [47 C.F.R. § 67.1](#)), a disproportionately small amount of equal access and network reconfiguration costs would be designated for recoupment through interstate tariffs; most of these costs would be designated for recovery through intrastate tariffs even though, at least initially, most of the benefits of equal access connections will flow to users of interstate, not intrastate, telecommunications services. See Correspondence between Howard J. Trienens and A. Gary Collins, filed June 29, 1983; Response of Mid-Atlantic Bell Telephone Companies, May 31, 1983, at 8-10. ³³

³⁰ AT&T Memorandum, May 23, 1983, at 4 n. **, 5 n. *. This includes putting in place access tandems for interconnection between interexchange carriers' points of presence and the local loops, plus any direct trunks from points of presence to end offices where this is considered more efficient than using access tandems. The exact amount will depend on many factors, including any waivers of the equal access requirements pursuant to Appendix B of the decree.

³¹ The primary responsibility lies with the Operating Companies since as part of the divestiture process they will receive the Bell System's local exchange facilities by which equal access will be provided.

³² It has been clear at least since the decision of the Court of Appeals in [MCI Telecommunications Corp. v. FCC, 188 U.S. App. D.C. 327, 580 F.2d 590 \(D.C. Cir. 1978\)](#) (*Execunet II*) that AT&T was under an obligation to furnish equal or substantially equal access to its intercity competitors. See also, [United States v. Am. Tel. & Tel. Co., 524 F. Supp. 1336, 1356, 1360 \(D.D.C. 1981\)](#).

³³ Indeed, the Mid-Atlantic Region expects to spend \$200 million for equal access through 1986, but anticipates that, under the existing separations procedures, about 60 percent of these costs would be allocated to intrastate, not interstate, rate-making. As the Mid-Atlantic region states:

It may be possible, if regulators agree, to apportion these costs more equitably between the interstate and intrastate jurisdictions. If this does not occur, there is no assurance that state regulators will be able to fix intrastate access rates high enough to recover these costs. If rates are fixed at such level, [interexchange carriers] will have a strong incentive to 'forum shop' between interstate and intrastate tariffs and to by-pass the BOCs for intrastate access. Even if the bulk of the costs

In fact, only after it was pointed out by others did AT&T acknowledge that all equal access and network configuration costs would not be recovered through interexchange carrier charges under the current jurisdictional separations procedures.

[23] [*1068]** Another, equally serious problem is created by the ability of AT&T to make use of the so-called bypass technology ([552 F. Supp. at 175-76](#)) which would allow that company, at its choice, and given the availability of the necessary technology, to bypass the Operating Company circuits altogether and to reach ultimate telephone subscribers directly. To the extent that bypass is a serious threat to the Operating Companies,³⁴ AT&T, because of its size and its well-developed telecommunications technology, is by far the most likely origin of that threat. Use of that bypass technology by AT&T would, of course, permit it to escape the payment of access charges to the Operating Companies, and this, in turn, would jeopardize the recovery of the funds which will be expended by the Operating Companies for the equal access and reconfiguration construction program.

[24]** It is thus not certain that the Operating Companies will be fully reimbursed through carrier access charges for their equal access and network reconfiguration expenditures. Yet because the decree anticipated that AT&T would transfer sufficient facilities to the Operating Companies to ensure equal access; because it now appears that the Operating Companies will instead have to undertake substantial new construction of their own; and because AT&T has throughout this proceeding assured the Court that access charges paid by interexchange carriers would be the instrument which would prevent divestiture from causing increases in local rates, it is appropriate that AT&T should bear the ultimate risk if it turns out that its assurances are overly optimistic.³⁵ That risk will accordingly be assigned to AT&T in the following manner. **[***120]**

[25]** According to the plan of reorganization, the equal access construction program will be completed in five years. Within five years thereafter, that is by January 1, 1994, if the Operating Companies have not recovered the costs of equal access and network reconfiguration, inclusive of financing costs, through their collection of access charges from the interexchange carriers,³⁶ AT&T will be responsible for reimbursing the Operating Companies in the amount of any remaining deficit.³⁷ A preliminary accounting will take place at the close of the construction program on by January 1, 1989, whichever is earlier.

become properly assigned as between interstate and intrastate access, the possibility of by-pass becomes more threatening with each increase in access costs.

Response of the Mid-Atlantic Bell Telephone Companies, May 31, 1983, at 9-10.

AT&T and the Operating Company personnel apparently are working on a proposal to treat equal access and reconfiguration costs as if they were costs of "Special Services Switching Equipment" which, it is asserted, "will avoid the misallocation of costs to the intrastate jurisdiction" and will allocate investment and related expenses on the basis of relative toll minutes, i.e., on the basis of carriers actually using access services. Letter from A. Gray Collins to Howard J. Trienens, filed June 29, 1983, at 2. The FCC would have to approve any such proposal.

³⁴ The Court, unlike the Federal Communications Commission, does not consider bypass to be an immediate large-scale problem. See transcript June 2, 1983 hearing at 25466.

³⁵ However, for the reasons stated in note 31 *supra*, there is no basis for requiring AT&T to pay all of these costs, in addition to the contribution it will make by way of the access charges and the costs of the risks assigned to it herein.

³⁶ AT&T is entitled, in equity, to count toward reimbursement of these costs all carrier access charges, not only the charges collected from it. If only AT&T's contributions were counted, the Operating Companies, AT&T's interexchange competitors, or both, would reap a windfall.

³⁷ The Operating Companies shall keep records to isolate those expenses incurred solely for equal access and network reconfiguration as mandated by the decree from expenses they would have incurred in any event. AT&T and the Regional Companies shall, jointly or severally, submit to the Court prior to January 1, 1984, the accounting method that will be appropriate for isolating these expenses and for determining whether and when the costs of equal access and of network configuring have been recovered.

[**26] If the Operating Companies and AT&T are able to report to the Court on or before January 1, 1994, of their agreement that all costs have been recovered, AT&T will be discharged from any further obligation with respect to the cost of equal access and network reconfiguration. If there is a dispute, the Court will decide, if necessary with the assistance of the Department of Justice and the Federal Communications Commission, whether all costs have been recovered.³⁸

[*1069] II

Contingent Liabilities

Under the plan of reorganization, the contingent liabilities of the Bell System are apportioned among AT&T and the Operating Companies on the basis of their relative net investment [**27]³⁹ as of the date of divestiture.⁴⁰ [**28] Section VIII(H) of the decree allocates to each Operating Company a proportionate share of the System's consolidated debt and equity; and the plan of reorganization provides that the post-divestiture entities will share in the contingent liabilities on the same basis.⁴¹

The intervenors acquiesce in most aspects of the plan's allocation of contingent liabilities,⁴² [**29] and they limit their objections in the main to the allocation of contingent antitrust liabilities. Several intervenors assert broadly that because the Operating Companies were not responsible for AT&T's alleged conduct in violation of the antitrust laws and reaped no benefits from such violations, they should not have to share in the liabilities resulting from any antitrust claims. Others make similar arguments more narrowly with respect only to certain types of antitrust violations, such as those relating to the provision of interexchange services or of customer premises equipment (CPE).⁴³

The contingent liability provisions of the plan assume (1) that prior to divestiture the Bell System operated as a single unit, and (2) that the residual risks of the System's predivestiture operations should be shared by all entities which receive a part of the System's assets. Several intervenors challenge these assumptions. [***121]

A. *Principle of the Division of the Contingent Liabilities*

It is argued by a number of opponents of the plan that for many purposes the Bell System did not operate as a single enterprise. Thus, it is claimed that various Operating Companies charged different rates, operated under

³⁸ This mechanism has several advantages: it avoids any direct financing partnership between AT&T and the Operating Companies; it requires relatively little monitoring; it gives effect to the access charge tool; it encourages AT&T to work for suitable separations procedures; and it minimizes interference with regulatory commissions.

³⁹ HN2 [↑] Contingent liabilities are liabilities which are attributable to pre-divestiture events but do not become certain, and are therefore not booked, until after divestiture. The plan of reorganization defines "net investment" as total assets less reserves for depreciation. AT&T states that it will receive 25 percent of the net investment of the Bell System, and the remaining 75 percent will be assigned to the Operating Companies. AT&T Memorandum, May 23, 1983, at 13 n. *.

⁴⁰ The plan provides special allocation rules for contingent liabilities relating exclusively to interstate or intrastate operations or to tax liabilities. See Plan of Reorganization at 188-89. These special rules have either not been specifically challenged by the intervenors, or they have been opposed for the same reasons discussed *infra* for challenging the general rule for allocating contingent liabilities. See, e.g., NASUCA Memorandum, May 25, 1983, at 10.

⁴¹ Under the plan, AT&T and the Operating Companies will be responsible for the payment of judgments and determinations of liability, regardless whether or not an entity was dismissed from the proceeding by virtue of settlement or otherwise. Plan of Reorganization at 190.

⁴² No objections were raised with respect to the contingent liabilities having to do with the Bell System's rates, contracts, torts, or taxes.

⁴³ CPE is used on subscribers' premises to originate, route, or terminate telecommunications (e.g., telephone sets, answering machines). Section IV(E) of the decree.

different tariffs, were directed by different personnel, and engaged in other practices which differed from company to company. One consequence of this diverse pattern, according to the plan's opponents, is that some Operating Companies were charged with violations of the antitrust laws along with AT&T while others [**30] were not. Further, [HN3](#)⁴⁴ since under the law a corporation is not automatically liable for the anti-trust violations of its affiliates,⁴⁴ there is no basis, it is said, for imposing liability upon entities (*i.e.*, the Operating Companies) which have not been or may not be found to have been at fault. Finally, citing [*Texas Industries, Inc. v. Radcliff Materials, Inc., 451 U.S. 630, 68 L. Ed. 2d 500, 101 S. Ct. 2061 \(1981\)*](#), several intervenors argue that the plan violates the "rule" [*1070] against contribution for anti-trust damages.⁴⁵

All of these arguments miss the mark. Until the time the reorganization takes effect, the Bell System is legally a single enterprise, with a single claim to the System's assets and a single responsibility [**31] for the System's liabilities. It is erroneous, therefore, to pose the problem in terms of imposing liability upon parts of the enterprise based upon fault or lack of fault; at the time the acts complained of occurred there was only one entity (the Bell System), and should there be a judgment in any particular case, that entity will have been found to be at fault.

The evidence at the trial of this case did not isolate specifically whether the fault for particular activities which allegedly violated the antitrust laws lay with personnel assigned to AT&T headquarters or with personnel working for an Operating Company; and, of course, there was no adjudicated final judgment by which such fault could have been parceled out. In view of the commingling and transfers of personnel between AT&T's central divisions (*e.g.*, Western Electric) and the Operating Companies, it may be that no such decision could ever have been made.⁴⁶

[**32] This basic problem with the theory advanced by the intervenors is not cured by the circumstance that some Operating Companies are defendants in some of the pending private antitrust lawsuits while others are not. The decisions of antitrust plaintiffs as to which Operating Companies, if any, should be named as defendants in the private suits appear to have most often been dictated by such non-substantive matters as jurisdiction, venue, and ease of discovery.⁴⁷ [**33] Such choices were available to the plaintiffs in the various actions because they knew that the cost of any judgment would be shared by AT&T and all Operating Companies⁴⁸ regardless whether or not a particular Operating Company was a party to the proceeding in which liability was determined. In short, the identity of the particular Bell defendants played no real substantive part in pre-divestiture lawsuits or judgments, and it would make no sense to regard it as the determinative factor with respect to the payment of judgments based on pre-divestiture conduct which are entered or become final after divestiture actually occurs.

More broadly, it is incorrect to view the plan's allocation of contingent liabilities as an attempt to impose upon this Court the responsibility for making findings concerning fault or for imposing liability with respect to lawsuits pending in other forums.⁴⁹ [*34] The plan of reorganization does not purport to assign fault; all that is involved here is that, as part of its review of the decree and of the plan of reorganization of the Bell System, the Court has been

⁴⁴ See, e.g., [*Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 23 L. Ed. 2d 129, 89 S. Ct. 1562 \(1969\)*](#).

⁴⁵ See, e.g., Comments of Southern Pacific Communications Co., May 23, 1983, at 15; Comments of MCI Communications Corp., May 23, 1983, at 9.

⁴⁶ Because of the integrated nature of the Bell System, it is unlikely that the result would be any different in the private cases brought against that System or its components. In any event, as developed below, it is appropriate to assign the responsibility for the payment of possible judgments now, rather than to leave the issue for resolution for later, on a case-by-case basis. Recognizing this reality, few of the intervenors suggest that the matter be left open until judgments are entered; they argue instead for a fixing of liability now, albeit on a basis different than that assigned by the plan. See slip op. at pp. 26-28 *infra*.

⁴⁷ AT&T Reply Memorandum, May 31, 1983, at 18 n. *

⁴⁸ Such sharing would have occurred through the division of revenues process and a general contribution to the expenses of AT&T's General Department, and it is that Department which would have paid any antitrust judgment irrespective of the Bell entity upon which it might have been imposed. *Id.*; AT&T Response to Objections at 333.

⁴⁹ See, e.g., Satellite Business Systems Memorandum, May 23, 1983, at 4.

presented with a proposed **[***122]** contractual arrangement⁵⁰ **[*1071]** whereby the Operating Companies and AT&T will share in the payment of liabilities arising from pre-divestiture operations regardless of fault -- in effect a form of self-insurance. See slip op. at pp. 30-31 *infra*.

The intervenors' reliance upon *Texas Industries, Inc. v. Radcliff Materials, Inc., supra*, as an obstacle to this procedure is misplaced. In that case the Supreme Court held merely that there is no *right* to contribution in antitrust cases;⁵¹ it did not decide, nor was its decision based on the premise, that contribution is contrary to the policies underlying **[**35]** the antitrust laws.⁵² *Texas Instruments* thus does not invalidate either the liability sharing arrangement which presently exists (and has long existed) among the Bell System's components for that System's liabilities or the contractual arrangement proposed for the future by the plan of reorganization.⁵³

[36] B. Method of Apportionment**

The plan of reorganization proceeds on the basis that the residual risks of the Bell System's pre-divestiture operations should be shared by the entities of the System on the same basis as their receipt of the System's assets and equity.⁵⁴ This method of apportionment is challenged by several intervenors who suggest a division of contingent liabilities based on a "benefit" or "line of business" approach rather than the "relative net investment" approach provided for by the plan.⁵⁵ While this suggestion appears abstractly to have some merit, it is faulty if only because it suffers from serious, indeed insuperable, difficulties in administration.

[37]** It may well be doubtful that the Operating Companies benefitted quite as much from the activities challenged in the various pending antitrust suits as AT&T now claims; but it would also surely be incorrect to say that the Operating Companies' past and future lines of business received no benefits. For example, activities which

⁵⁰ The plan provides that in December 1983, the Operating Companies and AT&T will enter into an agreement which will identify all then-pending litigation or other proceedings in which a judgment could result in liability to be allocated under the plan. This agreement will identify whether each contingent liability will be shared by AT&T and the Operating Companies under the net-investment formula or whether it will be treated under one of the special allocation rules. Within one month of the institution of any other action or proceeding against AT&T or an Operating Company based on pre-divestiture events, notice must be given to each entity which may be responsible for payments under the plan. Plan of Reorganization at 189-90, 470.

⁵¹ In that case, the defendant corporation had attempted to file a third-party complaint against other companies seeking contribution should it be held liable under the initial complaint. The Supreme Court upheld the lower court's dismissal of the third-party complaint.

⁵² To the contrary, the Court concluded that it was for the Congress, not the courts, to decide whether there should be a statutory right to contribution in antitrust cases and how such contribution should be structured. *451 U.S. at 646*.

⁵³ Arguing that the agreement between the Operating Companies and AT&T to share contingent liabilities should be deemed void as contrary to public policy, one intervenor cites *St. Paul Insurance Companies v. Talledega Nursing Home, Inc.*, 606 F.2d 631 (5th Cir. 1979). See Southern Pacific Memorandum of May 23, 1983, at 16. The *St. Paul* decision stands only for the proposition that under Alabama law insurance contracts protecting against intentional wrongs are invalid. Not only are such contracts not universally considered void, but any public policy problems from such contracts are avoided here because the agreement among the Bell companies does not relate to future conduct but applies only to liabilities from pre-divestiture events.

Zenith (note 44 *supra*) is likewise inapplicable because the jurisdictional problems there involved are not present here and because of the contractual agreements discussed *infra*.

⁵⁴ On this basis, since AT&T will receive 25 percent of the net investment of the Bell System, it will be responsible for 25 percent of the contingent liabilities. See note 39 *supra*.

⁵⁵ These intervenors assert (1) that AT&T's future lines of business, not those of the Operating Companies, benefitted from whatever anticompetitive conduct occurred, (2) that the potential liability from alleged anticompetitive conduct bears no necessary relationship to the assets being divided, and (3) that the method prescribed by the plan, coincidentally or otherwise, favors AT&T's interest as against that of the Operating Companies.

adversely affected competitors of AT&T in the CPE business probably benefitted not only AT&T "headquarters" but also the Operating Companies' own CPE business, and the effects of these activities may even [*1072] linger so as to continue to provide the local companies with a benefit after divestiture. Further, evidence at the trial of this case indicated significant involvement of the Operating Company personnel in the so-called "procurement" portion of the case, *i.e.*, that dealing, among other things, with CPE.

Likewise, because the Operating Companies received a substantial portion of revenues from interexchange services through the division of revenues process, and because it appears that they stood to lose revenues to the extent that long distance traffic was handled by one of AT&T's competitors, it is difficult [***123] to say that they did not benefit [**38] from Bell System activities claimed to be unlawful which affected the interexchange market.

For these reasons, several intervenors candidly acknowledge that it is not possible, at least not without lengthy proceedings, to conclude that the Operating Companies received no benefit from the conduct challenged in pending antitrust actions ⁵⁶ [**39] or precisely how such benefits might be allocated between them and AT&T.⁵⁷ The Court will go further. In its view, to attempt to trace benefits from conduct challenged in lawsuits not yet decided to lines of business ⁵⁸ which will be engaged in at a later time by entities which do not yet exist would involve the Court in an impossible, almost metaphysical task, and it is one which, for that reason, it will not undertake.

More affirmatively, the assumption underlying the plan's allocation of contingent liabilities that, as a matter of equity, the contingent liabilities should be shared proportionately by all entities which "succeed" to the assets of the Bell System, is not unreasonable. Under the current division of revenues and costs within the [**40] Bell System, antitrust liabilities are liabilities of the entire System. Contingent antitrust liabilities -- just as the other contingent liabilities not challenged by the intervenors -- do not encumber particular assets or particular lines of business; they encumber all of the System's assets and equity. Because the decree provides that the Operating Companies and AT&T will each receive a portion of the consolidated debt and equity of the Bell System,⁵⁹ it is reasonable for each of the post-divestiture entities also to receive a corresponding portion of the System's pre-divestiture business risks which encumber the equity.⁶⁰

⁵⁶ See United Church of Christ Reply, May 31, 1983, at 8 (not possible to determine the extent to which Operating Companies and their ratepayers benefitted from AT&T's policies); General Dynamics Telephone System Center, Inc. Response, May 20, 1983, at 8 (alleged antitrust violations did not necessarily inure to the benefit of the Operating Companies "to the same degree" as they did to AT&T).

⁵⁷ Because of this problem, California suggests that the test for allocating contingent liabilities should be: which line of business "primarily" stood to benefit from the antitrust violation? State of California Memorandum, May 25, 1983, at 19. New Mexico advocates that where ultimately there remains a dispute about which entity receives the post-divestiture benefit, the matter should be submitted to arbitration. State of New Mexico Reply Comments, April 13, 1983, at 5.

⁵⁸ The break-up of the Bell System does not, in a number of respects, involve a neat division of operations and lines of business. For example, the Operating Companies will handle some intercity toll calls -- especially in some of the larger LATA's -- and they will also be able to market CPE.

⁵⁹ The decree provides that AT&T is to divest the Operating Companies with 45 percent debt ratios (55 percent equity). This ratio represents the 1981 (year end) consolidated debt ratio of the Bell System and was also the System's target debt ratio for the end of 1983. See AT&T Reply Comments, June 29, 1982, at 95-96.

⁶⁰ The equity portion of the Bell System's capital structure represents, in effect, the shareholders' reserve against business risks, including contingent liabilities. The possibility that certain contingent liabilities may not become certain or may not be turned into debt does not mean that these contingent liabilities are not business risks which currently encumber equity.

One intervenor (Washington Utilities and Transportation Commission Memorandum, May 25, 1983, at 5) argues that, if the Operating Companies were not assigned any contingent liabilities, they could be considered as receiving too much equity only if all other business risks in the overall Bell System capital structure were equal, and it goes on to state that there is good reason to believe that the Operating Companies will face higher risks because they are removed from certain lines of business by the decree. This argument is too speculative. Even though AT&T will retain some of what have been the more lucrative lines of business in the past, these are the competitive lines of business, and there are some who regard them as riskier than the

[**41] [*1073] The proof of that proposition lies in an examination of the alternatives. If AT&T had decided to settle, insure, or self-insure all contingent liabilities prior to divestiture, the costs of these liabilities would have been reflected now in the Bell System's debt and equity accounts,⁶¹ [**42] and there would have been [***124] no need for making provision in the plan of reorganization for the allocation of contingent liabilities. These other options were apparently considered by AT&T and the Operating Companies,⁶² and the choice was made that each Operating Company would take on a portion of the System's consolidated equity as well as all associated business risks. In furtherance of that decision, all Bell System Companies are, in essence, insuring one another against the possibility that the contingent liabilities will become certain after divestiture. The chief executives of the Regional Companies have informed the Court that, with but one exception, they agree with the choice made in the plan for allocating the contingent liabilities.⁶³

For these reasons, the Court rejects the objections to the treatment accorded in [*1074] the plan of reorganization to the contingent liabilities,⁶⁴ and it will approve that portion of the plan as part of its overall disposition [**43] of the parties' motions.

Operating Companies' monopoly exchange functions. See Fortune, *Breaking Up The Phone Company*, June 27, 1983, at 81-91.

⁶¹ AT&T could have decided to handle the contingent liabilities problem by one of the following methods, all of which would have led to results similar to the apportionment provided for by the plan of reorganization:

- (1) The Bell System could have chosen to pay these liabilities through settlement of the litigation before the decree was entered (or before divestiture occurred), such payment to be funded by debt. The Operating Companies would then be divested with higher debt ratios (perhaps 50 percent) to reflect the higher debt ratio of the Bell System. There would then, of course, be no residual risks to divide.
- (2) The Bell System could have purchased insurance, with the premiums funded by debt. Again, this would have pushed the System's debt ratio closer to 50 percent, and the allocation of contingent liabilities would then have become irrelevant since any judgment would have been paid by the insurer.
- (3) The Bell System could have self-insured the contingent liabilities with a funded reserve of some \$25 billion, which would have been borrowed and held in a separate account. The System's debt ratio would again have risen closer to 50 percent, and whichever entity would have been assigned the contingent liabilities would have received this separate reserve account.
- (4) The Bell System could have self-insured by booking the contingent liabilities through transfer of a portion of its equity to an appropriate liability account. The choice then would have been either for AT&T to take all the contingent liabilities and the liability account, or AT&T and the Operating Companies each could have taken a share of both the contingent liabilities and the corresponding liability account.

In essence, AT&T and the Operating Companies decided to select the last option -- each will receive a share of the contingent liabilities and each will receive more equity than it would have had if one of the other three options had been selected. The only substantive difference between that option and the proposed plan is that the shareholders' equity reserve is not being segregated into a separate liability account. By accepting a share of the contingent liabilities and a higher equity ratio, the Operating Companies are all simply participating in underwriting the System's contingent liabilities. In this way, they are insuring each other, and they will retain any profit which otherwise would have gone to an insurer.

⁶² AT&T Memorandum, May 23, 1983, at 11-12.

⁶³ See testimony of Thomas Bolger, June 2, 1983, transcript at 25603-04; testimony of William Weiss, June 2, 1983, transcript at 25493-94; but see testimony of Zane Barnes, June 2, 1983, transcript at 25487.

The Court notes that it is entirely unlikely that the contingent liabilities could realistically threaten the viability of the Operating Companies. AT&T has suggested that \$25 billion in additional liabilities might become certain after divestiture, but it has since hastened to concede that this possibility is extremely remote. Even if this outside contingency came to pass, the Operating Companies could finance their shares with debt, and their debt ratios would then increase from 45 percent to the 50 percent range -- still the typical debt ratio of independent telephone companies and electrical utilities.

⁶⁴ The Court has also considered the various provisions made in the plan of reorganization with respect to other liabilities, reserves, and equity, including tax reserves, depreciation reserves, and long term debt, and finds the treatment of these matters in the plan to be reasonable.

[**44] III

Bell Name and Logo

The plan of reorganization originally submitted by AT&T provided that upon the divestiture both AT&T and the Operating Companies could continue to use the "Bell" name.⁶⁵ Complex provisions were made with [***125] respect to the Bell trademarks,⁶⁶ [**45] and the plan further provided that if, in light of the Justice Department's opposition to the AT&T approach, the Court were to disapprove it, AT&T "will adopt the alternative . . . [to] retain all uses of the Bell name, including all Bell trademarks, the Bell logo or seal, the blue and ochre stripes, and other graphics and all uses of Bell in corporate names" (emphasis added).⁶⁷ The Department of Justice did not oppose the second alternative,⁶⁸ but with respect to the first it proposed an amendment which AT&T accepted. It is this Department of Justice version (Amendment No. 15), described in more detail below, which is now before the Court.

Under Amendment No. 15, although the Operating Companies would have exclusive rights to the Bell logo in the United States,⁶⁹ they could use it only in connection with the provision of exchange telecommunications services, exchange access services, and printed directory advertising. The Operating Companies would be prohibited from using the Bell logo in connection with the marketing of any customer premises equipment (even that supplied by AT&T and its affiliates). As concerns the "Bell" name, the Operating Companies would be permitted to use it only in connection with [*1075] services other than the sale of equipment and only when explicitly modified by a geographic designation of an area less than national in scope [**46] (e.g., Southwestern Bell); AT&T, on the other hand, could use the name "Bell" on a national basis for all these purposes if preceded by the word "American."⁷⁰

It is appropriate briefly to mention the debt of Pacific Telephone and Telegraph Co., which has been the subject of several submissions both by the Operating Company and by the State of California. Upon consideration of all the documents, the Court has concluded that it will not require a modification of the plan of reorganization with regard to this issue because the plan is not the appropriate vehicle for determining the extent to which the local company's debt problems may have been created by the California regulators -- as was previously assumed by this Court ([552 F. Supp. at 208](#)) as well as by the FCC staff (Staff Analysis of February 11, 1983, at 27-28) and various financial rating services -- or by AT&T.

The debt equalization scheme which is proposed by California would inappropriately result in inter-regional subsidies and create complex problems leading to new and continuing AT&T entanglements with the Operating Companies. In any event, neither the decree nor the plan of reorganization adversely affects Pacific's financial condition; if anything, they improve it. See Second Supplemental Statement of Donald Guinn, April 7, 1983, at 1. Pacific's interest coverage ratio will be above the level necessary to maintain a Standard & Poor's "A" rating. Supplemental Statement of Donald Guinn, January 13, 1983, at 2; AT&T Response to Objections at 300-01. While future developments and perceptions cannot be vouchsafed, it appears that Pacific will be divested in as financially a sound condition as its prior history permits.

⁶⁵ AT&T and the Operating Companies could not use "common corporate names," however.

⁶⁶ The Central Staff Organization to be established by the Operating Companies (see Part VIII *infra*) was to receive the rights to the existing Bell trademarks for use in connection with lawful Operating Company business except for the marketing of "equipment not supplied by AT&T and its affiliates." The trademarks include not only the encircled bell logo but also the blue and ochre stripes, and other trademarks and service marks used on vehicles, telephone directories, and the like. They will generally be collectively referred to as the Bell "logo."

⁶⁷ If only because of the explicit representations made by AT&T's counsel to the Court during the first Tunney Act hearing in June 1982 (see pp. 48-49 *infra*), this alternative cannot be seriously entertained.

⁶⁸ It stipulated, however, that compensation had to be paid to the Operating Companies for the direct costs of revamping their trademarks and trade names.

⁶⁹ AT&T would retain its present rights to trade names and trademarks for use outside the United States.

⁷⁰ AT&T could continue to use the name "Bell Laboratories" without modification. AT&T could also continue to use the descriptive phrase "Bell System," albeit with the modifier "American." The amendment further provides that AT&T would conduct an extensive advertising campaign to distinguish its products, names, and trademarks from those of the Operating Companies.

A. Use of the "Bell" Name by both AT&T and the Operating Companies Would Be Confusing

The Department of Justice apparently considered that the original AT&T plan was unacceptable because it could lead to consumer confusion and mutual promotion (*i.e.*, cross subsidization). The proposal presently before the Court is as flawed in those respects as the first plan -- if **[**47]** not more so -- and it therefore cannot be approved.

There is no question but that the proposal, if implemented, would be confusing as to the relationship between AT&T and the Operating Companies: contrary to fact, it would lead consumers to believe that there is a continuing close connection between these entities or, worse, that they are all still components of the same company. The proposed system -- AT&T's use of the "Bell" name preceded by the word "American" and the Operating Companies' use of the "Bell" name preceded by the designation of some smaller geographic area -- inevitably suggests that each of the Operating Companies provides service in a particular region of the country while AT&T provides the national service which ties all of the components together into one integrated Bell System. As one of the intervenors correctly points out,

for AT&T to suggest that consumers will not likely think that "Illinois Bell" is part of "American Bell" is as preposterous as it is that consumers would not think Illinois to be part of America.⁷¹

[48]** This implication, that there is a continuing link between AT&T and the Operating Companies, would have several significant anticompetitive effects: in the market for intercity telecommunications services it would imply that AT&T is the natural or "official" long distance company to be used in conjunction with the local services provided by the several Bell Operating Companies; in the market for consumer premises equipment it would lead consumers to believe that the local system maintained by a "Bell" Operating Company calls for "American Bell" (*i.e.*, AT&T) equipment, or at a minimum, that American Bell equipment is made for and works better than the equipment of other manufacturers **[**126]** when hooked up to the local Bell network;⁷² and it would suggest that the local Bell Operating Companies will warrant, service, and repair the equipment of the national Bell company (*i.e.*, AT&T).

[49]** It is only to belabor the obvious to record that with respect to each of these areas, AT&T's competitors would, in terms of consumer perception, come off distinctly second best. None of them could claim a similarly close relationship with the local Operating Companies. Sprint and MCI would inevitably be regarded as not as well suited as AT&T to render long distance service in partnership with the local circuits of the Bell Operating Companies; and Tandy and ITT would constantly have to strive to overcome the perception that, even if their equipment could be connected at all to the local Bell Operating Company loops, it **[*1076]** would not operate as smoothly and naturally with them as would AT&T's, and that, again unlike AT&T's equipment, it would not be locally serviced.

The implication of a continuing relationship between AT&T and the Operating Companies is thus inconsistent with the bedrock principles underlying the decree. The principal purpose of the decree was to introduce fair and equitable competition in the telecommunications markets. This was to be achieved by separating the Operating Companies from AT&T so as to ensure that purchasing decisions regarding AT&T's **[**50]** competitive services and equipment would be unaffected by the position of the Operating Companies as the providers of local monopoly exchange and exchange access services.⁷³ It was, in brief, the decree's purpose to give AT&T's competitors the opportunity to compete with AT&T on equal terms without artificial impediments. The proposal for joint use of the "Bell" name substantially, if not fatally, undercuts these objectives.⁷⁴

⁷¹ Reply of Tandy Corporation at 8.

⁷² This confusion would exist regardless whether the Operating Companies would market CPE under the Bell label. Even if there were no such marketing, customers would still be led to believe that the providers of local exchange, exchange access, and directory advertising services are intimately connected with American Bell, and that AT&T's equipment -- the only equipment that would be marked "Bell" -- would be the most adaptable to the local system.

⁷³ It is on a similar rationale that the Court required modification of the decree to dispel customer confusion arising from joint billing. [552 F. Supp. at 199](#).

⁷⁴ One of the intervenors provided the apt example of a newspaper advertisement proclaiming "NOW YOU CAN BUY GENUINE AMERICAN BELL EQUIPMENT THROUGH THE RETAIL OUTLETS OPERATED BY YOUR LOCAL BELL TELEPHONE

[**51] Moreover, as long as AT&T and the Operating Companies both used the "Bell" name, there would also be subsidization between them to the detriment of the other existing and potential competitors. Any promotional efforts by either AT&T or an individual Operating Company would accrue to the benefit of the other, transmitting overtly or subliminally the message that Bell is a single, dominant supplier of telecommunications services and equipment. When an Operating Company advertised under the "Bell" name, it would necessarily also promote the products and services of AT&T marketed under the "American Bell" label, and vice versa. The long-standing consumer association of the "Bell" name with all aspects of the Bell System's local, long distance, and equipment operations would not only persist; it would actually be reinforced.⁷⁵

[**52] The decree is designed to effect a radical separation of the Operating Companies from AT&T;⁷⁶ it will hardly do to continue [*1077] to have the various divested entities of the Bell System⁷⁷ [**53] hold themselves out as if they were all still part of the same complex.⁷⁸ The plan proposed by AT&T would create the impression to the consuming public that the divestiture had never taken place. The Court did not approve a decree breaking up the Bell System to have that system rise again, phoenix-like, in the plan of reorganization.

[**54] For these reasons, the "Bell" name and the Bell logo must belong either to AT&T or to the Operating Companies -- but not to both.

COMPANY." Reply of Tandy Corporation at 5. There can be no doubt that consumers would be led to conclude by such an advertisement that these various "Bell" entities are all part of one giant company, and that their equipment was so designed that it would all mesh better than would some other, "foreign" equipment. This would be so if the Bell System had not become fixed in the national consciousness for a hundred years as a single corporation; it is even more true because of that historical fact.

⁷⁵ [**127] AT&T argues, citing several trademark decisions (e.g., *Gould Engineering Co. v. Goebel*, 320 Mass. 200, 68 N.E.2d 702 (1946); *Gemeinde Brau, Inc. v. Amana Society*, 557 F.2d 638 (8th Cir. 1977)) that different businesses which "share a common heritage" may use the same mark in separable parts of the business. See Response to Comments at 480-90. That argument lacks merit. Trademark law as it has developed in the context of claims of unfair competition between competing concerns is of dubious applicability to a situation -- divestiture under antitrust principles -- where the interests of outside competitors and the public are implicated. Cf. *Ford Motor Co. v. United States*, 405 U.S. 562, 576 & n.11, 31 L. Ed. 2d 492, 92 S. Ct. 1142 (1971). In any event, the lines of businesses of AT&T and the Operating Companies are not separable but related and, in the equipment market, they will be direct competitors. The customer confusion this would foster would delay achievement of a truly competitive CPE industry.

It was for similar reasons [HN4](#)↑ that the various oil companies which emerged from the 1911 break-up of Standard Oil have generally been prohibited from doing business under a Standard Oil name or trademark in a territory where Standard Oil denoted another product. See, e.g., *Standard Oil Co. (Kentucky) v. Humble Oil & Refining Co.*, 363 F.2d 945, 951 (5th Cir. 1966) ("we think long cumbersome records are no longer necessary to prove the public believes that all of the pseudonyms for Standard Oil belong to the same or related companies").

⁷⁶ The various components of the Bell System will, to be sure, be separated from each other in a legal, ownership, and financial sense. But if they were all to support each other in their marketing and promotional efforts, not a great deal will have been gained. Together they would still crowd out all others; together they would still be the colossus of telecommunications.

⁷⁷ Use by AT&T of the terms "Bell System" or "American Bell System" is particularly troublesome, for it implies that the system that will be broken up on January 1, 1984 actually survives in the form of AT&T.

⁷⁸ It is worth noting also that this confusion is actually being encouraged by AT&T's current advertising which features such phrases as "Bell System" and "Genuine Bell." Indeed, AT&T announced its decision to name its equipment marketing subsidiary "American Bell, Inc." after it had learned of the Department of Justice's objection to the use by AT&T of the word "Bell" in any way which could imply a continuing "endorsement or relationship between the BOCs' monopoly local exchange service and the products and services of AT&T and its affiliates" (letter of September 23, 1982, from William F. Baxter to Howard J. Trienens (Exhibit D to Objections of Tandy Corp., filed February 18, 1983)) and after at least one intervenor in the public interest proceeding before this Court (Tandy Corp.) had similarly complained about such use. AT&T advertising focusing on the word "Bell" has proceeded at a crescendo since the divestiture decision was made.

Because of this history, not much faith can be placed in AT&T's promise to undertake an advertising campaign to educate consumers as to the differences between the new entities. An effective campaign along these lines would be directly contrary to AT&T's interests.

B. AT&T Is Not Entitled to the "Bell" Name and Logo as a Matter of Right

Since the concurrent use by AT&T and the Operating Companies of the name "Bell" cannot be approved, it remains to be decided which entity or entities should inherit that name -- and along with it the logo -- as part of the divestiture. Before proceeding to determine whether AT&T or the Operating Companies should, consistently with the decree's principles, be assigned the Bell tradename and trademark, consideration must be given to several preliminary arguments made by AT&T.

First AT&T contends that it owns the "Bell" name,⁷⁹ from which it would presumably follow that it cannot be deprived thereof without its acquiescence. That argument is not well taken.

All of the assets of the combined Bell System are the property of AT&T⁸⁰ yet some -- indeed the majority -- **[**55]** of these assets are being assigned by the decree to the Operating Companies. If AT&T had a veto power stemming from general principles of property law with respect to the "Bell" name, it would have the same kind of power with regard to all other Bell System assets. Obviously that is not so, in the context of a distribution of assets and liabilities stemming from a break-up of the corporation under a court-approved decree.⁸¹ The question actually is a much more simple and direct one: how should the assets represented by the "Bell" name and logo be distributed in order to effectuate the provisions and principles of the decree -- an issue which is considered in Part C below.

[56]** Second. AT&T next claims that the "Bell" name is part of the heritage of AT&T,⁸² and that customers who have purchased Bell telephones and services and who may want to patronize Bell System companies in **[*1078]** the future are entitled to know, post-divestiture, which companies "are historically related to those products and services they have enjoyed for a hundred years."

But not only is that name as much a part of the heritage of the Bell Operating Companies as that of AT&T, but, in the public mind, "Bell" may well be said to stand **[***128]** primarily for the local companies, for that is where the public has traditionally obtained **[**57]** its telephones and its service.⁸³ It was the Operating Company to which one turned with a malfunction, a complaint, a request for new or altered service, a billing inquiry, and the like. The function of a trademark or tradename is to indicate the party which "puts the goods on the market and accepts the responsibility or plaudits for their acceptability or quality." E. Vandeburgh, Trademark Law and Procedure at 34 (2d ed. & 1979 Supplement).⁸⁴ In this instance, that means, more than any other entity, the Operating Companies.

⁷⁹ Plan of Reorganization at 415.

⁸⁰ See [552 F. Supp. at 201-04](#).

⁸¹ See [Ford Motor Co. v. United States, supra, 405 U.S. at 576](#) and n.11. AT&T also "owns" a sizable magnitude of liabilities, including the contingent liabilities the responsibility for which will pass in large part to the Operating Companies (see Part II *supra*), yet it has never taken the position with respect to these liabilities that they constitute its obligation as distinguished from that of the Operating Companies.

⁸² The reference to a "common heritage" is puzzling for another reason as well. It is because that common heritage was allegedly used to violate the antitrust laws, and it is presumably because the "common heritage" was so intrinsically anticompetitive, defying less drastic remedies such as injunctions, that this lawsuit was filed and this divestiture agreement was made and approved.

⁸³ Response to Objections at 486-87.

⁸⁴ AT&T also claims that the trademark and the tradename Bell belongs to the party which manufactured Bell equipment, i.e., Western Electric Co. However, as one commentator put it,

When one says that a trademark must indicate origin of the goods to which it is applied, it is not intended to [imply] that a trademark can only be used by a manufacturer of the goods The origin to which reference is made is the party that introduces the goods on which the mark is used into commerce with the trademark on them and who primarily stands to

[**58] Third. AT&T contends that the name "Bell" is assigned to it by the plan of reorganization and that this assignment should not be disturbed because it allegedly is not inconsistent with the provisions of the decree. It is true that the Department of Justice has capitulated to this argument, stating that it could find no basis for overturning the AT&T decision. But the provisions of the plan drawn by AT&T are entitled to much less weight here than in other circumstances, since it is clear from the submissions of the designated chief executives of the Regional Companies that a number of them oppose the proposed disposition of the Bell name and logo.⁸⁵ Beyond that, as the Court has had occasion to explain a number of times, the plan of reorganization, to be approved, must be consistent not only with the provisions of the decree but also with the underlying principles. For the substantive reasons discussed below, an assignment of the "Bell" name and logo, or either, to AT&T would not be consistent with these principles.

[59] C. Use of the Bell Name and Logo Are More Appropriately Assigned to the Operating Companies than to AT&T**

Both the original plan and the proposed Department of Justice amendment would [*1079] deny to the Operating Companies the use of the Bell name and logo in marketing customer premises equipment (CPE).⁸⁶ The former would have severely limited this use; the latter would preclude it altogether. It is this aspect which has drawn the widest criticism -- from the States, the inter-exchange carriers, the manufacturers of CPE, and the Operating Companies themselves. In the view of the Court, the critics are entirely correct.

The decree as ultimately entered expressly authorized the Operating Companies to market customer premises equipment. The Court fully explained why it required this modification as a condition of its approval of the decree:

As against [the] relatively slight risks to competition from Operating Company involvement in the marketing of CPE must be weighed [**60] the very substantial contribution these companies could make to vigorous competition in the customer premises equipment market The Operating Companies, with their existing relationship to telephone users, are more likely than any other competitive entity to provide an effective counterbalance to AT&T's market strength and thereby to promote a genuinely competitive market. [***129]

552 F. Supp. at 192 (footnotes omitted).⁸⁷

gain or lose by the acceptable qualities of the goods. It is not even necessary that the public or purchasers know who is the manufacturer of the goods

E. Vandenburgh, Trademark Law and Procedure at 35 (2d ed).

Moreover, it is undisputed that AT&T has not supplied to the Operating Companies and hence held out to the public only products made by it or its affiliates. See Amended Certification of Thomas E. Bolger, April 6, 1983, at 4.

While certainly a survey of the public would indicate that the name "Bell" and the Bell logo do not connote the same thing to every single person -- an individual who has written checks monthly to one of the Operating Companies which does not use the name "Bell" in its corporate name may be more likely to think of "Ma Bell" than of a local Operating Company, for instance -- it cannot be gainsaid that the primary connection between the individual and the Bell System occurred between telephone subscriber and local Operating Company. Assignment of Bell name and logo to the Operating Companies is thus consistent with the trademark law.

⁸⁵ See, e.g., Statement of Wallace R. Bunn, May 23, 1983; Reply Memorandum of the Midwest Regional Holding Co., May 31, 1983; Supplemental Statement of Zane E. Barnes, April 12, 1983. Here, again, AT&T cannot have it both ways: it cannot relegate the largest share of the Bell System obligations to the Operating Companies yet purport to speak conclusively on behalf of the entire System with regard to the plan of reorganization even where there is a sharp dispute among the various components. See note 81 *supra*.

⁸⁶ See note 43 *supra*.

⁸⁷ The Court repeated this reasoning in its Memorandum of August 23, 1982, denying the Justice Department's motion for reconsideration (at p. 5):

[**61] To deprive the Operating Companies of the use of the Bell logo and the Bell name in the CPE area would effectively cripple their efforts to become viable competitors in this market. The Court approved the decree in the expectation that the Operating Companies would be able to use their "existing relationship to telephone subscribers" in marketing equipment as a counter to AT&T's market strength.⁸⁸

The various Operating Company officials who provided comments to the Court⁸⁹ on this aspect of the plan of reorganization attested to the fact that their

principal strength in the marketplace for customer premises equipment (and other potential services which may be approved by the Court) [is their] long and solid reputation [**62] for quality products and excellent service. Our ability to trade on that hard earned reputation is important and should not be compromised by denying us the ability to use the Bell logo and marks as legitimate reminders of who we are.⁹⁰

Several executives of the new Regional Companies have stated that they might have to stay out of the equipment market entirely (or limit themselves to the sale of large-scale equipment) if they were prevented from using the Bell name and logo in connection with equipment marketing. See testimony of Thomas Bolger, June 2, 1983, transcript at 25601-02; see also, Wall Street Journal, Some [**63] Bell Companies May Stop Supplying Residential Phones as Competition Grows, June 17, 1983.

It would not be similarly inimical to the purposes and principles of the decree to preclude AT&T from the use of the Bell name and logo. One principle underlying the decree is that both AT&T and the [*1080] Operating Companies shall be in a position to be vigorous competitors with each other and with others in the marketing of customer premises equipment. To that end, the decree sets up a carefully balanced structure, as follows. AT&T will retain all embedded CPE; it will retain the Bell System retail outlets; and it will retain the ability both to manufacture and to market CPE. The decree further took into account in this regard that, by comparison with the individual Operating Companies, AT&T will be a giant, with financial and other resources far overshadowing those of the local entities.

The Operating Companies, on the other hand, will come out of the divestiture with relatively limited CPE-related resources and functions. They will be prohibited from manufacturing CPE; they will be deprived in part of their existing customer base by the assignment of existing CPE to AT&T; they will [**64] lack the ready-made outlet of existing retail stores; and they will not have the benefit of Bell personnel experienced in the marketing of CPE. Insofar as such marketing is concerned, these companies will essentially be limited to their proximity to the local customer base in addition to the goodwill inherent in the "Bell" name and logo (if these are assigned to them). In short, in competitive terms, the assignment of the Bell name and logo to the Operating Companies rather than to AT&T can hardly be characterized as unfair to the latter.⁹¹ The true situation is that, without the name and logo the

Balanced against the remote contingency that the Operating Companies would engage in anticompetitive conduct is the certainty that they would provide healthy competition for AT&T Allowing the Operating Companies to engage in providing CPE will serve as a useful competitive check on AT&T, not only deterring the possibility of anticompetitive behavior but also benefitting consumers by increasing the number of equipment providers in the market place.

⁸⁸ August 23, 1982, Memorandum Opinion at 4 n.7. Since the provision allowing the marketing of CPE was added to the decree at the Court's insistence, it would not be unreasonable to regard the Court's expectations in that regard as the most accurate expression of the decree's "intent."

⁸⁹ A substantial amount of testimony at the June 2, 1983, hearing was devoted to this issue.

⁹⁰ Letter dated April 13, 1983, from Raymond F. Burke, Vice President and General Counsel-designate of the Northeast region; see also, e.g., Supplement to Sworn Statement of Wallace R. Bunn, chief executive officer-designate of Southeast region; Statement of Thomas Bolger at 2-3.

⁹¹ There is some merit to AT&T's point that its employees have an emotional attachment to the Bell name, and that to them the name's passing may mean the loss of an emblem of pride and perhaps life-long association. The same could be said about employees of the Operating Companies, however.

local companies' right, under the decree, to market CPE would be defeated, while AT&T's right to do so would only be minimally affected.⁹²

[**65] It is appropriate, finally, to quote from the representations which were made to the [***130] Court by AT&T's counsel at last year's public interest hearing. On June 29, 1982, counsel stated in response to comments made by an attorney representing a competitor that

. . . The problem is not the logo, the yellow and blue stripes and that sort of thing . . . We do not want to get into that fight and we have already agreed . . . that the Bell that you know, the stripes that you have come to know they will go to the BOCs. Trucks that get repainted will be the Long Lines trucks, [not?] the BOC trucks. The only thing left then is the names. I think Tandy's counsel was very appropriate in saying that after all, you're breaking up the Bell System . . . What he objected to was concurrent use of the same corporate names. I stand before you and say there will be no such concurrent use of the same corporate name after the split.

When the Court suggested that this understanding had best be incorporated in the decree, AT&T's counsel replied that this was not necessary because

the question has been raised about these common names, the Court Reporter is recording this [**66] and there is a record of this hearing that should well outlast all of us, I suppose.

Transcript at 25214-15.

To be sure, it could be argued that these statements are not without some ambiguity.⁹³ Yet the overwhelming sense of the [*1081] representation, particularly when juxtaposed against the arguments made by counsel for one of AT&T's competitors and that of the Department of Justice, was that AT&T was content to have the Operating Companies inherit the Bell logo and name.⁹⁴

[**67] For the reasons stated, the Court will refuse to approve the plan of reorganization unless it is amended to provide for use of the "Bell" name and logo by the Operating Companies (except as provided in Part D *infra*) and for a prohibition on AT&T's use after January 1, 1984,⁹⁵ of the "Bell" name or the word "Bell" in any existing or new

⁹² It is significant also, in antitrust terms, that transfer of the Bell name and logo to the Operating Companies will not eliminate AT&T as a competitor but will yield two competitors where otherwise there might only be one. Cf. United States v. Lever Brothers Co., 216 F. Supp. 887 (S.D.N.Y. 1963).

⁹³ AT&T suggests that it is not, even now, proposing "common corporate names." When the promise was made that there would be no "common corporate names," it would have been difficult to visualize that AT&T promised only that a modifier would be added to the word "Bell" but that otherwise that name would still be used by all of the successor entities of the Bell System. Had not AT&T's counsel hastened to assure the Court that no amendment of the proposed decree was necessary, the Court would have, then and there, insisted upon language which is not susceptible of the current "fine print" argument.

⁹⁴ The assignment of the Bell name and logo to the Operating Companies rather than to AT&T is further consistent with those provisions of the decree which distribute assets on the basis of predominant use. As the Department of Justice points out,

[assignment] of the Bell logo and marks to AT&T would create relatively more transitional costs, due to the relatively greater number of BOC assets upon which the marks and logo appear, in comparison to those retained by AT&T, e.g., on buildings, trucks, phone booths.

Department of Justice Response to Comments at 155.

⁹⁵ The Court will consider postponing the effective date of the prohibition for an additional six months upon a showing by AT&T made by November 1, 1983, that it needs more time to continue a promotional campaign with respect to whatever name it desires to adopt in place of "American Bell." Although to some extent AT&T has created this problem by its recent intensive advertising campaign (see note 78 *supra*), it is nevertheless appropriate to allow it a reasonable period within which to extricate itself from this situation.

corporate name or in connection with the manufacture or marketing of any product or service, or for any other purpose.⁹⁶

[68] D. Limitations on the Operating Companies**

The use which the Operating Companies may make of the Bell name and logo requires additional discussion.

First. Under the current version of the plan of reorganization, the "Bell" trademarks are to be assigned to the Central Staff Organization.⁹⁷ However, if the CSO were to receive the assignment of the name and logo, it might also have to administer centrally a program of quality control, for lack of reasonable "quality control" could be regarded as working an abandonment of the licensor's registration of its trademark. See Lanham Act, [15 U.S.C. § 1051 et seq.; Dawn Donut Co. v. Hart's Food Stores, Inc., 267 F.2d 358, 367 \(2d Cir. 1959\)](#). Such monitoring of the Operating Companies by the CSO would run counter to the notion that it is the Operating Companies which control the CSO, not vice versa. Moreover, each Regional Company must have individual responsibility for giving meaning to the products or services it offers under the name Bell, consistent with trademark and [antitrust law](#). Accordingly, the Court will require that the **[***131]** tradename and trademarks shall pass directly to the Regional Companies, without intervention of **[**69]** the CSO.

Second. With respect to exchange telecommunications, exchange access, and directory advertising, the Operating Companies and the Regional Companies will, by definition, be limited to clearly defined geographic areas, and they will therefore use the name "Bell" only in conjunction with a geographic designation indicating the relevant territory. Likewise, in their corporate names, the Operating and Regional Companies will use "Bell" only in conjunction with a geographic prefix. In the marketing of equipment, however, these companies may wish to compete in places beyond their service territories, particularly with respect to the sale of large-scale telecommunications equipment to business customers. There is no reason why such competition should be **[*1082]** precluded by the imposition of territorial restrictions.⁹⁸

[70]** To the extent that an Operating Company sold CPE within its own geographic area, there might be no problem. Confusion would result, however, if hypothetically, Southern Bell, Northwestern Bell, and Pennsylvania Bell all marketed equipment in, say, Chicago, simply as "Bell" products, or if they stamped only the Bell logo on the equipment they sold there. The name "Bell" would in that case have little meaning; both it and the logo might be of dubious legitimacy under trademark law; and each company would run the risk of being sued by Illinois Bell for unfair competition. Accordingly, an Operating Company wishing to trade in another's territory shall not use the name "Bell" without a trade modifier, nor may it use the logo standing alone. See, e.g., [Standard Oil Company v. Standard Oil Company, 252 F.2d 65 \(10th Cir. 1958\); Mister Donut of America, Inc. v. Mr. Donut, Inc., 418 F.2d 838 \(9th Cir. 1969\)](#).⁹⁹

[71] IV**

⁹⁶ AT&T may, however, continue to use the "Bell" name with respect to its Bell Laboratories and its foreign operations. The Laboratories and the foreign operations will not be in competition with the Operating Companies, and use of the "Bell" name in these contexts will not otherwise be confusing.

⁹⁷ See Part VIII *infra*.

⁹⁸ Such restrictions have in other contexts been found to violate the antitrust laws. See, e.g., [Ohio-Sealy Mattress Manufacturing Co. v. Sealy, Inc., 585 F.2d 821 \(7th Cir. 1978\)](#).

⁹⁹ Whether the use of the word "Bell" with an appropriate prefix could pass muster under the law of trademarks and unfair competition outside a particular Regional Company's territory may be expected to depend upon the particular facts of each use (e.g., the precise configuration of the name and logo, the results of customer surveys, and the like). Any decision now on that issue would therefore not only be entirely speculative and premature but it might also be beyond the Court's jurisdiction, and it will accordingly be left to another day and another forum.

Patents

The issue before the Court is not, as it is with regard to the Bell name and logo, whether the Bell system patents should be assigned to AT&T or to the Operating Companies. AT&T will, in any event, retain ownership of all the patents. The question to be decided is the extent to which the Operating Companies will share in the patents by being granted licenses thereto, and what right these companies should have to grant sublicenses to others.

A. Meaning of the Decree

The plan of reorganization provides that the Operating Companies will be granted royalty-free licenses to use patents ¹⁰⁰ now owned by AT&T or to be issued to AT&T within five years after divestiture, to the extent that they relate to exchange, exchange access, and printed directory advertising services.¹⁰¹ Under the plan, the Operating Companies will not, however, be granted licenses to patents relating (1) to any services which the decree prohibits them from offering (such as inter-LATA service) and (2) to the provision of customer premises equipment. To justify these limitations, AT&T and the Department of Justice rely upon section I(A)(1) of the decree, which provides, *inter alia*, for [**72] the

transfer from AT&T . . . to the BOCs . . . of sufficient . . . rights to technical information to permit the BOCs to perform, [***132] independently of AT&T, exchange telecommunications and exchange access functions and on section VIII(B) which provides that

all facilities, personnel, systems, and rights to technical information owned by [*1083] AT&T . . . which are necessary for the production, publication, and distribution of printed advertising directories shall be transferred to the separated BOCs.

[**73] In the view of these parties, no patent rights need to be granted to the Operating Companies on any basis other than these explicit provisions contained within the "four corners" of the decree. This is erroneous.

When the Court approved the proposed decree on August 11, 1982, it made the approval contingent upon the adoption by the parties of a number of modifications. These modifications, it was made clear at the time, were required only for the most substantial changes or clarifications; with respect to other subjects, the Court stated that it was content to rely upon the parties' representations and promises and its own authority to give them effect during the implementation proceedings, including by its authority to approve or disapprove of the plan of reorganization. Thus, the August 11, 1982 Opinion explained

With respect to a number of subjects, the proposed decree establishes merely general principles and objectives, leaving the specific implementing details for subsequent action, principally by the plan of reorganization *The parties have also made informal promises, either to each other or to the Court, as to how they intend to interpret or implement [**74] various provisions.* The Court has decided that its public interest responsibilities require that it establish a process for determining whether the plan of reorganization and other, subsequent actions by AT&T actually implement these principles and promises in keeping with the objectives of the judgment

¹⁰⁰ "Patents" as used in this Opinion includes non-patented technical information. The parties have agreed that the Operating Companies would be granted rights not only to patents but also to all technical information funded by the license contracts. [552 F. Supp. at 177](#). The plan as proposed applies only to United States patents; the Operating Companies would receive no rights to foreign patents. Objections to this aspect of the plan are discussed at note 116 *infra*.

¹⁰¹ AT&T's original proposal, which was modified at the request of the Department of Justice, would not have permitted the Operating Companies to engage in sublicensing on their own at all but would have required them to request AT&T to perform all sublicensing for them. The parties have since agreed to a modification of this part of the plan, and each Operating Company will now have the right directly to sublicense patents to any firm for use in supplying goods or services to that company, regardless whether the sublicensee is then a party to a license agreement with AT&T. See Department of Justice Response to Comments at 141.

For that reason, the Court is requiring that the judgment be modified . . . to provide for a proceeding . . . in which *the Court will determine whether the plan of reorganization is consistent with the decree's general principles and promises* (emphasis added).

552 F. Supp. at 224-25.

One of these promises concerned patents. In its August 11, 1982 Opinion, the Court took note of the fact that

AT&T has proposed granting to the Operating Companies, on a royalty-free basis, *all* existing patents and all patents issued for a period of five years following approval of the proposed decree.

552 F. Supp. at 177 (emphasis added). ¹⁰² This statement was not conjured up by the Court; it reflects repeated representations made to it both by AT&T and by the Department of Justice. For example, the Department stated in its Response to Public Comments [**75] of May 20, 1982 at 132 that

the reorganization plan will require AT&T to grant royalty-free licenses to the BOCs for *all* of its existing patents, and for *all* patents issued for a period of five years following entry of the proposed modification (emphasis added).

See also Department of Justice Response to Public Comments, May 20, 1982, at 38; AT&T Reply to Comments, May 21, 1982, at 123; and see note 105 *infra*.

These various representations, said the Court in its August 11, 1982 Opinion,

are adequate to support the conclusion that the Operating Companies will possess the necessary patent and technical information resources. ¹⁰³

[**76] The arguments now made by AT&T and the Department of Justice in support of their claim that the word "all" in their several representations to the Court did not really mean "all," and that in context they meant something else, are disingenuous to say the least. ¹⁰⁴

Both parties base their narrow interpretations on the circumstance that the representations were made at a time when the [*1084] proposed decree would have limited the Operating Companies to exchange telecommunications and exchange access services. ¹⁰⁵ While this is [***133] an accurate depiction of their timing, it does not in the

¹⁰² The Court further relied on the fact that "the parties have assured the Court that the Operating Companies will have the right to sublicense the AT&T patents and technical information to those providing them with goods and services." 552 F. Supp. at 177.

¹⁰³ 552 F. Supp. at 177. Neither AT&T nor the Department of Justice thereafter contradicted the Court's understanding, whether by a motion for reconsideration or otherwise.

¹⁰⁴ Indeed, the Court is disturbed that representations made by both parties in so clear and unequivocal a fashion are now claimed, after the decree has been entered, to be encumbered by gaping loopholes.

¹⁰⁵ See AT&T May 31, 1983 Memorandum at 24; Department of Justice Memorandum, June 10, 1983, at 3.

The Department of Justice points out that AT&T made the following statement during the Tunney Act proceedings:

The Decree requires that AT&T afford the BOCs sufficient technical information to independently provide exchange telecommunications service and exchange access functions (Decree, § I(A)(I)). In compliance with that provision, AT&T will continue to license to the BOCs on a royalty-free basis existing patents and patents issuing within five years after entry of the Decree. AT&T Reply Comments, May 21, 1982, at 123.

The Department further referred to its May 20, 1982 Response to Public Comments at 38, where it stated:

In addition, AT&T has made a commitment to the Department that it will continue to license to the BOCs, on a royalty-free basis, all existing patents and patents issued within five years of the date of entry of the modification. Such licenses will be

least support the conclusion that the promises were or reasonably should have been regarded as limited to patents which related to these lines of business.

[**77] These promises, whatever their timing, were relevant not only to the question of what resources were required to be transferred to the Operating Companies to implement the exchange telecommunications and access service provisions of section I(A)(1), but also to two other issues -- whether the Operating Companies should receive licenses to patents which they had in substantial part financed, and whether AT&T should be relieved of the obligation, imposed by the 1956 decree, to license its patents to all applicants on a nondiscriminatory basis.

First. There were numerous references throughout the Tunney Act proceedings to the fact that the Operating Companies, by means of the licensing contracts, had contributed substantial amounts to the cost of the research which led to the patents, and this was always regarded by all as at least a possible basis for awarding licenses to the patents to these companies. See, e.g., Department of Justice Response to Public Comments, May 20, 1982, at 38.

Second. The Department of Justice took the position during the Tunney Act proceedings that it was reasonable and in the public interest to relieve AT&T of the patent provisions of the 1956 decree [**78] which required it to grant licenses to all comers, foreign and domestic. One basic argument made to buttress the claim of reasonableness was that the fruits of the Bell System research would not simply be lost to the world because the reorganization plan would still require AT&T to grant royalty-free licenses to the Operating Companies for all of its existing patents and for all patents issued for a period of five years following entry of the decree.¹⁰⁶ The Department explained that the effect of such a grant would be that

the BOCs will have the right to sublicense these patents for their own use, including the manufacture of equipment for the BOCs' purchase. Thus, as a practical matter, many AT&T patents issued within the next several years must also be licensed to AT&T's competitors notwithstanding entry of the proposed modification.

...

Because of the existence of requirements that AT&T license patents heretofore [*1085] issued or issued during the next five years, and in view of the BOCs' sublicensing rights, it is apparent that a significant portion, if not all, of such 'work in progress' patents will be licensed There is no reason to believe [**79] that entry of the proposed modification will result in the removal of 'work in progress' patents from the pool of AT&T patents generally available to industry.¹⁰⁷

This expansive description of the proposed distribution of patent rights was not in any way limited, explicitly or implicitly, to section I(A)(1) of the decree or to intra-LATA services. The Justice Department's reference was to the effect of the proposed decree on the mandatory licensing provisions of the 1956 decree -- and these provisions clearly applied to all Bell System patents (including, of course, the CPE patents).

There is, in view of that history, no reasonable basis for the conclusion that the various references by AT&T and the Department of Justice to "all" patents did not mean just that, or that CPE patents in particular were meant to be withheld from the Operating Companies. Thus, when the decree was modified to authorize [**80] the Operating Companies to provide CPE, there was no need again to specify the patent rights incidental to this [***134]

for the life of the patent and will include the right to grant sublicensee to others to provide the BOCs with goods and services *for the BOCs' own use* (emphasis added).

Department of Justice June 10, 1983 Memorandum at 3.

The Department argues that the "own use" limitation is not consistent with an interpretation that these companies would be granted the right to sublicense patents to manufacturers who provided them with products for resale. But the decree grants to the Operating Companies the right to provide CPE, and these companies obviously need to be supplied with products to use in selling CPE to the general public. See *infra*.

¹⁰⁶ Department of Justice Response to Public Comments, May 20, 1982, at 132.

¹⁰⁷ *Id. at 132-33.*

modification¹⁰⁸ -- rights which were already guaranteed to the Operating Companies by the parties' representations and by the Court's retention of jurisdiction to give effect thereto. As the Court said with reference to patents and technical information,

When [the plan of reorganization] is submitted . . . the Court will evaluate [that plan] to make certain that [the appropriate details] conform to the general principles implied by these assurances.

552 F. Supp. at 177.

[**81] AT&T next contends that, if it were required to license all the Bell System patents to the Operating Companies which would then have the right to sublicense these patents to others, it would be required to "give away *its* technology" (emphasis added).¹⁰⁹ [**82] That formulation misstates the issue. Because of their financing of much Bell System research through the licensing contracts, what the Operating Companies will be receiving cannot fairly be described as AT&T's technology;¹¹⁰ that technology is as much theirs as it is AT&T's. See 552 F. Supp. at 177.¹¹¹ Also, as the Court has already noted (see Part II above) all of the assets and all of the liabilities of the Bell System are being distributed between AT&T and the Operating Companies. AT&T cannot assert that, in the context of that distribution, the patents are "*its*" technology unless it is also prepared to live with the proposition that the liabilities of the Bell System are "*its*" liabilities. In short, it is entirely appropriate under the decree for [*1086] the Operating Companies to receive licenses to the existing patents and to those which will be issued within the next five years.¹¹²

AT&T and the Department of Justice finally argue that under this rule, the Operating Companies would receive licenses to patents for services which the decree currently prohibits them from offering,¹¹³ and that there could be no justification for such an action. It is not true, however, that even with respect to such subjects as inter-LATA services, the Operating Companies will be entirely barred from entry; they will be in these lines of business as of the very [**83] date of divestiture, albeit on a limited scale,¹¹⁴ and they will therefore be able legitimately to make use of the pertinent patents¹¹⁵ and the technology they represent.¹¹⁶ [**84] Additionally, the line of business

¹⁰⁸ The Department of Justice and AT&T also point out that section VIII(B) -- which authorizes the Operating Companies to provide printed directory advertising services (*i.e.*, Yellow Pages) -- specifically provides that the technical information necessary to provide such services should be transferred to the Operating Companies. From this premise they argue that since section VIII(A) -- which authorizes the Operating Companies to provide CPE -- is silent with regard to the transfer of technical information, the conclusion may be drawn that no transfer of CPE patents to the Operating Companies was intended.

This argument is likewise unpersuasive, since there is another, more plausible explanation for the variation between sections VIII(A) and VIII(B). The language in section VIII(B) concerning technical information is part of a larger provision, similar to section I(A)(1), which was intended to result in the transfer to the Operating Companies of all Bell System assets used in the production of printed directories. See 552 F. Supp. at 194 n.263. If this provision had been used in the CPE context, it would have effectively assigned to the Operating Companies the embedded CPE and the existing network of retail outlets, contrary to the Court's intent. See 552 F. Supp. at 192 n.248.

¹⁰⁹ AT&T Response to Objections at 462.

¹¹⁰ That is, "central" AT&T, as distinguished from the Bell System as a whole.

¹¹¹ This is so even if it is assumed, as AT&T asserts, that no expenses have been billed to the Operating Companies for new CPE patents since May 1980. See testimony of Thomas Bolger, designated chief executive of Mid-Atlantic Region, June 2, 1983, transcript at 25594, 25597-98.

¹¹² With regard to all patents, AT&T will retain ownership and the right to use them in any lawful way it sees fit. None of the licensing requirements in the decree or in the plan of reorganization as required to be modified by the Court changes that fact in any way.

¹¹³ [**135] *E.g.*, patents applicable directly to inter-LATA services or to foreign operations.

¹¹⁴ *E.g.*, in the so-called "corridors" and the Official Services (see slip op. at pp. 115 and 91 *infra*).

restrictions which will initially apply might in the future be lifted by the Court pursuant to section VIII(C) of the decree, and the patents would be useful to the Operating Companies at that time.¹¹⁷

B. Sublicensing by the Operating Companies

It is thus clear that, in view of the representations made by the parties and accepted by the Court as part of the decree, as well as in view of the various supporting considerations (e.g., that the Operating Companies in significant part financed the research which produced the patents), the local companies are entitled to licenses to all the patents secured during the course of their association with AT&T and for five years after the association is dissolved.¹¹⁸ This does not mean, however, as AT&T assumes and as some of the intervenors strenuously urge, that the Operating Companies may make direct use of the patents with respect to services which are otherwise forbidden to them by the decree. What must be [**85] firmly kept in mind is that, since the Operating Companies will not be allowed to enter manufacturing, they will be able to make effective use of the patent licenses only to the extent that they will have the power to grant sublicenses to manufacturers. As explained below, that power will exist with respect to some subjects immediately upon divestiture; with respect to others it is inchoate and its actual exercise will depend upon the removal of the line of business restrictions under section VIII(C).

[*1087] The Operating Companies may [**86] grant sublicenses consistently with the decree to the extent that they will use the technology covered by the particular patents in their provision of products and services which they are authorized to sell or render.¹¹⁹ [**87] They may not, however, grant sublicenses with respect to any other patents, for two reasons: first, because they may not, absent special permission, engage in new lines of business (sections II(D), VIII(C)), e.g., the sale of patent rights simply as a business venture unrelated to their own use of the technology; and second, because AT&T's manufacturing competitors are not entitled, as such, to the fruits of the Bell System research ([552 F. Supp. at 176-77](#)).¹²⁰

¹¹⁵ See, e.g., testimony of Thomas Bolger, June 2, 1983, transcript at 25595.

¹¹⁶ With regard to foreign patents, AT&T argues that since the Operating Companies' exchange operations are confined to this country, the rights to AT&T's domestic patents provide all the patent rights the Operating Companies require to conduct exchange and directory advertising operations. AT&T Memorandum, May 31, 1983, at 24 n. **. However, in the CPE area, at least, foreign patents could be helpful to the Operating Companies even though they will not be operating overseas, for rights to foreign patents will enable them to purchase CPE which is manufactured entirely or in part by foreign companies. See testimony of Thomas Bolger, June 2, 1983, transcript at 25600; Memorandum of Mid-West Regional Holding Company, May 23, 1983, at 19; Memorandum of Mid-West Regional Holding Company, May 31, 1983, at 8.

¹¹⁷ The Operating Companies would benefit from these rights if any of the line of business restrictions should be lifted *at any time during the life of the particular patent*, not simply during the five years after divestiture. A lifting of the restrictions, or some of them, during that extended period is certainly conceivable.

¹¹⁸ It may be noted that requests to modify the proposed plan of reorganization so as to broaden the scope of patent rights granted to the Operating Companies were made by the Midwest Regional Holding Company (see Reply Memorandum of May 31, 1983); Thomas Bolger, designated chief executive of the Mid-Atlantic Region (see Second Amended Certificate of June 10, 1983); and Wallace R. Bunn, designated chief executive of the Southeast Region (see Statement of May 23, 1983).

¹¹⁹ See [552 F. Supp. at 177](#) (Operating Companies may grant sublicenses "to those providing them with goods and services"). Likewise, the Plan of Reorganization at 411-12, as modified by Amendment 34, provides that

AT&T will grant to each BOC the right -- which no BOC currently has -- to sublicense such AT&T patents to competing manufacturers for use only in providing the BOCs with goods or services embodying the inventions of the patents, provided that such sublicense does not prejudice AT&T's existing cross license agreements.

¹²⁰ Several intervenors have suggested that the plan be modified to allow the Operating Companies to sublicense patents to manufacturers for the provision of goods and services not only to the Operating Companies but also to other purchasers, arguing that such broader sublicensing rights would result in increased royalty payments to the Operating Companies and, due to greater economies of scale, to the reduction in cost of all goods produced by independent manufacturers. See, e.g., Reply of

On the basis of these principles, it is convenient to consider the sublicensing issue with respect to two distinct categories of products or services -- those which the Operating Companies will be allowed to market immediately upon divestiture, and those which they will not be permitted to market at that time.

The first of these categories includes, of course, customer premises equipment.¹²¹ In an effort, accordingly, [**88] to resolve whether the grant of sublicenses to CPE patents by the Operating Companies to manufacturers of CPE would be used by the local companies in their provision of CPE -- and whether therefore these companies may sublicense Bell System patents to such manufacturers -- the Court has received and considered evidence (in both oral and affidavit form) from the chief executives of the Regional Companies. This evidence indicates that the Operating Companies will use the end products of the sublicenses in several respects.

First. The Operating Companies must have the right to sublicense [**89] CPE patents to manufacturers of their choice if they are to develop a CPE product line distinct from that of AT&T. As Thomas Bolger, designated chief executive officer of the Mid-Atlantic [***136] Region, has pointed out, if the Operating Companies were not granted rights to CPE patents, "the selection of the vendor to use Bell technology to supply a BOC would be taken from the BOCs and left to AT&T [which] might, or might not, cross-license the vendor with whom BOCs wish to deal."¹²² [**90] Under such circumstances, the reliance [*1088] of the Operating Companies upon Western Electric equipment would be perpetuated, thus impeding competition in the telecommunications equipment markets. It follows, of course, that without CPE patent rights and the ability to market a distinctive product line, the Operating Companies would not be able to provide the "effective counterbalance to AT&T's market strength" in CPE marketing, which the Court sought to establish in modifying the decree. [552 F. Supp. at 192](#).¹²³

Second. If the Operating Companies are able to sublicense CPE patents, they will probably be able to negotiate lower equipment purchase prices and thus to share in the benefits from the Bell System [**91] research which they supported for so long.¹²⁴ This, in turn, will facilitate greater CPE sales and higher Operating Company revenues,

Wang Laboratories, April 13, 1983. The Court will not order such a modification, however, since it would, in effect, permit the Operating Companies to enter the patent licensing business.

¹²¹ AT&T contends that the Operating Companies need not be granted rights to CPE patents in view of the Court's observation that the Operating Companies will enter the CPE market "from a zero base." AT&T Response to Objections at 465 n.* (citing [552 F. Supp. at 192](#) & n. 248). There is nothing in the Court's language to support AT&T's conclusion; it merely justified the assignment to AT&T of the embedded CPE and the retail outlets.

¹²² Second Amended Certificate of Thomas Bolger, June 10, 1983, at 6. When questioned by the Court at the June 2, 1983 hearing as to whether the Operating Companies would use the CPE patents other than merely as a source of revenue, Bolger responded:

I would use them in order to allow me the freedom to make arrangements with suppliers, if I wanted to and if I found that it would be valuable for me to do so, so that I would have additional flexibility to procure CPE for my requirements. . . . I'm not going to sell the technology. I want to use it to help me enter the CPE market.

Transcript at 25596.

¹²³ The logic underlying the licensing of all patents to the Operating Companies was to assure their independence from AT&T by providing alternative sources of supply for goods and services which they would use in the businesses which they were authorized to conduct. These companies had long been a captive market for Western Electric, both for telecommunications equipment and for CPE. Operating Company independence from AT&T is therefore crucial to CPE marketing, just as it is with respect to exchange and exchange access functions. With regard to both businesses the Operating Companies will be free to purchase equipment (or services) from suppliers which do not require licenses under AT&T patents; with regard to both businesses it is important, however, that they be able to purchase from alternative sources equipment (or services) which would not be available without sublicenses under AT&T patents.

¹²⁴ As indicated, the Operating Companies will be permitted to sublicense CPE patents only in order to enable a manufacturer to provide goods for resale by the Operating Companies. See *infra*. Thus, any royalty received by the Operating Companies under such sublicenses will, in all probability, be in the form of a reduced wholesale price paid by the Operating Companies to the manufacturer.

and contribute in the long run to the financial viability of the Operating Companies (and indirectly to stable local telephone rates).¹²⁵

Third. The sublicensing of patents will permit the Operating Companies to benefit from increased competition among their suppliers -- another development which would tend to reduce the price of CPE purchased by the Operating [**92] Companies for resale. To the extent that greater competition among CPE manufacturers¹²⁶ and lower wholesale prices paid by the Operating Companies will result in lower retail prices for consumers, the public will benefit as well.

For these reasons, the Court concludes that the sublicensing of CPE patents to manufacturers of CPE would be a legitimate part of the Operating Companies' CPE marketing business.

In contrast to the substantive benefits which would inure to the Operating Companies from the ability to license CPE patents, only one possible adverse effect has been suggested.¹²⁷ The Department of Justice contends that Operating Company sublicensing of such patents would be a "step into the manufacturing area," contrary to section VIII(A) of the decree. Such sublicensing, according to the Department, would give the Operating [**93] Companies an interest in the success of their manufacturer-sublicensees, and this, coupled with the proprietary interest in the particular technology covered by the sublicense, would create an incentive for anticompetitive acts.¹²⁸

In substance, this argument is but a variation of the claims made by the Department when it opposed the Court's decision [*1089] to permit the Operating Companies to enter the CPE market. The Court then rejected the [***137] Department's assertion¹²⁹ that Operating Company marketing of CPE would result in anticompetitive conduct,¹³⁰ because it concluded that the subsidization by the Operating Companies of their retail CPE operations with monopoly-derived [**94] revenues was entirely improbable.

There is no good reason -- and the Department has offered none¹³¹ [**95] -- why the Operating Companies would have a greater incentive or opportunity to engage in such subsidization merely because they will be able to

¹²⁵ See Statement of Wallace Bunn of May 23, 1983 at 5-7; Testimony of Thomas Bolger, June 2, 1983, transcript at 25596.

¹²⁶ There is no reason why an Operating Company would sublicense a particular CPE patent to only one manufacturer. See testimony of Thomas Bolger, June 2, 1983, transcript at 25597.

¹²⁷ To be sure, another consequence would be that AT&T would acquire additional competitors in the CPE business, but this could hardly be regarded as an "adverse" effect in the context of this antitrust decree designed, in part at least, to open the CPE market to competition.

¹²⁸ Department of Justice Response to Comments at 143-44.

¹²⁹ At the same time, as the Court made clear, there are abundant reasons why the marketing of CPE by the Operating Companies is in the public interest ([552 F. Supp. at 191-92](#)).

¹³⁰ See [552 F. Supp. at 192](#); Memorandum of August 23, 1982.

¹³¹ The Department has not attempted to explain how the grant to the Operating Companies of the right to sublicense CPE patents would increase the potential for cross-subsidization. The Department has, however, given three reasons why in its view discrimination among manufacturers could occur: (1) the sublicensing of patents would increase the Operating Companies' incentive to discriminate against certain vendors because the companies would have an incentive to market only the products of manufacturers operating under the sublicenses; (2) the Operating Companies would have the ability to extract concessions from manufacturers, thus undermining the potential for variety and merit purchasing; and (3) a financial interest in the success of a particular technology would enhance the incentives of the Operating Companies to develop standards through the CSO, which they own and control, to favor such technology. Department of Justice Memorandum, May 31, 1983, at 12-13.

The principal difficulty with these arguments is that there will be no reason for the Operating Companies to sublicense to only one particular manufacturer (and thus to favor that manufacturer's products) and a number of reasons why sublicenses will be granted to a number of manufacturers. See notes 126 *supra* and 134 *infra*. Additionally, the type of "concessions" the Operating Companies would extract from their sublicensing rights would be lower wholesale prices, which is hardly anticompetitive or

sublicense CPE patents to independent manufacturers.¹³² Such an ability would no more facilitate coordination between separate corporations likely to lead to cross-subsidization than the purchasing contracts themselves, nor would the sublicensing of patents make anti-competitive activities any less detectable.¹³³ **[**96]** See [552 F. Supp. at 191-92](#).¹³⁴

Finally, it is surely not without significance that the manufacturers of CPE -- **[*1090]** whom the Department of Justice is ostensibly attempting to protect -- uniformly support the grant of sublicensing rights to the Operating Companies.

The Court concludes that the Operating Companies may sublicense their Bell System patent rights to manufacturers of CPE where the equipment produced under the sublicenses will be sold to the Operating Companies.

The same rule applies to the services which the Operating Companies will be authorized to perform. Clearly, they may sublicense **[**97]** patents for the manufacture of products which will assist them in providing intra-LATA service. Further, although prohibited from providing inter-LATA service generally, they will be in two relatively small areas of that market: corridor services¹³⁵ and Official Services.¹³⁶ Under the rationale applied to CPE, **[***138]** sublicenses may therefore be granted to manufacturers for the provision of equipment for the Operating Companies' own use in these two authorized inter-LATA services.¹³⁷

Finally, section VIII(C) of the decree provides that the Court may, in the future, allow the Operating Companies to enter lines of business presently prohibited to them.¹³⁸ While, of course, the Operating Companies could not, immediately upon divestiture, sublicense patents **[**98]** useful with respect to such lines of business (see note 120

contrary to the selection of vendors based on merit. Finally, if the Operating Companies were able to sublicense Bell System technology, more manufacturers would have access to this technology than if it were tightly controlled by AT&T, and it would be less likely rather than more so that the CSO would set standards that favored only AT&T and Western Electric products. See Independent Data Communications Manufacturers Assoc., Inc. Reply Memorandum, May 31, 1983, at 9 n. 19.

¹³² Irrespective whether a sublicense is involved, the Operating Companies will share no common facilities with manufacturers. Further, sublicensing of CPE patents by the Operating Companies is no more a step into manufacturing than is the sublicensing of exchange and exchange access patents designed to provide goods and services to the Operating Companies for their exchange operations -- yet the Department of Justice does not object to the latter. If Operating Company sublicensing of CPE patents were considered a form of manufacturing violative of the decree, then so presumably would the sublicensing of any patent by an Operating Company to a manufacturer -- and the promises of AT&T and the Department of Justice made during the Tunney Act proceeding would be reduced to a nullity.

¹³³ See Memorandum of Midwest Regional Holding Co., May 23, 1983, at 20 n. 20. It is difficult to see how sublicensing of patents would be a "step into manufacturing" likely to produce anticompetitive conduct also because the Operating Companies will, by necessity, have to negotiate with independent equipment manufacturers over a variety of contractual terms (e.g., specification and design terms, volume contracts, trademark licenses) in order to obtain a distinctive line of products for resale.

¹³⁴ The Operating Companies will have no economic incentive to engage in discriminatory conduct merely because they will have the ability to sublicense. As they enter the CPE market with a zero market share, their overriding incentive will be to enter into arrangements with as many vendors as is necessary to produce the highest quality, lowest priced products for resale to the general public. And the Operating Company executives have given every indication to the Court that this is precisely what they intend to do.

¹³⁵ See slip op. at pp. 115-16 *infra*.

¹³⁶ See slip op. at pp. 91-101 *infra*.

¹³⁷ The Operating Companies will be responsible for ensuring that those to whom sublicenses are granted do not exceed the scope of the activities allowed hereunder.

¹³⁸ This may be done under that section, if it is demonstrated that "there is no substantial possibility that [an Operating Company] could use its monopoly power to impede competition in the market it seeks to enter."

supra), the patent licenses assigned to them at the time of divestiture will become valuable through the automatic availability of the right to sublicense to the extent that section VIII(C) is successfully invoked in the future.¹³⁹

C. General Considerations

Two **[**99]** additional considerations applicable both to the patent issue and the "Bell" name and logo questions deserve brief mention.

First. The Department of Justice¹⁴⁰ has been opposed to the marketing of CPE by the Operating Companies from the very outset. It was the Department which insisted on a provision in the proposed decree prohibiting such marketing. See, e.g., Brief of the United States, June 14, 1982, at 30. When the Court on August 11, 1982, informed the parties that it would not approve the proposed decree unless that prohibition was eliminated, the Department sought reconsideration -- the only issue with respect to which it made such an effort. See Memorandum, August 23, 1982. Finally, when the Court denied reconsideration, the Department, on the very date of filing the modified decree, submitted a memorandum in which it expressed "substantial doubts" that the modification allowing the Operating Companies to market CPE was "properly within the Court's authority under the public interest standard or [was] supported by the antitrust theory and the record in these cases."

[100]** The decree entered in this case allows the Operating Companies to market CPE. That decree was signed by the two parties, and it was entered as a judgment of this **[*1091]** Court. Whatever may be the views of the Department of Justice or some of its officials regarding the wisdom of the CPE provision, it will be enforced. And the Court will not allow this provision to be stripped of its vitality by artificial restraints which would undermine the competitive position of the Operating Companies in the CPE business vis-a-vis AT&T.¹⁴¹

Second. The Court has previously taken note of the recent decision of the Federal Communications Commission concerning access charges. See 1983-1 Trade Cas. P 65,333 at 66,973-75 (April 20, 1983). Briefly, the Court was advised prior to the entry of the decree that whatever subsidy from long distance rates might in the **[**101]** past have been inherent in the local rate structure could and would be preserved by means of access charges levied on interexchange carriers.¹⁴² However, in December of last year, the FCC decided to levy such charges also on individual subscribers.¹⁴³

This access charge decision undermines one of the assumptions underlying the Court's approval of the decree¹⁴⁴ - that there would be no impairment of [HNS](#)[↑] the principle of universal service¹⁴⁵ -- that is, that everyone,

¹³⁹ Until the occurrence of such an event, if ever, the particular patent licenses in the possession of the Operating Companies will simply lie dormant. AT&T will not be injured by the grant to the Operating Companies of licenses to patents which, ultimately, these companies may never utilize. There is also no need, therefore, to fear that the Operating Companies will use their patent rights to "peddle" AT&T technology. AT&T Memorandum May 23, 1982, at 23.

¹⁴⁰ Whether or not AT&T sought the Bell name and patent restrictions or was required or persuaded by the Department of Justice to agree to them, there can be no doubt that they are advantageous to AT&T, for they would, as a practical matter, eliminate competition from the Operating Companies or significantly curtail the effectiveness of such competition.

¹⁴¹ I.e., restraints which would unnecessarily and improperly deprive the local companies of the necessary and appropriate patent and trademark rights.

¹⁴² That is, charges levied upon the carriers as a prerequisite to their obtaining access to the local loops and hence to the local subscribers.

¹⁴³ See *In the Matter of MTS and WATS Market Structure*, CC Docket No. 78-72 Phase I (adopted December 22, 1982). The FCC also decided to begin this program on January 1, 1984, the date of the reorganization of the Bell System. This effective date makes it appear that the imposition of this burden on consumers is related to the decree herein -- which clearly it is not (see note 292 *infra*).

¹⁴⁴ See [552 F. Supp. at 169, 224 n. 376](#).

[**102] regardless [***139] of income, would have access at least to a minimum of telephone service, in recognition of the fact that this service is a necessity rather than a luxury.¹⁴⁶ The FCC's decision unnecessarily¹⁴⁷ jeopardizes this objective.

[**103] Whatever its authority or lack of it with regard to this development,¹⁴⁸ the Court may certainly take it into account, as further support for conclusions which are sound for other reasons. In passing upon the trademark, trademark, and patent issues, as well as on various other questions, the Court has done just that (see slip op. at pp. 151-52 *infra*). In each instance, the Court's decision is fully justified by other, specific considerations cited in the text, but in each such instance the Court also found that its decision was buttressed by the need to cope with the threat posed to universal, low-cost, local telephone service.

V

Employees

A. *Pension Plan*

Two challenges are made to the employee pension provisions of the plan of reorganization.

[*1092] 1. *Union Challenge*

The Communications Workers of America (Union)¹⁴⁹ claims that the plan's proposal to divide the Bell System Pension Plan (BSPP) into nine separate plans will materially alter [**104] the terms and conditions of employment within the Bell System, and that the plan therefore impermissibly interferes with the Union's right to bargain over pension benefits.

The two current pension plans, the BSPP covering nonmanagement employees and the Bell System Management Pension Plan (BSMPP) covering management employees, have existed in their present form only since 1980. Prior to that time, the many separate companies which constitute the Bell System administered separate pension plans. In October 1980 the plans were aggregated,¹⁵⁰ and even though a formal separation between management and nonmanagement personnel was maintained, the assets of both the BSPP and BSMPP have since 1980 been pooled for investment purposes into one Bell System Trust. The plan of reorganization would divide each integrated plan into nine plans to correspond to the nine entities which inherit AT&T's assets and functions after January [**105] 1, 1984.¹⁵¹

¹⁴⁵ Universal service has been mandated by the Congress, and until December of last year it had been a principal policy goal of the Federal Communications Commission.

¹⁴⁶ One might consider, for example, such uses as the ability to reach fire, police, and other emergency services; the need of the elderly to reach physicians, close relatives, or others who might give them aid; and the desire of those in isolated areas of the country for contact with others.

¹⁴⁷ That decision, at bottom, rests upon the proposition that novel bypass technologies may erode the financial health of the Operating Companies, and that increased support from the residential ratepayers will allow these companies to remain competitive. There is no reason to believe that bypass on a large scale is imminent. Further, evolving technology may be expected to result overall in reduced costs. Rather than to serve as a basis for imposing a new burden on local ratepayers, such technology and such reduced costs would better be channelled to benefit all segments of the public, including the local subscribers.

¹⁴⁸ See slip op. at p. 154 *infra*.

¹⁴⁹ Other labor unions are also involved, but they did not submit comments to the Court.

¹⁵⁰ The Union states that the decision to merge the various plans was a subject of collective bargaining, but AT&T disputes this assertion. AT&T Response to Objections at 399.

¹⁵¹ For pension purposes, these nine entities are AT&T, the Central Staff Organization, and the seven Regional Companies.

The Union, which is concerned specifically with the BSPP, offers eight changes it believes this division would cause, but upon examination they reduce to three general categories. First, the Union complains that the plan would phase out the "interchange" provisions in the BSPP governing the portability of service credit from one Bell System company to another. Second, it speculates that each of the nine plans will be financially more risky than the existing central plan,¹⁵² with the result that an employee's benefits may be reduced. Third, the Union maintains that the post-divestiture plans -- as described in the plan of reorganization -- would treat former employees who are rehired differently [**106] from the way they now are treated for pension purposes.¹⁵³

In approving the divestiture and rejecting the Union's request that the decree be modified to provide that it would not preclude [***140] continued national bargaining in telecommunications, the Court stated last August:

There is no need [**107] for such a modification. There is nothing in the proposed decree or in general principles of law which would preclude or interfere with such bargaining, and there accordingly is no reason whatever why, following the entry of the decree and the reorganization, such bargaining cannot continue as in the past.

The settlement of the lawsuits . . . do[es] not involve AT&T's labor relations and, more particularly, [it has] nothing to do with the Communications Workers of America or its relationship with the Bell System. [citations omitted]. It follows that the union, on the one hand, and AT&T, and the divested Operating Companies, on the other, will be entirely free to arrange their mutual labor relationships as the Bell System and the union did in the past, irrespective of the structural [*1093] changes that may be brought about by the decree

552 F. Supp. at 210.

The Union cites this language, the labor exception to the Sherman Act, federal labor policy, and the lack of relation between the Bell System Pension Plan and AT&T's alleged anticompetitive conduct as reasons why the Court should not approve the plan's proposed treatment of the BSPP but should commit [**108] the future of the BSPP to the results of collective bargaining.

First. The Court observes that the plan of reorganization does acknowledge the role of collective bargaining over pension benefits. AT&T states that

the provisions of this section [regarding pensions] are based on the Bell System's plans and trusts as they currently exist. These plans and trusts may be modified during 1983 or thereafter as a result of collective bargaining or other requirements.¹⁵⁴

Thus, it does not appear that AT&T is attempting to ride roughshod over the bargaining rights of its employees.

Second. Although AT&T could not materially alter pension benefits [**109] unilaterally (see [NLRB v. Katz, 369 U.S. 736, 8 L. Ed. 2d 230, 82 S. Ct. 1107 \(1962\)](#), [Bastian-Blessing, Division of Golconda Corp. v. NLRB, 474 F.2d 49 \(6th Cir. 1973\)](#)), this principle and the cases which support it are inapplicable here.¹⁵⁵ We are not dealing here

¹⁵² For example, the union posits that gains in one Operating Company's assets would no longer be available to compensate for losses in another Company's assets.

¹⁵³ A fourth criticism -- that the distribution of the Trust's assets may be out of synchronization with the distribution of its liabilities, i.e., the accrued benefits of employees -- is plainly without merit. Elaborate actuarial studies will be performed after employee assignments have been finalized to ensure that pension assets in the appropriate amounts follow each employee. A company would therefore not receive a disproportionate number of employees near retirement without also receiving a proportionately greater amount of pension assets.

¹⁵⁴ Plan of Reorganization at 281 n. 317. Moreover, AT&T and the Union have already bargained over certain effects of divestiture on employees' pension and health benefits, and the results of this bargaining are reflected in the Amended New Entities Arguments dated March 26, 1982, March 30, 1982, and April 5, 1982. See AT&T Response to Objections at 397.

with unilateral employer action in the sense in which it is condemned by the labor laws, but with a break-up of the employer company as part of a comprehensive settlement of a complex antitrust action. See [Newspaper Guild of Greater Philadelphia, Local 10 v. NLRB, 636 F.2d 550, 560 \(D.C. Cir. 1980\)](#).

[**110] Furthermore, contrary to the Union's assumption, the decree in this case requires far more than a separation of AT&T's telecommunications functions; it requires the complete economic separation of the various components of the Bell System. See, e.g., sections I(A)(1); I(A)(3). It would be entirely inconsistent with the decree to perpetuate a unified pension plan, with the result that employees of the independently owned and functioning Operating Companies would continue to look to AT&T for their pension benefits. As it is, equipment manufacturers are concerned that they may not receive equitable treatment from Central Staff Organization employees due to their alleged emotional ties to their former parent company. Such claims would acquire considerable plausibility if CSO and Operating Company employees believed that they had a continued economic stake in AT&T in the form of their retirement benefits.

At a minimum, the decree requires that the pension assets of employees follow them to their new assignments, and that the Regional Companies develop, as soon as possible, self-sufficient pension plans.¹⁵⁶ [**112] Union-employer [***141] [*1094] bargaining for a continued, unified pension [**111] plan is thus not a viable option. This is a structural matter covered by the decree that is not inconsistent with federal labor policy, for there will be no "changes in coverage, levels, or administration of the plan." [Connecticut Light & Power Co. v. NLRB, 476 F.2d 1079, 1082 \(2d Cir. 1973\)](#).¹⁵⁷

The phasing out of unlimited portability¹⁵⁸ [**114] is likewise a natural consequence of divestiture, for it would surely be inconsistent with the independence of the Operating Companies from AT&T and from one another to

¹⁵⁵ In *Katz*, the Supreme Court held unlawful an employer's unilateral establishment of new systems of wage increases, sick leave provisions, and merit raises at a time when it was negotiating with the union regarding the same subjects. *Bastian-Blessing* likewise involved the unilateral termination by the employer of a health insurance plan which had been the subject of collective bargaining. Neither case even remotely resembles the facts of the instant situation.

¹⁵⁶ AT&T proposes to continue to administer the pension plan of any Regional Company that requests such "full service" assistance for a transition period during which the Company would acquire the skills and resources to manage its own pension plan. Regional Companies that request this option would receive their share of pension assets no later than 1987. Plan of Reorganization at 297. The Court approves of AT&T's continued management of a Regional Company's pension plan with the expectations that the Regional Companies choosing this option will have as much authority over their respective plans while they are technically under AT&T's administration as they desire, and that the transition periods will be kept to a minimum. It would be impractical to insist that assets be immediately transferred to a company that does not believe it can prudently manage them. At the same time, continued linkage between AT&T and the Regional Companies is not to be encouraged. In this regard, AT&T proposes to continue managing the Bell System Trust's real estate investments, which amount to approximately \$3.1 billion. The Court approves this aspect of the plan, although reluctantly, in view of the nonliquid nature of these assets and the allowance for a Regional Company or AT&T to buy out of the arrangement.

¹⁵⁷ AT&T and the Department of Justice represent that this will be the case: benefit amounts and entitlement and eligibility requirements will not change. The financial performance of the individual plans may vary but the Union has offered nothing but speculation that any such variation would have an actual effect on the level of benefits, particularly since the fair market value of the BSPP and BSMPP trusts exceeds the present value of accrued benefits. Plan of Reorganization at 295 n. 332.

¹⁵⁸ Under the plan, unlimited portability would remain in effect for one year after divestiture, except that employees in certain specified job categories who work on facilities shared by the Operating Company and AT&T would be granted longer portability entitlements. See *infra* at slip op at pg. 88. Portability would continue after the one-year "true-up" period among the Operating Companies controlled by each Regional Company.

The Union objects to the elimination of unlimited portability insofar as it overrides a benefit secured previously through collective bargaining. AT&T agrees with the Union that "many of the employee protections to be provided during the true-up period are subject to collective bargaining" (AT&T Response to Objections at 382 n. 1) but argues that the decree requires the parties and the Court to set a definite time limit for the true-up period. The Court agrees that the decree's separation between AT&T and the Operating Companies requires the establishment of a fixed true-up period for employee transfers, and it finds that the one year

allow employees to rotate among them as freely as if these companies were related entities.¹⁵⁹ The Court therefore approves AT&T's proposals which would divide the two existing plans into nine separate plans, and the provisions governing the division of pension assets through actuarial studies -- both before and after divestiture -- to ensure that the assets will be equitably distributed. [**113]

Third. There is merit in the Union's position that the Court need not and should not involve itself in the specific terms of the post-divestiture pension plans beyond their structure. Unlike the threshold issues of the pension plans' division and the elimination of unlimited portability, the precise terms of the pension plans admit of several resolutions each of which would be consistent with the decree.¹⁶⁰ However such nonstructural aspects of the pension plans may have been resolved in the past, their resolution is not cast in concrete. Accordingly, they are open for further decision, whether by collective bargaining when the contract governing the current pension plan expires in August 1983, or otherwise as AT&T and the Union see fit. The Court's approval of the plan of reorganization is therefore not to be regarded as an endorsement of whatever AT&T may be planning with respect to post-divestiture pension benefits. To put it another way, there is nothing in the Court's approval of the plan of reorganization [**115] (other than the structural and portability matters discussed above) which would in any way impair the obligation of AT&T to bargain in good faith with the Union.

[*1095] 2. State Objections

The State of Maine and the Maine Public Utilities Commission argue that the plan of reorganization improperly allocates certain pension assets to AT&T. Under the plan, the assets of BSPP and BSMPP would be divided and allocated among the nine post-divestiture entities so that the accrual rates¹⁶¹ for each of the new plans after divestiture would be approximately the same as will be the rates under the AT&T plans immediately prior to divestiture.

[**116] The allocation would be accomplished in two steps: first, there would be coverage of an amount equal to the present value of accrued benefits for each participant; second, all remaining [***142] assets -- the difference between the present value of assets and liabilities -- would be allocated so that the accrual rates for the post-divestiture pension plans would be approximately the same as the accrual rates in effect for the AT&T plans immediately prior to divestiture. Maine does not quarrel with the first step which, in any event, is required by the Employee Retirement Income Security Act (ERISA) and section 3414(1) of the Internal Revenue Code. However, in its view, the assets in excess of those needed to cover accrued benefits¹⁶² should be allocated in proportion to the contributions which produced the excess rather than on the basis proposed by AT&T.

[**117] Maine claims that because some 10 to 20 percent of present Operating Company employees will be transferred to AT&T,¹⁶³ it is likely that excess assets originally contributed to the pension plans by the Operating Companies will improperly be transferred to the AT&T plan (thus reducing proportionately its pension liabilities).¹⁶⁴

proposed in the plan is reasonable. To the extent that it might be thought that this provision affects collective bargaining rights, such rights are superseded by the Court's power to enforce its decree. Cf. *Franks v. Bowman Transportation Co., 424 U.S. 747, 47 L. Ed. 2d 444, 96 S. Ct. 1251 (1976)*.

¹⁵⁹ See, e.g., Comments of Satellite Business Systems, filed Feb. 15, 1983, at 65.

¹⁶⁰ There is nothing in the provisions of the decree governing, for example, the treatment by the post-divestiture plans of former employees who are rehired, or what rules ought to determine when an employee's pension rights become vested.

¹⁶¹ An accrual rate is the percentage of total payroll that must be contributed to a plan periodically in order to meet future pension liabilities.

¹⁶² According to AT&T's 1982 Annual Report (p. 38), the fair market value of the pension assets exceeded the present value of accrued benefits by more than \$11.5 billion.

¹⁶³ This is due to the separation of interexchange and CPE operations from the Operating Companies. Plan of Reorganization at 456 n. 430.

It may well be true, as Maine contends¹⁶⁵ that the law does not affirmatively require that excess assets must follow the transferred employees from the Operating Companies to AT&T since there is no requirement that employees receive the benefit of excess assets.¹⁶⁶ **[**119]** What is flawed, however, is **[**118]** the State's argument that it is improper for the plan of reorganization to allocate the excess funds in accordance with future payment obligations and contribution levels, and that these funds must be allocated instead in accordance with the contributions made in the past. What this argument overlooks is that while the Operating Companies would be losing excess assets associated with the transferred employees, they would also be losing liabilities, i.e., the benefits the employee will accrue in the future. Under Maine's proposal, entities with higher liabilities after divestiture than before would have fewer pension fund assets to meet their future obligations, requiring a higher funding rate. Conversely, those companies which will have lower pension liabilities after divestiture than before would enjoy a windfall. The most important consideration is the interest of the participants and beneficiaries,¹⁶⁷ and they are best served by the proposed plan.¹⁶⁸

[*1096] B. Employee Transfers

In addition to the one-year true-up period¹⁶⁹ immediately following divestiture during which any employee may be transferred between AT&T and an Operating Company¹⁷⁰ **[**120]** without loss of seniority rights or other benefits,¹⁷¹ the plan further provides that employees in four specific job categories¹⁷² **[**121]** may be transferred without loss of benefits **[***143]** after the one-year period.¹⁷³

¹⁶⁴ To the extent that some entities (either AT&T or an Operating Company) had proportionately more excess than others, the plan would equalize the extent of any such excess regardless of which Operating Company was the source of the overfunding.

¹⁶⁵ Reply of Maine and Maine PUC, April 13, 1983, at 19.

¹⁶⁶ See, e.g., *Washington-Baltimore Newspaper Guild Local 35 v. Washington Star Co.*, 555 F. Supp. 257 (D.D.C. 1982); *Rev. Rul. 83-52*, 1983-13 I.R.B. 7; see also ERISA § 4044(d)(1).

¹⁶⁷ See ERISA, § 404(a)(1); *Donovan v. Bierwirth*, 680 F.2d 263 (2d Cir. 1982).

¹⁶⁸ There is also no evidence to support the assumption that the Operating Companies will have contributed to excess funds in greater proportion than has AT&T.

¹⁶⁹ See note 158 *supra*.

¹⁷⁰ It may be noted that all the transfers during the true-up period will be the result of arm's length negotiations between AT&T and the Operating Companies, and there is thus no occasion for either a "post-divestiture re-evaluation plan," judicial involvement, or the appointment of special Operating Company representation, as some have suggested. *E.g.*, Comments of the State of Michigan and Michigan Public Service Commission, Feb. 11, 1983 at 30; Comments on AT&T's Plan of Reorganization of the Public Service Commission of the State of Missouri, February 15, 1983, at 14. It is unclear what representation could be provided by the Court for companies which, after divestiture, will be independent entities. If the true-up process is not being conducted in accordance with the decree and the plan, ample means will be available for corrective action.

¹⁷¹ The Court expects, as AT&T represents, that the one-year true-up period will not be used for frequent personnel transfers but as a "time for correcting mistakes that are bound to occur in a reorganization of this magnitude." AT&T Response to Objections at 378.

¹⁷² These categories are (1) Operating Company service center employees who will write inter-LATA orders for AT&T under a sharing contract until such time as the contract ends and they are reassigned to AT&T, but no later than 5-1/2 years after divestiture; (2) AT&T operators who will provide inter-LATA Call Completion and Assistance services until Operating Companies establish such systems and they are reassigned to the Operating Companies, but no later than 10-1/2 years after divestiture; (3) Operating Company personnel who will provide circuit provisioning functions for AT&T until AT&T assumes this responsibility, but no later than 5-1/2 years after divestiture; and (4) employees providing installation and maintenance services for "special services" both by AT&T for Operating Companies and vice versa, until the companies provide their own services, but no later than 5-1/2 years after divestiture. AT&T claims that, for various reasons, it would be inefficient for AT&T and the Operating Companies to provide these functions independently immediately upon divestiture. See AT&T Response to Objections at 388 n.*.

Section I(A)(2) of the decree provides that AT&T and the Operating Companies may continue to share certain facilities, and the plan implements that provision by specifying that the entities "intend to cease sharing network facilities as promptly as is reasonably feasible." Plan of Reorganization at 56. The plan's employee transfer provisions are justified by AT&T on the basis that the job functions of these employees will begin with one entity but will need to be transferred to another as transitory arrangements for the sharing of multifunction facilities are phased out. Response to Objections at 382-83.

The principal objections raised to the plan's grant of [**122] transfer rights to the employees are that this may result in fraternization between AT&T and Operating Company personnel, the disclosure of equal access network information to AT&T employees, the perpetuation of loyalty to the Bell System, and the provision by Operating Company personnel of certain inter-exchange services to AT&T but not to other interexchange carriers. See, e.g., Comments of Satellite Business Systems, February 15, 1983, at 65-66, 91.

The intervenors' concerns are not frivolous; however, given the necessity for some sharing of multifunction facilities, the solution adopted in the plan is, in general, a reasonable one. The basic alternative to the provisions for transfers without loss of benefits is a lay-off of the affected employees by one entity to be followed by a (possible) rehire by the other. The Court has no intention whatever of unnecessarily imposing such a hardship on these employees. [*1097] Moreover, the entire matter must be kept in perspective; the individuals involved will not be managers or other policy makers but relatively low level employees. It is thus unlikely that manipulation or the disclosure of sensitive information to AT&T [**123] will occur. The loss of employment security and the unusual and unnecessary inefficiencies which would be the consequence of a rejection of most of the transfer provisions can therefore not be justified.

There is, however, one exception to this principle. AT&T has not demonstrated why Operating Company personnel should write inter-LATA orders for AT&T for up to 5-1/2 years after divestiture. Such order-writing is purely an interexchange function; it is performed by persons, not "facilities" as that word is used in section I(A)(2); and this service would not be available to any interexchange carrier other than AT&T. Indeed, such order-writing by Operating Company personnel for AT&T could provide the latter with a significant competitive advantage. The Court will not permit sharing of this function, and it will require the deletion of references to such sharing from the plan of reorganization (at pp. 253, 254, 279-80, and 287), unless the benefits are made available to all interexchange carriers.

The Union, unlike the other intervenors,¹⁷⁴ suggests that the Court require modification of the plan to permit unlimited transfers of employees among the post-divestiture Bell System [**124] entities. As noted *supra*, such a provision would be flatly inconsistent with section I(A) of the decree and with the underlying rationale of the judgment -- that the economic integration among the various Bell System entities must cease. That proposal, too, will therefore be rejected.

VI

Official Services and Other Facilities

With one major exception, the division of network facilities and other assets is reasonable and fully consistent with the decree.

A. Official Services

¹⁷³ Under the plan, the duration of the transfer is limited to the period necessary to accomplish the change of multifunction facilities to exclusively AT&T or Operating Company facilities. This will occur not later than five years and six months after divestiture, except for operator services personnel who may be transferred up to ten years and six months after divestiture. Plan of Reorganization at 287-88. See note 172 *supra*.

¹⁷⁴ However, the State of New York would permit all employees in shared services to have and exercise transfer rights, as distinguished merely from the four categories of employees listed in the plan.

The Court will not approve the decision made in the plan of reorganization with regard to so-called Official Services. These services represent communications between personnel or equipment of an Operating Company located in various areas and communications between Operating Companies [***144] and their customers.¹⁷⁵ [**126] The plan of [**125] reorganization provides that Bell System facilities used in whole or in part for Official Services will be assigned according to the same rules applicable to other transmission facilities; meaning that, if facilities are used solely or predominantly to perform inter-LATA functions, they will be assigned to [*1098] AT&T even if the functions constitute Official Services.¹⁷⁶ Additionally, the Department of Justice has indicated to one or more Operating Companies¹⁷⁷ that it would object if they constructed and operated their own inter-LATA facilities to administer Official Services.¹⁷⁸ In the view of the Court, neither the plan's treatment of Official Service facilities nor the position of the Department of Justice is consistent with the principles underlying the decree.

Each Operating Company conducts its authorized operations in several LATAs. In order to achieve operational efficiencies, the four basic categories of Official Service systems¹⁷⁹ [**127] have been designed to serve geographical areas which are usually larger than individual LATAs. For example, the so-called "Operational Support System Networks" (see note 179 *supra*) typically cover an entire state or major portion of a state, permitting the monitoring and controlling of trunks and switches and the routing of traffic from a centralized location.

¹⁷⁵ There is some dispute as to whether Official Services are limited to Operating Company internal communications or whether they include communications between an Operating Company and its customers. See AT&T Response to Objections at 95-96 n. *; Supplemental Affidavit of William Weiss, April 12, 1983, at 9; letter from Raymond Burke, April 13, 1983, at 2 n. *.

The Court concludes that for purposes of the discussion and decision herein "Official Services" must properly include customer communications. As Raymond Burke points out (April 13, 1983 letter at 3 n. *),

no charges apply to communications which AT&T classifies as 'official' service . . . [and] even where there is a charge for such services as directory assistance, any inter-LATA administrative facilities involved are not 'for hire.'

Similarly, Thomas Bolger notes (Amended Certification of April 6, 1983, at 5-6),

a customer in Salisbury, Maryland actually speaks to a directory assistance operator in Baltimore, but that is done solely to facilitate the conduct of these exchange operations in efficient work groups. The customer does not care where his call is answered and he pays no charge for the referral of his call from a local central office to a distant company location for this purpose.

¹⁷⁶ See AT&T Response to Objections at 95-96.

¹⁷⁷ The several communications from the Department of Justice to the Operating Companies may not be entirely consistent with regard to this subject, however.

¹⁷⁸ See Amended Certification of Thomas Bolger, April 6, 1983, at 5; letter from Raymond Burke, April 13, 1983, at 1.

¹⁷⁹ The Operating Companies manage their business through the following complex networks for the transmission of voice and data communications:

(1) The Operational Support System Network is a network of dedicated voice and data private lines used by the Operating Company to monitor and control trunks and switches. These communications links are vital to the proper operation of the network since, for example, they enable Operating Company personnel to measure the maintenance status of trunks and switches and instantly to control equipment and reroute traffic.

(2) The Information Processing Network is a network of dedicated data lines linking the Operating Companies' information system computer. It is used to transmit data relating to customer trouble reports, service orders, trunk orders from interexchange carriers, and other information necessary for carrying out the Operating Companies' business.

(3) Service Circuits comprise a network of largely dedicated voice lines used to receive repair calls and directory assistance calls from Operating Company customers. These communications ensure the maintenance of telephone service and they provide directory assistance to Operating Company customers.

(4) Voice communications are used by the Operating Companies for hundreds of thousands of calls relating to their internal businesses.

Directory assistance, repair service offices, and business offices likewise serve geographical areas which are larger than individual LATAs.¹⁸⁰

For the reasons stated below, it makes no sense to prohibit the Operating Companies from using, constructing, and operating on their own the facilities they need to conduct Official Services, whether they be intra-LATA or inter-LATA in character, and to require them instead to lease such facilities from AT&T.¹⁸¹

[128] [*1099]** The Department of Justice recognizes "that the BOCs may have constructed their internal data processing and operational support systems on the assumption that communications links between their facilities would be over BOC-owned facilities,"¹⁸² and further that to require such communications to be "placed on commercial facilities might abruptly increase the BOCs' cost of providing service."¹⁸³ Yet, relying solely on the curt rationale that such traffic is correctly classified as inter-LATA, the Department supports the assignment of all existing inter-LATA Official Service facilities to AT&T. This solution is both unwise and unnecessary.

[129]** Only two alternatives would be available to the Operating Companies under the current plan, both of them undesirable. One option would be for the companies to redesign their Official Service systems so that none of their internal communications crosses LATA boundaries. This would result in a loss of the operational and cost efficiencies produced by the centralization which currently exists in the local phone system.¹⁸⁴ In effect, a separate, self-contained Operating Company would be created for each LATA -- a result clearly not contemplated by the decree.

The other option would be to have the Operating Companies' Official Service communications carried by AT&T or another interexchange carrier. See **[**130]** note 181 *supra*. This alternative would not only be very costly¹⁸⁵ but it suffers from a number of other infirmities. As William Weiss, chief executive-designate of the Midwest Region, points out:

Speed and reliability are critically important with respect to the BOCs' monitoring and controlling of their switches and trunks. BOC operating personnel and computers must have continuous, instantaneous

¹⁸⁰ As Thomas Bolger, designated chief executive of the Mid-Atlantic Regional Company, has pointed out:

In order to reduce costs and maximize efficiency, the BOCs have computer processing centers which receive billing and other data from company locations in a number of LATAs. Similarly, calls from Operating Company customers seeking such services as directory assistance are currently routed between BOC offices to centralized locations in other LATAs.

Amended Certification of Thomas Bolger, April 6, 1983, at 5.

¹⁸¹ **[**145]** The Department of Justice suggests that where Operating Company facilities are transferred to AT&T under the assignment process, it would be appropriate for AT&T to lease back to the Operating Company those circuits currently dedicated to Official use. However, an Operating Company's ability to lease existing Official Service facilities from AT&T would be limited to the duration specified in the plan of reorganization for shared facilities -- that is, eight years. See Department of Justice Response to Comments at 35; AT&T Response to Comments at 115; Amended Certification of Thomas Bolger, April 6, 1983, at 5. After this eight-year period, the Operating Companies would have to hire the services of AT&T or other interexchange carriers to meet all their inter-LATA Official Service needs.

¹⁸² Department of Justice Response to Comments at 35. Indeed, ironically, in spite of the fact that most Operating Company Official Service communications are presently conducted over facilities "owned" by these companies themselves, many such facilities would now, under the plan, be assigned to AT&T. Supplemental Affidavit of William Weiss, April 12, 1983, at 10.

¹⁸³ Department of Justice Response to Comments at 35. However, that is precisely what will happen in eight years under the Department's scheme. See note 181 *supra*. Even during this eight-year period, any Official Service demands which cannot be satisfied by existing circuits leased from AT&T would have to be "placed on" commercial facilities of an interexchange carrier.

¹⁸⁴ In recent years, many of the Operating Companies have achieved significant cost savings through the modernization of their internal management processes. Supplement to Sworn Statement of Wallace Bunn, April 7, 1983, at 5 (47,000 internal computer terminals in operation throughout Southeast region alone).

¹⁸⁵ It has been estimated that for the Mid-Atlantic region alone, the total expenditures for all types of inter-LATA Official Services would be approximately \$125 million annually. Amended Certification of Thomas Bolger, April 6, 1983, at 6.

information regarding traffic loads and the operating status of equipment. When traffic overloads or equipment malfunctions occur, they must have the capability to immediately control equipment and reroute traffic. Forcing the BOCs to rely on third parties for official service communications . . . could seriously jeopardize the BOCs' fulfillment of their responsibilities to provide intra-LATA communications and exchange access

Moreover . . . [in] many instances, the BOCs could more efficiently conduct these communications over inter-LATA facilities constructed and owned by the BOCs. The BOCs' ability to deploy new transmission technologies is at least as good and probably better than that of third parties who might provide us with inter-LATA services. The [**131] cost of building facilities utilizing those new technologies might be far less than the cost of leasing facilities employing older, and thus higher-priced technologies.

. . . The critical point is that the BOCs should be free to conduct their official services communications in the optimal [*1100] manner, selecting whichever option is the most reliable and cost-efficient.¹⁸⁶

[**132] Such significant burdens should not be imposed on the Operating Companies unless this is clearly required by the decree. An [***146] examination of the decree's provisions shows, however, that a prohibition on the maintenance of inter-LATA Official Service facilities by the Operating Companies is required neither by its spirit nor by its letter.

The Operating Companies are prohibited from engaging in intercity, inter-LATA services in order to prevent a recurrence of the alleged anticompetitive practices of AT&T, which was claimed by the government to have used its local monopolies to disadvantage its intercity competitors in a variety of ways. That rationale is wholly inapplicable to the provision of inter-LATA service by each Operating Company for its own internal, official purposes.¹⁸⁷ Only by a highly abstract distinction between services that are once and for all labelled "competitive" or "monopolistic" could that prohibition be applied to the Operating Companies' Official Services. Moreover, it is ironic that a prohibition which grew out of AT&T's dominant competitive position and its alleged misuse of that position is now sought to be applied in such a way as to afford AT&T a substantial [**133] financial benefit by giving it the opportunity to carry, for a profit, the Operating Companies' own internal, official communications which these companies are perfectly able to carry themselves and have, indeed, carried themselves in the past.¹⁸⁸

[**134] Nor is so illogical a result required by the strict terms of the decree. While the Operating Companies are prohibited by section II(D)(1) from providing "interexchange telecommunications services," section IV(P) defines "telecommunications services" as "offering for hire of telecommunications facilities" (emphasis added). Obviously,

¹⁸⁶ Supplemental Affidavit of William Weiss, April 12, 1983, at 13-14. An increasing number of private corporations with operations dispersed over large geographic areas, such as oil companies and electric power utilities, have opted to construct and operate their own circuits by which their administrative communications are transmitted. Letter from Raymond Burke, April 13, 1983, at 2; see also, Amended Certification of Thomas Bolger, April 6, 1983, at 6; Supplement to Sworn Statement of Wallace Bunn, April 7, 1983, at 6.

¹⁸⁷ The Operating Companies are prohibited from providing inter-LATA telecommunications services under the decree for two reasons: the possibility of discriminatory interconnection practices and the possibility of subsidization of interexchange services with revenues from local exchange services. See [552 F. Supp. at 188-89](#). Neither of these reasons is implicated by the ownership and operation by an Operating Company of its own inter-LATA Official Service network.

¹⁸⁸ There is also a distinct possibility that AT&T might be able to gain competitive advantages from its control over Operating Company official circuits. Compare [552 F. Supp. at 181](#) (possible advantage to AT&T from control of electronic publishing business).

In arguing that the Operating Companies should be able to construct and operate their own inter-LATA Official Service facilities, Raymond Burke wrote on April 13, 1983, at 4:

Indeed, to the extent that the BOCs would need to purchase materials from facilities vendors in order to construct microwave, fibre, and other facilities for their administrative use, it would appear that competition in such markets would be enhanced. In contrast, the Department's interpretation may create a situation in which the BOCs may, practically speaking, be able to obtain their administrative facilities from only one interexchange carrier -- AT&T.

the Official Services are not "for hire." Similarly, the decree prohibits the Operating Companies from engaging in "information services," but it expressly permits them to engage in such services "for the management, control, or operation of a telecommunications system or the management of a telecommunications service." Section IV(J). Further, section I(A)(1) mandates

the transfer from AT&T and its affiliates to the BOCs . . . of sufficient facilities [to permit them] to perform, independently of AT&T, exchange telecommunications and exchange access functions, including the procurement for, and engineering, **[*1101]** marketing and *management* of, those functions. (emphasis added).¹⁸⁹

[135]** In light of these provisions, it is thus not surprising that, contrary to its present position, the Department of Justice stated in its competitive impact statement filed with the Court on February 10, 1982, that the Operating Companies will continue to perform those functions which are "inherent" in exchange communications and exchange access, such as "the ability to engage in the . . . management of retained functions." Competitive Impact Statement at 29. Because each Operating Company will perform its authorized services in several LATAs, an inherent part of the management of those services includes official communications which cross LATA boundaries.

For these reasons, the Court rules that an Operating Company shall receive inter-LATA facilities which are used solely or predominantly for the performance of its own Official Service functions. If the use made by an Operating Company of a multifunction facility for the provision of exchange telecommunications, exchange access, and Official Services, predominates in the aggregate (including **[**147]** all such functions) over that made of such facility by AT&T, the multifunction facility is required under section VIII(G) of the decree to be **[**136]** assigned to the Operating Company.¹⁹⁰ The Court further confirms that the decree does not prohibit the Operating Companies from providing their own Official Services, including, if necessary, by the construction of the appropriate inter-LATA facilities.¹⁹¹

B. Other

The network assets are being assigned on the basis of whether they provide an exchange function (in which event they are assigned to the Operating Company) or an interexchange function (in which event they go to AT&T); where an asset performs both functions, the assignment depends essentially upon predominant use. Sections **[**137]** I(A)(2), VIII(G); see note 20 *supra*.

A number of intervenors have objected to one aspect or another of the division of assets provided for under the plan (or to the failure to complete such division in advance of the approval of the plan of reorganization) but the Court finds all such objections (other than those related to Official Services allocations discussed *supra*) to lack merit.

1. Several intervenors claim that the plan improperly disregards the predominant use test required by the decree. To be sure, the decisive role of that test can most clearly be discerned in the assignment of switching systems, and its role is not as apparent where less complex equipment is involved. That result, however, is not surprising: it would be technically and administratively impossible to assign ownership of each of the thousands of relatively small items in the central offices on the basis of predominant use. What AT&T has proposed instead is to assign equipment bays containing related items of equipment to work areas which, in turn, are assigned to AT&T or the

¹⁸⁹ AT&T argues to the contrary that section VIII(G) calls for the assignment to it of facilities which perform both intra-LATA and inter-LATA functions if the use for inter-LATA functions predominates. AT&T Response to Objections at 97. However, that section does not speak at all of inter-LATA and intra-LATA functions but states more simply that

facilities . . . which serve both AT&T and one or more BOCs shall be transferred to the separated BOCs if the use made by such BOC or BOCs predominates over that of AT&T (emphasis added).

¹⁹⁰ It may be that this provision will not have a significant effect on the assignment of assets because Official Services use may not often tip the scales as between inter-LATA and intra-LATA use. See AT&T Response to Objections at 99.

¹⁹¹ The Court reaches this question now, rather than after divestiture, so that the Operating Companies may be able to continue their essential network and operational planning.

Operating Companies on the basis of predominant use. In the absence of a showing that the assignment of the general work [**138] areas as such is not being made on this basis -- which has not been forthcoming [*1102] -- the Court will accept these provisions of the AT&T plan.¹⁹²

2. The assignment of the private line facilities and other specialized functions (e.g., call completion and local directory assistance) proposed in the plan is likewise consistent with the decree and otherwise appropriate, and it will therefore also be approved.¹⁹³

[**139] 3. One type of facility about which there has been particular controversy is 800 Service Directory Assistance which several of AT&T's competitors claim properly to belong to the Operating Companies. It is abundantly clear, however, that this particular directory assistance is an interexchange, inter-LATA service which is appropriately assigned to AT&T. If this enhanced service were assigned to the Operating Companies in spite of the fact that it performs interexchange functions, it could be done only on the basis that AT&T's competitors should be afforded the ability, through the medium of the Operating Companies, to offer this service without having to pay for it.¹⁹⁴ [**140] If the other interexchange carriers wish to offer long distance directory assistance, they will have to construct the necessary facilities. It is not the purpose of the Court's review of the plan of reorganization to "punish" AT&T or to provide advantages to its interexchange competitors to which they are not legitimately entitled.¹⁹⁵

[**141] The assignment of the network facilities and other assets provided for in the plan of reorganization will accordingly be approved.

VII.

LATA Issues

In its April 20, 1983 Opinion on the proposed LATAs (see note 6 *supra*) the Court requested further information with regard to certain specified LATAs as well as assurances with regard to intra-LATA equal access. Also to be resolved at this time are issues which have been separately briefed respecting traffic between the LATAs and areas served by non-Bell, or independent telephone companies.

¹⁹² The Court likewise finds not unreasonable AT&T's decision to consider predominant use as of January 1, 1984, rather than as of some earlier date, as several intervenors have suggested. Network changes are, of necessity, occurring all the time, and most of them appear to have been planned, and partially implemented, for some time, in some instances for years. The suggestion that the January 1, 1984 date gives AT&T an undue opportunity for manipulation is unrealistic and unwarranted.

¹⁹³ Several intervenors had originally objected to the plan's assignment of Digital Dataphone Service (DDS) facilities to AT&T. Subsequently AT&T accepted the Department of Justice's position with respect to such facilities, and it now appears that all DDS hubs, which were the focus of the intervenor's objections, will be assigned to the Operating Companies. See Department of Justice Supplemental Response, June 1, 1983, at 7. Additionally, the Department has made a commitment to review the contracts for the sharing of DDS facilities to ensure that the Operating Companies will have the ability to afford equal access to these facilities to all interexchange carriers. *Id.* at 8 n. *. The Court, therefore, finds the assignment of DDS facilities to be consistent with the decree.

¹⁹⁴ [**148] Unlike with respect to some other subjects (e.g., the Cambridge switch discussed at slip op. at pp. 12-13 *supra*) there is no reasonable basis for departing from the predominant use rule.

¹⁹⁵ It should also be noted that the plan of reorganization initially assigned "Charge-A-Call" public telephones to AT&T on the ground that they are used predominantly for inter-LATA communications. However, a number of intervenors, along with several designated chief executives of the Regional Companies, objected to this assignment, arguing that despite the inter-LATA nature of the calls placed over these telephones, they are exchange facilities, having been installed by the Operating Companies as part of the service they provide to the public. The Department of Justice concurred with these objections, and required the plan to be modified to assign Charge-A-Call public telephones to the Operating Companies. See Department of Justice Response to Comments at 82-83. This modification was agreed to by AT&T and has been incorporated into the plan of reorganization. The Court concurs with this modification. Pursuant to the plan as so modified, the Operating Companies will be able to provide users with access to several interexchange carriers, while under the original plan AT&T would have limited access through these public telephones to its own long distance network.

[*1103] A. Individual LATAs

1. Vermont, Maine, New Hampshire

The Court in its April 20, 1983, Opinion declined to approve New England Telephone's proposed departure of the Maine, Vermont, and New Hampshire LATAs from state boundaries because some 26 border communities would otherwise have been placed in "out-of-state" LATAs.¹⁹⁶ The regulators in these states had expressed concern that these stateline crossings could result in discriminatory treatment of telephone users in these communities, and they requested that these areas be redrawn so that each LATA would correspond precisely to the borders of the particular state. NET has since informed [*142] the Court that it withdraws its request for stateline crossings and proposes instead LATA boundaries which conform to state borders. These new LATAs are approved.¹⁹⁷

NET requests additionally that it be allowed to phase in the new LATA boundaries, so that, in order to minimize costs, the necessary network modifications may be undertaken in conjunction with other system improvements.¹⁹⁸ [*143] That request is likewise approved.¹⁹⁹

2. Worcester

NET has drawn a separate Central Massachusetts LATA in conformity with the Court's April 20, 1983, Opinion, separating Worcester and its surrounding communities from the Boston area and creating a total of three LATAs in Massachusetts. LATA is in the public interest. NET contends that the establishment of a third LATA will prove costly to local ratepayers; will disrupt service in nine towns divided by the new LATA boundary;²⁰⁰ will decrease the viability of various optional intrastate billing plans which depend upon volume and distance,²⁰¹ and many preclude use of a No. 4ESS switch as an access to tandem to the possible detriment of AT&T's interexchange competitors. The [*149] Massachusetts Department of Public Utilities also urges the Court to reconsider the division of the Eastern Massachusetts [*144] LATA into an Eastern and a Central LATA, arguing additionally that the growth of the high technology industry beyond suburban Boston westward toward Worcester has created a single community of interest in central and eastern Massachusetts. The Department of Justice, on the other hand, continues to maintain that the contribution three LATAs would make to a competitive telecommunications environment in Massachusetts outweighs the inconvenience and cost involved in the creation of a third LATA.

The Court has carefully reviewed [*145] the filings addressed to eastern Massachusetts, [*1104] and it has decided to grant the request of NET for a single LATA for that area. Although NET continues to overestimate the cost to ratepayers of separating the LATA,²⁰² the other grounds it advances are persuasive. In its most recent

¹⁹⁶ These communities are presently served by NET facilities located outside the particular state, and NET requested the stateline crossings in order to continue these serving arrangements.

¹⁹⁷ The network reconfiguration costs and other network considerations are not so significant as to outweigh the discriminatory treatment of and the inconvenience to residents in these communities.

¹⁹⁸ The regulatory commissions support this request. Additionally, Vermont wishes the Court to declare that these costs ought to be recovered through carrier access charges rather than through local rates. This is, of course, a matter for the regulatory commissions to execute, but the Court's views ought to be apparent from part I supra.

¹⁹⁹ NET maintains that all necessary modifications could be completed within five years, but Maine's observation that some localities may require less time and others more is sound. NET should submit a detailed request for exemptions to the state regulators and to the Department of Justice.

²⁰⁰ A larger number of municipalities would be divided, but in all but nine communities EAS routes would enable NET to continue to carry traffic across the border from one side of town to the other.

²⁰¹ This factor alone is not significant since it may be expected that interexchange competitors will respond to consumer demand for special billing plans, e.g., for reduced rates on frequently called routes, in substitution or in addition to those offered by the local monopolist.

filings, NET describes in considerable detail the impact on subscribers whose towns would be split by the new border between the Eastern and Central LATAs. The Court has also been persuaded by the NET and the PUC submissions that the population of this area is sufficiently concentrated and the local telephone network sufficiently integrated that the expense, effort, and customer inconvenience associated with dividing the network would be very substantial, even if NET's estimate of the expense is somewhat exaggerated.²⁰³

The detail provided by New England Telephone in its May 5 and May 23, 1983, submissions stands in stark contrast to the paucity of supporting documentation in the Department of Justice's filing. The Department offers only its bare conclusion that "the competitive benefits of separating Worcester from Boston outweigh the costs of separation." The Department does indicate [**146] that it would consider exceptions to the new boundary to allow NET to continue to serve the divided communities, but NET persuasively counters that since calls within these municipalities are carried by the toll network -- but billed as if the calls were local -- "it is not clear what exemption could solve [the] problem."

The Court concludes that the palpable expense and inconvenience of separating the LATA outweigh the Department's speculation about benefits to competition,²⁰⁴ and it will therefore approve the consolidation of Boston and Worcester in a single LATA.

[**147] 3. New York

The Court accepts the Operating Company's proposal to consolidate Glens Falls and Albany into a single LATA and also to consolidate Utica and Syracuse into a single LATA.²⁰⁵ [**148] To be sure, New York Telephone Co. failed to provide the Court with new information except the revised, lower count of telephones in Glens Falls,²⁰⁶ but the Department of Justice has advised the Court that it does not believe that the competitive purposes of the decree would be significantly advanced by creating four LATAs rather than two. In view of the Department's general tendency to err on the side of separation in close cases -- as evidenced, for example, by its position on the proposed Eastern Massachusetts LATA -- its [*1105] failure to advocate such separation here, and the relatively

²⁰² Most of these costs will be reflected in interexchange carrier access charges, not in the local rate base. Moreover, there costs could be spread over a number of years.

²⁰³ Moreover, one of the factors cutting in favor of separating the LATA--the benefit to interexchange carriers of not having to compete with the Operating Company for calls between the Worcester area and the Boston/New Bedford region--is undermined somewhat by technical access considerations which previously were not entirely clear. If Worcester is in the same LATA as Boston and New Bedford, NET will offer access to interexchange carriers by means of No. 4ESS switch to be constructed in Framingham. If Worcester is placed in a separate Central Massachusetts LATA, two smaller switches will be built in Framingham and Worcester. NET insists that the existing cross bar switch in Worcester could not be upgraded to serve as an access tandem, and although this assertion is challenged by Southern Pacific Communications Corp., the Court is not prepared to override the Operating Company on so technical a point.

²⁰⁴ Supporting the Department's position is the fact that the access provided for calls within a single LATA would not include a presubscription option while calls between Worcester and Boston, were each city in a separate LATA, would include such an option. The choice is thus between access via a No. 4ESS switch (see note 203 *supra*) and a larger area in which presubscription will not be available, on the one hand, and access via an inferior switch and greater availability of presubscription, on the other. Based on the comments the Court has received, it is reasonable to expect that the former would do more for competition than would the latter.

²⁰⁵ The various requests for exceptions contained in the October 4, 1982 applications also are granted, except that New York Telephone will not be serving Wells, Vermont. See slip op. at pp. 104-05 *supra*.

²⁰⁶ The revised count is 97,000, as opposed to 200,000.

small size of Utica²⁰⁷ [**150] and Glens Falls, the Court is reluctant to impose on New York Telephone Co. total estimated costs of \$8.6 million in network reconfiguration.²⁰⁸

4. Pennsylvania

Pennsylvania Bell pledges (1) to build a No. 4ESS switch in the Philadelphia LATA and lease access capacity from AT&T in the meantime, (2) to offer access in the Pittsburgh LATA through a DMS-200 switch,²⁰⁹ and (3) to construct a DMS-200 switch in Harrisburg. Based upon these assurances, the Court will approve the Pennsylvania LATAs.

[149] 5. Baltimore**

Chesapeake & Potomac Telephone Co. and the Department of Justice ask the Court to make explicit its approval of exceptions requested by C&P to allow eight exchanges in the Baltimore LATA to continue using "Metro FX" service. This service allows telephone subscribers in these exchanges to pay rates for calls to and from Washington, D.C. as if the exchanges were located in the Washington LATA. The exceptions are approved.

Some of the affected exchanges are located in Calvert County, Maryland, whose Chamber of Commerce wrote the Court in late April 1983, concerned that the County's inclusion in the Baltimore LATA would mean disruption of economically necessary discount calling into Washington. The express approval of all FX exceptions requested by C&P should alleviate the County's concerns, for in view of that approval the placement of Calvert County in the Baltimore LATA will not affect its subscribers' rates.

The Court finds, however, that the County's placement in the Baltimore LATA, as initially proposed by C&P and accepted by the Court on April 20, 1983, is reasonable in light of C&P's representation that it would cost over \$3 million to reconfigure the County's [**150] local network to render it suitable for inclusion in the Washington LATA. According to C&P, this also would "leave idle about \$500,000 in facility capacity between these exchanges and Annapolis," Annapolis being the location of the toll center which connects Calvert County exchanges to the long distance network.

6. Winchester

For the reasons stated in the Department of Justice's filing,²¹⁰ the Court reconsiders the consolidation of the proposed Winchester and Louisville LATAs; approves the Louisville LATA as originally proposed; and approves the association of the Winchester LATA with the independent area around Lexington served by GTE.

[151] 7. Birmingham/Huntsville**

South Central Bell's division of the Birmingham LATA into two separate LATAs, as required by the Court's April 20, 1983, Opinion, is approved.

²⁰⁷ The Utica area contains 110,000 phones, according to New York Telephone, down from the 120,000 the Company previously reported.

²⁰⁸ The Court also approves the boundaries of the new Poughkeepsie LATA as proposed by New York Telephone Co.

²⁰⁹ A small portion of the Pittsburgh LATA, the Greensburg area, will be accessed by a 1AE5S, 2-wire machine. This is satisfactory since AT&T and its competitors will all be served by means of this switch, so that there will be no quality differences among them.

²¹⁰ The Department informs the Court that South Central Bell and GTE agree to an association of GTE's Lexington 264,864 main stations and South Central Bell's 165,000 Winchester stations. This association will ensure that the Winchester area will be attractive to interexchange carriers -- the primary concern that prompted the Court to require the consolidation of the Winchester and Louisville LATAs. The Louisville LATA has more than enough stations -- 430,000 -- to enable it to stand on its own.

[*1106] 8. *Midwest*

The Court approves the inclusion of Kankakee in the Chicago LATA;²¹¹ the Detroit LATA as proposed;²¹² the Grand Rapids LATA;²¹³ [*152] the inclusion of Sikeston and Cape Girardeau in the St. Louis LATA;²¹⁴ the borders between the Cleveland and Akron-Canton LATAs;²¹⁵ the Southeast, Wisconsin [***151] LATA as proposed;²¹⁶ and the division of the Davenport LATA.²¹⁷

9. *Minnesota*

Northwestern Bell and the Minnesota Public Utilities Commission request the Court to consolidate the Fargo (North Dakota) and Brainerd (Minnesota) LATAs. The LATAs are now separated by the North Dakota/Minnesota border. Previously the Commission and the Operating Company had been at odds over five communities on the Minnesota side of the border which Northwestern Bell desired to place in the Fargo LATA rather than the Brainerd LATA.

The requested consolidation will be approved. Although it requires an exception to the decree's presumption against LATAs that cross state lines, it will accomplish the Minnesota Public Utilities Commission's objective of ensuring a LATA of adequate population to be attractive to interexchange carriers without requiring [*153] Northwestern Bell to incur \$9 million in network reconfiguration costs, as would the previous proposal of the Minnesota regulators.²¹⁸ The resulting LATA would be of moderate size -- 216,000 subscribers not including those of Independent companies -- and it would be consistent with the community of interest that spans the Minnesota/North Dakota border.

10. *Seattle*

The Court approves the inclusion of Bellingham in the Seattle LATA for the reasons stated in the May 5, 1983, filing of Pacific Northwest Bell,²¹⁹ and since leasing space on AT&T's No. 4ESS switch would cost the Operating Company approximately \$1.2 million more than installing a switch [*154] of its own, the Court approves Pacific Northwest Bell's request to provide access in the Seattle LATA through a new 4-wire digital switch.

11. *Oregon*

Pacific Northwest Bell requests the Court to reconsider its decision to require the establishment of the two LATAs initially proposed for Oregon, and to allow instead a single LATA for the entire state. The State, through its

²¹¹ The Court accepts the reasons for this action provided by Illinois Bell, the Illinois Commerce Commission, and the Department of Justice.

²¹² The Court agrees in this regard with the reasoning of the Michigan Telephone Company, the Michigan Public Service Commission, the State of Michigan, and the Department of Justice.

²¹³ This approval is granted for the reasons stated in the Court's April 20 Opinion and the filing of the Department of Justice. The approval is conditioned, however, upon Michigan's undertaking to implement its plans to have certain Michigan Bell exchanges home on the new GTE Three Rivers switch.

²¹⁴ This approval is in accordance with the recommendations of Southwestern Bell and the Department of Justice.

²¹⁵ This division was required by the Court's April 20 Opinion.

²¹⁶ The Court accepts the reasoning of the Wisconsin Telephone Company.

²¹⁷ This division was likewise required by the April 20 Opinion.

²¹⁸ Northwestern Bell currently serves the five Minnesota border communities from facilities located in North Dakota. Under the previous proposal of the Minnesota Public Utilities Commission, the communities would have been included in the Brainerd LATA, obliging Northwestern Bell to rewire the communities to facilities on the Minnesota side of the border.

²¹⁹ The Department of Justice has withdrawn the reservations it initially expressed over inclusion of the Bellingham area in the Seattle LATA, noting that although the independently served expanse between Bellingham and Seattle is large geographically, it contains only about 20,000 subscribers.

Governor, endorses the request, as does the Oregon Public Utility Commission. Pacific Northwest Bell explains [*1107] its change of position as having resulted from a realization that it had proposed two LATAs based on a "conservative" reading of the decree's requirements. The Department of Justice maintains that a single LATA in Oregon [**155] would be unreasonable, and the Court agrees. Because of the distance between Eugene and Portland, the two major cities in Oregon, two LATAs configured around these cities are clearly warranted under the general standards applicable to the entire country, and the Court will not reverse its earlier determination.

12. California

The Court approves a tenth LATA in California composed of San Luis Obispo County as a reasonable response to its order of April 20, 1983 that the County's exchanges not be included in the Los Angeles LATA.

13. Pennsylvania-New York-New Jersey Corridors

The Court gave tentative approval to two unique serving arrangements for metropolitan regions which cross state lines -- the "limited corridors" running from New York City into five northern New Jersey counties and from Philadelphia into three southern New Jersey counties.

In response to questions posed by the Court, the Operating Companies and the Department of Justice provided additional information about the setting of access charges and customer rates with respect to corridor traffic. Some of the potential competitors of the Operating Companies object to the local companies' plans not to pass [**156] on to their end user customers the costs of facilities they do not use in serving them, that is, the costs of the circuits used to connect competitors' points of presence to the local loops. In the case of the corridors, which were sanctioned specifically to preserve for interstate callers in these areas the advantages of the existing local networks, the Operating Companies' policy is reasonable. [***152] As New Jersey and Pennsylvania Bell observed, "[to] do otherwise would require the Operating Companies to compete on the basis of their competitors' costs rather than their own."

The International Communications Association registers a different complaint about the corridors. Rather than to ask for more competition within the corridors, it wants to ensure that the Operating Companies' efficiencies will be passed on to consumers in the lowest rates possible, and it argues that this would more assuredly be accomplished if the corridor areas became LATAs (so that all traffic within a corridor would be intra-LATA). It is difficult to understand what difference this would make since the area would still be interstate and the rates would therefore still be subject to the jurisdiction of the [**157] Federal Communications Commission.²²⁰ Furthermore, if the corridor areas were configured into separate LATAs, this would force a reassessment of a number of other LATA boundaries, such as those between Long Island and New York City and New York City and Westchester, or else huge New York-New Jersey and Philadelphia-New Jersey-Delaware LATAs would have to be established -- both undesirable developments.

For these reasons, the Court approves the two proposed corridors subject to the equal access provisions discussed *infra*.

B. Intra-LATA Equal Access

With the exception of the New York and Pennsylvania corridors, the Court accepts as reasonable the commitments made by all of the Operating Companies as required by the April 20, 1983, Opinion (1983-1 Trade Cas. P 65,333 at 69,980) to provide equal [**158] access for intra-LATA service.

First. Pursuant to the Operating Company commitments, the access offered to interexchange carriers for intra-LATA toll [*1108] calls²²¹ will be equal in technical quality to the access provided to these carriers for inter-LATA

²²⁰ Moreover, to the extent that the rates are set above cost, the presence of competitors in the corridors will exert pressure on the Operating Companies and the FCC to reduce the price of corridor service.

²²¹ The intra-LATA equal access requirement does not apply to non-toll calls.

calls, meaning that both types of access connections will be performed by the same exchange access facilities (be they access tandems or direct trunks between end offices and interexchange carrier points of presence). The access will be equal also in another respect: subscribers of AT&T and its interexchange competitors alike will not be able to select in advance either AT&T or one of its competitors as a transporter of intra-LATA toll calls -- the so-called "presubscription" or "preselection" option. Rather, if a subscriber wishes to place an intra-LATA call through AT&T, MCI, Sprint, Micotel, or one of the other competitive services, he will have to add four digits at the time of dialing (*i.e.*, an access code of "10XX"). If an access code is not dialed, the intra-LATA call will automatically be carried by the Operating Company.

[**159] What that means, of course, is that, with respect to intra-LATA traffic, there will be inequalities between all interexchange carriers, on the one hand, and the Operating Companies, on the other. Telephone users will be able to access an Operating Company as they do now, simply by dialing a seven or ten-digit number (depending upon whether an area code is used).²²² To access an interexchange carrier, on the other hand, a telephone user would consciously have to select that carrier and dial the appropriate four-digit access code. Additionally, the Operating Companies (with their proliferation of direct trunks between Class 5 end offices and the concomitant ability to transport calls without the need for switching) may be able to carry their intra-LATA toll calls with higher quality and at less cost than can the competitors carry theirs.

A number of interexchange [**160] carriers attack this scheme both on account of the absence, to them, of the presubscription option, and because of the inequalities in facilities between the Operating Companies and their potential intra-LATA toll competitors.

The Court has concluded that, in light of all the circumstances and competing considerations, the position of the Operating Companies is not unreasonable. In approving the consent decree as in the public interest, and in directing the Operating Companies to provide intra-LATA access, it was not the Court's intention to require the decimation of the local telephone networks or to deprive customers of the conveniences and cost benefits which the Operating Companies have succeeded in making available to them.

It would cost approximately \$1 billion and take several years to modify the 3,000 Bell end offices so as to permit a telephone user to presubscribe for one carrier for intra-LATA [***153] toll calls and another carrier for inter-LATA calls.²²³ In the absence of such an expenditure -- which the Court will not require -- what will be available to the customer in the near future is the option to preselect one telephone company, and one only. If such a customer could [**161] select in advance either an interexchange carrier or an Operating Company for intra-LATA calls, many, if not most, telephone users would preselect the former rather than the latter. This is so because of the overriding fact that, under the decree and the plan of reorganization, the interexchange carriers are allowed to carry all toll calls (both inter-LATA and intra-LATA) while the Operating Companies may carry only intra-LATA calls -- a significant drawback with respect to convenience. Thus, to require the Operating Companies to provide the presubscription option to the interexchange carriers would place the local companies at an almost insuperable disadvantage. This the Court will not do.

[*1109] Even if a subscriber cannot or does not presubscribe, he may still designate a particular [**162] carrier at the time he makes the actual call (by dialing a specified access code). What if a customer does not do so -- which carrier will get that business? Some suggest that all intra-LATA toll calls should be required to be designated.²²⁴ That, too, will not be required.

²²² The latter would also have to be accompanied by a prefix "1" in those areas where an area code must be distinguished from a local exchange code.

²²³ This is because the end office would require revised computer software that could determine when a call was designated for a termination point within its LATA and when it was destined for a point in another LATA.

²²⁴ Micotel, Inc. argues that

with equal access should come a more uniform starting point for intra-LATA competition. We have no illusion that the BOCs will not continue to enjoy significant competitive advantages arising from their historical relationship with customers

[**163] To require all callers to use a four-digit access code, in addition to the number to be called, for all intra-LATA toll calls -- including those carried by the local Operating Company -- would have the perverse consequence of making intra-LATA, or local toll calls more cumbersome to dial than inter-LATA, or long distance toll calls.²²⁵ This is totally inappropriate. The alternative -- which the Court will allow -- is to route all undesignated intra-LATA toll calls to the Operating Company.

This conclusion is buttressed by the consideration that affirmatively to forbid such an arrangement would inappropriately override state regulators' authority to decide what intrastate calling arrangements are best suited to the public interest within their states. In a state [**164] such as Florida, where the Public Utilities Commission has sanctioned intrastate competition by granting Microtel a license,²²⁶ the Commission might well decide that intra-LATA competition should be further encouraged by requiring access codes alike for the Operating Company and its competitors, but the Court should not force this outcome. With respect to a state where the future of intra-LATA competition is more uncertain than in Florida, the Court would be even less justified in ordering the Operating Company to make intra-LATA telephone calling inconvenient for everyone -- by adding four more digits to every intra-LATA toll call -- for only speculative offsetting gains. Such a decision ought to be reserved for the state regulators, as several of them have urged.²²⁷

[**165] The unevenness resulting from the Court's decision between the Operating Companies and their competitors does not offend the competitive principles of the decree. The decree mandates that the Operating Companies have primary responsibility for exchange services, and it is appropriate [*1110] therefore that they should enjoy the non-access code arrangements with their exchange customers. The competitors are merely secondary suppliers of intra-LATA service, and while they may operate in that market on that basis, they should hardly be given what, in view of the considerations discussed above, would amount to a preferred position. However, if they should truly offer a better price or a better service than the Operating Companies, they should be able to educate their potential customers that it is worth the extra four numbers to take advantage of their offering.

Second. The reverse is true with respect to the so-called corridors.²²⁸ These corridors traverse not only LATA boundaries but also state boundaries, and they thus represent dual exceptions to the decree. They were permitted by the Court in heavily populated metropolitan areas not out of a desire to "[maintain] the [**166] position of the

and their dominant position in the . . . market. But those advantages should not be solidified by an additional head start arising from carriage of undesignated intra-LATA traffic.

Opposition dated May 16, 1983, at 14. There is some merit to that argument, particularly in states where the Court approved large LATAs on the expectation that there would not be significant barriers to intra-LATA competition. Microtel's primary state of operation, Florida, is a case in point. The Court allowed the consolidation of three SMSAs to form the Southeast LATA (Miami, West Palm Beach, and Ft. Pierce) with the understanding that there would be intra-LATA competition for calls between these cities.

²²⁵ Due to the availability of presubscription in inter-LATA calls, someone who had preselected an interexchange carrier would not have to dial an access code and he therefore could dial across the country with fewer digits than within his own LATA.

²²⁶ [***154] The Commission has under review whether also to license MCI for intrastate telecommunications traffic.

²²⁷ See, e.g., Comments of Maine. The situation may well be different with respect to undesignated inter-LATA calls. It would seem to be inconsistent with the decree for AT&T automatically to receive inter-LATA calls dialed either mistakenly or ignorantly without an access code (for those calls not dialed pursuant to a presubscription). The Operating Companies in that event would have two options: they could prevent an undesignated inter-LATA call from being completed (by obliging the caller to dial again using a proper access code) or they could allocate undesignated calls among all interexchange carriers on the basis of some formula. This subject is not dealt with at all in the plan of reorganization; moreover, the Operating Companies have not yet formulated their own policies, and they have not advised the Court as to the practical implications of various options. The Court will therefore defer a decision on this subject. If the Operating Companies should improperly discriminate among carriers with respect to undesignated calls, remedies will be available through the Department of Justice and the Court.

²²⁸ The corridors, as indicated at slip op. pp. 115-16 *supra*, run from the five boroughs of New York City into five northern New Jersey counties, and between five Eastern Pennsylvania counties into three southern New Jersey counties.

Operating Companies in the corridor," as New Jersey Bell and the Bell Telephone Company of Pennsylvania assert, but to maintain for consumers the benefits of what were represented to the Court to be particularly efficient network arrangements.

The decree presumes that the interexchange carriers -- not the Operating Companies -- will be the primary transporters of interstate, inter-LATA telecommunications. One of the reasons underlying the Court's tentative approval of the corridors -- which would allow the Operating Companies, too, to operate in the markets the corridors represent -- was that these routes would be fully open to competition. To implement that purpose, the Operating Companies will have to offer complete inter-LATA access to competitors which [**167] carry inter-LATA traffic within the corridors,²²⁹ with all that this implies, including the option of presubscription,²³⁰ and the requirement that all calls must be designated. The Operating Companies may choose whether they will develop the software that will allow presubscription of more than one carrier, or whether they will offer presubscription to one carrier only.

[168] C. Bell-Independent Traffic**

On February 17, 1983, the Operating Companies²³¹ submitted their proposed classifications of traffic between areas they serve and those served by independent telephone companies (Independents)²³² as either inter-LATA or intra-LATA.

[**169] The need for such a process came about because of the proximity of many Bell and Independent areas, and the consequent joint Operating Company/Independent service arrangements which are currently in effect around the country (that is, the Operating Company typically switches traffic [*1111] between its end offices and the offices of the Independent, which then routes that traffic to its final destination). If all that traffic were considered to be inter-LATA under the decree, the Operating Companies would be prohibited from participating in such arrangements, and significant, costly network rearrangement would have to be undertaken in order to have all Bell-Independent traffic carried by an interexchange carrier.²³³ To avoid such disruptive [***155] effects, the Operating Companies were asked to identify those areas where, consistent with the decree's purpose of limiting Operating Company participation in the long distance competitive markets, they should nevertheless be permitted to continue to provide joint service offerings with adjacent independent companies.²³⁴ In addition to determining whether the particular Operating Company may carry such traffic or whether it should be [**170] precluded from doing so, the

²²⁹ As evident from the filings, the Operating Companies intend to charge competitors inter-LATA access tariffs even though they would not be receiving inter-LATA-type access.

²³⁰ In the case of the corridors, it is appropriate that the Operating Companies undertake the responsibility for advertising what they claim to be their less expensive, exceptional service and instructing business and residential users on how to take advantage of it. Since many of the users of these routes are businesses, which may be expected to be very cost conscious, the Operating Companies should presumably have little trouble in inducing them to dial four additional numbers (in the event that, as many assume, that Operating Company will not be the one preselected by the user) if that would save them money.

²³¹ AT&T states that the Operating Companies alone classified the traffic between their respective LATAs and adjacent independent territories, without interference from AT&T. AT&T Response to Comments, March 25, 1983, at 5 n.**.

²³² There are some 1425 independent telephone companies which provide local phone service in 11,000 of the 18,000 local exchanges in the United States. Objections of the United States Independent Telephone Assoc., March 15, 1983, at 2. The geographic areas where the Independents provide service are, in total, larger than those where the Bell Operating Companies provide local service; although the Independent territories are generally more sparsely populated, encompassing only 20 percent of the telephones in the nation.

²³³ This would be so even where highly integrated communities are involved.

²³⁴ Under the terminology used by the parties, if a particular Independent territory is considered to be "associated" with the adjacent Operating Company LATA, then telecommunications traffic between these two areas is regarded as intra-LATA and may be handled by the Operating Company. If, on the other hand, a particular Independent territory is considered to be "not associated" with an Operating Company LATA, then the Operating Company would be prohibited under section II(D) of the decree from carrying traffic between the two areas, as this would be regarded as an inter-LATA service.

classifications will also be the basis for deciding whether Bell System facilities and assets connecting Bell and Independent territory should be assigned to AT&T or to an Operating Company.

On February 23, 1983, the Court issued an order establishing procedures for the review of the classifications prepared by the Operating [**171] Companies. Subsequently, a number of interested parties submitted comments, and AT&T and the Department of Justice filed their own responses.

The classifications, although made by the Operating Companies, are based upon principles and criteria furnished to these companies by the Department of Justice. The fundamental governing principle used by the Department and hence by the Operating Companies was that, for the purpose of determining whether the traffic between an Operating Company and adjacent Independent territory is to be regarded as inter-LATA or intra-LATA, Independent territory was treated as if it were Bell territory. Traffic is thus classified as intra-LATA if it would have been included within a LATA had it been exclusively Bell territory; it is classified as inter-LATA if it would have required the establishment of a separate LATA.

On November 17, 1982, the Department of Justice set forth the criteria by which it would judge the Operating Company determinations.²³⁵ The following types of Bell-Independent traffic were designated as clearly intra-LATA:

- (1) traffic within local calling areas and non-optional extended area service (EAS) areas;
- (2) intrastate [**172] traffic for states with a single LATA;
- (3) traffic within a single statistical area; and
- (4) traffic between a LATA and Independent exchanges serving non-statistical areas.

The following types of Bell-Independent traffic were designated by the Department as "possibly" intra-LATA:

- (1) traffic between a LATA and Independent territory in an adjacent SMSA which includes fewer than 100,000 main or equivalent main stations, or the distance between the core cities of the two areas is less than 25 miles;
- (2) traffic between a LATA and Independent territory without a Class 4 switch (or other network considerations); and
- (3) traffic between isolated Bell exchanges and an Independent dominated SMSA, provided that the Independent [*1112] makes a commitment to provide equal access.

The remaining traffic is regarded under the criteria as inter-LATA.

Reliance upon these criteria by the Department, [**173] and hence the Operating Companies, would have the following impact in the two factual circumstances which are predominant with respect to Bell-Independent traffic: (1) an Operating Company LATA may not be associated with an Independent area if the latter constitutes a market of sufficient size and distance from other markets to attract multiple interexchange carrier entry; (2) if, to the contrary, the Independent area has relatively few access lines or if the distance between the Bell and Independent core communities is insubstantial, an association between the Operating Company LATA and the Independent area will be permitted. In a few instances, particularly in Oregon and Washington, traffic was classified as inter-LATA by the particular Operating Company because it elected not to serve the relatively small Independent area in question.²³⁶ [**174] In a [***156] number of other instances, where the Operating Companies and the Independents

²³⁵ Letter from James P. Denvir to Jim G. Kilpatrick, November 17, 1982, at 3-7.

²³⁶ The Department of Justice as well as the states involved oppose these classifications on the ground that even though the decree cannot impose a requirement that an Operating Company actually provide service to an area which it is permitted to serve, the purpose of the classifications is to define areas which the Operating Companies *may* serve. In that view, the particular traffic should be classified as intra-LATA and it would then be left to the state and federal regulators to determine whether the Operating Companies or any other carriers should be *obligated* to serve particular areas. See Department of Justice Response to Comments, April 4, 1983, at 8; State of Oregon Comments, March 15, 1983, at 3-5. The Court finds the position taken by the Department of Justice in this regard to be correct, since it will best ensure that the decree does not unnecessarily intrude upon the jurisdiction of the regulatory commissions to determine service responsibilities within their jurisdictions. Accordingly, the Operating Company classifications are hereby required to be modified to conform to the Department's position.

agreed that there will be no Operating Company service despite an absence of a prohibition in the decree, the traffic was also classified as inter-LATA for purposes of the division of Bell System facilities.²³⁷

The two principal objections²³⁸ which have been advanced with respect to the Bell-Independent traffic classifications are first, that in certain instances either too many or too few Independent areas have been associated with Operating Company LATAs; and second, that **[**175]** the classifications unduly curtail the business freedom of the Independents.

First. The Court has considered the various Bell-Independent traffic classifications on the same basis as its earlier consideration of the LATAs.²³⁹ Although it is possible to disagree with particular decisions that were made by AT&T and the Department of Justice in this process, the Court has concluded that in no instance have the **[*1113]** intervenors made a case sufficiently compelling that it **[**176]** calls for a rejection of the classification.²⁴⁰ The Department's guidelines are reasonable and consistent with the principles of the decree, and these guidelines were properly applied by the Operating Companies.²⁴¹

[177]** Second. The "business freedom" claim is largely based upon a misunderstanding concerning the substantive scope of the classification decisions. Contrary to the assumption of some intervenors, the classification of particular traffic as intra-LATA does not have as its consequence that interexchange carriers may not offer service with respect thereto or that the Independents may not directly provide access arrangements to these carriers.²⁴² The intra-LATA or inter-LATA classifications -- in this context as in the context of service within the Bell territories -- bind only the Operating Companies and affect only their ability to provide service; they do not bind the interexchange carriers or the Independents and they will not in any way affect their ability to provide service. **[***157]**

²³⁷ However, for the purpose of determining whether the Operating Company may serve these areas, the traffic between the two areas will be classified as intra-LATA. Thus, if in the future an Operating Company wishes to provide service to such Independent areas, it will be free to do so. This minor category of classifications is, in essence, simply a request by the particular Operating Company for an exception to the general rule that it be assigned Bell System facilities devoted to intra-LATA service. Instead, AT&T will be assigned these facilities which the Operating Companies do not intend to use. See Department of Justice Response to Comments, April 4, 1983, at 9-10. No objections have been raised with respect to this exception to the general rule for the division of Bell System assets, and it is, therefore, approved.

²³⁸ It has also been argued that the Court should require that an opportunity be afforded the intervenors to seek reclassification of Bell-Independent traffic after divestiture. There is no basis for such a request, and it will be denied along with all other demands for systematic post-divestiture proceedings. See Part IX *infra*. However, the Bell Operating Companies may, under the decree, subsequently petition the Court for reclassification or for exceptions in regard to service between their own areas and Independent territory.

²³⁹ It is questionable whether, in view of the relatively limited impact of these classifications upon the intervenors (see *infra*), a level of scrutiny comparable to that employed with respect to the LATA classifications themselves was required.

²⁴⁰ No objections were raised to the vast majority of Independent exchanges that have been classified as "associated." It is to be noted that only 940 out of the 11,000 Independent exchanges are classified as "not associated" to any Bell Operating Company LATA. Objections of the United States Independent Telephone Assoc., March 15, 1983, at 4 n.*.

²⁴¹ In the few instances, such as those discussed in note 236 *supra*, where the Department of Justice and the Operating Companies took different positions with respect to whether particular traffic should be classified as intra-LATA or inter-LATA, the Court agrees with the position of the Department, and the classifications should, accordingly, be modified to conform to that position.

²⁴² Several intervenors argue that, although the associations being decided now have limited purposes under the decree, they will be "frozen in time" for state and federal regulatory bodies, common carriers, Independents, and ratepayers. See GTE Comments of March 15, 1983, at 3. There is nothing in the plan of reorganization which the Court is approving which has such wide consequences. If others decide to accept the decisions made herein, that would be their decision; it can hardly be a basis upon which the Court would be justified in rejecting the plan. Nothing in the Court's approval of the Bell-Independent classifications is intended in any way to restrict the regulatory bodies in the exercise of their legitimate authority.

[**178] To be sure, where traffic has been classified as inter-LATA, an Operating Company may not be "associated" with the adjacent Independent territory, and to that extent it may be said that the business freedom of the Independents is being restricted.²⁴³ [**179] That, however, is an inevitable consequence of the decree which limits the Bell Operating Companies to intra-LATA service; it cannot be regarded as a defect in the classifications made by the Operating Companies and approved by the Department of Justice. The objections to these classifications, as well as to the classification process, will accordingly be rejected.²⁴⁴

The proposed Bell-Independent classifications will be approved.

VIII

Central Staff Organization

Section I(B) of the decree requires the creation of a central organization jointly funded and utilized by the Regional Companies (1) for the purpose of meeting national security and emergency preparedness requirements and (2) for administering such [*1114] functions and services as can most efficiently be performed on a centralized basis.²⁴⁵ Pursuant to these provisions, AT&T has proposed, and the Department of Justice has approved, the creation of an 8,800-person Central Staff Organization (CSO) which would engage in a number of technical and nontechnical functions²⁴⁶ to replace support which the Operating Companies have until now received from the AT&T General Departments, Bell Laboratories, and Western Electric. [**180]²⁴⁷

A. CSO Responsibilities

Under the plan of reorganization, the CSO will perform technical services to support the Operating Companies in the "construction, operation, and maintenance of their local exchange networks."²⁴⁸ AT&T has listed five such technical functions: (1) network planning, which is described as "a long-range function concerned with recommending to the BOCs the optimal direction in which the local networks should evolve";²⁴⁹ (2) systems engineering, that is, the development of "generic requirements for new systems" which will enable the Operating Companies to "inform vendors of the features and functions that the BOCs want or need in the equipment [**181] they purchase"; (3) applied engineering, that is, the testing and evaluation of the products of potential suppliers to determine whether they meet the generic requirements developed by the systems engineers; (4) applied research, involving "state-of-the-art research in switching, signaling, materials and other elements which provide the underpinning for exchange telecommunications"; and (5) information systems support, which will involve

²⁴³ Moreover, regardless whether traffic is classified as intra-LATA or inter-LATA, Independents will have the option of establishing a relationship with an Operating Company whereby the Independent would be the carrier of traffic between its territory and the Operating Company LATA. See United States v. Western Electric Co., 569 F. Supp. 990, 1010; 1983-1 Trade Cas. P65,333, at 69,982-83 (D.D.C. 1983). If the Independent does not wish to carry such traffic itself, it will alternatively be able to enter into a service arrangement with AT&T (in which case it could continue to interconnect with the same Bell System facilities as are presently used for its interexchange of traffic with Bell territory) or any other interexchange carrier. AT&T Response to Comments, March 25, 1983, at 12.

²⁴⁴ Similarly, GTE's complaints regarding splintering of trunk groups, duplication of facilities, and stranding of existing facilities are basically inevitable consequences of the decree insofar as it does not permit the Bell Operating Companies to carry interexchange traffic.

²⁴⁵ Section I(A)(1) permits AT&T to transfer resources to such an entity.

²⁴⁶ Of the total 8,800, approximately 6,600 staff members would perform technical functions. Plan of Reorganization at 239.

²⁴⁷ The employees would be transferred from AT&T and its affiliates, transferred from the Operating Companies, or newly hired.

²⁴⁸ AT&T Response to Objections at 505.

²⁴⁹ The network planning group within the CSO will also recommend internal network requirements and technical interface standards.

"maintaining and enhancing a number of computer-based operations and administrative systems integral to the exchange business."²⁵⁰

Among the non-technical functions will be the provision to the Operating Companies of [***158] procurement support services,²⁵¹ and such other assistance as legal services,²⁵² regulatory support services, marketing (including billing [**182] and sales support) services, financial services, human resources development, and employee relations.

The criticisms leveled at the CSO proposal fall essentially into two categories.²⁵³ First, intervenors representing [**183] regulatory and consumer interests contend that AT&T has presented inadequate justification for what is contended to be an overly large and costly organization. Second, potential [*1115] equipment suppliers of the Operating Companies claim that the CSO may, in effect, exercise control over many procurement decisions, discriminate in favor of Western Electric products, and, over time, become a second-generation AT&T. After careful consideration, the Court has concluded that these objections are not sufficiently weighty to warrant either the rejection or the modification of the CSO provisions of the plan of reorganization.

[**184] B. CSO Size

There is substantial evidence that the CSO is neither too large nor too costly a burden on the Operating Companies. Since these companies will be controlling the CSO -- not the other way around -- and since most of the costs of the CSO will not be capable of capitalization, the local companies will have strong incentives to avoid wastefulness in the CSO's operation.²⁵⁴ In fact, it appears that the total cost of the CSO to the Operating Companies will be considerably less than what they now pay to AT&T for centralized support.²⁵⁵

[**185] Moreover, and significantly, the chief executives of the Regional Companies, who played an active part in molding the CSO,²⁵⁶ [**186] have given an exceptionally strong endorsement to the size of the organization, its

²⁵⁰ AT&T Response to Objections at 506-12.

²⁵¹ There would be 700 procurement support personnel. Plan of Reorganization at 339. The Court expects that this staff will not make substantive procurement decisions.

²⁵² The Court has some concern that the centralized provision of legal advice on potential antitrust liability might be of questionable propriety and wisdom. William Weiss, designated chief executive of the Midwest Region, testified at the June 2, 1983 hearing that: "I cannot conceive of a corporation the size of mine in the future not wanting to be self-sufficient in areas of liability like antitrust" Transcript at 25497. Although this is not a complete answer, the likelihood of antitrust violations through the central legal staff is not sufficiently substantial that elimination of these functions will be required.

²⁵³ The delegation of national security and emergency responsibilities to the CSO is largely unchallenged. The Court has always insisted that legitimate Department of Defense interests be fully protected ([552 F. Supp. at 208-209](#)), and the CSO provisions of the plan carry out that objective. The security and emergency responsibilities will be executed by a specialized group within the CSO which will set and enforce technical standards to the extent that security and emergency needs demand that telephone equipment be "capable of being interconnected nationwide." Plan of Reorganization at 418-19.

²⁵⁴ Several intervenors complain that the plan makes insufficient provision for an Operating Company's withdrawal from the CSO. Complete withdrawal may only take place with five years' advance notice, and an Operating Company may withdraw from a particular function on one year's notice. The chief executives of the Regional Companies support this approach as necessary to ensure the continuing viability of the CSO, and the Court sees no reason to interfere with their judgment.

²⁵⁵ William Weiss stated that the amount will be three-quarters of the sums previously expended (transcript at 25,500), while AT&T claims that the 8,800 CSO employees should be compared to the 23,000 AT&T employees allegedly now supporting the Operating Companies. Response to Objections at 496 note **.

²⁵⁶ A task force of Operating Company presidents initially recommended the structure of the CSO. Each regional planner on the task force then conferred with his respective chief executive officer, and a "CSO package" was adopted by these officials in October 1982. Since that time, some functions have been added and others eliminated, and negotiations over the CSO's final

cost, and the responsibilities vested in it by the plan of reorganization.²⁵⁷ In short, the concern of some of the intervenors that the CSO is an AT&T tool designed to hamper Operating Company progress rather than to assist these companies is not shared by those most [***159] directly involved.²⁵⁸ On this issue, at least, the opinions of the Regional Company managers are entitled to more weight than those of regulators²⁵⁹ and consumer groups.

Some of the intervenors also question the assignment to the CSO of functions other than those strictly related to national security and emergency preparedness. The decree permits the CSO to perform such functions as "can most efficiently be provided on a centralized basis." Section I(B). [**187] It appears obvious that, with respect to the responsibilities which are vested in the CSO [*1116] by the plan of reorganization, substantial economies will be realized from centralization. To be sure, AT&T has not provided a quantification of efficiencies and economies, but that is not especially surprising since it is unlikely that detailed cost-benefit comparisons could now be made: the seven Regional Companies are at present only planning to operate in this respect, and the territory is somewhat unchartered. It does not require an army of efficiency experts, however, to conclude that it will be more economical for certain support functions to be performed once rather than seven times over. As the Department of Justice has aptly observed, "it is neither necessary nor useful to engage in extensive second-guessing of the [Operating Companies'] decisions as to what activities can efficiently be centralized."²⁶⁰

The Court concludes that the objections [**188] regarding size, scope, and cost of the CSO do not warrant disturbing the CSO proposal.

C. Procurement Functions

The objections relating to the CSO's possible involvement in procurement activities have somewhat more substance. The intervenors complain in this respect primarily that standards may be set by the CSO which will favor Western Electric products over those of competitors, and that the testing of products may be biased against Western's competitors.

It seems beyond debate that uniform standards are necessary to ensure high quality in the telephone system, indeed its very survival as a nationwide network.²⁶¹ Nor are such standards incompatible with competition. Not all characteristics of products to be purchased by the Operating Companies will be specified in advance; there will be ample room for competitors to meet the generic requirements established by the CSO and still produce products drawing upon their special skills, distinctive styles, and other competitive advantages.

[**189] Similar conclusions apply to the testing function to be performed by CSO personnel. AT&T has advised the Court that such personnel will not make product recommendations to individual Operating Companies but will limit

form are continuing, without the participation of AT&T. Response to the Operating Companies in the Mountain-Northwest Region, May 31, 1983, at 5; Southeast Region's Response, May 31, 1983, at 3. According to William Weiss, "the presidents . . . elected to do only certain things in the central staff, those things that they felt could be done to achieve economies of scale. They excluded from the role of that central staff things that they felt either we could do ourselves with our present organizations and the Operating Companies or that didn't need to be done in the longer term future." Transcript at 25500.

²⁵⁷ See, e.g., Response of Operating Companies in the Mountain-Northwest Region, May 31, 1983; Response of the Northeast Region, May 31, 1983; Response of the Mid-Atlantic Bell Telephone Companies, May 31, 1983; Southwest Region's Response, May 31, 1983.

²⁵⁸ The Court has no question that on this subject the chief executives of the Regional Companies communicated to the Court their genuine convictions.

²⁵⁹ Some of the state regulatory commissions complain that they will be unable to exercise effective control over the costs of the CSO, but this was refuted by testimony at the June 2, 1983, hearing to the effect that the Operating Companies will present their respective shares of the cost of the CSO to the state regulators, so that "it will not escape [their] attention." Transcript at 25,501.

²⁶⁰ Department of Justice Response to Comments at 162.

²⁶¹ There are some features, e.g., network signaling protocols, which will be of no use unless they are agreed to by all the Operating Companies. AT&T Response to Objections at 523.

themselves to "a scientific and objective testing function." Test results will be made available to both the Operating Companies and the manufacturers, and the latter will be allowed an opportunity to demonstrate the incorrectness of any adverse findings. And it will be up to the Operating Companies, not the CSO, to determine the weight and significance to be accorded to the test results in the making of final procurement decisions.²⁶² The Court believes that these assurances adequately protect potential vendors.²⁶³

Some intervenors question more broadly whether objective **[**190]** conclusions are at all possible with respect to such activities as standard-setting, testing, and the like,²⁶⁴ and that in practice it may not be possible to distinguish sharply between these functions and procurement decision-making. Another intervenor asks who at the Operating Company level would "undertake an independent and intelligent analysis of the technical and other evaluations sent to [these companies] by the CSO" if, as AT&T asserts, there are not enough qualified technical personnel in the Bell System to staff both the Operating Companies and the CSO.²⁶⁵

Although these objections are not without some force -- particularly those related **[*1117]** to the somewhat shadowy line between standard-**[***160]** setting and procurement -- the Court has decided that, on balance, the advantages to be achieved from the centralization of these various responsibilities outweigh the dangers **[**191]** visualized by the opponents of such a step. The issue reduces itself to an inquiry whether the desirable ends of economy and uniform quality can be achieved without serious risk that the CSO will become an instrument of anticompetitive conduct. In the Court's view, that risk, *i.e.*, the risk of bad faith, is relatively small,²⁶⁶ for a very basic reason.

[192]** There will be no continuing relationship between AT&T and the CSO,²⁶⁷ **[**193]** and therefore no economic incentive for CSO personnel to favor Western Electric products over those of any other supplier. CSO personnel will, at least indirectly, be working for the Operating Companies; their success in their new employment will be bound up with the success of the local companies;²⁶⁸ and the Operating Companies are far more likely to flourish by purchasing the best equipment at the best price than by favoring Western Electric products regardless of quality or price. The employees' economic incentives therefore all run in favor of the Operating Companies and against improper favoritism toward Western Electric. Moreover, the testimony of the regional chief executives and their various filings with the Court establish that they intend to make their own procurement decisions, and that they

²⁶² AT&T Response to Objections at 525-26.

²⁶³ Should it ultimately appear that the CSO deviates from these standards, there will be time enough for the Department of Justice, the Court, or both to take corrective action.

²⁶⁴ See, *e.g.*, Reply of U.S. Telecommunications Suppliers Association at 7; ITT Reply at 15.

²⁶⁵ See GTE Reply at 8.

²⁶⁶ Since the representations made by AT&T in its Response to Objections regarding the limited role of the CSO in setting standards and testing products were critical in persuading the Department of Justice and the Court to approve the CSO as proposed, it is of course essential that the CSO abide by those representations. The Court has considered adopting the suggestion of some (*e.g.*, U.S. Telephone Suppliers Association) that these representations be reduced to a separate contract, but in the interest of avoiding the imposition of yet another set of rules on the Operating Companies, it will not insist on this measure. However, the Court does expect the Operating Companies to use the CSO to further only their own competitive interests, not those of AT&T, and it also expects the Department of Justice to be vigilant in its oversight of the CSO's role in the setting of standards and testing of products.

The plan of reorganization does not limit the CSO to the responsibilities initially entrusted to it. The Court is persuaded that some flexibility is necessary in this regard as well. However, here, too, it expects that the CSO will respect the boundaries between standards and testing, on the one hand, and procurement, on the other. It is in this area particularly that the Court will not hesitate to exercise the powers vested in it by section VIII(I) of the decree should this appear to be warranted.

²⁶⁷ Whatever sharing contracts that will be in effect will be between the Operating Companies and AT&T, not the CSO and AT&T.

²⁶⁸ The CSO will not, on its own, manufacture or market any product or service.

are acutely aware of the spectre of an enforcement action brought by the United States should the CSO act anticompetitively.²⁶⁹

In the absence of an economic incentive, much is made of the emotional attachment of CSO personnel to AT&T -- the former employer of many of them. Such an attachment cannot be entirely discounted, at least with respect to some employees and at least in the short run. But it defies all experience with a mobile work force in the United States to assume that, for any length of time, former AT&T personnel will make decisions which will assist their former employer, but now sometime competitor, simply because they used to work there.²⁷⁰ **[**194]** Certainly the Court would not be justified in vetoing an arrangement agreed to by AT&T, the Operating Companies, and the Department of Justice which is otherwise perfectly sensible and reasonable upon the basis of so speculative an objection.²⁷¹

[*1118] The Central Staff Organization is designed to carry out extremely important responsibilities. Not only will it perform the coordination for national defense and other emergency purposes that is vital to the nation's security, but it will also set the standards which will permit telecommunications to continue to operate in an engineering sense as one national network.²⁷² These responsibilities were in the past performed exceedingly well by AT&T. In the Court's view, it is essential that the break-up of the Bell System and the economic competition which will result from that break-up will not lead to a departure from that high standard or to the development of balkanized regional networks which poorly interconnect **[**195]** with each other to the detriment of all users. The Central Staff Organization **[***161]** will be an important check against deterioration and fragmentation of the existing telephone system.

For these reasons, the Court is strongly committed to the success of the CSO, and it will not weaken that organization, whether in size or in authorized responsibilities, without good cause. The arguments proffered by the intervenors, while they do not, here and there, lack some plausibility, are far from being sufficiently persuasive to provide such a cause. The Court accordingly will approve the Central Staff Organization as it is proposed in the plan of reorganization.

IX

Further Court Proceedings

Several intervenors suggest additional judicial or other proceedings **[**196]** of various kinds beyond those that are expressly provided for in the decree. For example, the State of New Mexico asks that the intervention status of all third parties be continued to permit them to participate in the true-up process following divestiture.²⁷³ **[**197]** The State of California asserts²⁷⁴ more specifically that a true-up procedure is necessary to ensure the achievement of target debt ratios, pointing out that the plan already contemplates such a procedure with respect to a number of other subjects.²⁷⁵ American Satellite Company asks for the submission to the Court of detailed information

²⁶⁹ See, e.g., Transcript at 25502.

²⁷⁰ This conclusion would seem to hold notwithstanding the strong feelings of loyalty which have been fostered and have traditionally existed within the Bell System.

²⁷¹ As for the claim that the very establishment of a CSO might give rise to antitrust problems it is well established that a joint technical organization with responsibility for setting standards does not in and of itself violate the Sherman Act. See [American Society of Mechanical Engineers, Inc. v. Hydrolevel Corp., 456 U.S. 556, 72 L. Ed. 2d 330, 102 S. Ct. 1935 \(1982\)](#).

²⁷² The testimony at the trial demonstrated that the application of nationwide standards has contributed substantially to the overall quality of telephone service enjoyed in this country. See, e.g., testimony of Casimir Skrypczak, transcript at 23854-55.

²⁷³ Reply Comments of the State of New Mexico, April 13, 1983, at 18-19.

²⁷⁴ Further Comments of the People of the State of California, Feb. 14, 1983, at 65-67.

concerning the day-to-day progress in the implementation of the plan of reorganization and requests public disclosure as well as judicial review of all divestiture-related contracts.²⁷⁶ And the State of Maine urges that the state and local public utilities commissions be allowed to participate in the division of assets between AT&T and the Operating Companies by a court-imposed requirement of the distribution to them of the same kinds of information and monitoring rights possessed by the Department of Justice. The Court will deny all of these and similar requests.²⁷⁷

There now is some provision in the decree, albeit on a carefully limited basis, for the retention of jurisdiction by the Court.

Section VII specifies that, upon application of a party or an Operating Company, the Court may issue orders to construe the decree, carry it out, modify it, or enforce it, or to punish violations.²⁷⁸ At the request of [*1119] a number of intervenors, the Court announced the adoption of a procedure which would permit an interested nonparty to initiate enforcement proceedings [**198] on its own. But that opportunity was deliberately kept very narrow²⁷⁹ because, as the Court stated on August 11, 1982, so restricted it strikes a proper balance between the need for some enforcement mechanism not under the direct control of the parties and the necessity of avoiding "constant, unnecessary interference by AT&T's competitors and others with implementation of the reorganization and with the normal operations of AT&T and the divested Operating Companies . . . [as well as the necessity not to burden the Court] with innumerable requests for clarification or modification, and with charges of violations."[552 F. Supp. at 219-20](#).

[**199] The Court will not expand these provisions. The difference between the procedures described above and those presently suggested by the intervenors is that the former are designed to be invoked only sporadically, upon the occurrence of some specific incident regarding the decree, while the latter would involve the Court, the intervenors, or both, on a more or less continuing basis in the divestiture process. The Court has no wish to be engaged on a long-range basis in oversight either of the divestiture or of the operations of the various components of the Bell System; such an oversight role would not be consistent [***162] with the principle of proper judicial restraint; and the kind of interference which it implies would not be fair to those who will manage AT&T and the Operating Companies.

HNG[↑] The Tunney Act requires a court to determine whether certain consent decrees are in the public interest and, in view of the unusual circumstances of this case,²⁸⁰ this responsibility also required the Court to pass upon the validity of the plan of reorganization under the decree and to allow third party intervenors to participate

²⁷⁵ These include a true-up of certain Operating Company accounts (1) to correct faulty estimates of depreciation reserves, of the assignment of assets and liabilities and of personnel assignments, (2) to correct mistaken personnel assignments and inadvertent work force imbalances, and (3) to accommodate personal hardships. Plan of reorganization at 160-62, 233-34, 277-78. See Part V(B) *supra*.

²⁷⁶ Reply Comments of American Satellite Co., April 4, 1983, at 2-4.

²⁷⁷ See note 283 *infra*.

²⁷⁸ The Court subsequently required the adoption of section VIII(I) which permits the Court to undertake the various section VII responsibilities (except that of modifying the decree) *sua sponte*, rather than merely upon request.

²⁷⁹ Such a party may serve upon the Department of Justice a request for enforcement. If the Department refuses to take action in response thereto, an application may be made to the Court for the initiation of "further appropriate proceedings." The process was carefully restricted to complaints accompanied by affidavits alleging facts with particularity which, if true, would demonstrate a bad faith refusal by the Department to enforce the judgment. [552 F. Supp. at 220](#). The Court will in due course issue an implementing order, and it will not entertain enforcement requests which do not follow this route.

²⁸⁰ E.g., the size of the divestiture, the sketchy nature of the decree itself, and, ultimately, the broad implications of the divestiture upon the entire telecommunications industry.

extensively in the review process. But for the reasons outlined above, **[**200]** this direct oversight should end with the approval of the plan of reorganization.

To be sure, the reorganization process is not complete: the division of assets, the transfer of employees and stock, and the upgrading of the Operating Companies to the status of truly equal access providers have yet to occur. Also, as several intervenors point out, it is possible that those within the Bell complex who will actually implement the reorganization will attempt to depart from the spirit if not the letter of the decree. However, notwithstanding some failures,²⁸¹ **[**201]** the parties have not given evidence of bad faith sufficient to impose upon them the rather draconian requirements requested by the intervenors.²⁸²

[*1120] There comes a time, once the basic documents have been approved, when the Court, rather than to superintend on an intensive basis the actual implementation of the reorganization, should, in the interest of keeping judicial involvement to a necessary minimum, leave compliance to the managers of the business interests directly involved, with such oversight as is vested in the Department of Justice by the decree. See, e.g., section VI.²⁸³

[202]** Should the Court's expectations with respect to the good faith and the fidelity of the parties to the letter and the spirit of the decree be disappointed with regard to any particular matter, there will be time enough under section VII, section VIII(I), and the Court's general equity powers, to take appropriate action. Except for such an eventuality, however, the Court's direct oversight role will come to an end with its approval of the plan of reorganization.

X

Conclusion

A. Summary

The Tunney Act imposed upon the Court the responsibility for determining whether the consent decree submitted to it by the parties was "in the public interest." In August of 1982, the Court approved the heart of the decree -- divestiture -- as satisfying that standard. At the same time, it determined that its public interest responsibilities required it to pass also on the plan of reorganization, since that plan was to fill in the decree's many interstices and to describe the precise method by which divestiture was to be accomplished.²⁸⁴ The plan was submitted by the

²⁸¹ E.g., the attempts of the Department of Justice, of AT&T, or both, to disavow commitments previously made with respect to patent and trademark rights to be granted to the Operating Companies (see Parts III and IV *supra*) and the continuing reluctance of the Department to accept as final the decision regarding the marketing of CPE by the Operating Companies. See pp. 73-74 *supra*. That reluctance gives rise to some concern regarding the Department's willingness and ability to enforce fairly the CPE provisions of the decree (rather than to seek, once again, to pursue its own notions in that regard) and this, of course, casts some doubt upon the Department's overall attitude with respect to the implementation of the decree. However, in these respects, too, the various judicial powers enumerated above are adequate to deal with any recalcitrance, whatever form it may take.

²⁸² It should also be noted that independent auditors and actuaries will verify compliance by AT&T and the Operating Companies with the requirements of the plan of reorganization regarding the assignment of assets and liabilities. AT&T Response to Objections at 355-60.

²⁸³ For similar reasons, the Court rejects the request of the State of California that the prices charged by Western Electric be controlled for a period following divestiture (Further Comments of the People of the State of California, Feb. 4, 1983, at 41); the request of the State of Missouri to provide special representation for the Operating Companies in the form of an independent attorney (Motion of the State of Missouri for a Hold Separate Order, April 13, 1983); and the request of New York City for the appointment of a Special Master pursuant to Rule 53 (Comments of the City of New York, Feb. 14, 1983, at p. 4). Suggestions similar to these were considered and rejected by the Court prior to the entry of the decree ([552 F. Supp. at 166, 220-22](#)). No new grounds have been adduced; indeed, the Operating Companies have not been reticent in recent months to advance their views to the Court, often contradicting those of AT&T. As the Operating Companies progress further on the road to independence, they may be expected to be increasingly strong-willed in protecting their rights vis-a-vis AT&T.

[***163] parties, and the Court has since subjected it to thorough scrutiny, on its own and with the assistance of the parties and [**203] over one hundred intervenors.²⁸⁵

To the extent that it has been free to do so,²⁸⁶ the Court, in exercising its Tunney Act [**204] responsibilities, has sought to achieve three principal objectives: (1) promotion of true and fair competition in the telecommunications long distance and equipment markets, (2) preservation of AT&T as a dynamic force, capable of research, manufacturing, and marketing in technologically advanced fields, and (3) protection of the principle of universal telephone service, accessible to all segments of the population regardless of income.

[*1121] In its consideration of the decree, the Court was able to advance all of these objectives -- in part by approving various provisions of the proposal submitted by the parties over vigorous objection from others, and in part by requiring the substantial modification of a number of other provisions.²⁸⁷ [**206] When [**205] it considered the plan of reorganization, the Court again had all three objectives in mind. However, it became apparent in the course of that consideration that the bulk of the actions which the Court had to take to achieve consistency of the plan with the decree tended primarily to promote the vitality of the Operating Companies²⁸⁸ and the principle of universal service.²⁸⁹

²⁸⁴ The 471-page plan is a blueprint for the largest corporate reorganization in United States history. The decree itself describes the reorganization process only in the most general terms.

²⁸⁵ Many of the submissions of the parties and the intervenors (e.g., states, AT&T's competitors, consumer groups) were detailed and voluminous. For example, one intervenor -- MCI -- filed a total of over 850 pages of memoranda, exhibits, and other documents, and AT&T's March 1983 Response alone was 617 pages in length. For the first time in the Bell System reorganization process, the Operating Companies participated in the judicial proceedings in their own right. A hearing was held on June 2, 1983, at which the parties, several intervenors, and the chief executives of the Regional Companies gave their views on several particularly controversial issues. See notes 3 and 4 *supra*.

²⁸⁶ The Court's powers under the Tunney Act are, of course, limited (see [552 F. Supp. at 151](#)) and in passing upon the plan of reorganization, the Court likewise does not write on a clean slate but must conform to the provisions and principles of the decree itself.

²⁸⁷ Among the actions which tended to further the cause of competition were the approval of the divestiture from AT&T of the twenty-two "bottleneck" local companies, the prohibition on the entry of these companies into business ventures where their monopoly status might have given them an improper advantage, and the requirement that these companies must provide equal access to all of AT&T's interexchange competitors. The Court also prohibited AT&T for a period of seven years from entering the electronic publishing market.

Actions designed to preserve AT&T's effectiveness included the rejection of proposals which would have required that company to divest itself of Western Electric and Bell Laboratories, prohibited it from utilizing sophisticated "bypass" technologies, and otherwise limited the scope of its operations. The Court also approved the removal of the restrictions imposed upon AT&T by the 1956 consent decree.

The vitality of the Operating Companies and the goal of universal telephone service were promoted, *inter alia*, by modifications which permitted the entry of the local companies into the printed advertising directory market and customer premises equipment market.

²⁸⁸ These actions will, of course, to some degree affect existing and potential competitors of AT&T, suppliers of products, and others within and without the telecommunications industry. But in passing upon the plan of reorganization, the Court was principally called upon to decide "internal" matters between AT&T and the Operating Companies, and for that reason it is not particularly surprising that the primary impact of the decision is on the local companies and their financial well-being.

²⁸⁹ This is not to say that other objectives were not advanced. Thus, the Court approved much of the AT&T plan, and it rejected proposals which would have improperly saddled AT&T with substantial costs, e.g., the direct costs of providing equal access and reconfiguring the network (Part I(C) of this Opinion) and the sole financial responsibility for the Bell System's contingent antitrust liabilities (Part II). In order further to promote competition in telecommunications services, the Court, *inter alia*, rejected joint use by AT&T and the Operating Companies of the name "Bell" (Part III(A)), required the access the Operating Companies provide to AT&T's competitors to be of sufficiently high quality so that voice and data customers will be unable to detect any difference

[**207] These actions, which are described in detail in the body of the Opinion, include the assignment of the "Bell" name and logo to the Operating Companies (Part III(C) of the Opinion); imposition of the requirement that the Operating Companies be granted licenses to all patents acquired by the Bell System (Part IV(A)), along with appropriate sublicensing rights (Part IV(B)); the grant of authority to the Operating Companies to perform their own Official Services functions rather than to have to lease the necessary facilities from AT&T or other interexchange carriers (Part VI(A)); approval of the establishment [***164] of a Central Staff Organization which will give effective logistical support to the Operating Companies (Part VIII); imposition of the requirement that AT&T stand as the ultimate guarantor of the costs of equal access and network reconfiguration (Part I); and the approval of local access and transport areas (LATAs) which avoid substantial, costly network rearrangements (Part VII(A)).

The fundamental purpose of the decree under the antitrust laws is to create conditions which will reduce the cost of telecommunications service to the public -- individual consumers, business, and government. [**208] ²⁹⁰ [*1122] Competition in the long distance and telephone equipment markets is already bearing fruit in the form of lower prices and wider choices. ²⁹¹ In the view of this Court, it is not necessary that these favorable developments be accompanied by the imposition of higher rates for local service.

One of the Court's principal [**209] aims throughout the public interest process has been to ensure that divestiture would not bring about or contribute to local telephone rate increases. While the parties to this proceeding have acknowledged that this effort was successful and that neither the decree nor the divestiture has caused or will cause local rates to rise, ²⁹² these rates will nevertheless be going up, albeit for reasons unrelated to the reorganization of the Bell System.

As the Court has previously noted, and as it elaborates at slip op. at pp. 74-76 *supra*, decisions [**210] taken by federal regulators regarding access charges will have the effect of increasing the cost of local service to residential subscribers. The Court has no authority to countermand those decisions. ²⁹³ It does, however, have the authority to take them into account -- not conclusively, certainly, but as support for determinations which are indicated in any event. That is what it has done here. The modifications it is requiring to be made in the proposed plan of reorganization should assist in moderating the pressure for local rate increases, whatever their source. ²⁹⁴

The telecommunications industry as a whole has a bright future for, as the Court previously observed, ²⁹⁵ we live in an age in which information and its transmission are central to the commonweal and a [**211] flourishing economy.

(Part I(A)), and required the provision of equal access in the intra-LATA field and the densely populated "corridors" in the New York-New Jersey-Philadelphia areas (Part VII(B)). In the interest of protecting the rights of AT&T employees, the Court made explicit that with respect to various subjects (e.g., pension benefits) the decree does not relieve AT&T of its obligation to bargain collectively. (Part V(A)).

²⁹⁰ Cost reductions need not, and in the Court's view will not, be achieved at the expense of quality and reliability. See Part VIII of the Opinion where the Court approved the setting of uniform standards so as to maintain the quality of the telephone network.

²⁹¹ A number of interexchange carriers and telephone equipment manufacturers and dealers have entered these fields or have vastly expanded their operations. The result has been that the prices of long distance service and customer premises equipment are falling and that telephone and related apparatus are becoming available in unprecedented varieties. These trends may be expected to continue and, indeed, to accelerate.

²⁹² See, e.g., Department of Justice Supplemental Memorandum, June 10, 1983, at 8 (decree will not, and has not, caused adverse effects on local rates); AT&T Response of May 5, 1983, at 10-21 (local rates are going up but not because of divestiture); see also, Response of the Federal Communications Commission, June 13, 1983, at 4 n.5 (FCC decision not a product of divestiture since Commission had proposed customer access charges well before Court accepted decree).

²⁹³ See [47 U.S.C. § 402](#).

²⁹⁴ Requests for rate increases by local telephone companies are apparently sought to be justified in some instances by references to the divestiture. Such reliance is unjustified. See note 292 *supra*.

²⁹⁵ [552 F. Supp. at 164-65](#).

No one can predict which company or group of companies will be able best to take advantage of the opportunities which lie ahead. To a large extent this will depend upon their own efforts and performance,²⁹⁶ and to a lesser degree upon the wisdom of those who will exercise regulatory authority over various segments of the industry at the federal and local levels. As indicated above (Part IX), the Court's own oversight over the Bell System divestiture process will end with the approval of the plan of reorganization.²⁹⁷

[**212] AT&T (including Western Electric and Bell Laboratories) as well as the Operating Companies appear to be led by talented managers, scientists, and engineers; moreover, these entities will continue to command immense personal and material resources. There is no reason to believe that the separate parts of the reorganized Bell System will not prosper in the new environment [*1123] or that they will fail to contribute significantly to the American economy.

B. Action on the Motions

Motions of AT&T and of the Department of Justice seeking approval of the plan of [***165] reorganization are pending.²⁹⁸ These motions will favorably be acted upon after the Court is advised that the following modifications [**213] are agreed to by the parties:³⁰⁰

1. If by January 1, 1994, the Operating Companies in the aggregate have not recovered the costs of providing equal access and network reconfiguration (as defined in AT&T's Consolidated Application filed with the Federal Communications Commission on March 1, 1983), plus financing expenses, through their collection of access charges from the interexchange carriers, AT&T will reimburse the Operating Companies in the amount of any remaining deficit. For purposes of this provision, "costs" shall mean the actual costs incurred by the Operating Companies, as distinguished from the estimates in the Consolidated Application. A preliminary accounting will be provided to the Court at the close of the Operating Companies' equal access and network reconfiguration program or by January 1, 1989, whichever [**214] is earlier, and a final accounting not later than January 1, 1994.
2. Beginning on the date of divestiture, AT&T will cease to use the word "Bell" in its corporate name and in the names of its subsidiaries or affiliates, other than Bell Laboratories and AT&T's foreign subsidiaries or affiliates; and beginning on the same date, AT&T will cease to use the "Bell" name and the Bell trademarks, or either, on any equipment sold by it in the United States after that date, except for equipment manufactured or purchased by AT&T prior to that date. In the event that substantial efforts have been made by AT&T by November 1, 1983, to acquaint the public with a new name to replace the name "American Bell," and for good cause shown, the Court will extend the use of that name by AT&T for an additional six months following divestiture in connection with the sale, but not the manufacture or purchase, of equipment.

The divested Operating Companies, the Regional Companies, or either, may use the "Bell" name and the Bell trademarks in connection with the services they perform and on equipment they use or sell, and they may use the word "Bell" in their corporate names, provided that the "Bell" name [**215] is modified so as to identify the

²⁹⁶ See, e.g., *Fortune, Breaking Up The Phone Company*, June 27, 1983.

²⁹⁷ The Court assumed control of this case in the summer of 1978. Pretrial proceedings were designed and announced in September of that year (**461 F. Supp. 1314**), and they took a little over two years to complete. Trial began in January 1981, and it was within weeks of completion when, in January 1982, the parties settled the case by the consent decree referred to above.

²⁹⁸ Issues relating to the LATAs are not a part of the plan of reorganization as such. However, the Court expects compliance with the decisions made with respect to such issues in the Opinion of April 20, 1983, and the present Opinion. It also expects the parties to comply with the other directions contained in these two documents.

²⁹⁹ All such modifications will supersede the existing provisions of the plan of reorganization to the extent of any inconsistency.

³⁰⁰ Section VIII(J) of the decree provides that the plan of reorganization "shall not be implemented until approved by the Court as being consistent with the provisions and principles of the decree." The Court considers that the plan will not be consistent with the decree until modified as required herein.

particular company, and provided further that on equipment sold any Bell trademark is accompanied by the corporate name of the respective Operating Company or Regional Company.

3. AT&T will grant to each Operating Company nonexclusive and personal royalty-free licenses to use telecommunications equipment and operational methods covered by all existing patents owned or controlled by AT&T and all other patents issued to AT&T on or before five years after the date of divestiture.

AT&T will grant to each Operating Company the right to sublicense all AT&T patents to manufacturers for use only in providing the Operating Companies with goods and services embodying the inventions of the patents.

[*1124] 4. In determining whether the use made by an Operating Company of facilities or other assets predominates over that made by AT&T within the meaning of section VIII(G) of the decree, the capacity of a facility or other asset devoted to Operating Company Official Service functions will be included as part of the Operating Company's use. Nothing in the decree precludes an Operating Company from constructing or maintaining facilities or other assets devoted [**216] to Operating Company Official Service functions.

5. The Operating Companies will not provide inter-LATA order writing, order typing, or other provisioning exclusively for AT&T.

6. The decree does not relieve AT&T and the Operating Companies from bargaining in good faith with any labor union, except with respect to the division of the Bell System Pension Plan into nine separate plans; the actuarial methodology specified in the plan of reorganization; and the elimination, one year following the date of divestiture, of unlimited portability of service credit.

MEMORANDUM

I

AT&T has asked for partial reconsideration of the Court's ruling of July 8, 1983, requesting that the Court delete Modification 1¹ [**217] which requires that AT&T guarantee the costs of providing equal access and of reconfiguring the network to conform to the LATAs (hereinafter generally referred to collectively as access costs or access expenses). The principal contention supporting the request for an outright elimination of the guarantee provision² is that this provision would improperly add to AT&T's obligations under the decree.³

As the Court previously pointed out (Opinion of July 8, 1983 slip op. at 14-19), there are two bases under the decree for requiring AT&T to bear at least part of the cost of access, whether in the form of a guarantee or otherwise. First, although section requires AT&T to transfer to the Operating Companies adequate facilities to enable the local companies to meet the equal access requirements, the transfers of equipment provided for under

¹ This Modification reads as follows:

If by January 1, 1994, the Operating Companies in the aggregate have not recovered the costs of providing equal access and network reconfiguration (as defined in AT&T's Consolidated Application filed with the Federal Communications Commission on March 1, 1983), plus financing expenses, through their collection of access charges from the interexchange carriers, AT&T will reimburse the Operating Companies in the amount of any remaining deficit. For purposes of this provision, 'costs' shall mean the actual costs incurred by the Operating Companies, as distinguished from the estimates in the Consolidated Application. A preliminary accounting will be provided to the Court at the close of the Operating Companies' equal access and network reconfiguration program or by January 1, 1989, whichever is earlier, and a final accounting not later than January 1, 1994.

² Other points made by AT&T essentially relate to the request for a proviso to the Modification and are considered under II *infra*.

³ AT&T also claims that the issue was not briefed or otherwise considered prior to the Court's decision on July 8, 1983, but this claim is difficult to understand. Dozens of memoranda with supporting materials were submitted to the Court on the question whether the access costs should more appropriately fall on AT&T or on the Operating Companies, and this was also one of the subjects on which argument and testimony were adduced at the June 2, 1983 hearing.

the plan of reorganization will clearly not be sufficient to [**218] achieve that purpose. Second, AT&T consistently represented to the Court that, even though the company would not pay the access expenses directly, it would do so indirectly through the carrier access charges.⁴ It now appears, however, that for several reasons discussed in the July 8, 1983 Opinion, the carrier access charges may not be adequate to reimburse [*1125] the Operating Companies for these costs. Hence the guarantee required as a prerequisite to the Court's approval of the plan of reorganization.

The argument made by AT&T, and supported by the Department of Justice, that the guarantee would impose an obligation on the company that would be inconsistent with what the parties call the decree's "basic premise" -- that the access costs be recovered through access charges paid by all interexchange carriers, not merely AT&T⁵ -- thus misses the point, for it fails to consider [**219] those features which embody a special AT&T obligation not shared by other carriers: the provisions of section I(A)(1) and the representations made to the Court by AT&T.⁶

All of these subjects [**220] were fully explored by the parties and considered by the Court prior to the issuance of the July 8, 1983 Opinion; AT&T's motion adds nothing new on any of the underlying issues; and the Court will therefore deny that motion to the extent that it requests the deletion of Modification 1.

II

The essence of AT&T's argument in support of the attachment of a proviso to the Modification lies in the claim that the Operating Companies and the local regulators would have and might exercise the opportunity to establish access charges that would be insufficient for full cost recovery. The result of such actions would be that the costs would ultimately be recovered from AT&T pursuant to the guarantee. This, according to AT&T, is not the purpose for which the Modification was designed. That understanding is correct.

The Operating Companies, assured under the guarantee provision of reimbursement from AT&T at the end of the ten-year period specified in the Modification, would have a significant incentive consistently to under-recover access costs prior to that time;⁷ the regulators would have a similar incentive to deny full recovery of such costs;⁸ and AT&T's competitors would have an incentive [**221] to encourage these trends.⁹ In the judgment of the Court it is quite likely that, absent some countervailing mechanism, these entities will act on these incentives.

The Court was not unmindful of this contingency when it issued the July 8, 1983 Opinion. Indeed, it was for that reason that it required AT&T and the Operating Companies to file prior to divestiture a description of the accounting methods which would be used for identifying the access costs and for determining whether and when they had been recovered. Opinion [**222] at slip op. 19 note 37. The Court had in mind that, if AT&T and the Operating Companies agreed on the procedure and substance with respect to such recovery, there would be no need for

⁴ While all interexchange carriers will pay such access charges, AT&T, as the largest carrier, will contribute the lion's share.

⁵ AT&T Memorandum at 3-4; Department of Justice Response at 2.

⁶ Moreover, as the National Association of Regulatory Utility Commissioners (NARUC) points out,

it would be fundamentally unfair if AT&T, whose interstate toll operations were sheltered by the refusal to provide equal access, should be allowed to unload the massive costs of complying with the decree upon the BOCs.

Response at 2. On this basis, the Court also rejects AT&T's demand that it strike the reference in the July 8, 1983, Opinion to AT&T's prior obligation to provide equal or substantially equal access. Motion at slip op. at p. 607 note *. If this issue should arise in other, private litigation, the tribunals having jurisdiction will, of course, draw their own conclusions based on their understanding of court and FCC precedents.

⁷ This would lower rates and thus stimulate usage, and it would also tend to divert the equal access obligation from the local companies to AT&T.

⁸ The resulting lower intra-LATA toll rates would obviously be popular with the public the regulators serve.

⁹ To the extent that AT&T, as a result of the guarantee, ultimately paid for the costs of providing equal access, its competitors would be relieved of the obligation of paying for that access through interexchange access charges.

further judicial intervention; if these parties did not agree (essentially because of a dispute similar to that generated [*1126] by AT&T's present motion) the Court could take steps before divestiture to guard against the contingencies feared by AT&T. By its motion AT&T has brought the issue to a head now, and there is no reason for delaying consideration of this subject.

The July 8, 1983 ruling represents the Court's determination that the somewhat conflicting requirements of the decree¹⁰ can best be harmonized by requiring the Operating Companies to incur the access expenses while requiring AT&T to provide the guarantee embodied in Modification 1. Implicit in that Modification is the principle that AT&T shall guarantee all access costs legitimately incurred and legitimately unrecovered. Equally implicit is the corollary: that AT&T need not provide a guarantee with respect to costs which remain unrecovered as a consequence of actions by Operating Companies or regulators designed improperly [*223] to divert such costs to AT&T. The proviso proposed by AT&T would make the latter objective explicit,¹¹ and it would do so -- as will not be seen -- without in any way weakening the guarantee itself.

Several of the intervenors¹² argue that the proviso would have the practical effect of nullifying the guarantee obligations. The theory underlying these arguments is that, if due to market forces or substantial bypass by AT&T, there is a shortfall in any one year in the recovery of carrier access charges to pay for the access costs, the Operating Companies will under the proviso be compelled to file, and the regulators will be compelled to approve, [*224] a higher tariff the following year, and so on every year until the end of the guarantee period. This process, it is said, would automatically and inevitably relieve AT&T of all obligations on the following basis. If the tariffs were designed so as to recover all necessary costs, there would never be a shortfall; on the other hand, if the tariffs were not designed to recover all necessary costs, they would violate the proviso and AT&T would be discharged of its obligation on that basis.

That analysis misconceives the breadth of the guarantee and the relatively narrow focus of the proviso. As AT&T has pointed out (Reply at 8-9):

The obligation would still require AT&T to stand as the ultimate guarantor of whatever equal access and network reconfiguration costs are allowed in the BOCs' tariffs in the ten years following divestiture. If market conditions ultimately prevent the BOCs from recovering those costs by January 1, 1994 -- despite [*225] their inclusion in tariffs intended to produce full recovery -- AT&T pays the balance, even as the guarantee would be conditioned by the proviso.

Properly construed, then, the effect of the Modification in combination with the proviso will be to protect AT&T from manipulation by the Operating Companies or the regulators; at the same time, these provisions will not excuse AT&T from the guarantee obligation in the event that there is a shortfall in the recovery of carrier access charges for access cost purposes as a result of market forces or bypass by AT&T.¹³ Under the decree and in equity, that is as it should be.¹⁴

¹⁰ Compare, e.g., section I(A)(1) with Appendix B.

¹¹ Essentially, the protection of AT&T is accomplished in the proviso by the clauses relieving AT&T of its obligation if the Operating Companies fail to file access charge tariffs designed to recover all costs included within the guarantee, or if the regulators refuse to allow such tariffs to take effect.

¹² E.g., Maine, p. 2; NARUC, pp. 4-7; GTE, p. 7; SBS, p. 2.

¹³ In the event that at the conclusion of the guarantee period, there is a dispute as to the cause of any shortfall, the Court will resolve that dispute as provided for on p. slip op. at 19 of the Opinion of July 8, 1983.

¹⁴ The proviso proposed by AT&T includes a footnote which reads as follows:

To the extent that network reconfiguration costs relate to the BOCs' provision of other services (such as intra-LATA toll), rather than to carrier access services, the BOCs will be required to include such costs in tariffs for those other services which are filed and allowed to become effective in accordance with this proviso, and any amounts thus recovered shall count toward reimbursement of the BOCs' costs of network reconfiguration.

[**226] [*1127] Questions have been raised by some (e.g., SBS Memorandum at 3) regarding the duration of the guarantee period. Modification 1 envisages the recovery by the Operating Companies of the costs of access within ten years. AT&T and others (e.g., the Department of Justice) have pointed out that under current regulatory directives, many major capital investments must be depreciated over extended periods of time, some in twenty-five years. The Court is thus presented with the choice of either substantially extending the guarantee period or retaining the ten-year period notwithstanding the various existing or proposed depreciation schedules.

After giving the subject careful consideration, the Court has decided to retain the ten-year deadline.¹⁵ Any change in that regard would create unnecessary and inappropriate entanglements between AT&T and the Operating Companies well into the next century.¹⁶ Moreover, depreciation schedules vary, depending not only upon the equipment involved but also upon the practices of the several state and federal regulators, and it would be difficult, if not impossible, to tailor the guarantee to meet all these contingencies. Finally, [**227] the various depreciation schedules are not immutably fixed in the law but are subject to change by the regulators.

[**228] The choice thus rests with the various regulatory bodies.¹⁷ They may either so adjust the depreciation schedules for equipment used to provide equal access or network reconfiguration as to accommodate the requirements of Modification 1, or they may decline to do so, recognizing that if they elect this course not all the costs may be recovered within a ten-year period and AT&T will be relieved of its obligation to that extent to make up the difference.

The Court denies AT&T's motion for partial reconsideration insofar as it requests that the Court strike Modification 1, but it grants that motion insofar as it requests the addition to the Modification of a proviso.¹⁸ [*1128] Accordingly, Modification 1 is hereby amended by the addition of the following language:

Network facilities to be constructed will, of course, be used in part for services other than interexchange access (e.g., for intra-LATA access or intra-LATA toll services), and accordingly a portion of the investment in these facilities will normally be recovered from services other than such access. On this basis, it is appropriate, therefore, that any funds received by the Operating Companies from these other sources be counted toward AT&T's reimbursement obligation. It was for this reason that the Court required in its July 8, 1983 Opinion that the Operating Companies keep records to isolate access expenses from expenses they would have incurred in any event (Opinion at slip op. at 19 note 37), and it is on the same basis that it approves the inclusion of this footnote.

It should be noted that this provision will not compel regulators to determine that any portion of network reconfiguration costs relates to services other than carrier access services; it simply provides that *if* the regulators make such determinations, AT&T will be protected from having to pay under the guarantee even though, in reality, there was no deficit.

¹⁵ The Court recognizes that one consideration cuts the other way: a ten-year schedule, as California points out (Opposition at 7), may inflate the Operating Companies' annual access costs in the near term. However, that increase in costs must be kept in perspective. Even if \$3 billion will have to be recovered in the ten-year period, the total amount would still only be two percent of the over \$150 billion that is estimated to be collected by the Operating Companies in access charges. See Department of Justice Response, Attachment B at 6. Thus, the effect on rates of a ten-year recovery period vs. some longer period would not be substantial, and even that effect could further be mitigated by the regulators.

¹⁶ For the same reason, the Court rejects the suggestion of the United Church of Christ (Opposition at 8) that AT&T be relieved of the guarantee only to the extent that the Operating Companies may be able to recover costs after 1994.

¹⁷ This solution also appropriately meets concerns expressed by the Federal Communications Commission (Comments at 2) and by NARUC (Response at 5) that the Court's decision might improperly interfere with the authority of the regulators.

¹⁸ Several of the intervenors propose various measures in other areas of the plan of reorganization in order to counterbalance what they regard as the effects of the proviso. Thus, California proposes (Opposition at 9-10) that the Court assign the so-called "Account 232" to AT&T, and MCI suggests (Opposition at 3) that the Court's modification with respect to patent licensing will have a beneficial impact on the recovery of the access costs. The plan of reorganization, as it was required to be modified in the July 8, 1983 Opinion, is carefully balanced to achieve the decree's purposes and objectives. The proviso is not sufficiently significant to call that balance into question and thus to provoke reconsideration of other aspects of the plan.

California also suggests (Opposition at 5-6) that

Provided, **[**229]** however, that with respect to any Operating Company, AT&T's obligation shall be discharged to the extent that: (a) the Operating Company fails annually to file carrier access tariffs designed to recoup any then-unrecovered equal access and network reconfiguration * costs by January 1, 1994; or (b) any regulatory commission refuses to permit such tariffs to take effect; or (c) regulatory requirements for the depreciation or amortization of equal access and network configuration investment cause any portion of the investment not to be recognized as a cost of ratemaking in periods prior to January 1, 1994.

[230]** It is the Modification as so amended which AT&T and the Department of Justice will be required to incorporate in the plan of reorganization as a prerequisite to the Court's final consideration and approval of that plan.

MEMORANDUM

Several motions for reconsideration or clarification of the Court's July 8, 1983, Opinion have been filed. This Memorandum disposes of all such motions.¹

1. MCI Communications Corporation has moved for clarification of Modification 3, which modifies the provisions of the plan of reorganization with respect to **[**231]** patents. MCI argues that computer software is subject to this modification, and that AT&T must grant to the Operating Companies royalty-free licenses thereto as well as the right to sublicense where the provision of goods and services to these companies is involved.

The Court stated in its July 8, 1983 Opinion that, for purposes of the plan of reorganization, "patents" includes non-patented technical information. Opinion at slip op. p. 53 note 100. However, as the Court indicated in the very next sentence of that footnote, it was referring in the technical information context to such information as was funded by the license contract between AT&T and the Operating Companies. Computer software has not been so funded.

More broadly, as the discussion in Part IV of the July 8, 1983 Opinion demonstrates, insofar as technical information (as distinguished from patents) is concerned, the Court was concerned in Modification 3 with the issues raised in the "Patents" section of the plan of reorganization, in particular note 399 at p. 411 of the plan. That footnote flatly states that "the BOCs will not be granted any licenses relating to patents **[*1129]** or any other technical information **[**232]** that relate solely to provision of CPE, inter-LATA service or any BOC services now prohibited by the Decree." The July 8 Opinion made it clear that this restriction was unacceptable under the purposes and principles of the decree and the representations that had been made to the Court. This, in turn, led to the requirement of Modification 3.

Other portions of the plan of reorganization deal with non-patented technical information in completely different contexts. For example, Part II(A)(1) (pp. 341-369 of the plan) discusses in considerable detail the assignment of various types of computer software. It was not the Court's intention to disapprove these portions of the plan *sub silentio*.² Indeed, the two reasons given in the July 8 Opinion for granting to the Operating Companies more extensive patent rights than originally provided for by the plan of reorganization -- (1) recognition of past contributions to research they had made through the licensing contracts, and (2) the reasonableness of the removal

[throughout] the nation, BOCs are presenting regulatory authorities with rate increase proposals requesting not only substantial increases in total revenue but also drastically restructured rate designs, featuring 100 to 300 percent increases in basic monthly rates . . . , occasional reductions in toll rates [and] substantial customer access line charges

To the extent that these requests are claimed to be based on the divestiture as presently structured, they have no justification.

¹ To the extent that motions or individual arguments made in motions are not addressed herein, they either raise issues which were previously fully considered or are deemed to lack merit for other reasons. However, the Operating Companies' proposed provision of cellular radio services across LATA boundaries, which is not part of the plan of reorganization but constitutes a request for an exception under Section VIII(C) of the decree, will be considered at a later time.

² The provisions in the plan regarding computer software represent complex arrangements some of which were substantially modified by AT&T following Department of Justice objections. See, e.g., Response of Department of Justice to Comments at 144-52.

of the mandatory patent licensing provisions of the 1956 decree³ -- are not applicable to the type of non-patented, computer software which is the subject of MCI's motion. [**233]⁴ These parts of the plan were not affected by Modification 3, and they remain in effect.

To the extent that clarification is required to resolve any seeming inconsistency between the Court's reference to technical information in note 100, on the one hand, and its implicit approval of the plan's treatment of non-patented technical information which AT&T did propose to share with the Operating Companies, on the other,⁵ it is hereby resolved as described above. MCI's motion will accordingly be denied.

[**234] 2. Several intervenors ask the Court to reconsider its approval of the assignment of the so-called Account 232 to the Operating Companies and to assign the Account instead to AT&T.⁶ That request will likewise be denied. In-place wiring, which is a principal item in Account 232, is as much a "bottleneck" as are the subscriber access lines.⁷ To assign such wiring to AT&T would be to insert AT&T-controlled facilities between the Operating Companies and the subscribers, and such an assignment would thus be entirely inconsistent with the basic purposes of the decree.⁸

Account 232 also includes the capitalized labor costs associated with the installation [**235] and testing of customer premises equipment, and a theoretical case could be made that, since under the plan embedded CPE is being assigned to AT&T, so should be this portion of Account 232. However, the Court was and is persuaded by AT&T's argument, for the reasons stated in AT&T's Response to Objections at 154-55, that there is no practical way to separate out the various handling costs.⁹ The provision made in the plan of reorganization regarding Account 232 is consistent with the decree and otherwise reasonable, and there is no basis for reconsidering the Court's approval of the plan in this regard.

3. GTE Corporation has petitioned the Court for limited reconsideration of that part of the Court's July 8, 1983 Opinion which approved the Operating Companies' classifications (as either intra-LATA or inter-LATA) [*1130] of traffic between their territories [**236] and Independent telephone company territories. Opinion of July 8, 1983 at slip op. p. 124-31. The basis for this request for the reconsideration of nineteen out of hundreds of such classifications is that new information regarding homing and network arrangements was revealed for the first time during the development of the exchange areas under the proposed consent decree in *United States v. GTE Corp.*, Civil Action No. 83-1298, (filed May 4, 1983), which is pending before this Court. See GTE Petition at 2.

Of the nineteen classifications at issue, in eleven instances the relevant Operating Company does not oppose GTE's reclassification proposal.¹⁰ These proposals are reasonable and consistent with the decree, and they will accordingly be deemed incorporated in the plan of reorganization.

³ Opinion of July 8, 1983 at slip op. p. 58-60.

⁴ See AT&T Response to Objections at 426-29.

⁵ I.e., technical information not related to CPE, inter-LATA service, or other Operating Company services prohibited by the decree.

⁶ The Court did not discuss this issue in the July 8, 1983, Opinion, but it was considered. Opinion at slip op. p. 2 note 2, and at 3.

⁷ Much inside wiring is wire that is embedded in conduits, and it is not replaceable by, nor often even accessible to, the customer.

⁸ See [*Litton Systems, Inc. v. Am. Tel. & Tel.*, 700 F.2d 785 \(2d Cir. 1983\)](#).

⁹ See also, the FCC's treatment of this issue, *Amendment of Part 31 (Uniform System of Accounts)*, CC Docket No. 79-105, [85 F.C.C.2d 818, 823-30 \(1981\)](#).

¹⁰ These proposals relate to the following areas: Indiana-Lafayette; Oklahoma-Guymon; South Carolina-Florence; Illinois-Olney; Illinois-Macomb; Pennsylvania-Erie; Texas-Texarkana; Kentucky-Winchester; Michigan; Oregon; and Washington. With respect

[**237] Of the remaining eight GTE proposals, in two instances the Operating Company does not oppose a temporary reclassification pending the completion of certain modernization programs (which was the basis for the Operating Company's original proposal). ¹¹ Such a temporary reclassification makes sense in view of current network arrangements, and the Court will approve it for these two areas on such a basis. In another case, permission is hereby granted for the reclassification which GTE proposes, upon completion of the rehoming project.¹²

In two instances, the Operating Company and GTE are in agreement, but the Department of Justice has correctly pointed out that the Operating Company should be permitted, but not required, [**238] to service the adjacent area.¹³ With respect to the three remaining proposals, the relevant Operating Company opposes the reclassification -- at least at this time -- and GTE has not demonstrated that the classification as originally proposed by that Operating Company, and approved by the Department of Justice and the Court, is unreasonable or inconsistent with the decree.¹⁴ Accordingly, that part of GTE's motion which relates to these five areas is denied.

[**239] 4. The Public Service Commission of Kentucky has moved for reconsideration of the Court's decision to deny consolidation of the Winchester and Louisville LATAs. The Commission argues that the incremental loss of intrastate toll revenue that will be occasioned by three LATAs rather than two will require increases in local rates. However, the Commission has failed to note that access charges to be collected from the interexchange carriers can, if set properly, make up for any loss of revenue to South Central Bell. In any event, significant competitive advantages would flow from three LATAs. The Department of Justice has previously argued in favor of three LATAs on this basis; and the Public Service Commission has not demonstrated that [*1131] the Court ought to disturb its prior decision that three LATAs are appropriate in Kentucky.¹⁵ The motion is denied.

5. New York Telephone Company has expressed concern that the July 8, 1983 Opinion may have placed [**240] territorial restrictions on the Operating Companies' provision of directory advertising services. That concern is unwarranted. As the company correctly surmised, when the Court made mention of activities outside an Operating Company's territory,¹⁶ it was referring to the Bell logo standing alone and the Bell name without a modifier. The decree and the plan do not limit the provision of directory advertising or of customer premises equipment to prescribed geographical territories.

6. The American Council of the Blind, the Paralyzed Veterans of America, and others are concerned about the transfer to AT&T of embedded specialized equipment for the disabled, such as teletypewriters and large button telephones, the price of which may conceivably no longer be subsidized after the transfer. The Court's approval of the decree's provisions regarding embedded CPE is, of course, without prejudice to whatever equitable arrangements may be made among AT&T, the Operating Companies, [**241] and the representatives of the

to the last three areas, the respective Operating Company has indicated that the classifications in these states are already being revised as required by the Court's July 8, 1983 Opinion, and that they will therefore be consistent with the GTE proposals. Response of the Operating Companies to GTE Petition at 6-7.

¹¹ The proposals in this category relate to the areas of Illinois-Bloomington and Illinois-Kewanee. Response of the Operating Companies to GTE Petition at 4, 7.

¹² This will enable the association of the Chesapeake exchange with the Columbus LATA when the exchange is rehomed in 1984.

¹³ These two proposals relate to Indiana-Terre-Haute and West Virginia-Bluefield.

¹⁴ These proposals relate to the following areas: Illinois-Chicago; Ohio-Medina; and California-Oxnard. With respect to the last of these areas, Pacific Telephone has indicated that it is presently discussing the resolution of this matter with the Department of Justice. Response of the Operating Companies to GTE Petition at 3. As the Court indicated in the Opinion of July 8, 1983, the Bell Operating Companies may, under the decree, subsequently petition the Court for reclassification or for exceptions in regard to service between their own areas and Independent territory. Opinion of July 8, 1983 at slip op. p. 129 n.238.

¹⁵ South Central Bell is neutral on this issue.

¹⁶ July 8, 1983 Opinion at slip. op. p. 51.

disabled regarding continued subsidization of such equipment. See also, The Telecommunications for the Disabled Act, P.L. 97-410 (1982).

7. The Communications Workers of America yesterday for the first time requested that the Court clarify or reconsider language in the July 8, 1983 Opinion which may prohibit portability of pension benefits not only between AT&T and the divested entities but also among the Regional Companies and between them and the Central Staff Organization. See Opinion at slip op. p. 83. In view of the fact that AT&T and the Union are apparently at the present time engaged in collective bargaining, the Court inquired of AT&T whether it was prepared, on an informal and expedited basis, to express its agreement with the Union's interpretation, but AT&T responded that it could not do so. Accordingly, the issue will be resolved on the basis of briefing in accordance with the usual procedure.

ORDER

Upon consideration of the motion filed by AT&T on April 7, 1983 to approve the Plan of Reorganization, the proposed plan of reorganization as amended, the testimony given, and the oppositions, affidavits, comments, responses, and briefs **[**242]** filed with respect thereto:

It appearing that AT&T on August 3, 1983, agreed to the modifications required by the Court on July 8, 1983, as qualified on July 28, 1983, and it appearing that the Department of Justice has likewise given its assent to such modifications, it is this 5th day of August, 1983,

ORDERED That the motion be and it is hereby granted, and it is further

ORDERED That AT&T's proposed plan of reorganization, dated December 16, 1982, as amended March 14, 1983, March 25, 1983, April 7, 1983, and August 3, 1983, be and it is hereby approved as consistent with the provisions and principles of the decree entered on August 24, 1982.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN4 [+] Practices Governed by Per Se Rule, Boycotts

The courts are reluctant to extend the per se categories of antitrust violations beyond price-fixing, market division, group boycotts, and tying arrangements. The test for determining whether the rule of per se illegality should be extended to a business practice not heretofore afforded per se treatment and whether the practice facially appears to be one that would always or almost always tend to restrict competition and decrease output, instead of one designed to increase economic efficiency and render markets more, rather than less, competitive.

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Noncompetition & Nondisclosure Agreements

Trade Secrets Law > Federal Versus State Law > **Antitrust Law**

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN5 Types of Contracts, Covenants

Employee covenants not to compete or interfere with the employer's business after the end of the employment relationship should not be tested under the per se rule of antitrust illegality. Such covenants often serve legitimate business concerns such as preserving trade secrets and protecting investments in personnel. In addition, the courts have had inadequate experience with noncompetition and noninterference covenants to warrant a per se categorization.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN6 Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

The proper function of ancillarity in antitrust analysis is to remove in some instances the per se label from restraints otherwise falling within the category. Whether a restraint that does not fall within a per se category is ancillary to a valid agreement is relevant only in the sense that ancillarity increases the probability that the restraint will be found reasonable.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN7 Per Se Rule & Rule of Reason, Sherman Act

Whether an agreement had sufficient anticompetitive effect is an essential part of a claim pursuant to [Section 1](#) of the Sherman Act, [15 U.S.C.S. § 1](#), under the rule of reason.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN8 Regulated Practices, Private Actions

Although summary judgment is disfavored in antitrust cases in which motive and intent are important factors, its use is not prohibited and may save judicial resources.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN9 Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

The plaintiff in an antitrust action judged under the rule of reason bears the burden of proving unreasonableness.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

718 F.2d 897, *897 (1983 U.S. App. LEXIS 25875, **1

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

HN10 [blue icon] Regulated Practices, Private Actions

When an antitrust defendant brings a summary judgment motion, he bears the burden of demonstrating the absence of a genuine issue of material fact and that he is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(c)*. The moving party is subject to a particularly rigorous burden in antitrust cases. In addition, nonmoving plaintiff is entitled to have all reasonable inferences of fact drawn in his favor.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

HN11 [blue icon] Summary Judgment, Burdens of Proof

The amount of evidence necessary to raise a genuine issue of material fact on a summary judgment motion is enough to require a jury or judge to resolve the parties' differing versions of the truth at trial. Substantial evidence to raise a triable issue is more than a mere scintilla, but the moving party has the burden of clearly demonstrating the absence of any genuine issue as to the existence of each material fact which under applicable principles of substantive law would be required to support a judgment in its favor.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN12 [blue icon] Regulated Practices, Market Definition

To establish anticompetitive market effect, antitrust plaintiff must prove that defendant's actions caused a decrease in competition in the relevant market. Whether a decrease in competition occurred and whether it was caused by defendant's conduct are factual matters which, if disputed, must be resolved by the trier of fact.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN13 [blue icon] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

To amount to an unreasonable restraint of trade, defendant's anticompetitive conduct must have an effect greater than its effect upon plaintiff's business.

Torts > Business Torts > Commercial Interference > Prospective Advantage

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN20 [Regulated Practices, Trade Practices & Unfair Competition]

The tort of interference with prospective business advantage encompasses intentional interference with business relations or advantages which are merely prospective and ordinarily not the subject of an existing contract. The protected area of activity is not a contractual relationship but an economic relationship with the potential to ripen into contract. The relations protected against intentional interference include interference with the prospect of obtaining employment or employees.

Civil Procedure > Appeals > Standards of Review > Clearly Erroneous Review

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Erie Doctrine

HN21[] Standards of Review, Clearly Erroneous Review

A federal court of appeals ordinarily accepts a district judge's analysis of the law of the state in which the judge sits, unless clearly wrong.

Counsel: Michael L. Harrison, Esq., Harrison, Hearn, (Illegible Word), San Jose, California, for Appellant/Petitioner.
Ernest Leff, Esq., Hahn, Cazier & Leff, Los Angeles, California, for Appellee/Respondent.

Judges: Wallace, Kennedy, and Nelson, Circuit Judges.

Opinion by: WALLACE

Opinion

[*899] WALLACE, Circuit Judge:

Aydin Corporation (Aydin) sued Loral Corporation (Loral) and Conic Corporation (Conic), a subsidiary of Loral, alleging violations of the federal antitrust laws. Aydin also alleges that they violated California statutory and common law. The district judge granted summary judgment for Loral and Conic on all counts. We affirm in part and reverse in part and remand.

I

Moyes served as head of the TerraCom Division of Conic (TerraCom) for several years prior to 1979. He also served as a director of Conic. On March 29, 1979, Moyes and directors of Loral and Conic signed a handwritten agreement terminating Moyes's employment. The agreement contained provisions resolving [*2] salary and stock obligations, as well as an agreement by Moyes not to "disrupt, damage, or impair" Conic's business.

On May 4, 1979, Moyes signed a more formal agreement with Loral and Conic which generally followed the provisions of the March 29th agreement. The May 4th agreement provided in part that Moyes would "preserve the confidentiality of all trade secrets and other confidential information" and that he would not:

now or in the future disrupt, damage, impair or interfere with the business of Conic Corporation, or its TerraCom Division whether by way of interfering with or raiding its employees, disrupting its relationships with customers, agents, representatives or vendors or otherwise[. Moyes is] not however, restricted from being employed by or engaged in a competing business.

After termination of his employment with Conic, Moyes became employed by Aydin as head of Aydin's newly formed Microwave Division. During the next several months, ten TerraCom employees left and went to work for Moyes at Microwave.

Loral and Conic filed suit in California state court in October 1979 against Moyes and two of the Aydin employees who had been employed by TerraCom, [*3] alleging breach of the May 4th agreement and unfair competition. Loral and Conic filed another state court action against Aydin in Pennsylvania. The Pennsylvania suit was dismissed after Loral and Conic joined Aydin as a defendant in the California action.

Aydin filed this suit in federal court in April 1980, alleging that the May 4th agreement is an unlawful restraint of trade, that Loral and Conic's state court actions violate the antitrust laws, and that Loral and Conic are liable under California law for tortious interference with prospective business relations, for injury to a servant, and for unfair competition. Loral and Conic moved for summary judgment which was granted on all counts. HN1[] We review the district court's order of summary judgment de novo. *State ex rel. Edwards v. Heimann*, 633 F.2d 886, 888 & n.1 (9th Cir. 1980).

II

We find no merit in Aydin's contention that the agreement prohibiting Moyes from disrupting, damaging, impairing or interfering with Conic's business is a per se violation of [section 1](#) of the Sherman Act. [15 U.S.C. § 1.](#) [**4] [Section 1 HN2](#) [↑] prohibits an unreasonable contract, combination or conspiracy in restraint of trade. See [Standard Oil Co. v. United States](#), 221 U.S. 1, 63-68, 55 L. Ed. 619, 31 S. Ct. 502 (1911).

Aydin first alleges that the May 4th agreement constitutes a per se violation of [section 1](#) because it results in a horizontal market division. To support this claim, Aydin [*900] must establish that Moyes competes at the same market level as Loral and Conic. [United States v. Topco Associates, Inc.](#), 405 U.S. 596, 608, 31 L. Ed. 2d 515, 92 S. Ct. 1126 (1972); accord [Krehl v. Baskin-Robbins Ice Cream Co.](#), 664 F.2d 1348, 1354 (9th Cir. 1982) [HN3](#) [↑] ("The hallmark of a horizontal market allocation is collusion among competitors to confer upon each a monopoly in a specific area."); [National Tire Wholesale, Inc. v. Washington Post Co.](#), 441 F. Supp. 81, 87 (D.D.C. 1977) ("In order to establish a horizontal restraint, there must be a collaboration [**5] among competitors.") (emphasis in original), aff'd without opinion, [595 F.2d 888 \(D.C. Cir. 1979\)](#). Moyes is not a competitor of Loral and Conic in any significant measure and does not operate at the same level of the market structure. Further, the May 4th agreement expressly permits Moyes to be employed by or engage in a competing business. There is no evidence that Aydin or any other competitor of Loral and Conic participated in any way in the formation of the agreement. We express no opinion on whether, on another set of facts, a noninterference agreement between a company and a departing executive could ever amount to a horizontal market division.

Aydin next argues that even if the May 4th agreement does not result in a horizontal market division, the categories of per se antitrust violations should be expanded to include post-employment noninterference agreements. [HN4](#) [↑] We have been reluctant to extend the per se categories of antitrust violations beyond price-fixing, market division, group boycotts, and tying arrangements. See [Ron Tonkin Gran Turismo, Inc. v. Fiat Distributors, Inc.](#), 637 F.2d 1376, 1381-88 [**6] (9th Cir.), cert. denied, 454 U.S. 831, 70 L. Ed. 2d 109, 102 S. Ct. 128 (1981); [DeVoto v. Pacific Fidelity Life Insurance Co.](#), 618 F.2d 1340, 1344 (9th Cir.), cert. denied, 449 U.S. 869, 66 L. Ed. 2d 89, 101 S. Ct. 206 (1980); [Gough v. Rossmoor Corp.](#), 585 F.2d 381, 386-88 (9th Cir. 1978), cert. denied, 440 U.S. 936, 59 L. Ed. 2d 494, 99 S. Ct. 1280 (1979); accord [White Motor Co. v. United States](#), 372 U.S. 253, 263, 9 L. Ed. 2d 738, 83 S. Ct. 696 (1963). As we stated in [Krehl v. Baskin-Robbins Ice Cream Co.](#):

The test for determining whether the rule of *per se* illegality should be extended to a business practice not heretofore afforded *per se* treatment is "whether the practice facially appears to be one that would always or almost always tend to restrict competition and decrease output . . . or instead one designed to 'increase economic efficiency and render markets more, rather than less, competitive.'"

[664 F.2d at 1356](#), quoting [Broadcast Music, Inc. v. Columbia Broadcasting System, Inc.](#), 441 U.S. 1, 19-20, 60 L. Ed. 2d 1, 99 S. Ct. 1551 (1979); [**7] accord [Betaseed, Inc. v. U & I Inc.](#), 681 F.2d 1203, 1220 (9th Cir. 1982); see also [Broadcast Music, Inc. v. Columbia Broadcasting System, Inc.](#) 441 U.S. at 8-10 (per se classification appropriate when practice is plainly anticompetitive and courts have considerable experience with the challenged business relationship); [Continental T.V., Inc. v. GTE Sylvania Inc.](#), 433 U.S. 36, 49-50, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977) ("Per *se* rules of illegality are appropriate only when they relate to conduct that is manifestly anticompetitive.").

[HN5](#) [↑] Employee covenants not to compete or interfere with the employer's business after the end of the employment relationship should not be tested under the *per se* rule. Such covenants often serve legitimate business concerns such as preserving trade secrets and protecting investments in personnel. [Newburger, Loeb & Co. v. Gross](#), 563 F.2d 1057, 1082 (2d Cir. 1977), cert. denied, 434 U.S. 1035, 54 L. Ed. 2d 782, 98 S. Ct. 769 (1978). In addition, the courts have had inadequate [**8] experience with noncompetition and noninterference covenants to warrant a *per se* categorization. See [Bradford v. New York Times Co.](#), 501 F.2d 51, 59-60 (2d Cir. 1974); [Business Foods Service, Inc. v. Food Concepts Corp.](#), 533 F. Supp. 992, 995 (E.D.N.Y. 1982).

Other circuits have likewise declined to apply a *per se* rule to noncompetition agreements. See, e.g., [Lektro-Vend Corp. v. Vendo Co.](#), 660 F.2d 255, 264-65 (7th Cir. [*901] 1981), cert. denied, 455 U.S. 921, 71 L. Ed. 2d 461, 102

S. Ct. 1277 (1982) (noncompetition covenants ancillary to sale of business); [Bradford v. New York Times Co., 501 F.2d at 59-60](#) (post-employment noncompetition agreement).

Without citing any authority, Aydin asserts that because most covenants ancillary to a valid agreement are tested by the rule of reason, all non-ancillary restraints must be tested under a per se standard. Even assuming that the restraints in this case may be deemed "non-ancillary," Aydin's analysis is confused. [HN6](#) [↑] The proper function of ancillarity [**9] in antitrust analysis "is to remove [in some instances] the *per se* label from restraints otherwise falling within the category." Bork, *Ancillary Restraints and the Sherman Act*, 15 A.B.A. Antitrust Section Proceedings 211, 212 (1959). Whether a restraint that does not fall within a *per se* category is ancillary to a valid agreement is relevant only in the sense that ancillarity increases the probability that the restraint will be found reasonable. See, e.g., [Lektro-Vend Corp. v. Vendo Co., 660 F.2d at 264-65](#); [Sound Ship Building Corp. v. Bethlehem Steel Corp., 387 F. Supp. 252, 255 \(D.N.J. 1975\), aff'd, 533 F.2d 96 \(3d Cir.\), cert. denied, 429 U.S. 860, 50 L. Ed. 2d 137, 97 S. Ct. 161 \(1976\)](#). See generally [Gough v. Rossmoor Corp., 585 F.2d at 388](#) (practices not conclusively presumed unreasonable must be proved unreasonable).

Aydin has not alleged conduct by Loral or Conic that fits within the market division category of *per se* restraints. We decline to expand the categories of *per se* violations and, therefore, affirm that part of the judgment of the district court rejecting the *per* [**10] *se* claim.

III

The district court's entry of summary judgment for Loral and Conic on Aydin's claim that the May 4th agreement is an unreasonable restraint of trade prohibited by [section 1](#) of the Sherman Act is more troublesome. At issue is [HN7](#) [↑] whether the agreement had sufficient anticompetitive effect, an essential part of a [section 1](#) claim under the rule of reason. [Kaplan v. Burroughs Corp., 611 F.2d 286, 290-91 \(9th Cir. 1979\), cert. denied, 447 U.S. 924, 65 L. Ed. 2d 1116, 100 S. Ct. 3016 \(1980\)](#). The district court summarized Aydin's allegations of anticompetitive effect as encompassing conduct by Loral and Conic interfering with the public's ability to obtain optimum service in the microwave telecommunications industry and affecting the employee labor market by preventing TerraCom employees from going to work for Moyes at Aydin. The district judge held that these allegations were insufficient to state a [section 1](#) claim and that Aydin's "allegations of far-reaching anticompetitive effects in the relevant industry are simply not supported by the uncontested [**11] facts of this case."¹

[HN8](#) [↑] Although summary judgment is disfavored in antitrust cases in which motive and intent are important factors, [Poller v. Columbia Broadcasting System, Inc., 368 U.S. 464, 473, 7 L. Ed. 2d 458, 82 S. Ct. 486 \(1962\)](#); [Calnetics Corp. v. Volkswagen of America, Inc., 532 F.2d 674, 683 \(9th Cir.\) \(per curiam\), cert. denied, 429 U.S. 940, 50 L. Ed. 2d 309, 97 S. Ct. 355 \(1976\)](#), its use is not prohibited and may save judicial resources. See [First National Bank v. Cities Service Co., 391 U.S. 253, 288-90, 20 L. Ed. 2d 569, 88 S. Ct. 1575 \(1968\)](#); [Hamro v. Shell Oil Co., 674 F.2d 784, 786 \(9th Cir. 1982\)](#) (California antitrust statutes); [Betaseed, \[**12\] Inc. v. U & I Inc., 681 F.2d at 1207; Mutual Fund Investors, Inc. v. Putnam Management Co., 553 F.2d 620, 622, 624 \(9th Cir. 1977\)](#).

[HN9](#) [↑] The plaintiff in an antitrust action judged under the rule of reason bears the burden of proving unreasonableness. [Betaseed, Inc. v. U & I Inc., 681 F.2d at 1228](#). Nevertheless, [HN10](#) [↑] when the defendant brings a summary judgment motion, he bears the burden of demonstrating the absence of a genuine issue of material fact and that he is [*902] entitled to judgment as a matter of law. [Fed. R. Civ. P. 56\(c\)](#); accord [Mutual Fund Investors, Inc. v. Putnam Management Co., 553 F.2d at 624](#). The moving party is subject to a "particularly rigorous" burden in antitrust cases. *Id.*; [Javelin Corp. v. Uniroyal, Inc., 546 F.2d 276, 280 \(9th Cir. 1976\), cert. denied, 431 U.S. 938, 53 L. Ed. 2d 256, 97 S. Ct. 2651 \(1977\)](#). In addition, a nonmoving plaintiff is entitled to have [**13] all reasonable inferences of fact drawn in his favor. See, e.g., [Sherman v. British Leyland Motors, Ltd., 601 F.2d 429, 438 \(9th Cir. 1979\)](#).

¹ Because matters outside the pleadings were presented to and not rejected by the district judge, we treat the ruling as one for summary judgment. [Fed. R. Civ. P. 12\(b\)](#).

HN11[] The amount of evidence necessary to raise a genuine issue of material fact is enough "to require a jury or judge to resolve the parties' differing versions of the truth at trial." *First National Bank v. Cities Service Co.*, 391 U.S. at 288-89; *Mutual Fund Investors v. Putnam Management Co.*, 553 F.2d at 624. As we stated in *Sherman v. British Leyland Motors, Ltd.*:

Substantial evidence to raise a triable issue is more than a mere scintilla, but the moving party has the burden of clearly demonstrating the absence of any genuine issue as to the existence of each material fact which under applicable principles of substantive law would be required to support a judgment in its favor.

601 F.2d at 439 (citations omitted).

HN12[] To establish anticompetitive market effect, the plaintiff [**14] must prove that the defendant's actions caused a decrease in competition in the relevant market. Whether a decrease in competition occurred and whether it was caused by the defendant's conduct are factual matters which, if disputed, must be resolved by the trier of fact. See *First Beverages, Inc. v. Royal Crown Cola Co.*, 612 F.2d 1164, 1175-76 (9th Cir.), cert. denied, 447 U.S. 924, 65 L. Ed. 2d 1116, 100 S. Ct. 3016 (1980); *Sherman v. British Leyland Motors, Ltd.*, 601 F.2d at 451; *Kaplan v. Burroughs Corp.*, 611 F.2d at 295-96 (affirming judgment *non obstante veredicto*); *DeVoto v. Pacific Fidelity Life Insurance Co.*, 516 F.2d 1, 6-7 (9th Cir.) (reversing grant of summary judgment on section 1 claim), cert. denied, 423 U.S. 894, 96 S. Ct. 194, 46 L. Ed. 2d 126 (1975); see also *Continental T.V., Inc. v. GTE Sylvania Inc.*, 433 U.S. at 49 ("Under [the rule of reason], the factfinder weighs all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition.").

Aydin [**15] did not allege in its complaint that the actions of Loral and Conic adversely affected competition in the microwave telecommunications industry. It alleged only that it was restrained from competing with Loral and Conic in a product market area alleged to extend to California, "other states and foreign countries." Regarding its employee labor market allegations, Aydin alleged only that it was "prevented . . . from seeking to employ skilled personnel who are desirable, logical candidates." We are at a loss to identify with any specificity the "fields of competition [with which] we are concerned and the dimensions of [those] field[s]." *Gough v. Rossmoor Corp.*, 585 F.2d at 389. Aydin has the burden to plead and prove that the actions of Loral and Conic harmed competition, not merely that the actions harmed Aydin in its capacity as a competitor. See *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc.*, 429 U.S. 477, 488, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977) (antitrust laws exist to protect competition, not competitors); *Gough v. Rossmoor Corp.*, 585 F.2d at 386 **HN13**[] ("To [**16] amount to an unreasonable restraint of trade the anticompetitive conduct must have an effect greater than its effect upon the plaintiff's business."). Aydin must demonstrate "a reduction . . . in competition flowing from the defendant's acts . . ." *California Computer Products, Inc. v. International Business Machines Corp.*, 613 F.2d 727, 732 (9th Cir. 1979).

The issue of market effect was properly raised before the district judge, but Aydin failed to raise a genuine issue of material fact. **HN14**[] In response to the motion for judgment, Aydin could not rest on its pleadings but was required to respond with affidavits or other evidence. *Fed. R. Civ. P.* [¹*9031 56(e)]. The only qualified response we have found on this issue was a portion of a deposition attached to Aydin's Brief in Opposition to Motion for Summary Judgment to the effect that the Chairman of the Board of Loral expressed concern that Aydin would build competitive microwave radios. This alone is insufficient. No other evidence was pointed out to us by Aydin. Viewing the evidence in the light most favorable [**17] to Aydin, a rational trier of fact could not find that Loral and Conic have caused a decrease in competition in the relevant product or labor markets.

IV

The district court also rejected Aydin's Sherman section 1 theory that the state court actions against Aydin, Moyes, and other Aydin employees constituted an antitrust violation. The district court ruled for Loral and Conic on the basis that "plaintiff failed to provide convincing proof that defendants' state court action to enforce the May 4

agreement is anything less than a genuine attempt to prevent irreparable injury to TerraCom caused by Moyes' breach of the agreement."

HN15[] Bona fide efforts to obtain or influence legislative, executive, judicial or administrative action are immune from antitrust liability under the *Noerr-Pennington* doctrine. *California Motor Transport Co. v. Trucking Unlimited*, 404 U.S. 508, 30 L. Ed. 2d 642, 92 S. Ct. 609 (1972); *United Mine Workers v. Pennington*, 381 U.S. 657, 14 L. Ed. 2d 626, 85 S. Ct. 1585 (1965); *Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc.*, 365 U.S. 127, 5 L. Ed. 2d 464, 81 S. Ct. 523 (1961); [**18] accord *Clipper Express v. Rocky Mountain Motor Tariff Bureau, Inc.*, 674 F.2d 1252, 1262 (9th Cir. 1982) (*Clipper Express*). The *Noerr-Pennington* doctrine protects the *first amendment* right to petition the government. *California Motor Transport Co. v. Trucking Unlimited*, 404 U.S. at 510; *Clipper Express*, 674 F.2d at 1262-63. If, however, the effort to obtain or influence government action is a sham, and is actually an attempt to interfere improperly with the business relationships of a competitor, antitrust liability may be imposed. *California Motor Transport Co. v. Trucking Unlimited*; *Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc.*, 365 U.S. at 144; *Clipper Express*, 674 F.2d at 1263.

HN16[] Multiple lawsuits are not a condition precedent to showing sham. Whether we consider the state court actions begun by Loral and Conic and subsequently combined as one or two actions is immaterial. We have held that a single action is sufficient to invoke the sham exception to the *Noerr-Pennington* [**19] doctrine. *Clipper Express*, 674 F.2d at 1265-67 & 1265 n.19.

HN17[] Whether an effort to invoke the judicial process is a genuine effort to obtain redress, or instead is a mere sham, is a question of fact. *Clipper Express*, 674 F.2d at 1264. Based on the record before us, we can draw no inference from the fact that the state court action was still pending when the district court entered judgment. Success or failure might be helpful as one indication of Loral and Conic's intent in bringing the action, *id.*; *Ernest W. Hahn, Inc. v. Coddington*, 615 F.2d 830, 841 n.13 (9th Cir. 1980), but such an indication is not available before the state action is terminated.

This leaves us once more to determine if there is a genuine issue of fact material to whether the filing of the state actions was a sham. No evidence of sham, aside from the filings of the actions, was pointed out to us by Aydin. A rational trier of fact could not conclude that the state court actions were a sham and therefore not immune from antitrust liability.

V

We next consider [**20] the district court's entry of summary judgment for Loral and Conic on the pendent claims.

HN18[] A district court may in its discretion reach pendent state claims even when the federal claims are dismissed before trial. See *Rosado v. Wyman*, 397 U.S. 397, 403-05, 25 L. Ed. 2d 442, 90 S. Ct. 1207 (1970); *Aitken [*904] v. IP & GCU-Employer Retirement Fund*, 604 F.2d 1261, 1271 (9th Cir. 1979); *Sherman v. British Leyland Motors, Ltd.*, 601 F.2d at 454; cf. *United Mine Workers v. Gibbs*, 383 U.S. 715, 726, 16 L. Ed. 2d 218, 86 S. Ct. 1130 (1966). The district court did not abuse its discretion in retaining jurisdiction to decide the state claims, because the record shows that the court and the litigants had expended considerable time on the pendent claims before the antitrust claims were dismissed. *Arizona v. Cook Paint & Varnish Co.*, 541 F.2d 226, 227-28 (9th Cir. 1976) (per curiam), cert. denied, 430 U.S. 915, 51 L. Ed. 2d 593, 97 S. Ct. 1327 (1977). Aydin seeks relief on three California [**21] state-law theories: intentional interference with prospective business relations, injury to a servant affecting his ability to serve his master, and unfair competition.

The California Supreme Court set forth the standard for determining whether a plaintiff has stated a claim for intentional interference with prospective business relations in *Buckaloo v. Johnson*, 14 Cal. 3d 815, 537 P.2d 865, 122 Cal. Rptr. 745 (1975). **HN19**[] We are, of course, bound to follow an interpretation of state law by the highest state court. *West v. American Telephone & Telegraph Co.*, 311 U.S. 223, 236, 85 L. Ed. 139, 61 S. Ct. 179 (1940); *Erie Railroad Co. v. Tompkins*, 304 U.S. 64, 78, 82 L. Ed. 1188, 58 S. Ct. 817 (1938).

In *Buckaloo v. Johnson*, the California Supreme Court held that a complaint alleging a "colorable economic relationship" between the plaintiff and a third party, with "the potential to develop into a full contractual relationship"

was sufficient to withstand a demurrer. *Buckaloo v. Johnson*, 14 Cal. 3d at 828-29, 537 P.2d at 873, 122 Cal. Rptr. at 753; [**22] see also 4 B. Witkin, *Summary of California Law*, Torts § 392 (8th ed. 1974) [HN20](#)↑ (tort of interference with prospective business advantage encompasses "intentional interference with business relations or advantages which are merely prospective and ordinarily not the subject of an existing contract"); *Restatement (Second) of Torts* § 766B comment c (1979) (the relations protected against intentional interference include interferences with the prospect of obtaining employment or employees). The California Supreme Court also stated that "the protected area of activity is not a contractual relationship but an economic relationship with the potential to ripen into contract." *Buckaloo v. Johnson*, 14 Cal. 3d at 830 n.7, 537 P.2d at 873 n.7, 122 Cal. Rptr. at 753 n.7.

We conclude that Aydin has made a sufficient showing to overcome a summary judgment motion of a colorable economic relationship with the potential to ripen into a full contractual relationship with TerraCom personnel that it desires to hire. Although this count refers to prospective employees, the economic [**23] relation is sufficiently demonstrated by the existing employment agreements between Aydin and the ten ex-TerraCom employees, Moyes's previous relationship with the prospective employees, and his desire to hire as many TerraCom employees as possible. [HN21](#)↑ We ordinarily accept the district judge's analysis of the law of the state in which the judge sits unless clearly wrong. E.g., *Camacho v. Civil Service Commission*, 666 F.2d 1257, 1262 (9th Cir. 1982); *S.A. Empresa De Viacao Aerea Rio Grandense v. Boeing Co.*, 641 F.2d 746, 752 (9th Cir. 1981); *C.R. Fedrick, Inc. v. Borg-Warner Corp.*, 552 F.2d 852, 856 (9th Cir. 1977). Here, the district judge was clearly wrong when she concluded that under California law Aydin must allege that it offered employment to TerraCom employees other than those actually hired, see *Olivet v. Frischling*, 104 Cal. App. 3d 831, 839-40, 164 Cal. Rptr. 87, 91 (1980) (allegation that defendants' conduct resulted in refusal to renegotiate leases upheld against demurrer), and as a result improperly [**24] granted summary judgment on the intentional interference with prospective business relations claim. The district court did not reach the issue of the defense of justification and neither do we. We only hold that on the ground relied upon by the district court, summary judgment could not be granted on this count.

[*905] Aydin's counts for relief for injury to servants affecting ability to serve under *California Civil Code section 49(c)* ([section 49\(c\)](#)) and on a common law unfair competition theory present more difficult issues concerning the proper interpretation of California law. Both claims are based upon the actions taken by Loral and Conic in filing the state court actions. We have found no California precedents that resolve the legal issues which confront us. Therefore, we are unable to assume, from a review of available California law, the result the California Supreme Court would reach. *Scandinavian Airline System v. United Aircraft Corp.*, 601 F.2d 425, 427 (9th Cir. 1979) (affirming partial summary judgment).

Aydin asserts that it has a claim under [section 49\(c\)](#) due to the harm caused to some of its employees as a result of Loral and Conic's [**25] state court actions. The district judge assumed without deciding that a claim could arise under [section 49\(c\)](#) for harm to an employer caused by a suit against an employee. The court ruled, however, that no claim was stated "absent some substantiation for [Aydin's] claim that the [state] suit is groundless and in bad faith." Whether a state court action is groundless and in bad faith is a factual issue.

The district court decided against Aydin on its common law unfair competition claim because it found that Aydin failed to demonstrate that Loral and Conic's state court actions were brought in bad faith.² As with the [section 49\(c\)](#) claim, the district court declined to determine whether a cause of action can be stated under California law for injury resulting from the filing of a lawsuit. We know of no authoritative California precedent resolving the issue.

[**26] Thus, both the [section 49\(c\)](#) and the unfair competition claims were resolved on the same issue. As we concluded in connection with Aydin's *Noerr-Pennington* claim, see part [IV, supra](#), whether the state actions were a sham or a genuine effort by Loral and Conic to obtain redress is a factual issue and, based upon the record before us, Aydin failed to raise an issue of material fact. The district judge was not clearly wrong in concluding that no

² The district court also rested its summary judgment ruling for Loral and Conic on the unfair competition claim on the basis that Aydin failed to demonstrate that the agreement with Moyes was unlawful. We do not address this aspect of the district court's ruling because we affirm the summary judgment on the unfair competition claim on another basis.

cause of action under either section 49(c) or a common law unfair competition theory could be stated based upon litigation instituted in good faith. Thus, summary judgment was properly granted.

AFFIRMED IN PART; REVERSED IN PART AND REMANDED.

Concur by: KENNEDY (In Part)

Dissent by: KENNEDY (In Part)

Dissent

KENNEDY, Circuit Judge, concurring in part and dissenting in part:

Although I agree that the plaintiff's antitrust claim must be dismissed, in my view the case presents an issue different from the one discussed by the majority. I respectfully submit a separate concurrence on this aspect of the appeal. I also dissent from the remand of one of the plaintiff's state claims, for I would dismiss that part of the action as well.

[**27] The majority states: "Aydin must establish that Moyes competes at the same market level as Loral and Conic." It further states: "Moyes is not a competitor of Loral and Conic in any significant measure and does not operate at the same level of the market structure." The problem with these statements is that Aydin is the plaintiff, and Aydin does compete at the same market level as Conic. Moyes's agreement with Conic in fact serves to restrain Aydin as though Aydin itself were bound not to hire Conic employees. For analytic purposes, at least, the agreement thus operates as a horizontal division of the market among competitors.

The majority in effect holds that a chief executive officer and his company cannot agree to lessen competition, even when they contract to do so explicitly and in anticipation of the executive's leaving the company's [*906] employment. I know of no principle that immunizes such agreements from standard antitrust analysis.

This said, I would nevertheless grant summary judgment against Aydin. Even if we assume the complaint alleges a horizontal market division, it does not mean we must find it a per se Sherman Act violation, or we must find it unreasonable. [**28] Broadcast Music, Inc. v. Columbia Broadcasting System, Inc., 441 U.S. 1, 60 L. Ed. 2d 1, 99 S. Ct. 1551 (1979), dealt with an arrangement bearing all the earmarks of a horizontal restraint through price-fixing, yet the Court failed to condemn it as illegal. See also United States v. Sealy, Inc., 388 U.S. 350, 357, 18 L. Ed. 2d 1238, 87 S. Ct. 1847 (1967) (dictum). Finally, of course, United States v. Addyston Pipe & Steel Co., 85 F. 271 (7th Cir. 1898), points away from per se treatment, when an agreement is ancillary to the achievement of legitimate business concerns.

Although the purpose of the agreement in question was to diminish competition of Loral's employees, doing so was ancillary to the protection of Loral-Conic's trade secrets, namely its information as to the talent and potential of its most valuable technical employees. It furthers rather than stifles competition when an employer is enabled to keep such information confidential. The economic rationale for protecting such trade secrets is the same as that for protecting patents: only by creating property rights with respect to knowledge can we insure the efficient [**29] production of such knowledge. See, e.g., F. Scherer, Industrial Market Structure and Economic Performance, ch. 16; R. Posner & F. Easterbrook, Cases and Materials on Antitrust Law, ch. 2, c.3. In my view, the agreement is pro-competitive; it is not governed by per se tests, and it satisfies the rule of reason.

I dissent from remand of the pendent state claim on intentional interference with prospective business relations. The majority is correct in ruling that there is an insufficient showing of bad faith prosecution on the other state counts. In my view, this premise should lead us to affirm the dismissal of the interference count as well, rather than to remand to the district court, which will be required to dismiss it in any event.

Section 773 of the Restatement (Second) of Torts provides:

One who, by asserting in good faith a legally protected interest of his own or threatening in good faith to protect the interest by appropriate means, intentionally causes a third person not to perform an existing contract or enter into a prospective contractual relation with another *does not interfere* improperly with the other's relation if the actor believes that his interest [**30] may otherwise be impaired or destroyed by the performance of the contract or transaction. (Emphasis added.)

This proposition has been endorsed by California courts. See, e.g., *Imperial Ice Co. v. Rosier*, 18 Cal. 2d 33, 36, 112 P.2d 631, 633 (1941); *Fletcher v. Western National Life Ins. Co.*, 10 Cal. App. 3d 376, 10 Cal. App. 3d 376, 89 Cal. Rptr. 78, 89 (1970); *United Professional Plan v. Superior Court*, 9 Cal. App. 3d 377, 88 Cal. Rptr. 551, 562 (1970). Even if we view justification as an affirmative defense, our finding of good faith completely disposes of the issue.

I would affirm the district court in all respects.

Opinion by: STERLING

Opinion

MEMORANDUM AND ORDER:

This is a suit for damages brought after Plaintiffs' planned shopping center development failed to materialize. Due to the disposition of the case, the facts will be summarized with all reasonable factual inferences drawn in favor of Plaintiffs who are three parent and subsidiary corporations and two individuals (Messrs. Gordon and Jones), who owned the corporations.

For a number of years Plaintiffs had unsuccessfully attempted commercially to develop a tract of approximately 177 acres located at the intersection of highways IH 45 and FM 1960 in Harris County, Texas, in the northern part of the greater Houston metropolitan area. Early attempts to develop a regional shopping center at the site failed principally because a major department store could not be persuaded to locate there. In the spring of 1975, Plaintiffs' outlook improved somewhat, and on May 5 [*2] they were able to sign Montgomery Ward Properties Corporation (Properties) to a letter partnership or joint venture agreement to develop "an enclosed, air conditioned shopping center" (Dx. W 74). The letter agreement by its terms was to be followed at an indefinite date by a "partnership agreement containing comprehensive provisions regulating the acquisition and development of the . . . site."

After May 5, development planning proceeded apace and in June the joint endeavor secured a new option to buy the land at the proposed site from its owners who are not parties of this suit (Dx. W 80). In the fall of 1975 the parties determined that it would be advisable to enlist the services of a more experienced mall developer. They

invited Melvin Simon, a nationally recognized developer, to join the venture. Later all partners in the project entered into a second letter agreement (Dx. W 92). This agreement, dated November 26, 1975, significantly modified the earlier agreement, changed the ownership rights and contribution obligations of the three partnership entities, placed valuations on various subsections of the optioned land, and explicitly recognized the right of each partnership [*3] entity to withdraw.

During this same period Properties renewed discussions it had held for several years with Federated Stores Realty (Realty) concerning the possibility of locating a Ward's store in Greenspoint Mall which was a shopping center being developed by Realty on IH 45 approximately six miles south of the FM 1960 site. Simon, who is not a party of this lawsuit, and Plaintiffs did not learn of these discussions until February, 1976. During that month Properties refused to extend a commitment to build a Ward's store to the owners of the optioned land at FM 1960. Since the option contract required such a commitment and payment of a fee on or about March 1st to extend the option to purchase the land through June 4, 1976, Plaintiffs, specifically Jones, attempted and successfully achieved renegotiation of the option contract so that the commitment requirement was deleted (Dx. W 116). Properties agreed to pay the full amount of the final, March 1 option payment which, under the November 26, 1975, letter agreement, normally would have been divided according to the ownership interest of the three partner entities, i.e., Plaintiffs, Simon, and Properties.

In May, 1976, Properties [*4] and its parent reached agreement with Realty that Ward would purchase land at Greenspoint Mall and locate a store there (Dx. F 68). Several days later Properties advised Simon and Plaintiffs that it did not intend to participate in the purchase of the partnership optioned land at IH 45 and FM 1960 (Dx. W 134). Plaintiffs filed this suit within one month.

The case was tried before a jury on a second amended complaint which alleged violation by all Defendants of the Sherman Antitrust Act, interference with contractual and prospective business relations by all Defendants except Properties, and breach of contract and fiduciary duty by Properties. Plaintiffs claimed actual, untrebled damages in the approximate amount of \$30 million. At the close of the presentation of all evidence at trial, the Court concluded that the critical issues in the case were either legal issues or questions governed by "facts and inferences [which] point so strongly and overwhelmingly in favor of one party that the Court believes that reasonable men [and women] could not arrive at a contrary verdict." [Boeing Co. v. Shipman, 411 F.2d 365, 374 \(5th Cir. 1969\)](#) (en banc). Accordingly, the motions by Defendants [*5] for directed verdicts were granted.

Contract Claim

Plaintiffs claimed that Properties breached the May 5, 1975, partnership or joint venture agreement by refusing after May, 1976, to participate in the development of the shopping center. They argue that the November 26, 1975, agreement is totally inapplicable to this case or at least that paragraph 7 of the agreement is inapplicable since Properties did not comply with its terms, but in fact made all payments under the option agreement (Dx. W 80). The subject paragraph reads:

7. Any of the parties may cease option payment beginning with the subsequent payments due as of the end of January and continuing through June if they do desire, and the other parties shall have the opportunity to purchase the withdrawing partners interest. If both parties desire to purchase this interest, it would be on a proportionate basis as it now stands.

The question of whether a contract is ambiguous is one of law for the Court. [R & P Enterprises v. La Guarda, Gavel & Kirk, Inc., 596 S.W.2d 517, 518 \(Tex. 1980\)](#). The primary object of courts in construing written contracts is to arrive at the intention of the parties. [Harris v. Row, 593 S.W.2d 1*61, 303, 306 \(Tex. 1979\)](#) (affirming the trial court's instructed verdict against a plaintiff's contract claim). Intent is to be determined from the words of the contract "consider[ed] . . . in the light of the surrounding circumstances." [City of Pinehurst v. Spooner Addition Water Co., 432 S.W.2d 515, 519 \(Tex. 1968\)](#) (interpreting another contract in a jury case). See [Watkins v. Petro Search, Inc., 689 F.2d 537 \(5th Cir. 1982\)](#).

In this case it is clear that both the May 5 and November 26, 1975, agreements are binding on the Plaintiffs. They unquestionably agreed to the latter agreement which controls the former. See *A.A.A. Realty Co. v. Neece*, 292 S.W.2d 811 (Tex.Civ.App. - Fort Worth 1956), aff'd 156 Tex. 614, 299 S.W.2d 270 (1957), aff'd on rehearing, [159 Tex. 403, 322 S.W.2d 597 \(1959\)](#). "Be a contract ever so binding, it is but a meeting of the minds, and those who enter into a contract may by mutual agreement rescind or alter it." *West India Industries, Inc. v. Tradex*, 664 F.2d 946, 949 (5th Cir. 1981). Paragraph 7 is unambiguous, and clearly granted each party the right to withdraw from the joint venture or partnership during the period January through June, 1976.

The critical [*7] issue is whether the paragraph 7 term, "option payment," includes only the payments due on or before March 1, 1976, under the option agreement (Dx. W 80) as contended by Plaintiffs, or whether the term includes, in addition to those payments, the initial payment due on the date of closing pursuant to paragraph 3(a) of the option agreement. The Court concludes that the term "option payment" includes the initial purchase price payment required by paragraph 3(a) of the option agreement.

At least partly decisive of this question is the fact that the withdrawal paragraph grants the parties the right to "cease option payment . . . due as of . . . June if they so desire." None of the payment advocated by Plaintiffs as being the "option payments" referred to in paragraph 7 could have come due in June. See Dx. W 80, paragraphs 2, 3, 10.

The initial purchase price payment was a true option under the agreement. If the option was "exercised" by paying the amount specified in paragraph 3 of the agreement, the optionee could buy the land. If the payment was not made, then all rights under the agreement terminated just as in the case of a failure to make the payments required by paragraph [*8] 2 to extend the term of the agreement.

Whether the initial purchase price payment due in June was in fact an "option" payment is a question clearly answered by examination of a document appropriately entitled for purposes of this inquiry, "Option Agreement." Dx. W 80. The first sentence of Paragraph 1 of that document defines what the option is, and what the optionee has in fact purchased. It reads in relevant part, "Optionor hereby grants, bargains, sells and conveys to Optionee the exclusive option . . . to purchase those certain tracts of land . . ." [emphasis added]. In other words, the option which existed was only an exclusive option to purchase certain land. Simply because the requisite payments were made to extend the discretionary period of one year to its fullest did not mean that no additional "option" existed. On the contrary, the most important option which would still be available to the optionee was the "option . . . to purchase" "prior to the expiration of the option term or any extension period." See Dx. W 80 at 3. Truly this was an "option payment . . . due . . . through June."

Paragraph 2 of the Option Agreement prefacing a part of the agreement with [*9] the condition, "If this option is exercised . . ." This conditional phrase, of course, was mandated by the fact that the most important option envisioned by the parties was the ultimate unpredictable "option . . . to purchase," which continued to be available to the optionee through June. At the risk of overemphasis, it should be noted that another phrase in the same paragraph of the agreement restates this idea. It reads, "Should Optionee elect to exercise the option herein granted Optionee shall have the right to do so. . ." (emphasis added). Clearly, these are words of option, choice, and discretionary right. The Optionee (and his assigns) were not committed to final purchase simply by extending the one-year term to its maximum, but held a further option to make a choice, or in the words of their November, 1975, agreement to make an "option payment". Only "[u]pon receipt of notice of Optionee's election to exercise the Option, [shall] this agreement . . . be and become a contract of sale . . ." Dx. W 80 at 3. The Court concludes from considering the words of the agreements and the surrounding circumstances that the logical and unambiguous intent of the parties was to [*10] allow withdrawal from the joint venture or partnership at any time until such time as the option became a contract of sale and a multi-million dollar purchase was irreversible.

At the approximate time Properties withdrew from the joint endeavor, its Executive Vice President, Mr. Burgess, indicated that he understood and relied upon the fact that the initial purchase price constituted and "option payment" as that term was used in the partnership agreement. See Dx. W 132 (referring to "the right under Section 7 to cease payments due under the options in June 1976"). Properties' interpretation of the agreement remained unchanged at trial and was supported by the testimony of Mr. Harbeck. R. 1321-22. Plaintiffs failed to produce any

specific evidence, either contemporaneously with the transaction or at the time of trial, which showed the existence of a contrary interpretation. "No principal of interpretation of contracts is more firmly established than that great, if not controlling, weight should be given by the court to the interpretation placed upon a contract of uncertain meaning by the parties themselves." *Harris v. Rowe, supra*. The Court concludes that the meaning of the [*11] instant contract is certain, but if any doubt existed it was removed by the contemporaneous interpretation of the parties.

Since all partners including Defendant Properties possessed the right to withdraw by ceasing option payments up to and including the one due as of June, exercise of that right by Properties was not a breach of the partnership contract. Plaintiffs' first claim fails as a matter of law. Alternatively, even if Plaintiffs' interpretation of the term "option payment" is correct, a proposition with which the Court disagrees, Properties still did not materially breach the partnership contract. At oral argument of the motions for directed verdicts the Plaintiffs, apparently for the first time, argued that cessation of option payments was a condition which if not satisfied required forfeiture of the right of termination. They argued that "option payment[s]" were those due on or before March 1, 1976, pursuant to the option agreement. Under Texas law, however, conditions which lead to forfeitures are not favored and are avoided if that is possible as a matter of interpretation. *Home Savings Assoc. v. Tappan Co., 403 F.2d 201 (5th Cir. 1968)*.

The Court concludes [*12] that if the initial purchase price payment was not an "option payment" that cessation of option payment was not a condition precedent to the right of withdrawal. Paragraph 7 is not written in language of condition, and does not specify that withdrawal in any manner other than cessation of payment is void or a waiver of the power of withdrawal. Cf. *Southern Surety Co. v. Macmillian Co., 58 F.2d 541, 546 (10th Cir. 1932)*. Additionally, as a matter of interpretation it is appropriate to look at the likely intent of the parties as reflected by the language of the contract and the surrounding circumstances. *Id. at 547*. One of the most important, ultimate goals of both 1975 agreements was to establish the obligations of the partners to contribute to the common enterprise. To infer that the parties' intent was to encourage early cessation of such joint contribution by prohibiting withdrawal subsequent to payment of the March option payment would contravene the overwhelming bulk of the evidence heard at trial. Certainly, Plaintiffs possessed no interest in terminating Properties financial contribution to the development at an early date. Simon and Properties wanted more time to attract [*13] additional anchor tenants. The evidence at trial overwhelmingly indicated that Plaintiffs desired and attempted to keep the development alive for as long a period as was possible even after Properties announced its withdrawal. Payment of the option costs, even by a withdrawing partner, would have furthered the express intent of the parties to purchase and develop the land at FM 1960.

In short, as a matter of contract interpretation, a legal question for the Court, it is clear that the intent of the parties in subscribing to Paragraph 7 of the November, 1975, agreement was not to encourage early rather than late withdrawal. The evident intent was to establish a right of succession to partnership interests along with a broad right of withdrawal at any time before "the Option, [shall] . . . be and become a contract of sale." See Dx. W 80 at 3. The intent of the parties as expressed by their language was to provide a right of withdrawal "through June if they so desire."

Plaintiffs have failed wholly to allege or show the existence of any damages suffered by them as a result of Properties' withdrawal in May rather than, for instance, in March, 1976. Cf. *Southern Surety Co. v. Macmillian Co., supra at 549*. This failure to claim or prove prejudice is a third independent, alternative ground upon which to deny Plaintiffs' contract claim.

Fiduciary Duty

Plaintiffs claim that Properties breached the fiduciary duty it owed as a partner or joint venturer by negotiating with Realty concerning Greenspoint Mall during the term of the FM 1069 venture, and by failing to reveal the occurrence of those secret negotiations. Plaintiffs argued additionally that even if a contractual right of withdrawal existed Properties could not have exercised that right without breaching an inherent duty to its partners.

The latter contention clearly is not the law in Texas. A partnership or joint venture is subject to dissolution and termination at any time at the express will of its principals. *Booth v. Wilson, 339 S.W.2d 388* (Tex.Civ.App. - Texarkana 1960, writ ref'd n.r.e.). See *TEX.REV.CIVSTAT.ANN. art. 6132b, § 31(a)* (Vernon 1970). Litigants are

not permitted to change the clear meaning of their joint venture contract by "use of the equitable rule [of fiduciary duty]." [Warner v. Winn, 145 Tex. 302, 309-310, 197 S.W.2d 338, 343 \(1946\)](#). The joint venture agreement determines [*15] the scope of the mutual, fiduciary duty owed to each participant. [Smith v. Bolin, 271 S.W.2d 90 \(1954\)](#) (affirming the trial court's grant of summary judgment on the issue of the extent of a venturer's fiduciary duty).

In this case the parties agreed on November 26, 1975, that Properties possessed the absolute, unrestrained right to withdraw from the endeavor without penalty during the period January to June, 1976. Under the authorities cited above, the doctrine of fiduciary duty did not change that contractual right. Since Properties did not breach the subject agreements, it was entitled as a matter of law to dissolve its association with the joint venture or partnership without suffering liability. [Collins v. Lewis, 283 S.W.2d 258](#) (Tex.Civ.App. - Galveston 1955, 2485 ref'd n.r.e.). Plaintiffs have identified no injury to their interests, with respect to the fiduciary duty claim (including the failure to reveal negotiations with Realty),¹ which did not result solely from Properties' decision to withdraw from the venture.² Liability cannot be imposed upon Properties simply because it did that which Plaintiffs expressly agreed it could do.

[*16] Plaintiffs cite [Johnson v. Peckham, 132 Tex. 148, 120 S.W.2d 786 \(1938\)](#) and quote [Maykus v. First City Realty and Financial Corp., 518 S.W.2d 887, 893](#) (Tex.Civ.App. - Dallas 1974, no writ) to support their contention that Properties could not withdraw without breaching a fiduciary duty. However, the first case holds only that one may not knowingly purchase his co-partner's interest in the property of the partnership for approximately one-seventh its market value without first informing the co-partner of the price disparity. The second case holds that one may not, in breach of the joint venture contract, purchase for one's personal profit with joint funds land which was intended by agreement to be joint property. Without doubt, neither case controls under the instant facts nor inapugns the contractual right of withdrawal held by Properties.

Similarly, Plaintiffs' fiduciary duty claim fails on other independent, but entirely sufficient grounds. Plaintiffs have misconstrued the reach of the fiduciary doctrine in this state as it is applied to joint venturers. That doctrine limits a venturer's business conduct only with respect to property which by contract or agreement is included [*17] within the venture. [Rankin v. Naftalis, 557 S.W.2d 940 \(Tex. 1977\)](#); and [Huffington v. Upchurch, 532 S.W.2d 576 \(Tex. 1976\)](#). Accord: [Meinhard v. Salmon, 249 N.Y. 458, 164 N.E. 545 \(1928\)](#). In [Warner v. Winn, supra, 145 Tex. at 308, 197 S.W.2d at 342](#), the Supreme Court of Texas stated the relevant law in the following language:

[W]hen a joint adventure or partnership has been formed for the acquisition, ownership or development of certain defined property, the equitable rule [of fiduciary duty] will not be extended so as to forbid the acquisition, ownership or development by one of the parties for his own benefit of property not embraced in the enterprise and outside of its scope.

In Warner the Supreme Court found it insufficient that development of the outside site by a co-venturer "would be in competition with and antagonistic to the success of the common enterprise." [Id. 145 Tex. at 309, 197 S.W.2d at](#)

¹ Plaintiffs did not allege that they would have dissolved the partnership if they had been aware earlier of Properties' negotiations with Realty. Apparently, in light of the total absence of such evidence in this case they did not even request a jury instruction or interrogatory on this issue. Properties' failure to notify Plaintiffs on the subject negotiations caused no damage to any complaining party. Plaintiffs' financial disappointments are exclusively attributable to the exercise by Properties of its legitimate power of termination.

² Overwhelming evidence adduced at trial indicated that before dissolution in June, 1976, the partners or joint venturers shared expenses according to their respective ownership interests in the venture except that Properties paid much more than its share of the March 1, 1976, option payment made by the venture. See Dx. W 116, W 114, W 80. Further, under [TEX.REV.CIVSTAT.ANN. art. 6132b](#), § 18(1)(f), no partner is entitled to remuneration for acting in the partnership business unless the partners specifically agree to the contrary. No such agreement was made. Defendants retained no partnership property. Accordingly, Plaintiffs have not shown that they are entitled to an accounting, see section 22, and, in fact, have not requested one.

343. See also *Rankin v. Naftalis, supra at 946*. In the Warner case the outside enterprise which was developed by a member of the joint venture drained the jointly operated land of its gas and absolutely reduced the share of the local gas field market available to the joint venture.

[*18] The present case is controlled by the cited precedents. Under the unambiguous agreements of the parties only the land at the intersection of FM 1960 and IH 45 was included within the scope of the venture. The parties did not consider or agree to a general partnership or joint development of any other parcels at any other location. There was no contractual limitation on outside development by venture members and such an agreement would have been absurd in light of the national activities of Simon and Properties. The acquisition of the site at Greenspoint was strictly analogous to the fact situations described in Warner v. Winn, Rankin v. *Naftalis and Smith v. Bolin, supra*. The existence of the joint venture agreement did not as a matter of law "forbid the acquisition [or] ownership . . . of [other] property [by Defendant Properties]." *Warner v. Winn, supra*.

Plaintiffs cited *Reynolds-Southwestern Corp. v. Dresser Industries, Inc.*, 438 S.W.2d 135 Tex.Civ.App. Houston [14th Dist.] 1969, writ ref'd n.r.e.), for the proposition that the failure of a partner to inform his co-partner of the former's development of a machine to "compete" with the partnership's machine constituted [*19] a breach of fiduciary duty. The language of *Woodruff v. Bryant*, 558 S.W.2d 535, 544 (Tex.Civ.App. - Corpus Christi 1977, writ ref'd n.r.e.) can be read similarly. But these two lower court cases are distinguishable. They are partnership cases. As the Supreme Court noted,

"[t]he scope of a prior confidential relationship is broader [than that owed by a joint venturer] when the defendant is a fiduciary such as a . . . partner. While . . . the [joint venture] relationship between the parties . . . was fiduciary in character, the fiduciary duties extended only to dealings within the scope of the underlying relationship of the parties: joint venturers for the development of a particular [property]." [citations omitted]. *Rankin v. Naftalis, supra*.

Further, in light of the several decisions by the highest court of the State of Texas, it is clear that Reynolds-Southwestern Corp. and Woodruff should not be read so broadly as to encompass the context of a joint venture for the development of designated property which is the situation before the Court. Examined in this light the first case held simply that a failure to reveal a competing operation is actionable only when [*20] the partnership assets are being wound up and the ignorant partner pays too much for the partnership property because his partner failed to inform him of the latter's unknown competition which significantly devalued the same property. Thus, the first case is similar to *Johnson v. Peckham, supra*, and is equally inapplicable to the present fact situation. The Woodruff case is more easily distinguished. That decision involved the breach by the defendant of a covenant not to compete which was contained in the partnership agreement. The first duty of partner-fiduciaries is to comply with their contractual obligations to their co-partners. The defendant in Woodruff did not do that. As discussed, supra, these Defendants did.

For purposes of this case it is not necessary to define precisely the prohibition against "antagonistic competition" by a co-venturer inherent in the concept of "fiduciary duty." ³ It is enough to say that a co-venturer may acquire and own neighboring property for his own benefit and devote it to a similar use if the land involved is not within the scope of the joint venture contract, with scope defined narrowly. *Rankin v. Naftalis, supra*; *Smith v. Bolin, supra*; [*21] and *Warner v. Winn, supra*. Defendant Properties did not misrepresent or obscure the value of venture property, and did not act improperly with respect to the scope or terms of the venture contract. It is therefore, not liable for breach of an alleged "fiduciary duty."

The third and also fatal flaw evident in Plaintiffs' fiduciary duty theory concerns the measure of damages. Plaintiffs have cited no cases and the Court believes no Texas cases exist wherein the complaining party recovered the expected profits of a partnership or joint venture from a departing member unless such departure constituted a breach of contract. Accordingly, this "fiduciary duty" claim is an action on contract which is rejected because Properties did not breach its contract by withdrawing in 1976. The cases cited by Plaintiffs all involved the

³ In point of fact Properties' purchase of a parcel of land at Greenspoint was not in competition with the development goals of the FM 1960 venture. Properties has not acted as a mall developer or shared in such profits at Greenspoint. See note 4, infra.

imposition of constructive trusts. In the present case, Plaintiffs have requested no such relief in [*22] either their complaint or charge to the jury, i.e., they have not requested that a constructive trust be imposed upon the Ward store at Greenspoint Mall.⁴ The Court concludes that Plaintiffs' second claim is deficient as a matter of law.

Interference Claims

In Counts II and III of their second amended complaint Plaintiffs maintain that the Ward and Federated Defendants unlawfully interfered with the joint venture agreement between Simon, Properties and themselves and also interfered with their future business relations and prospective [*23] advantage. However, as a matter of Texas law, these claims are without support in the record.

In the first part of this opinion the Court concluded, pursuant to the May and November, 1975, agreements, that the joint venture was terminable at the will of any of its members during the period January to June, 1976. Inducement of a third person to exercise his "at will" right to terminate a contract with a plaintiff does not constitute actionable interference of any nature if the defendant has acted to further his business competition with the plaintiff or otherwise to protect his economic interests. *Claus v. Gyorkey*, 674 F.2d 427, 435 (5th Cir. 1982) ("matter of law"); *Davis v. Alwac International, Inc.*, 369 S.W.2d 797, 802 (Tex.Civ.App. - Beaumont 1963, writ ref'd n.r.e.); *Kingsberry v. Phillips Petroleum Co.*, 315 S.W.2d 561, 576 (Tex.Civ.App. - Austin 1958, writ ref'd n.r.e.) (directed verdict); *RESTATEMENT (SECOND) OF TORTS §§ 766 Comment g* (second paragraph), 766B Comment a, 768 Comment i (1977). See *Martin v. Phillips Petroleum Co.*, 455 S.W.2d 429 (Tex.Civ.App. - Houston [14th Dist.] 1970, no writ) (directed verdict).

After reviewing the cases cited by the parties, the [*24] Court is convinced that the RESTATEMENT (SECOND) OF TORTS in general, and particularly section 768 thereof accurately reflects the law of this State.⁵ That section notes in general that competition within defined limits completely justifies the actions of "[o]ne who intentionally causes a third person not to enter into a prospective contractual relation with another who is a competitor or not to continue an existing contract terminable at will."⁶ "The courts take the position that if means of competition are fair, advantage should remain where success has put it. . . ." *Leonard Duckworth, Inc. v. Michael L. Field and Company*, 516 F.2d 952, 958 (5th Cir. 1975).

[*25] The Rule . . . rests on the belief that competition is a necessary or desirable incident of free enterprise. Superiority of power in the matters relating to competition is believed to flow from superiority in efficiency and service. If the actor succeeds in diverting business from his competitor by virtue of superiority in matters relating to their competition, he serves the purposes for which competition is encouraged.

⁴The constructive trust remedy is unavailable whether requested by Plaintiffs or not. The goal of the FM 1960 venture was to develop the land at that location so that mall space could be rented and improved land surrounding the proposed mall could be sold. Properties, however, has never had an interest in the mall or surrounding land at Greenspoint which could be shared with Plaintiffs. Just as it was envisioned that Plaintiffs would have no interest in the land upon which the planned Montgomery Ward Store at FM 1960 was to have been built, they have no present claim to the land upon which the Ward store is now located at Greenspoint Mall.

⁵This conclusion is sound even though "[t]here are frequent expressions in [Texas] judicial opinions that "malice" is requisite [and substantially sufficient] for liability." *RESTATEMENT § 766 Comments*. Review of the Texas cases, however, confirms the conclusion that generally "what is meant is not malice in the sense of ill will but merely "intentional interference without justification," Id., or the use of "wrongful means" of competition by the defendant. See RESTATEMENT § 768(1)(a). The determination whether interference was achieved without justification or by use of wrongful means is one for the Court at least in such a case as this which involves no dispute concerning the means employed to effect the alleged, competitive interference.

⁶Plaintiffs have failed to allege or show that they suffered any damages as a result of any alleged interference which occurred before Properties withdrew from the joint venture. All the claimed damages are attributable solely to Properties' entirely proper withdrawal from the venture which subsequently caused the failure of the development with consequential loss of envisioned profits. In this case, because the alleged interference resulted from proper competitive efforts by the Federated Defendants, Plaintiffs were not wronged and are not entitled to damages. RESTATEMENT § 768(1) Comment i.

RESTATEMENT § 768 Comment e.

In this case it is uncontested that the Federated Defendants were in direct mall competition with the FM 1960 development and that the acquisition of the Montgomery Ward store for Greenspoint benefited the Federated Defendants' mall. Plaintiffs wholly failed to claim or prove that any wrongful means whatsoever were employed.⁷ Their complaint is limited to notation of the conclusion of the competition - they lost.

Considering the decisions in *Claus v. Gyorkey, supra*, *Kingsbery v. Phillips Petroleum Co., supra*, and *Martin v. Phillips Petroleum Co., supra*, it appears as a matter of law that the Federated Defendants acted without "malice" in this business competition, i.e., they did not act wrongfully and were justified in attempting to persuade Ward to locate at Greenspoint rather than at FM 1960. Alternatively, "reasonable men [and women] could not arrive at a contrary verdict." *Boeing Co. v. Shipman, supra*.

Similarly, Ward, which held Properties as a wholly owned subsidiary, did not improperly interfere in the latter's venture agreement with Plaintiffs. "Interference with contractual [and, a fortiori, prospective business] relations is privileged where it results from the exercise of a party's own rights or where the party possesses an equal or superior interest to that of the plaintiff in the subject matter." *Black Lake Pipe Line Co. v. Union Construction Co., 538 S.W.2d 80, 91 (Tex. 1976)*. See *RESTATEMENT (SECOND) OF TORTS § 769 illustration 2*. Without doubt Ward has a right to place its own stores where it desires so as to maximize sales.

Plaintiffs cited a number of decisions which upon examination are entirely consistent with the foregoing analysis. In *Leonard Duckworth, Inc. v. Michael L. Field and Company, [*271 supra*, real estate agents were permitted to recover their anticipated brokerage fee on the tort ground of interference with prospective business advantage. They had brought the buyer and seller of certain real estate together, obtained relevant sales information, and participated in general, preliminary negotiations. Later without notifying the plaintiffs, the buyer and seller consummated their transaction without paying a fee. The Court noted at 956 that "at all times plaintiffs were recognized as the brokers to whom a commission would be due should the parties enter into a contract." Acceptance of all the advantages and services of a real estate broker coupled with later refusal to pay for the same in the recognized, customary manner can be easily viewed as a "wrongful means" of competition under section 768(1)(b). This conduct could even be classified as theft of services. This Court does not consider the reference at 958 to "surreptitious negotiations" to indicate that such negotiations are wrongful per se but to the contrary the reference simply identifies a fact indicating consciousness or wrongdoing given accepted real estate brokerage practices, i.e., the reference illustrates [*28] "other conduct below the behavior of fair men similarly situated." [emphasis modified].

Leonard Duckworth relies heavily upon *Light v. Transport Insurance Co., 469 S.W.2d 433* (Tex.Civ.App. - Tyler 1971, writ ref'd n.r.e.). In that case the offer by defendant of a contract of insurance which was known to be illegal under the insurance laws of Texas unquestionably constituted a "wrongful means" of competition. Clearly, the present case and the two cited cases are entirely distinguishable. Federated's offer and Ward's acceptance were absolutely lawful. The Plaintiffs played no part in bringing the Defendants together, and they do not claim to have provided brokerage or comparable services for which they reasonably expected compensation. On the contrary, they claim to have been joint venturers and, accordingly, their expectations were defined by their agreement. Defendants' means of competition were proper.

Along similar lines of analysis *Clements v. Withers, 437 S.W.2d 818 (Tex. 1969)*, another case cited by Plaintiffs, is equally inapposite. There the defendants were liable because they induced and obtained the breach of an acknowledged, non-executory contract. The Texas Supreme [*29] Court simply determined that the Statute of Frauds "does not give third parties the right to interfere with the performance of oral contracts." In the instant case there was no breach of the at will contract, but only a justified competitive offer from Defendants made without use of wrongful means. The interference claims must be dismissed.

⁷ Plaintiffs' claim that Defendants created or continued an unlawful restraint of trade is discussed and rejected in the final part of this opinion. See RESTATEMENT § 768(1)(c).

Antitrust Allegations

Plaintiffs claim that Defendants monopolized or attempted to monopolize the "supply of regional center space in the North Harris County Market" in violation of section 2 of the Sherman Act. The second amended complaint also alleges that section 1 of the Act was violated when "the Federated Defendants and the Ward Defendants combined and conspired together in unlawful unreasonable restraint of trade . . . by means of a course of conduct the purpose or effect of which was to exclude Plaintiffs' proposed center as a competitor" or potential competitor in the claimed market.

The Section 2 Claim

The Court of Appeals of this Circuit has stated:

In our court a section 2 plaintiff attempting to prove either completed monopolization or attempt must provide the jury with sufficient evidence to permit it to define the relevant [*30] geographic and product market [and to find sufficient market power therein].

[Dimmitt Agri Industries, Inc. v. CPC International, Inc.](#), 679 F.2d 516, 525 (5th Cir. 1982). See [Walker Process Equipment, Inc. v. Food Machinery & Chemical Corp.](#), 382 U.S. 172, 177-78 (1965). The burden is squarely on the shoulders of the plaintiff to make such a showing. See [United States v. United Shoe Machinery Corp.](#), 110 F.Supp. 295, 307 (D. Mass. 1953) aff'd per curiam [347 U.S. 521 \(1954\)](#).

If a plaintiff fails to present sufficient evidence from which a jury could determine the market power of the defendant in a relevant market, then "the District Court should [grant a] . . . motion for a directed verdict . . . with respect to the § 2 claim." [Spectrofuge Corp. v. Beckman Instruments, Inc.](#), 575 F.2d 256, 286 (5th Cir. 1978), cert. denied, 440 U.S. 939 (1970). A failure to prove market power mandates granting a directed verdict on the attempt claim as well as the monopoly allegation because a requisite of the former is a showing of a "dangerous probability" of monopolization. [American Tobacco Co. v. United States](#), 328 U.S. 781, 785 (1946). Even a showing of monopolization of twenty percent [*31] of the relevant market may be insufficient to establish a dangerous probability of monopoly such that a section 2 attempt claim may be maintained. [Yoder Brothers, Inc. v. California-Florida Plant Corp.](#), 537 F.2d 1347, 1369 (5th Cir. 1976), cert. denied, 429 U.S. 1094 (). After hearing all the Plaintiffs' evidence the Court granted a directed verdict with respect to the section 2 allegations because the jury was not provided sufficient evidence from which to conclude that Defendants had the requisite power in a relevant market to be guilty of attempted or completed monopoly.

A relevant market has two dimensions. One is the product involved and the other is the geographical area in which effective competition exists between suppliers of the product. Plaintiffs assert that the "supply of regional center space" is the product in this case. To this Court such a definition of the product is fanciful at best.

Relevant Product Market

"Monopoly power is the power to control prices or exclude competition" in a given product and geographic market. [United States v. E.I. duPont de Nemours & Co.](#), 351 U.S. 377, 391 (1956). But an alleged monopolist cannot control price or exclude competition [*32] with his "monopolized" product if there is a competing, substitute product available in the market. Generally one product is a substitute for another if more than "a limited number of buyers will turn" to it given only "reasonable variations in price", i.e., the products have significant "cross-elasticities of demand." [Times-Picayune Publishing Co. v. United States](#), 345 U.S. 594, 612 n. 31 (1953). Thus, in reversing the fact finder, the Supreme Court found that morning and evening newspaper advertisements were not separate products in the industry but that the two types of advertisements were substitutes for the purposes of advertisers and consumers. The offer of one type effectively competed in price and presence against an offer of the other. [Id. at 613.](#)

In [United States v. Continental Can Co.](#), 378 U.S. 441, 453, 456-57 (1964), the court recognized that although there was not complete "[i]nterchangeability of use and cross-elasticity of demand" between glass containers and metal

cans, "the existence of a large area of effective competition between the makers "of the two items' is sufficient to warrant treating as a relevant product market the combined glass and metal container [*33] industries." ⁸ In reversing the trial court the Supreme Court found as a matter of law that cans and glass containers were part of the same product market stating simply, "[w]e cannot accept . . . [the fact finder's contrary] conclusion." *Id. at 449*. See also *Spectrofuge Corp. v. Beckman Instruments, Inc., supra*. This Court must similarly reject Plaintiffs' definition of the relevant product market. Plaintiffs contend that the "supply of regional center space" and only such space is relevant. This claim is clearly insupportable.

Initially it must be noted that the Federated Defendants, the only parties charged in Plaintiffs' second amended complaint with monopolization, do not possess a monopoly of the supply of regional center space even at Greenspoint. All the major tenants at the center, including Sears, Penneys, Ward, Lord & Taylor, and Joskes, own the land (pads) upon which [*34] their stores are constructed and consequently, they control a larger supply of regional center space than does Federated. See Dx. F 127. Also, the sale of land to Ward at Greenspoint did not further an attempt of monopolization of space, but actually decreased Federated's share of the supply of regional center space at the mall.

But apparently, Plaintiffs argue for an even narrower product market. They maintain that the relevant product market is confined solely to the shops ["space"] that can be rented to smaller business tenants who locate in malls between major tenants, i.e., the general lease area (GLA) space. The issue then is whether under the Times-Picayune, and Continental Can standard the claimed product space faces "effective competition" from other space and whether with only "reasonable variations in price" of the claimed space significant numbers of buyers and retailers "will turn" to the use of other space. The Court is convinced that the claimed space faces competition from department store space in the mall and from numerous buildings located outside the mall which contain retail space. Both of these categories of "space" are "substitutes" for the article of [*35] commerce or trade which Plaintiffs claim has been monopolized.

The alleged monopoly at issue in this case questions the opportunity of the buying public to purchase retail goods and services and the opportunity of the suppliers of the same to obtain outlets for their enterprises. The list of goods and services sold by small mall retailers is, to say the least, extensive. The following list of stores is only partially representative but may be used for purposes of illustration: clothes, shoes, restaurants, movie theaters, hair cutting and styling, sports equipment, records, electronics, jewelry, greeting cards, books, artwork, photography, etc. Of course, these goods and services are sold in huge retail dollar amounts and market shares both inside and outside Greenspoint center.

It is beyond belief and entirely unreasonable to say that a mall retailer selling these items and services does not face intense price and other competition from department stores in the mall and many other stores outside the mall selling the same goods or services across the aisle, street, or several blocks and even miles away. Similarly, a retailer who feels rent inside the mall is too high can look [*36] for substitute shop space outside the mall and can turn to the major mall tenants for the purchase or lease of space within the major stores or for arrangement of other joint merchandising relationships.

While it is clear that department stores are part of the market for consumer sales from a consumer's viewpoint, it is also clear that department stores are not without market relevance from the viewpoint of retailers desiring to secure space for their establishments. The presence of department stores selling competing goods and services limits an alleged monopolist's "power to control prices or exclude competition" in the supply of space. If GLA rental is raised too high then small retailers will become substantially less competitive against all stores including department stores in the same mall. Accordingly, their sales will drop. The prospect of low sales for a retailer will assuredly limit a mall owner's power in the market for the rental of retail space.

⁸ *United States v. Continental Can Co., supra*, dealt with section 7, Clayton Act, but for purposes of product market definition there is little or no reason to distinguish cases applying that section and section 2, Sherman Act. See *United States v. Grinnell Corp.*, 384 U.S. 563, 572-73 (1966).

Plaintiffs contend that space for a store inside a mall possesses a unique product status. The Court rejects this contention. It is true that a mall store may be thought to have several important advantages over an [*37] outside store. Chiefly, these are: a large volume of foot traffic past a retail establishment, the chance that large numbers of prospective buyers will indulge in coincidental or impulse buying, a generally pleasant setting and the convenience of concentrated location for the customer.

An outside store also has many advantages which makes it competitive with a mall store both as a place to locate for a retailer and a place to buy for a consumer. An outside store can obtain a closer, more convenient location to a partially desirable submarket of the larger geographic market area of the mall, i.e., closer location to the homes or workplaces of prospective customers including those with or without cars. Outside stores can locate closer to parking lots, thus increasing convenience and minimizing long walks for customers. Free-standing stores or those located in smaller shopping centers generally have less automobile congestion and parking problems which in Houston are not insignificant disadvantages at mall sites. Another important advantage is lower building and overhead costs. Evidence adduced at trial showed that small retailers in malls actually subsidize the cost of the land [*38] upon which the large stores are built, and they pay costs associated with building huge roofed structures and pedestrian walk areas with corresponding heating and air conditioning costs. Further, a non-mall retailer may have more flexibility and control over his store's building since his relative bargaining power is much stronger than that of his counterpart located in a large mall. Finally, a retailer located in a mall faces not only higher fixed costs but more intense competition which serves to limit his profit. In a mall there are many competitors (including large stores which may have lower variable costs because of bulk purchases) present in the immediate market and there are fewer barriers to competition, i.e., a competitor can likely offer a buyer the same article or service at a place only a short walk away.

It is clear that non-mall space is competitive with mall space. "Certainly, that the competition here involved . . . is between products with distinctive characteristics does not automatically remove it from [classification within the same product market]." ⁹ In Times-Picayune, the Court concluded that it was irrelevant to advertisers whether they delivered their [*39] messages to consumers in the morning or evening newspaper. *Id. at 613*. This Court concludes similarly that it is irrelevant to consumers and retailers where they respectively buy and sell their products if the location is economically favorable to them. These various locations comprise a "large area of effective competition" between the renters and users of mall and non-mall space. See *United States v. E.I. duPont de Nemours & Co., supra*, (a section 2 case holding that cellophane shared the relevant product market with various other types of wrapping materials even though there were some differences in product characteristics).

Plaintiffs' argument reduced to its essentials is that non-mall retail space is practically obsolete in a given geographic market when compared to the much more advantageous retail mall space. The huge retail sales share of the market captured by non-mall stores selling the same goods and services as mall stores in the same geographic area clearly refutes this claim. The expert's study commissioned by Plaintiffs similarly contradicts this claim. See Px. 5, Vol. VI at 14-15 (listing non-mall [*40] stores as "major retail competition"). Reasonable minds could not differ that the space occupied by those listed stores plus smaller stores are within the relevant product market. See also, *Id.* at 12, noting, "[t]he total sales potential made available by residents of the trade area is subject to attraction from retail stores within the trade area. . . ." [emphasis added]. The 1974 Larry Smith Analysis discusses as competitors "retail facilities" and "major retail centers" which includes more space than just that provided by malls. "A new shopping center will not, of course, attract all the business in its trade area." Px. 22 at 29 [Urban Land Institute Shopping Center Development Handbook].

Even though "the record [does not] furnish the exact quantitative share of the relevant market . . . [t]he claimed deficiencies in the record cannot sweep aside the existence of a large area of effective competition." In this case the Court does not conclude necessarily that the relevant product market includes all non-mall retail space, but only that on this record Plaintiffs failed to "provide the jury with sufficient evidence to permit it to define the relevant . . .

⁹ *United States v. Continental Can Co., supra, at 452-53.*

product market." [*41] *Dimmitt Agri Industries, Inc. v. CPC International, Inc., supra; Spectrofuge Corp. v. Beckman Industries, Inc., supra.*

Geographic Market

In 1976, Plaintiffs were developers or entrepreneurs producing or promoting buildings and shopping centers of various sizes. That was their business or the area of commerce in which they competed. They attempted at least by 1975 to produce a type of center which can be characterized as the largest shopping center known in the industry - the so-called "regional shopping center mall."

The producers of that type product, if it be a product, compete throughout the nation to forge the necessary agreements and take the necessary steps to build such centers. Both of Plaintiffs' joint venture partners participate in one manner or another in the development of regional malls throughout the United States. The same may be said of Plaintiffs' competitors in this case - the Federated Defendants. The many major stores Plaintiffs solicited for location commitments also participate in mall developments throughout the nation or at least this state. That area is the relevant geographic market recognized by the industry. Cf. *United States v. Grinnell Corp., *421 384 U.S. 563, 570-76 (1966)*.

The record discloses no barriers to Plaintiffs' competing for other mall sites in a wider area than North Houston except their unwillingness to compete. Plaintiffs admitted development of other projects throughout the greater Houston area and claimed that this experience qualified them to develop a regional center. Logically this same experience would have qualified them to compete in a much wider area than simply "North Harris County."

Plaintiffs could have constructed malls at any desirable site which held the potential to attract major stores as "anchor tenants." Both sites and tenants were realistically available to Plaintiffs in a much wider area than that identified by them as the relevant geographic area. *Tampa Electric Co. v. Nashville Coal Co., 365 U.S. 320, 327 (1961)*, established that for purposes of defining the relevant geographic market, "the area of effective competition . . . must be charted by careful selection of the market area in which the seller operates, and to which the purchaser can practically turn for supplies." It is clear that Plaintiffs could turn to potential mall sites throughout a large area and that area is the appropriate [*43] one in which to measure alleged monopoly power in the supply of regional center space. See *American Football League v. National Football League, 323 F.2d 124, 130 (4th Cir. 1963)*. It is equally clear that, measured against the mall development done by Plaintiffs' state and nationwide competitors, only an insignificant amount of trade or commerce was secured by Defendants at Greenspoint. This did not amount to monopolization or the attempt thereof. Id.

This case was prosecuted under the theory that the cryptic term, "North Harris County," described the relevant geographic market. That term was defined by Mr. Harper, Plaintiffs' expert, as being the expected "trade area [to be] served by the proposed mall at I-45 and 1960." R. 648; see R. 642-50. But, as discussed earlier the proper inquiry in a section 2 case is the share held by the alleged monopolist in the relevant market. See *United States v. Grinnell Corp., supra, at 571*.

The testimony and work product of Plaintiffs' experts attempt to define generally the geographic market for retail space by reference to the area from which retail customers may be attracted to such space. Messrs. Harper, Huff and Smith all determined [*44] that it was reasonable to assume that shoppers would be willing to drive twenty-five to thirty-five minutes to be able to shop at a mall in the vicinity of Greenspoint Mall. R. 642. This fact is critical because as a matter of competition if customers are willing to drive approximately thirty minutes to visit one shopping center, then they are almost certainly willing and must be presumed to be willing to drive thirty minutes to visit another center in the same general area. The fact that some potential shoppers within thirty minutes of a given mall might choose to travel to a closer or more desirable store of any given size does not present an exception to this premise but only illustrates that the mall is in competition with other neighboring stores to attract buyers. This circumstance is graphically admitted by Larry Smith Analysis, Px. 5, Vol. VI, at 12-15.

In that Analysis stores twenty-five miles from the subject site were listed as "competition." See also the first sentence of page twelve of the Analysis describing the location of the competition. This admission is particularly

damaging to Plaintiffs' case because the testimony of their only expert witness concerning market [*45] area was principally based on this Analysis. R. 692-93.

The Court concludes that even if the geographic limits of the market for space is relevantly connected to the area from which such space will draw sales, the geographic area most favorable to Plaintiffs upon which reasonable minds could agree on this record would be the area within thirty minutes driving time of Greenspoint Mall. In reaching this conclusion the Court is aware that "the relevant competitive market is not ordinarily susceptible to a 'metes and bounds' definition. *Tampa Electric Co. v. Nashville Coal Co., supra, at 331*. But this approximate definition fits well with the conclusions reached by other courts and the particular facts of this case.¹⁰ In *Brown Shoe Co. v. United States, 370 U.S. 294, 339 (1962)*, the Court stated,

. . . the District Court properly defined the relevant geographic markets in which to analyze . . . [the competitive effect] as those cities with a population exceeding 10,000 and their environs in which both Brown and Kinnin retailled shoes through their own outlets. Such markets are large enough to include the downtown shops and suburban shopping centers in areas contiguous to the [*46] city, which are the important competitive factors, and yet are small enough to exclude stores beyond the immediate environs of the city, which are of little competitive significance.¹¹

See *Lehrman v. Gulf Oil Corp., 464 F.2d 26, 30 (5th Cir. 1972)*, cert. denied, 409 U.S. 1077 (1972) (price competition exists between retail gasoline stations located twenty miles apart). This market definition also adequately addresses the significant effect that even fringe competitors can have on a given firm's "power to control prices or exclude competition." See, e.g., AREEDA, ANTITRUST ANALYSIS 202 (2d ed. 1974) (explaining that competition for the marginal customer frequently controls a firm's pricing decisions).

Competitors of Defendants which are included within the geographic market include Gulfgate, Meyerland, Sharpstown, Northline, [*47] Memorial City, Town & Country, Northwest and the Galleria malls,¹² see Dx. F 126 at 1, plus the many smaller centers and stores within thirty minutes travel of Greenspoint. Considering only retail space in malls located within the approximate, relevant geographic market and setting aside for the moment consideration of retail space in free-standing stores and lesser shopping centers it is clear as a matter of law that Defendants lacked monopoly power in the supply of regional center space since they held only about ten percent of the market. Dx. F 126 at 1; see, e.g., *United States v. United Shoe Machinery Corp., supra, 110 F.Supp. at 346*.

Unless there are high barriers to entry in the business of supplying such space, it is also true as a matter of law that given this share of the market there is not a dangerous probability of monopoly so as to permit presentation of the attempt claim to the jury. See *Dimmitt Agri Industries, Inc. v. CPC International, Inc., supra at 533*. Barriers [*48] to entry were not high. It is undisputed that the area north of Greenspoint Mall experienced extensive and rapid growth throughout the last decade. The new construction included homes, free-standing retail outlets, shopping centers, and the completion in 1981 of Willowbrook Mall which is within nine miles of Defendants' Mall. Judged by the results of actual efforts to enter the market, the most accurate gauge, it is clear that entrance barriers were low. The constant shift of population to the north also made monopolization by a stationary store unlikely. The offer of a store site to Ward did not raise a dangerous probability of monopoly. *Yoder Brothers, Inc. v. California-Florida Plant Corp., supra, at 1369*.

¹⁰ *Id. at 456*. It was uncontested that the average (not maximum) driving time of the patrons who shopped at Greenspoint was twenty-two minutes. See R. 618.

¹¹ The entire greater urban and suburban areas of Minneapolis, Fort Worth, San Antonio and Detroit were considered as individual geographic markets in the cited, merger case. *Id. at 349-51*.

¹² All the listed malls are located on interstate highway systems and are well within 30 minutes driving time of Greenspoint given the non-stop nature of automobile travel on such highways.

The foregoing conclusion was reached without considering the market share of retail space held by department stores, shopping centers and free-standing stores located in the relevant area. When one considers those factors, which Plaintiffs largely failed to identify or quantify, there can be no question that they failed to prove their case with respect to both their section 2 claims. Submission of these claims to the jury would have required that body to speculate concerning [*49] critical facts which were not present in the record. [Spectrofuge Corp. v. Beckman Instruments, Inc., supra.](#) As a matter of law Plaintiffs cannot recover on their monopoly or attempted monopoly claims.

The Section 1 Claims

Plaintiffs appeal to have formulated several theses to support their restraint of trade allegation. They claim that Defendants have acted intentionally to further or extend a monopoly, acted in a wrongful or anti-competitive manner, and have conspired and combined to stifle competition.

The first argument falls because of the failure to prove either the attempted or completed offense of monopoly. The cases, [United States v. Griffith, 334 U.S. 100 \(1948\)](#), and [Lorain Journal Co. v. United States, 342 U.S. 143 \(1951\)](#), are radically different from this one, and are not controlling. Both Supreme Court decisions involved situations in which monopolies were found to exist, and the defendants therein secured agreements with their suppliers or customers that imposed on-going restrictions upon the efforts of their competitors to compete against the monopolies. Neither factor is present here.

At oral argument of the motions for directed verdict, Plaintiffs contended [*50] that Defendants competed unfairly in bringing "to an end a business relationship such as this joint venture," rather than competing in a "hard and fair" manner. Record of Proceedings at 19 (Sept. 29, 1982). But this argument suffers from at least two deficiencies. First, as discussed previously, Federated and Plaintiffs were competing mall developers and Federated's offer to Ward did not improperly or illegally interfere with Plaintiffs' business relations, nor did it violate a protected privilege. Second, allegations of unfair competition without more do not state a cause of action under the [Sherman Act](#). [Northwest Power Products, Inc. v. Omard Industries, Inc., 576 F.2d 83 \(5th Cir. 1978\)](#), cert. denied, 439 U.S. 1116 (1979). This thesis must also be rejected. The decision, [Landmarks Holding Corp. v. Bermant, 664 F.2d 891, 896-97 \(2d Cir. 1981\)](#), cited by Plaintiffs, is easily distinguishable from this case. There the defendants, with the purpose of delaying construction of plaintiff's mall, improperly solicited and subsidized numerous baseless suits, appealed from each "knowing that they lacked standing to do so," misrepresented facts to the Chief Justice of the Connecticut Supreme [*51] Court, and failed to communicate settlement offers to third parties who they sponsored as surrogates in their sham litigation. There are no comparable allegations in this suit.

Before specifically considering Plaintiffs' conspiracy contention, it will be worthwhile to put the section 1 claims as a whole in context. There are no allegations of per se violations of the Sherman Act, e.g., there are no claims of price fixing, Cf. [United States v. Sealy, Inc., 388 U.S. 350 \(1967\)](#), horizontal division of market areas, Cf. [United States v. Topco Associates, Inc., 405 U.S. 596 \(1972\)](#), boycott or concerted refusal to deal,¹³ Cf. [Klor's, Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207 \(1959\)](#), or product tying, Cf. [International Salt Co. v. United States, 332 U.S. 392 \(1947\)](#).

[*52] None of the business transactions assailed here involve exclusive or requirements contracts, Cf. [Tampa Electric Co. v. Nashville Coal Co., supra](#), merger, Cf. [United States v. Columbia Steel Co., 334 U.S. 495 \(1948\)](#) (a

¹³ On the contrary, Plaintiffs' complaint claimed that a major mall developer (Simon) and two major department stores (Sakowitz and Joskes) were quite willing to deal with Plaintiffs. Evidence adduced at trial showed that it was possible to develop a large shopping center without the presence of Sears, J.C. Penney or Wards. See Dx. F 126 at 4-5. The evidence failed to show any agreement to limit any store's option to deal with Plaintiffs in any location at any time including the future. The evidence also showed that Plaintiffs failed to contact stores which are now located in Houston and which might have located with them. Finally, if the interest to be considered is the freedom to participate in the business of regional center development, Plaintiffs are not unreasonably restrained since as discussed, *supra*, the Court found that development business to be one conducted in a state or nationwide area in which other opportunities were available.

section 1 case) or market division of any type, Cf. [White Motor Co. v. United States, 372 U.S. 253 \(1963\)](#).¹⁴ Any of the department stores located at Greenspoint, including Ward, was free at any time to contract with Plaintiffs for construction of a store at any place. If Plaintiffs had retained their interest in the FM 1960 site they might now be able to take advantage of the extensive growth in northern Houston and develop a mall at that site. That is what occurred at Willowbrook Mall which opened in September, 1981, at the intersection of FM 1960 and West Montgomery Road. In sum, there is a substantial question whether the actions of Defendants in this matter constitute a legally cognizable restraint. Upon reviewing prior cases, one becomes convinced that a finding of section 1 liability under these circumstances would be clearly unprecedented as well as unsupported by the evidence.

[*53] Moreover, to condemn the actions of Defendants here would disserve what was described in [Sulmeyer v. Coca Cola Co., supra, at 851](#), as the summum bonum of the Sherman Act. The Federated Defendants and Plaintiffs were competitors in every sense of the word. The two groups were located only about six miles apart, were known to one another and were in the same business - the construction of regional shopping centers. Both were attempting to build the biggest mall possible with the most desirable department store tenants as quickly as possible. The competition was fierce. Plaintiffs' group has one very strong Houston area merchandiser (Sakowitz) practically committed, and claimed to have probably a stronger if not the strongest Houston area merchandiser preparing to commit (Joske's). Ward, which could have served as an anchor tenant for the center, was committed also except that it held the right to terminate its commitment through the early part of June, 1976.

Throughout the 1970's both sets of developers competed for favorable major store commitments. Federated talked to Sakowitz, Joske's and Ward, and Plaintiffs attempted to interest several stores that eventually built at [*54] Greenspoint. Ward, just as were the other major stores, was an object of competition between the two development groups. In the end Federated won. They offered a superior product.

In the spring of 1976, the initial construction at Greenspoint was nearly complete and opening was imminent. Plaintiffs' proposed mall on the other hand was still in the planning stage with no construction whatsoever underway. Ward was anxious to enter the northern Harris County market quickly at any reasonable location. Greenspoint offered an earlier opening with less risk since the development work had already been completed there and the mall was essentially operational. Because Joske's had not committed to the 1960 site, Ward was faced with the real possibility of having a rather inefficient two-store mall at 1960 if it chose to locate there. This potential problem was not fanciful but was a problem which Ward had encountered earlier with unfavorable financial results at the Memorial City Shopping Center. Locating at Greenspoint additionally involved less risk because the population to support that mall was more nearly already present while that to support the more outlying 1960 location was [*55] not present but was hoped to be gained in the future. This consideration apparently affected the location analysis of Sears also. Although that company owned a mall site at Willowbrook (FM 1960 and West Montgomery Road) it chose to build first at Greenspoint and wait until 1981 to open its store on FM 1960.

In short, Federated competed fairly with Plaintiffs and won. The issue now is whether that business competition should be overturned in a court of law. "The antitrust laws . . . were enacted for the "protection of competition, not competitors.'" [Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488 \(1977\)](#). The Sherman Act, which has been called an economic "charter of freedom," relies upon competition and "the free play of market forces" to regulate the national economy in part to obviate the need for "continuous administrative supervision." [United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 221 \(1940\)](#). The "underpinning for antitrust has been a belief that competition makes a substantial contribution to economic performance in two important respects: (1) efficiency in the use and allocation of economic resources, and (2) progressiveness in the development of more [*56] efficient . . . services." 2 P. Areeda & D. Turner, [Antitrust Law](#) P401, 267-68 (1978).

¹⁴ Antitrust claims or theories not specifically alleged are deemed waived after the conclusion of trial. See [Sulmeyer v. Coca Cola Co., 515 F.2d 835, 846 \(5th Cir. 1975\)](#), cert. denied, [424 U.S. 934 \(1976\)](#). See also [Associated Carpenters, U.S.A., 103 S.Ct. 897 \(1983\), 51 U.S.L.W. 4139, 4141 \(1983\)](#).

It is highly impractical and inefficient to encourage competition generally as a desired end but then draw a line near the point of ultimate success and penalize the successful competitor for further competing. In a perfectly competitive situation an inefficient competitor will capture no share of the market. Because efficiency through competition is the public policy of this nation and continuous government regulation of competition has been rejected, it is not feasible or desirable to prohibit by law competition by any entity other than that of a monopolist. In the instant case there is no monopoly. Unacceptable economic concentration can be controlled through the concept of economy of scale. If a large mall fairly attracts the many customers necessary to make it economically successful, it must be presumed as an economic and legal fact that the mall is efficiently satisfying the needs of the community. On the other hand, a mall which is economically too large will inevitably be unable to attract sufficient customers to buy the huge quantity of goods and services required for its survival.

[*57] At no point in the course of this litigation have Plaintiffs proved or even claimed that the competition by Federated against them was other than that based on the merits of Greenspoint versus their site and proposed mall at 1960. All parties agree that Ward's move to Greenspoint has been successful. There has been no claim or showing that the opportunity of free-standing store owners or other mall developers to locate in the northern part of the county has been limited by any factor other than their ability to compete on the merits with Greenspoint. It is uncontested that there has been extensive construction of competing retail outlets in the immediate area.

It is clear that where there has been no showing of a use of anti-competitive means the courts should not interfere with the outcome of business competition. In this case Federated's entire Mall has been successful. It has satisfied the public demand and interest in an exceptional manner. The stores located there are in direct competition with one another at close proximity. They present to consumers few barriers to meaningful product choice. The Mall's location and timing appear to indicate an efficient and [*58] progressive entry in the marketplace which furthered the public interest expressed in the Sherman Act.¹⁵ It is inappropriate to force a business entity such as Ward to make an inefficient business decision so that it might avoid potential treble damage liability. The antitrust laws do not mandate foolish economic decisions. In this sense misapplication of the Sherman Act can itself be a serious restraint of trade. In short, if the antitrust laws prohibit a decision such as was made by Ward in this case, then the freedom of merchants to allocate resources efficiently will be severely restricted simply because at an earlier date the merchant tentatively considered locating with a competitor of his ultimate business associate.

[*59] When Ward declined to build at FM 1960, Plaintiffs reverted to a position which was no worse and was generally better than the one which they occupied before they initiated negotiations with the Ward Defendants in 1975. The Court concludes that an entity which considers, even seriously, becoming a competitor and then elects not to do so does not violate the antitrust laws simply by exploring its opportunities. The amount of regional center space competing with Greenspoint after Ward reached its decision in May, 1976, was no less than the amount competing before Ward considered becoming a supplier of the same. There was no decrease in competition in the alleged line of trade or commerce which resulted from Ward's decision to build at Greenspoint. Ward has continually been present in the relevant market, thus supporting regional mall competition from its location at Northline and at other centers. Its choice of Greenspoint over 1960 for location of another store should not without more make it liable under the antitrust laws. The opening of the Ward store at Greenspoint has increased competition in the mall between merchants there and has permitted Ward to participate in unrestrained [*60] development competition between Plaintiffs and Federated. In the long run if Ward is not permitted to make decisions maximizing its efficiency, its ability to compete as a merchandiser and as a supporter of regional mall space will be decreased to the injury of competition in general. The Court is convinced the section 1 claim must be dismissed.

¹⁵ Even if Ward's decision to move to Greenspoint had resulted in overconcentration of sellers vis a vis available buyers (shoppers), or had been inefficient in some other way, that agreement still would not present an anti-competitive threat to the market. Such an inefficient decision would increase the competitive opportunities of others in the area to construct decentralized retail establishments. Also, those entities responsible for the inefficient decision would not be shielded from the adverse economic consequences of their choice.

Alternatively, if further analysis is necessary, The instant situation is closely analogous to the several decided cases which have considered business relationships between manufacturers and their distributors. Both situations involve an association between parties in vertical relationships with one another and replacement of one member of the association with his horizontal competitor. Just as some manufacturers may offer financing to their distributors, or participate in competing distribution themselves, see [H & B Equipment Co. v. International Harvester Co., 577 F.2d 239 \(5th Cir. 1978\)](#), Ward tentatively agreed in return for a percentage interest to assist in development of Plaintiffs' mall. The rule of reason is applicable. Continental T.V., Inc. v. GTE Sylvania, Inc., 4333 U.S. 36 (1977).

The issue is whether the restraint in [*61] question is reasonable, specifically whether on balance it furthers or lessens competition. [Chicago Board of Trade v. United States, 246 U.S. 231 \(1918\)](#). As discussed previously, Wards' move to Greenspoint furthered competition in two important ways: it increased merchant competition within the mall and increased competition for the most efficient location of anchor tenants between Plaintiffs and Federated. "To prove an antitrust violation under the rule of reason, [Plaintiffs] . . . must show the defendants' conduct adversely affected competition. That showing is essential, because "an antitrust policy divorced from market considerations would lack any objective benchmarks."" [Northwest Power Products, Inc. v. Omak Industries, Inc., 576 F.2d 83, 90 \(5th Cir. 1978\)](#).

Plaintiffs failed to make the necessary showing. Even if it is assumed that the proposed mall would have developed as prophesied, its demise does not show, ipso facto, that competition was adversely affected. The Court earlier found the evidence would support only a finding that the relevant product market consisted of free standing retail stores, non-mall shopping center space and regional mall space. Because [*62] Plaintiffs' mall could not have been completed until many months after June, 1976, even if all necessary agreements had been reached with the major stores, it is proper to consider construction which has occurred subsequent to that date. The construction in northern Houston has been phenomenal. To the extent that this construction includes retail space, "interbrand" competition in the supply of the relevant product has increased dramatically. Further, because of the law of supply and demand, the Court must conclude that much of this space would not have been constructed but for the demise of the anticipated mall and retail space at IH 45 and FM 1960. Thus, its demise has increased competition from other sources. This is just another way of saying barriers to entry in the market were low.

Plaintiffs have failed to show that overall, interbrand competition has been adversely affected by the actions of Defendants. Specifically, they failed to furnish "any objective benchmarks" of the same. This failure is fatal. Continental T.V., Inc. v. GTE Sylvania, Inc., *supra*. See also, [Spectrofuge Corp. v. Beckman Instruments, Inc., supra](#); [E.A. McQuade Tours, Inc. v. Consolidated Air Tour \[*63\] Manual Committee, 467 F.2d 178 \(5th Cir. 1972\)](#), cert. denied, 409 U.S. 1109, (1973) (reversing damage award of jury with instructions to dismiss because as a matter of law no unreasonable restraint of trade had occurred).

"A supplier may switch dealers and conspire with a new dealer to take the place of an established one. Without more, the antitrust laws do not stand in their way." [Northwest Power Products, Inc. v. Omak Industries, Inc., supra at 86](#). In this case Ward had a supply, a department store, which was critical to the business of Plaintiffs and Federated. Those businesses principally entailed renting or selling (distributing) space which was located in close proximity to a concentration of department stores. Without this supply, albeit a one-time, semi-permanently issued supply, a mall developer could not distribute the surrounding land or the interior general lease area which comprises his business and furnishes his profit. "Even if [the supplier and new dealer] . . . did admit that they thought that [the old dealer] . . . would find it difficult to re-enter the market, we fail to see how this belief, without more, could give rise to the existence of a boycott [*64] . . ." [Carlson Machine Tools, Inc. v. American Tool, Inc., 678 F.2d 1253 \(5th Cir. 1982\)](#).

The preceding statements of **antitrust law** reflect the belief that if competitive conditions are unaffected, the potentially harsh consequences of competition upon inefficient or non-innovative or late arriving competitors must be accepted in furtherance of the public interest in free competition. In this case, however, Plaintiffs' business was not destroyed anymore than a salesman who loses one sale is destroyed in his business. Plaintiffs could have competed at other locations to develop other centers just as Simon has in fact done. Rather than striving in the marketplace Plaintiffs have elected to abandon their business in an attempt to achieve in the courts what they were

unable to gain within the economy. This approach should not be encouraged. This suit is dismissed in its entirety.
¹⁶

[*65]

End of Document

¹⁶ The fact that Ward may have had some horizontal association in mall development does not preclude application of the rule of reason. If Ward and Federated had gone so far as to merge, a circumstance involving much more extensive horizontal agreement and cooperation than was present here, their actions still would be judged by the rule. See *United States v. General Dynamics Corp.*, 415 U.S. 486 (1974) (section 7 Clayton Act); *United States v. Columbia Steel Co.*, 334 U.S. 495 (1948) (section 1 Sherman Act). Ward, of course, had important economic considerations relating to its competitiveness as a merchandiser to consider in choosing between Plaintiffs' and Federated's site. In moving to Greenspoint, Ward did not gain a share of the development project, but simply purchased a pad upon which to build its store. Just as importantly, Ward continued to maintain operation of its store at the Northline Shopping Center which was located only about ten minutes driving time away from Greenspoint. Northline and other centers in the relevant market which contain Ward stores are important competitors of Greenspoint.

Texas v. Scott & Fetzer Co.

HN5 Antitrust & Trade Law, Clayton Act

A *parens patriae* action is not merely a suit on behalf of individual citizens; it is an action on behalf of the state in which the attorney general seeks to vindicate the rights of the state's citizens injured by alleged actions in restraint of trade.

Counsel: Jack D. Maroney, Austin, Texas, Thomas Black, Austin, Texas, William T. Plesec, Washington District of Columbia, Barry L. Springel, Cleveland, Ohio, for Appellant.

Mark White, Atty. Gen., Austin, Texas, Katherine C. Bond, AAG, Austin, Texas, Steven Baron, AAG, Austin, Texas, for Appellee.

Judges: Politz and Jolly, Circuit Judges, and Hunter, * District Judge. E. Grady Jolly, Circuit Judge, dissenting.

Opinion by: HUNTER

Opinion

[*1024] EDWIN F. HUNTER, Jr., District Judge:

In this case, the State of Texas (acting through its Attorney General) seeks to bring suit in its capacity as *parens patriae* against defendants for their alleged violations of federal antitrust laws. Defendants moved to dismiss the complaint, insisting **[*1025]** that the Attorney General had no State authority to maintain the action. The district court denied the motion, but certified the issue for appeal. The question presented is whether the Attorney General of Texas has authority to maintain this suit.

[2]** The action was instituted in October of 1980 against Scott & Fetzer Company and its wholly owned subsidiary, Kirby Sales Company, Inc. It is brought pursuant to Section 4C of the Clayton Act, which is often referred to as the Hart-Scott-Rodino Antitrust Improvements Act of 1976, 90 Stat. 1394, 15 U.S.C. [[15 U.S.C. §§](#)

* District Judge of the Western District of Louisiana, sitting by designation.

15c-15h. As is true in every case involving the construction of a statute, our starting point must be the language utilized by Congress. HN1[] Section 4C provides:

Any Attorney General of a State may bring a civil action in the name of such State, as *parens patriae* on behalf of natural persons residing in such state in any district court of the United States having jurisdiction of the defendant, to secure monetary relief as provided in this section for injury sustained by such natural persons to their property by reason of any violation of sections 1 to 7 of this title . . .

15 U.S.C. § 15c (1976). HN2[] Section 15h provides [**3] that the Act "shall apply in any state, unless such state provides for its non-applicability in such state."

15 U.S.C. § 15h.

As the legislative history makes apparent, the Act was aimed primarily at enlarging the potential for consumer recovery for antitrust violations by effectively bypassing the burdensome requirements of Rule 23, Fed.R.Civ.P., that might tend to dissuade private litigants from pursuing consumer class actions for antitrust injury.¹ It involved no change in the substantive basis for antitrust liability. It simply created a new procedural device -- *parens patriae* actions by States on behalf of their citizens -- to enforce existing rights of recovery. See H.R. Rep. No. 499, 94th Congress, 2nd Sess. 6-8, reprinted in 1976 U.S. Cong. and Adm.News 2572, 2575-78. Columbia ex rel. Rogers v. Mid-Atlantic Toyota Distributors, et al., 704 F.2d 125 (4th Cir.1983).

[**4] Defendants argue that the clear import of the Act is that Congress opened the doors of the federal district courts only to state attorneys general who independently possess state law authorization to institute *parens patriae* actions, and then insists that Texas has never authorized its Attorney General to institute such a lawsuit. Texas suggests that there are at least four different sources of authority which permit its Attorney General to institute a *parens patriae* action under federal antitrust laws. Alternatively, Texas insists that its authority to sue became effective upon Section 4C's enactment and continued in each state unless the state revoked it under Section 4H.² [**5] Accepting arguendo defendants' assertion that Congress could not expand the state-defined power of its Attorney General,³ *1026 we hold that HN3[] a suit such as the instant one, brought by the Texas Attorney General on behalf of the State, falls squarely and unambiguously within the grant of authority in Section 15.40 of the Texas Business and Commerce Code.

The Texas statute which authorizes antitrust actions to be brought by the attorney general antedates the federal legislation.

¹ The House Report on the Bill ultimately enacted into law states that the thrust of the legislation is to overturn the decision in California v. Frito-Lay, Inc., 474 F.2d 774 (9th Cir.), cert. denied, 412 U.S. 908, 93 S. Ct. 2291, 36 L. Ed. 2d 974 (1973). The Court in *Frito-Lay* had held that the State of California lacked standing to sue to recover treble damages as *parens patriae* on behalf of its citizens for antitrust injuries. The House Report, after quoting from *Frito-Lay*, went on to say:

H.R. 8532 is a response to the judicial invitation extended in *Frito-Lay*. The thrust of the bill is to overturn *Frito-Lay* by allowing State attorneys general to act as consumer advocates in the enforcement process, while at the same time avoiding the problems of manageability which some courts have found under Rule 23 [of the Federal Rules of Civil Procedure].

² Id. at 8, U.S.Code Cong. & Admin.News 1976, p. 2578.

³ Senate debate confirms that Section 4C was intended to affirmatively authorize state attorneys general to bring *parens patriae* damage actions. It reveals that this authority was to become effective upon Section 4C's enactment and to remain so in each state until that state decided to revoke it under Section 4H. 22 Cong.Rec. 15853 (1976). During the 1977 session of the Texas Legislature, H.B. 592 was introduced for this purpose but was not enacted into law. See H.B. 592 65th Leg. (Texas 1977).

³ The nature of defendants' Tenth Amendment argument is of the type that courts have avoided until another day. So we have done today, but it must be noted that Section 4C does not impose any duties on the Attorney General. It merely provides that he *may* bring *parens patriae* actions. Congress has revealed its respect for state sovereignty by giving the state the option to withdraw the attorney general's permissive authority.

It reads in pertinent part:

HN4[] The attorney general may bring an action on behalf of the state or of any of its political subdivisions or tax supported institutions to recover the damages provided for by the federal antitrust laws, Title 15, United States Code . . .

[Tex. Bus. & Com. Code § 15.40\(a\)](#) (Vernon Supp.1981).

Defendants argue that 15.40(a) does not authorize a statutory *parens patriae* damage action under the Hart-Scott-Rodino **[**6]** Antitrust Improvements Act; they insist that it authorizes only an action to recover damages for injury to the state in its proprietary capacity. We disagree. There is simply nothing to justify the judicial engrafting of such a limitation. The statute clearly does not confine the authority of the Attorney General to the prosecutions of common law *parens patriae* actions or actions to vindicate quasi-sovereign and proprietary state interests. Contrariwise, it fully authorizes the maintenance of the statutory right of action here in issue, which concededly is of neither type.

The United States Court of Appeals for the Fourth Circuit issued its decision in the *Mid-Atlantic Toyota Distributors, Inc.* cases on the very day that the instant case was argued ([704 F.2d 125, 1983](#)). The question there was whether the state attorneys general of Maryland, Delaware and Pennsylvania, and the Corporation Counsel of the District of Columbia, were authorized to maintain statutory *parens patriae* damage actions under Hart-Scott-Rodino (the Act), in the names of their respective jurisdictions on behalf of their natural-person residents injured by an alleged price-fixing conspiracy **[**7]** in violation of the Sherman Act. The language and reasoning of the Fourth Circuit is incisive and pertinent:

"While the statutory and constitutional definitions of the powers of the several plaintiff-attorneys general differ significantly, a common thread runs throughout. The Maryland Constitution provides that the Attorney General shall 'commence, and prosecute . . . any civil . . . action . . . on the part of the State or in which the State may be interested,' [Md. Const. art. V, § 3\(a\)\(2\)](#); the Delaware Antitrust Act empowers the Attorney General to institute proceedings 'on behalf of the State and its public bodies' for suspected antitrust violations, [Del. Code Ann. Tit. 6, § 2105](#) (Supp.1980); District of Columbia law provides that the Corporation Counsel shall 'have charge and conduct of all law business' of the District, D.C.Code Ann. § 1-361 (1981); and Pennsylvania's Commonwealth and its citizens in any action brought for violation of the antitrust laws, . . . '

"While the language differs, each provision allocates to the attorney general power and authority to represent the jurisdiction and its interests in litigation. In at least two ways, we find the present actions **[**8]** to fall clearly within the ambit of each of the attorneys general's state-derived authority.

"First, these attorneys general have brought suits in the names of their respective states to enforce causes of action created by federal law. Whether the state is a real party in interest or merely a representative party, this cause of action exists in favor of the state. See [New Mexico v. Scott & Fetzer Co., 1981-2 Trade Cas. \(CCH\) P64,439, at 75,149](#) **[*1027]** (D.N.M. Dec. 22, 1981). Because the attorneys general are suing to enforce their jurisdictions' causes of action, these lawsuits indeed are 'on the part of' Maryland, on 'on behalf of Delaware, and representative of the Commonwealth of Pennsylvania and the 'law business' of the District of Columbia . . .

"In addition to their authority to sue to enforce their jurisdictions' statutory causes of action, these attorneys general have undoubtedly authority to pursue litigation that advances or vindicates public interests. See [Brown v. Stanton, 617 F.2d 1224, 1232 n. 14 \(7th Cir.1980\)](#) ('In general, a state Attorney General may institute such suits as he deems necessary for . . . the protection **[**9]** of public rights. '), vacated and remanded on other grounds, 453 U.S. 917 [101 S. Ct. 3151, 69 L. Ed. 2d 999] (1981) . . . Indeed, the notion that these attorneys general may institute actions to remedy invasion of the public interest appears implicit in the statutory and constitutional schemes defining their powers.

"As Congress fully recognized in enacting the Antitrust Improvements Act, see H.R.Rep. No. 499, 94th Cong., 2d Sess. 6-8, reprinted in 1976 U.S. Code Cong. & Ad.News 2572, 2575-78; S.Rep. No. 803, 94th Cong., 2d

Sess. 39-40 (1976), this statutory cause of action promotes enforcement of the federal antitrust laws, which promotes at the same time a state's public interest in protecting its citizens from violations of these laws, see *New Mexico v. Scott & Fetzer Co.*, 1981-2 Trade Cas. (CCH) P69,439, at 75,149 (D.N.M. Dec. 22, 1981); *Clark Oil & Refining Corp. v. Ashcroft*, 639 S.W.2d 594, 596-97 (Mo. 1982); see also *Iowa v. Scott & Fetzer Co.*, 1982-2 Trade Cas. (CCH) P64,873, at 72,359 (S.D. Iowa July 8, 1982). We reject the defendants' contention that a state has an 'interest,' under the [**10] various provisions involved here, only in those suits which vindicate quasi-sovereign or proprietary interests. Undoubtedly, a state can have a legitimate public interest in ensuring the economic well-being of its citizens -- and in indirectly promoting a smoothly functioning economy freed of antitrust violations -- even though the most obvious beneficiaries may be individual consumers who ultimately recoup money damages."

We are in perfect accord with the conclusions reached by the Fourth Circuit and the rationale utilized in reaching those conclusions. The opinion is particularly cogent because of the remarkable similarity between the statutes there under scrutiny⁴ and the Texas statute.

Defendants' attack upon the authority of the Attorney General to institute this suit follows naturally from their premise that the phrase "on behalf of the state" does not include *parens patriae* [**11] actions. The argument like the premise is incorrect and has been decisively rejected by the Fourth Circuit in *Mid-Atlantic Toyota Distributors, Inc.*, and the Missouri Supreme Court in *Clark Oil and Refining Corporation v. Ashcroft*, 639 S.W.2d 594 (Mo. 1982). This premise runs directly contrary to the central thesis of the Fourth Circuit and the Supreme Court of Missouri, which is that HN5⁵ a *parens patriae* action is not merely a suit on behalf of individual citizens; it is an action on behalf of the state in which the attorney general seeks to vindicate the rights of Texas citizens injured by alleged actions in restraint of trade.

By instituting a suit of this nature the attorney general exercises his statutory authority to protect citizen consumers against antitrust violations. *Clark Oil and Refining Corporation v. Ashcroft*, 639 S.W.2d 594 (Mo. 1982). We reach the inescapable conclusion that the instant suit, as filed, falls squarely and unambiguously within the grant of authority contained in Section 15.40.⁵

[**12] [*1028] We, of course, do not pass on the merits of the complaint. There is nothing in the record to indicate the truth or falsity of the allegations. We only hold that the Attorney General of Texas has standing and authority to maintain this action in a *parens patriae* capacity.

The District Court properly denied defendants' motion to dismiss the complaint. We affirm his decision and remand for further proceedings that may be appropriate.

REMANDED.

Dissent by: JOLLY

Dissent

E. GRADY JOLLY, Circuit Judge, dissenting:

⁴ The wording of the statutes of Maryland, Delaware, District of Columbia and Pennsylvania appears in the opinion.

⁵ Texas cites Section 22 of Article IV of its Constitution and Article 4409 of its Civil Statutes as additional sources of authority. The Interpretive Commentary to Section 22 and cases construing the section establish that these two provisions confer broad responsibility to oversee private corporations to safeguard the public interest. The Attorney General argues that by bringing this action to prevent and deter alleged violations of the antitrust laws, he is acting precisely in conformity with Section 22 and Article 4409. We need not address this contention because of our holding that the instant action falls precisely within the grant of authority of Section 15.40.

I am unable to conjure the conclusion reached by my two brethren that, although Texas does not expressly provide either by statute or in its Constitution for *parens patriae* actions by its attorney general, such actions are impliedly authorized under the broad language of [*Tex. Bus. & Com. Code Ann. § 15.40\(a\)*](#) (Vernon 1981).¹

[**13] I begin with the proposition, which can hardly be gainsaid, that the powers of the attorney general derive either from common law or from Texas's statutes and Constitution.

The common law authority vis-a-vis *parens patriae* has, commonly, been limited to actions involving infants and those having mental or other incompetencies and to actions involving the quasi-sovereign interests of the state. See Malina and Blechman, *Parens Patriae Suits for Treble Damages under the Antitrust Laws*, 65 Nw.U.L.Rev. 193, 198-203 (1970). As stated by the majority here, the instant case involves neither of these common law actions.

We are left, therefore, with Texas's statutes and Constitution.² In my view, it cannot be reasonably said that the Texas Legislature intended that [*section 15.40*](#) provide the attorney general authority to bring the *parens patriae* action involved here.

[**14] First, I look to the statute itself. No mention is made of *parens patriae* suits. Despite the efforts by the majority to read such authority into [*section 15.40*](#), this statutory provision is, on its face and by the clear import of its language, *limited* to suits "on behalf of the state or of any of its political subdivisions or tax-supported institutions. . ." (Emphasis added.) This suit has *not* been brought "on behalf of the State" or on behalf of its subdivisions; [*1029] rather, as stated in the caption of the case, it has been brought "as *parens patriae* on behalf of natural persons residing in Texas."

The majority reads the provision in [*section 15.40*](#) for suits "on behalf of the state" as including authority to bring *parens patriae* actions. The *state* as a political entity is not the intended beneficiary of this suit; if any recovery is had, it will be by a few citizens who will have a few pennies and quarters put in their pockets with attendant publicity of the great victory against door-to-door vacuum cleaner salesmen³ achieved by an ever-vigilant attorney general's

¹ Because the majority opinion turns solely upon the issue of the attorney general's *parens patriae* authority under Texas law, this dissent is directed solely to that issue. As noted in note 3 of the opinion, however, several residual issues exist, the most important being that the Antitrust Improvements Act of 1976 grants authority to a state attorney general to bring a *parens patriae* antitrust action "unless the State provides by law for its nonapplicability in such state." I have very serious doubts about Congress's constitutional authority to grant to a state's attorney general authority which the state has not seen to confer. Nor is this [*tenth amendment*](#) violation cured by the simple expedient of an "opt-out" clause. At the very least, a state attorney general will have been granted powers by Congress beyond those granted by the state until the state has an opportunity to exercise its option. The putative evanescence of an unconstitutional grant of power does not render it constitutional.

² In addition to section discussed in the majority opinion, the attorney general has relied upon [*Tex. Rev. Civ. Stat. Ann. Art. 4409*](#) (Vernon 1976), which provides that the attorney general

shall . . . inquire into charter rights of all private corporations and, in the name of the State take such legal action as may be proper and necessary to prevent any private corporation from exercising any power or collecting any species of taxes, tolls, freight or wharfage not authorized by law.

Also, the attorney general refers us to [*Tex. Const. Art. IV § 22*](#), which states that the attorney general "shall represent the State in all suits and pleas in the Supreme Court of the State in which the State may be a party . . . and perform such other duties as may be required by law."

My reasons for concluding that [*section 15.40*](#) does not contain *parens patriae* authority are equally applicable to these two provisions.

³ This suit involves an allegation that the defendants, through the mechanism of selling vacuum cleaners door-to-door, violate [*antitrust law*](#) by "imposing a system of resale price maintenance and unreasonable customer restrictions on their distributors and participating in group boycotts of retail vacuum cleaner stores." Brief for Appellee at 1.

office. The majority thus confounds the clear intent of the statute, which, **[**15]** in addition to section (a) discussed by the majority opinion, provides for notification of intent to bring suits by the attorney general *only* to political subdivisions and to tax-supported institutions. No mention is made in [§ 15.40\(a\)](#) of notification to the public at large of any *parens patriae* suits. Had the legislature been thinking of *parens patriae* suits, it presumably would have provided for such notification so that individuals who desired to "opt-out" and bring their own cause of action could do so. Further, the statute provides specifically that when an action has been brought on behalf of a political subdivision or on behalf of a tax-supported institution the state shall retain such sums out of damages recovered as are necessary to reimburse the state for expenses incurred by it in the prosecution of the action. No mention is made of retention of funds out of damages recovered for individuals as might be recovered in a *parens patriae* suit. There is a good reason for this: the legislature never gave any thought that some federal court would later read such suits and such authority of the Texas attorney general into the statute.

[16]** Moreover, in [section 15.40\(b\)](#) the statute provides that "in any action brought by the Attorney General pursuant to the federal antitrust laws for the recovery of damages by the State or any of its political subdivisions or tax-supported institutions" the attorney general may take such actions in the prosecution of the suit as are appropriate and necessary. Glaringly absent from this statutory sub-section is any discussion of actions by the attorney general in connection with a suit brought to recover damages suffered by individuals. "The State" by any rational interpretation cannot be said to be synonymous with *parens patriae* representation.

Despite the absence of any provisions for *parens patriae* actions in [section 15.40](#), the majority essentially holds that the broad language contained in this statutory section includes within its broad reach *parens patriae* authority and that even if the state legislature did not specifically confer this authority, *parens patriae* authority is consistent with the authority which was specifically granted.⁴ So the majority, beneficently, magically, confers this authority by its own act; so much for preachments against judicial **[**17]** legislation.

Needless for me to say, this, in my opinion, exceeds the authority of this court. As stated in [State v. Harney, 164 S.W.2d 55, 56 \(Tex.Civ.App.1942\)](#), "the powers and duties **[*1030]** of the Attorney General are prescribed by the Constitution and Statutes, [and] those powers **[**18]** must be limited to those so prescribed, and may not be enlarged by the courts." Also [Hill v. Lower Colorado River Auth., 568 S.W.2d 473, 480 \(Tex.Civ.App.1978\)](#) (stating that there has been "consistent adherence" to this principle). So, where the majority states that there is "nothing to justify the judicial engraving of such a limitation" on the attorney general's power to bring a *parens patriae* action, I say, to the contrary, there is every reason why this court cannot engrave the extra-statutory *expansion* of authority granted by the majority opinion. Under *Harney* and *Hill*, it is not enough that *parens patriae* authority is "consistent with" the statutory authority provided by the legislature. The authority exercised by the attorney general must be real and actual and conferred by the legislature -- not by Congress or by the Fifth Circuit Court of Appeals.

In its assumption that [section 15.40](#) does subsume *parens patriae* actions, the majority, relying on *Mid-Atlantic Toyota*, makes much of the argument that *parens patriae* authority is contained in the broad grant of authority under [section 15.40](#) because the economic well-being of **[**19]** the state is implicated and therefore the state has a legitimate interest in pursuing the antitrust remedy sought.

Of course a state has a legitimate interest in its economy. But that obvious interest does not translate, absent the philosopher's stone, into general authorization for the state's attorney general to pursue a *parens patriae* action absent authority of state legislation. In fact, as the Antitrust Improvements Act was originally introduced, a state

The essential allegation in this case appears to be that, selling door-to-door, the defendants were able to avoid head-to-head competition with other vacuum cleaner retailers, avoid price advertising and maintain artificially high prices for their products.

⁴Indeed, in the State's brief, the attorney general takes the ingenuous position that, whether or not the Texas legislature contemplated *parens patriae* suits in enacting [section 15.40](#), he possesses that authority because the statute confers authority to recover all damages recoverable under the federal antitrust laws, such as damages suffered by natural persons. Brief for Appellee at 12-13. This implicates the [tenth amendment](#), of course, and as discussed *supra* note 1, neither the majority nor this dissent deals with that issue. The significance of the rather glib concession by the appellee is that, as in the majority opinion, the desires of the Texas state legislature are deemed irrelevant.

would have been expressly authorized to bring actions for harm to its general economy as well as to its citizens.
⁵ **[**20]** This "general economy" provision was omitted from the Act's final version which, as enacted, provided only for *parens patriae* actions to recover damages "for injuries sustained by such natural persons to their property. . . ."
⁶

I see no reason why, if a state may not sue in its own name for general economic harm, it may be allowed under some "natural law" concept to come in and sue in the name of its citizens for redress of that harm. Nor, given section 4C's clear provision only for recovery of damages for injuries sustained by individuals, does this back-door approach provide support for suit by the attorney general. The majority and *Mid-Atlantic Toyota* attempt to equate "action on behalf of the State" with "economic well-being" with "*parens patriae*." The logic does not survive the leap, however. The "general economy" argument strikes me as irrelevant.

In sum, the majority *ignores* the substantive distinction between suits on behalf of the state, which are provided for in [section 15.40](#), and *parens patriae* actions, which are not provided for, explicitly or implicitly, in [section 15.40](#). The majority opinion holds essentially that "actions on behalf of the state" **[**21]** include *parens patriae* suits. The majority by its writing erases the traditional, historical basis for *parens patriae* actions. Twelve states and the District of Columbia have provided express authority to their attorneys general to bring antitrust *parens patriae* actions.⁷ According to the **[*1031]** majority, they could have saved themselves the trouble.

The doctrine of *parens patriae* evolved in a specific way with specific applicability. It is a distinct, discrete jurisdictional device. The Texas State Legislature, had it seen fit, could have conferred upon its attorney general authority to bring *parens patriae* suits. The **[**22]** legislature clearly has not done so. The majority, despite the absence of authority, not only reads between the lines of the statute, but veritably gazes into the Utopian skies of "ought-to-be" and glimpses that authority. I am not gifted with such visionary powers. I see no authority. I dissent.

HN1[] Racketeer Influenced & Corrupt Organizations, Claims

Permission to bring a civil action for a Racketeer Influenced and Corrupt Organizations Act (RICO) violation under [18 U.S.C.S. § 1964\(c\)](#), extends to those injured by a violation of the criminal RICO prohibitions, [18 U.S.C.S. § 1962](#). Had the Congress not intended civil RICO plaintiffs to prove the same elements which the government must prove in a criminal case, it undoubtedly would not define a civil violation with specific reference to a criminal one. Therefore, in deciding whether plaintiffs have properly alleged a civil RICO claim, the courts may properly draw upon those criminal RICO cases which have described the essential elements of such a claim.

Governments > Legislation > Interpretation > Rule of Lenity

HN2[] Private Actions, Racketeer Influenced & Corrupt Organizations

Given the inapplicability of the rule of lenity, to civil proceedings and the Racketeer Influenced and Corrupt Organizations Act's (RICO) statutory mandate for a liberal construction, [18 U.S.C.S. § 1961](#), the court would be hard pressed to justify a narrower construction of RICO's civil cause of action than that afforded RICO's criminal provisions.

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

[**HN4**](#) **Private Actions, Racketeer Influenced & Corrupt Organizations**

The term "racketeering enterprise injury" may imply that the plaintiff must somehow link his injuries to the operations of a criminal "enterprise" within the meaning of [18 U.S.C.S. § 1961\(4\)](#). This definition of "racketeering enterprise injury," however, cannot be reconciled with prevailing judicial constructions of [§ 1962](#). The Racketeer Influenced and Corrupt Organizations Act applies to situations where the enterprise is, in effect, no more than the sum of the predicate racketeering acts. Accordingly, it would be inconsistent to force a plaintiff to connect his injuries strictly to the offending "enterprise" as opposed to the underlying criminal racketeering acts.

HN7 Heightened Pleading Requirements, Fraud Claims

Fed. R. Civ. P. 9(b) requires that all fraud allegations shall be stated with particularity. This rule applies with particular force to a civil complaint which alleges fraudulent conduct involving violations of the criminal code.

Counsel: [**1] William Dobrovir, Dobrovir & Gebhardt, Washington, District of Columbia, Allan Kanner, Philadelphia, Pennsylvania, for Plaintiffs.

Douglas Lashley, Beckett, Cromwell & Myers, Bethesda, Maryland, Thomas Dyson, Washington, District of Columbia, for Defendants.

Judges: Sirica, District Judge.

Opinion by: SIRICA

Opinion

[*163] MEMORANDUM AND ORDER

SIRICA, District Judge.

This matter is before the Court on the defendants' motion to dismiss the complaint pursuant to "Rules 12(b)(6), 21 and 23 of the Federal Rules of [Civil] Procedure." According to the complaint, the plaintiffs are two former clients of an executive employment service who allegedly represent a class of over 2,000 similarly situated clients. The defendants are five individuals and two District of Columbia corporations involved in a furnishing executive placement services to the public. The gravamen of plaintiffs' complaint is that each member of the alleged class paid sums of money to the defendants in order to obtain executive placement services based on the defendants' allegedly fraudulent representations about the defendants' resources and capabilities. In short, the complaint alleges that the defendants induced the plaintiffs [**2] to pay for job search services which the defendants never actually had the intention or ability to perform. The plaintiffs have alleged four separate claims in their alleged class action: a claim for treble damages under the federal civil racketeering statute (18 U.S.C. § 1964(c) (1976)); a claim for treble damages under the District of Columbia's Consumer Protection Act (D.C. Code § 28-3904); and two claims for misrepresentation and fraud.

In their motion to dismiss the defendants raise three separate grounds for dismissing the complaint. The initial reason set forth in their motion is that this Court lacks subject matter jurisdiction because of an allegedly pending case in the [*164] District Court for the Eastern District of Pennsylvania docketed as *Eisen v. National Executive Search, Inc.*, No. 82-4657. The *Eisen* case, however, was denied class certification and, in fact, a default judgment was entered in that case. While this Court has little difficulty in deferring to matters more properly before a court of equal competence, cf. Brinco Mining v. Federal Ins. Co., 552 F. Supp. 1233 (D.D.C. 1982), defendants' contention that this Court lacks subject matter jurisdiction [**3] due to an allegedly contested default judgment in another federal forum is completely without merit.

Defendants' second ground for dismissing the complaint is a general argument about misjoinder (Rule 21) and whether this case is appropriately maintained as a class action (Rule 23). In response to defendants' arguments regarding dismissal for misjoinder the Court refers the defendants to the first sentence of Rule 21. Defendants' Rule 23 arguments are not yet ripe because the class certification issue is not presently before the Court.

Defendants' third contention in support of dismissal relates only to the plaintiffs' civil racketeering allegations. Basically, the defendants present two separate reasons for dismissing the cause of action brought under [18 U.S.C. § 1964\(c\)](#) (Civil RICO). Initially the defendants suggest that the federal civil racketeering statute can only be used against civil defendants with some demonstrated connection to "organized crime." Alternatively, the defendants argue that the civil RICO count should be dismissed because the plaintiffs lack standing to sue under the terms of [18 U.S.C. § 1964\(c\) \(1976\)](#). Although the Court will address both of defendants' [**4] arguments, the Court would like to clarify its position on a preliminary matter raised by the defendants.

In their latest pleading the defendants have attempted to distinguish the plaintiffs' citations by claiming that the case law generated through judicial construction of the criminal racketeering statutes ([18 U.S.C. §§ 1962\(a\)-\(d\)](#)) (RICO) is inapplicable to the civil racketeering provisions in [18 U.S.C. § 1964\(c\)](#). This Court must disagree with the defendants' views on the applicability of criminal precedent to RICO's civil provisions. As one court recently stated:

[HN1](#)[⁵] Permission to bring a civil action for a RICO violation, [18 U.S.C. § 1964\(c\)](#), extends to those injured by a violation of the criminal RICO prohibitions, [18 U.S.C. § 1962](#). Had the Congress not intended civil RICO plaintiffs to prove the same elements which the Government must prove in a criminal case, it undoubtedly would not have defined a civil violation with specific reference to a criminal one. Therefore, in deciding whether plaintiffs have properly alleged a civil RICO claim, we may properly draw upon those criminal RICO cases which have described the essential elements of such a claim.

[Eaby](#) [**5] *v. Richmond*, 561 F. Supp. 131, 134 (E.D.Pa. 1983). In any event, [HN2](#)[⁶] given the inapplicability of the rule of lenity, see [Rewis v. U.S.](#), 401 U.S. 808, 812, 91 S. Ct. 1056, 1059, 28 L. Ed. 2d 493 (1971), to civil proceedings and RICO's statutory mandate for a liberal construction, [18 U.S.C. § 1961](#), note, this Court would be hard pressed to justify a narrower construction of RICO's civil cause of action than that afforded RICO's criminal provisions.

The defendants have asked the Court to follow a few-reported cases which have implied an "organized crime connection" before recognizing a valid complaint under civil RICO. See, e.g., [Adair v. Hunt Int'l Resources Corp.](#), 526 F. Supp. 736-48 (N.D.Ill. 1981); [Moss v. Morgan Stanley, Inc.](#), 553 F. Supp. 1347, 1361 (S.D.N.Y. 1983). The clear and overwhelming majority of courts which have addressed this question, however, have rejected any attempt to add an "organized crime" requirement onto the statutory terms of [18 U.S.C. § 1964\(c\)](#). [Schact v. Brown](#), 711 F.2d 1343 (7th Cir. 1983); [Bennett v. Berg](#), 685 F.2d 1053, 1063 (8th Cir. 1982), aff'd, en banc, 710 F.2d 1361 (8th Cir. 1983); [Hunt Int'l Resources Corp. v. Binstein](#), [**6] 559 F. Supp. 601 (N.D.Tex. 1982); [Crocker Nat'l Bank v. Rockwell Int'l Corp.](#), 555 F. Supp. 47 (N.D.Calif. 1982); [Meineke Discount Muffler Shops, Inc. v. Noto](#), 548 F. Supp. 352 (S.D.N.Y. 1982); [Mauriber v. Shearson/Amer. Express](#), 546 F. Supp. 391 (S.D.N.Y. 1982); cf. [United States v. Cauble](#), 706 F.2d 1322, 1330 (5th Cir. 1983) ("judicial consensus that [RICO] may be used even though no organized crime activity is charged"). Reference to the legislative history of RICO's provisions reveals that Congress drafted RICO in broad terms to avoid creating a criminal offense whose definition depended on a term as vague as "organized crime." See 116 Cong.Rec. 35, 204 (1970); 116 Cong.Rec. 35,343-46 (1970). In light of Congress's understandable reluctance to draft a criminal offense in terms of a relation to some ill-defined notion of organized crime this Court has no difficulty following the majority of courts by refusing to add such a requirement to RICO's civil provisions.

The defendants' alternative argument for dismissal of the Civil RICO count focuses on the status of the plaintiffs rather than that of the defendants. Defendants argue that the plaintiffs lack [**7] standing to sue under Civil RICO. The plain terms of the statute confer standing to "any person injured in his business or property." [18 U.S.C. § 1964\(c\) \(1976\)](#). The defendants, relying on a few reported district court opinions, ask this Court to look beyond the plain terms of the statute to determine whether the plaintiffs belong to that group of litigants for whom the statute was enacted. The defendants contend that plaintiffs lack standing because they have not alleged either "competitive injury" or what has been termed "racketeering enterprise injury." The Court will address these two standing arguments raised by the defendants as though they are distinct although the distinction between the two standing tests is less than clear.

Briefly stated, the "competitive injury" standing requirement which the defendants ask this Court to place upon [18 U.S.C. § 1964\(c\)](#) would require that the plaintiffs allege some type of commercial, business-related injury before they could invoke the statute. In other words, the defendants assert that the plaintiff must allege that they were placed at a competitive disadvantage due to the defendants' conduct. The few courts that have endorsed the "competitive" test have done so in the belief that because [18 U.S.C. § 1964\(c\)](#) was modeled after traditional antitrust remedies the standing requirements of the antitrust field should be brought into play in actions under [18 U.S.C. § 1964\(c\)](#). Upon analysis, however, there are few, if any, satisfactory grounds for requiring a showing of "competitive injury" from plaintiffs under civil RICO. To begin with, there is legislative history to suggest that Congress intended to thwart the imposition of restrictive antitrust standing tests by placing civil RICO within title 18. See 115 Cong.Rec. 9567 (1969) (remarks of Sen. McClellan). Even assuming that the antitrust laws are an appropriate guide to construing [18 U.S.C. § 1964\(c\)](#), an assumption which ignores the markedly different purposes behind these two legislative schemes, judicial construction of the antitrust parallel to civil RICO, section four of the Clayton Act, argues *against* the imposition of a "competitive injury" requirement on civil RICO. See [Reiter v. Sonotone Corp.](#), [442 U.S. 330, 99 S. Ct. 2326, 60 L. Ed. 2d 931 \(1979\)](#) (injury to "business or property" under Clayton Act includes non-competitive, "consumer" injury). [\[**9\]](#) Finally, it would take a very narrow view of civil RICO's legislative history to contend that Congress, in enacting [18 U.S.C. § 1964\(c\)](#), was only concerned with the plight of those racketeering victims who were engaged in open business competition with racketeers. Accordingly, this Court joins an increasing number of other courts in holding that there is no "competitive" injury standing requirement applicable to [18 U.S.C. § 1964\(c\)](#). Accord, [Schact v. Brown](#), [711 F.2d 1343 \(7th Cir. 1983\)](#); [Bennett v. Berg](#), [685 F.2d 1053, 1059 \(8th Cir. 1982\)](#), aff'd, en banc, [710 F.2d 1361 \(8th Cir. 1983\)](#); [Crocker Nat'l Bank v. Rockwell Int'l Corp.](#), [555 F. Supp. 47, 49 \(N.D. Cal. 1982\)](#).

[\[*166\]](#) The defendants have also offered an alternate standing test in furtherance of their motion to dismiss. The defendants assert that plaintiffs must aver a "racketeering enterprise injury" to have standing under [18 U.S.C. § 1964\(c\)](#). The few courts that have referred to the "racketeering enterprise injury" standing requirement have not presented a clear definition of what exactly is a "racketeering enterprise injury." To the extent that the term includes the type of injury which has also gone under [\[**10\]](#) the name of "competitive injury" this court has already determined that [HN3](#) [18 U.S.C. § 1964\(c\)](#) does not require such a showing. Similarly, if the term refers to the status of the defendants as being considered members of "organized crime" then this Court has previously found that argument to be without merit. About the only feature of a "racketeering enterprise injury" that courts have been able to articulate is that a "racketeering enterprise injury" does *not* include the injury due solely to the commission of predicate criminal racketeering acts found in [18 U.S.C. § 1961\(1\) \(1976\)](#). Obviously, it is difficult to describe, much less apply, such a standing requirement when all that can be said about it is that there is general agreement on what does not constitute "racketeering enterprise injury." Nevertheless, the Court will attempt to describe what may be meant by the term "racketeering enterprise injury."

Those few courts which have used the term "racketeering enterprise injury" have reached the conclusion that [18 U.S.C. § 1964\(c\)](#) requires an allegation of this type of injury for two primary reasons. First, some courts have based their conclusions on a general analogy to [antitrust](#) [\[**11\]](#) [law](#) and reason that the general purpose of RICO is served when standing is limited to those injured by conduct Congress intended to proscribe. See [Landmark Savings & Loan v. Rhoades](#), [527 F. Supp. 206, 208 \(E.D. Mich. 1981\)](#). A second reason for imposing a "racketeering enterprise injury" standing requirement has been found in the "by reason of a violation of [section 1962](#)" language contained in [18 U.S.C. § 1964\(c\)](#). See [Harper v. New Japan Securities Int'l](#), [545 F. Supp. 1002 \(C.D. Cal. 1982\)](#). Despite these two different approaches to standing under [18 U.S.C. § 1964\(c\)](#), one based on a general reading of RICO and the other on the terms of civil RICO, this Court still has difficulty in articulating what type of injury satisfies either approach.

If "racketeering enterprise injury" merely means that a party has standing only if he has suffered injury from a violation of [18 U.S.C. § 1962](#), then it adds little or nothing to the terms of the statute itself. References to the general purpose of the RICO statute to support a narrow construction have been explicitly rejected by both the Supreme Court, [United States v. Turkette](#), [452 U.S. 576, 101 S. Ct. 2524, 69 L. Ed. 2d 246 \(1981\)](#), [\[**12\]](#) and Congress, see [18 U.S.C. § 1961](#), note (1976). One plausible explanation for the creation of the term "racketeering enterprise injury" might be that the statute should be available only to those victims whose injury can be connected

with a confluence of the statutory terms contained in RICO. Perhaps to show a "racketeering enterprise injury" a plaintiff must demonstrate that his business or property injury stemmed from the defendant's racketeering conduct in an enterprise which is specifically prohibited under the terms of [18 U.S.C. § 1962\(a\), \(b\), \(c\)](#), or [\(d\)](#). Again, however, this appears to mean little more than that the plaintiff must allege an injury attributable to a violation of RICO's criminal provisions.

On the other hand [HN4](#)[↑] the term "racketeering enterprise injury" may imply that the plaintiff must somehow link his injuries to the operations of a criminal "enterprise" within the meaning of [18 U.S.C. § 1961\(4\) \(1976\)](#). See [Van Schaick v. Church of Scientology](#), 535 F. Supp. 1125 (D.Mass. 1982). This definition of "racketeering enterprise injury", however, cannot be reconciled with prevailing judicial constructions of [18 U.S.C. § 1962](#). The majority of circuits have [\[**13\]](#) interpreted the Supreme Court's decision in [United States v. Turkette](#), 452 U.S. 576, 101 S. Ct. 2524, 69 L. Ed. 2d 246 (1981) as affirming the "application of [\[*167\]](#) RICO to situations where the enterprise was, in effect, no more than the sum of the predicate racketeering acts." [United States v. Bagaric](#), 706 F.2d 42, 55 (2d Cir. 1983); see also [United States v. Cagnina](#), 697 F.2d 915, 921 (11th Cir. 1983); [United States v. Bagnariol](#), 665 F.2d 877, 890-91 (9th Cir. 1981). Accordingly, it would be inconsistent to force a plaintiff to connect his injuries strictly to the offending "enterprise" as opposed to the underlying criminal racketeering acts. Of course, if "racketeering enterprise injury" means business or property injury to *plaintiffs* "enterprise" then it is nothing more than a different name for "competitive injury" which this Court has already rejected.

Having failed to define what the term "racketeering enterprise injury" is supposed to mean, all that remains is the often repeated statement that "racketeering enterprise injury" does *not* include injury attributable only to the underlying criminal predicate acts. This statement is itself somewhat hard [\[**14\]](#) to understand. Presumably, any person injured by the activities of racketeers as this group is defined by RICO will suffer direct injury from the actual criminal acts of the racketeers. In fact, Congress intentionally selected a group of criminal offenses as definitive of the type of conduct engaged in by organized criminals. The Eighth Circuit, for example, has singled out the elimination of the underlying pattern of criminal conduct as Congress's primary goal when RICO was enacted. [United States v. Dean](#), 647 F.2d 779, 787 (8th Cir.), on rehearing, 667 F.2d 729 (8th Cir. 1981), cert. denied, 456 U.S. 1006, 102 S. Ct. 2296, 73 L. Ed. 2d 1300 (1982). As that Circuit stated: "Supporters of RICO legislation, explaining its operation during the Congressional debate, shared the view that the evil to be punished was the pattern of racketeering activities and its injection into legitimate businesses, not the conversion of legitimate enterprises, into corrupt ones." [Id. at 787](#). By statutory design the victim's compensable injuries from the underlying criminal conduct will frequently be identical to those caused by the racketeering violation. Finally, the compensatory and deterrent [\[**15\]](#) purposes of RICO would be frustrated if a racketeering victim were prohibited from bringing suit on the basis of injuries directly attributable to predicate criminal acts. See [Cenco Inc. v. Seidman & Seidman](#), 686 F.2d 449, 457 (7th Cir. 1982) (Civil RICO to be construed in light of its "compensatory and deterrent objectives").

In conclusion, the Court is unable to provide a satisfactory definition for the term "racketeering enterprise injury." More importantly, the various reasons that have been proffered for the imposition of this type of a standing requirement are inconsistent with the objectives of the racketeering statute as well as the statutory scheme set forth in [18 U.S.C. § 1962](#). Hence, the Court will deny the defendants' request to impose a "racketeering enterprise injury" standing requirement on the plaintiffs in this case. This Court is satisfied that plaintiffs, having alleged a compensable injury to their "business or property" by reason of defendants' alleged violation of [18 U.S.C. § 1962](#), fall within that category of racketeering victims afforded a cause of action under [18 U.S.C. § 1964\(c\)](#). Of course, the Court does not wish to imply any view on the merits of [\[**16\]](#) plaintiffs' case. Rather, this Court merely holds that plaintiffs have alleged sufficient facts in their complaint to prevail over defendants' motion to dismiss for lack of standing.

The defendants raise one final argument in favor of dismissal at this early stage. During oral argument defense counsel voiced a general policy argument in favor of dismissing the plaintiffs' [section 1964\(c\)](#) claims even though they may be well-pleaded. Defendants contend that because the plaintiffs have other, more traditional and more specific claims available under District of Columbia law this Court should dismiss the plaintiffs' federal cause of action. The defendants are correct in their assertion that the broad terms of [18 U.S.C. § 1962](#) & [1964\(c\)](#) pose a risk

of turning traditional state claims into federal cases. The 91st Congress, however, enacted [*168] RICO despite persuasive similar arguments by several Congressmen. See 116 Cong.Rec. 35,205 (remarks of Rep. Mikva); see also *United States v. Turkette*, 452 U.S. 576, 586-87, 101 S. Ct. 2524, 2530-31, 69 L. Ed. 2d 246 (1981) (Congress intended to enter domains traditionally left to the states in enacting RICO). Moreover, [HN5](#) [↑] the statute [**17] itself declares that Congress intended to supplement other available remedies. See [18 U.S.C. § 1961](#), note. Accordingly, this Court will not entertain the defendants' federalism policy argument when it is clear that Congress has already made that judgment. Defendants have also asked this Court to dismiss the complaint because other, more specific causes of action are available to plaintiffs. It is beyond dispute, however, that the plaintiff "is master to decide what law he will rely on. . . ." *Bell v. Hood*, 327 U.S. 678, 681, 66 S. Ct. 773, 775, 90 L. Ed. 939 (1946). [HN6](#) [↑] A court's discretion in passing on a [Rule 12\(b\)\(6\)](#) motion to dismiss is limited. See *Jenkins v. McKeithen*, 395 U.S. 411, 421, 89 S. Ct. 1843, 1848, 23 L. Ed. 2d 404 (1969). This Court's authority does not include the discretion to dismiss a complaint because a plaintiff might have brought suit under a different law in another forum which may result in some form of relief. In addition, the Court notes that defendants' argument concerning the availability of more specific causes of action has uniformly been rejected when raised by criminal defendants in RICO proceedings. Courts have denied defendants' argument [**18] when viewed as a dual sovereignty challenge, *United States v. Aleman*, 609 F.2d 298, 309 (7th Cir. 1979), or as a challenge to the government's charging decision under two overlapping federal criminal statutes; see *United States v. Computer Sciences*, 689 F.2d 1181, 1187 (4th Cir. 1982); cf. *United States v. Batchelder*, 442 U.S. 114, 99 S. Ct. 2198, 60 L. Ed. 2d 755 (1979). Although the considerations relevant to judicial review of the government's charging decisions are not equally applicable between private litigants, this Court's review under a [Rule 12\(b\)\(6\)](#) motion is limited to whether the complaint states a valid cause of action.

Although the Court cannot grant the defendants' motion to dismiss based on the reasons offered by the defendants, the Court is genuinely concerned about the plaintiffs' compliance with [Rule 9\(b\) of the Federal Rules of Civil Procedure](#). [HN7](#) [↑] [Rule 9\(b\)](#) requires that all fraud allegations "shall be stated with particularity." *Id.* This rule applies with particular force to a civil complaint which alleges fraudulent conduct involving violations of the criminal code. The complaint in this case alleges that the defendants conducted a pattern of racketeering [**19] activity, to wit, an alleged scheme to defraud under [18 U.S.C. § 1341](#) & [1343](#), "in violation of [§ 1962](#)." Complaint, para. 10. While U.S.C. [§ 1964\(c\)](#) literally speaks only to violations of "[section 1962](#)," that does not remove the burden placed on plaintiffs to state a specific type of [section 1962](#) violation. For example, paragraph ten of the complaint refers to a conspiracy but the complaint fails to indicate whether a violation of RICO's conspiracy section, [18 U.S.C. § 1962\(d\)](#) is being alleged. Within the context of [Rule 9\(b\)](#)'s mandate for specificity, it is essential that plaintiffs identify what particular violation of [section 1962](#) is being alleged. [Rule 9\(b\)](#) also extends to the essential elements of the particular type of racketeering violation that is being alleged. Consequently, the plaintiffs must state with particularity the nature of the "enterprise" alleged as well as the acts constituting the basis for the underlying claims of mail and wire fraud. The Court will dismiss the complaint without prejudice to plaintiffs filing an amended complaint in conformity with [Rule 9\(b\) of the Federal Rules of Civil Procedure](#). Wherefore, it is this 28th day of July, 1983.

ORDERED that [**20] the defendants' motion to dismiss is denied in all respects, and it is

FURTHER ORDERED that the complaint is dismissed without prejudice to the refiling of an amended complaint in conformity with [Rule 9\(b\) of the Federal Rules of Civil Procedure](#) within thirty (30) days from the date of this Order.

Construction Aggregate Transport, Inc. v. Florida Rock Industries, Inc.

HN14[] **Antitrust & Trade Law, Sherman Act**

Under the rule of reason, a plaintiff must demonstrate anticompetitive effect in the relevant market.

Antitrust & Trade Law > Sherman Act > General Overview

HN15[] **Antitrust & Trade Law, Sherman Act**

The Sherman Act, [15 U.S.C.S. § 1](#), prohibition against "every" agreement in restraint of trade has been interpreted by the federal courts to forbid only "unreasonable restraints."

Antitrust & Trade Law > Sherman Act > General Overview

HN16[] **Antitrust & Trade Law, Sherman Act**

Per se rules of illegality are appropriate only when they relate to conduct that is manifestly anticompetitive.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Restraints of Trade

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN17[] **Exclusive & Reciprocal Dealing, Exclusive Dealing**

A merchant may choose with whom he will do business and with whom he will not do business; such action generally does not violate the antitrust laws. Thus, the manufacturer can deal or not deal with customers for reasons sufficient to itself. This sort of arrangement, referred to as "exclusive dealing," does not give rise to antitrust liability without proof of actual competitive injury. Implicit in the freedom to deal exclusively with one merchant, of course, is the freedom to refuse to deal with a competitor of that merchant. Again, such a unilateral exercise of business judgment is free from scrutiny in the absence of proof of competitive harm, or other underlying illegal behavior.

Antitrust & Trade Law > Sherman Act > General Overview

710 F.2d 752, *752 (1983 U.S. App. LEXIS 25371, **1

[**HN18**](#) [blue document icon] Antitrust & Trade Law, Sherman Act

When a merchant goes beyond unilateral choice and combines with other merchants to deal or not to deal only with a specific customer, the legal consequences are vastly different. Such an agreement between independent merchants is known as a "concerted refusal to deal" and is generally subject to the per se rule of illegality.

Antitrust & Trade Law > Sherman Act > General Overview

[**HN19**](#) [blue document icon] Antitrust & Trade Law, Sherman Act

A concerted refusal to deal essentially is an agreement among two or more parties that each will engage in an individual refusal to deal with a particular customer or customers.

Antitrust & Trade Law > Sherman Act > General Overview

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Covenants not to Compete

[**HN20**](#) [blue document icon] Antitrust & Trade Law, Sherman Act

The touchstone of an illegal group boycott or concerted refusal to deal is the agreement between two or more merchants not to deal with another merchant when, in the absence of such an agreement, the conspiring merchants would normally have been free to deal with that merchant.

Antitrust & Trade Law > Sherman Act > General Overview

[**HN21**](#) [blue document icon] Antitrust & Trade Law, Sherman Act

The "touchstone" of per se illegality is not the presence of exclusionary conduct in the particular case but rather is the market impact of the kind of restrictions in question. Departure from the rule of reason standard must be based upon demonstrable economic effect rather than upon formalistic line drawing.

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

[**HN22**](#) [blue document icon] Antitrust & Trade Law, Sherman Act

The key inquiry when determining whether a particular arrangement is horizontal or vertical is not the presence of a conspirator on the plaintiff's market level ("horizontal" to the plaintiff) but whether the conspiratorial agreement is between entities which are horizontally arranged at some level in the market.

Antitrust & Trade Law > Sherman Act > General Overview

[**HN23**](#) [blue document icon] Antitrust & Trade Law, Sherman Act

710 F.2d 752, *752L^A 1983 U.S. App. LEXIS 25371, **1

A tying arrangement may be defined as an agreement by a party to sell one product but only on the condition that the buyer also purchases a different product, or at least agrees that he will not purchase that product from any other supplier.

Antitrust & Trade Law > Sherman Act > General Overview

HN24 [] **Antitrust & Trade Law, Sherman Act**

When the victim of an alleged tie-in is not required to buy a single unit of the tied product from the tying party or from any source in which the tying party has an interest or on whose sales the tying party earns a commission, the arrangement simply does not constitute a tie.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN25 [] **Antitrust & Trade Law, Sherman Act**

Tying arrangements are subject to a special qualification that the party enforcing the tying agreement must have sufficient economic power with respect to the tying product to appreciably restrain free competition in the market for the tied product.

Antitrust & Trade Law > Sherman Act > General Overview

HN26 [] **Antitrust & Trade Law, Sherman Act**

The economic power which must be demonstrated need not rise to the level of monopoly power or even dominant power in the market.

Antitrust & Trade Law > Sherman Act > General Overview

HN27 [] **Antitrust & Trade Law, Sherman Act**

Even absent a showing of market dominance, the crucial economic power may be inferred from the tying product's desirability to consumers or from its uniqueness in its attributes. Thus, the proper focus of concern is whether the seller has the power to raise prices, or impose other burdensome terms such as a tie-in, with respect to any appreciable number of buyers within the market.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Remedies > Damages

[**HN28**](#) [blue icon] Clayton Act, Claims

Under the Clayton Act, [15 U.S.C.S. § 15](#), a private plaintiff who has demonstrated a violation of the Sherman Act, [15 U.S.C.S. § 1](#), also must prove an injury to his business resulting from the defendant's wrongful actions, and some indication of the amount of the damage done.

Antitrust & Trade Law > Clayton Act > General Overview

[**HN29**](#) [blue icon] Antitrust & Trade Law, Clayton Act

It is enough that the illegality is shown to be a material cause of the injury; a plaintiff need not exhaust all possible alternative sources of injury in fulfilling his burden of proving compensable injury under the Clayton Act, [15 U.S.C.S. § 15](#).

Antitrust & Trade Law > Clayton Act > General Overview

[**HN30**](#) [blue icon] Antitrust & Trade Law, Clayton Act

Once the fact of causation is established, the burden of proving damages is much less severe.

Civil Procedure > Appeals > Standards of Review

[**HN31**](#) [blue icon] Appeals, Standards of Review

Although the question of damages requires that the court enter into the realm of the imprecise and the uncertain, the appellate court must reverse the jury's verdict if it becomes apparent that its judgment was based on speculation and guesswork. Its task is to ensure that the jury rendered a just and reasonable estimate based on relevant data.

Antitrust & Trade Law > Clayton Act > General Overview

Civil Procedure > ... > Jury Trials > Jury Instructions > General Overview

[**HN32**](#) [blue icon] Antitrust & Trade Law, Clayton Act

Loss of future profits is a well-established basis for determining the measure of economic injury resulting from an anticompetitive act which forces the victim out of business.

Antitrust & Trade Law > Clayton Act > General Overview

[**HN33**](#) [blue icon] Antitrust & Trade Law, Clayton Act

Although the lesser standard of sufficiency controls once the fact of causation has been established, an expert's projection of future profits must be supported by proven facts.

Opinion by: ANDERSON, III

Opinion

[*756] R. LANIER ANDERSON, III, Circuit Judge:

Florida Rock Industries ("FRI") appeals from an adverse judgment entered against it in a treble damages action under § 4 of the Clayton Act, [15 U.S.C.A. § 15](#) [**2] (*West Supp. 1983*),¹ and § 1 of the Sherman Act, [15 U.S.C.A. § 1](#) (*West Supp. 1983*).² [**3] A jury found for the plaintiff, Construction Aggregate Transport, Inc. ("CAT"), and awarded damages of \$300,000, which the trial court [*757] trebled. We reverse and remand for a new trial because the trial court erred in instructing the jury on a theory of per se illegality.³

I. FACTS

Construction Aggregate Transport, Inc., a Florida corporation engaged in the hauling of sand, gravel, and other rock material ("aggregate") in Central and Southern Florida, was the brainchild of one, Al Hallowell, who had worked for many years in the trucking business in Florida. The idea upon which CAT was based was a novel one for the aggregate⁴ hauling business in Florida, and involved the use of double trailers. By using these double trailers, which required only one tractor and one driver, rather than the single trailers which were the norm in the aggregate hauling industry, a substantial reduction in costs could be realized.

[**4] Hallowell also recognized that most truckers of bulk aggregate use one-way hauls; after delivering their shipment of bulk aggregate they return with an empty load to the aggregate supplier. Obviously, a business which

* Honorable Charles R. Scott, U.S. District Judge for the Middle District of Florida, was a member of the panel that heard oral arguments but due to his death on May 12, 1983 did not participate in this decision. The case is being decided by a quorum. 28 U.S.C. § 46(d).

¹ [15 U.S.C.A. § 15\(a\)](#) (*West Supp. 1983*) states in relevant part:

[HN1](#) [↑] any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor in any district court of the United States. . . .

² [15 U.S.C.A. § 1](#) (*West Supp. 1983*) states in relevant part:

[HN2](#) [↑] Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal.

³ As discussed in Section V(B) below, we also have serious reservations regarding CAT's proof of damages. See *infra* text accompanying note 55.

⁴ The term "aggregate" refers to sand, gravel, slag, crushed stone and like materials which are mixed with a cementing material to form concrete, cement, mortar, or asphalt. Such materials are key ingredients in the construction industry.

relied on two-way hauling could maximize the use of its equipment and reduce the cost of transporting each trailer of aggregate.⁵

The Florida aggregate industry historically has been geographically divided into two separate markets. Each of these markets is supplied primarily by rock mined within the particular market. One market centers around Brooksville, near Orlando in Central Florida. Aggregate produced in the Brooksville-Orlando market generally constitutes the primary supply for asphalt producers in the Central Florida area. The defendant, Florida Rock Industries, is one of the largest producers of aggregate in the state of Florida, and is one of [**5] the primary suppliers in the Brooksville-Orlando market area.⁶ The other geographical aggregate market in the state of Florida centers around the Miami and West Palm Beach area. Thus, the primary sources of aggregate materials used in the production of asphalt in Florida are the rock mines in the Miami market and the Brooksville-Orlando market. Finally, another important facet of the Brooksville-Orlando market is the production of sand materials, also used in the construction industry. Much of this sand is produced at Clermont, due east of Orlando.

At the time the Hallowell conceived the idea of using double trailers, a strong demand existed in the Miami market for the sand produced outside of Clermont in the Brooksville-Orlando market. See Record at 1066. Further, there was a strong demand in the Brooksville-Orlando market for the rock being produced by the Miami mines. [**6] According to testimony at trial, no existing hauling outfit had attempted to take advantage of the separation of these two markets. Hallowell therefore determined that the time was ripe for an aggregate trucking outfit which could meet the demand for sand in the Miami and West Palm Beach area and also introduce Miami rock into the Brooksville-Orlando area.

Miami and Orlando lie at opposite ends of a 200-mile north-south stretch of the Florida Turnpike. Hallowell's plan was to pick up sand in the Clermont area west of Orlando and truck it down to the West Palm Beach area alongside the Turnpike. After delivering the sand to his customers in West Palm Beach, he would then drive to the [*758] stone mines in the Miami area, load his double trailers with aggregate material and return to the Orlando area, delivering the Miami aggregate to asphalt producers in and around Orlando. Under this plan, CAT's truckers would engage only in two-way hauls. Further efficiencies would be realized by using the double trailers, which could carry twice the normal load.⁷

[**7] In the summer of 1977, Hallowell began efforts to implement this plan. First, he persuaded a friend, Dr. Ward, to contribute capital needed for starting up the operation. Dr. Ward contributed \$15,000 and, after Mr. Hallowell's own contribution, CAT was able to begin with operating capital of \$35,000.⁸

Next Hallowell set about designing the necessary trailers and securing their manufacture. Of critical importance to our narrative is Hallowell's choice of trailer. Rather than selecting the rear dump trailers that were generally used in the bulk aggregate hauling business in Central Florida, Hallowell chose to design his trucking operation around the use of bottom dump or "hopper" trailers. A rear dump trailer is emptied of its contents by tilting the entire trailer unit on a horizontal axis, thus allowing the aggregate to slide out the back door. The result is a relatively concentrated pile of aggregate. Record at 1059. With the hopper trailer, material [**8] is emptied through the bottom of the trailer by means of gull-wing type doors. If the driver is careful when unloading the result will be long, narrow, and neat "windrows" of aggregate material. Generally, regardless of the type of trailer used the purchaser of the aggregate will have to use a "payloader" or "front end loader" to move the deposited material into larger stockpiles.

⁵ Such a one-way haul is known as a "deadhead over." Obviously, the "trucker's dream" is a full load on both hauls. Record at 1084-85.

⁶ According to its president, Edward Baker, FRI is the largest producer of aggregate in the state of Florida. Record at 1557.

⁷ At trial, Hallowell estimated that sand which sold for \$1.50 a ton in Orlando would bring \$4.50 a ton in the Miami area. Conversely, rock selling for \$3.00 in the Miami area would sell for \$7.00 in the Orlando area.

⁸ Included in this figure was a bank loan of \$10,000.

It is possible, however, that this job may take longer and require greater effort when the material has been deposited in windrows by a hopper trailer.⁹

[**9] Hallowell next took his design to Walter Harkala of Hardey Manufacturing. Harkala agreed that there was merit to Hallowell's business plan, and after working out the financial details Hardey Manufacturing began to construct the necessary trailers. The manufacturing process proved to be a slow one. Because of the unique design features of the new trailers, in particular the mechanism for opening the gull-wing doors, production of the first set of trailers took approximately six months. Ultimately, Hardey would manufacture three sets of trailers, or six trailers in all. Harkala testified that eventually Hardey would have been able to manufacture 12 to 18 trailers per year. Record at 1042. This capability coincided with Hallowell's goal of putting a fleet of twenty trailers on the Turnpike, capable of delivering 1,000 tons of aggregate a day. Record at 1274.

While the trailers were being manufactured, Hallowell was taking care of other business. At that time, the state of Florida allowed the use of double trailers only on the Turnpike, not on any other state or federal highways. This complicated Hallowell's round trip concept, and necessitated the purchase or construction [**10] of a "staging area" at each end of the Turnpike. At the end of each haul, CAT would have to pull off the Turnpike into the staging area, [*759] whereupon the two trailers would be unhitched. A tractor would then haul each trailer separately to its delivery destination, and then back to the staging area where it would be exchanged for the other trailer. The same procedure would then be carried out in order to load the two trailers. After loading and rehitching, the double trailer unit would begin its return journey up the Turnpike.¹⁰

[**11] Next, Hallowell set about obtaining a Certificate of Public Necessity and Convenience from the Florida Public Service Commission. After failing to secure a 10-county Certificate from a friend, he arranged to purchase a statewide Certificate from the Osceola Construction Company in Pensacola for \$25,000. After purchasing two tractors from International Harvester¹¹ and receiving the first set of trailers from Hardey Manufacturing, Hallowell secured approval and licensing from the Turnpike Authority for his equipment and his drivers. By October of 1978, CAT was ready to begin operations.

Because the viability of CAT depended upon its ability to haul to both ends of the Florida Turnpike, the hours of operation of its customers and suppliers were extremely important. In particular, it was critical to CAT's success that there be a customer for Miami rock in the Orlando area that would be able to take deliveries 24 hours a day. Only with the [**12] unrestricted delivery schedule at the north end of the "circuit" could CAT hope to maximize the use of two-way hauling and operate at a profit. See Record at 1298-300, 1491-92, 1014-15.

By November of 1978, CAT had lined up customers at both ends of the Turnpike. Typically, CAT would begin a two-way haul by loading its trailers with sand at the north end of the trip. This sand would be supplied by a mine in the Clermont area which would be open 24 hours a day for loading. Once the loaded trailers had been individually shuttled to the staging area on the Turnpike they would be hitched together for the journey south. After a three -

⁹ Jerry DeGarmo, a former vice president for FRI, testified that regardless of the type of trailer used, the aggregate deposited would have to be picked up with a front-end loader and moved. Further, the difference in cost between moving rock dropped by a rear dump trailer and moving rock dropped by a bottom dump trailer "would be negligible." Apparently, any preference for the use of rear dump trailers stems from the reduced likelihood of inadvertently mixing the stockpiles in the delivery yards. See Record at 1023-30. The mixing of stockpiles containing different sizes or grades of aggregate could have disastrous results for the concrete or asphalt produced. Moreover, because concrete and asphalt producers are largely dependent upon public contracts, their products are subject to strict quality controls. See also *infra* note 18.

¹⁰ Eventually, Hallowell intended to station one cab permanently at each staging area to handle all off-Turnpike duties, including loading and unloading aggregate material. This would free up at least one driver to handle only over-the-road hauling down the Florida Turnpike. Maximum efficiency would be reached with the use of one over-the-road tractor running a continuous circuit between Orlando and West Palm Beach, and one shuttle tractor at each end of the turnpike servicing up to six hopper trailers. See Record at 1421-23.

¹¹ The cost of the first tractor was \$50,000, the second \$165,000.

hour journey, the sand would be delivered to construction outfits in the West Palm Beach area. CAT's first customer for Clermont sand was Mack Concrete. Later CAT changed over to Rinker Materials Corporation ("Rinker") because of more advantageous delivery hours.

Ideally, CAT would arrive at the Rinker Lake Worth plant in West Palm Beach just as it opened at 7 a.m. After dumping the sand at Rinker, each empty trailer would be shuttled back out to the Turnpike and hitched together for the trip to Rinker's stone mines in the Miami area.¹² Because [**13] Rinker's Miami stone operation generally closed its gates at 3:30 p.m., CAT would aim for a noon arrival at the Miami staging area. Here, once again each trailer would be unhitched and shuttled to the Rinker mine one at a time. Loading the trailers in this manner would take approximately two hours, allowing CAT to begin the journey north at approximately 2 p.m. in the afternoon. Because of the distance involved, as well as the time that would be lost in the shuttle maneuver at the staging area at the north end of the Turnpike, rarely could CAT arrive at its north delivery point for Miami rock earlier than 8 p.m. Hence the necessity for a customer at the north end with 24-hour delivery. See Record at 1281-83, 1491-92.

From November of 1978 until mid-August of 1979, CAT's northern delivery point customer for aggregate rock¹³ transported [*760] from Rinker in Miami was Southern Paving Co., which was located just south of Orlando [**14] on the Florida Turnpike. Southern Paving's Orlando facilities were open on a 24-hour basis. In June of 1979, CAT received its second shipment of double trailers from Hardey, and began using them in its deliveries between Miami and Orlando. On August 10, however, CAT was terminated by Southern Paving, and had to seek another customer on the northern end of its route which would be open on a 24-hour basis.¹⁴

CAT's first attempts to secure other purchasers of stone in the Orlando area proved [**15] fruitless. By late August, however, CAT was able to obtain the business of a customer which was open 24 hours a day, and on August 29 CAT began hauling rock from Rinker in Miami to Basic Asphalt Company ("Basic") in Orlando.

When negotiating with Basic, Hallowell had dealt directly with Scott Carlson, Basic's vice president. According to testimony at trial, Hallowell offered Carlson a shipping price for Miami stone that was \$.71 per ton less than what Carlson was paying other trucking outfits for the delivery of stone produced in the Orlando area. According to Hallowell, he and Carlson reached "an understanding or an agreement" that CAT would haul 5,000 tons of rock from Miami -- approximately two and one-half months of work. Record at 1290.¹⁵ CAT began hauling rock to Basic almost immediately and continued doing so until CAT was terminated on September 21, 1979.¹⁶ The events surrounding this termination by Basic form the basis for the present controversy.

[**16] According to Hallowell, Scott Carlson phoned his home on a Wednesday evening, when he was not home. Upon returning Carlson's call, Hallowell was told not to haul any more material to Basic. Hallowell testified that Carlson said:

Well, I got word from Florida Rock that they don't want us to get any more material out of Miami. . . . Al, these people came and told me that if I got any more rock out of Miami, they were damn sure going to shut off allocation from Brooksville.¹⁷

¹² Rinker owned two stone mines in the area: Rinker Lake Worth and FEC.

¹³ The type of stone being carried from Rinker in Miami to Southern Paving outside of Orlando was known as "three-eighths stone," and was customarily used for making asphalt.

¹⁴ In its original complaint, CAT alleged that Southern Paving had been coerced by one of its Orlando stone suppliers, Florida Crushed Stone, into terminating CAT's delivery of stone from Rinker in Miami. Subsequently, CAT stipulated to the granting of a summary judgment against it on its claim against Florida Crushed Stone. Record at 525.

¹⁵ Whether Carlson actually agreed to such an arrangement was a matter of some dispute at trial. See *infra* Section V(A).

¹⁶ Invoices show that CAT shipped rock one day, missed the following week for unexplained reasons, then shipped four days for each of the following two weeks. In all, CAT shipped approximately 850 tons of aggregate up until its termination.

Record at 1306. Hallowell then called Ted Baker, the president of FRI and an old friend, who said that he would look into the matter. On Saturday of that week, Baker called Hallowell back and told him that the threat had been a mistake and that Basic had complained about the way that CAT was delivering the aggregate.

[**17] According to officials for Basic and FRI, coercion was not involved in the termination of CAT. Rather, Hallowell's choice of hopper trailers instead of rear dump trailers resulted in the inadvertent mixing of different types of aggregate in the unloading areas.¹⁸ [**18] Further, there was testimony to [*761] the effect that more labor was needed to move the narrow windrows of aggregate deposited by a hopper trailer than would be necessary to move the more concentrated piles left by rear dump trailers.¹⁹ Thus, the defendants' position was that CAT's termination by Basic was merely a business decision based upon CAT's inability to perform as expected.²⁰

[**19] The Monday after CAT's termination by Basic, CAT began delivering the stone from Rinker in Miami to the Rinker South Orange Concrete Plant south of Orlando. The substitution of Rinker South Orange for Basic, however, suffered one major flaw: Rinker South Orange closed for deliveries at 5 p.m. Hallowell and his drivers testified that the original concept of one round trip every 18 to 20 hours was impossible under this arrangement. Although on occasion Rinker would remain open beyond 5 p.m., generally CAT was unable to complete its circuit of deliveries. As a result, CAT's drivers would have to lay over for the night in Orlando and make their deliveries at Rinker South Orange in the morning. Each such morning delivery meant a loss of \$500 for CAT. See Record at 1324-25.

CAT continued hauling from Rinker in Miami to Rinker South Orange for approximately 8 weeks. During this time, CAT was unable to find another 24-hour customer at the north end of the circuit. Unable to generate enough revenue to continue in business, CAT was forced to return its trailers to Hardey Manufacturing in December.²¹ At

¹⁷ The significance of the term "allocation" is discussed below at note 56. Testimony at trial disclosed that FRI was Basic's major supplier of aggregate. After Basic stopped receiving Miami rock from Rinker, through CAT, its only purchases for at least three months were from FRI.

¹⁸ Aggregate brought out of the Miami mines typically has a lighter specific gravity than aggregate found in the Brooksville-Orlando area. As a result, it is not perfectly interchangeable with the Brooksville rock. For this reason, the two types of aggregate could not be mixed in the same stockpile. Although asphalt might be comprised of several different types of rock, including both types of aggregate, a special mix would be required. Obviously, then, stockpiling different types of aggregate in the same yard would increase the likelihood of mixing those types, particularly if deliveries were made in a careless manner. The use of rear-dump loaders generally would minimize this risk. See Record at 1023-25.

Hopper trailers are most effective when the delivery facility utilizes "hoppers" for receiving the aggregate. The hopper consists essentially of a cone-shaped receptacle leading to a conveyer belt and covered by a grate. The hopper trailer is driven over the grated surface and its bottom doors are opened to allow aggregate to fall into the receptacle, where it is carried by the conveyer belt to a storage facility. If a particular customer used hoppers, there would be little chance of mixing different types of aggregate. Neither Southern Paving nor Basic used hoppers, however. As a result, unloading aggregate from a hopper trailer could be a more complicated operation. See Record at 1294.

¹⁹ On the other hand, there was testimony that the customer would have to use a payloader to move the delivery piles into more condensed stockpiles regardless of whether delivery was made by a rear-dump trailer or a hopper trailer. See Record at 1319.

²⁰ According to FRI's sales representative, Walter McFall, the person who allegedly threatened Basic, when he asked Jake Scherf of Basic why CAT had been terminated, Scherf responded:

Walter, it wouldn't work out. They were scattering the material all over our stockpile area. Each morning that I would come in, I would either have to get on the front end loader or one of my people would have to get on the front end loader and stockpile the material every morning. And it just didn't work out to [sic] their behalf.

Record at 1541. Hallowell and two of his drivers, however, testified that they had never received any complaints about the way in which they had delivered aggregate. According to Ted Baker, president of FRI, Carlson told him that if McFall had said anything to him that appeared to be a threat of economic coercion, "he would take that as a joke because he and Walter were very close friends." Record at 1563. According to Hallowell, Baker told him that "Walter McFall threatened them out there, but, hell, he was only kidding." Record at 1307.

approximately the same time, CAT's insurance policies were cancelled. By [**20] the end of the year, CAT had ceased all operations.

On March 10, 1980, CAT filed its complaint against FRI alleging violations of [§§ 1](#) and [2](#) of the Sherman Antitrust Act. CAT alleged that FRI, as a major supplier of construction aggregate in the Central Florida area, had coerced Basic into an agreement to cease purchasing aggregate hauled by CAT from competing Miami aggregate mines. Subsequently, CAT dropped its [§ 2](#) claim against FRI, and proceeded to trial only on the [§ 1](#) claim. The case was submitted to the jury on a theory of per se illegality and on April 17 the jury returned a \$300,000 verdict for CAT. Damages were trebled pursuant to [15 U.S.C.A. § 15\(a\)](#) and FRI noticed this appeal.

[*762] FRI alleges the following errors: (1) CAT lacked standing to sue under § 4 of the Clayton Act; (2) CAT's failure to show any restraint [**21] on interstate commerce deprived the court of subject matter jurisdiction; (3) the court erred in instructing the jury under a theory of per se illegality; (4) the alleged antitrust violation by FRI did not injure CAT or force it out of business; and (5) there was insufficient evidence to support the \$300,000 damage award. After a close examination of the record, we conclude that the trial court did indeed err in sending this case to the jury under an instruction on per se illegality. Accordingly, we remand for a new trial.

II. STANDING

Section 4 of the Clayton Antitrust Act provides a private cause of action for damages to:

Any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws

[15 U.S.C.A. § 15 \(West Supp.1983\)](#). Read literally, this provision would confer antitrust standing on business organizations far removed from those areas of the economy actually affected by an anticompetitive act. To eliminate the possibility of remote liability, courts have interpreted the "by reason of" language of § 4 as creating a requirement of standing. [HN3↑](#) [**22] The test for standing adopted by this circuit²² is the "target area" test: The plaintiff must show that he is within that sector of the economy which is endangered by a breakdown of competitive conditions in a particular industry. E.g., [Associated Radio Service Co. v. Page Airways, Inc.](#), 624 F.2d 1342, 1362 (5th Cir.1980), cert. denied, 450 U.S. 1030, 101 S. Ct. 1740, 68 L. Ed. 2d 226 (1981); [Larry R. George Sales Co. v. Cool Attic Corp.](#), 587 F.2d 266, 270-72 (5th Cir. 1979); [Donovan Construction Co. of Minnesota v. Florida Telephone Corp.](#), 564 F.2d 1191, 1192 (5th Cir.1977), cert. denied, 435 U.S. 1007, 98 S. Ct. 1878, 56 L. Ed. 2d 389 (1978); [Yoder Brothers, Inc. v. California-Florida Plant Corp.](#), 537 F.2d 1347, 1359 (5th Cir.1976), cert. denied, 429 U.S. 1094, 97 S. Ct. 1108, 51 L. Ed. 2d 540 (1977); [Southern Concrete Co. v. U.S. Steel Corp.](#), 535 F.2d 313, 316 (5th Cir.1976), cert. denied, 429 U.S. 1096, 97 S. Ct. 1113, 51 L. Ed. 2d 543 (1977); [Tugboat, Inc. v. Mobile Towing Co.](#), 534 F.2d 1172, 1175 (5th Cir.1976); [**23] [Jeffrey v. Southwestern Bell](#), 518 F.2d 1129, 1131 (5th Cir.1975); [Battle v. Liberty National Life Ins. Co.](#), 493 F.2d 39, 49 & n. 10 (5th Cir. 1974), cert. denied, 419 U.S. 1110, 95 S. Ct. 784, 42 L. Ed. 2d 807 (1975). See generally [Associated General Contractors of California, Inc. v. California State Council of Carpenters](#), 459 U.S. 519, - & n. 33, 103 S. Ct. 897, 907-08 & n. 33, 74 L. Ed. 2d 723, 736-37 & n. 33 (1983) (discussing various tests used by courts of appeals).²³ Thus, the task before this court

²¹ For a brief period shortly before its demise, CAT resumed doing a more limited form of business with Southern Paving. See Record at 1377-83.

²² In [Bonner v. City of Prichard](#), 661 F.2d 1206 (11th Cir.1981) (en banc), this court adopted as binding precedent all of the decisions of the former Fifth Circuit handed down prior to the close of business on September 30, 1981. *Id. at 1209*. Cf. [Stein v. Reynolds Securities, Inc.](#), 667 F.2d 33 (11th Cir.1982) (adopting as binding precedent all post-September 30, 1981, decisions of Unit B of former Fifth Circuit).

²³ Only rarely has the Supreme Court spoken directly to the issue of standing. See [Associated General Contractors of California, Inc. v. California State Council of Carpenters](#), *supra*; [Hawaii v. Standard Oil Co.](#), 405 U.S. 251, 92 S. Ct. 885, 31 L. Ed. 2d 184 (1972); [Perkins v. Standard Oil](#), 395 U.S. 642, 89 S. Ct. 1871, 23 L. Ed. 2d 599 (1969). In [Blue Shield of Virginia v. McCready](#), 457 U.S. 465, 102 S. Ct. 2540, 73 L. Ed. 2d 149 (1982), the Court did not rely directly on any of the various tests used by the courts of appeals. It also expressed no opinion as to the relative utility of these tests. In concluding that the plaintiff in that case

is to [HN4](#) [↑] identify the area or areas of the economy adversely affected by the alleged anticompetitive act and then to determine whether the claimed injury occurred within those areas. See [Yoder Brothers, Inc. v. California-Florida Plant Corp., 537 F.2d at 1359](#). By engaging in this analysis, we can safely limit the class of [[*763](#)] potential plaintiffs to those persons who will most adequately vindicate the purposes of the antitrust laws. See [Jeffrey v. Southwestern Bell, 518 F.2d at 1131](#). [\[**24\]](#)

[\[**25\]](#) The starting point in our analysis is CAT's complaint against FRI. See [Yoder Brothers, Inc. v. California-Florida Plant Corp., 537 F.2d at 1359](#) [HNS](#) [↑] (standing to sue is preliminary matter to be evaluated upon allegations of complaint).²⁴ According to the complaint, FRI engages in two businesses relevant to our inquiry. FRI is:

A large producer of construction aggregate and sand used in the manufacturing of asphalt and also used in roadbuilding, construction fill and the manufacture of concrete in Florida.
....

Likewise, in addition to owning and operating aggregate and sand mines in Florida, the defendant, FRI, through majority stock interests, controls a significant portion of the hauling industry in Florida; specifically, the aggregate, sand and construction materials hauling business. Upon information and belief, plaintiff says that the defendant, FRI, controls approximately 35% of the hauling industry described above in Florida.

Record at 4.

[\[**26\]](#) The complaint describes FRI's alleged anticompetitive actions:

The nature of the economic coercion alleged herein essentially took the form of threatening [sic] to cut off the sale and supply of mined aggregate materials to such hauling customers unless they agreed to contract for the hauling of such products only from those aggregate haulers owned or controlled by the defendant FRI.
....

With respect to Basic Asphalt, agents or employees of the defendant FRI coerced Basic Asphalt into a contract, combination or conspiracy to terminate the then extant business relationship between the plaintiff and Basic Asphalt.

Record at 5-6.

CAT's standing argument apparently is two-fold. First, it argues that because FRI competes for the aggregate hauling business in Central Florida through its wholly owned subsidiary Florida Rock and Tank Lines, Inc. ("Tank Lines") then the relevant sector of the market affected by FRI's acts was the aggregate hauling industry.²⁵ Secondly, CAT argues that because its unique operation made possible the marketing of Miami stone in the Orlando area, its operation was an essential aspect of the aggregate production industry.

[\[**27\]](#) FRI contends that any alleged coercion was aimed at the competition in aggregate production and not in aggregate hauling. Thus, FRI argues that insofar as its acts were aimed at eliminating competition from Rinker's Miami stone mines, the sector of the market affected was the *production* of stone aggregate used in the Florida construction industry.

In our view, FRI characterizes CAT's allegations much too narrowly. The complaint clearly alleges that FRI attempted to eliminate competition from CAT in the aggregate hauling industry. According to the complaint, therefore, one area of the market that would be adversely affected by the alleged conduct of FRI would be the aggregate hauling industry. CAT clearly operated within this market; examination of the complaint thus demonstrates CAT's standing to challenge FRI's alleged anticompetitive behavior.

was "within that area of the economy . . . endangered by [the] breakdown of competitive conditions," however, *id.* at [102 S. Ct. at 2549, 73 L. Ed. 2d at 162](#), the Court implicitly sanctioned continued, flexible use of the "target area" test.

²⁴ [HNS](#) [↑] Ultimate proof of injury in fact is not required in order for a plaintiff to have standing to sue. [Yoder Brothers, Inc. v. California-Florida Plant Corp., 537 F.2d at 1360 n. 6](#). Otherwise, preliminary litigation over the threshold question of standing would result in a "trial on the merits."

²⁵ In 1979, Tank Lines owned and operated approximately 350 aggregate trucks in the state of Florida, which generated revenues of about \$10-12 million. Record at 1558-59.

FRI's contentions, however, appear to rest on two implicit assumptions which should be addressed. First, FRI contends that the evidence introduced at trial belies CAT's claim that the target market was the [*764] hauling industry. Rather, FRI suggests, the proof at trial indicated that the target market was the aggregate production [**28] industry. As we noted earlier, however, "standing to sue is a preliminary matter, to be evaluated upon the allegations of the complaint." [*Yoder Brothers, Inc. v. California-Florida Plant Corp., 537 F.2d at 1359.*](#) Even were we to go beyond the face of the complaint, we would disagree with FRI's contention. On the one hand, Mr. Hallowell's testimony, described earlier, does suggest that the precise target of FRI's coercion was competition from Rinker's Miami stone mines. Testimony by Walter McFall, the FRI agent who allegedly coerced Basic, suggests a different conclusion. Although McFall denied having threatened to cut off Basic's allocation of FRI rock, he did give his version of a conversation which occurred between himself and Jake Scherf, vice president in charge of production at Basic. According to McFall, CAT's hauling to Basic, and not the source of the rock being hauled, was the starting point for the conversation.²⁶ Thus, the record actually developed at trial is not conclusive, and suggests that both the aggregate production and the aggregate hauling industries were potential targets of FRI's acts.

[**29] This ambiguity in the testimony is related, in our view, to the second assumption implicit in FRI's argument: that only one discrete sector of the market may be the target for a particular anticompetitive act. Nothing in our cases, however, requires such a narrow interpretation of the target area test. In fact, the Supreme Court recently sanctioned an analysis of standing which expressly recognizes that different areas of the market may be so closely related that both may be targets of the same anticompetitive act. See [*Blue Shield of Virginia v. McCready, 457 U.S. 465, 102 S. Ct. 2540, 73 L. Ed. 2d 149 \(1982\).*](#)

Our analysis of standing is aimed at determining whether the plaintiff's injuries are merely indirect, secondary, or remote, [id. at 476-81, 102 S. Ct. at 2547-49, 73 L. Ed. 2d at 159-62;](#) its purpose is to ensure against potentially disastrous recoveries by those only tenuously harmed. [*Jeffrey v. Southwestern Bell, 518 F.2d at 1131.*](#) Few of the cases cited by FRI involve an anticompetitive act aimed at either or both of two closely related markets in which the defendant is engaged.²⁷ FRI, however, clearly has an economic [**30] interest in two separate markets: the construction aggregate [*765] production industry and the construction aggregate hauling industry. While these markets might generally be viewed as separate for most purposes, in the specific context of this case they are not. Even if FRI's conduct was aimed most directly at restraining competition for the production of aggregate, FRI must

²⁶ McFall testified as follows:

Well, I went in to talk to Jake as I do periodically, and I asked Jake the question. I said, "Jake, is it true that Construction Aggregate is hauling materials into your operation?" And Jake's answer was yes. He said they have hauled a few loads of material in here. And my next question to Jake is, "Is the material working out for you?" And Jake kind of nodded his head and said, "Not too well." I said, "Jake," I said, "You know our problems that we are having at Brooksville as far as the stockpiles of materials there. And you and I have discussed many times in the past about keeping your stockpile of material up." And Jake said, "I know that." "The only thing I can suggest to you is if you use a load of material or three loads a day, I would certainly replenish that material each day so that stockpile would not go down." I said, "Because at the quarry at Brooksville, if your stockpile should go down and you should need a large quantity of material say in the neighborhood of 40, 50, 60 loads in a short period of time, in a day or two period of time," I said, "Due to our stockpile conditions at Brooksville, I don't know whether we will be able to get you that large quantity of material or not."

Record at 1536-37.

²⁷ This is not a case like [*Associated Radio Service Co. v. Page Airways, Inc., 624 F.2d 1342 \(5th Cir. 1980\), cert. denied, 450 U.S. 1030, 101 S. Ct. 1740, 68 L. Ed. 2d 226 \(1981\)*](#), in which the relationship between the plaintiff and the defendant was purely vertical in market terms. In *Page*, a supplier of Grumman Avionics equipment sued an installer of that equipment for attempting to drive out another installer. Thus, there was no direct competition between the plaintiff and the defendant. The only market in which the defendant had an interest in restraining competition was the installation of avionics equipment. Therefore, it was most appropriate in *Page* to allow a direct competitor of the defendant to attempt to vindicate the interests which underlie antitrust enforcement. [624 F.2d at 1362-63;](#) see [*Associated General Contractors of California, Inc. v. California State Council of Carpenters, supra, U.S. at - , 103 S. Ct. at 910-11, 74 L. Ed. 2d at 740-41.*](#)

have foreseen that the direct effect of such a restraint would be to eliminate an innovative competitor from the field of aggregate hauling -- a field in which FRI through its wholly owned subsidiary, Tank Lines, was a dominant factor.

[**31] The Supreme Court's recent decision in *Blue Shield of Virginia v. McCready, supra*, provides strong support for our position. In *McCready*, a Blue Cross subscriber denied reimbursement for the costs of treatment by a psychologist brought a § 1 claim against her insurer, whose policy it was to reimburse costs incurred only during treatment by a psychiatrist. Although acknowledging that the apparent goal of the conspiracy was to restrict competition by psychologists, the Court nonetheless held that the subscriber had standing to sue. First, the Court looked to the "physical and economic nexus" between the violation and the harm to the plaintiff:

The harm to McCready and her class was clearly foreseeable; *indeed, it was a necessary step in effecting the ends of the illegal conspiracy*. Where the injury alleged is so integral an aspect of the conspiracy alleged, there can be no question but that the loss was precisely "the type of loss that the claimed violations . . . would be likely to cause."

Id. at 479, 102 S. Ct. at 2549, 73 L. Ed. 2d at 161 (emphasis added) (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc.*, 429 U.S. 477, 489, 97 S. Ct. 690, 697, 50 L. Ed. 2d 701 (1977)). [**32] Next, the Court turned to an examination of the relationship between the injury alleged and those injuries about which Congress was concerned when it provided private remedies under § 4 of the Clayton Act. Again, the Court focused on the inextricable relationship between the competitive injury the conspirators sought to inflict -- elimination of the psychologists as Blue Cross competitors -- and the injury suffered by the subscriber -- increased costs for psychologists' services. *457 U.S. at 483, 102 S. Ct. at 2550-51, 73 L. Ed. 2d at 163-64*. In our view, it is particularly significant that the Court recognized that *HN7* [↑] the "target area" test does not require a conspiratorial purpose to injure the *particular individual bringing suit*. *Id. at 479 n. 15, 102 S. Ct. at 2548 n. 15, 73 L. Ed. 2d at 161 n. 15*.

In the instant case, and on the basis of the Court's reasoning in *McCready*,²⁸ we cannot say that CAT's injury was too "fortuitous," "incidental," or "remote" to allow for a § 4 action. Rather, whatever the specific motivation behind FRI's act, injury [**33] to the aggregate hauling industry, and hence CAT, was a necessary step. Indeed, that FRI's subsidiary, Tank Lines, competed with CAT for the aggregate hauling business in Florida strongly suggests that FRI's goal was the elimination of CAT. Thus, the evidence supports the conclusion that the aggregate hauling industry in Florida was a sector of the economy which was endangered by a breakdown of competitive [*766] conditions. See *Yoder Brothers, Inc. v. California-Florida Plant Corp.*, 537 F.2d at 1359-61 (suit allowed by distributor of restricted product where more than one area of economy affected); *Tugboat, Inc. v. Mobile Towing Co.*, 534 F.2d at 1176-78 (union had standing to challenge anticompetitive behavior by owners of tugboats attempting to monopolize tugboat industry).

[**34] III. SUBJECT MATTER JURISDICTION

²⁸ Recently, the Supreme Court further refined the standing analysis used in *McCready*. In *Associated General Contractors of California, Inc. v. California State Council of Carpenters, supra*, a union alleged that members of a contractors' trade association coerced member and nonmember contractors and landowners to give some of their business to nonunion contracting firms, thereby injuring unionized firms, as well as the business activities of the unions. In denying the union standing, the Court examined the following factors: (1) the causal connection between the alleged violation and the injury to the plaintiff; (2) the intent to cause harm to the plaintiff; (3) the nature of the injury, i.e., whether the plaintiff was either a consumer of the defendants' goods or a competitor of the defendants; and (4) the directness of the injury. The Court concluded that the plaintiff union was neither a consumer nor a competitor of the defendants; in particular, the Court noted that "the existence of more direct victims of the alleged conspiracy" (unionized firms) should ensure adequate protection of the markets *directly involved*. Finally, the Court found it significant that the type of harm allegedly suffered by the union was more clearly the concern of the labor laws. In our view, *Associated General Contractors* does not alter our conclusion.

FRI next contends that the trial court lacked subject matter jurisdiction because CAT failed to demonstrate the necessary restraint on interstate commerce. [HN8](#)²⁸ Absent an adequate showing by the plaintiff that the defendants' conspiracy will result "in restraint of trade or commerce among the several states," [15 U.S.C.A. § 1](#), the plaintiff's claim must be dismissed.

It is well established that [HN9](#)²⁹ jurisdiction under the Sherman Act does not require that the activities in question actually occur in interstate commerce. See [McLain v. Real Estate Board of New Orleans](#), [444 U.S. 232, 241, 100 S. Ct. 502, 508, 62 L. Ed. 2d 441 \(1980\)](#); [Brett v. First Federal Sav. & L. Ass'n](#), [461 F.2d 1155, 1157 \(5th Cir.1972\)](#). Rather, the reach of the Sherman Act is coextensive with Congress' power under the [Commerce Clause](#). See [McLain v. Real Estate Board of New Orleans](#), [444 U.S. at 241, 100 S. Ct. at 508](#); [United States v. Southeastern Underwriters Ass'n](#), [322 U.S. 533, 558, 64 S. Ct. 1162, 1176, 88 L. Ed. 1440 \(1944\)](#); [\[**35\] United States v. Cargo Service Stations Inc.](#), [657 F.2d 676, 679-80 \(5th Cir.1981\)](#), cert. denied, [455 U.S. 1017, 102 S. Ct. 1712, 72 L. Ed. 2d 135 \(1982\)](#); [Chatham Condominium Ass'n v. Century Village, Inc.](#), [597 F.2d 1002, 1007-08 \(5th Cir.1979\)](#).²⁹ The cases establish that the Sherman Act was intended to reach activities that "while wholly local in nature, nevertheless substantially affect interstate commerce." [McLain v. Real Estate Board of New Orleans](#), [444 U.S. at 241, 100 S. Ct. at 508](#) (emphasis added). [HN10](#)³⁰ The jurisdictional requirement of the Sherman Act may therefore be satisfied by proving either that the business activities occurred in commerce or that those activities had an effect on commerce. [Id. at 242, 100 S. Ct. at 509](#). "If it is interstate commerce that feels the pinch, it does not matter how local the operation which applies the squeeze." [United States v. Women's Sportswear Association](#), [336 U.S. 460, 464, 69 S. Ct. 714, 716, 93 L. Ed. 805 \(1949\)](#); see [Hospital Building Co. v. Trustees of the Rex Hospital](#), [425 U.S. 738, 743, 96 S. Ct. 1848, 1851, 48 L. Ed. 2d 338 \(1976\)](#); [\[**36\] Gulf Oil Corp. v. Copp Paving Co.](#), [419 U.S. 186, 195, 95 S. Ct. 392, 398, 42 L. Ed. 2d 378 \(1974\)](#).³⁰

[**37] The plaintiff, CAT, is a Florida corporation engaged in business only within the state of Florida. Materials hauled by CAT originated in Florida rock and sand mines, and were delivered to Florida customers for use in construction projects within the state of Florida. The defendant, FRI, also is a Florida corporation, listed on the American Stock Exchange, which also engages in purely intrastate business. FRI produces sand and construction aggregate which are used in the manufacturing of concrete and asphalt. The record does not demonstrate the existence of any customers of either FRI or Basic in states other than Florida. Thus, it is clear that the "in commerce" or "flow of commerce" theory of jurisdiction is [\[*767\]](#) not available to CAT. Rather, CAT must rely on the "affecting commerce" branch of Sherman Act jurisdiction.

In [McLain v. Real Estate Board of New Orleans, supra](#), the Supreme Court discussed at length the appropriate analysis [HN13](#)³¹ under the "affecting commerce" test. "It is not sufficient merely to rely on identification of a relevant local activity and [\[**38\]](#) to presume an interrelationship with some unspecified aspect of interstate commerce." [444 U.S. at 242, 100 S. Ct. at 509](#). Rather, the plaintiff must allege and prove that the relevant local activity "has an effect on some other appreciable activity demonstrably in interstate commerce." [Id.](#) Further, the plaintiff must demonstrate that the local activities "as a matter of practical economics" have a not insubstantial effect on the interstate commerce involved. [Id. at 242-46, 100 S. Ct. at 509-11](#). See also [Hospital Building Co. v.](#)

²⁹ As we have stated:

[HN11](#)³² any challenge to subject matter jurisdiction in a Sherman Act case is necessarily resolved by answering the following question: Can Congress prohibit the challenged conduct under the [Commerce Clause](#)? If so, then the conduct is within the jurisdictional reach of the Sherman Act.

[Chatham Condominium Ass'n v. Century Village, Inc.](#), [597 F.2d at 1008](#).

³⁰ It is also well established that [HN12](#)³³ the existence or absence of an intent to affect interstate commerce is not dispositive when determining subject matter jurisdiction under the Sherman Act. See [Hospital Building Co. v. Trustee of the Rex Hospital](#), [425 U.S. at 744-45, 96 S. Ct. at 1852](#). Neither is it necessary to prove that the antitrust violation itself affected commerce. See [Western Waste Serv. v. Universal Waste Control](#), [616 F.2d 1094, 1097 \(9th Cir.\)](#), cert. denied, [449 U.S. 869, 101 S. Ct. 205, 66 L. Ed. 2d 88 \(1980\)](#).

Trustees of the Rex Hospital, 425 U.S. at 743-47, 96 S. Ct. at 1851-53; Gulf Oil Corp. v. Copp Paving Co., 419 U.S. 202, 95 S. Ct. at 402.³¹

[**39] In our view, CAT introduced substantial evidence of its relationship with interstate markets. For example, the steel used to fabricate the trailers purchased by [*768] CAT was fabricated in Pennsylvania.³² The mechanism used to connect CAT's double trailers, called a "fifth wheel" or "dolly," was produced in Holland, Michigan. Further, the purchase of trailers by CAT was financed by the Ford Motor Credit Co., a national corporation. See McLain v. Real Estate Board of New Orleans, 444 U.S. at 245, 100 S. Ct. at 510; Hospital Building Co. v. Trustees of the Rex Hospital, 425 U.S. at 743-45, 96 S. Ct. at 1851-52; United States v. Employing Plasterers Ass'n, 347 U.S. 186, 187-88, 74 S. Ct. 452, 453, 98 L. Ed. 618 (1954); Heille v. City of St. Paul, 671 F.2d 1134, 1136-37 (8th Cir.1982); Western Waste Serv. v. Universal Waste Control, 616 F.2d 1094, 1097 (9th Cir.), cert. denied, 449 U.S. 869, 101 S. Ct. 205, 66 L. Ed. 2d 88 (1980). Finally, the two tractors purchases by CAT to haul its double trailers were manufactured out of state by International Harvester. See [**40] Appellant's Brief, at 26; Record at 1034-38. Plaintiff's exhibit number 11 demonstrates that the sale of these tractors was financed by the International Harvester Credit Corporation pursuant to a retail contract between IHCC and CAT. This exhibit, a notice of repossession and private sale, originated in IHCC's Atlanta office. See Brett v. First Federal Sav. & L. Ass'n, 461 F.2d at 1157.

³¹ In *McLain*, the Court referred generally to the local activities of the defendant. Thus, *McLain* can be read as limiting our inquiry to the relationship between relevant local activities of the defendant and interstate commerce. See Western Waste Serv. v. Universal Waste Control, 616 F.2d at 1097 n. 2 (focus of inquiry is on defendant's business). In our view, such an analysis is too restrictive, and is not supported by the case law. First, *McLain* involved plaintiffs who were consumers rather than businesses. See also Chatham Condominium Ass'n v. Century Village, Inc., 597 F.2d 1002, 1005-10 (5th Cir.1979); City of Fort Lauderdale v. East Coast Asphalt Corp., 329 F.2d 871, 872-73 (5th Cir.), cert. denied, 379 U.S. 900, 85 S. Ct. 187, 13 L. Ed. 2d 175 (1964); cf. United States v. Employing Plasterers Ass'n, 347 U.S. 186, 189, 74 S. Ct. 452, 454, 98 L. Ed. 618 (1954) (criminal prosecution); United States v. Cargo Service Stations, Inc., 657 F.2d 676, 678 (5th Cir.1980) (same), cert. denied, **455 U.S. 1017, 102 S. Ct. 1712, 72 L. Ed. 2d 135 (1982)**. In such cases there will be little alternative to concentrating on the defendant's activities.

More importantly, however, the antitrust laws are concerned primarily with the integrity of interstate markets. The starting place for analysis, therefore, is the relationship between the defendant's business and interstate markets, in particular the effect the defendant's business will have on those markets. Most often this effect will be readily apparent because the defendant engages directly in interstate commerce, and any restrictive conduct has an immediate impact on the particular goods or services involved. See Kypta v. McDonald's Corp., 671 F.2d 1282 (11th Cir.), cert. denied, 459 U.S. 857, 103 S. Ct. 127, 74 L. Ed. 2d 109 (1982). Beginning the inquiry with an examination of the defendant's activities, however, does not mean that the plaintiff's relationship with interstate markets is irrelevant. Occasionally the relationship between the defendant and interstate commerce becomes apparent only by examining the relationship between the defendant and other businesses. Hypothetically, a business engaged in purely intrastate commerce could restrain trade in interstate commerce through its local conduct with regard to businesses that enjoy substantial ties to interstate commerce. Thus, when determining whether interstate commerce is affected by an alleged violation courts will often examine both the defendant's relationship with interstate markets and the plaintiff's. Such an approach makes good sense because injury to the plaintiff may result directly in injury to the market. See, e.g., Hospital Building Co. v. Trustees of the Rex Hospital, 425 U.S. 738, 741, 96 S. Ct. 1848, 1850, 48 L. Ed. 2d 338 (1976) (local actions by defendants to block relocation of hospital adversely affects interstate commerce with regard to medicines and supplies purchased by hospital); Lehrman v. Gulf Oil Corp., 464 F.2d 26, 34-35 (5th Cir.) (demise of plaintiff's business had impact on interstate flow of goods he would have sold) (alternative holding), cert. denied, **409 U.S. 1077, 93 S. Ct. 687, 34 L. Ed. 2d 665 (1972)**; Heille v. City of St. Paul, 671 F.2d 1134, 1137 (8th Cir.1982) (examining both plaintiff's and defendant's use of goods manufactured out-of-state); Turf Paradise, Inc. v. Arizona Downs, 670 F.2d 813, 819 (9th Cir.1980) (examining, *inter alia*, plaintiff's relationship with out-of-state corporations), cert. denied, **456 U.S. 1011, 102 S. Ct. 2308, 73 L. Ed. 2d 1308 (1982)**. See generally, I E. Kintner, Federal Antitrust Law § 6.5, at 294 n. 41 (1980); I P. Areeda & D. Turner, Antitrust Law para. 232, at 234 (1978) (necessary relationship between defendant and interstate commerce may "consist in injuring plaintiffs who purchase supplies from interstate markets"). In our view, therefore, the proper inquiry is one which focuses on the interstate markets involved in both the defendant's and the plaintiff's operations, and seeks to determine whether the defendant's business conduct will likely make its presence known in those markets.

³² Moreover, the company which manufactured CAT's trailers was a division of an international corporation. Record at 1046-47.

The foregoing evidence demonstrates that the local conduct of the defendant with regard to the plaintiff will have a substantial effect on interstate markets. In particular, we note that at the time that CAT ceased operations it possessed but two tractors and three sets of double trailers. As envisioned, however, CAT ultimately would have had a need for at least 20 trailer units as well as a corresponding number of tractors with which to haul those units, and the financing with [**41] which to purchase the tractors and trailers. If FRI was indeed responsible for the demise of CAT, then it necessarily follows that FRI is equally responsible for the decrease in demand for the tractors and trailers which CAT would have consumed. In our view, this presents the likelihood of a not insubstantial effect on interstate commerce. See [*Hospital Building Co. v. Trustees of the Rex Hospital, 425 U.S. at 743-46, 96 S. Ct. at 1851-53*](#) (defendants' efforts to block relocation of plaintiff hospital adversely affects interstate commerce with regard to medicines and supplies purchased by hospital); [*Western Waste Serv. v. Universal Waste Control, 616 F.2d at 1097.*](#)

In addition to the foregoing argument, CAT has pursued a second theory of jurisdiction. According to CAT's complaint:

Florida Rock and its subsidiaries currently have gross sales of more than \$90 million, a substantial amount of which consisted of sales of concrete, concrete products, sand, aggregate, road base materials, and hauling services used in the construction of roads, highways, airports and intercoastal waterways in Florida and other states, used in interstate travel [**42] and commerce. Monies used in the purchase of such products and materials for construction of roads, highways, and airports are, in large part, Federal funds, collected and redistributed in interstate commerce. Sales of Florida Rock products, and utilization of said materials and services, have a direct, substantial effect upon interstate commerce.

Record at 2. Thus, CAT argues that the use of FRI's products in instrumentalities of interstate commerce gives rise to jurisdiction under the Sherman Act. Further, at trial there was testimony that FRI's co-conspirator, Basic, had since 1978 been a supplier of construction materials for federally funded road projects. Record at 1553-54. In addition, CAT introduced uncontested evidence that it had transported to an asphalt plant in Florida rock that ultimately was used in the construction of Interstate 95. Finally, rock hauled by CAT to Southern Paving was used in the construction of Orlando International Airport. Record at 1275-76. Thus, the evidence demonstrates that the defendant and the plaintiff [*769] engage in the production and transportation of materials which are necessary components of instrumentalities [**43] of interstate commerce.

In other statutory contexts, the Supreme Court has relied upon this "instrumentalities" theory to uphold the scope of Congress' regulatory enactments. See [*Mitchell v. C.W. Vollmer & Co., 349 U.S. 427, 428-30, 75 S. Ct. 860, 861-62, 99 L. Ed. 1196 \(1954\)*](#) (repair of facilities of interstate commerce is activity in commerce within meaning of Fair Labor Standards Act); [*Alstate Construction Co. v. Durkin, 345 U.S. 13, 15-16, 73 S. Ct. 565, 566-67, 97 L. Ed. 745 \(1953\)*](#) (production of road surfacing products for local use in interstate highways constitutes interstate commerce because of relationship to instrumentality or facility of commerce). See also [*City of Fort Lauderdale v. East Coast Asphalt Corp., 329 F.2d 871, 873 \(5th Cir.\)*](#) (conspiracy to fix prices of materials used in construction of interstate highways has necessary effect on commerce under Sherman Act), cert. denied, 379 U.S. 900, 85 S. Ct. 187, 13 L. Ed. 2d 175 (1964). Because the Sherman Act sweeps as broadly as the [*commerce clause*](#) allows, CAT's argument would seem to have merit.

Both parties, however, have devoted much attention [**44] to the Supreme Court's decision in [*Gulf Oil Corp. v. Copp Paving Co., supra*](#). Copp had its genesis in the Ninth Circuit's decision in [*In re Western Liquid Asphalt Cases, 487 F.2d 202 \(9th Cir. 1973\)*](#). In the Asphalt Cases, the plaintiffs, processors of asphaltic concrete, brought claims against producers of asphaltic oil under §§ 1 and 2 of the Sherman Act, §§ 3 and 7 of the Clayton Act, [*15 U.S.C.A. §§ 14 & 18 \(West Supp. 1983\)*](#), and § 2(a) of the Robinson-Patman Price Discrimination Act, [*15 U.S.C.A. § 13\(a\) \(West Supp. 1983\)*](#). The Ninth Circuit analogized the case to [*Alstate Construction Co. v. Durkin, supra*](#), in which the Supreme Court held that businesses engaged in the local production of road surfacing products for local use in interstate highways were operating in commerce because of their relationship to an instrumentality or facility of interstate commerce. See [*487 F.2d at 205*](#). After concluding that the production of materials used in the construction of interstate highways was "in commerce" for purposes of the Sherman Act, the Ninth Circuit went on

to hold that [**45] the same activities also were in commerce for purposes of the Robinson-Patman and Clayton Acts. See *id. at 206*. In granting certiorari, the Supreme Court limited its inquiry to whether jurisdiction was established under the Robinson-Patman and Clayton Acts. See [419 U.S. at 193, 95 S. Ct. at 397](#). Significantly, the Robinson-Patman Act and §§ 3 and 7 of the Clayton Act contain jurisdictional language that, read literally, is much narrower than that contained in the Sherman Act; each provision restrains the anti-competitive conduct only of persons "engaged in commerce." See generally Comment, 21 Vill.L. Rev. 721 (1976) (discussing jurisdictional elements under the various antitrust acts). In reversing the Ninth Circuit's finding of subject matter jurisdiction under the Robinson-Patman and Clayton Acts, the Court held that only anticompetitive action actually occurring "within the flow of interstate commerce" is actionable. [419 U.S. at 195, 95 S. Ct. at 398](#). The Court thus disavowed the Ninth Circuit's use of a test focusing on the relationship of the defendant's activities to an instrumentality of interstate commerce.

[**46] FRI admits that technically the Court's holding was limited to the narrower bases for subject matter jurisdiction which exist under the Robinson-Patman Act and §§ 3 and 7 of the Clayton Act. The Court clearly was concerned with Congress' *intent* when utilizing the "in commerce" language in those provisions. The Court cautioned that the plaintiff:

would have us expand the concept of the flow of commerce by incorporating categories of activities that are perceptibly connected to its instrumentalities. But whatever merit this categorical inclusion-and-exclusion approach may have when dealing with the language and purposes of other regulatory enactments, it does not carry over to the context of the Robinson-Patman and Clayton Acts. The chain of connection has no logical end [**770] point. The universe of arguably included activities would be broad and its limits nebulous in the extreme More importantly, to the extent that those limits could be defined at all, the definition would in no way be anchored in the economic realities of interstate markets, the intensely practical concerns that underlie the purposes of the antitrust laws.

In short, assuming, arguendo, [**47] that the

facially narrow language of the Clayton and Robinson-Patman Acts was intended to denote something more than the relatively restrictive flow of commerce concept, we think the nexus approach would be an irrational way to proceed. The justification for an expansive interpretation of the "in commerce" language, if such an interpretation is viable at all, *must rest on a congressional intent that the acts reach all practices, even those of local character, harmful to the national marketplace*.

Id. at 198-99, 95 S. Ct. at 400 (emphasis added). However, as the Supreme Court has made clear, just such an expansive interpretation was intended by Congress under the Sherman Act. See *Hospital Building Co. v. Trustees of the Rex Hospital*, [425 U.S. at 743 n. 2, 96 S. Ct. at 1852 n. 2](#) (decisions by Court have permitted reach of Sherman Act to expand along with expanding notions of Congressional power); *Alstate Construction Co. v. Durkin*, [345 U.S. at 14-16, 73 S. Ct. at 566-567](#).

FRI argues, however, that the Court's reasoning necessarily implicates jurisdiction under the Sherman Act because the Court counseled [**48] against relying on "nominal connections between commerce and activities that may have no significant economic effect on interstate markets." [419 U.S. at 199, 95 S. Ct. at 400](#). During the course of its ruling, the Court clearly dismissed the instrumentality theory as a basis for satisfying the "in commerce" language of the Robinson-Patman Act and §§ 3 and 7 of the Clayton Act. Nonetheless, the impact of *Copp* on Sherman Act jurisdiction is far from clear. Without deciding whether §§ 3 and 7 of the Clayton Act would admit of an "affecting commerce" theory the Court declared that effects on commerce could *not be presumed* from the mere use of materials in the production of instrumentalities of commerce. *Id. at 202, 95 S. Ct. at 402*. This holding, though technically limited to §§ 3 and 7 of the Clayton Act, casts some doubt on reliance on a relationship to instrumentalities of commerce under the Sherman Act. It casts some doubt on what would otherwise seem to be a logical approach in applying the "affecting commerce" theory in the Sherman Act context, namely to consider

effects on interstate instrumentalities as one kind of effect on commerce; or **[**49]** in other words to consider the instrumentalities theory as a subset of the "affecting commerce theory."³³

[50]** Whether or not *Copp* places limits on a litigant's ability to claim jurisdiction under the Sherman Act through relationships to **[*771]** instrumentalities of interstate commerce is, in the last analysis, not necessary to resolve this case.³⁴ As we concluded above, CAT sufficiently demonstrated an effect on commerce by virtue of injury to interstate markets resulting from the defendant's alleged activities. We thus proceed to the merits of this dispute.

[51] IV. PER SE OR RULE OF REASON**

FRI's next contention is that the trial court erred in submitting this case to the jury under a theory of per se illegality.³⁵ **[**52]** The complaint reveals that CAT's theory of liability was that FRI and Basic created and enforced a boycott

³³ The movement of people has long been held to constitute commerce. Thus, businesses lying near interstate highways and serving interstate customers have the effect on commerce necessary to invoke jurisdiction under the Sherman Act. See *United States v. Cargo Service Stations*, 657 F.2d at 680, and cases cited therein. Obviously, the movement of people interstate, as well as the movement of goods in commerce, depends upon the elimination of impediments to that movement. Such impediments may consist of a scarcity of businesses serving interstate movement, e.g., gasoline stations and motels; see *id.*; they may also consist of conditions which physically restrict such travel in a more direct way, such as the absence or destruction of the means of travel.

On the other hand, earlier Supreme Court cases determining whether Congress could regulate those engaged in the production of instrumentalities of commerce were concerned with statutes referring to those "engaged in commerce" or "engaged in the production of goods for commerce." See e.g., *Alstate Construction Co. v. Durkin*, 345 U.S. 13, 73 S. Ct. 565, 97 L. Ed. 745 (1952); *Overstreet v. North Shore Corp.*, 318 U.S. 125, 63 S. Ct. 494, 87 L. Ed. 656 (1943); *Pedersen v. Delaware, Lackawanna & West. R.R.*, 229 U.S. 146, 33 S. Ct. 648, 57 L. Ed. 1125 (1913). This suggests that technically the "instrumentalities" theory is the offspring of the older "flow of commerce" theory. See *Thornhill Pub. Co. v. General Tel. & Electronics*, 594 F.2d 730, 737 (9th Cir. 1979) (treating "instrumentalities" theory as a type of "in commerce test").

³⁴ It is worth noting that two well-known authorities have stated their reluctance to believe that the Supreme Court intended to narrow the scope of the Sherman Act, particularly in light of the Court's subsequent decision in *Hospital Building Co. v. Trustees of the Rex Hospital*, 425 U.S. 738, 96 S. Ct. 1848, 48 L. Ed. 2d 338 (1976). Indeed, they point out that rarely has the Court required anything more than a reasonable presumption that certain activities affect interstate commerce. See I P. Areeda & D. Turner, *supra* note 31, para. 232, at 237-41. Moreover, *Copp* may represent no more than a deferential treatment of the district court's finding on that particular record of no substantial impact on interstate commerce. *419 U.S. at 202-03, 95 S. Ct. at 402*.

However, the only other court to address a Sherman Act instrumentalities claim since *Copp* has expressed reluctance to apply the instrumentality theory to find the necessary effect on commerce to support Sherman Act jurisdiction. See *Thornhill Pub. Co. v. General Tel. & Electronics*, 594 F.2d at 737.

³⁵ The trial court instructed the jury in part as follows:

There are four essential elements which the plaintiff must prove by a preponderance of the evidence in order to establish its claim under the Sherman Act, that is this provision of the **antitrust law** as follows: First, that there was a combination or a conspiracy between the defendant, Florida Rock Industries, and the Basic Asphalt Company to put the plaintiff out of the business. And that would be complied with if that occurred even though Basic Asphalt was nonwilling or a reluctant party to that particular agreement. But unless the plaintiff proves that, it cannot recover. Next, it must prove that such a combination or conspiracy constituted an unreasonable restraint on interstate commerce as hereafter defined.

* * * *

The second element which plaintiff must prove to establish his claim is that the alleged threatened activity amounted to an unreasonable restraint [sic] trade. Not all restraints of trade are unreasonable. All business agreements restrain trade in some way. But only unreasonable restraints are illegal.

aimed at driving the plaintiff out of business. Record at 6. At the charge conference conducted by the trial court, CAT thus argued that the case should be submitted to the jury under an instruction on per se illegality; under such an instruction CAT would not need to prove an anticompetitive effect in a relevant product and geographic market. See [Muenster\[*772\] Butane, Inc. v. Stewart Co., 651 F.2d 292, 295 \(5th Cir. 1981\) HN14](#) [↑] (under rule of reason plaintiff must demonstrate anticompetitive effect in relevant market). Rather, the finding by the jury that FRI conspired with Basic to terminate CAT's services would suffice to support a verdict against FRI.³⁶

FRI, on the other hand, submits that this case involves, at most, either an exclusive dealing arrangement between Basic and FRI or a requirements contract whereby Basic agreed to purchase all of its rock supplies from FRI. Incidental to such an agreement would be the termination of CAT's services as a transporter of rock from Rinker's competing mines in the Miami area. Under either of these theories a rule of reason instruction would have been required.

Since [Standard Oil Co. v. United States, 221 U.S. 1, 31 S. Ct. 502, 55 L. Ed. 619 \(1911\)](#), [*53] the Sherman Act [HN15](#) [↑] prohibition against "every" agreement in restraint of trade has been interpreted by the federal courts to forbid only "unreasonable restraints." [Id. at 59-60, 31 S. Ct. at 515](#); see [United States v. Realty Multi-List, Inc., 629 F.2d 1351, 1362 \(5th Cir. 1980\)](#). However, in *Standard Oil* as well as subsequent cases the Supreme Court has declared some restraints "inherently unreasonable" or "per se unlawful." Thus:

there are certain agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use.

[Northern Pacific Ry. Co. v. United States, 356 U.S. 1, 5, 78 S. Ct. 514, 518, 2 L. Ed. 2d 545 \(1958\)](#); See [Continental TV v. GTE Sylvania, Inc., 433 U.S. 36, 50, 97 S. Ct. 2549, 2557, 53 L. Ed. 2d 568 \(1977\)](#). The Supreme

In sum and substance, I would suggest that you consider these questions. First, was the plaintiff, that is CAT, forced out of business because it lost the Basic Asphalt Company account? Now, if your answer to this question is no, you would cease your deliberations and promptly give a verdict for the defendant.

Now, if your answer to that question is yes, then did Basic Asphalt terminate the plaintiff because Florida Rock Industries threatened to cut off Basic Asphalt's allocation of aggregate unless it terminated the plaintiff? If your answer to this question is no, again you would cease your deliberations and return a verdict for the defendant.

If your answer is yes, then did the fact that the plaintiff was forced out of business have a not insubstantial adverse affect upon interstate commerce by lessening competition or any other way? Now, if your answer to this is no, then again you must cease your deliberations and return a verdict for the defendant.

Record Excerpts at 26-36. Later, the trial court was asked to repeat a portion of its charge:

The Court: All right. First was the plaintiff, Construction Aggregate Transport, Inc. -- is that the correct name?

Mr. Schwartz: Yes sir.

The Court: Forced out of business because it lost the Basic Asphalt Company Account? Next, did Basic Asphalt terminate the plaintiff because Florida Rock Industries threatened to cut off Basic Asphalt's allocation of aggregate unless it terminated the plaintiff? Now, if you answer either of those questions no, that would be the end of the case.

Record Excerpts at 43. The trial court's instructions could have been clearer regarding the particular analysis (per se or rule of reason) being applied. Because the plaintiff did not introduce evidence of the relevant market, the case must be considered submitted under a per se theory. Neither party has argued or assumed otherwise.

³⁶ For general discussions of rule of reason analysis, see [National Soc'y of Professional Eng'rs v. United States, 435 U.S. 679, 687-92, 98 S. Ct. 1355, 1363-65, 55 L. Ed. 2d 637 \(1978\)](#); P. Areeda, The "Rule of Reason" in Antitrust Analysis: General Issues (Federal Judicial Center 1981). For a discussion of the historical development of both per se and rule of reason analysis, see I. E. Kintner, *supra* note 31, §§ 8.2, 8.3, at 350-70.

Court has stressed, however, that [HN16](#) "per se rules of illegality" are appropriate only when they relate to conduct that is manifestly anticompetitive." [433 U.S. at 49-50, 97 S. Ct. at 2557](#).

To date, the rule of per se illegality has been applied to the following types of competitive restraints: horizontal and vertical price fixing agreements, see [United States v. Socony Vacuum Oil Co., 310 U.S. 150, 60 S. Ct. 811, 84 L. Ed. 1129 \(1940\)](#); [Dr. Miles Medical Co. v. John D. Park & Sons Co., 220 U.S. 373, 31 S. Ct. 376, 55 L. Ed. 502 \(1911\)](#); horizontal division of markets between competitors, see [Timken Roller Bearing Co. v. United States, 341 U.S. 593, 71 S. Ct. 971, 95 L. Ed. 1199 \(1951\)](#); tying arrangements, see [Northern Pacific Ry. Co. v. United States, supra](#); and concerted refusals to deal or group boycotts. See [Fashion Originators Guild of America v. FTC, 312 U.S. 457, 61 S. Ct. 703, 85 L. Ed. 949 \(1941\)](#). Proof of the foregoing types of restraints results in automatic condemnation solely because of the obvious restrictive effects on competition. CAT contends that the restraint involved in the case before this court falls within that category [**55](#) of restraints referred to as concerted refusals to deal or group boycotts.³⁷

It is well established that [HN17](#) a merchant, whether he be a manufacturer, distributor, wholesaler, or retailer, may choose with whom he will do business and with whom he will not do business; such action generally does not violate the antitrust laws. Thus, the manufacturer can deal or not deal with customers "for reasons sufficient to itself." [Eastern States Retail Lumber Dealers' Ass'n v. United States, 234 U.S. 600, 614 \[*773\] 34 S. Ct. 951, 955, 58 L. Ed. 1490 \(1914\)](#); [**56 Universal Brands, Inc. v. Philip Morris, Inc., 546 F.2d 30, 33 \(5th Cir.1977\)](#). This sort of arrangement, referred to as "exclusive dealing," does not give rise to antitrust liability without proof of actual competitive injury. Implicit in the freedom to deal exclusively with one merchant, of course, is the freedom to refuse to deal with a competitor of that merchant. Again, such a unilateral exercise of business judgment is free from scrutiny in the absence of proof of competitive harm, or other underlying illegal behavior. See [Packard Motor Car Co. v. Webster Motor Car Co., 100 U.S. App. D.C. 161, 243 F.2d 418, 420 \(D.C.Cir.\), cert. denied, 355 U.S. 822, 78 S. Ct. 29, 2 L. Ed. 2d 38 \(1957\)](#). [HN18](#) When the merchant goes beyond this unilateral choice, however, and combines with other merchants to deal or not to deal only with a specific customer, the legal consequences are vastly different. Such an agreement between independent merchants is known as a "concerted refusal to deal" and is generally subject to the per se rule of illegality. [**57](#) See [Radiant Burners v. Peoples Gas Light & Coke Co., 364 U.S. 656, 81 S. Ct. 365, 5 L. Ed. 2d 358 \(1961\)](#) (per curiam); [Klor's v. Broadway-Hale Stores, 359 U.S. 207, 79 S. Ct. 705, 3 L. Ed. 2d 741 \(1959\)](#); [Fashion Originators Guild v. FTC, supra](#).

CAT contends that this is precisely the type of agreement which was entered into between FRI, the rock supplier, and Basic, the purchaser of the rock. By conspiring not to utilize the services of CAT in hauling aggregate material, FRI and Basic would thus be guilty of a boycott of, or concerted refusal to deal with CAT.

Neither party has been able to bring to our attention a case involving the somewhat unique relationships between supplier, customer and transporter which are present in this case. Nonetheless, in our view the agreement here does not sufficiently resemble those arrangements which have been considered to be illegal per se in other cases. First, it is important to remember that [HN19](#) a concerted refusal to deal essentially is an agreement among two or more parties that each will engage [**58](#) in an individual refusal to deal with a particular customer or customers. In the case before us, however, we have only one business entity refusing to deal with the plaintiff: the ultimate customer of FRI's rock, Basic Asphalt. That FRI may have instigated Basic's refusal to deal does not create the plurality of "refusals" necessary for the arrangement to be called a group boycott. Compare [Radiant Burners v. Peoples Gas Light & Coke Co., 364 U.S. at 659-60, 81 S. Ct. at 367](#) (refusal by association comprised of gas companies and gas burner manufacturers to sell gas to purchasers of plaintiff manufacturer's gas burner was illegal per se as a group boycott); [Klor's, Inc. v. Broadway-Hale Stores, 359 U.S. at 212-13, 79 S. Ct. at 709-10](#) (agreement by manufacturers to sell only to defendant department store and not plaintiff's department store constituted group boycott); [Fashion Originators Guild v. FTC, 312 U.S. at 465-66, 61 S. Ct. at 706](#) (refusal by manufacturers of textiles and original design dresses to sell to retailers purchasing "copycat" designs from

³⁷ These two terms are commonly used interchangeably. See [St. Paul Fire & Marine Ins. Co. v. Barry, 438 U.S. 531, 540-45, 98 S. Ct. 2923, 2929-31, 57 L. Ed. 2d 932 \(1978\)](#); [United States v. Realty Multi-List, Inc., 629 F.2d 1351, 1354 \(5th Cir.1980\)](#); [Bauer, Per Se Illegality of Concerted Refusals to Deal: A Rule Ripe for Reexamination, 79 Colum.L.Rev. 685 n. 5 \(1979\)](#).

competing manufacturers constituted illegal group boycott); *with Abadir & Co. v. First Mississippi Corp.*, 651 F.2d 422, 426-28 (5th Cir. 1981) [**59] (manufacturer's agreement with one dealer not to sell to other dealer did not constitute group boycott); *Red Diamond Supply, Inc. v. Liquid Carbonic Corp.*, 637 F.2d 1001, 1004-07 (5th Cir.) (conspiracy between manufacturer and distributor not to deal with plaintiff distributor did not constitute group boycott), cert. denied, 454 U.S. 827, 102 S. Ct. 119, 70 L. Ed. 2d 102 (1981); *Daniels v. All Steel Equipment, Inc.*, 590 F.2d 111, 113 (5th Cir. 1979); *H. & B. Equipment Co. v. International Harvester*, 577 F.2d 239, 245-46 (5th Cir. 1978); *Oreck Corp. v. Whirlpool Corp.*, 579 F.2d 126, 131-32 (2d Cir.) (en banc) (manufacturer's termination of plaintiff-dealer at behest of competing dealer was not a group boycott), cert. denied, 439 U.S. 946, 99 S. Ct. 340, 58 L. Ed. 2d 338 (1978); *Universal Brands, Inc. v. Philip Morris, Inc.*, 546 F.2d at 33-34 (no per se violation for manufacturer or supplier to agree with distributor to give him exclusive franchise unless part of an illegal boycott); *Packard* [*774] *Motor Car Co. v. Webster Motor Car Co.*, 243 F.2d at 420-21 [**60] (manufacturer's termination of small dealers at request of large dealer was exclusive dealing arrangement and not illegal per se). Thus, [HN20](#)↑ the touchstone of an illegal group boycott or concerted refusal to deal is the agreement between two or more merchants not to deal with another merchant when, in the absence of such an agreement, the conspiring merchants would normally have been free to deal with that merchant.

In the instant case, FRI does not itself arrange for or hire businesses to transport rock from its mines to its customers. Therefore, regardless of whether CAT's termination was the result of an agreement between FRI and Basic, there exists only one refusal to deal: that between Basic and CAT. The foregoing analysis of the alleged arrangement thus suggests that it is much closer to a unilateral refusal to deal. If so, then CAT's allegation of conspiracy between FRI and Basic would be subject to rule of reason analysis. See *Tampa Electric Co. v. Nashville Coal Co.*, 365 U.S. 320, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961); *Standard Oil Co. v. United States*, 337 U.S. 293, 69 S. Ct. 1051, 93 L. Ed. 1371 (1949). [**61]

Aside from whether the agreement between FRI and Basic fits into the classic group boycott arrangement, however, the case law surrounding restraints on trade provides an alternative type of analysis. This analysis distinguishes between restraints which are horizontal in nature and those which may be considered vertical in nature. See generally *Continental TV v. GTE Sylvania*, 433 U.S. at 54-59, 97 S. Ct. at 2559-2562.³⁸ Horizontal combinations are cartels or agreements *among competitors*. Such agreements generally restrain competition among enterprises at the same level of distribution. Vertical restraints, on the other hand, are generally agreements between persons or firms occupying different levels in the chain of distribution of a specific product. *Muenster Butane, Inc. v. Stewart Co.*, 651 F.2d at 295.³⁹ [**63] As such, the effect of a purely vertical restraint will be to

³⁸ For a valuable critique of the relationship between these alternative analyses of concerted refusals to deal, see generally Bauer, *supra* note 37.

³⁹ Professor, now Judge, Bork has stated that:

A restraint -- whether on price, territory, or any other item -- is vertical . . . when a firm operating at one level of an industry places restraints upon rivalry at another level for its own benefit.

R. Bork, *The Antitrust Paradox* 288 (1978); see Bauer, *supra* note 37, at 692 & n. 45.

If we examine the restraints alleged by CAT in terms of the underlying agreement (as we must given the plaintiff's allegation of conspiracy), then we see that the agreement is between entities occupying different levels -- rock supplier and purchaser of rock. Likewise, the agreement which FRI initiated, and in which Basic acquiesced, *restrains* competition at a level different from that occupied by FRI. The primary restraint is upon competition among transporters of aggregate. Although this may redound to the benefit of FRI's trucking subsidiary, the restraint was *initiated* by FRI. Arguably, the restraint may endanger competition among purchasers of rock. This too however, constitutes a different level in the chain of production. We see, then, that in this case the arrangement is almost purely vertical; the agreement is between, and the restraint acts upon, entities at different levels in the market. In contrast, a horizontal arrangement involves agreement among entities operating at the same level. Such an agreement generally will restrain competition *at that level* of the market. Finally, on occasion entities on the same market level will seek to have an entity at a different level impose restrictions upon them. Such putative vertical arrangements are in reality horizontal: the actual agreement is among competitors, and the effect is to restrain competition at their level, although the

restrain competition at a level other than that from whence the restraint was initiated.⁴⁰ The classic example of a per se violation is an agreement between:

Competitors at the same level of the market structure to allocate territories in order to minimize competition. **[**62]** Such concerted **[*775]** action is usually termed a "horizontal" restraint, in contradistinction to *combinations of persons at different levels* of the market structure, e.g., manufacturers and distributors, which are termed "vertical" restraints.

United States v. Topco Associates, 405 U.S. 596, 608, 92 S. Ct. 1126, 1133, 31 L. Ed. 2d 515 (1972) (emphasis added).

CAT contends that the restraint involved in this case is horizontal rather than vertical in nature. Specifically, it argues that the "horizontal aspect" necessary to bring this case within the rule of per se illegality is provided by FRI's aggregate hauling subsidiary, Tank Lines, which competes at the same market level as CAT. According to this argument, it is irrelevant that the parties to the alleged conspiracy are arranged in a completely vertical configuration so long as FRI competes with CAT through its trucking subsidiary. In our view, this argument is without merit.⁴¹

[64]** The case law demonstrates that there are several types of arrangements which may be characterized as horizontal, thus warranting the per se prohibition. First is the arrangement in which two or more businesses all operating at the same level in the chain of distribution agree to do business with one customer to the exclusion of a competitor of that customer. See *Klor's, Inc. v. Broadway-Hale Stores, 359 U.S. at 207-10, 79 S. Ct. at 705-08*. It is not necessary for the target of the boycott to operate at the same market level as the conspirators; the danger lies in allowing an entire industry, as opposed to an individual merchant in that industry, to restrict the sale of its goods thereby potentially restricting output at the cost of increased prices to the consumers.⁴² See also *ComTel, Inc. v. DuKane Corp., 669 F.2d 404 (6th Cir. 1982)*.

[65]** Another type of horizontal arrangement prohibited outright by the Sherman Act is that in which two or more merchants agree to sell their goods to a customer conditioned upon that customer's refusal to purchase goods manufactured by a competitor of the merchants. See *Fashion Originators Guild v. FTC, 312 U.S. at 461-63, 61 S. Ct. at 705-06*. In this situation, both the parties to the agreement and the target of the agreement occupy the same relative level in the chain of distribution. Again, such a restraint on trade directly implicates concerns for an industry's ability to restrict output by reducing the number of competitors.

vehicle for the restraint occupies a different level. See *United States v. Topco Associates, 405 U.S. 596, 608-09, 92 S. Ct. 1126, 1133-34, 31 L. Ed. 2d 515 (1972)*; *Sports Center, Inc. v. Riddell, Inc., 673 F.2d 786, 791 n.4 (5th Cir. 1982)*.

⁴⁰ As the Supreme Court made clear in the *Sylvania* case, a restraint on trade at a level different than that of the "initiator" of the agreement is often tolerated because it may lead to greater competition at that "initiating" level. See *infra* note 48.

⁴¹ Implicit in the argument is treatment of Tank Lines, not a party to this litigation, as a co-conspirator of Basic and FRI. This assumption apparently stems from the relationship between Tank Lines and FRI. There is no evidence that officials of Tank Lines were involved in or had knowledge of the alleged conspiracy.

⁴² In *Klor's*, ten manufacturers conspired, at the behest of a competitor of Klor's, either not to sell goods to Klor's or to sell only at higher prices. The Supreme Court focused generally on the possible injury to retailers in Klor's position. See *359 U.S. at 210-13, 79 S. Ct. at 708-10*. However, the Court also stressed that the agreement deprived "manufacturers and distributors of their freedom to sell to Klor's at the same prices and conditions made available to [Klor's competitor]." The Court also contrasted the case with one where a dealer agrees to an exclusive distributorship. *Id. at 212-13, 79 S. Ct. at 709-10*. The necessary implication is that the feature which renders one agreement horizontal and the other vertical is the mutual agreement between entities on the same market level. See *Gough v. Rossmoor Corp., 585 F.2d 381, 387 n. 7 (9th Cir. 1978)*, cert. denied, *440 U.S. 936, 99 S. Ct. 1280, 59 L. Ed. 2d 494 (1979)*; McCormick, *Group Boycotts -- Per Se or Not Per Se, That is the Question*, 7 Seton Hall L.Rev. 703, 760 (1976) (*Klor's* case is complex because it involved both horizontal and vertical restraints).

Finally, the ban on horizontal restraints encompasses purportedly vertical arrangements which are actually horizontal agreements in disguise. See [United States v. Topco Associates, 405 U.S. at 608-12, 92 S. Ct. at 1133-35](#). In such situations, businesses at the same market level, most often distributors, seek to have restraints imposed upon them by their supplier or manufacturer. The actual goal of such an arrangement, however, may be to organize *among themselves* how the distributors will carry [\[*776\]](#) on their [\[**66\]](#) respective operations.⁴³ Such an agreement represents one of the most dangerous threats to competition, since it can have few purposes other than requiring the manufacturer to restrict output. See R. Bork, *The Antitrust Paradox* 389 (1978) (retailers who agree to horizontal restraint not desired by manufacturer are almost certainly attempting to restrict output for sake of monopoly gains). See generally L. Sullivan, *Antitrust* § 83 (1977) (discussing various types of boycotts).

The foregoing examples of horizontal activity condemned by the antitrust laws all have one feature in common: they involve agreements between more than one entity at the [\[**67\]](#) same level of the market. The key to per se illegality in such cases, therefore, is not the relationship of the target to the members of the conspiracy.⁴⁴ Conversely, that one of the conspirators may operate as a direct competitor of the plaintiff is not dispositive. See [Oreck Corp. v. Whirlpool Corp., 579 F.2d at 131](#) (Whirlpool, manufacturer, at instigation of Sears, retailer, terminated its sales of vacuum cleaners to Oreck, who functioned at the same level as Sears). In fact, if it were true that participation in the conspiracy by an entity which operates on the plaintiff's market level were sufficient to establish that horizontal aspect necessary for per se illegality, then the category of horizontal restraints would completely swallow the category of vertical restraints. For example, every exclusive dealing agreement between manufacturer and customer, though vertical as between its members, necessarily involves the exclusion of an entity which operates on the same market level as either the customer or the manufacturer. To declare that such an arrangement is therefore horizontal in nature would convert all restrictions such as vertical territorial agreements [\[**68\]](#) into per se violations. Such a result is directly contrary to the holding in the *Sylvania* case. See [433 U.S. at 58-59, 97 S. Ct. at 2561-2562](#).

[\[**69\]](#) CAT argues that the cases involving manufacturer-distributor chains should not control. While these arrangements are slightly different from the one involved here, such differences should not lead us to embark on a completely novel analysis of horizontal restraints.⁴⁵ [\[**70\]](#) In our view, the finding of an absence of a horizontal aspect in this case is well supported by precedent. See, e.g., [Abadir & Co. v. First Mississippi Corp., 651 F.2d at 424-26;](#)⁴⁶ [Red Diamond \[*777\] Supply, Inc. v. Liquid Carbonic Corp., 637 F.2d at 1004-07](#) (conspiracy between

⁴³ Thus, in *Topco* the putative vertical restraint was actually a mutual, and thus horizontal restraint among competing distributors regarding the allocation of territory. [405 U.S. at 608-10, 92 S. Ct. at 1133-34](#). For one court's analysis of a similar situation, see [Sports Center, Inc. v. Riddell, Inc., supra note 39.](#)

⁴⁴ One commentator has stated:

The danger to the market begins with aggregates of units at the same level. Any horizontal combination of sellers [which attempts to exclude a business from access to the market] . . . would seem to be per se illegal, regardless whether the coercive pressure is directed at the victim or the victim's customers; so long as two or more defendants are on the same level of distribution, it would not seem to make any difference whether the party denied access to the market by the combination's refusal to deal is (1) on a different level from one or more members of the combination, or (2) is or is not a competitor.

Woolley, *Is a Boycott a Per Se Violation of the Antitrust Laws?* 27 Rutgers L.Rev. 773, 793 (1974) (footnotes omitted). Professor Gerhart points out that "attempts to synthesize the group boycott cases are legion." Gerhart, *The Supreme Court and Antitrust Analysis: The (Near) Triumph of the Chicago School*, 1982 Sup.Ct.Rev. 319, 324 n. 16 (1983).

⁴⁵ One example of a classic refusal to deal, a vertical restraint, involves a purchaser refusing to buy from a seller. In the instant case, Basic is the purchaser of trucking services, and has refused to buy from CAT. When the purchaser refuses to buy because he is obligated to purchase from another source, the arrangement becomes one of exclusive dealing. The uniqueness of this case stems from the involvement of two products -- rock and transportation. The potential significance of this aspect is discussed below.

manufacturer and distributor to exclude plaintiff-distributor not a horizontal agreement merely because manufacturer also conducts limited operations at plaintiff's level of the market); [*Daniels v. All Steel Equipment, Inc.*, 590 F.2d at 113](#) (conspiracy between manufacturer and dealer to eliminate plaintiff-dealer does not constitute horizontal boycott); [*H. & B. Equipment Co. v. International Harvester*, 577 F.2d at 245-46](#) (conspiracy between manufacturer and distributor horizontal only when source of conspiracy is combination of distributors).

[**71] In contending for a rule of per se illegality, both CAT and the district court relied on the former Fifth Circuit's decision in [*E.A. McQuade Tours, Inc. v. Consolidated Air Tour Manual Committee*, 467 F.2d 178 \(5th Cir. 1972\)](#), cert. denied, 409 U.S. 1109, 93 S. Ct. 912, 34 L. Ed. 2d 690 (1973). In *McQuade*, a group of airlines published a consolidated listing of available tour programs in the Caribbean. On at least two occasions the airlines, through their tour manual committee, refused to list the plaintiff's tours in their programs and instead listed tours by a competitor. Although the court refused to apply a rule of per se illegality on the facts before it, the opinion contains dicta which tend to support CAT's argument. First, the court cited *Klors* as a case "involving vertical combinations among traders at different marketing levels, designed to exclude from the market direct competitors of some members of the combination." [*Id. at 186*](#). Actually, however, the conspiracy or combination in *Klors* included both vertical and horizontal agreements. While one of the conspirators, Broadway-Hale, was a retailer, and thus [**72] vertical with respect to the other conspirators, the remaining conspirators were all suppliers and horizontal with respect to each other. Second, the court summarized the case law dealing with collective refusals to deal in a manner which suggests that the primary consideration is whether exclusionary or coercive conduct has occurred:

In all of these cases, the touchstone of per se illegality has been the purpose and effect of the arrangement in question. Where exclusionary or coercive conduct has been present, the arrangements have been viewed as "naked restraints of trade," and have fallen victim to the per se rule.

[*Id. at 187*](#). In our view, however, this dictum in *McQuade* does not survive the Supreme Court's decision in [*Continental TV, Inc. v. GTE Sylvania, Inc.*, 433 U.S. 36, 97 S. Ct. 2549, 53 L. Ed. 2d 568 \(1977\)](#). *Sylvania* makes it clear that [**HN21**](#) the "touchstone" of per [*778] se illegality is not the presence of exclusionary conduct in the particular case but rather is the market impact of the kind of restrictions in [**73] question. See [*id. at 50-59, 97 S.*](#)

⁴⁶ In *Abadir*, the plaintiff, Abadir & Co., was an independent trader dealing in various chemicals, including urea -- an inorganic chemical compound used worldwide for fertilizer and other industrial uses. The defendant, First Mississippi Corp., was engaged in the distribution and sale of urea. The defendant agreed to sell a certain quantity of urea to the plaintiff, conditioned upon the plaintiff's agreement to resell urea for consumption only in Asia. Subsequently, the defendant discovered that Abadir had resold the urea for consumption in the United States. The defendant then terminated its contract with Abadir and sold directly to Abadir's American customer, effectively eliminating competition from Abadir. In Abadir's antitrust action against First Mississippi, the plaintiff alleged that the contract between it and the defendant was an illegal horizontal market-dividing agreement, since First Mississippi engaged in the distribution of urea in competition with its distributors, such as Abadir. A panel of the Former Fifth Circuit, however, held otherwise. In doing so, the court recognized that the requirement of a horizontal aspect is not satisfied by the mere fact that the initiator of the restraint engages in some degree of competition on the plaintiff's market level. Rather, the court recognized that in essence the original agreement between Abadir and First Mississippi was simply a vertical agreement imposed by one merchant upon another occupying a different level in the market. [*651 F.2d at 425*](#). Thus, the court looked to the policies justifying the distinction between vertical and horizontal restraints, and tempered its analysis with those general considerations which militate against expansion of the per se categories:

Departure from the rule of reason standard must be based upon demonstrable economic effect rather than -- as in [[*United States v. Arnold, Schwinn & Co.*, 388 U.S. 365, 87 S. Ct. 1856, 18 L. Ed. 2d 1249 \(1967\)](#)] -- upon formalistic line drawing. . . . It is only after considerable experience with certain business relationships that courts classify them as per se violations of the Sherman Act. . . . The usual assumption is that a per se rule would grow out of a history of rule of reason cases all arriving at the same verdict. . . . When the courts are uncertain of the competitive significance of a particular type of restraint they decline to apply the per se label.

Ct. at 2557-2562.⁴⁷ "Departure from the rule of reason standard must be based upon demonstrable economic effect rather than . . . upon formalistic line drawing." Id. at 58-59, 97 S. Ct. at 2561-2562.⁴⁸

[**74] CAT attempts to bolster its argument by citation to the Sixth Circuit's recent decision in Com-Tel, Inc. v. DuKane Corp., supra. *Com-Tel* involved a boycott initiated by one distributor which pressured its manufacturer, which in turn enforced the boycott among other distributors. The plaintiff, a competing distributor which was thereby barred from purchasing products from either the manufacturer or the boycotting distributors, brought suit, alleging a concerted refusal to deal. The Sixth Circuit held that the boycott in question was horizontal in nature, thus warranting an instruction on per se illegality. The court declared that the acquiescence, or participation by other distributors in the plan not to sell goods to the plaintiff provided the horizontal aspect necessary for per se illegality. 669 F.2d at 412-14. Although the court noted that some commentators had suggested that the presence of one conspirator, i.e., the initiating distributor, at a level horizontal to the plaintiff would provide a sufficient horizontal aspect, the court expressed no opinion as to the validity of such a proposition. See id. at 412-13 & n. 16.

In our [**75] view, CAT reads *Com-Tel* too broadly. The defendant there had argued that more than one conspirator, or "numerosity," was required at each market level of the boycott. The court's lengthy discussion of the numerosity issue was therefore aimed only at showing that the existence of a boycott does not depend upon the specific market level at which the boycott occurs; so long as there exists an agreement *among competitors at some level*, there will be a sufficient horizontal aspect. Thus, HN22[1] the key inquiry when determining whether a particular arrangement is horizontal or vertical is not the presence of a conspirator on the plaintiff's market level ("horizontal" to the plaintiff) but whether the conspiratorial agreement is *between* entities which are *horizontally arranged* at some level in the market.⁴⁹

⁴⁷ In fact, *McQuade* has been cited as an example of an attempt to temper the harshness of the per se rule when there is a clear absence of anticompetitive effects, notwithstanding that the arrangement in question seems to constitute a classic boycott. See McCormick, *supra* note 42, at 744-46.

⁴⁸ The court in *Sylvania* announced that the primary concern of the antitrust laws is the protection of interbrand competition, occasionally at a cost to intrabrand competition. 433 U.S. at 58-59, 97 S. Ct. at 2561-62. We note that many unilateral refusals to deal or exclusive dealing situations necessarily involve an effect on interbrand competition. The decision by a distributor to carry only a particular manufacturer's line of products, to the exclusion of another manufacturer's line, may reduce the ability of the excluded manufacturer to market his goods. Nonetheless, this is not the type of negative impact on interbrand competition against which the Supreme Court's analysis in *Sylvania* was aimed. Rather, the Court was concerned with those types of arrangements in which competitors agree *among themselves* to take certain courses of action. The distinction rests on an economic assumption that when a manufacturer or supplier restricts his business vis-a-vis his customers or distributors he is attempting to compete more effectively against the manufacturers and suppliers of other brands. The result will be vigorous interbrand or industry-wide competition. See id. at 54-56, 97 S. Ct. at 2559-2560. On the other hand, the rule of per se illegality for horizontal agreements is based on another economic assumption -- that when business entities which operate at the same market level reach an agreement as to the conduct of their businesses, there is a strong likelihood that the net effect will be to restrict the output of products in an entire industry, thereby *restraining* interbrand competition. Such restraints in turn thwart such goals as consumer welfare and the efficient allocation of resources:

"Horizontal" agreements among competitors . . . threaten the achievement of antitrust goals by eliminating competition among the participants and thereby allowing them to enhance their collective profits to the detriment of consumers.

P. Areeda, *supra* note 36, at 16.

⁴⁹ As the court in *Com-Tel* pointed out, the arrangement in Klor's, Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207, 79 S. Ct. 705, 3 L. Ed. 2d 741 (1959), was condemned even though there was only one conspirator on the boycotted level -- the numerosity requirement was satisfied at the boycotting level. Conversely, in United States v. General Motors, 384 U.S. 127, 86 S. Ct. 1321, 16 L. Ed. 2d 415 (1966), horizontal numerosity existed at the boycotted level, among the target's competing distributors, all of whom were parties to the boycotting agreement.

In Blackburn v. Crum & Forster, 611 F.2d 102 (5th Cir.), cert. denied, 447 U.S. 906, 100 S. Ct. 2989, 64 L. Ed. 2d 856 (1980), a panel of the former Fifth Circuit stated that the per se rule against concerted refusals to deal applies only when "the plaintiff, the

[**76] [*779] We therefore conclude that the arrangement in question cannot be labeled a horizontal restraint of trade.⁵⁰ [**77] This result, however, does not necessarily dictate a rule of reason analysis. As the Supreme Court noted in *Sylvania*, particular types of vertical restrictions may nonetheless require per se prohibition. See [433 U.S. at 58, 97 S. Ct. at 2561](#). We agree with FRI that the arrangement here is much closer to a unilateral refusal to deal than it is to a horizontal boycott. However, if the evidence will sustain a finding that FRI's conduct falls under one of the categories of per se illegality set forth earlier in this opinion, we need not remand for a new trial.⁵¹

As discussed earlier, the conspiracy alleged is unique in that the evidence suggests it was aimed at two different targets. One target was FRI's competitor in rock production, Rinker. The other target was CAT's innovative transportation operation which made possible the sale of Rinker stone in the Orlando market. By coercing Basic to exclude CAT's trucking operation, FRI could restrict the importation of its competitor's stone. Similarly, by discouraging its customers from purchasing stone [*780] from Rinker, FRI could restrict competition in the aggregate hauling industry, thus potentially benefiting its subsidiary, Tank Lines. In our view, the particular arrangement involved is quite similar to a tying arrangement: for purposes of this lawsuit FRI's stone, upon which Basic [*78] was dependent, would be the tying product, while the tied product would be the transportation of this stone.⁵²

excluded party, is on the same competitive level with one member of the conspiracy. In other words, in such cases it may be proper to infer anticompetitive motive and effect because the conspiracy has a horizontal aspect." [Id. at 104](#). Because there was no evidence of agreement between the alleged conspirators in *Blackburn*, the foregoing statement was unnecessary to decide the case. Further, the court's opinion that a horizontal restraint necessarily involves one conspirator on the plaintiff's level is doubtful, at best. Of course, most concerted refusals to deal or boycotts will involve at least one conspirator on the target's level, since there generally will be at least one "beneficiary" at that level of the refusal by the boycotters to deal with the target. See, e.g., [Radiant Burners v. Peoples Gas Light & Coke Co.](#), 364 U.S. 656, 81 S. Ct. 365, 5 L. Ed. 2d 358 (1961); [Klor's, Inc. v. Broadway-Hale Stores, Inc.](#), 359 U.S. 207, 79 S. Ct. 705, 3 L. Ed. 2d 741 (1959); [Fashion Originators' Guild of America v. FTC](#), 312 U.S. 457, 61 S. Ct. 703, 85 L. Ed. 949 (1941). That this factor is not necessary in order to find a horizontal restraint, however, is implicit in many of the Supreme Court cases which resulted from prosecutions by the United States. For example, in [United States v. Sealy, Inc.](#), 388 U.S. 350, 87 S. Ct. 1847, 18 L. Ed. 2d 1238 (1967), the Court struck down as per se illegal a scheme whereby competing manufacturers were licensed and allocated territories in which to sell bedding products under the Sealy name. In determining whether the arrangement was vertical or horizontal, the Court focused on the relative market levels of the parties to the agreement, and not upon the particular level of the market which was being injured. See also [Timken Roller Bearing Co. v. United States](#), 341 U.S. 593, 595-96, 71 S. Ct. 971, 973, 95 L. Ed. 1199 (1951) (territorial restrictions among manufacturers); [Hobart Brothers Co. v. Malcolm T. Gilliland, Inc.](#), 471 F.2d 894, 899 (5th Cir.) (per se violation for competitors at same level of market to allocate territories), cert. denied, 412 U.S. 923, 93 S. Ct. 2736, 37 L. Ed. 2d 150 (1973); [A.H. Cox & Co. v. Star Machinery Co.](#), 653 F.2d 1302, 1306 (9th Cir. 1981); [National Tire Wholesale, Inc. v. The Washington Post Co.](#), 441 F. Supp. 81, 87 (D.D.C. 1977) (horizontal restraint requires collaboration among competitors), aff'd without opinion, [194 U.S. App. D.C. 81, 595 F.2d 888 \(D.C. Cir. 1979\)](#).

⁵⁰ CAT's final argument is that the use of coercion in bringing about the agreement is a per se violation regardless of whether the agreement is vertical or horizontal. We reject this contention. See [Associated Radio Service Co. v. Page Airways, Inc.](#), 624 F.2d 1342 (5th Cir. 1980), cert. denied, 450 U.S. 1030, 101 S. Ct. 1740, 68 L. Ed. 2d 226 (1981); [Northwest Power Products, Inc. v. Omard Industries](#), 576 F.2d 83 (5th Cir. 1978), cert. denied, 439 U.S. 1116, 99 S. Ct. 1021, 59 L. Ed. 2d 75 (1979); [Oreck Corp. v. Whirlpool Corp.](#), 579 F.2d 126 (2d Cir.) (en banc), cert. denied, 439 U.S. 946, 99 S. Ct. 340, 58 L. Ed. 2d 338 (1978). "The use of unfair means resulting in the substitution of one competitor for another without more does not violate the antitrust laws." [Manufacturing Research Corp. v. Greenlee Tool Co.](#), 693 F.2d 1037, 1043 (11th Cir. 1982).

⁵¹ To reiterate, those categories include horizontal and vertical price fixing agreements, division of markets between competitors, tying arrangements, and group boycotts. We have already eliminated the last category. Additionally, there is no contention by CAT that FRI has engaged in any practices regarding prices.

⁵² Actually, the tied product would be the agreement *not* to utilize CAT's services in the transportation of stone. See [Northern Pacific Ry. Co. v. United States](#), 356 U.S. at 5-6, 78 S. Ct. at 518 (1958) (tying [HN23](#) arrangement may be defined as an agreement by a party to sell one product but only on the condition that the buyer also purchases a different product, or at least agrees that he will not purchase that product from any other supplier).

[**79] If we examine the policies behind the prohibition on tying agreements, we see that the arrangement in the instant case directly implicates those policies. The primary concern is the restriction of competition in the market for the tied product. See *Kypta v. McDonalds Corp.*, 671 F.2d 1282, 1284 (11th Cir.), cert. denied, 459 U.S. 857, 103 S. Ct. 127, 74 L. Ed. 2d 109 (1982); *Southern Concrete Co. v. United States Steel Corp.*, 535 F.2d at 316-17. Tying arrangements are thus discouraged because:

They deny competitors free access to the market for the tied product, not because the party imposing the tying requirements has a better product or a lower price but because of his power or leverage in another market. At the same time [*781] buyers are forced to forgo their free choice between competing products.

Fortner Enterprises v. U.S. Steel Corp., 394 U.S. 495, 498-99, 89 S. Ct. 1252, 1256, 22 L. Ed. 2d 495 (1969); see, *International Salt Co. v. United States*, 332 U.S. 392, 396-98, 68 S. Ct. 12, 15-16, 92 L. Ed. 2d (1947); *Heattransfer Corp. v. Volkswagenwerk, A.G.*, 553 F.2d 964, 975-77 (5th Cir. 1977), [*80] cert. denied, 434 U.S. 1087, 98 S. Ct. 1282, 55 L. Ed. 2d 792 (1978). In the case at bar, FRI threatened to cut off its supply of rock to Basic unless Basic

Thus, if Hallowell's version of FRI's "threat" is accurate, it does not constitute a classic tying arrangement: Basic was not required to purchase the tied product, aggregate transportation, from FRI, but was merely admonished not to purchase it from CAT. The distinction potentially is of great significance. In *Kentucky Fried Chicken v. Diversified Packaging*, 549 F.2d 368 (5th Cir. 1977), a panel of the former Fifth Circuit stated that:

HN24 [When the victim of an alleged tie-in is not required to buy a single unit of the tied product from the tying party or from any source in which the tying party has an interest or on whose sales the tying party earns a commission, the arrangement simply does not constitute a tie.]

Id. at 378-79. Thus, *Kentucky Fried Chicken* provides that to constitute a tie the arrangement must economically benefit the alleged perpetrator with regard to the tied product. That case, however, involved franchise restrictions: The franchisee of the defendant franchisor was required to purchase certain products from either the franchisor or one of a group of suppliers approved by the franchisor. The record demonstrated that no supplier who met the product specifications required by the franchisor had ever failed to gain approval. *Id. at 380*. Further, there was no evidence that the franchisor had coerced the franchisee into purchasing its supplies.

Franchising inevitably creates a tension between free competition and the need of the franchisor to maintain the quality and reputation of its trademark. In such situations, as the court recognized, allowing franchisors to set quality requirements with regard to the purchase of certain products can actually *enhance* competition. *Id. at 379-80*. These special concerns, however, may be limited to franchise disputes. In the case before us, CAT clearly was foreclosed from doing business with Basic, compare *id. at 378*, and there appears to be no competition-enhancing justification for allowing FRI to restrict competition in the tied market. Instead, this case directly implicates those concerns over barriers to entry which justify per se treatment for tying arrangements.

Aside from the franchise problem, the facts of *Northern Pacific* are similar to those of *Kentucky Fried Chicken*. In *Northern Pacific*, the Railroad sold and leased land on condition that goods produced on the land would be shipped over its lines, provided that its rates were equal to those of competing carriers. *356 U.S. at 3, 78 S. Ct. at 517*. Thus, the case did not involve an "absolute" tie of the second product. The Court's discussion of the cost loophole in this tie, however, suggests that every effort to use power in one market to influence competition in another should arouse Sherman Act concern. See *id. at 11-12, 78 S. Ct. at 521* (even if tie subject to many exceptions, essential fact remains that agreements are binding obligations which deny defendant's competitors access to fenced-off market on same terms as defendant). See generally, Note, *Tie Out -- A Case for the Extension of Tying Theory*, 35 Ohio S.L.J. 140 (1974).

Finally, it is possible that although FRI did not expressly require Basic to secure shipping services from Tank Lines, the effect of the coercion was to ensure that Tank Lines would be CAT's substitute. Even under *Kentucky Fried Chicken* such an effect would warrant per se treatment. See *id. at 377-78*. The record is ambiguous on this point; it is clear that Tank Lines did haul rock to Basic, but it is not certain that it was the exclusive transporter of Basic's rock during the critical period after CAT's termination.

terminated the hauling services of CAT. Therefore, if CAT's allegations are true, FRI attempted to transfer its market power in the aggregate supplying industry over to the aggregate hauling industry. The effect of this transfer would be to erect a barrier against competition in the tied industry, i.e., hauling; this barrier is prohibited by the Sherman Act.⁵³

[**81] As noted earlier, tying arrangements are among those rare categories of cases subject to a rule of per se illegality. See [Kentucky Fried Chicken v. Diversified Packaging, 549 F.2d 368, 374 \(5th Cir.1977\)](#). On the other hand, the specific application of the per se rule in such cases is somewhat unique. Normally, automatic condemnation under the per se rule occurs merely upon a finding that the defendant engaged in the restrictive conduct alleged; proof of anticompetitive effect in a relevant market need not be demonstrated. [HN25](#)[↑] Tying arrangements, however, are subject to a special qualification that the party enforcing the tying agreement must have "sufficient economic power with respect to the tying product to appreciably restrain free competition in the market for the tied product." [Northern Pacific Ry. Co. v. United States, 356 U.S. 1, 6, 78 S. Ct. 514, 518 2 L. Ed. 2d 545](#); see [Bob Maxfield, Inc. v. American Motors Corp., 637 F.2d 1033, 1037 \(5th Cir.\)](#), cert. denied, 454 U.S. 860, 102 S. Ct. 315, 70 L. Ed. 2d 158 (1981); [**82] [Heattransfer Corp. v. Volkswagenwerk, A.G., 553 F.2d at 975](#); [Carpa, Inc. v. Ward Foods, Inc., 536 F.2d 39, 47-49 \(5th Cir.1976\)](#); [Driskill v. Dallas Cowboys Football Club, Inc., 498 F.2d 321, 323 \(5th Cir.1974\)](#). As the Supreme Court pointed out in *Northern Pacific*, [HN26](#)[↑] the economic power which must be demonstrated need not rise to the level of monopoly power or even dominant power in the market. See [356 U.S. at 11, 78 S. Ct. at 521](#). [HN27](#)[↑] "Even absent a showing of market dominance, the crucial economic power may be inferred from the tying product's desirability to consumers or from its uniqueness in its attributes." [Fortner Enterprises v. U.S. Steel Corp., 394 U.S. at 503, 89 S. Ct. at 1258](#). Thus, "the proper focus of concern is whether the seller has the power to raise prices, or impose other burdensome terms such as a tie-in, with respect to any appreciable number of buyers within the market." [Id. at 504, 89 S. Ct. at 1259](#). [**83]

At trial, however, CAT pursued only the "concerted refusal to deal" theory of liability, and did not introduce evidence of FRI's ability to raise prices with respect to an appreciable number of its customers. As a result, the trial court did not instruct the jury as to the need to find that FRI possessed sufficient market power to restrain competition in the market for the tied product. See [Heattransfer Corp. v. Volkswagenwerk, A.G., 553 F.2d at 977-78](#) & n. 12 (example of per se instruction for tying arrangement); [Carpa, Inc. v. Ward Foods, Inc., 536 F.2d at 49](#) (same). Thus, [**82] even if CAT was entitled to proceed under a theory of tying, a question we do not decide, the judgment for CAT must be reversed and the cause remanded to the district court for a new trial.⁵⁴

[**84] V. CAUSATION AND DAMAGES

⁵³ Professors Kaysen and Turner have stated:

A tie-in always operates to raise the barriers to entry in the market of the tied good to the level of those in the market for the tying good: the seller who would supply the one can do so only if he can also supply the other, since he must be able to displace the whole package which the tying seller offers. Developing a substitute for the tying product may be very difficult, if not impossible. Thus, tying tends to spread market power into markets where it would not otherwise exist: for example, few firms are prepared to supply machines like those of IBM, whereas many may be prepared to supply punch cards.

C. Kaysen and D. Turner, Antitrust Policy 157 (1959). But See R. Bork, *supra* note 39, at 366-81. Professor, now Judge, Posner has suggested that the real evil of tie-ins is that they enable a monopolist of the tying product to generate greater monopoly profits by engaging in price discrimination. See R. Posner, [Antitrust Law](#) 171-84 (1976).

⁵⁴ See [Doran v. Petroleum Management Corp., 576 F.2d 91, 93 \(5th Cir.1978\)](#) (parties free on remand to present by amendment new issues not inconsistent with appellate decision) (*quoting Jones v. St. Paul Fire & Marine Co., 108 F.2d 123, 124 (5th Cir.1939)*). See also [GTE Sylvania, Inc. v. Continental T.V., Inc., 537 F.2d 980, 1004 n. 41 \(9th Cir.1976\)](#) (en banc) (remanding for new trial under rule of reason where trial court erred in applying per se theory of illegality), aff'd, [433 U.S. 36, 97 S. Ct. 2549, 53 L. Ed. 2d 568 \(1977\)](#).

HN28[] Under § 4 of the Clayton Act, a private plaintiff who has demonstrated a violation of the Sherman Act also must prove "an injury to his business resulting from the defendant's wrongful actions, and some indication of the amount of the damage done." *Kestenbaum v. Falstaff Brewing Corp.*, 514 F.2d 690, 694 (5th Cir. 1975) (quoting *Terrell v. Household Goods Carriers' Bureau*, 494 F.2d 16, 20 (5th Cir. 1974), cert. denied, 419 U.S. 987, 95 S. Ct. 246, 42 L. Ed. 2d 260 (1974); cert. denied, 424 U.S. 943, 96 S. Ct. 1412, 47 L. Ed. 2d 349 (1976); see *J. Truett Payne Co. v. Chrysler Motors Corp.*, 451 U.S. 557, 561-63, 101 S. Ct. 1923, 1926-27, 68 L. Ed. 2d 442 (1981); *Zenith Radio Corp. v. Hazeltine Research*, 395 U.S. 100, 114-15 & n. 9, 89 S. Ct. 1562, 1571-72 & n. 9, 23 L. Ed. 2d 129 (1969); *Bigelow v. RKO Radio Pictures*, 327 U.S. 251, 264-65, 90 L. Ed. 652, 66 S. Ct. 574 (1946); *Chrysler Credit Corp. v. J. Truett Payne Co.*, 670 F.2d 575, 581 [***851 (5th Cir.)] (on remand from *451 U.S. 557, 101 S. Ct. 1923, 68 L. Ed. 2d 442 (1981)*), cert. denied, 459 U.S. 908, 103 S. Ct. 212, 74 L. Ed. 2d 169 (1982)). FRI's final contentions are that CAT failed to introduce sufficient probative evidence of the fact of injury, and that CAT's evidence with regard to the quantum of damages resulting from the alleged injury was insubstantial. Regarding the damages issue, FRI specifically objects to the reliance by plaintiff's expert on a "pro forma" prepared by Hallowell when testifying as to CAT's profitability. In our view, CAT did introduce "substantial evidence" that FRI's actions, assuming they violated the Sherman Act, resulted in cognizable injury to CAT's business enterprise. See *Malcolm v. Marathon Oil Co.*, 642 F.2d 845, 846-48 (5th Cir.), cert. denied, 454 U.S. 1125, 102 S. Ct. 975, 71 L. Ed. 2d 113 (1981). Further, we think that plaintiff introduced barely enough evidence as to damages to withstand a directed verdict. See *Boeing v. Shipman*, 411 F.2d 365, 374-75 (5th Cir. 1969) (en banc). Because we remand for a new trial for other reasons, see *supra* [***86] Section IV, we need not determine whether appellants should have been granted a new trial solely on the damages issue. Moreover, given the complexity of this case, the possibility that the plaintiff at retrial will rely on new theories with regard to liability, and the deficiencies discussed below in CAT's evidence with respect to damages, we would in any event decline to exercise our discretion to order a new trial only as to liability.⁵⁵ We take the opportunity below, however, to express our concern over the apparent weaknesses in CAT's evidence with regard to damages. See *Eastern Air Lines, Inc. v. McDonnell Douglas Corp.*, 532 F.2d 957, 999 (5th Cir. 1976).

A. Fact of Injury

Our first task is to determine whether there is a causal relation between the alleged antitrust violation and an injury to plaintiff's business. *Copper Liquor, Inc. v. Adolph Coors Co.*, 509 F.2d 758, 759 [***871 (5th Cir.)] (per curiam), *denying petition for rehearing*, 506 F.2d 934 (5th Cir. 1975). The plaintiff must introduce substantial probative facts demonstrating that some damage flowed from the unlawful conspiracy. *Zenith Radio Corp. v. Hazeltine Research*, 395 U.S. at 123-25, 89 S. Ct. at 1576-77; *Jot-Em-Down Store (JEDS), Inc. v. Cotter & Co.*, 651 F.2d 245, 247 (5th Cir. 1981) (causation must be proved by sufficient evidence); *Malcolm v. Marathon Oil Co.*, 642 F.2d at [***873] 848 (requiring evidence of such quality and weight that reasonable and fairminded men in the exercise of impartial judgment might reach different conclusions); *Shumate & Co. v. National Ass'n of Securities Dealers, Inc.*, 509 F.2d 147, 152-53 (5th Cir.) (incumbent upon plaintiff to produce some credible evidence to support allegations of injury), cert. denied, 423 U.S. 868, 96 S. Ct. 131, 46 L. Ed. 2d 97 (1975). On the other hand, **HN29**[] "it is enough that the illegality is shown to be a material cause of the injury; a [***88] plaintiff need not exhaust all possible alternative sources of injury in fulfilling his burden of proving compensable injury under § 4." *Zenith Radio Corp. v. Hazeltine Research*, 395 U.S. at 114 n. 9, 89 S. Ct. at 1571 n. 9; see *Foremost-McKesson v. Instrumentation Laboratory*, 527 F.2d 417, 420 (5th Cir. 1976) (plaintiff must present substantial evidence that illegal practices by defendant were material cause of plaintiff's injuries); *Terrell v. Household Goods Carriers' Bureau*, 494 F.2d at 20 (where damages may have been caused by number of factors plaintiff need not prove defendant's actions were sole proximate cause; plaintiff must only show with fair degree of certainty that defendant's conduct materially contributed to injury).

FRI advances three arguments to demonstrate that CAT was not injured by its alleged anticompetitive acts. First, FRI contends that Basic's limited purchases of stone subsequent to its termination of CAT demonstrate that Basic soon would have terminated CAT without any prodding by FRI.

⁵ See generally *Williams v. Slade*, 431 F.2d 605, 608-09 (5th Cir. 1970).

According to Hallowell, he and Scott Carlson of Basic had an understanding whereby CAT would deliver 5,000 tons [**89] of Miami rock to Basic. At CAT's current rate of delivery, this would have generated approximately two to two and one-half months of hauling. Hallowell believed that this length of time with the 24-hour customer would allow CAT to establish itself on a firm footing. Hallowell also testified that at the time he met with Carlson he was accompanied by one of his drivers, Charles Justice. Justice corroborated this testimony, and also testified as to the 5,000-ton agreement between Hallowell and Carlson. Carlson, on the other hand, denied the existence of an agreement involving 5,000 tons, and could not recall the presence of anyone other than Hallowell during their negotiations. This testimony, however, is undercut by the testimony of one of Basic's own employees, Robert Peters, who stated that Hallowell *had* been accompanied by another man.

FRI contends that the evidence at trial refutes CAT's claim of an understanding to deliver 5,000 tons to Basic. From the time that CAT was terminated until the end of 1979, a period of approximately three months, Basic received a total of only eight shipments of rock, totaling approximately 200 tons; all were delivered the last three days [**90] of November, and all were purchased from FRI. Thus, FRI argues that even though CAT was forced to use Rinker South Orange, a non 24-hour customer, as its northern terminus, this changeover resulted in greater revenues for CAT than it would have earned had it not been terminated by Basic.

The record, however, establishes that during the relevant time period rock produced in the Brooksville-Orlando market was in short supply.⁵⁶ CAT's introduction of Miami rock into the Brooksville-Orlando market was the only alternative to rock produced in that market. Moreover, it was uncontested [784] at trial that Basic had a continual debt problem with FRI; Basic's debt at the time of the events in question was variously estimated at from \$90,000 to \$150,000.

[**91] Our examination of the record persuades us that there is a sufficient basis for rejecting FRI's contention. As discussed above, Carlson's recollection of the events surrounding the hiring of CAT was contradicted in at least one significant regard by the testimony of a fellow employee.⁵⁷ Further, the evidence of rock shortages in the Brooksville-Orlando market, combined with Basic's position as a substantial debtor of FRI, could lead a reasonable juror to conclude that Basic's subsequent course of dealing with FRI is not indicative of how it would have behaved had it continued to enjoy a steady supply of cheaper rock from the Miami area. See [Associated Radio Serv. Co. v. Page Airways, Inc., 624 F.2d at 1362.](#)

FRI next argues that even if CAT had not been terminated by Basic it soon would have been terminated at the south end of its circuit by its sand customer, [**92] Rinker. According to John Dicks, Rinker's Regions Operations Manager, Rinker did not anticipate a long-term relation with CAT, and Hallowell had been aware of this. Dicks stated that Rinker normally purchased its sand directly from the Miami market. In his view, Miami sand was a better grade than that produced in the Clermont area. He further testified that Rinker's reasons for bringing in Orlando sand was a temporary shortage in the Miami supply. Thus, as soon as it would be able to, Rinker intended to switch back over to the Miami supply.⁵⁸ The evidence is clear, however, that until CAT collapsed it was still

⁵⁶ There was some dispute at trial as to whether FRI's rock was "on allocation." Apparently, during the early 1970's FRI had attempted to cope with chronic shortages of rock by allocating a specific percentage to each of its customers. According to employees of FRI, this practice was abandoned shortly thereafter due to complaints by its customers. At trial, Hallowell and other CAT employees all claimed that during the time period here involved FRI was again allocating rock on some type of percentage basis among its customers. Employees of FRI denied this. In our view, whether or not FRI was in fact pursuing such a course of conduct is a relatively minor issue. All parties seem to have agreed that the demand for Orlando rock exceeded its current supply. See also *supra* note 26 (statement by employee of FRI regarding "stockpile conditions").

⁵⁷ Moreover, soon after CAT began hauling stone to Basic, Basic established an apparently open-ended line of credit with Rinker Miami.

⁵⁸ There was also evidence that at approximately the same time that CAT went out of business, Rinker opened up a rail spur from its Miami stone mines to its plant at City Point, fifty miles south of Orlando. According to Dicks, this spur allowed Rinker itself to ship its Miami rock to City Point by train, and from there by truck into the Orlando market. At the time of trial, Rinker was shipping approximately 30 cars a day; it had the capacity to ship more. It is not clear what relevance this evidence has to the

transporting sand south to Rinker's West Palm Beach plant and was still transporting rock north from Rinker Miami to Rinker South Orange. Finally, FRI's argument as to the probability that CAT would have been terminated by Rinker may well be relevant to the quantum of damages for which FRI is liable. It does not, however, have any bearing on the loss of revenue CAT may have suffered during the remaining two months of its operations, during which time Rinker remained its customer. Thus, this argument by FRI has no bearing on the fact of injury issue.

[**93] Finally, FRI contends that CAT did not discharge its obligation to mitigate damages. See [Gulf City, Inc. v. Wilson Sporting Goods, Inc., 555 F.2d 426, 436 \(5th Cir.1977\)](#); [Lehrman v. Gulf Oil Corp., 464 F.2d 26, 46-47 \(5th Cir.\)](#), cert. denied, 409 U.S. 1077, 93 S. Ct. 687, 34 L. Ed. 2d 665 (1972). In our view, this contention is without merit. Immediately after its termination by Basic, CAT secured as a customer for Miami stone the Rinker South Orange plant. CAT continued with Rinker as a customer until it ceased operations. FRI contends, however, that since CAT's viability depended upon securing a 24-hour customer, CAT's relationship with Rinker, a limited delivery time customer, was an insufficient effort to mitigate. According to testimony by one of Hallowell's employees, however, CAT had exhausted the available 24-hour customers. See Record at 1499. The record simply does not demonstrate [*785] that CAT's inability to secure a 24-hour customer was the result of its own "business calculus." [Zenith Radio Corp. v. Hazeltine Research](#), 395 U.S. at 128, 89 S. Ct. at 1579.

We thus conclude that the [**94] record does not demonstrate that "complete absence of substantial probative facts" necessary to allow us to overturn the jury's determination of causation. [Hobart Brothers Co. v. Malcolm T. Gilliland, Inc., 471 F.2d 894, 902 \(5th Cir.\)](#), cert. denied, 412 U.S. 923, 93 S. Ct. 2736, 37 L. Ed. 2d 150 (1973); see [Copper Liquor, Inc. v. Adolph Coors Co., 506 F.2d 934, 953 \(5th Cir.\)](#), rehearing denied, [509 F.2d 758 \(5th Cir.1975\)](#) (per curiam). The unrebutted testimony by Hallowell, Justice, and FRI's former vice-president, Jerry DeGarmo, established that CAT's viability depended upon securing and maintaining the 24-hour customer at the north terminus of its haul.⁵⁹ Moreover, CAT's invoices demonstrate that the last week it shipped stone to Basic Asphalt its revenue was approximately \$2,100. During that week a total of sixteen trailer-loads were delivered in a period of five days. By the beginning of November, CAT was delivering only two trailer-loads of stone per day to Rinker's non-24-hour plant at South Orange, and its revenue had dropped to approximately \$1,300 per week. From this evidence, a juror could reasonably [**95] infer that FRI's action in coercing the termination of CAT by Basic was a material cause of some economic damage to CAT.⁶⁰

case at hand. There is no evidence to suggest that Rinker was doing any more than shipping its own rock from Miami to its own asphalt plants in the Orlando area; in other words, Rinker's ability to satisfy its own rock needs in the Orlando area does not necessarily bear upon the demand of producers such as Basic for Miami rock. Moreover, Dicks himself conceded that if CAT had been able to stay in business long enough to reach its anticipated goal of hauling 1,000 tons a day at a competitive price Rinker South Orange may have agreed to stay open on a 24-hour basis in order to continue doing business with CAT. See Record at 1075-81.

⁵⁹ In [H & B Equipment Co. v. International Harvester, 577 F.2d 239 \(5th Cir.1978\)](#), a panel of the former Fifth Circuit stated that "isolated self-serving statements" of the plaintiff's corporate officers are insufficient to establish antitrust causation. In our view, *H & B Equipment* is distinguishable: There, statements by plaintiff's corporate officer provided the sole basis for an inference of causation. [Id. at 247](#). Nor did the plaintiff present any expert testimony as to its ability to penetrate the market and maintain a viable market position. *Id.* In the case at bar, Hallowell's testimony was corroborated by a former officer of FRI. Further, it is uncontested that each one-way haul by CAT which resulted from its inability to secure a 24-hour customer at the northern terminus resulted in a loss of revenue for that haul.

⁶⁰ The cases relied upon by FRI to demonstrate the absence of causation are readily distinguishable. For example, [Copper Liquor, Inc. v. Adolph Coors Co., 509 F.2d 758 \(5th Cir.1975\)](#) (per curiam), denying petition for rehearing, [506 F.2d 934](#), involved a complaint by a beer retailer who operated at a substantial profit both before and after the alleged antitrust violation. According to the plaintiff, his supply of Coors beer had been cut off because he failed to abide by the defendant's pricing and quality restrictions. The plaintiff, however, used Coors only as a "loss leader" in order to draw customers into the store to purchase other goods. The court rejected his claim of injury and damages because the plaintiff presented no itemized product-by-product records to show the impact on the sale of other products resulting from his loss of Coors beer. Essentially, the only evidence introduced was the plaintiff's gross bank deposit records, which did not reflect product-by-product effects. More importantly, however, although the plaintiff had available to him daily sales records which would have been extremely probative, he made no attempt to introduce these records. The court concluded that when relative degrees of profitability are concerned, as opposed to

[**96] B. Amount of Damages

[HN30](#) Once the fact of causation is established, the burden of proving damages is much less severe. [Hobart Brothers Co. v. Malcolm T. Gilliland, Inc.](#) 471 F.2d at 902; see [J. Truett Payne Co. v. Chrysler Motors Corp.](#), 451 U.S. at 566-67, 101 S. Ct. at 1929-30; [Zenith Radio Corp. v. Hazeltine Research](#), 395 U.S. at 124, 89 S. Ct. at 1577; [Malcolm v. Marathon Oil Co.](#), 642 F.2d at 858; [Household Goods Carriers' Bureau v. Terrell](#), 452 F.2d at 159. This rule of leniency with regard to proof of damages is necessary because:

[*786] any other rule would enable the wrongdoer to profit by his wrongdoing at the expense of his victim. It would be an inducement to make wrongdoing so effective and complete in every case as to preclude any recovery, by rendering the measure of damages uncertain. [Thus] . . . the wrongdoer shall bear the risk of the uncertainty which his own wrong has created.

[Bigelow v. RKO Radio Pictures](#), 327 U.S. at 264-65, 66 S. Ct. at 580; [**97] see [Lehrman v. Gulf Oil Corp.](#), 464 F.2d at 45. On the other hand, [HN31](#) although the question of damages requires that the court "enter into the realm of the imprecise and the uncertain," we must reverse the jury's verdict if it becomes apparent that its judgment was based on speculation and guesswork. [Zenith Radio Corp. v. Hazeltine Research](#), 395 U.S. at 124, 89 S. Ct. at 1577. Our task is to ensure that the jury rendered a just and reasonable estimate based on relevant data. *Id.*

FRI has argued vigorously that CAT's evidence with regard to the amount of damages is overly speculative and insufficient to support the verdict. In particular, FRI contends that testimony by plaintiff's expert, Dr. Frederick Raffa, as well as certain charts used by Dr. Raffa, were so deficient that they should have been held inadmissible. Our review of the record satisfies us that CAT's evidence of damages was barely sufficient to withstand a directed verdict.⁶¹ However, we have grave reservations regarding much of Dr. Raffa's testimony. Because we reverse and remand [**98] for a new trial on the basis of the erroneous per se instruction, in the interests of judicial economy we will discuss below our concerns about the evidence.

CAT's theory of damages was that had it been able to continue delivering to Basic it could have stabilized its costs and revenues to the point where it could have begun expanding its operation. Because FRI was the cause of its termination by Basic, then FRI is responsible for the loss of all future profits which could have been earned by CAT. [HN32](#) Loss of future profits is a well-established basis [**99] for determining the measure of economic injury resulting from an anticompetitive act which forces the victim out of business. See [H & B Equipment Co. v. International Harvester](#), 577 F.2d at 246-47; [Lehrman v. Gulf Oil Corp.](#), 464 F.2d at 44-45; [Household Goods Carriers' Bureau v. Terrell](#), 452 F.2d 152, 159-60 (5th Cir. 1971) (en banc). Accordingly, the trial court instructed the jury on this theory of future profits.⁶²

the destruction of a going concern, there can be no evidentiary substitute for accurate sales and inventory records. Clearly, *Copper Liquor* does not govern the case before this court.

Similarly, in [Shumate & Co. v. National Ass'n of Securities Dealers, Inc.](#), 509 F.2d 147 (5th Cir.), cert. denied, 423 U.S. 868, 96 S. Ct. 131, 46 L. Ed. 2d 97 (1975), plaintiff failed to produce any relevant data bearing upon injury and damages other than his own unsupported testimony. See also [Kestenbaum v. Falstaff Brewing Corp.](#), 514 F.2d 690 (5th Cir. 1975) (no injury from price fixing scheme where plaintiff conceded he would have voluntarily taken action which defendant sought to coerce, and where plaintiff failed to introduce any evidence of reduction in sales), cert. denied, 424 U.S. 943, 96 S. Ct. 1412, 47 L. Ed. 2d 349 (1976).

⁶¹ In particular, CAT's receipts demonstrate a clear decrease in revenues subsequent to its termination by Basic at the behest of FRI. See [Malcolm v. Marathon Oil Co.](#), 642 F.2d at 858-60 & n. 24 (when plaintiff has offered sufficient evidence of fact of damage directed verdict on *amount* of damages is proper only in most unusual circumstances).

⁶² The trial court stated in part:

[**100] The precise manner in which the plaintiff arrived at a calculation for lost future profits was hotly disputed at trial. The plaintiff relied exclusively on the testimony of Dr. Raffa, who took as his starting point the pro forma prepared by Hallowell during the planning stages of CAT.⁶³ The first [**787] page of the pro forma contained a breakdown of expected income from hauling both sand and stone; the income arrived at by Hallowell was 94.2 cents per running mile. The second page of the pro forma contained a breakdown of the estimated costs of operation, including driver's salaries, fuel, equipment payments, tires, insurance, repairs, licenses, bookkeeping and other overhead, phone bills, and turnpike tolls. Hallowell's pro forma arrived at an estimated cost of 75 cents per running mile, with an overall profit of 19.2 cents per running mile or 19.8 percent.

[**101] Using this pro forma as well as the actual revenues as reflected in CAT's invoices, Raffa established a historical revenue pattern. This revenue pattern included three specific historic periods: a start-up period during which CAT earned an average weekly revenue of approximately \$1,600; a normalized period during which CAT earned an average weekly revenue of approximately \$3,000 per week; and a slow down period beginning with CAT's termination by Southern Paving. Next, Raffa established a projection of the normalized period over time, using the base revenue of \$3,000 per week. In order to establish a projection of CAT's growth, Raffa relied upon two statistical proxies. With regard to CAT's sand hauling, Raffa relied upon the growth rate in residential building permit activity in the West Palm Beach area -- the area and industry in which CAT's sand would be utilized. As a proxy for CAT's rock hauling business, Raffa relied upon the Florida Department of State Transportation's historical data on asphalt road construction in the Central Florida area -- the likely destination of rock hauled by CAT. Weighing the relevant growth rates on the basis of those percentages of CAT's [**102] business respectively devoted to sand and rock hauling,⁶⁴ Raffa arrived at an estimated annual growth rate for CAT's business of 7.58%. Next, Raffa annualized the estimated weekly revenue of CAT during its normalized period. Multiplying this annualized revenue by the weighted growth rate, Raffa determined that CAT's revenue for 1980 had it continued in business would have been \$169,240. This revenue would have increased over a 10-year period, until by 1989 it would have amounted to \$303,638.

Next, Raffa computed expected annual costs. In doing so he relied exclusively upon the pro forma, as well as on interviews with Hallowell. He did not rely on actual costs as represented by cancelled checks. Based on the pro forma estimates he arrived at an annualized cost of \$123,720; when subtracted [**103] from the revenue figure this yielded a projected net profit for 1980 of approximately \$36,000. Over a ten-year period,⁶⁵ Raffa calculated that CAT's profits would have amounted to over \$500,000. Reduced by an annual interest rate of 8% this amounted to a present value of approximately \$355,000.

The use of a projection of anticipated profits by an antitrust plaintiff in proving damages is entirely acceptable so long as the projection when reduced to present cash value leads to a reasonable estimate of the damages caused by the violation based upon the evidence.

Now, you may elect to use any formula or theory that you consider reasonable for a reasonable estimate or an approximation provided that it is based upon the evidence in the case and the loss stated by the court. Now, in considering the elements of future profits and in determining what damages, if any, were sustained by the plaintiff, if it is entitled to recover, you are instructed that if because of the violation of the antitrust laws plaintiff was unable to earn that profit which it could have earned but for the violation of the antitrust laws, the plaintiff was, in fact, damaged . . .

Now, the fact that a plaintiff's business may have been new or unestablished is not fatal to the amount of damages constituting that profit.

Record at 1218.

⁶³This two-page pro forma was a statement of expected income and expenditures with regard to the planned operation of the new business. Record at 855. During CAT's existence the figures contained in the pro forma were never updated, despite changes in the costs of various items such as fuel.

⁶⁴The relevant growth rates were 10.48% for residential building, and 5.1% for road construction. Road hauling produced 57.7% of CAT's revenue, while sand hauling resulted in 43.3% of that revenue. Record at 863-66.

⁶⁵Dr. Raffa testified that he used a ten-year period because Department of Labor statistics indicated that Hallowell could reasonably be expected to continue working for that period of time. In addition, he relied upon Hallowell's own representations.

FRI's expert witness, Dr. Sanford Berg, used a similar methodology in that he relied upon the pro forma revenue estimates and calculated annualized figures based on the revenue during CAT's normalized period of operations. However, his sources differed in one significant respect: he did not rely upon the pro forma's cost estimates but chose instead to use cancelled business checks to reconstruct actual cash outlays during this period. According to Berg, he and [**104] an assistant reviewed each check drawn on CAT's bank account and attempted to place them into the cost categories used on the pro forma. It is not surprising that Dr. Berg arrived at a different conclusion as to CAT's profitability during the normalized [*788] period. Whereas Dr. Raffa had estimated annual costs at approximately \$123,000, Dr. Berg arrived at a figure of \$175,000. This figure translated into an annual loss of over \$18,000, or 11.7%. See Defendant's Exhibit 6.

This wide disparity in cost figures is partially explained by Dr. Berg's detailed itemization of the pro forma category listed as "bookkeeping, billing, overhead and supervision." According to the pro forma, the annual cost for these operations would have been \$10,000. Dr. Berg broke this category down further, however, and arrived at a much larger figure -- approximately \$41,000. A good deal of this difference lies in Hallowell's admission that his own salary was included in this fund.⁶⁶ In addition to these expenses which were not reflected in the pro forma estimates, Dr. Berg's investigation turned up an additional \$61,776 of debt for which CAT had not yet made payments.⁶⁷ Most of these [**105] expenses, such as withholding taxes, could be termed recurring expenses rather than start-up expenses, and hence would be incurred during any normalized period of operations.⁶⁸

[**106] Dr. Raffa testified that for a business as young as CAT he would not expect records of actual cash outlays to be entirely accurate. In his judgment, use of the pro forma was a reasonable source for his calculations. Dr. Raffa admitted, however, that he had not been provided copies of the cancelled checks prior to making his study of CAT's operations. He further conceded that he would prefer, when possible, to be provided an actual experience of costs. Finally, although he had made some effort to supplement the pro forma with evidence of CAT's actual expenses, he admitted relying upon Hallowell's representations that CAT's actual expenses had been close to those estimates provided by the pro forma.⁶⁹

⁶⁶ Thus, although the estimated cost for items in this category was \$10,000, Dr. Berg's calculation of checks actually made payable to Hallowell as salary amounted to almost \$22,000. This did not include other items also included in this category, such as road expense (\$6,500), car payments (\$2,800), and miscellaneous expenses (\$7,100).

⁶⁷ For example, although according to CAT's disbursements for salary it had been withholding federal and state income taxes from its employees, it had never actually paid such taxes to the authorities. Thus, CAT had incurred tax liability of over \$35,000. In addition, CAT had incurred a liability of over \$7,000 with the Florida Department of Transportation for payment of highway tolls.

⁶⁸ Implicit in the methodology used by both experts, the annualization of costs and revenues incurred during the normalized period of operation, was an effort to separate out recurring costs from start-up costs. Calculations based on the pro forma would facilitate this task, since each category could readily be assigned the label of either recurring or start-up costs. Dr. Berg testified that he encountered some difficulty in attempting to determine from the cancelled checks whether or not certain outlays belonged in one category or another. Dr. Berg further testified that occasionally he was not able to determine whether a particular expenditure was made during the normalized period as opposed to either the start-up period or the slow-down period. A case in point would be the downpayment on the trailers which CAT purchased. Because of manufacturing flaws in these trailers, which were returned several times to the manufacturer, CAT's deadline for the downpayment was delayed by several months. If the actual payment was made during the normalized period, the expense nonetheless should be considered a part of start-up expenses, including this expenditure during the normalized period would tend to skew Dr. Berg's calculation of annual expenses. On the other hand, since CAT intended to continue ordering sets of trailers at an increased rate, and not simply to operate on the first sets of trailers manufactured, it is possible that inclusion of this expense actually resulted in a more accurate calculation.

⁶⁹ In at least one category the pro forma clearly was inaccurate. Hallowell had based his fuel costs per mile upon an estimate that diesel fuel would cost 55 cents a gallon. Soon after CAT began operations, however, the price of fuel rose to approximately \$1. At one point during his testimony, Dr. Raffa indicated he relied on the original figure of 55 cents. At another point, he seemed to suggest that he had updated the cost to 85 cents a gallon. Even this estimate, however, falls far short of the mark.

[**107] The most problematic aspect of Dr. Raffa's reliance on the pro forma, however, was the mathematical conclusion contained in the document itself. In order to calculate revenue per running mile, Hallowell [*789] had used a figure of 548 miles, or one round trip, from Miami to Orlando and back. When calculating the cost per running mile, however, Hallowell had used a figure of 800 miles per round trip. Dr. Berg testified that use of the much larger figure when calculating costs would reduce considerably the calculation of cost per running mile. Dr. Raffa testified that he did not know why the differing mileage figures had been used. Various of CAT's witnesses, including Hallowell, were questioned at length as to use of the 800-mile figure; none of these witnesses provided a satisfactory explanation.⁷⁰

[**108] Although we are mindful of [HN33](#)⁷¹ the lesser standard of sufficiency which controls once the fact of causation has been established, an expert's projection of future profits must be supported by proven facts. See [Chrysler Credit Corp. v. J. Truett Payne Co.](#), 670 F.2d at 582; [Terrell v. Household Goods Carriers' Bureau](#), 494 F.2d at 24. The available evidence, however, suggests that the estimates of profits contained in the pro forma were distorted and that CAT's actual experience with expenditures differed significantly from those estimates. Moreover, Dr. Raffa not only failed to review available evidence of actual costs, but also failed to demonstrate why that evidence was not more accurate than the estimates upon which he relied.⁷¹ [**110] At retrial, therefore, the trial court should reconsider its decision to admit Dr. Raffa's testimony based upon the pro forma, unless CAT sufficiently explains the apparent inconsistencies in its pro forma and its failure to consider the evidence of actual costs. See [Georgia Kaolin Int'l v. M/V Grand Justice](#), 644 F.2d 412, 417 (5th Cir. 1981) [**109] (judgment based on testimony by expert who relied on demonstrably incorrect statistics cannot stand; case remanded to district court for redetermination of issue); [Eastern Air Lines, Inc. v. McDonnell Douglas Corp.](#), 532 F.2d at 998-1000 (where practical court should exclude particular assumptions or other aspects of expert testimony which considered individually do not meet minimum of probative value); [Herman Schwabe, Inc. v. United Shoe Machinery Corp.](#), 297 F.2d 906, 911-13 (2d Cir.) (expert testimony inadmissible where basic assumption as to market share plaintiff would have garnered is completely unsupported), cert. denied, 369 U.S. 865, 82 S. Ct. 1031, 8 L. Ed. 2d 85 (1962).⁷²

[*790] VI. CONCLUSION

⁷⁰ The thrust of Hallowell's explanation appears to be that although revenue was calculated on the basis of using one set of trailers during the first few months of CAT's operation, the costs were calculated upon the basis of the ideal utilization of CAT's resources at a time when it would have between 10 and 20 trailers on the road. Hallowell testified that maximum utilization would result when CAT would have sufficient equipment to run its tractors exclusively on the Florida Turnpike between the Palm Beach exit and the Orlando exit. At the same time, CAT would rely upon tractors stationed at these exits to actually conduct the shuttle operation of pulling each trailer to the various delivery and loading points. Apparently, the mileage between Turnpike exits would be approximately 800 miles per round trip, excluding the shuttle operations. Regardless of the viability of this plan, we agree with FRI that use of the two different mileage figures to calculate revenue per running mile results in a distortion of CAT's profit margin.

⁷¹ FRI cites [Copper Liquor, Inc. v. Adolph Coors Co.](#), 506 F.2d 934 (5th Cir.), aff'd on rehearing, 509 F.2d 758 (5th Cir. 1975) (per curiam), for the proposition that testimony as to lost future profits must be based upon the best available evidence. We would not go so far, however. In *Copper Liquor* the plaintiff had established a long track record of profitability, and had available to it accurate sales and inventory records. In such a situation, reliance on general operating statements and income tax records clearly is insufficient. *Copper Liquor* does not control when, as here, the plaintiff enjoyed only a brief existence. See [Greene v. General Foods Corp.](#), 517 F.2d 635, 665-66 & n. 23 (5th Cir. 1975) (to support jury verdict expert's assumptions and methodology need not be most preferable ones), cert. denied, 424 U.S. 942, 96 S. Ct. 1409, 47 L. Ed. 2d 348 (1976).

⁷² We note, in passing, that CAT seems to have proceeded under the assumption that in order to prove lost future profits it must demonstrate that the business destroyed was operating at a profit. Such is clearly not the law in this circuit. See [Terrell v. Household Goods Carriers' Bureau](#), 494 F.2d at 24 (plaintiff may proceed under lost profits theory even if business had never been profitable so long as each element of projection is supported by proven facts). Accord, [Murphy Tugboat Co. v. Crowley](#), 658 F.2d 1256, 1260-63 (9th Cir. 1981), cert. denied, 455 U.S. 1018, 102 S. Ct. 1713, 72 L. Ed. 2d 135 (1982). Thus, plaintiff's case for damages does not necessarily depend upon showing CAT's profit-making ability during the normalized period of operations. When, however, the expert's opinion is based on the assumption that an entity was profitable, then the validity of the expert's ultimate opinion depends upon the accuracy of that assumption.

710 F.2d 752, *790L^A1983 U.S. App. LEXIS 25371, **109

On the basis of the foregoing discussion, the judgment is reversed [**111] and the cause is remanded to the district court for retrial under the correct rule of reason theory of liability⁷³ and for retrial on the issue of damages.

REVERSED and REMANDED.

End of Document

⁷³ Should plaintiff choose to pursue a tying theory, and produce sufficient evidence to warrant same, a qualified "per se" instruction would be appropriate.

HN4 Justiciability, Case & Controversy Requirements

Standing involves both constitutional (case or controversy) requirements and prudential considerations.

Constitutional Law > ... > Case or Controversy > Standing > General Overview

HN5 Case or Controversy, Standing

U.S. Const. art. III, requires the party who invokes the court's authority to show that he personally has suffered some actual or threatened injury as a result of the putatively illegal conduct of the defendant, and that the injury fairly can be traced to the challenged action and is likely to be redressed by a favorable decision.

Constitutional Law > The Judiciary > Case or Controversy > Advisory Opinions

Environmental Law > Land Use & Zoning > Constitutional Limits

Constitutional Law > ... > Case or Controversy > Standing > Third Party Standing

HN6 Case or Controversy, Advisory Opinions

The plaintiff generally must assert his own legal rights and interests, and cannot rest his claim to relief on the legal rights or interests of third parties. In addition even when the plaintiff has alleged redressable injury sufficient to meet the requirements of U.S. Const. art. III, courts must refrain from adjudicating abstract questions of wide public significance which amount to generalized grievances, pervasively shared and most appropriately addressed in the representative branches. Finally, the plaintiff's complaint must fall within the zone of interests to be protected or regulated by the statute or constitutional guarantee in question.

Civil Procedure > ... > Justiciability > Standing > General Overview

[**HN7**](#) Justiciability, Standing

In considering the question of standing, both the trial and appellate courts must accept all material allegations of the complaint as true and must construe the complaint in favor of the plaintiff. Affidavits which particularize the allegations of fact must also be considered.

Constitutional Law > ... > Case or Controversy > Standing > General Overview

[**HN8**](#) Case or Controversy, Standing

Though the injury to a plaintiff need not be direct to satisfy the constitutional requirement, it must at least be traceable to the challenged action of the defendant and must be an injury that the requested legal action will be likely to redress.

Opinion by: LIVELY

Opinion

[*1222] LIVELY, Circuit Judge.

In this action three private air couriers sought to enjoin the Board of Governors of the Federal Reserve System (the Board) and the twelve regional Federal Reserve Banks from implementing an order which modified their check collection services. The program sought to be enjoined extended the time for presentment of checks and established [*2] a schedule of fees to be charged by Federal Reserve Banks for check collection services. The district court dismissed the action and this court granted an expedited appeal.

I.

For many years prior to 1980 the Federal Reserve Banks performed check collection services for member banks without charge. The earnings on reserves which member banks were required to maintain on deposit with the Federal Reserve Banks made this free service possible. As part of a general overhaul of the government's regulation of the banking industry Congress enacted the Monetary Control Act of 1980, Pub. L. 96-221, 94 Stat. 132 (The MCA). One feature [*1223] of the MCA is a provision by which many banks in the United States that are not now members will eventually be required to maintain reserve accounts with the Federal Reserve System. Further, services such as check clearing formerly provided to member banks only will be made available to all banks, regardless of whether or not they are members. The services will no longer be free of charge, however. [HN1](#) [up] Section 107 of the MCA added a new Section 11A to the Federal [*3] Reserve Act, codified as [12 U.S.C. § 248a \(1976 ed., Supp. IV\)](#):

[§ 248a. Pricing of services](#)

(a) Publication of pricing principles and proposed schedule of fees; effective date of schedule of fees

* The Honorable Eugene Siler, Judge, U.S. District Courts for the Eastern and Western Districts of Kentucky, sitting by designation.

Not later than the first day of the sixth month after March 31, 1980; the Board shall publish for public comment a set of pricing principles in accordance with this section and a proposed schedule of fees based upon those principles for Federal Reserve bank services to depository institutions, and not later than the first day of the eighteenth month after March 31, 1980, the Board shall begin to put into effect a schedule of fees for such services which is based on those principles.

(b) Covered services

The services which shall be covered by the schedule of fees under subsection (a) of this section are --

- (1) currency and coin services;
 - (2) check clearing and collection services;
 - (3) wire transfer services;
 - (4) automated clearinghouse services;
 - (5) settlement services;
 - (6) securities safekeeping services;
 - (7) Federal Reserve float; and
- (8) any new services which the Federal Reserve System offers, including **[**4]** but not limited to payment services to effectuate the electronic transfer of funds.

(c) Criteria applicable

The schedule of fees prescribed pursuant to this section shall be based on the following principles:

- (1) All Federal Reserve bank services covered by the fee schedule shall be priced explicitly.
- (2) All Federal Reserve bank services covered by the fee schedule shall be available to nonmember depository institutions and such services shall be priced at the same fee schedule applicable to member banks, except that nonmembers shall be subject to any other terms, including a requirement of balances sufficient for clearing purposes, that the Board may determine are applicable to member banks.
- (3) Over the long run, fees shall be established on the basis of all direct and indirect costs actually incurred in providing the Federal Reserve services priced, including interest on items credited prior to actual collection, overhead, and an allocation of imputed costs which takes into account the taxes that would have been paid and the return on capital that would have been provided had the services been furnished by a private business firm, except that the pricing **[**5]** principles shall give due regard to competitive factors and the provision of an adequate level of such services nationwide.
- (4) Interest on items credited prior to collection shall be charged at the current rate applicable in the market for Federal funds.

(d) Budgetary consequences of decline in volume of services

The Board shall require reductions in the operating budgets of the Federal Reserve banks commensurate with any actual or projected decline in the volume of services to be provided by such banks. The full amount of any savings so realized shall be paid into the United States Treasury.

In their complaint, filed February 17, 1983, the plaintiffs charged that the Board violated Section 107 of the MCA by directing the Reserve Banks to begin implementing previously determined new fee schedules, deposit deadlines and funds availability schedules for check collection services on **[*1224]** February 24, 1983. The plaintiffs asserted that the fees, presentment and availability schedules violated the MCA by tending to create a monopoly or near monopoly for the Federal Reserve Banks in the market for check collection and transportation services in violation of **[**6]** a congressional mandate that Reserve Banks compete on a fair and equal basis with their commercial clearing bank counterparts. This unfair competition was achieved, the plaintiffs claimed, by establishing fee schedules which failed to cover the full cost of the services offered by the Federal Reserve Banks. The plaintiffs charged that the fee schedules for use of the Interdistrict Transportation System (ITS), a component of the check clearing operations conducted by the Federal Reserve System had no relation to the cost of services actually offered and reflected "a deliberate pattern of predatory pricing." The ITS performs services for the Federal Reserve Banks and the banks which use their check collection services which is similar to that performed by the plaintiffs and other air couriers for private clearing banks and their check collection customers.

The plaintiffs based their demand for injunctive relief on claimed violation of the pricing criteria contained in [12 U.S.C. § 248a\(c\)](#), *supra*, alleged failure to publish the plan for comment sufficiently in advance of the effective date and an asserted violation of [Section 2](#) of the Sherman Act, [15 U.S.C. § 2](#) [**71](#) (1976).¹ The plaintiffs filed a motion for a temporary restraining order with supporting affidavits and the Board and one Reserve Bank filed responses in opposition to the motion, also supported by affidavits. After conducting a hearing the district court dismissed the action on February 22, 1983, upon concluding that the plaintiffs lacked standing to sue under the MCA and that the complaint failed to state a claim upon which relief could be granted under the Sherman Act. Both the district court and this court denied motions to stay the judgment of dismissal.

[**8] II.

We agree with the district court that the plaintiffs lack standing under the relevant statute,² the MCA. The plaintiffs are not banks and do not function as check processing or clearing centers. They are private air couriers which contract with banks other than Federal Reserve Banks that perform check collection services. None of the banks which utilize the transportation services of the plaintiffs joined in bringing this action.

A.

The requirement that a plaintiff must have "standing" in order to bring an action in a federal court has been long recognized, and has been the subject of many decisions. The most recent Supreme Court statement on the subject is contained [\[**9\]](#) in [Valley Forge Christian College v. Americans United for Separation of Church and State, Inc., 454 U.S. 464, 70 L. Ed. 2d 700, 102 S. Ct. 752 \(1982\)](#). In *Valley Forge* the court noted that [HN4](#)[↑] standing involves both constitutional ("case" or "controversy") requirements and prudential considerations. After discussing some ambiguity concerning the nature of the standing requirement arising from earlier decisions, the Court identified the "irreducible minimum" constitutional requirement as follows:

A recent line of decisions, however, has resolved that ambiguity, at least to the following extent: at an irreducible minimum, [HN5](#)[↑] Art. III requires the party who invokes the court's authority to "show that he personally has suffered some actual [\[*1225\]](#) or threatened injury as a result of the putatively illegal conduct of the defendant," [Gladstone Realtors v. Village of Bellwood, 441 U.S. 91, 99 \[60 L. Ed. 2d 66, 99 S. Ct. 1601\] \(1979\)](#), and that the injury "fairly can [\[**10\]](#) be traced to the challenged action" and "is likely to be redressed by a favorable decision," [Simon v. Eastern Kentucky Welfare Rights Org., 426 U.S. 26, 38, 41 \[48 L. Ed. 2d 450, 96 S. Ct. 1917\] \(1976\)](#). In this manner does Art. III limit the federal judicial power "to those disputes which confine federal courts to a role consistent with a system of separated powers and which are traditionally thought to be capable of resolution through the judicial process." *Flast v. Cohen, supra* at 97.

[454 U.S. at 472](#) (footnote omitted). The Court also outlined the governing prudential considerations:

Beyond the constitutional requirements, the federal judiciary has also adhered to a set of prudential principles that bear on the question of standing. Thus, this Court has held that [HN6](#)[↑] "the plaintiff generally must assert his own legal rights and interests, and cannot rest his claim to relief on the legal rights or interests of third parties." *Warth v. Seldin*, 422 U.S. at 499. In addition even when the plaintiff has alleged redressable injury [\[**11\]](#) sufficient to meet the requirements of Art. III, the Court has refrained from adjudicating "abstract

¹ Though the plaintiffs did not cite the Administrative Procedure Act (APA), [5 U.S.C. § 551 \(1976\)](#) et seq., in their complaint, it is evident from the fact that they sought to enjoin action of the Federal Reserve "not in accordance with law" that they were seeking review under the APA. [HN2](#)[↑] More specifically, [5 U.S.C. § 706\(2\)\(A\)](#) provides for review of agency action which is "arbitrary, capricious, an abuse of discretion or otherwise not in accordance with law." The plaintiffs did assert subject matter jurisdiction under [28 U.S.C. § 1331](#) (federal question jurisdiction).

² [HN3](#)[↑] Section 10(a) of the APA, [5 U.S.C. § 702](#), limits standing to a person who suffers legal wrong because of an agency action or is adversely affected or aggrieved by such action "within the meaning of a relevant statute"

questions of wide public significance" which amount to "generalized grievances," pervasively shared and most appropriately addressed in the representative branches. *Id.* at 499-500. Finally, the Court has required that the plaintiff's complaint fall within "the zone of interests to be protected or regulated by the statute or constitutional guarantee in question." *Association of Data Processing Service Orgs. v. Camp*, 397 U.S. 150, 153 [25 L. Ed. 2d 184, 90 S. Ct. 827] (1970).

[454 U.S. at 474-75](#) (footnotes omitted). Other federal courts have been required to deal with the standing issue on many occasions. We note particularly that the opinion of the court in *Community Nutrition Institute v. Block*, 225 U.S. App. D.C. 387, 698 F.2d 1239, 1245-46 (D.C. Cir. 1983), contains a valuable discussion of the principles of standing. See also *Young v. Klutznick*, 652 F.2d 617 (6th Cir. 1981), cert. denied, 455 U.S. 939, 71 L. Ed. 2d 650, 102 S. Ct. 1430 (1982).

B.

Standing is **[**12]** a threshold question in every federal case. [HN7](#) In considering the question both the trial and appellate courts must accept all material allegations of the complaint as true and must construe the complaint in favor of the plaintiff. Affidavits which particularize the allegations of fact must also be considered. *Warth v. Seldin*, 422 U.S. 490, 501, 45 L. Ed. 2d 343, 95 S. Ct. 2197 (1975). Treating the complaint before us in this manner, the plaintiffs will lose business because their bank customers which provide check collection services will be unable to compete with the Federal Reserve Banks because of their below-cost pricing and will stop utilizing the services of private air couriers. Several affidavits by bank officials filed in support of the plaintiffs' position contain this prediction. The fact that the plaintiffs will suffer indirect rather than direct injury as a result of the Board's action does not necessarily deprive them of standing for failure to meet the constitutional requirement of injury. The Court discussed this issue in *Warth v. Seldin, supra*, 422 U.S. at 504-05: **[**13]**

The fact that the harm to petitioners may have resulted indirectly does not in itself preclude standing. When a governmental prohibition or restriction imposed on one party causes specific harm to a third party, harm that a constitutional provision or statute was intended to prevent, the indirectness of the injury does not necessarily deprive the person harmed of standing to vindicate his rights. E.g., *Roe v. Wade*, 410 U.S. 113, 124 [35 L. Ed. 2d 147, 93 S. Ct. 705] (1973). But it may make it substantially more difficult **[*1226]** to meet the minimum requirement of Art. III: to establish that, in fact, the asserted injury was the consequence of the defendants' actions, or that prospective relief will remove the harm.

[HN8](#) Though the injury to a plaintiff need not be direct to satisfy the constitutional requirement, it must at least be traceable to the challenged action of the defendant and must be an injury that the requested legal action will be likely to redress. In *Simon v. Eastern Kentucky Welfare Rights Organization*, 426 U.S. 26, 48 L. Ed. 2d 450, 96 S. Ct. 1917 (1976), **[**14]** the Court found that plaintiffs who claimed they would be denied medical services by hospitals which would refuse to admit indigent patients as the result of a ruling of the Internal Revenue Services lacked standing to contest validity of the ruling. The Court found it purely speculative whether a hospital's denial of services to one of the plaintiffs could fairly be traced to the IRS ruling, and stated the constitutional requirement of injury as follows:

"Although the law of standing has been greatly changed in [recent] years, we have steadfastly adhered to the requirement that, at least in the absence of a statute expressly conferring standing, federal plaintiffs must allege some threatened or actual injury resulting from the putatively illegal action before a federal court may assume jurisdiction." *Linda R. S. v. Richard D.*, 410 U.S. at 617 ²² In other words, the "case or controversy" limitation of Art. III still requires that a federal court act only to redress injury that fairly can be traced to the

²² The reference in *Linda R.S.* to "a statute expressly conferring standing" was in recognition of Congress' power to create new interests the invasion of which will confer standing. See 410 U.S., at 617 n. 3; *Trafficante v. Metropolitan Life Ins. Co.*, 409 U.S. 205 [34 L. Ed. 2d 415, 93 S. Ct. 364] (1972). When Congress has so acted, the requirements of Art. III remain: "The plaintiff still must allege a distinct and palpable injury to himself, even if it is an injury shared by a large class of other possible litigants." *Warth v. Seldin, supra*, at 501. See also, *United States v. SCRAP*, 412 U.S. 669 [37 L. Ed. 2d 254, 93 S. Ct. 2405] (1973); cf. *Sierra Club v. Morton, supra* [405 U.S. 727], at 732 n. 3.

challenged action of the defendant, and not injury that results from the independent action of some third party not before the court.

[**15] [426 U.S. at 41-42.](#)

The defendants argue that it is purely speculative whether any injury plaintiffs might suffer from business decisions of their present customers would result from the implementation of new schedules of fees and presentation times by the Board. They rely principally on this court's decision in [Young v. Klutznick, supra](#), where the injury complained of would occur only if the Michigan legislature took or refrained from taking actions which might result in a dilution of representation in Congress for residents of Detroit. This case is distinguishable. Here, if the affidavits of customers of the air couriers are credited, these couriers will suffer economic losses flowing from actions which the private banks will take in response to the revised schedules of the Federal Reserve Banks. Though the injury alleged by the plaintiffs is indirect, it is "distinct and palpable" and "fairly traceable" to the action of the Board of Governors. [Duke Power Co. v. Carolina Environmental Study Group, Inc., 438 U.S. 59, 72, 57 L. Ed. 2d 595, 98 S. Ct. 2620 \(1978\)](#). We believe the plaintiffs have sufficiently alleged a "personal" [**16] stake," *Id.*, in the outcome of the controversy and have demonstrated a likelihood that their injury would be redressed by a favorable decision. Thus they have satisfied the constitutional requirements for standing. [Community Nutrition Institute v. Block, supra, 698 F.2d at 1244.](#)

C.

Even though the constitutional requirements for standing are satisfied, those based on prudential considerations must also be met in order for a plaintiff to go forward with an action. In [Association of Data Processing Service Organizations, Inc. v. Camp, 397 U.S. 150, 153, 25 L. Ed. 2d 184, 90 S. Ct. 827 \(1970\)](#), the Supreme Court described the non-constitutional requirement [*1227] which is pertinent to this case as follows:

HNg[↑] It [the question of standing] concerns, apart from the "case" or "controversy" test, the question whether the interest sought to be protected by the complainant is arguably within the zone of interests to be protected or regulated by the statute or constitutional guarantee in question.

We have examined the text of Section 107 of [**17] the MCA in vain for any indication that Congress sought to protect the competitive position of private air couriers in requiring the Board of Governors to adopt and publish a set of pricing principles and a proposed schedule of fees for its services. Among the covered services for which a schedule of fees is required is "check clearing and collection services." [12 U.S.C. § 248a\(b\).](#) The statute does not break these services down into their component parts. There is no indication that Congress was concerned with the source of the various components of these services. What is clear is that the covered services offered by Federal Reserve Banks are to be priced explicitly, are to be made available to nonmember depository institutions at the same fees charged member banks, and that "over the long run, fees shall be established on the basis of all direct and indirect costs actually incurred in providing the Federal Reserve services priced. . . ." U.S.C. [§ 248a\(c\).](#) These criteria are concerned with the depository institutions which use the services offered by the Federal Reserve, not with third parties who provide similar services, and certainly not with others who [**18] furnish some of the components of the services offered by such third parties. We find the legislative history of the MCA equally devoid of any indication that Congress intended to protect the competitive position of the plaintiffs. There are references in the floor debate on the bill which became the MCA to competition in bank services by the "private sector." E.g., remarks by Senator Proxmire, 126 Cong. Rec. 53167 (daily ed. March 17, 1980). However, these references are to the banks and clearing houses which provide "both complementary and substitute systems to the Federal Reserve." *Id.* There is no indication of congressional concern with the means by which the private sector operates the complementary and substitute systems. House Conference Report No. 96-842, reprinted in [1980] U.S. Code Cong. & Adm. News, Vol. 1, p. 301, notes that the Federal Reserve Board is required to make an annual detailed report to Congress of its costs for the services offered and the means by which fees are determined "and the impact of its service offerings and the fees charged on competing or potentially competing service providers, depository institutions and private consumers." The [**19] "service providers" are those private institutions offering check clearing services, not third parties such as the plaintiffs which perform some of the steps in the check clearing

process. We conclude that the air couriers are not "service providers," and it is clear they are neither depository institutions nor private consumers.

The only case similar to the present case of which we are aware is [Bank Stationers Association v. Board of Governors, 704 F.2d 1233 \(11th Cir. 1983\)](#). There printers of personal checks brought suit to enjoin the Federal Reserve Board of Governors from charging fees for automated clearing house services which are insufficient to cover the cost of providing such services. Automated clearinghouse services make transfers by computer, which eliminate the need for printed checks. The court held that the plaintiffs had sufficiently alleged injury in fact, but had not demonstrated that they were arguably within the zone of interests which Congress sought to protect in enacting the MCA. Like the stationers, the air couriers do not provide check clearing services. They only perform functions for those private check clearing establishments which provide **[**20]** such services and those depository institutions which use such private providers. The competitive concerns of the statute do not reach the level of the plaintiffs' activities. Thus we conclude they are not arguably within the zone of interests which Congress sought to protect in enacting the MCA.

[*1228] III.

The other ground on which the plaintiffs sought injunctive relief requires little discussion. [HN10](#) [Section 2](#) of the Sherman Act makes "every person" who monopolizes, attempts to monopolize, or combines or conspires with any other person to monopolize, trade or commerce among the states guilty of a misdemeanor. [15 U.S.C. § 2 \(1976\)](#). The plaintiffs contend that the Federal Reserve Banks are corporations and therefore persons within the Sherman Act which defines "persons" to include corporations.

The district court held that none of the defendants in this action is a person within the meaning of this [antitrust law](#). We agree. The argument of the plaintiffs overlooks the fact that the Federal Reserve Banks are not private business corporations, but are part of a **[**21]** system created by Congress to perform important governmental functions. The Federal Reserve System, consisting of the Board of Governors and the twelve Federal Reserve Banks, functions as the nation's chief money manager. It is this nation's central bank, performing a vital governmental role. The court in [Federal Reserve Bank of Boston v. Commissioner of Corporations and Taxation, 499 F.2d 60, 62-63 \(1st Cir. 1972\)](#), described this role as follows:

While savings and loan associations may in many ways be analogized to private corporations, federal reserve banks, by contrast, are plainly and predominantly fiscal arms of the federal government. Their interests seem indistinguishable from those of the sovereign. . . .

There are twelve such banks in the nation, of which the plaintiff is one. They were created and are operated in furtherance of the national fiscal policy. They are not operated for the profit of shareholders, and do not provide ordinary commercial banking services; their stockholders, the member banks, lack the powers and rights customarily vested in shareholders of a private corporation. Federal reserve banks act as depositories for money **[**22]** held in the United States Treasury and as fiscal and monetary agents of the United States. [12 U.S.C. § 391](#). They hold the legal reserves of member banks, issue currency, facilitate check clearance and collection, and have supervisory duties as to member banks. They also provide important services for the Treasury with respect to the public debt and the issuance, handling and redemption of government securities. The limited income generated is used to pay expenses and dividends limited to 6 percent. Any remaining earnings are paid into the surplus fund, [12 U.S.C. § 289](#), where they may be used by the United States Treasury to supplement the gold reserve. Should a federal reserve bank go into liquidation, any surplus becomes the property of the United States, [12 U.S.C. § 290](#). See generally Board of Governors, The Federal Reserve System: Purposes and Functions (5th ed. 1969).

(Footnote omitted).

[HN11](#) As an agency of the federal government the Federal Reserve System may not be sued under the Sherman Act. In [Sea-Land Service, Inc. v. Alaska Railroad, 212 U.S. App. D.C. 197, 659 F.2d 243 \(D.C. Cir. 1981\)](#), **[**23]** cert. denied, 455 U.S. 919, 71 L. Ed. 2d 459, 102 S. Ct. 1274 (1982), the court held that an entity wholly owned and operated by the United States was not amenable to suit under the Sherman Act. See also [Champaign-Urbana News Agency, Inc. v. J.L. Cummins News Co., Inc., 632 F.2d 680 \(7th Cir. 1980\)](#). The plaintiffs

argue that *Sea-Land Service* is not controlling because there the government was the sole owner of the railroad whereas it is not the sole owner of the Federal Reserve Banks, which do have private shareholders. We think this distinction is immaterial. It is the role of the Federal Reserve System as manager of the fiscal affairs of the federal government and the money supply of the nation which places the Reserve Banks outside the Sherman Act definition of persons. In a different context the Supreme Court has held that where monopoly results from "valid governmental action, as opposed to private action, no violation of the [Sherman] Act can be made out." [Eastern Railroad Presidents Conference v. Noerr, Motor Freight, Inc., 365 U.S. 127, 136, 5 L. Ed. 2d 464, 81 S. Ct. 523 \(1961\)](#). In promulgating the [*1229] [**24] schedules complained of by the plaintiffs the Board was following the directions of Congress in the MCA; it was engaged in "valid governmental action."

The judgment of the district court is affirmed.

Opinion by: PETTINE

Opinion

Opinion

PETTINE, SR. J.: This case presents a broad antitrust challenge by an independent auto body repair shop to the practices employed by Aetna Casualty & Surety Company (Aetna) to settle claims in Rhode Island. The plaintiff's essential claim is that the defendant has combined and conspired with others to coerce and intimidate independent automobile repair shops to accept insufficient remuneration for the services. The defendant is said to have carried out this conspiracy in violation of [Section 1](#) of the Sherman Act.¹ Plaintiff seeks treble damages and injunctive relief from this Court pursuant to [15 U.S.C. §§ 15](#) and [26](#). The complaint also alleges a state law claim for slander the defendant has moved for summary judgment on both counts. For the reasons set forth below, the defendant's motion is granted in part and denied in part.

¹ [Section 1](#) of the Sherman Act provides that:

"Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint or with foreign nations, is hereby declared to be illegal. Every person who shall make any contract or engage in any combination or conspiracy hereby declared to be illegal shall be deemed guilty of a felony, and, on conviction thereof, shall be punished by fine not exceeding one million dollars if a corporation, or, if any other person, one hundred thousand dollars, or by imprisonment not exceeding three years, or by both said punishments, in the discretion of the court."

[15 U.S.C. § 1](#).

[*2] I. Facts and Allegations

The Court will consider first the antitrust claims made by plaintiff. The plaintiff makes the following four allegations:

- (1) the defendant has established vertical provider agreements with certain recommended or preferred repair shops which fix the price of automobile repairs;
- (2) the defendant has engaged in a horizontal price-fixing conspiracy with other insurance companies;
- (3) the defendant has combined with its insureds to aggregate buying power and thereby restrain trade in the automobile repair industry; and
- (4) the defendant has combined with its insureds, certain preferred shops, and certain independent damage appraisers to boycott plaintiff's shop.²

[*3] Before analyzing these specific claims, a general description of the claims settlement practices used by the automobile insurance industry in general and by Aetna in particular may be useful.

The focus of this case is on the market interaction of automobile insurance companies and automobile repair shops. Such interaction is inevitable given the nature of the parties' respective businesses. An automobile insurance company in the course of its business issues policies of insurance which obligate it to undertake the repair of damaged automobiles owned by its insureds. In theory the insurance company could discharge its obligations under the insurance policy after the occurrence of an insurable event by performing any necessary repair work itself. In general, however, insurance companies have not chosen to pursue this option. Instead, they allow their insureds to select an automobile repair shop at which repairs can be performed, and agree to reimburse their insureds for the cost of such repairs.

The potential problems which may be created by this system of reimbursement are obvious. If an insured is guaranteed reimbursement up to any amount spent on repairs, there will be **[*4]** little incentive to shop around to secure an advantageous price for repair work. Any money spent will ultimately be reimbursed, so an insured will be relatively indifferent in choosing between high-priced and low-priced repair shops.

Automobile insurance companies deal with this problem by specifying in the contract of insurance that they will only be responsible for the competitive cost of repair. If the insured incurs expenses in excess of the competitive cost of repair, he will have to pay the excess out of his own pocket. This arrangement gives the insured a powerful incentive to shop around until he finds a repair shop that is willing to work for the competitive price specified by the insurance company.

Problems with this approach may arise if the insurance company has set the competitive cost for repair work at a price which is so low that insureds find it difficult to locate a repair shop that is willing to perform the necessary repairs at the specified price. To ensure customer satisfaction, the insurance company may have to identify for its insureds several repair shops that are willing to perform repair work for the competitive price established by the company. **[*5]** This ability to recommend particular shops may in turn give the insurance company significant market leverage in dealing with repair shops. For example, it would be possible for an insurance company to agree to recommend a substantial volume of business to repair shops that are willing to work for a lower price than is usually charged.

² Plaintiff also contends that agreements between the defendant and certain insurance adjustment firms violate the Sherman Act. Objection and Opposition at 12. But plaintiff fails to advance any theory under which the Court could find such contracts to be illegal restraints of trade. It does not suggest that the contracts with adjusters by themselves restrain trade, nor does it indicate that such agreements facilitate other types of illegal combinations. The Court therefore concludes that plaintiff's allegations as to the illegality of the defendant's agreements with insurance adjusters are without merit.

Aetna has submitted detailed affidavits which describe the specific procedures it uses in settling claims. The contents of these affidavits have not been directly controverted by the plaintiff. The defendant's submissions state that when an automobile owned by an Aetna insured is damaged, the insured is requested to have the damaged vehicle inspected before it is repaired. The insured is encouraged to use one of Aetna's drive-in claim centers, but he or she is not required to do so. After inspecting the car, an Aetna appraiser will prepare an estimate of the competitive cost of replacement parts, the amount of time required to make the necessary repairs, and the hourly rate charged for labor. Aetna frequently uses a publication known as a crash manual to determine the amount of time required for a particular job and the suggested retail prices [*6] for replacement parts. The third component -- the hourly labor rate -- is determined through an informal survey of rates being charged by various local shops. Aetna attempts to set the rate which it will pay at the lowest level that the insured could obtain on his own without undue inconvenience.

After receiving their estimate, Aetna's policyholders remain free to select the repair shop at which they wish to have repair work done. If the shop selected is unwilling to work for the amount of Aetna's estimate, Aetna will attempt to negotiate an acceptable price. If negotiations fail, the car owner must choose between paying any amount in excess of the estimate himself or having his car repaired elsewhere. Aetna, however, guarantees its insureds that repairs can be obtained for the amount of its estimate, and it will furnish its insureds with the names of two or three repair shops that will perform the necessary work for the estimated amount. Aetna states that it selects the shops that it recommends based on its experience with shops in the area. It denies having any agreement with the shops that it recommends whereby the insurance company agrees to recommend such shops in return [*7] for a commitment by the recommended or preferred shop to accept Aetna's estimate. Aetna's affidavits also state that it determines the competitive cost of repairs unilaterally and independently without consultation with other insurance companies.

II. Summary Judgment Standard

Aetna's submissions must be viewed in light of the standards which govern motions for summary judgment. Because the question of the appropriateness of summary judgment in this case is a close one, the Court deems it advisable to set forth the applicable standard at some length.

Rule 56 of the Federal Rules provides that a court may not grant summary judgment unless it is satisfied that there are no genuine issues of material facts and that the movant is entitled to judgment as a matter of law. Fed. R. Civ. P. 56(c). The party seeking summary judgment has the burden of affirmatively demonstrating that there is no genuine issue of fact on every material issue raised by the pleadings. Adickes v. S.H. Kress & Co., 398 U.S. 144, 159-60 (1970); Mack v. Cape Elizabeth School Board, 553 F. 2d 720, 722 (1st Cir. 1977). This is so even if the movant is the defendant, and would have no burden whatsoever if the [*8] case were to go to trial. Mack v. Cape Elizabeth School Board, supra, at 722. In determining whether genuine issues exist, the Court is required to view the record in the light most favorable to the opponent of the motion, and must indulge all reasonable inferences favorable to the opponent. Thyssen Plastik Anger KG v. Induplas, Inc., 596 F. 2d 400, 401 (1st Cir. 1978); Hahn v. Sargent 523 F. 2d 461, 464 (1st Cir. 1975), cert. denied, 425 U.S. 904 (1976).

The First Circuit requires this Court to be highly circumspect in granting summary judgment. It has held that summary judgment is not appropriate where there exists the "slightest doubt" as to any material fact. United States v. DelMonte de Puerto Rico, Inc., 586 F. 2d 870, 872 (1st Cir. 1978) (quoting Peckham v. Ronrico Corp., 171 F. 2d 653, 657 (1st Cir. 1948)). The United States Supreme Court has likewise counselled that "summary procedures should be used sparingly in complex antitrust litigation where motive and intent play leading roles, the proof is largely in the hands of the alleged conspirators, and hostile witnesses thicken the plot." Poller v. Columbia Broadcasting System, Inc., 368 U.S. 464, 473 (1962) (footnote omitted). [*9]³

³ The Court is nevertheless aware that the First Circuit has recently warned that Poller should not "become a magic wand waved indiscriminately by those opposing summary judgment motions in antitrust actions." White v. The Hearst Corp., 669 F. 2d 14, 17 (1st Cir. 1982), quoting Mutual Fund Investors v. Putnam Management Co., 553 F. 2d 620, 624 (9th Cir. 1977).

The Court recognizes, however, that summary judgment may be warranted even in the litigation of complex antitrust cases. The Supreme Court has made it clear that [Rule 56](#) cannot be read out of antitrust cases, and that plaintiffs should not be afforded a full-dress trial if the trial court is satisfied that there exists no significant probative evidence tending to support the complaint. [*First National Bank of Arizona v. Cities Service Co., 391 U.S. 253, 289-90 \(1968\); White v. The Hearst Corp., 669 F. 2d 14, 17 \(1st Cir. 1982\).*](#)

III. Agreements Between Aetna and Preferred Automobile Repair Shops

Turning now to a consideration of plaintiff's allegations in light of the summary judgment standard, the Court will analyze first what appears to be the plaintiff's principal contention.⁴ The plaintiff maintains that [*10] Aetna has entered into price-fixing agreements with certain preferred auto body repair shops, and that such agreements are per se illegal under the Sherman Act. The defendant makes three arguments in response. First, it contends that no such agreements exist. Second, it contends that even if such agreements exist, they are immune from antitrust scrutiny by reason of the McCarran-Ferguson Act, [*15 U.S.C. §§ 1011 et seq.*](#) Finally, defendant maintains that vertical agreements between insurance companies and automobile repair shops (sometimes referred to as provider agreements) do not contravene [Section 1](#) of the Sherman Act. These contentions will be considered seriatim.

[*11] A. Proof of the Agreement

To prove a violation of [Section 1](#) of the Sherman Act, plaintiff must first show that the defendant entered into a contract, combination or conspiracy. As the First Circuit recently observed, "in the field of Sherman Act violations a conspiracy, as in other proscribed conspiracies, imports a plurality of persons acting in concert to attain a common goal or purpose." [*White v. The Hearst Corp., 669 F. 2d 14, 18 \(1st Cir. 1982\).*](#) See [*American Tobacco Co. v. United States, 328 U.S. 781, 810 \(1946\)*](#). In this case, the defendant contends that it did not enter into any agreement with automobile repair shops, and that the necessary concert of action is therefore lacking.

The defendant has supported this contention by submitting affidavits which flatly deny the existence of any agreement with an auto body repair shop with respect to anything other than the price to be charged for a particular job. Despite these sworn submissions, the Court believes that a triable issue of fact exists on this question. The defendant admits that it recommends particular repair shops if its policyholders request a recommendation. Aetna also admits that it determines which shops [*12] to recommend by considering which shops have been willing to work for the amount of Aetna's estimate. The repair shops which have been recommended are no doubt aware of this, and are likewise aware that an increase in rates which Aetna deems unacceptable will jeopardize future referrals.

While the question is a close one, the Court believes that the economic realities of this situation are such that a reasonable trier of fact could infer the existence of informal agreements between Aetna and the repair shops agree to accept Aetna's the repair shops that it recommends, whereby such shops agree to accept Aetna's estimate in return for receiving referrals from Aetna. It is true that any such agreement does not guarantee a shop that it will receive a specific amount of business. It is also true that repair shops remain free at any time to alter their prices if

⁴ A threshold objection by defendant to this Court's jurisdiction can be disposed of without extended discussion. The defendant contends that the Court lacks subject matter jurisdiction over this case because plaintiff has failed to establish that the alleged restraint of trade affects interstate commerce. See [*15 U.S.C. § 1*](#) (prohibiting "restraint of trade among the several States, or with foreign nations . . ."). The defendant concedes that many of the parts and supplies which plaintiff purchases in the course of its business come from outside of Rhode Island. Defendant's Memorandum of Law at 24. The defendant argues, however, that the effect of any alleged illegalities is merely to divert business from one body shop to another without affecting the total volume intrastate business or the total amount of parts and supplies purchased in interstate commerce. However, if plaintiff is successful in showing that the provider agreements between Aetna and certain body shops are used to limit the quality of repair work performed, the requisite effect on interstate commerce could be shown. This possibility that the defendant's practices as a matter of practical economics may affect interstate commerce is sufficient to satisfy the Sherman Act's jurisdictional requirement. [*McLain v. Real Estate Board of New Orleans, Inc., 444 U.S. 232, 242-43 \(1980\); Cordova Simonpetri Insurance Agency, Inc. v. Chase Manhattan Bank N.A., 649 F. 2d 36, 45 \(1st Cir. 1981\).*](#)

they are willing to risk a loss of Aetna referrals. This, however, suggests only that any agreement which exists is not very specific and can be altered at the will of the parties. It does not affirmatively demonstrate a lack of concerted action.

On similar facts, the district court in *Quality Auto Body, Inc. v. Allstate* [*13] *Insurance Co., 1980-2 TRADE CASES P63,507 (N.D. Ill. 1980)*, aff'd, *660 F. 2d 1195 (7th Cir. 1981)*, cert. denied, *102 S. Ct. 1717 (1982)*, reached the same conclusion. It noted that:

The court would be blind to economic reality, however, if it did not recognize that the policies of the defendants, well known to every body shop, create powerful incentives to adhere to the insurance companies' guidelines. Body shops know that if they follow the prevailing competitive rate, they can expect to have insurance company work referred to them. These incentives and this knowledge could be said to create informal vertical agreements between the insurance companies and certain body shops. Indeed, it appears that in some manner each insurance company communicates its guidelines to the shops with which it deals, and that shops following these guidelines are awarded by being placed on each company's list (however informally that list is maintained) of preferred shops. From these facts, the trier of fact could draw the inference that at least some body shops have agreed to perform body work for a set price. Thus, viewing the facts in the light most favorable to the plaintiff, the court will, [*14] for the purposes of this motion, assume that informal vertical arrangements, between the defendants and certain "preferred" body shops, exist. Accordingly, these practices, in addition to the explicit agreements that are a part of the Allstate direct repair program must be scrutinized under the Act.

Id. at 76,694-95.

B. McCarran-Ferguson Immunity

The McCarran-Ferguson Act provides in relevant part that the Sherman Act and Clayton Act "shall be applicable to the business of insurance to the extent that such business is not regulated by State law." *15 U.S.C. § 1012(b)*. The Act further provides that, "Nothing contained in this Act shall render the said Sherman Act inapplicable to any agreement to boycott, coerce, or intimidate, or act of boycott, coercion, or intimidation." *15 U.S.C. § 1013(b)*. The Act thus exempts the provider agreements in question from the operation of the antitrust laws only if: (1) they constitute the "business of insurance"; (2) they are regulated by state law; and (3) they do not constitute boycotts, coercion, or intimidation. *Group Life & Health Insurance Co. v. Royal Drug Co., 440 U.S. 205, 210 n. 4 (1979)*.

The plaintiff argues that the defendant's [*15] provider agreements do not constitute the business of insurance, and therefore are not exempt under McCarran-Ferguson. It relies primarily on the Supreme Court's decision in *Royal Drug*.⁵ That case presented an antitrust challenge to provider agreements between a health insurance company and certain pharmacies. Under the agreements, participating pharmacies agreed to accept limited reimbursement for dispensing drugs to persons covered by the insurer's health plan.⁶ In return, the health insurance policy made it financially advantageous for plan members to deal with participating drug stores.⁷ The Supreme Court was called upon to determine whether such agreements constituted the business of insurance for McCarran-Ferguson purposes.

⁵ The reasoning and analysis in *Royal Drug* were closely followed in the Supreme Court's most recent decision on McCarran-Ferguson immunity. See *Union Labor Life Insurance Co. v. Pireno, 50 U.S.L.W. 4911, 4913* (U.S. June 29, 1982).

⁶ Participating pharmacies agreed to charge plan members only \$2 for any prescription drug they dispensed. The health insurance company reimbursed participating pharmacies for only the actual cost of all drugs dispensed to plan members. The pharmacies in the plan thus received only a \$2 markup on all drugs sold to plan members. *Royal Drug at 209*.

⁷ Plan members dealing with participating pharmacies had to pay only \$2 for any prescription drug. Members who dealt with nonparticipating pharmacies had to pay the full price charged by the pharmacy, and received reimbursement amounting to only 75% of the difference between the price of the drug and \$2. *Id.*

[*16] Since the McCarran-Ferguson Act does not define "the business of insurance," the Court sought to determine whether the provider agreements fell "within the ordinary understanding of that phrase, illuminated by any light to be found in the structure of the Act and its legislative history." [Royal Drug at 211](#). The Court observed that the primary elements of insurance are the spreading and underwriting of a policyholder's risk. The Court added that the business of insurance is also commonly understood to relate to the contract between the insurer and insured. [Id. at 215](#).

The provider agreements at issue fit neither of these descriptions of the business of insurance. The agreements did not involve any spreading or underwriting of risk, nor did they constitute a contract between insurer and insured. At most the provider agreements were a convenient method of minimizing the insurance company's costs. As such, they were legally indistinguishable from a host of other costcutting arrangements which constituted the business of insurance companies, but not the business of insurance. [Id. at 217](#). The Court also canvassed the legislative history of the McCarran-Ferguson Act and found full [*17] support for its conclusion that the provider agreement were not the business of insurance. [Id. at 217-24](#). This conclusion was further bolstered by the traditional canon of construction which requires exemptions from the antitrust laws to be narrowly construed. [Id. at 231](#).

The provider agreements in this case are legally indistinguishable from those found to fall outside the McCarran-Ferguson exemption in Royal Drug. They do not spread or underwrite a policyholder's risk, nor are they contracts between the insurer and insured. At best they are a means by which the defendant seeks to minimize costs and ensure customer satisfaction. While such agreements may constitute the business of insurance companies, they are not the business of insurance as defined in Royal Drug.⁸

[*18] The Fifth, Seventh and District of Columbia Circuits have reached the same conclusion with respect to informal provider agreements between automobile insurance companies and automobile insurance companies and automobile repair shops. *Proctor v. State Farm Mutual Automobile Insurance Co.*, 675 F. 2d 308, 336-37 (D.C. Cir. 1982); [Quality Auto Body, Inc. v. Allstate Insurance Co.](#), 660 F. 2d 1195, 1201 (7th Cir. 1981), cert. denied, [102 U.S. 1717 \(1982\)](#); [Liberty Glass Co. v. Allstate Insurance Co.](#), 607 F. 2d 135, 137-38 (5th Cir. 1979).

C. Legality of the Agreements

The plaintiff maintains that the provider agreements are illegal per se and should be found to violate the Sherman Act without regard to their utility. In support of this position it relies on [Dr. Miles Medical Co. v. John D. Park & Sons Co.](#), 220 U.S. 373, 408 (1911), and its progeny, which hold that vertical price fixing is illegal per se. Specifically, these cases hold that manufacturers and distributors may not place restrictions on the price which retailers may charge for resale of a product to the general public. It must be acknowledged that the provider agreements do not precisely fit this pattern. Plaintiff [*19] points out, however, that the relationship between Aetna and the automobile repair shops that is recommends is a vertical one, i.e. their businesses are situated at different levels of the market. It further maintains that Aetna agrees on prices with the preferred repair shops, and that this agreement constitutes vertical price fixing.

As the defendant points out, plaintiff's analysis misses the mark by a wide margin. Plaintiff acknowledges that defendant is properly characterized as a purchaser of repair services on behalf of its insureds. As a purchaser it is required to enter the marketplace, negotiate with sellers, and arrive at a mutually satisfactory price. This sort of "price-fixing" occurs whenever a purchase is made by a buyer. It certainly cannot be said to be illegal per se. [Quality Auto Body, Inc. v. Allstate Insurance Co.](#), 660 F. 2d 1195, 1202-03 (7th Cir. 1981), cert. denied, 102 S. Ct.

⁸ In *D & B Auto Body, Inc. v. Firemen's Fund Insurance Co.*, Civ. No. 79-0550, a case involving antitrust issues identical to those in the case at bar, the Court requested the participation of the Antitrust Division of the United States Department of Justice as amicus Curiae. In response to this invitation to this invitation, the Division submitted an excellent Memorandum of Law discussing the relevant issues. *D & B Auto Body* subsequently was dismissed pursuant to a stipulation by the parties. The Court nevertheless found the views of the Antitrust Division quite useful, and will cite them in this Opinion where appropriate. In connection with the McCarran-Ferguson immunity issue discussed above, the Court notes that the Justice Department agrees that the vertical provider agreements at issue do not constitute "the business of insurance" within the meaning of the McCarran-Ferguson Act. Memorandum of the United States at 6-7.

1717 (1982); *Travelers Insurance Co. v. Blue Cross of Western Pennsylvania*, 481 F. 2d 80, 84 (3d Cir.), cert. denied, 414 U.S. 1093 (1973); *Medical Arts Pharmacy of Stamford, Inc. v. Blue Cross & Blue Shield of Connecticut, Inc.*, 518 F. Supp. 1100, 1106-07 (D. Conn. 1981), aff'd, [*20] 675 F. 2d 502 (2d Cir. 1982); *Sausalito Pharmacy, Inc. v. Blue Shield of California*, 1981-1 TRADE CASES P63,885 at 75,607 (N.D. Cal. 1981).

As noted above, the type of vertical price fixing that has been condemned as illegal per se involves restrictions on a purchaser's freedom to resell the purchased product to a third person. See, e.g., *Albrecht v. The Herald Co.*, 390 U.S. 145; *United States v. Parke, Davis & Co.*, 362 U.S. 29 (1960). Under the provider agreements at issue here, there simply are not third persons to whom a resale is made. The agreements thus clearly do not come within the traditional classification of vertical price fixing which is condemned as illegal per se. *Medical Arts Pharmacy of Stamford, Inc. v. Blue Cross & Blue Shield of Connecticut, Inc.*, *supra*, at 1107; *Sausalito Pharmacy, Inc. v. Blue Shield of California*, *supra*, at 75,607; *General Glass Co. v. Globe Glass and Trim Co.*, 1980-2 TRADE CASES P63,531 at 76,851 (N.D. Ill. 1980).

Despite this, the question arises whether the provider agreements should be held to constitute a new class of agreements which are illegal per se. The First Circuit has expressed some reluctance to add to "the per se pantheon [*21] recognized by the Supreme Court." *George R Whitten, Jr., Inc. v. Paddock Pool Builders, Inc.*, 508 F. 2d 547, 560 (1st Cir. 1974), cert. denied, 421 U.S. 1004 (1975). In this case it seems clear that a per se approach is inappropriate.

The Supreme Court has indicated that per se rules should only be applied where the purpose and effect of a restraint "threaten the proper operation of our predominantly free-market economy -- that it, [where] the practice facially appears to be one that would always or almost always tend to restrict competition and decrease output. . . ." *Broadcast Music, Inc. v. Columbia Broadcasting System, Inc.*, 441 U.S. 1, 19-20 (1979). Accord *Arizona v. Maricopa County Medical Society* (1982-2 TRADE CASES P64,792, 50 U.S.L.W. 4687, 4690) (U.S. June 15, 1982). Agreements that are per se illegal are characterized by "their pernicious effect on competition and lack of any redeeming virtue." *Northern Pac. Ry. Co. v. United States*, 356 U.S. 1, 5 (1958). Far from lacking any redeeming virtue, the provider agreements in this case have a substantial pro-competitive effect. The defendant has concluded such agreements in an attempt to satisfy the needs of its insureds [*22] at the lowest possible price. The agreements themselves tend to encourage repair shops to compete with each other by offering lower prices to attract greater shares of insurance company work.

As the Seventh Circuit recently observed,

Defendants are simply taking steps to insure the best terms available in the marketplace and firmly indicating their position on price to the sellers (the body shops). As the Third Circuit explained in *Travelers Insurance Co. v. Blue Cross of Western Pennsylvania*, 481 F. 2d 80 (3d Cir.), cert. denied, 414 U.S. 1093 (1973), "this pressure encourages [suppliers] to keep their costs down; and, for its own competitive advantage, [enables the insurer to pass] . . . along the savings thus realized to consumers. To be sure, [the insurer's] initiative makes life harder for commercial competitors. . . . The antitrust laws, however, protect competition, not competitors; and staff competition, not competitors; and staff competition is encouraged, not condemned."

Id. at 84.

Quality Auto Body, Inc. v. Allstate Insurance Co., 660 F. 2d 1195, 1203 (7th Cir. 1981), cert. denied, 102 U.S. 1717 (1982); accord *Proctor v. State Farm Mutual Automobile Insurance* [*23] Co., 1980-81 TRADE CASES P63,591 at 77,141 (D.D.C. 1980), aff'd, 675 F. 2d 308 (D.C. Cir. 1982). Given this substantial positive effect on competition, it is clear that the provider agreements cannot be found to be illegal per se.

Having reached this conclusion, the question arises whether the effects and purpose of the provider agreements must also be analyzed under the rule of reason. Such an inquiry would certainly be in keeping with the usual practice in antitrust cases. See, e.g., *Broadcast Music, Inc. v. Columbia Broadcasting System, Inc.*, 441 U.S. 1, 24-25 (1979) (holding that blanket licenses are not per se illegal, remanding to Court of Appeals for consideration of

licenses under rule of reason). In this case, however, plaintiff has focussed almost exclusively on the legality of the agreements under the per se rule. In a similar case, one court has ruled that where "plaintiffs have placed all their eggs in the per se basket," further scrutiny of the challenged agreements under the rule of reason is inappropriate. [Medical Arts Pharmacy of Stamford, Inc. v. Blue Cross & Blue Shield of Connecticut, Inc., 518 F. Supp. 1100, 1109](#), (D. Conn. 1981), aff'd, [675 F. 2d 502 \(2d Cir. \[*24\] 1982\)](#).

The Court does not believe that a similar approach is warranted in this case. Plaintiff by its general allegations has challenged the legality of the provider agreements under [Section 1](#) of the Sherman Act. While relying almost exclusively on its argument that the agreements are illegal per se, a reading of plaintiff's pleadings and submissions suggests that it has also raised the question of the agreements' legality under the rule of reason. In particular, plaintiff's allegation that the defendant has used its market power as a large-scale purchaser of automobile repair work to obtain the services of preferred shops at an artificially low price⁹ is sufficient to suggest that the agreements have an anticompetitive effect which must be analyzed under the rule of reason. Having determined that this issue is properly raised by the pleadings, the defendant as the movant for summary judgment has the burden of showing that no genuine issue of fact exists as to the legality of the agreements under the rule of reason.

Under the rule of reason the Court must assess the anticompetitive and procompetitive effects [^{*}25] of a particular agreement "by analyzing the facts peculiar to the business, the history of the restraint, and the reasons why it was imposed." [National Soc'y of Professional Engineers v. United States, 435 U.S. 679, 692 \(1978\)](#). The Court has already noted its opinion that the agreements in question have a substantial procompetitive effect in that they foster price competition between automobile repair shops. See [Chick's Auto Body v. State Farm Mutual Automobile Insurance Co., 168 N.J. Super. 68, 401 A. 2d 722, 731-32 \(1979\)](#), aff'd per curiam, [176 N.J. Super. 320, 423 A. 2d 311 \(1980\)](#) (agreements are "the very essence of competition"). Plaintiff alleges, however, that the agreements also have a significant anticompetitive effect. It contends that the defendant has used its position as a large-scale buyer to enter into provider agreements which depress the price of automobile repairs below competitive levels. In short, it contends that the defendant possesses monopsony¹⁰ power, and that it has concluded provider agreements to enable it to wield this power more effectively.¹¹

[^{*}26] To show an abuse of monopsony power, however, it is not enough merely to indicate that the defendant possesses significant market power because it makes purchases of repair services on a large scale. [Quality Auto Body, Inc. v. Allstate Insurance Co., 660 F. 2d 1195, 1204 \(7th Cir. 1981\)](#), cert. denied, 102 S. Ct. 1717 (1982) (buyers' possession of significant market power not a violation of Sheman Act absent certain types of abuse). Plaintiff must point to some way in which the provider agreements restrict output or otherwise injure competition. See [Medical Arts Pharmacy, Inc. v. Blue Cross & Blue Shield, Inc., 675 F. 2d 502, 507 \(2d Cir. 1982\)](#) (provider agreements did not violate rule of reason where insurer had small market share and could not use monopsony power to obtain agreements with anti-competitive effect); [Sausalito Pharmacy, Inc. v. Blue Shield of California,](#)

⁹ See Plaintiff's Objection and Opposition at 3 and 11.

¹⁰ Monopsony is the economic term used to describe a market involving one buyer and numerous sellers. It is the counterpart in the buyer's market of monopoly.

¹¹ The vertical provider agreements might also have anticompetitive effects if they facilitated the creation of horizontal cartels between insurance companies or between automobile repair shops. [Workman v. State Farm Mutual Automobile Insurance Co., 520 F. Supp. 610, 615-17 \(N.D. Cal. 1981\)](#); Sausalito Pharmacy, Inc. v. Blue Shield of California, 1981-1 TRADE CASES at 75,609; Quality Auto Body, Inc. v. Allstate Insurance Co., 1980-2 TRADE CASES at 76,696. Likewise, the agreements might violate the rule of reason if they were used by automobile repair shops as an instrument of predatory pricing. Sausalito Pharmacy, Inc. v. Blue Shield of California, *supra*, at 75,609. There is no contention in this case that automobile repair shops have attempted to form a horizontal cartel or have engaged in predatory pricing. Plaintiff's contentions with respect to the existence of horizontal agreements between insurance companies are discussed in greater detail infra.

1981-1 TRADE CASES P63,885 at 75,609 (N.D. Cal. 1981) (no violation of rule of reason absent showing of intent in provider agreements to affect quantity or quality of services).¹²

[*27] To understand whether there is a significant possibility that the challenged provider agreements have the anticompetitive effect of restricting output, a more detailed understanding of the economics of monopsony may be necessary. Professors Areeda and Turner suggest that before a large-scale buyer will restrict output and thereby injure competition, three conditions must be satisfied. 4 P. Areeda & D. Turner, Antitrust Law P964 at 202 and n. 2 (1980). First, the buyer must possess significant market power in that its purchases are so numerous that they have an appreciable effect on total output. Second, the buyer must make its purchases in an industry which has a rising cost curve, i.e. one where each successive unit produced costs more to produce than the previous one. Finally, the buyer must possess the power to restrict its purchases to a particular amount. If all three conditions are present, a rational large-scale purchaser will limit its purchases to a smaller quantity of goods which are produced at a lower price than would be prevalent under conditions of free competition. Id. If the provider agreements in question were used to effectuate such a limitation, they would [*28] have a significant anticompetitive effect and would probably violate the rule of reason.

It is difficult to assess whether the three preconditions to abuse of monopsony power are present in this case. The parties have offered no evidence as to the market share of defendant, so it is impossible to assess whether it possesses sufficient market power to affect appreciable total output. Nor is there any evidence which indicates whether the automobile repair industry possesses a rising cost curve. At first glance, however, it might seem possible to reach a conclusion with respect to the third condition -- the ability of the defendant to restrict its purchases.

The defendant arguably does not possess this ability. Its obligation to purchase repair services is fixed by its contracts with its insureds. Upon the occurrence of an insurable event, the defendant must arrange for the repair of the damaged vehicle. There thus exists little discretion on the part of Aetna to determine the amount of repair work which it will purchase.

However, it would be open to the defendant to restrict the level of repair services purchased by arranging for its preferred shops to perform repairs of [*29] an inferior quality. I note that plaintiffs in other cases have alleged that insurance companies do precisely this, although their claims have not been substantiated. Quality Auto Body, Inc. v. Allstate Insurance Co., 660 F. 2d 1195, 1204 n. 6 (7th Cir. 1981), cert. denied, 102 S. Ct. 1717 (1982);¹³ Workman v. State Farm Mutual Automobile Insurance Co., 520 F. Supp. 610, 621 (N.D. Cal. 1981). In any case, the Court is convinced that such a restriction of output is at least a possible result of the challenged provider

¹² The Justice Department takes the position that the vertical agreements in question do not violate the Sherman Act absent a showing that "insurance companies have the power to limit the amount of repair work performed for policyholders, that they refuse to deal with any competent repair shop in the same terms available to other repair shops, or that there are other facts that would render their actions unreasonably anticompetitive." Memorandum of the United States at 11.

¹³ The Seventh Circuit in this case noted that:

"When the rate is too low, some repair shops resort to dishonest practices in order to survive. These practices include: (1) charging for new parts but using old parts; (2) estimating parts that are not damaged; (3) straightening old parts but charging for new parts; (4) inflating labor hours; (5) billing for repairs which have not been performed; and (6) offering rebates and bribes to adjusters."

[Quality Auto Body, Inc. v. Allstate Insurance Co., supra, 1204 n. 6.](#)

The court went on to observe that, "Although these deplorable practices may be prevalent in the auto repair industry, in and of themselves they are not matters the antitrust laws were intended to address." Id. (emphasis in original). This Court agrees with the Seventh Circuit that unethical business practices which do not have a significant adverse effect on competition do not violate the antitrust laws. George R. Whitten, Jr., Inc. v. Paddock Pool Builders, Inc., 508 F. 2d 547, 560-2 (1st Cir. 1974), cert. denied, **421 U. S. 1004 (1975)**. However, if dishonest business practices are the result of a concerted effort to restrict output, a significant adverse effect on competition may result, and the Sherman Act's rule of reason may be violated.

agreements.¹⁴ As a result, I cannot say on this record that plaintiff would be unable to show at trial that the provider agreements have the anticompetitive effect of restricting production and that such agreements therefore violate the rule of reason. For this reason the defendant's motions for summary judgment must be denied.

[*30] I wish to note, however, that the question of the appropriateness of summary judgment in this case is a very close one. This is because plaintiff has raised the question of the possible abuse of monopsony power in a very oblique fashion. As a consequence, the defendant undoubtedly lacked proper notice as to what it was required to refute in order to prevail on its motion. The Court also considers it highly unlikely that the provider agreements are in fact being used by defendant to exert monopsony power and to restrict output. There is certainly nothing in the record which would point to this. But plaintiff, as nonmovant, does not bear the burden of showing the existence of genuine issues of fact, and the silence of the record on this point, therefore, cannot be held against it. In the end, the Court is persuaded that the better course is to proceed with caution. As the First Circuit has noted: The summary judgment rule, *F.R. Civ. P. 56*, can be a valuable tool for saving judicial time. However, by use in inappropriate situations, or misuses, it can also waste time. In view of the possible terminal result, it is essential that i's be dotted and t's crossed.

*Mack v. Cape [*31] Elizabeth School Board*, 553 F. 2d 720, 722 (1st Cir. 1977).

This is not to say that a trial will be necessary on the question of the possible anticompetitive effect of the provider agreements. Further submissions made pursuant to a renewed motion for summary judgment by the defendant may show that no genuine issue of fact exists on the pivotal question of restriction of output. If this is the case, a grant of summary judgment in favor of defendant on this question will be warranted.

IV. Horizontal Price-Fixing Agreements Between Insurance Companies

Although plaintiff does not emphasize this aspect of its case in its Memorandum of Law in opposition to the defendant's motion for summary judgment, the complaint in this action also alleges that the defendant has combined and conspired with other insurance companies to fix the price paid to automobile repair shops for their services. Second Amended Complaint P6. Such an agreement between buyers of services, if not immune from antitrust scrutiny under the McCarran-Ferguson Act, would be illegal per se. *Mandeville Island Farms, Inc. v. American Crystal Sugar Co.*, 334 U.S. 219, 235 (1948); *Williams v. St. Joseph Hospital*, 629 [*321] F. 2d 448, 453 (7th Cir. 1980). The Court finds, however, that Aetna has demonstrated that it has not engaged in any conspiracy with other automobile insurance companies to fix the price of automobile repairs, and that no genuine issue of fact exists on this question.

In sworn affidavits submitted by its present and former Providence Branch Claims Managers, Aetna has categorically denied consulting with any other insurance company in determining the competitive cost of repairs. Daffron Affidavit at 3; Mistretta Affidavit at 4. Following this sworn denial, "[i]t . . . became [plaintiff's] burden to present factual materials that might have been admissible at trial as evidence to support the complaint." *White v. The Hearst Corp.*, 669 F. 2d 14, 18 (1st Cir. 1982). This plaintiff clearly has failed to do.

Indeed, in deposition testimony Richard Ruggiero, the president of Custom Auto Body, admitted that he has no direct evidence that Aetna has agreed with other insurance companies to fix prices, and that plaintiff's allegations in this regard are largely conjectural. Ruggiero Deposition at 82-84. Nor has plaintiff produced any persuasive circumstantial evidence which tends [*33] to show the existence of such an agreement.¹⁵ Faced with this

¹⁴ Aetna comes very close to demonstrating that it does not attempt to restrict output by limiting the quality of repairs performed by its preferred shops. Aetna's affidavits state that it recommends shops based on their ability to perform quality repairs at a competitive price, and that it guarantees that workmanlike repairs can be performed for the amount of its estimate. Daffron Affidavit at 5; Mistretta Affidavit at 2. This is circumstantial evidence that Aetna has not conspired with preferred repair shops to restrict output by performing inferior repairs. Absent an explicit denial that such an agreement exists, however, the Court cannot say that this is sufficient to meet Aetna's burden of showing the absence of any genuine issue of material fact.

complete absence of evidence to contradict Aetna's sworn statement that it has not engaged in horizontal price fixing, the Court is required to grant summary judgment for Aetna on this claim.¹⁶

[*34] V. Agreements Between Aetna and Its Policyholders

The third focus of plaintiff's antitrust challenge is the relationship of the defendant with its policyholders. Plaintiff maintains that the defendant has acted in concert with its insureds to create a horizontal combination of automobile owners which uses its combined purchasing power to restrain trade in the automobile repair industry. The court believes, however, that any such combination is clearly exempt from antitrust scrutiny under the McCarran-Ferguson Act, and that defendant is entitled to summary judgment for this reason. I thus need not reach the question of whether the defendant would be entitled to summary judgment on the alternative ground that the alleged combination is completely legal under the Sherman Act.

To decide whether plaintiffs claim is barred by the McCarran-Ferguson Act, the court must first determine whether the challenged conduct constitutes "the business of insurance". Before reaching this question, however, it is necessary to understand precisely what conduct plaintiff is challenging. Read broadly, plaintiff's allegations appear to challenge the legality of the basic concept of automobile insurance. [*35] As was noted earlier, automobile insurance provides for the spreading of risk by obligating the insurance company to undertake the repair of automobile damage sustained by its policyholders. In fulfilling its obligations under the insurance contract, the insurance company will always be required to perform some purchasing functions on behalf of its insureds. Some combination of buying power thus seems virtually inherent in any automobile insurance policy. It seems unlikely, however, that plaintiff intends to argue from this that automobile insurance by its very nature is violative of the antitrust laws.¹⁷

A more reasonable interpretation of plaintiff's contention is that it challenges the provision in the insurance policy which limits the reimbursement of the policyholder to the reasonable or competitive cost of repairs. Absent such a restriction on the policy's coverage, an insured would have less incentive to accept his insurance company's recommendation of a repair shop, and the company would find it more difficult to aggregate the buying [*36] power of its insureds in dealing with repair shops. Even accepting this more reasonable interpretation of plaintiff's allegations, however, it is clear that plaintiff is challenging conduct which constitutes the business of insurance.

¹⁵ Plaintiff appears to rely on the theory of conscious parallelism to prove the existence of a horizontal conspiracy. It claims that the defendant and other insurance companies employ similar practices in settling claims, such as the use of the same independent publication to determine repair times and new part prices. Plaintiff suggests that the existence of these similar practices can only be explained as the result of a conspiracy between insurance companies. The Supreme Court has indicated that parallel behavior may be circumstantial evidence of the existence of an agreement or conspiracy. See [Interstate Circuit, Inc. v. United States, 306 U.S. 208, 226-27 \(1939\)](#). But it is also clear that mere proof of parallel behavior without more does not prove the existence of a contract, combination or conspiracy. [Theatre Enterprises, Inc. v. Paramount Film Distributing Corp., 346 U.S. 537, 541 \(1954\)](#); [Naumkeag Theatres Co. v. New England Theatres, Inc., 345 F.2d 910, 911-12 \(1st Cir., cert. denied, 382 U.S. 906 \(1965\)\)](#).

In this case, plaintiff has failed to show that the similar practices employed by automobile insurance companies are anything more than the result of the companies' independent pursuit of their economic self-interest. Absent such a showing, the doctrine of conscious parallelism in no way supports an inference of conspiracy. See [Quality Auto Body, Inc. v. Allstate Insurance Co., 660 F.2d 1195, 1200-01 \(7th Cir. 1981\)](#), cert. denied, [102 S. Ct. 1717 \(1982\)](#); [Workman v. State Farm Mutual Automobile Insurance Co., 520 F. Supp. 610, 621 \(N.D. Cal. 1981\)](#); [Sausalito Pharmacy, Inc. v. Blue Shield of California, 1981-1 TRADE CASES P63,885 at 75,612 \(N.D. Cal. 1981\)](#); [Chick's Auto Body v. State Farm Mutual Automobile Insurance Co., 168 N.J. Super. 68, 401 A.2d 722, 730-31 \(1979\)](#), aff'd per curiam, [176 N.J. Super. 320, 423 A.2d 311 \(1980\)](#).

¹⁶ The Court therefore need not decide whether an agreement between insurance companies to fix the price of automobile repairs would be immune under the McCarran-Ferguson Act.

¹⁷ Such a claim would clearly be a challenge to "the business of insurance" within the meaning of the McCarran-Ferguson exemption.

As the Supreme Court noted in Royal Drug:

Another commonly understood aspect of the business of insurance relates to the contract between the insurer and the insured. In enacting the McCarran-Ferguson Act Congress was concerned with: "The relationship between insurer and insured, the type of policy which could be issued, its reliability, interpretation, and enforcement -- these were the core of the "business of insurance."

[Royal Drug at 215-16](#) (quoting [SEC v. National Securities, Inc., 393 U.S. 453 460 \(1969\)](#).

The conduct challenged here, involving as it does the provisions of the insurance policy itself, falls within the core of "the business of insurance" as the Supreme Court has defined that term.¹⁸

[*37] The challenged conduct must also be regulated by state law before the McCarran-Ferguson exemption will apply.¹⁹ In accordance with the intent of Congress expressed in the McCarran-Ferguson Act, Rhode Island has established a comprehensive program of regulation for the business of insurance. See R.I.G.L. § 27-29.1. Rhode Island law prohibits any person from engaging in "an unfair method of competition or an unfair deceptive act or practice in the business of insurance." [R.I.G.L. § 27-29-3](#). The Insurance Commissioner is authorized to make determinations as to what constitutes unfair competition, and to seek injunctions in superior court enjoining any violation he determines is taking place. [R.I.G.L. § 27-29-8](#).

In addition to this general regulation, Rhode Island law [*38] specifically regulates claims adjustment procedures. The Insurance Commissioner is authorized to order the discontinuance of any claims adjustment practice which he finds to be unfair, with Rhode Island statutes. [R.I.G.L. § 27-10-10](#). The Commissioner's authority also extends specifically to motor vehicle damage appraisers, and he is authorized to "prescribe reasonable regulations concerning . . . the methods with which [such appraisers] conduct their business." [R.I.G.L. § 27-10.1-1](#) (1981 supp.).

Pursuant to his statutory authority, the Insurance Commissioner has promulgated Regulation XXVIII, Fair Insurance Claim Settlement Practices. Section 9 of this regulation establishes "Standard For Prompt, Fair and Equitable Settlements Applicable to Automobile Insurance." The regulation provides that:

A viewing of a damaged automobile for the purposes of preparing an estimate for the cost of repair shall be made within seven (7) working days of notification to the insurer of the claim. Such estimate shall be in an amount for which it may be reasonably expected the damage can be satisfactorily repaired.

Regulation XXVIII § 9(d).

It thus appears that Rhode Island has specifically [*39] authorized the activities challenged by the plaintiff by passing a regulation that permits an insurance company to pay only the reasonable cost of repairs. Such specific authorization more than satisfies the requirement that the business of insurance be regulated by state law before the McCarran-Ferguson exemption will be available.²⁰ See [Dexter v. Equitable Life Assurance Society of the](#)

¹⁸ Plaintiff appears to argue that even if the agreements between Aetna and its insureds are themselves immune under the McCarran-Ferguson Act, the anticompetitive effects of such agreements are not. Objection and Opposition at 11-12. This argument is completely without merit. As the Justice Department points out, "An antitrust exemption would be meaningless, however, if it were forfeited to the extent that the exempted conduct produced anticompetitive effects." Memorandum of the United States at 14. See [Royal Drug at 249](#) (Brennan, J. dissenting). If the agreements satisfy the requirements of the McCarran-Ferguson Act, they are exempt from the antitrust laws without regard to their possible anticompetitive effects.

¹⁹ In addition, under the McCarran-Ferguson Act the antitrust laws remain applicable to acts of boycott, coercion and intimidation in the business of insurance. [15 U.S.C. § 1013\(b\)](#). The Court concludes for the reasons set forth in a subsequent section of this opinion that the actions of defendant and its insureds cannot be said to constitute an act of boycott or coercion. See pp. 30-34 infra.

[United States, 527 F. 2d 233, 236 \(2d Cir. 1975\)](#); [Crawford v. American Title Insurance Co., 518 F. 2d 217, 219 \(5th Cir. 1975\)](#) (2-1 decision); [Commander Leasing Co. v. Transamerica Title Insurance Co., 477 F. 2d 77, 83 \(10th Cir. 1973\)](#); [Miley v. John Hancock Mutual Life Insurance Co., 148 F. Supp. 299, 302](#) (D. Mass.), aff'd per curiam, [242 F. 2d 758](#) (1st Cir.), cert. denied, 355 U.S. 8288 (1975).

[*40] Accordingly, I find that the combination between Aetna and its insureds which is challenged by the plaintiff constitutes the business of insurance which is regulated by state law. As such, the combination is immune from antitrust attack under the McCarran-Ferguson Act.²¹ The defendant's motion for summary judgment on this claim will therefore be granted.

VI. Agreements Between Aetna "Preferred" Repair Shops, Damage Appraisers and Policyholders [*41] to Boycott Plaintiff's Repair Shop

Plaintiff's final antitrust claim is that Aetna has conspired with its insureds, certain automobile repair shops, and certain automobile damage appraisers to boycott plaintiff's repair shop. Plaintiff contends that a boycott occurs when the defendant informs its policyholders that it will pay only the amount which it determines to be the reasonable cost of repair work. This amount is sometimes less than the amount that plaintiff charges for its services. Insureds who wish to deal with plaintiff's shop may thus be forced to choose between paying the additional amount charged by plaintiff out of their own pockets, or having the repair work performed at a "preferred" shop which will do the work for the amount estimated by Aetna. In many such instances, insureds choose to take their business elsewhere, and this refusal to deal constitutes the alleged boycott of which plaintiff complains.

In response the defendant has offered sworn affidavits which state that Aetna imposes no restrictions on its insureds' freedom to deal with any repair shop they choose. The only limitation imposed by Aetna is that it will pay no more than the competitive cost [*42] of repairs. Daffron Affidavit at 4-5; Mistretta Affidavit at 7. It is also important to note that plaintiff does not contend that it is being boycotted despite its willingness to offer price quotes and other terms that are comparable to those offered by preferred shops. Plaintiff apparently concedes that the alleged boycott has occurred only because of its refusal to offer prices and terms in line with those offered by other shops.

A group boycott has been described generally as "concerted refusal by traders to deal with other traders." [Klor's, Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207, 212 \(1959\)](#). But obviously not every refusal to deal constitutes an illegal boycott. A purchaser's refusal to deal with a seller because his price is too high, for example, is clearly not an illegal boycott under the Sherman Act. Rather, this is simply the result of the proper functioning of the marketplace wherein purchasers decide whether or not to buy based on the price and quality of goods. See [American Tel. & Tel. Co. v. Delta Communications Corp., 408 F. Supp. 1075, 1101 \(S.D. Miss. 1976\)](#), aff'd per curiam, [579 F. 2d](#)

²⁰ To trigger McCarran-Ferguson exemption, the system of state regulation need not completely duplicate the provisions of the federal antitrust laws. The Court agrees with the Second Circuit's observations that:

"The McCarran-Ferguson Act clearly contemplates that where a state undertakes to regulate the business of insurance, it has the power to permit practices which would otherwise violate federal antitrust laws; if the exemption is only to apply when state law squarely prohibits all acts which would, absent the exemption, violate the antitrust laws, the state regulation which the McCarran-Ferguson Act aims to foster, [15 U.S.C. §§ 1011, 1012\(a\)](#), would be a nullity."

[Dexter v. Equitable Life Assurance Soc'y of the United States, 527 F. 2d 233, 236 \(2d Cir. 1975\)](#); accord [Travelers Ins. Co. v. Blue Cross of Western Pa., 481 F. 2d 80, 83 n. 10](#) (3rd Cir.); cert. denied, [414 U.S. 1093 \(1973\)](#); [Ohio AFL-CIO v. Insurance Rating Bd., 451 F. 2d 1178, 1181 \(6th Cir. 1971\)](#), cert. denied, [409 U. S. 917 \(1972\)](#).

²¹ The Justice Department takes the position that a combination between insurers and insureds which aggregates buying power would not violate the antitrust laws in any case, absent some showing that insureds had agreed to pool their purchasing power and restrict demand so as to lower the price of automobile repairs below the competitive level. Memorandum of the United States at 16. It seems at least unlikely that plaintiff could make such a showing at trial. Because defendant is entitled to summary judgment on McCarran-Ferguson grounds, however, the Court need not decide if defendant has met its burden of showing that no genuine issue of fact exists as to this possible anticompetitive effect of the insurer-insured combination.

[972](#) (5th cir. 1978), modified on other grounds, [590 F. 2d 100](#) [*43] (5th cir. 1979) ("[a] refusal to buy a product for more than it is worth simply cannot be a violation of the antitrust laws.")

Purchases in the insurance context, however, are somewhat different from the typical purchase of goods and services in that both the insurer and the insured perform certain purchasing functions. The insured usually performs the task of selecting a provider of services while the insurer pays for the purchase subject to the coverage limitations of the insurance policy. Because two separate entities perform purchasing functions, plaintiff claims that there is concerted action when an insured automobile owner declines to use plaintiff's shop because the owner's insurance company will not reimburse the full cost of repairs. Plaintiff appears to conclude from this that the conduct of the defendant and its insureds involves both concerted action and a refusal to deal, and that therefore such conduct constitutes a concerted refusal to deal which by definition is an illegal boycott.

But this is a concerted refusal to deal only as a matter of semantics. Verbal formulas cannot be used to obscure the fact that the defendant and its insureds have simply acted [*44] as rational consumers in declining to patronize high-priced repair shops. Plaintiff at all times has been free to compete for the business of the defendant and its insureds by offering lower prices or higher quality services. From time to time plaintiff has failed in this endeavor because Aetna deemed the plaintiff's charges unreasonable and individual car owners did not believe that the quality of plaintiff's services justified paying an additional amount out of their own pockets. Far from being an illegal boycott, such activities merely constitute the normal functioning of a free-market economy. As the Seventh Circuit recently observed in a similar case: Although some repair shops which charge more than the so-called prevailing competitive rate may suffer some economic losses, these losses appear basically to be the result of the shops' inability or unwillingness to meet competition. The Darwinian working of competition (which the antitrust laws are presumably designed to foster) mean that high-cost, high-price shops tend to lose business and might even go out of business if they cannot become more competitive. Presumably, this process is in the consumer's best interest (although [*45] it may have social costs we think inappropriate to address here). Whatever sympathy one may feel for the body shops in these circumstances, the antitrust laws were not intended to provide redress for losses resulting from noncompetitive prices.

[Quality Auto Body, Inc. v. Allstate Insurance Co., 660 F. 2d 1195, 1206 \(7th Cir. 1981\)](#), cert. denied, 102 S. Ct. 1717 (1982).

Moreover, the harm to competition that usually results from a group boycott is conspicuously absent here. The Supreme Court has noted that the principal evil of group boycotts is their tendency to "cripple the freedom of traders and thereby restrain their ability to sell in accordance with their own judgment." [Klor's, Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207, 212 \(1959\)](#) (quoting [Kiefer-Stewart Co. v. Joseph R. Seagram & Sons 1950-1951 TRADE CASES P62,737, 340 U.S. 211, 213 \(1951\)](#)). The Court noted that a group boycott curtails the freedom of both the participants in the boycott and the boycott's target to deal with each other on the same terms that they deal with others. [Id. at 213](#). Here plaintiff remains free to compete with all other body shops on the same basis in attracting the business of Aetna [*46] and its insureds. Individual insureds likewise remain free to deal with plaintiff's shop by personally paying the additional amount charged by plaintiff. The restrictions on freedom to trade usually associated with group boycotts are thus wholly absent in this case.

I note that courts faced with allegations of an illegal boycott based on similar facts have uniformly found such allegations to be without merit. Quality Auto Body, [Inc. v. Allstate Insurance Co., 660 F. 2d 1195, 1206 \(7th Cir. 1981\)](#), cert. denied, 102 S. Ct. 1717 (1982); [Bartholomew v. Virginia Chiropractors Ass'n, Inc., 612 F. 2d 812, 817-18 \(4th Cir. 1979\)](#) (2-1 decision), cert. denied, 446 U.S. 938 (1980); [Proctor v. State Farm Mutual Automobile Insurance Co., 561 F. 2d 262, 275 \(D.C. Cir. 1977\)](#), vacated and remanded on other grounds, 440 U.S. 942 (1979); [Workman v. State Farm Mutual Automobile Insurance Co., 520 F. Supp. 610, 622-24 \(N.D. Cal. 1981\)](#); [Nationwide Mutual Insurance Co. v. Automotive Service Councils of Delaware, Inc., 1981-1 TRADE CASES P63,958 at 75,963 \(D. Del. 1981\)](#); [Chicks' Auto Body v. State Farm Mutual Automobile Insurance Co., 168 N.J. Super. 68, 401 A. 2d 722, 730 \(1979\)](#), aff'd per curiam, [*47] [176 N.J. Super. 320, 423 A. 2d 311 \(1980\)](#). The only case that is arguably to the contrary is [General Glass Co. v. Globe Glass & Trim Co., 1980-2 TRADE CASES P63,531 at 76,843 \(N.D. Ill. 1980\)](#). There the court held that plaintiff's allegations that they had been boycotted by an insurance company, the

company's policyholders, and certain preferred glass repair shops were sufficiently supported by the evidence so as to require a trial on the merits. Id. at 76,853-54. This case, however, is distinguishable. Evidence in General Glass Co. indicated that individual insureds were told that they had to replace their broken glass at a "preferred" repair shop, and that they could not use a non-preferred shop. Id. at 76,853. No such restriction on an insured's freedom of choice has been shown to have taken place in this case.

For the foregoing reasons the Court believes that defendant has shown that there exists no genuine issue of fact on the boycott claim, and that the conduct challenged here does not constitute an illegal boycott. The defendant is thus entitled to summary judgment on this claim.

VII. Slander Claim

The Second Amended Complaint alleges that one Walter Fortin, [*48] acting as the agent of the defendant, stated to one of plaintiff's customers, "What makes you think this repair work is so good; in my opinion, this work stinks." The plaintiff further alleges that Fortin made this statement with respect to work that had been performed by the plaintiff that said statement was false, and that Fortin acted maliciously in making it. Plaintiff now seeks to recover nominal actual and punitive damages on a state law claim based on slander.

The defendant has moved for summary judgment on a number of grounds. First, it argues that the Court should exercise its discretion under [United Mine Workers v. Gibbs, 383 U.S. 715, 726 \(1966\)](#), to dismiss the pendent state claim. In the Court's opinion, Gibbs is inapplicable to the present controversy. This is because a reading of the complaint discloses an independent basis for federal jurisdiction over the state law claim. Specifically, Paragraph 2 of the Second Amended complaint alleges that plaintiff is a Rhode Island corporation with its principal place of business in Rhode Island. Paragraph 3 alleges that the defendant is a Delaware corporation with its principal place of business in Hartford, Connecticut. [*49] Paragraph 1 states that the amount in controversy exceeds the sum of \$10,000 exclusive of interest and costs. The complaint thus alleges all the facts necessary to show the existence of diversity jurisdiction. [28 U.S.C. §§ 1332\(a\)](#) and [\(c\)](#). The Court, therefore, has independent subject matter jurisdiction over Count II and lacks any discretion to dismiss the claim under the doctrine announced in Gibbs. It is true that the complaint does not specifically refer to [28 U.S.C. § 1332](#), and that the plaintiff has unnecessarily sought to invoke the Court's pendent and ancillary jurisdiction. It is well settled, however, that a failure to cite the proper jurisdictional provision is not fatal if the complaint sets forth sufficient facts to show that the court has jurisdiction. *Continental Casualty Co. v. Canadian Universal Insurance Co.*, 605 F. 2d 1340, 1343 55th Cir. 1979), cert. denied, 445 U.S. 929 (1980); *Lytle v. Freedom International Carriers, S.A.*, 519 F. 2d 129 132-33 (6th Cir. 1975); [Williams v. United States, 405 F. 2d 951, 954 \(9th Cir. 1969\)](#).

The defendant's second argument is that the statement allegedly made by Fortin was a statement of opinion which is not actionable [*50] because it was not defamatory. The defendant relies on [§ 566 of the Restatement \(Second\) of Torts](#) which states, "A defamatory communication may consist of a statement in the form of an opinion, but a statement of this nature is actionable only if it implies the allegation of undisclosed defamatory facts as the basis for the opinion." The Court is uncertain whether Rhode Island courts would follow the rule set forth in the Restatement. Two somewhat dated cases indicate that a false statement that the goods and services supplied by a tradesman are of inferior quality is actionable regardless of whether it is a statement of opinion or an assertion of fact. [Barr v. Providence Telegram Publishing Co., 27 R.I. 101, 103, 60 A. 835 \(1905\)](#); [Morrison-Jewell Filtration Co. v. Lingane, 19 R.I. 316, 317, 33 A. 452 \(1895\)](#). But I need not decide this question because I am convinced that the alleged statement was defamatory even under the Restatement approach.

The Restatement provides that an opinion is defamatory if it implies the allegation of undisclosed defamatory facts. Fortin's statement of opinion may be fairly interpreted to imply either that the work performed suffered from hidden [*51] defects or that such work was generally inferior when compared to the work performed by other automobile repair shops with which Fortin was familiar. Either implication could well constitute the allegation of undisclosed defamatory facts, and the statement of opinion would thus be defamatory even under the Restatement approach. I conclude that the defendant's argument on this point is without merit.

The defendant's final argument is that it is entitled to summary judgment because the statement made by Fortin was privileged under Rhode Island law. The Rhode Island Supreme Court has recognized the existence of a qualified privilege for communications between parties who share a "common interest" in the subject matter of the communication. *Ventetuolo v. Burke*, 470 F. Supp. 887, 897 (D.R.I. 1978), aff'd 596 F. 2d 476, 485 (1st Cir. 1979); *Powers v. Carvalho*, 117 R.I. 519, 368 A. 2d 1242, 1249 (1977); *Ponticelli v. Mine Safety Appliance Co.*, 104 R.I. 549, 247 A. 2d 303, 306 (1968). The communication alleged in the complaint would seem to fall within the scope of this privilege, since Aetna's agent and the policyholder to whom he spoke had an important common interest in a full and [*52] open discussion of the quality of repairs obtained by the insured and paid for by Aetna.

This qualified privilege may be lost, however, if plaintiff can show that the defendant acted with malice in making the false statement. *Swanson v. Speidel Corp.*, 110 R.I. 335, 293 A. 2d 307, 310 (1972); *Ponticelli v. Mine Safety Appliance Co.*, 104 R.I. 549, 247 A. 2d 303, 308 (1968). Malice in this context may be present when the defendant acts with ill will, spite, or malevolence, *Swanson v. Speidel Corp.*, 110 R.I. 335, 293 A. 2d 307, 310 (1972), or when the defendant's "statement was made with the knowledge that it was false or with a reckless disregard of whether it was false or not." *Powers v. Carvalho*, 117 R.I. 519, 368 A. 2d 1242, 1250 (1977). Plaintiff in its complaint has alleged that the defendant acted with malice and defendant has failed to show that there is no genuine issue on this question.²² Defendant's motion for summary judgment on the basis of privilege must therefore be denied.

[*53] VIII. Conclusion

The Court finds that defendant is not entitled to summary judgment on plaintiff's claim that its provider agreements with "preferred" automobile repair shops violate the rule of reason under the Sherman Act. The defendant's motion for summary judgment on all other antitrust claims is granted. The defendant's motion for summary judgment on plaintiff's slander claim is denied.

An order will be prepared in keeping with this Opinion.

End of Document

²² Defendant in its Memorandum of Law cites the deposition of Richard Ruggiero, the plaintiff's president, in support of its position that Fortin's statement was made without malice. The Court has read the cited portion of the deposition and finds therein no discussion whatsoever of the question of malice.

Antitrust & Trade Law > Exemptions & Immunities > General Overview

Antitrust & Trade Law > Exemptions & Immunities > McCarran-Ferguson Act Exemption

HN5 **Scope, Exemptions**

The McCarran-Ferguson Act, [15 U.S.C.S. § 1011 et seq.](#), exempts from the antitrust laws, including the Sherman Act, the business of insurance, which is regulated by the state and which does not constitute an act of boycott, coercion, or intimidation.

Antitrust & Trade Law > Sherman Act > General Overview

HN6 **Antitrust & Trade Law, Sherman Act**

An unreasonable restraint on the freedom to buy and sell on the open market -- not necessarily total exclusion -- is essential to the Sherman Act concept of boycott.

Antitrust & Trade Law > Exemptions & Immunities > McCarran-Ferguson Act Exemption

Business & Corporate Compliance > ... > Industry Practices > Federal Regulations > Antitrust Regulations

HN7 Exemptions & Immunities, McCarran-Ferguson Act Exemption

There are three criteria relevant in determining whether a particular practice is part of "the business of insurance" exempted from the antitrust laws by § 2(b): first, whether the practice has the effect of transferring or spreading of a policyholder's risk; second, whether the practice is an integral part of the policy relationship between the insurer and the insured; and third, whether the practice is limited to entities within the insurance industry. None of these criteria is necessarily determinative in and of itself.

Opinion by: HAWKINS

Opinion

[*1476] ORDER

This matter is before the court on defendant Blue Cross and Blue Shield of South Carolina, Inc.'s motion for summary judgment. The plaintiff instituted this action in July 1981, seeking damages and injunctive relief. Plaintiff Trident Neuro-Imaging Laboratory (Trident) is a South Carolina general partnership; the plaintiffs Albert F. Aiken, M.D., O. Rhett Talbert, M.D. and Thomas H. Dukes, M.D. are its partners. CT Scanlab is a North Carolina limited partnership, and James Harrell and John Mizzell are patients of one of the two scanlabs who have contracts of insurance with Blue Cross and Blue Shield of South Carolina, Inc. (Blue Cross). Both partnership plaintiffs consist of physician partners and are physician-directed "private" clinics which own, operate and use devices known as CAT scanners in rendering CAT scans and interpretations thereof to patients who have health and medical insurance with Blue Cross. Trident is located in **[**2]** North Charleston, South Carolina, and CT Scanlab is located in Charlotte, North Carolina.

The defendant Blue Cross is a private insurance corporation which contracts with policyholders and others to provide third party payment directly to health care providers for various health and medical services rendered by doctors, hospitals, clinics and other health care providers. If direct reimbursement is not paid to the provider, then Blue Cross may reimburse the policyholder directly for health care provided.

[*1477] The former defendant Palmetto Lowcountry Health Systems Agency (PLHSA) is a nonprofit regional Health Systems Agency (HSA) established pursuant to the National Health Planning and Resources Development Act of 1974 (NPRDA) (Public Law 93-641), [42 U.S.C. § 300k, et seq.](#), and state enabling legislation. PLHSA was designated as an HSA on April 29, 1976. By order dated November 2, 1982, this court granted summary judgment to defendant PLHSA.

The plaintiffs' complaint seeks damages and injunctive relief. Count I of the complaint alleges violations of §§ 4 and 16 of the Clayton Act ([15 U.S.C. § 15](#)) and [§ 1](#) of the Sherman Act ([15 U.S.C. § 1](#)) by Blue Cross, alleging [*3] a conspiracy by Blue Cross and other unnamed co-conspirators in restraint of trade. Count II of the plaintiffs' complaint alleges violations of the South Carolina statutes regarding trusts, monopolies and restraints of trade, specifically [S.C. CODE §§ 39-3-10, 39-3-120, 39-3-130, 39-3-140](#), and the South Carolina Unfair Trade Practices Act ([S.C. CODE § 39-5-20](#)). Count III of the complaint alleges a breach of contract by Blue Cross.

The case at bar involves Computerized Axial Tomography scanners (CAT scanners). Computerized axial tomography, labeled the first revolutionary innovation in radiology, is a procedure whereby a machine known as a scanner obtains x-ray images of cross sections of the head or body (tomography). These images are reconstructed from numerous angles (axial) mathematically into three dimensions (by computer). Reconstructions can be displayed on a television screen from which photographic prints may be made for medical records or presented in digital form. Plaintiffs' contention is that Blue Cross conspired with others to restrain trade by preventing or impairing the ability of physicians with CAT scanners to compete with hospitals in providing CAT scanning [*4] services.

Blue Cross has moved for summary judgment on the federal antitrust claim on two distinct grounds: (1) that there is no evidence creating an issue of antitrust conspiracy; and (2) that Blue Cross is exempt from antitrust liability under the McCarran-Ferguson Act ([15 U.S.C. § 1011, et seq.](#)). [HN1](#) [↑] Summary judgment may be granted where there is no genuine issue as to any material fact and the moving party is entitled to judgment as a matter of law. [Kendall Elevator Co., Inc. v. LBC & W Assoc. of S.C., Inc.](#), 350 F. Supp. 75 (D.S.C. 1972).

I. EVIDENCE OF ANTITRUST CONSPIRACY

Plaintiffs' position is that the evidence shows that Blue Cross conspired with PLHSA and other health planning agencies, the Health Care Financing Administration (HCFA) of the Department of Health and Human Services, hospitals with CAT scanners, hospital-based physicians (most notably radiologists), and Blue Cross and Blue Shield Association (BCA) to restrain trade in the market of CAT scanning, and attempted to prevent the acquisition of CAT scanners by private physicians.

Citing to numerous depositions and documents, the plaintiffs have substantiated, for the purposes of this summary judgment motion, [*5] their theory of conspiracy. This court has studied the evidence at length and concludes that there is sufficient evidence from which to draw reasonable inferences of the existence of a conspiracy as outlined by the plaintiffs.

To illustrate, BCA paid for the CAT scan study conducted by the Institute of Medicine, which discouraged the acquisition of CAT scanners by physicians and recommended that insurers not reimburse for scans performed on physician-owned machines. This report was relied on by PLHSA in adopting its recommendation that insurers not reimburse for CAT scans done on physician-owned scanners. Judge Simons has ruled in *Starnes v. Harris*, No. 79-2311-6 (D.S.C. Mar. 6, 1980), that Blue Cross acted in concert with HCFA and others to formulate a ceiling for Medicare reimbursement for CAT scans performed on physician-owned machines when no such limitation on reimbursement was placed on CAT scans on hospital-owned scanners. The existence, make-up, and discussions of [*1478] the "CAT discussion group" called by the South Carolina Department of Health and Environmental Control (DHEC) give rise to inferences of a joint effort to prevent physician-owned scanners. There [*6] is evidence from which to infer that Blue Cross worked with hospitals and hospital administrators to prevent the acquisition of CAT scanners by physicians (see affidavit of Michael L. Hodge). Further, the evidence as submitted indicates that Blue Cross never imposed any limit on the level of hospital reimbursement for CAT scans. As stated by the plaintiffs, each of the alleged conspirators had an economic or other express interest in preventing physician-

owned CAT scanners. Whether these persons or organizations joined in a conspiracy to carry out the mutual interest of the group is a question of fact that will have to be decided at trial.

In a memorandum supporting the motion for summary judgment and at oral argument, Blue Cross has attempted to narrow the scope of alleged conspiracy to the activities of the "CAT discussion group," as those participants in the DHEC meeting are known. Plaintiffs' position is that the meeting was only one act in furtherance of the overall conspiracy, and plaintiffs have supported their position for the purposes of this motion.

HN2[] The antitrust plaintiff, when faced with a summary judgment motion, must merely offer significant probative evidence to [****7**] support its case.

HN3[] If reasonable inferences drawn from all of the evidence -- which must be viewed in the light most favorable to the plaintiff -- indicate the existence of a conspiracy, the plaintiff has introduced a sufficient basis for proceeding to trial. See [*Poller v. Columbia Broadcasting System, Inc., 368 U.S. 464, 7 L. Ed. 2d 458, 82 S. Ct. 486 \(1962\)*](#). The ultimate inference that a conspiracy existed need not be more probable than the inference that the refusal to deal resulted from independent business judgment.

[*Southway Theatres, Inc. v. Georgia Theatre Co., 672 F.2d 485, 495 \(5th Cir. 1982\)*](#). **HN4**[] When viewing a conspiracy such as is involved in this case, the conspiracy must be judged, not by looking at its various distinct parts, but only by looking at it as a whole.

Conspiracies may be implied from a course of dealing and other circumstances [citation omitted]. Moreover, this case involves elusive questions concerning the moving defendants' intentions and motives, which are questions that should seldom be disposed of by summary procedure.

Ohio ex rel. Brown v. Mahoning County Medical Society, 1980-1 Trade Cases P 63-100, p. 77,505 [****8**] (N.D. Ohio 1979).

The facts and evidence in this case permit the inference that Blue Cross conspired with numerous parties to boycott and prevent the acquisition of CAT scanners by private physicians and to otherwise restrain trade in the CAT scanning market. Regardless of Blue Cross' denial that a conspiracy existed, the evidence before this court of the close contacts and contractual relations between Blue Cross and the alleged co-conspirators, the actions of those parties, and the motives of the alleged co-conspirators to boycott physician-owned scanners give rise to an inference that all embraced the conspiracy. See [*Feminist Women's Health Center, Inc. v. Mohammad, 586 F.2d 530, 548-49 \(5th Cir. 1978\)*](#); [*Ballard v. Blue Shield of Southern West Virginia, 529 F. Supp. 71 \(S.D. W. Va. 1981\)*](#).¹

[**9] Given the general principle that summary disposition of antitrust conspiracy cases is not favored, especially when there are competing inferences which may be [***1479**] drawn from the evidence and questions exist concerning the defendant's motives and intent, this is simply not a case which is appropriate for summary disposition. As the Supreme Court stated in the landmark case [*Poller v. Columbia Broadcasting System, Inc., 368 U.S. 464, 7 L. Ed. 2d 458, 82 S. Ct. 486 \(1962\)*](#):

We believe that summary procedures should be used sparingly in complex antitrust litigation where motive and intent play leading roles, the proof is largely in the hands of the alleged conspirators, and hostile witnesses thicken the plot.

¹ Blue Cross relies on two cases from the Second Circuit Court of Appeals to support its position that it is entitled to a summary judgment on the conspiracy issue. Neither case is applicable since both determined that no conspiracy existed after a full review of the evidence presented at trial and the peculiar circumstances of the industries and relationships involved. In [*Oreck Corp. v. Whirlpool Corp. 639 F.2d 75 \(2d Cir. 1980\)*](#), cert. denied, 454 U.S. 1083, 102 S. Ct. 639, 70 L. Ed. 2d 618 (1982), the court affirmed a directed verdict, and in [*Venture Technology, Inc. v. National Fuel Gas Co., 685 F.2d 41 \(2d Cir. 1982\)*](#), the court reversed a jury verdict.

Id. at 473.

II. McCARRAN-FERGUSON ACT

Blue Cross also argues that, as a matter of law, summary judgment should be granted as Blue Cross is protected by [HN5](#) the McCarran-Ferguson Act, [15 U.S.C. § 1011, et seq.](#), which exempts from the antitrust laws, including the Sherman Act, the business of insurance, which is regulated by the state and which does not constitute an act of boycott, coercion, or intimidation.

The plaintiffs concede that Blue Cross [\[**10\]](#) is regulated by the state, but argue that the act complained of is not the "business of insurance." In addition, plaintiffs argue that their claim is within the "boycott" exception of Section 3(b) of the Act, which provides that the Sherman Act shall remain applicable "to any agreement to boycott, coerce or intimidate, or act of boycott, coercion or intimidation." [15 U.S.C. § 1013\(b\)](#). The issue is whether the plaintiffs have provided sufficient evidence of conduct amounting to a boycott to withstand a summary judgment motion.

A. Conduct Amounting to Boycott

In [St. Paul Fire & Marine Ins. Co. v. Barry, 438 U.S. 531, 57 L. Ed. 2d 932, 98 S. Ct. 2923 \(1978\)](#), the Supreme Court construed the language of § 3(b) as adopting the traditional concept of a boycott: namely, a target of the boycott and a concerted refusal to deal with the target. Blue Cross would argue that there must be a refusal to deal *on any terms* by members of the boycott, thus, there is no boycott in the instant case because, on some Blue Cross policies, the plaintiffs are reimbursed. Further, Blue Cross points out, other private insurers and Medicare provide the coverage for CAT scans performed in physicians' [\[**11\]](#) offices. Blue Cross also points out that it does not compete in the relevant market, a requirement it says is necessary for a relevant boycott.

The generic concept of boycott is a "method of pressuring a party with whom one has a dispute by withholding, or enlisting others to withhold, patronage or services from the target." [Barry, 438 U.S. at 542](#). In the present case, under the facts alleged, Blue Cross' partial refusal to deal with plaintiffs, for whom reimbursement is important in providing health care services, "accords with the common understanding of boycott." [Barry, 438 U.S. at 552](#). As a means of ensuring plaintiffs' submission to their attempt to prevent them from operating a physician-owned CAT scanner, the alleged conspirators convinced Blue Cross to refuse to reimburse plaintiffs. A valuable service germane to plaintiffs' business and important to their effective competition with others was withheld from it by collective action.

Further, as the *Hibbett* court ruled, [HN6](#) an unreasonable restraint on the freedom to buy and sell on the open market -- not necessarily total exclusion -- is essential to the Sherman Act concept of boycott. [Nurse Midwifery Associates](#) [\[**12\]](#) *v. Hibbett, 549 F. Supp. 1185, 1191-92 (M.D. Tenn. 1982)*.

The plaintiffs rely on *Ballard v. Blue Shield of West Virginia*, a Fourth Circuit case which involved the refusal of the Blue Shield plan to reimburse for chiropractic services. The Fourth Circuit held that the allegation that Blue Shield's policy restrained trade by making chiropractic services unattractive was sufficient to come within the scope of [15 U.S.C. § 1013\(b\)](#) for purposes of withstanding a motion to dismiss. [Ballard v. Blue Shield of West Virginia, 543 F.2d 1075 \(4th Cir. 1976\)](#). On remand, on motion for summary judgment, the district court refused to hold that a boycott within the meaning of the Act [\[*1480\]](#) could not be proved and denied summary judgement.

This court is of the opinion that whether or not a boycott has existed or exists presently is a question of fact going directly to the merits of the plaintiffs' case. Quite simply, if a boycott exists or has existed in the past, the plaintiffs may prevail before a jury and recover damages accordingly. Conversely, if there is or has been no boycott the plaintiffs will have failed to prove their case and the defendants will prevail without [\[**13\]](#) need for invoking the McCarran-Ferguson exemption. In short, by alleging a boycott, plaintiffs have precluded further inquiry regarding this exemption and must now be put to their proof.

The existence or non-existence of a boycott remains a genuine issue of material fact to be resolved herein and summary judgment is manifestly inappropriate.

Over a six-year period, the court file in this action has become voluminous, and this court is unable to say that a jury might not draw differing inferences regarding the existence of a boycott. Indeed, documents submitted by

the plaintiffs tend to indicate an anti-chiropractic bias on the part of the leadership of the American Medical Association. The factual materials in the record do not necessarily preclude plaintiffs' establishing at trial some nexus between the A.M.A. and one or more of the named defendants with regard to this anti-chiropractic attitude. Should such a nexus be established, a jury could find that there was concerted action among one or more defendants and the A.M.A. to boycott the chiropractic profession.

The casebooks are replete with admonitions against the granting of summary judgment in complex antitrust cases involving **[**14]** intent and motive. (See 10 Wright and Miller, Federal Practice and Procedure § 2730).

....

The case at bar seems to be a classic example of a situation in which there may be little dispute as to the facts, but great disagreement as to the inferences which might conceivably be drawn therefrom. The record before the court abounds with documents, depositions and interrogatories which, taken together, constitute a set of facts about which there is little dispute. Summary judgment, under these circumstances, will nevertheless be improper because it appears that these undisputed facts might yield conflicting inferences.

[Ballard v. Blue Shield of Southern West Virginia, 529 F. Supp. 71, 74-75 \(S.D. W. Va. 1981\)](#).

Because the § 3(b) exception to possible McCarran-Ferguson Act exemption is applicable in this case for the purpose of this motion, this court could deny Blue Cross' summary judgment motion on this ground without considering whether the challenged activity constitutes the "business of insurance" for purposes of exemption under § 2(b). Application of the § 3(b) boycott exception, however, warrants denial of Blue Cross' motion only as to the Sherman **[**15]** Act claims of boycott or concerted refusal to deal. To the extent that the complaint states any antitrust claims that do not invoke a boycott within the meaning of the Sherman Act, Blue Cross could still argue that the § 2(b) "business of insurance" exception applies to it.

B. The Business of Insurance

The issue becomes whether or not the decision by Blue Cross not to reimburse policyholders for CAT scans performed outside hospitals is the business of insurance.²

The Supreme Court in *[Union Labor Life Ins. Co. v. Pireno, 458 U.S. 119, 102 S. Ct. 3002, 73 L. Ed. 2d 647 \(1982\)](#)*, re-examined the three basic elements used to determine what is the "business of insurance" that were first set forth in *[Group Life and Health Ins. Co. v. Royal Drug Co., 440 U.S. 205, 59 L. Ed. 2d 261, 99 S. Ct. 1067 \(1979\)](#)*.

[*1481] [16]** In sum, *Royal Drug* identified [HN7](#) three criteria relevant in determining whether a particular practice is part of "the business of insurance" exempted from the antitrust laws by § 2(b): *first*, whether the practice has the effect of transferring or spreading of a policyholder's risk; *second*, whether the practice is an integral part of the policy relationship between the insurer and the insured; and *third*, whether the practice is limited to entities within the insurance industry. None of these criteria is necessarily determinative in and of itself

[Pireno, 458 U.S. at 129, 102 S. Ct. at 3009](#). These will be discussed separately.

(1) Whether the practice has the effect of transferring or spreading of a policyholder's risk.

"It is characteristic of insurance that a number of risks are accepted, some of which involve losses, and that such losses are spread over all the risks so as to enable the insurer to accept each risk at a slight fraction of the possible liability upon it." G. Couch, Encyclopedia of Insurance Law, § 1:3 (2d Ed. 1959). Blue Cross classifies the underwriting decision made as the decision, in part, to exclude the "risk of CAT scans **[**17]** performed on a hospital scanner" is transferred to Blue Cross and spread over all its subscribers.

² It should be noted that it is plaintiffs' contention that Blue Cross' decision not to reimburse for physician-owned CAT scans was only one aspect of the overall illegal conduct.

Plaintiffs, on the other hand, contend that the underwriting decision made by Blue Cross was to reimburse for all medically necessary CAT scans, since any policyholder in need of a scan could obtain reimbursement for a CAT scan by going to a hospital with a scanner. Thus, the decision NOT to reimburse physician-owned scanners was made to discourage the acquisition of CAT scanners and was not an underwriting decision.

A study of relevant case law is revealing. In *Royal Drug*, the Texas Blue Shield Plan offered policies which entitled insureds to purchase prescription drugs for two dollars from pharmacies participating in "Pharmacy Agreements" with Blue Shield. Non-participating pharmacies alleged pricefixing and a boycott. The Supreme Court ruled that Blue Shield was not protected from liability by the McCarran-Ferguson Act. The Court found no "underwriting of risk" involved in the decision to offer the "Pharmacy Agreement" involved in the decision to offer the "Pharmacy Agreement" benefit to insureds because Blue Shield had already accepted the risk of paying for an insured's [**18] prescription. The Supreme Court in *Pireno* reviewed the use of a chiropractic peer review committee by insurance companies to determine whether chiropractic charges were reasonable. The Supreme Court found the arrangement in question did not involve the spreading of risk. As explained by the Second Circuit, whose opinion was affirmed by the Supreme Court, peer review merely *measures the extent* to which a policyholder has failed to effect such a transfer of risk (i.e., the cost of chiropractic service). *Pireno v. New York State Chiropractic Ass'n*, 650 F.2d 387, 393 (1981). The *Pireno* Supreme Court found the use of the peer review committee to be a form of cost reduction and *not* the spreading of risk. *Pireno*, U.S. , 102 S. Ct. at 3009.

A Tennessee district court refused to dismiss an action brought by midwives against a medical insurance company for refusing to provide malpractice coverage. Using the *Pireno* analysis, the court in *Nurse Midwifery Associates v. Hibbett*, 549 F. Supp. 1185 (M.D. Tenn. 1982), undertook an analysis of the insurance company's decision to refuse to cover midwives in order to determine if it were made a part [**19] of the "business of insurance." There, the judge felt that the denial of coverage was related to the underwriting or spreading of "risk," saying that if transferring risk is the "business of insurance," then the converse process, a refusal to transfer a risk, would also be a part of insurance. *Id. at 1194*. Compare *Pireno*, where the Second Circuit said "an activity or procedure that does not either transfer risk for insurer or spread the risk among insureds is *not* the business of insurance." *Pireno*, 650 F.2d at 393. However, the court in *Hibbett* applied the other two criteria of the "business of insurance" to the facts and found this refusal to insure *not* to be covered by the McCarran-Ferguson Act for the purpose of the dismissal motion.

[*1482] In *Hahn v. Oregon Physicians' Service*, 508 F. Supp. 970 (D. Org. 1981), the district court granted summary judgment for the defendant health insurers in an antitrust action where plaintiffs alleged that the insurers had conspired to boycott podiatrists' services in favor of licensed physicians by not providing insurance coverage. The district court in examining the "risk-spreading" criteria found that: [**20]

In my view, the qualifications of physicians, podiatrists, and other members of the healing arts, and the nature and extent of the services such persons may perform, are essential elements in the risk which health care insurance companies may legally define. Therefore, the defendants were privileged to determine that the care provided by podiatrists increased the risk over that of an M.D., for the same type of service. This is particularly true in Oregon, where there is no equality statute.

I therefore hold that the decision of the defendants to limit their risk by imposing restrictions on podiatric care insurance qualifies as the "business of insurance" for purposes of the McCarran-Ferguson Act.

Id. at 975.

On appeal, the Ninth Circuit held that the record did not support the district court's decision and therefore reversed the district court in *Hahn v. Oregon Physicians' Service*, 689 F.2d 840 (9th Cir. 1982). While the opinion primarily focused on the third criteria set forth in *Royal Drug* and *Pireno*, the court stated: ". . . the defendants have introduced no evidence tending to establish there were bona fide risk-related reasons to distinguish between [**21] the services of M.D.'s and podiatrists . . ." *Id. at 843.*

Finally, the Fourth Circuit, in *Virginia Academy of Clinical Psychologists v. Blue Shield of Virginia*, 624 F.2d 476 (4th Cir. 1980), cert. denied, 450 U.S. 916, 67 L. Ed. 2d 342, 101 S. Ct. 1360 (1981), decided a Sherman Act case

brought by psychologists against Blue Shield for its refusal to reimburse insureds for services rendered by clinical psychologists unless the services were billed through a physician. The court held that the defendants' activities were not the "business of insurance." *Id. at 483-84*. The court recognized that the insurers had already made the underwriting decision to cover these mental and nervous disorders in their policies. "Their decision regarding psychologists was not whether to underwrite the risk of those disorders or even the need for psychotherapy; rather it was a question of *who* [sic] they would pay for such services." *Id. at 484*. The court therefore decided that the defendants' actions did not fall within the traditional meaning of the "business of insurance" but rather related to the cost of carrying out their contractual obligation.

Thus, cases since *Royal Drug* seem to hold that only the core activities of a traditional insurance company, *viz.*, the underwriting and risk spreading functions, fall within the McCarran-Ferguson Act exemption for the business of insurance.

Applying that approach to the facts at hand, this court concludes that Blue Cross' decision not to reimburse for physician-owned scanners is not an underwriting decision but rather a cost reduction decision as explained by the plaintiffs. Thus, Blue Cross fails to qualify for the first criteria of the "business of insurance."

(2) *Whether the practice is an integral part of the policy relationship.*

Although Blue Cross' reimbursement policy with regard to CAT scans was adopted on January 23, 1977, and applied to all claims received thereafter, the policy was not incorporated into many contracts even as late as April 26, 1979. Further, in *Virginia Academy*, although the payment policy was clearly included in the contracts, the Fourth Circuit concluded:

The essence of the business of insurance is the relationship between the insurance company and its policyholder. [Citations omitted]. We are persuaded that the defendants' policy regarding payment of clinical psychologists is only tangential to that relationship in that it does not affect the benefit conferred upon the subscriber.

Id. at 483. The Virginia Blue Shield policy would not reimburse a policyholder who went directly to a psychologist. In order to [*1483] obtain reimbursement, a policyholder would have to go to a physician who would then presumably refer the patient, then handle the billing for the treatment rendered by the psychologist. The Fourth Circuit did not feel this policy affected the benefit conferred on the subscriber. It seems certain that the Fourth Circuit would feel the same way about Blue Cross' policy not to reimburse for CAT scans taken on physician-owned instruments.

(3) *Whether the practice is limited to entities within the insurance industry.*

It is clear that Blue Cross' refusal to reimburse for physician-owned scanners inevitably involves third parties wholly outside the insurance industry -- namely neurologists. As noted in *Royal Drug* (and quoted in *Pireno*), § 2(b) was intended primarily to protect "intra-industry cooperation in the underwriting of risks." *440 U.S. at 221*. The plaintiffs claim is that Blue Cross' **24 practices restrain competition in a provider market -- the market for neurological reading of CT scans -- rather than the insurance market. *Royal Drug*, *Pireno*, and *Hahn*, all support this analysis. Further, the plaintiffs have alleged that hospital physicians and others influenced Blue Cross' decision not to reimburse. To that extent, third parties outside the insurance industry were involved in the decision-making process. Blue Cross cites *Anglin v. Blue Shield of Virginia*, 693 F.2d 315 (4th Cir. 1982), for support in saying that Blue Cross meets this third criteria; however, *Anglin* dealt with the refusal of Blue Shield to offer the plaintiff a policy which would cover his child but would not require coverage for his wife. That refusal was certainly an insurance decision. The plaintiffs were policyholders whose alleged injury concerned only Blue Shield's relations with its policyholders and had no direct effect on a specific health care provider. It is evident under the facts of the case at bar that Blue Cross does not meet the third criteria.

To summarize, Blue Cross' decision not to reimburse for physician-owned scanners does not constitute the "business of insurance" within the meaning of § 2(b) of the McCarran-Ferguson Act. As the district court said in *Hibbett*,

This Court cannot conclude, for purposes of these motions to dismiss, that the process by which SVMIC, allegedly in concert with the physicians, decided not to continue its policy relationship with Dr. Martin is so plainly the "business of insurance" as to require Section 2(b) exemption. To hold otherwise would mean that the challenged denial of coverage should be exempted from antitrust scrutiny as part of the business of insurance even if, as plaintiffs allege, it was made solely to apply pressure upon the customer in order to secure his compliance with anticompetitive behavior in a noninsurance market. It is not the business of insurance to use coverage "as a coercive lever . . . in order to compel certain dealings in a non-insurance product or service." (citation omitted)

Hibbett, 549 F. Supp. at 1194. Summary judgment is denied as a matter of law on the ground that Blue Cross is exempt from liability by the McCarran-Ferguson Act. Plaintiffs' injuries did not result from the "business of insurance," therefore, Blue Cross is not entitled to the protection **[**26]** afforded by the Act.

III. BLUE CROSS' MOTION FOR SUMMARY JUDGMENT ON THE STATE LAW CAUSES OF ACTION

As to the allegations of state antitrust violations, this court has previously held that under Count II there is no private right of action under the state antitrust statutes. Blue Cross is also exempt from liability under the Unfair Trade Practices Act, which has been allegedly violated by Blue Cross. The activities of Blue Cross are regulated by the Insurance Commission under Title 38 of the South Carolina Code. HN8[↑] The Unfair Trade Practices Act does not apply to "transactions permitted under laws administered by any regulatory body . . ." S.C. CODE ANN. § 39-5-40(a)(1976), see State ex rel. McLeod v. Rhoades, 275 S.C. 104, 267 S.E.2d 539 (1980). As the South Carolina Commission on Insurance approved Blue Cross' exclusion of coverage on physician-owned CAT scans, § 39-5-40(g) acts to exempt Blue Cross from Unfair Trade Practice claims.

[*1484] Count III alleges contract claims by the individual plaintiffs, subscribers to Blue Cross policies. As summary judgment has been denied on the federal claims, this court will continue its pendent jurisdiction over these common **[**27]** law claims.

Based on the above, it is, therefore,

ORDERED, that the defendant Blue Cross' motion for summary judgment be, and the same is hereby, granted only as to the state antitrust and Unfair Trade Practice causes of action (designated as Count II in the complaint), and that its motion for summary judgment as to the federal antitrust cause of action and the contract cause of action (designated as Counts I and III in the complaint) be, and the same is hereby, denied.

AND IT IS SO ORDERED.

Opinion by: VAN GRAAFEILAND

Opinion

[*31] VAN GRAAFEILAND, Circuit Judge:

Fairdale Farms, Inc. appeals from a summary judgment of the United States District Court for the District of Vermont (Albert W. Coffrin, J.) dismissing its antitrust complaint against appellees, Yankee Milk, Inc. and Regional Cooperative Marketing [*2] Agency, Inc. We affirm.

Appellant is a dairy products producer and processor located in Bennington, Vermont, which purchases raw milk from other producers in Bennington County, Berkshire County, Massachusetts, and Rensselaer County, New York. Appellee, Yankee Milk, is a dairy farmer cooperative with members in New England and eastern New York. Yankee and six other cooperatives in the New England-New York area are associated in the Regional Cooperative Marketing Agency, Inc. (RCMA). Since 1973, RCMA has acted as a common marketing agency for its members.

In 1975, Fairdale began this action against Yankee, alleging that Yankee and RCMA had conspired to fix the price of raw milk and had monopolized and attempted to monopolize the raw milk trade in the three county area in which Fairdale procures its milk, all in violation of [sections 1](#) and [2](#) of the Sherman Act, [15 U.S.C. §§ 1, 2 \(1976\)](#). Yankee joined RCMA as a necessary party. In 1979, the district court granted defendants' motions for summary judgment on the [section 1](#) price-fixing claim but denied their motions on the [section 2](#) monopolization claim. The court certified the case for interlocutory appeal. [28 U.S.C. § 1292](#) [*3] (b). This Court affirmed the district court's dismissal of the price-fixing claim, but vacated and remanded on the monopolization claim. [Fairdale Farms, Inc. v. Yankee Milk, Inc.](#), [635 F.2d 1037 \(2d Cir. 1980\)](#), cert. denied, [454 U.S. 818](#), [70 L. Ed. 2d 88](#), [102 S. Ct. 98](#) (1981).

The district court had ruled that the latter claim was to be tested by the usual monopolization standards of [United States v. Grinnell Corp.](#), [384 U.S. 563](#), [16 L. Ed. 2d 778](#), [86 S. Ct. 1698](#) (1966). That case held that a claim under [section 2](#) was made out if the plaintiff established "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a

consequence of a superior product, business acumen, or historical accident." *Id. at 570-71*. We held that the effect of the Capper-Volstead Act, [7 U.S.C. §§ 291-92](#), "is to prevent the full application of the second element of this test to agricultural cooperatives," so that the acquisition, maintenance, or exercise of monopoly power by "predatory means" only was proscribed. [\[**4\] 635 F.2d at 1045](#). Because we could not determine "whether the district court denied defendants' motion for summary judgment dismissing the [section 2](#) count on the premise that the mere accretion of power from formation of a cooperative is sufficient to violate that section or on the ground that predatory acts had been sufficiently shown," *id.*, the order of denial was vacated and remanded for reconsideration. Upon remand and defendants' renewal of their motions for summary judgment, the district court dismissed the complaint, holding that plaintiff had raised no material questions of fact as to whether defendants had engaged in predatory conduct.

RCMA Pricing Policies

Appellant contends that RCMA set its over-order premium so high as to constitute a predatory policy. The over-order premium was the amount by which RCMA prices exceeded the market order minimum prices [\[*32\]](#) set by the United States Department of Agriculture and State regulatory agencies. Relying in part upon our decision in [Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263, 294 \(2d Cir. 1979\)](#), cert. denied, 444 U.S. 1093, 62 L. Ed. 2d 783, 100 S. Ct. 1061 (1980), [\[**5\]](#) the district court properly rejected that argument. As we stated in *Berkey*, "there is probably no better way for [a monopolist] to guarantee that its dominance will be challenged than by greedily extracting the highest price it can." *Id.* It may be, as appellant contends, that market forces will not correct over-pricing in the cooperative milk trade as rapidly as they might in others. Congress wisely has protected against this possibility, however, by authorizing [HN1](#) the Secretary of Agriculture to issue a cease and desist order against any monopolization by a cooperative which has "unduly enhanced" the price of any agricultural product. [7 U.S.C. § 292](#).

In enacting the Sherman Act, Congress recognized that [HN2](#) the "reasonableness of prices has no constancy." [United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 221, 84 L. Ed. 1129, 60 S. Ct. 811 \(1940\)](#). "The reasonable price fixed today may through economic and business changes become the unreasonable price [\[*6\]](#) of tomorrow," [United States v. Trenton Potteries Co., 273 U.S. 392, 397, 71 L. Ed. 700, 47 S. Ct. 377 \(1927\)](#), and courts are poorly equipped to undertake the "heavy, continuous, and unguided burden" of determining reasonableness, III Areeda and Turner, [Antitrust Law](#) para. 710, at 149 (1978); see Sullivan, *Handbook of the Law of Antitrust* 117-18 (1977). It is not surprising, therefore, that Congress did not ask the courts to determine "whether or not particular price-fixing schemes are wise or unwise, healthy or destructive." [Socony-Vacuum Oil Co., supra, 310 U.S. at 221](#). Instead, the Sherman Act makes every combination formed for the purpose of raising the price of a commodity illegal per se. [Id. at 223](#).

The Capper-Volstead Act was enacted to provide an exception from this rule for agricultural cooperatives. [Fairdale I, supra, 635 F.2d at 1039](#). Had Congress intended that the federal courts were to act as regulatory bodies in setting upper monetary limits for this exception, it easily could have said so. It did not. Although the Capper-Volstead Act has not relieved us of our duty to outlaw "competition-stifling [\[*7\]](#) practices", [Maryland and Virginia Milk Producers Ass'n v. United States, 362 U.S. 458, 463, 4 L. Ed. 2d 880, 80 S. Ct. 847 \(1960\)](#), we fail to see how an increase in prices by an agricultural cooperative stifles competition by other cooperatives or individual farmers. Appellant's contention that appellees' imposition of over-order premiums constitutes a "predatory practice" against the consumer misinterprets the meaning of that phrase as it is used in [Fairdale I, supra, 635 F.2d at 1044](#), and [United States v. Dairymen, Inc., 660 F.2d 192, 194 \(6th Cir. 1981\)](#). [HN3](#) "Predatory practices", as discussed in those and similar cases, are not aimed at consumers, but at "an identifiable competitor or potential competitor or an identifiable group of them." Sullivan, *supra*, at 112. Although, in some instances, the charging of unremunerative prices may damage or destroy competition, [Northeastern Tel. Co. v. American Tel. and Tel. Co., 651 F.2d 76, 86 \(2d Cir. 1981\)](#), cert. denied, 455 U.S. 943, 71 L. Ed. 2d 654, 102 S. Ct. 1438 (1982), [\[*8\]](#) excessively high pricing hardly is likely to accomplish the same result.

We likewise find no merit in appellant's argument that appellees violated [section 2](#) because they charged different premiums in the several milk-marketing areas which they served. [HN4](#)¹⁵ The Secretary of Agriculture sets minimum milk prices for each federal marketing area which are not nationally uniform, nor, indeed, necessarily uniform within the marketing area itself, financial allowances being permitted for those producers in an area who provide an economic service or benefit to the handler. [Schepps Dairy, Inc. v. Bergland, 202 U.S. App. D.C. 11, 628 F.2d 11, 15 \(D.C. Cir. 1979\)](#). However, producers are permitted to bargain with handlers for higher prices, or over-order premium charges. *Id.* A similar situation exists in State-regulated areas, one of which includes Berkshire County, Massachusetts.

[HN5](#)¹⁶ The basic requirement for successful cooperative marketing is the control or handling [*33] of a substantial [**9] part of a commodity in the market involved. [Fairdale I, supra, 635 F.2d at 1041-43](#). It would be self-defeating for a cooperative to raise its prices when its share of the market is so small as to leave it without bargaining power. It is undisputed that appellees did not have the bargaining power in the large New York-New Jersey marketing area to enable them successfully to impose over-order premium charges. See [Zuber v. Allen, 396 U.S. 168, 173 n.4, 24 L. Ed. 2d 345, 90 S. Ct. 314 \(1969\)](#). Appellant contends, nonetheless, that appellees' failure to impose over-order premium charges in New York precluded them from imposing such charges in the New England marketing area. We disagree.

[HN6](#)¹⁷ Governmentally defined marketing areas for fluid milk create natural boundaries for price differentials. Fairdale has made no showing that appellees' pricing in the New York-New Jersey market was below their cost or was designed in some manner to eliminate competition by predatory means. See Areeda and Turner, *supra*, para. 720, at 187. Absent any showing that appellees [**10] were moving milk from the New York marketing area into the New England marketing area to compete with Fairdale and given appellees' lack of bargaining power in the New York area, there was nothing predatory in the premium charges which appellees imposed uniformly in the Berkshire County area where appellant purchased milk. To hold otherwise would be to defeat the very purpose of the Capper-Volstead Act. See [Kinnett Dairies, Inc. v. Dairymen, Inc., 512 F. Supp. 608, 633-34 \(M.D. Ga. 1981\); GVF Cannery, Inc. v. California Tomato Growers Ass'n, 511 F. Supp. 711, 715-16 \(N.D. Cal. 1981\)](#).

Refusal to Deal

Yankee first began charging that RCMA premium to Fairdale in the second half of 1973. The premium was imposed at all relevant times only with respect to milk produced by Yankee members in Berkshire County. In the Spring of 1974, a New York handler, Normanskill Dairy, began preparations to enter the Berkshire market. By purchasing in New York, where the Government minimum price was lower than in Berkshire County and where RCMA could not impose its premium because of competition, Normanskill would be able to offer prices to potential Berkshire customers [**11] that were lower than those charged by Fairdale. Seeking to forestall this competition by lowering its own prices, Fairdale asked Yankee for an exemption from the RCMA premium. Yankee granted an exemption to Fairdale, but for one month only. When the premium was reimposed, Fairdale refused to pay it. Although Yankee warned Fairdale that it would cease to deliver any more milk unless the Berkshire premiums were paid, milk deliveries continued while the matter was being negotiated.

In December, 1974, Fairdale learned from two Yankee members that Yankee's management had ordered them to withhold milk deliveries to Fairdale. Upon inquiry, Fairdale learned that the order had been given in error and already had been rescinded. At the next negotiating session, Fairdale demanded that Yankee promise to give Fairdale forty-five days prior notice of any termination of its milk supply. Upon Yankee's refusal to give such assurance, Fairdale, professing its inability to live with resultant supply uncertainties, discontinued its relations with Yankee as of December 31, 1974.

Fairdale says Yankee's threat to sell it no more milk was a predatory practice. Because the dispute concerned only Yankee [**12] milk produced in Berkshire County, Fairdale contends Yankee had no reason to refuse to sell it milk purchased in Vermont and New York, about which there was no price dispute. Since only 40% of Fairdale's milk purchases were from Yankee, no reasonable contention can be made that Yankee was cutting Fairdale off from all

sources of supply. Moreover, although Vermont producers were getting the Vermont Milk Control Board price, which included the equivalent of an RCMA premium, no such premium was charged in eastern New York, only a short distance from Bennington. [*34] See *Kinnett Dairies, Inc. v. Dairymen, Inc., supra, 512 F. Supp. at 624-25*. **HN7**[[↑]] Section 2 of the Sherman Act does not give purchasers the exclusive right to dictate the terms upon which they will deal. Yankee, which did not have a monopoly covering both the New York and New England areas, lawfully might refuse to sell to a purchaser which would not meet its terms of sale and which had other sources of supply available. *Kinnett Dairies, Inc. v. Dairymen, Inc., supra, 512 F. Supp. at 632*; *GVF Cannery, Inc. v. California Tomato Growers Ass'n, supra, 511 F. Supp. at 716*. [**13] Such conduct cannot be considered an unlawful use of lawfully acquired monopoly power. See *Fairdale I, supra, 635 F.2d at 1044*. If anything, Yankee's action in terminating all business relationships with Fairdale necessarily created an added market for its competitors. *House of Materials, Inc. v. Simplicity Pattern Co., 298 F.2d 867, 871 (2d Cir. 1962)*.

Fairdale's argument that a processor who refuses to pay overdue premium charges nonetheless is entitled to forty-five days' notice before future deliveries can be cancelled, is specious. **HN8**[[↑]] There is nothing predatory in terminating deliveries to a purchaser who refuses full payment therefor, particularly where other purchasers are required to and do pay the full price. As a matter of fact, it was not Yankee, but Fairdale, which terminated their business relationship, and it did so on one week's notice.

The judgment of the district court is affirmed.

The Noerr-Pennington doctrine generally holds that the Sherman Act, [15 U.S.C.S. § 1 et seq.](#), does not apply to joint efforts by groups seeking to exercise their, [U.S. Const. amend. I](#), right to petition the government, whether it be a petition to the legislature, an administrative agency, or the courts. Furthermore, such joint efforts do not violate the antitrust laws even though intended to eliminate competition. But an exception to the doctrine does hold that the Sherman Act applies if the joint action is a mere sham to cover what is actually nothing more than an attempt to interfere directly with the business relationships of a competitor.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

[HN8](#) Exemptions & Immunities, Noerr-Pennington Doctrine

The Sherman Act, [15 U.S.C.S. § 1 et seq.](#), does not prohibit two or more persons from associating together in an attempt to persuade the legislature or the executive to take particular action with respect to a law that would produce a restraint or a monopoly. Such associations bear very little if any resemblance to the combinations normally held violative of the Sherman Act, combinations ordinarily characterized by an express or implied agreement or understanding that the participants will jointly give up their trade freedom, or help one another to take away the trade freedom of others through the use of such devices as price-fixing agreements, boycotts, market-division agreements, and other similar arrangements.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

[HN9](#) Exemptions & Immunities, Noerr-Pennington Doctrine

It is established that the right of access to the courts is indeed but one aspect of the right of petition; accordingly, groups do not violate the Sherman Act, [15 U.S.C.S. § 1 et seq.](#), by using the channels and procedures of state and federal agencies and courts to advocate their causes and points of view respecting resolution of their business and economic interests vis-a-vis their competitors.

HN11 [blue icon] **Antitrust & Trade Law, Exemptions & Immunities**

When a state legislature enacts an otherwise unlawful anticompetitive system of regulation, such regulation is outside the reach of the antitrust laws under the state action exemption provided that the regulations reflect a state policy clearly articulated and affirmatively expressed, designed to displace unfettered business freedom with regulation.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN12 [blue icon] **Exemptions & Immunities, Parker State Action Doctrine**

State agencies or subdivisions of a state simply by reason of their status as such, apparently do not qualify as the state acting in its sovereign capacity. Actions by such bodies, however, may reflect a state policy to displace competition with regulation. Such actions will not be subject to scrutiny under the Sherman Act, [15 U.S.C.S. § 1 et seq.](#), provided that an adequate state mandate for anticompetitive activities exists. This mandate exists when it is found from the authority given a governmental entity to operate in a particular area, that the legislature contemplated the kind of action complained of.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN14 [blue icon] **Exemptions & Immunities, Parker State Action Doctrine**

The Sherman Act, [15 U.S.C.S. § 1 et seq.](#), will preempt a state statute if there exists an irreconcilable conflict between the federal and state regulatory schemes. It is then self-evident that application of state action principles follows the antitrust court's initial determination that there is truly a conflict between the Sherman Act and the challenged regulatory scheme.

[HN15](#) [] Exemptions & Immunities, Parker State Action Doctrine

A state statute, when considered in the abstract, may be condemned under the antitrust laws only if it mandates or authorizes conduct that necessarily constitutes a violation of the antitrust laws in all cases, or if it places irresistible pressure on a private party to violate the antitrust laws in order to comply with the statute. Such condemnation will follow under the Sherman Act, [15 U.S.C.S. § 1](#), when the conduct contemplated by the statute is in all cases a per se violation. If the activity addressed by the statute does not fall into that category, and therefore must be analyzed under the rule of reason, the statute cannot be condemned in the abstract. Analysis under the rule of reason requires an examination of the circumstances underlying a particular economic practice, and therefore does not lend itself to a conclusion that a statute is facially inconsistent with federal antitrust laws.

Opinion

[*1441] HANSON, Senior District Judge.

This antitrust case concerns alleged anticompetitive private and regulatory restraints on the South Dakota abstracting and title insurance businesses. Plaintiffs/appellants, First American Title Company of South Dakota and First American Title Insurance Company of South Dakota, contend that they were the victims of a price-fixing conspiracy, frivolous and sham litigation, and a conspiracy to devise and [*1442] enforce statutes and regulations which served to restrain trade in the abstracting and title insurance businesses, all in violation of [sections 1](#) and [2](#) of the Sherman Act.¹ [15 U.S.C. §§ 1](#) and [2](#). Defendants/appellees are the South Dakota Land Title Association (the Association), a professional association of South Dakota abstracters; the South Dakota Abstracters' Board of Examiners (the Board of Examiners), the state board which regulates the business of abstracting; and various individual South Dakota abstracters and title companies. The district court also permitted the joinder of the State of South Dakota as a defendant pursuant to a motion by the Board of Examiners.

[**3] Following a bifurcated bench trial on the issue of liability, the district court entered judgment for defendants. The court found that there was insufficient evidence to support a conclusion that a private price-fixing conspiracy existed among defendant abstracters and their title companies. The court further concluded that plaintiffs' remaining antitrust claims were barred by the McCarran-Ferguson Act, the *Noerr-Pennington* doctrine, and the state action doctrine. The First American companies appeal these holdings and we affirm.

I.

A.

South Dakota pervasively regulates the business of abstracting and insuring land titles. See SDCL chs. 36-13 (Abstracters of Title) and 58-25 (Title Insurance Rates and Policies). Until July 1, 1979, South Dakota required that no foreign insurance company could issue a title insurance policy on property in South Dakota unless the policy

* The Honorable William C. Hanson, Senior District Judge for the Northern and Southern Districts of Iowa, sitting by designation.

¹ The district court's memorandum opinion sets out plaintiffs' basic allegations as follows:

Plaintiffs allege that the Defendants conspired to: (a) fix the price to Plaintiffs of abstractor countersignatures on title insurance policies; (b) engage in frivolous and sham litigation by appealing the decision of the South Dakota Director of Insurance to grant a certificate of authority to Plaintiff First American Title Insurance Company to do business in South Dakota; (c) engage in frivolous and sham litigation by participating in the case of *Fall River County Abstract Company v. Knutson*, (6th Judicial Circuit Court, Hughes County, S.D., Nov. 6, 1979, Judge Robert A. Miller, presiding); (d) engage in efforts to influence the enactment of S.L. 1979, ch. 345, amending [SDCL 58-25-16](#), which had the effect of requiring all title insurance policies issued in the state to contain the countersignature of an abstractor; (e) enforce and attempt to enforce [SDCL 58-25-16](#); (f) attempt to establish a fee schedule for countersignatures to be provided by abstractors on title insurance policies; (g) enforce and attempt to enforce ARSD § 20:36:04:01; (h) engage in a publicity campaign directed against the Plaintiffs, ostensibly directed toward influencing government action, which campaign was a sham to cover an attempt to interfere with the business relationships of Plaintiffs.

was countersigned by a licensed abstracter who was doing business in the county where the property was located. [SDCL § 58-25-16](#).²

[**4] In order to do business in a particular county in South Dakota, an abstracter, among other requirements, must have an approved abstract plant showing "in a sufficiently comprehensive form, all instruments affecting the title to real estate which are of record or on file in the office of the register of deeds. . ." [SDCL § 36-13-10](#). The Board of Examiners, whose duty it is to "carry out the purposes and enforce the provisions of" the statutes governing abstracting and to "make such rules and regulations as may be necessary to carry out the purposes of those statutes," [SDCL § 36-13-6](#), defines by regulation what constitutes "sufficiently comprehensive form" for an abstract plant's records. [*1443] [HN2](#)[↑] In part, this long-standing regulation requires that the plant contain

a complete index showing every instrument recorded in the register of deeds' office in the county wherein [the abstracter] proposes to operate, properly listed against the specific property which it affects, and also a separate index showing all recorded instruments which do not affect specific property. This [**5] index . . . must be made from an actual check of each page of each book of recorded instruments in said office, and in no case will a copy or film of the numerical index in the register's office be accepted.

ARSD § 20:36:04:01.

One of the First American companies' contentions is that the requirement that an abstracter's index be "made from an actual check of each page of each book of recorded instruments" imposes a financially-prohibitive burden upon anyone who wishes to open a competing abstract plant in a given county. See Part IV *infra*. The regulation's anticompetitive effect, according to appellants, is reflected by the current situation in South Dakota in which most counties have only one licensed abstracter, except for the more populated counties, which have two.

B.

Walter J. Linderman became a licensed abstracter in Pennington County, South Dakota in 1973 and formed First American Title Company of South Dakota in 1974. Linderman's title company served as a local agent for a foreign title insurance company, First American Title Insurance Company of California. In his dual capacity as abstracter and title insurance agent, Linderman was qualified to countersign [**6] title insurance policies on property located in Pennington County; but in insuring title on property outside Pennington County, Linderman was required to obtain the countersignature of that county's licensed abstracter and pay the resulting fee.

The anomaly in [SDCL § 58-25-16](#) which required only foreign insurance companies to obtain countersignatures from abstracters on title insurance policies led Linderman to form a domestic title insurance company in December 1978 -- First American Title Insurance Company of South Dakota. This would have enabled Linderman to issue title insurance policies on property in any South Dakota county without obtaining a countersignature from that county's licensed abstracter.

This was not to be, however, because in the ensuing legislative session, the South Dakota legislature amended [SDCL § 58-25-16](#) by deleting the word "foreign," thus extending the countersignature requirement to all title insurance policies, whether they be issued by a foreign or domestic insurance company.³

² [HN1](#)[↑] [Section 58-25-16 of the South Dakota Codified Laws](#) provided:

No foreign insurance company shall issue any policy of title insurance or certificate of title or other guarantee of title, covering any property located within the state of South Dakota, unless the same is countersigned by a person, partnership or corporation, who has met the requirements of §§ 36-13-8 and 36-13-10. Violation of this section is a Class 2 misdemeanor.

This statute was amended by the South Dakota legislature in 1979. See Part I B *infra*.

³ [HN3](#)[↑] The amended [§ 58-25-16](#) which became effective July 1, 1979, states:

[**7] Defendants' opposition to Linderman's formation of a domestic title insurance company and their support for the amendments to [§ 58-25-16](#) form bases for two of the First American companies' antitrust claims. It is claimed that defendants engaged in frivolous and sham litigation in violation of the Sherman Act by appealing to state court the administrative decision by the Division of Insurance to grant a certificate of authority to First American Title Insurance Company of South Dakota. It is further claimed that defendants engaged in unlawful anticompetitive conduct by lobbying in support of the amendments to [§ 58-25-16](#), which included the deletion of the word "foreign" from the statute.

[*1444] Following the amendment to the countersignature statute, the alleged anticompetitive conspiracy continued in 1979 in the context of a controversy over whether the Division of Insurance or the Board of Examiners had the authority to set countersignature fees. The Board of Examiners already had at that time clear authority to "establish a schedule of fees for doing business" under chapter 36-13 relating to abstracters' services. [SDCL § 36-13-25](#). The countersignature requirement, however, [**8] is in chapter 58-25, which regulates title insurance, a business overseen by the Division of Insurance and its director. [SDCL § 58-2-21](#). The First American companies claim that defendants wanted the Board of Examiners to control countersignature fees to insure that they would be sufficiently high to stem the proliferation of title insurance in South Dakota. Presumably, the Board of Examiners' interest in setting high fees would be greater because three of its four members are required to be abstracters. [SDCL § 36-13-1](#).

Following an opinion by the South Dakota Attorney General that the Division of Insurance had authority to set countersignature fees, the Association brought an ultimately unsuccessful state court action attacking the jurisdictional basis for this authority. *Fall River County Abstract Company v. Knutson*, (6th Judicial Circuit Court, Hughes County, S.D., November 6, 1979, Judge Robert A. Miller). A basis for the state court ruling was the conclusion that the countersigning of a title insurance policy was purely a ministerial act because South Dakota law did not require any affirmative act by the abstracter before signing. During the 1979 South Dakota legislative [**9] session, defendants successfully lobbied the state legislature to pass laws which ensured that the countersigning of a title insurance policy was to be more than a ministerial act and which specifically gave the Board of Examiners the authority to set countersignature fees.⁴ The litigation and lobbying by defendants on the countersignature fee issue are alleged to be further unlawful anticompetitive acts.

No insurance company shall issue any policy of title insurance or certificate of title or other guarantee of title, covering any property located within the state of South Dakota, unless the same is countersigned by a person, partnership or corporation, who has met the requirements of §§ 36-13-8 and 36-13-10 *in the county in which the real property is located, or maintains an abstract plant in the county where the real property is located and meets the requirements of chapter 36-13*. A violation of this section is a Class 2 misdemeanor.

The emphasized portion indicates language which was added by amendment in 1979.

⁴ [HN4](#) [↑] The legislature enacted [SDCL § 36-13-26.1](#), which states, "An abstractor's countersignature on a title insurance policy is verification that the abstracter has furnished the insurer a report based on the examination of record title and any other title information and services required by the insurer and [§ 36-13-25](#)."

[HN5](#) [↑] The legislature also amended [SDCL § 36-13-25](#) to state in pertinent part that, "[The Board of Examiners] shall also establish a schedule of fees and the requirements for an abstracter's services for countersigning title insurance policies pursuant to [§ 58-25-16](#)."

The Board of Examiners subsequently promulgated regulations implementing these statutory changes. A title search -- meaning a search of both the abstracter's plant and the official county records -- is required before countersigning a title insurance policy. ARSD § 20:36:07:01. Additionally, the search is to be "made under the direction of an abstracter licensed in the county in which the property is located." ARSD § 20:36:07:02. This regulation also requires the abstracter's full cooperation with the title insurer by forbidding any unnecessary delays in performing the search and countersigning the policy: "Delays in the search or reporting shall be cause for complaint and disciplinary proceedings by the abstracters' board of examiners." *Id.*

[**10] Although the Board of Examiners did in 1980 obtain authority to establish countersignature fees, no fee schedule ever regulated countersignature fees during the life of the First American Title Insurance Company of South Dakota. It is claimed that Linderman, as the agent for this company, was the victim of a private price-fixing conspiracy by the individually-named defendant abstracters and title companies in 1979 and 1980. Allegedly, these defendants conspired to fix countersignature fees at a level of 50% of the title insurance policy's premium. It is claimed that this private price-fixing conspiracy, coupled with the statutory changes, forced Linderman to dissolve First American Title Insurance Company of South Dakota in May 1980.

II.

First American's ⁵ initial claim on appeal -- that the district court erred in finding insufficient evidence of a private [*1445] conspiracy to fix prices for countersignature fees -- need not long detain us. [HN6](#)[↑] It is, of course, well-established that price-fixing is a *per se* violation of [§ 1](#) of the Sherman Act. [United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 218, 84 L. Ed. 1129, 60 S. Ct. 811 \(1940\)](#). [**11] In this case the district court concluded that evidence of a conspiracy to fix countersignature fees at 50% of the title insurance policy premium was "equivocal" and "not sufficient." First American failed to prove the presence of a conspiracy among the individual abstracters and title companies named as defendants, and further failed to prove that the countersignature fees charged by these defendants were fixed at a level of 50% of the policy premium. It would serve no purpose for this court to reiterate the district court's discussion which reflects careful consideration of the evidence. See [First American Title Co. v. South Dakota Land Title Association, 541 F. Supp. 1147, 1154-56 \(D.S.D. 1982\)](#). We hold that substantial evidence in the record supports the district court's findings; nowhere are we left with the "definite and firm conviction that a mistake has been committed" with regard to these findings. [United States v. United States Gypsum Co., 333 U.S. 364, 395, 92 L. Ed. 746, 68 S. Ct. 525 \(1948\)](#).

[**12] III.

First American next contends that the district court erred in holding that the *Noerr-Pennington* doctrine insulates defendants from antitrust liability for their lobbying and litigation activities. [HN7](#)[↑] The *Noerr-Pennington* doctrine generally holds that the Sherman Act does not apply to joint efforts by groups seeking to exercise their [first amendment](#) right to petition the government, whether it be a petition to the legislature, an administrative agency, or the courts. [California Motor Transport Co. v. Trucking Unlimited, 404 U.S. 508, 30 L. Ed. 2d 642, 92 S. Ct. 609 \(1972\)](#); [United Mine Workers v. Pennington, 381 U.S. 657, 14 L. Ed. 2d 626, 85 S. Ct. 1585 \(1965\)](#); [Eastern Railroad Conference v. Noerr Motor Freight, 365 U.S. 127, 5 L. Ed. 2d 464, 81 S. Ct. 523 \(1961\)](#). Furthermore, such joint efforts "do not violate the antitrust laws even though intended to eliminate competition." [Pennington, supra, 381 U.S. at 670](#). But an exception to the doctrine does hold that the Sherman Act applies if the joint action "is [**13] a mere sham to cover what is actually nothing more than an attempt to interfere directly with the business relationships of a competitor." [Noerr Motor Freight, supra, 365 U.S. at 144](#).

A.

First American initially attacks the district court's holding that lobbying by defendants in favor of the amendment to [SDCL § 58-25-16](#) which resulted in deletion of the word "foreign" from the statute was activity which fell "squarely within the confines of the Noerr-Pennington Doctrine." [First American Title Co., supra, 541 F. Supp. at 1157](#). We do not understand First American to argue the sham exception in attacking this holding. Indeed, such a claim would not prevail. As the district court concluded, "This is a classic case of a group of persons petitioning their government for relief and receiving the relief they request." *Id. Cf. Alexander v. National Farmers Organization, 687 F.2d 1173, 1195 (8th Cir. 1982)*, cert. denied, 461 U.S. 937, 103 S. Ct. 2108, 77 L. Ed. 2d 313, 51 U.S.L.W. 3826 (1983) ("The sham exception generally involves governmental contacts which are not a genuine attempt to influence official decision [**14] making, but instead are merely an attempt to interfere directly with the business relationships of a competitor.").

⁵ We shall refer to appellants collectively as "First American" throughout the remainder of this opinion.

Rather First American claims that the *Noerr-Pennington* doctrine does not apply because a state agency -- the Board of Examiners -- was an alleged conspirator along with the private party defendants in seeking amendment to the countersignature statute. First American relies on [*Duke & Co. v. Foerster, 521 F.2d 1277, 1281-82 \(3d Cir. 1975\)*](#), in arguing for application of this coconspirator exception to the *Noerr-Pennington* doctrine. In *Duke & Co.*, plaintiff alleged that municipal corporations which [*1446] owned the Pittsburgh Civic Arena, Three Rivers Stadium, and the Pittsburgh International Airport conspired with private corporations which operated these facilities to boycott malt beverages manufactured by plaintiff. The court of appeals reversed the district court's dismissal of the complaint, holding in part that the *Noerr-Pennington* doctrine did not shield defendants from antitrust liability.

Both *Noerr* and *Pennington* involved suits against *private parties* who had allegedly conspired to influence governmental [**15] action. In neither case was it alleged that the governmental entity had collaborated to promote the conspiracy. Where the complaint goes beyond mere allegations of official persuasion by anticompetitive lobbying and claims official participation with private individuals in a scheme to restrain trade, the *Noerr-Pennington* doctrine is inapplicable.

[*Duke & Co., supra, 521 F.2d at 1282*](#) (emphasis in original).

We do not quarrel with the court's conclusion in *Duke & Co.* that the *Noerr-Pennington* doctrine did not apply. In our view, however, *Noerr-Pennington* was inapplicable because of the nature of the conduct alleged in the complaint, not because of the nature of the parties involved.⁶ The anticompetitive conduct alleged in the complaint in *Duke & Co.* was a boycott of plaintiff's product; clearly an alleged anticompetitive boycott is not [*first amendment*](#) conduct which the *Noerr-Pennington* doctrine was formulated to protect. The Court made this distinction in *Noerr Motor Freight*.

We think it equally clear that [**HN8**](#) the Sherman Act does [**16] not prohibit two or more persons from associating together in an attempt to persuade the legislature or the executive to take particular action with respect to a law that would produce a restraint or a monopoly. . . . Such associations . . . bear very little if any resemblance to the combinations normally held violative of the Sherman Act, combinations ordinarily characterized by an express or implied agreement or understanding that the participants will jointly give up their trade freedom, or help one another to take away the trade freedom of others through the use of such devices as price-fixing agreements, boycotts, market-division agreements, and other similar arrangements.

[*Id., 365 U.S. at 136*](#). Thus the Court made clear that "the proscriptions of the Act, tailored as they are for the business world, are not at all appropriate for application in the political arena." [*Id., 365 U.S. at 141*](#). *Duke & Co.* and the instant case are embodiments of the Court's distinction. Whereas *Duke & Co.* involved allegations of anticompetitive government activity in the business world, the instant case concerns government activity in the political [**17] arena. We therefore hold that *Duke & Co.* is distinguishable on its facts.

First American further contends that defendants' lobbying campaign should not be protected by *Noerr-Pennington* because it involved "a misuse of the lobbying process" through false statements and inaccuracies that were made [**18] by defendants to the state legislature. The focus of this complaint appears to be a letter that the Board of Examiners sent to members of the South Dakota legislature explaining the Board's understanding of the then-current requirements for becoming a licensed abstracter and stating the Board's fear that failure to amend the countersignature statute could conceivable result in a domestic title insurance company issuing policies without performing a title search. The district court made no specific findings in this regard, but [*1447] to characterize these statements as "misrepresentations" and to withhold *Noerr-Pennington* protection on account of this would

⁶This circuit recently refused to rely on the *Duke & Co.* coconspirator exception, noting that it has been subject to criticism. [*Westborough Mall, Inc. v. City of Cape Girardeau, 693 F.2d 733, 746 \(8th Cir. 1982\)*](#), cert. denied, [*461 U.S. 945, 103 S. Ct. 2122, 77 L. Ed. 2d 1303, 51 U.S.L.W. 3841 \(1983\)*](#); see [*Metro Cable Co. v. CATV of Rockford, Inc., 516 F.2d 220, 229-30 \(7th Cir. 1975\)*](#); Fischel, *Anti-trust Liability for Attempts to Influence Government Action: The Basis and Limits of the Noerr-Pennington Doctrine*, 45 U.Chi.L.Rev. 80, 115 (1977) ("in most cases the co-conspirator exception is unworkable and should not be recognized").

result in undermining the doctrine itself. This letter, which contained at most mild political hyperbole, was well within the bounds of traditional political activity which *Noerr-Pennington* was established to protect. Cf. *Westborough Mall, Inc. v. City of Cape Girardeau*, 693 F.2d 733, 746 (8th Cir. 1982), cert. denied, 461 U.S. 945, 103 S. Ct. 2122, 77 L. Ed. 2d 1303, 51 U.S.L.W. 3841 (1983) (holding that illegal or fraudulent actions employed in conjunction with legitimate lobbying [**19] went beyond traditional political activity protected by *Noerr-Pennington*).

Even assuming that misrepresentations may have appeared in the Board's letter, this would not preclude application of the *Noerr-Pennington* doctrine -- at least in the context of legislative lobbying. The Supreme Court in *California Motor Transport* made the following comments regarding the bounds of constitutionally-protected conduct in the political arena:

The political campaign operated by the railroads in *Noerr* to obtain legislation crippling truckers employed deception and misrepresentation and unethical tactics. We said:

"Congress has traditionally exercised extreme caution in legislating with respect to problems relating to the conduct of political activities, a caution which has been reflected in the decisions of this Court interpreting such legislation. All of this caution would go for naught if we permitted an extension of the Sherman Act to regulate activities of that nature simply because those activities have a commercial impact and involve conduct that can be termed unethical." *365 U.S., at 141.*

Id. 404 U.S. at 512.

Finally, [**20] we note that First American had equal access to the legislature to lobby against the amendment and to correct any "misrepresentations" which may have been made by defendants. Accordingly, we hold that the district court properly applied the *Noerr-Pennington* doctrine to defendants' activities in lobbying the South Dakota legislature to amend the countersignature statute.

B.

First American also attacks the district court's application of the *Noerr-Pennington* doctrine to the state court litigation which arose during the period when Linderman formed and operated his domestic title insurance company. First American claims that certain defendants in two instances engaged in baseless and sham litigation intended to harass and interfere with First American's business relations. The Association opposed the granting of a certificate of authority by the Division of Insurance to First American Title Insurance Company of South Dakota and appealed the subsequent grant of the certificate to state court. This appeal resulted in affirmance of the Division of Insurance's decision to grant the certificate. Also, in *Fall River County Abstract Co. v. Knutson*, *supra*, the Association and the [**21] Fall River County Abstract Company sought a writ of prohibition in state court to prohibit the director of the Division of Insurance from establishing a fee schedule for the countersigning of title insurance policies. First American Title Insurance Company of South Dakota intervened in this litigation as a defendant. The district court held that the *Noerr-Pennington* doctrine protected the Association and the Fall River County Abstract Company from antitrust liability for their participation in these actions.

HN9 It is established that "the right of access to the courts is indeed but one aspect of the right of petition"; accordingly, groups do not violate the Sherman Act by "us [ing] the channels and procedures of state and federal agencies and courts to advocate their causes and points of view respecting resolution of their business and economic interests *vis-a-vis* their competitors." *California Motor Transport, supra, 404 U.S. at 510-11.* **HN10** The sham exception to this doctrine [**22] holds that litigation of baseless claims which "may be characterized as a [*1448] sham cover for what is really just an attempt to directly interfere with the business relations of a competitor," is subject to scrutiny under the Sherman Act. *Alexander v. National Farmers Organization, supra, 687 F.2d at 1200;* see *California Motor Transport, supra, 404 U.S. at 513.*

In *Alexander v. National Farmers Organization, supra*, the parties initiated reciprocal antitrust actions arising out of competition in the milk industry between the NFO and certain large midwest dairy cooperatives. The court held that certain lawsuits initiated by the other dairy cooperatives against NFO were not actionable under the antitrust laws

by application of the *Noerr-Pennington* doctrine, even though "the litigation directly against NFO was intended in part to hamper NFO's ability to compete." *Id.*, [687 F.2d at 1200](#). The court concluded that "(there were genuine disputes regarding NFO's solicitation methods," *id.*, thus the sham exception did not apply.

Similarly in this case we do not doubt that the litigation was intended in part [\[**23\]](#) to hamper First American's ability to carry on the title insurance business with a domestically-formed company. But both causes of action also involved genuine disputes. The controversy over who was the proper party to establish a countersignature fee schedule was certainly genuine. When the Association lost in the judicial forum, it continued to assert its position before the South Dakota legislature and ultimately achieved the result it sought -- the Board of Examiners was vested with authority to establish the fee schedule.

Likewise, the Association's effort to prevent Linderman's domestic title insurance company from receiving a certificate of authority to operate in South Dakota was not a baseless claim or sham cover for an attempt to interfere with First American's business.⁷ The Association had a genuine interest in preventing a domestic title insurance company from operating in South Dakota -- at least while South Dakota law had the effect of permitting a domestic insurance company to issue title insurance policies without securing a title search from an abstracter who was licensed in the county where the property to be insured was located.⁸ Clearly the Association [\[**24\]](#) had a [first amendment](#) right of access both to the administrative and the judicial forums to press its opposition. We discern no abuse of these processes which was intended to produce an illegal result. Cf. [California Motor Transport, supra](#) (in which the Court held that the sham litigation exception applied to allegations that defendants abused administrative and judicial processes to produce the illegal result of barring plaintiffs from access to the agencies and courts). We thus affirm the district court's application of the *Noerr-Pennington* doctrine to these litigation episodes.

[\[**25\]](#) IV.

First American also challenges the district court's application of the state action doctrine of [Parker v. Brown, 317 U.S. 341, 87 L. Ed. 315, 63 S. Ct. 307 \(1943\)](#). First American's rather unclear claims in its complaint state that defendants violated the Sherman Act by "enforc[ing] and attempt[ing] [\[*1449\]](#) to enforce" the countersignature statute ([SDCL § 58-25-16](#)) and the regulation setting out the requirements for an abstract plant (ARSD § 20:36:04:01), as well as that defendants violated the Sherman Act by attempting to establish a fee schedule for countersignatures pursuant to [SDCL § 36-13-25](#). The district court held that these particular claims were barred from federal antitrust scrutiny on account of the state action doctrine under which federal law impliedly defers to "state action" when the state program at issue satisfies certain requirements. P. Areeda & D. Turner, [Antitrust Law](#) para. 207 at 58 (1978).

It appears, however, that First American shifted its focus somewhat during the course of the district court proceedings by dropping its challenge to defendants' authority to establish a countersignature fee schedule and arguing that [\[**26\]](#) the Sherman Act preempts the countersignature statute and certain regulations. See Clerk's Record (C.R.) at 74-75. The district court did not address this particular argument. The challenged regulations are those setting out the abstract plant requirements (ARSD § 20:36:04:01), requiring the abstracter to search both the

⁷ [SDCL § 58-6-8](#) requires the director of the Division of Insurance to hold a hearing in order to determine whether authority to engage in the INSURANCE BUSINESS SHOULD BE GRANTED. PART OF THIS INQUIRY IS A determination whether the grant of such authority would be in the public interest. *Id.*

⁸ Apparently, the Association's asserted public interest concern (see note 7, *supra*) was that untrained individuals could issue title insurance policies without the necessity of being supervised or trained by abstracters licensed by the State of South Dakota. Brief of the Association at 6-7. This situation prevailed as long as [SDCL § 58-25-16](#) required only foreign insurance companies to obtain the countersignature of a licensed abstracter before issuing a policy of title insurance. The Association asserted its position without success before the Division of Insurance and before a state court. It appealed the state court's decision to the South Dakota Supreme Court, but abandoned this appeal following the amendment of [SDCL § 58-25-16](#) which deleted the word "foreign" from the statute, thus extending the statute's requirements to domestic title insurance companies.

official records and the abstracter's title plant before countersigning a title insurance policy (ARSD § 20:36:07:01), and requiring that the search on behalf of a title insurer be made under the direction of the licensed abstracter (ARSD § 20:36:07:02).

First American claimed before the district court that the challenged statute and regulations produce the following anticompetitive effect. The challenged provisions impose a rigorous abstract plant requirement which must be satisfied in each county in which an abstracter seeks to be licensed to do business. ARSD § 20:36:04:01. Coupled with this is the countersignature requirement, which states that a title insurance policy must be countersigned by an abstracter who is licensed in the county where the property to be insured is located. [SDCL § 58-25-16](#). Because First American has satisfied the state's abstract [**27] plant requirements only in Pennington County, the anticompetitive effect is to prevent First American from performing title searches on a statewide basis, which in turn prevents First American from countersigning title insurance policies on a statewide basis.

First American reiterates this argument on appeal and adds that a further anticompetitive result of the regulatory scheme is to create a horizontal division of territories under which each abstracter is assured of a monopoly of the abstracting business in the county where the abstracter is licensed to operate. See [United States v. Topco Associates, Inc., 405 U.S. 596, 608, 31 L. Ed. 2d 515, 92 S. Ct. 1126 \(1972\)](#) ("One of the classic examples of a *per se* violation of [§ 1](#) is an agreement between competitors at the same level of the market structure to allocate territories in order to minimize competition.") We take this latter argument to be directed mainly at the abstract plant requirement which states that the plant must contain an index and that the index "must be made from an actual check of each page of each book of recorded instruments in [the register of deeds'] office, and in no case will a copy [**28] or film of the numerical index in the register's office be accepted." ARSD § 20:36:04:01. ⁹ According to First American, these anticompetitive effects require preemption of the challenged statute and regulations under the Sherman Act.

In arguing for preemption, First American claims neither to seek "any sweeping repudiation of state statutory and regulatory provisions," nor to "seek a finding of unconstitutionality of any state statutes." Brief of First American at 43. On [*1450] the contrary, the result of a successful preemption [**29] attack upon a state statute is that the statute is stricken down as unconstitutional under the [Supremacy Clause](#). See, e.g., [Seagram & Sons v. Hostetter, 384 U.S. 35, 45, 16 L. Ed. 2d 336, 86 S. Ct. 1254 \(1966\)](#). Accordingly, it is clear that First American is making a facial challenge to the above-indicated statute and regulations which are said to conflict with the Sherman Act. We also clarify that although First American's preemption argument appears to be directed against all defendants without differentiation, the only defendants against whom the argument necessarily can be directed are the State of South Dakota and the Board of Examiners. The state (in the form of its legislature) and the Board promulgated and enforce ¹⁰ the challenged statute and regulations; consequently, it is they who would be enjoined from enforcing the challenged aspects of the regulatory scheme if First American were to prevail. We trouble to clarify these points because they are important to our ensuing discussion of the preemption/state action issues.

[**30] A.

A due regard for federalism led the Supreme Court to create what is referred to as the state action doctrine in [Parker v. Brown, supra](#). A raisin producer attempted to use the Sherman Act in *Parker* to strike down a marketing program enacted by the California legislature to create price supports for raisins. The Court assumed that the

⁹ See Brief of First American at 41 (where First American claims that the abstract plant requirement makes it "prohibitively expensive" to construct an abstract plant and that the effect of the regulation is to give "existing abstracters monopoly power over title services within their respective counties"). Apparently there was never any evidence offered at trial indicating exactly how costly it would be to assemble an abstract plant in accordance with ARSD § 20:36:04:01.

¹⁰ The unauthorized conduct of the business of abstracting in South Dakota is a petty offense. [SDCL § 36-13-9](#). The Board of Examiners is empowered to commence actions for injunctions against such unauthorized business as an alternative to the state's initiation of criminal proceedings. [SDCL § 36-13-9.1](#). In addition, [SDCL § 58-25-16](#) states that violation of its countersignature requirement "is a Class 2 misdemeanor."

program would have violated the Sherman Act if it had been devised and carried out by private individuals or corporations. But because the marketing program "derived its authority . . . from the legislative command of the state," *id.*, [317 U.S. at 350](#), the program was not prohibited by the Sherman Act. The Court found no intent in the Sherman Act to occupy a field so broad that it precluded the states, acting in their sovereign capacities, from exercising their broad police powers to effect economic regulations.¹¹ "In a dual system of government in which, under the Constitution, the states are sovereign, save only as Congress may constitutionally subtract from their authority, an unexpressed purpose to nullify a state's control over its officers and agents is not lightly to be attributed to Congress." *Id. 317 U.S. at 351*. [**31]

Of late, the state action doctrine has become a road well-traveled by the Court.¹² Its signposts, however, remain less than clear. We know, for example, that [HN11](#) when a state legislature enacts an otherwise unlawful anticompetitive system of regulation, such regulation is "outside the reach of the antitrust laws under the 'state action' exemption" provided that the regulations reflect a state policy "clearly articulated and affirmatively expressed, designed to displace unfettered business freedom" with regulation. [New Motor Vehicle Bd. of Cal. v. Orrin W. Fox Co., 439 U.S. 96, 109, 58 L. Ed. 2d 361, 99 S. Ct. 403 \[*1451\] \(1978\)](#). [**32] This state policy must be articulated by the state acting in its sovereign capacity; this much is clear from *Parker* itself. Naturally the question arises -- what constitutes an articulation of the state in its sovereign capacity? Certainly enactments of a state legislature qualify as the state acting in its sovereign capacity. [Orrin W. Fox, supra](#); [Parker, supra](#). Also, the state supreme court acting in its supervisory capacity over the practice of law qualifies as the state acting in its sovereign capacity. [Bates v. State Bar of Arizona , 433 U.S. 350, 359-60, 53 L. Ed. 2d 810, 97 S. Ct. 2691 \(1977\)](#); [Goldfarb v. Virginia State Bar, 421 U.S. 773, 789-90, 44 L. Ed. 2d 572, 95 S. Ct. 2004 \(1975\)](#).

[**33] On the other hand, [HN12](#) "state agencies or subdivisions of a State . . . simply by reason of their status as such," apparently do not qualify as the state acting in its sovereign capacity. [City of Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 408, 55 L. Ed. 2d 364, 98 S. Ct. 1123 \(1978\)](#). Actions by such bodies, however, may reflect a state policy to displace competition with regulation. Such actions will not be subject to scrutiny under the Sherman Act provided that "an adequate state mandate for anticompetitive activities exists." *Id. 435 U.S. at 415*. This mandate exists "when it is found 'from the authority given a governmental entity to operate in a particular area, that the legislature contemplated the kind of action complained of.'" *Id.*

Finally, we observe that [HN13](#) conduct by a private party may be cloaked with state action immunity provided that the conduct was pursuant to a "clearly articulated and affirmatively expressed" state policy and that [**34] the conduct was "actively supervised"¹³ by the state itself. [California Retail Liquor Dealers Assn. v. Midcal Aluminum, Inc., 445 U.S. 97, 105, 63 L. Ed. 2d 233, 100 S. Ct. 937 \(1980\)](#).

¹¹ Of course the state's exercise of its police powers in effecting economic regulations may impermissibly impinge on other federal interests which does not concern us in the instant case -- notably the interest in preventing significant burdens on interstate commerce which is protected by the [Commerce Clause](#). See P. Areeda & D. Turner, [Antitrust Law](#) paras. 219-20 (1978).

¹² See [Community Communications Co. v. City of Boulder, 455 U.S. 40, 70 L. Ed. 2d 810, 102 S. Ct. 835 \(1982\)](#); [California Retail Liquor Dealers Assn. v. Midcal Aluminum Inc., 445 U.S. 97, 63 L. Ed. 2d 233, 100 S. Ct. 937 \(1980\)](#); [New Motor Vehicle Bd. of Cal. v. Orrin W. Fox Co., 439 U.S. 96, 58 L. Ed. 2d 361, 99 S. Ct. 403 \(1978\)](#); [City of Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 55 L. Ed. 2d 364, 98 S. Ct. 1123 \(1978\)](#); [Bates v. State Bar of Arizona, 433 U.S. 350, 53 L. Ed. 2d 810, 97 S. Ct. 2691 \(1977\)](#); [Cantor v. Detroit Edison Co., 428 U.S. 579, 49 L. Ed. 2d 1141, 96 S. Ct. 3110 \(1976\)](#); [Goldfarb v. Virginia State Bar, 421 U.S. 773, 44 L. Ed. 2d 572, 95 S. Ct. 2004 \(1975\)](#).

¹³ Uncertainty exists regarding whether the second *Midcal* criterion -- the requirement of active state supervision -- applies to conduct by municipalities and other state subdivisions as well as to conduct by private parties. The Court expressly declined to address this issue in [Community Communications Co. v. City of Boulder, 455 U.S. 40, 51 n.14, 70 L. Ed. 2d 810, 102 S. Ct. 835 \(1982\)](#) ("Because we conclude in the present case that Boulder's moratorium ordinance does not satisfy the 'clear articulation and affirmative expression' criterion, we do not reach the question whether that ordinance must or could satisfy the 'active state supervision' test focused upon in *Midcal*.")

[**35] B.

We therefore see the state action doctrine to be a construct developed by the Court and based upon principles of federalism which permits the coexistence of the Sherman Act and apparently conflicting state economic regulation. Absent the state action doctrine, the Sherman Act preempts the conflicting state regulation. *Rice v. Norman Williams Co.*, 458 U.S. 654, 73 L. Ed. 2d 1042, 1049, 102 S. Ct. 3294 (1982) HN14¹⁴ (The Sherman Act will preempt a state statute if "there exists an irreconcilable conflict between the federal and state regulatory schemes."). It is then self-evident that application of state action principles [*1452] follows the antitrust court's initial determination that there is truly a conflict between the Sherman Act and the challenged regulatory scheme. See, e.g., *Midcal, supra*, 445 U.S. at 102 ("The threshold question is whether California's plan for wine pricing violates the Sherman Act."); *Parker, supra*, 317 U.S. at 350 ("We may assume for present purposes that the California prorate program would violate the [*36] Sherman Act. . . .").

In *Rice, supra*, the Court set out how the antitrust court is to analyze whether a state regulatory scheme conflicts with the Sherman Act when aspects of the state scheme are challenged in the abstract.

HN15¹⁵ [A] state statute, when considered in the abstract, may be condemned under the antitrust laws only if it mandates or authorizes conduct that necessarily constitutes a violation of the antitrust laws in all cases, or if it places irresistible pressure on a private party to violate the antitrust laws in order to comply with the statute. Such condemnation will follow under § 1 of the Sherman Act when the conduct contemplated by the statute is in all cases a per se violation. If the activity addressed by the statute does not fall into that category, and therefore must be analyzed under the rule of reason, the statute cannot be condemned in the abstract. Analysis under the rule of reason requires an examination of the circumstances underlying a particular economic practice, and therefore does not lend itself to a conclusion that a statute [**37] is facially inconsistent with federal antitrust laws.

Id., 73 L. Ed. 2d at 1051. The challenged statute in *Rice* empowered liquor distillers to designate which California wholesalers may import the distiller's product into the state. The Court characterized the conduct allowed by the statute as a vertical nonprice restraint; such restraints have been held not to be *per se* violations of the Sherman Act. *Continental T.V., Inc. v. GTE Sylvania Inc.*, 433 U.S. 36, 57-59, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977). Accordingly, the Court held that there was no irreconcilable conflict between the state statute and the Sherman Act; hence, there was no preemption by the Act.¹⁴ The Court noted that "Because of our resolution of the preemption issue, it is not necessary for us to consider whether the statute may be saved from invalidation under the doctrine of *Parker v. Brown*. . . ." *Rice, supra*, 73 L. Ed. 2d at 1052 n.9.

[**38] C.

This circuit has answered this question in the negative in the context of municipal conduct. *Gold Cross Ambulance & Trans. v. City of Kansas City*, 705 F.2d 1005, 1014 (8th Cir. 1983) ("The state supervision requirement is intended to control the potential for abuse created by authorizing private persons to make anticompetitive decisions and to insure that those decisions are consistent with the clearly articulated and affirmatively expressed state policy at stake."). The court's reasoning in *Gold Cross* was fourfold: municipal officials are generally politically accountable to their citizens, which keeps those officials in check; requiring state authorization for local government conduct is analogous to requiring active supervision of private conduct; it would make little sense to require the state to supervise and enforce municipal ordinances; and state supervision could lead to duplicative, wasteful regulation as well as the erosion of local autonomy. *Id.*, 705 F.2d at 1014-15. But see *Ronwin v. State Bar of Arizona*, 686 F.2d 692, 696 (9th Cir. 1981), cert. granted, 461 U.S. 926, 103 S. Ct. 2084, 77 L. Ed. 2d 296, 51 U.S.L.W. 3825 (1983) (No. 82-1474) (The court held in the context of challenged action by the state supreme court-appointed committee which grades the Arizona bar examination that the acts of this governmental body had to be "actively supervised by the state itself" in order to be immune from Sherman Act scrutiny.).

¹⁴ The Court indicated that the conduct of a particular distiller under the statute would not necessarily be insulated from scrutiny under the Sherman Act, even though there was no basis "for condemning the statute itself by force of the Sherman Act." *Rice v. Norman Williams Co.*, 458 U.S. 654, 73 L. Ed. 2d 1042, 1052, 102 S. Ct. 3294 (1983).

Applying the above principles to the instant case, we arrive at the following conclusions. Initially, the district court, in analyzing First American's Sherman Act challenges to aspects of South Dakota's regulation of the business of abstracting, applied the two *Midcal* criteria and concluded that the state action doctrine immunized the regulatory scheme from Sherman Act scrutiny. As we have stated, however, the *Midcal* criteria apply only in the context of whether a private party's conduct is immunized from Sherman Act scrutiny by the state action doctrine. See [Gold Cross Ambulance & Trans. v. City of Kansas City, 705 F.2d 1005, 1014 \(8th Cir. 1983\)](#).

More fundamentally, we do not perceive that the aspects of South Dakota's regulatory scheme which are challenged by First American "irreconcilably conflict" with the Sherman Act under the principles of [Rice, supra](#). We are told by First American that an irreconcilable conflict does exist because the rigorous abstract plant requirement of ARSD § 20:36:04:01 effectively forecloses competition in the abstracting business within a county and creates a horizontal division of territories, which **[**39]** is a *per se* violation of [§ 1](#) of the Sherman Act. See note 9 *supra* and accompanying text. But *Rice* states that for an irreconcilable **[**1453]** conflict to arise, the challenged regulatory provision must contemplate conduct that "is in all cases a *per se* violation." [Id., 73 L. Ed. 2d at 1051](#). Regardless of whether the challenged regulation tends to have the anti-competitive effect claimed by First American, it cannot be said that the regulation mandates or authorizes conduct that in all cases constitutes a [§ 1](#) violation. First American and its principal, Linderman, exemplify this. In 1973, Linderman became a licensed abstracter in Pennington County which indicates that Linderman was able to fulfill the abstract plant requirement and thus compete on an equal footing with the other licensed abstracter in Pennington County at that time, Theresa Burke. Accordingly, we hold that because no irreconcilable conflict exists between the Sherman Act and the abstract plant requirement, the Sherman Act does not preempt the requirement.

Furthermore, even if we assumed that the challenged aspects of the regulatory scheme conflicted with the Sherman Act sufficiently **[**40]** to require preemption, we would hold that the scheme reflects a clearly articulated and affirmatively expressed state policy to replace unfettered business freedom with regulation. See [Orrin W. Fox, supra, 439 U.S. at 109](#). Thus the state action doctrine would apply to preclude preemption. The state as sovereign enacted the challenged countersignature statute, [SDCL § 58-25-16](#), and although it is within the code chapter regulating the business of title insurance, it undoubtedly regulates the business of abstracting as well. In fact, First American's complaint about the statute relates to its anticompetitive effect on the business of abstracting.

The statutory requirement that a title insurance policy be signed by a licensed abstracter who, by regulation, has searched both his own title plant and the official county records (ARSD § 20:36:07:01) before countersigning ensures that someone whom the State of South Dakota deems qualified has performed a professional title search before title to property is transferred. Indeed, First American at oral argument appeared to have no quarrel with this policy, stating that it did not really object to the countersignature requirement, **[**41]** but only objected to the regulations which precluded Linderman, a licensed abstracter, from searching official county records outside of Pennington County and countersigning title insurance policies based on his search of those records. According to First American, the state's requirement that an abstracter have an abstract plant in each county in which the abstracter wishes to do business serves only anticompetitive ends. The State of South Dakota at trial justified its abstract plant requirement by introducing evidence which indicated the poor -- in some cases illegible -- condition of many counties' official records. Thus the state requires an actual check, in lieu of copies, of each page of the official county records in constructing an index for the abstract plant.

We do not fulfill our role as the antitrust court by determining whether the manner in which the State of South Dakota regulates the business of abstracting is wise or appropriate. This type of judicial inquiry by the federal courts has long been repudiated in the context of due process. See [Ferguson v. Skrupa, 372 U.S. 726, 731, 10 L. Ed. 2d 93, 83 S. Ct. 1028 \(1963\)](#) (**[**42]** [HN16](#) The Due Process Clause does not empower the judiciary "to sit as a 'superlegislature to weigh the wisdom of legislation'"). Rather we fulfill our role by determining whether the state as a sovereign, in the broad exercise of its police powers, has chosen "to displace competition with regulation. . ." [City of Lafayette, supra, 435 U.S. at 413](#).

Certainly regulation of the business of title insurance falls within the state's broad police powers. As the South Dakota Supreme Court observed in response to a due process challenge to the fee schedule for abstractors' services, which at the time was established by state statute:

Because the abstractors' product is an indispensable part of real property transfers and due to the reliance which must [*1454] necessarily be placed upon it by the vendor and vendee alike, the legislature has properly exercised its police power by the enactment of Ch. 36-13 [Abstractors of Title]. It is evident that there does exist a real and substantial relation between the regulatory means adopted in regard to price regulation and the actual or manifest evil possible [**43] due to the monopolistic nature of the business.

Siefkes v. Clark Title Co., 88 S.D. 81, 215 N.W.2d 648, 652 (1974).¹⁵ The pervasiveness of South Dakota's regulation -- to the point of mandating the fixing of prices for abstractors' services, SDCL § 36-13-25 -- indicates that the state has indeed chosen to displace competition with regulation in the business of abstracting.

First American argues that even if the statutes which regulate the abstracting business are protected by the state action doctrine, the regulations promulgated by the Board of Examiners are not because they [**44] do not qualify as enactments of the state as sovereign. We hold that the abstract plant regulation (ARSD § 20:36:04:01), the regulation requiring the abstractor to search both his own abstract plant and the official county records before countersigning (ARSD § 20:36:07:01), and the regulation requiring the search pursuant to the countersignature requirement to be under the supervision of a licensed abstractor (ARSD § 20:36:07:02) all to be actions clearly within the contemplation of the legislature in granting authority to the Board to regulate. See City of Lafayette, supra, 435 U.S. at 415.

South Dakota by statute requires that an abstractor maintain an abstract plant "showing in a sufficiently comprehensive form, all instruments affecting the title to real estate which are of record or on file in the office of the register of deeds. . ." SDCL § 36-13-10. The Board of Examiners in turn sets out by regulation precisely what constitutes "sufficiently comprehensive form" for an abstract plant in ARSD § 20:36:04:01. South Dakota also requires by statute that an abstractor maintain a set of records for "each county wherein said person seeks to engage in compiling [**45] abstracts of land titles. . ." SDCL § 36-13-10. In addition, SDCL § 36-13-26.1 requires the abstractor to examine record title and furnish a report to the title insurer before countersigning the title insurance policy. The Board of Examiners in turn sets out that the "examination of record title" required by SDCL § 36-13-26.1 must include an examination of both the abstractor's abstract plant and the official county records. ARSD § 20:36:07:01. The Board also requires that the search pursuant to the countersignature requirement be made "under the direction of an abstractor licensed in the county in which the property is located," ARSD § 20:36:07:02, to ensure that the search is not improperly delegated to one who has not met the requirements for becoming a licensed abstractor. Clearly the statutory provisions which govern the business of abstracting indicate that the challenged regulations of the Board of Examiners are the kind of action contemplated by the South Dakota legislature. Cf. Areeda, *Antitrust Immunity for "State Action" After Lafayette*, 95 Harv.L.Rev. 435, 445 n.49 (1981) ("Immunity [under the state action doctrine] for decisions of subordinate [**46] agencies or officials cannot depend on an explicit command from the legislature; delegation of governmental powers necessarily includes the discretion to make decisions not compelled by the legislature."). To the extent that the challenged regulatory provisions impose an anticompetitive restraint upon First American, such restraint "is a necessary or reasonable consequence of engaging in the authorized activity." Gold Cross, supra, 705 F.2d at 1013.

First American relies on cases from the Ninth and Fifth Circuits in arguing that [*1455] the challenged regulations were not compelled by the South Dakota legislature, thus they are not entitled to state action immunity. Ronwin v. State Bar of Arizona, 686 F.2d 692 (9th Cir. 1981), cert. granted, 461 U.S. 926, 103 S. Ct. 2084, 77 L. Ed. 2d 296,

¹⁵ See also 1 Am.Jur.2d Abstracts of Title § 4 at 230 (1962) ("The inherent police power of the states permits reasonable regulation of businesses or professions when such regulation appears necessary for the general welfare of the people, and in the exercise of this power, a state may impose reasonable regulations upon those who seek to engage in the business of abstracting titles to real estate.")

51 U.S.L.W. 3825 (1983); [United States v. Texas State Board of Accountancy](#), 464 F. Supp. 400 (W.D.Tex. 1978), modified, [592 F.2d 919](#) (5th Cir.), cert. denied, 444 U.S. 925, 100 S. Ct. 262, 62 L. Ed. 2d 180 (1979). Our above discussion should indicate, however, that we are in fundamental **[**47]** disagreement with our brethren in these circuits regarding application of the state action doctrine to state agencies or subdivisions. In both these cases, the courts cast the inquiry in mandatory terms -- whether the challenged action by the state agency was compelled by the state legislature. In both cases there were vigorous dissents putting forth the view adhered to by this circuit: "that an adequate state mandate for anticompetitive activities of cities and other subordinate governmental units exists when it is found 'from the authority given a governmental entity to operate in a particular area, that the legislature contemplated the kind of action complained of.'" [City of Lafayette](#), 435 U.S. at 415.

Accordingly, we conclude that the Sherman Act does not irreconcilably conflict with the challenged statute and regulations, and that, even if it did, the state action doctrine would operate to shield the regulatory provisions from anti-trust scrutiny. ¹⁶

[48]** V.

In conclusion we observe that the regulations challenged here by First American undoubtedly restrained it from carrying on its business in the manner it desired. That the regulations, in this sense, have an anti-competitive effect does not invalidate them under the Sherman Act, "for if an adverse effect on competition were, in and of itself, enough to render a state statute invalid, the States' power to engage in economic regulation would be effectively destroyed." [Exxon Corp. v. Governor of Maryland](#), 437 U.S. 117, 133, 57 L. Ed. 2d 91, 98 S. Ct. 2207 (1978).

For the foregoing reasons, the judgement of the district court is affirmed.

End of Document

¹⁶ It is thus unnecessary to consider the district court's alternative holding that the countersignature statute is exempt from antitrust scrutiny under the McCarran-Ferguson Act, [15 U.S.C. §§ 1011-15](#), because the statute constitutes state regulation of the "business of insurance." See [Union Labor Life Ins. Co. v. Pireno](#), 458 U.S. 119, 102 S. Ct. 3002, 73 L. Ed. 2d 647 (1982).

Additionally, we reject First American's contention that the district court failed to consider its claims under [§ 2](#) of the Sherman Act. [15 U.S.C. § 2](#). If the alleged private price-fixing conspiracy was supposed to be evidence of monopolization, the claim failed for lack of proof. If the lobbying and litigation activity which has been held immune from anti-trust scrutiny under *Noerr-Pennington* is alleged to be evidence of an attempt or a conspiracy to monopolize, then *Noerr-Pennington* applies to immunize defendants from these claims as well.

Opinion by: EVANS

Opinion

[*622] DECISION and ORDER

This is an antitrust action brought by 32 individual plaintiffs against Gulf Oil Corporation and its wholly owned subsidiary, Bulk Petroleum Corporation. Plaintiffs allege that the defendants engaged in maximum resale price maintenance; illegally tied the sales of gasoline, milk, cigarettes, and related products to gasoline station leases; required plaintiffs to deal exclusively in Bulk's gasoline, milk, cigarettes, and other products; and conspired to fix the wholesale price of gasoline sold by Bulk to the plaintiffs. The allegations are made under both state and federal antitrust laws; on the federal claims, plaintiffs seek damages of \$9 to \$12 million trebled; on a state claim, plaintiffs seek more than \$100 million. Defendants have moved for summary judgment dismissing all claims.

The 32 plaintiffs are independent businessmen selling gasoline in the Milwaukee and Fox River Valley areas of Wisconsin. ^[**2] Each plaintiff operated under a lease agreement with Bulk, which in turn delivered gasoline to them through its "Transport" Division. In the early 1970's, the agreements between the plaintiffs and Bulk were ^[*623] oral. However, all of the agreements have subsequently been reduced to writing.

The agreements in question consist of several documents: a basic lease; an automotive gasoline agreement; a security deposit agreement; and a credit card agreement. The gasoline stations which the plaintiffs operated were discount, cut-rate, non-major/unbranded gasoline retail outlets. The emphasis was on pumping gas, and with minor exceptions, the stations did not provide repair facilities or other service to customers. Plaintiffs emphasize that their arrangement with Bulk did not require them to invest significant capital as a condition to entry into the business; in addition, because their main business was to pump gas, there was no substantial inventory to purchase in order to start the business.

Gulf Oil Corporation is a large refiner and supplier of petroleum products in the United States. The company does business in all sections of the country. At one time, Gulf sold gasoline ^[**3] in Wisconsin under the brand name "Gulf". It has not done so for over ten years.

Bulk is a wholly owned subsidiary of Gulf. It does business in Wisconsin through its "Transport" Division, which primarily is in the business of the purchase and resale of gasoline to cut-rate, non-major/unbranded outlets.

The defendants have moved for summary judgment. Their argument in support of their motion is contained in three volumes of briefs, and in numerous documents attached thereto. The three volumes of briefs are spread over a total of 165 pages. The plaintiffs' brief in opposition to the motion is 116 pages long. It is met by the defendants' 61 page reply brief. Despite their length, the briefs submitted by counsel for each side are excellent.¹

^[**4] To summarize, the defendants argue that the rule of reason, rather than the per se standard, should be applied to all of the antitrust claims at issue here, including the resale price maintenance claim. Defendants argue

¹ The briefs in this case, though of excellent quality, are a bit long, totaling 342 pages. Counsel for both sides, who are frequent litigators in this court, should be aware of the passage of new local rules by the judges of this district on May 24, 1983. One of the new rules, number 6.01, provides that except with permission of the court, principal briefs on motions may not exceed 30 pages in length. Reply briefs are limited to 15 pages. The new rules will become effective on September 1, 1983.

that the tying claims are without merit because the items involved constituted a package, rather than separate products capable of being tied; because Bulk lacks sufficient economic power in the lease market to impose an unlawful tie; because competition has not been appreciably restrained in the markets for the tied products; and because various dealers have acknowledged that they were not coerced into purchasing the tied products. Furthermore, defendants argue that plaintiffs' exclusive dealing claims are without merit. These arguments are addressed in Volume I of the defendants' brief. Volume II sets forth defendants' arguments that the intra-enterprise conspiracy claim should be dismissed because the relationship between Bulk and Gulf establishes that the two are not separate actors capable of conspiring. Defendants propose that should the claim survive the motion, it should be tested under the rule of reason. Volume III sets forth the argument that the dealers [**5] who have released their claims must be dismissed from the case. Defendants argue that the state antitrust claims must be dismissed, in that Wisconsin antitrust law does not apply to transactions involving interstate commerce. Finally, the argument is made that § 133.14, Wis. Stats., is unconstitutional.

In their response, plaintiffs concede defendants' arguments as to two claims: they concede that the tying claims brought under § 3 of the Clayton Act should be dismissed, but they argue that dismissal of the Sherman Act tying claims would not be appropriate; plaintiffs concede that the exclusive dealing claims must be dismissed.

Rule of Reason or Per Se Standard

Defendants seek a ruling that the rule of reason, rather than the per se standard, [**624] should be applied to the resale price maintenance claims and the tying claims. Defendants state:

"Current judicial analysis of tying claims and resale price maintenance is generally conducted under the per se standard. However, defendants believe that the law has evolved to the point that this court should recognize that the rule of reason is appropriate for judging plaintiffs' antitrust claims in this case." Vol. [**6] 1, p. 8.

The evolution of the "law" which leads them to this conclusion is (1) their reading of Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977), in which the court concluded that economic considerations should control in cases of vertical territorial and customer restraints; (2) the position announced by William F. Baxter, Assistant Attorney General and Chief of the Antitrust Division of the Department of Justice ² in which he concluded that resale price maintenance and tying should be subject to the rule of reason; and (3) various academic articles, most notably those authored by Judge (then Professor) Richard Posner.³

[**7] It goes without saying that while there may be some merit to the opinions of Assistant Attorneys General, their opinions are not law. The same is true of analyses performed by academics. As to the effect of Sylvania, supra, sitting as a district judge, I would be reluctant to extend that case to vertical price restraints or to tying claims. The court states, at n. 18, p. 51:

. . . We are concerned here only with non-price vertical restrictions. The per se illegality of price restrictions has been established firmly for many years and involves significantly different questions of analysis and policy. . . . Furthermore, Congress recently has expressed its approval of a per se analysis of vertical price restrictions. . . .

Recently, in Arizona v. Maricopa County Medical Society, 457 U.S. 332, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982), the court held that horizontally imposed maximum fee agreements were unlawful per se. In that case, the district court, in reliance on Sylvania, had noted a "recent antitrust trend . . . emerging where the Rule of Reason is the

² For an interesting, and critical, review of Mr. Baxter's position, see the article written by David D. Stewart, an attorney in the Washington, D.C. firm of Miller, Cassidy, Larroca & Lewin. Mr. Stewart's article appears in the July 18, 1983 issue of the National Law Journal.

³ The articles were written by Judge Posner when he was a professor of law at the University of Chicago Law School. Ironically, Mr. Baxter was also a professor of law (at Stanford) before he joined the Department of Justice in 1981.

preferred method of determining whether a particular practice is in violation of the **antitrust law**." [**8] The Supreme Court, however, reversed and adhered to the per se rule, stating:

"We have not wavered in our enforcement of the per se rule against price fixing." At 2475.

Defendants attempt to distinguish *Maricopa County* because horizontal restraints were involved there and vertical restraints are attacked here. They quote the following passage:

"Our decisions foreclose the argument that the agreements at issue escape per se condemnation because they are horizontal and fix maximum prices. *Kiefer-Stewart* and *Albrecht* place horizontal agreements to fix maximum prices on the same legal -- even if not economic -- footing as agreements to fix minimum or uniform prices."

Defendants also quote the footnote which accompanies this passage:

"It is true that in *Kiefer-Stewart*, as in *Albrecht*, the agreement involved a vertical arrangement in which maximum resale prices were fixed. But the case also involved an agreement among competitors to impose the resale price restraint. In any event, horizontal restraints are generally less defensible than vertical restraints." At 2475.

[*625] From these passages, defendants argue that [**9] the court is using *Kiefer-Stewart Co. v. Seagram & Sons*, 340 U.S. 211, 95 L. Ed. 219, 71 S. Ct. 259 (1951) and *Albrecht v. Herald Co.*, 390 U.S. 145, 19 L. Ed. 2d 998, 88 S. Ct. 869 (1968), as a basis for holding horizontal maximum price fixing per se illegal, but at the same time stating that vertical restraints may be judged by a rule of reason.

Clever. *Kiefer-Stewart* and *Albrecht* involved vertical restraints on maximum prices. In *Maricopa County*, the court extended those cases to horizontal restraints and said in fact that horizontal restraints are less defensible than vertical restraints. The most obvious way to read *Maricopa County* is as follows: vertical restraints are per se illegal; horizontal restraints are less defensible than vertical restraints; horizontal restraints are therefore also per se illegal. Defendants, however, have their own reading: vertical restraints -- though previously held to be per se illegal -- are not as bad as horizontal restraints, so therefore they must be subject to the rule of reason. I disagree.

As to tying claims, the court in footnote 15 on page 2473 in *Maricopa County* stated:

"Among the practices which [**10] the courts have heretofore deemed to be unlawful in and of themselves are price fixing, division of markets, group boycotts, and tying arrangements."

Defendants' request to apply the rule of reason to these claims is denied. My role is to apply the law as it seems to be, not as commentators think it should be. Judge Eschbach of this circuit has recently made an eloquent statement regarding the roles of the lower courts in relation to pronouncements from the Supreme Court. In *Vail v. Board of Education*, 706 F.2d 1435 (7th Cir. 1983), Judge Eschbach was writing to respond to what he called a "strongly worded dissenting opinion", ironically written by Judge Posner, whose views, while a professor of law, I am aggressively urged to adopt here.⁴ Writing in regard to property [*626] interests in employment, Judge Eschbach stated that a certain case was correctly decided. He explained:

⁴ It is certainly possible that someday in the future the defendants here will be in Chicago renewing their argument on this point before a panel of the Court of Appeals for the Seventh Circuit. It is also possible that Judge Posner could be one of the members of the panel. If he is, one could hardly blame the defendants if they smile.

Judge Posner has been a member of the Court of Appeals since December of 1981. While I have found his judicial writings to be interesting and informative -- he is obviously very intelligent and his style is to be admired -- he has been criticized, most notably by a former brother from academia (Professor James F. Ponsoldt, University of Georgia Law School), for not remembering that he is no longer speaking as a law professor from the University of Chicago. The criticism, written as a letter to the editor and published in the February 7, 1983 edition of the National Law Journal stated:

"Since President Reagan has demonstrated no reluctance to appoint law professors to the federal judiciary, it may be appropriate to take another look at the proper role of the Senate in reviewing and approving these most important

"When I say 'correctly' decided, I mean that it was decided in accordance with the authoritative pronouncements of the United States Supreme Court and remains good law in light of subsequent precedent. Whether it was correctly decided in some sort of ultimate jurisprudential or philosophical [**11] sense is not within my domain as an intermediate appellate court judge once I have decided that it was properly decided in the former sense. My brother Posner calls this approach to deciding cases 'putting the blame on the [Supreme] Court.' . . . I call it adherence to *stare decisis* and to a superior authority."

[**12] It would be inappropriate for me to adopt what is essentially a new standard for judging price fixing and tying claims. In their motion, however, defendants request that I go even further than that and grant summary judgment.

HN1 Summary judgment is, of course, proper in antitrust cases if no material facts are in dispute. See *Lupia v. Stella D'Oro Biscuit Co., Inc.*, 586 F.2d 1163 (7th Cir. 1978), cert. den. 440 U.S. 982, 60 L. Ed. 2d 242, 99 S. Ct. 1791 (1979). Although it is true that no greater caution is required in judging a summary judgment motion in antitrust litigation than in any other litigation (see *Weit v. Continental Ill. Nat. Bank & Trust Co.*, 641 F.2d 457 (7th Cir. 1981), cert. den. 455 U.S. 988, 102 S. Ct. 1610, 71 L. Ed. 2d 847 (1982)), that is not to say that caution should be thrown to the wind.

Tying

Defendants argue alternatively that even if the per se rule is applied, summary judgment should be granted dismissing the tying claims. Defendants claim that what is involved here were packaged distribution systems, rather than separate products capable of being tied. In addition, they argue that Bulk lacked sufficient economic power in the lease [**13] market to impose an unlawful tie; that competition has not been appreciably restrained; and that certain plaintiffs have admitted that they were not coerced into purchasing the tied products.

I am unpersuaded that summary judgment is appropriate on the tying claim under § 1 of the Sherman Act (the Clayton Act claim is dismissed per plaintiffs concession that it ought to be). At this point I am unconvinced by the

presidential appointments. In particular, the question arises: to what extent should a person's public expression of and commitment toward an ideology hostile to prevailing law and public policy effectively preclude him from serving as a judge?

"Part of the job of a law professor is to criticize and seek change. In fact, law professors often achieve prominence through their association with innovative reform and more radical schools of thought. Yet the role of a federal judge is institutionally different, if for no other reason than to engender respect for the rule of law -- distinguishing our governmental system from others -- among the public.

"Perhaps most startling among this group of professor-judges is Richard A. Posner, formerly a prolific University of Chicago law professor. As one example, Judge Posner's recent opinion for the 7th U.S. Circuit Court of Appeals in *Marrese v. American Academy of Orthopaedic Surgeons*, 692 F.2d 1083, reported in your Dec. 13 issue, may demonstrate the continuing need for the Senate to insist upon closer substantive scrutiny of judicial appointees' intentions.

"Judge Posner's writing and consulting had long been known for its revisionist, anti-populist critique of the existing body of antitrust legislation and Supreme Court caselaw. Judge Posner's antitrust casebook had set forth and criticized 50 years of Supreme Court antitrust boycott law as being too restrictive to business integration and not promoting economic efficiency.

"Perhaps, therefore, it should have come as no surprise that Judge Posner's opinion in *Marrese* relied on his own views and ignored at least six relevant landmark Supreme Court decisions, constituting the 50-year development of the law through the present day. What is surprising, as evidenced by retired Justice Potter Stewart's outraged dissent in *Marrese* (Justice Stewart was sitting on the panel by designation), is that Judge Posner purported to revise the law and legislative history in a private antitrust case in which the merits of the antitrust claim had never been submitted to trial or even to pretrial discovery. The case was an interlocutory appeal in which the appellate court admittedly lacked jurisdiction to reach the merits of the antitrust claim and in which Judge Posner did not even participate in oral argument. "The Posner opinion in *Marrese* represents the imperial judiciary in its extreme. The possibility of similar judicial nullification, based upon any ideology, should be addressed specifically by the Senate in its confirmation hearings, at least where the nominee is so publicly associated with an extralegal view of public policy."

contention that the dealerships involved in this action constitute packaged distribution systems. Since May, 1980, defendants have leased stations to certain of the plaintiffs on terms that did not require them to buy gasoline or any other products from the defendants. That action by the defendants raises a significant issue of fact as to whether what is involved here is a package.

Additionally, defendants attempt to slide this case into the category of franchise cases. A genuine issue of material fact exists as to whether that is the proper category. What is involved here is a lease of a gasoline station for unbranded discount gasoline. No business distribution system has been established, nor is any business reputation at issue.

Similar issues of fact preclude findings [**14] regarding defendants' economic power to impose an illegal tie. In *Fortner I* and *Fortner II*,⁵ the Supreme Court analyzed [*627] [HN2](#)[] the factors which may indicate requisite economic power: (1) the seller occupies a dominant position in the tying market; (2) the seller's product is sufficiently unique that it provides him with an advantage not shared by the competitors; or (3) a substantial number of customers have accepted the tie and there are no explanations other than the seller's economic power for their willingness to do so. In the case before me, plaintiffs agreed to purchase all their gasoline from Bulk for the duration of the leases. They continued to buy from Bulk even when Bulk admittedly charged excessive prices. A genuine issue of material fact exists as to whether an explanation exists for this behavior, other than defendants' economic power.

[**15] Defendants also argue that no tying claim can be established because competition has not been appreciably restrained, in that Bulk's shares in the relevant market are slight. Summary judgment on this issue is also inappropriate. [HN3](#)[] The requirement that a "not insubstantial" amount of commerce be affected by the tie is not necessarily dependent on market shares:

"An analysis of market shares might become relevant if it were alleged that an apparently small dollar-volume of business actually represented a substantial part of the sales for which competitors were bidding. But normally the controlling consideration is simply whether a total amount of business, substantial enough in terms of dollar-volume so as not to be *de minimis*, is foreclosed to competitors by the tie. . ." [Fortner I, 394 U.S. 495, 501, 22 L. Ed. 2d 495, 89 S. Ct. 1252](#).

Additionally, plaintiffs have raised an issue of fact on this point.

Finally, defendants argue that the tying claims must be dismissed because of a lack of coercion in the arrangement between them and certain of the plaintiffs. This argument must also be rejected. Even if the facts show that a few plaintiffs did not feel [**16] direct coercion, the claim need not necessarily fail. See [Tire Sales Corp. v. Cities Service Oil Co., 637 F.2d 467 \(7th Cir. 1980\)](#), cert. denied 451 U.S. 920, 68 L. Ed. 2d 312, 101 S. Ct. 1999 (1981). In summary, issues of material fact preclude summary judgment on the tying claims.

Resale Price Maintenance

Defendants argue that summary judgment must be granted as to the resale price maintenance claims because defendants' actions regarding prices is condoned in [United States v. Colgate & Co., 250 U.S. 300, 63 L. Ed. 992, 39 S. Ct. 465 \(1919\)](#). This argument also must be rejected.

As interpreted by later decisions, *Colgate* held that a seller's advance announcement that it will not sell to price cutters and its termination of customers who cut prices, without more, is not a Sherman Act violation. However, [HN4](#)[] an illegal combination is found if

⁵ [Fortner Enterprises v. U.S. Steel, 394 U.S. 495, 22 L. Ed. 2d 495, 89 S. Ct. 1252 \(1969\); U.S. Steel Corp. v. Fortner Enterprises, 429 U.S. 610, 51 L. Ed. 2d 80, 97 S. Ct. 861 \(1977\)](#).

569 F. Supp. 621, *627L 1983 U.S. Dist. LEXIS 14634, **16

". . . the producer secures adherence to his suggested prices by means which go beyond his mere declination to sell to a customer who will not observe his announced policy." [United States v. Parke, Davis & Co., 362 U.S. 29, 43, 4 L. Ed. 2d 505, 80 S. Ct. 503 \(1960\)](#).

Plaintiffs have raised issues of fact regarding [**17] whether defendants here have used such means to secure adherence to their pricing policies.

Intraenterprise Conspiracy

Defendants claim that the intraenterprise conspiracy claim should be dismissed because plaintiffs cannot establish a separateness of identity between Gulf and Bulk, an element necessary to allow them to conspire.

The intraenterprise conspiracy doctrine has been roundly criticized by commentators (see [Independence Tube Corp. v. Copperweld Corp., 691 F.2d 310, 317 n. 3 \(7th Cir. 1982\)](#)). Be that as it may, the Supreme Court has made sweeping pronouncements supporting the theory, and those pronouncements cannot be disregarded:

[*628] "For a federal judge at the trial or appellate level, the salient factor is that the Supreme Court's decisions, while they need not be read with complete literalism, of course they cannot be ignored." [Independence Tube, at 317.](#)

In [Timken Co. v. United States, 341 U.S. 593, 598, 95 L. Ed. 1199, 71 S. Ct. 971 \(1951\)](#), for example, the court stated:

"The fact that there is common ownership or control of the contracting corporations does not liberate them from the impact of the antitrust laws."

[**18] In [Perma Mufflers v. Int'l Parts Corp., 392 U.S. 134, 141-2, 20 L. Ed. 2d 982, 88 S. Ct. 1981 \(1968\)](#), the court stated:

". . . Since respondents Midas and International availed themselves of the privilege of doing business through separate corporations, the fact of common ownership could not save them from any of the obligations that the law imposes on separate entities."

In deciding this issue, the Court of Appeals for this circuit has focused "on the practical relationship between the parent and the subsidiary, using a variety of factors to decide when there is enough separation between the two entities to make treating them as two independent actors sensible." The focus essentially is on the question as to "when the distinction between affiliation and integration is trivial and when it is significant." [Independence Tube, at 318.](#)

HN5 [↑] The factors involved in the analysis were first articulated in [Photovest Corp. v. Fotomat Corp., 606 F.2d 704 \(7th Cir. 1979\)](#), cert. denied 445 U.S. 917, 63 L. Ed. 2d 601, 100 S. Ct. 1278 (1980), and include the following: the extent of integration and ownership, whether the two corporations have separate managerial staffs, [**19] whether efficiencies would be notably sacrificed if they acted as two firms, whether the firms functioned separately before being partially integrated, the extent to which they can wield market power when they act as one corporation -- power they would not have as separate corporations. The analysis is in a formative stage; the factors are not "canonical". [Independence Tube, at 318.](#)

What they are, however, is highly dependent on the facts of a particular case, making, at this stage in the development of the law, a grant of summary judgment on this issue rather risky. In the case before me defendants list numerous factors which they consider relevant to the issue, and which in their view establish that plaintiffs will not be able to show two entities capable of conspiring. Plaintiffs, quite expectedly, counter with factors of their own which present issues of material fact. To make a judgment on this issue requires a weighing of facts and evidence, an undertaking that cannot be correctly negotiated on a motion for summary judgment.

Releases

Defendants argue that summary judgment should be granted against the eight dealers who have signed releases of claims and causes [**20] of action. Defendants contend that federal law, rather than Wisconsin law, governs the interpretation of the releases. According to the defendants, under federal law, the claims of these plaintiffs would be barred. Alternatively, defendants argue that even under Wisconsin law, the claims are barred.

Plaintiffs argue that Wisconsin law governs the interpretation of the releases, which are in fact contracts; that under Wisconsin law, the claims would not be barred by the releases; and that even if federal law is applied, factual disputes preclude summary judgment. Finally, plaintiffs argue that the releases are with Bulk and that, therefore, the claims against Gulf can proceed.

Although *Erie Railroad Co. v. Tompkins*, 304 U.S. 64, 82 L. Ed. 1188, 58 S. Ct. 817 (1938), stated that there was "no federal general common law", a body of federal common law has grown over the years in limited areas where a federal voice is necessary. The areas are "few and restricted" (*Wheeldin v. Wheeler*, 373 U.S. 647, 10 L. Ed. 2d 605, 83 S. Ct. 1441 (1963)), and are limited to situations in which federal law is necessary [*629] to protect a federal interest or in which Congress has given [**21] the court the power to develop substantive law. *Texas Industries, Inc. v. Radcliff Materials, Inc.*, 451 U.S. 630, 68 L. Ed. 2d 500, 101 S. Ct. 2061 (1981).

The most comprehensive discussion to which I have been referred on this issue is *Three Rivers Motors Company v. Ford Motor Company*, 522 F.2d 885 (3d Cir. 1975), cited by both sides as support for their respective positions. As defendants point out, the court indicated that it was competent to interpret releases without reference to state law. However, as plaintiffs emphasize, the court then went on to state that it was "also free to apply a state rule of law." It stated that it had to determine whether the policies embodied in the antitrust laws would be better served by the absorption of state laws regarding releases or by the formulation of a federal rule. Factors relevant to a decision were (1) the need for a federal rule, (2) the extent to which the transaction in question first falls within the normal course of activities regularly governed by state law, and (3) the possibility of a state rule frustrating the federal statutory scheme. The court concluded that state law was appropriate to the interpretation of leases.

[**22] I agree. The action before me was brought under the federal antitrust laws. The releases, which are contracts between the dealers and Bulk, are defenses to the antitrust action. There would be nothing particularly unusual for federal law to be applied to one issue and state law to the other. In fact, the parties in entering into the releases -- if they gave it any thought whatsoever -- would probably have assumed that Wisconsin law would govern them.

More important here, the application of Wisconsin law in this case will not frustrate the federal statutory scheme. That scheme would be frustrated if a state had a rule on releases which would preclude a plaintiff from pursuing a federal claim in a situation in which federal common law would allow him to proceed. That is not the case here. According to both sides in this litigation, the releases will receive very vigorous scrutiny under Wisconsin law. In fact, it is possible that if federal law were applied in this case, the plaintiffs might be precluded from bringing their antitrust actions in federal court but be allowed to proceed on a claim in state court.

Additionally, it is somewhat unclear what "federal common law" exists [**23] in this circuit on the interpretation of releases. Two cases are cited: *Fabert Motors, Inc. v. Ford Motor Company*, 355 F.2d 888 (7th Cir. 1966), cert. den. 384 U.S. 939, 16 L. Ed. 2d 539, 86 S. Ct. 1462(1966) and *Richard's Lumber & Supply v. U.S. Gypsum Co.*, 545 F.2d 18 (7th Cir. 1976), cert. den. 430 U.S. 915, 51 L. Ed. 2d 593, 97 S. Ct. 1326 (1977). It may be that federal common law is being applied in those cases although there is no explicit discussion of the appropriate rule of law. Neither decision attempts to set forth a comprehensive federal rule regarding releases. And in fact, *Richard's Lumber* cites *Three Rivers, supra*, in which state law was applied.

Under Wisconsin law, the validity of a release is a question of fact. Also under Wisconsin law on this record, summary judgment is inappropriate.

State Law Claims

Defendants argue that this court lacks jurisdiction over the plaintiffs claims brought under the state antitrust statutes. The argument is without merit. The motion for summary judgment on this issue is denied.

Finally, defendants argue that any recovery pursuant to a claim based on [§ 133.14, Wis. Stats.](#), must be reduced to reflect [**24] the benefits plaintiffs have received under the allegedly illegal contracts. If no set off is made, defendants argue, the statute is unconstitutional.

[Section 133.14](#) provides:

HN6[] "All contracts or agreements made by any person while a member of any combination or conspiracy prohibited by section 133.03, and which contract or agreement is founded upon, is the result of, grows [*630] out of or is connected with any violation of such section, either directly or indirectly, shall be void and no recovery thereon or benefit therefrom may be had by or for such person. Any payment made upon, under or pursuant to such contract or agreement to or for the benefit of any person may be recovered from any person who received or benefitted from such payment in an action by the party making any such payment or the heirs, personal representative or assigns of the party."

The language of the statute shows that no set off is contemplated. In [Madison v. Hyland, Hall & Co., 73 Wis.2d 364, 243 N.W.2d 422 \(1976\)](#), the Wisconsin Supreme Court compared the statute to the setting aside of an illegal or fraudulent contract, in which case the defrauded party is entitled to recoupment [**25] of the full contract price without a requirement for set off.

Defendants argue that if no set off is made, the statute as applied in this action is unconstitutional. The recovery plaintiffs seek under the statute is \$100,000,000; whereas their actual damages are said to be \$4,000,000. Defendants claim that the difference between the two amounts is an unconstitutional taking in violation of the due process clause.

HN7[] Penalty provisions may be unconstitutional

". . . when in their actual operation in the cases before it, such statutes work an arbitrary, unequal and oppressive result. . . . which shocks the sense of fairness the [Fourteenth Amendment](#) was intended to satisfy in respect to state legislation. . . ." [Chicago & Northwestern Railway Co. v. Nye-Schneider-Fowler Co., 260 U.S. 35, 44-45, 67 L. Ed. 115, 43 S. Ct. 55 \(1922\)](#).

According to the defendants, in evaluating the constitutionality of penalty provisions, courts look to three factors: the size of the penalty; the proportion of the penalty to actual damages; and the relationship between the penalty, the violation, and the public interest sought to be protected.

To state the criteria reveals, I think, the [**26] premature nature of defendants' request for summary judgment on this issue. There has been no finding of actual damages. The nature of the violation has not been judged. While it is true that a claim for \$100,000,000 sounds a little ridiculous, dealing as we are here with a mine run antitrust claim affecting cut-rate gasoline operations and not the property damage claims that followed the eruption of Mt. St. Helens, it could become clear at trial that the size of the claim is due to the volume of business conducted under illegal contracts. If so, plaintiffs should not be thrown out of court because they were harmed excessively, rather than moderately. The motion in regard to [§ 133.14, Wis. Stats.](#), is denied at this time.

I am aware that other minor issues, such as the standing of plaintiff Zorn, have not been specifically addressed in this decision. Eleven lawyers were apparently involved in the preparation of the briefs and supporting materials for this motion. Their work as I have stated was well done. However, not every claimed deficiency in this case need be addressed at this time. If issues remain, they can be addressed at trial, for the motion for summary judgment, [**27] except as noted below, is denied.

569 F. Supp. 621, *630 (1983 U.S. Dist. LEXIS 14634, **27

IT IS THEREFORE ORDERED that defendants' motion for summary judgment is DENIED, with the exception that plaintiffs' tying claims under § 3 of the Clayton Act are DISMISSED and plaintiffs' exclusive dealing claims are DISMISSED.

HN3 [+] **Robinson-Patman Act, Claims**

The Robinson-Patman Act, [15 U.S.C.S. § 13a](#) is remedial legislation which should be construed liberally. Though widely criticized, it is enforced as protective legislation designed to help small businesses remain healthy and afloat. The Supreme Court does, however, elect against adopting a generous method of ascertaining damages. It accepts Judge Learned Hand's ruling against allowing "automatic damages" measured by the amount of the price differential.

Counsel: [**1] William J. Burrell, Duane J. Fox, Burrell, Seigfreid & Bingham, P.C., Kansas City, Missouri, for Plaintiff.

F. Philip Kirwan, Terry L. Tyrrell, Margolin And Kirwan, Kansas City, Missouri, for Defendant Zenith Distributing Corp. of Kansas.

Philip J. Curtis, Edward McCausland, Glenview, Illinois, for Defendant Zenith Radio Corporation.

Opinion by: SACHS

Opinion

[*1201] MEMORANDUM AND ORDER LIMITING PLAINTIFF'S PROOF OF ALLEGED DAMAGES

Defendants have filed a motion that would drastically limit plaintiff's proof in this Robinson-Patman case, scheduled for early trial. Plaintiff's major contention in this case is that, as a distributor of defendants' products, he suffered price discrimination for several years and then elected in February, 1977, to begin purchasing similar products from other suppliers. Price discrimination damages in the amount of \$38,048 (before trebling) are sought for the period in which plaintiff served as a distributor. Plaintiff also seeks \$1,448,542 (before trebling) in alleged lost profits for the period from 1977-1982, after he gave up the distributorship.

Defendants seek an *in limine* ruling that plaintiff could not recover for profits that he contends [**2] he would have made if he had continued to make purchases from defendants and the pricing policy had been modified in his favor. In the alternative, defendants ask the Court to limit the proof of lost profits to the period (some eighteen months) in which plaintiff continued to operate as an individual sole proprietor. The business was later incorporated, to ease the transition of the business in the event of plaintiff's retirement or death.

Plaintiff apparently seeks to prove damages as though he were complaining of the constructive termination of his distributorship. The gist of the complaint, however, is price discrimination, and plaintiff relies solely on alleged "violations of the Robinson-Patman Act, [15 U.S.C. § 13 et seq.](#)" Complaint, paragraph 11 (Count I), paragraph 6 (Count II).

HN1 [+] A price discrimination complaint is directed toward actual sales transactions; it cannot be presented by a potential customer who *fails* to make purchases because he objects to a potential seller's pricing policies, or where the lack of consummated sales is otherwise simply "attributable" to the "discriminatory practice." A contrary holding

by the Fifth Circuit ([American Can Co. v. Bruce's Juices, Inc.](#), [187 F.2d 919, 924 \(5th Cir. 1951\)](#), *reh'g. granted*, [190 F.2d 73 \(5th Cir. 1951\)](#), *cert. dis.*, [342 U.S. 875, 72 S. Ct. 165, 96 L. Ed. 657 \(1951\)](#)) is considered "an aberration," although arguably good public policy. See, e.g., [M.C. Mfg. Co. v. Texas Foundries, Inc.](#), [517 F.2d 1059, 1065 \(5th Cir. 1975\)](#), *cert. den.*, [424 U.S. 968, 47 L. Ed. 2d 736, 96 S. Ct. 1466 \(1976\)](#); [Republic Packaging Corp. v. Haveg Industries](#), [406 F. Supp. 379, 381 \(N.D.Ill. 1976\)](#); Hansen, "Robinson-Patman Law," [51 Fordham L.Rev. 1113, 1126 n. 79 \(1983\)](#).

If the claim for future profits were allowed in this context, it would apply not only to the plaintiff, who had several years' experience selling defendants' products, but would equally apply to a plaintiff who quits defendants after thirty days, in protest against their pricing policies. Even a potential customer (like the corporation formed by plaintiff in 1978) might similarly make a multi-million dollar claim. Whatever logical analogy may be made to a constructive termination case, under the antitrust laws or otherwise, the absence of any support for plaintiff generated during the nearly fifty years of experience with the [\[***4\]](#) Robinson-Patman Act convinces me that such generous remedies are not available under that legislation. If a theoretical label needs to be placed on the rejection of the novel claim, perhaps it should be categorized as too "indirect" or "remote" from the offending sales transactions. [HN2](#)[] Only direct, proximate losses may be remedied under the antitrust laws. [Associated General Contractors of California v. California State Council of Carpenters](#), [459 U.S. 519, 103 S. Ct. 897, 910-13, 74 L. Ed. 2d 723 \(1983\)](#).

Plaintiff's search for supporting authorities has produced essentially one offering: [Perkins v. Standard Oil Co. of California](#), [395 U.S. 642, 23 L. Ed. 2d 599, 89 S. Ct. 1871 \(1969\)](#). That case basically holds, however, that "fourth level" injuries are compensable under the Robinson-Patman Act. [\[*1202\]](#) It further permits recovery of individual losses of brokerage fees *during the period of price discrimination*, even though the individual plaintiff was not the direct victim of discrimination. Justice Marshall dissented from this last holding, saying "the law under the Robinson-Patman Act is convoluted enough without the addition of numerous explicit and implicit holdings [\[***5\]](#) which may come back to bedevil us in future years." I.c. 652. While there are references in that litigation to a claim for injury to the "going concern value" of Perkins' business ([Standard Oil Company of California v. Perkins](#), [396 F.2d 809, 815 \(9th Cir. 1968\)](#)) the reported decisions do not show the evidentiary basis for the claim. Nothing indicates use of data subsequent to the period of the sales giving rise to litigation. There is simply no price discrimination case law which is fairly usable in support of this plaintiff's claim for lost future profits. *

[\[***6\]](#) The trend of the law regarding Robinson-Patman damages is not encouraging to plaintiff's theory. [HN3](#)[] It is true that the Supreme Court very recently reaffirmed the view that the Robinson-Patman Act is remedial legislation which should be construed liberally. [Jefferson County Pharmaceutical Association v. Abbott Laboratories](#), [460 U.S. 150, 103 S. Ct. 1011, 1017, 74 L. Ed. 2d 882 \(1983\)](#). Though widely criticized, it is enforced as protective legislation designed to help small businesses remain healthy and afloat. I.c. 1023. The Supreme Court has, however, elected against adopting a generous method of ascertaining damages. [J. Truett Payne Co. v. Chrysler Motors Corp.](#), [451 U.S. 557, 68 L. Ed. 2d 442, 101 S. Ct. 1923 \(1981\)](#). It accepted Judge Learned Hand's ruling against allowing "automatic damages" measured by the amount of the price differential. [Enterprise Industries v. Texas Company](#), [240 F.2d 457 \(2d Cir. 1957\)](#). If "automatic damages" were deemed too generous as a matter of law, it would be surprising if the novel enlargement of damage potential suggested by this plaintiff were adopted.

* Additional difficulties may be mentioned for consideration if this ruling is reviewed on appeal. It may still be arguable in this Circuit that a future profit claim based on a plaintiff's continuing employment life expectancy should not be made even for a wrongful antitrust termination. Evidence of future profits is normally offered as one of the elements needed for capitalization into lost going concern value. [Albrecht v. Herald Company](#), [452 F.2d 124, 128-29 \(8th Cir. 1971\)](#). Unlike an employment termination case, a "life annuity" is not allowable as recovery for an antitrust violation, since "the injury is to the business and not to the person." 1.c. 131. The "life annuity" method of calculating damages seems to have been allowed, however, in such later cases as [Lehrman v. Gulf Oil Corp.](#), [500 F.2d 659, 663-64 \(5th Cir. 1974\)](#) and [Arnott v. American Oil Co.](#), [609 F.2d 873 \(8th Cir. 1979\)](#), *cert. den.* [446 U.S. 918, 64 L. Ed. 2d 272, 100 S. Ct. 1852 \(1980\)](#). Senior Judge Gibson's comment in *Albrecht* may, however, still have appeal to some members of the reviewing court. In the present case, moreover, plaintiff's business "lifetime" as a sole proprietor may be deemed to have ended when the corporation was formed. The absence of a corporate claim for its losses as a possible future customer might thus serve to limit any recovery.

568 F. Supp. 1200, *1202-983 U.S. Dist. LEXIS 14505, **6

It is therefore ORDERED that plaintiff's damage proof at trial as to price discrimination [**7] shall be limited to the period during which plaintiff was making purchases from defendants, and shall not include claims for hypothetical lost profits on hypothetical sales subsequent to February, 1977. * *

End of Document

* * Recognizing the monetary significance of this ruling, I note that it is necessarily interlocutory and that plaintiff will have a further opportunity, either orally or through further citations, to persuade me to change the views expressed above, which are, however, at this point firmly held. Perhaps plaintiff will give up hope at this level and will reserve his contention for settlement value or appeal.

Real Property Law > Mobilehomes & Mobilehome Parks > Purchase & Sale

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN9 [blue download icon] **Tying Arrangements, Per Se Rule**

To allege an illegal per se tying arrangement, the complaint must show: (1) a tying arrangement existed, i.e., the sale of a tying product was linked to the purchase of the tied product; (2) the seller had sufficient economic power in the tying market to coerce the sale of the tied product; (3) a substantial amount of commerce was effected by the tying arrangement; and (4) the buyer suffered damages proximately caused by the arrangement.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN10 [blue download icon] **Price Fixing & Restraints of Trade, Tying Arrangements**

Sufficient economic power to compel the purchase of a tied product may be inferred if the seller occupies a dominant position in the relevant market. The power is sufficient even though it falls short of dominance and exists only with respect to some buyers. Finally, the requisite power can be inferred from the tying product's uniqueness or desirability to buyers.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN11 [blue download icon] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

The showing of a combination or conspiracy is a threshold requirement which must be met before the reasonableness of an alleged restraint of trade can be considered. This requirement precludes liability for coordinated activity among multiple corporations operating as a single entity.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN12 [blue download icon] **Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints**

Jointly owned corporations that compete in the marketplace, hold themselves out to the public as competing corporations, or set policy independently, are capable of conspiring to restrain trade as distinct entities.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN13 [blue download icon] **Price Fixing & Restraints of Trade, Tying Arrangements**

Where tying arrangements are alleged, there is ample authority the required combination can exist as between a defendant and the plaintiff/victim.

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Acts & Mental States > Mens Rea > General Intent

HN14 [] Antitrust & Trade Law, Sherman Act

The Sherman Act, [15 U.S.C.S. § 1](#), requires only a general intent on the part of a defendant to injure competition.

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Acts & Mental States > Mens Rea > General Intent

HN15 [] Antitrust & Trade Law, Sherman Act

General intent is usually inferred from the particular circumstances. A plaintiff alleging an antitrust violation need only show that a defendant acted with the intention that his acts have their natural consequences and with knowledge at least one other person would act in conjunction with the defendant.

Headnotes/Summary

Summary

CALIFORNIA OFFICIAL REPORTS SUMMARY

Two persons who purchased a home in a subdivision brought a class action against the real estate developer and an escrow company that the developer owned, alleging that they were required to use defendant escrow company's services and pay inflated closing costs as a condition of purchasing their home. Plaintiffs further alleged that such requirement violated [Civ. Code, § 2995](#), which prohibits a real estate developer from requiring the provision of escrow services by an entity in which the developer has a financial interest, and constituted an illegal per se tying arrangement under the Cartwright Act ([Bus. & Prof. Code, §§ 16720, 16726](#)). The trial court sustained defendant's demurrer to plaintiffs' third amended complaint without leave to amend and entered a judgment of dismissal. (Superior Court of Orange County, No. 338191, Edward J. Wallin, Judge.)

The Court of Appeal reversed and ordered the matter to proceed on the third amended complaint. The court first held that [Civ. Code, § 2995](#), was remedial in nature, not penal, and that the applicable limitations period was the three-year period provided by Civ. Code, § 338, subd. 1, and not the one-year period provided by Civ. Code, § 340, subd. 1. The court also held the cause of action alleging a violation of [§ 2995](#) accrued on the date escrow closed and the fees were paid, and not on the dates the purchase agreement or escrow instructions were signed. Accordingly, the court held the action was not time barred. The court further held that the complaint was sufficient to state a cause of action for violation of [§ 2995](#), and that whether a condition precedent to the purchase of homes existed as pleaded and whether the escrow instructions negated its existence were questions of fact to be resolved at trial. As to the Cartwright Act cause of action, the court held that the facts alleged were sufficient to allege a tying arrangement and to satisfy the requirement for sufficient economic power in the relevant market to coerce purchase of the tied product. The court also held that the complaint satisfied the threshold requirement for a showing of a combination between two distinct business entities and that the elements of intent to injure competition and resulting injury were sufficiently pleaded. (Opinion by Trotter, P. J., with Crosby and Sonenshine, JJ., concurring.)

Headnotes

CA(1) [] (1)**Appellate Review § 128—Review—Scope and Extent—Rulings on Demurrs.**

--The facts alleged in a complaint are presumed to be true for purposes of reviewing an order sustaining a demurrer.

CA(2a) [] (2a) **CA(2b)** [] (2b)**Escrows § 6—Pleadings and Actions—Controlled Escrows—Limitation of Actions.**

--Civ. Code, § 2995, which provides recovery when use of a particular escrow is required as a condition precedent to the transfer of a single family home, was enacted as a remedial statute to protect the buyer against in-house escrow services and was intended to assure the buyer's freedom to select an escrow entity and that entity's independence and neutrality. It is concerned with the effect of a buyer/seller agreement rather than the intent of the seller. Since liability is not dependent on some degree of culpability, recovery under § 2995 is remedial in nature. Accordingly, in an action alleging a violation of § 2995, the applicable limitations period was the three-year period provided by Civ. Code, § 338, subd. 1 (actions on a liability created by statute, other than a penalty or forfeiture), and not the one-year period provided by Civ. Code, § 340, subd. 1 (actions on a statute for a penalty or forfeiture).

CA(3) [] (3)**Escrows § 6—Pleadings and Actions—Controlled Escrows—Limitation of Actions.**

--The determination of the limitation period applicable to an action predicated on an alleged violation of Civ. Code, § 2995, which prohibits a real estate developer from requiring the provision of escrow services by an entity in which the developer has a financial interest, was a judicial function, since the Legislature did not prescribe a period of limitations within the statute. Such determination was dependent on whether the statute was characterized as penal or remedial, in light of its language and the legislative intent.

CA(4) [] (4)**Escrows § 6—Pleadings and Actions—Controlled Escrows—Limitation of Actions—Accrual of Cause of Action.**

--Civ. Code, § 2995, which provides recovery when use of a particular escrow is required as a condition precedent to the transfer of a single family home, accords a right of action to the "purchaser" of the residence, i.e., one who has acquired title or to whom title has been transferred. Further, there is no claim under the statute unless the party suffers injury as a result of the use of a particular escrow entity. This can only arise when escrow closes and the fees are paid. Accordingly, a cause of action alleging a violation of § 2995 accrued on the date escrow closed and fees were collected by the escrow agent, and not on the dates the purchase agreement or escrow instructions were signed.

CA(5) [] (5)**Escrows § 6—Pleadings and Actions—Controlled Escrows—Complaint—Sufficiency to Withstand Demurrer.**

--In an action against a real estate developer and others alleging a violation of Civ. Code, § 2995, which provides recovery against a real estate developer with a financial interest in a particular escrow entity who conditions the sale of a single family residence on the procurement of that escrow entity's services, the trial court erred in

sustaining defendants' demurrer, where the complaint alleged that the developer required buyers to use the services of its wholly owned entity as a condition precedent to acquiring title to single family residences, and where such allegations were supported in the complaint by specific facts rather than by conclusionary assertions. Whether a condition precedent existed as pleaded and whether the escrow instructions negated its existence were questions of fact to be resolved at trial.

CA(6) (6)

Monopolies and Restraints of Trade § 6—Under Cartwright Act—Applicability of Federal Precedent.

--Bus. & Prof. Code, 16720, which prohibits the combination of resources of two or more persons to prevent market competition or to restrain trade, and Bus. & Prof. Code, § 16726, which declares such combinations unlawful, against public policy, and void, are patterned after the Sherman Act (15 U.S.C. § 1), and cases construing the Sherman Act are applicable to problems arising under state law. However, state courts may exercise their prerogative to disagree with federal case law.

CA(7) (7)

Monopolies and Restraints of Trade § 7—Under Cartwright Act—Prohibited Agreements and Combinations—Illegality Per Se.

--Although the literal language of Bus. & Prof. Code, §§ 16720 and 16726, and their federal counterpart prohibit any combination to restrain trade, courts have required the restraints to be unreasonable. However, certain practices are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use because of their pernicious effect on competition and lack of any redeeming virtue. Such practices, considered illegal per se, include tying arrangements.

CA(8) (8)

Monopolies and Restraints of Trade § 7.4—Under Cartwright Act—Prohibited Agreements and Combinations—Tying Arrangements—Required Allegations.

--In order to allege an illegal per se tying arrangement, which involves a seller's refusal to sell one product (the tying product) unless the buyer also purchases a second product (the tied product) from the seller, the complaint must show that a tying arrangement existed, i.e., that the sale of a tying product was linked to the purchase of the tied product; that the seller had sufficient economic power in the tying market to coerce the sale of the tied product; that a substantial amount of commerce was affected by the tying arrangement; and that the buyer suffered damages proximately caused by the arrangement.

CA(9) (9)

Monopolies and Restraints of Trade § 7.4—Under Cartwright Act—Prohibited Agreements and Combinations—Tying Arrangements—Sufficiency of Complaint.

--In an action by home buyers against a real estate developer and an escrow company that it owned, allegations that the developer conditioned the sale of its homes on the use of its subsidiary's escrow services were sufficient to allege a tying arrangement (Bus. & Prof. Code, §§ 16720, 16726), where such allegations were supported in the complaint by specific facts rather than by conclusionary assertions. Whether a condition precedent existed as pleaded and whether escrow instructions negated its existence were questions of fact to be resolved at trial.

CA(10) [] (10)**Monopolies and Restraints of Trade § 7.4—Under Cartwright Act—Prohibited Agreements and Combinations—Tying Arrangements—Economic Power.**

--In an action by home buyers against a real estate developer and an escrow company that it owned alleging an illegal per se tying arrangement ([Bus. & Prof. Code, §§ 16720, 16726](#)), the facts alleged in the complaint were sufficient to support an allegation that the developer had sufficient economic power in the real estate market to coerce the purchase of escrow services, where it was alleged that the developer sold 6,404 residential properties for a total sum of \$ 591 million in the 4 preceding years, that there was a housing shortage during this time, and that each home was marketed as a unique product. Sufficient economic power may be inferred if the seller occupies a dominant position in the relevant market. The power is sufficient even though it falls short of dominance and exists only with respect to some buyers. The requisite power may also be inferred from the tying product's uniqueness or desirability to buyers.

CA(11a) [] (11a) **CA(11b)** [] (11b)**Monopolies and Restraints of Trade § 7.4—Under Cartwright Act—Prohibited Agreements and Combinations—Tying Arrangements—Combinations Between Distinct Entities.**

--In an action by home buyers against a real estate developer and an escrow company that it owned, the complaint, on its face, satisfied the threshold requirement for a showing of a combination or conspiracy between two distinct business entities. Whether or not the companies operated as a single entity had no effect on the cause of action for violation of the Cartwright Act ([Bus. & Prof. Code, §§ 16720, 16726](#)), where tying arrangements were alleged between the purchase of a home from the developer and the purchase of escrow services from its subsidiary. Under such circumstances, the required combination could exist as between the defendants and the victims.

CA(12) [] (12)**Monopolies and Restraints of Trade § 7—Under Cartwright Act—Prohibited Agreements and Combinations—Combinations Between Distinct or Single Entities.**

--The showing of a combination or conspiracy between two distinct business entities is a threshold requirement which must be met before the reasonableness of an alleged restraint of trade can be considered. This requirement precludes liability for coordinated activity among multiple corporations operating as a single entity. The definition of a single entity turns on the particular facts. For example, the single entity test is easily satisfied when corporate policies are set by one individual or by a parent corporation to the extent there is no autonomy. Conversely, jointly owned corporations that compete in the marketplace, hold themselves out to the public as competing corporations, or set policy independently are capable of conspiring to restrain trade as distinct entities.

CA(13a) [] (13a) **CA(13b)** [] (13b)**Monopolies and Restraints of Trade § 7.4—Under Cartwright Act—Prohibited Agreements and Combinations—Tying Arrangements—Injury to Competition.**

--In an action by home buyers against a real estate developer and an escrow company that it owned alleging an illegal per se tying arrangement ([Bus. & Prof. Code, §§ 16720, 16726](#)), the trial court erred in ruling, as a matter of law, that the elements of intent to injure competition and resulting injury to competition were insufficiently pleaded. An allegation of defendants' intent to injure competition could be inferred from the face of the complaint, where it

was alleged that defendants carried out enumerated practices in furtherance of a combination for the unlawful purpose of restricting trade, thus injuring competition. It also claimed direct and proximate damages resulting from the sale of homes conditioned on the use of the developer's escrow company to the extent plaintiffs were forced to pay inflated escrow fees.

CA(14)[] (14)

Monopolies and Restraints of Trade § 4—Particular Agreements and Combinations—Sherman Act—Intent to Injure Competition.

--The Sherman Act requires only a general intent to injure competition on the part of a defendant, which is usually inferred from the particular circumstances. A plaintiff need only show that a defendant acted with the intention that his acts have their natural consequences and with knowledge that at least one other person would act in conjunction with the defendant.

Opinion

[*280] [**568] Plaintiffs appeal a judgment of dismissal following the sustaining of a demurrer to their third amended complaint without leave to amend. We reverse the judgment holding the complaint states a cause of action for violations of [Civil Code section 2995](#) and the Cartwright Act ([Bus. & Prof. Code, § 16700 et seq.](#))

CA(1)[] (1) The complaint alleges the following facts which are presumed true for purposes of reviewing [***2] the order sustaining the demurrer. ([Bohrer v. County of San Diego \(1980\) 104 Cal.App.3d 155, 158 \[163 Cal.Rptr. 419\].](#))

Frederick O. MacManus and Barbara-Helene Smith (plaintiffs) purchased a home in Westwind, a subdivision developed by A.E. Realty Partners (AERP) in San Diego County. AERP, doing business as Ponderosa Homes, is a major developer and seller of residential real estate in California. Its principal place of business is in Irvine. Realty Escrow, Inc. (REI) is owned and controlled by AERP and derives all of its business from that company. Its principal place of business is also in Irvine.

[*281] [**569] From 1976 through 1980, AERP gained an income of \$ 591 million from its sale of 6,404 homes. REI provided the escrow services for more than 99.9 percent of the conveyances and received fees totalling \$ 2,045,343.

When plaintiffs decided to purchase their home, they were given a copy of the Real Estate Commissioner's Public Report which informed prospective buyers of AERP's financial interest in the escrow company to be used in the sale or lease of Westwind residences. After plaintiffs had read the report, an AERP sales agent prepared [***3] an offer to purchase (Agreement) for their signature. Among other conditions, the Agreement required the home buyer to sign escrow instructions on forms provided by AERP within 10 days after its acceptance of the buyer's offer. The buyer was further obligated to execute and deposit additional documents, including the escrow instructions, or be

considered in default. Should the buyer default, AERP could cancel the Agreement and retain as liquidated damages any fees the buyer previously paid.

Before signing the Agreement, plaintiffs asked if changes could be made. They were told only AERP's Agreement form could be used, no changes could be made in the preprinted terms and, if changes were made, the Agreement would not be accepted by AERP.

Upon signing the Agreement, plaintiffs were furnished written notice of their right to choose a title insurance company. They selected, in writing, St. Paul Title Company. Plaintiffs then received escrow instructions identifying REI as the entity to provide escrow services for their conveyance.

Included in the instructions (attached as an exhibit to the complaint) was the following Notice of Interest:

"All Parties to This Transaction Are Hereby [***4] Advised That Realty Escrow, Inc., the Escrow Agent Above Named Is a Corporation Wholly Owned by AE Realty Partners, a General Partnership by Aetna Life Insurance Company, a Connecticut Corporation and AE Development Group, Inc., a Connecticut Corporation a Wholly Owned Subsidiary of Aetna Casualty [sic] Surety Company, and for Whom Realty Escrow, Inc. Performs Escrow Services at a Negotiated Bulk Rate. All Parties to This Transaction Are Further Advised That the Sole Stockholder of Realty Escrow, Inc. Is Also the Sole Stockholder of Ponderosa Brokerage Company, a California Corporation and Further AE Realty Partners Is Engaged in Business Under the Name and Style Ponderosa Homes. All Parties Agree That the Services of Any of the Foregoing Companies May Be Used in Connection With This Transaction, That Such Use Has [*282] Not Been Made a Condition of This Sale by Any Party." Plaintiffs signed and returned the escrow instructions as required by the Agreement.

The conveyance of the Westwind residence was completed in July 1979. Plaintiffs paid REI various closing fees totaling \$ 319. Comparable escrow services in San Diego County were available at costs of \$ 127.50 to \$ [***5] 269.

From August 25, 1978,¹ through July 16, 1980,² AERP conveyed 386 lots in San Diego County containing single family residences. REI provided escrow services for all of the conveyances at costs \$ 50 to \$ 191.50 higher than those of local competitors. During the same period AERP also conveyed 2,080 lots of single family residences in other California counties. REI handled all but two of the closings and charged buyers inflated fees. The purchase of AERP properties was conditioned upon the procurement of REI escrow services.

[**570] Plaintiffs filed a class action on behalf of themselves and other buyers of AERP homes who were compelled to use the services of REI between August 25, 1978, and July 16, 1980.

Discussion

Alleged Violation of Civil Code Section 2995

CA(2a)[↑] (2a) Plaintiffs' first cause of action is predicated on Civil Code section 2995[***6] (hereafter section 2995).³ [*283] At the outset we must decide whether it is barred by section 340, subdivision (1) of the Code

¹ The date Civil Code section 2995 was enacted.

² The date the instant suit was commenced.

³ Section 2995 provides: HN1[↑] "No real estate developer shall require as a condition precedent to the transfer of real property containing a single family residential dwelling that escrow services effectuating such transfer shall be provided by an escrow entity in which the real estate developer has a financial interest."

"A real estate developer who violates the provisions of this section shall be liable to the purchaser of the real property in the amount of three times the amount charged for the escrow services, but in no event less than two hundred fifty dollars (\$ 250), plus reasonable attorney's fees and costs.

of Civil Procedure.⁴AERP and REI demurred on the ground plaintiffs filed the action more than one year after signing the Agreement and escrow instructions. Plaintiffs argue the action is subject to a three-year statute of limitations (Code Civ. Proc., § 338, subd. 1)⁵ and it did not accrue until the transfer of title to their residences.⁶

CA(3)[] (3) Since the Legislature did not prescribe a period of limitations within section 2995, we must determine the applicable period. (See Huntington v. Attrill (1892) 146 U.S. 657 [36 L.Ed. 1123, 13 S.Ct. 224]; Levy v. Superior Court (1895) 105 Cal. 600 [38 P. 965].) Our decision must depend upon whether the statute is characterized as "penal" [***8] or "remedial." (*Ibid.*) The distinction is rarely clear cut, for the same provision may be penal to the offender and remedial to the victim. (See Levy, supra, at pp. 607-608; Riggs v. Government Emp. Financial Corp. (9th Cir. 1980) 623 F.2d 68, 72, citing Huntington v. Attrill, supra, 146 U.S. at p. 667 [36 L.Ed. at p. 1127]) Nevertheless, to determine the applicable limitations period of section 2995, we examine its intent and language. (See Riggs v. Government Emp. Financial Corp., supra, 623 F.2d 68, 69-71.)

CA(2b)[] (2b) Its legislative history reveals residential buyers have often been forced to use an escrow entity in which the seller has an interest. Section 2995 was enacted as a remedial statute to protect the buyer against in-house escrow services. It was intended to assure the buyer's freedom to select an escrow entity and that entity's independence and neutrality.

Section 2995 provides recovery where use of a particular escrow is required as a condition precedent to the transfer of a single family residence. It is concerned with the effect of a buyer/seller agreement rather than [***9] the intent of the seller. Since liability is not dependent on some degree of culpability, recovery is construed as remedial in nature. (See Riggs, supra, at p. 71.)

Section 2995 also provides the aggrieved buyer shall receive treble damages, not less than \$ 250. "That a portion of such damages [**571] is statutorily set, rather than being subject to proof like most remedial damages, does not necessarily make the statute penal." (Riggs, supra, at p. 71.) Further, the [*284] liquidated damage measure is consistent with a remedial purpose, for when a buyer is deprived of using comparable escrow services, the value of those services, or actual damages, may be difficult to ascertain. (*Ibid.*)

In light of the intent and language of section 2995 we characterize it as remedial, and a three-year limitations period will be applied. (Code Civ. Proc., § 338, subd. 1.)

CA(4)[] (4) Finally, plaintiffs' first cause of action accrued on July 18, 1979, the date escrow closed and fees were collected by REI, and not on the dates the Agreement or escrow instructions were signed. Section 2995

"For purposes of this section 'financial interest' means ownership or control of 5 percent or more of an escrow entity.

"For purposes of this section 'real estate developer' means a person or entity having an ownership interest in real property which is improved by such person or entity with single family residential [sic] dwellings which are offered for sale to the public.

"For purposes of this section 'escrow entity' includes a person, firm or corporation.

"Any waiver of the prohibition contained in this section shall be against public policy and void."

⁴ Code of Civil Procedure section 335 provides: **HN2[]** "The periods prescribed for the commencement of actions other than for the recovery of real property, are as follows:"

Section 340, subdivision (1), provides in pertinent part: **HN3[]** "Within one year:

"An action upon a statute for a penalty or forfeiture, when the action is given to an individual, or to an individual and the state, except when the statute imposing it prescribes a different limitation."

⁵ Section 338, subdivision 1, provides in pertinent part: **HN4[]** "Within three years:

"An action upon a liability created by statute, other than a penalty or forfeiture."

⁶ The trial court did not address this issue.

accords a right of [***10] action to the "purchaser" of the residence, i.e., one who has acquired title (see [Anderson v. Badger \(1948\) 84 Cal.App.2d 736, 744 \[191 P.2d 768\]](#)) or to whom title has been "transferred." (See [Civ. Code, §1039.](#)) Further, a plain reading of the statute shows there is no claim unless the party suffers injury as a result of a condition precedent, i.e., the use of a particular escrow entity. This can only arise when escrow closes and the fees are paid. Plaintiffs' cause of action is clearly not time barred.

CA(5)[↑] (5) The demurrer interposed by AERP and REI was sustained on the following grounds: "Insufficient facts are pleaded to support a requisite element of a claim under [Civil Code Section 2995](#), namely, that A.E. Realty Partners conditioned the sale of Ponderosa Homes on the use of Realty Escrow's escrow services, and the escrow instructions . . . expressly negate the existence of a conditioned sale." We disagree.

HN5[↑] The elements constituting a claim under [section 2995](#) appear on its face: (1) A real estate developer with a financial interest in a particular escrow entity, (2) who conditions the sale [***11] of a single family residence, (3) on the procurement of that escrow entity's services.

The complaint alleged AERP required buyers to use the services of REI, its wholly owned entity, as a condition precedent to acquiring title to single family residences. These allegations are supported in the complaint by specific facts rather than by conclusionary assertions. (See e.g., [People v. McKale \(1979\) 25 Cal.3d 626, 635 \[159 Cal.Rptr. 811, 602 P.2d 731\]](#); 3 Witkin, Cal. Procedure (2d ed. 1971) Pleading, § 268, pp. 1939-1940.) Plaintiffs' first cause of action clearly withstands demurrer. Whether a condition precedent existed as pleaded and whether the escrow instructions negated its existence are questions of fact to be resolved at trial. (E.g., [McKale, supra, at pp. 634-635.](#))

Alleged Violation of Cartwright Act

CA(6)[↑] (6) The second cause of action is based on [Business and Professions Code sections 16720](#) and [16726](#) of the Cartwright Act, the principal California [*285] antitrust statute. Both sections are patterned after [section 1](#) of the Sherman Act ([15 U.S.C. § 1](#); [***12] see [Corwin v. Los Angeles Newspaper Service Bureau, Inc. \(1971\) 4 Cal.3d 842, 852 \[94 Cal.Rptr. 785, 484 P.2d 953\]](#)) and cases construing the Sherman Act are applicable to problems arising under the Cartwright Act. ([Marin County Bd. of Realtors, Inc. v. Palsson \(1976\) 16 Cal.3d 920, 925 \[130 Cal.Rptr. 1, 549 P.2d 833\].](#))⁷

[Section 16720 HN6\[↑\]](#) prohibits the combination of resources of two or more persons to prevent market competition or to restrain trade as detailed in the section.⁸ Such combinations [**572] or trusts are "unlawful,

⁷ In [Bruno v. Superior Court \(1981\) 127 Cal.App.3d 120, 131 \[179 Cal.Rptr. 342\]](#), the court declared: "Interpretations of the federal antitrust laws are of relevance to the Cartwright Act problems [citation], but we respectfully exercise our prerogative to disagree with the cited cases."

⁸ [Business and Professions Code section 16720](#) provides: **HN7[↑]** "A trust is a combination of capital, skill or acts by two or more persons for any of the following purposes:

"(a) To create or carry out restrictions in trade or commerce.

"(b) To limit or reduce the production, or increase the price of merchandise or of any commodity.

"(c) To prevent competition in manufacturing, making, transportation, sale or purchase of merchandise, produce or any commodity.

"(d) To fix at any standard or figure, whereby its price to the public or consumer shall be in any manner controlled or established, any article or commodity of merchandise, produce or commerce intended for sale, barter, use or consumption in this State.

"(e) To make or enter into or execute or carry out any contracts, obligations or agreements of any kind or description, by which they do all or any or any combination of any of the following:

against public policy and void." ([Bus. & Prof. Code, § 16726.](#)) **CA(7)** (7) Although the [***13] literal language of these sections and their federal counterpart prohibit any combination to restrain trade, courts have added a judicial gloss requiring the restraints to be "unreasonable." ([Chicago Board of Trade v. United States \(1918\) 246 U.S. 231, 238-241 \[62 L.Ed. 683, 687-688, 38 S.Ct. 242\]; People v. Building Maintenance etc. Assn. \(1953\) 41 Cal.2d 719, 727 \[264 P.2d 31\].](#)) However, certain practices are "conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use" because of "their pernicious effect on competition and lack of any redeeming virtue." ([Northern Pac. R. Co. v. United States \(1958\) 356 U.S. 1, 5 \[2 L.Ed.2d 1*286\] 545, 549, 78 S.Ct. 514\], partially quoted in *Suburban Mobile Homes, Inc. v. AMFAC Communities, Inc.* \(1980\) 101 Cal.App.3d532, 541 \[\[161 Cal.Rptr. 811\]\(#\)\].](#)) Such practices, considered illegal per se, include tying arrangements.

[***14] **CA(8)** (8)

HN8 (8) Tying arrangements involve a seller's refusal to sell one product (the tying product) unless the buyer also purchases a second product (the tied product) from the seller. ([Id. at pp. 542-543.](#))

HN9 (9) To allege an illegal per se tying arrangement, the complaint must show: (1) a tying arrangement existed, i.e., the sale of a tying product was linked to the purchase of the tied product; (2) the seller had sufficient economic power in the tying market to coerce the sale of the tied product; (3) a substantial amount of commerce was effected by the tying arrangement; and (4) the buyer suffered damages proximately caused by the arrangement. ([Suburban Mobile Homes, supra, at pp. 542-543; see also Classen v. Weller \(1983\) 145 Cal.App.3d 27 \[192 Cal.Rptr. 914\].](#))

CA(9) (9) The trial court ruled plaintiffs failed to allege sufficient facts to support two elements of an illegal per se tying claim under [sections 16720](#) and [16726](#): (1) that AERP conditioned the sale of Ponderosa Homes on the use of REI's escrow services, and the escrow instructions expressly negate the existence of a conditioned sale; and (2) that AERP had sufficient economic [***15] power in any tying product market to compel the purchase of escrow services, the tied product. However, the complaint alleges AERP conditioned the sale of its residential property (the tying product) on the "purchase" of REI's escrow services (the tied product) thereby violating [sections 16720](#) and [16726](#).

We conclude the tying arrangement, or conditioned sale of Ponderosa Homes, was sufficiently alleged for reasons already stated in our discussion of the first cause of action. (See also [Classen, supra, at pp. 36-37.](#)) Plaintiffs also stated facts to support the element of economic power in the tying market.

CA(10) (10) **HN10** (10) Sufficient economic power may be inferred if the seller occupies a dominant position in the relevant market. (See e.g., [International Business Machines Corp. v. U.S. \(1936\) 298 U.S. 131, 135-136 \[80 L.Ed. 1085, 1088-1089, 56 S.Ct. 701\]; Moore v. Jas. H. Matthews & Co. \(9th Cir. 1977\) 550 F.2d 1207, 1215.](#)) The power is sufficient even though it falls short of dominance and exists only with respect to [**573] some buyers. ([Suburban Mobile Homes, supra, at p. 544.](#)) Finally, the requisite power [***16] can be inferred from the tying product's uniqueness or desirability to buyers. (*Ibid.*; [Moore, supra, at pp. 1215-1216.](#))

[*287] The complaint alleged AERP sold 6,404 residential properties for a total sum of \$ 591 million in the four years preceding this litigation. During this time, there was a housing shortage especially acute in those areas

"(1) Bind themselves not to sell, dispose of or transport any article or any commodity or any article of trade, use, merchandise, commerce or consumption below a common standard figure, or fixed value.

"(2) Agree in any manner to keep the price of such article, commodity or transportation at a fixed or graduated figure.

"(3) Establish or settle the price of any article, commodity or transportation between them or themselves and others, so as directly or indirectly to preclude a free and unrestricted competition among themselves, or any purchasers or consumers in the sale or transportation of any such article or commodity.

"(4) Agree to pool, combine or directly or indirectly unite any interests that they may have connected with the sale or transportation of any such article or commodity, that its price might in any manner be affected."

where AERP conducted business. Each Ponderosa Home was marketed as a unique product, "custom [designed] by award winning architects" in "choice and convenient locations" throughout the state. These facts support an allegation of AERP's sufficient economic power in the real estate market.

CA(11a)[] (11a) The trial court further sustained the demurrer to plaintiffs' second cause of action for failure to state facts sufficient to support the element of a combination in restraint of trade between two distinct business entities.

CA(12)[] (12) **HN11[]** The showing of a combination or conspiracy is a threshold requirement which must be met before the reasonableness of an alleged restraint of trade can be considered. (*Harvey v. Fearless Farris Wholesale, Inc.* (9th Cir. 1979) [589 F.2d 451, 453](#).) [***17] This requirement precludes liability for coordinated activity among multiple corporations operating as a single entity. (*Thomsen v. Western Elec. Co. Inc.* (9th Cir. 1982) [680F.2d 1263](#); *Las Vegas Sun, Inc. v. Summa Corp.* (9th Cir. 1979) [610 F.2d 614](#); *Knutson v. Dailey Review* (9th Cir. 1976) [548 F.2d 795](#); see also *Bondi v. Jewels by Edwar, Ltd.* (1968) [267 Cal.App.2d 672](#) [[73 Cal.Rptr. 494](#)].)

The single entity test, or intraenterprise conspiracy theory, is a frequently litigated issue. The problem, defining a single entity, turns on the particular facts. (*Mutual Fund Investors v. Putnam Management Co.* (9th Cir. 1977) [553 F.2d 620](#).) This test is easily satisfied when corporate policies are set by one individual or by a parent corporation (see, e.g., *Las Vegas Sun, supra, at p. 618*) to the extent there is no autonomy (see *Harvey, supra*, p. 457). At the other extreme, **HN12[]** jointly owned corporations that compete in the marketplace, hold themselves out to the public as competing corporations, or set policy independently, are capable of conspiring to restrain trade as distinct [***18] entities. (*General Business Systems v. North Am. Philips Corp.* (9th Cir. 1983) [699 F.2d 965, 980](#).)

CA(11b)[] (11b) REI is wholly owned by AERP for whom it performs escrow services at a negotiated bulk rate. REI paid cash dividends to AERP, its sole shareholder, during the four years preceding this action. All but one of the current officers of REI are officers of AERP. All but one of the directors of REI are also officers of AERP. However, the degree of control AERP exercises over REI's day-to-day operations is not shown. (See, e.g., *General Business Systems v. North Am. Philips Corp., supra, 699 F.2d 965*.)

Nevertheless, whether or not AERP and REI operate as a single entity has no effect on plaintiffs' cause of action which, on its face, satisfies the [*288] threshold requirement. **HN13[]** Where tying arrangements are alleged, there is ample authority the required combination can exist as between the defendants and the plaintiff/victim. (See e.g., *Roberts v. Elaine Powers Figure Salons, Inc.* (9th Cir. 1983) [708 F.2d 1476](#); *Siegel v. Chicken Delight, Inc.* (9th Cir. 1971) [448 F.2d 43](#).)

In [***19] *Perma Mufflers v. Int'l Parts Corp.* (1968) [392 U.S. 134, 141-142](#) [[20 L.Ed.2d 982, 991-992, 88 S.Ct. 1981](#)], the Supreme Court determined: "There remains for consideration only the Court of Appeals' alternative holding that the Sherman Act claim should be dismissed because respondents were all part of a single business entity and were therefore entitled to cooperate without creating an illegal conspiracy. But since respondents Midas and International availed themselves of the privilege of doing business through separate corporations, the fact of common ownership could not save them from any of the obligations that the law imposes on separate entities. [Citations.] In any event each petitioner can clearly charge a combination between [**574] Midas and himself, as of the day he unwillingly complied with the restrictive franchise agreements [citations]"

This line of reasoning was recently followed by the Oregon Supreme Court in *King City Realty, Inc. v. Sunspace Corp.* (1981) [291 Ore. 573](#) [[633 P.2d 784](#)], which concerned a tying arrangement between a seller and buyer of lots with a "list back" agreement. Faced with arguments [***20] akin to those of AERP and REI, the *King* court held the defendant's affirmative defense sufficiently pled the "elements" of an illegal tying arrangement under the Oregon equivalent of *section 1* of the Sherman Act. ([633 P.2d at pp. 787-789](#).)

In light of the preceding cases, we conclude the second cause of action alleged facts sufficient to show a combination in restraint of trade between plaintiffs and AERP/REI, as distinct business entities.

CA(13a)[] (13a) Lastly, we address the trial court's determination that two additional elements of an unreasonable restraint of trade were not sufficiently alleged: (1) AERP's and REI's intention to injure competition, and (2) injury to competition as a result of their conduct.

CA(14)[] (14) **HN14[]** Section 1 of the Sherman Act requires only a general intent on the part of a defendant. (16A Von Kalinowski, Business Organizations, Antitrust Laws and Trade Regulation, § 36.01[3][b].) **HN15[]** General intent is usually inferred from the particular circumstances. (*Ibid.*) A plaintiff need only show a defendant acted with the intention that his acts have their natural consequences and with knowledge at least one other person [***21] would act in conjunction with the defendant. (*Interstate Circuit v. U.S. (1939) 306 U.S. 208 [**289] [83 L.Ed. 610, 59 S.Ct. 467]; Northern California Pharmaceutical Ass'n v. United States (9th Cir. 1962) 306 F.2d 379.*)

CA(13b)[] (13b) From the face of the complaint, an allegation of AERP's and REI's intent to injure competition can be inferred. It alleged defendants carried out enumerated practices in furtherance of a combination for the unlawful purpose of restricting trade, thus injuring competition. It also claimed direct and proximate damages resulting from the conditioned sale, to the extent plaintiffs were forced to pay inflated escrow fees. The trial court erred in ruling, as a matter of law, that such elements were not sufficiently pleaded. (See *Saxer v. Philip Morris, Inc. (1975) 54 Cal.App.3d 7 [126 Cal.Rptr. 327].*)

Judgment of dismissal is reversed, and the matter is ordered to proceed on the third amended complaint.

Opinion

[*455] MEMORANDUM OPINION AND ORDER

The plaintiffs to this action are Mission Hills Condominium Association M-1, Mission Hills Condominium Association M-2, Mission Hills Condominium Association M-3 and Mission Hills Condominium Association M-4 ("Associations"), and they have sued on behalf of their members who purchased condominium units in the Mission Hills Country Club Village ("Development"). The defendants are Eugene R. Corley, individually and d/b/a Eugene R. Corley Builders, The Corley Companies, Inc., Corley, Inc., ("Corley"), and Phoenix Mutual Life Insurance Co. ("Phoenix"). Jurisdiction over the plaintiffs' two federal claims is conferred by [28 U.S.C. § 1337](#), and the plaintiffs ask the Court to assert pendent [*456] jurisdiction over their twelve state law claims.

Presently before the Court is defendants' motion to dismiss the amended complaint. For the reasons set forth below, defendants' motion to dismiss is granted in part and denied in part. Also before the Court is the petition of six individuals, owners of units in the Development, to intervene as plaintiffs. That motion is granted.

FACTS

On a motion to dismiss, the court [**2] must accept as true the allegations pled by the plaintiffs. The amended complaint and briefs filed relative to the instant motion reveal the following. The Development is a residential development located in Northfield, Illinois. Constructed and developed by Corley and Phoenix, the Development comprises approximately thirteen condominium properties, a private country club and other various amenities.

On or about August 8, 1973, a Blanket Declaration governing the Development was recorded. The Declaration, the legal instrument by which condominium property is created, imposed certain obligations and requirements with respect to the ownership and operation of the Development. Pursuant to the Development's Blanket Declaration, Corley and Phoenix retained three votes in the Mission Hills Homeowners Association ("Homeowners Association") for every unsold condominium unit. Approximately one year later, the Homeowners Association's By-laws were amended, giving Corley and Phoenix the authority to continue to administer the Homeowners Association and to disregard any vote of the unit owners until 60 days after the last condominium unit was sold. In their capacity as administrators of [**3] the Homeowners Association, Corley and Phoenix have entered into management, maintenance, and other property-related service contracts, for work on the Development's common areas, with business entities affiliated with either Corley or Phoenix. The services include snow removal, general maintenance, and landscaping. These service contracts were worth approximately \$2 million in the four years preceding this action.

On March 24, 1982, the plaintiff Associations (they claim to represent the interests of all unit owners in four of the Development's thirteen condominium properties) filed an amended complaint. In their fourteen count amended complaint, plaintiffs charge that defendants' conduct violates [Section 1](#) of the Sherman Act, [15 U.S.C. § 1](#), the Illinois Antitrust Act, Ill. Rev. Stat. ch. 38 § 60-1 *et seq.*, the Illinois Condominium Property Act, Ill. Rev. Stat. ch. 30, § 301, *et seq.*, and the common law of Illinois.

First, plaintiffs charge that as a result of controlling the Homeowners Association, Corley and Phoenix are able to require unit owners to accept property-related services from entities controlled by Corley and Phoenix. They claim that but for the defendants' [**4] actions, the plaintiffs could purchase these services from various other independent and more competent concerns on more favorable terms. They state that the defendants have conspired to reject lower bids from potential competitors, and that the plaintiffs have paid \$750,000 more to

defendants than plaintiffs would have paid to others. Plaintiffs allege that this constitutes an illegal tying arrangement violative of federal and Illinois antitrust laws (Counts I-IV).

Second, plaintiffs allege that provisions of the Declaration and By-laws, giving Corley and Phoenix allegedly total authority over the administration of the Homeowners Association, are unconscionable and therefore invalid (Count V). In this connection, plaintiffs further allege that defendants' continued control over the Homeowners Association and defendants' behavior violate the Illinois Condominium Property Act (Counts VI, X, XIV). Third, plaintiffs charge that during the course of their administration of the Homeowners Association, Corley and Phoenix have breached various common law duties owed to the unit owners, and in the process have committed fraud and conversion (Counts VII-IX, XI-XIII).

[*457] Defendants [*5] have filed a motion to dismiss the entire amended complaint. In support of their motion, defendants argue that plaintiffs, as associations, lack standing to bring Counts I-IV. Second, defendants argue that Counts I-IV of the amended complaint fail to state claims under the antitrust laws, and that Counts VI and XIV fail to state claims under the Illinois Condominium Property Act. Third, defendants argue that the Declaration and By-laws are valid and enforceable contracts and are not unconscionable (Count V). Finally, defendants argue that since the amended complaint fails to state claims cognizable under federal law, the Court should dismiss the entire amended complaint (including the pendent claims) for lack of subject matter jurisdiction.

STANDING

Counts I, II, III and IV of the amended complaint allege violations of federal and Illinois antitrust laws. Specifically, Count I seeks to recover treble damages, in the amount of \$2,250,000, pursuant to Section 4 of the Clayton Act, [15 U.S.C. § 15](#), for defendants' alleged violation of [Section 1](#) of the Sherman Act, [15 U.S.C. § 1](#). Count II, incorporating by reference the allegations of Count I and brought under Section 16 of the [*6] Clayton Act, [15 U.S.C. § 26](#), seeks to enjoin defendants from exercising any control over the Homeowners Association and taking any action for which the unit owners would incur a cost. Count III seeks to recover treble damages for defendants' alleged violations of the Illinois Antitrust Act, Ill. Rev. Stat. ch. 38, §§ 60-1 *et seq.*, and Count IV, incorporating by reference the allegations of Counts II and III, also seeks injunctive relief.

Defendants move to dismiss all four counts on the ground that plaintiffs, as associations, lack standing to bring these claims. Asserting that these counts allege violations of antitrust laws arising from purchase agreements to which plaintiffs were not parties, defendants argue that plaintiffs have not been injured by defendants' conduct. Furthermore, defendants argue that plaintiffs should not be granted representative standing because plaintiffs have failed to satisfy the necessary requirements for such. Defendants claim that representative standing is inappropriate in the instant action due to a conflict of interest between the plaintiff associations and their members regarding the decision to bring the instant action.

[HN1](#)[[↑]] The Supreme Court [*7] has recognized that an association has standing to bring suit on behalf of its members when: (1) its members would have standing to sue in their own right; (2) the interests it seeks to protect are germane to the association's purpose; and (3) neither the claim asserted or relief sought requires the individual participation of the members in the lawsuit. [Hunt v. Washington State Apple Advertising Commission, 432 U.S. 333, 343, 53 L. Ed. 2d 383, 97 S. Ct. 2434 \(1977\)](#). Furthermore, [HN2](#)[[↑]] the Court specifically has found that associations may seek injunctive relief because "it can reasonably be supposed that the remedy, if granted, will inure to the benefit of those members of the association actually injured." [Warth v. Seldin, 422 U.S. 490, 511, 45 L. Ed. 2d 343, 95 S. Ct. 2197 \(1975\)](#).

Relying upon these Supreme Court decisions, [HN3](#)[[↑]] courts have upheld associational standing in federal antitrust actions seeking injunctive relief pursuant to Section 16 of the Clayton Act, [15 U.S.C. § 26](#). [Associated General Contractors of North Dakota v. Otter Tail Power Company, 611 F.2d 684, 690 \(8th Cir. 1979\)](#); [National Office Machine Dealers Association v. Monroe, The Calculator Co., 484 F. \[**81\] Supp. 1306, 1307 \(N.D. Ill. 1980\)](#). Section 16 states, in pertinent part, that "[HN4](#)[[↑]] any person, firm, corporation, or association shall be entitled to sue for and have injunctive relief . . . against threatened loss or damage by a violation of the antitrust laws . . ." (emphasis added). In recognizing associational standing in Section 16 cases, the courts have emphasized the

absence of statutory language convincing an intent to restrict standing beyond the limitations established in Article III of the Constitution.

[*458] This Court concurs with the decisions reached by these courts and concludes that [HN5](#) an association's right to bring a claim under Section 16 shall be scrutinized the same as in any other action brought by an association on behalf of its members. Applying the criteria set forth in [Hunt, supra](#), the Court finds that plaintiffs have standing to seek injunctive relief against defendants for alleged antitrust violations. First, the individual members of the associations would have standing to bring this action since the injury claimed is to the members' condominium property. Second, given that plaintiffs are seeking to protect their members' property and to prevent [**9](#) their members from paying assessments derived from allegedly noncompetitive fees, the interests plaintiffs seek to protect are germane to the associations' purposes. Third, neither the relief requested nor the claim asserted require the participation of the association members. Plaintiffs allege that defendants have engaged in conduct resulting in an illegal tying arrangement. Proof of these allegations would not require member participation.

Defendants cite two Fifth Circuit cases holding that condominium associations lack standing to bring antitrust claims on behalf of their members. [Buckley Towers Condominium, Inc. v. Buchwald](#), 533 F.2d 934 (5th Cir. 1976), cert. denied, 429 U.S. 1121, 51 L. Ed. 2d 571, 97 S. Ct. 1157 (1977); [Chatham Condominium Ass'n. v. Century Village, Inc.](#), 597 F.2d 1002 (5th Cir. 1979). Buckley preceded [Hunt v. Washington State Apple, supra](#), the leading Supreme Court case on associational standing. Further, while Buckley did refer to [Warth v. Seldin, supra](#), see [533 F.2d at 938 n.3](#), the Fifth Circuit found Warth "inapposite":

The Court in *Warth* held that an association may have standing as the representative [**10](#) of its members even in the absence of injury to itself, but the association must allege that its members are suffering or threatened with injury as a result of the challenged action of the sort that would make out a justiciable case had the members themselves been parties to the suit.

The plaintiff associations have here alleged what the *Buckley* court apparently there found lacking (para. 18, Amended Complaint). The Fifth Circuit in *Chatham* followed its earlier decision in *Buckley* in addressing a question of associational standing, without citing or discussing any other cases.

The Court believes *Buckley* is distinguishable, since the *Warth* test, apparently not met in *Buckley*, has been met here. However, even if it were not so distinguishable, this Court would not follow *Buckley* because it seems not to follow Supreme Court precedent. Furthermore, it is against the overwhelming weight of other authority on the issue of associational standing. In addition to the cases cited above (*Hunt*, *Warth*, *Otter Tail*, and *Monroe*, *The Calculator Co.*), see also [National Collegiate Athletic Ass'n. v. Califano](#), 622 F.2d 1382, 1387 (10th Cir. 1980); [**11 Chicago-Midwest Meat Ass'n. v. City of Evanston](#), 589 F.2d 278, 280 (7th Cir. 1978), cert. denied, 442 U.S. 946, 61 L. Ed. 2d 318, 99 S. Ct. 2895 (1979). This Court does not believe that the associational standing rule is different when the plaintiff is an association of condominium owners.

The Court also finds that plaintiffs have standing to seek injunctive relief against defendants for alleged violations of the Illinois Antitrust Act. Claims for injunctive relief do not require the members' individual participation and there is every reason to expect that, if granted, the relief sought will benefit all of the members equally. Further, Illinois law explicitly allows an association to bring suit on behalf of its members. The Illinois Condominium Property Act, Ill. Rev. Stat. 1978, ch. 30, § 309.1, states in relevant part: "[HN6](#) The board of managers [of the condominium association] shall have standing to act in a representative capacity in relation to matters involving the common elements of more than one unit, on behalf of the unit owners, as their interests may appear." [HN7](#) The Illinois courts have construed this statute to allow a condominium association to sue on behalf of [**12](#) its members. [Tassan v. United Development Co.](#), 88 Ill.App.3d 581, [\[*459\]](#) 410 N.E.2d 902, 914-15, 43 Ill. Dec. 769 (1st Dist. 1980) (§ 309.1 gives association right to sue on behalf of its members; individual owners also retain right to sue); [St. Francis Courts v. Investors Real Estate](#), 104 Ill.App.3d 663, 432 N.E.2d 1274, 1275-76, 60 Ill. Dec. 375 (1st Dist. 1982) (§ 309.1 gives association standing to sue; *Tassan* interpreted to allow either association or individual to bring suit).

Defendants argue that plaintiffs should be denied standing here due to an alleged conflict among the members regarding the decision to institute the instant action. Defendants' argument is unpersuasive. Contrary to the naked assertion in defendants' brief, there is no allegation in plaintiffs' amended complaint indicating any conflict among the associations' members. The Court will not deny plaintiffs standing to seek injunctive relief simply on the basis of a vague and unsubstantiated allegation.

Plaintiffs, however, lack standing to bring a claim for damages pursuant to Section 4 of the Clayton Act, [15 U.S.C. § 15](#). Unlike the injunctive provision of Section 16, [HN8](#) the damage provision [\[**13\]](#) of Section 4 expressly restricts suit to "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws . . ." The Court interprets [HN9](#) this language as precluding an association -- as distinct from its individual members -- from bringing a claim for treble damages for alleged antitrust violations, where the association has not been injured in its "business or property."

The Supreme Court has noted that [HN10](#) standing to sue for damages under Section 4 is more limited than standing to sue for injunctive relief under Section 16. [Hawaii v. Standard Oil Co., 405 U.S. 251, 262, 31 L. Ed. 2d 184, 92 S. Ct. 885 n.14 \(1972\)](#). [HN11](#) The "language in § 4 was intended to screen out some potential plaintiffs from bringing treble damage actions, even though they could bring suits for injunctive relief." [Tugboat, Inc. v. Mobile Towing Co., 534 F.2d 1172, 1175 \(5th Cir. 1976\)](#). See also [National Constructors v. National Elec. Contractors, 498 F. Supp. 510, 518-20 \(D. Md. 1980\)](#) (association has standing to sue for injunctive relief under Section 16, but may not sue for damages under Section 4), *aff'd*, [678 F.2d 492 \(4th Cir. 1982\)](#), *petition for [**14] cert. filed*, [51 U.S.L.W. 3535](#) (U.S. Jan. 18, 1983) (No. 82-1146). The associations here have not alleged to have been damaged in their business or property. Instead, the members are the ones who have suffered money damages. Further, under the *Hunt* test, association standing would be inappropriate for the damage claims here, since the individuals would be required to participate to prove the damages suffered.

Similarly, the Court finds that the plaintiffs lack standing to bring a claim for treble damages against defendants for alleged violation of the Illinois antitrust laws. Ill. Rev. Stat. ch. 38, § 60-7(2), uses the same words ("business or property") as Section 4 of the Clayton Act. The legal analysis is the same as recited above.

In summary, the Court concludes that plaintiffs have standing to seek injunctive relief against defendants for alleged violations of federal and Illinois antitrust laws. However, plaintiffs do not have standing to seek monetary damages for the aforementioned allegations. Accordingly, Counts I and III of the amended complaint (both of which seek money damages), are dismissed, while Counts II and IV (seeking injunctive relief) remain.

FEDERAL [\[**15\]](#) ANTITRUST CLAIMS

Defendants move to dismiss Count II of the amended complaint, claiming violations of [Section 1](#) of the Sherman Act, asserting that this count does not allege the substantive elements necessary to support a "tying action" under [Section 1](#). Characterizing Count II as constituting a claim solely for *per se* violations of [Section 1](#), defendants argue that Count II is defective because it fails to allege the existence of two distinct products and defendants' "sufficient economic power." In opposing the motion, plaintiffs argue that Count II sets forth the essential elements to maintain an action for a *per se* violation of [Section 1](#). Furthermore, [\[*460\]](#) plaintiffs argue that, even if Count II does not support a claim for a *per se* violation of the Sherman Act, their allegations state a claim under a Rule of Reason theory.

1. PER SE VIOLATIONS OF [SECTION 1](#)

[HN12](#) [Section 1](#) of the Sherman Act provides that any restraint of trade or commerce among the several states is illegal. It is well established that [HN13](#) tying arrangements comprise conduct that is illegal *per se* under [Section 1](#) of the Sherman Act. [Kentucky Fried Chicken Corporation v. Diversified Packaging \[**16\]](#) [Corporation, 549 F.2d 368, 374 \(5th Cir. 1977\)](#); see generally [Hovenkamp, Tying Arrangements in the Real Estate Market: Federal Antitrust Law and Local Land Development Policy](#), 33 Hast. L.J. 325 (1981) ("Hovenkamp"). [HN14](#) A tying arrangement generally is defined as an arrangement whereby a seller agrees to sell or lease one product (the "tying product") only on the condition that the buyer also purchase or lease a second product (the "tied product").

See *Hovenkamp, supra* at 325. [HN15](#) Tying arrangements have been considered violative of the antitrust laws because by using their monopoly power in the tying product to create a monopoly in the tied product, sellers inhibit competition in the market for the tied product. *Hovenkamp, supra* at 327.

[HN16](#) To maintain an action for damages due to an allegedly illegal tying arrangement, a plaintiff must show: (1) separate tying and tied products; (2) evidence of actual coercion by the seller that forced the buyer to accept the tied product; (3) sufficient economic power held by the seller in the tying product to coerce purchaser acceptance of the tied product; (4) anticompetitive effects in the tied market; and (5) a not insubstantial effect [**17](#) on interstate commerce. [*Yentsch v. Texaco, Inc., 630 F.2d 46, 56-57 \(2d Cir. 1980\)*](#). See also [*Forther Enterprises, Inc. v. United States Steel, 394 U.S. 495, 22 L. Ed. 2d 495, 89 S. Ct. 1252 \(1969\)*](#).

Defendants argue that plaintiffs have failed to set forth the necessary allegations, since in defendants' view the instant action involves only one product, i.e., a "leisure living package." The Court rejects this argument, however, and finds (at this pleading juncture, at least) that this case involves two distinct products.

The instant action involves both the sale of condominium units and property-related service contracts. Management services and the sale of condominium units are generically different and are not the same product. *Jones v. 247 E. Chestnut Properties*, [1975-2] Trade Cas. P 60,491, at 67,162 (N.D. Ill. 1974). It is inappropriate to characterize such disparate items as one product simply because they both are related, in some way, to a condominium development. *But see Levinson v. Maison Grande Inc., 517 F. Supp. 963 (S.D. Fla. 1981)* (court sees purchase of condominium with 99 year lease to swimming pool, located on condominium common area, to [**18](#) be a "single condominium development"; swimming pool property could not be separated from rest of condominium property).

In [*Johnson v. Nationwide Industries, Inc., 450 F. Supp. 948 \(N.D. Ill. 1978\)*](#), the court found that the purchase of a condominium was not "tied" (within the meaning of the Sherman Act) to a long-term garage lease, where the lease had been entered into years before the apartment building was converted to condominiums. However, in the same case the court held that the condominium could be illegally "tied" to a contract to manage the building. The management contract is equivalent to the service contracts at issue here. Though *Johnson* is cited by the defendants, it supports the plaintiffs' position.

Further, the reasoning of [*Chatham Condominium Ass'n., supra, 597 F.2d at 1013*](#), supports the view that the "leisure living package" argument is in the middle of the spectrum of antitrust tying law, and that facts must be developed before a court should rule as a matter of law that a leisure living package is one product. See also [*Miller v. Granados, 529 F.2d 393 \(5th Cir. 1976\)*](#) (purchase of condominium conditioned [**19](#) on acceptance of management [**19](#) contract to provide various services states a cause of action under [Section 1](#) of Sherman Act.)

Defendants also claim that plaintiffs have failed to allege that defendants have "sufficient economic power" in the tying product, i.e., the condominium real estate market. Therefore, defendants argue that plaintiffs have failed to state a claim for a *per se* violation of [Section 1](#) of the Sherman Act.

The Court finds defendants' argument unpersuasive. A fair reading of plaintiffs' amended complaint reveals that plaintiffs have alleged that defendants maintained such an economic position so as to have "the power to exact extraordinary nonprice concessions from the purchasers over and above the premium price." Amended Complaint, Count I para. 7A. Since on a motion to dismiss the Court must construe allegations in the plaintiffs' complaint as being true, the Court concludes that plaintiffs have set forth the necessary allegations to maintain an action for a *per se* violation of [Section 1](#) of the Sherman Act.

The defendants' request that the Court take judicial notice that the Chicago condominium market was "hot" in the 1970's, so that defendants cannot be said to have had "sufficient [**20](#) economic power," is disregarded. This is a matter for proof, not pleading. Cf. [*Levinson v. Maison Grande, supra*](#) (jury finds defendants did not have sufficient economic power in market).

2. RULE OF REASON

Even if unsuccessful in demonstrating all of the essential elements of a tying arrangement, plaintiffs may nevertheless prevail by showing that defendants' conduct unreasonably restrains competition. See [Fortner Enterprises, Inc. v. United States Steel Corp.](#), 394 U.S. 495, 500, 22 L. Ed. 2d 495, 89 S. Ct. 1252 (1969). In the instant action, the amended complaint is replete with allegations with respect to the ways in which defendants' conduct allegedly restrained competition. Thus even if plaintiffs are unsuccessful in establishing a claim for a *per se* violation of [Section 1](#), the amended complaint nonetheless sets forth a cause of action under the federal antitrust laws.

ILLINOIS CONDOMINIUM PROPERTY ACT

Counts VI and XIV of the amended complaint allege violations of the Illinois Condominium Property Act, Ill. Rev. Stat. ch. 30 § 318.2, due to defendants' continued control over the Homeowners Association. Defendants move to dismiss these counts on the ground that [**21](#) the Homeowners Association is not subject to the Illinois Condominium Property Act.

The Court finds that Counts VI and XIV state claims upon which relief may be granted. Section 318.2 provides, in pertinent part, that the election of the board of directors of an association of condominium unit owners shall be held no later than sixty days after seventy-five percent of the units have been sold or three years after recording of the Declaration, whichever is earlier. The Declaration was recorded approximately ten years ago and no such election has taken place. The plaintiffs have alleged that the defendants adopted provisions of the Blanket Declaration and By-laws which violate the express terms of § 318.2, and that it is defendants who have refused to abide by the requirements of § 318.2. Defendants' position (obscure at best) is unsupported by case law. The Court cannot say that defendants have shown that plaintiffs cannot recover under § 318.2 as a matter of law. The motion to dismiss Counts VI and XIV is denied.

UNCONSCIONABILITY OF THE DECLARATION AND BY-LAWS

Similarly, the Court denies defendants' motion to dismiss Count V of the amended complaint, alleging the invalidity [**22](#) of certain provisions of the Declaration and By-laws. [HN17](#) The term "unconscionability" is used to describe a contract that is "improvident, totally one-sided or oppressive." [Neal v. Lacob](#), 31 Ill.App.3d 137, 334 N.E.2d 435, 439 (1st Dist. 1975). This cannot be decided on a motion to dismiss. The Court finds [*462](#) that Count V sets forth sufficient allegations to state a claim for unconscionability, and the motion to dismiss is denied.

CONCLUSION ON DEFENDANTS' MOTION TO DISMISS

Since the defendants' motion to dismiss the federal cause of action is denied, the Court has subject matter jurisdiction to hear the federal claim. By virtue of the doctrine of pendent jurisdiction, the Court will assert (at this juncture) jurisdiction over the remaining state law causes of action brought by the plaintiffs. [United Mine Workers v. Gibbs](#), 383 U.S. 715, 16 L. Ed. 2d 218, 86 S. Ct. 1130 (1966).

PETITION TO INTERVENE

Six individuals who were residents and owners of units in the Development have sought leave to intervene in this action, pursuant to [Fed. R. Civ. P. 24\(a\)](#), as party plaintiffs. They have attached a copy of their proposed complaint. This complaint sets forth the same [**23](#) basic facts and legal theories of the plaintiff Associations' amended complaint. In addition, the potential intervenors seek leave to represent a class of all persons who owned units in the Development during the period between May 18, 1978, and May 18, 1982. They allege that the class consists of more than 600 unit owners.

The defendants oppose the petition to intervene and present a curious argument. They say that the intervenors need not appear here because their interests are adequately represented by the plaintiff Associations. Yet in their motion to dismiss, they have argued that the Associations lack standing to bring the amended complaint, because "any rights of recovery lie with the individual unit owners, not with plaintiff Condominium Associations . . ." (Defendants' Motion to Dismiss, at 1-2). The inconsistency of the defendants' positions is apparent.

In any case, for the reasons stated above the plaintiff Associations lack standing under the antitrust laws to sue for money damages. However, the individuals themselves are not so disabled. They can fill the gap left open by the Court's ruling on defendants' motion to dismiss Counts I and III. Further, they meet **[**24]** the criteria set forth in Fed. R. Civ. P. 24(a), for intervention as of right. The petition to intervene is granted, and the intervening plaintiffs are granted leave to file their complaint. Of course, the Court has not yet ruled upon whether the intervening plaintiffs may represent a class.

IT IS THEREFORE ORDERED that

- (1) Defendants' motion to dismiss is granted as to Counts I and III of the amended complaint, and is denied in all other respects.
- (2) The petition to intervene is granted, and the intervening plaintiffs are granted leave to file their complaint.
- (3) Defendants are to answer the plaintiffs' amended complaint and the intervening plaintiffs' complaint within 21 days.
- (4) A status hearing is set for September 16, 1983, at 9:45 a.m. Parties are to present a proposed discovery schedule at that time, specifying dates for the exchange of documents, the propounding of interrogatories, and the taking of depositions.

Section 4 of the Clayton Act, 15 U.S.C.S. § 15, identifies in sweeping language those "persons" entitled to initiate an antitrust action. Any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue and shall recover threefold the damages by him sustained.

Antitrust & Trade Law > Clayton Act > General Overview

HN3 **Private Actions, Standing**

Although on its face, § 4 of the Clayton Act, [15 U.S.C.S. § 15](#), contains little in the way of restrictive language, and consistent with congressional intent, the federal forum must guard against engrafting artificial limitations on the § 4 remedy, application of § 4 has of necessity been judicially confined to limit the remedy available thereunder to particular classes of persons and for redress of particular forms of injury.

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

Antitrust & Trade Law > Regulated Practices > Private Actions > Prioritizing Resources & Organization for Intellectual Property Act

HN4 **Private Actions, Standing**

Judicial limitation of the remedy under § 4 of the Clayton Act, [15 U.S.C.S. § 15](#), to those persons and injuries within the core of congressional concern, while simultaneously guarding against the imposition of "artificial limitations" of the facially unrestrictive § 4 remedy, has proven to be less than an empirical judicial science. In an attempt to relieve this dichotomy, the circuit courts have embraced various analytical doctrines including the "direct injury" test and "target area" test. Under the target area test the injured party must be the "target" of the anticompetitive practice before he may sue.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

HN5 **Remedies, Damages**

The court has committed itself to the principles that in order to have "standing" to sue for treble damages under § 4 of the Clayton Act, [15 U.S.C.S. § 15](#), a person must be within the "target area" of the alleged antitrust conspiracy, i.e., a person against whom the conspiracy was aimed, such as a competitor of the persons sued. Accordingly, courts have drawn a line excluding those who have suffered economic damage by virtue of their relationships with "targets" or with participants in an alleged antitrust conspiracy, rather than being "targets" themselves. Excluded as targets are those who have suffered economic damage by virtue of their relationships with "targets." A "target" is

715 F.2d 1079, *1079 (1983 U.S. App. LEXIS 24590, **1

defined as a person or business against which competitive aim is taken. The line is clearly drawn by requiring that to have standing one must be an object of an antitrust conspiracy.

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

[**HN6**](#) [down] Antitrust & Trade Law, Clayton Act

The "target area" test arose as a means of limiting the class of potential treble-damage plaintiffs to those persons who could most adequately vindicate the purposes of the antitrust laws. To attain standing a person whether a corporation or individual must be one against whom the conspiracy is aimed. The complainant must show that he is within that sector of the economy which is endangered by a breakdown of competitive conditions in a particular industry.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

[**HN7**](#) [down] Clayton Act, Claims

Under the "direct injury" test the injury of the plaintiff alleging violations of § 4 of the Clayton Act, [15 U.S.C.S. § 15](#), must not be too remote from the alleged antitrust violation. The concept of "direct injury" focuses on the relationship between the plaintiff and the defendant. If the alleged injury is "remote," such as that of a stockholder or creditor of a corporation injured by the defendant, standing is denied. The direct injury test, accordingly, injects into the § 4 inquiry concepts of "relationship" very analogous to those of foreseeability developed in doctrines of common law negligence.

[**HN8**](#) [down] Antitrust & Trade Law, Clayton Act

715 F.2d 1079, *1079 (1983 U.S. App. LEXIS 24590, **1

A less restrictive test of "standing" is that the "person" pleading (1) injury in fact and (2) an interest arguably within the zone of interests to be protected or regulated by § 4 of the Clayton Act, [15 U.S.C.S. § 15](#) possess "standing" to initiate an antitrust action.

[HN9](#) [down] Justiciability, Standing

Generalizations about standing to sue are largely worthless as such. One generalization is, however, necessary and that is that the question of standing in the federal courts is to be considered in the framework of U.S. Const. art. III which restricts judicial power to "cases" and "controversies." In terms of Article III limitations on federal court jurisdiction, the question of standing is related only to whether the dispute sought to be adjudicated will be presented in an adversary context and in a form historically viewed as capable of judicial resolution. The doctrine of standing poses the question whether a particular person is a proper party to litigate a given issue. Undoubtedly, the principal function of the doctrine is as a device to eliminate those plaintiffs who are jurisdictionally barred by Article III from maintaining a suit.

[HN10](#) [down] Clayton Act, Claims

As a prerequisite to "standing" under § 4 of the Clayton Act, [15 U.S.C.S. § 15](#), plaintiffs must prove an antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of the anticompetitive acts made possible by the violation. It should, in short, be the type of loss that the claimed violations would be likely to cause.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

[**HN11**](#) [down] **Clayton Act, Claims**

In order to establish standing in an antitrust action, the circuit continues to require (1) that the plaintiff allege injury in fact and (2) that the interest which the plaintiff seeks to protect is arguably within the zone of interests protected by the statute in question. Added to that standard is the requirement that the plaintiff allege antitrust injury when seeking treble damages under § 4 of the Clayton Act, [15 U.S.C.S. § 15](#). Unlike the "direct injury" and "target area" tests, an element of proximate cause is not injected into the standing inquiry; rather, it compels the court to focus on the type of injury pleaded and its relationship to the alleged anticompetitive conduct.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

Antitrust & Trade Law > Regulated Practices > Private Actions > Prioritizing Resources & Organization for Intellectual Property Act

[**HN12**](#) [down] **Private Actions, Standing**

Two areas of sub-analysis are employed by the court to identify those injuries characterized as "too remote." The court looks (1) to the physical and economic nexus between the alleged violation and the harm to the plaintiff, and (2) more particularly, to the relationship of the injury alleged with those forms of injury about which congress was likely to have been concerned in making defendant's conduct unlawful and in providing a private remedy under § 4 of the Clayton Act, [15 U.S.C.S. § 15](#).

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Torts > ... > Elements > Causation > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

[**HN13**](#) [down] **Private Actions, Standing**

In its most recent antitrust "standing" decision, the supreme court has removed all doubt as to the relevant inquiries to be implemented by federal courts confronting the perimeters of § 4 of the Clayton Act, [15 U.S.C.S. § 15](#). Examination of the legislative history of § 4 has prompted the Supreme Court to conclude that congress simply assumed that the antitrust damages litigation would be subject to constraints comparable to well-accepted common-law rules applied in comparable litigation. The judicially-created doctrines which circumscribed the availability of damages at the time of promulgation of § 4 include concepts of foreseeability, proximate cause, directness of injury, certainty of damages, and privity of contract. The issue of whether a § 4 plaintiff may recover for the injury it allegedly suffered requires the federal court, as mandated in common-law damages litigation evolving from the 1890s, to evaluate the plaintiff's harm, the alleged wrongdoing by the defendants, and the relationship between them.

HN14 [+] **Clayton Act, Claims**

The inquiry under § 4 of the Clayton Act, [15 U.S.C.S. § 15](#), is distinct from the constitutional "standing" inquiry. The label "antitrust standing" has traditionally been applied to some of the elements of this inquiry. As commentators have observed, the focus of the doctrine of "antitrust standing" is somewhat different from that of standing as a constitutional doctrine. Harm to the antitrust plaintiff is sufficient to satisfy the constitutional standing requirement of injury in fact, but the court must make a further determination whether the plaintiff is a proper party to bring a private antitrust action.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN15 [+] **Private Actions, Standing**

In an obvious attempt to implement uniformity among the circuits in the area of antitrust "standing," and discourage use of analytical "tests" which may impermissibly restrict inquiry under § 4 of the Clayton Act, [15 U.S.C.S. § 15](#), the Supreme Court has forewarned that labels such as directness of the injury, target area, and zone of interests may lead to contradictory and inconsistent results and has proclaimed that courts should analyze each situation in light of certain factors. The "factors" include: (1) the causal connection between the antitrust violation and harm to plaintiff and whether that harm was intended to be caused; (2) the nature of plaintiff's alleged injury including the status of plaintiff as consumer or competitor in the relevant market; (3) the directness or indirectness of the injury, and the related inquiry of whether the damages are speculative; (4) the potential for duplicative recovery or complex apportionment of damages; and (5) the existence of more direct victims of the alleged antitrust violation.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN16 [+] **Private Actions, Standing**

It is virtually impossible to announce a black-letter rule for standing that will dictate the result in every case.

Antitrust & Trade Law > Clayton Act > Claims

HN17 [blue icon] **Clayton Act, Claims**

A significant element of the "standing" inquiry under § 4 of the Clayton Act, [15 U.S.C.S. § 15](#), is the nature of the plaintiff's alleged injury either as a "customer" or "participant" in the "relevant market." It is appropriate to focus on the nature of the plaintiff's alleged injury.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN18 [blue icon] **Private Actions, Standing**

An injury "inextricably intertwined" with the injury sought to be inflicted upon the relevant market or participants therein may fall "within the area of congressional concern" so as to satisfy the inquiry under § 4 of the Clayton Act, [15 U.S.C.S. § 15](#).

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN19 [blue icon] **Clayton Act, Claims**

The "existence of more direct victims" of the alleged antitrust violation is another related area of inquiry in evaluating "standing" under § 4 of the Clayton Act, [15 U.S.C.S. § 15](#). More direct victims may justify denial of a § 4 remedy to those only tangentially injured since such is not likely to leave a significant antitrust violation undetected or unremedied.

Antitrust & Trade Law > Clayton Act > Remedies > Damages

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN20 [blue icon] **Remedies, Damages**

Yet another relationship to be considered in the "standing" inquiry under § 4 of the Clayton Act, [15 U.S.C.S. § 15](#), is the directness or indirectness of the asserted injury. Particularly, indirect injuries may render damages highly speculative or create situations of complexity that would foreclose an equitable determination and apportionment of damages.

Opinion by: KRUPANSKY

Opinion

[*1080] KRUPANSKY, Circuit Judge.

This action joins inquiry into the evolving doctrine of antitrust "standing" under Section 4 of the Clayton Act, [15 U.S.C. § 15](#). Plaintiff Southaven Land Company, Inc. (Southaven) initiated the instant cause of action against Malone & Hyde, Inc. (Malone) seeking injunctive and monetary relief for injuries allegedly resulting from Malone's violation of [Section 2](#) of the Sherman Act, [15 U.S.C. § 2](#). Southaven appealed from the judgment of the United States District Court for the Western District of Tennessee granting Malone's motion to dismiss, [Rule 12\(b\), Fed. R. Civ. P.](#), adjudging that Southaven lacked "standing" to initiate an antitrust action.

HN1 [**2] The allegations of the complaint must be accepted as true for purposes of [Rule 12\(b\)\(6\)](#) analysis. Briefly summarized the complaint asserts Southaven is an owner-lessor of retail commercial space in the geographic area of Southaven, Mississippi. Malone is engaged in the wholesale and retail sale of food, drugs and sundries in a multistate area including the geographical area of Southaven, Mississippi. On or about May 15, 1974, Malone assumed a lease to premises owned by Southaven, which incorporated a covenant restricting the use of the premises to the operation of a retail grocery business. Subsequent to its assumption of the lease, Malone executed a series of subleases with successive third parties to operate grocery stores at the Southaven location in accordance with the above defined restrictive covenant. The last of these successive subtenants, Southaven Food Center, Inc. (SFC), filed a petition in bankruptcy. Malone has not subleased the premises since SFC's business demise.

During 1974, and thereafter, Malone also owned and operated other retail grocery outlets in the Southaven geographical area and, it is alleged, intentionally sought to destroy competition, monopolize and control [***3] the food supply in that area, and had undertaken to cut prices and otherwise destroy and foreclose the operation of a successful grocery store at Southaven's commercial property.

Subsequent to the bankruptcy of SFC, Malone's last subtenant, Southaven initiated negotiations with Malone seeking a cancellation of Malone's lease to enable Southaven to replace Malone with a viable grocery operator in the premises. Pursuant to the negotiations whereby Southaven sought to regain control of the property, an agreement ¹ was derived providing for the cancellation of the Malone lease and delivery of the premises and equipment to Southaven whereupon Malone would be released from [*1081] its obligations at the site. In reliance upon said agreement, Southaven secured a viable tenant to operate a grocery store at the shopping center site.

Upon learning that Southaven [***4] was prepared to immediately implement the operation of a grocery store at its commercial location, Malone refused to execute the mutual cancellation agreement with the calculated purpose to further its monopoly and eliminate competition. Malone, with intent to destroy the site as a present and future location for the operation of a retail grocery outlet, removed its equipment from the premises thereby rendering them unfit as a retail grocery outlet.

¹ It appears that this agreement was never reduced to writing. See: Complaint, Exhibit B (Mutual Cancellation Agreement executed only by Southaven.)

Accordingly, Southaven's injury is charged to have accrued as a result of its contract negotiations with the alleged antitrust violator. The complaint noticeably fails to aver that Southaven sustained any injury as a competitor, purchaser, consumer or other economic actor in the grocery industry. The district court, styling the issue as "whether a 'non-operating' lessor of premises has standing to complain about conduct purportedly aimed at monopolizing a market in which the lessor's tenants compete", adjudged that Southaven lacked "standing" under § 4 of the Clayton Act. This appeal ensued.

HN2 [↑] Section 4 of the Clayton Act, [15 U.S.C. § 15](#), [**5] identifies in sweeping language those "persons" entitled to initiate an antitrust action:

Any person who shall be injured in his business or property by reason of *anything* forbidden in the antitrust laws may sue . . . and shall recover threefold the damages by him sustained . . . (emphasis added)

HN3 [↑] Although "on its face, § 4 contains little in the way of restrictive language", [Blue Shield of Virginia v. McCready, 457 U.S. 465, 102 S. Ct. 2540, 2545, 73 L. Ed. 2d 149 \(1982\)](#), [Reiter v. Sonotone Corp., 442 U.S. 330, 337, 99 S. Ct. 2326, 2330, 60 L. Ed. 2d 931 \(1979\)](#), and, consistent with congressional intent, the federal forum must guard against "engraft[ing] artificial limitations on the § 4 remedy", [McCready, supra, 102 S. Ct. at 2545](#), application of § 4 has of necessity been judicially confined to limit the remedy available thereunder to particular classes of persons and for redress of particular forms of injury. See also: [Associated General Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. 519, 103 S. Ct. 897, 74 L. Ed. 2d 723 \(1983\)](#). [**6]

HN4 [↑] Judicial limitation of the § 4 remedy to those persons and injuries within the core of congressional concern, while simultaneously guarding against the imposition of "artificial limitations" of the facially unrestrictive § 4 remedy, has proven to be less than an empirical judicial science. In an attempt to relieve this dichotomy, the circuit courts have embraced various analytical doctrines including the "direct injury" test and "target area" test. Under the target area test the injured party "must be the 'target' of the anti-competitive practice before he may sue." [Pan-Islamic Trade Corp. v. Exxon Corp., 632 F.2d 539, 546 \(5th Cir. 1980\)](#). The oft-cited decision of [Calderone Enterprises Corp. v. United Artists Theatre Circuit, 454 F.2d 1292 \(2d Cir. 1971\)](#) provides the following rule:

HN5 [↑] This court has committed itself to the principles that in order to have "standing" to sue for treble damages under § 4 of the Clayton Act, a person must be within the "target" [**7] area" of the alleged antitrust conspiracy, i.e., a person against whom the conspiracy was aimed, such as a competitor of the persons sued. Accordingly, we have drawn a line excluding those who have suffered economic damage by virtue of their relationships with "targets" or with participants in an alleged antitrust conspiracy, rather than being "targets" themselves.

Id. at 1295 (emphasis added). ² *Calderone*, therefore, excludes as targets those "who have suffered economic damage by virtue of their relationships with 'targets' ". *Id. at 1295*.

[*1082] The Fifth Circuit, referencing a "target area" test, has also framed the pertinent inquiry in terms of sector of the economy:

² *Calderone* defined a "target" as

a person or business against which competitive aim is taken. The line is clearly drawn by requiring that to have standing one must be an object of an antitrust conspiracy.

Id. at 1296, note 2.

[**8]

HN6 [↑] The "target area" test arose as a means of limiting the class of potential treble-damage plaintiffs to those persons who could most adequately vindicate the purposes of the anti-trust laws. To attain standing a person (whether a corporation or individual) must be one against whom the conspiracy is aimed. Or, put in plutonomic terms, the complainant must show that he is *within that sector of the economy which is endangered by a breakdown of competitive conditions* in a particular industry. (emphasis added)

Jeffrey v. Southwestern Bell, 518 F.2d 1129, 1131 (5th Cir. 1975). Accord: In re Multidistrict Vehicle Air Pollution M.D.L. No. 31, 481 F.2d 122, 129 (9th Cir. 1973), cert. denied sub nom. Morgan v. Automobile Manufacturing Association, 414 U.S. 1045, 94 S. Ct. 551, 38 L. Ed. 2d 336 (1973) (compilation of cases referring to "direct injury" and "target area" tests). See also: In re Industrial Gas Antitrust Litigation, 681 F.2d 514 (7th Cir. 1982); Reading Industries, Inc. v. Kennecott Copper Corp., 631 F.2d 10, 12 (2d Cir. 1980); [**9] Long Island Lighting Co. v. Standard Oil Co. of Calif., 521 F.2d 1269, 1274 (2d Cir. 1975), cert. denied, 423 U.S. 1073, 96 S. Ct. 855, 47 L. Ed. 2d 83 (1976); In re Municipal Bond Reporting Antitrust Litigation, 672 F.2d 436 (5th Cir. 1982); Engine Specialties Inc. v. Bombardier, Ltd., 605 F.2d 1, 18-19 (1st Cir. 1979); Schwimmer v. Sony Corp. of America, 637 F.2d 41, 46 (2d Cir. 1980); Ostrofe v. H.S. Crocker Co., Inc., 670 F.2d 1378 (9th Cir. 1982).

HN7 [↑] Under the "direct injury" test the injury of the § 4 plaintiff must not be too remote from the alleged antitrust violation:

The concept of "direct injury," derived from Loeb v. Eastman Kodak, 183 F. 704 (3rd Cir. 1910), focuses on the relationship between the plaintiff and the defendant. If the alleged injury is "remote," such as that of a stockholder or creditor of a corporation injured by the defendant, standing is denied. Loeb, supra; Gerli v. Silk Association of America, 36 F.2d 959, 960 (S.D. N.Y. 1919). [**10]

Chrysler Corporation v. Fedders Corporation, 643 F.2d 1229, 1233 (6th Cir. 1981). The direct injury test, accordingly, injects into the § 4 inquiry concepts of "relationship" very analogous to those of foreseeability developed in doctrines of common law negligence.

This Circuit has on two occasions expressly rejected the "direct injury" and "target area" tests as limiting the § 4 remedy. See: Malamud v. Sinclair Oil Corp., 521 F.2d 1142 (6th Cir. 1975); Chrysler Corp. supra. In Malamud it was concluded that both tests "demand[ed] too much from plaintiffs at the pleading stage of a case", 521 F.2d at 1149, and further "enabled [the court] to make a determination on the merits of a claim under the guise of assessing the standing of the claimant." Id. at 1150 (original emphasis). **HN8** [↑] The less restrictive test of "standing" as pronounced in Association of Data Processing Service Organizations, Inc. v. Camp, 397 U.S. 150, 90 S. Ct. 827, 25 L. Ed. 2d 184 (1970) was adopted in [**11] Malamud. Thereunder, the § 4 "person" pleading (1) injury in fact and (2) an interest arguably within the zone of interests to be protected or regulated by the statute in question possessed "standing" to initiate an antitrust action. Since the *Data Processing* zone of interests test was derivative of Article III of the United States Constitution, *Malamud* effectively engrafted a constitutional definition of standing into antitrust law.³

³The Supreme Court prefaced its discussion in *Data Processing* with the following observation:

HN9 [↑] Generalizations about standing to sue are largely worthless as such. One generalization is, however, necessary and that is that the question of standing in the federal courts is to be considered in the framework of Article III which restricts judicial power to "cases" and "controversies". As we recently stated in Flast v. Cohen, 392 U.S. 83, 101, 88 S. Ct. 1942, 1953, 20 L. Ed. 2d 947 "In terms of Article III limitations on federal court jurisdiction, the question of standing is related only to whether the dispute sought to be adjudicated will be presented in an adversary context and in a form historically viewed as capable of judicial resolution."

397 U.S. at 151-52, 90 S. Ct. at 829. *Malamud* reflected:

[**12] [*1083] Subsequent to *Malamud* the Supreme Court issued [*Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 97 S. Ct. 690, 50 L. Ed. 2d 701 \(1977\)*](#), establishing therein the requirement of "antitrust injury" [HN10](#)
[] as a prerequisite to § 4 "standing":

Plaintiffs must prove an *antitrust* injury, which is to say injury of the type the anti-trust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. The injury should reflect the anti-competitive effect either of the violation or of the anti-competitive acts made possible by the violation. It should, in short, be "the type of loss that the claimed violations . . . would be likely to cause." *Zenith Radio Corp. v. Hazeltine Research*, 395 U.S. [100] at 125, 89 S. Ct. [1562] at 1577.

[429 U.S. at 489, 97 S. Ct. at 697-98](#) (original emphasis; footnote omitted). In [*Chrysler Corp., supra*](#), this Circuit adjudged that *Brunswick* did not vitiate the *Malamud* test of § 4 "standing" but, rather, *added* an "antitrust" [\[*13\]](#) injury" requirement:

[HN11](#)[] In order to establish standing in an antitrust action, this circuit continues to require (1) that the plaintiff allege injury in fact and (2) that the interest which the plaintiff seeks to protect is arguably within the zone of interests protected by the statute in question. *Brunswick* adds to that standard the requirement that the plaintiff allege *antitrust* injury when seeking treble damages under § 4 of the Clayton Act. Unlike the "direct injury" and "target area" tests, *Brunswick* does not inject an element of proximate cause into the standing inquiry; rather, it compels the court to focus on the *type* of injury pleaded and its relationship to the alleged anti-competitive conduct.

[*Chrysler Corp., supra, 643 F.2d at 1235*](#). The "target area" test was again expressly rejected as overburdening the plaintiff at the pleading stage and impermissibly authorizing a court to issue a determination on the merits of a claim under the guise of assessing standing, [*Chrysler Corp., supra, 643 F.2d at 1233*](#), and, additionally, [\[*14\]](#) "inject[ing] an element of proximate cause into the standing inquiry." [*Id. at 1235*](#).

Re-examination of this Circuit's § 4 "standing" doctrine as enunciated in *Malamud* and *Chrysler Corp.* is mandated by the Supreme Court's recent decisions in *Blue Shield of Virginia v. McCready*, 457 U.S. 465, 102 S. Ct. 2540, 73 L. Ed. 2d 149 (1982) and [*Associated General Contractors of California, Inc. v. California State Council of Carpenters*, 459 U.S. 519, 103 S. Ct. 897, 74 L. Ed. 2d 723 \(1983\)](#). In *McCready* plaintiff Carol McCready (McCready) subscribed to a group health plan which had been purchased by her employer, Prince William County, Virginia, from defendant Blue Shield of Virginia (Blue Shield). The Blue Shield health plan authorized reimbursement to subscribers for psychotherapy services provided by psychiatrists but did not provide similar reimbursement for services rendered by psychologists unless the treatment was supervised by and billed through a physician. McCready engaged the services of a psychologist and was subsequently denied reimbursement by Blue Shield in accordance with the plan's provisions. McCready [\[*15\]](#) thereupon initiated a class action alleging that Blue Shield and the Neuropsychiatric Society of Virginia, Inc. had conspired in violation of [§ 1](#) of the Sherman Act, [15 U.S.C. § 1](#), to exclude and boycott clinical psychologists from receiving compensation under Blue Shield group health plans. The Fourth Circuit, applying the target area doctrine, adjudged that McCready's loss was not "too remote" or indirect to be covered by the Act. [649 F.2d 228 \(4th Cir. 1981\)](#). Affirming, the Supreme Court majority in *McCready* concluded that deference to statutory policy had prompted acknowledgement of two categories of judicial confinement of the § 4 remedy: (1) cases presenting a risk of duplicative recovery and (2) cases wherein the persons "sustained injuries too remote [from an antitrust violation] to give them standing to sue" [\[*1084\]](#) for damages under § 4". [102 S. Ct. at 2547](#), citing [*Illinois Brick Co. v. Illinois*, 431 U.S. 720, 728 n.7, 52 L. Ed. 2d 707, 97 S. Ct. 2061 \(1977\)](#). [HN12](#)[] Two areas of sub-analysis were employed [\[*16\]](#) by the Court to identify those injuries characterized as "too remote":

The doctrine of standing poses the question whether a particular person is a proper party to litigate a given issue. Undoubtedly, the principal function of the doctrine is as a device to eliminate those plaintiffs who are jurisdictionally barred by Article III from maintaining a suit.

We look (1) to the physical and economic nexus between the alleged violation and the harm to the plaintiff, and (2) more particularly, to the relationship of the injury alleged with those forms of injury about which Congress was likely to have been concerned in making defendant's conduct unlawful and in providing a private remedy under § 4.

102 S. Ct. at 2548.

Applying the first area of sub-analysis for identifying an injury as "too remote", to-wit, the physical and economic nexus between the alleged violation and the harm to the plaintiff, the Court concluded that McCready's injury was not too remote since, as a recipient of psychotherapy services, she was "within that area of the economy . . . endangered by [that] breakdown of competitive conditions' resulting from Blue Shield's selective refusal to reimburse." 102 S. Ct. at 2549, citing Multidistrict Vehicle Air Pollution M.D.L. No. 31, 481 F.2d 122, 129 (9th Cir. 1973).⁴ Applying the second area of sub-analysis for identifying an injury as "too remote", namely, the relationship of the injury **17 alleged with those forms of injury which Congress was likely to have been concerned, the Court adjudged that her injury was "inextricably intertwined with the injury the conspirators sought to inflict on psychologists and the psychotherapy market", 102 S. Ct. at 2551, and therefor "squarely within the area of congressional concern." *Id.* Accordingly, McCready injects into the § 4 inquiry elements of proximity and directness which were deemed impermissible by this Court in *Chrysler Corporation*.⁵ The "constitutional" concept of standing, as espoused in *Data Processing* and adopted in *Malamud*, was not acknowledged in *McCready* as pertinent to the § 4 inquiry.

**18 HN13[] In its most recent antitrust "standing" decision, Associated General Contractors, supra, the Supreme Court removed all doubt as to the relevant inquiries to be implemented by federal courts confronting the perimeters of § 4. Examination of the legislative history of § 4 prompted the Supreme Court to conclude that "Congress simply assumed that the antitrust damages litigation would be subject to constraints comparable to well-accepted common-law rules applied in comparable litigation". 459 U.S. at 533, 103 S. Ct. at 906. The judicially created doctrines which circumscribed the availability of damages at the time of promulgation of § 4 included concepts of foreseeability, proximate cause, directness of injury, certainty of damages and privity of contract. 459 U.S. at 532-33, 103 S. Ct. at 905-06. The issue of whether a § 4 plaintiff "may recover for the injury it allegedly suffered" requires the federal court, as mandated in common-law damages litigation evolving from the 1890s, to "evaluate the plaintiff's harm, the alleged wrongdoing by the defendants, **19 and the relationship between them." 459 U.S. at 535, 103 S. Ct. at 907. HN14[] The § 4 inquiry is distinct from the constitutional "standing" inquiry:

The label "antitrust standing" has traditionally been applied to some of the elements of this inquiry. As commentators have observed, the focus of the doctrine of "antitrust standing" is somewhat different from that of standing as a constitutional doctrine. Harm to the antitrust plaintiff is sufficient to satisfy the constitutional **1085 standing requirement of injury in fact, but the court must make a *further* determination whether the plaintiff is a proper party to bring a private antitrust action.

459 U.S. at 535, note 31, S. Ct. at 907, note 31 (emphasis added). HN15[] Significantly, in an obvious attempt to implement uniformity among the circuits in the area of antitrust "standing", and discourage use of analytical "tests" which may impermissibly restrict the § 4 inquiry,⁶ **21 the Supreme Court forewarned **20 that labels such as

⁴ The language of *Multidistrict Vehicle Air Pollution*, cited with approval by the Supreme Court, was twice rejected by this Circuit. See Chrysler Corp., supra, 643 F.2d at 1233; Malamud, supra, 521 F.2d at 1149.

⁵ The inquiry of whether an injury is "too remote" from an antitrust violation was analogized to an inquiry of proximate cause: In the absence of direct guidance from Congress, and faced with the claim that a particular injury is too remote from the alleged violation to warrant § 4 standing, the courts are thus forced to resort to an analysis no less elusive than that employed traditionally by courts at common law with respect to the matter of "proximate cause".

directness of the injury, target area and zone of interests "may lead to contradictory and inconsistent results", and proclaimed that "in our view, courts should analyze each situation in light of the factors set forth in the text *infra*." [459 U.S. at 537, 103 S. Ct. at 908](#), note 33.⁷ The "factors" expressly identified as such in the text include, *inter alia*, (1) the causal connection between the antitrust violation and harm to the plaintiff and whether that harm was intended to be caused; (2) the nature of the plaintiff's alleged injury including the status of the plaintiff as consumer or competitor in the relevant market; (3) the directness or indirectness of the injury, and the related inquiry of whether the damages are speculative; (4) the potential for duplicative recovery or complex apportionment of damages; and (5) the existence of more direct victims of the alleged antitrust violation. [103 S. Ct. at 908-13](#).

[**22] *McCready and Associated General Contractors* exemplify that innumerable elements, including proximity and directness, constitute proper areas of inquiry in identifying a "person" injured by reason of a violation of the antitrust laws within the meaning of § 4. Examination of these factors facilitates identification of "who is entitled to prosecute an action under § 4".⁸ [**23] *Associated General Contractors, supra*. [459 U.S. at 545](#), note 51, [103 S. Ct. at 912](#), note 51. These two most recent pronouncements by the Supreme Court encompass a divergent analysis from that articulated by this Circuit in *Malamud* and *Chrysler Corporation*. Accordingly, this Court acknowledges [*1086] the Supreme Court's concern that the various tests used by the Circuits, including this Circuit's zone of interests test, may result in inconsistent adjudications, and accordingly shall henceforth implement the Supreme Court's directive to consider the § 4 inquiry on a case by case basis by applying the criteria mandated by *Associated General Contractors*.⁹

⁶ The Court conceded that "[HN16](#)" it [is] virtually impossible to announce a black-letter rule that will dictate the result in every case". [Id., 459 U.S. at 536, 103 S. Ct. at 908](#).

⁷ Footnote 33 provides in full:

Some courts have focused on the directness of the injury, e.g., [Loeb v. Eastman Kodak Co., 183 F.704, 709 \(CCA3 1910\)](#); [Productive Inventions, Inc. v. Trico Prods. Corp., 224 F.2d 678, 679 \(CA2 1955\)](#), cert. denied, 350 U.S. 936, 76 S. Ct. 301, 100 L. Ed. 818 (1956); [Volasco Products Co. v. Lloyd A. Fry Roofing Co., 308 F.2d 383, 394-395 \(CA6 1962\)](#), cert. denied, 372 U.S. 907, 83 S. Ct. 721, 9 L. Ed. 2d 717 (1963). Others have applied the requirement that the plaintiff must be in the "target area" of the antitrust conspiracy, that is, the area of the economy which is endangered by a breakdown of competitive conditions in a particular industry. E.g., [Pan-Islamic Trade Corp. v. Exxon Corp., 632 F.2d 539, 546-547 \(CA5 1980\)](#); [Engine Specialties, Inc. v. Bombardier Ltd., 605 F.2d 1, 17-18 \(CA1 1979\)](#); [Calderone Enterprises Corp. v. United Artists Theatre Circuit, Inc., 454 F.2d 1292-1295 \(CA2 1971\)](#). Another court of appeals has asked whether the injury is "arguably within the zone of interests protected by the antitrust laws." [Malamud v. Sinclair Oil Corp., 521 F.2d 1142, 1151-1152 \(CA6 1975\)](#). See generally Berger & Bernstein, *supra* n.31.

As a number of commentators have observed, these labels may lead to contradictory and inconsistent results. See Berger & Bernstein, *supra* n.31, at 835, 843; Handler, The Shift From Substantive to Procedural Innovations in Antitrust Suits, 71 Colum.L.Rev. 1, 27-31 (1971); Sherman, Antitrust Standing: From *Loeb* to *Malamud*, 51 N.Y.U.L.Rev. 374, 407 (1976) ("it is simply not possible to fashion an across-the-board and easily applied standing rule which can serve as a tool of decision for every case"). In our view, courts should analyze each situation in light of the factors set forth in the text *infra*.

This directive to the federal forum appears to conclusively resolve the inquiry left open in *McCready* wherein the Court acknowledged that the various aids to analysis implemented by the circuit courts were "possibly conflicting" but refused to "evaluate the relative utility of any of these possibly conflicting approaches toward the problem of remote antitrust injury." [McCready, supra, 457 U.S. at 477-78, 102 S. Ct. at 2547](#), note 12.

⁸ Phrased differently, the antitrust court is to ascertain "whether the law affords a remedy in specific circumstances" or "whether the [plaintiff] may recover for the injury it allegedly suffered". [Associated General Contractors, supra, 459 U.S. at 535](#) and , 103 S. Ct. at 908 and 907.

⁹ The case at bar does not require this Court to confront the issue of whether the factors enunciated in *Associated General Contractors* are exhaustive or merely illustrative.

In the action *sub judice* it is alleged that Malone intentionally monopolized the food market industry in the Southaven, Mississippi geographical area. As previously narrated, when Malone became aware that Southaven had a tenant which was prepared to immediately compete in the relevant grocery market in its leased premises at the Southaven commercial center, it refused to execute a written mutual cancellation agreement to surrender the premises to Southaven. Malone's conduct, it is charged by the complaint, was intended to perpetuate and promote its monopoly of the grocery market.

HN17[] A significant element of the § 4 "standing" inquiry is the nature of the plaintiff's alleged injury either as a "customer" or "participant" in the "relevant market":

In this case it is appropriate to focus on the nature of the plaintiff's [**24] alleged injury. As the legislative history shows, the Sherman Act was enacted to assure *customers* the benefits of price competition, and our prior cases have emphasized the central interest in protecting the economic freedom of *participants* in the *relevant market*.

Associated General Contractors, supra, 459 U.S. 519, 103 S. Ct. at 908-09 (emphasis added). In the case before this Court the "relevant market" has been identified in the complaint as the retail grocery industry in the geographical area of Southaven, Mississippi. The pleading probatively concedes that Southaven is neither a consumer, competitor or participant in that market. Rather, Southaven is a lessor of commercial premises whose grocery outlet lessee's compete in the relevant product market. However, a finding or concession that Southaven is not a direct participant in the relevant market is not dispositive of the § 4 "standing" issue. *McCready* instructs that *HN18*[] an injury "inextricably intertwined" with the injury sought to be inflicted upon the relevant market or participants therein [**25] may fall "within the area of congressional concern" so as to satisfy the § 4 inquiry. In *McCready* it was alleged that Blue Shield and the Neuropsychiatric Society of Virginia, Inc., conspired to restrain competition in the market for psychotherapeutic services by providing insurance coverage only for consumers who patronize psychiatrists rather than psychologists. Through economic incentives, the conspirators were alleged to have channeled "consumers" of psychotherapeutic services, such as *McCready* and her class, to effect an economic boycott of competitors of psychiatrists in the relevant market. This manipulation of a class of consumers of psychotherapeutic services served to "inextricably intertwine[] their injuries with those injuries sought by the conspirators to be inflicted upon participants in the psychotherapy market. In the case at bar Southaven's injury cannot be construed as "inextricably intertwined", within the meaning of *McCready*, with the injury allegedly inflicted by Malone upon the relevant grocery market so as to make Southaven's injury "of a type that Congress sought to redress in providing a private remedy for violations of the antitrust laws." *McCready, supra, 457 U.S. at 483, 102 S. Ct. at 2550,* [**26] referencing *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 697-98, 50 L. Ed. 2d 701 (1977)*. Southaven is not alleged to be a member of a class of "consumers" of grocery products or a class otherwise manipulated or utilized by Malone as a fulcrum, conduit or market force to injure competitors or participants in the relevant product and geographical markets. Although Southaven's injury may be a tangential by-product of Malone's averred monopolistic conduct, such injury is not *inextricably intertwined* to any injury inflicted [*1087] upon the relevant market. Accordingly, Southaven is not a consumer, customer, competitor or participant in the relevant market or otherwise inextricably intertwined with any such entity. Its injury is not sufficiently linked to the pro-competitive policy of the antitrust laws.¹⁰

[**27] *HN19*[]

¹⁰ Specifically, Malone is alleged to have monopolized the grocery industry in violation of *Section 2* of the Sherman Act. Monopoly power is the power to control prices or exclude competition. *U.S. v. E.I. DuPont de Nemours & Co., 351 U.S. 377, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*. Accord: *Borden, Inc. v. Federal Trade Commission, 674 F.2d 498, 507 (6th Cir. 1982); Bataseed, Inc. v. U & I Inc., 681 F.2d 1203, 1231 (9th Cir. 1982); Dimmit Agri Industries, Inc. v. CPC International Inc., 679 F.2d 516, 525 (5th Cir. 1982)*. Logic dictates, therefore, that the primary class of persons protected by *§ 2* are those adversely affected as a result of controlled prices or an exclusion of competition. In the case at bar Southaven has not adduced an injury resulting from either controlled prices of grocery products or exclusion of competitors or participants in the grocery industry.

The "existence of more direct victims" of the alleged antitrust violation is another related area of § 4 inquiry in evaluating "standing". [Associated General Contractors, supra, 459 U.S. at 545, 103 S. Ct. at 913](#). More direct victims may justify denial of a § 4 remedy to those only tangentially injured since such "is not likely to leave a significant antitrust violation undetected or unremedied." [Id., 459 U.S. at 542, 103 S. Ct. at 911](#). That there exists, in the case at bar, more direct victims of Malone's alleged monopoly follows as an inescapable corollary to the foregoing observation that Southaven is neither a consumer or participant in the relevant market. These two categories of potential plaintiffs -- consumers and participants -- are obviously more direct victims. Indeed, Southaven's complaint acknowledges the existence of both classes of injured parties.¹¹

[**28] [HN20](#)

Yet another relationship to be considered in the § 4 "standing" inquiry is " the directness or indirectness of the asserted injury." [Id., 459 U.S. at 540, 103 S. Ct. at 910](#). Particularly, indirect injuries may render damages highly speculative or create situations of complexity that would foreclose an equitable determination and apportionment of damages. Confronting the issue of Southaven's damages, the complaint is notable for what it fails to allege. Southaven has not plead that Malone has breached or failed to perform any condition or covenant in its lease which it assumed on May 15, 1974. Particularly, Southaven has not alleged that Malone has failed to tender rental payments. Nor does the complaint state that Southaven would receive greater rental from its proposed lessee than it would receive from Southaven under the existing lease. In sum, it has not been plead that Malone's alleged breach of contract caused Southaven financial disadvantage. Nevertheless, the complaint prays for "actual damages of \$500,000.00 or such damage as may be established at the trial [**29] and as provided in [15 U.S.C. § 15](#) including treble damages" and punitive damages in an equal amount. It appears that the only allegation in the pleading which serves to identify with any specificity economic injury to Southaven is the following:

Malone . . . has intentionally sought to destroy competition, monopolize and control the food market and food supply in interstate commerce and has undertaken to cut prices and otherwise *destroy the feasibility of a grocery store in Plaintiff's shopping center* and this area of interstate commerce. [Malone's] acts of unfair competition and monopolization have *subverted Plaintiff's business and financial interests* as well as the interests of the consuming public and other food suppliers and retailers. (Paragraph 6, emphasis added).

[*1088] Liberally construed, this allegation may support the inference that Southaven has been injured, as a lessor of retail premises, in its ability to command premium rent from *all* lessees due to an economically unattractive shopping area resulting from lack of a grocery enterprise therein. However, to the extent that Southaven's injury is predicated upon [**30] a diminished consumer interest in and activity at its shopping area as a result of consumer preference for shopping centers with grocery retailers, and a corresponding inability to realize high rents from other lessees, ascertainment of damages to compensate such injury would necessitate wide ranging speculation, particularly since diminished consumer activity at any given shopping area could result from myriad independent reasons unrelated to the alleged antitrust violation.¹² See: [Associated General Contractors, supra, 459 U.S. at 542, 103 S. Ct. at 911](#) ("the [plaintiff's] damages claim is also highly speculative").

¹¹ The complaint states at Paragraph 6:

Defendant's acts of unfair competition and monopolization have subverted Plaintiff's business and financial interests as well as the interests of the consuming public and other food suppliers and retailers.

Similarly, Paragraph 8 provides:

[Malone] desires to destroy the site as a present and future location for the retail sale of groceries and further desires to illegally dominate, control and monopolize the free competition in the area by damaging Plaintiff, the consuming public and other business in the trade area.

¹² Further, should Southaven possess a § 4 remedy against Malone predicated upon diminished lease revenue resulting from less consumer activity at a shopping area without a grocery enterprise, then it follows axiomatically that Southaven's non-grocery lessees would possess a similar cause of action predicated upon diminished sales resulting from less consumer activity. Not only would the potential damage claims of these absent plaintiffs be highly speculative, but apportionment of damages among

[**31] Last, it is observed that Southaven's injury is "remedial under other laws", namely, contract law. [Associated General Contractors, supra, 103 S. Ct. at 911.](#)

In the action *sub judice* Southaven has plead a causal connection between its injury and an antitrust violation; it has also adduced that Malone intended to cause that harm. However, these two factors were also satisfied in *Associated General Contractors* and adjudged insufficient, when compared with other factors, to satisfy the § 4 inquiry. A careful consideration and balancing of the most relevant criteria mandated in *Associated General Contractors* leads this Court to conclude that Southaven is not a proper plaintiff under § 4 of the Clayton Act. The judgment of the district court dismissing the cause of action is therefore AFFIRMED

End of Document

the lessees, and Southaven, would require complex calculations joining, at best, conceptual difficulties. See: [Associated General Contractors, supra, 459 U.S. at 545, 103 S. Ct. at 912](#) ("the District Court would face problems of identifying damages and apportioning them").

HN4 Consumer Protection, Likelihood of Confusion

To obtain equitable relief for Lanham Act violations -- or for "palming off" under the New York law of unfair competition -- plaintiff must demonstrate a likelihood of public confusion. A showing of likely confusion is sufficient, however, for purposes of summary judgment for damages. To obtain summary judgment plaintiff must show by undisputed or indisputable evidence that there was actual confusion.

Counsel: [*1] Alexander R. Sussman, Gregory P. Joseph, Daniel Shapiro, Russell Pearce, of Fried, Frank, Harris, Shriver and Jacobson, New York City, Eric C. Cohen, of Welsh & Katz, Chicago, for the plaintiff.

Daniel King, New York City, for the defendants.

Opinion by: NICKERSON

Opinion

Memorandum and Order

NICKERSON, District Judge:

This action gave rise to an amended memorandum and order dated April 21, 1983, familiarity with which is assumed. Plaintiff has moved for summary judgment against all defendants on the claims for copyright infringement, Lanhan Act violations, and unfair competition. Harold Wexler, Barbara Seneci, and Factory Direct Video, Inc. have moved to dismiss the amended complaint as against them and all defendants have moved for summary judgment on all counts other than copyright infringement. Plaintiff has filed a supplemental motion seeking injunctive relief.

Defendants are companies and officers of companies that sell video games, operate arcades, and arrange for placement of video games in arcades. Pursuant to the court's order in *Bally Midway Mfg. Co. v. Mazzilli*, 82 Cd 2490, on August 24, 1982, plaintiff seized twenty-one video games from defendant arcade Captain [*2] Lightning and the Fireflys.

Defendants do not deny the substantial similarity between the seized games and plaintiffs Pac-Man and Galaxian. Nor do defendants dispute access. The only defense asserted is an affirmative one based on antitrust law. Defendants argue that plaintiff has illegally tied sales of its circuit boards to sales of its cabinets.

Defendants offer little authority for the proposition that the antitrust claim would, if valid, constitute a defense to the claim of copyright infringement. Moreover, the record on the antitrust issues is undeveloped. For example, defendants have not shown any effects on the relevant markets. At least under these circumstances, the court will not treat the antitrust claim as a defense. See *Alfred Bell & Co. v. Catalda Fine Arts*, 191 F.2d 99, 106 (2d Cir. 1951). Defendants may protect their interests by pursuing it as a counterclaim. Thus the only questions on the copyright claim are who is liable and for how much.

Plaintiff contends that individuals who participate in the infringement are jointly and severally liable for it, and that a financially interested corporate officer is liable if he had the ability to supervise [*3] the infringing activity. Barbara Seneci was the vice president and the only other shareholder and director of defendant corporations in addition to Eugene Seneci. While she denies any role in their business, she may be held liable since she had the ability to supervise the infringing activity and a financial stake in it. *Lauratex Textile Corp. v. Allton Knitting Mills, Inc.*, 517 F.Supp. 900, 904 (S.D.N.Y. 1981).

The original deposition testimony of Eugene Seneci showed that Wexler was closely involved in the infringing activities. The corrected deposition provides no evidence that would justify liability on Harold Wexler's part. Moreover, Wexler denies active involvement with defendant corporations prior to April 15, 1982. Neither side, however, has shown whether Wexler participated in infringing acts after that date. Under the circumstances there are issues of fact as to Wexler's liability, and a trial is required on those issues.

Factory Direct Video, Inc. may not be held liable. Wexler's affidavit states that Factory Direct Video was not involved in the infringements which are the subject of this action, and there is nothing to refute this assertion.

In its original [*4] papers, plaintiff requested defendants' profits or, in the alternative, statutory damages for copyright infringement. In its reply and sur-reply papers, however, plaintiff requests only statutory damages. HN1[
↑] This is a valid election of remedies by plaintiff, which may make its choice "at any time before final judgment is rendered." *17 U.S.C. § 504(c)*, see *Oboler v. Goldin*, No. 83-7153, slip op. (2d Cir. August 1, 1983).

The record is sufficiently developed for the court to assess statutory damages at this time. The evidence makes manifest the fact that defendants' acts of copyright infringement were willful and numerous.

Defendants' only argument of good faith rests on Eugene Seneci's statement that defendants "obtained assurances from several manufacturers and distributors that they were legally entitled to sell them, and our sales were made in

reliance on those assurances." Two such "assurances" are attached to Seneci's affidavit. They do not represent that the games are not infringing, although one seems to say that manufacturers had done so in other statements. In any event, although Seneci alleges that defendants relied on the assurances, he does not say that defendants [*5] in fact doubted that the games were infringing. And if his affidavit should be interpreted to make that claim, the court would have had no difficulty under the circumstances in rejecting the claim of good faith as a matter of law.

Trade in infringing games concededly constituted a substantial part of defendants' business. Gaps in their business records and evasive response to discovery requests demonstrate consciousness of wrongdoing. The court sees no reason to award less than the maximum damages for such concerted and deliberate infringement in the course of a commercial enterprise.

Defendants argue that the maximum statutory damages are per action rather than per infringed work, but the statutory text and the committee notes make clear that this is not so. Defendants do not argue that Pac-Man and Ms. Pac-Man are "one work" for purposes of [§ 504\(c\)](#). Accordingly defendants are liable in statutory damages for each of the three infringed works.

Defendants have offered no convincing support for their contention that copyright and trademark protection are in some sense mutually exclusive. Moreover, the contention is rebutted by the saving clause in the Copyright Act, [17 U.S.C. § 301\(d\)](#), and the fact that the interests protected by the two statutes do not coincide. Even if innovation is sufficiently promoted by copyright law, there is reason to protect consumers against false or misleading designations of origin.

The second contention asserted against the Lanham Act claim is that titles cannot be trademarks. Defendants rely on a case denying registration for a book title on such grounds. However that may be, [HN2](#) there is no reason to exclude a title from the reach of section 43(a) of the Lanham Act, [15 U.S.C. § 1125\(a\)](#), if its use would constitute a misleading designation of origin of a false description or representation. See [Orion Pictures Co. v. Dell Publishing Co.](#), 471 F.Supp. 392 (S.D.N.Y. 1979); [National Lampoon, Inc. v. ABC](#), 376 F.Supp. 733 (S.D. N.Y.), aff'd, [497 F.2d 1343 \(2d Cir. 1974\)](#).

Plaintiffs also claim a trademark in the "nonfunctional design features" of the games' characters. This is contested on the ground that those design features are functional. However, even if some core of the characters' qualities is functional -- such as their status as mobile, vulnerable, gobbler characters -- the particular visual realization of [*7] those qualities is not. The details are decorative, nonfunctional, and subject to trademark for the same reasons that applied to the details of the cheerleaders' costumes in [Dallas Cowboys Cheerleaders, Inv. v. Pussycat Cinema, Ltd.](#), 604 F.2d 200 (2d Cir. 1979).

Defendants argue that the graphics must be found functional if there is to be competition. But competitors can market video games using different sorts of characters -- perhaps even ones that move through mazes, gobbling as they go -- as long as the incidental features, such as shapes and coloring are different from Pac-Man. See [Midway Mfg. Co. v. Dirkschneider](#), 543 F.Supp. 466, 484-85 (D. Neb. 1981).

[HN3](#) A claim of false designation of origin or false description or representation under § 43(a) cannot succeed unless secondary meaning is shown, at least where the mark at issue is not arbitrary or fanciful. [Vibrant Sales, Inc. v. New Body Boutique, Inc.](#), 652 F.2d 299, 303-04 & n.3 (2d Cir. 1981), cert. denied, 102 S.Ct. 1257 (1982). The court need not determine whether the marks here were fanciful and arbitrary so as to be protected without proof of secondary meaning, see [Miller Brewing Co. v. Meileman Brewing Co.](#), 561 F.2d 75, 79 (7th Cir. 1977), cert. denied, 434 U.S. 1025 (1978), because there is ample, undisputed evidence to show that the names and characters in the games have acquired a secondary meaning. They have had extensive advertising and promotion as well as unsolicited media exposure. Moreover, they have had tremendous sales success. In addition, defendants consciously copied and exploited the marks in question. The deposition testimony of Eugene Seneci leaves little doubt that this is so. Such exploitation in itself may constitute "significant evidence" of secondary

meaning. See *Harlequin Enterprises Ltd. v. Gulf & Western Corp.*, 644 F.2d 946, 950 (2d Cir. 1981); *RJR Foods, Inc. v. White Rock Corp.*, 603 F.2d 1058 (2d Cir. 1979).

While plaintiff has submitted no surveys or other material showing directly that the public associates the marks with a particular source of video games, the evidence submitted is more than sufficient to justify the inference of secondary meaning. Indeed, defendants present nothing which casts doubt on that inference.[HN4](#)[

To obtain equitable relief for Lanham Act violations -- or for "palming off" under the New York law of unfair competition -- plaintiff [*9] must demonstrate a likelihood of public confusion. *Warner Bros. v. Gay Toys, Inc.*, 658 F.2d 76, 79 (2d Cir. 1981); *Perfect Fit Industries, Inc. v. Acme Quilting Co.*, 618 F.2d 950 (2d Cir. 1980). Plaintiff plainly made a sufficient showing for that purpose.

A showing of likely confusion is sufficient, however, for purposes of summary judgment for damages. To obtain summary judgment plaintiff must show by undisputed or indisputable evidence that there was actual confusion. *Perfect Fit Industries, Inc. v. Acme Quilting Co.*, 618 F.2d 950, 955 (2d Cir. 1980). Defendants contend that their customers were always informed of the differences among the various games. This would not save defendants from liability for contributory infringement. But defendants also say that in most cases non-Midway headboards and cabinets underlined the difference. Viewing the evidence in the light most favorable to the nonmoving party, the court cannot say that there is no issue of fact as to actual confusion.

Defendants' motion for summary judgment on the antidilution claim derives from the premise that the statute, *N.Y. General Business Law § 368-d*, serves to protect only against dilution from dissimilar [*10] or noncompeting products. This in turn is based on an overly literal reading of the court's opinion in *Allied Maintenance Corp. v. Allied Mechanical Trades, Inc.*, 42 N.Y.2d 538, 399 N.Y.S.2d 628, 369 N.E.2d 1162 (1977), and the legislative history it cites.

Both sources refer specifically to dilution by dissimilar products, but there is no reason to take the passages to refer to an exclusive concern of the statute rather than its primary one. Certainly the case does not turn on this question.

The motions of Harold Wexler, Barbara Seneci, and Factory Direct Video, Inc. are treated as ones for summary judgment. The motions of Wexler and Barbara Seneci are denied. The motion of Factory Direct Video, Inc. is granted and the action is dismissed as against it. Plaintiff's supplemented motion for summary judgment is granted to the following extent: (1) The defendants other than Factory Direct Video, Inc. are jointly and severally liable to plaintiff for copyright infringement in the amount of \$150,000.00; (2) those defendants are permanently enjoined from further infringing plaintiff's copyrights in Galaxian, Pac-Man, and Ms. Pac-Man in any manner, from inducing other to infringe [*11] such copyrights, or from contributing to such infringement; and (3) they are permanently enjoined from (a) operating for profit any video game which simulates the nonfunctional design features of Midway's Galaxian, Pac-Man, and Ms. Pac-Man video games, (b) operating for profit any video game under the names Galaxian, Pac-Man, or Ms. Pac-Man, or any names confusedly similar thereto, (c) manufacturing, assembling, importing, selling, offering for sale, or distributing in any manner any video games or components thereof that stimulate the nonfunctional design features of, or bear a trademark or name confusingly similar to a trademark or name of Midway's Galaxian, Pac-Man, or Ms. Pac-Man video games, (d) advertising for any purpose any products whatsoever as Galaxian, Pac-Man, or Ms. Pac-Man or as emanating from, manufactured by, or sponsored by Midway, and (e) competing unfairly with plaintiff in violation of New York law by palming off their products as emanating from Midway so as to cause consumer confusion. In all other respects, plaintiff's supplemented motion for summary judgment is denied. Except as provided above as to Factory Direct Video, Inc., defendants' motion for summary [*12] judgment on Counts II, III, and IV of the amended complaint is denied in all respects. So ordered.

Opinion by: CHAPMAN

Opinion

[*246] CHAPMAN, Circuit Judge:

This matter is before us upon a certification under [28 U.S.C. 1292\(b\)](#). The sole issue is whether section 2(c) of the Robinson-Patman Act, [15 U.S.C. § 13\(c\)](#),¹ proscribes an incentive program in which appellee Metrix Warehouse, Inc. (Metrix) makes payments to parts managers of Mercedes-Benz dealerships based on the number of Metrix products purchased by the parts managers' employers. The district court denied the motion of appellant [*2] Mercedes-Benz of North America (MBNA) for partial summary judgment. The court found that further inquiry was necessary because, instead of having an anticompetitive impact, the Metrix program seemed to have the effect of

¹ [HN1](#) [+] Section 2(c) of the Robinson-Patman Act provides:

It shall be unlawful for any person engaged in commerce, in the course of such commerce, to pay or grant, or to receive or accept, anything of value as a commission, brokerage, or other compensation, or any allowance or discount in lieu thereof, except for services rendered in connection with the sale or purchase of goods, wares, or merchandise, either to the other party to such transaction or to an agent, representative, or other intermediary therein where such intermediary is acting in fact for or in behalf, or is subject to the direct or indirect control, of any party to such transaction other than the person by whom such compensation is so granted or paid.

increasing competition. Section 2(c) does not address competitive effect and, under the clear language of the statute and the undisputed facts of the case, the incentive program constitutes a *prima facie* violation of section 2(c). We reverse the decision of the district court.

[**3] MBNA and Metrix are competitors in the sale of automobile parts to approximately 400 Mercedes-Benz dealers in the United States. MBNA, the exclusive United States distributor of Mercedes-Benz automobiles, has granted franchises to these automobile dealers to sell Mercedes-Benz automobiles and replacement parts and to perform repairs and maintenance work. Metrix, which also sells parts to the Mercedes-Benz dealers for use in Mercedes-Benz automobiles, sued MBNA for alleged violations of the Sherman Antitrust Act. MBNA counterclaimed, alleging that Metrix was engaged in acts in violation of the Robinson-Patman Act.

Metrix does not contest the fact that its incentive program involves the awarding of points redeemable for either merchandise or cash or the payment of cash directly to the parts managers of the Mercedes-Benz dealers. These payments are based on a percentage [*247] of total parts purchased from Metrix. As consideration for the payments, the payees perform no services other than placing their employers' purchase orders with Metrix.

Between February 1974 and June 1980, Metrix paid at least \$119,980.80 in cash and \$394,551.53 in cash and/or merchandise to parts managers [**4] of Mercedes-Benz dealers for the placement of approximately \$13,000,000 in spare parts orders with Metrix. Payments are mailed monthly by Metrix to the parts managers at their home address. The value of the points is approximately 3 1/2% of the purchase price.

Metrix argues, and the district court found, that questions of fact remain whether the incentive program decreases competition. HN2[] Nothing in the language of section 2(c), however, requires proof of an adverse effect on competition before a violation may be found where there is an admitted payment of a commission or other compensation to an agent of the purchaser. *Southgate Brokerage Co. v. FTC*, 150 F.2d 607 (4th Cir. 1945), cert. denied, 326 U.S. 774, 90 L. Ed. 468, 66 S. Ct. 230 (1945); *Oliver Brothers v. FTC*, 102 F.2d 763 (4th Cir. 1939). See also *FTC v. Simplicity Pattern Co.*, 360 U.S. 55, 65, 3 L. Ed. 2d 1079, 79 S. Ct. 1005 (1959) (dicta); see also n.11 on page 67. Any change in the law to address the competitive effect of such compensation must be made [*5] by Congress and not by the courts. The decision of the district court is accordingly

REVERSED.

Governments > Public Improvements > General Overview

Real Property Law > Subdivisions > State Regulations

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN3 Exemptions & Immunities, Parker State Action Doctrine

A municipality may invoke the Parker doctrine in situations where the challenged conduct genuinely reflects state policy. The Parker doctrine exempts anticompetitive conduct engaged in as an act of government by the state as sovereign, or, by its subdivisions, pursuant to state policy to displace competition with regulation or monopoly public service. Although there must be a clearly articulated and affirmatively expressed state policy decision behind anticompetitive conduct by municipalities, such a policy statement need not be a legislative directive to engage in anti-competitive actions, nor even a detailed authorization.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN4 Exemptions & Immunities, Parker State Action Doctrine

An adequate state mandate for anticompetitive activities of cities and other subordinate governmental units exists when it is found from the authority given a governmental entity to operate in a particular area that the legislature contemplated the kind of action complained of. The state must have had some expectation that the municipality would engage in economic regulation of the particular area, but it need not specifically have directed the municipality to act in a certain way.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Governments > Local Governments > Home Rule

Governments > State & Territorial Governments > Relations With Governments

HN5 Exemptions & Immunities, Parker State Action Doctrine

A "home rule" provision in a state constitution granting autonomy to municipalities with respect to local matters does not constitute the adequate state mandate necessary to invoke the Parker exemption.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN6[] Exemptions & Immunities, Parker State Action Doctrine

Conduct of a subordinate governmental entity will not fall within the Parker state action exemption unless the state plays an affirmative role by, at the very least, providing the impetus for the anticompetitive activity.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

Governments > Public Improvements > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN7[] Exemptions & Immunities, Parker State Action Doctrine

There are two requirements of the Parker doctrine for immunity for municipal conduct. First, the state legislature must have authorized and challenged municipal activity. Second, and more important, the legislature must have intended to displace competition with regulation or some form of monopoly public service.

Governments > Public Improvements > General Overview

HN8[] Governments, Public Improvements

See [Iowa Code § 28F.5.](#)

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN9[] Exemptions & Immunities, Parker State Action Doctrine

Where private parties claim the benefit of the state action exemption, they are required to show active state supervision of the challenged restraint. However, a showing of state supervision is unnecessary where the restraint represents governmental conduct in an area of traditional municipal activity.

F. Richard Lyford, Barbara G. Barrett, Dickinson, Throckmorton, Parker, Mannheimer & Raife, Des Moines, Iowa, for Plaintiff-Appellant.

R. Michael Hayes, City Solicitor, Intergovernmental Programs, Des Moines, Iowa, for Defendant-Appellee City of Des Moines, Iowa.

Judges: Heaney, Circuit Judge, Gibson and Max Rosenn, * Senior Circuit Judges.

Opinion by: ROSENN

Opinion

[*420] ROSENN, Senior Circuit Judge.

This antitrust case raises a difficult question concerning the "state action" exemption from the federal antitrust laws. Plaintiff Central Iowa Refuse Systems, Inc. (CIRS) brought this action against the Des Moines Metropolitan Area Solid Waste Agency (Metro), and its constituent members, Polk County, Iowa and fifteen Iowa municipalities including the city of Des Moines (the municipal defendants). Metro operates a solid waste disposal site within the Des Moines metropolitan area, [*2] and plaintiff CIRS operates a similar facility outside the metropolitan area. The plaintiff's complaint alleged violations of [sections \[*421\] 1](#) and [2](#) of the Sherman Antitrust Act, [15 U.S.C. §§ 1, 2](#), as well as Iowa [antitrust law](#), arising out of Metro's attempt to require that all solid waste generated within the geographic area covered by Metro be disposed of at Metro's facilities.¹

The district court, [557 F. Supp. 131](#), held, on the basis of stipulated facts, that the defendants' activities were protected from antitrust scrutiny by the state action exemption from the federal antitrust laws, and entered judgment for the defendants. The plaintiff now appeals from this determination.² We affirm.

[**3] <QPQ1>

The seeds of this litigation were sown over fifteen years ago. In the mid-1960's, the city of Des Moines recognized that its municipal dump was rapidly becoming unable to accommodate the increasing quantities of refuse produced within the city. Knowing that several neighboring municipalities were experiencing similar problems, the City Manager of Des Moines proposed that the municipalities enter into a cooperative arrangement to construct adequate modern waste disposal facilities. In November 1966, the municipalities retained two consulting firms to conduct an engineering study, funded largely by a grant from the United States Public Health Service.³ The engineers' report, submitted in May 1968, recommended the formation of a single agency to manage the collection and disposal of all solid waste produced in the entire Des Moines metropolitan area. Such a cooperative effort was permitted under a newly-enacted chapter of the Iowa Code, Chapter 28E, which authorized political subdivisions of Iowa to join together to provide important and necessary services and facilities.⁴ Under Chapter 28F of the Iowa

* Honorable Max Rosenn, Senior United States Circuit Judge for the Third Circuit, sitting by designation.

¹ The plaintiff invoked the district court's jurisdiction over the federal antitrust claims pursuant to [28 U.S.C. § 1337](#) and over the state antitrust claims under the doctrine of pendent jurisdiction.

² Certain of the defendants filed a cross-appeal, contesting the district court's preliminary determination that the activities complained of satisfied the Sherman Act's interstate commerce requirement. At oral argument this challenge was abandoned and the defendants conceded that their activities had a substantial effect on interstate commerce.

³ The federal government had numerous financial assistance programs designed to encourage states and local governments to develop comprehensive plans for solid waste disposal. One example was the Solid Waste Disposal Act of 1965. See [42 U.S.C. §§ 6901-6987](#).

⁴ Significantly, in May 1970, aware of the critical problem in solid waste disposal, the Iowa legislature enacted sections 455B.75-.83 for the purpose of encouraging municipalities to "provide sanitary disposal projects for the final disposition of solid wastes by their residents and, thereby, protect the citizens of this state from such hazards to their health, safety, and welfare that result from the uncontrolled disposal of solid wastes." See 1970 Iowa Legis. Serv. at 336 [§ 1](#). This statute required that municipalities establish and maintain solid waste disposal systems, and, like Chapter 28E, provided for cooperative arrangements between governmental units.

Code, enacted in 1969, such intergovernmental projects were to be **[**4]** financed by the issuance of revenue bonds.

In July 1969, the **[**5]** municipalities availed themselves of the provisions of Chapters 28E and 28F and established Metro. A formal intergovernmental cooperative agreement was executed in December 1969, expressly providing for financing of the project by revenue bonds.⁵

During 1971, Metro developed a plan for a single solid waste landfill on a site 10 miles east of Des Moines. At the same time, each of the municipalities and Metro entered into a Solid Waste Disposal Service Contract (the Service Contract) setting forth schedules of rates to be paid by the municipalities to Metro for disposal of refuse.⁶ **[**7]** Based on recommendations from **[*422]** Metro's bond consultants, the municipalities included in the Service Contract two provisions **[**6]** for the protection of the bondholders which would facilitate the underwriting and sale of the bonds. Section 105 of the Service Contract provided:

Disposal. The municipality does hereby agree, that to the full extent permitted by law, all Solid Waste generated from within its jurisdiction shall be disposed of at the Project.

In addition, under section 701 the Municipalities agreed that during the time the revenue bonds were outstanding, the Municipalities would not grant any license for any facility to compete with Metro.⁷ These provisions were included to guarantee the broadest possible financial base for Metro's activities, as a means of making the revenue bonds an attractive investment. The bond consultants believed that, in view of prevailing conditions in the financial markets, the bond issue would be unmarketable without these provisions.⁸

[8]** In October 1972, Metro duly issued pursuant to resolution \$1,500,000 of revenue bonds to finance the construction of the landfill. This resolution constitutes a contract between Metro and the bondholders. In accordance with the Solid Waste Disposal Service Contract, it was contemplated that the funds to pay the bondholders would come out of charges to be collected for use of Metro facilities. The bonds are secured by a lien on and a pledge of the revenues derived from the operation of the Metro facility. By 1974, however, only two of the municipalities in Metro had enacted ordinances requiring that all solid waste generated within their jurisdiction be disposed of at the Metro landfill. Accordingly, in 1974 Metro obtained a declaratory judgment in Iowa District Court for Polk County construing the exclusivity provisions in sections 105 and 701 of the Service Contract to require "that all solid waste within the territorial boundaries of the City of Des Moines . . . be transported to the [Metro] site . . . until such time as the bond obligations of [Metro] are retired," and requiring that all transfer stations within the Des Moines area

⁵ The Supreme Court of Iowa ruled that the delegation of legislative power to the municipalities and Metro under chapters 28E and 28F of the Iowa Code was proper under the Iowa constitution. [Goreham v. Des Moines Metropolitan Area Solid Waste Agency, 179 N.W.2d 449 \(Iowa 1970\).](#)

⁶ Under Section 401 of the Service Contract, each of the Municipalities agreed to adopt an ordinance prior to the execution of the Service Contract authorizing the levying and collection of rates, charges, tolls, and other fees for the services and facilities of the Metro project. Each municipality adopted such a rate ordinance.

⁷ Section 701 provided in pertinent part:

Non-Competitive Facilities. So long as any Bonds of the Agency are outstanding, the Municipality shall not grant any franchise or license to any person, firm, association or corporation for a competing solid waste disposal system, nor shall they permit any municipal solid waste disposal system to compete with the Agency. . . .

The Agency however shall have the right to establish, construct and acquire any other disposal project, provided, however, that no such other disposal project shall be so established, constructed or acquired unless the Consulting Engineers shall certify that such other disposal project will not be competitive with said Project constructed and acquired pursuant to the terms of the Resolution, and will not materially or adversely affect the revenues to be derived from said Project, or the rights and security of the holders of the Bonds issued pursuant to said Resolution.

⁸ In addition, the municipalities were apprehensive that, unless future revenues could be assured, the municipalities themselves might become liable for any default by Metro in paying the bondholders. This would violate [section 28F.6 of the Iowa Code](#), which required the cooperative project to be self-supporting.

deposit all solid waste at the Metro landfill. **[**9]** As a result of this litigation, most of the constituent municipalities passed ordinances requiring persons collecting solid waste to bring the refuse to Metro's landfill or to other waste transfer stations for subsequent hauling to the Metro landfill. In addition, some members of Metro passed ordinances making it a crime to take solid waste produced within the jurisdiction to any place other than Metro's facilities.

Plaintiff CIRS is in the business of operating waste collection and disposal services in central Iowa. Until 1980, as part of this business, it operated a sanitary landfill in Madison County, 31 miles from the Des Moines central business district and outside the metropolitan area covered by Metro. CIRS brought this action in January 1979, ten years after the formation of Metro and over six years after the revenue bonds were issued. CIRS claimed that because of the **[*423]** exclusivity provisions of the Service Contract, CIRS and other persons collecting refuse within the area covered by Metro were not allowed to dispose of that refuse at the landfill operated by CIRS in Madison County. The plaintiff argued that this provision prevented CIRS from competing with Metro **[**10]** in the disposition of solid waste, and thus amounted to a restraint of trade in violation of federal and state antitrust laws.⁹ CIRS also accused Metro and the municipalities of monopolizing and attempting to monopolize the disposal of solid waste. The district court found it unnecessary to consider the question of liability, believing that the alleged anticompetitive arrangement was protected by the state action exemption to the federal antitrust laws.

[11] II.**

The state action antitrust exemption had its origin in *Parker v. Brown*, 317 U.S. 341, 87 L. Ed. 315, 63 S. Ct. 307 (1943). In *Parker*, the Supreme Court held that the federal antitrust laws did not prevent the state of California from instituting a marketing program for raisins. Although such a program might well have been a violation of the Sherman Act if it had been privately run, the Court held that the state's involvement exempted the program from antitrust scrutiny. Explaining that the State of California, "as sovereign, imposed the restraint as an act of government," *id. at 352*, the Court stated that **HN1** the Sherman Act "must be taken to be a prohibition of individual and not state action." *Id.*

The *Parker* decision rested on basic principles of federalism. The Court determined that neither the express language nor the legislative history of the Sherman Act evidenced an intention on the part of Congress to restrain state action. *Id. at 350*. The Court therefore applied the general presumption against federal preemption **[**12]** of state law, explaining that "in a dual system of government in which, under the Constitution, the states are sovereign, save only as Congress may constitutionally subtract from their authority, an unexpressed purpose to nullify a state's control over its officers and agents is not lightly to be attributed to Congress." *Id. at 351*.

The *Parker* decision raised more questions than it answered. One of the most important of these questions was whether the antitrust exemption for "state action" encompasses actions by subordinate governmental entities, such as cities. The Court finally addressed this issue five years ago in *City of Lafayette v. Louisiana Power & Light Co.*, 435 U.S. 389, 55 L. Ed. 2d 364, 98 S. Ct. 1123 (1978). *City of Lafayette* involved a claim under the Sherman Act by a private utility company against several Louisiana cities, challenging various anticompetitive practices in the operation of the cities' own electric utility systems. The Supreme Court rejected the defendants' contention that

⁹ In its brief to the district court, plaintiff explained:

CIRS does not challenge the establishment of the Metro facility. It does not dispute the municipalities' powers to regulate the disposal of refuse and garbage, either pursuant to the municipal police power to promote and preserve the welfare and convenience of the people (citation) or pursuant to statutory mandate (citation). It does not challenge the municipalities' ability to jointly exercise their powers to provide for joint facilities, including sanitary disposal projects.

What CIRS does challenge here is the defendants' method of insuring the economic success of its project by destroying competition; i.e., requiring that, as long as the bonds are outstanding, all solid waste generated from within the Metro area be deposited at the Metro site, and the enforcement of that anti-competitive activity by way of permits and criminal ordinances. Such conduct obviously cannot be justified as a proper exercise of the Defendants' police power since the requirement is not tied to a health or welfare concern but rather to a financial one.

HN2[↑] municipalities, like states, are automatically **[**13]** exempt from the strictures of the federal antitrust laws. In a plurality opinion for four members of the Court, Justice Brennan wrote that the municipalities could not avail themselves of the state action exemption for the simple reason that cities are not states.

[*424] Cities are not themselves sovereign; they do not receive all the federal deference of the States that create them. *Parker*'s limitation of the exemption to "official action directed by a state" is consistent with the fact that the States' subdivisions generally have not been treated as equivalents of the States themselves. In light of the serious economic dislocation which could result if cities were free to place their own parochial interests above the Nation's economic goals reflected in the antitrust laws, we are especially unwilling to presume that Congress intended to exclude anticompetitive municipal action from their reach.

[435 U.S. at 412-13](#) (footnote and citations omitted).¹⁰

[14]** Despite its unwillingness in *City of Lafayette* to equate municipal action with state action, the plurality observed that **HN3**[↑] a municipality could invoke the *Parker* doctrine in situations where the challenged conduct genuinely reflected state policy. The plurality emphasized that the *Parker* doctrine exempts "anticompetitive conduct engaged in as an act of government by the State as sovereign, or, by its subdivisions, pursuant to state policy to displace competition with regulation or monopoly public service." [Id. at 413](#). Although there must be a "clearly articulated and affirmatively expressed" state policy decision behind anticompetitive conduct by municipalities, see [id. at 410](#), the plurality made it clear that such a policy statement need not be a legislative directive to engage in anti-competitive actions, nor even a detailed authorization. **HN4**[↑] An adequate state mandate for anticompetitive activities of cities and other subordinate governmental units exists **[**15]** when it is found 'from the authority given a governmental entity to operate in a particular area, that the legislature contemplated the kind of action complained of. "[435 U.S. at 415](#) (footnote omitted) (quoting [City of Lafayette v. Louisiana Power & Light Co., 532 F.2d 431](#),^{<QPQ5>} 435 (5th Cir. 1976)). The state must have had some expectation that the municipality would engage in economic regulation of the particular area, but it need not specifically have directed the municipality to act in a certain way.¹¹

The Court again considered the matter of state action immunity for municipalities in [Community Communications Co. v. City of Boulder, 455 U.S. 40, 70 L. Ed. 2d 810, 102 S. Ct. 835 \(1982\)](#). **[**16]** In *Community Communications*, a majority of the Court endorsed the analysis of the plurality opinion in *City of Lafayette*, stating that the anticompetitive restraint imposed by the City of Boulder (an ordinance placing a moratorium on the expansion of cable television) "cannot be exempt from antitrust scrutiny unless it constitutes the action of the State of Colorado itself in its sovereign capacity, or unless it constitutes municipal action in furtherance or implementation of clearly articulated and affirmatively expressed state policy." [Id. at 52](#) (citations omitted). The Court held that **HN5**[↑] a "home rule" provision in the Colorado constitution granting autonomy to municipalities with respect to local matters did not constitute the "adequate state mandate" necessary to invoke the *Parker* exemption.

Plainly the requirement of "clear articulation and affirmative expression" is not satisfied when the State's position is one of mere *neutrality* respecting the municipal actions challenged as anticompetitive. A State that allows its municipalities to do as they **[**17]** please can hardly be said to have "contemplated" the specific anticompetitive actions for which municipal liability is sought. Nor can those actions be truly described as "comprehended" **[*425]** within the powers *granted*," since the term, "granted," necessarily implies an affirmative addressing of the subject by the State. The State did not do so here: The relationship of the State of Colorado to Boulder's moratorium ordinance is one of precise neutrality. . . . In Boulder's view, it can pursue its course of regulating cable television competition, while another home rule city can choose to prescribe

¹⁰ In a concurring opinion, Chief Justice Burger developed the theory that municipal conduct should be subject to antitrust strictures if it was "proprietary" in nature but not if it was "governmental" in nature. See [435 U.S. at 418](#).

¹¹ State authorization can perhaps be inferred from concurrent state acts evincing a policy favoring regulation or from a delegation of authority to a municipality to act in an area which has customarily been regulated in an anticompetitive manner. See Note, *The Application of Antitrust Laws to Municipal Activities*, 79 Colum. L. Rev. 518, 523 (1979).

monopoly service, while still another can elect free-market competition: and all of these policies are equally "contemplated," and "comprehended within the powers granted." Acceptance of such a proposition -- that the general grant of power to enact ordinances necessarily implies state authorization to enact specific anticompetitive ordinances -- would wholly eviscerate the concepts of "clear articulation and affirmative expression" that our precedents require.

Id. at 55-56 (emphasis in original). Thus, it is clear after *Community Communications* that [**18] [HN6](#) conduct of a subordinate governmental entity will not fall within the *Parker* state action exemption unless the State plays an affirmative role by, at the very least, providing the impetus for the anticompetitive activity.

Recently, this circuit has analyzed [HN7](#) the *Parker* doctrine in terms of two requirements for immunity for municipal conduct. First, the state legislature must have authorized <QPQ6> and challenged municipal activity. Second, and more important, the legislature must have intended to displace competition with regulation or some form of monopoly public service. See [*Gold Cross Ambulance & Transfer & Standby Service, Inc. v. City of Kansas City, 705 F.2d 1005, 1011 \(8th Cir. 1983\)*](#).

III.

In the instant case, plaintiff CIRS challenges the requirement imposed by Metro and the defendant municipalities that as long as the revenue bonds are outstanding, all solid waste produced within the Metro area is to be deposited at the Metro landfill. Plaintiff does not challenge [**19] either the establishment of Metro or the power of the municipalities jointly to regulate the disposal of refuse in the Des Moines metropolitan area. Plaintiff's claim is that Metro acted illegally in attempting to monopolize the disposal of solid waste produced in the Des Moines area and preventing the depositing of refuse at CIRS' landfill in Madison County.

Thus, the question is whether this alleged anticompetitive activity by Metro constitutes action "in furtherance or implementation of clearly articulated and affirmatively expressed state policy." [*Community Communications Co. v. City of Boulder, supra, 455 U.S. at 52*](#). We must ascertain whether the Iowa legislature authorized the challenged activity and, if so, whether it did so with an intent to displace competition. See [*Gold Cross Ambulance v. City of Kansas City, supra*](#); P. Areeda, *Antitrust Law* para. 212.3a, at 53 (1982 Supp.).

It cannot be denied that in the 1970's the Iowa state legislature made a deliberate policy decision to encourage the construction of sanitary landfills by local governments. Under the provisions of Chapter 455 of the Iowa Code, the cities and counties of Iowa are required [**20] to provide for environmentally safe and sanitary disposal of solid waste. See Iowa Code §§ 455B.76-.84.¹² This statute authorizes cities and counties to join together, pursuant to the provisions of Chapter 28 of the Iowa Code, to provide common disposal facilities.¹³

It is also clear that the Iowa legislature contemplated that such joint undertakings of municipalities under Chapter 28 would be financed through the issuance of revenue [\[*426\]](#) bonds. See Iowa Code, Chapter 28F. The bonds were to be repaid out of the revenues derived from operation of the facility. [Section 28F.5](#) specifically provides, in pertinent [**21] part: [HN8](#)

Such an entity shall have the power to fix . . . fees, rentals or other charges and collect the same from the public agencies participating in the agreement . . . for the payment of the services and facilities provided by said project. . . . Such . . . fees, rentals or other charges shall be so fixed, established and maintained and revised from time to time whenever necessary as will always provide revenues sufficient to pay the cost of . . . operating the project . . . to pay the principal of and interest on the bonds then outstanding . . . [and to provide certain reserves and provide for repairs].

¹² These sections, however, do not require that the cities and counties actually establish and operate such facilities themselves. The municipalities could have complied with their statutory obligation by contracting with private parties.

¹³ The statute also provides for administrative supervision and regulation of disposal facilities by the Iowa Environmental Quality Commission.

In addition, section 28F.6 expressly states that the revenue bonds are not to be general obligation bonds of any public agency, but are to be secured by and repaid out of the revenues realized from the project.

Nonetheless, there is no state statute or other authority indicating that the Iowa legislature actually contemplated that the agency responsible for construction and operation of the landfill facility would have the exclusive right to dispose of solid waste produced in [**22] the Des Moines area or would engage in practices in restraint of trade. Plaintiff argues that because the anticompetitive provisions were included in the Service Contract only to ensure the financial success of the Metro Project, and not for any public health or welfare reason, the restriction on competition in disposal services was not within the scope of the activities authorized by Iowa legislation.

Admittedly, one must engage in some speculation to determine whether the State of Iowa genuinely intended to displace competition in the disposal of solid waste. We agree with the district court, however, that notwithstanding the statutes' silence on the specific matter of monopolization, it is possible to infer the existence of an affirmative state policy permitting anticompetitive practices in the operation of municipal landfills.

An examination of the statutory provisions behind Metro's formation reveals that the Iowa legislature placed an extremely high priority on the activities of Metro and other inter-governmental agencies engaged in the disposal of solid waste. The comprehensive statutory scheme makes clear that the Iowa legislature encouraged cities and counties to join together [**23] to provide facilities for the disposal of solid waste. Moreover, the provisions of Chapter 455B, enacted in 1970, require every city and county in Iowa to provide for sanitary disposal facilities. The reasonable and perhaps even inescapable conclusion from this statutory scheme is that the legislature desired agencies such as Metro to have broad discretion to do whatever was necessary to ensure their success.

CIRS insists, however, that there is no basis for concluding that the Iowa legislature contemplated that Metro would monopolize the disposal of solid waste produced within the Des Moines area. Plaintiff emphasizes that the Iowa statutes did not impose on local governments any obligation to construct their own landfills. Although the municipalities were required to provide for the establishment of solid waste disposal facilities, they had the option of doing so by contracting with private enterprise. Plaintiff points to Community Communications, supra, in which the Supreme Court held that "a State that allows its municipalities to do as they please can hardly be said to have 'contemplated' the specific anticompetitive actions for which municipal liability is [**24] sought." 455 U.S. at 55.

We believe the instant case is not controlled by *Community Communications* because the State's position here is not "one of mere neutrality respecting the municipal actions challenged as anticompetitive." 455 U.S. at 55. As we recently pointed out in Gold Cross Ambulance v. City of Kansas City, supra, 705 F.2d at 1013-14, the city's anticompetitive cable television ordinance in *Community Communications* was passed pursuant to a home rule provision in the Colorado constitution that [**427] failed even to refer to cable television. There was no indication of any Colorado legislative policy regarding this industry; the State simply had never considered the matter. See 455 U.S. at 55. By contrast, in the instant case, as in Gold Cross Ambulance, supra, the State of Iowa has affirmatively addressed the matter regulated by the municipalities. Indeed, the legislature has gone so far as to express its support for those municipalities electing to cooperate in the construction of common refuse facilities. Thus, although the State has left Iowa municipalities with a range of [**25] options concerning how best to provide for sanitary disposal facilities, by no means has the state adopted an approach of indifference or "mere neutrality." See also Town of Hallie v. City of Eau Claire, 700 F.2d 376 (7th Cir. 1983). The State obviously has been very much concerned with the problem of state-wide solid waste disposal.

Plaintiff argues, however, that it requires an unwarranted leap to conclude that the state legislature actually contemplated the imposition of restrictions on competition in the disposal of solid waste in order to promote the financial viability of projects such as Metro. Chapter 28F.5 authorizes entities such as Metro to set rates, fees, and charges to insure sufficient revenue to pay for the bonds. Plaintiff asserts that the legislature may have expected that this power alone would be sufficient to guarantee the financial viability of the project. Thus, even assuming Metro's bond consultants were correct in their opinion that the revenue bonds would not be marketable without the

anticompetitive provisions in the Service Contract, plaintiff argues that there is no indication that the state legislature considered such a step necessary [**26] to ensure the financial viability of Metro.¹⁴

We believe that the Iowa legislature did indeed contemplate these restrictions on competition. Chapter 28F expressly authorizes municipalities to finance collective projects by issuing revenue bonds. When ascertaining what was in the minds of the legislators, we cannot ignore the realities of the municipal bond market in the mid 1970's. The legislature surely realized the importance of assuring a source of repayment in order to make the bonds marketable. Common sense and experience suggest that the Iowa legislature must have intended Metro to have the latitude necessary to impose restrictions on competition if [**27] Metro believed such restrictions necessary to promote the sale of the bonds. The bond experts had convinced Metro that the restrictions were essential for marketing the bonds. In short, even though the legislation does not speak to the precise question whether restraints of trade could be employed to guarantee the financial <QPQ6> viability of Metro, the comprehensive legislative scheme favoring the development of solid waste facilities demonstrates that the legislature intended the localities to have broad authority to act in furtherance of the legislative mandate.¹⁵ Thus, we believe that the restraint on competition was a "necessary or reasonable consequence" of engaging in the authorized activity of constructing a waste disposal facility with funds raised by revenue bonds. See *Gold Cross Ambulance v. City of Kansas City, supra, 705 F.2d at 1013*; Areeda, *Antitrust Immunity for "State Action" After Lafayette*, 95 Harv. L. Rev. 435, 446 (1981).

[**28] The instant case is distinguishable from a case involving, for instance, a cooperative effort among governmental subdivisions to construct a recreational swimming pool. Without evidence that a state legislature considered such a swimming pool to be a high priority project, we would be unwilling to infer that the unauthorized anticompetitive actions of local governments were [*428] <QPQ6> without the contemplation of the legislature. In this modern era, however, the construction of solid waste disposal facilities is an essential governmental activity, and the obvious importance that the Iowa legislature placed on projects such as Metro justifies a broad interpretation of what the legislature must have contemplated. Thus we believe that Metro initiated its anticompetitive conduct pursuant to state policy, and such conduct is exempt from the federal antitrust laws under the *Parker* doctrine.

IV.

Plaintiff contends that, even if the restriction on disposal of refuse generated within the Des Moines area was pursuant to a clearly articulated and affirmatively expressed state policy, as required by *City of Lafayette and Community Communications, supra*, [**29] the defendants' anticompetitive conduct is still not immunized from antitrust scrutiny because it was not actively supervised by the state itself.

H9 [↑] Where private parties claim the benefit of the state action exemption, they are required to show active state supervision of the challenged restraint. See *California Retail Liquor Dealers Association v. Midcal Aluminum, Inc., 445 U.S. 97, 104-06, 63 L. Ed. 2d 233, 100 S. Ct. 937 (1980)*. See also *City of Lafayette v. Louisiana Power & Light Co, supra, 435 U.S. at 410*; *Cantor v. Detroit Edison Co., 428 U.S. 579, 49 L. Ed. 2d 1141, 96 S. Ct. 3110 (1976)*. The Supreme Court has not decided whether this active supervision requirement also applies to anticompetitive activities of municipal governments. See *Community Communications Co. v. City of Boulder, supra, 455 U.S. at 51 n.14*. This circuit, however, has recently held that a showing of state supervision is unnecessary where the restraint represents governmental conduct in an area of traditional municipal activity. *Gold Cross Ambulance & Transfer & Standby Service, Inc. v. City of Kansas City, supra, 705 F.2d at 1014-15*. [**30] Accord *Town of Hallie v. City of Eau Claire, supra, 700 F.2d at 383-84 (7th Cir. 1983)*. Metro's refuse disposal operations were within a well defined

¹⁴ Plaintiff also points out that the constituent municipalities in Metro could guarantee the financial stability of the agency by assessing a fee on all property owners in the area. This would eliminate the need for any monopoly of the disposal of solid waste, and would be permissible, since the activities of Metro involve the public health and welfare.

¹⁵ Indeed, this conclusion is strengthened by the Iowa Supreme Court's interpretation that Chapters 28E and 28F authorize the issuance of revenue bonds and the use of restrictions on competition to protect the liquidity and merchantability of the bonds. See *Goreham v. Des Moines Metro Area Solid Waste Agency, supra, 179 N.W.2d at 457-58*.

area of traditional municipal activity and thus we need not address the district court's reasoning that the supervision exercised by the State of Iowa over the activities of Metro was sufficient to satisfy the requirements of the state action exemption set forth in *California Retail Liquor Dealers Association v. Midcal Aluminum, supra.*¹⁶

Accordingly, the judgment of the district court dismissing the plaintiff's complaint is affirmed.¹⁷

[**31]

End of Document

¹⁶ In view of the district court's dismissal of the federal antitrust claims, dismissal of the pendent state antitrust claims was warranted.

¹⁷ Relying upon *National League of Cities v. Usery*, 426 U.S. 833, 49 L. Ed. 2d 245, 96 S. Ct. 2465 (1976), and *Hodel v. Virginia Surface Mining & Reclamation Ass'n*, 452 U.S. 264, 69 L. Ed. 2d 1, 101 S. Ct. 2352 (1981), the defendants have also argued that, even apart from the *Parker* exemption, their activities are protected from antitrust scrutiny by the *tenth amendment to the United States Constitution*. Because we hold that the *Parker* exemption applies, there is no need for us to consider the defendants' constitutional argument. It should be noted, however, that once the revenue bonds have been retired, the legislative justification for the anticompetitive provisions will disappear. If the ordinances are still in effect and plaintiff chooses to challenge them at that time, the *Parker* exemption might no longer be available to Metro.

[**HN2**](#) **Price Fixing & Restraints of Trade, Tying Arrangements**

A tying arrangement conditions the sale of a tying product upon the buyer's purchase of a distinct tied product. Courts associate tying with the exclusion of competitors from the market in the tied product and the restraint of buyers' independent judgment, both of which the courts perceive as fundamental economic evils. Therefore they have condemned such arrangements. In rejecting tying arrangements, courts often refer to tying by a party with sufficient economic power with respect to the tying product to appreciably restrain free competition in the market for the tied product, as a per se antitrust violation whenever a not insubstantial amount of interstate commerce is affected.

[Real Property Law > Common Interest Communities > Homeowners Associations](#)

[Real Property Law > Common Interest Communities > Condominiums > General Overview](#)

[Real Property Law > Common Interest Communities > Condominiums > Management](#)

[HN3](#) Common Interest Communities, Homeowners Associations

The Illinois Condominium Property Act obligates each unit owner to pay his proportionate share of the common expenses. Ill. Rev. Stat. ch. 30, para. 309. The courts have no doubt that such expenses include charges under management contracts executed by the developer, initially, or, later, by the board of managers pursuant to Ill. Rev. Stat. ch. 30, para. 318.2-318.4. The unit owner's obligation with respect to the common elements is inseparable from the ownership of his unit, and the sale by a developer to a unit owner is *prima facie* a sale of one property interest, the unit and appertaining percentage of ownership in the common elements, and not two. The choice of whether and with whom to contract for management belongs to the unit owners' association, once it assumes control from the developer, and not to unit owners individually.

[HN4](#) Condominiums, Management

Condominium owners bear the burden of producing evidence that the duration of a particular property management contract is unreasonable.

Counsel: Robert W. Berliner, Jr., Levy and Erens, Chicago, Illinois, Sheldon O. Collen, Friedman and Koven, Chicago, Illinois, for Appellants.

Thomas H. Fegan, Johnson, Cusack and Bell, Ltd., Chicago, Illinois, for Appellees.

Judges: Bauer, Circuit Judge, Fairchild, Senior Circuit Judge, and Wesley E. Brown, Senior District Judge. *

Opinion by: FAIRCHILD

* Senior District Judge Wesley E. Brown of the District of Kansas sitting by designation.

Opinion

[*1234] FAIRCHILD, Senior Circuit Judge.

This is an appeal from denial of defendants' motions to dismiss or for summary judgment.¹

Each of the two plaintiffs (suing also as class representatives) purchased and owns one unit of a high-rise condominium on Chicago's lakefront. It contains 940 units. They [*2] complain that defendants, some of whom were involved in the conversion of a rental building into this condominium in 1973 and some in later sales,² violated § 1 of the Sherman Act by tying a building management contract to the sale of the units.³ Defendants contend that the sale of a unit subject to a proportionate obligation under a pre-existing management contract is a sale of a single product.

[**3] On August 23, 1973, a trustee executed a declaration of condominium ownership for the building in question. Shortly thereafter, [*1235] the developer defendants contracted with one of their number, Moss Financial Corporation, for the management of the condominium's common elements. By its terms, the contract was to extend until five years after the date by which 80% of the units had been sold by the developer. About two and one-half years after the conversion to a condominium, the developer defendants sold the last 430 unpurchased residential units and all of the commercial properties except the garage to the Invsco defendants and assigned the management contract to American Invsco Management, Inc., one of the Invsco defendants. The condominium's developer-controlled board of directors⁴ (Johnson Dep. 109-14, 214-18) approved the assignment and agreed with the assignee to interpret the contract so that it would extend for the five years beginning January 1, 1976 and ending December 31, 1980. After December 31, 1980, American Invsco Management, Inc., ceased managing the condominium's common areas.

[**4] In denying defendants' motions for summary judgment, the district court rejected defendants' argument that there could be no tying arrangement because only a single product was sold. Noting that "a tying arrangement may avoid *per se* unreasonable status if it is shown to be reasonable and justifiable as a business necessity," the court concluded that the reasonableness of the management contract purchased from defendants is a factual issue.

¹ Leave was given for an interlocutory appeal. [28 U.S.C. § 1292\(b\)](#).

² The district court recognized three groups of defendants: (1) developer defendants who developed the building and converted it from a rental property into a condominium; (2) the three Invsco defendants, two of which succeeded the developer defendants as the title holders of the unsold residential units and one of which is the assignee of a contract to manage the condominium; and (3) garage lessee defendants. The district court dismissed the claims against the garage lessee defendants. See [Johnson v. Nationwide Industries, Inc., 450 F. Supp. 948 \(N.D. Ill. 1978\)](#).

³ [HN1](#) In Illinois a condominium unit purchaser buys: (1) a fee simple estate in his apartment unit; and (2) a tenancy in common (a fractional undivided interest) in the shared areas such as the ground, outside hallways, elevator, roof, etc. Ill. Rev. Stat. ch. 30, §§ 304, 306. The Illinois Condominium Property Act, Ill. Rev. Stat. ch. 30, §§ 301-31, has been amended several times since the declaration of condominium ownership and the contracting for management services in 1973. None of the changes affect the issue before us. We note, however, that an amendment to Ill. Rev. Stat. ch. 30, § 318.2, effective January 1, 1978, if applicable, would have provided an opportunity to cancel the contract in question or any developer negotiated contract which attempted to bind the unit owners' association for a period of more than two years from the recording of the declaration. 1977 Ill. Rev. Laws 80-1118.

Numerous states have chosen to limit the term of management contracts to which a developer may bind the purchasers of condominium units. See *Krebs, The Legislative Response to "Sweetheart" Management Contracts: Protecting the Condominium Purchaser*, 55 Chi-Kent L. Rev. 319, 324 (1979).

⁴ This characterization of the board of directors accords with the most favorable inference attributable to the deposition testimony of the plaintiffs, the party opposing summary judgment. We do not preclude the finding of a contrary fact upon remand.

HN2 A tying arrangement conditions the sale of a tying product upon the buyer's purchase of a distinct tied product. *Northern Pacific Railway v. United States*, 356 U.S. 1, 5, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958). Courts associate tying with the exclusion of competitors from the market in the tied product and the restraint of buyers' independent judgment, both of which the courts perceive as fundamental economic evils. Therefore they have condemned such arrangements. *Id. at 6*. In rejecting tying arrangements, courts often refer to tying by a party with "sufficient economic power with respect to the tying product to appreciably restrain free competition in the market for the tied product," as a *per se* antitrust [**5] violation whenever "a 'not insubstantial' amount of interstate commerce is affected." *Id.*

HN3 The Illinois Condominium Property Act obligates each unit owner to pay his proportionate share of the common expenses. Ill. Rev. Stat. ch. 30, § 309. We have no doubt that such expenses include charges under management contracts executed by the developer, initially, or, later, by the board of managers pursuant to §§ 318.2 to 318.4. The unit owner's obligation with respect to the common elements is inseparable from the ownership of his unit, and the sale by a developer to a unit owner is *prima facie* a sale of one property interest (the unit and appertaining percentage of ownership in the common elements) and not two (the unit and share of common elements plus a share of a management contract). The choice of whether and with whom to contract for management belongs to the unit owners' association, once it assumes control from the developer, and not to unit owners individually.

Defendants would have us focus on the sale of the unit, treating the management contract as "pre-existing." Where, however, the same person or group has both created the management contract and made the sale of a [**6] unit, we think the antitrust analysis must focus on the creation of the contract and the sale as if they were one transaction. Thus the original developer is not saved from a claim of antitrust violation by the fact that if one looked at the sale separately, no more than one product would be involved.

The substance of the matter would be different as to a group of units purchased at arm's length by another, subject to the management contract. Such purchasers would bear no responsibility for the pre-existing unity of the contract and the property. [*1236] Therefore in selling to unit owners they would be selling only one product in substance as well as form. Plaintiff Johnson purchased his unit from one of the developer defendants, and plaintiff Hansen claims to have purchased later from one of the Invsco groups. It is conceivable that their cases may have different results on this account. The Invsco defendants have not, up to now, claimed any difference in position on this basis, and there may be facts as to their relationship which would defeat any such claim if made.

It seems clear to us that in development and sale of a large condominium there is great advantage, perhaps [**7] necessity, in the existence of a management contract of substantial duration during the period of sale. The sale process may continue over a substantial period. Prospective purchasers will be highly interested in the identity and reputation of the manager, as well as the tenure and expense of the arrangement. Stability in management is essential to unit owners, and delay in an independent choice until there are enough unit owners to act collectively seems inevitable.

Affidavits submitted to the district court to support a request for reconsideration assert that it is the practice of the condominium industry in the Chicago area to contract for professional management services prior to unit sales and for a period thereafter. Prospective purchasers are reluctant to purchase in a building not professionally managed, and proper management helps protect the developer against loss in value of unsold units. Lenders generally require such contractual arrangements, and virtually all the large condominium buildings in the Chicago area have such contracts during and after the period of sales by the developer.

The decision dealing most directly with sale of condominium units subject to a management [**8] contract is *Foster v. West Alexandria Properties, Inc.*, 1980-1 CCH Trade Cases para. 63,223 (E.D. Va. 1980). There the court held that only one product was sold. It determined that it is neither possible nor practical for a unit and management services to be sold individually in a condominium with 800 units; that there was no evidence of hindrance in the market for condominiums or purchasers or diminution of the number of management service companies; and that it is the universal practice of the industry in the area to contract for the services of a professional management corporation. The court did emphasize the reasonableness of the provisions involved, which permitted earlier

termination of the contract than in the present case. The unit owners' association was permitted to choose a manager once unit owners held 75% of the units, and only eleven months needed to elapse before the decision could become effective. The court found this arrangement manifestly not unreasonable. The court noted that in *Jones v. 247 East Chestnut Properties*, 1975-2 CCH Trade Cases para. 60,491 (N.D. Ill. 1974) unit owners were required to maintain the same management [**9] company for five years after the sale of the last unit, and found *Jones* factually distinguishable on that basis.

Thus the *Foster* court appears to have considered the reasonableness of the duration of the management contract in deciding that the sale of the unit subject to such contract was the sale of only one product.

In *Jones, supra*, the court held that the management services and condominium units were separate products, but could not determine from the showing on the motion for summary judgment whether the duration of the management contract was reasonable. The court noted "the feasibility at some point of a collective choice by the owners with respect to the management of the building." The *Jones* court cited *United States v. Jerrold Electronics Corp.*, 187 F. Supp. 545 (E.D. Pa. 1960), aff'd per curiam, 365 U.S. 567, 81 S. Ct. 755, 5 L. Ed. 2d 806 (1961). *Jerrold* had held that defendant's insistence upon a buyer of its antenna system taking its service contract was a tie of two products, but reasonable and not in violation of § 1 of the Sherman Act under the circumstances at initial stages of the business. *187 F. Supp. at 557*. [**10]

Thus the *Jerrold* court considered reasonableness as a justification for tying two products, and the *Jones* court followed the [*1237] same analysis.⁵ An Illinois Appellate Court followed *Jones* in a state antitrust case involving the same condominium. *Luster v. Jones*, 70 Ill. App. 3d 1019, 388 N.E.2d 1029, 27 Ill. Dec. 66 (1st Dist. 1979).

Professor Areeda has commented: [**11]

Jerrold is a frank recognition of the room for exceptions to an apparently applicable per se condemnation. It makes clear that so-called per se rules are simply examples of the presumptions that exist throughout **antitrust law**. Of course, presumptions come in various breadths and strengths, and so do per se rules, as we shall see.

....

The court faced with an alleged tie-in that is said to be unlawful per se must, if there by any doubt about it, ask whether the challenged conduct ought to be condemned. That is, the court must decide whether the reasons for relatively categorical historical condemnation of tie-ins apply to the situation before it. If the answer is negative, the court may hold that the challenged conduct does not constitute a tie-in at all. Thus, a package transaction with substantial justifications or with few apparent harmful effects may be said not to be a "tie-in." [Citing in footnote *Principle v. McDonald's Corp.*, 631 F.2d 303 (4th Cir. 1980), cert. denied, 451 U.S. 970, 68 L. Ed. 2d 349, 101 S. Ct. 2047 (1981).] Of course, it might be cleaner and clearer to say that harmful effects are a prerequisite for illegality [**12] or that justified tie-ins are lawful, but the immediate point is that courts achieve the same end by varying the definition of a per se classification.

P. Areeda, The "Rule of Reason" in Antitrust Analysis: General Issues (Federal Judicial Center 1981), pp. 30, 31, 32.

One may wonder whether it makes much difference, except for allocating the burden of producing evidence, whether, in the situation here, a court requires a finding of unreasonable duration of the management contract before deciding that two products are tied, or first finds that two products are tied, but that the arrangement is lawful if the duration of the management contract is reasonable. In either approach there would be a finding as to whether the duration of the management contract was excessive and that is the factor which would foreclose competition.

⁵ *Fortner Enterprises, Inc. v. United States Steel Corp.*, 394 U.S. 495, 22 L. Ed. 2d 495, 89 S. Ct. 1252 (1969), implicitly distinguished the separability issue from the business justification defense. Compare: "Whatever the standards for determining exactly when a transaction involves only a 'single product,' we cannot see how an arrangement such as that present in this case could ever be said to involve only a single product," *394 U.S. at 507*, with "It may turn out that the arrangement involved here serves legitimate purposes." *394 U.S. at 506*.

Because practical considerations require that almost every sale of a condominium unit in a large condominium be subject to a management contract and because we ought not presume that most such contracts are of unreasonable duration, HN4[¹³] plaintiffs ought bear the burden of producing evidence that the duration of a particular management contract is unreasonable. [**13] Therefore we prefer the *Foster* approach and are satisfied that only one product is involved in the sale of a condominium unit subject to a management contract of reasonable duration.

Oddly enough all parties seem to take the position that the duration of the management contract in this case is irrelevant. We nevertheless conclude that the reasonableness of its duration is the critical issue and affirm the denial of summary judgment on that basis.

The order appealed from is AFFIRMED.

Where the nature of an enterprise is such that differing state regulation, although not conflicting, requires the enterprise to comply with the strictest standard of several states in order to continue an interstate business extending over many states, the extraterritorial effect which the application of a particular state law would exact constitutes, absent a strong state interest, an impermissible burden on interstate commerce.

Headnotes/Summary

Summary

CALIFORNIA OFFICIAL REPORTS SUMMARY

A professional football player who played for a team member of the National Football League (NFL) and who was subject to certain nationwide NFL operating rules, such as the draft, option clause, Rozelle rule, tampering rule, and one-man rule, brought an antitrust action against the team for violation of the Cartwright Act ([Bus. & Prof. Code, § 16700 et seq.](#)). The trial court found all but the option clause to violate state antitrust laws and awarded the player treble damages based on the difference between his \$ 38,500 salary and a \$ 50,000 offer from a team in another league. (Superior Court of San Diego County, No. 391152, Franklin B. Orfield, Judge.)

The Supreme Court reversed insofar as the judgment awarded damages on the basis of a violation of the Cartwright Act, holding that application of state **antitrust law** to the interstate activities of professional football would impermissibly burden interstate commerce. Stating that professional football is a nationwide business

structured essentially the same as baseball, to which state antitrust laws are inapplicable, and that there was need for a nationwide league structure and a nationally uniform set of rules, the court held that the national uniformity required in the regulation of baseball and its reserve system was likewise required in the player-team-league relationships at issue. Fragmentation of the league structure on the basis of state lines would adversely affect the success of the competitive business enterprise, and differing state antitrust decisions would likely compel all members to comply with the laws of the strictest state. (Opinion by Broussard, J., with Bird, C. J., Mosk, Richardson, Kaus, JJ., and Byrne, J., * concurring. Separate concurring opinion by Mosk, J. Separate dissenting opinion by Reynoso, J.)

Opinion by: BROUSSARD

Opinion

[*380] [**675] [***368] The San Diego Chargers Football Company, a California limited partnership, appeals a judgment awarding damages for violation [***369] of the California antitrust law. [****2] ([Bus. & Prof. Code, § 16700 et seq.](#), hereinafter the [**676] Cartwright Act.) ¹ In accordance with other decisions considering the applicability of state antitrust laws to national professional sports leagues, we conclude that the Cartwright Act is not applicable to the interstate activities of professional football.

From 1968 to 1976, Dennis Partee, a California resident, played professional football as a punter and placekicker for the Chargers, a member of the National Football League (NFL). In 1974, the World Football League came into existence, and one of its teams offered Partee \$ 50,000 to play for [*381] it for a season. He subsequently entered into a contract with the Chargers for three years with a salary of \$ 38,500 in 1974, \$ 44,000 in 1975, and \$ 49,500 in 1976. The [***3] agreement was subject to the terms and conditions of the standard NFL players contract. The trial court fixed damages for violation of the Cartwright Act based on the difference between the \$ 50,000 offer and the 1974 salary, awarded for the three years of the contract and trebled for a total award of \$ 103,500.

In 1975, the last full year Partee played for the Chargers, the NFL had 26 teams located in 16 states and the District of Columbia. The league structure is characterized by a basic division into two conferences each having divisions composed of certain teams within the conference, and by play according to an ordered schedule between teams within the various divisions and the two conferences. The Chargers play nearly half their games outside of California, and most of their games are against teams located in other states. NFL games are regularly broadcast coast to coast over network television, and professional football has gained nationwide appeal.

To promote athletic competition by providing a means of keeping the teams on a par with each other and to foster the business success of the member teams, the NFL has certain operating rules, many of which are embodied in

* Assigned by the Chairperson of the Judicial Council.

¹ The judgment also awarded damages for breach of contract. On appeal, the Chargers did not challenge the part of the judgment awarding contract damages, and we dismissed the appeal insofar as it relates to that award.

the [****4] NFL constitution and bylaws. Partee's antitrust action concerns five of these operating rules as they existed in 1974: the draft, option clause, Rozelle rule, tampering rule and one-man rule.² These rules are applied nationwide to all of the teams in the league. The court found all but the option clause to violate California antitrust laws.

[****5] Since 1968, all NFL players have been represented by the NFL Players Association (NFLPA). In 1970, the NFLPA and NFL management entered [*382] a second collective bargaining agreement covering the 1970 and 1973 seasons. No new agreement was reached until March 1977, but this agreement was made retroactive to the expiration date of the prior agreement. This new agreement, which was effective into [***370] 1982, contains each of the rules or practices challenged by Partee.³

[****6] [CA\(1a\)](#)⁴ (1a) The [**677](#) Chargers contend that professional football is a unique activity of interstate commerce which requires nationally uniform governance, that only federal antitrust laws apply, that interstate commerce would be unreasonably burdened if state antitrust laws were applied to professional football's interstate activities, and that application of the Cartwright Act was a violation of the commerce and supremacy clauses of the Constitution.

[CA\(2\)](#)⁵ (2) The Chargers do not claim federal antitrust laws, the Sherman and Clayton Acts, "occupy" the field of antitrust regulation, or that the federal and state antitrust laws so conflict as to require preemption of the state scheme. [HN1](#)⁶ The federal and California antitrust laws, having identical objectives, are harmonious with each other. (See [Chicago Title Ins. Co. v. Great Western Financial Corp. \(1968\) 69 Cal.2d 305, 315 \[70 Cal.Rptr. 849, 444 P.2d 481\]](#).)

[CA\(3\)](#)⁷ (3) [HN2](#)⁸ The commerce clause is a limitation upon the power of the states without implementing legislation by Congress. ([A.&P. Tea Co., Inc. v. Cottrell \(1976\) 424 U.S. 366, 370-371 \[47 L.Ed.2d 55, 60, 96 S.Ct. 923\]](#)) [HN3](#)⁹ "Not every exercise of state power with some impact on interstate [****7] commerce is invalid. A state statute must be upheld if it 'regulates even-handedly to effectuate a legitimate local public interest, and its effects on interstate commerce are only incidental . . . unless the burden imposed on such-commerce is clearly excessive in relation to the putative local benefits.'" ([Edgar v. Mite Corp. \(1982\) 457 U.S. 624, 640 \[73 L.Ed.2d 269, 282, 102 S.Ct. 2629, 2640\]; Minnesota v. Clover Leaf Creamery Co. \(1981\) 449 U.S. 456, 471 \[66 L.Ed.2d 659, 673, 101 S.Ct. 715\]; Pike v. Bruce Church, Inc. \(1970\) 397 U.S. 137, 142 \[25 L.Ed.2d 174, 178, 90 S.Ct. 844\].](#)) [HN4](#)¹⁰ The burden on interstate commerce will ordinarily be found unreasonable where the state regulation

²The draft is a selection system whereby the respective NFL teams are awarded the initial rights to negotiate exclusively with football players graduating from college.

The option clause is a provision of the NFL Standard Player Contract which grants the team the right to renew a player's contract for one additional year if the team and player cannot agree to a new contract. After the option year expires, the player becomes a "free agent" and may negotiate and contract with teams of another league or with other NFL teams subject to the Rozelle rule.

The Rozelle rule is named after the NFL commissioner, Pete Rozelle. This rule provides if a free agent contracts with another NFL team, the new team must compensate the player's former team with draft choice(s) or other player contracts. If the new and former teams cannot agree as to the compensation, the commissioner arbitrates the matter and determines the compensation.

The tampering rule prohibits an NFL team from negotiating with a player currently under contract with another NFL team. Also, if one team has the exclusive right to negotiate with a player, no other team may tamper with that player.

The one-man rule refers to the commissioner's authority to compel a player to adhere to terms of an operative collective bargaining agreement between the players and the NFL teams.

³This second collective bargaining agreement was negotiated during the pendency of antitrust suits brought by players against the NFL. The most significant case, *Alexander v. National Football League* (D.Minn. 1977) 1977-2 Trade Cases (CCH) para. 61,730, was a class action. The agreement and *Alexander* incorporate a settlement which includes the practices and rules Partee challenges. The settlement also contains a covenant not to sue (in antitrust) by the class members. However, Partee, who filed this suit before the specified cutoff date, chose not to be a class member. This agreement terminated in mid-1982.

substantially impedes the free flow of commerce from state to state or governs "those phases of the national commerce which, because of the need of national uniformity, demand their [*383] regulation, if any, be prescribed by a single authority." (*Southern Pacific Co. v. Arizona* (1945) 325 U.S. 761, 767 [89 L.Ed. 1915, 1923, 65 S.Ct. 1515].) **HN5**^[↑] The commerce clause permits only incidental regulation of interstate commerce by the states; direct regulation is prohibited. [****8] (*Edgar v. Mite Corp.*, *supra*, 457 U.S. 624, 641-643 [73 L.Ed.2d 269, 282-283, 102 S.Ct. 2629, 2640-2641].)

CA(4)^[↑] (4) **HN6**^[↑] It is settled that the NFL is engaged in interstate commerce and that federal antitrust laws are applicable. (*Radovich v. Nat. Football League* (1957) 352 U.S. 445, 452 [1 L.Ed.2d 456, 462, 77 S.Ct. 390].)

CA(1b)^[↑] (1b) A number of cases have considered the applicability of state antitrust laws to national professional sports leagues. The leading case is *Flood v. Kuhn* (S.D.N.Y. 1970) 316 F.Supp. 271, affirmed (2d Cir. 1971) 443 F.2d 264, affirmed 407 U.S. 258 [32 L.Ed.2d 728, 92 S.Ct. 2099]. Considering baseball's reserve system, the trial court found state antitrust laws inapplicable on alternative grounds: preemption and unreasonable burden on interstate commerce.⁴

[***9] [***371] Treating the applicability of state antitrust laws to professional baseball as a question of first impression, the Second Circuit affirmed. (*Flood v. Kuhn*, *supra*, 443 F.2d 264, 267-268.) [**678] The court stated: **HN7**^[↑] "[Where] the nature of an enterprise is such that differing state regulation, although not conflicting, requires the enterprise to comply with the strictest standard of several states in order to continue an interstate business extending over many states, the extra-territorial effect which the application of a particular state law would exact constitutes, absent a strong state interest, an impermissible burden on interstate commerce." (*Id.*, *at p. 267*.)

Analyzing the organization of professional baseball and the effect of state antitrust regulation balanced against its need, the court of appeals reasoned: "Professional baseball clubs, although existing as separate legal entities, are organized into so-called leagues for competitive play and are dependent on the league playing schedule to further the ends of their sports competition. Therefore, it is the league structure at which any state antitrust regulation must be aimed if organized professional [***10] baseball is not to be severely fragmented. On the one hand, it is apparent that each league extends over [*384] many states, and that, if state regulation were permissible, the internal structure of the leagues would require compliance with the strictest state antitrust standard. The consequent extra-territorial effect of necessary compliance would be considerably more far-reaching than that in *Southern Pacific Co. v. Arizona*, *supra*. On the other hand, we do not find that a state's interest in antitrust regulation, when compared with its interest in health and safety regulation, is of particular urgency. Hence, as the burden on interstate commerce outweighs the states' interests in regulating baseball's reserve system, the Commerce Clause precludes the application here of state **antitrust law**." (443 F.2d *at pp. 267-268*; fn. omitted.)

Affirming the circuit court, the United States Supreme Court stated: "The petitioner's argument as to the application of state antitrust laws deserves a word. Judge Cooper rejected the state law claims because state antitrust regulation would conflict with federal policy and because national 'uniformity [is required] in any regulation of [***11] baseball and its reserve system.' 316 F.Supp., *at 280*. The Court of Appeals, in affirming, stated, '[As] the burden on interstate commerce outweighs the states' interests in regulating baseball's reserve system, the Commerce Clause precludes the application here of state **antitrust law**.' 443 F.2d, *at 268*. As applied to organized baseball, and in the light of this Court's observations and holdings in *Federal Baseball*, in *Toolson*, in *Shubert*, in *International Boxing*, and in *Radovich*, and despite baseball's allegedly inconsistent position taken in the past with respect to the application of state law, these statements adequately dispose of the state law claims." (407 U.S. *at*

⁴ As considered by the trial court in *Flood v. Kuhn*, baseball's reserve system had many of the attributes of the NFL rules and practices of which Partee complains. Baseball's reserve system involved an agreement by all of the teams to be involved in a draft creating exclusive bargaining rights in the club as to the draftee; a uniform player's contract empowering the signing club unilaterally to renew a player's contract from year to year; denial of any right in a player, once signed, to negotiate with any other team; a prescribed number of players per team; and the unilateral right of a team to assign the contract to another team. (See *Flood v. Kuhn*, *supra*, 316 F.Supp. 271, 273-275.)

34 Cal. 3d 378, *384 LEXIS 668 P.2d 674, **678 LEXIS 94 Cal. Rptr. 367, ***371 LEXIS 983 Cal. LEXIS 223, ****11

[pp. 284-285 \[32 L.Ed.2d at p. 745\]](#), fn. omitted; see [State of Wisconsin v. Milwaukee Braves, Inc. \(1966\) 31 Wis.2d 699 \[144 N.W.2d 1, 17-18\]](#); cert. den. 385 U.S. 990 [17 L.Ed.2d 451, 87 S.Ct. 598]; rehg. den. 385 U.S. 1044 [17 L.Ed.2d 689, 87 S.Ct. 770].)

Following *Flood v. Kuhn*, state antitrust regulation has been held inapplicable to professional basketball ([Robertson v. National Basketball Association \(S.D.N.Y. 1975\) 389 F.Supp. 867, 881](#); [HMC Management \[****12\] v. New Orleans Basketball Club \(La.App. 1979\) 375 So.2d 700, 706-707](#)) and professional football ([Matuszak v. Houston Oilers, Inc. \(Tex.Civ.App. 1974\) 515 S.W.2d 725, 728-729](#)). No case has been found applying state antitrust laws to the interstate activities of professional sports.

Professional football is a nationwide business structured essentially the same as baseball. Professional football's teams are dependent upon the league playing schedule for competitive play, just as in baseball. The necessity of a nationwide league structure for the benefit of both teams and players for effective competition is evident as is the need for a nationally uniform set of rules governing the league structure. Fragmentation of the [*385] league structure on the basis of state lines would adversely affect the success of the competitive business [***372] enterprise, and differing state antitrust decisions if applied to the enterprise would likely compel all member teams to comply with the laws of the strictest state. [**679] (*Flood v. Kuhn, supra*, 443 F.2d at pp. 267-268.)

We are satisfied that national uniformity required in regulation of baseball and its reserve [***13] system is likewise required in the player-team-league relationships challenged by Partee and that the burden on interstate commerce outweighs the state interests in applying state antitrust laws to those relationships.

Partee seeks to distinguish *Flood v. Kuhn*, on the ground that professional baseball enjoys a unique exemption from federal antitrust law (*Flood v. Kuhn, supra*, 407 U.S. 258, 269-284 [32 L.Ed.2d 728, 736-745]; [Toolson v. New York Yankees \(1953\) 346 U.S. 356 \[98 L.Ed. 64, 74 S.Ct. 78\]](#); [Federal Baseball Club v. National League \(1922\) 259 U.S. 200 \[66 L.Ed. 898, 42 S.Ct. 465, 26 A.L.R. 357\]](#)), and that the United States Supreme Court in upholding baseball's exemption from state law relied on the cases establishing baseball's federal exemption and stated that its holding applied to baseball. However, the high court specifically relied upon the court of appeals' statement: "[As] the burden on interstate commerce outweighs the states' interests in regulating baseball's system, the Commerce Clause precludes the application of state antitrust law." The high court also relied upon the district court judge's statement that "national 'uniformity [****14] [is required] in a regulation of baseball and its reserve system.'" ([407 U.S. at p. 284 \[32 L.Ed.2d at p. 745\]](#).) There is no justification to conclude that the United States Supreme Court did not fully consider the brief statements from the lower court opinions it chose to quote, approve, and rely upon. The statements are clear and unequivocal, and we are not free to disregard them. Because in all relevant respects the burden on interstate commerce and the state interest resulting from the player-team-league relationship in professional football attacked by Partee is substantially the equivalent of that resulting from the reserve clause in professional baseball, the statements are applicable to professional football.

Our conclusion that application of the Cartwright Act in the instant case would be in conflict with the commerce clause makes it unnecessary to consider the claim that application of the Cartwright Act would also be in conflict with federal labor law policy.⁵

[***15] [*386] The judgment is reversed insofar as it awards damages on the basis of violation of the Cartwright Act. Each party shall bear its own costs on appeal.

Concur by: MOSK

⁵ The dissent asserts that today's holding strikes a significant blow to the vitality of the Cartwright Act and that by this opinion "we would necessarily have to exempt all businesses engaged in multistate activities." (Dis. opn. at pp. 389, 408.) This opinion has a limited scope. The Cartwright Act remains vital. We do not mean to suggest that multistate activities of other businesses may not be subject to state regulation upon due consideration of the commerce clause. Our holding is limited to the issue directly before us, the inapplicability of the Cartwright Act to professional football.

Concur

MOSK, J., Concurring. I have signed the majority opinion, under compulsion of [*Flood v. Kuhn \(1972\) 407 U.S. 258 \[32 L.Ed.2d 728, 92 S.Ct. 2099\]*](#).

Though keenly aware of the need to vigilantly enforce the Cartwright Act, I cannot accept the unique theory of the dissent that professional baseball and professional football are governed by different law. Though the playing fields are of different configuration, the balls of a different shape, the equipment and uniforms of a varying appearance and the method of scoring inconsistent, both baseball and football are for all practical purposes identical coast to coast sporting ventures seeking a combination of glory and financial reward.

While I might not rhapsodize as effusively about baseball lore as did Justice Blackmun [***373] in *Flood* (*supra*, pp. 260-264 [32 L.Ed.2d pp. 732-734]), I am bound by the decision in that case and believe despite some dictum (*id.*, p. 283 [32 L.Ed.2d at p. 744]) that [**680] it must be applied [****16] equally to professional football. If a great outfielder like Curt Flood is barred by the United States Supreme Court from state antitrust protection, an outstanding gridiron performer like Dennis Partee must suffer the same fate.

Dissent by: REYNOSO

Dissent

REYNOSO, J., Dissenting. Is the application of our state antitrust law ([*Bus. & Prof. Code, § 16700 et seq.*](#); the Cartwright Act) to professional football precluded by the presence of interstate commerce and concurrent Sherman Act jurisdiction? I think not.

The Cartwright Act parallels and is in harmony with the Sherman Antitrust Act. A conflict would arise only if compliance with both federal and state regulations were impossible ([*Florida Avocado Growers v. Paul \(1963\) 373 U.S. 132, 142-143 \[10 L.Ed.2d 248, 256-257, 83 S.Ct. 1210\]*](#)) or if state regulation stood as an obstacle to achievement of congressional objectives ([*Hines v. Davidowitz \(1941\) 312 U.S. 52, 67 \[85 L.Ed. 581, 587, 61 S.Ct. 399\]*](#)). Nothing in the case before us even remotely suggests that application of the Cartwright Act conflicts with or is hostile to federal [*387] antitrust enforcement. To the contrary, federal courts have held the [****17] same National Football League (NFL) rules and practices challenged by Partee to be violative of the Sherman Act. Nor is there any interference with any congressionally declared, paramount national interest, notwithstanding the majority's implication that the league structure of professional sports entitles the individual team businesses to a state antitrust exemption not enjoyed by any other business engaged in interstate commerce.

As the majority correctly note, the doctrine of federal preemption under the supremacy clause ¹ is not involved in this case, i.e., Congress has not occupied the field of antitrust regulation to the exclusion of the states. Our focus then is on the narrow issue of federal preclusion under the commerce clause. ² [****19] The majority summarily conclude, without discussion, that application of the Cartwright Act to the NFL practices would virtually destroy "the

¹ (U.S. Const., art. VI, [*cl. 2.*](#))

² "The Congress shall have Power . . . To regulate Commerce . . . among the several States . . ." (U.S. [*Const., art. I, § 8, cl. 3.*](#)) The Supreme Court has explained: "The Commerce Clause reaches, in the main, three categories of problems. First, the use of channels of interstate or foreign commerce which Congress deems are being misused, as, for example, the shipment of stolen goods . . . or of persons who have been kidnapped . . . Second, protection of the instrumentalities of interstate commerce, as, for example, the destruction of an aircraft . . . or persons or things in commerce, as, for example, thefts from interstate shipments . . . Third, those activities affecting commerce." ([*Perez v. United States \(1971\) 402 U.S. 146, 150 \[28 L.Ed.2d 686, 690, 91 S.Ct. 1357.\]*](#)) We are here concerned with the third element of interstate commerce jurisdiction.

player-team-league relationships challenged by Partee and that the burden on interstate commerce outweighs the state interests in applying state antitrust laws to those relationships." (*Ante*, at p. 385.) But we are not told why this is so when the trial court has done nothing more than remove restraints [****18] on free trade which have already been held violative of the federal act.³ I respectfully suggest that the majority fail to explain why there is a potential for lack of uniformity and a consequent burden on interstate commerce, because, in the present case, there can be no showing whatsoever that the application of the Cartwright Act to the challenged NFL practices will have *any* adverse effects on the free flow of commerce across state lines. In holding otherwise -- contrary to the record before us -- the majority ignore the unique and limited [***374] factual circumstances in which this case arises. The trial judge found that this case is one of only four cases remaining from a 1977 settlement of a class action [**681] antitrust suit brought by NFL players against the league. Pursuant to the settlement agreement, the players covenanted not to sue; thus only players opting out of the settlement -- e.g., Partee -- can challenge the practices here in issue.

[*388] Thus, in the circumstances of this case, I cannot agree that application of state **antitrust law** will impose on interstate commerce an undue -- indeed, any -- burden which "is clearly excessive in relation to the putative local benefits." (*Ante*, at p. 385.) This action, involving a California resident and a California corporation, arises under an employment contract expressly providing for the application of California law. The trial court, recognizing that antitrust regulation is an area of overlapping state and federal concern, correctly concluded the process is one of accommodation and that, in the present circumstances, application of state law is proper and preferable. Indeed, the state antitrust [****20] action was the only one available to Partee. A majority of this court have now left him with no remedy though the challenged practices manifestly violate state and federal antitrust laws.

The majority reverse the judgment in this case on the ground that "we are not free to disregard" the Supreme Court's holding in Flood v. Kuhn (1972) 407 U.S. 258 [32 L.Ed.2d 728, 92 S.Ct. 2099]. Finding *Flood* controlling, the majority think it unnecessary to decide whether state regulation of professional football actually conflicts with federal law or policy. As I shall explain, the *Flood* case, while binding on us, is in my view clearly distinguishable. I question the wisdom of deferring to a case which the high court candidly admits is an aberration in the law and a perpetuation of earlier, erroneously decided cases applicable only to professional baseball. More importantly, in *Flood*, state antitrust regulation would have inevitably resulted in conflict with federal law as baseball has historically been granted an exemption from federal antitrust regulation. In other contexts, the Supreme Court has consistently held that the mere potential of conflict with federal law [****21] is insufficient to preempt state regulation. Most recently, the high court has held that California's statutory provisions for the storage and disposal of nuclear waste are not preempted by, and do not conflict with federal law, notwithstanding Congress' passage of the Nuclear Waste Policy Act of 1982. (Pacific Gas & Electric Co. v. State Energy Resources Conservation and Development Commission (1983) U.S. [75 L.Ed.2d 752, 103 S.Ct. 1713].) I find it ironic that this court today holds that professional football -- for which Congress has *not* declared a national uniform policy -- is immune from state regulation.

The majority thus embrace the same dubious conclusion reached by the Court of Appeal below. Although we granted hearing to address this difficult federal preemption question -- the resolution of which requires a delicate balancing of state and federal interests in this area of mutual concern -- the majority simply conclude that we are presented with a nonissue as the result in this case is assertedly preordained by the Supreme Court's decision in *Flood*. My conclusion that this case is not controlled by *Flood* necessarily requires a more detailed [****22] analysis (and rejection) of the San Diego Chargers [*389] federal preclusion claim than that of the majority decision, which -- I respectfully suggest -- is rendered without apparent recognition of the significant blow dealt to the vitality of the Cartwright Act.

As I shall explain, the majority's holding represents a dramatic and abrupt departure from this court's previous teachings and uniform application of the Cartwright Act to activities affecting interstate commerce. I would not turn

³ "Consequently, it would be difficult to prove that a policy which removes privately instituted interferences, delays, interruptions, and inconveniences with interstate commerce, is itself a delay, interference, interruption, and inconvenience to interstate commerce when enforced at the local level by the States." (Flynn, *Federalism and State Antitrust Regulation* (1964) at p. 84.)

my back on sound precedent unless there is something unique about professional football which compels a marked deviation from the normal course of our consistent holdings in this area. In my view, professional sports enterprises, despite our society's fascination with them, are no different, in any legally significant way, than any other business engaged in [***375] interstate commerce. Accordingly, I fear that today's decision comes dangerously close to eliminating concurrent state-federal [**682] antitrust enforcement as it may be read as relegating state jurisdiction to solely intrastate conduct and activities, a realm of competence already severely restricted by the vast expansion [****23] of federal interstate authority.

In short, the majority fail to reconcile principles of federalism with the reality of a national economy dominated by interstate commercial activity. My review of the case law in this area convinces me that our state's interest in regulating anticompetitive practices is paramount if the subject matter is not one which requires exclusive federal regulation in order to achieve uniformity vital to national interests. An extended discussion of the relevant decisional authority is necessary to show that the majority today fashion the unprecedented rule that a wholly speculative conflict between state and federal law, founded on mere supposition and inference unsupported by the factual record before us, is sufficient to compel a finding of federal preemption. This approach is completely at odds with, and seriously misapprehends the commerce clause preclusion doctrine carefully delineated in legion Supreme Court decisions. I would not follow this misguided path at the expense of our state's Cartwright Act. Instead, I would hold that, consistent with the commerce clause, the Cartwright Act may apply to activities which affect interstate commerce if, as [****24] in the present case, there is neither a conflict with federal law or policy nor imposition of a burden on interstate commerce. I therefore dissent.

This case arises in a limited factual setting.

Partee filed this action alleging, inter alia, breach of contract in that the San Diego Chargers (Chargers) failed to pay his 1976 salary, and violation of the Cartwright Act in that the Chargers' adherence to various NFL rules and practices damaged his business and property interests. The antitrust action concerns five operating rules (contained in the NFL constitution and [*390] bylaws and incorporated by reference in the standard player contract) which, Partee alleged, imposed an unreasonable restraint on player transfer. Partee challenged these rules (the draft, option clause, Rozelle rule, tampering rule and one-man rule) as they existed in 1974.

These operating rules and practices have since been modified due in large part to several other actions against the NFL brought by players under federal antitrust laws. Three individual plaintiffs have prevailed on the merits of their challenge to these same rules. (*Smith v. Pro-Football (D.D.C. 1976)* 420 F.Supp. 738, [***25] revd. in part, affd. in part (D.C. Cir. 1976) 593 F.2d 1173; *Kapp v. National Football League* (N.D.Cal. 1974) 390 F.Supp. 73 (9th Cir. 1978) 586 F.2d 644, cert. den. 441 U.S. 907 [60 L.Ed.2d 375, 99 S.Ct. 1996]; *Mackey v. National Football League (D.Minn. 1975)* 407 F.Supp. 1000, affd. in part, revd. in part (8th Cir. 1976) 543 F.2d 606, petn. for cert. withdrawn (1977) 434 U.S. 801 [54 L.Ed.2d 59, 98 S.Ct. 28].) In *Kapp*, the district court granted summary judgment in favor of plaintiff, finding the draft, Rozelle rule, tampering rule and one man rule violative of the Sherman Act. The *Smith* court found the draft a "per se" restraint on trade; the circuit court affirmed on the "rule of reason" theory, but remanded for recomputation of damages. In *Mackey*, the circuit court affirmed a judgment that the Rozelle rule violated the Sherman Act; thereafter, the NFL's petition for writ of certiorari in the Supreme Court was withdrawn pursuant to the terms of a settlement agreement in *Alexander v. NFL* (D.Minn. 1977) 1977-2 Trade Cases (CCH) para. 61,730.

Alexander was a class action brought on behalf of all NFL players, during the same period that [***26] NFL management was attempting to negotiate a collective bargaining agreement with the NFL Players Association (NFLPA). In March 1977, the NFL and NFLPA agreed to a comprehensive settlement which included the adoption of a new collective bargaining agreement which was made retroactive to the expiration date of the prior agreement in 1974. (This [***376] agreement expired in 1982.) The 1977 collective bargaining agreement sought to stimulate player mobility and remedy the [**683] lack of competitive bidding by, for example, modifying the Rozelle rule, providing a team with a "right of first refusal" when a free agent negotiates with another team for his services, and requiring that compensation take the form of draft choices. (See, e.g., Comment, *Sport in Court: The Legality of Professional Football's System of Reserve and Compensation* (1980) 28 UCLA L.Rev. 252.) Thus, the 1977 agreement substantially modified the rules and practices challenged by Partee and may have obviated most of the

problems with unreasonable trade practices. (Of course, we are here concerned only with the NFL's rules and practices in effect in 1974 and need not consider whether the terms of the [****27] 1977, or for that matter the 1982, collective bargaining agreement are still so restrictive as to violate antitrust laws, state or federal.)

[*391] The *Alexander* settlement also contained a covenant not to sue in antitrust by the class members. Partee, however, is not bound by the settlement agreement as he filed this action before the specified cut-off date and chose not to be a class member.⁴ Thus, as earlier noted, he is one of a handful of players who is not precluded from challenging the NFL rules in force in 1974.

[****28] The present action proceeded to trial in 1979. After a nonjury trial, the court found in favor of Partee on the antitrust and breach of contract causes of action.⁵ As to the antitrust cause of action, the trial court found that "[the] facts of this case present no undue burden upon interstate commerce, nor is there any preemption of the field by the Sherman Act or other federal statutes or the Constitution" Based on the evidence and, alternatively, on the doctrine of collateral estoppel (in reliance on *Smith, Kapp, and Mackey*), the court found that all of the challenged rules, with the exception of the option clause, constituted an unreasonable restraint of trade in violation of the Cartwright Act. The court assessed actual damages under the antitrust cause of action in the amount of \$ 34,500 (based on the difference between the World Football League offer and Partee's 1974 salary from the Chargers computed through 1976) and trebled that amount under the Cartwright Act for a total amount of \$ 103,500. Damages under the breach of contract cause of action were assessed in the amount of \$ 30,550.

[****29] The Chargers do not appeal from the breach of contract judgment as they assert claims of error only as to the antitrust judgment. The Chargers contend that the trial court lacked jurisdiction to apply the Cartwright Act to the interstate activities of professional football.

The narrow issue before us involves federal preclusion under the commerce clause.

As the majority observe, the Chargers *do not* base their argument against state antitrust regulation of their business activities on the traditional [*392] preemption doctrine.⁶ [*684] [***377] The Chargers do not claim a violation of the supremacy clause. Nor can they do so. The contention that the Sherman Act ([15 U.S.C. § 1 et seq.](#)) occupies the field of antitrust (so that state regulation of the field is preempted as conflicting with the declared or presumed intent of Congress) was persuasively rejected in the well-reasoned Court of Appeal opinion [*R. E. Spriggs Co. v. Adolph Coors Co. \(1974\) 37 Cal.App.3d 653 \[112 Cal.Rptr. 585\]*](#).

⁴ Pursuant to federal rules of procedure for class actions, a notice was sent to all class members, including Partee, concerning the potential settlement. The settlement notice contained the following statement: "Neither the covenant not to sue, nor the dismissal with prejudice of this action shall prevent any member of the plaintiff class who duly commenced an individual action . . . in any Federal or State Court, prior to March 4, 1977, from pursuing such action to its lawful conclusion through trial and appeal." (Italics added.)

⁵ The court found in favor of the Chargers on fraud and unpaid wages causes of action.

⁶ The traditional preemption doctrine focuses on congressional intent. Thus, state regulation is preempted if Congress expresses a clear intent to reserve a field exclusively within its jurisdiction (see, e.g., [*Pennsylvania v. Nelson \(1956\) 350 U.S. 497 \[100 L.Ed. 640, 76 S.Ct. 477\]*](#); [*Charleston & W.C. Railway v. Varnville Furniture Co. \(1915\) 237 U.S. 597 \[59 L.Ed. 1137, 35 S.Ct. 715\]*](#)) or if such an intent can be inferred in a field dominated by pervasive federal regulation (see, e.g., [*Garner v. Teamsters Union \(1953\) 346 U.S. 485 \[98 L.Ed. 228, 74 S.Ct. 161\]*](#); [*Hines v. Davidowitz, supra, 312 U.S. 52*](#)). Conversely, in the absence of congressional occupation of a field, a state may regulate the interstate aspects of an activity, even though the regulation has some effect on interstate commerce. (See, e.g., [*Head v. New Mexico Board \(1936\) 374 U.S. 424 \[10 L.Ed.2d 983, 83 S.Ct. 1759\]*](#); [*Huron Cement Co. v. Detroit \(1960\) 362 U.S. 440 \[4 L.Ed.2d 852, 80 S.Ct. 813, 78 A.L.R.2d 1294\]*](#).) However, even in this latter area, state laws which conflict with federal law may be preempted. (E.g., [*California v. Zook \(1949\) 336 U.S. 725 \[93 L.Ed. 1005, 69 S.Ct. 841\]*](#); but see [*Exxon Corp. v. Governor of Maryland \(1978\) 437 U.S. 117 \[57 L.Ed.2d 91, 98 S.Ct. 2207\]*](#); [*Parker v. Brown \(1943\) 317 U.S. 341 \[87 L.Ed. 315, 63 S.Ct. 307\]*](#).)

[****30] The court in *Coors* noted that the legislative history of the Sherman Act unequivocably evidences a congressional intent to supplement, not preempt, state antitrust enforcement.⁷ [****32] Moreover, because the Cartwright Act was patterned after the Sherman Act, both laws have identical objectives and are harmonious with each other ([Chicago Title Ins. Co. v. Great Western Financial Corp. \(1968\) 69 Cal.2d 305, 315 \[70 Cal.Rptr. 849, 444 P.2d 481\]](#)); thus, decisions under the latter act are applicable in construing the former ([Mailand v. Burckle \(1978\) 20 Cal.3d 367 \[143 Cal.Rptr. 1, 572 \[*393\] P.2d 1142\]](#)). The adoption and incorporation of federal precedent effectively precludes the possibility of conflicts.⁸ In light of Supreme Court holdings that "mere coincidence" of state and federal regulation is not enough to preempt state law (see, e.g., [California v. Zook, supra, 336 U.S. at pp. 731-733 \[93 L.Ed. at pp. 1010-1011\]](#)), it cannot be seriously disputed, therefore, that state and federal laws may operate concurrently in the area of antitrust regulation. (See [Younger v. Jenson \(1980\) 26 Cal.3d 397, 405 \[161 Cal.Rptr. 905, 605 P.2d 813\]](#) ["Obviously [****31] there is an overlap between coverages of the Sherman Act . . . and state antitrust laws that prohibit substantially the same conduct, . . ."].) Federal preemption, then, is applicable in this case, if at all, because of the operation of commerce clause limitations on this concurrent state jurisdiction.⁹

[***378] The Chargers make clear that their position is grounded on commerce clause principles. Particularly, they contend that state regulation [****33] through the Cartwright Act is [**685] precluded by the commerce clause because the structure of professional football is (1) "exclusively interstate commerce," and (2) "uniquely interstate commerce." The distinction set forth by the Chargers is not without significance. The former characterization -- exclusivity -- goes to the *impact* of the activity on the state: does it have a sufficient local consequence or nexus with the state? The latter -- uniqueness -- relates more properly to the *nature* of the activity: is it an activity requiring national uniformity, the regulation of which imposes a burden on interstate commerce?

The challenged activities in this case are not exclusively in interstate commerce.

It is axiomatic that where an activity is exclusively in interstate commerce without intrastate aspects, the commerce clause precludes state regulation or interference with that activity. ([R. E. Spriggs Co. v. Coors Co., supra, 37 Cal.App.3d at p. 657](#).) Of course, as a practical matter, all interstate commerce has intrastate effects, as it begins in one state and ends in another. [*394] We are here concerned, however, with "exclusive" federal

⁷ "The history of the Sherman Antitrust Act makes it clear that the Congress did not intend that the federal legislation preempt parallel state efforts to control unfair competitive practices. Before the enactment of the Sherman Act, some 21 states had legislation proscribing 'combinations in restraint of trade.' Thus, it was not by accident that Congress did not use language in its act that would expressly preclude state regulation though the activity possessed interstate qualities. Senator Sherman, in urging enactment of his bill, stated: 'This bill . . . has for its . . . object to invoke the aid of the courts of the United States to deal with the combinations . . . when they affect injuriously our foreign and interstate commerce . . . and in this way to supplement the enforcement of the established rules of the common and statute laws by the several states in dealing with combinations that affect injuriously the industrial liberty of the citizens of those states. It is to arm the federal courts within the limit of their constitutional power *that they may cooperate with the state courts* in checking, curbing and controlling the most dangerous combinations that now threaten the business, property, and trade of the people of the United States . . .' (21 Cong. Rec. 2457 (1890).)" ([R. E. Spriggs Co. v. Coors, supra, 37 Cal.App.3d at p. 660](#), original italics, fn. omitted.) Thus, the fact that federal antitrust enforcement has historically become the dominant force in the field does not in itself mean that state antitrust law is displaced or preempted by the Sherman Act which, as noted, was passed for the purpose of supplementing state antitrust enforcement by providing for more efficient regulation of anticompetitive interstate activities.

⁸ Also relevant in this regard is the shared common law heritage of state and federal antitrust laws. (See Flynn, *Federalism and State Antitrust Regulation, supra*, at p. 90.) As this court stated in [Speegle v. Board of Fire Underwriters \(1946\) 29 Cal.2d 34, 44 \[172 P.2d 867\]](#): "The Cartwright Act merely articulates in greater detail a public policy against restraint of trade that has long been recognized at common law" This policy is wholly in conformity with the purposes sought to be furthered by the Sherman Act. (See, e.g., [Northern Pac. R. Co. v. United States \(1958\) 356 U.S. 1 \[2 L.Ed.2d 545, 78 S.Ct. 514\]; Apex Hosiery Co. v. Leader \(1940\) 310 U.S. 469 \[84 L.Ed. 1311, 60 S.Ct. 982, 128 A.L.R. 1044\].](#))

⁹ Although some courts have employed supremacy clause preemption and commerce clause preclusion terminology interchangeably, it is apparent that preclusion has been treated as a species of preemption.

jurisdiction [****34] in the constitutional sense, i.e., the preclusion of state regulation of essentially interstate activity. The question, then, is whether the interstate activity has the requisite impact upon intrastate commerce to sanction state interference. It has been held that states may apply antitrust laws to interstate commerce only "when such commerce has significant local consequences."¹⁰ ([Baker v. Walter Reade Theatres, Inc. \(1962\) 37 Misc.2d 172, 173 \[237 N.Y.S.2d 795\]](#).)

[****35] The Chargers assert that the employment practices challenged by Partee are solely interstate in character. It is emphasized that the challenged rules and practices were applied uniformly by all the teams in the NFL. Thus, the Chargers argue, Partee's antitrust injury was the product of nationwide conduct by all NFL teams. Yet, we are not here concerned with the uniform adherence to the challenged rules and practices by NFL teams in general; rather, we are concerned with the anticompetitive practices of one team, a California partnership, which caused injury to a California resident. Moreover, the rules which were found to be a restraint on trade were incorporated in a service contract which, by its terms, expressly provides for the application of California law. Manifestly, the activity in the present case has both interstate and intrastate aspects.

I therefore conclude that the Chargers' conduct in this case does not present too remote or insubstantial a nexus with intrastate commerce so as to preclude state antitrust jurisdiction. (See [State v. Allied Chemical & Dye Corporation \(1960\) 9 Wis.2d 290 \[101 N.W.2d 133\]](#).)¹¹ I am not persuaded that this case involves [****36] exclusively interstate commerce and that this state has no legitimate local interest in its adjudication. Because the Cartwright Act is "within the tradition of 'the usual police' powers of the state," the state retains the right to protect its residents from trade restraints. ([Alfred M. Lewis Inc. v. Warehousemen etc. Local No. 542 \(1958\) 163 Cal.App.2d 771, 790 \[***379\] \[330 P.2d 53\]](#).) But may it do so when such restraints arise primarily from interstate activity? In other words, may state [**686] regulation affect [*395] all interstate activity which has a significant local impact? Although there is a dearth of authority in the area of antitrust, in other contexts the Supreme Court has consistently held, "[ever] since *Willson v. Black-Bird Creek Marsh Co.*, 2 Pet. 245, and [Cooley v. Board of Wardens, 12 How. 299](#)" that the commerce clause "does not exclude all state power of regulation" and that "there is a residuum of power in the state to make laws governing matters of local concern which nevertheless . . . affect interstate commerce or even . . . regulate it." ([Southern Pacific Co. v. Arizona \(1944\) 325 U.S. 761, 766-767 \[89 L.Ed. 1915, 1923\]](#).)

The Cartwright Act is applicable to interstate activities.

The anticompetitive activity in the present case -- being both interstate and intrastate in character -- is in the penumbral zone of the antitrust jurisdictional continuum, i.e., subject to overlapping state and federal authority. As I have explained, there is no supremacy clause bar to concurrent state jurisdiction in this area. The inquiry, then, is whether, given the requisite local nexus, the state is precluded by the commerce clause from affecting interstate commerce in its regulation of restraints on trade. The Chargers contend that no California case has upheld state regulation of [****38] interstate conduct comparable to the national practices here at issue, and that Cartwright Act enforcement has been limited to activities wholly within California. They further argue that prior cases deal only with supremacy clause preemption and not commerce clause preclusion.¹² The Chargers mischaracterize our case

¹⁰ Conversely, the reach of federal antitrust jurisdiction into intrastate activity, while generally expansive, is also limited by the requirement that the impact of the local conduct on interstate commerce be more than incidental. (See, e.g., [Sun Valley Disposal Co. v. Silver State Disposal Co. \(9th Cir. 1969\) 420 F.2d 341](#) [garbage collection]; [Kallen v. Nexus Corp. \(N.D.Ill. 1973\) 353 F.Supp. 33](#) [bar review courses].) The boundaries in this area, however, are elusive. The courts have disagreed as to what type of activities are "essentially local" and thus not subject to federal intervention. (Compare [United States v. Yellow Cab Co. \(1947\) 332 U.S. 218, 230 \[91 L.Ed. 2010, 2020, 67 S.Ct. 1560\]](#) with [Times-Picayune v. United States \(1953\) 345 U.S. 594, 602, fn. 11 \[97 L.Ed. 1277, 1286, 73 S.Ct. 872\]](#).)

¹¹ In [Allied Chemical, supra, 101 N.W.2d 133](#), three out-of-state corporate defendants were charged with a price-fixing conspiracy under the Wisconsin **antitrust law**. Defendants had neither offices nor employees in the state; and prices were set nationwide. Nonetheless, the court found them within the purview of the Wisconsin law.

law. California cases have held, despite the lack of an unambiguous Supreme Court directive, that the state may, consistent with the commerce clause, regulate restraints on trade which affect interstate commerce.

[****39] This court has recently stated that "[neither] the Sherman Act nor the federal prohibition of undue burdens on interstate commerce . . . prevents [the Cartwright Act] from reaching transactions that have interstate aspects, [*396] but significantly affect state interests." (*Younger v. Jensen, supra, 26 Cal.3d 397, 405*; citing *Speegle v. Board of Fire Underwriters, supra, 29 Cal.2d 34; R. E. Spriggs v. Coors Co., supra, 37 Cal.App.3d 653*.) Although the issue in *Younger* concerned the authority of the Attorney General to investigate into the existence of antitrust violations, this court's statement regarding preclusion reaffirmed prior cases which have held that our state may regulate anticompetitive activities that affect interstate commerce. *Speegle* and *Coors* inescapably support the conclusion that Cartwright Act enforcement is not limited to wholly intrastate activities.

Coors involved a Cartwright Act action alleging antitrust violations in the California beer distribution system of an out-of-state brewer. Although the Court of Appeal was primarily confronted with a preemption challenge, it explicitly recognized that any holding [****40] against federal exclusivity [***380] would affect interstate commerce; accordingly, it proceeded to discuss commerce clause preclusion. While acknowledging [**687] that only Coors' California distribution scheme was being challenged, the court correctly noted that as this state's regulation of the distribution scheme "would clearly affect Coors' overall methods of distribution which are in interstate commerce, interstate commerce is both involved and affected." (*37 Cal.App.3d at p. 658, fn. 4*) It had earlier observed that "[there] is no question but that at all times relevant to this case, Coors was engaged in interstate commerce." (*Id., at p. 656*.) After concluding that neither the supremacy clause nor the Sherman Act preempted the Cartwright Act, the court "[turned] to the question of whether the nature of the regulated subject requires federal preeminence." (*Id., at p. 660*, original italics.) The court answered this question in the negative by employing the balancing approach enunciated in *California v. Zook, supra, 336 U.S. 725*. "The approach has been to reconcile the relevant state and federal interests and to find that the states have a valid [****41] interest in regulating unfair competitive practices within their jurisdictions, and that this power is not lost merely because the activity affects interstate commerce." (*Id., at p. 663*, italics added.) Earlier, the *Coors* opinion had observed that there was no undue burden on interstate commerce "in that the Cartwright Act, . . . is complementary to the relevant provisions of the federal statutes and may be justified as a reasonable means of protecting a significant state interest, i.e., prevention of unfair competition." (*Id., at p. 659*.)

Of significance is the *Coors* court's recognition that finding state preclusion whenever interstate commerce is involved would effectively destroy most state antitrust enforcement since, in light of the vastly increased domain of federal commerce clause authority, states would be relegated to a severely restricted realm of intrastate commerce. With the demise of the mechanical "dual sovereignty" theory and the development of expansive [*397] federal power over activities merely "affecting" interstate commerce (see, e.g., *Manderille Farms v. Sugar Co. (1948) 334 U.S. 219 [92 L.Ed. 1328, 68 S.Ct. 996]; United States [****421] v. Frankfort Distilleries (1945) 324 U.S. 293, 298 [89 L.Ed. 951, 956, 65 S.Ct. 661]* ["Congress in passing the Sherman Act, left no area of its constitutional power unoccupied"]), the regulatory power of the national government has become so broad that, if fully exercised, virtually all intrastate activity might be regulated to the complete exclusion of state authority (see, e.g., *Perez v. United States (1971) 402 U.S. 146 [28 L.Ed.2d 686, 91 S.Ct. 1357]* [loan sharking]; *Atlanta Motel v. United States (1964) 379 U.S. 241 [13 L.Ed.2d 258, 85 S.Ct. 348]* [public accommodations]). Recognizing the potential for

¹² As previously noted, some cases do appear to discuss preclusion and preemption interchangeably. One example is *Alfred M. Lewis, Inc. v. Warehousemen etc. Local No. 542, supra, 163 Cal.App.2d 771*, which involved an agreement to restrict competition. The trial court had determined that the agreement "would have been in violation of the Cartwright Act if it involved 'local businesses not engaged in interstate commerce,' but that because appellant [Lewis] was engaged in interstate commerce, the laws of the United States apply." (*Id., at p. 783*.) Lewis was "engaged in interstate business, operating grocery stores in many states." (*Id., at p. 775*.) Thus, the issue of commerce clause preclusion was squarely raised. The Court of Appeal reversed, holding that the Sherman Act does not preempt the Cartwright Act since there is no conflict between the acts. The court also discussed commerce clause preclusion: it stated that, even assuming "that the activities in question are within the sphere of the commerce clause [,] . . . [the] fact that Congress has acted to prevent restraints on trade in commerce, of itself, does not invalidate legislation by a state effecting the substantially same result." (*Id., at p. 788*.)

"nullification of much state effort in the antitrust field[.]" the Court of Appeal aptly observed: "If state regulations were to lose effectiveness as soon as interstate commerce is affected, a large policing area would be excluded, and the states would become helpless to protect [their] citizens, though no national benefit would accrue. (*Commonwealth v. McHugh*, 326 Mass. 249 [93 N.E.2d 751, 761-764].) Exclusion would necessarily result whenever the subject activity 'substantially affects' interstate commerce." ¹³ (*37 Cal.App.3d* [****43] at p. 660; [***381] citing *Burke v. Ford* (1967) 389 U.S. 320 [19 L.Ed.2d 554, 88 S.Ct. 443].) Similarly, a federal court has recently [**688] noted that "[despite] the broad reach of the federal commerce power, state antitrust laws retain vitality in dealing with matters which, while having interstate aspects, significantly affect local interests." (*Salveson v. Western States Bankcard Ass'n.* (N.D.Cal. 1981) 525 F.Supp. 556, 573-574).

[****44] An earlier decision by this court, *Speegle v. Board of Fire Underwriters*, *supra*, 29 Cal.2d 34, further supports the view that the state is not precluded from regulating interstate activity once a local nexus is established. The issue before this court was whether the application of the Cartwright Act to the insurance business was precluded in light of a then-recent Supreme Court decision holding that insurance transactions were interstate commerce. (*U.S. v. Underwriters Assn.* (1944) 322 U.S. 533 [88 L.Ed. 1440, 64 S.Ct. 1142].) For three-quarters of a century prior to *South-Eastern*, insurance had been regulated by the states, as this business had been held [*398] not to constitute interstate commerce. (*Paul v. Virginia* (1869) 75 U.S. (8 Wall.) 168 [19 L.Ed. 357].) However, the Supreme Court strongly suggested that the redefinition of insurance as interstate activity did not necessarily deprive state courts of jurisdiction to regulate this business,¹⁴ and, accordingly, the court set forth a balancing test to decide the preclusion question: ". . . [The] primary test applied by the Court is not the mechanical one of whether the particular activity [****45] affected by the state regulation is part of interstate commerce, but rather whether, in each case, the competing demands of the state and national interests involved can be accommodated. And the fact that particular phases of an interstate business or activity have long been regulated or taxed by states has been recognized as a strong reason why, in the continued absence of conflicting Congressional action, the state regulatory and tax laws should be declared valid . . ." (*South-Eastern*, *supra*, at pp. 548-549 [88 L.Ed. at pp. 1454-1455].)

[****46] Relying on the above-quoted language, this court held in *Speegle* that since there is no conflict between the Cartwright Act and the Sherman Act, state law applies "even if interstate commerce is involved." (*29 Cal.2d* at p. 51.) *Speegle* stated: "State laws are not invalid under the Commerce Clause unless they actually discriminate against interstate commerce or conflict with a regulation enacted by Congress." (*Id.*, at p. 50.) (The *Speegle* court, however, omitted mention of the additional limitation -- enunciated in Supreme Court cases dealing with state regulations outside the antitrust context -- that the state may not impose an undue burden on interstate commerce -- see, e.g., *Pike v. Bruce Church Inc.* (1970) 397 U.S. 137, 142 [25 L.Ed.2d 174, 178-179, 90 S.Ct. 844]; *Bibb v. Navajo Freight Lines* (1959) 359 U.S. 520 [3 L.Ed.2d 1003, 79 S.Ct. 962].)

¹³ *McHugh*, the Massachusetts case cited by the Court of Appeal, makes the following pertinent observations in arguing against a restricted role for state antitrust regulation: "Monopolies and restraints of trade are of infinite form and variety Some expend their efforts almost wholly upon intrastate commerce and are of only local interest and some almost wholly upon interstate commerce and so become matters of national concern, and there are all gradations in between. In many cases it would be very difficult to draw the line. If State laws have no force as soon as interstate commerce begins to be affected, a very large area will be fenced off in which the States will be practically helpless to protect their citizens without, so far as we can perceive, any corresponding contribution to the national welfare Especially is this true in view of the immense broadening in the conception of interstate commerce in recent years." (*326 Mass.* at p. 265.)

¹⁴ The final paragraph of the opinion states: "The argument that the Sherman Act necessarily invalidates many state laws regulating insurance we regard as [greatly] exaggerated." (*322 U.S.* at p. 562 [88 L.Ed. at p. 1462].) In response to *South-Eastern*, Congress enacted the McCarran-Ferguson Act which provides that federal law is only "applicable to the business of insurance to the extent that such business is not regulated by state law." ((1945) 59 Stat. 33, *15 U.S.C. §§ 1011, 1012*.)

The foregoing demonstrates that the courts of this state have held, consistent with Supreme Court authority,¹⁵ [****48] that the [**689] [***382] state may regulate interstate [*399] anticompetitive activity subject to certain limitations. These limitations may be summarized as a three-part test [****47] of commerce clause preclusion: states may regulate interstate activity unless (1) the activity is exclusively in interstate commerce without intrastate aspects or a local nexus (*Coors, supra, 37 Cal.App.3d 653*); or (2) regulation of the activity imposes an undue burden upon or discriminates against interstate commerce (*Bruce Church, supra, 397 U.S. 137*; *Bibb, supra, 359 U.S. 520*); or (3) regulation of the activity conflicts with federal law or policy (*Speegle, supra, 29 Cal.2d 34; South-Eastern, supra, 322 U.S. 533*).¹⁶

I have thus far concluded that the anticompetitive conduct before us has significant intrastate aspects and is not exclusively in interstate commerce, and that the state may, consistent with the commerce clause, regulate restraints on trade which affect interstate conduct. The remaining inquiries focus on the second and third part of the test, and specifically, on the central issue before us in this case: whether state regulation of professional football burdens interstate commerce or conflicts with federal law or policy. We must [****49] "undertake[] a balancing approach in resolving these issues." (*Pike v. Bruce Church, Inc. (1970) 397 U.S. 137, 142 [25 L.Ed.2d 174, 178]*; see also *Huron Cement Co. v. Detroit, supra, 362 U.S. 440*; *Southern Pacific Co. v. Arizona, supra, 325 U.S. 761*.) The majority, however, do not engage in the impartial balancing of conflicting interests mandated in a host of Supreme Court decisions; instead they accept the Chargers' contention that Supreme Court authority compels this court to hold that state regulation of all professional sports is prohibited by the commerce clause.

[*400] *Flood v. Kuhn* does not control this case.

The Chargers, relying on *Flood v. Kuhn (S.D.N.Y. 1970) 316 F.Supp. 271*, affirmed (2d Cir. 1971) *443 F.2d 264*, affirmed (*1972* *407 U.S. 258 [32 L.Ed.2d 728, 92 S.Ct. 2099]*) -- a baseball case -- contend that because professional sports require national uniformity in their regulation, they can only be regulated, if at all, under the Sherman Act. The majority agree with the Chargers that we are precluded from applying the balancing test because, assertedly, we are bound by the Supreme Court's decision in *Flood*. As [****50] earlier noted, I conclude that the Supreme Court's cursory holding in *Flood* with respect to state antitrust preclusion is limited to baseball -- "a derelict in the stream of the law." (*Flood, supra, 407 U.S. at p. 286 [32 L.Ed.2d at p. 746]* [Douglas, J., dis.].)

¹⁵ While *Speegle* relied on an antitrust case (*South-Eastern, supra*), *Coors* necessarily relied on commerce clause decisions outside the field of antitrust because the Supreme Court, to my knowledge, has never specifically addressed itself to the question of the outer limit of state antitrust regulation of interstate commerce. Nevertheless, in every case I have found that raised the question factually, the high court has expressed a willingness to defer to state regulation. (See *Waters-Pierce Oil Co. v. Texas* (No. 1) (*1909* *212 U.S. 86 [53 L.Ed. 417, 29 S.Ct. 220]*); *Standard Oil Co. v. Tennessee* (*1910* *217 U.S. 413 [54 L.Ed. 817, 30 S.Ct. 543]*); *Straus v. Am. Publishers' Ass'n.* (*1913* *231 U.S. 222 [58 L.Ed. 192, 34 S.Ct. 84]*); cf. *Gibbs v. Buick* (*1939* *307 U.S. 66, 83 [83 L.Ed. 1111, 1121, 59 S.Ct. 725]* [Black, J., dis.]; see also *U.S. v. Underwriters Assn., supra* *322 U.S. 533*.) The early cases are of limited precedential value, however, since they only implicitly approved the application of state antitrust law, and also because these decisions were rendered in the era of strict adherence to the mechanical intrastate-interstate view of the commerce clause. It appears that in these early cases the court perceived the activity in question as purely intrastate in nature. As an example, see *Standard Oil's* rejection of a contention that the Tennessee antitrust law constituted "an unreasonable constitutional interference with commerce among the States." (*217 U.S. at p. 419 [54 L.Ed. at p. 820]*.) Justice Holmes responded: "The mere fact that [the Tennessee act] may happen to remove an interference with commerce among the States as well with the rest does not invalidate it. It hardly would be an answer to an indictment for forgery that the instrument forged was a foreign bill of lading, or for assault and battery that the person assaulted was engaged in peddling goods from another State. How far Congress could deal with such cases we need not consider, but certainly *there is nothing in the present state of the law at least that excludes the States from a familiar exercise of their power.*" (*Id. at p. 422 [54 L.Ed. at p. 821]*, italics added.)

¹⁶ I note that commentators are "overwhelmingly supportive of the extension of state antitrust regulation to include conduct and practices that, while possessing a local nexus, nonetheless 'affect' or are 'in' interstate commerce." (Rubin, *Rethinking State Antitrust Enforcement* (1974) *26 U.Fla.L.Rev.* 653, 670; see also Flynn, *Federalism and State Antitrust Regulation, supra*, at pp. 56-108; Mosk, *State Antitrust Enforcement* (1962) *21 A.B.A.*, Antitrust Section 358; Note, *The Commerce Clause and State Antitrust Enforcement* (1961) *61 Colum.L.Rev.* 1469.)

While a few lower courts, state and federal, have considered this difficult question, there is to my knowledge no Supreme Court opinion which sets forth guidelines as to the exact parameters of state antitrust regulation [***383] of interstate commerce. (See fn. 15, *ante*.) Finding no certain precedent to guide us, I would employ the balancing test [**690] enunciated in cases involving the interface of commerce clause requirements within other areas of state regulation.

In *Flood*, a baseball player challenged professional baseball's reserve system as violative of the Sherman Act and New York's **antitrust law**. The *Flood* litigation, however, was principally an assault on baseball's long-standing exemption from antitrust laws. In 1922, Justice Holmes, speaking for a unanimous court, ruled that baseball exhibitions were purely state affairs (to which the interstate transportation of players was merely [****51] incidental) and were not "trade or commerce in the commonly accepted use of those words" and hence "were not interference with commerce among the States." ([*Federal Baseball Club v. National League \(1922\) 259 U.S. 200, 209 \[66 L.Ed. 898, 900, 42 S.Ct. 465, 26 A.L.R. 357\]*](#)) Over the years, baseball was able to withstand intermittent antitrust attacks on the authority of *Federal Baseball*. The baseball exemption question again reached the Supreme Court in 1953, at a time when that court's decisions had greatly expanded federal commerce clause authority. In [*Toolson v. New York Yankees \(1953\) 346 U.S. 356 \[98 L.Ed. 64, 74 S.Ct. 78\]*](#), the court, with two justices dissenting, declined to reconsider *Federal Baseball* despite the considerable change during the intervening thirty years in the definition of "interstate commerce." The court referred to four reasons for its holding: (1) Congressional awareness of and inaction with respect to *Federal Baseball*; (2) baseball's development on the understanding that it was not subject to existing federal antitrust laws; (3) a reluctance to overrule *Federal Baseball* with a consequent retroactive effect; and (4) a professed [****52] desire that any remedy be supplied by Congress rather than by court decision. ([*346 U.S. at p. 357 \[98 L.Ed. at p. 68\]*](#).)

[*401] Four years after *Toolson*, the Supreme Court limited the exemption to the sport of baseball, and held that antitrust laws were applicable to professional football and its practices. ([*Radovich v. National Football League \(1957\) 352 U.S. 445 \[1 L.Ed.2d 456, 77 S.Ct. 390\]*](#).) Other decisions made it clear that *Toolson* applied only to baseball and that no other sport enjoyed exemption from the antitrust laws.¹⁷ (See, e.g., [*U.S. v. International Boxing Club \(1955\) 348 U.S. 236 \[99 L.Ed. 290, 75 S.Ct. 259\]*](#); [*Haywood v. National Basketball Assn. \(1971\) 401 U.S. 1204 \[28 L.Ed.2d 206, 91 S.Ct. 672\]*](#).)

[****53] Faced with this history, it is not surprising that *Flood* was not to prevail in his federal antitrust claim. The district court considered itself bound by the rule of stare decisis, stating that "decisions of the Supreme Court are not lightly overruled, . . ." ([*Flood, supra, 316 F.Supp. at p. 277*](#).) Further, the court held that in light of baseball's exemption from federal antitrust laws, state antitrust regulation would violate the supremacy and commerce clauses. The circuit court affirmed. However, it considered the state law claim a "question of first impression, . . . whether application of state **antitrust law** to professional baseball is barred by a federal pre-emption of the field under the Commerce Clause." ([*Flood, supra, 443 F.2d at p. 267*](#).) Citing [*Southern Pacific Co. v. Arizona, supra, 325 U.S. 761, 774-775 \[89 L.Ed. 1915, 1927-1928\]*](#), the court of appeals said: "[Where] the nature of an enterprise is such that differing state regulation, although not conflicting, requires the enterprise to comply with the strictest standard of several states in order to continue an interstate [***384] business extending over many states, the extraterritorial effect [****54] which the application of a particular state law would exact [**691] constitutes, absent a strong state interest, an impermissible burden on interstate commerce." (*Ibid.*) It thus held that the commerce clause precluded state regulation of baseball.

¹⁷ The lower courts accepted this inconsistent result, but they did so reluctantly. One circuit court stated: "We freely acknowledge our belief that *Federal Baseball* was not one of Justice Holmes' happiest days, that the rationale of *Toolson* is extremely dubious and that, to use the Supreme Court's own adjectives, the distinction between baseball and other professional sports is 'unrealistic,' 'inconsistent' and 'illogical.' [Citation.] . . . However, . . . we continue to believe that the Supreme Court should retain the exclusive privilege of overruling its own decisions . . ." ([*Salerno v. American League of Prof. Baseball Clubs \(2d Cir. 1970\) 429 F.2d 1003*](#), quoting [*Radovich v. National Football League, supra, 352 U.S. at p. 452 \[1 L.Ed.2d at p. 461\]*](#).)

On petition for certiorari, the Supreme Court principally considered the baseball exemption question. Justice Blackmun's opinion conceded that the baseball exemption was aberrant in view of the court's failure to similarly exempt other sports: "[Baseball] is, in a very distinct sense, an exception and an anomaly. *Federal Baseball* and *Toolson* have become an aberration confined to baseball. Even though others might regard this as 'unrealistic, [**402] inconsistent, or illogical,' see *Radovich*, *supra*, the aberration is an established one, and . . . is an aberration that has been with us now for half a century, . . . If there is any inconsistency or illogic in all this, it is an inconsistency and illogic of long standing that is to be remedied by the Congress and not by this Court." ([407 U.S. at pp. 282-284 \[32 L.Ed.2d at pp. 743-744\]](#).) The court therefore concluded that Congress, "by its positive inaction," [****55] had sanctioned this anomaly and had "clearly evinced a desire" to keep baseball unregulated by federal antitrust laws. ([Id., at pp. 283-284 \[32 L.Ed.2d at p. 744\]](#).)

The court then disposed of the state antitrust issue in a terse concluding paragraph: "The petitioner's argument as to the application of state antitrust laws deserves a word. Judge Cooper rejected the state law claims because state antitrust regulation would conflict with federal policy and because national 'uniformity [is required] in any regulation of baseball and its reserve system' [316 F.Supp., at 280](#). The Court of Appeals, in affirming, stated, '[As] the burden on interstate commerce outweighs the states' interests in regulating baseball's reserve system, the Commerce Clause precludes the application here of state **antitrust law** [443 F. 2d, at p. 268](#). As applied to organized baseball, and in the light of this Court's observation and holdings in *Federal Baseball* and *Toolson*, in [*United States v. Shubert* I(1955) [348 U.S. 222 \(99 L.Ed. 279, 75 S.Ct. 277\)](#)], in *International Boxing*, and in *Radovich*, and despite baseball's allegedly inconsistent position taken in the past with [****56] respect to the application of state law, these statements adequately dispose of the state law claims." ([407 U.S. at pp. 284-285 \[32 L.Ed.2d at p. 745\]](#), fn. omitted, italics added.)

While it is unfortunate that the court did not find it necessary to explain its reasons for affirming, the brief paragraph is nonetheless a constitutional holding rejecting Flood's alternate contention. Accordingly, we are bound by it. The court makes clear, however, that it agreed with the judgment below "[as] applied to . . . baseball . . ." As the New Mexico Supreme Court recently noted in rejecting a contention that *Flood* mandates preclusion of state antitrust laws: "In affirming the lower courts' decisions, the Supreme Court did not adopt any broad or rigid limitations on the applicability of state antitrust laws to transactions involving interstate commerce. The Court upheld those holdings '[as] applied to organized baseball, and in light of this Court's holdings in *Federal Baseball* [and] *Toolson* . . .'" ([United Nuclear Corp. v. General Atomic Co. \(1980\) 96 N.M. 155 \[629 P.2d 231, 273\]](#), quoting *Flood, supra, 407 U.S. at p. 284 [32 L.Ed.2d at p. 744]*.)

The [****57] Chargers argue that we can infer from the citation to *Radovich*, a football case, that the court intended its holding to apply to football as well. [*403] *Radovich*, however, held only that *Toolson* is specifically limited to baseball and that "the volume of interstate business involved in organized professional football places it within the provisions of the [Clayton] Act." ([352 U.S. at p. 452](#).) As I have explained, the mere fact that a defendant is engaged in interstate activities does not preclude application of state antitrust laws. More likely, the court cited *Radovich* and the other sports cases to emphasize the unique and anomalous treatment afforded baseball. While I agree with the majority that the organizational structure of football is factually indistinguishable from that of [***385] baseball, the long-standing, aberrant exemption provided baseball makes this case readily distinguishable from *Flood*.

[**692] The unique character of the baseball exemption provides a clear explanation for the Supreme Court's affirmation of the district court's supremacy rationale for preempting state regulation of baseball. Having concluded that the "positive [****58] inaction" of Congress serves to exempt baseball from federal antitrust regulation ([407 U.S. at p. 283 \[32 L.Ed.2d at p. 744\]](#)), the court found it necessary to imply federal preemption of state antitrust enforcement as well. (See *Bay Guardian Company v. Chronicle Publishing Company* (N.D.Cal. 1972) [344 F.Supp. 1155, 1160](#) [statutory exemption for joint operating agreements preempts state **antitrust law**].) Indeed, "the time honored, though unusual, exemption from federal antitrust laws which professional baseball enjoys would be meaningless if state antitrust laws were not also inapplicable." ([United Nuclear Corp., 629 P.2d at p. 273](#).) Thus, in *Flood* there was a clear conflict since the application of state antitrust laws would produce a result inconsistent with the congressional intent that baseball be unregulated.

The Supreme Court's alternate holding ¹⁸ in *Flood* -- affirming the circuit court's burden-on-commerce holding -- also appears to be grounded on baseball's unique exemption, again, as suggested by the citation to *Federal Baseball* and *Toolson*. The high court specifically approved the view of the circuit court that "the burden on interstate commerce [****59] outweighs the states' interests in regulating baseball's reserve system, . . ." ([407 U.S. at p. 284 \[32 L.Ed.2d at p. 745\]](#); quoting [443 F.2d at p. 268](#).) The circuit court, [*404] relying on [*Southern Pacific Co. v. Arizona, supra, 325 U.S. 761*](#), had reasoned that "if state regulation were permissible, the internal structure of the [baseball] leagues would require compliance with the strictest state antitrust standard." ([443 F.2d at p. 268](#).)

[****60] The Chargers place heavy reliance on *Southern Pacific*, a case in which the Supreme Court precluded application of an Arizona law requiring a change in the length of trains at the state line. The trial court had found that "the Arizona Law had no reasonable relation to safety, . . ." (325 U.S. at p. 775 [25 L.Ed.2d at p. 1928].) Balanced against this, the court held that the "Arizona Train Limit Law imposes a serious burden on interstate commerce, . . . [as] [it] materially impedes the movement of appellant's interstate trains through that state and interposes substantial obstruction to the *national policy proclaimed by Congress*, to promote adequate, economical and efficient railway transportation service. Interstate Commerce Act, preceding [§ 1](#), 54 Stat. 899." (*Id.*, at p. 773 [25 L.Ed.2d 1927], italics added.)

It seems evident that the circuit court in *Flood* quite properly relied on *Southern Pacific* because, as in the case of train regulation, there is, according to the Supreme Court, a "national policy" as to baseball. With respect to railroads and other interstate transportation, the needs of the subject matter clearly call for national uniformity.

[****61] (See [*Railroad Trainmen v. Terminal Co. \(1969\) 394 U.S. 369 \[22 L.Ed.2d 344, 89 S.Ct. 1109\]*](#); [*Bibb v. Navajo Freight Lines, supra, 359 U.S. 520*](#).) Similarly, professional baseball is entitled to uniform treatment as Congress has "clearly evinced a desire" for a policy of self-regulation and complete antitrust exemption for this particular sport. ([*Flood, supra, 407 U.S. at p. 284 \[32 L.Ed.2d at p. 744\]*](#).) State regulation of baseball [***386] would result in inherent conflict because states, unguided by federal antitrust precedent, [**693] would subject baseball to antitrust laws of varying strictness in violation of the commerce clause.

While the impact of diverse state regulation is unquestionable as to baseball, professional football, by marked contrast, can claim only a potential conflict in the absence of a corresponding "national policy" precluding federal antitrust regulation. Unlike baseball, football cannot claim a national policy supporting self-regulation. Nor is football "a subject demanding exclusive federal regulation in order to achieve uniformity vital to national interests."

¹⁹ [****63] ([*Florida Avocado Growers v. Paul, supra, 373 U.S. \[****62\] 132, 144 \[*405\] \[10 L.Ed.2d 248, 257\]*](#); see and compare [*Southern Pacific, supra, 325 U.S. 761*](#), and [*Navajo Freight Lines, supra, 359 U.S. 520*](#) with [*Pacific Gas & Elect., supra, U.S. , and United Nuclear, supra, 629 P.2d 231, 272*](#) [uranium industry not "vital to military posture of United States" and subject to state antitrust laws].) Nor has Congress manifested the intent, express or implied, to exempt football from federal antitrust regulation so as to preclude divergent state-enforcement. ²⁰ To the

¹⁸ I note that the preemption holding alone is sufficient to dispose of the *Flood* case. If state antitrust regulation is completely preempted by the supremacy clause there is no need to weigh the state's interest in regulating the activity against the burden imposed upon interstate commerce. Under a commerce clause analysis, state interference is presumed valid unless it unduly burdens commerce; therefore, such analysis must be preceded by a judicial determination (or litigant's concession) that state law is *not* preempted by the supremacy clause. In *Flood*, the circuit court did not discuss supremacy clause preemption; nor did it comment on the district court's preemption holding. It might be argued, therefore, that the high court's affirmation of the district court rendered the circuit court's commerce-clause-preclusion holding dictum, or that the court's affirmation of the circuit court is itself dictum.

¹⁹ The Supreme Court has sustained preemption challenges against state law in most cases where the "national interest" implicated is in the area of national security or labor policy, neither of which is in issue here. (See, e.g., [*Hines v. Davidowitz, supra, 312 U.S. 52*](#); [*Pennsylvania v. Nelson \(1956\) 350 U.S. 497 \[100 L.Ed. 640, 76 S.Ct. 477\]*](#); [*Garner v. Teamsters Union \(1955\) 346 U.S. 485 \[98 L.Ed. 228, 74 S.Ct. 161\]*](#); [*Hill v. Florida \(1945\) 325 U.S. 538 \[89 L.Ed. 1782, 65 S.Ct. 1373\]*](#).)

²⁰ Chief Justice Stone's statement in [*Parker v. Brown, supra, 317 U.S. at page 351 \[87 L.Ed. at p. 326\]*](#), is particularly apt in this regard: "In a dual system of government in which, under the Constitution, the states are sovereign, save only as Congress may

contrary, the fact that football is subject to federal antitrust laws greatly reduces the potential for diverse treatment by states, like California, which have patterned their antitrust laws after the Sherman Act and have adopted federal precedent as their own. In fact, as I shall explain, the trial court judgment in the present case is consistent with federal authority holding the same rules and practices challenged here violative of the Sherman Act.

In sum, *Flood* and *Southern Pacific* are inapposite. The Chargers would have us assume a conflict between state and federal antitrust policies without assessing and weighing the perceived detrimental impact of state regulation on professional football against this state's strong interest in enforcing its antitrust laws. Although the mere potential of conflicting state regulation was held sufficient to impermissibly burden baseball by forcing it to conform to "the strictest state antitrust standard" (*Flood*, *supra*, 443 F.2d at p. 268), I interpret the *Flood* cases as limited to professional baseball because of their focus on the unique historic development of [****64] that sport.²¹ [*406]

[**694] [***387] Baseball is, to use the Supreme Court's own adjectives, "an exception and an anomaly." (*Flood*, *supra*, 407 U.S. at p. 282 [³² L.Ed.2d at p. 743].) I am not persuaded that this "aberration" (*ibid.*) should be extended to another professional sport. As in *Radovich*, the Chargers and amicus NFL seek refuge under a protective umbrella provided only to baseball. However, because football enjoys no congressional or judicially created exemption from antitrust laws, its asserted need for uniformity must be based, not on a national policy precluding state regulation, but, rather, only on the nature of its interstate operations. I would therefore balance this asserted need for uniformity against this state's interest in enforcing its antitrust laws in order to determine whether,

constitutionally subtract from their authority, an unexpressed purpose to nullify a state's [regulatory scheme] is not lightly to be attributed to Congress."

²¹ I recognize of course that state and federal lower courts have held state antitrust laws inapplicable to various professional sports. (See *State v. Milwaukee Braves, Inc.* (1966) 31 Wis.2d 699, 719-732 [¹⁴⁴ N.W.2d 1], cert. den. (1966) 385 U.S. 990 [¹⁷ L.Ed.2d 451, 87 S.Ct. 598]; *Matuszak v. Houston Oilers* (Tex.Civ.App. 1974) 515 S.W.2d 725; *Robertson v. National Basketball Association* (S.D.N.Y. 1975) 389 F.Supp. 867, 880-881; *HMC Management v. New Orleans Basketball Club* (La.App. 1979) 375 So.2d 700, 706, cert. den. (La. 1980) 379 So.2d 11.) These authorities, however, are not controlling.

In *Milwaukee Braves*, a pre-*Flood* case, Wisconsin brought an action against 10 baseball teams alleging that the league's decision to move the Braves' franchise to Atlanta violated its state **antitrust law**. In holding state law inapplicable, the majority opinion obliquely stated that "some members" of the court believed state law was preempted under the supremacy clause while "other members" preferred a commerce clause rationale. In either event, the court makes clear that its decision was grounded on baseball's unique "history of judicial action and legislative inaction" and the resulting "conflict between state and federal policy." (³¹ Wis.2d at p. 721.) Moreover, "transfer of a team franchise is certainly distinguishable (particularly with regard to the likelihood of state discrimination in favor of its own economic interests) from restraints imposed . . . upon players' freedom to negotiate, . . ." (*Flood*, *supra*, 316 F.Supp. 271, 279.)

Similarly, *HMC Management* involved an attempt to keep the "Jazz" basketball team from moving from New Orleans. Relying on *Flood*, the court held on preemption grounds that "most of the violations that are alleged cannot be subject to Louisiana Anti-Trust Laws." (³⁷⁵ So.2d at p. 706.) The court held, however, that the alleged violation of a lease, if proven to be the result of anticompetitive conspiracy, would be subject to the state law. (*Id.*, at p. 707.) As I have explained, though, this court cannot, absent an unambiguous Supreme Court directive to the contrary, limit our state **antitrust law** to purely intrastate activities.

In *Matuszak*, a football case, the Texas court simply quoted the circuit court's opinion in *Flood* and concluded, on "federal pre-emption" grounds and without analysis, that the circuit court's "holding is applicable to the instant case . . . [therefore], the question of whether Matuszak's contract violates federal law is a question for the Federal Courts." (⁵¹⁵ S.W.2d at pp. 728-729.)

Finally, in *Robertson* a federal district court found "the opinion of the Court of Appeals [in *Flood*] unquestionably applicable and controlling." (³⁸⁹ F.Supp. at p. 880.) The court held state antitrust regulation inapplicable to professional basketball because that sport is in the "same business" as baseball, involving "substantial volumes of interstate . . . commerce." (*Id.*, at p. 881.).

To the extent that *HMC Management*, *Matuszak* and *Robertson* held (either without analysis or in reliance on the virtually identical league structures and interstate nature of professional sports) that state **antitrust law** is preempted or precluded, we should decline to follow these cases. In my view we should not decide the instant case on the basis of the organizational similarities between professional football and baseball; rather, we should focus on the aberrant treatment historically accorded the latter sport.

34 Cal. 3d 378, *406 LEXIS 668 P.2d 674, **694 LEXIS 94 Cal. Rptr. 367, ***387 LEXIS 983 Cal. LEXIS 223, ****64

"under the circumstances of [this] particular case, [state] law stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress." ([Hines v. Davidowitz, supra, 312 U.S. 52, 67 L.Ed. 581, 587.](#))

*Under the facts of this case, state antitrust regulation of football neither burdens interstate [****65] commerce nor conflicts with federal law or policy.*

[****66] In cases where there is no express or implied national policy with respect to a particular business enterprise, the Supreme Court has phrased the "general rule" for determining the validity of state regulation affecting interstate commerce as follows: "Where the statute regulates even-handedly to effectuate a legitimate local public interest, and its effects on interstate commerce are only incidental, it will be upheld unless the burden imposed on such commerce is clearly excessive in relation to the putative local benefits. [Citation.] If a legitimate local purpose is found, then the question becomes [*407] one of degree. And the extent of the burden that will be tolerated will of course depend on the nature of the local interest involved, and on whether it could be promoted as well with a lesser impact on interstate activities. Occasionally the Court has candidly undertaken a balancing approach in resolving these issues [citation], but more frequently it has spoken in terms of 'direct' and 'indirect' effects and burdens. [Citation.]" ([Pike v. Bruce Church, Inc., supra, 397 U.S. 137, 142 \[25 L.Ed.2d 174, 178\]](#); see also [Hughes v. Oklahoma \(1979\) 441 ****671 U.S. 322, 336 \[60 L.Ed.2d 250, 262, 99 S.Ct. 1727\]](#).) In applying this mode of analysis, I bear in mind that federal antitrust laws are applicable to professional football ([Radovich, supra, 352 U.S. at p. 452 \[1 L.Ed.2d at p. 461\]](#)), and that federal decisions under the Sherman Act are applicable in state antitrust [***388] cases brought under the Cartwright Act ([Mailand v. Burkle, supra, 20 Cal.3d 367, 373.](#))

[**695] With respect to the requirement that the state law regulate "even-handedly," it is the rule that the burden to show discrimination rests on the party challenging the state regulation. ([Hughes v. Oklahoma, supra, at p. 336 \[60 L.Ed.2d at p. 262\]](#).) This question needs no extended discussion as the Chargers do not contend the Cartwright Act discriminates between interstate and intrastate commerce. Clearly, this state's **antitrust law** is nondiscriminating. Because the Cartwright Act applies both to interstate and intrastate commerce, "the controlling question is whether the incidental burden imposed on interstate commerce by [the state] is 'clearly excessive in relation to the putative local benefits.'" ([Minnesota v. Clover Leaf Creamery \[****681 Co. \(1981\) 449 U.S. 456, 472 \[66 L.Ed.2d 659, 674, 101 S.Ct. 715\]](#), quoting from [Pike v. Bruce Church, Inc., supra, 397 U.S. 137, 142 \[25 L.Ed.2d 174, 178\]](#).) Though this is the central question before us, the majority do not balance California's interest in preventing unfair trade practices within its borders against the asserted burden on professional football's interstate operations and its need for nationally uniform antitrust regulation.

It is not open to dispute that California has a legitimate interest in protecting its citizens against unfair trade practices. Regulations which effectuate a legitimate public interest -- here antitrust regulation under the Cartwright Act -- are within the state's inherent police powers. ([Alfred M. Lewis, Inc. v. Warehousemen etc. Local No. 542, supra, 163 Cal.App.2d 771, 790.](#)) It has been consistently held that "the prevention of anti-competitive, monopolistic and predatory trade practices . . . is a legitimate exercise of the state's inherent police powers." ([United Nuclear, supra, 629 P.2d at p. 270;](#) citing [Giboney v. Empire Storage Co. \(1949\) 336 U.S. 490 \[93 L.Ed. 834, 69 S.Ct. 684\].](#))

The Chargers contend, [****69] though, that the state interest is outweighed because professional football is a unique activity of interstate commerce which [*408] requires nationally uniform governance. The Chargers argue that the nationwide character of the NFL league structure and operating practices prohibits the application of state antitrust laws.

The Supreme Court has rejected a similar argument, advanced by oil companies, that the nationwide character of the industry prohibited state regulation. The court stated: "[We] cannot adopt appellants' novel suggestion that because the economic market for petroleum products is nationwide, no State has the power to regulate the retail marketing of gas. Appellants point out that . . . the cumulative effect of this sort of legislation may have serious implications for their national marketing operations. While this concern is a significant one, we do not find that the Commerce Clause, by its own force, pre-empts the field of retail gas marketing [This] Court has only rarely

held that the Commerce Clause itself pre-empts an entire field from state regulation, and then only when a lack of national uniformity would impede the flow of interstate goods [****70] In the absence of a relevant congressional declaration of policy, or a showing of a specific discrimination against, or burdening of, interstate commerce, we cannot conclude that the States are without power to regulate in this area." ([Exxon Corp. v. Governor of Maryland, supra, 437 U.S. 117, 128-129 \[57 L.Ed.2d 91, 101-102\].](#))

The *Exxon* analysis applies with equal force here. If we were to insulate football from this state's antitrust laws on the basis of its "national character," we would necessarily have to exempt all businesses engaged in multistate activities. The Chargers' arguments, carried to their logical extension, would severely restrict the applicability of the Cartwright Act since a large segment of this nation's businesses would be immunized from state antitrust regulation as soon as their activities became "national" in scope. Thus, "a very large area will be fenced off in which the states will be practically helpless to protect their citizens . . ." [**389] ([Commonwealth v. McHugh, supra, 326 Mass. 249, 265.](#))

The majority apparently accept the Chargers' argument that professional football [**696] is unique in that the league [****71] structure imposes a "necessary interdependence" among the teams, each of which is required to function pursuant to a uniform set of national rules. Thus, the Chargers argue, subjecting California teams to differing standards would adversely affect, and possibly result in the fragmentation of, the league structure of the NFL. This argument would be quite persuasive if these were the facts before us, but, because they are not, we cannot properly express any opinion as to the resolution of a hypothetical conflict. There is no showing whatsoever in the present case that the Chargers have been subjected to more stringent or inconsistent requirements under state law. (Cf. [Ray v. Atlantic Richfield Co. \[*409\] \(1978\) 435 U.S. 151, 165 \[55 L.Ed.2d 179, 193, 98 S.Ct. 988\]](#) (preemption of state statute which undermined uniform federal standards by setting more stringent oil tanker design requirements).) To the contrary, the judgment below is entirely consistent with federal court decisions finding the same practices violative of the Sherman Act. As earlier noted, the trial court was aware of, and in fact relied in part on the federal decisions in *Smith v. Pro-Football, Inc.*, [supra, 593 F.2d 1173, Kapp v. National Football League, supra, 390 F.Supp. 73, and Mackey v. National Football League, supra, 543 F.2d 606.](#) Thus, there is uniformity of treatment under both state and federal law. It certainly cannot be argued that state antitrust enforcement has in this case frustrated the purpose of the Sherman Act when the trial court, in complete harmony with its federal counterparts, has simply condemned anticompetitive practices that have already been condemned under federal law. Because both jurisdictions have sought to achieve the same result -- elimination of trade restraints -- there is no "showing of a specific . . . burdening of . . . interstate commerce." ([Exxon, supra, at pp. 128-129 \[57 L.Ed.2d at p. 102\].](#)) While professional football may indeed be entitled to uniform treatment, it has been provided it by the trial court.²²

[****73] The Chargers fall back on one final argument: they contend that they need not show specific, actual conflict but only that *potential* conflict may arise after an initial state and then subsequent states impose their own differing regulations on the activity. I disagree. Numerous Supreme Court decisions have deferred to concurrent state and federal regulation where the record "contains nothing to suggest the existence of any . . . competing or conflicting local regulations" ([Huron Cement, supra, 362 U.S. 440, at p. 448 \[4 L.Ed.2d 852 at p. 859\]](#) or where the "record demonstrates no inevitable collision between the two schemes of regulation, despite the dissimilarity of standards." ([Florida Avocado, supra, 373 U.S. 132, at p. 143 \[10 L.Ed.2d 248 at p. 257\].](#)) Moreover, the limited scope of the present case militates against finding even a potential conflict. As noted earlier, the NFL rules and practices challenged by Partee have been substantially modified pursuant to the settlement in *Alexander*. There was evidence before the trial court that Partee was one of only four players who opted-out of the *Alexander* class and refused to covenant not to sue. Thus, there [****74] is potential for conflict *only* if a court in one of the remaining cases rules *in favor* of the NFL, and contrary to the present case and *Smith, Kapp, and Mackey*.

"Only if the burden on interstate commerce clearly outweighs the State's legitimate purposes does [state] regulation violate the Commerce Clause." [*410] ([Minnesota v. Clover Leaf Creamery Co. \(1981\) 449 U.S. 456, 474 \[66](#)

²²I do not mean to suggest that under different factual circumstances state antitrust regulation may not unreasonably burden interstate commerce. Such a case, however, is not before us.

L.Ed.2d 659, 675, 101 S.Ct. 715.) On the record before us, I conclude there is no specific burdening of interstate commerce; nor is there a showing of actual or potential conflict in an area where uniformity [***390] of regulation is required pursuant to a congressional declaration of policy. "[Where] the effect of the application of [**697] the Cartwright Act upon interstate commerce is to facilitate competition and not to place a restraint upon it, it is one which conforms with like policies of the federal government . . ." (Coors, supra, 37 Cal.App.3d at p. 666.)

In sum, the present case illustrates a successful accommodation of state and federal policies. I am simply unable to find that the stringent federal preclusion standard has been met in this case. [****75] ²³ Yet, this court today relies on the Chargers' unwarranted and unproven speculations as to a purported irreconcilable undermining of federal law without requiring them to meet their burden of clearly demonstrating that the application of the Cartwright Act in this case inexorably conflicts with the purposes underlying the federal act. The reasoning process which leads the majority to conclude that a citizen of this state is without power to enforce our state's antitrust laws because of the mere existence of concurrent federal regulation of professional football is both legally and factually defective. Though it may be correctly said that the national operations of professional football require uniform antitrust regulation, this alone does not justify ignoring the "thoroughly established" principle that where Congress has not expressly prohibited regulation of a given field, state law "is superseded *only* where the repugnance or conflict is so 'direct and positive' that the two acts cannot 'be reconciled or consistently stand together.'" (Kelly v. Washington (1937) 302 U.S. 1, 10 [82 L.Ed. 3, 10-11, 58 S.Ct. 87], italics added.) Our primary inquiry, then, should be [****76] whether state antitrust enforcement in this case is so repugnant that it inevitably undermines the purpose of the Sherman Act. As I have explained, we simply have no basis for concluding that state regulation frustrates federal law or policy as nothing in the present record shows that this state has or will impose more stringent antitrust requirements.

Although, "[in] the final analysis, there can be no crystal clear distinctly marked formula" (Hines v. Davidowitz, supra, 312 U.S. at p. 67 [85 L.Ed. at p. 587]), my review of the case law compels me to conclude -- notwithstanding the aberrant *Flood* decision -- that there is a [****77] heavy presumption against preemption where state regulation seeks to protect the vital interests [*411] of state citizens. By reversing the normal presumption against finding federal preemption, the majority ignore the fact that state enforcement here promotes the very policy goals underlying the enactment of the Sherman Act. Accordingly, under the factual circumstances before us, I cannot agree that the commerce clause precludes state antitrust regulation. I would hold that the trial court had jurisdiction to apply the Cartwright Act to professional football.

For the foregoing reasons I would affirm the judgment.

End of Document

²³ "The test of whether both federal and state regulations may operate, or the state regulation must give way, is whether both regulations can be enforced without impairing the federal superintendence of the field, not whether they are aimed at similar or different objectives." (Florida Avocado Growers v. Paul, supra, 373 U.S. at p. 142 [10 L.Ed.2d at p. 257].)

Energy & Utilities Law > Utility Companies > General Overview

HN5 **Utility Companies, Rates**

Pennsylvania law requires utilities to file all tariffs, defined by [66 Pa. Cons. Stat. § 1302](#) as all rules, regulations, practices or contracts involving any rates, with the Pennsylvania Public Utility Commission.

Energy & Utilities Law > Utility Companies > Rates > General Overview

HN6 **Utility Companies, Rates**

Rates may not be preferential to any person, corporation or municipal corporation, nor may a public utility unreasonably discriminate between localities or classes of service. [66 Pa. Cons. Stat. § 1304](#). A retail rate may not go into effect until the Pennsylvania Public Utility Commission approves it.

Energy & Utilities Law > Utility Companies > Rates > General Overview

[**HN7**](#) Utility Companies, Rates

The code mandates, as does its federal counterpart, that the utility give sixty days notice to the Pennsylvania Public Utility Commission (PPUC) before changing any existing or established rate. [66 Pa. Cons. Stat. § 1308\(a\)](#). Upon complaint or upon its own motion, the PPUC may order a hearing to consider the lawfulness of a proposed rate change. Absent an order permitting a proposed tariff to become effective, the proposed rate is automatically suspended for up to seven months following the sixty-day notice period. [66 Pa. Cons. Stat. § 1308\(d\)](#). If an order has not been made prior to the expiration of the seven-month period, the proposed rate takes effect, subject to refund.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

Civil Procedure > ... > Pleadings > Amendment of Pleadings > General Overview

[**HN8**](#) Amendment of Pleadings, Leave of Court

Leave to amend pleadings out of time under [Fed. R. Civ. P. 15\(a\)](#) is discretionary with the trial court. In exercising its discretion, the court may consider the following factors: undue delay, bad faith or dilatory motive on the movant's part, repeated failure to cure deficiencies by previous amendments, undue prejudice to the opposing party by virtue of the allowance of the amendment, and futility of the amendment.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > General Overview

[**HN9**](#) Pleadings, Amendment of Pleadings

There are additional considerations when a plaintiff files a motion to amend after the defendant has moved for summary judgment. In such a case, the motion to amend will not be granted unless the party seeking amendment can show not only that the proposed amendment has "substantial merit," but also come forward with "substantial and convincing evidence" supporting the newly asserted claim.

Opinion by: McCUNE

Opinion

[*554] Memorandum

McCUNE, D.J.:

We consider Pennsylvania Power Company's second motion for summary judgment and plaintiff's motion for leave to amend the complaint. We previously considered defendant's motion to dismiss, which was treated, in part, as one for summary judgment pursuant to [Fed. R. Civ. P. 12\(b\)\(6\)](#), in [Borough of Ellwood City v. Pennsylvania Power Company, 462 F. Supp. 1343 \(W.D. Pa. 1979\)](#). We incorporate by reference our prior opinion in this matter. For the reasons stated [*2] below, defendant's present motion will be granted in part and denied in part, and plaintiff's motion to amend will be denied.

Plaintiffs, Boroughs of Ellwood City and Grove City (hereinafter Boroughs), are municipal corporations of Pennsylvania located within the service area of defendant, Pennsylvania Power Company (hereinafter Penn Power). Plaintiffs sell electric power at retail to consumers within their respective corporate boundaries. The power that plaintiffs sell is acquired through wholesale purchases from Penn Power, as neither borough has any generation or transmission facilities. Defendant Penn Power has been a wholly-owned subsidiary of Ohio Edison Company since 1944. Penn Power directly services consumers in 137 communities and also sells energy for resale to five municipalities, including plaintiffs.

Penn Power's wholesale rates are regulated by the Federal Energy Regulatory [*555] Commission (hereinafter FERC) ¹ pursuant to the Federal Power Act, [16 U.S.C. § 824 et seq.](#) (& Supp. V). Penn Power's retail rates are regulated by the Pennsylvania Public Utility Commission (hereinafter PPUC or Commission) pursuant to the Public Utility Code (hereinafter Code), [*3] [66 Pa. C.S. § 101 et seq.](#)

[HN1](#) All rates subject to FERC's jurisdiction are required to be just and reasonable and not unduly discriminatory or preferential. [16 U.S.C. § 824d\(a\)](#) and [\(b\)](#). [HN2](#) Penn Power is required to file schedules with FERC listing all wholesale rates, the classifications, practices and regulations affecting the rates, and all contracts relating to the rates. [16 U.S.C. § 824d\(c\)](#). [HN3](#) Pursuant to 16 U.S.C. (Supp. V) [§ 824d\(d\)](#), Penn Power must give sixty days notice to FERC and the public before modifying its wholesale rates. In response to a complaint, or on its own initiative, [HN4](#) FERC is empowered by [16 U.S.C. § 824d\(e\)](#) to order a hearing to consider the lawfulness of a filed rate change and authorized to suspend the proposed change for a period not to exceed five months beyond the [*4] time when the rate would otherwise go into effect. If a hearing is not ordered, the new rate takes effect at the end of the sixty-day notice period. Pursuant to [16 U.S.C. § 824d\(e\)](#), if a hearing is not concluded before the expiration of the suspension period, the proposed rate takes effect. Any portion of the increase subsequently determined to be unjustified is then subject to refund with interest.

[HN5](#) Pennsylvania law requires utilities to file all tariffs, defined by [66 Pa. C. S. § 1302](#) as all rules, regulations, practices or contracts involving any rates, with the PPUC. [66 Pa. C. S. § 1302](#). ² [HN6](#) Rates may not be preferential to any person, corporation or municipal corporation, nor may a public utility unreasonably discriminate between localities or classes of service. [66 Pa. C. S. § 1304](#). A retail rate may not go into effect until the PPUC approves it. [HN7](#) The Code mandates, as does its federal counterpart, that the utility give sixty days notice to the PPUC before changing any existing or established rate. [66 Pa. C. S. § 1308\(a\)](#). Upon complaint or upon its own motion, the PPUC may order a hearing to consider the lawfulness of a proposed rate change. Absent an order

¹ References to FERC during the time prior to October 1, 1977, should be construed as referring to the Federal Power Commission, which had essentially the same statutory authority as FERC prior to the above-noted date.

² At the time the instant complaint was filed, the predecessor statutes to the above-cited provisions were in effect and governed public utilities' retail rates. Except where specifically noted, the provisions of the Code are substantially identical to those of the prior act.

permitting [**5] a proposed tariff to become effective, the proposed rate is automatically suspended for up to seven months following the sixty-day notice period. [66 Pa. C. S. § 1308\(d\)](#). If an order has not been made prior to the expiration of the seven-month period, the proposed rate takes effect, subject to refund. *Id.*

Prior to October 7, 1977, the Pennsylvania Public Utility Code had no provision for giving effect to a proposed rate-change should the Commission fail to conclude its hearing and/or reach a decision within the suspension period. However, the PPUC was authorized to suspend rate increases for up to nine months. 66 P. S. § 1148(b). The rate in force at the time the proposed rate was filed remained in effect, unless the PPUC ordered [**6] that a temporary rate be collected, until the time that the Commission rendered a final decision. *Id.* The collection was subject to refund if it were greater than the subsequently approved rate. If it were less than the approved rate, a surcharge could be added. 66 P. S. §§ 1150(e) and 1153(a).

On October 4, 1977, plaintiffs filed a complaint alleging that Penn Power had violated the Sherman Act, [15 U.S.C. §§ 1](#) and [2](#), and the Robinson-Patman Act, [15 U.S.C. § 13\(a\)](#). The complaint alleges that Penn Power imposed an anticompetitive price squeeze upon Boroughs by manipulating the relationship between its wholesale rate to plaintiffs and its retail industrial rates. We stayed the rate-related aspects of Boroughs' claim until the determination of the rate [**556] proceedings then-pending before FERC. [Borough of Ellwood City v. Pennsylvania Power Co., supra](#). Boroughs also allege in their complaint that Penn Power prevented plaintiffs from gaining access to alternative sources of power, refused to deal with Boroughs, adopted a policy of denying access by municipal electric systems to nuclear generating facilities and refused to wheel service to Boroughs. These claims were [**7] dismissed by our prior opinion. *Id.*

We initially address Boroughs' motion for leave to amend the complaint. Plaintiffs wish to amend para. 14 to state (A) defendant's actions, as indicated in the 1977 and 1981 docket proceedings before FERC, constitute unlawful violations of the Federal Power Act and the Sherman Act, and (B) defendant's wheeling rate filed with FERC on November 1, 1982, in response to Grove City Borough's proposed Shenango River Hydroelectric Project, constitutes an unlawful constructive refusal to wheel and refusal to deal in violation of the Federal Power Act and the Sherman Act.

[HN8](#) [↑] Leave to amend pleadings out of time under [Fed. R. Civ. P. 15\(a\)](#) is discretionary with the trial court. [Foman v. Davis, 371 U.S. 178, 9 L. Ed. 2d 222, 83 S. Ct. 227 \(1962\)](#). In exercising its discretion, the court may consider the following factors: undue delay, bad faith or dilatory motive on the movant's part, repeated failure to cure deficiencies by previous amendments, undue prejudice to the opposing party by virtue of the allowance of the amendment, and futility of the amendment. [Addington v. Farmer's Elevator Mut. Ins. Co., 650 F.2d 663 \(5th Cir. 1981\)](#). However, [HN9](#) [↑] there [**8] are additional considerations when a plaintiff files a motion to amend after the defendant has moved for summary judgment, as in the present case.³ In such a case, the motion to amend

will not be granted unless the party seeking amendment can show not only that the proposed amendment has "substantial merit," [Verhein v. South Bend Lathe, Inc., 598 F.2d 1061, 1063 \(7th Cir. 1979\)](#), but also come forward with "substantial and convincing evidence" supporting the newly asserted claim. [Artman v. International Harvester, Inc., 355 F. Supp. 476, 481 \(W.D. Pa. 1972\)](#). . . . This more demanding burden, which the party seeking amendment bears at this procedural juncture, evolves from the truism that "prejudice to the non-moving party is the touchstone for denial of the amendment." [Cornell & Co., Inc. v. Occupational Safety and Health Administration, 573 F.2d 820 \(3d Cir. 1978\)](#).

[Carey v. Beans, 500 F. Supp. 580, 582 \(E.D. Pa. 1980\)](#), aff'd mem., 659 F.2d 1065 (3d Cir. 1981). [HN10](#) [↑] The trial court's decision is not subject to reversal except for an abuse of discretion. [Heyl & Patterson International v. F.D. Rich Housing, 663 F.2d 419 \(3d Cir. 1981\)](#), cert. [**9] denied, 455 U.S. 1018, 102 S. Ct. 1714, 72 L. Ed. 2d 136 (1982).

³ Defendant's motion for summary judgment was filed February 14, 1983. Plaintiff's motion for leave to amend the complaint was filed February 18, 1983.

The proposed amendment alleging violations of the Sherman Act would cause defendant to suffer undue prejudice because it would cause discovery, now completed, to begin again. We note, *infra*, that discovery in this complex case has been extensive and lengthy. Plaintiffs note, at p. 38 of their brief in opposition to the motion for summary judgment, that should the amendment be permitted, they will begin discovery concerning Penn Power's actions regarding the Shenango hydro project. To require defendant, at this late date, to begin discovery anew is indefensible. See [*Roberts v. Arizona Bd. of Regents, 661 F.2d 796 \(9th Cir. 1981\)*](#) (Court of Appeals upheld district court's refusal to permit amendment of complaint, where the issue was raised at the "eleventh hour," after discovery was [**10] virtually complete, and the defendant's motion for summary judgment was pending before the court). See also [*Mende v. Dun & Bradstreet, Inc., 670 F.2d 129 \(9th Cir. 1982\)*](#). Accordingly, the motion for leave to amend the complaint is denied.

Turning to the motion for summary judgment, the allegations of the complaint pertinent to the claim of price squeeze accuse [*557] defendant of discriminating in price between rates applicable to municipal wholesale customers and those charged retail industrial customers. Boroughs allege that they pay more, as wholesale customers, than retail industrial customers pay for similar service. The effect of this rate differential is alleged, *inter alia*, to prevent plaintiffs from competing with Penn Power for industrial customers.

The proceedings before FERC required two separate opinions and orders because the administrative law judge had severed the price squeeze issue from the issues of cost of service, rate design and compliance. The latter were considered in Phase I, Opinion No. 89, 21 F. P. S. 5-37, issued July 18, 1980. The price squeeze claim was dealt with in Phase II, Opinion No. 157, 23 F. P. S. 5-928, issued December 21, [**11] 1982. FERC denied Penn Power's and Boroughs' requests for rehearing in Opinion No. 157-A, 24 F. P. S. 5-115, issued February 18, 1983. A petition for review has been filed. [*Boroughs of Ellwood City v. FERC, 701 F.2d 266 \(D.C. Cir. 1983\)*](#).

As noted above, FERC considered, in Opinion No. 157, whether Penn Power engaged in an anticompetitive price squeeze. Boroughs argued to FERC, and argue here, that the disparity between the wholesale rate they paid, and the retail rate charged to industrial customers, created a price squeeze. Its effect was to preclude competition between Boroughs and Penn Power. In resolving this claim, FERC compared the rates of return indicated by consistent cost of service analyses of the wholesale and relevant retail rates. FERC concluded that a disparity of rates of return, which was unexplained by differences in cost factors, existed during the period from September 11, 1977, to September 1, 1978. However, FERC also determined that factual circumstances existed that justified the tolerance of the price discrimination.

As noted previously, Penn Power's retail rates are governed by the PPUC, and wholesale rates are governed by FERC. Thus, different [**12] statutes and agencies govern the rates and the dates on which changes in the rates may be implemented. This dual utility rate regulation was a significant factor in FERC's determination that the price disparity should be tolerated in the instant case.

Defendant alleged that it needed rate relief immediately to maintain its construction program. Therefore, it filed a proposed wholesale rate increase in accordance with the Federal Power Act. However, Penn Power did not simultaneously file its proposed retail rate increase with the PPUC, so that it could take advantage of the newly enacted Public Utility Code. As we noted *supra*, a change in the Code provided that when the PPUC failed to reach a decision before the expiration of the suspension period, the utility's proposed rate would take effect, subject to refund. This is a departure from the prior statute which required that either the rate in force at the time the proposed rate was filed, or a temporary rate imposed by the Commission, remain in effect until the PPUC concluded its investigation and reached a decision.

Therefore, Penn Power's decision to delay its retail rate filing in 1977, provided it assurance of [**13] either a prompt Commission ruling on its rate application (within the seven month suspension period) or the right to implement its proposed rates in full, subject to refund, after the suspension period. Had Penn Power filed prior to October 7, 1977, it would have faced the possibility of an even longer suspension period and temporary rates thereafter that may have been substantially less than the proposed rate relief.

Opinion No. 157-A, *supra*, at 5-115-116 (footnote omitted).

FERC thus concluded that by waiting to file its retail tariff, so as to take advantage of the newly enacted Code, Penn Power actually mitigated the price squeeze. FERC reasoned that by delaying the state filing, Penn Power may have shortened the duration of the disparities in its wholesale and retail rates that would have resulted from earlier, simultaneous filings. FERC therefore held that although there was a [*558] price squeeze for eleven and one-half months, Penn Power demonstrated mitigating circumstances that rendered the price discrimination not undue.

We are now asked to give full effect to the decision of the Federal Energy Regulatory Commission in Opinions Nos. 157 and 157-A, and [**14] thereby grant Penn Power's motion for summary judgment. Following argument on the motion and extensive research, we conclude that the motion must be denied even though FERC has decided the main issue before the court.

Penn Power cites the Supreme Court's decision in *FPC v. Conway Corp.*, 426 U.S. 271, 96 S. Ct. 1999, 48 L. Ed. 2d 626 (1976), in which the Court concluded that [HN11](#)[¹⁴] FERC (then the Federal Power Commission) has the authority and the duty under the Federal Power Act to consider allegations of price squeeze in a ratemaking proceeding. The Supreme Court stated,

The Commission thus cannot so easily satisfy its obligation to eliminate unreasonable discriminations or put aside its duty to consider whether a proposed rate will have anticompetitive effects. . . . The Commission must arrive at a rate level deemed by it to be just and reasonable, but in doing so it must consider the tendered allegations that the proposed rates are discriminatory and anticompetitive in effect.

[FPC v. Conway, supra, at 278-79.](#)

The *Conway* Court made it clear that FERC is empowered to determine "whether a utility's wholesale rates [are] discriminatory and noncompetitive when [**15] compared with a utility's non-jurisdictional retail rates." Note, *The Applicability of Antitrust Laws to Price Squeezes in the Electric Utility Industry*, 54 St. John's L. Rev. 103, 110 (1979) (hereinafter Note, *The Applicability of Antitrust Laws*). This relationship between wholesale and retail rates and their potential for working an anticompetitive effect is the essence of the price squeeze issue presently before us.

FERC and the parties expended considerable time and expense developing and considering this case. Discovery commenced in September, 1977, producing thousands of pages of material. The hearing before FERC lasted over four weeks, producing thousands of pages of testimony and exhibits. FERC made a thorough analysis of the relationship between the rates and the dual regulation to which Penn Power is subject. Penn Power argues that the court should not second guess FERC's determination, especially in light of its particular expertise in the areas of rate-making and anti-competitive price squeezes. The Supreme Court's pronouncement in *Conway*, Penn argues, would be a hollow directive if this court should now undertake the identical analysis and consideration [**16] recently completed by FERC. Both parties, it is argued, will have the benefit of appellate review by virtue of the District of Columbia Circuit Court's consideration of FERC's decision on appeal.

FERC has determined that although there existed a price disparity for eleven and one-half months, it is explained and justified by the effects of dual regulation to which Penn Power is subject. Penn Power argues that the Boroughs should not be entitled to relitigate the factual or legal issues determined by FERC under the fundamental principles of issue preclusion expressed by the [*Restatement \(Second\) of Judgments* § 27](#) (1980):

When an issue of fact or law is actually litigated and determined by a valid and final judgment, and the determination is essential to the judgment, the determination is conclusive in a subsequent action between the parties, whether on the same or a different claim.

See also [*Deaktor v. Henner*, 517 F. Supp. 26 \(N.D. Ill. 1980\)](#) (District court will regard as conclusive the determination of the Commodity Future Trading Commission that the Chicago Mercantile Exchange did not violate the Commodity Exchange Act. The court had granted a stay and retained [**17] jurisdiction to permit the administrative hearing before the Commission, and granted summary judgment based upon principles of issue preclusion). [HN12](#)[¹⁵] Issue preclusion has not been restricted to final judgments of courts, [*559] but has been

applied, in appropriate circumstances to administrative agencies. [United States v. Utah Construction Co., 384 U.S. 394, 86 S. Ct. 1545, 16 L. Ed. 2d 642 \(1966\)](#). There the Court stated,

HN13[] When an administrative agency is acting in a judicial capacity and resolves disputed issues of fact properly before it which the parties have had an adequate opportunity to litigate, the courts have not hesitated to apply *res judicata* to enforce repose. . . .

In the present case the Board was acting in a judicial capacity . . . , the factual disputes resolved were clearly relevant to issues properly before it, and both parties had a full and fair opportunity to argue their version of the facts and an opportunity to seek court review of any adverse findings. There is, therefore, neither need nor justification for a second evidentiary hearing on these matters already resolved between these two parties.

Id., at 422 (footnote omitted).

An [**18] oft-repeated justification for the use of issue preclusion is that the interest of the state requires that there be an end to litigation, e.g., [Reed v. Allen, 286 U.S. 191, 76 L. Ed. 1054, 52 S. Ct. 532 \(1932\)](#). Related to this is the premise that matters once determined in an adversary action shall be deemed conclusive. The former is probably not of prime importance here. However, the latter is argued by Penn Power to be highly relevant. Defendant notes the extensiveness of discovery before FERC and the length and extent of the hearing before the federal Commission. In [Montana v. United States, 440 U.S. 147, 59 L. Ed. 2d 210, 99 S. Ct. 970 \(1979\)](#), the Court stated,

To preclude parties from contesting matters that they have had a full and fair opportunity to litigate protects their adversaries from the expense and vexation attending multiple lawsuits, conserves judicial resources, and fosters reliance on judicial action by minimizing the possibility of inconsistent decisions.

Id., at 153-54 (footnote omitted).

Penn Power is correct that in the proceeding before FERC, and in the present matter, the issue is identical: Whether Penn Power imposed an anti-competitive [**19] price squeeze upon Boroughs by manipulating the relationship between its wholesale rate to plaintiffs and its retail rates to industrial customers. However, applicable precedent compels our conclusion that the proceedings before FERC do not preclude our consideration of Boroughs' price squeeze claims under the antitrust laws. Initially, we rely upon our prior decision in this case. There we stated,

HN14[] The mere fact that FERC may consider arguments based on antitrust concepts does not preclude later antitrust review. There is no certainty that use of the limited powers of the FERC can fully remedy an antitrust violation. Mere consideration of a claim does not rise to the level of complete disposition of the underlying violation.

* * *

The actual determination of the legal structure of a price squeeze claim and its presence or absence here must remain in this court. (Citation omitted). Further, this court has remedial powers, in particular, injunctive and treble damage relief, which are not held by the FERC.

[Borough of Ellwood City v. Pennsylvania Power Co., supra, at 1349, 1351](#).

Although the Third Circuit Court of Appeals has not considered similar [**20] claims. In [City of Kirkwood v. Union Electric Co., 671 F.2d 1173 \(8th Cir. 1982\)](#), cert. denied, 459 U.S. 1170, 103 S. Ct. 814, 74 L. Ed. 2d 1013 (1983), the Eighth Circuit Court of Appeals reversed the district court holding, *inter alia*, that FERC did not have exclusive jurisdiction over the municipality's price squeeze claim. *Kirkwood* might be distinguished because the court did not have the benefit of FERC's ruling on the price squeeze issue and was not considering whether to accord it conclusive effect. Rather, the controversy centered over which forum had exclusive jurisdiction to hear the dispute. However, the case is [*560] sufficiently analogous to provide guidance in our disposition of the present motion.

Similarly, in [City of Mishawaka v. Indiana & Michigan Electric Co., 560 F.2d 1314 \(7th Cir. 1977\)](#), cert. denied, 436 U.S. 922, 56 L. Ed. 2d 765, 98 S. Ct. 2274 (1978), the Seventh Circuit Court of Appeals considered and rejected the argument that FERC had exclusive jurisdiction over a price-squeeze claim. *Mishawaka*, like *Kirkwood*,

determined that the federal courts should proceed with allegations of antitrust violations involving [**21] price-squeeze claims despite the pendency of the same allegations before FERC. Again, the *Mishawaka* court did not confront the precise issue in the present case, but it is sufficiently analogous to merit our consideration. See also *Cities of Batavia v. FERC*, 217 U.S. App. D.C. 211, 672 F.2d 64 (D.C. Cir. 1982); *City of Groton v. Connecticut Light & Power Co.*, 497 F. Supp. 1040 (D. Conn. 1980), aff'd in part, 662 F.2d 921 (2d Cir. 1981); Note, *The Applicability of Antitrust Laws*, *supra*.

We think it clear that jurisdiction over the price-squeeze claim must remain in this court. As one commentator stated,

While the considerations relevant to rate-making under the Federal Power Act may differ from those used to determine a violation of the Sherman Act, the prophylactic purposes of the schemes are the same: to curb discriminatory or anti-competitive business practices. The statutory frameworks, therefore, may complement each other. Yet, because the FERC cannot provide a remedy for injury due to the existence of a price squeeze and may be unable to prevent future occurrences, it is suggested that the sole effective means of redress available to municipally-owned [**22] utilities is under the antitrust laws.

Note, *The Applicability of Antitrust Laws*, *supra*, at 123 (footnotes omitted) (emphasis in original).

We conclude that issue preclusion or collateral estoppel does not apply conclusively because Congress has placed antitrust jurisdiction in the district courts and because the courts can afford relief that FERC cannot provide. Further, we are uncertain that the mitigation found by FERC is a defense to antitrust violations. The view of the D.C. Circuit would be helpful but it may be sometime before it is available. Thus, the price-squeeze issue remains viable in this court.

However, there are portions of Boroughs' claims which are no longer viable. The claim under § 1 of the Sherman Act which alleges a combination or conspiracy in restraint of trade, and the portion of the claim under § 2 of the Sherman Act which alleges that Penn Power conspired to monopolize have not been supported by the extensive discovery that has taken place. Summary judgment as to those claims must be granted, for "it is now settled that HN15[¹] summary judgment is appropriate in those antitrust cases where plaintiffs, after having engaged in extensive discovery, [**23] fail to produce 'significant probative evidence' in support of the allegations in their complaint. *First National Bank of Arizona v. Cities Service Co.*, 391 U.S. 253, 289-90, 88 S. Ct. 1575, 1593, 20 L. Ed. 2d 569 (1968)." *Zenith Radio Corp. v. Matsushita Elec. Indus. Co.* 513 F. Supp. 1100, 1140 (E. D. Pa. 1981), appeal filed, August 24, 1981 (Nos. 81-2331, 81-2332, 81-2333), argued, October 22, 1982. See also *Mid-South Grizzlies v. National Football League*, 550 F. Supp. 558 (E. D. Pa. 1982).

"The HN16[¹] core requirement of § 1 of the Sherman Act . . . is that there be a 'contract, combination, or conspiracy' -- i.e., an agreement -- in restraint of trade." *Id.*, at 1145. Boroughs' sole evidence of conspiratorial action is based upon an inference they have drawn from the fact that Penn Power is owned by Ohio Edison and the fact that the two companies have certain common directors. This supposition is clearly inadequate to establish a conspiracy under the Sherman Act. Evidence of a conspiracy does not exist simply because Boroughs represent that it does.

Although not limited to situations involving a conspiracy, *Higbie v. Kopy-Kat Inc.*, 391 F. Supp. 808, [**24] 810 (1975), § HN17[¹] 1 of the [*561] Sherman Act requires proof of concerted action. *F.T.C. v. Lukens Steel Co.*, 454 F. Supp. 1182 (D. D.C. 1978). The mere fact that Penn Power and its parent corporation share some common directors, and that defendant is a member of CAPCO ⁴ is not sufficient evidence to show the necessary concerted action. "Unilateral action, no matter what its motivation, cannot violate § 1." *Edward J. Sweeney & Sons, Inc. v. Texaco*, 637 F.2d 105, 111 (3d Cir. 1980) (citations omitted). Plaintiffs' argument is akin to the argument that mere active membership in a trade association constitutes an agreement. In *Zenith Radio Corp. v. Matsushita Elec.*

⁴CAPCO consists of Ohio Edison, Penn Power, Duquesne Light, Toledo Edison and Cleveland Electric Illuminating Companies. "The group was formed in 1967 to enable the members to coordinate installation of generation and transmission in order to take advantage of economies of scale." Complaint, para. 5.

Indus. Co., supra, the plaintiffs intimated that the defendants' membership in the Electronic Industries Association of Japan, requiring as it did defendants' participation in meetings as conferees, gave rise to an inference of collusive activity. The court rejected such a claim, noting that mere membership, without more, is insufficient to give rise to an inference of conspiracy. *Id.* at 1149 and cases cited therein.

[**25] Similarly, in the present case, the mere assertion that Penn Power is a member of CAPCO, without more, is insufficient to give rise to an inference of conspiratorial conduct. "Opportunities to conspire are not probative of whether firms did in fact conspire; an opportunity to conspire will exist always." *Id.*, quoting, *Brown v. Cameron-Brown Co.*, 1980-2 TRADE CASES P 63,400 at p. 76,040 (E. D. Va. 1980). Therefore, the claims based upon a conspiracy or combination theory under [§§ 1](#) and [2](#) of the Sherman Act may not be maintained. We will grant Penn Power's motion for summary judgment as to these claims.

Finally, we deny Penn Power's motion for summary judgment concerning the Robinson-Patman Act claims as there exist disputes over material facts.

[HN18](#) [↑] The Robinson-Patman Act prohibits discrimination in price "between different purchasers of commodities of like grade and quality . . . where the effect of such discrimination may be substantially to lessen competition or tend to create a monopoly in any line of commerce." [15 U.S.C. § 13\(a\)](#). Defendant first argues that its motion must be granted because electricity is not a commodity within the jurisdictional reach of the Robinson-Patman [**26] Act. It relies upon [City of Newark v. Delmarva Power & Light Co.](#), 467 F. Supp. 763 (D. Del. 1979), wherein the District Court of Delaware determined that "the wording of the [Robinson-Patman Act], its legislative history, and the regulation of the electric utility industry which existed at the time of the adoption of the . . . Act, all suggest that 'commodity' was not intended to encompass electric power." [Id. at 773](#).

We, however, agree with the Eighth Circuit Court of Appeals in [City of Kirkwood v. Union Electric Co., supra](#). In *Kirkwood*, the court noted that although the Robinson-Patman Act does not cover real property, intangibles or services, electricity does not fall into any of the above classifications. "Electric power can be felt, if not touched. It is produced, sold, stored in small quantities, transmitted, and distributed in discrete quantities. We hold that [HN19](#) [↑] electricity is a commodity for purposes of the Robinson-Patman Act. [HN20](#) [↑] The antitrust laws should not be given a restrictive interpretation." [Id. at 1181-82](#) (footnote omitted). See also [City of Gainesville v. Florida Power & Light Co.](#), 488 F. Supp. 1258 (S. D. Fla. 1980). (The court analyzed the [**27] Robinson-Patman Act's legislative history, relevant case law and the nature of electricity, and concluded that electricity is a commodity entitled to the protection of the Robinson-Patman Act.)

Penn Power argues that plaintiffs' Robinson-Patman claim is barred by FERC's finding that defendant's customer classifications are appropriate, and Opinion No. 157's conclusion that the price discrimination alleged by plaintiffs is cost justified. We [*562] held, *supra*, that FERC's conclusions are not to be given preclusive effect.

Defendant also asserts that the sales of electric power about which plaintiffs complain were not made "in commerce" within the meaning of the Robinson-Patman Act. Penn Power bases its argument on the fact that it is located wholly within Pennsylvania and serves only Pennsylvania customers. Thus, it contends none of its sales to customers cross state lines. We reject this argument and agree with Boroughs that [HN21](#) [↑] intrastate sales are subject to the Robinson-Patman Act as long as the sales remain in the flow of the interstate commerce.

In a Seventh Circuit Court of Appeals case, [Dean Milk Co. v. FTC](#), 395 F.2d 696 (7th Cir. 1968), the court held that [**28] milk sold from processing plants located within the state, which had been mixed with milk purchased from out-of-state producers, was in commerce for purposes of the Robinson-Patman Act. Accord [Foremost Dairies, Inc. v. FTC](#), 348 F.2d 674 (5th Cir.), cert. denied, 382 U.S. 959, 15 L. Ed. 2d 362, 86 S. Ct. 435 (1965).

Penn Power, it is alleged, purchases electricity out-of-state which flows across state lines and is subsequently sold to plaintiffs and other customers of defendant. This is sufficient to show that Penn Power's sales of electric power cross state lines. [Gulf Oil Corp. v. Copp Paving Co.](#), 419 U.S. 186, 42 L. Ed. 2d 378, 95 S. Ct. 392 (1974).

570 F. Supp. 553, *562 (1983 U.S. Dist. LEXIS 14190, **28

We conclude, therefore, that Boroughs' Robinson-Patman claims withstand Penn Power's attack and we deny defendant's motion as it relates to these claims.

An order follows.

[HN4](#) [down] Exemptions & Immunities, McCarran-Ferguson Act Exemption

The McCarran-Ferguson Act, [15 U.S.C.S. § 1012](#), creates an antitrust exemption for the business of insurance. It provides an exemption from the antitrust laws for the business of insurance, but only to the extent that such business is regulated by the state, and does not involve a boycott, coercion or intimidation.

Antitrust & Trade Law > Exemptions & Immunities > McCarran-Ferguson Act Exemption

[HN5](#) [down] Exemptions & Immunities, McCarran-Ferguson Act Exemption

The Supreme Court has set forth three factors to consider in determining whether a practice constitutes the business of insurance: (1) whether the practice has the effect of transferring or spreading the policyholders' risks; (2) whether the practice is an integral part of the policy relationship between the insurer and insured; and (3) whether the practice is limited to entities within the insurance industry.

Antitrust & Trade Law > Exemptions & Immunities > McCarran-Ferguson Act Exemption

[HN6](#) [down] Exemptions & Immunities, McCarran-Ferguson Act Exemption

The primary characteristic of the business of insurance is the transferring or spreading of risk. Provided that the risk spreading factor is present, the business of insurance is not limited to traditionally recognized areas of insurance. The practice of shifting the risk of pharmacy costs, as well as medical costs, qualifies as the business of insurance.

Antitrust & Trade Law > Exemptions & Immunities > McCarran-Ferguson Act Exemption

Insurance Law > Claim, Contract & Practice Issues > Allocation

Insurance Law > Claim, Contract & Practice Issues > General Overview

HN8 Exemptions & Immunities, McCarran-Ferguson Act Exemption

Practices aimed solely at cutting insurer's costs and have nothing to do with the allocation of risk are not part of the business of insurance.

Antitrust & Trade Law > Exemptions & Immunities > McCarran-Ferguson Act Exemption

Insurance Law > Industry Practices > General Overview

HN9 Exemptions & Immunities, McCarran-Ferguson Act Exemption

To be exempt under the McCarran-Ferguson Act, [15 U.S.C.S. § 1012](#), a practice must not only be the business of insurance, it must also be regulated by the state. It is not necessary to point to a state statute which gives express approval to a particular practice; rather, it is sufficient that a state regulatory scheme possess jurisdiction over the challenged practice.

Antitrust & Trade Law > Exemptions & Immunities > McCarran-Ferguson Act Exemption

Criminal Law & Procedure > ... > Crimes Against Persons > Coercion & Harassment > Elements

HN10 Exemptions & Immunities, McCarran-Ferguson Act Exemption

The McCarran-Ferguson Act, [15 U.S.C.S. § 1012](#), specifies that the antitrust exemption will not extend to any agreement to boycott, coerce, or intimidate, or act of boycott, coercion or intimidation.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

HN11 Sherman Act, Claims

Whatever the precise reach of the terms boycott, coercion, and intimidation, the decisions of the Court do not support the suggestion that they are coextensive with the prohibitions of the Sherman Act, [15 U.S.C.S. §§ 1,2](#). Thus, some additional act or agreement constituting boycott, coercion or intimidation would have to be shown to establish violation of the Sherman Act, [15 U.S.C.S. § 2](#).

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > Sherman Act > General Overview

[**HN12**](#) [blue icon] Sherman Act, Claims

A Sherman Act, [15 U.S.C.S. § 2](#) monopolization claim requires two principal elements in addition to antitrust injury: (1) possession of monopoly power in the relevant market, and (2) willful acquisition or maintenance of that power.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

[**HN13**](#) [blue icon] Monopolies & Monopolization, Attempts to Monopolize

The conduct element distinguishes lawful possession of monopoly power from unlawful possession of monopoly power. The Sherman Act, [15 U.S.C.S. § 2](#) proscribes monopolization; it does not render unlawful all monopolies.

Opinion by: SCHROEDER

Opinion

[*929] OPINION

SCHROEDER, Circuit Judge.

This is a protracted antitrust action by physicians against the insurance agent and carriers who provided medical malpractice insurance [^{**2}] to members of the Los Angeles County Medical Association. The question is whether the defendants' alleged domination of the medical malpractice insurance market in Southern California, through an agreement with the medical association, is immune from antitrust attack. The district court held that the defendants' conduct was the business of insurance and was regulated by the state. It therefore concluded that [*930] the antitrust claims were barred by the McCarran-Ferguson Act exemption to the antitrust laws, [15 U.S.C. § 1012](#). In addition, the court held that defendants' conduct did not fall within the boycott exception to that Act, [15 U.S.C. § 1013\(b\)](#). It granted summary judgment in favor of the defendants. We affirm for the reasons set forth below.

I. FACTS AND PROCEDURAL HISTORY

Plaintiffs-appellants Walter Feinstein, Jack Kriegsman, Leo Miller, Morton H. Pastor, and Jason I. Green, are doctors in Los Angeles County who at various times between 1963 and 1969 purchased medical malpractice insurance through defendant-appellee Nettleship Company. Nettleship was an underwriting manager for medical malpractice insurance, and was [**3] the approved agent for the Los Angeles County Medical Association (LACMA) throughout the relevant period. Defendant Pacific Indemnity was one of the insurance carriers. The other companies named in the complaint were reinsurers.

It is undisputed that at the time this lawsuit began, most professional medical liability insurance in California was written on a group basis. The doctors negotiated with the insurance company through local medical associations. The insurance company issued a master policy to the association, and the participating physicians, in turn, received certificates of insurance.

The facts in this case reflect that pattern. In a written agreement LACMA designated the Nettleship Company the "sole and exclusive agent approved by the association." Nettleship issued a master policy to LACMA and certificates of insurance to the covered doctors. In exchange for exclusive agency, Nettleship agreed not to limit coverage to low risk areas, but to include high risk specialties as required by the members. The agreement also addressed claims handling and provided for the revision of rates, pursuant to annual reports regarding Nettleship's net profits.

In order to buy insurance [**4] through Nettleship, a physician was required to be a member of LACMA, but LACMA members were free to purchase medical malpractice insurance elsewhere if they chose. For part of the period in issue, the "exclusivity" provision was not respected, for LACMA used an additional insurance agent. Nettleship, however, gained an increasing share of the medical malpractice insurance market in Southern California, and, during the late sixties it imposed substantial, successive rate increases. In 1969, plaintiffs filed their complaint in this case alleging conspiracy to monopolize and monopolization, price-fixing and tied sales, as well as boycott, fraud and coercion.

In 1971, the district court granted the defendants summary judgment on price-fixing and related claims, on the ground that insurance rate-setting was regulated by state law and thus fell within the exemption of the McCarran-Ferguson Act. [15 U.S.C. §§ 1011-15](#). In 1977, the district court granted summary judgment on the remaining antitrust claims, holding that the entire action was barred by the McCarran-Ferguson Act and that the plaintiff-physicians, as policyholders, lacked standing to raise the boycott [**5] exception in [15 U.S.C. § 1013\(b\)](#). The district court's holding on standing was dictated by our decision in [Addrisi v. Equitable Life Assurance Society of the United States, 503 F.2d 725 \(9th Cir. 1974\)](#), cert. denied, 420 U.S. 929, 43 L. Ed. 2d 400, 95 S. Ct. 1129 (1975). After the 1977 district court decision in this case, however, that aspect of *Addrisi* was overruled by [St. Paul & Marine Insurance Co. v. Barry, 438 U.S. 531, 98 S. Ct. 2923, 57 L. Ed. 2d 932 \(1978\)](#) which held that policyholders may invoke the boycott exception. In 1979, this court therefore remanded for reconsideration in light of *Barry*.

Following remand the district court in 1980 granted partial summary judgment for the defendants on plaintiffs' tying claims. In 1982, the district court granted summary judgment to defendants on all remaining issues on the ground that the action was barred by the McCarran-Ferguson Act and that the defendants' conduct did not constitute [**931] a boycott under [15 U.S.C. § 1013\(b\)](#). [HN1\[\]](#) [**6] There is no factual dispute and we review solely to determine whether defendants were entitled to judgment as a matter of law. [Clipper Express v. Rocky Mountain Motor Tariff Bureau, 690 F.2d 1240, 1250 \(9th Cir. 1982\)](#), cert. denied, 459 U.S. 1227, 103 S. Ct. 1234, 75 L. Ed. 2d 468 (1983).

II DISCUSSION

The McCarran-Ferguson Act provides that:

- (a) The business of insurance, and every person engaged therein, shall be subject to the laws of the several States which relate to the regulation or taxation of such business.
- (b) No act of Congress shall be construed to invalidate, impair, or supersede any law enacted by any State for the purpose of regulating the business of insurance. . . . *Provided*, that . . . the Sherman Act, and . . . the

Clayton Act, and . . . the Federal Trade Commission Act . . . shall be applicable to the business of insurance to the extent that such business is not regulated by state law.

[HN2](#) [15 U.S.C. § 1012.](#)

Section [HN3](#) [\[**7\]](#) 1013(b) of the McCarran-Ferguson Act provides that

Nothing contained in this act shall render the said Sherman Act inapplicable to any agreement to boycott, coerce, or intimidate, or act of boycott, coercion, or intimidation.

[HN4](#) [\[**8\]](#) The McCarran-Ferguson Act creates an antitrust exemption for the business of insurance which was prompted by the Supreme Court's departure in [United States v. South-Eastern Underwriters Ass'n, 322 U.S. 533, 64 S. Ct. 1162, 88 L. Ed. 1440 \(1944\)](#) from prior holdings that insurance is not a transaction in interstate commerce. See *Barry*, 438 U.S. at 538-39, 98 S. Ct. at 928-29. The Act was passed in response to widespread concern that the states should be permitted to continue regulating and taxing the insurance industry. It provides an exemption from the antitrust laws for the business of insurance, but only to the extent that such business is regulated by the state, and does not involve a boycott, coercion or intimidation. *Id. at 539-40, 98 S. Ct. at 2929; Klamath-Lake Pharmaceutical Ass'n v. Klamath Medical Service Bureau, 701 F.2d 1276, 1284 (9th Cir. 1983),* [\[**8\]](#) cert. denied, 464 U.S. 822, 104 S. Ct. 88, 78 L. Ed. 2d 96 (1983).

Plaintiffs in this appeal contend both that the defendants' agreement with LACMA was not exempt as the business of insurance, and that even if it otherwise qualifies for exemption, it falls within the boycott-coercion exception. We address these contentions in turn.

A. The Business of Insurance and State Regulation

[HN5](#) [\[**9\]](#) The Supreme Court has set forth three factors to consider in determining whether a practice constitutes the business of insurance: (1) whether the practice has the effect of transferring or spreading the policyholders' risks; (2) whether the practice is an integral part of the policy relationship between the insurer and insured; and (3) whether the practice is limited to entities within the insurance industry. [Union Labor Life Insurance Co. v. Pireno, 458 U.S. 119, 102 S. Ct. 3002, 3009, 73 L. Ed. 2d 647 \(1982\)](#). This court has discussed these factors in two recent decisions, both of which emphasize that [HN6](#) [\[**9\]](#) the primary characteristic of the business of insurance is the transferring or spreading of risk. [Klamath-Lake, 701 F.2d at 1285; United States v. Title Insurance Rating Bureau of Arizona, 700 F.2d 1247, 1251 \(9th Cir. 1983\)](#). Provided the risk spreading factor is present, the business of insurance is not limited to traditionally recognized areas of insurance. See [Klamath-Lake, 701 F.2d at 1286-87](#). In *Klamath-Lake*, we held that the practice of shifting the risk of pharmacy costs, as well as medical costs, qualified as the business of insurance. *Id. at 1287*.

In this case, which involves a conventional field of insurance, plaintiffs offer no very clear articulation of the practice which they seek to challenge as violative of the antitrust laws and outside the business of insurance. It appears, however, that for purposes [\[*932\]](#) of bringing this suit outside the scope of the McCarran-Ferguson Act, plaintiffs have focused their ire upon the agreement between the medical association and the insurers to offer the malpractice insurance only to members of LACMA.

That practice is, however, demonstrably related [\[**10\]](#) to the allocation and spreading of risk, for, as the district court pointed out, it defines a pool of insureds over which risk is spread. The medical association sought to provide a single insurance broker for all of its members in order to assure coverage for certain high-risk specialties, thereby distributing risk across the membership. The effect is to spread risk across a wide area, and that is precisely what the Supreme Court described when it formulated the risk spreading criterion. See [Group Life & Health Insurance Co. v. Royal Drug Co., 440 U.S. 205, 212-13, 99 S. Ct. 1067, 1073-74, 59 L. Ed. 2d 261 \(1979\)](#).

The Third Circuit identified the risk spreading characteristic of this practice when it recently held that [HN7](#) offering insurance through a state medical association is the business of insurance. [Owens v. Aetna Life & Casualty Co., 654 F.2d 218](#) (3d Cir.), cert. denied, 454 U.S. 1092, 70 L. Ed. 2d 631, 102 S. Ct. 657 (1981). The Third Circuit underlined the fact that mass marketing of malpractice insurance through an association is [\[**11\]](#) one way of

maximizing the risk pool of medical specialties. [*Id. at 223*](#). The Owens court was further influenced by the fact that cooperative rate-making schemes have long been recognized as the business of insurance, and were clearly contemplated by the proponents of the McCarran-Ferguson Act. [*Id. at 225*](#); accord [*Royal Drug, 440 U.S. at 222-24, 99 S. Ct. at 1078-80*](#). These considerations apply with equal force here.

Contrary to the plaintiffs' contention, the agreement in this case is wholly unlike the agreement providing peer review of chiropractors' fees in *Pireno*, or the agreement between the insurer and pharmacists to offer low cost drugs to policyholders in *Royal Drug*. The Supreme Court held those [**HN8**](#)[↑] practices were not part of the business of insurance because they were aimed solely at cutting insurers' costs and had nothing to do with the allocation of risk. *Pireno*, U.S. at , 102 S. Ct. at 3010; [*Royal Drug, 440 U.S. at 216-17, 99 S. Ct. at 1075-76*](#). The practice here is related to risk allocation, [**\[**12\]**](#) and is not a cost-cutting device.

Despite these distinctions, plaintiffs attempt to bring their claims under the Supreme Court precedents by focusing upon the fact that this arrangement was negotiated by the medical association on behalf of its members. Their argument seems to be that since the association is neither the insured nor the insurer, the arrangement is not "limited to entities within the insurance industry" and therefore does not meet the third prong of the *Pireno* test. See

U.S. at , 102 S. Ct. at 3009. Plaintiffs describe LACMA, the entity which negotiated the terms of the insurance on behalf of the insureds, as "strangers" to the insurer-insured relationship. *Pireno*, however, suggests that a non-insurer (or non-insured) party's involvement does not necessarily defeat antitrust exemption, but is of concern where the agreement has the potential to restrain competition in non-insurance markets. *Id. at* , 102 S. Ct. at 3010-11. Thus *Pireno* appears to be satisfied where, as here, the only role of the non-insurer is in negotiating the terms of the policy relationship between insurer and insured, and the gravamen of the complaint is lack [**\[**13\]**](#) of competition in the insurance market itself.

Offering insurance to members of a group through an association or employer which is not the insured is a practice common to all group insurance plans. R. Keeton, *Insurance Law* § 2.8(a)(1971). These occupy an increasingly larger share of the overall insurance market in the United States. See W. Meyer, *Life and Health Insurance Law* § 19:1 (1972); W. Vance, *Law of Insurance* § 203 (3d ed. 1951). The law generally views the intermediary who negotiates the insurance contract as the agent either of the insured or the insurer, not as a party pursuing its own objectives. See W. Meyer, *supra*, § 23. Plaintiffs do not offer any reason why the intermediary [**\[*933\]**](#) should be treated differently for antitrust purposes, or why group insurance should be treated any differently from insurance obtained directly by the insured. Nor do they contend that there is any authority either in the McCarran-Ferguson Act, its history, or in any judicial interpretation, that group insurance is not "the business of insurance." Indeed, the proposition is directly contrary to the Third Circuit's decision in *Owens*. We therefore conclude [**\[**14\]**](#) that the agreement between LACMA and defendants is the "business of insurance" within the meaning of the McCarran-Ferguson Act.

[**HN9**](#)[↑] To be exempt under that Act, however, a practice must not only be "the business of insurance," it must also be regulated by the state. [*Royal Drug, 440 U.S. at 219, 99 S. Ct. at 1077*](#). It is not necessary to point to a state statute which gives express approval to a particular practice; rather, it is sufficient that a state regulatory scheme possess jurisdiction over the challenged practice. See [*Klamath-Lake, 701 F.2d at 1287*](#) & n.10; [*Addisi, 503 F.2d at 728*](#), overruled on other grounds, [*438 U.S. 531, 98 S. Ct. 2923, 57 L. Ed. 2d 932 \(1978\)*](#); accord, P. Areeda, *Antitrust Law* para. 210.1b (Supp. 1982). California has an extensive regulatory scheme with jurisdiction over all rating practices of insurers, and which grants the insurance commissioner broad investigatory and enforcement powers. See, e.g., [*Calif. Ins. Code §§ 1852-1853.9, 12919-12931*](#). The state regulation requirement clearly is [**\[**15\]**](#) satisfied in this case.

B. The Boycott-Coercion-Intimidation Exception to the McCarran-Ferguson Act

Since we have determined that the object of plaintiffs' challenge is within the business of insurance and regulated by California, we must now consider the plaintiffs' contention that even if their suit is otherwise barred by the McCarran-Ferguson Act exemption from antitrust liability, it falls within the exception to that Act.

HN10[] The McCarran-Ferguson Act specifies that antitrust exemption will not extend to "any agreement to boycott, coerce, or intimidate, or act of boycott, coercion or intimidation." [15 U.S.C. § 1013\(b\)](#). Plaintiffs do not contend that the agreement itself forced them to buy the LACMA sponsored insurance from the defendants, or that it prevented them from dealing with other insurers. The only limitation in the agreement, and of which they complain, is the requirement that doctors join LACMA as a prerequisite to being insured by defendants. Indeed, not only were doctors free to purchase insurance elsewhere, whether or not they joined LACMA, [**16] but several doctors in this case were covered by other companies at times during the relevant period. Because it in no way limited the doctors' ability to deal with third parties, the agreement itself is not an agreement to boycott or coerce the plaintiffs to purchase the defendants' insurance. See [Barry, 438 U.S. at 553, 98 S. Ct. at 2935-36; Klamath-Lake, 701 F.2d at 1287-88; Proctor v. State Farm Mutual Automobile Insurance Co., 182 U.S. App. D.C. 264, 561 F.2d 262, 275 \(D.C. Cir. 1977\), vacated on other grounds, 440 U.S. 942, 99 S. Ct. 1417, 59 L. Ed. 2d 631 \(1979\); Travelers Insurance Co. v. Blue Cross of West Pennsylvania, 481 F.2d 80, 84 \(3d Cir.\), cert. denied, 414 U.S. 1093, 38 L. Ed. 2d 550, 94 S. Ct. 724 \(1973\); cf. Barber, Refusals to Deal Under the Federal Antitrust Laws, 103 U. Pa. L. Rev. 847, 876-77 \(1955\) \(quoted in \[Joseph E. Seagram and Sons, Inc. v. Hawaiian Oke & Liquors, Ltd., 416 F.2d 71, 77 \\(9th Cir. 1969\\)\]\(#\), cert. denied, 396 U.S. 1062, 24 L. Ed. 2d 755, 90 S. Ct. 752 \(1970\)\).](#) There is no "agreement to [**17] boycott, coerce or intimidate" within [section 1013\(b\)](#).

Plaintiffs do not contend otherwise, but stress instead that because as a practical matter, the defendants' plan became the only medical malpractice plan available to doctors in the Los Angeles area, they were forced to buy this insurance. They argue that the existence of defendants' monopoly power was inherently coercive, and is therefore within the boycott-coercion exception. Plaintiffs' theory thus rests squarely upon an attempt to equate [section 2](#) monopolization claims with the McCarran-Ferguson Act exceptions; for several reasons, it must fail.

First, the Supreme Court expressly stated in *Barry* that the boycott and coercion exceptions [*934] are not as broad as the Sherman Act itself.

We note our disagreement with Mr. Justice STEWART's expression of alarm that a reading of the operative terms of § 3(b), consistent with traditional Sherman Act usage, "would plainly devour the broad antitrust immunity bestowed by [§ 2\(b\)](#)." Post, at 2938. **HN11**[] Whatever the precise reach of the terms "boycott," "coercion," and "intimidation," [**18] the decisions of this Court do not support the dissent's suggestion that they are coextensive with the prohibitions of the Sherman Act. See, e.g., [Eastern States Lumber Ass'n v. United States, 234 U.S. 600, 611, 34 S. Ct. 951, 954, 58 L. Ed. 1490 \(1914\)](#), quoting [Gompers v. Bucks Stove & Range Co., 221 U.S. 418, 438, 31 S. Ct. 492, 496, 55 L. Ed. 797 \(1911\)](#).

438 U.S. at 545 n.18, 98 S. Ct. at 293 n.18.

Thus even if plaintiffs could establish a violation of [section 2](#) of the Sherman Act in this case, some additional act or agreement constituting boycott, coercion or intimidation would have to be shown. None is alleged.

The legislative history of the McCarran-Ferguson Act further repudiates plaintiffs' position. During the debate on the proposed bill, Senator Ferguson clearly distinguished between monopolistic practices on the one hand and boycott, coercion or intimidation on the other. He explained that monopolistic practices, within the business of insurance and regulated by the state, would be permitted under the statute, while boycotts, coercion or intimidation would not. 91 Cong. Rec. 480-81 (1945) (statement of Sen. Ferguson). [**19] ¹ Monopoly alone is therefore not within any exception to the McCarran-Ferguson Act.

¹ Relevant portions of the Senate debate on the proposed bill are set forth below.

Mr. FERGUSON. * * * By no means does the bill *anticipate* that any act would or should be passed which would create monopoly.

Mr. O'MAHONEY. Then, does the Senator believe that the bill as it now stands *permits* that interpretation?

Mr. FERGUSON. *It would permit it.* * * * I think the bill is broad enough to allow a state to pass a law allowing any agreement or contract other than those inhibited in paragraph (b) of section 4. But it is not the purpose of the bill at all to

[**20] There is still an additional flaw in plaintiffs' argument. To recover, they must show not only that they have in some sense suffered the effects of boycott, coercion or intimidation, but that there has been some violation of the antitrust laws. See *Pireno*, U.S. at , 102 S. Ct. at 3007. Thus in order to succeed, they cannot rest solely upon the position that a monopoly is "coercive" within the meaning of the McCarran-Ferguson Act exception. They must also persuade the court to hold that the existence of monopoly power alone is a [section 2](#) violation of the Sherman Act.

Although such an approach to monopolization liability has been discussed approvingly, see L. Sullivan, *Law of Antitrust* § 38 at 104 & n.6 (1977), it is not accepted in this circuit. Our cases hold that [HN12](#)[↑] a [section 2](#) monopolization claim requires two principal elements in addition to antitrust injury: (1) possession of monopoly power in the relevant market and (2) willful acquisition or maintenance of that power. [Betaseed, Inc. v. U and I, Inc.](#), 681 F.2d 1203, 1230 (9th Cir. 1982); [**21 Phonetele, Inc. v. American Telephone and Telegraph Co.](#), 664 F.2d 716, 739 (9th Cir. 1981), cert. denied , 459 U.S. 1145, 103 S. Ct. 785, 74 L. Ed. 2d 992 (1983); [Greyhound Computer Corp., Inc. v. International Business Machines Corp.](#), 559 F.2d 488, 492 (9th Cir. 1977), cert. denied, 434 U.S. 1040, 98 S. Ct. 782, 54 L. Ed. 2d 790 (1978). [*935] Plaintiffs insist that it is sufficient to allege that defendants had a "mere" monopoly. We require more from a [section 2](#) claimant for, as we recently stated,

it is the second element, [HN13](#)[↑] the conduct element, which distinguishes lawful possession of monopoly power from unlawful possession of monopoly power. [Section 2](#) of the Sherman Act proscribes "monopolization"; it does not render unlawful all monopolies.

[Foremost Pro Color, Inc. v. Eastman Kodak Co.](#), 703 F.2d 534, 543 (9th Cir. 1983). Thus plaintiffs' theory of recovery, which is bottomed solely upon their view of the oppressive nature of monopoly, would not constitute a claim of antitrust [**22](#) violation. We plainly cannot hold that the exception to the McCarran-Ferguson Act is a broader ground for liability than the Sherman Act itself, a conclusion which is the inevitable result of plaintiffs' logic.

Plaintiffs raise additional arguments on appeal in this thirteen-year-old lawsuit which, as we observed in addressing like arguments in a similarly protracted antitrust suit, seek only to sustain this action's "flickering life." [Klamath-Lake](#), 701 F.2d at 1292. We are persuaded upon reviewing the record that the district court considered the facts which plaintiffs alleged as true, and complied fully with the dictates of [Fed. R. Civ. P. 56](#). See [Clipper Express](#), 690 F.2d at 1250. The plaintiffs claim for the first time on appeal that there is a triable issue of fact with respect to their tying claims, but we decline to address that issue for the first time at this stage. See [Scott v. Pacific Maritime Ass'n](#), 695 F.2d 1199, 1203 (9th Cir. 1983); [Fitzgerald v. Century Park, Inc.](#), 642 F.2d 356, 359 (9th Cir. 1981).

The judgment of the district court is affirmed.

End of Document

foster monopoly, or to anticipate that any act will be passed permitting or even encouraging monopoly. A state law *** relating to regulation, for instance, the fixing of rates, or the fixing of the terms of a contract of insurance, *which might under some definitions of monopoly be monopolistic, would be permitted under the pending bill*; but if the state law undertook to authorize a boycott, a coercion, or an intimidation, or an agreement to do any one of those three things, then it would be clearly void because Congress would have already spoken, and once Congress speaks on interstate commerce, no state can speak contrary to the congressional declaration. 91 Cong. Rec. 480-81 (1945) (emphasis added).

HN2 Standing, Clayton Act

Sections 4 and 16 of the Clayton Act require actual or threatened injury by reason of an **antitrust law** violation as a prerequisite to private suits for damages or injunctive relief. [15 U.S.C.S. §§ 15, 26](#).

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN3 Private Actions, Standing

An argument can be made that a plaintiff's injury is too remote or incidental to confer standing under the antitrust laws. Two factors to be considered in evaluating such an argument are: (1) the physical and economic nexus between the alleged violation and the harm to the plaintiff, and (2) the relationship of the injury alleged with those forms of injury about which Congress was likely to have been concerned in making defendant's conduct unlawful and in providing a private remedy under § 4. The first factor has been interpreted quite liberally, and would appear to be satisfied in any case, where the plaintiff is within that area of the economy endangered by the alleged breakdown in competitive conditions. Analysis of the second factor, however, is inextricably intertwined with consideration of the merits of the alleged violations.

Opinion by: [*1] PFAELZER

Opinion

Memorandum and Order

PFAELZER, D.J.: Defendants' motion for summary judgment came on regularly for hearing on April 12, 1982 before the Honorable Mariana R. Pfaelzer. The Court, having considered the papers filed and oral arguments made, and having taken the matter under submission, now files this Memorandum, which shall constitute its Findings of Fact and Conclusions of Law.

I. Background

This action alleging violations of federal **antitrust law** arises out of the structure of the real estate industry in the San Fernando Valley ("the Valley"). Plaintiff is a real estate brokerage firm operating in the Valley.¹ While most, if not all, real estate brokerage firms in the Valley charge a commission of about six percent, plaintiff's announced practice is to charge commissions averaging about two and one-half percent on sales which it effects.² Defendants National Association of Realtors ("NAR"), California Association of Realtors ("CAR"), and San Fernando Valley Board of Realtors ("the Board") are national, regional, and local associations of Realtors which promulgate Codes of Ethics for their members, and establish various standards and policies to which their [*2] members are expected to adhere.³ In addition, the Board publishes the Multiple Listing Service ("MLS"), a joint informational service which is the central focus of this litigation.

The MLS is a booklet published twice weekly which lists residential properties on the market in order of their price. The booklet is organized by regions within the Valley. The listings include the specifications of the property, the price, the commission to be earned on its sale,⁴ and other information used by a broker in showing the property. Generally, the broker whom the prospective seller first approaches lists the property in the MLS. If this broker ("listing broker") is able to procure a buyer for the property without the aid of another broker, he will receive the whole of the commission on the sale. Oftentimes, however, [*3] the listing broker will be able to sell the property only by accepting the aid of another broker in finding a buyer. In that event, the listing broker will receive a portion of the commission, usually one-half, as compensation for obtaining the original listing. The broker who brings the buyer to the property (the "cooperating broker" or "selling broker") will receive the remaining portion of the commission.⁵

The need for more than one broker on a sale provides the basic rationale for the maintenance of the MLS. The publication of a listing in the MLS is a unilateral offer of a subagency to other brokers, and the ability to create subagencies is an essential part of the real estate [*4] brokerage business. Indeed, since it is virtually impossible

¹ The first amended complaint lists two plaintiffs: Supermarket of Homes, Inc., and the Original Supermarket of Homes, Inc. The former is the predecessor corporation of the latter.

² At the time this suit was filed, plaintiff's practice was to charge a fixed commission of \$1,995 per house.

³ Other individual defendants have been dismissed from the suit.

⁴ Since 1980, the MLS has disclosed only the commission to be paid to the selling or cooperating broker, and not the full commission payable to the listing broker.

⁵ As a technical matter, both the amount of the overall commission, which is paid by the seller, and the amount of the "split" between the listing and cooperating brokers are negotiable. The prevailing industry practice, however, appears to be to charge a six percent commission which is then split evenly between the two brokers.

for one broker to have sufficient contracts to find enough matching sellers and buyers to earn adequate commissions, some brokers contend that they could not make a living without the MLS.⁶

[Public Access]

The Board has enacted rules which regulate the use of the MLS. Of particular significance in this litigation is the Board's rule restricting public access to the MLS ("the access rule"). This restriction takes two forms. First, the privilege of listing properties for sale in the MLS is limited to licensed brokers. Individual members of the public may have their properties listed only through a broker. Second, the rule prohibits brokers from selling or distributing copies of the MLS to the public. Individual members of the public may look at the MLS only in the presence of a broker.

Plaintiff's amended complaint advances four separate theories of antitrust liability against defendants: price fixing, group boycott, restraint [*5] of trade, and monopolization.⁷ Factually, however, plaintiff's allegations come down to two basic contentions. The first is that the Board's operation of a "closed" MLS (that is, an MLS to which the public is denied access) both enables brokers to maintain commissions at artificially high levels and discourages entry into the market by discount brokers such as plaintiff. The second is that the defendants have engaged in a number of discriminatory or otherwise unlawful practices designed to harass plaintiff and drive it out of business. After consideration of the arguments and evidence presented by both parties, the Court concludes that both of these contentions are without merit and that defendants' motion for summary judgment should be granted.

[*6] II. Discussion

A. Standards for Summary Judgment

It has frequently been noted that [HN1](#) summary judgment is disfavored in complex antitrust cases. See [Poller v. Columbia Broadcasting System](#) 368 U.S. 464, 473 (1962). This principle is not absolute, however. In order to successfully oppose summary judgment, a party must present some "significant probative evidence tending to support the complaint." [First National Bank v. Cities Service Co.](#) 391 U.S. 253, 290 (1968). As the Ninth Circuit has recently stated, "[a] lawfully displaced competitor cannot construct a justiciable controversy from artful pleading alone. The courts should not serve as a refuge from the give and take of a properly functioning marketplace." [General Business Systems v. North American Phillips Corp.](#), 699 F. 2d 965, 971 (9th Cir. 1983). See also [Ron Tonkin Gran Turismo v. Fiat Distributors, Inc.](#), 637 F. 2d 1376, 1381 (9th Cir. 1981); [Mutual Fund Investors v. Putnam Management Co.](#), 553 F. 2d 620, 624 (9th Cir. 1977). For the reasons discussed below, the Court concludes that plaintiff's showing here falls short of that required to avoid summary judgment.

B. Operation of a "Closed" MLS

1. Plaintiff's Theory [*7] of Antitrust Liability

In considering the contention that the Board's operation of a "closed" MLS violates the antitrust laws, it is particularly significant that plaintiff does not claim that it has been excluded from the benefits of the MLS, but rather that the public has been excluded. Plaintiff's president is a licensed broker and Board member with full access to the MLS, both for listing properties for sale and learning of properties listed by other brokers. This being so, the

⁶ Plaintiff estimates that over seventy-five percent of the home sales in the San Fernando Valley are effectuated by means of a subagency relationship entered into through the MLS.

⁷ Plaintiff's original complaint, to which the present motion for summary judgment was directed, contained six causes of action. The first of these was disposed of on prior motion for summary judgment. The first amended complaint basically restates the allegations of the remaining five causes of action, adding the Original Supermarket of Homes as a plaintiff and consolidating two of the original price fixing claims into one. The Court therefore treats defendants' motion as directed toward the present first amended complaint.

manner in which the operation of the MLS injures the plaintiff's is not apparent. Thus, the plaintiff's theory as to how there can be antitrust liability as to it requires analysis before turning to an examination of other issues in the case.

Plaintiff's injury, as alleged in the complaint, stems from a practice engaged in by other brokers which plaintiff terms "steering." Steering occurs when cooperating brokers acting on behalf of buyers direct their clients toward properties listed by brokers offering high commissions and away from those listed by discount brokers such as plaintiff. Specifically, plaintiff contends that steering has hampered its ability to sell the numerous listings it has obtained [⁸] as a result of its discounting policies, and that this in turn has discouraged potential sellers from listing their properties with it. As a result, plaintiff claims that it has suffered severe business losses.

Plaintiff candidly concedes that steering results not from any conspiracy among brokers, but rather from the unilateral acts of individual brokers motivated by the desire to earn higher commission.⁸ Nonetheless, plaintiff contends that steering violates the antitrust laws because "all agents are aware that if they charge less than 6% to list a property, then other agents will steer away from those properties and the properties will not sell." Thus, any broker who actually attempts to charge lower rates will be driven out of business.⁹

[⁹] Plaintiff points to two features of the MLS which have the effect of stabilizing commission rates at high levels, thereby "facilitating" the practice of steering. Were it not for these allegedly anticompetitive features of the MLS, plaintiff contends, commission rates would be lower (i.e. closer to those offered by plaintiff) and individual brokers would therefore be deprived of the existing incentive to steer their clients away from properties listed by plaintiff.

The first of these features, to which plaintiff devotes scant attention in both its complaint and its opposition papers, is the inclusion of commission rates in the individual MLS listings. Plaintiff characterizes the MLS as a "secret price list," and argues that the circulation of such information among brokers helps to stabilize commission rates at artificially high levels.

The second feature, which is the crux of the complaint, is the access rule described above. Plaintiff's theory as to how this rule contributes to high commission rates is somewhat complex.¹⁰ According to plaintiff, the MLS is a far more effective and far less costly means of circulating information about properties for sale than conventional [¹⁰] advertising (e.g., in a local newspaper). Thus, plaintiff argues, if individual members of the public were allowed direct access to the MLS for both listing and learning of properties, many more sellers would attempt to sell their properties without engaging a listing broker. For a fee based on the cost of the service, sellers would simply list their properties in the MLS, along with the amount of the commission to be paid to the broker who found a buyer. Then, any attempts by brokers to steer buyers away from properties offered without listing brokers or from properties listed by discount commission brokers such as plaintiff would be unsuccessful, as buyers would be free to consult the MLS directly and to decide for themselves what properties they wanted to see.¹¹ Plaintiff further contends that

⁸ See First Amended Complaint P11 at 5. In addition, the Proposed Joint Pretrial Conference Order, signed by counsel for all parties, contains the following stipulation:

"A Matter Which All Parties Agree is Not in the Case: As part of its proof, plaintiff does not intend to show that the Board, NAR, or CAR was party to any agreements with real estate agents by which the agents agreed with each other or with the Board, NAR or CAR not to show plaintiff's properties, and the parties agree that there is no such issue in the case."

Proposed Pretrial Conference Order at 11.

⁹ See First Amended Complaint, P11 at 5.

¹⁰ This theory is set forth in greatest detail in the declarations of plaintiff's expert, Dr. Conley.

¹¹ The Court must note at the outset that it has some difficulty understanding this aspect of plaintiff's theory. In particular, it is not altogether clear why a buyer would be significantly concerned with the level of the commission paid by the seller to the listing and cooperating brokers. While some portion of the commission may be passed on to the buyer in the form of a higher purchase price, any such amount seems unlikely to be significant in comparison to the overall price. At most, therefore, a buyer might attempt to use the fact that a seller will be paying little or no commission as a bargaining point in negotiations over the purchase price. In comparison to the numerous other variables that a buyer must consider in selecting a home for purchase, the level of

the corresponding decrease in the number of sellers who would be motivated to employ listing brokers would spur increased price competition among brokers seeking to represent sellers. This would allegedly cause the commission rates for listing brokers to drop to levels closer to those now charged by discount brokers such as plaintiff, thereby diminishing or eliminating the incentive [*11] for cooperating brokers to steer buyers away from plaintiff's listings. Put simply, plaintiff's argument is that competition in the market for listing brokerage services would be enhanced if the MLS were operated as a public clearinghouse for buyers and sellers of property rather than as an information exchange for brokers.¹²

[*12] 2. Standing

HN2 Sections 4 and 16 of the Clayton Act require actual or threatened injury by reason of an antitrust law violation as a prerequisite to private suits for damages or injunctive relief. 15 U.S.C. §§ 15, 26. Defendants argue that plaintiff lacks standing to complain of the allegedly anticompetitive effects of the closed MLS because plaintiff, as a broker, is not injured by the higher commissions that allegedly result from its operation. The argument is that plaintiff can only benefit from higher commissions as it then has a competitive advantage over those who charge more. This argument, however, fails to apprehend the full play of plaintiff's theory as summarized above. Here, plaintiff complains of injury, albeit indirect injury, as a result of the practice of steering, which allegedly will have an injurious effect on it as long as it continues to operate on a discount basis.

HN3 An argument can still be made that plaintiff's injury is too remote or incidental to confer standing under the antitrust laws. In Blue Shield of Virginia v. McCready, 457 U.S. 465 (1982), the Supreme Court listed two factors to be considered in evaluating such an argument: (1) "the physical and [*13] economic nexus between the alleged violation and the harm to the plaintiff," and (2) "the relationship of the injury alleged with those forms of injury about which Congress was likely to have been concerned in making defendant's conduct unlawful and in providing a private remedy under § 4." Id. at 478. The first factor has been interpreted quite liberally, and would appear to be satisfied in any case, where, as here, the plaintiff is ""within that area of the economy . . . endangered by [the alleged] breakdown in competitive conditions". . ." Id. at 480 (quoting In re Multidistrict Air Pollution M.D.L. No. 31, 481 F. 2d 122, 129 (9th Cir. 1973)). Analysis of the second factor, however, is inextricably intertwined with consideration of the merits of the alleged violations. As noted above, plaintiff seeks to condemn the closed MLS under four alternative antitrust theories: price fixing, group boycott, restraint of trade, and monopolization. The question of whether plaintiff's injury "flows from that which makes defendant's acts unlawful," Brunswick Corp. v. Pueblo Bowl-O-Mat, 429 U.S. 477, (1977), requires as a threshold matter inquiry into which of the theories asserted, if [*14] any, are applicable to the challenged conduct.¹³ It is to this inquiry that the Court now turns.

the commission payable by the seller would appear to be of doubtful importance to a buyer in deciding which homes he wishes to be shown.

¹² That this contention is the centerpiece of the complaint is borne out by plaintiff's prayer for relief, which requests:

1. A declaration that the rules and agreements of defendants prohibiting public access to the MLS violate sections 1 and 2 of the Sherman Act,
2. An injunction that defendants shall not create or enforce any rule which prohibits any person from placing a property listing in the Board's MLS for a price equal to the cost of processing such listing, including reasonable overhead and reserves,
3. An injunction that the Board shall print sufficient quantities of MLS materials to sell to the public for a price equal to the cost of processing such listing, including reasonable overhead and reserves,
4. An injunction that the Board shall not create or enforce any rule which prohibits real estate agents from giving access to the MLS to any member of the public,
5. Damages. . . ."

First Amended Complaint at 10.

¹³ Obviously, if none of plaintiff's theories of antitrust liability is applicable, plaintiff's alleged injury at the hands of defendants will be immaterial, as any such injury would not be "by reason of" an antitrust violation, and plaintiff would lack standing under section 4.

3. Steering by Individual Brokers

The allegation that individual brokers engage in the practice of steering prospective buyers away from properties listed by plaintiff clearly does not, in and of itself, state a claim under the antitrust laws. Plaintiff has expressly conceded that there exists no conspiracy among the defendants or brokers not to deal with plaintiff. The concerted activity necessary to establish a violation of section 1 of the Sherman Act is therefore absent. See *Rickards v. Canine Eye Registration Foundation* [1983-1 TRADE CASES P65,355], 704 F. 2d 1449, 1453-54 (9th Cir. 1983). As plaintiff readily admits, the alleged steering reflects nothing more than unilateral refusals to deal by individual brokers motivated by the desire to earn higher commissions. Such conduct might conceivably [*15] raise an issue under the code of ethics governing brokers, but it is not proscribed by the antitrust laws. Absent all allegation of concerted activity, the fact that all brokers may be "aware" that steering occurs is immaterial.

Plaintiff's reliance on section 2 of the Sherman Act is similarly misplaced. Defendants are trade associations. The unilateral acts of defendants' members, none of whom is individually a monopolist, cannot be cumulatively attributed to defendants so as to make defendants monopolists within the meaning of section 2.

Finally, plaintiff's suggestion that defendants are guilty of **antitrust law** violations because they "encourage" or otherwise promote the practice of steering is contradicted by plaintiff's admission that no conspiracy regarding steering exists. Moreover, there is no evidence of the existence of a conspiracy in the record. It is true that plaintiff has proffered a single piece of evidence in the form of an article on the perils of price fixing in which the president of CAR admits that individual brokers are not legally required to show properties listed by other brokers offering lower than acceptable commission splits.¹⁴ However, this is [*16] hardly sufficient to establish a policy of encouraging steering on the part of any of the defendants.

4. Circulation of Commission Rates in the MLS

Plaintiff's contention that the inclusion of commission rates in the MLS listings constitutes unlawful price fixing is also without merit. Plaintiff does not allege any underlying agreement among brokers to adhere to any particular price schedule, and defendants specifically deny that they have been parties to any such agreement.¹⁵ Nor is there any evidence in the record that defendants recommend that their members adhere to any price schedule or to the commission rates listed in the MLS. Plaintiff argues that defendants have indirectly done so by publicizing "studies" which purportedly show that individual brokers must maintain commission rates of about six percent in order to remain profitable. Plaintiffs have offered no evidence of any such studies, however, and defendants specifically deny their existence.¹⁶ The only evidence offered to support this theory consists of two isolated statements made by the president of CAR, one in a speech [*17] and one in the aforementioned article on price fixing, suggesting that "[i]nvestigation would probably reveal that because of the fragmented nature of the real estate brokerage industry most real estate firms must charge somewhere in the range of 5-7 percent in order to make a reasonable return and be competitive."¹⁷ These statements are not a sufficient basis on which to predicate a claim of a conspiracy to fix commission rates.

Absent an agreement to adhere to particular price schedules, the exchange of price information among competitors is not a per se violation of the antitrust laws, but should be judged under the rule of reason. See *United States v. Citizens & Southern National Bank*, 422 U.S. 86, 113 (1975); *Maple Flooring Assn. v. United States*, 268 U.S. 563, 578-86 (1925). Applying the rule of reason, a number of courts have considered the [*18] antitrust implications of the exchange of commission rates among real estate brokers in an MLS, and have found the practice to be lawful. See, e.g., *Murphy v. Alpha Realty*, 1978-2 TRADE CASES (CCH) P62,388 (N.D. Ill. 1978); *Derish v. San Mateo-*

¹⁴ See Declaration of Gina Williams, Exh. F at 127 (Article by Clark E. Wallace).

¹⁵ See Declaration of Robert G. Adamson at 12; Declaration of William D. North at 4; Declaration of William M. Pfeiffer at 2.

¹⁶ See Declarations of Adamson, North and Pfeiffer, supra n. 14.

¹⁷ See Declaration of Gina Williams, Exh. F at 126; Plaintiff's Brief in Opposition to Motion for Summary Judgment at 17-19. **HN4[]**

Burlingame Board of Realtors, 136 Cal. App. 3d 534, 186 Cal. Rptr. 390 (1982). This Court agrees with that conclusion.

The procompetitive benefits of the information exchange conducted through the MLS have been widely noted. See, e.g., id. at 538, 186 Cal. Rptr. at 392; United States v. Realty Multi-List, 629 F. 2d 1351, 1368 (5th Cir. 1980). The centralized dissemination of information contributes to the efficiency of geographically fragmented markets for housing and for brokerage services. The allegedly anticompetitive effects of the disclosure of commission rates, on the other hand, are difficult to discern. Plaintiff's characterization of the MLS as a "secret price list" is simply inapposite. Brokers can and do publicly advertise their commission rates, as plaintiff itself has done. Moreover, since April of 1980, the MLS has revealed only the commission payable to cooperating brokers, and not the commission retained by the listing [*19] broker. Thus, it can no longer be argued that the MLS hinders competition in commission rates among listing brokers. As to the continued disclosure by listing brokers of the commissions payable to cooperating brokers, it has been rightfully observed that the listing and cooperating brokers are not truly competitors with respect to this use of the MLS. "[J]ust as the seller and the listing broker are entitled to know the rate of commission involved in order to decide if they will enter into an agency relationship, potential cooperating brokers are similarly entitled to information concerning the rate of commission . . . in order to decide whether a subagency relationship should be established." Murphy v. Alpha Realty, 1978-2 TRADE CASES P62,388 at 76,311.

The Court therefore concludes that the circulation of commission rates in the MLS does not violate the antitrust laws. Plaintiff's reliance on Penne v. Greater Minneapolis Area Board of Realtors, 604 F. 2d 1143 (8th Cir. 1979), which declined to grant summary judgment on a similar issue, is misplaced. In Penne, the plaintiff alleged that the circulation of commission rates in the MLS had played a significant role in the enforcement [*20] of an underlying conspiracy among brokers to fix prices by "punishing" competitors who charged lower rates. No material issue regarding the existence of such a conspiracy has been raised here.

5. The Access Rule

The Court now turns to plaintiff's central contention that the Board's access rule, which limits use of the MLS to licensed brokers, violates the antitrust laws.

Plaintiff first attacks the access rule as an unlawful price fixing agreement. Clearly, however, the rule cannot be so characterized, as it has no direct bearing on commission rates. Plaintiff does not allege, and defendants specifically deny, that the access rule is part of an underlying agreement to fix commission rates. As noted above, plaintiff's contention is merely that the rule has the effect of stabilizing commission rates, thereby facilitating the practice of steering. HN5 [↑] The allegation that a jointly agreed upon rule has an indirect or incidental effect on prices, without more, does not state a claim for a conspiracy to fix prices. Cf. Betaseed, Inc. v. U and I Inc., 681 F. 2d 1203, 1233-35 (9th Cir. 1982).

Plaintiff next argues that the access rule should be condemned as an unlawful group boycott [*21] of the public. This argument is also without merit. Group boycotts of competitors or would be competitors have long been held to be per se violations of the antitrust laws. See Eastern States Retail Lumber Dealer's Association v. United States, 234 U.S. 600 (1914). The public does not compete in the ordinary sense with defendants in the market for brokerage services, however. Indeed, such competition would be illegal without a broker's license. For the same reason, the cases cited by plaintiff which condemn group efforts to deny competitors a valuable business service are also inapplicable. See e.g., Silver v. New York Stock Exchange, 373 U.S. 341 (1963). Plaintiff appears to contend that individual members of the public who choose to sell their homes without the aid of a broker compete with brokers in the same sense that "do-it-yourselfers" compete with plumbers, electricians and providers of like services. This analogy does not find support in the cases cited by plaintiff pertaining to group boycotts, however. The primary concern in such cases is with the preservation of competition in the markets for the supply of the services in question. See id.

Plaintiff also cites [*22] two cases for the proposition that group boycotts of noncompetitors may nonetheless violate the antitrust laws. The Court does not disagree with this proposition as a general statement of law, but finds both cases to be inapposite. In St. Paul Fire & Marine Insurance v. Barry, 438 U.S. 531 (1978), The Supreme Court

condemned a group of malpractice insurers' collective refusal to deal with physicians who would not agree with the new terms required by one of the insurers. The Court found that "'a valuable service germane to [the physicians'] business and important to their effective competition with others was withheld from them by collective action.'" *Id. at 553-54* (quoting *Silver v. New York Stock Exchange*, 373 U.S. at 348-49, n. 5). No analogous situation is presented here. *Williams v. St. Joseph Hospital*, 629 F. 2d 448 (7th Cir. 1980), held unlawful an agreement among all of the doctors in an area to refuse to treat any person or member of the family of a person who had instituted a malpractice action against one of their number. The court found that the agreement violated the antitrust laws because it "preclud[ed] . . . [the plaintiff patients] from a free market for [*23] the purchase of medical care." *Id. at 453*. Again, no such situation is presented here. Individual members of the public who wish to publicize the availability of their homes for sale are free to do so by any number of methods other than MLS, such as advertising in the newspaper or in other media.

Moreover, the access rule does not completely exclude the public from the informational advantages of the MLS. Strictly speaking, the rule only requires that individual buyers and sellers who wish to use the MLS do so through a broker.¹⁸ This is the principal difficulty with plaintiff's attempt to bring the rule within the ambit of the cases condemning group boycotts. The real issue here is whether the antitrust laws confer upon the public (and plaintiff) the right to convert an informational service compiled and maintained by brokers for their own benefit into what would amount to little more than another advertising medium. The Court concludes that the antitrust laws confer no such right.

[*24] The related, but distinct, group of cases applying the "essential facility" doctrine provides a more apt analogy. The MLS is a cooperative facility operated by and for real estate brokers which is designed to pool resources so as to enhance the value of brokerage services to the public. Because it increases the efficiency of those services, the MLS has a significant procompetitive effect as well. The membership restrictions of such cooperative facilities have often been scrutinized under the antitrust laws, and held unlawful to the extent that they constitute unreasonable restraints of trade. See *Associated Press v. United States*, 326 U.S. 1 (1945); *United States v. Realty Multi-List*, 629 F. 2d 1351 (reversing summary judgment in favor of defendant MLS); *Marin County Board of Realtors v. Palsson*, 16 Cal. 3d 920, 130 Cal. Rptr. I (1976). The rationale for condemnation of unreasonably exclusive membership requirements is to prevent the members of the facility from employing the fruits of their joint efforts to secure an unfair advantage over their competitors. The right to exclude noncompetitors, on the other hand, has rarely been questioned. Cf. *United States v. Realty Multi-List*, [*25] 629 F. 2d at 1369 (noting government's unwillingness to challenge MLS requirement limiting membership to licensed brokers). As noted above, members of the public who wish to sell their own homes without employing a broker can be considered competitors of brokers only in the most limited sense. This consideration alone is probably sufficient to preclude application of the essential facility doctrine.

Moreover, there exist legitimate reasons for limiting access to the MLS to licensed professionals. The Board's stated justification for maintaining the confidentiality of the MLS is twofold: (1) to protect the interest of the listing broker in ensuring that the information furnished by him to the MLS is used only for the stated purpose of entering into a subagency agreement, and (2) to protect the interests of individual sellers in ensuring that the information provided to listing brokers is not improperly disseminated so as to intrude on the seller's privacy and endanger the security of this property.¹⁹ The interest of the brokers who use the MLS in ensuring that the other participants who will enter into subagency agreements are licensed professionals who are bound by the legal [*26] and ethical obligations of the profession are obvious. As suggested by the court in *Derish v. Sam Mateo-Burlingame Board of Realtors*, 136 Cal. App. 3d at 541, 186 Cal. Rptr. at 394, a case which held that the access rule did not violate state

¹⁸ The Court notes that under the present access rule, individuals who are bona fide prospective buyers of property may consult the MLS at no cost simply by going to a broker's office and asking to see it. Such an individual incurs no cost in so doing, as the commission payable on any property listed in the MLS is independently set by the seller and the listing broker. If a cooperative broker does not wish to then take the individual to see a particular listed property, there is nothing to prevent the individual from approaching the listing broker directly.

¹⁹ See Declaration of Robert G. Adamson, Exh. C, Part V (MLS Rules, as revised July 31, 1980).

antitrust law, "[w]ithout some assurance that those who list properties in a MLS and perform the vital functions of subagents [will do so] in accordance with exacting professional standards, neither [the listing nor the cooperating] broker would be encouraged to use the service and the procompetitive benefits of the MLS would be lost." See also [United States v. Realty Multi-List, 629 F. 2d at 1369](#) (suggesting that standards of competence, professionalism, and mode of operation for admission to membership may be necessary to the success of a MLS). In addition, the court in Derish noted that permitting individual sellers direct access to the MLS would threaten to seriously undermine the state legislature's attempt to assure standards of competence in the brokerage profession through licensing requirements.²⁰ Finally, it cannot be doubted that one of the principal benefits to the public of the MLS is the opportunity it provides sellers [*27] to publicize the availability of properties for sale while compromising their privacy and security only to the extent necessary to permit approaches by bona fide prospective buyers through licensed professionals. Accordingly, for all the reasons given above, the Court declines to hold that the Board's refusal to allow the public direct access to the MLS is, in and of itself, a violation of the antitrust laws.

Plaintiff next contends that the access rule may nonetheless be held unlawful as an unreasonable restraint of trade because of its purported indirect effect on the ability of discount brokers such as plaintiff to compete in the market for brokerage services. This contention, which would appear to provide the appropriate mode of analysis of the legality of the access rule under the antitrust laws, requires consideration of two factors: (1) whether the intent of the [*28] rule is anticompetitive, and (2) whether the rule has significant anticompetitive effects. See [Kaplan v. Burroughs Corp., 611 F. 2d 286, 290-91 \(9th Cir. 1980\)](#).

The stated justifications for the access rule have been described above. Plaintiff has neither alleged nor presented any evidence that the intent of the Board's rule is anticompetitive. In particular, there is no indication in the record that the rule is intended to injure discount brokers in the manner described by plaintiff.²¹ These alleged anticompetitive effects, if they exist at all, are merely incidental to legitimate purposes of the rule. It is thus incumbent upon plaintiff to demonstrate that the anticompetitive effects of the rule are substantial. Cf. [Las Vegas Sun, Inc. v. Summa Corp., 610 F. 2d 614, 619-20 \(9th Cir. 1979\)](#). The Court finds, however, that plaintiff has failed to present any "significantly probative evidence" in support of its contention that the access rule injures competition in the market for brokerage services. Plaintiff has therefore failed to raise an issue of material fact sufficient to avoid summary judgment on its rule of reason claim. See [Ron Tonkin Gran Turismo, Inc. v. Fiat Distributors, I^{*291} 637 F. 2d at 1388](#) (approving granting of summary judgment on rule of reason claim).

As noted above, plaintiff's theory of competitive injury is that allowing prospective buyers unlimited access to the MLS would alleviate the practice of steering which is injurious to discount brokers,²² and that allowing direct listings by sellers would cause a significant reduction in the size of the market for brokerage services, thereby spurring price competition and diminishing the incentive for steering. The Court finds this theory to be little more than speculation. With respect to the practice of steering, plaintiff has presented no evidence to document the extent of this practice other than the unsupported allegation that it is "widespread." It has not been explained why buyers who consult the MLS in the presence of other brokers may not approach plaintiff directly if their broker refuses [*30] to show them properties listed by plaintiff. Nor has it been explained how the rule forecloses plaintiff's ability to engage in direct efforts to attract buyers for the properties it has listed through advertising in other media such as newspapers. The mere fact that advertising in such other media may be more costly than listing properties in the MLS does not make the restriction to public access to the latter unreasonable under the antitrust laws.

Plaintiff's assertion that permitting sellers to themselves list properties in the MLS without paying commissions to listing brokers would cause a reduction in commission rates is equally speculative. It is possible, for example, that

²⁰ The California Legislature has also recently enacted a statute which expressly contemplates the MLS as a cooperative facility of licensed professionals. See [Cal. Civ. Code §§ 1086-1090](#) (West Supp. 1983).

²¹ See also the Proposed Pretrial Order at 8, which states that "Supermarket has no evidence which supports the averments of P36 of the [original] complaint that "[t]he Board has enacted rules designed only to thwart Supermarket's efforts to compete effectively in the San Fernando Valley."

²² The Court's initial doubts with respect to this aspect of plaintiff's theory have been set forth at note 11, *supra*.

many sellers would choose not to list their properties if there were no restrictions on who had access to the information. Moreover, even if permitting direct access to sellers would cause a reduction in the demand for brokerage services, it by no means necessarily follows that commission rates would then fall. Such a reduction in demand might just as easily lead to a decline [*31] in the number of brokers able to stay in business, with no corresponding decline in commissions.

The only evidence in the record which purportedly supports plaintiff's economic scenario is the declaration of plaintiff's expert, Dr. Conley. [HN6](#) Declarations of expert opinion which are composed solely of speculations and hypotheses and which do not set forth specific facts underlying their conclusions cannot be relied upon to avoid summary judgment, however. See [United States v. Various Slot Machines on Guam, 658 F. 2d 697, 700-01 \(9th Cir. 1981\)](#); *Merit Motors, Inc. v. Chrysler Corp.*, 569 F. 2d 666, 670-74 (D.C. Cir. 1977) (applying rule to declaration of economist in antitrust action).²³ Dr. Conley's declaration does not refer to any statistical studies or other factual evidence which supports his conclusions. Indeed, the declaration appears to be little more than theoretical speculation. It therefore fails to raise a genuine issue of material fact with respect to the allegedly anticompetitive effect of the access rule. See *id.*

[*32] Finally, the Court must emphasize that the effects of the access rule on competition in the brokerage market cannot and should not be considered in isolation from the clearly procompetitive features of the MLS.²⁴ The courts should not lightly reach an interpretation of the antitrust laws which would restrict the operation of a procompetitive mechanism such as the MLS to the point where its attractiveness is diminished sufficiently to result in a negative net effect on competition. Cf. [United States v. Citizens & Southern National Bank, 422 U.S. at 117-20](#). This is particularly true in cases where the alleged injury to competition caused by the challenged practice is an indirect and attenuated as it is here.

Plaintiff's final challenge to the closed MLS falls within the rubric of monopolization. It is far from clear, however, how defendant's conduct can be said to possess the necessary characteristics for that offense. Plaintiff appears to argue that the Board has [*33] unlawfully employed its monopoly power in the "market for housing information in the San Fernando Valley" in order to establish a monopoly in the market for brokerage services. In the Court's view, the allegation that the Board has monopolized the market for housing information in the Valley, which is served by numerous other media including major newspapers, is frivolous. Moreover, there is no evidence in the record that any of the defendant's practices are intended to restrict the entry of licensed brokers into the market for brokerage services. The Court therefore concludes that summary judgment must be granted with respect to plaintiff's monopolization claim.

C. Alleged Discriminatory Actions

Plaintiff's remaining contentions concern allegedly discriminatory actions taken by defendants with the intent of harassing plaintiff and driving it out of business. Plaintiff appears to argue that these actions taken together should be regarded as evidence of a group boycott. The undisputed evidence in the record, however, makes clear that in each of the instances complained of, the defendants' actions were reasonable and not in violation of the antitrust laws.

Plaintiff first [*34] charges that the Board refused to list plaintiff's discount commission in the MLS in the same manner as the commissions charged by other brokers. As the record shows, however, plaintiff's commissions were in fact listed in the MLS. They were not initially listed in the small box reserved for that purpose because the MLS computer was programmed only to print commissions stated in terms of percentages, and not commissions stated as fixed dollar amounts, such as that charged by plaintiff. This was corrected as soon as the computer program

²³ These cases hold in addition that the fact that such a declaration of expert opinion may be admissible under [Rule 703 of the Federal Rules of Evidence](#) does not, absent the presentation of a factual basis for the opinion, preclude the granting of summary judgment against the party relying on the expert.

²⁴ Even plaintiff's expert appears willing to concede that commission rates would likely be higher in the absence of the MLS. See Additional Declaration of John E. Munter, Exh. 2 (Deposition of Bryan Conley).

was altered.²⁵ Clearly, there was nothing improper in the Board's conduct with respect to the listing of plaintiff's commissions in the MLS.

Plaintiff next charges that the Board has initiated discriminatory disciplinary and judicial proceedings against it for violation of the Board's rule forbidding dissemination to the public of confidential information contained in the MLS. Plaintiff contends that this rule is violated routinely with impunity by other brokers. Again, however, the record fails to bear out plaintiff's contention. Plaintiff's allegation of discriminatory disciplinary action stems [*35] from a complaint filed with the Board by a member of the public who charged that plaintiff disclosed the address of her residence to a buyer who subsequently attempted to see the house without being accompanied by one of plaintiff's agents.²⁶ The Board's action in investigating a complaint made by a member of the public charging a clear violation of Board rules does not run afoul of the antitrust laws. Nor can its action be characterized as discriminatory, as there is no allegation that the Board does not investigate all such complaints.²⁷

Plaintiff's charge of allegedly discriminatory initiation of judicial proceedings is a reference to the Board's efforts to curb plaintiff's announced practice of distributing the MLS materials to the public. The Board initially obtained a temporary restraining order from a state court. After the Board's application [*36] for a preliminary injunction was subsequently denied, plaintiff demanded a license to sell copies of the MLS to the public, and asked that the Board supply extra copies for this purpose. The Board refused, and indicated that it would supply plaintiff with copies of the MLS only as authorized by the longstanding Board policy permitting brokers to obtain limited numbers of copies for their own use.²⁸ When plaintiff persisted in selling copies to the public, the Board filed a counterclaim for copyright infringement in this action. This Court granted the Board's motion for summary judgment on the counterclaim, specifically concluding that the Board had not misused its copyright.²⁹ On reexamining the issue, the Court reaches the same conclusion regarding the alleged copyright misuse, and further finds nothing in the record indicating that any of the proceedings initiated by the Board were "sham" proceedings which could give rise to antitrust liability. Cf. *Forro Precision, Inc. v. IBM*, 673 F. 2d 1045 (9th Cir. 1982).

[*37] Plaintiff claims to have evidence that other brokers routinely "bend the rules" regarding disclosure of information contained in the MLS to prospective buyers. It is undisputed, however, that plaintiff is the only broker which has embarked on a publicized program of selling copies of the MLS to the public. Thus, the Board's initiation of judicial proceedings against plaintiff cannot be characterized as discriminatory.

Plaintiff further contends that the Board wrongfully refused to run an advertisement promoting plaintiff's low commissions in a newspaper which the Board publishes and distributes free to the public. The record, however, reveals only that the Board refused to publish one of two advertisements submitted by plaintiff because the advertisement misleadingly implied that the commissions charged by other brokers were fixed at a certain level. The Board invited plaintiff to revise the offending language, but plaintiff declined to do so.³⁰ The Court finds nothing in the Board's actions that would raise an issue of fact material to any alleged antitrust violation.

Plaintiff also makes reference in its opposition [*38] papers, though not in the complaint, to two occasions on which it is claimed that the Los Angeles Times and the Los Angeles Herald Examiner rejected certain of plaintiff's

²⁵ See Declaration of William G. Watt.

²⁶ See Declaration of Gina Williams at 142-43.

²⁷ In addition, contrary to plaintiff's allegations, the record indicates that no formal disciplinary proceedings have been initiated against plaintiff as a result of complaints filed with the Board, and that no such proceedings are planned pending the outcome of this litigation.

²⁸ See Declaration of Robert G. Adamson at 8-9.

²⁹ Findings of Fact and Conclusions of Law and Order for Summary Judgment on the Amended Counterclaim and Cross-claim at 10 (filed March 17, 1982).

³⁰ See Declaration of John E. Munter, Exhs. 3, 6-7.

advertisements. Plaintiff has submitted no evidence, however, indicating that these rejections were instigated by any of the defendants.³¹ The alleged incidents are therefore not relevant to this motion for summary judgment.

[*39] D. Liability of NAR and CAR

Finally, the Court observes that although it has concluded that none of the defendants has committed a violation of the antitrust laws, its conclusion with respect to NAR and CAR would remain the same independently of its conclusions with respect to the Board. As defendants correctly point out, neither NAR nor CAR is a party to the challenged access rule. Plaintiff's contention that the rule is required under the professional code of ethics promulgated by NAR is without merit,³² as are the contentions discussed above with respect to the alleged publication of studies and encouragement of steering. Plaintiff's remaining contentions, which have also been rejected by the Court, are pertinent only to its claim against the Board.

For the reasons stated herein,

It Is Ordered that the defendant's motion for summary judgment is granted, and that judgment be entered in favor of each of the defendants.

End of Document

³¹ Plaintiff's evidence regarding this matter consists of transcripts of telephone conversations with officials of the two newspapers. See Declaration of Gina Williams, Exhs. Q-R.

The transcript of the conversation with the Los Angeles Times indicates that the newspaper refused to continue running a nonspecific advertisement promoting plaintiff's low commissions in a space reserved for advertisements offering specific properties for sale after receiving some complaints from "other brokers." The transcript also indicates that the newspaper offered to continue running the advertisement if plaintiff would agree to revise it to include specific properties, or to move it to another space reserved for nonspecific advertisement of real estate services.

The transcript of the conversation with the Los Angeles Herald Examiner indicates that the newspaper delayed approval of one of plaintiff's advertisements, apparently for fear of becoming embroiled in a legal controversy. The record does not indicate whether the advertisement was eventually approved.

HN1 [down arrow] Per Se Rule & Rule of Reason, Per Se Violations

Generally, conduct alleged to violate the Sherman Act is scrutinized under the rule of reason rather than the per se rule, and departure from the rule-of-reason standard must be based upon demonstrable economic effect. It is only after considerable experience with certain business relationships that courts classify them as per se violations of the Sherman Act. Per se rules are fashioned to promote litigation efficiency and business certainty by prohibiting conduct that is characterized by a pernicious effect on competition and lack of any redeeming virtue. However, despite the ominous tenor of the phrase conspiracy to eliminate a competitor by unfair means, such conspiracies

have not been shown to be consistently anticompetitive; they may actually have a beneficial effect on competition by facilitating new entry or otherwise decreasing concentration.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

[HN2](#) [] Antitrust & Trade Law, Sherman Act

The difficulty with the per se approach is that the alleged conspiracy tends to be a spurious one, often between the defendant and parts of his own enterprise. Given, moreover, that the hiring of a rival's employees is not ordinarily exclusionary, even when done by a monopolist, characterizing the employment as a conspiracy seems little more than a semantic trick that is inconsistent with employee mobility. Many courts have wisely stepped back from the per se holdings of the earlier cases, recognizing that such conduct is not always exclusionary.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

[HN3](#) [] Antitrust & Trade Law, Sherman Act

The Sherman Act is intended to prevent restraints on competition, whereas unfair competition is still competition and the purpose of the law of unfair competition is to impose restraints on that competition. There is, therefore, fundamental conflict between antitrust and unfair competition law; this counsels against basing per se illegality under the Sherman Act on the violation of unfair competition laws. A related difficulty is isolating the impermissible intent to eliminate a competitor from the permissible intent to engage in cutthroat competition. Because intent is nearly always determined by inference, and because the same conduct could support the inference of both a permissible and an impermissible intention, a per se rule prohibiting conspiracies to eliminate competition by unfair means would sweep too broadly.

[HN4](#) [] Sherman Act, Claims

There is no indication that Congress intended to balkanize antitrust law by permitting antitrust illegality to turn on the unfair competition law of the various states; making unfair means an element of the violation would cause the content of the Sherman Act to vary from state to state. The Sherman Act was not enacted to police interstate

transportation, or to afford a remedy for wrongs, which are actionable under state law, and result from combinations and conspiracies which fall short, both in their purpose and effect, of any form of market control of a commodity.

[Antitrust & Trade Law > Public Enforcement > US Federal Trade Commission Actions > General Overview](#)

[Antitrust & Trade Law > Sherman Act > General Overview](#)

[HN8](#)[] Price Fixing & Restraints of Trade, Horizontal Refusals to Deal

Concerted refusals to deal are generally characterized by conduct inducing a competitor's suppliers or customers to refuse to deal with that competitor.

Governments > Fiduciaries

Torts > Business Torts > Unfair Business Practices > General Overview

HN9 **Governments, Fiduciaries**

Kansas imposes very strict fiduciary responsibilities upon its directors and officers, and a coconspirator in a breach of fiduciary duty is liable for damages.

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

HN10 **Jury Trials, Province of Court & Jury**

It is well settled that a verdict will not be upset on the basis of speculation as to the manner in which the jurors arrived at it.

Civil Procedure > Judicial Officers > Judges > General Overview

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

HN11 **Judicial Officers, Judges**

A trial judge may not have the same jury reconsider what appears to him (or what he might determine upon general inquiry) to be a miscalculation of general damages. Appearances do not always ring true, and possible prejudice by the court's inquiry may easily take place. To allow a judge to question a jury's process of deliberate decision, even though done in good faith to avoid an apparent miscarriage of justice, could result in abuses far outweighing the infrequent inability to correct what may appear to be or is erroneous or a misunderstanding.

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

HN12 **Jury Trials, Province of Court & Jury**

If the court's interrogation of the jury as to the amount of the verdict could be condoned, then it would logically follow that the court or counsel could seek to correct a verdict on matters that are traditionally considered inherent in the verdict. If a verdict for a certain amount had been received, counsel could not have later shown by affidavit that the amount was erroneously computed. Such a rule may seem harsh, but it is premised upon sound reasons of public policy. It is well settled that a jury's misunderstanding of testimony, misapprehension of law, errors in computation or improper methods of computation, unsound reasoning, or other improper motives cannot be used to impeach a verdict. These matters all inhere in the verdict itself.

Civil Procedure > Judgments > Relief From Judgments > Motions for New Trials

HN13 **Relief From Judgments, Motions for New Trials**

The decision whether to grant a new trial is committed to the informed discretion of the district court, which is generally in a better position to evaluate claims of jury confusion or other error in the verdict.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > Judgments > Relief From Judgments > Motions for New Trials

Civil Procedure > Appeals > Standards of Review > General Overview

HN14 [blue icon] **Standards of Review, Abuse of Discretion**

An appellate court's standard of review of a trial court's refusal to grant a new trial is whether the court abused its discretion.

Counsel: John T. Conlee, Wichita, Kansas, and Floyd L. Walker, Tulsa, Oklahoma, (Thomas D. Kitch, Wichita, Kansas), for Defendants-Appellants, Cross-Appellees.

Gerald Sawatzky, (Dwayne C. Pollard of Blackstock, Joyce, Pollard, Blackstone & Montgomery, Tulsa, Oklahoma), of Foulston, Siefkin, Powers & Eberhardt, Wichita, Kansas, for Plaintiff-Appellee, Cross-Appellant.

Judges: Holloway, McKay, and Logan, Circuit Judges.

Opinion by: LOGAN

Opinion

[*495] LOGAN, Circuit Judge.

The plaintiff, Midwest Underground Storage, Inc., brought an action against its former president Francis G. Melland, a former stockholder Louis Porter, and various entities controlled by Melland or Porter, alleging that the defendants violated § 1 of the Sherman Act by conspiring to engage in unfair competition for the purpose of eliminating Midwest as a competitor. Midwest also alleged that the defendants' conduct constituted business torts under state law. Porter counterclaimed against Midwest and stockholders [***2] Bill Moon and Walter Scott. Prior to trial, defendants Melland and M-P Petroleum, Inc. settled with Midwest and were dismissed from the action. The case was submitted to the jury on special interrogatories. The jury found in favor of Midwest on the antitrust claim in the amount of \$ 250,000 and on the other claims in the amount of \$ 3,911,637; the jury denied Porter's counterclaim. After various motions and orders the court entered final judgment on the verdict, trebling the antitrust award to \$ 750,000 and awarding Midwest the \$ 3,911,637 on the other claims but refusing to treble it. Prior to entering final judgment the court concluded that it lacked in personam jurisdiction over M-P Petroleum, Ltd. and dismissed M-P from the action. Both Midwest and the defendants appealed. The issues on appeal are (1) whether the district court erred in denying the defendants' motion for directed verdict on the antitrust claim, (2) whether the court erred in refusing to order a new trial on the state law claims, and (3) whether the court erred in refusing to enter judgment on the state law claims against defendants other than Porter and in holding that it lacked in personam jurisdiction over [***3] M-P Petroleum, Ltd.

Midwest was formed in 1969 to develop underground facilities for the storage of liquid petroleum gas (LPG) products. Fifty percent of the stock was originally controlled by Moon, Scott, and Porter, who held equal numbers of shares. The remaining stock was held by Melland and three others, each of whom owned 1/8 of the corporation's outstanding shares. Melland became president of Midwest and directed the construction and the operation of the facilities. In 1973, after Scott, Moon, and Porter had a falling-out, Porter transferred his ownership interest in Midwest to Scott and Moon. Thereafter, Melland and Porter jointly engaged in various business activities, ultimately

forming a corporation to operate competing underground storage facilities. When certain of Melland's activities were challenged as being in derogation of his fiduciary duties as president of Midwest at a stockholders meeting in May 1974, he resigned the presidency of Midwest. Moon became president of Midwest, and Midwest argues that only then did it become aware of the extent to which Melland had violated his fiduciary duties. Midwest's complaint alleged that the defendants conspired to use [**4] Melland's position as president of Midwest to eliminate Midwest as a competitor by diverting corporate opportunities, by failing to expand Midwest, and by otherwise using Midwest for personal gain.

I

The defendants contend that the district court erred in refusing to direct a verdict against Midwest on the antitrust claim. They argue that the complaint does not state a per se violation and that Midwest failed to prove injury to competition as required under rule of reason analysis. Asserting that a per se violation was alleged and proven and that the record reflects injury to competition, Midwest argues that [*496] the record adequately supports the jury's finding of liability under § 1 of the Sherman Act. We turn first to whether the conspiracy alleged constitutes a per se violation.

A

The per se instruction Midwest sought and the court refused was:

"In this case, if you find that one or more defendants combined or conspired with another, such as Francis G. Melland, to use Melland's position as president and manager of plaintiff to cripple plaintiff's operations with the intent to eliminate plaintiff as a viable competitor, then such defendant or defendants are guilty [**5] of a per se violation of the federal statute, and are liable for the damages caused to plaintiff."

App. I, 92. Midwest argues that such a conspiracy is a per se violation because it is "horizontal in nature for the purpose of excluding plaintiff from competition." Brief of Plaintiff-Appellee and Cross-Appellant at 46. The contention that a horizontal conspiracy to suppress competition through the elimination of a competitor by unfair means constitutes a per se violation is derived from [Albert Pick-Barth Co. v. Mitchell Woodbury Corp., 57 F.2d 96 \(1st Cir. 1932\)](#), cert. denied, 286 U.S. 552, 76 L. Ed. 1288, 52 S. Ct. 503 (1932).¹ Some courts have viewed this Court's decision in [Perryton Wholesale, Inc. v. Pioneer Distributing Co., 353 F.2d 618 \(10th Cir. 1965\)](#), cert. denied, 383 U.S. 945, 16 L. Ed. 2d 208, 86 S. Ct. 1202 (1966), as adopting the *Pick-Barth* per se rule. See, e.g., [Havco of America, Ltd. v. Shell Oil Co., 626 F.2d 549, 555 \(7th Cir. 1980\)](#); [Northwest Power Products, Inc. v. Omak Industries, Inc., 576 F.2d 83, 86 \(5th Cir. 1978\)](#), cert. denied, 439 U.S. 1116, 59 L. Ed. 2d 75, 99 S. Ct. 1021 (1979). [**6] But in [Craig v. Sun Oil Co., 515 F.2d 221, 224 \(10th Cir. 1975\)](#), cert. denied, 429 U.S. 829, 50 L. Ed. 2d 92, 97 S. Ct. 88 (1976), we said *Perryton Wholesale* "is not necessarily a per se case despite the citation of the First Circuit cases." This Circuit has not held that a conspiracy to eliminate a competitor by unfair means constitutes a per se violation, and we decline to do so now.

HN1 [↑] Generally, conduct alleged to violate the Sherman Act is scrutinized under the rule of reason rather than the per se rule, and "departure from the rule-of-reason standard must be based upon demonstrable economic [**7] effect." [Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 58-59, 53 L. Ed. 2d 568, 97 S. Ct. 2549 \(1977\)](#). "It is only after considerable experience with certain business relationships that courts classify them as per se violations of the Sherman Act." [United States v. Topco Associates, Inc., 405 U.S. 596, 607-08, 31 L. Ed. 2d 515, 92 S. Ct. 1126 \(1972\)](#). Per se rules are fashioned to promote litigation efficiency and business certainty by prohibiting conduct that is characterized by a "pernicious effect on competition and lack of any redeeming virtue." [Northern Pacific Railway v. United States, 356 U.S. 1, 5, 2 L. Ed. 2d 545, 78 S. Ct. 514 \(1958\)](#). However, despite the ominous tenor of the phrase "conspiracy to eliminate a competitor by unfair means," such conspiracies have not been shown to be consistently anticompetitive; they may actually have a beneficial effect on competition by

¹ The First Circuit later severely limited the scope of the rule of *Pick-Barth*. See [George R. Whitten, Jr., Inc. v. Paddock Pool Builders, Inc., 508 F.2d 547, 561-62 \(1st Cir. 1974\)](#), cert. denied, 421 U.S. 1004, 44 L. Ed. 2d 673, 95 S. Ct. 2407 (1975).

facilitating new entry or otherwise decreasing concentration. See, e.g., [Northwest Power Products, Inc. v. Omak Industries, Inc.](#), 576 F.2d at 90-91.

"The [HN2](#) [**8] difficulty with [the per se] approach is that the alleged conspiracy tends to be a spurious one, often between the defendant and parts of his own enterprise. Given, moreover, that the hiring of a rival's employees is not ordinarily exclusionary, even when done by a monopolist, characterizing the employment as a conspiracy seems little more than a semantic trick that is inconsistent with employee mobility. Many courts have wisely stepped back from the per se holdings [[*497](#)] of the earlier cases, recognizing that such conduct is not always exclusionary."

3 P. Areeda & D. Turner, [**Antitrust Law**](#) § 828b, at 323 (1978) (footnotes omitted). The conspiracy alleged here appears to be of the "spurious" type: the actors are Porter, Melland, and corporations they jointly control. The conspiracy is not one of erstwhile competitors combining to supplant competition with cooperation. Some of the defendants are not in the relevant geographic market. Others did not exist prior to Melland's resignation. None competes with other defendants. Conspiracies of the type alleged here are not consistently exclusionary and do not carry the same trappings that characterize conduct treated [[**9](#)] under the per se rule.

Other considerations also militate against applying per se analysis to a conspiracy to eliminate a competitor by unfair means. First, "the definition of 'unfair means' is so vague that the *Pick-Barth* cases fail to draw the bright line of illegality which is essential if a *per se* rule is to achieve its purpose as a guide to business planning." [Northwest Power Products](#), 576 F.2d at 90. Second, as noted in *Northwest Power Products*, [HN3](#) [**9] the Sherman Act is intended to prevent restraints on competition, whereas "unfair competition is still competition and the purpose of the law of unfair competition is to impose restraints on that competition." [Id. at 88](#). There is, therefore, fundamental conflict between antitrust and unfair competition law; this counsels against basing per se illegality under the Sherman Act on the violation of unfair competition laws. A related difficulty is isolating the impermissible "intent to eliminate a competitor" from the permissible "intent to engage in cutthroat competition." Because intent is nearly [[**10](#)] always determined by inference, and because the same conduct could support the inference of both a permissible and an impermissible intention, a *per se* rule prohibiting conspiracies to eliminate competition by unfair means would sweep too broadly. Third, [HN4](#) [**10] there is no indication that Congress intended to balkanize [**antitrust law**](#) by permitting antitrust illegality to turn on the unfair competition law of the various states; making "unfair means" an element of the violation would cause the content of the Sherman Act to vary from state to state.

"The Sherman Act was not enacted to police interstate transportation, or to afford a remedy for wrongs, which are actionable under state law, and result from combinations and conspiracies which fall short, both in their purpose and effect, of any form of market control of a commodity"

[Apex Hosiery Co. v. Leader](#), 310 U.S. 469, 512, 84 L. Ed. 1311, 60 S. Ct. 982 (1940). Fourth, [HN5](#) [**11] Congress has repeatedly refused to enact a [[**11](#)] federal cause of action for unfair competition, 1 E. Callman, *Unfair Competition, Trademarks & Monopolies* para. 4.3, at 137-42 (3d ed. 1967 & Supp. 1976 at 35), and instead has given the Federal Trade Commission the exclusive authority to police unfair practices. See [15 U.S.C. § 45](#). This cautions against using the Sherman Act as a mandate to regulate unfair competition. Finally, [HN6](#) [**12] unfair competition law is grounded in ethical considerations that are irrelevant to, or even inconsistent with, the economic considerations on which the antitrust laws are based. See [National Society of Professional Engineers v. United States](#), 435 U.S. 679, 687-92, 55 L. Ed. 2d 637, 98 S. Ct. 1355 (1978). We conclude, therefore, that conspiracies of the type alleged herein should be assessed under the rule of reason. Accord [Havco of America, Ltd. v. Shell Oil Co.](#), 626 F.2d 549, 555-56 (7th Cir. 1980); [Stifel, Nicolaus & Co. v. Dain, Kalman & Quail, Inc.](#), 578 F.2d 1256, 1260-61 (8th Cir. 1978); [Northwest Power Products](#), 576 F.2d at 90. [[**12](#)] ²

² Midwest also argues that a conspiracy to eliminate a competitor by unfair means is a *per se* violation because the conspiracy constitutes something akin to a market allocation agreement, a concerted refusal to deal, and a price fixing arrangement. Brief of Plaintiff-Appellee and Cross-Appellant at 35-42. Midwest contends that Melland's diversion of its corporate opportunities constituted a market allocation agreement because it diverted what would otherwise have been Midwest's share of the market. [HN7](#) [**13] The essence of a market allocation violation, however, is that competitors apportion the market among themselves and cease competing in another's territory or for another's customers. There is no evidence of any market division here, either

[**13] [*498] B

We turn next to the defendants' contention that Midwest failed to prove injury to competition, necessary under rule of reason analysis, and that therefore the district court erred in refusing to direct a verdict against the Sherman Act § 1 claim. Midwest argues that sufficient evidence of injury to competition was adduced through the testimony of Dr. Randall Haydon, David Onsgard, Bill Moon, and Walter Scott. We are very reluctant to overturn a jury verdict on the basis of insufficiency of the evidence. But after review of the record, we agree with the defendants that the evidence does not support the verdict. The evidence could support a finding of injury to a competitor, but not a finding of injury to competition in the sense contemplated by the antitrust laws. See generally *George R. Whitten, Jr., Inc. v. Paddock Pool Builders, Inc.*, 508 F.2d 547, 5621 (1st Cir. 1974), cert. denied, 421 U.S. 1004, 44 L. Ed. 2d 673, 95 S. Ct. 2407 (1975). The defendants' motion for directed verdict, therefore, should have been granted.

Dr. Haydon's testimony regarding injury to competition came in response to hypothetical questions put to [**14] him by counsel for Midwest.

"Q. Now, further assume that the demand for underground storage in late 1973 and 1974 exceeded the supply for storage in the State of Kansas and elsewhere, that two or three relatively new companies have started and are able to meet the excess demand, and further assume that two of the new companies have the same President, who owns a much greater interest in one company than the other and gives preference in major business decisions for expansion to the company he has greatest ownership in, do you have an opinion as to whether those facts would affect competition in that market?

A. I do.

Q. And what is that opinion?

A. Well, no man can serve two masters. No man is going to compete with himself on price; therefore, in fact if you had two or three firms, you would really only have two competing, therefore, they would not be as effective competition for that demand as there would have been with three firms competing.

Q. And would that have an effect generally on consumers of the product for which there is that competition?

A. Yes, it would.

Q. Would it have a detrimental effect, or a good effect so far as competition? [**15]

[*499] A. It would cost the consumer a higher price for the purchase of that service.

Q. So there would be an injury to competition?

A. Yes."

App. I, 415-16. Dr. Haydon's testimony does not establish injury to competition. His opinion did not explicitly treat, nor was it grounded upon, any discussion of the structural characteristics of the market that actually existed -- the number of competing firms, the relative market share of each, or the potential of new entry into the market --

among the defendants or between Midwest and the defendants. Instead, the defendants attempted to control Midwest's share of the market by excluding Midwest. This does not constitute the type of anticompetitive conduct condemned as a per se unlawful market allocation.

Neither does the alleged conspiracy constitute a concerted refusal to deal. [HN8](#) Concerted refusals to deal are generally characterized by conduct inducing a competitor's suppliers or customers to refuse to deal with that competitor. See, e.g., *Radiant Burners, Inc. v. Peoples Gas Light & Coke Co.*, 364 U.S. 656, 5 L. Ed. 2d 358, 81 S. Ct. 365 (1961); *Klor's, Inc. v. Broadway-Hale Stores, Inc.*, 359 U.S. 207, 3 L. Ed. 2d 741, 79 S. Ct. 705 (1959); *Fashion Originators' Guild of America, Inc. v. Federal Trade Commission*, 312 U.S. 457, 85 L. Ed. 949, 61 S. Ct. 703 (1941). Here, there is no allegation or evidence that Midwest's suppliers or customers have refused to deal with Midwest; nor is there evidence that the defendants have conspired to boycott those suppliers or customers to coerce such a refusal.

Midwest's attempt to characterize the conspiracy as price fixing is also unconvincing. The foreclosure of price rivalry between Midwest and the defendants does not, by itself, constitute price fixing, and there is no evidence of an agreement between Midwest and the defendants or of an agreement among the defendants to fix or manipulate the price of storage. That the defendants were able to charge more than Midwest would have charged does not compel the conclusion that they engaged in supracompetitive pricing.

evidence that could support a conclusion that the elimination of price competition between Midwest and the defendants would lead to monopoly pricing. Also absent from Dr. Haydon's testimony and the record is any indication of an increase in concentration or other evidence from which an anticompetitive aggregation of market power could be inferred. Instead, the record appears to contradict the assumptions of fact implicit or explicit in the questions put to Dr. Haydon. The record demonstrates that the 1973-1974 period was a peculiarly advantageous time for those in the LPG underground storage business because of the OPEC oil embargo. The demand for storage space exceeded [**16] the supply and prices rose rapidly. At least two new competitors to Midwest in addition to the Melland-Porter company entered the market about that time. Midwest was able to lease all of its storage space at relatively high prices. The assumption that Melland was a principal in Midwest and in a competing company (although in fact Melland's competing company was formed after he resigned as Midwest's president), and that instead of devoting his time to expanding the storage capacity of Midwest Melland devoted that time to building the competitor in which he had a greater economic interest, may give rise to the inference that Midwest was injured as a competitor but falls short of providing a basis for the conclusion that competition in the geographic market in which both operated was reduced. Thus, Dr. Haydon's responses to the questions did not establish injury to competition. Melland's failure to expand Midwest so that it could absorb the increased demand and prevent entry of the Melland-Porter company into the marketplace does not demonstrate that Melland's actions increased the price of LPG storage in the market; nor does it reflect injury to the competitive market. This is [**17] like the situation presented in *Northwest Power Products*, in which the unfair competition of the conspiracy enhanced rivalry in the market rather than reduced it.

The evidence adduced through Moon, Scott, and Onsgard neither cures the deficiencies in Dr. Haydon's testimony nor itself shows injury to competition. Moon's testimony related to establishing the Conway-Hutchinson area as the relevant geographic market, but did not reflect injury to competition in that market. Scott's testimony related almost exclusively to how Melland's conduct injured Midwest. He made no statements regarding injury to competition in the relevant market. Onsgard offered testimony relating to the geographic market and concerning the relative size of the various storage facilities in the market. His testimony, however, was not sufficiently detailed to support inferences regarding the effect of the conspiracy on competition.

The evidence, taken as a whole, fails to show that the defendants injured competition. There is no showing that their conduct raised entry barriers, increased concentration, or otherwise led to the acquisition or exercise of market power. Even if we were willing to infer injury [**18] to competition if Midwest had been eliminated from the market or severely injured as a viable competitor, the record does not reflect such injury. During the time in question, Midwest expanded its capacity; it fully rented its existing capacity; it could and did increase its storage fees. It had lower incremental costs for storage expansion than most of its rivals, especially new entrants, because its rail and other facilities were in place. Although Midwest made a jury case that it lost opportunities to increase profits and to strengthen its position in the market, it did not establish injury to competition as [*500] opposed to injury to a competitor. Consequently, the district court erred in refusing to direct a verdict against Midwest on its antitrust claim.

II

We turn now to the pendent state law claims for unfair competition, loss of corporate opportunities, self-dealing, and other fiduciary breaches. Even though we have concluded that the court should have directed a verdict for the defendants on Midwest's federal claim, that claim, measured at the outset of the litigation, was substantial, especially in light of *Perryton Wholesale*. Because the federal claim was [**19] substantial, and because the state claims arose from a common nucleus of operative facts, pendent jurisdiction was proper. See *United Mine Workers v. Gibbs*, 383 U.S. 715, 721-19, 16 L. Ed. 2d 218, 86 S. Ct. 1130 (1966).

Although the evidence is conflicting, the record supports the jury's verdict holding Porter liable as a coconspirator with Melland for Melland's actions in violation of his fiduciary duties. HNG[ Kansas imposes very strict fiduciary responsibilities upon its directors and officers, see *Delano v. Kitch*, 663 F.2d 990 (10th Cir. 1981), cert. denied, 456 U.S. 946, 72 L. Ed. 2d 468, 102 S. Ct. 2012 (1982); *Newton v. Hornblower, Inc.*, 224 Kan. 506, 582 P.2d 1136 (1978), and a coconspirator in a breach of fiduciary duty is liable for damages. See generally *International Union, UAW v. Cardwell Manufacturing Co.*, 416 F. Supp. 1267, 1290 (D. Kan. 1976). Furthermore, we have examined the

court's instructions of which the defendants complain and find the instructions sufficient not to mislead the jury [**20] on the law.

Had the jury returned a verdict for \$ 4,000,000, or almost any figure even slightly different from the \$ 3,911,637 total it did return, we would have little trouble affirming the judgment. The difficulty is that the \$ 3,911,637 judgment is the exact amount claimed by Midwest in exhibits and arguments it presented before the jury ³ for LPG product

³The figure \$ 3,911,637 was listed on plaintiff's exhibit 100, which set forth the manner in which Midwest's damage claim for LPG product shortage was calculated, and on plaintiff's exhibit 104, which summarized the various damage claims and is reconstructed as follows:

SUMMARY OF DAMAGES

shortage -- a damage item that was contingent upon a finding that Midwest was liable on Porter's counterclaim. However, the jury exonerated Midwest from liability for LPG shortage by denying the counterclaim, even though it found for Midwest in the total amount of \$ 3,911,637. There was, of course, no explanation of how the jury arrived at its verdict.

[**21] The defendants requested a new trial. The district court initially agreed that the amount of the verdict was improper and awarded a new trial on damages only. Midwest then argued for reconsideration, urging that the award was within the range of the evidence, that the jury clearly intended to find the defendants liable on all state law claims, and that the mere coincidence of the award with the amount claimed for LPG product shortage did not justify setting aside the verdict. It also argued that because the jury found against Porter on the counterclaim, it could not have intended the amount awarded to represent damages for product shortage. On reconsideration the district judge reinstated the jury verdict and reversed his earlier new trial ruling. He recognized, as do we, that in this case it is logically impossible to award a new trial on damages only.

"We have been unable to construct any logic which would permit us to vacate the award as we did without also being compelled by defendant's argument that the award evidences the finding of the jury [*501] that defendant Porter was liable to plaintiff only for product shortages; as to all the other claims, the jury [**22] found against plaintiff. In other words, if the amount of the jury award is sufficient of itself to cause us to conclude that it was derived from one improper source, namely the product shortages, it is no less sufficient for the conclusion that the jury found plaintiff was entitled to recover only on the product shortages claim, and not on any other state law claims."

App. I, 196.

The only amount (other than the \$ 250,000 antitrust damages) that the jury awarded was the exact total -- to the dollar -- claimed for the product shortage, which Midwest would have suffered only if Porter had won his counterclaim. Yet by denying Porter's counterclaim, the jury essentially found that there was no product shortage for which Midwest could recover. We can conceive of two plausible explanations for this apparent contradiction. One is that the jury intended to find for Midwest on the state claims (understanding that the product shortage claim was not an element of the damages) and either coincidentally arrived at the \$ 3,911,637 figure or deliberately picked it because it was within the range of the evidence and the jury was somehow attracted to it regardless of the claim to which [**23] it was associated on the exhibits. While the likelihood of a coincidence in numbers may be very small, the possibility of the special attractiveness of \$ 3,911,637 as a consciously selected damage award appears to us to be a distinct possibility. The jury had before it exhibit 104, which displayed a variety of numbers, including the \$ 3,911,637 figure. Exhibit 104 also contained a damage figure for some of the state law claims which, when added with other figures of damage the jury could award, would come close to the \$ 3,911,637 figure. The second plausible explanation is that the jury was confused and that its answers to special interrogatories do contradict its damage award. If so, perhaps the jury intended to award Midwest this amount for product shortage regardless of the decision on the counterclaim and to deny damages for the other claims despite the finding of liability on those claims.

The first explanation would require that we uphold the award, the second that we reverse and remand for a new trial on both liability and damages. Given this choice between a possible proper determination of a figure and a possible

instance of jury confusion, we cannot freely exercise [**24] our own judgment as to the most plausible. We face two barriers to reversing the verdict.

The first barrier is the traditional sanctity of jury verdicts. [HN10](#)[] It is well settled that a verdict will not be upset on the basis of speculation as to the manner in which the jurors arrived at it. [Howard D. Jury, Inc. v. R & G Sloane Manufacturing Co.](#), [666 F.2d 1348, 1349-52 \(10th Cir. 1981\)](#); see [Air-Exec, Inc. v. Two Jacks, Inc.](#), [584 F.2d 942, 945 \(10th Cir. 1978\)](#). In deciding not to award a new trial, the trial court relied upon [Chicago, Rock Island and Pacific Railroad v. Speth](#), [404 F.2d 291 \(8th Cir. 1968\)](#), which states:

"[[HN11](#)[] A] trial judge may not have the same jury reconsider what appears to him (or what he might determine upon general inquiry) to be a miscalculation of general damages. Appearances do not always ring true, and possible prejudice by the court's inquiry may easily take place. To allow a judge to question a jury's process [**25] of deliberate decision, even though done in good faith to avoid an apparent miscarriage of justice, could result in abuses far outweighing the infrequent inability to correct what may appear to be or is erroneous or a misunderstanding"

[HN12](#)[] If the court's interrogation of the jury as to the amount of the verdict could be condoned in the instant case, then it would logically follow that the court or counsel could seek to correct a verdict on matters that are traditionally considered inherent in the verdict. If the verdict for \$ 16,000.00 had been received, counsel could not have later shown by affidavit that the \$ 16,000.00 was erroneously computed. Such a rule may seem harsh, but it is premised upon sound reasons of public [[*502](#)] policy. It is well settled that a jury's misunderstanding of testimony, misapprehension of law, errors in computation or improper methods of computation, unsound reasoning or other improper motives cannot be used to impeach a verdict. These matters all inhere in the verdict itself."

Id. at 295 (footnote omitted). The \$ [**26] 3,911,637 figure is well within the range of the evidence.

The second barrier to reversal inheres in our position as an appellate court. [HN13](#)[] The decision whether to grant a new trial is committed to the informed discretion of the district court, which is generally in a better position to evaluate claims of jury confusion or other error in the verdict. *E.g.*, [Thompson v. Kerr-McGee Refining Corp.](#), [660 F.2d 1380, 1388 \(10th Cir. 1981\)](#), cert. denied, [455 U.S. 1019, 72 L. Ed. 2d 137, 102 S. Ct. 1716 \(1982\)](#). [HN14](#)[] Our standard of review of a trial court's refusal to grant a new trial is whether the court abused its discretion. *Id.* After careful review of the record we are unwilling to hold that the trial court abused its discretion when it denied a new trial in this case. Courts have refused to find error in other jury verdicts with coincidences of figures almost as compelling as this one. See, e.g., [Estes v. Southern Pacific Transportation Co.](#), [598 F.2d 1195, 1199-1200 \(10th Cir. 1979\)](#); [**27] [George v. Bolen](#), [2 Kan. App. 2d 385, 580 P.2d 1357 \(1978\)](#). We therefore affirm the jury verdict on the state law claims in the amount of \$ 3,911,637.

We uphold the jury verdict denying the counterclaim as adequately supported by evidence in the record. The defendants' argument that the court erred in dismissing portions of Porter's counterclaim is without merit.⁴

III

The trial court dismissed M-P Petroleum, Ltd. from the case after trial for lack of in personam jurisdiction. The court explained the dismissal of M-P on the ground that Midwest failed to establish that M-P performed any act that would bring it within the jurisdiction of the court. The court recited that M-P was formed approximately seven weeks prior to Melland's resignation as Midwest's president. It cited no authority, [**28] declaring only, "After review of trial notes and consideration of defendants' argument, the Court is of the opinion, and must conclude, that plaintiff's evidence failed to establish that M-P Petroleum, Limited performed any act which would bring that corporation within the jurisdiction of this Court, pursuant to the Kansas 'long-arm' statute, [K.S.A. 60-308](#)." App. I, 183. Citing [Ammon v. Kaplow](#), [468 F. Supp. 1304, 1312 \(D. Kan. 1979\)](#), and [Professional Investors Life Insurance Co. v.](#)

⁴ Because we have held there was no antitrust violation proved, we need not consider Midwest's arguments that the total award should be trebled or that the court erred in the amount awarded as attorney's fees.

Roussel, 445 F. Supp. 687, 696 (D. Kan. 1978), Midwest argues that because M-P participated in a conspiracy to commit a business tort in Kansas, the actions of the coconspirators bring M-P within the reach of the Kansas long-arm statute. *Kaplow* and *Roussel* represent the general rule regarding long-arm jurisdiction over out-of-state coconspirators. See R. Casad, *Jurisdiction in Civil Actions* §§ 403[1][b], 7.09[3] (1983). We are not told the basis for the court's ruling. The court may have found that M-P was not a coconspirator and consequently that it had no contacts with the state. However, without a more detailed explanation of the basis for [**29] the dismissal of M-P, we cannot review that determination. Consequently, the order dismissing M-P is vacated. The court on remand should issue a new ruling setting forth the factual and legal conclusions underlying the ruling.

The trial court entered the judgment for \$ 3,911,637 only against defendant Porter. No explanation was given for limiting the entry of judgment to Porter alone. On remand the court should address this issue and set forth the factual and legal bases for its conclusion.

[*503] IV

On remand, the district court is directed to enter judgment n.o.v. for the defendants on the antitrust claim and to vacate its judgment awarding attorney's fees on that claim. The court's judgment against defendant Porter on the state law claim is affirmed in the amount of \$ 3,911,637, although the court should consider whether Hillsdale, Ltd., Hillsdale Underground Storage, Inc., Dalco Petroleum, Inc., and M-P Petroleum, Ltd. should also be liable for that judgment.

The case is affirmed in part, reversed in part, and remanded for proceedings consistent with this opinion.

HN1 [down arrow] Trade Secrets & Unfair Competition, Trade Secrets

To maintain a cause of action for the disclosure of a trade secret against an employee, the employee must have a duty not to disclose. A confidential relationship gives rise to an employee's duty not to use or disclose the employer's trade secrets. A confidential employment relationship can be established expressly by contract or can

be implied from the nature of the relationship. When an employee has an intimate knowledge of the employer's business, a confidential relationship will be implied.

HN2 [] **Employee Duties & Obligations, Employee Nondisclosure**

When a confidential employment relationship is established, the employer has a qualified right to secrecy that arises from the relationship and is required by principles of good faith. The employee has a concomitant duty not to use or disclose the employer's trade secrets, if he knows or should have known that the employer desired secrecy.

Trade Secrets Law > Protected Information > Customer Lists

HN3 [] **Trade Secret Determination Factors, Business Use**

The duty not to disclose is breached only when the information disclosed can be properly classified as a trade secret. A trade secret is defined as any formula, pattern, device, or compilation of information which is used in one's business, and which gives him an opportunity to obtain an advantage over competitors who do not know or use it. It may be a list of customers. The Texas courts, however, have added a criterion to the traditional definition: a trade secret must be "secret." Thus, to qualify as a trade secret the information cannot be generally known by others in the same business nor readily ascertainable by an independent investigation. Thus, a customer list of readily ascertainable names and addresses will not be protected as a trade secret.

HN7 Punitive Damages, Aggravating Circumstances

If the use of trade secrets results in economic injury to the employer, an award of actual damages is a proper remedy. Punitive damages are available as well if defendant's actions are fraudulent or malicious.

Counsel: Palmer, Palmer & Coffee, Dallas, Texas, Philip I. Palmer, Jr., Dallas, Texas, for Appellant.

Opinion by: WISDOM

Opinion

[*1176] WISDOM, Circuit Judge:

In this diversity case the issue the appeal raises is whether a memorandum containing the names, addresses, and purchasing characteristics of a business's customers is a trade secret under Texas law. The defendants, Carolyn Reed, Nelda Poncik, and the American Stockman Tag Company, appeal from a judgment permanently enjoining them from (1) using certain stamping equipment identical with that used by Temple Tag Company, (2) disclosing the modifications made to that type of equipment by Temple Tag, and (3) using or disclosing the contents of a customer list obtained from Temple Tag. The court also awarded actual and exemplary damages to the plaintiff, Zoecon Industries. The district court found that Reed and Poncik breached a confidential [**2] relationship by misappropriating the trade secrets of their former employer, Temple Tag Company, a Zoecon subsidiary. The district court also found that Reed, assisted by Poncik, breached a non-competition agreement she had entered into with Zoecon by forming American Stockman, a competing business.

On appeal, Reed and Poncik make three contentions. First, they contend that the district court erred in finding that they had breached a confidential relationship because Temple Tag's customer list, the basis for the court's determination that there had been a breach, is not a trade secret under Texas law. Second, Reed contends that the non-competition agreement is invalid and nonenforceable under Texas law because it does not state a reasonable territorial limitation. Finally, Reed and Poncik contend that the evidence presented at trial does not support the court's finding of fact that they used the list to solicit customers for American Stockman.

We hold that the customer list is a trade secret under Texas law. The district court's finding that the defendants used the memorandum in soliciting customers is not clearly erroneous. Reed and Poncik, therefore, breached a confidential relationship [**3] with their former employer by using the list in soliciting customers and by disclosing the information contained in it. Because of this holding, it is unnecessary to address the validity of the non-competition agreement under Texas law. We affirm.

I.

Before February 1977, Temple Tag Company was an independent company that manufactured various types of plastic ear tags, including tags used by feedlots to identify cattle. Temple Tag sold these ear tags directly to the cattle feedlots. Reed [*1177] was the assistant general manager and a ten percent stockholder of Temple Tag. Temple Tag also employed Poncik.

In February 1977, Zoecon Industries purchased Temple Tag. Reed sold her Temple Tag stock to Zoecon for \$270,000. At the time of the sale, she executed a non-competition agreement with Zoecon.¹ Zoecon Industries later merged with Zoecon Corporation, which Hooker Chemical Corporation later acquired.

[**4] Reed and Poncik, while employed at Temple Tag, executed employee agreements with Hooker.² They agreed not to disclose any information, inventions, or discoveries without the consent of the company. In 1978,

¹ "For and in consideration of the terms, covenants, and conditions contained in the aforementioned Agreement, the undersigned Shareholders agree as follows: 1. From the date hereof, for a period of five (5) calendar years, Shareholders shall refrain from engaging in any business activity . . . which directly or indirectly competes with the business activities of [Temple Tag] . . . as of the date hereof. Such prohibited activities shall specifically include, but are not limited to, the activities of the production, manufacture or sale of livestock identification materials and products. 2. Subsequent to the date hereof, Shareholders shall not disclose or dispose of, in any matter whatsoever, facts or information concerning any formulas, methods, inventories, methods of operation, customer lists or any other matters related to the operations of the Company."

² The Agreement provides in part:

2. With respect to any such information, inventions and discoveries. . . and to all other information, whatever its nature and form and whether obtained orally, by observation, from written materials or otherwise, . . . , obtained by me during or as a

Reed became general manager of Temple Tag. One year later, Poncik became assistant general manager. During this time, feeder ear tags were an important and growing part of Temple Tag's business. The company began selling to distributors, rather than directly to cattle feedlots as it had done previously. In the summer of 1979, Reed and Poncik begin planning to form their own company to manufacture feeder ear tags and to sell them directly to ultimate users. American Stockman was formed in August 1979, and Poncik became its president.

[**5] Reed and Poncik, however, worked for Temple Tag until late October 1979. Between August 1979 and October 1979, they engaged in various activities at Temple Tag that would benefit American Stockman. They obtained a molding machine and other equipment used to make feeder ear tags. At their request, other Temple Tag employees provided an operating manual for the molding machine and a description of the modifications that Temple Tag made to the equipment it used.³ Reed directed another Temple Tag employee to prepare a memorandum listing ear tag customers and distributors. This list contained names and addresses, as well as information on the type of ear tag purchased by each customer, the amount purchased, the dates of purchases, and other information about the customers. The district court found that this information, which was not known to the general public, was used by Temple Tag to project future sales and to service its customers.

[**6] In early 1980, Reed and Poncik made telephone calls to Temple Tag's feedlot customers soliciting sales of ear tags manufactured by American Stockman. The record showed that 94 percent of American Stockman's sales were made to former customers [*1178] of Temple Tag. Temple Tag had only seven percent of the feeder ear tag market. From this information, the trial judge inferred that Reed and Poncik used the memorandum of Temple Tag customers to obtain customers for American Stockman. In response to American Stockman's entry into the market, Temple Tag established a promotional program: "Buy 5 Tags, Get 2 Tags Free".

Zoecon Industries sought a preliminary injunction against American Stockman, Reed, and Poncik contending that they were using its trade secrets, infringing its trademark, and violating a non-competition agreement. On August 19, 1980, the district court entered a preliminary injunction, enjoining the continued use of certain machinery not at issue here, the continued use or disclosure of the information contained in the memorandum of Temple Tag's cattle feed tag customers, and Reed's participation in American Stockman's business activities. The district court refused [**7] injunctive relief for the use of the list of Temple Tag's suppliers and the list of feedlots showing the location of Temple Tag's hot stamping machines, because these lists were not trade secrets. On June 23, 1982, the district court issued a permanent injunction⁴ and awarded damages against the defendants, jointly and severally, in the amount of \$457,590.66, against Reed, individually, the sum of \$53,705.60, and against Poncik, individually, the sum of \$51,834.20. The court also awarded attorney's fees and costs to Zoecon Industries.

result of my employment . . . relating to any products, apparatus or processes, to any uses thereof or therefor, to raw materials or product prices or costs . . . or to any research, technical, manufacturing or commercial activities or plans of Hooker . . . , I agree:

a. To hold such information, . . . in *strict confidence*, and not publish or otherwise disclose . . . except to or with the prior consent . . . of the Company.

....

c. To make no use of such information, invention or discovery except such use as is required in the performance of my duties for the company.

....

6. I agree to perform and carry out diligently, faithfully and to the best of my ability all duties assigned . . . , and to act and comport myself at all times in the best interests of the Company.

(Emphasis added)

³The defendants have not appealed the district court's permanent injunction on the use of this equipment.

⁴On August 16, 1982, the district court modified its judgment to specify that the permanent injunction enjoined the defendants from soliciting or making sales to any party listed on the memorandum of Temple Tag's feeder tag customers prepared by Reed and from using or disclosing the contents of the memorandum to any other party.

II.

HN1[] To maintain a cause of action for the disclosure [**8] of a trade secret against an employee, the employee must have a duty not to disclose. Our initial inquiry is whether a confidential relationship existed between the employer, Temple Tag, and the employees, Reed and Poncik. A confidential relationship gives rise to an employee's duty not to use or disclose the employer's trade secrets. *E.I. duPont de Nemours Powder Co. v. Masland*, 1917, 244 U.S. 100, 102, 37 S. Ct. 575, 577, 61 L. Ed. 1016, 1019; see also *Mercer v. C.A. Roberts Co.*, 5 Cir.1978, 570 F.2d 1232, 1238 (applying Texas law); Comment, *Trade Secrets in Texas -- The Employer's Rights in the Absence of Contractual Protection*, 17 S.Tex.L.J. 132, 138 (1975). Not all employment relationships are confidential ones. *Mercer v. C.A. Roberts Co.*, 5 Cir.1978, 570 F.2d 1232, 1238. A confidential employment relationship can be established expressly by contract or can be implied from the nature of the relationship. When an employee has an intimate knowledge of the employer's business, a confidential relationship will be implied. *Id.* In this case, Reed and Poncik were the key management personnel at Temple Tag; they [**9] necessarily had an intimate knowledge of the business. They also had signed employee agreements containing non-disclosure provisions.⁵ Thus, we find that under either test a confidential relationship existed between the defendants, Reed and Poncik, and Zoecon Industries, the parent corporation of Temple Tag.

HN2[] When a confidential employment relationship is established, the employer has a qualified right to secrecy that arises from the relationship and is required by principles of good faith. R. Callman, *The Law of Unfair Competition, Trademarks, and Monopolies* § 14.03 (4th ed. 1982). The employee has a concomitant duty not to use or disclose the employer's trade secrets, if he knows or should have known that the employer desired secrecy. *Mercer v. C.A. Roberts Co.*, 5 Cir.1978, 570 F.2d 1232, 1238. Based upon the facts of this case, there is no doubt that [**10] Reed and Poncik knew that Temple Tag intended its customer information to remain secret. Both Reed and Poncik executed employee agreements expressly providing that they were to hold all information obtained from their employment in strict confidence. The evidence [*1179] also shows that when questioned about the list Reed denied having it, allowing the factfinder to infer her knowledge that Temple Tag intended this information to remain secret.

HN3[] The duty not to disclose, however, is breached only when the information disclosed can be properly classified as a trade secret.⁶ *Mercer v. C.A. Roberts Co.*, 5 Cir.1978, 570 F.2d 1232, 1238-39 (alternative holding). The Texas Supreme Court, following the *Restatement of Torts* § 757, comment b (1939), defines a trade secret as "any formula, pattern, device, or compilation of information which is used in one's business, and which gives him an opportunity to obtain an advantage over competitors who do not know or use it. It may be . . . a list of customers." *Hyde Corp. v. Huffines*, 1958, 158 Tex. 566, 314 S.W.2d 763, [**11] cert. denied, 358 U.S. 898, 79 S. Ct. 223, 3 L. Ed. 2d 148; *Elcor Chemical Corp. v. Agri-Sul Inc.*, Tex.Civ.App.1973, 494 S.W.2d 204. The memorandum at issue in this case falls within this definition because it is a list of customers. The type of customer information contained in the memorandum also gave Reed and Poncik an advantage over competitors who did not have the information. See *Collins v. Ryon's Saddle & Ranch Supplies, Inc.*, Tex.Civ.App.1979, 576 S.W.2d 914, 915.

HN4[] The Texas courts, however, have added a criterion to the traditional definition: a trade secret must be "secret". Thus, to qualify as a trade secret the information cannot be generally known by others in the same business nor readily ascertainable [**12] by an independent investigation. *Mercer v. C.A. Roberts Co.*, 5 Cir. 1978, 570 F.2d 1232, 1239; *Gaal v. BASF Wyandotte Corp.*, Tex.Civ.App.1976, 533 S.W.2d 152; *Brooks v. American Biomedical Corp.*, Tex.Civ.App.1973, 503 S.W.2d 683. Thus, a customer list of readily ascertainable names and

⁵ For the text of this agreement, see note 2.

⁶ The subject matter of trade secrets falls into two categories, technological and internal operating information. R. Callman, *The Law of Unfair Competition, Trademarks, and Monopolies* § 14.06 (4th Ed.1982). Customer lists fall into the latter category.

addresses will not be protected as a trade secret.⁷ *Gaal v. BASF Wyandotte Corp.*, Tex.Civ.App. 1976, [533 S.W.2d 152, 155](#).

[**13] [HN5](#) Whether customer information is generally known or readily ascertainable is a question of fact.⁸ [**14] In the instant case, the district court found that the information contained in the memorandum of Temple Tag's feeder ear tag customers was not known or available to the public. The memorandum contained information concerning the type and color of ear tags purchased, the date of purchase, and the amount purchased, in addition to the names and addresses of Temple Tag's customers. Even if the names and addresses were readily ascertainable through trade journals as the defendants allege, the other information could be compiled only at considerable expense. Cf. [SCM Corporation v. Triplett Company](#), Tex.Civ.App.1966, [399 S.W.2d 583, 587](#). Based on the record, we cannot [[*1180](#)] say that the district court's conclusion that this type of customer information is not generally known nor readily ascertainable is clearly erroneous.⁹ [Bryan v. Kershaw](#), [5 Cir.1966, 366 F.2d 497, 499](#); See also R. Callman, The Law of Unfair Competition, Trademarks, and Monopolies § 14.31 at 109.

Nor can we say on the basis of this record that the district court's finding that Reed and Poncik used the list is clearly erroneous. The majority of American Stockman's customers had been customers of Temple Tag. Since Temple Tag controlled only seven percent of the market for feeder ear tags, the trial judge could have inferred that Poncik and Reed used the list to solicit customers for American Stockman.

III.

[HN6](#) Equitable relief in the form of a permanent injunction is a proper remedy for the breach of a confidential relationship. *Hyde Corp. v. Huffines*, 1958, 158 Tex. 566, 314 S.W.2d 763, 778, [**15] cert. denied, 358 U.S. 898, 79 S. Ct. 223, 3 L. Ed. 2d 148; see also Comment, *Trade Secrets in Texas -- The Employer's Rights in the Absence of Contractual Protection*, 17 S.Tex.L.J. 132, 144-45 (1975). Thus, the equitable relief awarded by the district court was proper. [HN7](#) If the use of trade secrets results in economic injury to the employer, an award of actual damages is also a proper remedy. *K & G Oil Tool & Service Co. v. G & G Fishing Tool Service*, 1958, 158 Tex. 594, 314 S.W.2d 782. Punitive damages are available as well if the defendant's actions are fraudulent or malicious. R. Callman, The Law of Unfair Competition, Trademarks, and Monopolies § 14.45 (4th Ed.1982). Here the defendants were key employees who violated the employer's trust. The district court properly awarded exemplary damages. Reed, Poncik, and American Stockman argue that part of the award for actual damages should be disallowed because it is based on an allegedly invalid non-competition agreement. We do not find it necessary to reach the validity of that [[**16](#)] agreement because we find that the total award is supported by the breach of the confidential relationship.

⁷ At least one Texas appeals court case has suggested that the use of business information obtained by an employee in an unlawful manner from his employer will give rise to liability, though the information is not technically a trade secret. [Jeter v. Associated Rack Corp.](#), Tex.Civ.App.1980, [607 S.W.2d 272, 275-76](#). The Jeter court held that the key inquiry is whether the employee obtains access to confidential business information to facilitate the formation of a new corporation without the permission of the employer. The availability of a lawful means to acquire the information is not dispositive of the issue of a breach of confidentiality. *Id. at 275*. See also Comment, *Misappropriation of Trade Secrets*, [53 Tul.L.Rev. 215, 226-27](#); R. Callman, The Law of Unfair Competition, Trademarks, and Monopolies § 14.03 at 21. Reed and Poncik acquired the business information at issue here during work hours, with the aid of other employees, and without Temple Tag's knowledge or permission. Because we find that the customer information constituted a trade secret, we do not reach the issue of liability under this theory.

⁸ Because the classification of information as a trade secret depends on the facts of each case, this area of the law is unsettled, resulting in seemingly conflicting opinions. The classification of customers lists is particularly confused. See [Crouch v. Swing Machinery Co.](#), Tex.Civ.App.1971, [468 S.W.2d 604](#) (Cadena, J., stating that "the customer list cases stand on the periphery of that area of the law which can best be described as the 'trade secret quagmire !'") *Id. at 607*.

⁹ Our decision is not inconsistent with [Mercer v. C.A. Roberts Co.](#), [5 Cir.1978, 570 F.2d 1232](#). In Mercer, the district court found that the information at issue could be obtained from other sources, and, therefore, did not constitute a trade secret. *Id. at 1239*. As in the case at bar, we concluded that the district court's finding of fact was not clearly erroneous.

The district court awarded Zoecon Industries \$305,148 for lost sales resulting from the breach of the confidential relationship. According to the district court's conclusions of law, this amount was based only on the breach of the confidential relationship. The punitive damages and attorneys' fees and costs were also awarded solely on the theory of the breach of confidential relationship. We sustain this portion of the district court's damage award.

The district court also awarded \$99,908 for expenses associated with the promotional campaign. This award was supported by two theories, breach of the confidential relationship and breach of the non-competition agreement. The district court, however, did not apportion the damages between the two violations; instead, it noted that the "Buy 5 Tags, Get 2 Tags Free" promotional campaign could have been avoided only if neither the confidential relationship nor the non-competition agreement had been breached. The district court found that the use of Temple Tag's trade secrets enabled American Stockman to compete with Zoecon, necessitating **[**17]** the promotional campaign. The promotional expenses, therefore, were properly awarded for a breach of the confidential relationship. Similarly, the award for salary expense was based on either theory, and is fully supported by the breach of confidential relationship. We do not have to reach the issue of the validity of the non-competition agreement under Texas law because no part of the damage award rested solely on that theory.

The judgment of the district court is AFFIRMED.

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > General Overview

Energy & Utilities Law > Oil & Petroleum Products > General Overview

HN1 **Regulated Industries, Energy & Utilities**

The objectives of § 209 of the Economic Stabilization Act differ significantly from those of § 210. Section 210 provides for private suits seeking damages. Section 209 provides for government action in which the court may order restitution. In § 209, congress gave the courts equitable power to set things right and order restitution. S. Rep. No. 92-507, 92nd Cong., 1st Sess. reprinted in 2, 1971 U.S.C.C.A.N. 2283, 2291. The Temporary Emergency Court of Appeals has made it clear that restitution, as provided in § 209, is fundamentally an equitable concept.

Contracts Law > Remedies > Restitution

HN2 **Remedies, Restitution**

In equity, restitution is usually thought of as a remedy by which defendant is made to disgorge ill gotten gains or to restore the status quo or to accomplish both objectives.

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > General Overview

Energy & Utilities Law > Oil & Petroleum Products > General Overview

HN3 Regulated Industries, Energy & Utilities

The Temporary Emergency Court of Appeals (TECA) approves an action which does not seek damages, which may or may not be the amount of the overcharge, but sought restitution. TECA also made it clear that the court's equitable power is broad, noting that there is no indication that § 209 of the Economic Stabilization Act attempts to limit the power of the courts or the agency to restitution or to a particularly strict interpretation of restitution. Restitution seeks to restore the status quo but, if that is not possible because the status quo has been permanently altered, restitution seeks to provide other kinds of compensation.

Tax Law > ... > Deductions > Charitable Deductions > General Overview

HN4 Deductions, Charitable Deductions

The cy pres doctrine in the legal field of charitable trusts states that, when it is impossible to carry out the specific intent of the testator, courts may dispose of the funds in the "next best" manner. Such a doctrine is extended to the distribution of funds in class action and overcharge cases and, where it is impossible to specifically identify the proper claimants, allows the funds to be used in a manner designed to benefit the claimants as a class.

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

Antitrust & Trade Law > Procedural Matters > Jurisdiction > General Overview

Administrative Law > Separation of Powers > Primary Jurisdiction

HN5 Reviewability, Jurisdiction & Venue

Where the claim before the court requires the resolution of issues which, under a regulatory scheme, are placed within the purview of an administrative agency, the doctrine of primary jurisdiction may be applied to suspend the judicial process pending referral of such an issue to the administrative agency. In cases raising issues of fact not within the conventional expertise of judges or cases requiring the exercise of administrative discretion, agencies created by congress for regulating the subject matter should not be passed over.

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

HN6 Reviewability, Jurisdiction & Venue

Referral is useful when uniformity and consistency is important and where technical questions of fact within the expertise and the experience of the agency exist. Referral is also desirable when one compares the flexibility or agency procedures with the rigidity too often characteristic of court procedures. It is a discretionary tool of the courts, a flexible concept to integrate the regulatory functions of agencies into the judicial decision making process by having agencies pass in the first instance on technical questions of fact uniquely within the agency's expertise and experience, or in cases where referral is necessary to secure uniformity and consistency in the regulation of business, such as issues requiring the exercise of administrative discretion.

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

HN7 Reviewability, Jurisdiction & Venue

The court can retain jurisdiction of a matter while referring only limited factual questions to an agency.

Civil Procedure > ... > Pleadings > Counterclaims > General Overview

Civil Procedure > Judgments > Entry of Judgments > General Overview

Civil Procedure > Judgments > Entry of Judgments > Multiple Claims & Parties

HN8 Pleadings, Counterclaims

When more than one claim for relief is presented in an action, whether as a claim, counterclaim, cross-claim, or third-party claim, or when multiple parties are involved, the court may direct the entry of a final judgment as to one or more but fewer than all of the claims or parties only upon an express determination that there is no just reason for delay and upon an express direction for the entry of judgment. In the absence of such determination and direction, any order or other form of decision, however designated, which adjudicates fewer than all the claims or the rights and liabilities of fewer than all the parties shall not terminate the action as to any of the claims or parties, and the order or other form of decision is subject to revision at any time before the entry of judgment adjudicating all the claims and the rights and liabilities of all of the parties. Opinion

[*589] MEMORANDUM AND ORDER OF REFERRAL FOR FACT FINDING TO ADMINISTRATIVE AGENCY

THEIS, District Judge.

Like flies to honey, claimants are quickly drawn by a fund containing over one billion dollars. These claimants have radically differing notions as to how the fund should be distributed, with one factor common to all suggested approaches: each claimant, unsurprisingly, desires a methodology of distribution likely to result in a large percentage of the fund being deposited into said claimant's pockets. Now before the Court is a motion to refer the question of fund distribution to the Department of Energy's Office of Hearing and Appeals (OHA). Some of the parties wholeheartedly endorse this approach, others wholeheartedly oppose it, and others embrace it only as a fall-back position should the Court reject their contentions that [*6] the money should go immediately to them. Needless to say, all parties view this motion as extremely important, if the immense effort funneled into the voluminous briefs on this issue are an accurate gauge of the parties' perception of the importance of this motion.

This action is a consolidation of a number of cases brought by oil producers to enjoin the Federal Energy Administration (FEA), now the Department of Energy (DOE), from enforcing Ruling 1974-29, concerning low production oil wells, commonly called "stripper wells." The Court enjoined enforcement of the regulations in question, but ordered the oil producers to deposit into escrow the difference between the stripper well price and the controlled price of crude oil affected by the injunction. As of October 31, 1982, the escrow fund, including interest, contained over one billion dollars.

The issue of the validity of the regulations and Ruling was finally settled in *In Re The Department of Energy Stripper Well Exemption Litigation*, 690 F.2d 1375 (Em.App. 1982), cert. denied, 459 U.S. 1127, 103 S. Ct. 763, 74 L. Ed. 2d 978 (1983), in which the Temporary Emergency Court of Appeals (TECA) reversed this Court's decision [*7] and upheld the rulings and regulations as valid. TECA remanded this action to this Court with instructions to enter judgment for DOE, which judgment has been entered. The effect of TECA's decision is to declare the funds deposited in escrow to be overcharges received due to violations of the petroleum pricing regulations. The remaining task is the appropriate dispensation of the escrowed funds -- in effect a monumental interpleader action with potential classes and sub-classes.

The DOE has moved the Court to refer the issue of remedy to DOE pursuant to the doctrine of primary jurisdiction. DOE contends that the remedy issues are complex and are within the special competence of the agency. DOE states that the distribution of the various claims will require analysis of the ability of the claimant to pass through increasing costs and the extent to which such costs were actually passed through. DOE also notes that an analysis of the impact of the complex Entitlements Program and of the system of "banks" of increased costs will be required. DOE points out that it has already established a procedural mechanism for considering refund applications and that issues similar to those before [*8] the court are presently being considered in refund actions before OHA. DOE contends that initial consideration by the agency, subject to review by the Court, will be more efficient than the Court conducting the entire factual inquiry itself.

[*590] Nearly every premise underlying the DOE's motion to refer has come under attack by other parties, which challenge both DOE's characterization of the remaining inquiry and DOE's competence and fairness to conduct it.

Plaintiff oil producers vigorously oppose the motion to refer. From their perspective, the remaining questions are mostly legal, not factual. They contend referral would, by implication, decide these legal issues and that the result would be contrary to what they view as controlling legal precedent. The principal legal contention advanced by producers is that it is improper to attempt to determine the actual damages beyond the refiner stage of distribution. In other words, the Court should not consider whether any overcharges were passed through by refiners to marketers and consumers. The basis of this contention is a line of precedent in **antitrust law** rejecting pass through theories and limiting recovery to first **[**9]** purchasers, with certain limited exceptions. [Hanover Shoe, Inc. v. United Shoe Machine Corp., 392 U.S. 481, 88 S. Ct. 2224, 20 L. Ed. 2d 1231 \(1968\)](#); and [Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 \(1977\)](#). This approach has been applied to private enforcement actions brought under Section 210 of the Economic Stabilization Act. [Eastern Airlines, Inc. v. Atlantic Richfield Co., 609 F.2d 497 \(Em.App.1979\)](#). Producers also contend that the OHA has failed to demonstrate either expertise or efficiency in its handling of refund claims. Producers further claim that OHA is not autonomous and has prejudged the issues in this case.

Finally, producers claim that referral is not appropriate because the pending issues are of the type within the Court's competence to address. Producers state that DOE can give the Court the benefit of its expertise by making recommendations to the Court by way of briefs.

Essentially similar positions are held by the first purchasers, refiners that actually purchased the petroleum in question. As presented in the brief filed by Total Petroleum, the first purchasers' position embraces the theory that *Hanover Shoe* **[**10]** and *Illinois Brick* preclude examination of passed through costs, and that the first purchasers are entitled to the entire amount of overcharges. The first purchasers contend that allowance of passed through recovery would subject the first purchasers to double liability if private parties sue them pursuant to Section 210 for the overcharges. The first purchasers argue that this is not a Section 209 action and is not a Section 210 action, but is analogous to a Section 210 action.

Not dissimilar contentions are advanced by the indicated refiners, who also oppose referral, reject pass through recovery by marketers and consumers, and question DOE's objectivity and competence. The key thrust of the indicated refiners' approach is that all refiners who participated in the Entitlements Program are eligible for recovery, and not just those who actually purchased the oil in question. This is required, contend the indicated refiners, because the Entitlements Program served to spread the overcharges equally among all participants in the Entitlements Program. In addition to opposing consideration of passed through overcharges on *Illinois Brick* grounds, the indicated refiners contend **[**11]** that overcharges were not passed on, because market conditions restricted what refiners could charge and thus the refiners bore the burden of the overcharges. The indicated refiners also contend that the forces of the market will force them to pass through the refunds they receive from the escrow fund in the form of reduced prices to ultimate consumers.

The intervening States argue that referral is unnecessary and contend that this Court should order distribution to the States as representatives of the ultimate consumers of petroleum products. The States rely on the recent opinion of Judge Flannery in [United States v. Exxon, 561 F. Supp. 816 \(D.D.C.1983\)](#), in which the Court ordered distribution to the States for use in programs designed to benefit petroleum consumers. The States argue that **[*591]** review of the regulatory statutes shows that overcharges were passed along to the ultimate consumers and that it would be impossible to ascertain the precise damage borne by the ultimate victim. Thus, since DOE could not precisely determine losses suffered by particular claimants, the Court should, in the interests of restitution and equity, distribute the fund to the States, **[**12]** in proportion to their citizen's use of petroleum products during the controls period, for use in energy-related programs. To refer the case would, in the States' view, plunge the agency, the Court, and the escrow fund into an administrative quagmire.

The States argue, however, that if their proposal for immediate payout to the States is not endorsed by the Court, the motion to refer should then be granted. They argue that if the quagmire must be entered, DOE has the expertise and procedures to best accommodate the expedition. The States also contend that the Court can exercise supervisory control over the DOE to allay fears of bias and to insure prompt attention to the case.

Intervening purchasers have split on the issue of referral. The National Oil Jobbers Council (NOJC), a federation of 42 trade associations representing thousands of small petroleum marketers, favors referral. The NOJC contends that the Government has the duty to at least try to ascertain the identity of overcharge victims, and cites [Citronelle-Mobile Gathering, Inc. v. Edwards, 669 F.2d 717 \(Em.App.1982\)](#) in support of this contention. The NOJC contends that there is no factual basis, in the absence [**13] of such an attempt, to conclude that none of the overcharge victims can be identified.

A number of other intervening purchasers, seeking to represent classes of gasoline retailers, trucking companies and electric utilities, oppose referral. They raise questions of agency bias and assert the Government is or may be trying to appropriate the funds for itself. They challenge DOE's competence and expertise and claim that referral will merely cause further delay in resolving this case. They raise the possibility of the Court appointing a special master and generally contend that the distribution issue is within the Court's competence and province to resolve.

Consideration of the above questions leads the Court to conclude that two basic questions must be resolved before a decision on referral can be made:

1. Are any parties other than the first purchasers or participants in the Entitlements Program entitled to refunds?
2. Is it clearly impossible to ascertain particular harms suffered by particular parties by virtue of the overcharges?

If the first question is answered in the negative, then it must be asked: why refer? If the answer to the first question is affirmative, [**14] however, the second question becomes decisive. If it is clearly impossible to ascertain the impact of overcharges with particularity, does equity require that the fund be distributed in the public interest to the States, or to the Government standing in place of the ultimate consumers? The Court will now examine these questions in detail.

The key legal issue in deciding whether any parties other than first purchasers or participants in the Entitlements Program can recover is the applicability of *Hanover Shoe* and *Illinois Brick* to this case.

In [Hanover Shoe, supra](#), the Supreme Court held that defendant in a private antitrust action could not assert the "passing on" defense that plaintiff shoe manufacturer suffered no legally cognizable injury because it increased the prices it charged its customers (i.e., it "passed on" the overcharges caused by defendant's illegal actions). The Court's reasoning on this issue is as follows:

"Even if it could be shown that the buyer raised his price in response to, and in the amount of, the overcharge and that his margin of profit and total sales had not thereafter declined, there would remain the nearly insuperable difficulty [**15] of demonstrating that the particular plaintiff [*592] could not or would not have raised his prices absent the overcharge or maintained the higher price had the overcharge been discontinued. Since establishing the applicability of the passing-on defense would require a convincing showing of each of these virtually unascertainable figures, the task would normally prove insurmountable. On the other hand, it is not unlikely that if the existence of the defense is generally confirmed, antitrust defendants will frequently seek to establish its applicability. Treble-damage actions would often require additional long and complicated proceedings involving massive evidence and complicated theories."

"In addition, if buyers are subjected to the passing-on defense, those who buy from them would also have to meet the challenge that they passed on the higher price to *their* consumers. These ultimate consumers, in today's case the buyer of single pairs of shoes, would have only a tiny stake in a lawsuit and little interest in attempting a class action. In consequence, those who violate the antitrust laws by price fixing or monopolizing would retain the fruits of their illegality [**16] because no one was available who would bring suit against them. Treble-damage actions, the importance of which the Court has many times emphasized, would be substantially reduced in effectiveness."

In *Illinois Brick, supra*, the Court concluded that the pass-on rule must be applied equally to plaintiffs and defendants, and held that only the direct purchasers, and not others in the chain of manufacture or distribution could recover for overcharges. As in *Hanover Shoe*, the Court emphasized both the complexity that pass-on theories entail and the resultant impairment of private antitrust enforcement. The Court noted:

"Permitting the use of pass-on theories under § 4 essentially would transform treble-damages actions into massive efforts to apportion the recovery among all potential plaintiffs that could have absorbed part of the overcharge -- from direct purchasers to middlemen to ultimate consumers. However appealing this attempt to allocate the overcharge might seem in theory, it would add whole new dimensions of complexity to treble-damages suits and seriously undermine their effectiveness."

Illinois [**17] [*Brick, 97 S. Ct. at 2070.*](#)

The Court also noted:

"The concern in *Hanover Shoe* for the complexity that would be introduced into treble-damages suits if pass-on theories were permitted was closely related to the Court's concern for the reduction in the effectiveness of those suits if brought by indirect purchasers suing for the full amount of the overcharge. The apportionment of the recovery throughout the distribution chain would increase the overall costs of recovery by injecting extremely complex issues into the case; at the same time such an apportionment would reduce the benefits to each plaintiff by dividing the potential recovery among a much larger group. Added to the uncertainty of how much of an overcharge could be established at trial would be the uncertainty of how that overcharge would be apportioned among the various plaintiffs. This additional uncertainty would further reduce the incentive to sue. The combination of increasing the costs and diffusing the benefits of bringing a treble-damages action could seriously impair this important weapon of antitrust enforcement."

[*Illinois Brick, 97 S. Ct. at 2074.*](#)

Based on *Hanover Shoe* and *Illinois* [**18] *Brick*, TECA has held that the passing on defense cannot be used in a private enforcement action under Section 210 of the Economic Stabilization Act. [*Eastern Air Lines, Inc. v. Atlantic Richfield, supra.*](#)

This Court does not believe the rationale of *Hanover Shoe* and *Illinois Brick* is applicable, however, in this action. This action is fundamentally different from a private enforcement action under the Antitrust Laws or under Section 210 of the [*593] Economic Stabilization Act. In this action, oil producers sought declaratory judgments to forestall government enforcement of overcharge violations under Section 209. Preliminary injunctive relief was granted, conditioned on the oil producers paying the alleged overcharges into escrow. The Court now considers this action to be, in effect, a Government enforcement action in which the fact of overcharge has been determined and the Court is now faced with effecting restitution.

In the Court's view, the difficulty in computing passed on costs and the subsequent adverse effect on antitrust enforcement were inextricably bound together in *Hanover Shoe*. In that case the Court found that addition of pass-on issues to [**19] already protracted private antitrust suits would seriously hamper the scheme of private enforcement of the antitrust laws. In *Illinois Brick*, the Court was faced with the problem of whether to permit offensive use of pass-on theories after defensive use had been barred by *Hanover Shoe*. The Court declined to allow offensive use, repeatedly emphasizing the adverse impact on private antitrust enforcement that pass-on theories would entail. As one commentator noted:

"The *Illinois Brick* result apparently rests on the proposition that a rule allowing all purchasers to recover would so reduce the incentives for direct purchasers to bring suit that while there might be some enforcement gains at the indirect purchaser level, the total number of suits would decline."

The Supreme Court, 1976 Term, 81 Harv.L.Rev. 72, 226 (1977).

In this case no such fears are applicable. There is no private enforcement involved, and thus, no incentive to encourage private suits by disallowing pass-on theories. On that ground alone, the *Hanover Shoe -- Illinois Brick* doctrine is inapplicable to an action under Section 209 or an action, such as this one, closely analogous [**20] to a Section 209 action. While *Hanover Shoe* and *Illinois Brick* may be suitable for Section 210 actions, it must be noted that [HN1](#)[[↑]] the objectives of Section 209 differ significantly from those of Section 210. Section 210 provides for private suits seeking damages. Section 209 provides for Government action in which the Court may order restitution.

In Section 209, Congress gave the courts "equitable power . . . to set things right and order restitution." S.Rep. No. 92-507, 92nd Cong., 1st Sess. reprinted in 2, 1971 U.S. Code Cong. & Ad.News 2283, 2291, quoted in [Sauder v. Department of Energy](#), [648 F.2d 1341 \(Em.App.1981\)](#). In *Sauder*, TECA made clear that restitution, as provided in Section 209, is fundamentally an equitable concept. The Court quoted *Moore's Federal Practice* Vol. 5, para. 38.24[2], stating:

[HN2](#)[[↑]] "In equity, restitution is usually thought of as a remedy by which defendant is made to disgorge illgotten gains or to restore the status quo or to accomplish both objectives." [648 F.2d at 1348](#).

[HN3](#)[[↑]] TECA approved an action which did not seek damages, "which may or may not be the amount of the overcharge," but sought restitution. TECA also made it [**21] clear that the Court's equitable power is broad: "There is no indication . . . that the section thereby attempts to limit the power of the courts or the agency to restitution or to a particularly strict interpretation of restitution."

[Sauder, 648 F.2d at 1348](#).

Restitution seeks to restore the status quo but, if that is not possible because the status quo has been permanently altered, restitution seeks to provide other kinds of compensation. See *Restatement of Restitution*, § 1, comment a (1937).

Thus, the restitutionary nature of Section 209 and of this action differ fundamentally from the damages remedy of Section 210 and of the Antitrust Laws. For this additional reason, the *Hanover Shoe* and *Illinois Brick* cases do not apply to this action. This was also recognized by the District Court in [Citronelle-Mobile Gathering, Inc. v. O'Leary](#), [499 F. Supp. 871 \(S.D.Ala.1980\)](#), *rev'd on other grounds*, [669 F.2d 717 \(Em.App.1982\)](#), which rejected attempts to bar consideration of pass-on consequences. [*594] Referring to *Hanover Shoe* and *Illinois Brick*, the Court stated:

"The policies underlying those cases are largely inapplicable [**22] to enforcement actions by the government, and restitutionary relief by its nature does not have some of the difficulties which arise in actions for damages.

"In an enforcement action, there is no danger that the incentive to enforce the law will be reduced by permitting indirect purchasers to recover."

[499 F. Supp. at 884](#).

The Court would also note that the fundamental difference in and independence of the 209 and 210 remedies were recognized by TECA in [Bulzan v. Atlantic Richfield Co.](#), [620 F.2d 278 \(Em.App.1980\)](#).

The first purchasers have also raised the spectre of potential double liability if pass through is allowed and they are then subject to a private enforcement action under Section 210. It has been recognized, however, that both private and public remedies may be applied to the same violation. [Bulzan v. Atlantic Richfield Co., supra](#). In *Bulzan*, TECA noted a number of solutions to the multiple liability problem, stating that one solution is adjudication of a liability action under Section 210 "to take into account a prior or subsequent" restitution award. [Bulzan, at 283-284](#). The spectre of double liability was similarly dispelled in *U.S.* [**23] [Oil Co., Inc. v. Koch Refining](#), [518 F. Supp. 957](#)

(E.D.Wis.1981); Martin Service v. Koch Refining Co., Unpub. No. 81-1844 (E.D.Ill., Oct. 18, 1982); Ray L. Hunt v. Department of Energy, Unpub. No. CA-3-78-02440-W (N.D.Tex. July 25, 1983).

Since considerations of equity are so vital in restitution, the Court must note that allowing first purchasers to retain all of the overcharges, particularly in the absence of a factual showing that they did not pass on some or all of the overcharges, would not be an equitable result. This is particularly true when the first purchasers' proposed remedy would result in most of the overcharges being returned to plaintiffs in this action, who were the parties responsible for and who attempted to benefit from the overcharges in the first place. At this stage of the proceedings, there are no facts to show that this would not be an inequitable windfall to the first purchasers or indicated refiners.

Having concluded that recovery is not limited to first purchasers or the participants in the Entitlements Program, the Court must now consider whether it is clearly impossible to ascertain with particularity the parties that bore the burden of the **[**24]** overcharges. The States argue that such a task is clearly impossible and, relying on Judge Flannery's opinion in *United States v. Exxon, supra*, contend that the States should receive the escrow fund for use in programs aiding energy consumers.

The Court tends to agree with the States and with Judge Flannery that it is likely that the ultimate consumers of petroleum products bore the brunt of these overcharges and that it will be impossible to determine otherwise. If this is the case, the Court believes that the equitable goals of restitution would mandate distribution to either the state governments or the federal government for use in programs designed to aid energy consumers. Such a distribution would be akin to HN4 the *cy pres* doctrine in the legal field of charitable trusts where, when it is impossible to carry out the specific intent of the testator, courts dispose of the funds in the "next best" manner. Such a doctrine has been extended to the distribution of funds in class action and overcharge cases and, where it is impossible to specifically identify the proper claimants, allows the funds to be used in a manner designed to benefit the claimants as a class. See **[**25]** *Note, Collecting Overcharges from the Oil Companies: The Department of Energy's Restitutionary Obligation*, 32 Stan.L.Rev. 1039 (1980).

This approach was most notably applied in *West Virginia v. Chas. Pfizer & Co.*, 314 F. Supp. 710 (S.D.N.Y.1970), aff'd., 440 F.2d 1079 (2nd Cir.1970), cert. denied, 404 U.S. 871, 92 S. Ct. 81, 30 L. Ed. 2d 115 (1971). This was a nationwide antitrust class action against drug companies accused of price **[*595]** fixing brought by 37 states on behalf of consumers. Pursuant to a court-approved settlement, a fund of 37 million dollars was administered for refunds to individual consumers, but application of a claim procedure still left 32 million dollars in the fund. This was distributed to states for use in public health programs. A similar rationale underlay Judge Flannery's remedial action in *United States v. Exxon, supra*, in which the overcharges were placed in an escrow account for distribution to the states for use in energy conservation programs.

Likewise, a direct refund to the United States treasury would serve equitable and restitutionary goals. While such a remedy would not aid energy consumers as directly as refund to **[**26]** the states for use in energy programs, it would have certain advantages. It would involve virtually no administrative expense and would benefit the public at large by increasing federal revenues. Since mobile transportation is an all-encompassing way of life in our nation, those injured may well be the public at large. Hence such a distribution would probably serve the purpose of aiding the injured party. It would also, of course, fulfill the restitutionary goal of requiring plaintiffs to disgorge their judicially-determined illegal gains. See *Note, Refunding Overcharges Under the Emergency Petroleum Allocation Act: The Evolution of a Compensatory Obligation*, 79 Mich.L.Rev. 1454, 1473 (1981).

The Court reaches no conclusion as to what remedy would be the most efficacious or equitable, but merely points out that equitable remedies do exist in the absence of proof as to the particulars of the burden of the overcharges. The Court believes, however, that an attempt must be made to determine if particular harm can be shown and that Judge Flannery's resolution in *Exxon* was premature. The Court believes this approach is required by TECA in light of *Citronelle-Mobile Gathering* **[**27]** Co. v. Edwards, supra, where the Court concluded:

"The Government has a *duty* to try to ascertain those overcharges, and refund them, with interest, from the restitutionary funds."

669 F.2d at 723.

The Court would note that it has before it no facts at this time which could establish that it is impossible to identify at least some of the injuries caused by the overcharges. For the Court to conclude that impossibility at this time would be a too-hurried retreat from the objective of restitution to most nearly restore the status quo and return to those overcharged the amount of their loss.

Having reached that conclusion, the Court must reject the request of the States for immediate distribution to them. The Court has thus rejected various claims for immediate distribution and concluded that an attempt must be made to identify those harmed by the overcharges. The basic question remaining is whether this issue should be referred for fact-finding to the OHA of the DOE.

HN5 [↑] Where the claim before the Court requires the resolution of issues which, under a regulatory scheme, are placed within the purview of an administrative agency, the doctrine of primary jurisdiction [**28] may be applied to suspend the judicial process pending referral of such an issue to the administrative agency. [United States v. Western Pacific R.R. Co., 352 U.S. 59, 77 S. Ct. 161, 165, 1 L. Ed. 2d 126 \(1956\)](#). In the *Western Pacific* case, the Supreme Court noted:

"in cases raising issues of fact not within the conventional expertise of judges or cases requiring the exercise of administrative discretion, agencies created by Congress for regulating the subject matter should not be passed over."

77 S. Ct. at 165.

The Supreme Court has emphasized that **HN6** [↑] referral is useful when uniformity and consistency is important and where technical questions of fact within the expertise and the experience of the agency exist. [Nader v. Allegheny Airlines, Inc., 426 U.S. 290, 1*596 96 S. Ct. 1978, 48 L. Ed. 2d 643 \(1976\)](#). Referral is also desirable when one compares the flexibility or agency procedures with the rigidity too often characteristic of court procedures. *Sunflower Electric Coop. v. Kansas Power & Light Co.*, 603 F.2d 791, 795 (10th Cir. 1979). The doctrine is best summarized in fn. 14 of [Columbia Gas Transmission v. Allied Chemical Corp., 652 F.2d 1*291 503 \(5th Cir. 1981\)](#), wherein it is stated at 519:

"It is a discretionary tool of the courts, a flexible concept to integrate the regulatory functions of agencies into the judicial decision making process by having agencies pass in the first instance on technical questions of fact uniquely within the agency's expertise and experience, or in cases where referral is necessary to secure uniformity and consistency in the regulation of business, such as issues requiring the exercise of administrative discretion."

In the Court's view, the tracing of overcharges involves complicated and technical questions of fact, compounded by the impact of regulatory phenomena such as the Entitlements Program and the "banking" of costs. The OHA has developed procedures for refund claims in overcharge cases and is better equipped than the Court to make preliminary findings concerning the particular impact of overcharges on various parties.

Opponents of referral have pointed to the rather rocky beginning OHA experienced in developing refund procedures, but it appears that OHA has now made significant progress in implementing such procedures. See *Office of Enforcement*, 9 DOE para. 82,521 [**30] (hereinafter Alkek); *Office of Enforcement*, 9 DOE para. 82,553 (hereinafter Adams), which show that OHA is progressing with large refund proceedings. The agency has established a mechanism for considering applications for refunds, known as Subpart V procedures.

The Court believes that the large number of technical questions involved in attempting to determine the allocation of the burden of overcharges in the thicket of the regulatory scheme could more efficiently be addressed before the OHA. The Court does share the concern of the parties who have noted that OHA has not been as efficient at handling claims as might be hoped. The Court will therefore retain jurisdiction over this case and require regular progress reports from the Department on its handling of the referred matters in this case.

The Court is also aware of the concern of some parties of DOE bias in this case, and notes that the Department has not taken a position on what the final disposition of the escrowed funds should be. Positions of the DOE in other actions concern some parties. The Court emphasizes that he is referring to the DOE only the factual question concerning the particularized impact of the overcharges. **[**31]** The Court is specifically retaining jurisdiction and will make the final determination of the disposition of the funds. The Court, not the DOE, will decide where the funds go. The Court does believe, however, that the OHA's claim process and DOE's acquired expertise, will assist the Court in developing the facts needed for an equitable disposition of the funds.

HN7 The Court notes that it can retain jurisdiction of this matter while referring only limited factual questions to the agency. See *Israel v. Baxter Laboratories*, 151 U.S. App. D.C. 101, 466 F.2d 272 (D.C.Cir.1972); *Danville Tobacco Assoc. v. Bryant-Buckner Associates, Inc.*, 333 F.2d 202 (4th Cir.1964). The Court is retaining jurisdiction of this action, and is merely suspending its consideration of the issues in this case in order to allow OHA to attempt to determine with particularity the tracing and impact of the overcharges or any portion of them in this case.

The Court is therefore referring to the Office of Hearing and Appeals of the Department of Energy the task of attempting to determine what parties bore the cost of the overcharges and in what amounts. The Court will also welcome the views of the OHA on **[**32]** how restitution can best be achieved in this case. The Court, however, is retaining jurisdiction over both this action and the escrow fund. No determination **[*597]** of restitution nor payout from the escrow fund may be ordered by the OHA, as such matters remain within the province of this Court.

The Court also orders OHA to make an interim report to the Court within six months of the date of this order, and a final report to the Court within one year from the date of this order, regarding the extent of its progress in determining the questions referred. The Court realizes that these matters are complex and that considerable time may well be needed for OHA to complete its assigned task. Nevertheless, the Court would expect substantial progress in one year, and emphasizes that this is MDL litigation deserving the utmost expedition. If substantial progress is not made, OHA is ordered to provide detailed explanation of why progress has been lacking. A lack of progress and the reasons therefore may indicate to the Court that the process is futile and may require the Court to take equitable action as noted elsewhere in this opinion. On the other hand, the Court may determine **[**33]** that more time and a greater effort on the part of OHA is all that is required. These issues will be explored by the Court after receipt of OHA's reports.

IT IS THEREFORE ORDERED AND ADJUDGED that the Department of Energy's motion to refer is granted, with the following conditions:

1. This Court retains jurisdiction over this action and over the escrow fund. All decisions concerning restitution and payout from the fund are reserved to this Court for judicial resolution.
2. The Department of Energy's Office of Hearings and Appeals is ordered to conduct factfinding pursuant to its regulatory process concerning the particularized tracing and impact of the overcharges at issue in this case. The DOE is ordered to make an interim report to this Court within six months of the filing of this order, and a final report within one year from the date of this order, concerning its progress in such factfinding.
3. All parties with claims on the escrow fund in this case shall submit specific proof thereof to the OHA consistent with the regulatory process established by that agency.
4. The Court will suspend its consideration of this action, pending OHA's reports to this **[**34]** Court, or until further order of the Court. The Court will hold in abeyance all pending motions until that time, including motions to intervene or to certify class actions.

IT IS FURTHER ORDERED, for the reasons set forth in the foregoing memorandum, that the motions of Total Petroleum and Farmland Industries for immediate distribution from the escrow fund are hereby denied.

On Motion to Certify Constitutional Issues

On September 13, 1983, this Court referred the issue of the appropriate remedy in this multidistrict litigation to the Office of Hearings and Appeals [OHA] of the Department of Energy [DOE], with instructions to the OHA to report in March and September of 1984 on its progress. The relief afforded to the Court by this referral has, however, been

short-lived. The case is once more before the Court on a hotly contested and heavily briefed motion. The plaintiffs, various oil producers, have moved this Court to certify three constitutional issues concerning one house legislative vetoes in the Emergency Petroleum Allocation Act [EPAA] and the Energy Policy and Conservation Act [EPCA] to the Temporary Emergency Court of Appeals [TECA] for consideration [**35] in light of the United States Supreme Court's recent declaration that one-house legislative vetoes are unconstitutional, see *Immigration and Naturalization Service v. Chadha*, 462 U.S. 919, 103 S. Ct. 2764, 77 L. Ed. 2d 317 (1983). Numerous parties, including the DOE, intervening states, and intervening purchasers, hereinafter collectively referred to as the defendants, are bitterly opposed to any certification. For the reasons that follow, this Court believes that substantial constitutional [*598] issues exist in this case, and that those constitutional issues must be certified to TECA, see § 211(c) of the Economic Stabilization Act of 1970, 12 U.S.C. § 1904 note.

I. Brief Factual and Procedural Background

This action was originally brought by an individual plaintiff to enjoin the DOE and its predecessor, the Federal Energy Administration, from enforcing Ruling 1974-29, which concerned low-production oil wells commonly referred to as "stripper wells." This Court enjoined enforcement of the Ruling, but required the plaintiffs to deposit into an escrow account the difference between the higher stripper well price the injunction permitted them to receive and the [**36] lower controlled crude oil price they would otherwise have received. This escrow fund currently contains approximately eight hundred million dollars.

Unfortunately, this litigation has tread a rocky road to arrive at the present motion. First, this Court concluded that Ruling 1974-29 was void, *Energy Reserves Group, Inc. v. Federal Energy Administration*, 447 F. Supp. 1135 (D.Kan.1978). This conclusion was reversed by TECA in a two-to-one decision, and the case was remanded for trial, *Energy Reserves Group, Inc. v. The Department of Energy*, 589 F.2d 1082 (Em.App.1978). Numerous other cases concerning the same issue were collected around the country and consolidated here as multidistrict litigation in June of 1979, *In re The Department of Energy Stripper Well Exemption Litigation*, 472 F. Supp. 1282 (Jud.Pan.Mult.Lit.1979). After a brief second sojourn at TECA in which the DOE unsuccessfully attempted to obtain a writ of mandamus against this Court, *Duncan v. Theis, Chief Judge*, 613 F.2d 305 (Em.App.1979), the case was finally tried in early 1981.

After the trial, this Court concluded that Rule 1974-29 was arbitrary, capricious, and contrary to the expressed intent [**37] of Congress, *In re The Department of Energy Stripper Well Exemption Litigation*, 520 F. Supp. 1232 (D.Kan.1981). The case was then taken to TECA for the third time, and TECA once again reversed, *In re the Department of Energy Stripper Well Exemption Litigation*, 690 F.2d 1375 (Em.App.1982), cert. denied, 459 U.S. 1127, 103 S. Ct. 763, 74 L. Ed. 2d 978 (1983). The final section of TECA's opinion reads as follows:

Conclusion

In summary, we find:

- 1) The legislative history of the stripper well exemption amply supports the DOE's position that injection wells were not intended by Congress to be included in the well count;
- 2) Ruling 1974-29 is not beyond the authority of the DOE granted by the controlling statutory provisions;
- 3) Our prior decision in *Energy Reserves I, Duncan v. Theis* and *Wiggins* have correctly decided that Ruling 1974-29 is a reasonable interpretation of the applicable statutes and regulations; and
- 4) The stripper well regulations, as interpreted by Ruling 1974-29, are neither arbitrary nor capricious.

For all these reasons, the decision of the district court is reversed, and these consolidated cases are remanded to the [**38] district court with instructions to enter judgment for the [defendants].

Id. at 1392. In accordance with TECA's instructions, judgment was entered for the DOE on February 14, 1983, see Dk. No. 282, in the following words:

IT IS THEREFORE ORDERED that judgment is hereby rendered in favor of defendants and against plaintiffs, in accordance with the mandate of the Temporary Emergency Court of Appeals filed herein on September 20, 1982.

Dk. No. 282, at 2. As the Court stated in its Order of September 13, 1983, Dk. No. 505.

The remaining task is the appropriate dispensation of the escrowed funds -- in [*599] effect a monumental interpleader action with potential classes and sub-classes.

Id. at 589.

After hearing from the various parties and intervenors at extraordinary length, this Court concluded that the most expeditious method of proceeding was for this Court to retain jurisdiction over both the case and the escrowed funds while referring the factfinding as to who bore the brunt of the overcharges to the OHA, *id.* at slip op. pp. 21-22.

On November 14, 1983, the plaintiffs moved to certify three constitutional issues to [**39] TECA, to vacate the referral of factfinding to the OHA, and to release the escrowed funds. The three constitutional issues are stated by the plaintiffs as follows:

- 1) Whether the Emergency Petroleum Allocation Act, as amended, must be declared unconstitutional, *ab initio*, because it contains an invalid and inseverable one-house legislative veto provision that was twice utilized to the detriment of plaintiffs.
- 2) Whether the Oil Pricing Policy added as section 8 to the Emergency Petroleum Allocation Act by section 401 of the Energy Policy and Conservation Act must be declared unconstitutional, *ab initio*, because it contains three invalid and inseverable one-house legislative veto provisions and imposed price controls to the detriment of plaintiffs.
- 3) Whether MDL No. 378 must be dismissed for lack of subject matter jurisdiction in view of the constitutional invalidity of the Emergency Petroleum Allocation Act, as amended, and section 401 of the Energy Policy and Conservation Act.

Memorandum in Support of Plaintiffs' Motion, Dk. No. 520, at 1-2. The Court heard extensive oral argument on the motions on Monday, January 16, 1984, and is now ready to [**40] rule.

II. Preliminary Issues

No one disputes that the *Chada* decision declared one-house legislative vetoes to be an unconstitutional infringement of the Article I requirements of bicameralism and presentment. Instead, the defendants present four essentially procedural arguments in support of their basic assumption that the plaintiffs cannot raise their constitutional challenge at this juncture. The defendants assert that: (1) the motion to certify the constitutional issues is inexcusably tardy; (2) the plaintiffs are without standing to raise the constitutional challenge; (3) the legislative vetoes in the EPAA and EPCA are, in any event, severable from the remainder of the acts; and (4) retroactive application of *Chada* would be inequitable. The Court will deal with these assertions in the order listed.

(1) Timeliness

The defendants first argue that the plaintiffs' motion is inexcusably tardy because judgment has already been entered in this case, see Dk. No. 282, and because [Rule 60 of the Federal Rules of Civil Procedure](#) provides no mechanism whereby that judgment may be modified. This argument proceeds from the erroneous assumption that a *final* judgment [**41] has been entered in this case.

HN8 [↑] [Rule 54\(b\) of the Federal Rules of Civil Procedure](#) explicitly states that

When more than one claim for relief is presented in an action, whether as a claim, counterclaim, cross-claim, or third-party claim, or when multiple parties are involved, the court may direct the entry of a final judgment as to one or more but fewer than all of the claims or parties only upon an express determination that there is no just reason for delay and upon an express direction for the entry of judgment. In the absence of such determination and direction, any order or other form of decision, however designated, which adjudicates fewer than all the claims or the rights and liabilities of fewer than all the parties shall not terminate the action as to any of the claims or parties, and the order or other form of decision is subject to revision at any time before the entry of judgment adjudicating all the claims and the rights and liabilities of all of the parties.

[*600] The judgment entered on February 14, 1983, Dk. No. 282, is on its face not a final order. The rights and liabilities of the plaintiffs, the defendants, and the numerous intervenors simply [**42] were not finally adjudicated by that order. No disposition of the huge escrow fund was made, and all parties still maintain their entitlement to that fund. The Court, in fact, unequivocally expressed its understanding that no final judgment was entered when it expressly retained jurisdiction over the case and the escrow fund while referring the fact-finding mission to the OHA. Such retention would have been nonsensical had a final judgment adjudicating all the claims and the rights and liabilities of all of the parties been entered seven months earlier. Additionally, the substantial factfinding presently being conducted by the OHA and the difficult question remaining for the Court of who gets the money make any notion of finality in this case untenable at this time. Because the question of who gets the money is unresolved, and because a decision that the EPAA and EPCA are unconstitutional could have a major impact on the resolution of that question, this Court believes that the plaintiffs' motion to certify the constitutional issues is timely.

(2) Standing

The essence of the standing challenge is the supposed lack of injury from an exercise of the concededly unconstitutional [**43] one-house vetoes. The short answer to this argument is that the plaintiffs allege that the EPAA and EPCA must be declared void *ab initio* because of the one-house vetoes, and that the money presently in the escrow fund must, therefore, be restored to the plaintiffs because it was exacted from them under unconstitutional acts. Clearly, the exaction of large sums of money under unconstitutional acts is an injury, that injury is traceable to those acts, and that injury could be redressed by a declaration that the acts are unconstitutional and that the money should be returned to the plaintiffs, see e.g., [Valley Forge Christian College v. Americans United for Separation of Church and State, 454 U.S. 464, 102 S. Ct. 752, 70 L. Ed. 2d 700 \(1982\)](#). This Court believes that the plaintiffs have a sufficient "personal stake in the outcome of this controversy to warrant [their] invocation of federal court jurisdiction and to justify exercise of the Court's remedial powers on [their] behalf," [Arlington Heights v. Metropolitan Housing Development Corp., 429 U.S. 252, 260-61, 97 S. Ct. 555, 560-61, 50 L. Ed. 2d 450 \(1977\); Holly Sugar Corp. v. Goshen City Cooperative Beet Growers Association, 725 F.2d 564, 568](#) (10th Cir., 1984). The plaintiffs therefore have standing to assert their constitutional challenge.

(3) and (4) Severability and Retroactivity

The Court will consider these two assertions together because a similar analysis applies to both. As a preliminary matter, it must be remembered that this Court lacks jurisdiction to determine the constitutional validity of any provision of the EPAA or EPCA, or of the regulations under those Acts, inasmuch as exclusive jurisdiction over those issues is vested in TECA and the United States Supreme Court by way of appeal, see § 211(g) of the Economic Stabilization Act of 1970, 12 U.S.C. § 1904 note. If any substantial constitutional issue exists, it must be certified to TECA, see *id.* § 211(c).

These restrictions on this Court's jurisdiction and power are relevant to the defendants' final two assertions because those assertions invite this Court to reach the merits of the constitutional challenge, albeit indirectly. Were this Court to conclude that the concededly unconstitutional one-house vetoes are severable from the remainder of the Acts, the Court would also be concluding that the remainder [**45] of the Acts passes constitutional muster, despite the plaintiffs' vigorous assertion that the Acts must be declared void *ab initio*. Likewise, a decision that *Chada* will not be applied retroactively to this litigation would be tantamount to a declaration that the price controls are constitutionally sound [*601] enough to be enforced by the final judgment this Court must eventually enter

disbursing the escrowed funds. Both of these inquiries are so firmly intertwined with the merits of the constitutional challenge as to be inseverable from it and, therefore, outside this Court's jurisdiction and power to hear.

The parties have briefed these issues with their customary professionalism and attention to detail, and their lengthy citations to the case law and the legislative histories of the Acts have demonstrated that each side has a substantial argument and that the question is indeed a close one. This demonstration has helped to convince this Court that the constitutional issues raised by the plaintiffs are substantial, and that those issues must, therefore, be certified to TECA.

III. Certification

IT IS THEREFORE ORDERED that the three constitutional issues raised [**46] by the plaintiffs and set out verbatim in this Memorandum and Order, *supra* p. 599, be certified to the Temporary Emergency Court of Appeals.

IT IS FURTHER ORDERED that the plaintiffs' motions to vacate the referral of factfinding to the OHA and to release the escrowed funds be held in abeyance pending TECA's resolution of the constitutional issues.

IT IS FURTHER ORDERED that OHA continue uninterrupted with its factfinding mission.

IT IS FURTHER ORDERED that this Court retain jurisdiction over this case and over the escrowed fund to the maximum extent consistent with the certification of constitutional issues to TECA.

Opinion by: ROGERS

Opinion

Memorandum and Order

ROGERS, D.J.: This is an action brought by a non-union general contractor and a non-union ready-mix concrete supplier seeking compensatory damages for antitrust violations and for violations of the federal labor laws. This matter is presently before the court upon the motion for partial summary judgment on the antitrust violations filed by defendants Topeka Building and Construction Trades Council, Operating Engineers Local No. 101 (Operating Engineers) and Truckdrivers and Helpers Local No. 696 (Truckdrivers). The court has heard oral argument and is now prepared to rule.

In considering a motion for summary judgment, we must view the evidence in a light most favorable to the party opposing the motion. *Frito Lay, Inc. v. Retail Clerks Union Local No. 7*, 629 F. 2d 653, 656 (10th Cir. 1980). We cannot grant summary judgment unless we are persuaded [*2] beyond a reasonable doubt that there are not material issues of fact and that the defendants, in this case, are entitled to summary judgment as a matter of law. Id. Summary judgment is often inappropriate in antitrust actions where the litigations is complex, motive and intent play leading roles, proof is largely in the hands of the defendants, and hostile witnesses and secret agreements thicken the plot. *Natrona Service, Inc. v. Continental Oil Co.*, 435 F. Supp. 99, 106, aff'd, 598 F. 2d 1294 (10th Cir. 1979). This is not to say that summary judgment may never be granted in antitrust actions because such actions are clearly subject to the provisions of *Fed. R. Civ. P. 56*. *Holter v. Moore and Co.*, 702 F. 2d 854 (10th Cir. 1983); *Semke v. Enid Automobile Dealers Ass'n*, 456 F. 2d 1361 (10th Cir. 1972).

Plaintiffs' antitrust allegations are contained in Count II of their complaint. Plaintiffs allege that the defendants violated §§ 1 and 2, by conspiring to restrain interstate trade and by conspiring and attempting to monopolize the ready-mix concrete market in Topeka, Kansas. In the instant motion, defendants contend that they are entitled to summary judgment on plaintiffs' antitrust [*3] claim based on the judicially created immunity applied to labor activities in the antitrust context.

The discovery record in this case shows generally the following facts. R.D. Andersen Constructin Company (Andersen Construction) began offering contracting and construction services in the Topeka area in 1971. Andersen Construction operated as a non-union contractor in a predominantly unionized labor market. As a result, Andersen Construction was frequently picketed and encountered difficulties in getting delivery of ready-mix concrete, an essential building material. This occurred because all of the supplies of ready-mix concrete were unionized and had signed collective bargaining agreements with defendants Operating Engineers and Truckdrivers.

Andersen Construction thereafter purchased a concrete batch plant to fulfill its needs. In October, 1973, the batch plant was incorporated as Topeka Ready-Mix, Inc., and began offering ready-mix concrete for sale to the public. Unlike the unionized ready-mix companies, Topeka Ready-Mix delivered on Saturdays. Customers of the unionized ready-mix companies requested Saturday deliveries and threatened to take all of their business [*4] throughout the week to Topeka Ready-Mix if the other companies were unwilling to deliver on Saturdays.

The collective bargaining agreements entered into by the unionized ready-mix companies and the Operating Engineers and the Truckdrivers contained a provision which prohibited Saturday deliveries of concrete except in emergencies in which case the employees were to be paid double their usual rate of pay. As a result of this provision, the unionized companies rarely made Saturday deliveries and when they were made, the customer paid the increased labor cost. This provision had been in effect for a number of years and was included in the agreement, negotiated in March and April 1974, for April 1974 through March 1977. Shortly after the collective bargaining agreement was concluded, on or about June 15, 1974, the unionized companies began making Saturday deliveries. The evidence is conflicting as to how this began, but the end result was that the collective bargaining agreement's prohibition was unofficially waived and employees at each companywere voluntarily making Saturday deliveries for time and a half. There is some testimony that the changes were initiated by management [*5] of the unionized companies without notice to the unions' negotiators.

There was not, apparently, sufficient demand for Saturday deliveries to justify a full work crew. At the various companies, those with the highest seniority were first given the option of working Saturdays, continuing down the seniority list until an adequate number of workers agreed to work. Business was so slow on Saturdays that fewer than all of the unionized companies would work on any given Saturday. Thus, there is testimony that an order to one company for concrete might result in delivery by a different company. The plaintiff suggests that the unionized companies had agreed on which company would be working on a particular Saturday.

The record also shows some evidence that the unions and the other producers organized a surveillance system of Topeka Ready-Mix's activities. The drivers of one of the unionized companies were instructed to inform their dispatchers whenever they saw a Topeka Ready-Mix at a job site. Business representatives of the Truck drivers would monitor Topeka Ready-Mix operations. This surveillance, according to the plaintiff, was designed to identify customers of Topeka Ready-Mix [*6] and allow the unionized companies to offer to undercut Topeka Ready-Mix's prices.

The court notes that the complaint also sets forth a claimed violation of the National Labor Relations Act involving secondary boycotts. We do not set forth the facts of these claims presented in the present record except to note that they support the inference that there were hard feelings between the plaintiffs and the unions. There is at least some evidence, in a statement by a representative of the Operating Engineers, that they were "trying to get this non-union ready-mix out of business."

Based on the foregoing facts, it appears that the plaintiffs are alleging two types of anit-competitive conduct by the unions. The first is the employees working on Saturdays at less than double time while the unions did not attempt to enforce the terms of the collective bargaining agreement calling for double time. The second is the unions' role in

co-ordinating the surveillance of Topeka Ready-Mix operations to facilitate price cutting by the unionized companies.

[Antitrust Exemption]

As noted previously, defendants contend in the instant motion that the antitrust labor exemption applies here [*7] and required that judgment be entered in their favor. The motion also contains some argument that the record fails to reveal any violation on which antitrust liability could be based. We believe that the proper method of analysis is to first determine the issue of the labor exemption, then to move to the conventional antitrust scrutiny of the case. Larry Muko, Inc. v. Southwestern Pennsylvania Building and Construction Trades Council, 670 F. 2d 421, 425-26 (3d cir. 1982), cert. denied, U.S. (1982); Consolidated Express, Inc. v. New York Shipping Assoc., 602 F. 2d 494, 522 (3d Cir. 1979), vacated and remanded on other grounds, 448 U.S. 902 (1980). Here, we shall consider only the applicability of the labor exemption because the other question has not been sufficiently presented to the court by the defendants.

The court has carefully considered the leading cases on the antitrust labor exemption including Apex Hosiery Co. v. Leader, 310 U.S. 469 (1940); United States v. Hutcheson, 312 U.S. 219 (1941); Allen Bradley Co. v. Local 3, International Brotherhood of Electrical Workers, 325 U.S. 797 (1945); United Mine Workers v. Pennington, 381 U.S. 657 (1965); Local 189, Amalgamated Meat Cutters Union v. Jewel Tea Co., 381 U.S. 676 (1965); and Connell Construction Co. v. Plumbers and Steamfitters Local No. 100, 421 U.S. 616 (1975). In addition, the court has examined a number of legal treatises and law reviews including 1 Areeda & Turner, Antitrust Law P229 (1978 and 1982 Supp.); 16E Von Kalinowski, Business Organizations -- Antitrust Laws and Trade Regulation § 48 (1983); Mann, Powers & Roberts, The Accommodation Between Antitrust and Labor: The Antitrust Labor Exemption, 9 Seton Hall L. Rev. 744 (1978); Handler & Zifchak, Collective Bargaining and the Antitrust Laws: The Emasculation of the Labor Exemption, 81 Colum. L. Rev. 459 (1981); and Handler, Reforming the Antitrust Laws, 82 Colum. L. Rev. 1287 (1982). After a thorough review of these authorities, the court is convinced that this area of the law is confused. Furthermore, we are convinced that summary judgment should not be granted to the defendants.

Here, there is conflicting evidence and material issues of fact in dispute prohibiting the application of the labor exemption at this time. There is at least some evidence that the unions were aiding and abetting anticompetitive practices and conspiring [*9] with the unionized companies. A representative of the Operating Engineers had told an employee on a project that they were trying to "get this non-union ready-mix out of business." The claim of conspiracy and combination is also supported by the union's involvement in the surveillance of Topeka Ready-Mix vehicles to facilitate price cutting by the unionized employers. We are unable to say as a matter of law that there was no illegal combination in restraint of trade between the unions and the unionized companies. Direct evidence of a conspiracy is rarely available; instead, it is usually proven by circumstantial evidence and we should be reluctant to grant summary judgment in a case where an illegal combination can be inferred from the circumstances. Cf., Fisher v. Shamburg, 624 F. 2d 156, 162 (10th Cir. 1980).

We also have problems in saying that the unions' action in not enforcing the terms of the collective bargaining agreement as to double pay was, as a matter of law, in their own self-interest. The employees considered filing a grievance for violating the Saturday work provision and even considered going on strike. An argument can be made that the employees would not lose [*10] jobs even if Saturday deliveries were not made, as an inference from the fact that demand for Saturday deliveries was so meager that only a few workers would generally work and that the companies rotated Saturday delivery duties among themselves.

We therefore conclude that we cannot say, as a matter of law, that the unions' conduct falls within the antitrust exemption for labor organizations. Accordingly, we must deny the labor unions' motion for partial summary judgment.

It Is So Ordered.

Opinion

[*1576] By Judge Horace W. Gilmore

By Judge Horace W. Gilmore

This action is brought under the Racketeer Influenced and Corrupt Organizations Act of 1970, [18 U.S.C. 1961, et seq.](#) ("RICO"). [HN1](#) A civil remedy is provided in [§ 1964\(c\)](#):

Any person injured in his business or property by reason of a violation of [§ 1962](#) of this chapter may sue therefor in any appropriate United States district court and shall recover threefold the damages he sustains and the cost of the suit, including a reasonable attorney's fee.

Plaintiffs charge defendants with fraudulent, illegal and corrupt activities in providing medical treatment and related medical services to patients. [*2] Bradford Capper, D.O., was a medical practitioner who operated a "Suburban Clinic" in Livonia, Michigan. His sister, Virginia Capper, was the attorney and secretary for Bradford Capper, D.O., P.C. Elizabeth Capper, his wife, [*1577] was the Vice-President and Treasurer of the Corporation, and Alex Furda and his wife Zoya operated Furda Bio-Chemical Biopsy, a blood-testing service located in Lansing, Michigan.

Plaintiffs in the instant case are former patients who received medical services from defendants.¹ They allege they have been injured monetarily and otherwise by the fraudulent activities of defendants.

It is plaintiffs' allegation that they were victims of a Medicaid fraud scheme. [*3] ² Plaintiffs allege that Dr. Capper, and those associated with him, billed them and Medicaid, as well as other insurance carriers, for work and tests that were never performed. They further allege that unnecessary tests were performed upon plaintiffs, inflicting physical and mental injury. The Furdas are alleged to have taken part in the scheme by performing unnecessary and fraudulent blood tests. Plaintiffs allege a scheme to defraud, and a conspiracy on the part of all defendants. In addition, they allege that defendants used the mails in furtherance of their scheme to defraud, in violation of [18 U.S.C. § 1341](#), the federal mail fraud statute. They further allege that each of the plaintiffs was injured in his or her business or property by reason of the acts and conduct of the defendants.

[*4] In their motions to dismiss, defendants essentially argue that, although their activities may literally fall within the words of the RICO Statute, they are not within its spirit or purpose. They argue that RICO was not intended to provide a federal treble-damage remedy for "garden variety" state fraud claims, and cite many U.S. district court cases which evince judicial hostility towards civil RICO claims.

RICO is part of Title IX of the Organized Crime Control Act of 1970, Public Law No. 91-452, 84 Stat 922 (1970). In the statement of findings and purposes, the Statute states:

It is the purpose of this Act to seek the eradication of organized crime in the United States by strengthening the legal tools in the evidence gathering process, by establishing new penal prohibitions, and by providing enhanced sanctions and new remedies to deal with the unlawful activities of those engaged in organized crime.

[Section 1962\(a\)-\(d\)](#) of RICO contains the prohibited activities which are made subject to criminal penalties under § 1963 and civil penalties under [§ 1964](#). Although the criminal penalties have been widely employed in the last

¹ The complaint alleges that plaintiffs are bringing the case both individually and as part of a class of patients injured by the defendants, but, as of this date, no motion for class certification has been brought or granted. Thus, at this point, we are concerned only with allegations made by plaintiffs as individuals.

² Although not part of the pleadings, and thus not directly relevant to the motion presently before the Court, the Court notes that this allegation is not fanciful -- Dr. Capper pled guilty to Medicaid fraud in state court.

decade and are subject to many appellate decisions, [**5] until very recently the civil penalties were rarely used and there is a relative scarcity of appellate opinions dealing with civil penalties under RICO.

HN2  [Section 1961](#) of RICO supplies the definitions of the elements necessary to prove a [§ 1962\(c\)](#) violation. A "pattern of racketeering activity" is defined in [§ 1961\(5\)](#) as follows:

(5) "pattern of racketeering activity" requires at least two acts of racketeering activity, one of which occurred after the effective date of this chapter and the last of which occurred within ten years (excluding any period of imprisonment) after the commission of a prior act of racketeering activity;

HN3  "Racketeering activity" is defined in [Section 1961\(1\)](#) as follows:

(1) "Racketeering activity" means (A) any act or threat involving murder, kidnaping, gambling, arson, robbery, bribery, extortion, or dealing in narcotic or other dangerous drugs, which is chargeable under State law and punishable by imprisonment for more than one year; (B) any act which is indictable under any of the following provisions of title [18, United States Code, . . . section 1341](#) (relating to mail fraud), . . .

HN4  In the criminal context, the Sixth Circuit has [**6] defined the elements constituting a violation of [§ 1962\(c\)](#) as: 1) engaging in an enterprise, 2) affecting interstate commerce, 3) conducted through a pattern of racketeering, and 4) involving two or more statutorily-named racketeering crimes. *United States v. Sutton*, 642 F.2d 1001, 1008 (6th Cir. 1980) (en banc), cert. denied, 453 U.S. 912, 101 S. Ct. 3143, 69 L. Ed. 2d 995 (1981). The conspiracy provision of [§ 1962\(d\)](#) is a separate offense, and thus for criminal purposes is not violative of double jeopardy, since it involves proof of the additional element of an agreement to violate [§ 1962\(c\)](#).

[*1578] Many federal district courts have sustained a narrow reading of the RICO statute when civil penalties are at stake.³ [**8] This Court finds no basis, however, for sustaining a narrow reading of the RICO statute when civil penalties are at stake, nor is there any basis for establishing additional court-imposed requirements for civil RICO violations in face of the clear language of the RICO statute. To put it simply, courts "are without authority to restrict the application of the statute" beyond its statutory language. [United States v. Turkette](#), 452 U.S. 576, 587, [\[*71\] 69 L. Ed. 2d 246, 101 S. Ct. 2524 \(1981\)](#). This position is not only clearly mandated by the Supreme Court's holding in *Turkette*, but it is also reflected in a growing number of appellate decisions that reject narrow readings of civil RICO suits. See [USACO Coal Company v. Carbomin Energy, Inc.](#), 689 F.2d 94 (6th Cir. 1982), upholding an injunction in a civil RICO action founded on the corporate promoter's breach of fiduciary duty.⁴ See also [Bennett v. Berg](#), 685 F.2d 1053 (8th Cir. 1982), aff'd, [710 F.2d 1361 \(8th Cir. 1983\)](#) (en banc), and [Schacht v. Brown](#), 711 F.2d 1343 (7th Cir. 1983). This reasoning is also supported by the clear weight of recent commentary. See Tarlow, *RICO Revisited*, 17 Georgia L. Rev., 291, 305 (1983); Strafer, Massumi & Skolnick, *Civil RICO in the Public Interest: "Everybody's Darling,"* 19 Am. Crim. L. Rev. 655 (1982); Note, *Civil RICO: The Temptation and Impropriety of Judicial Restriction*, 95 Harv. L. Rev. 1101 (1982).

Defendants contend that the RICO statute was not intended by Congress to reach "garden variety" fraud or mere medical malpractice, and that Congress did not intend for [§ 1964\(c\)](#) to federalize already existing state common law remedies such as traditional common law fraud remedies. There is nothing in the plain language of RICO to support this contention. On the contrary, Title IX contains a clause stating: "The provisions of this title . . . shall be

³ See, e.g., [Moss v. Morgan Stanley, Inc.](#), 553 F. Supp. 1347 (S.D.N.Y. 1983); [Harper v. New Japan Securities](#), 545 F. Supp. 1002 (C.D. Cal. 1982); [Van Schaick v. Church of Scientology](#), 535 F. Supp. 1125 (D. Mass. 1982); [Adair v. Hunt International Resources Corp.](#), 526 F. Supp. 736 (1981); [Waterman Steamship Corp. v. Avondale Shipyards](#), 527 F. Supp. 256 (E.D. La. 1981); [North Barrington Development, Inc. v. Fanslow](#), 547 F. Supp. 207 (N.D. Ill. 1980). This includes cases in this district. See, e.g., [Barker v. Underwriters At Lloyd's, London](#), 564 F. Supp. 352 (E.D. Mich. 1983); [Landmark Savings & Loan v. Rhoades](#), 527 F. Supp. 206 (E.D. Mich. 1981).

⁴ That court noted that "Congress intended that RICO be liberally construed to effectuate its remedial purposes." [689 F.2d 95, n.1](#).

569 F. Supp. 1575, *1578-1983 U.S. Dist. LEXIS 13780, **7

liberally construed to effectuate its remedial purposes." The statement of findings and purpose of the statute speaks of "new remedies," clearly indicating an intent to add to already existing remedies.

Schacht v. Brown, 711 F.2d 1343 (7th Cir. 1983) is the most recent appellate case dealing with RICO's civil damage provisions. There the Illinois State Director of Insurance brought an action to recover for alleged RICO violations by officers, directors, and the parent corporation, who allegedly continued an [**9] insurer in business past the point of insolvency and looted the insurer of its most profitable and least risky business. A motion to dismiss was denied in the trial court, and on interlocutory appeal the court of appeals held that the state director's RICO complaint sufficiently alleged a causal nexus between RICO proscribed conduct and insurer's damage to meet the requirements of RICO's civil damage provisions. The court dealt at length with the defendant's contention that the injury which the Director alleged was not compensable under the civil damage provisions of RICO, and rejected such argument. The main argument of the defendant was that, even though RICO might literally apply to its situation, Congress did not intend the statute to reach so far. The defendant argued, as the defendants have argued here, that it would be unreasonable to federalize the common law of "garden variety" business frauds.

The court rejected the argument:

We agree that the civil sanctions provided under RICO are dramatic, and will have a vast impact upon the federal-state division of substantive responsibility for redressing illegal conduct, but, like most courts who have considered this [**10] issue, we believe that such dramatic consequences are necessary incidents of the deliberately broad swath Congress chose to cut in order to reach the evil it sought; we are therefore without authority to restrict the application of the statute . . . (citations omitted).

Id. at 1353.

After a lengthy analysis, the court said this:

[*1579] In short, while we are mindful of the jurisprudential maxim that statutes are not to be interpreted woodenly and without regard to their aim, we do not see how any legitimate or principled tailoring of RICO could be effected without impairing the broad strategy embodied in the act. If Congress wishes to avoid the inclusion under RICO's umbrella of "garden variety" fraud claims involving the operation of enterprises through mail and securities fraud, it may easily do so through removing mail and securities fraud from the list of predicate acts enumerated in § 1961. That is not, however, a program which may be undertaken by this court.

...

Id. at 1356.

Defendants further point to the legislative history of RICO, which establishes that Congress was concerned with "organized crime," and enacted RICO as a weapon in [**11] the combat against organized crime, especially the infiltration of legitimate businesses by organized crime elements. No one can quarrel with this analysis of the legislative history. What one quarrels with is the conclusion, uniformly rejected in the criminal RICO case law, that, because of this, RICO is to be read as creating a "status" offense, limited to a judicially-created definition of what constitutes "organized crime." No court has accepted this analysis.

HN5 [↑] Criminal RICO decisions have uniformly held that RICO is not limited to a judicially-created definition of "organized crime." United States v. Martino, 648 F.2d 367 (5th Cir. 1981); United States v. Uni Oil, Inc., 646 F.2d 946 (5th Cir. 1981); United States v. Aleman, 609 F.2d 298 (7th Cir. 1979); United States v. Forsythe, 560 F.2d 1127 (3d Cir. 1977). RICO criminal prosecutions have been upheld against members of the Hell's Angels Motorcycle Club, an attorney charged with investing money derived from a client's drug dealing, a large Japanese corporation, state legislators, union leaders, oil companies, and state prosecuting attorneys' offices. See *Tarlow, supra*, at 299-300, and cases cited therein. [**12] The Sixth Circuit has held that the office of the Governor of the State of Tennessee could be charged as a RICO "enterprise." United States v. Thompson, 685 F.2d 993 (6th Cir. 1982) (en banc), cert. denied, 459 U.S. 1072, 103 S. Ct. 494 (1982).

569 F. Supp. 1575, *1579 (1983 U.S. Dist. LEXIS 13780, **12

In the face of this overwhelming authority in the criminal context, there simply is no basis to conclude that civil RICO suits should be construed more narrowly.

There are good reasons for not reading into RICO a definition of "organized crime." First, Congress explicitly rejected an attempt to restrict the scope of RICO to "the Mafia" or "La Cosa Nostra." This rejection was based on well-grounded fears of the unconstitutionality of the creation of a "status offense," which would limit the application of the statute to a specified group in society.

Secondly, Congress feared that a narrow definition of the groups Congress was trying to reach through RICO would unnecessarily limit the scope of the statute and weaken the ability of Congress to combat organized crime. See Note, *Civil RICO, supra*, at 1106-1109.

In light of all of this, it seems clear that RICO creates a functional offense rather than a status offense. It [**13] is aimed at conduct, and if the conduct meets the definitions provided in the statute, then the conduct is within the meaning of the statute. To hold otherwise would simply create too much judicial discretion in defining what constitutes "organized crime." Where the RICO statute itself defines the offense, there is no reason to allow courts to impose additional definitions according to their own conceptions of what "organized crime" is or is not.

Similarly, there is no basis in the statute itself, or in the legislative history, for concluding Congress could not have intended the civil RICO provisions to possibly intrude on areas of state law. The Supreme Court noted in *Turkette, supra*:

The language of the statute and its legislative history indicate that Congress was well aware that it was entering a new domain of federal involvement through the enactment of this measure The view was that existing law, state and federal, was not adequate to address the problem, which was of national dimensions There is no argument that Congress acted beyond its power in so doing. That being the case, the courts are without authority to restrict the application of the statute.

[**14] *Id. at 586-87.*

Although *Turkette* was a criminal prosecution, there is nothing in the statute to indicate that this rationale should not apply to RICO civil remedies. Defendants [*1580] "floodgates" argument that federal courts will be overwhelmed with state "garden variety" fraud claims has no basis in fact. Nor is it true that a RICO "fraud" claim is identical to a state common law fraud claim. There must be an enterprise, there must be an effect upon interstate commerce before RICO can come into effect, and there must also be two predicate offenses. All of the separate elements of a 1962(c) or 1962(d) claim must be proven by plaintiffs, including the predicate racketeering acts, their impact on interstate commerce, and the existence of an enterprise. These requirements will be strictly adhered to.

An additional argument made by defendants, and accepted by some district courts, is that in order to establish standing to bring a claim under § 1964(c) plaintiffs must establish some kind of "competitive injury," see *North Barrington Development, Inc. v. Fanslow*, 547 F. Supp. 207 (N.D. Ill. 1980); "commercial harm," *Van Schaick v. Church of Scientology*, 535 F. Supp. 1125 (D.Mass. 1982); or "racketeering enterprise injury", *Landmark Savings & Loan v. Rhoades*, 527 F. Supp. 206 (E.D. Mich. 1981). This Court has great difficulty in understanding the precise meaning of these requirements, which are never defined, and even more difficulty finding a statutory source for these requirements.

These additional standing requirements appear to be based on a strained analogy to antitrust law, based upon references in RICO's legislative history to antitrust precedent, particularly as a basis for treble damage provisions. However, analogies to limitations on standing in the antitrust context are entirely inappropriate here. The antitrust laws are designed to promote competition in the marketplace, and courts have been concerned that the use of treble damage provisions in antitrust cases could threaten a company with economic ruin and thus reach a result contrary to the very purpose of the antitrust laws and reduce competition in the market place.

RICO has the opposite purpose. It is precisely designed to *ruin* those individuals and enterprises it is aimed at. It is not designed to increase their efficiency or protect them from insolvency. [**16] Thus, the rationale behind the antitrust standing concerns have no applicability here. See *Schact v. Brown, supra at 1357-58.*

Finally, given the ample record in the legislative history concerning Congress's recognition that the victims of organized crime extend to all social categories, including workers, consumers and the poor,⁵ there is simply no basis for imposing a judicially-created standing requirement limiting recovery under [§ 1964\(c\)](#) to businessmen, or those suffering from an undefined "racketeering enterprise" injury, since nothing in the statute or legislative history authorizes such a limitation. Obviously, there is no rationale for excluding Medicaid fraud victims from the scope of civil RICO.

[**17] Although [§ 1964\(c\)](#) requires a specific violation of [§ 1962](#) in order to have a claim for civil relief, nowhere do plaintiffs plead a specific violation of [§ 1962](#). Liberally construing plaintiffs' claims, as the Court is required to do in considering a Rule 12(b)(6) motion, *Conley v. Gibson, 355 U.S. 41, 2 L. Ed. 2d 80, 78 S. Ct. 99 (1957)*, it is clear that the violations of [§ 1962](#) most applicable to plaintiffs' claims are [HN6](#) [↑] [§ 1962\(c\)](#):

(c) It shall be unlawful for any person employed by or associated with any enterprise engaged in, or the activities of which affect, interstate or foreign commerce, to conduct or participate, directly or indirectly, in the conduct of such enterprise's affairs through a pattern of racketeering activity or collection of unlawful debt.

[HN7](#) [↑] and [§ 1962\(d\)](#), the RICO conspiracy provision:

(d) It shall be unlawful for any person to conspire to violate any of the provisions of subsections (a), (b), or (c) of this section. Added Pub.L. 91-452, Title IX, § 901(a), Oct. 15, 1970, 84 Stat. 942.

Further, although plaintiffs plead a violation of [18 U.S.C. § 1341](#), mail fraud, in their complaint, the Court notes that they do not plead [**18] the two predicate acts within 10 years necessary to sustain a claim of "pattern of racketeering" activity under [§ 1961\(5\)](#).

It is thus clear that there are some deficiencies in plaintiffs' pleadings. The Court [*1581] has held it is without authority to narrow the application of [§ 1964\(c\)](#) or impose additional requirements in face of the clear language of the statute. By the same token, this Court must insist that the statutory language be strictly adhered to. It necessarily follows that the Court must also insist that plaintiffs adhere to statutory requirements in pleading their claim.

The technical requirements for a RICO [§ 1964\(c\)](#) claim must be strictly adhered to because the statute is a relatively specific one, designed to accomplish certain Congressional intent. In face of the difficulties courts have had in interpreting the provisions of RICO, and also in face of the treble damage liability which defendants are subject to, it is imperative that the court and the defendants be placed on clear notice as to what is being alleged, and what the substance of the claim is, in order to facilitate a decision on the merits of the case. It is also in keeping with the policies [**19] of the Federal Rules of Civil Procedure where allegations of fraud are involved. See [F.R.C.P. 9\(b\)](#) (allegations of fraud to be stated with particularity).

As noted earlier, there are several deficiencies in plaintiffs' complaint. Although [§ 1964\(c\)](#) requires a specific violation of [§ 1962](#) in order to bring a claim for civil relief, plaintiffs have not pled any specific violation of [§ 1962](#). Defendants are clearly entitled to have notice of which specific provisions of [§ 1962](#) plaintiffs are relying on. If plaintiffs are also relying on a conspiracy theory, in addition to a substantive violation, this must be pled separately as well.

⁵ "Business competitors suffer unfair competition. Workers are the victim of sweetheart labor contracts. And consumers are victims of inferior products and services, price fixing and . . . other predatory practices." 116 Cong. Rec. 35201 (Oct. 6, 1970, remarks of Rep. McCulloch). The President's Commission on Law Enforcement also noted: "In all of these illicit operations the 'customers' -- in reality the victims -- are the people least able to afford criminal exploitation. They are the poor, the uneducated, and the culturally deprived. . ." 113 Con. Rec. 18004 (Report, "Organized Crime -- Challenge to a Free Society").

Looking further at the test for a § 1962 violation established in *United States v. Sutton, supra*, the plaintiffs have not pled a "pattern of racketeering activity" which must consist of two or more predicate acts within the last 10 years. Defendants have an absolute right to know which predicate acts plaintiffs rely upon that they must defend against. In addition, plaintiffs must plead an effect on interstate commerce under § 1962(c).

Finally, plaintiffs have not pled an "enterprise" within the meaning of § 1961(4), a required element **[**20]** in a § 1964(c) claim. Defendants are entitled to have notice of the type of "enterprise" that they as "persons" were "employed by" or "associated with". The plaintiffs' complaint does not give them that notice.

HN8 [↑] F.R.C.P. 15(a) declares that leave to amend "shall be freely given when justice so requires." The purpose of pleading is to facilitate a decision on the merits of a lawsuit. There will be no substantial prejudice to defendants if plaintiffs are granted a reasonable time to amend their complaint to comply with the RICO statute and the views expressed in this opinion.

The Court will give plaintiffs 30 days from the date of this opinion to amend its complaint. If the complaint is not amended within that time, defendants' motion to dismiss will be granted. If the complaint is amended by that time, defendants will have 30 days to raise any questions about the sufficiency of the complaint by motion. If such amended complaint is filed and defendants do not raise the questions as to the sufficiency of the amendment within 30 days, defendants' motion to dismiss will be denied. If defendants raise questions of the sufficiency of the amended complaint, the matter will be noticed **[**21]** on for hearing before the Court to determine if the amended pleading does comply with the requirements of RICO.

An order in accordance with this opinion may be presented.

Civil Procedure > Appeals > Standards of Review > General Overview

HN3 Jury Trials, Jury Instructions

A court must look to the jury instructions as a whole, in a common sense manner, avoiding fastidiousness, in inquiring whether the correct message is conveyed to the jury reasonably well. Even if the court discerns error in one or more instructions, the court will not reverse a judgment unless it is persuaded the jury's understanding of the issues was seriously affected, to the prejudice of the plaintiffs.

HN4 [↓] Per Se Rule & Rule of Reason, Per Se Violations

Before the jury is free to find a per se violation of the Sherman Act, [15 U.S.C.S. § 1 \(1979\)](#), the trial court must determine that there is evidence from which the jury may find that the defendants engaged in certain conduct -- for example, a horizontal agreement among competitors to fix prices charged to consumers -- which conduct, the court (not the jury) must decide, constitutes a per se violation. In such a case, the court must explain to the jury that its function is to decide whether certain conduct, described with precision in the instruction, did or did not occur. It must be explained, also, that if the jury finds that the described conduct did occur, it must also find, without further factual inquiry, that [§ 1](#) was violated. In this important respect, the verdict as to a per se violation must be controlled by the court.

Judges: Swygert, Senior Circuit Judge, Sprecher, * Circuit Judge, and Doyle, Senior District Judge. ** [**3]

Opinion by: DOYLE

Opinion

[*211] DOYLE, Senior District Judge.

Plaintiffs appeal from a judgment entered on a jury verdict in favor of defendants-appellees. Plaintiffs, five licensed chiropractors, charged defendants-appellees ¹ [**4] with violating [sections 1 and 2](#) of the Sherman Act, [15 U.S.C. §§ 1 and 2 \(1979\)](#).² Plaintiffs alleged that defendants engaged in a combination and conspiracy to eliminate the chiropractic profession through refusing to deal with plaintiffs and other chiropractors. Plaintiffs alleged defendants implemented the group boycott by agreeing to induce individual medical doctors to forego any form of professional, research, or educational association with chiropractors, to induce hospital and other health care facilities to deny access to chiropractors, and to induce actual and prospective patients of chiropractors to avoid seeking chiropractic

* Judge Sprecher heard oral argument and participated in the conference which followed. He died May 15, 1982, and did not participate in the preparation or approval of this opinion.

** James E. Doyle, a Senior United States District Judge for the Western District of Wisconsin, is sitting by designation.

¹ Two defendant medical organizations settled prior to trial and thus were not parties to the judgment. Plaintiffs have not appealed from the judgment in favor of one defendant, the Chicago Medical Society. Plaintiffs' complaint named individual members of the defendant associations as co-conspirators but not as defendants.

² [Section 1](#) of the Sherman Act [HN1](#) [↑] declares illegal "every contract, combination . . . , or conspiracy in restraint of trade or commerce. . . ." [15 U.S.C. § 1 \(1970\)](#). [Section 2](#) prescribes penalties for "every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce. . . ." [15 U.S.C. § 2 \(1970\)](#).

services. Plaintiffs also alleged that through this agreement, defendants attempted to monopolize and conspired to monopolize certain health care markets.³

[**5] I. GROUNDS OF APPEAL

Plaintiffs' principal ground of appeal is that the court's instructions gave the jury to understand, incorrectly, that a boycott by defendants, resulting in a diminution of competition between chiropractors and medical doctors, was lawful if the boycott was the product of a genuine belief by medical doctors that chiropractic is dangerous quackery. Because the district court embraced this incorrect view of the law, plaintiffs contend, it received in evidence, erroneously and over objection, much prejudicial material concerning the alleged evils of chiropractic. Plaintiffs contend also that the jury was incorrectly instructed on the application of the [first amendment](#) in the circumstances.

The remaining grounds of appeal relate to: jury instructions on coercive enforcement of ethical canons as an essential element of a conspiracy of the type alleged; jury instructions relating to apparent authority of agents; the trial court's handling of the "unclean hands" concept; and the trial court's refusal to permit reopened discovery into settlement negotiations.

Defendants-appellees dispute all of these contentions, of course. Five of the organization defendants [**6] (JCAH, AHA, ACP, ACS, and ISMS) raise a further argument. Each claims that its motion for a directed verdict was erroneously denied by the district court. Each asserts that the evidence was insufficient to support a jury finding that it was a member of a conspiracy. Thus, each contends, the judgment they won should be affirmed even if the judgment in favor of the other defendants were to be reversed on one ground or another.

In the following section headed "Facts," we set forth those propositions which a reasonable jury might have found as fact and which might arguably have prompted a verdict in plaintiffs' favor, had the jury been instructed as plaintiffs contend it should have been and had the jury been [*212] protected from the allegedly prejudicial evidence. We set forth, also, those facts concerning the involvement of JCAH, AHA, ACP, ACS, and ISMS in the alleged conspiracy which a reasonable jury might have found from the evidence, viewed most favorably to the plaintiffs.

II. FACTS

The American Medical Association (AMA) is a nonprofit corporation with a membership of over 200,000 medical doctors, which is nearly half the total number of medical doctors in the United [**7] States. AMA is a federation of independent state and territorial medical societies, each of which appoints representatives to the House of Delegates of the national organization. The House of Delegates elects the AMA Board of Trustees. AMA is heavily involved in this country's professional and public medical education programs. AMA also publishes numerous professional journals, receives and responds to questions from the public on medical subjects, and engages in legislative lobbying. AMA promulgates the Principles of Medical Ethics, which are interpreted by its Judicial Council.

The American Hospital Association (AHA) is a nonprofit corporation composed of 7,000 organization members and 30,000 individual members. Approximately 6,000 of the 7,000 hospitals in the United States belong to AHA. AHA publishes several periodicals and manuals on various topics related to hospital operations. It also collects statistics on hospitals, sponsors educational programs, and reviews and responds to governmental activities relevant to hospital operations.

³ On appeal, plaintiffs raise no claim based solely on § 2. They assert conclusorily that the trial court erred with regard to those claims in its jury instructions on conspiracy, its failure to instruct the jury that good motives do not constitute a defense to either § 1 or § 2 violations, and its admission of evidence on defendants' public health and welfare motives. They do not present specific argument on these issues. Since we treat each of these points in light of plaintiffs' § 1 claims, and since plaintiffs failed to raise the § 2 claims in any meaningful fashion on appeal, we do not address separately their general assertion of claims based solely on § 2.

The American College of Surgeons (ACS) is a nonprofit corporation having as its members about 40,000 of the 100,000 American physicians [**8] who identify themselves as surgeons. ACS takes public positions on relevant issues and sometimes expresses those positions to legislative and administrative bodies.

The American College of Physicians (ACP) is a nonprofit corporation composed mainly of physicians who specialize in internal medicine. Its chief function is to conduct continuing education programs for members and nonmembers.

The Joint Committee on Accreditation of Hospitals (JCAH) is a nonprofit corporation having AMA, AHA, ACS, ACP, and the American Dental Association as its members. The member organizations appoint representatives to the JCAH Board of Commissioners, the policy-making body of JCAH. JCAH operates a health care facilities accreditation program, in which it establishes standards for accreditation and conducts surveys of individual institutions when they so request. If a facility meets JCAH standards, that facility is accredited.

The American College of Radiology (ACR) is a nonprofit corporation with approximately 13,000 members, most of whom are medical doctors specializing in radiology. It is active in education and research, and it furnishes advice and information to government, private industry, [**9] and health care professionals concerning radiation protection and the practice of radiology.

The American Academy of Orthopaedic Surgeons (AAOS) is a nonprofit corporation composed of about 9,000 medical doctors who specialize in orthopaedic surgery. More than 75 percent of the total number of board-certified orthopaedic surgeons in the United States belong to AAOS. AAOS conducts continuing medical education courses for practicing orthopaedic surgeons and persons working in related areas, including orthopaedic nursing, occupational therapy, physical therapy, and manufacturing braces and artificial limbs.

The Illinois State Medical Society (ISMS) is a state medical society with approximately 14,000 medical doctors as members. ISMS is one of the fifty state medical societies that comprise AMA.

Doyl Taylor was employed by AMA and served as director of the AMA Department of Investigation and as secretary to the AMA Committee on Quackery. Joseph A. Sabatier, Jr., M.D., and H. Thomas Ballantine, Jr., M.D., both served on the AMA [*213] Committee on Quackery as members and chairmen. James H. Sammons, M.D., was a member of the AMA Board of Trustees.

Chiropractic is a health [**10] care service. Its primary therapeutic tool is spinal manipulation.⁴ Chiropractors and medical doctors treat some of the same medical problems. Chiropractors would treat some patients in health care facilities and would use hospital X-ray and laboratory services if such treatment and use were permitted.

In Illinois, Michigan, California, Colorado, and Missouri, five states where plaintiffs have practiced, there were no laws in effect during the time relevant to this lawsuit that prohibited chiropractors from furnishing care in a hospital under the supervision of a medical staff member, nor were there laws preventing hospitals from providing X-ray or laboratory services to chiropractors or preventing hospital X-ray departments or radiologists from making X-ray films or copies of X-rays available to chiropractors at the request of their patients.

Principle 3 of the AMA Principles [**11] of Medical Ethics in effect during the alleged boycott provided: "A physician should practice a method of healing founded on a scientific basis; and he should not voluntarily professionally associate with anyone who violates this principle."

At its meeting on November 2 and 3, 1963, the AMA Board of Trustees voted to establish a "Committee on Quackery" (Committee). The Committee was active from that time until 1974. It considered "its prime mission to be, first, the containment of chiropractic and ultimately, the elimination of chiropractic." Memorandum to AMA Board of Trustees from Committee on Quackery, January 4, 1971. During these years, the AMA also operated a

⁴ Spinal manipulation also is practiced by osteopathic physicians, physical therapists, and a small number of medical doctors.

Department of Investigation (Department), a clearing-house for information on healing methods AMA deemed unscientific.

In December of 1966, upon the recommendation of the Committee and the AMA Board of Trustees, the AMA House of Delegates adopted a resolution asserting: "It is the position of the medical profession that chiropractic is an unscientific cult whose practitioners lack the necessary training and background to diagnose and treat human disease." This resolution, together with Section 3 of the Principles [**12] of Medical Ethics, was incorporated into the Opinions and Reports of the Judicial Council.

The Committee characterized this policy statement as follows:

This was the necessary tool with which your Committee has been able to widen the base of its chiropractic campaign. With it, other health-related groups were asked and did adopt the AMA policy statement or individually-phrased versions of it. These, in turn led to even wider acceptance of the AMA position.

...

The hoped-for effect of this widened base of support was and is to minimize the chiropractic argument that the campaign is simply one of economics, dictated and manipulated by the AMA.

Memorandum, *supra*, at 2.⁵

[**13] The Committee and the Department prepared numerous publications critical of chiropractic for distribution to medical professionals and laypersons. The Committee was extensively involved in legislative work at state and national levels on such matters as chiropractic licensing and Medicaid and Medicare reimbursement for chiropractic services. Among its other activities were sending letters warning medical boards and associations that professional cooperation and association between chiropractors and physicians were unethical and attempting to discourage colleges, universities, and faculty [*214] members from cooperating with chiropractic schools.

Codefendant organizations AHA, ACS, ACP, JCAH, ACR, AAOS, and ISMS communicated in various ways with defendant AMA and its Committee on Quackery. Some codefendant staff members attended meetings and a conference of chiropractic sponsored by the Committee. Codefendant staff members also discussed with Committee members ways of responding to inquiries from individual physicians and hospitals concerning possible professional cooperation with chiropractors. Representatives of three codefendant associations joined with AMA to form defendant [**14] JCAH and to determine requirements for JCAH accreditation. The JCAH accreditation manual asserted that a hospital permitting chiropractors to use its facilities would "very probably" lose its accreditation. Some codefendant organizations adopted the AMA Principles of Medical Ethics, including Principle 3.

Through such mechanisms, individual physicians were discouraged from cooperating with chiropractors in: patient treatment, because referrals were inhibited by defendants' activities; research; and educational activities, such as sharing clinical experience and research results. Chiropractors were denied access to the hospital facilities they considered necessary to practice their professions. Medical doctors were discouraged from aiding chiropractors in interpreting electrocardiograms. Requests by individual plaintiffs to use laboratory and X-ray facilities were not granted; requests for hospital in-patient privileges were similarly denied. Referrals from medical doctors were reduced. Public demand for chiropractic services was negatively affected.

JCAH. JCAH was comprised of twenty-one members, seven appointed by AMA, seven by AHA, three by ACS, three by ACP, and one [*15] by the American Dental Association. JCAH exercised considerable power over hospitals through the mechanism of accreditation. JCAH staff members replied to letters from hospitals on chiropractors by asserting that a hospital permitting chiropractors to use its services, such as laboratory testing and X-rays, would endanger its status as an accredited institution, even if a state passed a law requiring hospitals to

⁵ This memorandum was characterized as a report of the Committee's activities during the previous seven years.

The memorandum said: "The Committee has not submitted such a report [earlier] because it believes that to make public some of its activities would have been and continues to be unwise. Thus this report is intended only for the information of the Board of Trustees."

allow chiropractors to be staff members. These letters at times referred to the AMA Principles of Medical Ethics and to an AMA publication on chiropractic. JCAH jointly published with AHA a widely distributed manual, *Hospital Accreditation References*, setting forth standards and criteria for JCAH accreditation. The manual was written by the director of JCAH. The manual contained the following statements: "The Commission looks on chiropractors as cultists. A hospital that encourages cultists to use its facilities in any way would very probably be severely criticized and lose its accreditation." The same statements appeared in a column written by the JCAH director, published in the Journal of the American Hospital Association. In its Accreditation Manual for Hospitals, **[**16]** JCAH incorporated the AMA Principles of Medical Ethics, and asserted: "Failure by the medical staff and the governing body to take all reasonable steps to ensure adherence to these ethical principles shall constitute grounds for nonaccreditation." In denying plaintiff Lumsden staff privileges, one hospital cited its unwillingness to jeopardize its JCAH accreditation.

AHA. AHA appointed commissioners to JCAH. AHA and JCAH collaborated to publish *Hospital Accreditation References*. AHA also published that material in the AHA professional journal. Dr. Shu, an AHA employee who responded on behalf of AHA to inquiries from individual hospitals concerning use of facilities by chiropractors, answered those inquiries by citing the JCAH view that accreditation would be jeopardized if such use were permitted. At the AMA "National Conference on Health Quackery -- Chiropractic," Dr. Shu attended a presentation of the "right and duty" of hospitals to exclude chiropractors. He also met informally with AMA and JCAH employees to discuss ways of answering questions from hospitals concerning chiropractors. Persons attending this meeting discussed the ethical prohibition on physicians' association **[**17]** with chiropractors. Dr. Shu had **[*215]** telephone conversations with AMA and JCAH personnel on the subject of chiropractors using hospital facilities.

ACP. ACP appointed commissioners to JCAH. Minutes from an ACP board of governors meeting in 1978 described activities of the ACP's "Ad Hoc Committee on Chiropractic."⁶ The committee was named "to suggest what might be done at the Chapter or regional level to promote the College's policy toward chiropractic." Although part of the committee's purpose was simply to inform ACP members of pending lawsuits by chiropractors against ACP, the committee also recommended that:

the Governors should remain alert to efforts of chiropractors to gain access to radiographic and clinical laboratory diagnostic facilities in their regions and keep ACP headquarters informed of such developments;
the Governors should alert colleagues in other disciplines to the efforts of chiropractors to gain access to radiographic and clinical pathology diagnostic facilities; and

the Governors and the College members in their regions should discuss these matters with their county and state medical societies and with their representatives to the **[**18]** House of Delegates of the AMA.

The ACP board of governors unanimously voted to approve the committee's report and to distribute it immediately.

ACS. ACS appointed three commissioners to JCAH. The ACS "Statement on principles" endorsed the Principles of Medical Ethics and suggested that infraction of those principles would result in disciplinary action by ACS. An ACS director attended the National Conference on Health Quackery sponsored by the AMA Committee on Quackery. A former ACS director responded **[**19]** to a request from a state medical society for the ACS position on the relationship between physicians and chiropractors by asserting: "The College has never taken an official position in regard to relationships between M.D.s and chiropractors. We have followed the lead of the AMA, which is not always entirely clear." The letter notes that this director called the AMA legal department for an answer to the inquiry, and the letter suggests the AMA be consulted for an "authoritative" opinion.

ISMS. ISMS adopted the Principles of Medical Ethics, and ISMS members are bound by the principles. ISMS appointed its own Committee on Quackery. AMA Committee on Quackery staff member Doyl Taylor spoke to the ISMS committee on AMA activities and formal positions concerning chiropractic. ISMS committee members

⁶ Defendant ACP argues that the trial court erred in admitting this exhibit, or alternatively, that the exhibit could not be the basis of an antitrust violation, because the activities it described were protected by the *Noerr-Pennington* doctrine. Some of the committee's recommendations were directed toward protected activities. But others were not. That some activities of a particular organization are protected by the [first amendment](#) does not shield all its activities, under *Noerr-Pennington*.

attended an AMA-sponsored meeting on quackery at which chiropractic was a major item of discussion. The ISMS committee endorsed the AMA House of Delegates statement labeling chiropractic an "unscientific cult." The ISMS Board of Trustees subsequently adopted this statement. The ISMS Board of Trustees had jurisdiction over all ethical questions. Doyl Taylor wrote the chair of the ISMS [**20] Committee on Quackery to suggest various meetings, referring to ISMS as "an active partner in the fight to head off chiropractic." The "Policy Manual of the Illinois State Medical Society," May, 1967, included the following statement: "The Judicial Council of the American Medical Association has ruled that it is unethical to associate VOLUNTARILY with an individual who practices as a member of a 'cult.'" (emphasis in original) In 1975, the AMA named Dr. Lees, former chairman of the ISMS Board of Trustees, to the AMA Committee on Quackery. A letter written by an ISMS staff member in 1966, complained to Doyl Taylor about the AMA position on chiropractic, but took no action to dissociate itself from that position.

[*216] III. OPINION

Plaintiffs alleged and undertook to prove that each of the defendants- appellants had done certain things at certain times, with the result that chiropractors' ability to compete with medical doctors for patient fees had been impaired. In their affirmative case, plaintiffs presented themselves and chiropractors generally as serious, unpretentious, governmentally-licensed practitioners in competition with medical doctors only within the narrow band [**21] of health services to which chiropractors limited themselves. Plaintiffs presented evidence intended to prove when and how the defendants came to a decision to trim and eventually perforate chiropractors' sails and when and how they chose and employed the means to that end. This evidence came largely from various officers and employees of the defendant organizations, called adversely, and from documents obtained from defendants' files. There was no way in which it could have been presented without revealing the low opinion of chiropractic entertained by medical doctors generally and the reasons for that opinion as stated from time to time by the medical doctors.

In plaintiffs' view of the Sherman Act, it was irrelevant whether the stated reasons, namely, ethical considerations springing from belief that chiropractic is dangerous quackery, were the true reasons or whether the true reasons were economic. But nothing was to be lost by plaintiffs, so far as the jury was concerned, by innuendo that money and not ethics spurred on the medical doctors.

In mild degree, there was dispute whether particular defendants had done the things plaintiffs alleged; in higher degree, whether [**22] there was competition between chiropractors and medical doctors; and in yet higher degree, whether defendants' conduct had in fact impaired chiropractors' ability to compete.⁷ But in the district court, before and during trial, defendants were insistent that under the Sherman Act, available defenses were that their conduct had been undertaken in the interest of public health, safety, and welfare and that their conduct had been non-commercial. The trial was dominated by defendants' efforts to persuade the jury that they had acted in the good faith belief that chiropractic is dangerous quackery. Evidence intended to show that chiropractic is indeed dangerous quackery was introduced to support the proposition that defendants' belief was genuine.

[**23] The upshot of all this was that much of the trial, and virtually all of the parties' arguments to the jury were a free-for-all between chiropractors and medical doctors, in which the scientific legitimacy of chiropractic was hotly debated and the comparative intensity of the adversaries was explored.

During the pretrial stages and the trial, the able and experienced district judge suffered from the uncertainty which marks the law of boycotts by professionals: specifically, what legal justification, if any, exists for such boycotts when their effect is to restrain competition. From time to time, understandably, he described this core issue as "unique," "new waters," and "close." On the eve of trial, he embraced plaintiffs' contention that it was irrelevant whether defendants' conduct had been undertaken in the interest of public health, safety and welfare (the "public interest defense") and whether that conduct had been non-commercial, and he struck those attempted affirmative defenses. He agreed that a trial on the validity of chiropractic should not be allowed to develop; that it was for legislatures and not defendants to decide whether chiropractic should be [**24] permitted to exist; and that even if defendants could

⁷ In part II, above, we have set forth those facts concerning what defendants actually did and with what effect, that a reasonable jury could have found from the evidence when viewed most favorably to plaintiffs. In all that follows, we will assume that the jury did make such findings. In this manner, the significance of error in the conduct of the trial, if any, can be tested.

prove that their sole motivation was a sincere and well founded belief in the dangers of chiropractic, they could not escape liability for [*217] an otherwise unlawful boycott. But simultaneously he denied a broad motion by plaintiffs, *in limine*, to exclude evidence bearing on public health, safety or welfare. He expressed the opinion that evidence pertaining to defendants' "public interest" beliefs might bear on how to view and weigh evidence that defendants did or did not conspire; that such evidence might be necessary to determine whether a *per se* violation of the Sherman Act had occurred; and, if significant in amount, such evidence might be relevant to rule of reason analysis. He also observed that such evidence would necessarily bear on the nature and availability of the equitable relief plaintiffs were seeking (in addition to money damages). So he decided that defendants' "public interest" evidence should be allowed "if it is shown that such evidence is relevant, probative, and not cumulative." From the moment of their opening statements on through the trial, defendants pressed for the admission of their "public" [**25] "interest" evidence and over repeated objection the district court received it.

Whether the district judge enjoyed discretion to receive or not to receive this evidence is a question we will address in a moment. However, it is obvious that because it was received in such abundance, the significance of the jury instructions and the form of the verdict was sharply enhanced.

Although the verdict form requested by plaintiffs, acquiesced in by defendants, and used by the district court was "special" in the sense that the questions of causation and of the amount of the damages were separated from the other questions, it was general in that question 1 was simply whether each defendant "conspired to restrain trade within the meaning of Section 1 of the Sherman Act" (and question 2, whether each defendant conspired to monopolize or attempted to monopolize within the meaning of Section 2). That is, the liability issue (apart from the question of causation) was not broken down into a series of questions, from the answers to which the judge might have determined the judgment. Thus the district court found it necessary, in a bundle of instructions, to explain to the jury its duty, for example, [**26] first to address whether there had been a *per se* violation and, only if the jury decided that question negatively, then to address whether there had been a violation under the rule of reason.

We commend the use of more precise questions in an antitrust case of this kind.

Once the decision had been made to permit the jury to entertain the *per se* theory, it would surely have been helpful to the jury had the special verdict form embodied a set of fact questions bearing on the *per se* rule and another set bearing on the rule of reason, with a portion of the instructions expressly directed to the *per se* questions, and with an explanation in the verdict form itself that the jury's answers to the *per se* questions would determine whether the jury would be required to answer the rule of reason questions. If so required, the jury could have been told to answer them in the light of another portion of the instructions relating expressly to the rule of reason.

We do not consider it error to have submitted the case in the form of a single all-inclusive question on Section 1 of the Act. But because it was submitted in this manner, we are obliged to examine the instructions [**27] with particular care to determine whether they explained the law not only correctly, but reasonably understandably.

A. *Jury Instructions*

The case presents difficulties, both theoretical and what may be called forensic or rhetorical. It was important that the court's instructions help the jury through both sets of difficulties.

On the theoretical side, the "boycott" which plaintiffs alleged and undertook to prove is surely not within any of the more familiar contexts. However, "boycotts are not a unitary phenomenon." P. Areeda, *Antitrust Analysis* 381 (2d ed. 1974). "In its simplest aspects, HN2[] a boycott . . . is nothing more than an agreement among a number of economic actors to sever or limit [*218] economic relations with another economic actor or actors." Bird, *Sherman Act Limitations on Noncommercial Concurred Refusals to Deal*, 1970 Duke L. J. 247, 248.

Here, the jury was free to find that the services of one medical doctor were interchangeable with the services of other medical doctors; they competed with one another. The services of one chiropractor [**28] were interchangeable with the services of other chiropractors; they competed with one another. The services of a relatively small number of medical doctors were interchangeable with the services of all or nearly all chiropractors; they competed with one another. Superficially at least, the benefits to consumers arising from unrestrained

competition could have been realized without any cooperation between any two medical doctors, between any two chiropractors, between any medical doctor and any chiropractor, or between an enclave of medical doctors and an enclave of chiropractors. The medical doctors, generally, were more than content with the absence of cooperation between two enclaves; the plaintiffs and chiropractors, generally, were not. The chiropractors contend that they would have gained economically had medical doctors referred patients to them, which seems accurate. The chiropractors seem also to contend that they would have gained economically had medical doctors accepted referrals from them, with the professional courtesies of exchanging reports and opinions, so as to permit the chiropractors better to serve their patients; this seems accurate because in the long run [**29] more persons will seek out chiropractors if chiropractic services are perceived to be beneficial. The chiropractors contend that those medical doctors who controlled the defendant medical associations influenced their colleagues to keep the medical doctor enclave intact.

The chiropractors contend that they would have gained economically had there been available to them: hospital facilities, laboratory facilities, X-ray-taking facilities, and the services of radiologists trained in reading X-rays. The chiropractors seem to contend that these facilities and resources were not available to them within their own enclave; that these facilities and resources are to be viewed as standing free of both enclaves; and that it is the members of the medical doctor enclave who caused these otherwise independent facilities and resources to be unavailable to the chiropractors, to the economic disadvantage of the latter.

This is not a case in which it is alleged or shown that the medical doctors, competitors of one another, have combined, for example, to fix the prices they will receive from consumers, and that they have agreed to ostracize or boycott those among them who fail to go along. It [**30] is not a case in which the medical doctors are alleged to have combined to boycott chiropractors in an attempt to coerce the chiropractors to behave in a certain economic manner, such as pricing.

What the antitrust law implications of all this may be for consumers of health care services, as distinguished from chiropractors as a group of health care providers, is difficult to discern. See Marrese v. American Academy of Orthopaedic Surgeons, 706 F.2d 1488, 1495-1496 (7th Cir. 1983). In any event, in the absence of partial or plenary summary judgment or directions of verdict, they are implications which arise from facts which it was for the jury to have found, combined with law which it was for the judge to have explained in the instructions.

On the forensic or rhetorical side, as we have already observed, the opening statements, the evidence, and the closing arguments which the jury had heard and seen must have come through as if the jury was being called upon to decide whether in our society it is the medical doctors who are the heroes and the chiropractors the villains, or vice versa.

It is familiar law that [**31] HN3[] we must look to the instructions as a whole, in a common sense manner, avoiding fastidiousness, inquiring whether the correct message was conveyed to the jury reasonably well. Even if we should discern error in one or more instructions, we will not reverse a judgment -- especially after eight weeks of trial [*219] -- unless we are persuaded the jury's understanding of the issues was seriously affected, to the prejudice of the plaintiffs. See, e.g., Beard v. Mitchell, 604 F.2d 485, 498 (7th Cir. 1979).

We are persuaded that from the evidence, the statements of counsel, and the court's instructions, several basic points must have been well understood by the jury. The jury very likely understood that it was called upon to decide whether each of the defendants had agreed with others that the medical doctors would not refer patients to chiropractors and would not themselves consult or cooperate with chiropractors, and that hospitals and X-ray facilities would be placed off limits to chiropractors. If the jury made this finding, it very likely found as well that the boycotters: acted voluntarily and intended to do these things; intended the natural consequence [**32] that significantly fewer persons would consult chiropractors about certain health problems, such as back and neck pains; and were not displeased by the anticipation of this consequence.

But what this jury needed badly to know was whether "within the meaning of Section 1" it made a difference why the defendants had behaved in this intentional manner with this intended consequence. The jury could certainly have found that defendants had behaved in this manner: (1) because they believed that it would permit them to make

more money than they would make if they did not do it; or (2) because they believed they were performing a public service in applying economic pressure to diminish or eliminate the general threat posed by chiropractic to public health, safety and welfare; or (3) because defendants respected scientific method as the basis for diagnosis and treatment and were unwilling to risk the health and lives of their patients by associating professionally in the care of patients with persons who (so defendants thought) do not share respect for scientific method; or (4) because of some combination of (1), (2) and (3). For brevity and convenience, we will refer to (1) as a money [**33] motive, (2) as a public interest motive, and (3) as a patient care motive.

The jury needed to know whether it should answer the verdict question yes or no if it found that a defendant's motive had been money alone, public interest alone, or patient care alone. It needed to know whether to answer yes or no if it found that a defendant had entertained two or all three motives, and, if so, whether it is legally significant that one motive was more powerful than another.

1. *Per se instructions*

Over defendants' objection, the court granted plaintiffs' request that the jury be permitted to decide whether there had been a *per se* violation of [Section 1](#) and, if not, then to apply the rule of reason in determining whether a violation had occurred. We have sustained a judgment for a plaintiff based upon a verdict by a jury which was permitted to proceed in this manner. [Ohio-Sealy Mattress Mfg. Co. v. Sealy, Inc., 585 F.2d 821, 827 \(7th Cir. 1978\)](#), cert. denied 440 U.S. 930, 59 L. Ed. 2d 486, 99 S. Ct. 1267 (1979). However, [HN4](#)[] before the jury is freed [**34] to find a *per se* violation, the trial court must determine that there is evidence from which the jury may find that the defendants engaged in certain conduct -- for example, a horizontal agreement among competitors to fix prices charged to consumers -- which conduct, the court (not the jury) must decide, constitutes a *per se* violation. In such a case, it must be explained to the jury that its function is to decide whether certain conduct, described with precision in the instruction, did or did not occur. It must be explained, also, that if the jury finds that the described conduct did occur, it must also find, without further factual inquiry, that [section 1](#) was violated. In this important respect, the verdict as to a *per se* violation must be controlled by the court.

We will assume for a moment that in the present case there was evidence of conduct which constituted a *per se* violation of [section 1](#) and, on that assumption, inquire whether the jury was properly instructed as to its function.

The jury was instructed that:

[*220] (1) To establish *per se* unlawfulness, plaintiffs were obliged to show: (a) that defendants entered into "a concerted refusal [**35] to deal, engaged in by the participants primarily or in large part for the purpose of excluding competitors from the market"; and (b) "that the primary motivations for this refusal to deal were essentially commercial or economic in nature."

(2) Not all concerted refusals to deal are group boycotts of the kind the law deems *per se* unlawful. Those "that are of a noncommercial nature or character, ones that do not include among their principal aims the economic purpose of excluding competitors, may be lawful or unlawful depending on their reasonableness."

(3) "If you find that any of the boycott conspiracies which plaintiffs have alleged were entered into to contain or eliminate chiropractors or to injure them in their ability to compete, . . . you may not consider whether the resulting restraint of trade was reasonable or unreasonable. Conspiracies are illegal. However, if you find that the conspiracies existed, but not for the specific purpose of excluding chiropractors from the market or injuring them in their ability to compete, then you must determine whether the agreements imposed an unreasonable restraint on trade." ⁸

⁸ "Conspiracies are illegal" is taken from the reporter's transcript of the instructions as read by the trial judge. It is clear from the joint appendix that the judge intended to say: "The conspiracies are illegal." Whether the error was his or the reporter's, we are sure that the jury understood the reference to be to the kind of conspiracies described in the immediately preceding sentence.

[**36] The third of these instructions, including the use of the word "purpose" rather than "intent," resembles closely an instruction requested by the plaintiffs themselves, but the first and second were inconsistent with plaintiffs' requests.

Still assuming that from the evidence the jury could have distilled conduct on the part of one or more of the defendants which did indeed constitute *per se* violation, the instructions were faulty in two major respects. First, unfairly to the defendants, the instruction failed to describe with sufficient precision the conduct which, if the jury found it to have occurred, constituted a *per se* violation. Second, unfairly to the plaintiffs, the instruction created a strong impression that conduct which would otherwise constitute a *per se* violation escapes that categorization if the "public interest motive" was the "primary" or "principal" motive.

As to the first point, the active role imposed upon the trial judge with respect to the concept of *per se* violations demanded that the jury be instructed that only if it found that a particular defendant had done A, B, C, and D, could it proceed to find that such conduct constituted a [**37] *per se* violation. But the only descriptions provided this jury were "a concerted refusal to deal" and "any of the boycott conspiracies which plaintiffs have alleged." We appreciate that elsewhere in the instructions, the elements of the alleged concerted refusal to deal were described (for example, refusal to refer patients, denial of access to hospitals, closing doors of educational programs). But the *per se* rule is extraordinarily severe and it was necessary for the jury to know whether it became operative only if the jury found that a particular defendant participated in all of the alleged misconduct or if it found participation in some but not all of the alleged misconduct. No guidance was provided in this respect.

As to the second point, taken together and taken in the context of all of the instructions, the jury was plainly led to believe that if the money motive was present but was not "primary" or "principal," even the most classical anti-competitive conduct would not constitute a *per se* violation. The jury may well have found that a generalized public interest motive was dominant with one defendant or another. If so, the jury was required by the [*221] [**38] instructions to withhold the *per se* violation label even from conduct -- comparable to horizontal price-fixing, for example -- to which the label would otherwise clearly attach. This was error. [Arizona v. Maricopa County Medical Soc., 457 U.S. 332, 73 L. Ed. 2d 48, 102 S. Ct. 2466 \(1982\)](#); [National Society of Professional Engineers v. United States, 435 U.S. 679, 55 L. Ed. 2d 637, 98 S. Ct. 1355 \(1978\)](#).

It can fairly be said that the Supreme Court of the United States has been persistent and firm in its support of the *per se* doctrine. Since the trial of the case before us, the Court has pointedly described and endorsed its virtues. [Arizona v. Maricopa County Medical Soc., 457 U.S. at 342-348](#). Also, it is now firmly established that the [HN5](#)[↑] members of learned professions and their professional associations are within the terms of [Section 1](#) of the Sherman Act. [Id. at 348-349](#); [Goldfarb v. Virginia State Bar, 421 U.S. 773, 44 L. Ed. 2d 572, 95 S. Ct. 2004 \(1975\)](#). Nor are the duration and depth of the [**39] judiciary's experience with the health care industry too little to permit application of the *per se* rule to a particular device, such as price-fixing, the anti-competitive effects of which have long been recognized. [Arizona v. Maricopa County Medical Soc., 457 U.S. at 349-351](#). Moreover, as recently as in [Arizona v. Maricopa County Medical Soc.](#), a price-fixing case, the Court quoted approvingly this language from [Northern Pac. R. Co. v. United States, 356 U.S. 1, 5, 2 L. Ed. 2d 545, 78 S. Ct. 514 \(1958\)](#): "Among the practices which the courts have heretofore deemed to be unlawful in and of themselves are price fixing, division of markets, group boycotts, and tying arrangements." [457 U.S. at 344, n. 15](#).

Nevertheless, we conclude that in the present case, the trial court should not have acceded, over defendants' objection, to plaintiffs' request that the jury be afforded the option to find a *per se* violation. It follows that any error in the *per se* instructions which was disadvantageous to plaintiffs was not prejudicial.

We reach this conclusion because we reject the assumption, in which we have indulged for the purpose [**40] of analysis, that facts could have been distilled by the jury from this record which would constitute a *per se* violation, and because the evidence of the "patient care motive" required that rule of reason analysis be applied.

This court has recently recognized in [United States Trotting Ass'n v. Chicago Downs Ass'n, 665 F.2d 781, 787-90 \(7th Cir. 1981\)](#) (*en banc*), "that [HN6](#)[↑] boycotts are illegal *per se* only if used to enforce agreements that are themselves illegal *per se* -- for example price-fixing agreements." [Marrese v. American Academy, 706 F.2d at 1495](#).

As we have observed, one of the peculiarities of the boycott which plaintiffs alleged and undertook to prove was that it was not used to compel either medical doctors or chiropractors to engage in certain economic behavior vis-a-vis consumers, such as price-fixing. The evidence was that the compulsion to be exerted upon medical doctors, hospitals, X-ray facilities, and laboratories through the conspiracy, if the jury found there was such intended compulsion, was to engage in the boycott itself, and [**41] not to exert, through the boycott, compulsion upon any one to do or to refrain from doing anything else. Particularly when a conspiracy of this sort is alleged in the context of a profession, the nature and extent of its anticompetitive effect are too uncertain to be amenable to *per se* treatment, as contrasted with treatment under the rule of reason.

Moreover, assuming the case were otherwise amenable to *per se* treatment, the presence of substantial evidence of motive (3) -- the "patient care" motive -- rendered the case inappropriate for *per se* treatment. In discussing the instructions on the rule of reason, we will comment further on the legal significance of the patient care motive. For the present, we note that in *Goldfarb, 421 U.S. at 788, n. 17, National Society of Professional Engineers v. United States, 435 U.S. at 696 (1978)*, and *Arizona v. Maricopa County Medical Soc., 457 U.S. at 348-349, [*222]* the Court has taken pains to preserve the possibility that a particular practice which could be viewed as a violation of the Sherman Act in another context, should be viewed and treated differently in the [**42] circumstances peculiar to a learned profession. We know from *Professional Engineers* and *Maricopa County* that an agreement to fix prices will not escape *per se* treatment simply because it is entered into by professionals and accompanied by ethical protestations. But a canon of medical ethics purporting, surely not frivolously, to address the importance of scientific method gives rise to questions of sufficient delicacy and novelty at least to escape *per se* treatment.

2. Rule of reason instructions

A famous articulation of the rule of reason appears in *Chicago Board of Trade v. United States, 246 U.S. 231, 238, 62 L. Ed. 683, 38 S. Ct. 242 (1918)*:

The true test of legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition. To determine that question the court must ordinarily consider the facts peculiar to the business to which the restraint is applied; its condition before and after the restraint was imposed; the nature of the restraint and its effect, actual or probable. The history of the restraint, the evil believed [**43] to exist, the reason for adopting the particular remedy, the purpose or end sought to be attained, are all relevant facts. This is not because a good intention will save an otherwise objectionable regulation or the reverse; but because knowledge of intent may help the court to interpret facts and to predict consequences.

In *National Society of Professional Engineers v. United States, 435 U.S. at 691*, referring to *Chicago Board of Trade*, the Court stated that for sixty years it had "adhered to the position that HN7[↑] the inquiry mandated by the Rule of Reason is whether the challenged agreement is one that promotes competition or one that suppresses competition."

Plaintiffs in the present case requested a rule of reason instruction which stated plainly that: the rule focuses directly on the challenged restraint's impact on competition; the question is whether the agreement merely regulates and thereby promotes competition or is such as may injure or suppress or even destroy competition; and a restraint is not illegal if on balance it promotes competition or [**44] has no effect upon competition, but is illegal if on balance it suppresses or injures competition. The trial court declined to give this instruction, and it gave the following instructions on the rule of reason as the jury was to apply it in this case:

One of the factors to be considered in determining whether any agreement in restraint of trade is unreasonable is whether it has or is likely to have unreasonable effects. The law is not concerned with restraints of trade that are not anticompetitive in purpose unless they also have a substantial adverse effect on the marketplace.

One of the factors you should consider in judging reasonableness is the effect of the defendants' practices on competition, if any, that exists between chiropractors generally and medical doctors. You have been instructed

as to the definition of the term "competition" in an antitrust case such as this, and you must keep that definition in mind when considering whether there was any effect on competition.

If you find from the evidence that defendants engaged in activities, meaning direct, private activities, as distinguished from governmental activities, which have had a substantial effect in preventing [*45] chiropractors from offering services which are reasonably interchangeable by consumers for the same purposes as the services offered by medical doctors, that would be an element weighing on the side of unreasonableness. If, on the other hand you find from the evidence that the defendants' activities did not have any substantial effect in preventing chiropractors [*223] from offering such services as licensure permits, that would be an element weighing on the side of the reasonableness of the defendants' activities.

If you find that the conduct complained of on the part of the defendants was not so motivated by economic considerations that it amounted to a per se violation of the antitrust statutes, you then must consider whether the actions of those defendants in agreeing to adopt and enforce certain ethical standards or principles as a means of eliminating or preventing associational activities between chiropractors and medical doctors had the effect of unreasonably restraining the trade of chiropractors.

In this regard, it is a proper function of professional associations to formulate and express principles concerning desirable standards of professional conduct and service. [*46] This is so because such principles may benefit the public by raising professional standards generally, and by helping to insure that the profession merits the trust that the public necessarily places in its members. Such principles also assist members of the profession by giving them guidance as to generally accepted standards of conduct in their profession.

In judging whether a particular professional standard in operation produces an unreasonable restraint of trade, it is necessary to consider the genuineness of the justification advanced in support of the standard, the reasonableness of the standard itself, the manner of its enforcement, and the effects of it on the relevant area of trade or commerce.

The fact that an ethical standard which affects the conduct of one profession, such as medical doctors, may also have an indirect effect on the activities of another profession, such as chiropractors, does not alone mean that it amounts to an unreasonable restraint of trade. Rather, the determination to be made is whether, as a consequence of the operation of that standard, there has been a cognizable adverse effect on the public interest in the sense that the opportunity of [*47] chiropractors to provide services they are licensed to provide and the opportunity of the public to receive those services has been unreasonably impaired or obstructed.

You are further instructed that chiropractors have been given the right by law to carry on their practice and to engage in the treatment of patients, subject to whatever legal limits are placed on their licenses. The question of whether chiropractic poses an impermissible hazard to the health and welfare of the public is one for the Congress and/or the state legislatures to resolve, not the defendants or other private persons or groups. Because those legislative entities alone have the authority to determine whether chiropractors should be permitted to offer their services to the general public, the law will not allow their decision to be overturned.

It is a different question, however, whether members of the medical profession may limit their own relationships with chiropractors for the purpose of practicing their own profession according to standards they consider necessary or desirable for the proper practice of medicine. As I have already instructed you, reasonable ethical principles having that objective [*48] and not aimed at barring the practice of chiropractic within the limits allowed by state licenses may be lawful if they do not, in operation, also have a significant and unnecessarily adverse effect on the chiropractors' ability to carry on their trade. You may, therefore, consider as bearing on the reasonableness of the defendants' purposes what the evidence shows to be the depth and sincerity of their beliefs that the sharing of responsibility by doctors with chiropractors poses substantial hazards to the welfare of patients and the public welfare.

Plainly the instructions as given failed to convey that the single standard is whether the challenged agreement is one that promotes competition or one that suppresses competition.

[*224] It is true, as defendants argue on appeal, that the instructions as given include the following points:

"One of the factors to be considered in determining whether any agreement in restraint of trade is unreasonable is whether it has or is likely to have unreasonable effects One of the factors you should consider in judging reasonableness is the effect of the defendants' practices on competition, if any, that exists between [**49] chiropractors generally and medical doctors." If the jury were to find that defendants' activities had had a substantial effect on the chiropractors' ability to compete, "that would be an element weighing on the side of unreasonableness." The determination to be made is whether "there has been a cognizable adverse effect on the public interest in the sense that the opportunity of chiropractors to provide services they are licensed to provide and the opportunity of the public to receive those services has been unreasonably impaired or obstructed." It is for legislative bodies alone to decide whether chiropractic should be permitted; they have decided that it should; "the law will not allow their decision to be overturned." Even ethical principles limiting the relationships of medical doctors with chiropractors for the purpose of protecting the medical doctors' own profession, and not aimed at barring the practice of chiropractic within the limits licensed by the state, are unlawful if, in operation, they "have a significant and unnecessarily adverse effect on the chiropractors' ability to carry on their trade."

The passages just summarized include every portion of the instructions [**50] which might be thought to approximate an instruction that the single standard is whether the challenged agreement merely regulates and perhaps thereby promotes competition or is such as may suppress or even destroy competition. In a case in which a "public interest motive" has not been made the centerpiece of the defense, an indulgent appellate court might conceivably decide that this portion of the instructions sufficiently approximated the single standard. But surely in the context of the present case, this is not possible. To instruct that "the effect of the defendants' practices on competition" is "one" of the factors in judging reasonableness and that "a substantial effect in preventing chiropractors from offering services" in competition with medical doctors is "an" element weighing on the side of unreasonableness is unmistakably to suggest that the jury was free, even obliged, to weigh factors unrelated to impact on competition. The expression "unnecessarily adverse" can mean only that an adverse effect on competition may be "reasonable," within the meaning of the rule of reason, if there is a necessity for it arising from some value unrelated to free competition.

Any [**51] possibility that the instructions as given sufficiently approximated the single standard of promoting or suppressing competition is dispelled by other portions of the instructions on the rule of reason. After being told of the importance of ethical canons in raising professional standards generally and in insuring that public trust in the members of the profession is merited, the jury was instructed that in judging whether a particular professional standard, in operation, produces an unreasonable restraint of trade, it was "necessary to consider the justification advanced in support of the standard, the reasonableness of the standard itself, the manner of its enforcement," as well as "the effects of it on the relevant area of trade or commerce." Again, the implication is unmistakable: the "reasonableness" of the standard, in terms of values unrelated to free competition (in this case, generally raising the standards of the medical profession and insuring that the public trust in that profession is merited), is a factor which it is "necessary" for the jury to consider in addition to its consideration of the standard's effects on competition.

We appreciate that in the classic exposition [**52] in *Chicago Board of Trade*, it was said that facts relevant to the test of promotion or suppression of competition include: "the history of the restraint, the evil believed to exist, the reason for adopting the [**225] particular remedy, [and] the purpose or end sought to be attained" 246 U.S. at 238. But the Court followed this observation immediately with the statement that "this is not because a good intention will save an otherwise objectionable regulation, . . . but because knowledge of intent may help the court to interpret facts and to predict consequences." *Id.* We understand this to mean that it is effect or consequence which controls, not intent or motive. In ascertaining effect or consequence, it is useful to determine the setting in which the restraint was adopted and the effect or consequence which its instigators anticipated. An anticipated effect on competition may be somewhat more likely to have emerged as the true effect than an unanticipated effect. But in a claim for damages (as contrasted with injunctive relief), the true effect, as it has emerged, is the critical and sole factor.

On this appeal, defendants stoutly insist that [**53] the references in the instructions to the "genuineness" of the justification advanced in support of the standard, the "reasonableness" of the standard itself, and the "depth and

sincerity" of defendants' beliefs about chiropractic, were all clearly subordinated to the inquiry blessed in *Chicago Board of Trade*. That is, as we understand the contention, defendants refrain, on this appeal, from disputing that the effect on competition is the single test. They contend that in determining that effect, it is useful to inquire into what the instigators anticipated the effect on competition would be; inquiry into that anticipation includes inquiry into the instigators' "reason for adopting the particular remedy" and the "purpose or end sought to be attained" by them; inquiry into what their true (as contrasted with pretextual) "reason," "purpose" or "end" may have been, in turn, may be affected by ascertaining their "genuineness," the "depth and sincerity" of their beliefs, and the "reasonableness" of the means they chose.

Conceivably, an instruction which explained this tortuous sequence might pass muster, but the instructions as given fail utterly to explain in understandable language [**54] the severely limited function of the inquiry, sanctioned by *Chicago Board of Trade*, into the reason for adopting the ethical canon and the purpose or end sought to be attained by it.⁹

[**55] In short, the instructions given cannot be defended successfully as an adequate approximation of a rule of reason test geared simply, clearly, and exclusively to the question whether the challenged conduct promoted or suppressed competition between medical doctors and chiropractors. We cannot escape the conclusion that in the district court, defendants flatly resisted the test geared exclusively to effect on competition and sought a modification which affords recognition to values other than those associated with unrestrained competition. The district court acceded to these urgings. From the jury's viewpoint, the result was ambiguity, an uncertain trumpet.

The judgment must be reversed unless: (1) the district court and we are free to modify the rule of reason test in this case involving Principle 3 of the AMA Principles of Medical Ethics; and (2) despite their ambiguity, the instructions adequately expressed the permissible modification, without prejudice to the plaintiffs' proper interests. We hold that the district court and [*226] we are free to modify the rule of reason test in a case involving a certain kind of question of ethics for the medical profession, but that [**56] the instructions as given failed to express a permissible modification and that prejudice to the plaintiffs resulted.

As we have noted, in the course of its relatively recent application of the Sherman Act to the professions, including the medical profession, the Supreme Court has been markedly careful to preserve the courts' freedom to discriminate between nonprofessional and professional activities, in construing and applying the Act. [HN8](#) [↑] "The public service aspect, and other features of the professions, may require that a particular practice, which could properly be viewed as a violation of the Sherman Act in another context, be treated differently . . ." [*Goldfarb v. Virginia State Bar*, 421 U.S. at 787, n. 17](#). "By their nature, professional services may differ significantly from other business services, and, accordingly, the nature of the competition in such services may vary." [*National Society of Professional Engineers v. United States*, 435 U.S. at 696](#). It is true that in *National Society of Professional Engineers*, the theme from *Goldfarb* was [**57] echoed in a context in which the Court was emphasizing the narrow limits of the theme and was making clear that even in the setting of the profession of engineering, even in the face of a possibly accurate contention that the consequence of competitive bidding would be corner-cutting dangerous to the users and consumers of products, "the Rule of Reason does not support a defense based on the assumption that competition itself is unreasonable." *Id.* Moreover, in [*Arizona v. Maricopa County Medical Society*, 457 U.S. 332 \(1982\)](#), the Court held it not only a violation of the rule of reason, but a *per se* violation, for medical doctors to agree upon maximum fees that they might claim in full payment for health services provided to

⁹ Defendants explain that the phrases "genuineness of the defendants' justification" and "reasonableness of the standards themselves" were drawn from [*Feminist Women's Health Center, Inc. v. Mohammad*, 586 F.2d 530 \(5th Cir. 1978\)](#), cert. denied, 444 U.S. 924, 62 L. Ed. 2d 180, 100 S. Ct. 262 (1979). An abortion clinic claimed, among other things, that the defendant medical doctors had conspired to boycott it, and the district court granted defendants' motion for summary judgment. In reversing in part, the court of appeals commented that even if defendants' efforts to enforce professional standards were to be tested by the rule of reason, rather than the *per se* rule, factual issues remained "as to the genuineness of the defendants' justification, the reasonableness of the standards themselves, and the manner of their enforcement." *Id. at 547*. The Fifth Circuit's choice of words in its cryptic dealing with this summary judgment question cannot fairly be accorded the immense significance attributed to it by defendants in the context of the case before us.

policyholders of specified insurance plans, despite the doctors' contention that the agreement facilitated the successful marketing of an insurance plan in which the participating medical doctors had no financial interest and which apparently was beneficial to consumers.

Conscious of the narrowness of the range of the preserved opportunity for differential treatment of professions and nonprofessions under the Sherman Act, we believe that [**58] the considerations reflected in the AMA's Principle 3 fall within that range. In his concurrence in *National Society of Professional Engineers v. United States*, Justice Blackmun regretted the intimations he found in the Court's opinion that any ethical rule with an overall anticompetitive effect promulgated by a professional society is forbidden by the Act. He expressed the view that flexibility should remain, in the professional context, to "take account of benefits other than increased competition" and to recognize "that there may be ethical rules which have a more than de minimis anticompetitive effect and yet are important in a profession's proper ordering." [435 U.S. at 699-700](#).

In the case at hand, evidence of what we have referred to as the "patient care motive" was that when they enter into a doctor-patient relationship with specific persons, medical doctors believe it is essential to bring scientific method to bear upon diagnosis and treatment. There was evidence of their belief that to collaborate with chiropractors in the care of persons who are patients of the medical doctors is to compromise the application of scientific principles, to violate [**59] the oaths taken by the medical doctors, and to introduce risk to the health and lives of the patients for whom the medical doctors have accepted responsibility. Clearly, an individual medical doctor is free to act on this belief by declining to associate with a particular chiropractor in the care of a particular patient. It seems reasonable that two or three medical doctors, sharing this view and working as a team in the care of a particular patient, would be free to agree, and to act on the agreement, to decline to associate with a particular chiropractor in the care of that patient. The Sherman Act problem in the present case arises from the express embodiment of this viewpoint in a formal set of [*227] ethical principles promulgated by a large association of medical doctors, and by the alleged efforts of that association and kindred associations to give effect to the exclusionary attitude in the setting of hospitals staffed by medical doctors.

If it should be determined eventually in this case that the Sherman Act was violated, that determination should not rest on insistence that the Act is indifferent to, or even hostile to, the value of permitting medical doctors to honor [**60] in their practice what they perceive to be scientific method, or indifferent to or hostile to the value of encouragement, from within the profession, to its members to honor scientific method by declining to associate with those thought to dishonor it. A value independent of the values attributed to unrestrained competition must enter the equation. The reasonableness of any resulting restraint on competition must be determined by a reconciliation of values of differing kinds. Because Congress has for so long assigned such pronounced value to freedom of competition and the Supreme Court has for so long applied the rule of reason so as virtually to exclude other values (except, for example, the value of activity protected by the [first amendment](#)), the adaptation of the rule of reason in the Principle 3 setting should impose a heavy burden on those who would justify conduct having significant anticompetitive effect.

The jury should be instructed in appropriate language to the following effect: The burden of persuasion is on the plaintiffs to show that the effect of Principle 3 and the implementing conduct has been to restrict competition rather than to promote it. If the plaintiffs [**61] have met this burden, the burden of persuasion is on the defendants to show: (1) that they genuinely entertained a concern for what they perceive as scientific method in the care of each person with whom they have entered into a doctor-patient relationship; (2) that this concern is objectively reasonable; (3) that this concern has been the dominant motivating factor in defendants' promulgation of Principle 3 and in the conduct intended to implement it; and (4) that this concern for scientific method in patient care could not have been adequately satisfied in a manner less restrictive of competition.

We hold that this requirement does not constitute an affirmative defense which must be pleaded. [Fed.R.Civ.P. 8\(c\)](#). We hold, however, that if plaintiffs meet their burden to show that the effect has been to restrict competition, they make a *prima facie* showing that the restraint has been unreasonable, within the meaning of [Section 1](#) of the Sherman Act. Only if the defendants then meet their burden, as described, does their conduct escape condemnation as unreasonable. We commend the use of a special verdict to permit the jury to understand clearly

the nature and sequence of the questions [**62] it must answer, and where the burden of persuasion lies with respect to each question.

In *Silver v. New York Stock Exchange*, 373 U.S. 341, 10 L. Ed. 2d 389, 83 S. Ct. 1246 (1963), the Court recognized a value in the absence of the use of fraudulent techniques within the New York Stock Exchange and recognized that vindication of this value was the dominant goal of the Exchange. Nevertheless, it found that the means chosen to vindicate the value was not the least restrictive available to achieve substantial vindication. Similarly, in *National Society of Professional Engineers v. United States*, the challenged rule of the Society was "grossly overbroad." [435 U.S. at 699-700](#) (Blackmun, J., concurring).

We appreciate that the last paragraph of that segment of the rule of reason instructions we have quoted above bears resemblance to the adaptation of the rule we have discussed. It refers to limitation of relationships with chiropractors for the purpose of practicing medicine according to standards deemed necessary or desirable; to principles having that objective and not the objective of barring chiropractic within its licensed limits; and to the [**63] absence of "a significant and unnecessarily adverse effect on the chiropractors' ability to carry on their trade." However, if any modification [*228] of the single-test rule of reason (promotion versus suppression of competition) is permissible, the modification must be explained to the jury forthrightly and precisely, and in particular the least restrictive means requirement must be set forth more understandably than by the use of the single word "unnecessarily" in the phrase "significant and unnecessarily adverse effect on the chiropractors' ability to carry on their trade."

There is another important respect in which the instructions were inadequate and prejudicial to plaintiffs: they failed to distinguish sharply enough between the "public interest motive" and the "patient care motive."

The patient care motive could explain nothing more than the refusal by the medical doctors, and the hospitals staffed by medical doctors, to associate with chiropractors in the treatment of patients. It could not explain, for example, defendants' efforts to persuade Congress, state legislatures, and federal and state agencies to enact laws and to promulgate rulings to contain or to eliminate [**64] chiropractic. The motive for this "political" activity, the jury must have found, was either the money motive or the generalized public interest motive, or a combination of the two. We will assume, for the moment, that the jury found the political activity to be entirely protected by the [first amendment](#) (see III A3, *infra*). A critical question for the jury was whether defendants conspired to contain and to eliminate chiropractic generally, not only by waging constitutionally protected political warfare, but by waging economic warfare; that is, by engaging in aspects of the alleged boycott not limited to a refusal to associate in the care of specific patients. If the jury found that defendants had indeed engaged in economic warfare against chiropractic generally, beyond a refusal to associate in the care of specific patients, it was important that the jury understand that a generalized public interest motive affords no legal excuse for such economic warfare.

Since at least as early as 1941 when *Fashion Originators' Guild of America, Inc. v. FTC*, 312 U.S. 457, 85 L. Ed. 949, 61 S. Ct. 703, was decided, it has been clear that [**65] [HNG](#) private persons and entities may not presume to function as "an extra-governmental agency, which prescribes rules for the regulation and restraint of interstate commerce." [Id. at 465](#). It is true that medical doctors are better qualified than most members of the public to form an opinion whether chiropractic poses a threat to public health, safety and welfare. They are free to attempt to persuade legislatures and administrative agencies. But a generalized concern for the health, safety and welfare of members of the public as to whom a medical doctor has assumed no specific professional responsibility, however genuine and well-informed such a concern may be, affords no legal justification for economic measures to diminish competition with some medical doctors by chiropractors.

The jury was instructed that chiropractic was lawful within the limits imposed by Congress and state legislatures; that whether chiropractic poses an impermissible hazard to the health and welfare of the public is for Congress and state legislatures to resolve; and not for the defendants; and that the law will not allow the legislative decision [**66] to be overturned. The jury was then told that it is a different question whether medical doctors may limit their own relationships with chiropractors.

Had the jury been instructed that the sole test under the rule of reason was the effect of defendants' conduct on competition and that the jury must disregard evidence both of defendants' public interest motive and of their patient care motive, plaintiffs would have suffered no prejudice, of course. But when the district court ventured to instruct that defendants' concerns with the perceived threat of chiropractic were relevant to the jury's task, it was essential that a line be drawn sharply and unmistakably between evidence of the public interest motive and evidence of the patient care motive. We conclude that such a line was not drawn with sufficient emphasis and clarity.

[*229] We conclude that the instructions to the jury were prejudicially erroneous in two respects. The overriding question in the case was whether, in applying the rule of reason, the jury was to be allowed to consider any factor whatever beyond the effect of defendants' conduct on competition. The district court elected to permit the jury to go beyond [**67] that single test and to consider the defendants' motives. But it failed to confine that consideration sharply to defendants' patient care motive, as contrasted with their generalized public interest motive. And, with respect to the patient care motive, the court failed to convey clearly and understandably the manner in which the jury was to weigh it, particularly as to the least restrictive means requirement.

The verdict and the judgment cannot stand.

3. First amendment

There was evidence of considerable activity on the part of one or more of the defendants directed to winning or defeating bills in Congress and in state legislatures, and other activity directed to federal and state agencies responsible for administering laws in the health care field.

Plaintiffs assert that two instructions on freedom of speech and association labelled all speech and writing as protected by the Constitution, thus suggesting that defendant AMA's ethical canons could not be a basis for finding a Section 1 violation unless the canons were coercively enforced. The instructions at issue were general descriptions of first amendment rights, merely a part of the court's statements on the relationship [**68] between the first amendment and the Sherman Act. Subsequent instructions limited the general instructions on first amendment rights.

HN10 [↑] The *Noerr-Pennington* doctrine extends protection to businesses and other associations when they join together to petition legislative bodies, administrative agencies, or courts for action that may have anticompetitive effects. *California Motor Transport Co. v. Trucking Unlimited*, 404 U.S. 508, 30 L. Ed. 2d 642, 92 S. Ct. 609 (1972); *United Mine Workers v. Pennington*, 381 U.S. 657, 14 L. Ed. 2d 626, 85 S. Ct. 1585 (1965); *Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc.*, 365 U.S. 127, 5 L. Ed. 2d 464, 81 S. Ct. 523 (1961). In *California Transport*, the Court created the "sham" exception to the doctrine:

"[A] pattern of baseless, repetitive claims may emerge which leads the factfinder to conclude that the administrative and judicial processes have been abused. That may be a difficult line to discern and draw. But once it is drawn, the case is established that abuse [**69] of those processes produced an illegal result, *viz.*, effectively barring respondents from access to the agencies and courts. Insofar as the administrative or judicial processes are involved, actions of that kind cannot acquire immunity by seeking refuge under the umbrella of "political expression."

[404 U.S. at 513](#). See also [Otter Trail Power Co. v. United States](#), 410 U.S. 366, 35 L. Ed. 2d 359, 93 S. Ct. 1022 (1973) (antitrust liability attaches when repetitive lawsuits raising unsubstantial claims evidence goal of suppressing competition). The sham exception exposes fraudulent and illegitimate petitioning activities to Sherman Act prohibitions.

Plaintiffs complain that the court's explanation substantially distorted the *Noerr-Pennington* doctrine and the sham exception by instructing the jury that defendants' advocacy activity directed to legislative and administrative

agencies or bodies was protected if "the defendants undertook such efforts to influence governmental bodies with a sincere purpose to obtain the governmental actions that they sought."

Plaintiffs' contention is without merit. In *Noerr*, the defendants had [**70] conducted a publicity campaign which the plaintiffs claimed was distorted and directed to harming the plaintiffs' public image more than to obtaining legislative action. The Court agreed that the publicity campaign fell "far short of the ethical standards generally approved of in this country." [365 U.S. at 140, 1*230 81 S. Ct. at 531](#). But as long as the defendants "were making a genuine effort to influence legislation," their actions did not violate the Sherman Act. [*Id. at 144*](#). Thus, the trial court's statement in this case properly explained an important aspect of the *Noerr-Pennington* doctrine. See [Federal Prescription Service v. American Pharmaceutical Association, 214 U.S. App. D.C. 76, 663 F.2d 253 \(D.C. Cir. 1981\)](#), cert. denied, 455 U.S. 928, 71 L. Ed. 2d 472, 102 S. Ct. 1293 (1982).

4. Coercive enforcement

Plaintiffs contend the trial court incorrectly instructed the jury that it could not find the requisite agreement unless the ethical canons at issue were coercively enforced.

HN11[] It is not essential [**71] to a conspiracy under the Sherman Act that the conspirators possess or demonstrate their power to carry out their anticompetitive plan. [United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 224, n.59, 84 L. Ed. 1129, 60 S. Ct. 811](#), (1940). In *National Society of Professional Engineers v. United States*, a provision of the society's code of ethics prohibited members from providing price information to potential clients which would permit the latter to make price comparisons among those performing engineering services. The district court found the society had "actively pursued a course of policing adherence to the competitive bid ban through direct and indirect communication with members and prospective clients," and had "engaged in educational campaigns and personal admonitions to members and clients who were suspected of engaging in competitive bidding practices." [United States v. National Society of Professional Engineers, 389 F. Supp. 1193, 1200 \(D.D.C. 1974\)](#). In Supreme Court argument, the society claimed it had never enforced the ban on competitive bidding. The Court deemed the lower court's finding sufficient to fulfill the § 1 agreement [**72] criterion. [435 U.S. at 684, n. 5](#). In *Goldfarb v. Virginia State Bar*, the Court noted the power the state bar association's ethical opinions on minimum-fee schedules exerted over its members:

[The] opinions threatened professional discipline for habitual disregard of fee schedules, and thus attorneys knew their livelihood was in jeopardy if they did so. Even without that threat the opinions would have constituted substantial reason to adhere to the schedules because attorneys could be expected to comply in order to assure that they did not discredit themselves by departing from professional norms, and perhaps betraying their professional oaths.

[421 U.S. at 791, n. 21](#). Thus, **HN12**[] even without coercive enforcement, a court may find that members of an association promulgating guidelines sanctioning conduct in violation of § 1 participated in an agreement to engage in an illegal refusal to deal.

Plaintiffs' complaint is specifically addressed to two instructions as given. One stated in pertinent part:

In considering the first element [**73] [of a group boycott] -- that is, whether there was an agreement to engage in, or to coerce others to engage in, a concerted refusal to deal with chiropractors -- you should consider what the evidence shows to be the manner and extent of enforcement of the ethical standards involved in the case.

The effect of an ethical principle in restraining trade, if there is any such effect, depends upon the extent to which it actually operates to limit the freedom of persons to whom it is addressed. An ethical standard may serve as a guideline, advice or recommendation to medical doctors, leaving them free to evaluate the principle and to make their own decisions as to what constitutes sound ethical practice. On the other hand, such a rule may be regarded by doctors as a binding rule which they are required in all circumstances to follow. You must

determine, therefore, whether the ethical standards in this case operated only as guidelines or whether they were employed to, and/or [*231] had the effect of, controlling the actions of members of the medical profession.

Another instruction given concerned the liability of defendant AHA, and said: "You may not find the AHA liable [**74] for any action taken against the plaintiffs by individual hospitals in this case unless plaintiffs have proven that those hospitals are members of the AHA and that AHA intentionally coerced or induced that action."

The district court refused to instruct the jury that proof of coercive enforcement was not required, as requested by plaintiffs:

There need be no assurances among the conspirators, either oral or in writing, to the effect that they would adhere to the plan. Nor is it necessary that there exist a coercive mechanism by which the conspiracy may be enforced. It is enough that a mutual understanding was reached, and that the defendants in fact conformed to the arrangement.

The instructions as given were unfortunately ambiguous, but they did not state that coercive enforcement was required. One mentioned enforcement, but did not imply that coercive enforcement action was necessary. Another mentioned coercive enforcement only in the disjunctive: "coerced or induced." Although plaintiffs' proposed instruction correctly states the law, the court did instruct the jury that:

What the preponderance of the evidence in the case must show, in order to [**75] establish proof that a conspiracy existed, is that the members in some way or manner, or through some contrivance, positively or tacitly came to a mutual understanding to try to accomplish a common and unlawful plan.

Sufficiently to avoid the necessity of reversal on this ground, this instruction described the nature of the agreement plaintiffs had to prove.¹⁰

5. Apparent authority

Significant evidence bearing on the conspiratorial conduct of JCAH, AHA, and ISMS related to certain employee conduct, which witnesses testified was unauthorized by those organizations. [*236] The district court denied plaintiffs' request for a jury instruction to the effect that an association may be liable for the conduct of employees who have acted with apparent, but not actual, authority. The instruction given stated only that an association is responsible for acts done within the scope of an employee's authority, explaining that the existence of authority may be shown by circumstantial evidence. [American Society of Mechanical Engineers, Inc. v. Hydrolevel Corp., 456 U.S. 556, 72 L. Ed. 2d 330, 102 S. Ct. 1935 \(1982\)](#), decided subsequently to the trial in the case before us, holds flatly that HN13↑ apparent authority is sufficient to support civil antitrust liability on the part of a standard-setting organization. The evidence was sufficient to permit the jury to find that JCAH and AHA -- and ISMS in association with JCAH and AHA -- were standard-setting organizations. The factual record requires us to hold that with respect to defendants JCAH, AHA and ISMS, plaintiffs were prejudiced by the district court's erroneous refusal to instruct the jury on the significance [**77] of apparent authority of employees.

B. Admission of evidence

Even if reversal were not required by reason of error in the jury instructions, we would be obliged to reverse by reason of the ruling receiving in evidence the volume of evidence about the Parker School of Chiropractic and about the plaintiff Bryden's one-time arrangement with a furniture store on the sale of mattresses to Bryden's patients. We would do so with great reluctance, recognizing keenly the difficulties encountered by a trial judge in a trial of this length and complexity. The evidence [*232] was relevant to the genuineness of the defendants' belief that chiropractic is quackery. That is, evidence tending to show that chiropractic is in fact quackery is probative that

¹⁰ Plaintiffs contend, also, that the court failed to instruct on one of their conspiracy theories: namely, that the individual members of each defendant organization conspired among themselves. Although not explicit on the point, the instructions as given (e.g., "plaintiffs . . . have alleged that . . . the defendants and their members have agreed . . .") were sufficient to reveal to the jury that this was one of plaintiffs' theories.

defendants genuinely entertained the belief that it is quackery. But the genuineness of defendants' beliefs on that subject, whatever its proper legal significance in the trial, is a subject that could have been addressed with a less extravagant volume of evidence, and with far less emphasis upon alleged financial greed. The items we have specified created [**78] [HN14](#)[[↑]] such a danger of unfair prejudice and confusion of issues that it was an abuse of discretion not to exclude it under [Fed. R. Evid. 403](#).

C. Unclean hands

Before trial, the district court correctly granted plaintiffs' motion to strike the affirmative defense of unclean hands, thus barring evidence that plaintiffs had themselves violated the antitrust laws. See [Perma Life Mufflers, Inc. v. International Parts Corp.](#), 392 U.S. 134, 139, 20 L. Ed. 2d 982, 88 S. Ct. 1981 (1968), and [Kiefer-Stewart Co. v. Joseph E. Seagram & Sons](#), 340 U.S. 211, 214, 95 L. Ed. 219, 71 S. Ct. 259 (1951). As the cross-examination of plaintiff Bryden was about to commence, plaintiff's counsel moved for an order barring defendants from inquiring of him about an arrangement Bryden had had with a furniture store for a payment to Bryden when, upon his recommendation, a patient purchased a certain type of mattress. The district court denied the motion on the ground that such testimony would be relevant to the genuineness of defendants' belief that chiropractic is quackery.

On cross-examination, Bryden acknowledged that, without the knowledge of his patients, he had had [**79] such an arrangement with the store. Asked by defendants' counsel whether he considered it ethical, Bryden responded: "It is probably as ethical as MDs owning pharmacies . . ." Apparently to lessen the effect of Bryden's remark, examining defense counsel immediately referred, ambiguously, to a version of AMA's Principles of Ethics, already in evidence, and he suggested that it is unethical for medical doctors to own drug stores. From discussion out of the jury's hearing, it developed that such ownership is not unethical, if patients are not exploited.

Controversy developed with respect both to the mattresses and to the physician-owned drug stores, and eventually the court permitted the testimony about the mattresses to stand, instructed the jury to disregard defense counsel's attempt to describe what the AMA Principles say about physician-owned drug stores, and denied plaintiff's motion for a mistrial. In closing argument, defendants referred to Bryden's involvement in the arrangement "whereby in exchange for their endorsement and promotion of the firm's mattresses, the chiropractors would get a rake-off on each one sold." The trial court refused to give plaintiff's proposed [**80] instruction that unclean hands was not a defense in this case.

For reasons set forth in III B, above, we have concluded that plaintiffs were prejudiced by the volume and nature of the evidence which defendants were permitted to present, impugning the validity of chiropractic and the integrity of chiropractors. We believe that this prejudice could not have been overcome by an instruction to the effect that the clean hands defense was unavailable, and so we refrain from comment whether the failure to give such an instruction was error. Viewed in isolation, however, the episode concerning the mattresses and physician-owned drug stores did not require the district court to grant a mistrial.

D. Reopening of Discovery

Plaintiffs sought to reopen discovery to investigate whether some defendants had attempted to prevent unilateral settlements in this case, contending that such attempts could constitute an independent violation of the Sherman Act. Defendants were granted a protective order barring the discovery. The trial court did not abuse its discretion, especially when discovery had continued for nearly four years and trial was imminent.

[*233] E. Involvement [**81] of JCAH, AHA, ACP, ACS and ISMS

The evidence summarized under "Facts" in part II, above, clearly supports findings that there was considerable communication on the subject of chiropractic between the AMA, on the one hand, and, on the other, each of the five organizations which moved for a directed verdict; that this communication revealed acquiescence by all five organizations in the AMA view that chiropractic is quackery and cultism; that JCAH and AHA cooperated to give practical effect to this view by discouraging hospitals from permitting use of their facilities by chiropractors; that by their direct, formal and significant organizational participation in JCAH and by their own activities, ACP and ACS

endeavored both to discourage hospitals from permitting use of their facilities by chiropractors and to discourage medical doctors from professional association with chiropractors; and that by adopting the AMA Principles of Medical Ethics and by embodying the Principles in its own policy manual, ISMS endeavored to discourage medical doctors from professional association with chiropractors. Had a reasonable jury made these findings, as it would have been free to do, the findings [**82] were sufficient to permit, although not to require, a finding that JCAH, AHA, ACP, ACS and ISMS each knew that concerted action in a scheme was contemplated and invited and that each acquiesced and participated in that scheme. Such a finding would have provided sufficient footing for liability in this civil antitrust action. See *Theater Enterprises, Inc. v. Paramount Film Distributing Corp.*, 346 U.S. 537, 540, 98 L. Ed. 273, 74 S. Ct. 257 (1954); *Interstate Circuit, Inc. v. United States*, 306 U.S. 208, 226-227, 83 L. Ed. 610, 59 S. Ct. 467 (1939). The district court did not err in denying the motions for directed verdicts in favor of these five defendants.

F. *The Section 2 Claim*

The plaintiffs' asserted cause of action based on Section 2 of the Sherman Act was somewhat muted at trial and was virtually ignored on this appeal. Because of the rulings we have made on the Section 1 claim, relating to the admission of prejudicial evidence and to the legal significance of apparent authority, we reverse the judgment as to the Section 2 claim. We refrain from expressing an opinion with respect to any other matters as they bear on the Section 1 claim.¹¹

IV. ORDER

The judgment appealed from is reversed and the case is remanded for a new trial.¹¹

End of Document

¹¹ The motion by the Health Care Equalization Committee of the Iowa Chiropractic Society, pursuant to **Federal Rules of Appellate Procedure 27**, for the limited purpose of obtaining access to discovery, is denied.
