Opinion

MEMORANDUM OF OPINION AND ORDER

[Resolving ECF Nos. 26, 27, 28, 29, 30, 31, 32, 33, and 53]

INTRODUCTION

Pending before the Court are motions to dismiss filed by Defendants alleged to have violated various federal and State laws in an effort to take advantage of *Pro se* Plaintiff by means of, behavior that is best described as anti-competitive or other illegal acts. Defendants contend that the Court does not have subject matter jurisdiction over this action and also lacks **[*2]** personal jurisdiction over fourteen of the fifteen Defendants. In addition, Defendants maintain that several of Plaintiff's causes of action fail to state a claim upon which relief can be granted.

Pro se Plaintiff Rohit Prakash applied to register the mark TREAT for "filter-tipped cigarettes" in International Class 34 in the U.S. Patent and Trademark Office ("PTO"). On January 20, 2006, Defendant Charles W. Grimes sent a cease-and-desist letter (ECF No. 26-3 at 5-6) to Dr. Prakash. *See* Amended Complaint (ECF No. 3) at ¶ 38; Declaration of Charles W. Grimes (ECF No. 26-3 at 3). The letter notified Dr. Prakash of the DUTCH TREATS trademark registered on April 21, 1970 in International Class 34 and stated that the mark was owned by Defendant Max Rohr, Inc. and used by Defendant Altadis U.S.A. Inc. in the sale of cigars for over 30 years. ECF No. 26-3 at 5. The letter demanded that **"you immediately phase out the use of** 'TREAT' **as a designation on or in connection with your cigarettes and expressly abandon your trademark application."** ECF No. 26-3 at 6 (emphasis in original). Litigation was threatened if Dr. Prakash did not comply. *Id*. On March 9, 2006, Defendant Charles W. Grimes sent a **[*3]** letter (ECF No. 26-3 at 9) in reply to Dr. Prakash's letter, dated February 17, 2006 (ECF No. 26-3 at 7-8). In response to the cease-and-desist letters, Somya Inc.[1] stopped making and selling herbal cigarettes with the TREAT trademark and, apparently, discontinued making and selling its herbal smokes altogether. *See* Amended Complaint (ECF No. 3) at ¶¶ 41 and 246a.

On February 14, 2006, Defendant Max Rohr, Inc., by and through Defendant Charles W. Grimes, filed in Number 91169175 in the PTO a formal opposition to registration of the mark TREAT for the sale of cigarettes because of the potential for confusion with, or dilution of, the DUTCH TREATS trademark. On March 21, 2006, Dr. Prakash counterclaimed for cancellation of the DUTCH TREATS trademark. On February 16, 2010, as proceedings before the Trademark Trial and Appeal Board neared the trial stage, the matter was suspended at Plaintiff's request pending final determination of the above-entitled action. Trademark Rule 2.117(a).[2]

On **[*4]** January 7, 2010, *Pro se* Plaintiff Rohit Prakash filed a Complaint (ECF No. 1). Eight days later, Plaintiff filed a 76-page, 11-count Amended Complaint (ECF No. 3) containing 325 allegations against the following Defendants: Altadis U.S.A. Inc., Cuban Cigar Brands, N.V., Altadis Holdings U.S.A. Inc., Max Rohr, Inc., Imperial Tobacco Group PLC. Gary R. Ellis, Lewis I. Rothman, Grimes & Battersby, LLP, Charles W. Grimes, Ronald O. Perelman, MacAndrews & Forbes Holdings Inc., Theo W. Folz, 800-JR Cigar, Inc., James L. Colucci, George Gershel, and John Does 1-10. Plaintiff filed the Amended Complaint (ECF No. 3) purportedly for himself and as the purported assignee of non-party Somya Inc. ECF No. 3 at ¶ 19. The Amended Complaint (ECF No. 3) sets forth the following 11 federal and state claims for relief:

> First - Violations of the Racketeer Influenced and Corrupt Organizations Act ("RICO") - Violation of *18 U.S.C. § 1962(a)*, *(b)*, *(c)*, and *(d)*;
>
> Second - Antitrust Violations - Sherman Act (*15 U.S.C. § 1*);
>
> Third - Antitrust Violations - Sherman Act (*15 U.S.C. § 2*);
>
> Fourth - Antitrust Violations - Clayton Act (*15 U.S.C. SS 12-27*);
>
> Fifth - *15 U.S.C. § 1125(a)*(Section 43(a) of the Lanham Act) - False **[*5]** Representation and Source of Origin;
>
> Sixth - *15 U.S.C. $1125(a)*(Section 43(a) of the Lanham Act) - Deceptive Advertising;
>
> Seventh - Cancellation of Registrations *15 U.S.C. $1120* (Section 38 of the Lanham Act);

---

[1] Dr. Prakash's wholly owned corporation that sold herbal non-tobacco cigarettes. ECF No. 3 at ¶¶ 18 and 33.

[2] *See* *http://ttabvue.uspto.gov/ttabvue/v?qt=adv&procstatus=All&pno=91169175&propno=&qs=&propnameop=&propname=&pop=&pn=&pop2=&pn2=&cop=&cn=*

Eighth - Unfair Competition Under State Law;

Ninth - Violation of *Ohio Rev. Code $4165.02*, the Uniform Deceptive Trade Practices Act as adopted in Ohio; Tenth - Interference With Prospective Economic Advantage; and

Eleventh - Derivative Liability Under RICO, Antitrust, Lanham Act, and Aiding and Abetting Under *18 U.S.C. § 2*.[3]

Plaintiff's intent-to-use application for registration of the mark TREAT was allegedly filed on December 15, 2004. ECF No. 3 at ¶ 32. Plaintiff alleges that Somya Inc. is a company that manufactures and sells "herbal, non-tobacco smokes, designed to be alternative smokes and intended to help smokers treat their habit of smoking tobacco." *Id.* at ¶ 33. Somya Inc. allegedly used the mark TREAT exclusively to sell herbal nontobacco smokes, beginning in January 2006. *Id.* at ¶¶ 33 and 42. It is alleged that Plaintiff and Defendants are competitors in the sale of smoking products. *Id.* at ¶ 44.

Plaintiff's central complaint is that Defendants Max Rohr, Inc. and Altadis U.S.A. Inc. objected to the use of the mark TREAT for the sale of cigarettes, and Defendant Max Rohr, Inc, formally objected to the registration of that mark. *See, e.g.*, ECF No. 3 at ¶ 205. Plaintiff also complains about the procurement, use of, and enforcement of the mark DUTCH TREATS, owned by Defendant Max Rohr, Inc., alleging, *inter alia*, that the use of this mark is a fraudulent attempt "to capitalize on the prestige and desirability of authentic Dutch cigars." *See Id.* at ¶¶ 196, 252-253, 261-265, 270-275, and 303. He makes a similar complaint about two other marks for cigars that incorporate the term "Dutch", DUTCH MASTERS and DUTCHIES. *Id*.

Plaintiff alleges that, in connection with seeking to register or record the assignment of the registration for certain trademarks, Defendant Grimes & Battersby, LLP or Defendant Charles W. Grimes committed mail fraud by knowingly and willfully concealing from the PTO certain material facts. *Id.* at ¶¶ 141-199. He characterizes the cease-and-desist letters that Defendant Charles W. Grimes sent as extortion. *See id.* at ¶¶ **[*7]** 205-206. Plaintiff admits, however, that throughout, Individual Defendants[4] "engaged in the alleged unlawful conduct in [a] representative capacit[y]." *Id.* at ¶ 312.

In January 2011, the above-entitled action and the within motions were reassigned from Judge Sara Lioi to the undersigned pursuant to General Order 2011-4.

I.

This action is before the Court upon the Joint Motion of All Defendants to Dismiss Counts 1-6 and 8-11 of the Amended Complaint for Lack of Subject Matter Jurisdiction and Failure to State a Claim, and to Dismiss Count 7 for Lack of Subject Matter Jurisdiction (ECF No. 26), filed on April 7, 2010. The Court has reviewed the memorandum in support (ECF No. 26-1), memoranda in opposition (ECF Nos. 58 and 61),[5] and reply memoranda (ECF Nos. 63 and 65).

---

[3] Plaintiff's "First Amended Pleading" (ECF No. 37) was stricken from the record. **[*6]** *See* Memorandum Opinion and Order (ECF No. 52).

[4] Individual Defendants are Gary R. Ellis, Lewis I. Rothman, Charles W. Grimes, Ronald O. Perelman, Theo W. Folz, James L. Colucci, and George Gershel.

[5] Plaintiff, in both briefs, has, for the most part, presented the Court with a laundry list of cases in a summary fashion and without setting forth any developed analysis or meritorious explanation as to why the Joint Motion of All Defendants should be denied. He also restates **[*8]** a series of allegations from the Amended Complaint (ECF No. 3) in single-spaced blocks of text. *See* ECF No. 61 at 21-27. Additionally, Plaintiff makes statements that are not on point. For example, Plaintiff writes: "Opposing counsels' arguments that all elements of prima facie case against defendants are lacking is thus not supported by law." ECF No. 61 at 17. No such argument regarding the *McDonnell Douglas* elements of a *prima facie* case of discrimination is made in ECF No. 26.

All Defendants move the Court, pursuant to *Fed. R. Civ. P. 12(b)(1)* and *12(b)(6)*, to dismiss Counts 1-6 and 8-11 of the Amended Complaint (ECF No. 3) because Plaintiff has no standing to complain of, or recover for, alleged competitive injury to Somya Inc., and because none of these claims for relief state a claim upon which relief can be **[*9]** granted.

Furthermore, all Defendants move the Court, pursuant to *Fed. R. Civ. P. 12(b)(1)* and *12(b)(6)*, to dismiss those portions of the seventh claim for relief of the Amended Complaint (ECF No. 3) that relate to trademarks other than DUTCH TREATS, as shown on ECF No. 26-2 because Plaintiff has no standing to complain of the registration of those marks, and to dismiss all but Defendant Max Rohr, Inc, from Count 7.

Finally, Defendants move the Court, pursuant to *Fed. R. Civ. P. 12(b)(1)*, to dismiss the balance of the seventh claim for relief of the Amended Complaint (ECF No. 3), namely, the portion that seeks cancellation of the registration of Defendant Max Rohr, Inc.'s mark DUTCH TREATS, for lack of subject matter jurisdiction.

For the reasons set forth in Section X below, Defendants' motion is granted.

II.

This action is also before the Court upon Defendants Ronald 0. Perelman and MacAndrews & Forbes Holdings Inc.'s Motion to Dismiss for Lack of Personal Jurisdiction and Venue, and for Failure to State a Claim (ECF No. 27), filed on April 7, 2010. The Court has reviewed the memoranda in support (ECF Nos. 27-1 and 26-1), memoranda in opposition (ECF Nos. 59, 60, and 61), and reply memoranda **[*10]** (ECF Nos. 63 and 64).

Defendants Ronald Perelman and MacAndrews & Forbes Holdings Inc. move the Court, pursuant to *Fed. R. Civ. P. 12(b)(2)* and *12(b)(3)*, for an order dismissing them for lack of personal jurisdiction and improper venue because they have no connection to Ohio or to the matter of which Plaintiff complains and exercising jurisdiction over them would offend Constitutional notions of fair play and substantial justice.

Furthermore, Defendants Ronald Perelman and MacAndrews & Forbes Holdings Inc. move the Court, pursuant to *Fed. R. Civ. P. 12(b)(6)*, to dismiss the Amended Complaint (ECF No. 3) because it fails to state a claim against them upon which relief can be granted and any such claim is time-barred.

For the reasons set forth in Section XI below, Defendants' Motion is granted.

III.

In addition, this action is before the Court upon Defendant Imperial Tobacco Group PLC's Motion to Dismiss for Lack of Personal Jurisdiction (ECF No. 28), filed on April 7, 2010. The Court has reviewed the memoranda in support (ECF Nos. 28-1 and 26-1), memorandum in opposition (ECF No. 59). and reply memorandum (ECF No. 64).

Defendant Imperial Tobacco Group PLC moves the Court, pursuant to *Fed. R. Civ. P. 12(b)(2)*, **[*11]** for an order dismissing it for lack of personal jurisdiction because it has no connection to Ohio nor does it conduct any business in the United States and exercising jurisdiction over it would offend Constitutional notions of fair play and substantial justice.

For the reasons set forth in Section XII below, Defendant's Motion is granted.

Finally, Plaintiff seeks to rely on the First Amended Pleading (ECF Nos. 53-1 and 2). *See* ECF No. 58 at 11. However, the Court has not yet ruled on his Motion for Leave to File an Amended Pleading in Lieu of Brief in Response to Defendants' Motions Under *Rule 12(b)* (ECF No. 53). Accordingly, the First Amended Pleading (ECF Nos. 52-1 and 2) is not properly before the Court.

IV.

Next, this action is before the Court upon Defendants Gary R. Ellis, Lewis I. Rothman, Theo W. Folz, and James L. Colucci's Motion to Dismiss for Lack of Personal Jurisdiction and Venue, and for Failure to State a Claim (ECF No. 29), filed on April 7, 2010. The Court has reviewed the memoranda in support (ECF Nos. 29-1 and 26-1), memoranda in opposition (ECF Nos. 59, 60, and 61), and reply memoranda (ECF Nos. 63 and 64).

Defendants Gary R. Ellis, Lewis I. Rothman, Theo W. Folz, and James L. Colucci move the Court, pursuant to *Fed. R. Civ. P. 12(b)(2)* and *12(b)(3)*, for an order dismissing them for lack of personal jurisdiction and improper venue because they have no connection to Ohio and exercising jurisdiction over them would offend Constitutional notions of fair play and substantial justice.[6]

Furthermore, Defendants Gary R. Ellis, Lewis I. Rothman, Theo W. Folz, and James L. Colucci move the Court, pursuant to *Fed. R. Civ. P. 12(b)(6)*, to dismiss the Amended Complaint (ECF No. 3) because it fails to state a claim against them upon which relief can be granted.

For the reasons set forth in Section XIII below, Defendants' Motion is granted.

V.

This action is also before the Court upon Defendant George Gershel's Motion to Dismiss for Lack of Personal Jurisdiction and Venue, and for Failure to State a Claim (ECF No. 30), filed on April 7, 2010. The Court has reviewed the memoranda in support (ECF Nos. 30-1 and 26-1), memoranda in opposition (ECF Nos. 59, 60, and 61), and reply memoranda (ECF Nos. 63 and 64).

Defendant George Gershel moves the Court, pursuant to *Fed. R. Civ. P. 12(b)(2)* and *12(b)(3)*, for an order dismissing **[*13]** him for lack of personal jurisdiction and improper venue because his *de minimis* contacts with Ohio are insufficient to establish jurisdiction or venue and exercising jurisdiction over them would offend Constitutional notions of fair play and substantial justice.

Furthermore, Defendant George Gershel moves the Court, pursuant to *Fed. R. Civ. P. 12(b)(6)*, to dismiss the Amended Complaint (ECF No. 3) because it fails to state a claim against him upon which relief can be granted.

For the reasons set forth in Section XIV below, Defendant's Motion is granted.

VI.

In addition, this action is before the Court upon Defendants Cuban Cigar Brands, N.V., Altadis Holdings U.S.A. Inc., and 800-JR Cigar, Inc.'s Motion to Dismiss for Lack of Personal Jurisdiction and Improper Venue (ECF No. 31), filed on April 7, 2010. The Court has reviewed the memoranda in support (ECF Nos. 31-1 and 26-1), memoranda in opposition (ECF Nos. 59 and 60), and reply memorandum (ECF No. 64).

Defendants Cuban Cigar Brands, N.V., Altadis Holdings U.S.A. Inc., and 800-JR Cigar, Inc. move the Court, pursuant to *Fed. R. Civ. P. 12(b)(2)* and *12(b)(3)*, for an order dismissing them for lack of personal jurisdiction and improper venue **[*14]** because they have no connection to Ohio and exercising jurisdiction over them would offend Constitutional notions of fair play and substantial justice.

---

[6] Defendants Gary R. Ellis, Lewis I. Rothman, Theo W. Folz, **[*12]** and James L. Colucci assert that they "must be dismissed from this case with prejudice for lack of personal jurisdiction." ECF No. 29-1 at 12. A similar assertion is made in Defendant George Gershel's motion. *See* ECF No. 30-1 at 14. A dismissal for lack of personal jurisdiction, however, is without prejudice. *Intera Corp. v. Henderson, 428 F.3d 605. 620 (6th Cir. 2005)*.

For the reasons set forth in Section XV below, Defendants' Motion is granted.

VII.

Next, this action is before the Court upon Defendants Grimes & Battersby, LLP and Charles W. Grimes' Motion to Dismiss for Lack of Personal Jurisdiction, Improper Venue, and Failure to State a Claim (ECF No. 32), filed on April 7, 2010. The Court has reviewed the memoranda in support (ECF Nos. 32-1, 26-1, and 29-1), memoranda in opposition (ECF Nos. 59, 60, and 61), and reply memoranda (ECF Nos. 63 and 64).

Defendants Grimes & Battersby, LLP and Charles W. Grimes move the Court, pursuant to *Fed. R. Civ. P. 12(b)(2)* and *12(b)(3)*, for an order dismissing them for lack of personal jurisdiction and improper venue because they have no connection to Ohio, except their efforts to enforce a client's trademark rights, and exercising jurisdiction over them would offend Constitutional notions of fair play and substantial justice.

Furthermore, Defendants Grimes & Battersby, LLP and Charles W. Grimes move the Court, pursuant to *Fed. R. Civ. P. 12(b)(6)*. to dismiss the **[*15]** Amended Complaint (ECF No. 3) because it fails to state a claim against them upon which relief can be granted.

For the reasons set forth in Section XVI below, Defendants' Motion is granted.

VIII.

This action is also before the Court upon Defendant Max Rohr, Inc.'s Motion to Dismiss for Lack of Personal Jurisdiction and Improper Venue (ECF No. 33), filed on April 7, 2010. The Court has reviewed the memoranda in support (ECF No. 33-1 and 26-1). memoranda in opposition (ECF Nos. 59 and 60), and reply memorandum (ECF No. 64).

Defendant Max Rohr, Inc. moves the Court, pursuant to *Fed. R. Civ. P. 12(b)(2)* and *12(b)(3)*, for an order dismissing it for lack of personal jurisdiction and improper venue because it has no connection to Ohio and exercising jurisdiction over it would offend Constitutional notions of fair play and substantial justice.

For the reasons set forth in Section XVII below, Defendant's Motion is granted.

IX.

Finally, this action is before the Court upon Plaintiff's Motion for Leave to File an Amended Pleading in Lieu of Brief in Response to Defendants' Motions Under *Rule 12(b)* (ECF No. 53), filed on July 21, 2010. Plaintiff has attached a copy of the 136-page proposed amended pleading **[*16]** to the motion. *See* The First Amended Pleading (ECF Nos. 53-1 and 2).

On November 2, 2010, the Court entered an Order (ECF No. 57) that advised Plaintiff that the Court intended to rule on his motion to further amend his Amended Complaint (ECF No. 53) at the same time it rules on Defendants' various pending Motions to Dismiss (ECF Nos. 26-33). Plaintiff was, therefore, granted leave to file a response(s) to the pending dispositive motions.

The Court has now reviewed the memorandum in support, memorandum in opposition (ECF No. 54). and reply memorandum (ECF No. 55) regarding Plaintiff's Motion for Leave to File an Amended Pleading. For the reasons set forth in Section XVIII below, Plaintiff's Motion is denied.

X.

The Court can consider the Declarations of Charles W. Grimes (ECF No. 26-3). Russell D. Dize (ECF No. 26-4). and Rohit Prakash (ECF No. 58-1) in deciding the issues presented by the *Fed. R. Civ. P. 12(b)(1)* prong of the Joint Motion of All Defendants to Dismiss Counts 1-6 and 8-11 of the Amended Complaint for Lack of Subject Matter Jurisdiction and Failure to State a Claim, and to Dismiss Count 7 for Lack of Subject Matter Jurisdiction (ECF No. 26). *See* *Land v. Dollar, 330 U.S. 731, 735 n. 4, 67 S. Ct. 1009, 91 L. Ed. 1209 (1947)* **[*17]** (when question of court's jurisdiction is raised, the court may consider evidence, by affidavits or otherwise, which bear upon the facts of jurisdiction); *Rogers v. Stratton Industries, Inc., 798 F.2d 913, 917-18 (6th Cir. 1986)* (quoting *Gordon v. National Youth Work Alliance, 675 F. 2d 356, 362-63, 218 U.S. App. D.C. 337 (D.C. Cir. 1982)* (Robinson, C.J., concurring).

A. As a Pro se Plaintiff, Dr. Prakash Cannot Represent His Corporation in This Court

A non-attorney may not file anything on behalf of a corporation in an action pending in this Court. *See* *Local Rule 83.5*; *In re O'Connor, No. 08-16434, 2009 Bankr. LEXIS 1376, 2009 WL 1616105, at *3-4 (Bankr. N.D. Ohio Feb. 27, 2009)*. A corporation cannot appear in court through an officer of the corporation or an appointed agent not admitted to the practice of law. *Union Savings Assn, v. Home Owners Aid. Inc., 23 Ohio St. 2d 60, 262 N.E.2d 558 (1970)*. *Ohio Rev. Code § 4705.01* prohibits anyone from practicing law or commencing or defending an action "in which the person is not a party concerned ... unless the person has been admitted to the bar by order of the supreme court . . . ."

Somya Inc. is an Ohio corporation for profit[7] and Plaintiff is its sole shareholder and owner. Declaration of Rohit Prakash **[*18]** (ECF No. 58-1) at ¶ 4. Plaintiff is hereby advised that *28 U.S.C. § 1654*, which provides that "parties may plead and conduct their own cases personally or by counsel...," has been uniformly construed to mean that a corporation cannot appear otherwise than through an attorney. *United States v. 9.19 Acres of Land, 416 F.2d 1244. 1245 (6th Cir. 1969)*. The rule of this circuit is that a corporation cannot appear in federal court except through an attorney. *Doherty v. American Motors Corp., 728 F.2d 334. 340 (6th Cir. 1984)*.

Therefore, Counts 1-6 and 8-11, and all claims sounding in unfair competition that belong to Somya Inc., are dismissed because Plaintiff cannot maintain them *pro se* or as the alleged assignee of his corporation for profit.[8] The federal courts have, in cases governed by federal law, disapproved any circumvention of the rule by the procedural device of an assignment of the corporation's claims to the lay individual. *See* *U.S. S.E.C. v. Merklinger, No. 08-CV-13184-DT, 2010 U.S. Dist. LEXIS 52046, 2010 WL 2232224, at *2 (E.D. Mich. May 27, 2010)* (citing *Mercu-Ray Indus., Inc. v. Bristol-Myers Co., 392 F.Supp. 16, 20 (S.D.N.Y.)* **[*19]** (to allow a purported assignee of a corporation's claims to appear *pro se* "would be allowing him to flout a well-established and purposeful public policy by means of a procedural device" where he "chose to accept the advantages of incorporation and must now bear the burdens of that incorporation."), *aff'd*, *508 F.2d 837 (2d Cir. 1974)*).

B. Plaintiff Has Failed to State a Claim Under the RICO Statute Upon Which Relief Can be Granted

Most of the pages and paragraphs of the Amended Complaint (ECF No. 3) are devoted to Count 1, a series of wide-ranging allegations that "defendants" engaged in RICO predicate acts and a RICO conspiracy through the procurement, use and enforcement of 56 trademarks, including 47 alleged to have been obtained in violation of laws prohibiting trade with Cuba, such as H. UPMANN, MONTE CRISTO, and POR LARRANAGA. *See* ECF No. 3 at ¶¶ 45-213.

---

[7] *http://www2.sos.state.oh.us/pls/bsqry/f?p=100:7:673032241987595::NO:7:P7_CHARTE_R_NUM:1510866*

[8] According to Plaintiff, "Somya Inc. had effectively assigned all its legal rights and interests in the subject matter of this civil action to Rohit Prakash in March 2006." ECF No. 58-1 at ¶ 6. But, he provides no proof of the assignment.

Defendants ask the Court to dismiss Count 1 pursuant to *Fed. R. Civ. P. 12(b)(6)* because Plaintiff **[*20]** cannot state a cognizable RICO claim under any theory.

To state a RICO claim that a defendant violated *18 U.S.C. S 1962*, a plaintiff must plead "(1) that the defendant (2) through the commission of two or more acts (3) constituting a 'pattern' (4) of 'racketeering activity' (5) directly or indirectly invests in, or maintains an interest in, or participates in (6) an 'enterprise' (7) the activities of which affect interstate or foreign commerce." *Moss v. Morgan Stanley, Inc., 719 F.2d 5, 17 (2d Cir. 1983)*. As the fifth element suggests, the four subsections of *18 U.S.C. § 1962* require different allegations with respect to the conduct allegedly at issue; *i.e.*, that the defendant "invest" in an enterprise (*§ 1962(a)*); "acquire or maintain" an interest in an enterprise (*§ 1962(b)*); "conduct or participate ... in the conduct" of an enterprise (*§ 1962(d)*); or "conspire" to violate *subsection (a)*, *(b)*, or *(c)* (*§ 1962(d)*). Plaintiff seeks recovery under all four subsections.

Defendants argue that Count 1 fails to state a claim under the RICO statute for several reasons, including a failure adequately to allege a "pattern of racketeering activity," or injury to business and property by reason **[*21]** of a violation of the statute. In response to Defendants' argument, Plaintiff merely states, in conclusory fashion, "RICO Claims - Sufficient Facts Pleaded To State The Claims To Relief Plausible" under the four subsections of *18 U.S.C. S 1962*. He then restates a series of allegations from the Amended Complaint (ECF No. 3) in single-spaced blocks of text without providing pin cites to a specific paragraph or page in the affirmative pleading. *See* ECF No. 61 at 21-24.

C. Plaintiff Lacks Standing Under the RICO Statute

Additionally, Plaintiff lacks standing to bring a RICO claim for wrongs that injured his business, Somya Inc. The alleged "particularized" harm, if any, would be Somya Inc.'s, while any loss of money to Plaintiff as the sole shareholder of Somya Inc. is indirect and does not qualify for Article III standing. *See Frank v. D'Ambrosi., 4 F.3d 1378. 1385 (6th Cir. 1993)* (finding no standing for RICO claims brought by shareholder-employee where the company suffered the alleged injuries). Therefore, Counts 1 and 11 (for "derivative liability") are dismissed.

Finally, Plaintiff asserts, without citing any authority, that Defendants' trademarks may be enjoined from use as part of **[*22]** the "dissolution or reorganization of the enterprise." *See* ECF No. 58 at 27. Dr. Prakash alleged this as part of his "recovery" pursuant to *18 U.S.C. § 1964(a)*. *See* ECF No. 3 at ¶ 328. The Court finds Plaintiff's assertion is moot because Plaintiff does not have standing to assert RICO claims.

D. Counts 2, 3 and 11 Are Dismissed Because Members of a Corporate Family Cannot be Held Liable For Conspiracy Under the Antitrust Laws

Counts 2 and 3 allege a conspiracy "in restraint of trade" among related actors with a unitary purpose, ECF No. 3 at ¶ 222, which cannot be the foundation of an actionable antitrust claim. The seminal case on this topic is *Copperweld v. Independence Tube Corp., 467 U.S. 752, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*, which held that the coordinated acts of a parent, such as Defendant Imperial Tobacco Group PLC, and its wholly owned subsidiaries cannot, in the legal sense contemplated by the Sherman Act, constitute a combination or conspiracy. *Id. at 771*. Joinder of the individual defendants does not rescue Plaintiff's fatally defective antitrust claims. *Id. at 769* ("officers or employees of the same firm do not provide the plurality of actors imperative for a *§ 1* conspiracy"). Neither does adding **[*23]** agents of a company who act within the scope of their agency, like Defendants Grimes & Battersby, LLP and Charles W. Grimes, help Plaintiff state an antitrust conspiracy claim on which relief can be granted. *Nelson Radio & Supply Co. v. Motorola Inc., 200 F.2d 911, 914 (5th Cir. 1952)* (explaining that "[i]t is basic in the law of conspiracy that you must have two persons or entities to have a conspiracy. A corporation cannot conspire with itself any more than a private individual can, and it is the general rule that the acts of the agent are the acts of the corporation").

E. Counts 2-4 and 11 Lack the Specificity Required to State Plausible Antitrust Offenses Under Clearly Established Supreme Court Precedent

Count 2 falls under *§ 1* of the Sherman Act, which prohibits conspiracies "in restraint of trade or commerce among the several States, or with foreign nations." *15 U.S.C. § 1*. Count 3 alleges that "Defendants attempted to monopolize and conspired to monopolize with a specific intent of achieving a monopoly in the trade or commerce in the relevant market for cigars and alternate smokes among the several States in violation of *Section 2* of the Sherman Act, *15 U.S.C. § 2*." ECF No. 3 **[*24]** at ¶ 224. In Count 4, Plaintiff alleges "exclusionary, predatory and anticompetitive acts and strategies" in violation of *15 U.S.C. §§ 12-27*. ECF No. 3 at ¶ 239. Finally, Count 11 asserts that Individual Defendants have "derivative liability" for the corporate defendants' violation of the antitrust laws. ECF No. 3 at 71-72.

Plaintiff's Amended Complaint (ECF No. 3) attempts to establish a Sherman Act violation by alleging an express agreement to restrain trade, and therefore must "'plausibly suggest[ ],' rather than be 'merely consistent with,' an agreement to restrain trade in violation of the Sherman Act." *Watson Carpet & Floor Covering. Inc. v. Mohawk Industries. Inc., 648 F.3d 452, 457 (6th Cir. 2010)* (quoting *In re Travel Agent Com'n Antitrust Litis., 583 F.3d 896. 908 (6th Cir. 2009)*). To survive a motion to dismiss, these allegations must be specific enough to establish the relevant "who, what, where, when, how or why." *Total Benefits Planning Agency, Inc. v. Anthem Blue Cross & Blue Shield, 552 F.3d 430, 437 (6th Cir. 2008)* (internal quotation marks omitted). Furthermore, they must "specify how [each] defendant [was] involved in the alleged conspiracy." *In re Travel Agent Com'n Antitrust Litig., 583 F.3d at 905*.

Plaintiff's **[*25]** allegations in the case at bar fall well short of this pleading threshold. He does not allege a single fact concerning the existence of an actual agreement, when such a purported agreement was entered into, or which of the defendants specifically entered into such an agreement. Even the allegations of the purpose and scope of the supposed conspiracies, *see* ECF No. 3 at ¶¶ 218, 232, and 242, are vague. The Court concludes that Counts 2-4, and 11 will be dismissed because they lack the specificity required to support a claim that the antitrust laws were violated. *See* *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 565 n.10, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (explaining that the plaintiff's failure to allege a "specific time, place, or person involved in the alleged conspiracies" left "no clue as to which of the [defendants] (much less which of their employees) supposedly agreed, or when and where the illicit agreement took place").

F. Plaintiff Lacks Standing to Bring the Antitrust Claims in Counts 2-4 and 11

Additionally, Plaintiff, as the sole shareholder of Somya Inc., lacks standing to bring the antitrust claims in Counts 2-4 and 11. Nor has Plaintiff asserted any consumer injury. Plaintiff asserts that he "has **[*26]** sufficiently alleged this antitrust injury" at 246 of the Amended Complaint (ECF No. 3). ECF No. 58 at 23. But, this allegation does not state how consumers have been injured.

Finally, Plaintiff's reliance on the antitrust laws to assert that the Court can order cancellation of all Defendants' trademarks or enjoin Defendants from their use is unwarranted. The Court also finds Plaintiff's assertion is moot because he does not have standing to bring the antitrust claims.

G. Counts 5 and 6 Are Dismissed as to All Defendants for Failure to State a Claim

The status of Somya Inc. has changed during the pendency of the case at bar. It was alleged in the Amended Complaint (ECF No. 3) that Somya Inc. "used the mark TREAT *exclusively* in production and selling of herbal, non-tobacco smokes" *Id*. at ¶ 33 (emphasis added). Plaintiff now alleges in ECF No. 58 at 19 and ECF No. 58-1 at ¶ 5 that Somya Inc. is the "non-exclusive licensee" of the TREAT trademark. According to Defendants, "this alleged change from exclusive licensee to non-exclusive licensee is an attempt to try to circumvent the right that Somya Inc.

would have as the exclusive licensee to sue under [the] Lanham Act §43(a) for the alleged **[*27]** unfair competition claims, Counts 5 and 6 of the Complaint." ECF No. 65 at 15. *See* *Frisch's Restaurants. Inc. v. Elby's Big Boy of Steubenville, Inc., 670 F.2d 642, 649 (6th Cir. 1982)* (holding that the plaintiff, an exclusive licensee of the mark, had standing to bring a claim under § 43(a)). Whether Somya Inc. is an exclusive or non-exclusive licensee, the Court finds that Plaintiff still lacks standing under Section 43(a) of the Lanham Act, *15 U.S.C. § 1125(a)* because Counts 5 and 6 do not allege how Plaintiff, an individual who is not a competitor of Defendants, himself would be commercially injured.[9]

Counts 5 and 6 of the Amended Complaint (ECF No. 3) are captioned "False Representation and Source of Origin" and "Deceptive Advertising" under Section 43(a). They allege that Defendants have made statements falsely associating their cigars with authentic Dutch or Cuban cigars in an effort to divert customers.

A party must plead and prove the following to recover on a claim for false advertising **[*28]** under Section 43(a) the Lanham Act, *15 U.S.C. S 1125(a)*:

> (1) the defendant has made false or misleading statements of fact concerning his product or another's; (2) the statement actually or tends to deceive a substantial portion of the intended audience; (3) the statement is material in that it will likely influence the deceived consumer's purchasing decisions; (4) the advertisements were introduced into interstate commerce; and (5) there is some causal link between the challenged statements and harm to the plaintiff.

Herman Miller. Inc. v. Palazzetti Imports and Exports. Inc., 270 F.3d 298. 323 (6th Cir. 2001) (citation omitted). Defendants argue that Somya Inc., which is not alleged to be selling a product of authentic Dutch or Cuban origin, has no standing to make the Lanham Act claims set forth in Counts 5 and 6. Plaintiff never actually addresses the substance of Defendants' argument at ECF No. 26-1 at 50-53 in any respect. The Court concludes that Counts 5 and 6 fail to state a claim upon which relief can be granted because the Amended Complaint (ECF No. 3) (1) does not allege facts to support a causal link between the challenged statements and harm to Somya Inc. and (2) does not **[*29]** identify specific false statements or instances in which individual consumers have been misled in their product purchases.

H. To the Extent That Counts 1-4 and 8-11 are Based on the Cease-and-Desist Letters or the Opposition Proceedings before the Trademark Trial and Appeal Board of the PTO, No Liability Attaches Because They Concern Privileged Conduct

Actions taken to protect trademark rights are privileged, and the defendants who take those actions cannot be held liable for them. *Weber v. National Football League, 112 F.Supp. 2d 667. 672-73 (N.D. Ohio 2000)* (legal efforts taken to protect trademark rights do not violate antitrust laws).

Litigation privilege, and its antitrust counterpart, the *Noerr-Pennington* doctrine, immunize Defendants from federal or state liability based on their trademark enforcement efforts. *Noerr-Pennington* immunity[10] requires dismissal of the claims for violation of the Sherman Act and Clayton Act set forth in Counts 2, 3, and 4, to the extent that they are based upon the cease-and-desist letters or the Opposition Proceedings. Furthermore, the Court concludes that the conclusory allegations at ¶¶ 219, 236, and 244 of the Amended Complaint (ECF No. 3) with respect **[*30]** to the "sham litigation" exception to *Noerr-Pennington* immunity are insufficient to survive the *Rule 12(b)(6)* motion. *Mezibov v. Allen, 411 F.3d 712, 716 (6th Cir. 2005)*.

---

[9] Nor does Plaintiff have standing for his state law claims (Counts 8, 9, and 10) and Count 11 to the extent that the "derivative liability" against Individual Defendants is based on the Lanham Act.

[10] *Noerr-Pennington* immunity principles are derived from the holdings of the United States Supreme Court in *Eastern Railroad Presidents Conference v. Noerr Motor Freight. Inc., 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*, and *United Mine Workers v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*.

Similarly, the state law claims in Counts 8-10 are barred by the litigation privilege. Trademark policing activities also cannot form the basis for any of Plaintiffs state law claims. The doctrine of absolute privilege in a judicial proceeding asserts that a statement made during litigation related activities is not actionable where the statement bears "some reasonable relation" to the matters at hand. *Surace v. Wuliger, 25 Ohio St.3d 229. 233, 25 Ohio B. 288, 495 N.E.2d 939 (1986)* (holding that statements in a written pleading are absolutely privileged). The doctrine of absolute privilege extends to communications that occur at "every step in the proceeding, from beginning to end." *M.J. DiCorpo, Inc. v. Sweeney, 69 Ohio St.3d 497. 506, 1994 Ohio 316, 634 N.E.2d 203 (1994)* (citation omitted). Whether this privilege applies in **[*31]** a given case is a question of law for the Court. *Surace, 25 Ohio St.3d at 233*; *Theiss v. Scherer, 396 F.2d. 646. 650 (6th Cir. 1968)*.

The Court holds that the absolute privilege extends to Defendants' statements made in the cease-and-desist letters and during the Opposition Proceedings. *See* *Baldwin v. adidas America. Inc., No. 2:02-cv-00265-JLG-TPK, 2002 U.S. Dist. LEXIS 19626, 2002 WL 2012562, at *3 (S.D. Ohio July 29, 2002)* (applying litigation privilege to statements made in petition for cancellation of trademark before Trademark Trial and Appeal Board).

Nothing in ECF No. 61 at 25-26 changes the Court's conclusion in this regard.

I. Counts 8, 9, and 10 Are Dismissed Because They Suffer From the Same Pleading Deficiencies as Counts 2-6

Counts 8, 9, and 10, which conclusorily allege violations of state unfair competition laws, *see* ECF No. 3 at 305. 308. and 310, suffer from the same pleading deficiencies as the antitrust claims in Counts 2-4 and the Lanham Act claims in Counts 5-6.

A cause of action fails to state a claim upon which relief may be granted when it lacks "plausibility in th[e] complaint." *Twombly, 550 U.S. at 564*. A pleading must contain a "short and plain statement of the claim showing that the pleader **[*32]** is entitled to relief." *Ashcroft v. Iqbal, 556 U.S. 662, 129 S.Ct. 1937, 1949, 173 L. Ed. 2d 868 (2009)* (quoting *Fed. R. Civ. P. 8(a)(2)*). Plaintiff is not required to include detailed factual allegations, but must provide more than "an unadorned, the-defendant-unlawfully-harmed-me accusation." *Id*. A pleading that offers "labels and conclusions" or "a formulaic recitation of the elements of a cause of action will not do." *Twombly, 550 U.S. at 555*. Nor does a complaint suffice if it tenders "naked assertion[s]" devoid of "further factual enhancement." *Id. at 557*. It must contain sufficient factual matter, accepted as true, to "state a claim to relief that is plausible on its face." *Id at 570*. "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Iqbal, 129 S.Ct. at 1949*. The plausibility standard is not akin to a "probability requirement," but it asks for more than a sheer possibility that a defendant has acted unlawfully. *Twombly, 550 U.S. at 556*. Where a complaint pleads facts that are "merely consistent with" a defendant's liability, it "stops short of the line between **[*33]** possibility and plausibility of 'entitlement to relief.'" *Id. at 557* (brackets omitted).

Despite Plaintiff's arguments to the contrary, *see* ECF No. 61 at 26-27, Counts 8, 9, and 10 of the Amended Complaint (ECF No. 3) do not contain allegations reasonably suggesting Plaintiff might have valid claims for unfair competition under state law, violation of *Ohio Rev. Code § 4165.02*, or interference with prospective economic advantage.

In addition, to the extent that Counts 8 and 9 are intended to characterize, as violations of state law, the facts alleged in Counts 5 and 6 as Lanham Act violations, they are subject to dismissal for the same reasons that Counts 5 and 6 fail. Ohio courts recognize that the evaluation of a claim for violation of Ohio's unfair competition laws (Count 8) or of *Ohio Rev. Code § 4165.02*, the Uniform Deceptive Trade Practices Act as adopted in Ohio (Count 9), involves "essentially the same analysis as that applied in assessing unfair competition under the federal statutes." *Cesare v. Work, 36 Ohio App.3d 26, 28, 520 N.E.2d 586 (Ohio Ct. App. 1987)*, citing *Jewel Companies, Inc. v. Westhall Co., 413 F. Supp. 994, 999 (N.D. Ohio 1976)*. *aff'd* *575 F.2d 1176 (1978)*.

J. Count 11

Count 11, **[*34]** which alleges that Individual Defendants have "derivative liability" for violations of RICO, the Sherman Act, and the Lanham Act by their employers, alleges:

1. that Individual Defendants "engaged in the alleged [unspecified] unlawful conduct in [a] representative capacit[y]." ECF No. 3 at ¶ 312.

2. that unspecified but "aforedescribed unlawful activities by corporate defendants arose within the course and scope of the employ and/or agency of the aforementioned individual defendants." ECF No. 3 at ¶ 313.

3. that "[a]ll defendants violated *18 U.S.C. § 2* by seeking to aid and abet and aiding and abetting a scheme to violate *18 U.S.C. §§ 1962(a)*, *(b)*, *(c)* and *(d)* [RICO]; *15 U.S.C. §§ 1*, *2*, *12-27* [antitrust laws]; and *15 U.S.C. § 1125(a)* [Lanham Act]." ECF No. 3 at ¶ 314.

4. that "[a]ll defendants aided and abetted each other," "attempt[ed] to derive substantial income and proceeds through the above-described patterns of racketeering activities" and other alleged violations of law, and intended to invest in and or participate in conducting the affairs of a RICO enterprise. ECF No. 3 at ¶ 315.

Count 11 fails because the underlying claims fail for the reasons set forth above and because there **[*35]** are no allegations that any of Individual Defendants personally participated in the alleged wrongs.

K. Count 7 is Dismissed Because Plaintiff Has No Standing to Seek Cancellation of Any Mark Except Dutch Treats, and This Court Lacks Subject Matter Jurisdiction of That Freestanding Claim

After taking into account Plaintiff's lack of standing to assert Counts 1-6 and 8-11 of the Amended Complaint (ECF No. 3). and the failure of any of these counts to state a claim upon which relief can be granted, only Count 7 remains. Yet, Count 7 too, must be dismissed because this Court lacks subject matter jurisdiction of the claims it asserts. Count 7 seeks the cancellation of the U.S. registration of 56 marks belonging to Defendants Cuban Cigar Brands, N.V. or Max Rohr, Inc. pursuant to Section 38 of the Lanham Act, *15 U.S.C. § 1120*.[11] Those portions of Count 7 concerning marks other than DUTCH TREATS are dismissed because Plaintiff has not pled a "case or controversy" under Article III of the United States Constitution between himself and Defendants Cuban Cigar Brands, N.V. or Max Rohr, Inc. concerning those marks.

Standing has three constitutional elements. A plaintiff seeking to invoke a federal court's jurisdiction must show:

> (1) it has suffered an "injury in fact" that is (a) concrete and particularized and (b) actual or imminent, not conjectural or hypothetical; (2) the injury is fairly traceable to the challenged action of the defendant; and (3) it is likely, as opposed to merely speculative, that the injury will be redressed by a favorable decision.

Friends of the Earth, Inc. v. Laidlaw Envtl. Servs. (TOC), Inc., 528 U.S. 167, 180-81, 120 S. Ct. 693, 145 L. Ed. 2d 610 (2000); accord *Bennett v. Spear, 520 U.S. 154, 167, 117 S. Ct. 1154, 137 L. Ed. 2d 281 (1997)*; *Lujan v. Defenders of Wildlife, 504 U.S. 555, 560-61, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992)*. All three elements are an "irreducible constitutional minimum," and failure to show any one results in a failure to show standing. *Defenders of Wildlife, 504 U.S. at 560*.

It is apparent that Plaintiff has no personal interest in the outcome of the requested cancellations of the marks other than DUTCH TREATS, or a reasonable basis for the belief that he has been or will be damaged by registration of the marks. Plaintiff has not alleged such an "injury in fact" in the Amended **[*37]** Complaint (ECF No. 3). *Bennett,*

[11] 47 allegedly "Cuban" marks; three other "Cuban" marks-ROYAL CUBAN, ROYAL HAVANA **[*36]** and HAVANA SWEETS; four DUTCH MASTERS marks; DUTCHIES; and, DUTCH TREATS.

520 U.S. at 167, citing Defenders of Wildlife, 504 U.S. at 560-61. Moreover, the mark that he seeks to register is TREAT. The word formative "TREAT" does not even appear in 55 of the 56 registrations Plaintiff seeks to cancel. Once these aspects of Count 7 are dismissed, the only claim remaining before the Court is Plaintiff's claim against Defendant Max Rohr, Inc, for the cancellation of the registration of DUTCH TREATS. Even if this claim were not already pending before the PTO, this Court lacks subject matter jurisdiction of a case consisting solely of a claim for cancellation of a mark.

Next, the Court finds Plaintiff does not have standing to petition to cancel 55 of the 56 trademarks under the Lanham Act. Under the Lanham Act, a party "who believes that he is or will be damaged ... by the registration of a mark on the principal register" may petition to cancel the registration under 15 U.S.C. § 1064. For a court to grant cancellation of the registration, the petitioning party must demonstrate that he has standing and that valid grounds for cancellation exist. Cunningham v. Laser Golf Corp., 222 F.3d 943, 945 (Fed. Cir. 2000) ("Standing ... requires **[*38]** only that the party seeking cancellation believe that it is likely to be damaged by the registration."). A party seeking cancellation must satisfy two judicially-created requirements: the petitioner must show (1) a "real interest" in the proceedings and (2) a "reasonable" basis for the belief that the challenged mark has caused or will cause damage. Ritchie v. Simpson, 170 F.3d 1092, 1095 (Fed. Cir. 1999). To show a real interest, the petitioner must "have a direct and personal stake in the outcome" of the cancellation. *Id*. Standing will not be granted to "'mere intermeddlers' who do not raise a real controversy...." *Id*. With regard to the 55 trademarks other than DUTCH TREATS (owned exclusively by Defendant Max Rohr, Inc.), it is clear that Plaintiff has not alleged a "personal stake" or a real commercial interest in their cancellation or any explanation of how these registrations damage him. *Id*.

After this Court has dismissed Counts 1-6 and 8-11 for lack of standing and failure to state a claim, and has dismissed those portions of Count 7 that relate to marks in which Plaintiff has no personal stake or real commercial interest, the only claim would be against Defendant Max Rohr, Inc. **[*39]** and the DUTCH TREATS trademark for cancellation of the registration under the Lanham Act. In this event, this count cannot be the sole basis for federal jurisdiction. *See* Toytrackerz LLC v. Koehler, No. 08-2297-GLR, 2011 U.S. Dist. LEXIS 31316, 2011 WL 3702970, at *4 (D. Kan. March 25, 2011) ("A court is empowered by 15 U.S.C. § 1119 to order the cancellation of a trademark registration when there is some independent basis for federal jurisdiction apart from the cancellation claim."). As stated in Universal Sewing Mach. Co. v. Standard Sewing Equip. Corp., 185 F.Supp. 257, 260 (S.D.N.Y. 1960):

> [The Court does not agree] that an original suit may be instituted by one in the position of the present plaintiff, in the district court for cancellation of another's federal registration where no other basis for jurisdiction is present.... *In our view § 37 assumes a properly instituted and otherwise jurisdictionally supportable action involving a registered mark. That not being the case here, we are without jurisdiction of the subject matter and upon that ground we must dismiss the complaint*. (Emphasis added.)

See also J. Thomas McCarthy, 5 *McCarthy on Trademarks and Unfair Competition* § 30:110 (4th ed.). Therefore, if the **[*40]** only claim remaining in the case at bar following resolution of the within Joint Motion to Dismiss against Plaintiff is one for cancellation of the federal trademark registration of DUTCH TREATS, that claim must be dismissed.[12]

Finally, absent an independent basis for federal jurisdiction, Plaintiff must first exhaust his administrative remedies before resorting to the courts. The dismissal of Plaintiff's claim for cancellation of the registration of DUTCH TREATS leaves Plaintiff to litigate that claim where he first filed it, before the Trademark Trial and Appeal Board in the PTO. Universal Sewing Mack Co., 185 F.Supp. at 259-60; *see also* Merrick v. Sharp & Dohme, Inc., 185 F.2d 713, 717 (7th Cir. 1950) (noting that "[t]he courts of the United States have no jurisdiction over registration proceedings except that appellate jurisdiction given them by the Trade-Mark Act").

---

[12] Plaintiff's only argument in opposition is merely to recite the language of 15 U.S.C. S 1119. *See* ECF No. 58 at 28.

To the extent that Plaintiff's claim for cancellation of the U.S. registration of the marks in Count 7 is akin to a claim for declaratory judgment, it is recognized that a declaratory judgment claim too **[*41]** should not be used to preempt agency action. As the Supreme Court stated:

> [T]he declaratory judgment procedure will not be used to pre-empt and prejudge issues that are committed for initial decision to an administrative body or special tribunal.... Responsibility for effective functioning of the administrative process cannot be thus transferred from the bodies in which Congress has placed it to the courts.

Public Service Comm'n v. Wycoff Co., 344 U.S. 237, 246-47, 73 S. Ct. 236, 97 L. Ed. 291 (1952). *See also* J. Thomas McCarthy, 6 *McCarthy on Trademarks and Unfair Competition* § 32:53 (4th ed.) ("an applicant whose mark is opposed before the Trademark Board, or a registrant whose mark is attacked for cancellation before the Trademark Board, cannot short-circuit the administrative process by filing suit for declaratory judgment in the federal courts."). The parties may now resume their trademark Opposition Proceeding before the Trademark Trial and Appeal Board of the PTO.

XI.

Plaintiff bears the burden of setting forth a *prima facie* showing of personal jurisdiction over a defendant. *Theunissen v. Matthews, 935 F.2d 1454, 1458 (6th Cir. 1991)*; *Hitachi Medical Systems America, Inc. v. Branch, No. 5:09CV1575, 2010 U.S. Dist. LEXIS 19405, 2010 WL 816344, at *2 (N.D. Ohio March 4, 2010)*. **[*42]** A plaintiff, seeking to hail a foreign defendant into a distant forum, bears an initial burden of pleading jurisdiction. "He must allege in his pleading the facts essential to show jurisdiction. If he fails to make the necessary allegations he has no standing." *McNutt v. General Motors, 298 U.S. 178, 189, 56 S. Ct. 780, 80 L. Ed. 1135 (1936)*.

The Court may consider all documents attached to the Amended Complaint (ECF No. 3). or referred to and relied upon by it, without converting a motion to dismiss to one for summary judgment. *Mengel Co. v. Nashville Paper Prods. & Specialty Workers Union, 221 F.2d 644, 647 (6th Cir. 1955)*.

More than 13 years ago, Defendant MacAndrews & Forbes Holdings Inc. had an interest in Consolidated Cigar Corporation. Plaintiff alleges that Defendant Ronald O. Perelman owns Defendant MacAndrews & Forbes Holdings Inc. and that MacAndrews & Forbes owned Consolidated Cigar Corporation during two different time periods, the last ending in January 1999. ECF No. 3 at ¶¶ 26 and 27. Consolidated Cigar Corporation was allegedly the parent of Defendants Max Rohr, Inc. and Cuban Cigar Brands, N.V. *Id*. at ¶ 65. In January 1999, however, Defendant MacAndrews & Forbes Holdings **[*43]** Inc. sold Consolidated Cigar Corporation to Société Nationale D'Exploitation Industrielle des Tabacs et Allumettes ("SEITA"). *Id*. at ¶ 26; Declaration of Steven Fasman (ECF No. 27-3) at ¶ 4. Consolidated Cigar Corporation was allegedly the predecessor of Defendant Altadis U.S.A. Inc. ECF No. 3 at ¶ 26. The Amended Complaint (ECF No. 3) alleges that Defendant MacAndrews & Forbes Holdings Inc. is the "successor" in interest to Consolidated Cigar Corporation and, therefore, is subject to "RICO successorship liability." *Id*. at ¶ 66.

Neither Defendant Ronald O. Perelman nor Defendant MacAndrews & Forbes Holdings Inc. has any Ohio contacts on which personal jurisdiction can be based. Defendant Ronald 0. Perelman, who is the Chairman and Chief Executive Officer of Defendant MacAndrews & Forbes Holdings Inc., is a New York resident. Declaration of Ronald O. Perelman (ECF No. 27-2) at ¶¶ 1-2. Defendant MacAndrews & Forbes Holdings Inc. is a holding company, incorporated in Delaware, with its offices in New York. ECF No. 27-3 at ¶¶ 2-3. Defendants Ronald 0. Perelman and MacAndrews & Forbes Holdings Inc. do not have, and have never had, any offices or places of business in the state of Ohio, nor **[*44]** have they ever stationed any employees, sales representatives, or agents in the state of Ohio. ECF No. 27-2 at ¶¶ 5, 9, and 11-12; ECF No. 27-3 at ¶¶ 9-12. Furthermore, neither has entered into a contract in the state of Ohio, sold goods or services in the state of Ohio, or derived substantial revenue from goods consumed in the state of Ohio. ECF No. 27-2 at ¶¶ 6-8 and 14-15; ECF No. 27-3 at ¶¶ 5-8 and 12. As a holding company, Defendant MacAndrews & Forbes does not derive operational revenues as a result of any contacts in Ohio. ECF No. 27-3 at ¶ 12.

Since 1999, neither Defendant Ronald O. Perelman nor Defendant MacAndrews & Forbes Holdings Inc. has had any interest in any business that sells tobacco products, or any connection to Defendant Imperial Tobacco Group PLC, or any of its subsidiaries, their employees or the agents sued in this case. *See* ECF No. 27-2 at ¶ 4; ECF No. 27-3 at ¶ 4.

A. This Court Lacks Personal Jurisdiction Over Defendants Ronald O. Perelman and MacAndrews & Forbes Holdings Inc.

Defendants Ronald O. Perelman and MacAndrews & Forbes Holdings Inc. argue that Plaintiff has failed to meet his *prima facie* burden of showing personal jurisdiction because there are no **[*45]** allegations in the Amended Complaint (ECF No. 3) that support personal jurisdiction over them. Assuming *arguendo* that the Amended Complaint (ECF No. 3) does include such allegations, a federal court may exercise personal jurisdiction over defendants outside the forum state only pursuant to an applicable federal statute that provides for service of process outside this state or Ohio's long-arm statute, *Ohio Rev. Code Ann. S 2307.382*. *Robert J. Kwait & Assocs. v. Health-Mark Diagnostics, L.L.C., No. 1:97-CV-512, 1998 U.S. Dist. LEXIS 22880, at *4-5 (N.D. Ohio Feb. 23, 1998)*. Nationwide service of process may be effected in a civil RICO action pursuant to *18 U.S.C. § 1965(b)* and *(d)*. Worldwide service of process may be effected in an antitrust case pursuant to the Clayton Act.[13] According to Defendants Ronald O. Perelman and MacAndrews & Forbes Holdings Inc., neither has any contacts with Ohio sufficient to support personal jurisdiction under any federal statute that Plaintiff invokes or under the Ohio long-arm statute. Finally, even if these statutory tests could be met, the *Fourteenth Amendment* must still be satisfied, and in the case at bar, Defendants Ronald O. Perelman and MacAndrews **[*46]** & Forbes Holdings Inc. contend that neither has the minimum contacts with Ohio that would allow a suit to be brought here.

1. The RICO Statute Cannot be Used to Establish Personal Jurisdiction Over Defendants Ronald O. Perelman and MacAndrews & Forbes Holdings Inc. Because Plaintiffs RICO Allegations Fail to State a Justiciable Claim

Whether a plaintiff can rely on the nationwide service provisions of a federal statute "[d]epends upon whether [he] has adequately stated a claim" for a violation of that statute. *United Liberty Life Ins. Co. v. Ryan, 985 F.2d 1320, 1330 (6th Cir. 1993)*; *accord* *Med. Mut. of Ohio v. deSoto, 245 F.3d 561, 566-68 (6th Cir. 2001)* (concluding that the federal statute providing for nationwide service of process requires a determination only that a party has contacts with the United States, not a particular state, for personal jurisdiction). **[*47]** As detailed in Section X, Part B, Plaintiff has failed to state a RICO claim on which relief can be granted. For that reason, he cannot utilize RICO's nationwide service provision to secure personal jurisdiction over Defendants Ronald O. Perelman and MacAndrews & Forbes Holdings Inc. *See, e.g.*, *Williams v. D. Richey Management Corp., No. 87 C 6398, 1988 U.S. Dist. LEXIS 988, 1988 WL 8983, at *2 (N.D.Ill. Jan. 28, 1988)* (declining to assert personal jurisdiction pursuant to nationwide-service provision of RICO where "plaintiff's RICO allegations fail[ed] to state a claim upon which relief may be granted").

2. Plaintiff Cannot Establish Personal Jurisdiction Over Defendants Ronald O. Perelman and MacAndrews & Forbes Holdings Inc. Under the Antitrust Laws

As discussed in Section X, Parts D and E, Plaintiff has failed to state an antitrust claim on which relief can be granted. Furthermore, none of the provisions of the Clayton Act that Plaintiff invokes-*15 U.S.C. § 5*, *15 U.S.C. § 15*, *15 U.S.C. § 22*, and *15 U.S.C. § 24*-establish personal jurisdiction over either Defendant Ronald 0. Perelman or

---

[13] The Clayton Act contains a provision that authorizes service of process on a corporate defendant in any judicial district in which the defendant may be found, *15 U.S.C.A. § 22*, but that section contains no provision authorizing service on individual defendants. *Brink's Mat Ltd. v. Diamond, 906 F.2d 1519. 1522 (11th Cir. 1990)*.

Defendant MacAndrews & Forbes Holdings Inc. *15 U.S.C. § 5* applies only to claims brought by the United States. *Georgia v. Pennsylvania Railroad, 324 U.S. 439. 466-467, 65 S. Ct. 716, 89 L. Ed. 1051 (1945)*. **[*48]** Because Plaintiff did not and cannot allege that Defendant Ronald O. Perelman or Defendant MacAndrews & Forbes Holdings Inc. have the connection to Ohio required for proper venue under *15 U.S.C. § 15*, they cannot be compelled to litigate in the Northern District of Ohio and must be dismissed for improper venue. *See Braun v. Berenson, 432 F.2d 538, 544 (5th Cir. 1970)*; *Redmond v. Atl. Coast Football League, 359 F. Supp. 666, 671 (S.D. Ind. 1973)*, *aff'd* 478 F.2d 1405 (7th Cir. 1973). *See also Pocahontas Supreme Coal Co., Inc., v. National Mines Corp., 90 F.R.D. 67, 69-70 (S.D.N.Y. 1981)* (holding that the individual defendant did not reside in New York because he was a Kentucky resident). Notwithstanding the provisions of *15 U.S.C. § 22*,[14] Defendant MacAndrews & Forbes Holdings Inc. cannot be sued in Ohio because it cannot be found in Ohio. There is no allegation in the Amended Complaint (ECF No. 3) that Defendant MacAndrews & Forbes Holdings Inc. did anything in Ohio, and Defendant MacAndrews & Forbes Holdings Inc.'s assertion that it cannot be found in Ohio is not refuted. Therefore, the venue provision is not satisfied. Finally, *15 U.S.C. § 24* cannot provide personal jurisdiction because **[*49]** Defendant Ronald O. Perelman does not have minimum contacts with Ohio. Sullivan v. Tagliabue, *785 F. Supp. 1076, 1082 (D.R.I. 1992)*. Neither the theory of general jurisdiction, *Schultz v. Szott, No. 3:08CV2718, 2009 U.S. Dist. LEXIS 66627, 2009 WL 2392912, at *8 (N.D. Ohio July 31, 2009)*, or specific jurisdiction, *Reynolds v. Int'l Amateur Athletic Fed'n, 23 F.3d 1110, 1116 (6th Cir. 1994)*, supports a claim for personal jurisdiction over him. *See* Section XTV, Part B(3) and (4), *infra*.

3. Plaintiff Cannot Satisfy the Ohio Long-Arm Statute for His Lanham Act and State Law Claims

Unlike RICO **[*50]** and the antitrust laws, the Lanham Act does not have a provision that permits service of process outside the forum state. To establish personal jurisdiction of an out-of-state defendant for a Lanham Act claim, a plaintiff must rely on the long-arm statute of the forum state. *See generally 15 U.S.C. §§ 1051-1141*. "When considering whether to exercise jurisdiction over a non-resident defendant in a diversity case, or in a case where federal subject matter jurisdiction exists but the federal statute does not provide for service of process, a federal court must apply the law of the forum state in which it sits." *Robert J. Kwait & Assocs., 1998 U.S. Dist. LEXIS 22880, at *4-5*.

A federal district court may exercise personal jurisdiction only if the requirements of both the state long-arm statute and constitutional due process are met. *See Calphalon Corp. v. Rowlette, 228 F.3d 718, 721 (6th Cir. 2000)*; *Reynolds, 23 F.3d at 1115*. *See also Goldstein v. Christiansen, 70 Ohio St.3d 232, 235, 1994 Ohio 229, 638 N.E.2d 541 (1994)* ("When determining whether a state court has personal jurisdiction over a nonresident defendant, the court is obligated to (1) determine whether the state's 'long-arm' statute and the applicable Civil **[*51]** Rule confer personal jurisdiction, and if so, (2) whether granting jurisdiction under the statute and rule would deprive the defendant of the right to due process of law pursuant to the *Fourteenth Amendment to the United States Constitution*."). Neither is true in the case at bar. The provisions of the Ohio long-arm statute that Plaintiff invokes-*Ohio Rev. Code S 2307.382(A)(3)* and *(7)*[15]-do not support the assertion of personal jurisdiction over Defendant

---

[14] *15 U.S.C. § 22* provides:

> Any suit, action, or proceeding *under the antitrust laws* against a corporation may be brought not only in the judicial district whereof it is an inhabitant, but also in any district wherein it may be found or transacts business; and all process in such cases may be served in the district of which it is an inhabitant, or wherever it may be found (emphasis added).

Although this statute provides for nationwide service of process, "proper venue is still required in order to confer personal jurisdiction." *Hyland v. Homeservices of America, Inc., No. 3:05 CV 612 R, 2007 U.S. Dist. LEXIS 47502, 2007 WL 1959158, at *3 (W.D.Ky. June 28, 2007)*.

[15] Ohio courts are deemed to have personal jurisdiction over a person "as to a cause of action arising from the person's ... [c]ausing tortious injury by an act or omission in" Ohio or from the person's "[c]ausing tortious injury to any person by a criminal act, any element of which takes place in [Ohio], which he commits or in the commission of which he is guilty of complicity."

Ronald O. Perelman, a New York resident, or Defendant MacAndrews & Forbes Holdings Inc., a Delaware corporation. These claims must be dismissed because Plaintiff cannot meet his burden to establish such jurisdiction. *Nationwide Mut'l Ins. Co. v. Tryg Int'l Ins. Co., Ltd., 91 F.3d 790. 793 (6th Cir. 1996)*. Moreover, the "absent co-conspirator" doctrine alleged at ¶ 13 of the Amended Complaint (ECF No. 3) is not recognized as a means for establishing personal jurisdiction in this district. *See* *Hollar v. Philip Morris. Inc., 43 F. Supp.2d 794. 802 n.7 (N.D. Ohio 1998)* ("Since personal jurisdiction must be based on the actions and contacts of the specific defendant at issue, the Court declines to apply the so called 'conspiracy theory **[*52]** of jurisdiction' in which the contacts of a defendant's co-conspirators with the forum state are attributed to the defendant in order to supply the minimum contacts necessary for personal jurisdiction.") (citation omitted).

4. Plaintiff Cannot Satisfy the Fourteenth Amendment Due Process Requirements

Fourteenth Amendment due process requirements are met when *in personam* jurisdiction is asserted over a nonresident defendant that has "certain minimum contacts with [the forum] such that the maintenance of the suit does not offend 'traditional notions of fair play and substantial justice.'" *International Shoe Co. v. Washington, 326 U.S. 310, 316, 66 S. Ct. 154, 90 L. Ed. 95 (1945)* **[*53]** (quoting *Milliken v. Meyer, 311 U.S. 457, 463, 61 S. Ct. 339, 85 L. Ed. 278 (1940)*. Because neither Defendant Ronald 0. Perelman nor Defendant MacAndrews & Forbes Holdings Inc. have-or are alleged to have-such contacts, whether related to Plaintiff's claims or otherwise, they lack the minimum contacts that would permit this Court constitutionally to exercise personal jurisdiction over either of them.

5. The Alleged Inapplicability of the "Fiduciary Shield Doctrine" Does Not Confer Personal Jurisdiction Over Defendants

Defendant Ronald O. Perelman is mentioned by name only once in ECF No. 59 and not at all in ECF Nos. 60 and 61, Plaintiff's memoranda in opposition. Furthermore, Defendant MacAndrews & Forbes Holdings Inc. is not mentioned by name at all in ECF Nos. 59, 60, and 61.

Plaintiff argues that the "Fiduciary Shield Doctrine" is inapplicable in this Circuit and therefore, this Court has personal jurisdiction over all of Individual Defendants (including Defendant Ronald O. Perelman) and Defendant Grimes & Battersby, LLP. *See* ECF No. 59 at 21-24. Plaintiff appears to argue that the "individual defendants (i.e., Folz, Gershel, Colucci, Ellis, Perelman, Grimes and Rothman,) and GB (Grimes & Battersby LLC)" cannot **[*54]** use the corporate form of the other defendants to shield them from liability. In other words, Individual Defendants are not shielded from liability simply because their acts were undertaken in an official rather than a personal capacity.

However, the Sixth Circuit has specifically recognized that "jurisdiction over the individual officers of a corporation cannot be predicated *merely* upon jurisdiction over the corporation." *Weller v. Cromwell Oil Co., 504 F.2d 927, 929 (6th Cir. 1974)* (emphasis added). In *Balance Dynamics Corp. v. Schmitt Indus. Inc*., the Sixth Circuit clarified the fiduciary shield doctrine by expressing agreement with courts that exercised personal jurisdiction over corporate officers where the officers were personal, active participants in allegedly tortious or violative conduct. *204 F.3d 683, 697-98 (6th Cir. 2000)* (citing *Chattanooga Corp. v. Klingler, 704 F.2d 903, 906-907 (6th Cir. 1983)*; *Serras v. First Tennessee Bank N.A., 875 F.2d 1212, 1217 (6th Cir. 1989)*). In other words, just because there may be personal jurisdiction over a corporation does not necessarily mean that there is personal jurisdiction over its officers and employees.

In the case at bar, Plaintiff **[*55]** has not sufficiently pled how Individual Defendants or Defendant Grimes & Battersby, LLP were primary participants in any alleged wrongdoing. Plaintiff states that "[t]heir intentional

---

Plaintiff merely recites the language from *§ 2307.382(A)(7)* in ¶ 15 of the Amended Complaint (ECF No. 3). rather than allege specific facts concerning any alleged criminal act or element thereof that took place in Ohio.

participation in violations is alleged in AC ¶¶ 311-314." ECF No. 59 at 22. The Court agrees with Defendants that those allegations comprise nothing more than conclusory statements that "Defendants" (collectively) violated certain federal statutes, without explaining specifically what acts an individual defendant committed. *See* ECF No. 64 at 13-14. Therefore, this is not a case wherein Individual Defendants seek to be shielded from liability by the corporate form with regard to acts they committed in their official capacities. Instead, there is no credible allegation that Individual Defendants and Defendant Grimes & Battersby, LLP committed any wrongful acts in the first place. There is simply no believable allegation that Defendant Ronald O. Perelman or any of the other Individual Defendants engaged in any wrongdoing whatsoever.

B. The Amended Complaint (ECF No. 3) Fails to State a Claim Against Defendants Ronald O. Perelman and MacAndrews & Forbes Holdings Inc. Upon Which Relief Can be Granted

As stated **[*56]** in Section X, Part I, a cause of action fails to state a claim upon which relief may be granted when it lacks "plausibility in th[e] complaint." *Twombly, 550 U.S. at 564*. A pleading must contain a "short and plain statement of the claim showing that the pleader is entitled to relief." Iqbal, *129 S.Ct. at 1949* (quoting *Fed. R. Civ. P. 8(a)(2)*). The factual allegations in the pleading must be sufficient to raise the right to relief above the speculative level on the assumption that all the allegations in the complaint are true. *Twombly, 550 U.S. at 555*. Plaintiff is not required to include detailed factual allegations, but must provide more than "an unadorned, the-defendant-unlawfully-harmed-me accusation." *Iqbal, 129 S.Ct. at 1949*. A pleading that offers legal conclusions or a simple recitation of the elements of a cause of action will not meet this pleading standard. *Id*. In reviewing a complaint, the Court must construe the pleading in the light most favorable to the plaintiff. *Bibbo v. Dean Witter Reynolds, Inc., 151 F.3d 559, 561 (6th Cir. 1998)*.

1. Plaintiff's Claims Against Defendants Ronald O. Perelman and MacAndrews & Forbes Holdings Inc. Fail Because He Has Alleged No Relevant [*57] Conduct or Breach of Duty on the Part of Either Defendant

In Plaintiff's Amended Complaint (ECF No. 31. there are no allegations of conduct by Defendants Ronald O. Perelman or MacAndrews & Forbes Holdings Inc. that violated any legal duty to Plaintiff or that injured him. The only four allegations about Defendants Ronald O. Perelman or MacAndrews & Forbes Holdings Inc. allege Perelman's ownership of MacAndrews & Forbes, its sale of Consolidated Cigar Corporation to SEITA in January 1999, and implausibly, that Defendant MacAndrews & Forbes Holdings Inc. is the "successor" in interest to Consolidated Cigar. ECF No. 3 at ¶¶ 26, 27, and 66.

2. Plaintiffs Claims Against Defendants Ronald O. Perelman and MacAndrews & Forbes Holdings Inc. Are Time-Barred

Plaintiff's claims against Defendants Ronald 0. Perelman and MacAndrews & Forbes Holdings Inc. are dismissed because any applicable statutes of limitations have run. Plaintiff's claims under RICO, the Sherman Act, and the Clayton Act are subject to four-year statutes of limitations. *See Agency Holding Corp. v. Malley-Duff & Assocs., Inc., 483 U.S. 143, 156, 107 S. Ct. 2759, 97 L. Ed. 2d 121 (1987)*; *15 U.S.C. § 15b*. His claims based on unfair competition and interference with **[*58]** prospective economic advantage are barred by four-year statutes of limitations, as well. *See Ohio Rev. Code § 1331.12(B)*; *Cramer v. Fairfield Med. Ctr., 182 Ohio App.3d 653, 668, 2009 Ohio 3338, 914 N.E.2d 447 (Ohio Ct. App. 2009)* ("The statute of limitations for a claim of tortious interference with contract is four years pursuant to *R.C. 2305.09(D)*."). Finally, for the Lanham Act and Deceptive Trade Practices Act claims, because there are no specific statutes of limitations, courts apply the equitable doctrine of laches. *See Veracity Group, Inc. v. Cooper-Atkins Corp., Inc., No. 1:11-cv-526, 2012 U.S. Dist. LEXIS 7997, 2012 WL 203415, at *2 (S.D. Ohio Jan. 24, 2012)* ("The starting point of the laches analysis is the analogous statute of limitations of the forum state-which is a claim of false advertising in Ohio. Therefore, a two-year limitations period (*Ohio Rev. Code § 2305.10*) applies."); *Santana Prods., Inc. v. Bobrick Washroom Equip., Inc., 401 F.3d 123. 140 (3rd Cir. 2005)* (dismissing Lanham Act claim based on laches). Plaintiff has alleged no conduct on the part of

Defendants Ronald O. Perelman or MacAndrews & Forbes Holdings Inc. since 1999. ECF No. 3 at ¶ 26. Because the last conduct on the part of Defendants Ronald O. Perelman and **[*59]** MacAndrews & Forbes Holdings Inc. was more than 13 years ago, Plaintiff's claims against them are time-barred by the applicable statutes of limitations and by the doctrine of laches.

XII.

Defendant Imperial Tobacco Group PLC is a corporation organized and existing under the laws of the United Kingdom with offices in the United Kingdom. Declaration of Robert Dyrbus (ECF No. 28-2) at ¶ 2. Defendant Imperial Tobacco Group PLC directly or indirectly owns subsidiaries that have U.S. connections or operations, but Defendant Imperial Tobacco Group PLC has, at all times, maintained a separate corporate existence and identity and has operated solely outside the United States. *Id*. at ¶¶ 3-6. Its shares are traded in the United States in the form of American Depositary Shares. *See* ECF No. 59 at 17 and ECF No. 64 at 12-13. None of Defendant Imperial Tobacco Group PLC's subsidiaries, including Commonwealth Brands, is authorized to act as Defendant Imperial Tobacco Group PLC's agent or to accept service[16] for Defendant Imperial Tobacco Group PLC. *Id*. at ¶¶ 4 and 9. Defendant Imperial Tobacco Group PLC has no office or place of business in Ohio or elsewhere in the United States. *Id*. at ¶ 8. Defendant **[*60]** Imperial Tobacco Group PLC has no employees that reside in Ohio or the United States, and has no mailing address, or phone listing, and owns no property in Ohio or the United States. *Id*. Defendant Imperial Tobacco Group PLC has never solicited business and has never sold or contracted to sell any goods or services in the state of Ohio. *Id*.

A. Plaintiff Has Failed to Meet His Burden to Establish a Prima Facie Case in Support of Personal Jurisdiction

Plaintiff makes only a single allegation of fact in the Amended Complaint (ECF No. 3) to support a claim that the Court has personal jurisdiction over Defendant Imperial Tobacco Group PLC, namely, that "[t]his court has personal jurisdiction over the alien defendant Imperial Tobacco Group PLC on the basis of: . . . [the actions of] its agent subsidiaries in the United States." ECF No.3 at ¶ l6(d). In ¶ 30 of the Amended **[*61]** Complaint (ECF No. 3), Plaintiff purports to describe Defendant Imperial Tobacco Group PLC's interest in a number of U.S.-based subsidiaries, including Defendants Altadis U.S.A. Inc., Cuban Cigar Brands, N.V., Altadis Holdings U.S.A. Inc., Max Rohr, Inc., and 800-JR Cigar, Inc. *See also* ECF No. 3 at ¶ 77 ("Imperial Tobacco Group PLC has sufficient contacts with the United States. It has several agent subsidiaries in the U.S. that are in the same business as parent.").

Plaintiff would have the Court exercise jurisdiction over Defendant Imperial Tobacco Group PLC because of the activity of its agent U.S.-based subsidiaries. A company does not, however, purposefully avail itself of the privilege of conducting activities within a state merely by owning all or some of a corporation subject to jurisdiction. *See* *Keeton v. Hustler Magazine, Inc., 465 U.S. 770, 781 n. 13, 104 S. Ct. 1473, 79 L. Ed. 2d 790 (1984)* (jurisdiction over a corporation does not necessarily result in jurisdiction over holding company that owns it). Ownership of shares in a corporation located in a particular forum is not purposeful availment of that forum. *Shaffer v. Heitner, 433 U.S. 186, 216, 97 S. Ct. 2569, 53 L. Ed. 2d 683 (1977)*. Stock ownership in or affiliation with a corporation, **[*62]** without more, is not a sufficient minimum contact. *Dean v. Motel 6 Operating L.P., 134 F.3d 1269, 1273-74 (6th Cir. 1998)*. The Court finds that there is no personal jurisdiction over Defendant Imperial Tobacco Group PLC because there is no purposeful availment by Imperial. *Id. at 1275*.

Assuming *arguendo* that the Amended Complaint (ECF No. 3) does include sufficient allegations of jurisdictional "facts," as stated above, a federal court may exercise personal jurisdiction over a defendant outside the forum state

---

[16] Plaintiff served a summons on Commonwealth Brands, naming it as the agent of Defendant Imperial Tobacco Group PLC for accepting service of process. ECF No. 4 at 7-8 and 26. According to Defendant Imperial Tobacco Group PLC, any assertion that Commonwealth Brands is Imperial's agent is incorrect. *See* ECF No. 28-1 at 11 n. 4.

only pursuant to an applicable federal statute that provides for service of process outside this state or Ohio's long-arm statute, *Ohio Rev. Code Ann. § 2307.382*, and only if the exercise of such jurisdiction satisfied the *Due Process Clause of the Constitution of the United States*. *Robert J. Kwait & Assocs., 1998 U.S. Dist. LEXIS 22880, at *4-5*. (stating that courts look to a state's long-arm statute for non-resident defendants if there is no federal statute that provides for service of process).

B. Plaintiff Cannot Establish Personal Jurisdiction Pursuant to the Special Service Provision of RICO (18 U.S.C. § 196S(b))

The RICO statute authorizes nationwide service of process, *18 U.S.C. § 1965(b)* **[*63]** Whether a plaintiff can rely on the nationwide service provisions of a federal statute "[d]epends upon whether [he] has adequately stated a claim" for a violation of that statute. *United Liberty Life Ins. Co., 985 F.2d at 1330*. As detailed in Section X, Part B, Plaintiff has failed to state a RICO claim on which relief can be granted. For that reason, he cannot utilize RICO's nationwide service provision to secure personal jurisdiction over Defendant Imperial Tobacco Group PLC. *See, e.g.*, *Williams, 1988 U.S. Dist. LEXIS 988, 1988 WL 8983, at *2* (declining to assert personal jurisdiction pursuant to nationwide-service provision of RICO where "plaintiff's RICO allegations fail[ed] to state a claim upon which relief may be granted").

RICO does not authorize international service of process. So, even if Plaintiff could state a RICO claim, RICO's nationwide service of process provision would not support the exercise of personal jurisdiction over Defendant Imperial Tobacco Group PLC, a company that is a resident of and is incorporated in the United Kingdom and which was served in the United Kingdom. Thus, Plaintiff must rely on Ohio's long-arm statute and constitutional due process to establish that the Court has personal **[*64]** jurisdiction over Defendant Imperial Tobacco Group PLC. *See* *Iron Workers Local Union No. 17 Ins. Fund v. Philip Morris Inc., 23 F. Supp.2d 796, 806 (N.D. Ohio 1998)* (British Defendant B.A.T. Industries dismissed for lack of personal jurisdiction from case alleging RICO and Clayton Act violations.).

C. Plaintiff Cannot Establish Personal Jurisdiction Over Defendant Imperial Tobacco Group PLC Under the Antitrust Laws

Plaintiff cannot use the service provision in *15 U.S.C. § 22* to secure personal jurisdiction over Defendant Imperial Tobacco Group PLC. Because *Section 22*, applies only to a "suit, action, or proceeding under the antitrust laws," Plaintiff's failure to state a claim under the antitrust laws precludes him from using the worldwide provision of *15 U.S.C. § 22* as a means to secure personal jurisdiction over Defendant Imperial Tobacco Group PLC. *See* *A-DEC, Inc. v. Professional Equipment Mfg. Co., No. 83-1118, 1983 U.S. Dist. LEXIS 11560, 1983 WL 1944, at *2 (D. Or. 1983)* ("[T]he expansive venue and service of process provisions of [*15 U.S.C. § 22*] shall only apply to allow for expanded personal jurisdiction as against corporations that allegedly have violated the antitrust laws."). As discussed in Section **[*65]** X, Parts D and E, Plaintiff has failed to state an antitrust claim on which relief can be granted. Furthermore, none of the provisions of the Clayton Act that Plaintiff invokes against Defendant Imperial Tobacco Group PLC-*15 U.S.C. § 5*, *15 U.S.C. § 15*, or *15 U.S.C. § 22*-establish personal jurisdiction over Imperial.

Section 5, 15 U.S.C. applies only to claims brought by the United States. *Pennsylvania Railroad, 324 U.S. at 466-67*. *15 U.S.C. § 15(a)*, which authorizes a private cause of action for "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws [establishes venue for such a claim in] the United States in the district in which the defendant *resides* or *is found* or *has an agent*. . . ." (emphasis added). Defendant Imperial Tobacco Group PLC does not reside, cannot be found,[17] and does not have an agent anywhere in the United States. This is conclusively established by the fact that Plaintiff was required to serve Defendant Imperial Tobacco Group PLC in the United Kingdom under *Fed. R. Civ. P. 4(h)*. *See* Alias Summons(ECF No. 23).

---

[17] Plaintiff agrees that Defendant Imperial Tobacco Group PLC cannot be found in this district. *See* **[*66]** ECF No. 59 at 15.

Section 22, 15 U.S.C, also cannot be relied upon by Plaintiff to establish personal jurisdiction over Defendant Imperial Tobacco Group PLC because Imperial lacks the minimum contacts with the state of Ohio or the United States as a whole upon which such jurisdiction could be based. *See* Plaskolite, Inc. v. Zheijiang Taizhou Eagle Mach. Co., Ltd., No. 08cv487, 2008 U.S. Dist. LEXIS 99395 (S.D. Ohio Dec. 9, 2008) (noting circuit split regarding the interaction of the Clayton Act's special venue provision and the general venue statute, 28 U.S.C. § 1391, when a plaintiff relies on 15 U.S.C. § 22 to establish personal jurisdiction). Defendant Imperial Tobacco Group PLC conducts no business, owns no property, and maintains no office in the United States. ECF No. 28-2 at ¶ 8. Although U.S. employees of Defendant Imperial Tobacco Group PLC's subsidiaries may qualify to purchase shares of Imperial's stock through its "Sharesave" plan,[18] this alone is insufficient to establish personal jurisdiction over Imperial. *See* Ames v. Whitman's Chocolates. Div. of Pet. Inc., No. 91-3271, 1991 U.S. Dist. LEXIS 18389, 1991 WL 281798 (E.D. Pa. Dec. 30, 1991) (dismissing foreign parent corporation pursuant to Fed. R. Civ. P. 12(b)(2) **[*67]** even though it granted stock options to Plaintiff). Finally, Plaintiff's bare conclusory allegations in the Amended Complaint (ECF No. 3) that Defendant Imperial Tobacco Group PLC conducts business within the United States are insufficient as well. *See* Chrysler Corp. v. Fedders Corp., 643 F.2d 1229, 1239 (6th Cir. 1981).

D. None of the Remaining Claimed Federal Bases for Jurisdiction Over Defendant Imperial Tobacco Group PLC Apply

In ¶ 16(f)-(j) of the Amended Complaint (ECF No. 3), Plaintiff makes an obscure reference to the "effects doctrine," to extraterritorial application of the RICO statute, a section of the Code of Federal Regulations, and two sections of the United States Code, and claims that these references establish personal jurisdiction over Defendant Imperial Tobacco Group PLC. In ¶ 16(a)-(b) of the Amended Complaint (ECF No. 3), Plaintiff cites Fed. R. Civ. P. 4(k)(1)(C) as a basis to establish personal jurisdiction over Defendant Imperial Tobacco Group PLC under 18 U.S.C. § 1965(d) and 15 U.S.C. § 22.

First, the Amended Complaint (ECF No. 3) asserts that personal jurisdiction over Defendant Imperial Tobacco Group PLC exists pursuant to the "'[e]ffects **[*68]** doctrine,' since the foreign defendant's acts have a foreseeable impact within the United States." ECF No. 3 at ¶ 16 (f). The Sixth Circuit recently stated:

> Since Judge Learned Hand's leading opinion in United States v. Aluminum Co. of America (Alcoa), 148 F.2d 416, 443 (2d Cir. 1945), which proposed the need for practical limitations on the Sherman Act that would avoid global overreaching, it has been generally established that the so-called "effects test" limits the Sherman Act "to those acts (1) that 'significantly' or 'directly' affect United States commerce, or (2) that are intended to have an effect, or (3) that are both intended to have and do have such an effect." IB Phillip Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 272d, at 279-80 (3d ed.2006) (citing Alcoa, 148 F.2d at 443-44). These standards have since been widely incorporated into U.S. jurisprudence. Indeed, "it is well established by now that the Sherman Act applies to foreign conduct that was meant to produce and did in fact produce some substantial effect in the United States." Hartford Fire Ins. Co. v. California, 509 U.S. 764, 796, 113 S.Ct. 2891, 125 L.Ed.2d 612 (1993). The Supreme Court, however, has not delineated **[*69]** the precise bounds of the effects test, and lower courts are not in agreement as to its exact scope. *Cf. generally* Dee-K Enters., Inc. v. Heveafil Sdn. Bhd., 299 F.3d 281, 286 (4th Cir. 2002) (addressing the scope of the effects test and discussing the complexities inherent in applying the test in cases such as this one, which involve a "mixture of foreign and domestic elements"). . . .

Carrier Corp. v. Outokumpu Ovh, Nos. 07-6052, 07-6114, __ F.3d __, 673 F.3d 430, 2012 U.S. App. LEXIS 4283, 2012 WL 678151, at *4 (6th Cir. March 2, 2012) (complaint satisfied threshold jurisdictional requirement under Sherman Act). The Amended Complaint (ECF No. 3) is utterly devoid of any specific allegations supporting the conclusory claim that Defendant Imperial Tobacco Group PLC's actions abroad had a substantial effect in the United States. The Amended Complaint (ECF No. 3) alleges no such overt acts abroad and no identified effects in

[18] *See* ECF No. 28-2 at ¶ 7.

Ohio or even in the United States as a whole. Moreover, Plaintiff has not alleged an action by Defendant Imperial Tobacco Group PLC that was purposefully directed at Ohio with an intention to cause Plaintiff foreseeable harm here. *See* Reynolds, 23 F.3d at 1120 (no personal jurisdiction over international **[*70]** athletic foundation for publication of allegedly defamatory press release in England despite allegations of harm felt in Ohio).

Second, as noted in Section XII, Part B, Plaintiff has failed to state a valid RICO cause of action against Defendant Imperial Tobacco Group PLC and thus any reference to RICO as a basis for jurisdiction also fails as a matter of law.

Third, the section of the Code of Federal Regulations that Plaintiff cites at ¶ 16(h), *i.e.*, 31 C.F.R. § 515.310(d), does not exist. The non-existent regulation that Plaintiff cites cannot possibly establish personal jurisdiction over Defendant Imperial Tobacco Group PLC.

Fourth, Plaintiff lacks standing to assert a claim under the Helms-Burton Act, specifically 22 U.S.C. § 6082, because he never alleges that he is a United States national whose property was confiscated by the Cuban government. Thus, 22 U.S.C. § 6082 does not apply to Plaintiff's claims and it does not establish personal jurisdiction over Defendant Imperial Tobacco Group PLC.

Fifth, Plaintiff's reference to 18 U.S.C. § 1957(d)(2)[19] at ¶ 160) of the Amended Complaint (ECF No. 3) does not establish personal jurisdiction over Defendant Imperial Tobacco Group PLC. 18 U.S.C. § 1957 **[*71]** prohibits individuals and entities from "engag[ing] in a monetary transaction in criminally derived property." *See* 18 U.S.C. § 1957(a). 18 U.S.C. § 1957 does not apply to Defendant Imperial Tobacco Group PLC because Imperial is not a United States person. Furthermore, enforcement of 18 U.S.C. § 1957 is left to the Department of Justice, Department of the Treasury, Department of Homeland Security, and the United States Postal Service, depending on the circumstances of the infraction. *See* 18 U.S.C. § 1957(e).

Sixth, the reference to Fed. R. Civ. P. 4(k)(1)(C) in ¶ 16(a)-(b) of the Amended Complaint (ECF No. 3) does not establish an independent basis for personal jurisdiction. Fed. R. Civ. P. 4, entitled "Summons," deals with the service of a summons on another party. Subsection (k) sets forth the territorial limits of effective **[*72]** service and subsection (k)(1)(C) specifically states that personal jurisdiction is established "when authorized by a federal statute." There is no personal jurisdiction over Defendant Imperial Tobacco Group PLC pursuant to Fed. R. Civ. P. 4(k)(1)(C) because, as shown above, none of the federal statutes cited by Plaintiff establish personal jurisdiction.

Seventh, Plaintiff argues that Fed. R. Civ. P. 4(k)(2)[20] provides personal jurisdiction over Defendant Imperial Tobacco Group PLC. *See* ECF No. 59 at 18-19. In order to prove that jurisdiction is proper under Fed. R. Civ. P. 4(k)(2), (1) the plaintiff's claims must be based on federal law; (2) no state court could exercise jurisdiction over the defendants; (3) the exercise of jurisdiction must be consistent with the laws of the United States; and (4) the exercise of jurisdiction must be consistent with the Constitution." See, Inc. v. Imago Eyewear Pty. Ltd., 167

---

[19] 18 U.S.C. § 1957(d)(2) provides:

> The circumstances referred to in subsection (a) are--
>
> * * *
>
> that the offense under this section takes place outside the United States and such special jurisdiction, but *the defendant is a United States person* (as defined in section 3077 of this title, but excluding the class described in paragraph (2)(D) of such section) (emphasis added).

[20] Fed. R. Civ. P. 4(k)(2) provides:

> For a claim that arises under federal law, serving a summons or filing a waiver of service establishes personal jurisdiction over a defendant if:
>
> (A) the defendant is not subject to jurisdiction in any state's courts of general jurisdiction; and
>
> (B) exercising jurisdiction is consistent with the United States Constitution and laws.

Fed.Appx. 518, 521-24 (6th Cir. 2006) (holding that defendant's overall contacts with the United States did not provide sufficient contacts with the United States to satisfy due process). As detailed above, Defendant Imperial Tobacco Group PLC's contacts with the United States **[*73]** are minor. *See* ECF No. 28-2. The Court finds that Defendant Imperial Tobacco Group PLC does not have sufficient contacts with the United States to be hauled into Court here.

Finally, Plaintiff contends, without providing any legal authority, that the "Corporate Disregard Doctrine" provides an additional basis for personal jurisdiction over Defendant Imperial Tobacco Group PLC. *See* ECF No. 59 at 24. The Court disregards this argument, however, because Plaintiff has not cited any case applying the "Corporate Disregard Doctrine" to establish personal jurisdiction over a defendant.

E. Plaintiff Cannot Satisfy the Ohio Long-Arm Statute for His RICO, Lanham Act, and State Law Claims

Plaintiff must turn to the laws of Ohio because he cannot establish personal jurisdiction over Defendant Imperial Tobacco Group PLC under a federal statute **[*74]** that provides for international service of process. To establish personal jurisdiction of an out-of-state defendant for a Lanham Act claim, a plaintiff must rely on the long-arm statute of the forum state. *See generally* *15 U.S.C. §§ 1051-1141*. "When considering whether to exercise jurisdiction over a non-resident defendant in a diversity case, or in a case where federal subject matter jurisdiction exists but the federal statute does not provide for service of process, a federal court must apply the law of the forum state in which it sits." *Robert J Kwait & Assocs., 1998 U.S. Dist. LEXIS 22880, at *4-5*.

A federal district court may exercise personal jurisdiction only if the requirements of both the state long-arm statute and constitutional due process are met. *See* *Calphalon Corp., 228 F.3d at 721*; *Reynolds, 23 F.3d at 1115*. *See also* *Goldstein, 70 Ohio St.3d at 235* ("When determining whether a state court has personal jurisdiction over a nonresident defendant, the court is obligated to (1) determine whether the state's 'long-arm' statute and the applicable Civil Rule confer personal jurisdiction, and if so, (2) whether granting jurisdiction under the statute and rule would deprive the **[*75]** defendant of the right to due process of law pursuant to the *Fourteenth Amendment to the United States Constitution*."). Neither is true here. The provisions of the Ohio long-arm statute that Plaintiff calls upon-*Ohio Rev. Code § 2307.382(A)(3)* and *(7)*[21] -do not support the assertion of personal jurisdiction over Defendant Imperial Tobacco Group PLC, a citizen of the United Kingdom. The Amended Complaint (ECF No. 3) does not allege that Defendant Imperial Tobacco Group PLC was ever present in Ohio or committed any act in Ohio that harmed Plaintiff. *Hildebrand v. Steck Mfg. Co. Inc.*, *279 F.3d 1351, 1355 (Fed. Cir. 2002)* (to satisfy *§ 2307.382(A)(3)*, both the tortious act and the injury must occur in Ohio and the presence of the alleged tortfeasor is required). Also, Plaintiff merely recites the language from *§ 2307.382(A)(7)* at ¶ 16(d) of the Amended Complaint (ECF No. 3). *Hoover v. Society Bank of Eastern Ohio N.A., No. 5:90CV1245, 1991 U.S. Dist. LEXIS 19073, at *34-35 and 41 (N.D. Ohio April 12, 1991)* (finding that plaintiff failed to establish personal jurisdiction under *§ 2307.382(A)(7)* because the amended complaint merely recited the statute and failed to offer any creditable evidence **[*76]** regarding what criminal act allegedly occurred). The RICO, Lanham Act, and state law claims are dismissed because Plaintiff cannot meet his burden to establish such jurisdiction. *Nationwide Mut'l Ins. Co., 91 F.3d at 793*.

Moreover, the "absent co-conspirator" doctrine alleged at ¶ 16(e) of the Amended Complaint (ECF No. 3) is not recognized as a means for establishing personal jurisdiction in this district. *See* *Hollar, 43 F.Supp.2d at 802 n.7* ("Since personal jurisdiction must be based on the actions and contacts of the specific defendant at issue, the Court declines to apply the so called 'conspiracy theory of jurisdiction' in which the contacts of a defendant's co-conspirators with the forum state are attributed to the defendant in order to supply the minimum contacts necessary for personal jurisdiction.") **[*77]** (citation omitted).

---

[21] Ohio courts are deemed to have personal jurisdiction over a person "as to a cause of action arising from the person's . . . [c]ausing tortious injury by an act or omission in" Ohio or from the person's "[c]ausing tortious injury to any person by a criminal act, any element of which takes place in [Ohio], which he commits or in the commission of which he is guilty of complicity."

Lastly, *Fourteenth Amendment* due process requirements are met when *in personam* jurisdiction is asserted over a nonresident defendant that has "certain minimum contacts with [the forum] such that the maintenance of the suit does not offend 'traditional notions of fair play and substantial justice.'" *Int'l Shoe Co. v. Washington, 326 U.S. 310, 316, 66 S. Ct. 154, 90 L. Ed. 95 (1945)* (quoting *Milliken v. Meyer, 311 U.S. 457, 463, 61 S. Ct. 339, 85 L. Ed. 278 (1940))*. Because Defendant Imperial Tobacco Group PLC does not have-and is not alleged to have-such contacts, whether related to Plaintiff's claims or otherwise, neither the theory of general jurisdiction or specific jurisdiction supports a claim for personal jurisdiction over Defendant Imperial Tobacco Group PLC. *See Chrysler Corp., 643 F.2d at 1239-40* (dismissing a foreign corporation because the plaintiff had presented no evidence demonstrating the foreign corporation's contacts with the forum or the United States, and because the "[m]aintenance of this action against it would offend traditional notions of fair play and substantial justice") (internal quotations and citation omitted).

XIII.

Plaintiff has joined as defendants several current and former employees of the **[*78]** corporate defendants, including Defendants Gary R. Ellis, Lewis I. Rothman, Theo W. Folz, and James L. Colucci. ECF No. 3 at ¶¶ 23-25 and 29. These defendants are not Ohio residents, and they do not have any contacts with the state of Ohio upon which personal jurisdiction may be based. Defendant Theo W. Folz, who is the former President and Chief Executive Officer of Defendant Altadis U.S.A. Inc., is a Florida resident. Declaration of Theo W. Folz (ECF No. 29-2) at ¶¶ 2-3. Defendant Gary R. Ellis, the current President and Chief Executive Officer of Defendant Altadis U.S.A. Inc., is a resident of Florida. Declaration of Gary R. Ellis (ECF No. 29-3) at ¶¶ 2-3. Defendant James L. Colucci is also a Florida resident and an Executive Vice President of Defendant Altadis U.S.A. Inc. Declaration of James L. Colucci (ECF No. 29-4) at ¶¶ 2-3. Defendant Lewis I. Rothman, the Chairman, President, and Chief Executive Officer of Defendant 800-JR Cigar, Inc., is a New Jersey resident. Declaration of Lewis I. Rothman (ECF No. 29-5) at ¶¶ 2-3. Neither Defendants Gary R. Ellis, Lewis I. Rothman, Theo W. Folz, nor James L. Colucci has ever resided in Ohio, has had any offices in Ohio, or has had any **[*79]** employees or agents in Ohio. ECF No. 29-2 at ¶¶ 6-12; ECF No. 29-3 at ¶¶ 8-9 and 11; ECF No. 29-4 at ¶¶ 8-9 and 11; and ECF No. 29-5 at ¶¶ 7-8 and 10. Nor have they ever transacted any business in Ohio. ECF No. 29-2 at ¶ 15; ECF No. 29-3 at ¶ 14; ECF No. 29-4 at ¶ 14; and ECF No. 29-5 at ¶ 13.

A. The Amended Complaint (ECF No. 3) Fails to State a Claim Against Defendants Gary R. Ellis, Lewis I. Rothman, Theo W. Folz, and James L. Colucci Upon Which Relief Can be Granted

In *Iqbal*, the United States Supreme Court stated: "Threadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice." *129 S.Ct. at 1949*. To survive a motion to dismiss for failure to state a claim, a "complaint must contain either direct or inferential allegations respecting all the material elements to sustain a recovery under some viable legal theory." *Scheid v. Fanny Farmer Candy Shops. Inc., 859 F.2d 434, 436 (6th Cir. 1988)* (internal quotation marks and citations omitted). A plaintiff cannot survive a *Rule 12(b)(6)* motion based solely on wholly conclusory allegations hoping that he "might later establish some 'set of [undisclosed] facts' to support recovery." *Twombly, 550 U.S. at 561*. **[*80]** (internal quotation marks omitted).

The Amended Complaint (ECF No. 3) does not state any factual allegations of any conduct by Defendants Gary R. Ellis, Lewis I. Rothman, Theo W. Folz, and James L. Colucci. Beyond the allegations that introduce Defendants Gary R. Ellis, Lewis I. Rothman, Theo W. Folz, and James L. Colucci (ECF No. 3 at ¶¶ 23-25 and 29) referenced above, the only allegations that even mention these defendants appear in Count 11 of the Amended Complaint (ECF No. 3) at ¶¶ 312-315. These allegations, which contain only generalities as to all seven Individual Defendants, provide as follows:

¶ 312 alleges, in essence, that whatever Individual Defendants did, they did in the course of their employment;

¶ 313 alleges that whatever the corporate defendants did occurred while Individual Defendants were employed by their respective corporate defendant employers;

¶ 314 alleges that Individual Defendants were aiders and abettors to an unspecified principal with respect to violations of certain federal law that are not described; and

¶ 315 contains a more verbose but equally general allegation of aiding and abetting.

Also see Section XI, Part J. Notably, there is no mention of Defendants **[*81]** Gary R. Ellis, Lewis I. Rothman, Theo W. Folz, and James L. Colucci in the RICO allegations. *See* ECF No. 3 at ¶¶ 45-213.

Conspicuously absent is any allegation that Defendants Gary R. Ellis, Lewis I. Rothman, Theo W. Folz, or James L. Colucci were personally involved in any way in any of the conduct of which Plaintiff complains. The Amended Complaint (ECF No. 3) utterly lacks allegations sufficient to state a claim that any of these defendants personally violated a legal duty to Plaintiff or caused him injury. For this reason, as well as the reasons stated in Section X above, the Amended Complaint (ECF No. 3) is dismissed with prejudice as to Defendants Gary R. Ellis, Lewis I. Rothman, Theo W. Folz, or James L. Colucci for failure to state a claim upon which relief can be granted. *See* *Twombly, 550 U.S. at 570* (dismissing antitrust claims because the complaint did not "state a claim to relief that is plausible on its face").

B. This Court Lacks Personal Jurisdiction Over Defendants Gary R. Ellis, Lewis I. Rothman, Theo W. Folz, and James L. Colucci

Plaintiff has failed to allege (1) that Defendants Gary R. Ellis, Lewis I. Rothman, Theo W. Folz, and James L. Colucci personally engaged in **[*82]** any conduct affecting him or (2) that any of these defendants have any personal contacts with Ohio-nor do they. As stated at the beginning of Section XI, Plaintiff bears the burden of setting forth a *prima facie* showing of personal jurisdiction over a defendant. *Theunissen, 935 F.2d at 1458*. A plaintiff, seeking to hail a foreign defendant into a distant forum, bears an initial burden of pleading jurisdiction. "He must allege in his pleading the facts essential to show jurisdiction. If he fails to make the necessary allegations he has no standing." *McNutt, 298 U.S. at 189*. Plaintiff has failed to meet his *prima facie* burden of showing personal jurisdiction because the Amended Complaint (ECF No. 3) does not allege any facts to support a claim that this Court has personal jurisdiction over Defendants Gary R. Ellis, Lewis I. Rothman, Theo W. Folz, and James L. Colucci.

Assuming *arguendo* that the Amended Complaint (ECF No. 3) does include such allegations, a federal court may exercise personal jurisdiction over defendants outside the forum state only pursuant to an applicable federal statute that provides for service of process outside this state or Ohio's long-arm statute. *Robert J. Kwait & Assocs., 1998 U.S. Dist. LEXIS 22880, at *4-5*. **[*83]** Nationwide service of process may be effected in a civil RICO action pursuant to *18 U.S.C. § 1965(b)* and *(d)*. Worldwide service of process may be effected in an antitrust case pursuant to the Clayton Act.[22] According to Defendants Gary R. Ellis, Lewis I. Rothman, Theo W. Folz, and James L. Colucci, none of them reside in Ohio or have any contacts with Ohio sufficient to support personal jurisdiction under any federal statute that Plaintiff invokes or under the Ohio long-arm statute.

1. The RICO Statute Cannot be Used to Establish Personal Jurisdiction Over Defendants Gary R. Ellis, Lewis I. Rothman, Theo W. Folz, and James L. Colucci Because Plaintiffs RICO Allegations Fail to State a Justiciable Claim

For the reasons set forth at Section XI, Part A(1), Plaintiff cannot utilize RICO's nationwide service provision to secure personal jurisdiction over Defendants Gary R. Ellis, Lewis I. Rothman, Theo W. Folz, and James L. Colucci.

2. Plaintiff Cannot Establish Personal Jurisdiction Over Defendants Gary R. Ellis, Lewis I. Rothman, Theo W. Folz, and James L. Colucci Under the Antitrust Laws

---

[22] *See* n. 13, *supra*.

For the reasons set forth at Section XI, Part A(2), none of the provisions of the **[*84]** Clayton Act that Plaintiff invokes against Defendants Gary R. Ellis, Lewis I. Rothman, Theo W. Folz, and James L. Colucci-*15 U.S.C. § 5*, *15 U.S.C. § 15*, or *15 U.S.C. § 24*-establish personal jurisdiction over them.

3. Plaintiff Cannot Satisfy the Ohio Long-Arm Statute for His Lanham Act and State Law Claims

For the reasons set forth at Section XI, Part A(3), these claims must be dismissed because Plaintiff cannot meet his burden to establish personal jurisdiction over Defendants Gary R. Ellis, Lewis I. Rothman, Theo W. Folz, and James L. Colucci.

4. The Court Does Not Have Jurisdiction Over Defendants Gary R. Ellis, Lewis I. Rothman, Theo W. Folz, and James L. Colucci Just Because It Has Jurisdiction Over Defendant Altadis U.S.A. Inc.

As previously stated, the Sixth Circuit has specifically recognized that "jurisdiction over the individual officers of a corporation cannot be predicated *merely* upon jurisdiction over the corporation." *Weller, 504 F.2d at 929* (emphasis added). Thus, although Defendant Altadis U.S.A. Inc. currently employs Defendants Gary R. Ellis and James L. Colucci and formerly employed Defendant Theo W. Folz, and Defendant Altadis U.S.A. Inc. does not object to jurisdiction, **[*85]** these circumstances do not support the exercise of jurisdiction over Defendants Gary R. Ellis, Theo W. Folz, or James L. Colucci personally. Rather, a court may exercise jurisdiction over an employee only if the employee was (1) "actively and personally involved in the conduct giving rise to the claim, [and (2)] the exercise of personal jurisdiction [satisfies] traditional notions of fair play and substantial justice." *Balance Dynamics Corp., 204 F.3d at 698*. The Amended Complaint (ECF No. 3) does not satisfy either factor.

The Amended Complaint (ECF No. 3) does not set forth specific facts that Defendants Gary R. Ellis, Lewis I. Rothman, Theo W. Folz, or James L. Colucci were personally involved in any way in any of the conduct of which Plaintiff complains or an allegation sufficient to state a claim that any of these defendants personally violated a legal duty to Plaintiff or caused him injury. *See Kemper v. Saline Lectronics, 348 F. Supp.2d 897, 902 (N.D. Ohio 2004)* (holding that the broad allegation that defendants engaged in fraudulent conduct was insufficient to establish personal jurisdiction over a corporate employee when plaintiff presented no specific facts showing the employee's **[*86]** involvement).

For these reasons and those set forth at Section XI, Part A(5), the Court concludes that the fiduciary shield doctrine prevents the Court from exercising personal jurisdiction over Defendants Gary R. Ellis, Lewis I. Rothman, Theo W. Folz, and James L. Colucci.

XIV.

Plaintiff has joined as defendants several current and former employees of the corporate defendants, including retired employee Defendant George Gershel, allegedly an executive vice president of Defendant Altadis U.S.A. Inc. and managing director of Defendant Cuban Cigar Brands N.V. *See* ECF No. 3 at ¶ 25. Defendant George Gershel is not an Ohio resident and does not have sufficient contacts with the state of Ohio upon which personal jurisdiction may be based. Defendant George Gershel was Executive Vice President Tobacco of Defendant Altadis U.S.A. Inc. until December 31, 2008, when he retired. Declaration of George Gershel (ECF No. 30-2) at ¶¶ 3-4. While employed with Defendant Altadis U.S.A. Inc., Defendant George Gershel was a resident of Florida. *Id*. at ¶ 5. After retiring, Defendant George Gershel moved to Switzerland with his wife, who is a citizen of Switzerland, and became a permanent resident. *Id*. at ¶¶ **[*87]** 2 and 4.[23] Defendant George Gershel has never resided or intended to permanently reside in Ohio, nor has he ever had any offices, employees, or agents in Ohio. *Id*. at ¶¶ 7 and 13-14. Defendant George Gershel does, however, maintain an apartment, car, bank account, and phone listing in Ohio

---

[23] Plaintiff served a summons on Defendant George Gershel in Florida. *See* Return of Service (ECF No. 10).

that he uses when he travels to Ohio a few times a year to visit two of his children. *Id*. at ¶ 6. Defendant George Gershel has no other contacts with Ohio and does not work in Ohio, sell any goods or services in Ohio, or regularly solicit business in Ohio. *Id*. at ¶¶ 11-12.

A. The Amended Complaint (ECF No. 3) Fails to State a Claim Against Defendant George Gershel Upon Which Relief Can be Granted

Plaintiff does not allege that Defendant George Gershel has any connection to the matters of which Plaintiff complains, except that he worked for one of the corporate defendants. Beyond the allegations that introduce Defendant George Gershel (ECF No. 3 at ¶ 25) referenced above, the only allegations that even mention this defendant appear in Count 11 of the Amended Complaint (ECF No. 3) at ¶¶ 312-315. As **[*88]** mentioned in Section XIII, Part A, these allegations contain only generalities as to all seven Individual Defendants. Notably, there is no mention of Defendant George Gershel in the RICO allegations. *See* ECF No. 3 at ¶¶ 45-213. For these reasons and those set forth at Section XIII, Part A, the Amended Complaint (ECF No. 3) is dismissed with prejudice as to Defendant George Gershel for failure to state a claim upon which relief can be granted.

B. This Court Lacks Personal Jurisdiction Over Defendant George Gershel

Plaintiff has failed to allege (1) that Defendant George Gershel personally engaged in any conduct affecting him or (2) that Defendant George Gershel has any personal contacts with Ohio upon which jurisdiction can be based-nor does he. His limited personal contacts with the state in connection with visiting his children here are insufficient to support jurisdiction. Because Defendant George Gershel does not reside in Ohio and has only *de minimis* **[*89]** contacts with the state that are insufficient to support personal jurisdiction under any federal statute that Plaintiff invokes or the Ohio long-arm statute, the Court dismisses Defendant George Gershel for lack of personal jurisdiction.

1. The RICO Statute Cannot be Used to Establish Personal Jurisdiction Over Defendant George Gershel Because Plaintiffs RICO Allegations Fail to State a Justiciable Claim

For the reasons set forth at Section XI, Part A(1), Plaintiff cannot utilize RICO's nationwide service provision to secure personal jurisdiction over Defendant George Gershel.

2. Plaintiff Cannot Establish Personal Jurisdiction Over Defendant George Gershel Under the Antitrust Laws

For the reasons set forth at Section XI, Part A(2), none of the provisions of the Clayton Act that Plaintiff invokes against Defendant George Gershel-*15 U.S.C. § 5*, *15 U.S.C. S 15*, or *15 U.S.C. § 24*-establish personal jurisdiction over him.

3. The Court Cannot Exercise General Jurisdiction Over Defendant George Gershel Because He Does Not Have Continuous and Systematic Contacts With Ohio

Personal jurisdiction may be based on either general or specific jurisdiction. *Bird v. Parsons, 289 F.3d 865, 873 (6th Cir. 2002)*. **[*90]** General jurisdiction is based on a defendant's actual or virtual presence in the forum. "General jurisdiction is proper only where 'a defendant's contacts with the forum state are of such a continuous and systematic nature that the state may exercise personal jurisdiction over the defendant even if the action is unrelated to the defendant's contacts with the state.'" *Id*. (quoting *Third Nat'l Bank in Nashville v. WEDGE Group Inc., 882 F.2d 1087, 1089 (6th Cir. 1989)*).

The Amended Complaint (ECF No. 3) is devoid of allegations that Defendant George Gershel has any contact with the state of Ohio. In *Schultz*, the Court recently found that general jurisdiction was not established in a case where the defendants had only isolated contacts with the state of Ohio rather than a regular presence which is necessary to establish that continuous and systematic contacts exist. *2009 U.S. Dist. LEXIS 66627, 2009 WL 2392912, at *9*. Furthermore, merely maintaining a bank account within the forum, having an interest in property in the forum, or traveling to the forum occasionally does not constitute the systematic and continuous contacts required to establish general jurisdiction. *See Access Telecom, Inc. v. MCI Telecommunications Corp., 197 F.3d 694, 717 (5th Cir. 1999)* **[*91]** (stating that renting or owning property in a forum does not confer general jurisdiction when the property is not used to conduct business in the forum); *Sullivan, 785 F. Supp. at 1079-80* (maintaining a bank account within the forum or occasionally traveling to the forum is not a continuous and systematic contact). Defendant George Gershel's limited personal contacts with the state in connection with visiting his children here do not constitute the systematic and continuous contacts required to establish general jurisdiction. *See Access Telecom, Inc., 197 F.3d at 717*; *Sullivan, 785 F. Supp. at 1079-80*.

For these reasons, Defendant George Gershel is not subject to general jurisdiction in Ohio. The Court must therefore determine whether he is subject to specific jurisdiction.

4. The Court Cannot Exercise Specific Jurisdiction Over Defendant George Gershel Because His De Minimis Contacts With Ohio are Unrelated to the Matters of Which Plaintiff Complains

In contrast to general jurisdiction, specific jurisdiction is proper under circumstances "where 'a State exercises personal jurisdiction over a defendant in a suit arising out of or related to the defendant's contacts with the forum.'" *Bird, 289 F.3d at 874* **[*92]** (quoting *Helicopteros Nacionales de Colombia, S.A. v. Hall, 466 U.S. 408, 414 n. 8, 104 S. Ct. 1868, 80 L. Ed. 2d 404 (1984)*). Specific jurisdiction may be based on a single act. *Nationwide Mut'l Ins. Co., 91 F.3d at 794* (citing *McGee v. Int'l Life Ins. Co., 355 U.S. 220, 222, 78 S. Ct. 199, 2 L. Ed. 2d 223 (1957)*).

The Sixth Circuit has developed a three-part test to determine whether a defendant's contacts are sufficient so as to establish specific jurisdiction:

> First, the defendant must purposefully avail himself of the privilege of acting in the forum state or causing a consequence in the forum state. Second, the cause of action must arise from the defendant's activities there. Finally, the acts of the defendant or consequences caused by the defendant must have a substantial enough connection with the forum to make the exercise of jurisdiction over the defendant reasonable.

Reynolds, 23 F.3d at 1116.

In *CompuServe, Inc. v. Patterson, 89 F.3d 1257 (6th Cir. 1996)*, the Sixth Circuit stated:

> This court has stated that the question of whether a defendant has purposefully availed itself of the privilege of doing business in the forum state is "the *sine qua non* for *in personam* jurisdiction." *Mohasco Indus., 401 F.2d at 381-82*. The "purposeful availment" **[*93]** requirement is satisfied when the defendant's contacts with the forum state "proximately result from actions by the defendant *himself* that create a 'substantial connection' with the forum State," and when the defendant's conduct and connection with the forum are such that he "should reasonably anticipate being haled into court there." *Burger King Corp. v. Rudzewicz, 471 U.S. 462, 474-75, 105 S.Ct. 2174, 2183-84, 85 L.Ed.2d 528 (1985)* (quoting *World-Wide Volkswagen, 444 U.S. at 297, 100 S.Ct. at 567*); *Reynolds, 23 F.3d at 1116*. Courts require purposeful availment to insure that "random," "fortuitous," or "attenuated" contacts do not cause a defendant to be haled into a jurisdiction. *Burger King Corp., 471 U.S. at 475, 105 S.Ct. at 2183-84* (citing *Keeton v. Hustler Magazine, Inc., 465 U.S. 770, 774, 104 S.Ct. 1473, 1478, 79 L.Ed.2d 790 (1984))*.

Id., at 1263 (Emphasis in original.) Plaintiff's allegations in the Amended Complaint (ECF No. 3) and the absence of any argument in opposition, *see* ECF No. 59, fall woefully short of establishing purposeful availment. Instead of alleging specific facts concerning Defendant George Gershel's Ohio contacts, Plaintiff alleges merely that "defendants" **[*94]** committed unspecified "tortious activities," and caused an unspecified "tortious injury" through an unspecified "criminal act" in Ohio. ECF No. 3 at ¶¶ 14-15. Plaintiff has not demonstrated that Defendant George Gershel has connections with Ohio that are substantial enough to show "purposeful availment." *Highway Auto Sales v. Auto-Konig of Scottsdale, Inc., 943 F. Supp. 825, 828 (N.D. Ohio 1996)*. Thus, the Court finds that Defendant George Gershel's personal Ohio contacts, related to occasional visits to his children, are clearly insufficient to establish that he has purposelfully availed himself of the privilege of doing business in Ohio. *See* ECF No. 30-2 at ¶¶ 6 and 8-9.

The matters of which Plaintiff complains are unrelated to Defendant George Gershel's *de minimis* Ohio contacts and exercising personal jurisdiction over him would be unreasonable. Plaintiff has not alleged that Defendant George Gershel engaged in any conduct, anywhere, that harmed him. Moreover, Plaintiff has not made any allegations that suggest a connection between his claims and Defendant George Gershel's personal contacts with Ohio. Thus, exercising jurisdiction over Defendant George Gershel in the case at bar **[*95]** would be random and arbitrary, and would offend the notions of fair play and substantial justice. *See, e.g.*, *Conti v. Pneumatic Products Corp., 977 F.2d 978, 983 (6th Cir. 1992)* (holding personal jurisdiction over a foreign defendant based merely on the plaintiff's state of residence would be unfair and would not comport with the notions of fair play and substantial justice).

5. Plaintiff Cannot Satisfy the Ohio Long-Arm Statute for His Lanham Act and State Law Claims

For the reasons set forth at Section XI, Part A(3), these claims must be dismissed because Plaintiff cannot meet his burden to establish personal jurisdiction over Defendant George Gershel.

6. Plaintiff Cannot Satisfy the Fourteenth Amendment Due Process Requirements

For the reasons set forth at Section XTV, Part B(3) and (4), Plaintiff cannot establish that the Court has general or specific jurisdiction over Defendant George Gershel. Therefore, Plaintiff cannot satisfy the *Fourteenth Amendment* Due Process requirements to secure personal jurisdiction over Defendant George Gershel.

7. The Court Does Not Have **Jurisdiction Over Defendant George Gershel Just Because It Has Jurisdiction Over Defendant Altadis U.S.A. Inc**.

For the **[*96]** reasons set forth at Section XIII, Part B(4), the Court concludes that the fiduciary shield doctrine prevents the Court from exercising personal jurisdiction over Defendant George Gershel.

XV.

Defendants Cuban Cigar Brands, N.V., Altadis Holdings U.S.A. Inc., and 800-JR Cigar, Inc. are all holding companies. Declaration of Salvatore M. Marino (ECF No. 31-2) at ¶ 5; Declaration of Gary R. Ellis (ECF No. 31-3) at ¶ 5; Declaration of Eric Workman (ECF No. 31-4) at ¶ 6. Defendant 800-JR Cigar, Inc. is incorporated in Delaware. ECF No. 31-2 at ¶ 4. Defendant Altadis Holdings U.S.A. Inc. is a Delaware company, with its principal place of business in Fort Lauderdale, Florida. ECF No. 3 at ¶ 120; ECF No. 31-3 at ¶ 4. And Defendant Cuban Cigar Brands, N.V. is organized under the laws of the Netherlands Antilles, having an office in Fort Lauderdale, Florida. ECF No. 3 at ¶ 22; ECF No. 31-4 at ¶ 4. None of these defendants has, or previously had, any offices or places of business in the state of Ohio, nor has any ever stationed any employees, sales representatives, or agents in the state of Ohio. ECF No. 31-2 at ¶¶ 6-12; ECF No. 31-3 at ¶¶ 6-14; ECF No. 31-4 at ¶¶ 7-13. Furthermore, none has entered **[*97]** into a contract in the state of Ohio, sold goods or services in the state of Ohio, or derived substantial revenue from goods consumed in the state of Ohio. ECF No. 31-2 at ¶¶ 7-8 and 13; ECF No. 31-3 at ¶¶ 7-8 and 13; ECF No. 31-4 at ¶¶ 9 and 14. As holding companies, Defendants Cuban Cigar Brands, N.V., Altadis

Holdings U.S.A. Inc., and 800-JR Cigar, Inc. do not derive operational revenue from any of their activities in Ohio. ECF No. 31-2 at ¶ 13; ECF No. 31-3 at ¶ 13; ECF No. 31-4 at ¶ 14.

A. This Court Lacks Personal Jurisdiction Over Defendants Cuban Cigar Brands, N.V., Altadis Holdings U.SA. Inc., and 800-JR Cigar, Inc.

Plaintiff has failed to allege (1) that Defendants Cuban Cigar Brands, N.V., Altadis Holdings U.S.A. Inc., and 800-JR Cigar, Inc. have any Ohio contacts on which personal jurisdiction can be based and (2) with the exception of the conclusory RICO allegations,[24] that they have engaged in any conduct that injured Plaintiff. Notably, there are no allegations about Defendants Cuban Cigar Brands, N.V., Altadis Holdings U.S.A. Inc., and 800-JR Cigar, Inc. in Counts 2-11 of the Amended Complaint (ECF No. 3).

As stated at the beginning of Section XI and in Section XIII, Part B, Plaintiff bears the burden of setting forth a *prima facie* showing of personal jurisdiction over a defendant. *Theunissen, 935 F.2d at 1458*. A plaintiff, seeking to hail a foreign defendant into a distant forum, bears an initial burden of pleading jurisdiction. "He must allege in his pleading the facts essential to show jurisdiction. If he fails to make the necessary allegations he has no standing." *McNutt, 298 U.S. at 189*. Plaintiff has failed to meet his *prima facie* burden of showing personal jurisdiction because the Amended Complaint (ECF No. 3) does not allege any facts to support a claim that this Court has personal jurisdiction over Defendants Cuban Cigar Brands, N.V., Altadis Holdings U.S.A. Inc., and 800-JR Cigar, Inc.

Assuming *arguendo* that the Amended Complaint (ECF No. 3) does include such allegations, a federal court may exercise personal jurisdiction over defendants outside the forum **[*99]** state only pursuant to an applicable federal statute that provides for service of process outside this state or Ohio's long-arm statute. *Robert J. Kwait & Assocs., 1998 U.S. Dist. LEXIS 22880, at *4-5*. Nationwide service of process may be effected in a civil RICO action pursuant to *18 U.S.C. § 1965(b)* and *(d)*. Worldwide service of process may be effected in an antitrust case pursuant to the Clayton Act.[25] According to Defendants Cuban Cigar Brands, N.V., Altadis Holdings U.S.A. Inc., and 800-JR Cigar, Inc., none of them is an Ohio company or have any contacts with Ohio sufficient to support personal jurisdiction under any federal statute that Plaintiff invokes or under the Ohio long-arm statute. Finally, even if these statutory tests could be met, the *Fourteenth Amendment* must still be satisfied, and here, Defendants Cuban Cigar Brands, N.V., Altadis Holdings U.S.A. Inc., and 800-JR Cigar, Inc. do not have the minimum contacts with Ohio that would allow a suit to be brought here.

1. Plaintiff Cannot Establish Personal Jurisdiction Pursuant to the Service Provisions of RICO and the Antitrust Laws

*a. Broad Service Provisions Apply Only When the Plaintiff Has Stated Viable [*100] Causes of Action Under the Relevant Statutes*

Plaintiff cannot establish personal jurisdiction over Defendants Cuban Cigar Brands, N.V., Altadis Holdings U.S.A. Inc., and 800-JR Cigar, Inc. based on the special service provisions of RICO (*18 U.S.C. § 1965(b)* and *(d)*) or the antitrust laws (*15 U.S.C. § 22*) because the Amended Complaint (ECF No. 3) does not state valid RICO or antitrust claims against any of them. As previously stated, it is well recognized that a plaintiff cannot rely on the special service provisions of a federal statute unless the plaintiff "has adequately stated a claim" for a violation of that statute. *United Liberty Life Ins. Co., 985 F.2d at 1330* (remanding for ruling on validity of claim under the 1934

[24] The RICO allegations in the Amended Complaint (ECF No. 3) merely **[*98]** assert in non-factual, conclusory fashion that Defendants Cuban Cigar Brands, N.V., Altadis Holdings U.S.A. Inc., and 800-JR Cigar, Inc. illegally owned and/or sold certain trademarks and/or illegally derived profits therefrom.

[25] *See* n. 13, *supra*.

Exchange Act); *see also* NGS Am., Inc. v. Jefferson, 218 F.3d 519 (6th Cir. 2000) (affirming dismissal for lack of personal jurisdiction because ERISA's nationwide-service provision did not apply to the plaintiff's case).

b. Plaintiff Cannot Rely on RICO's Nationwide Service of Process Because the Amended Complaint (ECF No. 3) Fails to State a RICO Claim

For the reasons set forth at Section XI, Part A(1), Plaintiff cannot utilize RICO's nationwide service provision **[*101]** to secure personal jurisdiction over Defendants Cuban Cigar Brands, N.V., Altadis Holdings U.S.A. Inc., and 800-JR Cigar, Inc.

c. Plaintiff Cannot Establish Jurisdiction Over Defendants Cuban Cigar Brands, N. V., Altadis Holdings U.S.A. Inc., and 800-JR Cigar, Inc. Under 15 U.S.C. § 22 Because the Amended Complaint (ECF No. 3) Fails to State an Antitrust Claim Against Them and Ohio is an Improper Venue

While the nationwide-service provision of the antitrust laws may permit certain defendants to be *served* in any district, it does not permit these defendants to be *sued* in any district. Rather, defendants in antitrust suits may be sued only where they are *found. See, e.g.*, *Valley Drive Systems, Inc. v. EMPI, Inc., No. 94 C 50118, 1994 U.S. Dist. LEXIS 13233, 1994 WL 511294, at *3 (N.D. Ill. Sept. 19, 1994)* ("In an antitrust action, a corporate defendant may be sued in any judicial district where it is an inhabitant, where it may be found or where it transacts business."). In the case at bar, Defendants Cuban Cigar Brands, N.V., Altadis Holdings U.S.A. Inc., and 800-JR Cigar, Inc. do not have any connection with the Northern District of Ohio. And therefore, because Defendants Cuban Cigar Brands, N.V., Altadis Holdings **[*102]** U.S.A. Inc., and 800-JR Cigar, Inc. cannot be found in Ohio, they cannot be sued in Ohio, notwithstanding the provisions of Section 12 of the Clayton Act, 15 U.S.C. § 22.

Plaintiff cannot rely on Section 12 of the Clayton Act to establish personal jurisdiction over Defendants Cuban Cigar Brands, N.V., Altadis Holdings U.S.A. Inc., and 800-JR Cigar, Inc. because he has not stated an antitrust claim against them. Because 15 U.S.C. § 22 applies only to "[a]ny suit, action, or proceeding under the antitrust laws," Plaintiff's failure to state a claim under the antitrust laws precludes him from using the worldwide service of process provision of *Section 22* as a means to secure jurisdiction over Defendants Cuban Cigar Brands, N.V., Altadis Holdings U.S.A. Inc., and 800-JR Cigar, Inc. *See* *A-DEC, Inc., 1983 U.S. Dist. LEXIS 11560, 1983 WL 1944, at *2 (D. Or. 1983)* ("[T]he expansive venue and service of process provisions of [15 U.S.C. § 22] shall only apply to allow for expanded personal jurisdiction as against corporations that allegedly have violated the antitrust laws."). As discussed in Section X, Parts D and E, Plaintiff has failed to state an antitrust claim on which relief can be granted.

Assuming *arguendo* that Plaintiff **[*103]** has made a valid antitrust claim against Defendants Cuban Cigar Brands, N.V., Altadis Holdings U.S.A. Inc., and 800-JR Cigar, Inc., he still cannot rely on *15 U.S.C. § 22* to establish jurisdiction over these defendants, because under Section 12 of the Clayton Act, "proper venue is still required in order to confer personal jurisdiction." *Hyland v. Homeservices of America., Inc.*, No. 3:05 CV 612 R, 2007 U.S. Dist. LEXIS 47502, 2007 WL 1959158, at *3 (W.D. Ky. June 28, 2007) (venue is proper "only . . . if it could be determined that the objecting defendants were inhabitants of, could be found in, or transacted business within the district"). This Court is not a proper venue in which to sue Defendants Cuban Cigar Brands, N.V., Altadis Holdings U.S.A. Inc., and 800-JR Cigar, Inc., since none of these defendants (1) is an inhabitant of; (2) transacts business in; or (3) may be found, in the Northern District of Ohio.

A corporation is an "inhabitant" of the state of its incorporation. *Athletes Foot of Delaware, Inc. v. Ralph Libonati Co., Inc., 445 F. Supp. 35, 42-46 (D. Del. 1977)* (dismissing defendant not incorporated in forum state). Plaintiff has not alleged that Defendants Cuban Cigar Brands, N.V., Altadis Holdings **[*104]** U.S.A. Inc., and 800-JR Cigar, Inc. were incorporated in Ohio, and none were. As alleged in ¶ 20 of the Amended Complaint (ECF No. 3), Defendant Altadis Holdings U.S.A. Inc. is incorporated under the laws of Delaware and its principal place of business is located in Fort Lauderdale, Florida. ECF No. 31-3 at ¶4. Similarly, as alleged in ¶ 22 of the Amended Complaint (ECF No. 3), Defendant Cuban Cigar Brands, N.V. is organized under the laws of Netherlands Antilles, with a place of business in Fort Lauderdale, Florida, where it was served.[26] ECF No. 31-4 at ¶ 4. Although Plaintiff does not allege where Defendant 800-JR Cigar, Inc. is incorporated, *see* ¶ 28 of the Amended Complaint (ECF No. 3), this omission does not work in his favor. As set forth in ¶ 4 of ECF No. 31-2, Defendant 800-JR Cigar, Inc. is a Delaware corporation.

Additionally, the Amended Complaint (ECF No. 3) does not allege that Defendants Cuban Cigar Brands, N.V., Altadis Holdings U.S.A. Inc., and 800-JR Cigar, Inc. have done *anything* in Ohio, much less that they have transacted *substantial* business in Ohio. "[B]efore a corporation may be held to be 'transacting business' **[*105]** in a district[,] it must in the ordinary and usual sense 'transact business' therein of any substantial character." *Ohio-Midland Light & Power Co. v. Ohio Brass Co., 221 F. Supp. 405, 408 (S.D. Ohio 1962)* (citations omitted). Furthermore, a corporation must engage in more extensive activities to be "found" within a district than required to be "transacting business" there. *Friends of Animals, Inc. v. American Veterinary Medical Assn., 310 F. Supp. 620, 622 (S.D. N.Y. 1970)* (citations omitted). Indeed, Defendants Cuban Cigar Brands, N.V., Altadis Holdings U.S.A. Inc., and 800-JR Cigar, Inc. have not transacted any business in the Northern District of Ohio. *See* ECF No. 31-2 at ¶ 9; ECF No. 31-3 at ¶ 9; ECF No. 31-4 at ¶ 10. Therefore, the Court finds that neither the allegations of the Amended Complaint (ECF No. 3) nor the facts support a conclusion that Defendants Cuban Cigar Brands, N.V., Altadis Holdings U.S.A. Inc., and 800-JR Cigar, Inc. "transact business" in or can be "found" in the Northern District of Ohio.

d. Plaintiff Cannot Establish Personal Jurisdiction Over Defendants Cuban Cigar Brands, N.V., Altadis Holdings U.S.A. Inc., and 800-JR Cigar, Inc. Under 15 U.S.C. § 5 or 15 U.S.C. § 15 [*106] of the Antitrust Laws

For the reasons set forth at Section XI, Part A(2), none of the other provisions of the Clayton Act that Plaintiff invokes against Defendants Cuban Cigar Brands, N.V., Altadis Holdings U.S.A. Inc., and 800-JR Cigar, Inc.-*15 U.S.C. § 5*, or *15 U.S.C. § 15*-establish personal jurisdiction over any of the defendants.

e. Plaintiff Cannot Rely on the Ohio Long-Arm Statute to Establish Personal Jurisdiction Over Defendants Cuban Cigar Brands, N.V., Altadis Holdings U.S.A. Inc., and 800-JR Cigar, Inc.

The Court cannot exercise personal jurisdiction over Defendants 800-JR Cigar, Inc. (a Delaware corporation), Altadis Holdings U.S.A. (a Delaware corporation with its principal place of business in Florida), and Cuban Cigar Brands, N.V. (a Netherlands Antilles corporation with its principal place of business in Florida) unless (1) each is amenable to suit under Ohio's long-arm statute and (2) the due process requirements of the United States Constitution are met. *Reynolds, 23 F.3d at 1115*. For the reasons set forth at Section XII, Part E, Plaintiff can satisfy neither in the case at bar.

XVI.

All of the allegations concerning Defendants Grimes & Battersby, LLP and Charles W. Grimes **[*107]** concern their actions as lawyers on behalf of clients in connection with the registration or enforcement of trademarks. The Amended Complaint (ECF No. 3) does not allege that Defendants Grimes & Battersby, LLP and Charles W. Grimes reside in or have had any contact with the state of Ohio, except that Defendant Charles W. Grimes sent the cease-and-desist letters.

Neither Defendant Grimes & Battersby, LLP nor Defendant Charles W. Grimes has any Ohio contacts on which personal jurisdiction can be based. Defendant Charles W. Grimes, the Managing Partner of the law firm Grimes & Battersby, LLP, is a Connecticut resident. Declaration of Charles W. Grimes (ECF No. 32-2) at ¶¶ 1-2. Defendant

---

[26] *See* Return of Service (ECF No. 4) at 5-6, and 23.

Grimes & Battersby, LLP is a limited liability partnership, with offices in Norwalk, Connecticut and New York City, New York. *Id*. at ¶ 6. All of the attorneys affiliated with Defendant Grimes & Battersby, LLP live and work in Connecticut or New York, except when the representation of a client requires travel. *Id*. Neither Defendant Grimes & Battersby, LLP nor Defendant Charles W. Grimes has engaged in any persistent course of conduct in Ohio. *Id*. at ¶ 7. A Grimes & Battersby lawyer took Plaintiff's deposition **[*108]** in connection with the Opposition Proceeding, but otherwise, neither Defendant Charles W. Grimes nor Defendant Grimes & Battersby, LLP has had an employee or agent in Ohio. *Id*. at ¶¶ 11, 14, 16, and 21. Neither Defendant Grimes & Battersby, LLP nor Defendant Charles W. Grimes has regularly solicited business in the state of Ohio, or ever sold any goods or services in Ohio, except possibly in connection with their representation of clients. *Id*. at ¶¶ 8-10. Neither Defendant Grimes & Battersby, LLP nor Defendant Charles W. Grimes has established a mailing address or phone listings in Ohio, neither owns property in Ohio, and neither has an office in Ohio. *Id*. ¶¶ 10-12. Neither Defendant Grimes & Battersby, LLP nor Defendant Charles W. Grimes has ever negotiated or entered into any contracts in Ohio. *Id*. at ¶ 13. Defendant Charles W. Grimes has never transacted any business in Ohio, and to the extent that other Grimes & Battersby attorneys have, they have only done so on behalf of clients, in connection with their representation of those clients. *Id*. at R ¶ 14. Neither Defendant Grimes & Battersby, LLP nor Defendant Charles W. Grimes has had business or personal contact with Plaintiff **[*109]** or Somya Inc. other than receipt of process in this case, the cease-and-desist letters and their involvement in the pending trademark Opposition Proceeding in which they represent Defendant Max Rohr, Inc. *Id*. at ¶ 15.

A. The Amended Complaint (ECF No. 3) Fails to State a Claim Against Defendants Grimes & Battersby, LLP and Charles W. Grimes Upon Which Relief Can be Granted

The allegations (1) that Defendants Grimes & Battersby, LLP and Charles W. Grimes took action, as counsel for their clients, to register, record the assignment of or enforce trademark rights, and (2) of Count 11 of the Complaint, which refer to Attorney Grimes among other Individual Defendants, fail to state a claim against these defendants upon which relief can be granted.

1. Ohio's Litigation Privilege Protects Defendants Grimes & Battersby, LLP and Charles W. Grimes from Claims Based on Work for Their Clients Before the PTO, or to Enforce Registered Marks

For the reasons set forth at Section X, Part H, the work of Defendants Grimes & Battersby, LLP and Charles W. Grimes as counsel for their clients, in connection with the registration and enforcement of trademarks, cannot be the basis for liability to Plaintiff.

2. [*110] Count 11 of the Amended Complaint (ECF No. 3) Fails to State a Claim Against Defendant s Charles W. Grimes Upon Which Relief Can be Granted

For the reasons set forth at Section XIII, Part A, Count 11 fails to state a claim against Defendant Charles W. Grimes.

B. This Court Lacks Personal Jurisdiction Over Defendants Grimes & Battersby, LLP and Charles W. Grimes

Personal jurisdiction cannot be based on the cease-and-desist letters or the Opposition Proceeding. Neither Defendant Grimes & Battersby, LLP nor Defendant Charles W. Grimes is an Ohio resident; and the limited contact with the state of Ohio that Defendants Grimes & Battersby, LLP and Charles W. Grimes had, in the course of seeking to protect a client's trademark rights, cannot legally or fairly serve as the basis for the assertion of personal jurisdiction. This conduct was privileged.

The discussion at the beginning of Section XIII, Part B is incorporated herein by reference.

1. The RICO Statute Cannot be Used to Establish Personal Jurisdiction Over Defendants Grimes & Battersby, LLP and Charles W. Grimes Because Plaintiffs RICO Allegations Fail to State a Justiciable Claim

For the reasons set forth at Section XI, Part A(1), Plaintiff **[*111]** cannot utilize RICO's nationwide service provision to secure personal jurisdiction over Defendants Grimes & Battersby, LLP and Charles W. Grimes.

2. Plaintiff Cannot Establish Personal Jurisdiction Over Defendants Grimes & Battersby, LLP and Charles W. Grimes Under the Antitrust Laws

For the reasons set forth at Section XI, Part A(2), none of the provisions of the Clayton Act that Plaintiff invokes against Defendants Grimes & Battersby, LLP and Charles W. Grimes-*15 U.S.C. § 5*, *15 U.S.C. § 15*, *15 U.S.C. §22* (as to Defendant Grimes & Battersby, LLP only), or *15 U.S.C. $24* (as to Defendant Charles W. Grimes only)-establish personal jurisdiction over them.

Moreover, *15 U.S.C. § 15* does not help Plaintiff to establish personal jurisdiction over Defendants Grimes & Battersby, LLP and Charles W. Grimes in Ohio. It merely establishes proper venue for an antitrust action. *See* *Norman's on the Waterfront v. West Indies Corp*., No. 515/1973 Antitrust, 1974 U.S. Dist. LEXIS 7588, at *3 (D. V.I. July 17, 1974) ("Paragraph 1 of the complaint states that jurisdiction and venue are founded on ... *15 U.S.C. § 15*. **[*112]** It is true that [this] provision[ ] [does not] authorize the exercise of personal jurisdiction."). The cease-and-desist letters and the deposition taken of Plaintiff provide the only possible connection between Defendants Grimes & Battersby, LLP and Charles W. Grimes and the state of Ohio. But those activities are privileged, and they cannot be the basis for personal jurisdiction or venue. *See* Section X, Part H, *supra*; *Database America, Inc. v. Bellsouth Advertising & Pub. Corp.. 825 F. Supp. 1216, 1226 (P. N.J. 1993)* (construing venue under *28 U.S.C. § 1391*, and holding "[b]ecause cease-and-desist letters are logically sent to an alleged infringer in its home forum, a rule which automatically provides for venue in the district of receipt of such letter has the effect of establishing venue in the plaintiff's home forum, without regard to the inconvenience to the defendant.... This result is contrary to both the letter and spirit of the venue requirement.").

Plaintiff cannot rely on *15 U.S.C. §22* to establish personal jurisdiction over Defendant Grimes & Battersby, LLP because, as previously stated, *Section 22* applies only to "[a]ny suit, action, or proceeding under the antitrust laws **[*113]** against a *corporation*." *See* n. 13, *supra*. Defendant Grimes & Battersby, LLP is a limited liability partnership, not a corporation. *See* ECF No. 32-2 at ¶ 6.

Finally, Plaintiff cannot rely on *15 U.S.C. § 24* to establish personal jurisdiction over Defendant Charles W. Grimes because it applies only to corporate employees, it is not a jurisdictional statute, and the nature of Grimes's contacts with Ohio do not support the exercise of jurisdiction. First, *15 U.S.C. § 24*, entitled "Liability of directors and agents of corporation" applies only to Individual Defendants who work for corporations, and Defendant Grimes & Battersby, LLP is a limited liability partnership. *See* ECF No. 32-2 at ¶ 6. Second, *15 U.S.C. § 24* is not a jurisdictional statute. *Sullivan, 785 F. Supp. at 1082*. Rather, "before a state can exercise jurisdiction over [an] employee," the Court must look to whether the employee has contacts with the forum sufficient to support the exercise of general jurisdiction or specific jurisdiction." *Id*. Third, for the reasons set forth at Section XIV, Part B(3) and (4), Plaintiff cannot establish that the Court has general or specific jurisdiction over Charles W. Grimes.

3. Plaintiff Cannot [*114] Establish Personal Jurisdiction Based on Due Process and the Ohio Long-Arm Statute

The discussion at Section XI, Part A(3) and Section XII, Part E is incorporated herein by reference.

The Court cannot exercise personal jurisdiction over Defendants Grimes & Battersby, LLP (a Connecticut limited liability partnership) or Defendant Charles W. Grimes (a Connecticut resident) unless (1) each is amenable to suit under Ohio's long-arm statute and (2) the due process requirements of the United States Constitution are met.

Reynolds, 23 F.3d at 1115. For the reasons set forth at Section XII, Part E, Plaintiff can satisfy neither in the case at bar.

The Amended Complaint (ECF No. 3) does not allege that either Defendant Grimes & Battersby, LLP or Defendant Charles W. Grimes were ever present in Ohio. Although Defendant Charles W. Grimes sent cease-and-desist letters to Plaintiff in Ohio, "letters sent into the forum do not constitute . . . presence in Ohio." *Hildebrand, 279 F.3d at 1355*. Personal jurisdiction also does not exist because Plaintiff's reliance on the two letters that Defendant Charles W. Grimes sent to Plaintiff from his Connecticut office offends due process. *See* Section XIV, Part **[*115]** B(4). *See also* *Calphalon Corp., 228 F.3d at 721*; *Cadle Co. v. Schlichtmann, 123 Fed. Appx. 675, 681 (6th Cir. 2005)* (rejected the idea that a letter sent from an out-of-state attorney could form the basis of personal jurisdiction in Ohio).

XVII.

Defendant Max Rohr, Inc. has an insufficient connection to Ohio to satisfy the minimum contacts necessary for personal jurisdiction in the case at bar. Privileged efforts to protect trademark rights cannot be the basis for personal jurisdiction.

The Amended Complaint (ECF No. 3) does not allege that Defendant Max Rohr, Inc. resides in or had any contact with Ohio, except that Defendant Grimes & Battersby, LLP sent the cease-and-desist letters to Plaintiff on Max Rohr's behalf. Defendant Max Rohr, Inc. has no Ohio contacts on which personal jurisdiction can be based. Defendant Max Rohr, Inc. is a Delaware corporation with offices located in Wilmington, Delaware.[27] Declaration of Pamela Jasinski (ECF No. 33-2) at ¶ 1. Defendant Max Rohr, Inc. has never solicited business in the state of Ohio, has never contracted to sell any goods or services in the state of Ohio, and has never transacted any business in the state of Ohio. *Id*. at ¶¶ 7-10. Other **[*116]** than in connection with the Opposition Proceeding at the Trademark Trial and Appeal Board of the PTO, Defendant Max Rohr, Inc. has never had any agents or employees in the state of Ohio. *Id*. at ¶¶ 11 and 16. Likewise, Defendant Max Rohr, Inc. has never had any contact with Plaintiff other than the cease-and-desist letters sent by Defendant Grimes & Battersby, LLP, the receipt of service of process in the case at bar, and its involvement as a party in the Opposition Proceeding before the Trademark Trial and Appeal Board. *$d*. at ¶ 16. Except in connection with its privileged efforts to enforce its trademark rights, Defendant Max Rohr, Inc. has had no contact or relation with the state of Ohio whatsoever, and has never had any expectation of being sued here. *Id*. ¶ 19.

Defendant Max Rohr, Inc. has never maintained offices or owned property in the state of Ohio. *Id*. at ¶¶ 12-13. Moreover, Defendant Max Rohr, Inc., being exclusively a trademark holding company, does not operate any business and therefore has no operational revenue of any kind as a result of its activities in Ohio. *Id*. at ¶¶ 6 **[*117]** and 14. Defendant Max Rohr, Inc. has never established a mailing address or phone listing in Ohio. *Id*. at ¶ 15.

The discussion at the beginning of Section XIII, Part B is incorporated herein by reference.

A. Ohio's Litigation Privilege Protects Defendant Max Rohr, Inc. from Claims Based on the Work that Defendants Grimes & Battersby, LLP and Charles W. Grimes Performed on Its Behalf Before the PTO, or to Enforce Registered Marks

For the reasons set forth at Section X, Part H, the work of Defendants Grimes & Battersby, LLP and Charles W. Grimes, as counsel for Defendant Max Rohr, Inc., in connection with the registration and enforcement of trademarks, cannot be the basis for liability to Plaintiff.

---

[27] Defendant Max Rohr, Inc. was served in Wilmington, Delaware. *See* Return of Service (ECF No. 21).

B. The RICO Statute Cannot be Used to Establish Personal Jurisdiction Over Defendant Max Rohr, Inc. Because Plaintiffs RICO Allegations Fail to State a Justiciable Claim

For the reasons set forth at Section XI, Part A(1), Plaintiff cannot utilize RICO's nationwide service provision, *18 U.S.C. § 1965(b)* and *(d)*, to secure personal jurisdiction over Defendant Max Rohr, Inc.

C. Plaintiff Cannot Establish Personal Jurisdiction Over Defendant Max Rohr, Inc. Under the Antitrust Laws

1. Plaintiff Cannot [*118] Establish Jurisdiction Over Defendant Max Rohr, Inc. Under 15 U.S.C. § 22 Because the Amended Complaint (ECF No. 3) Fails to State an Antitrust Claim Against It and Ohio is an Improper Venue

For the reasons set forth at Section XV, Part A(1)(c), Plaintiff cannot utilize the worldwide service provision of *Section 12* of the Clayton Act, *15 U.S.C. § 22*, to secure personal jurisdiction over Defendant Max Rohr, Inc.

2. Plaintiff Cannot Establish Personal Jurisdiction Over Defendant Max Rohr, Inc. Under 15 U.S.C. § 5 or 15 U.S.C. § 15

For the reasons set forth at Section XI, Part A(2), neither of the other provisions of the Clayton Act that Plaintiff invokes against Defendant Max Rohr, Inc.-*15 U.S.C. § 5* or *15 U.S.C. § 15*-establish personal jurisdiction over it.

Moreover, just as is the case with Defendants Grimes & Battersby, LLP and Charles W. Grimes, *15 U.S.C. § 15* does not help Plaintiff to establish personal jurisdiction over Defendant Max Rohr, Inc. in Ohio. It merely establishes proper venue for an antitrust action. *See* *Norman's v on the Waterfront, 1974 U.S. Dist. LEXIS 7588, at *3* ("Paragraph 1 of the complaint states that jurisdiction and venue are founded on . . . *15 U.S.C. § 15*. **[*119]** It is true that [this] provision[ ] [does not] authorize the exercise of personal jurisdiction."). Just as venue would be improper under *15 U.S.C. § 22*, it is likewise improper under *15 U.S.C. § 15*. Federal courts analyzing this provision have required a plaintiff to establish that the defendant has a "substantial" level of contact with a given jurisdiction before the defendant will be "found" within that jurisdiction. *See, e.g.*, *Redmond, 359 F. Supp. at 669-71*. Other than its trademark policing activities-activities privileged under Ohio law-the Amended Complaint (ECF No. 3) makes no allegations that Defendant Max Rohr, Inc. has had any contact with the state of Ohio. In fact, Defendant Max Rohr, Inc. does not reside in, cannot be found in, and does not have agents in the Northern District of Ohio. ECF No. 33-2 at ¶¶ 3, 6-15, and 18. Because Plaintiff does not and cannot allege that Defendant Max Rohr, Inc. has the connection to Ohio required for proper venue under *15 U.S.C. § 15*, it must be dismissed for lack of personal jurisdiction. *Redmond, 359 F.Supp. at 671*.

D. Plaintiff Cannot Establish Personal Jurisdiction Based on Due Process and the Ohio Long-Arm Statute

The discussion at **[*120]** Section XVI, Part B(3) is incorporated herein by reference.

XVIII.

On April 26, 2010, Plaintiff filed another Amended Complaint (ECF No. 37) without seeking leave of Court, which although styled as a "First Amended Pleading" is truly a Second Amended Complaint. Defendants moved to strike Plaintiff's "First Amended Pleading" and the Court granted Defendants' motion on July 2, 2010. In the July 2, 2010 Memorandum Opinion and Order (ECF No. 52). the Court also instructed Plaintiff to file responses to Defendants' pending motions to dismiss by July 26, 2010 and noted: "*Failure to timely oppose these motions may result in summary dismissal of this action*" (emphasis added).

On July 21, 2010, Plaintiff filed the within motion, which seeks leave to file a further amended complaint, rather than address the substance of Defendants' various pending Motions to Dismiss (ECF Nos. 26-33). As stated above in Section EX, the Court entered an Order (ECF No. 57) that advised Plaintiff that the Court intended to rule on his motion to further amend his Amended Complaint (ECF No. 53) at the same time it ruled on Defendants' various pending motions. Plaintiff was, therefore, granted leave to file a response(s) **[*121]** to the eight comprehensive and case-dispositive motions to dismiss.

Plaintiff seeks to add two additional new party defendants by virtue of the proposed amendment. He seeks to join as defendants Tabacalera Brands, Inc. and Commonwealth Brands, Inc., two additional companies in Defendant Altadis U.S.A. Inc.'s corporate family. Plaintiff also seeks to add a proposed "Fifth Claim for Relief and to expand his claim under the Lanham Act to increase the number of trademark registrations he seeks to cancel from 56 to approximately 380.

The Court denies Plaintiff's Motion for Leave to File an Amended Pleading (ECF No. 53) for two reasons.[28] First, the procedural and substantive defects in Plaintiff's claims are not curable. *Kottmyer v. Maas, 436 F.3d 684, 692 (6th Cir. 2006)* ("A district court may deny a plaintiff leave to amend his . . . complaint . . . when the proposed amendment would be futile.") For example, Plaintiff has added a proposed "Fifth Claim for Relief to "null and void" Defendants trademarks. *See* ECF No. 53-2 at 25-26. However, there is no private right of action for declaratory relief under the Cuban Assets Control Regulations, *31 C.F.R. § 515.101 et seq*. *See* *Glen v. Club Mediterranee S.A.., 365 F. Supp. 2d 1263, 1272 (S.D. Fla. 2005)* **[*122]** (citing *Schilling v. Rogers, 363 U.S. 666, 80 S. Ct. 1288, 4 L. Ed. 2d 1478 (1960)* and explaining that where the plaintiff has no "remedial right" under a statute the Court lacked jurisdiction to consider the claim). The First Amended Pleading (ECF Nos. 53-1 and 2) would not withstand a motion to dismiss.

Second, the current defendants will be unduly prejudiced by the proposed amendment because Defendants reasonably relied upon the Amended Complaint (ECF No. 3) as the controlling affirmative pleading, to which they expended substantial time, effort, and legal fees in preparing and filing eight responsive motions to dismiss.

Thus, the Court hereby brings an end to this litigation in this court.

XIX.

The Court also dismisses without prejudice Plaintiff's allegations against John Does 1-10 as service of process, and, by extension the **[*123]** institution of a lawsuit, cannot be effected on fictitious persons. *Webster v. Freedom Debt Relief, LLC. No. 1:10CV1587, 2011 U.S. Dist. LEXIS 85848, 2011 WL 3422872, at *2 (N.D. Ohio Aug. 4, 2011)*.

IT IS SO ORDERED.

March 30, 2012

Date

/s/ Benita Y. Pearson

---

[28] In their Memorandum in Opposition (ECF No. 54), Defendants argue that "Plaintiff's Motion for Leave to Amend should be denied because Plaintiff has unduly delayed in seeking leave to amend. Defendants submit that Plaintiff seeks leave now in an attempt to delay responding to the pending motions to dismiss." ECF No. 54 at 3. Given the Court's prior ruling, *see* ECF No. 57, this argument is moot.

Benita Y. Pearson

United States District Judge

Ochoa v. United States Bank N.A.

United States District Court for the Southern District of California

April 2, 2012, Decided; April 2, 2012, Filed

2012 U.S. Dist. LEXIS 201308 *; 2012 WL 13176112

CLEMENTE OCHOA, Plaintiff, vs. U.S. BANK N.A., et al., Defendants.

Core Terms

allegations, motion to dismiss, concealment, judicial notice, trustee sale, trust deed, fraudulent, negligent misrepresentation, leave to amend, Notice, unfair, intentional misrepresentation, quiet title, documents, recorded

Counsel: **[*1]** Clemente Ochoa, Plaintiff, Pro se, San Diego, CA USA.

For U.S. Bank N.A., as Trustee for Structured Asset Securities Corporation Trust 2006-WF3, Wells Fargo Bank, N.A., First American Loan Star Trustee Services, Llc, a Texas limited liability company, First American Title Company, a California corporation, Defendants: Kathryn Anne Moorer, LEAD ATTORNEY, Wright Finlay & Zak LLP, Newport Beach, CA USA.

Judges: MARILYN L. HUFF, UNITED STATES DISTRICT JUDGE.

Opinion by: MARILYN L. HUFF

Opinion

ORDER GRANTING MOTION TO DISMISS

On February 9, 2012, Defendants U.S. Bank N.A. and Wells Fargo Bank N.A. filed a motion to dismiss Plaintiff Clemente Ochoa's complaint. (Doc. No. 5.) On February 17, 2012, Plaintiff, proceeding pro se, filed his response in opposition to the motion to dismiss. (Doc. No. 7.) On February 27, 2012, Defendants filed a reply. (Doc. No. 10.) The Court determined this matter appropriate for resolution without oral argument and submitted the matter. (Doc. No. 11.)

Background

On or about June 21, 2006, Mr. Clemente Ochoa obtained a loan from Wells Fargo in the amount of $493,000, which was secured by a deed of trust ("Deed of Trust") against the property at 2948 Clay Avenue #A-C, San Diego, CA 92113. (Doc. **[*2]** No. 5-1 at ¶ 18.) In January 2009, Plaintiff received a loan modification. Plaintiff ultimately defaulted on the modified loan agreement and a Notice of Default was recorded on June 12, 2009, when the amount in arrears had reached $58,747.07. On July 28, 2009, Wells Fargo substituted in as trustee under the Deed of Trust First American Loan Star Trustee Services, LLC. On July 28, 2009, the beneficial interest under the Deed of Trust was assigned to U.S. Bank. A Notice of Trustee's Sale was recorded identifying April 1, 2011 as the date for public auction. The trustee's sale has been postponed due, in part, to Plaintiff's chapter 13 bankruptcy. Plaintiff originally filed suit in the Superior Court of California, County of San Diego, asserting state law claims for (1) unlawful/unfair business practices in violation of *Cal. Bus. & Prof. Code § 17200*; (2) intentional misrepresentation; (3) negligent misrepresentation; (4) fraudulent concealment; (5) quiet title; and (6) declaratory relief. Ochoa v. U.S. Bank, N.A., Superior Court of California, County of San Diego, Case No. 37-2011-00102826-CU-OR-CTL (filed December 21, 2011). On February 2, 2012, Defendants removed the action to this court on diversity grounds. Defendants **[*3]** now seek to dismiss Plaintiff's claims under *Federal Rule of Civil Procedure 12(b)(6)*.

Discussion

I. Motion to Dismiss Pursuant to *Fed. R. Civ. P. 12(b)(6)*

A motion to dismiss a complaint under *Federal Rule of Civil Procedure 12(b)(6)* tests the legal sufficiency of the claims asserted in the complaint. *Navarro v. Block, 250 F.3d 729, 732 (9th Cir. 2001)*. *Rule 8(a)(2)* requires that a pleading stating a claim for relief contain "a short and plain statement of the claim showing that the pleader is entitled to relief." The function of this pleading requirement is to "give the defendant fair notice of what the . . . claim is and the grounds upon which it rests." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. "While a complaint attacked by a *Rule 12(b)(6)* motion to dismiss does not need detailed factual allegations, a plaintiff's obligation to provide the 'grounds' of his 'entitlement to relief' requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." Id. A complaint does not "suffice if it tenders 'naked assertion[s]' devoid of 'further factual enhancement.'" *Ashcroft v. Iqbal, 556 U.S. 662, 129 S.Ct. 1937, 1949, 173 L. Ed. 2d 868 (2009)* (quoting *Twombly, 550 U.S. at 557*). "Factual allegations must be enough to raise a right to relief above the speculative level." *Twombly, 550 U.S. at 555* (citing 5 C. Wright & A. Miller, Federal Practice and Procedure § 1216, pp. 235-36 (3d ed. 2004)). "All allegations of material fact are taken as true and construed in the light most favorable **[*4]** to plaintiff. However, conclusory allegations of law and unwarranted inferences are insufficient to defeat a motion to dismiss for failure to state a claim." *Epstein v. Wash. Energy Co., 83 F.3d 1136, 1140 (9th Cir. 1996)*; see also *Twombly, 550 U.S. at 555*.

"Generally, a district court may not consider any material beyond the pleadings in ruling on a *Rule 12(b)(6)* motion." *Hal Roach Studios, Inc. v. Richard Feiner & Co., Inc., 896 F.2d 1542, 1555 n. 19 (9th Cir. 1990)*. The court may, however, consider the contents of documents specifically referred to and incorporated into the complaint. *Branch v. Tunnell, 14 F.3d 449, 454 (9th Cir. 1994)* overruled on other grounds by *Galbraith v. County of Santa Clara, 307 F.3d 1119, 1127 (9th Cir. 2002)*. A court may also consider judicially noticed facts to show whether a complaint states a cause of action. *Sears, Roebuck & Co. v. Metropolitan Engravers, Ltd., 245 F.2d 67, 70 (9th Cir. 1956)*.

II. Plaintiff's Complaint

A. Unlawful/Unfair Business Practices

California's Unfair Competition Law ("UCL") prohibits "any unlawful, unfair or fraudulent business act or practice and unfair, deceptive, untrue or misleading advertising." *Cal. Bus. & Prof. Code §17200*. An act is "unlawful" if it violates an underlying state or federal statute or common law. *Cel-Tech Communications, Inc. v. Los Angeles Cellular Tel. Co., 20 Cal. 4th 163, 180, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*. An act is "unfair" if it "threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *Id. at 187*. Under the UCL, conduct is deceptive or misleading if it is likely **[*5]** to deceive an ordinary consumer. *Williams v. Gerber Products Co., 552 F.3d 934, 938 (9th Cir. 2008)*. To have standing for a violation of *Section 17200*, a plaintiff must allege that he suffered an injury-in-fact as a result of the unfair or unlawful conduct. *Cal. Bus. & Prof. Code §17204*; see also *Hale v. Sharp Healthcare, 183 Cal. App. 4th 1373, 1384, 108 Cal. Rptr. 3d 669 (2010)*.

Federal Rule of Civil Procedure 9(b)'s heightened pleading standards apply to claims for violation of the UCL that are grounded in fraud. *Kearns v. Ford Motor Co., 567 F.3d 1120, 1125 (9th Cir. 2009)*. Under *Rule 9(b)*, a plaintiff must plead fraud with particularity. *Fed. R. Civ. P. 9(b)*. "*Rule 9(b)*'s particularity requirement applies to state-law causes of action." *Vess v. Ciba-Geigy Corp. USA, 317 F.3d 1097, 1103 (9th Cir. 2003)*. "Averments of fraud must be accompanied by 'the who, what, when, where, and how' of the misconduct charged." *Id. at 1106* (quoting *Cooper v. Pickett, 137 F.3d 616, 627 (9th Cir.1997))*.

Defendant asserts that the complaint only provides conclusory allegations that Defendant violated the UCL. (Doc. No. 5-1 at ¶¶ 39-50.) For example, Plaintiff alleges that Defendants wrongfully foreclosed and sold the property without legal standing to do so. (Id. at ¶ 40.) Plaintiff also alleges that Defendants deceptively posted a notice of trustee's sale without legal standing to do so. (Id. at ¶ 43.) Plaintiff further alleges that Defendants used fraudulent documents to illegitimately foreclose upon and sell the property. (Id. at ¶ 45.)

Defendant challenges the adequacy of these allegations under *Rule 9(b)*. The Court concludes that the allegations in the **[*6]** complaint are insufficient to establish a claim for violation of the UCL under *Rule 9(b)*. Plaintiff's complaint does not provide specific facts to support the who, what, when, where, and how of Defendants' conduct violates the UCL. See *Vess, 317 F.3d at 1103* ("Averments of fraud must be accompanied by the who, what, when, where, and how of the misconduct charged."). For example, Plaintiff does not plead facts relating to how Defendants' actions led to an injury-in-fact. Plaintiff still holds legal title to the property, is still in possession of the property, and no trustee's sale has taken place. Therefore, the complaint lacks facts showing how he sustained an injury based on Defendants' actions. Therefore, the complaint falls short of the pleading standards required under *Rule 9(b)*. Accordingly, the Court grants Defendants' motion to dismiss Plaintiff's UCL claim with thirty (30) days leave to amend.

B. Intentional Misrepresentation

To establish a fraudulent claim for intentional misrepresentation, the plaintiff must establish seven essential elements: (1) the defendant represented to the plaintiff that an important fact was true; (2) that representation was false; (3) the defendant knew that the representation was false **[*7]** when the defendant made it, or the defendant made the representation recklessly and without regard for its truth; (4) the defendant intended that the plaintiff rely on the representation; (5) the plaintiff reasonably relied on the representation; (6) the plaintiff was harmed; and (7) the plaintiff's reliance on the defendant's representation was a substantial factor in causing that harm to the plaintiff. *Manderville v. PCG & S Group, Inc., 146 Cal. App. 4th 1486, 1498, 55 Cal. Rptr. 3d 59 (2007)*.

Defendants challenge the sufficiency of Plaintiff's conclusory allegations regarding intentional misrepresentation of material facts. For example, Plaintiff alleges that Defendants falsely represented their right to foreclose and sell the property. (Doc. No. 5-1 at ¶¶ 51-52.) Plaintiff also alleges that Defendants made this representation with the intent to induce him into surrendering his property. (Id. at ¶ 55.) Plaintiff further alleges that he reasonably relied on these representations. (Id. at ¶ 56.)

Defendant asserts that the complaint lacks facts to support these allegations. The Court concludes that the complaint does not provide sufficient facts to satisfy the pleading requirements of fraud-based claims under *Rule 9(b)*. See *Vess, 317 F.3d at 1103* ("Averments of fraud must be accompanied by the who, what, **[*8]** when, where, and how of the misconduct charged."). For example, Plaintiff does not plead facts relating to how he has relied on Defendants' representations. Plaintiff still holds legal title to the property, is still in possession of the property, and no trustee's sale has taken place. Therefore, the complaint lacks facts to establish how he relied on Defendants' representations. Plaintiff's allegations that Defendants induced him into surrendering the property cannot stand because he is still in possession of the property. Accordingly, the Court concludes that the complaint does not establish a claim for intentional misrepresentation and grants Defendants' motion to dismiss this claim with thirty (30) days leave to amend.

C. Negligent Misrepresentation

The tort of negligent misrepresentation encompasses '[t]he assertion, as a fact, of that which is not true, by one who has no reasonable ground for believing it to be true', and '[t]he positive assertion, in a manner not warranted by the information of the person making it, of that which is not true, though he believes it to be true.' *Small v. Fritz Companies, Inc., 30 Cal. 4th 167, 173-74, 132 Cal. Rptr. 2d 490, 65 P.3d 1255 (2003)*. Negligent misrepresentation does not require scienter or intent to defraud. *McClain v. Octagon Plaza, LLC, 159 Cal. App. 4th 784, 71 Cal. Rptr. 3d 885 (2008)*. "As is true of negligence, **[*9]** responsibility for negligent misrepresentation rests upon the existence of a legal duty, imposed by contract, statute or otherwise, owed by a defendant to the injured person. The determination of whether a duty exists is primarily a question of law." *Eddy v. Sharp, 199 Cal.App.3d 858, 864, 245 Cal. Rptr. 211 (1988)*. "[A]s a general rule, a financial institution owes no duty of care to a borrower when the institution's involvement in the loan transaction does not exceed the scope of its conventional role as a mere lender of money." *Das v. Bank of America, 186 Cal. App. 4th 727, 740, 112 Cal. Rptr. 3d 439 (2010)*.

Defendant contends that it does not owe a legal duty of care to Plaintiff because it operated within the scope of its traditional role as a lender of money. The complaint lacks facts to support that Defendants exceeded its traditional role as a lender of money. See *Das, 186 Cal. App. 4th at 740* ("[A]s a general rule, a financial institution owes no duty of care to a borrower when the institution's involvement in the loan transaction does not exceed the scope of its conventional role as a mere lender of money.") Therefore, the Court concludes that the complaint fails to plead a duty of care owed to Plaintiff. Accordingly, the Court concludes that the complaint does not establish a claim for negligent misrepresentation, and grants Defendants' motion **[*10]** to dismiss this claim with thirty (30) days leave to amend.

D. Fraudulent Concealment

The elements of fraudulent concealment are: "(1) the defendant must have concealed or suppressed a material fact, (2) the defendant must have been under a duty to disclose the fact to the plaintiff, (3) the defendant must have intentionally concealed or suppressed the fact with the intent to defraud the plaintiff, (4) the plaintiff must have been unaware of the fact and would not have acted as he did if he had known of the concealed or suppressed fact, and (5) as a result of the concealment or suppression of the fact, the plaintiff must have sustained damage." *Kaldenbach v. Mutual of Omaha Life Ins. Co., 178 Cal. App. 4th 830, 850, 100 Cal. Rptr. 3d 637 (2009)*; accord *Levine v. Blue Shield of California, 189 Cal. App. 4th 1117, 1126-1127, 117 Cal. Rptr. 3d 262 (2010)*.

Defendant argues that the complaint does not provide sufficient facts to satisfy the heightened pleading requirement of fraud-based claims under *Rule 9(b)*. See *Vess, 317 F.3d at 1103* ("Averments of fraud must be accompanied by the who, what, when, where, and how of the misconduct charged."). For example, Plaintiff does not plead facts relating to how Defendants' concealment led to his injury. Plaintiff still holds legal title to the property, is still in possession of the property, and no trustee's sale has taken place. Therefore, the complaint lacks facts indicating **[*11]** how he sustained an injury based on Defendants' actions. Accordingly, the Court concludes that the complaint does not establish a claim for fraudulent concealment, and grants Defendants' motion to dismiss this claim with thirty (30) days leave to amend.

E. Quiet Title

Under California law, a quiet title action must include: (1) a description of the property in question; (2) the basis for plaintiff's title; and (3) the adverse claims to plaintiff's title. *Cal. Code Civ. Proc. § 761.020*. A borrower may not quiet title without first paying the outstanding debt on the property. See *Miller v. Provost, 26 Cal. App. 4th 1703, 1707, 33 Cal. Rptr. 2d 288 (1994)* ("a mortgagor of real property cannot, without paying his debt, quiet his title against the mortgagee"); *Karlsen v. Am. Sav. & Loan Ass'n, 15 Cal. App. 3d 112, 92 Cal. Rptr. 851 (1971)*. The first amended complaint does not alleged that Plaintiff paid his outstanding debt obligations under the Deed of Trust. Therefore, the Court concludes that Plaintiff fails to state a claim for quiet title, and grants Defendant's motion to dismiss the claim to quiet title with thirty (30) days leave to amend.

F. Declaratory Relief

The Declaratory Judgment Act provides, in relevant portion, that "[i]n a case of actual controversy within its jurisdiction. . ., any court of the United States. . . may declare the rights and other legal relations **[*12]** of any interested party seeking such declaration." *28 U.S.C. § 2201(a)*. "A 'controversy' in this sense must be one that is appropriate for judicial determination. . . A justiciable controversy is [not one] of a hypothetical or abstract character [or] one that is academic or moot. . . [It is] definite and concrete, touching the legal relations of parties having adverse legal interests." *Aetna Life Ins. Co. v. Haworth, 300 U.S. 227, 240-241, 57 S. Ct. 461, 81 L. Ed. 617 (1937)*. Issuing a declaratory judgment in a case without an actual controversy is an advisory opinion, which is prohibited by Article III of the United States Constitution. *Hillblom v. United States, 896 F.2d 426, 430 (9th Cir. 1990)*.

In view of the Court's determinations on Plaintiff's other causes of action, the Court concludes that the claim for declaratory relief constitutes an improper request for an advisory opinion. Accordingly, the Court grants Defendants' motion to dismiss this claim with thirty (30) days leave to amend.

III. Request For Judicial Notice

Federal Rule of Evidence 201 permits judicial notice of adjudicative facts, which are defined as facts "not subject to reasonable dispute." *Fed. R. Evid. 201(b)*. A judicially noticed fact must be one that is not subject to reasonable dispute in that it is either: (1) generally known within the territorial jurisdiction of the trial court or (2) capable of accurate and ready determination by resort to sources whose accuracy **[*13]** cannot reasonably be questioned. Id. A court may take judicial notice of "[r]ecords and reports of administrative bodies." *Barron v. Reich, 13 F.3d 1370, 1377 (9th Cir. 1994)*; see also *Interstate Natural Gas Co. v. S. Cal. Gas Co., 209 F.2d 380, 385 (9th Cir. 1953)* ("We may take judicial notice of records and reports of administrative bodies.").

Defendants request this Court to take judicial notice of seven documents: (1) A Deed of Trust (Doc. No. 5-2 at 5-33, "Exhibit 1"); (2) A Loan Modification Agreement (Id. at 34-39, "Exhibit 2"); (3) A Notice of Default and Election to Sell (Id. at 40-43, "Exhibit 3"); (4) A Substitution of Trustee (Id. at 44-46, "Exhibit 4"); (5) An Assignment of Deed of Trust (Id. at 47-48, "Exhibit 5"); (6) A Notice of Trustee's Sale (Id. at 49-50, "Exhibit 6"); and (7) A Voluntary Petition filed in the United States Bankruptcy Court, Southern District of California (Id. at 51-57, "Exhibit 7"). Exhibits 1-6 are documents that have been officially recorded at the San Diego County Recorder's Office. Exhibit 7 is a copy of petition filed with U.S. Bankruptcy Court for the Southern District of California. Therefore, these documents are records of administrative bodies and courts, each of which are readily ascertainable and verifiable. Accordingly, the Court takes judicial notice of Defendants' Exhibits 1-7.

Conclusion

Based on the foregoing, **[*14]** the Court grants Defendants' motion to dismiss Plaintiff's complaint. The Court permits Plaintiff to file an amended complaint, if he can cure the deficiencies noted in this Order, within thirty (30) days of this Order.

IT IS SO ORDERED.

Opinion

MEMORANDUM

GENE E.K. PRATTER, J.

I. Introduction

Defendant egg producers and trade groups move for the dismissal of claims for damages outside the statutes of limitations applicable in the various jurisdictions that recognize the Indirect Purchaser Plaintiffs' antitrust, consumer protection, and unjust enrichment claims in the Second Consolidated Amended Class Action Complaint (hereinafter, the "IPSAC").[1] Specifically, the motion seeks partial dismissal of 33 state law claims emanating from 17 different jurisdictions.[2] For the following reasons, the Court grants the motion without prejudice.

II. Background, Factual Allegations, and Legal Standards

The background of this litigation and the core factual allegations contained in the IPSAC are set forth at length in the Court's *March 19, 2012 Opinion and Order, 2012 U.S. Dist. LEXIS 37265, 2012 WL 935669* (Doc. Nos. 631 and 632). That Opinion also discussed the applicable legal standards for reviewing a motion to dismiss in this case, including the relevance of the *Erie* doctrine's precepts to the Court's consideration of the Plaintiffs' state law claims, as well as *Federal Rules of Civil Procedure 8*, *9(b)*, and *12(b)(6)*. Therefore, the Court need not repeat that legal framework in this Memorandum except to incorporate the prior Opinion by reference. *See* *2012 U.S. Dist. LEXIS 37265, [WL] at *1-6*. Insofar that any such previously-discussed matters arise in-depth as a predicate to the Court's rulings here, the Court will include more explicit discussion as appropriate.

III. Legal Discussion

In their briefing, Defendants have summarized the relevant limitations periods governing the 33 state law claims, which range from three to six years. *See* Defs.' Mot. at 2-3 & n.4. The Defendants have calculated their proposed limitations dates based **[*4]** upon the filing dates of the first direct purchaser suit consolidated in these proceedings to have first asserted claims under the various state laws. *See id.* at 2 & n.2; Defs.' Proposed Order at 1-3.

Plaintiffs have not raised any objections to those limitations periods or the calculation of the statutes of limitations dates as to each state claim at issue. Plaintiffs also have not contended as a general matter that those statutes of limitations, as calculated and absent any applicable equitable tolling, would not curtail their claims for damages.

The parties' focal point of dispute, and the kernel of the motion to dismiss, concerns whether Plaintiffs sufficiently alleged facts that demonstrate their entitlement to equitably toll the various state statutes of limitations pursuant to those jurisdictions' respective fraudulent concealment doctrines, or comparable equitable tolling doctrines.[3] The

[1] The Defendants filed their Motion to Dismiss the Indirect Purchaser Plaintiffs' Claims for Damages Barred by the Statutes of Limitations of Various States at Docket No. 331. The Plaintiffs' response is at Docket No. 353, and the Defendants' reply brief is at Docket No. 384. The parties also submitted several supplemental **[*2]** materials to the Court. The transcript of the oral argument on the motion is contained in the record at Docket No. 597.

[2] Certain claims in the IPSAC are not, or are no longer, subject to this motion. Defendants have not moved to dismiss as time-barred the Sherman Act claim, the Wisconsin antitrust and unjust enrichment claims, the California unjust enrichment claim, and all claims brought under the laws of Massachusetts, Nevada, New Mexico, and West Virginia. *See* Defs.' Mot. at 3 n.4. Certain other claims also are not subject to this motion: those state claims which the Court dismissed by granting in part the Defendants' prior Motion—the consumer protection claims arising under the laws of Kansas and New York, the North Dakota unjust enrichment claim, and the Plaintiffs' Utah Antitrust Act claim with respect to alleged damages occurring prior to May 1, 2006—and those claims that Plaintiffs voluntarily withdrew, namely, all claims brought under Maine or Puerto Rico law, and the consumer protection claims brought under the laws of Michigan, South Dakota, and Wisconsin. To the extent that the motion *sub judice* sought to dismiss one of these claims that are no longer a part of the case, **[*3]** the Court does not address that aspect of this motion.

[3] To the **[*5]** extent that the Plaintiffs rely on equitable tolling doctrines other than the fraudulent concealment doctrine for certain jurisdictions (such as jurisdictions that recognize multiple equitable tolling doctrines, or those jurisdictions that embrace the principles of "fraudulent concealment" within the manifolds of another equitable tolling doctrine, such as, by way of example, equitable estoppel, or those that might incorporate the discovery rule into the fraudulent concealment doctrine), the parties appear to posit that the principles and standards that the Motion places at issue, and as discussed in this Memorandum, as to fraudulent concealment are, as a general matter, equally applicable across jurisdictions without consideration for the actual doctrine at issue. *See, e.g.,* Tr. at 16-17; 40-43; 54. In light of the Court's ruling here, which focuses on the actual facts pled in

parties implicitly agree that if Plaintiffs adequately plead facts in support of fraudulent concealment pursuant to the constraints of *Rules 12(b)(6)* and *9(b)*, then the doctrine functions so that Plaintiffs may pursue their state claims for recovery of damages during the tolled period.

The Court previously addressed the specific statute of limitations principles and the federal fraudulent concealment doctrine appurtenant to the Direct Purchaser Plaintiffs' Sherman Act claim in a prior decision. *See* *Nov. 30, 2011 Opinion and Order, 2011 U.S. Dist. LEXIS 139995, 2011 WL 5980001* (Doc. Nos. 593 and 594). The Court references here the explanation in that decision of the operation of certain legal precepts which the parties appear to presume are generally (although not necessarily specifically) applicable to the various jurisdictions' jurisprudence concerning statutes of limitations and the fraudulent concealment doctrine.

The Defendants' motion can be distilled into three separate categories of arguments concerning (1) judicial notice of documents external to the IPSAC, (2) failure to plead affirmative acts of concealment, and (3) whether Kansas law recognizes the fraudulent concealment doctrine. The Court addresses each in turn.

A. Requests for Judicial Notice

Defendants argue that the "Plaintiffs' allegations and judicially noticeable materials establish that, before and throughout the alleged class period, **[*7]** Defendants openly and publicly discussed the mechanisms purportedly used to implement the so-called conspiracy—the UEP Certification program, the UEP recommendations for flock reductions, and egg exports." Defs.' Mot. at 5 (footnote omitted). Defendants urge the Court to take judicial notice of "newspaper and magazine articles not referenced in Plaintiffs' complaints" for the "fact [of] that press coverage . . . without regard to the truth of their contents" so as to determine whether they constitute "storm warnings" that might trigger inquiry notice. *Id.* at 5 n.7 (emphasis omitted) (internal quotation marks omitted). According to Defendants, "[t]hese publications demonstrate that Defendants repeatedly, routinely, and freely discussed the facts underlying Plaintiffs' supposedly 'concealed' conspiracy." *Id.* at 6. Defendants contend that the publications ultimately demonstrate that "Defendants concealed nothing," and that the various fraudulent concealment doctrines of each jurisdiction at issue are not available to Plaintiffs for purposes of tolling the statutes of limitations. *Id.* at 11.

Plaintiffs do not object to the Defendants' request for judicial notice *per se,* but instead claim **[*8]** that the publications "to which the Defendants point in the Motion *are* the fraud." Pls.' Resp. at 2 (emphasis in original). Indeed, Plaintiffs appear to make their own request for judicial notice of a document called the "Assurance of Voluntary Compliance," which Plaintiffs have proffered for the Court's consideration as a means of illustrating the "misleading nature of Defendants' conduct." Pls.' Resp. at 2 (describing the document).

The Court previously considered similar requests for judicial notice in conjunction with a motion to dismiss the Direct Purchaser Plaintiffs' Second Consolidated Amended Class Action Complaint on the basis of a statute of limitations and fraudulent concealment. In that pleading, the Direct Purchasers had alleged "certain facts drawn from excerpted quotes of various publicly disseminated egg industry publications and regional newspapers between 1999 and September 24, 2004," and Defendants urged the Court to take judicial notice of those publications. *Nov. 30, 2011 Opinion and Order, 2011 U.S. Dist. LEXIS 139995, 2011 WL 5980001, at *5*. The Court declined, recognizing that "as a general matter, 'a district court ruling on a motion to dismiss may not consider matters extraneous to the **[*9]** pleadings.'" *2011 U.S. Dist. LEXIS 139995, [WL] at *6* (quoting *In re Burlington Coat Factory Sec. Litig., 114 F.3d 1410, 1426 (3d Cir. 1997))*.

The Court also explained that "even if the cited articles were 'sources whose accuracy cannot reasonably be questioned' and concerned matters that are 'capable of accurate and ready determination,' the articles ought not be relied upon at this stage of the litigation to determine whether or not Defendants concealed the conspiracy"

---

the IPSAC, the Court need not explore the distinctions between other equitable tolling doctrines and fraudulent concealment generally, or specifically as to any particular jurisdiction. Nonetheless, as this litigation proceeds and insofar that jurisdiction-specific laws on equitable tolling may arise again, **[*6]** the parties will need to be explicit as to what doctrine(s) in a given jurisdiction are at issue.

because such consideration would constitute a merits inquiry, which is appropriate for another, subsequent stage of the litigation. *Id.*

Insofar as the Court could properly consider the publications for the purpose of establishing that their content was publicly available, the Court nonetheless declined to take judicial notice of their contents. *2011 U.S. Dist. LEXIS 139995, [WL] at *7*. The Court observed that the exercise of ascertaining whether the Direct Purchaser Plaintiffs were on inquiry notice requires a fact intensive inquiry as to "whether a plaintiff should have known of her claim and the reasonableness of a plaintiff's investigation." *Id.* The Court concluded that judicial notice of the documents in question would be unproductive because "there are no grounds in the [complaint] **[*10]** from which to conclude that Plaintiffs contemporaneously knew of, or reasonably should have been expected to know of, those documents." *2011 U.S. Dist. LEXIS 139995, [WL] at *8*. The Court held that "because the articles proffered by Defendants would not lead to productive avenues of analysis on this motion, the Court finds it appropriate to limit its consideration to the [complaint] itself." *Id.*

Considering the IPSAC's entire allegations and recognizing that the parties' proffered documents are not a part of or attached to the IPSAC, nor are those documents integral to the Plaintiffs' claims, the Court concludes that its earlier rationale, as just summarized, equally applies to reject both parties' arguments for judicial notice here. To reiterate, taking judicial notice of the documents would constitute an impermissible merits inquiry and/or an unfruitful inquiry notice analysis.[4] Therefore, the Court declines to take judicial notice of the Defendants' proffered publications as well as the Plaintiffs' proffered document, and determines that those materials do not provide appropriate grounds for concluding that the fraudulent concealment doctrines of the various jurisdictions are inapplicable or vice versa.

B. Failure to Plead Affirmative Acts of Concealment

As a generalized legal principle, fraudulent concealment is understood to involve a defendant concealing the wrong at issue which prevents the plaintiff from discovering, with due diligence, her claim sooner. *See generally* 2 C. Corman, *Limitation of Actions* § 9.7.1 (1991); John P. Dawson, *Fraudulent Concealment and Statutes of Limitation,* 31 Mich. L. Rev. 875, 878-81 (1933). All parties agree that the fraudulent concealment or equitable tolling doctrine in each of the jurisdictions at issue here require Plaintiffs to plead facts that demonstrate that Defendants performed affirmative acts of concealment. *See* **[*12]** Defs.' Mot. at 11; Pls.' Resp. at 3-4. However, the parties dispute whether Plaintiffs have failed to sufficiently plead this element as to each of the 17 jurisdictions at issue: Arizona, California, the District of Columbia, Florida, Iowa, Kansas, Michigan, Minnesota, Mississippi, Nebraska, New York, North Carolina, North Dakota, South Dakota, Tennessee, Utah, and Vermont.

Yet, despite agreeing that each jurisdiction requires "an affirmative act of concealment" element, the parties provide limited reference to the law concerning this element in each of the jurisdictions at issue. Still, the parties jointly appear to posit that the laws of each of the 17 jurisdictions can be abstracted into a single encapsulation of "law." However, this "cheaper by the dozen" approach verges on forging a kind of "common law" that is firmly discouraged by the *Erie* doctrine. Furthermore, neither party has presented any grounds—let alone well-documented, appropriate grounds—to treat all 17 jurisdictions' laws identically. Indeed, the parties' own arguments suggest there are jurisdiction-specific variations to this element that conflict with the parties' endorsement of a common "law" applicable **[*13]** to all jurisdictions.[5]

---

[4] As will **[*11]** be discussed, *infra,* the parties have not discussed the specific laws of the various jurisdictions at issue with respect to this Motion, and, thus, they present no occasion for the Court to consider whether *vel non* a plaintiff's inquiry notice and reasonable diligence are operative principles of fraudulent concealment in those jurisdictions. Of course, to the extent that those jurisdictions might not embrace such principles, the Defendants' arguments in favor of the judicial notice of the publications would be further diminished.

[5] As an example, Defendants generally describe this element of fraudulent concealment in two distinct ways: 1) an affirmative act "to conceal Plaintiffs' *causes of action,*" Defs.' Mot. at 11 (emphasis added); or 2) an affirmative act that "conceals an *element* of the claim," Defs.' Reply at 2 (emphasis added), *see also id.* at 4-5, 7 (discussing same). Defendants ostensibly take the position

In order to address the Defendants' motion to dismiss, the most conservative—indeed, hard boiled—analysis would require separately asking whether the IPSAC sufficiently pleads the "affirmative act of concealment" element as to **[*15]** each individual jurisdiction's fraudulent concealment claim.[6] However, given that the parties themselves eschewed this task, the Court will not—and need not, under the circumstances here—assume the burden of meaningfully articulating the 17 jurisdictions' laws as to this element.

Instead, the Court observes that, notwithstanding that they are each unique legal jurisdictions and their respective "affirmative acts of concealment" elements may have additional and differing demands, the 17 jurisdictions can be divided into two categories as classified by one of two common *minimum* standards. That is, a given jurisdiction *at minimum* requires one of the following two standards: either that (a) a defendant concealed **[*16]** a material fact about the alleged wrong, *i.e.,* a fact that is material to the underlying claim at issue, to wit, a state antitrust, consumer protection, or unjust enrichment claim, *or* (b) a defendant concealed a fact that would prompt a plaintiff's inquiry notice, *i.e.,* information that might alert an individual to inquire into and discover whether a wrong exists.[7]

---

that there is no meaningful difference between these characterizations. However, Defendants cite case authority as to the 17 jurisdictions at issue, which, as cited, suggests that many of the jurisdictions take differing approaches to this element—approaches that do not necessarily conform with the Defendants' singular broad characterization of the element. *See* Defs.' Mot. at 11-12 n.14. The Defendants' cited authorities illustrate that the first element of fraudulent concealment can involve consideration of the defendant's conduct in terms of whether the conduct, *inter alia,* occurred after the wrong transpired, was "calculated to operate" in a certain manner, or was the defendants' ultimate object.

Plaintiffs do not raise any targeted objections to the jurisdiction-specific case **[*14]** law cited by Defendants. Rather, Plaintiffs cite several federal court decisions that generally appear to have addressed matters relating to fraudulent concealment under federal law rather than the jurisdictions at issue in their claims. However, in contrast to the Defendants' position, the tenor of the Plaintiffs' arguments suggest that the 17 jurisdictions require that the alleged affirmative acts of concealment conceal *facts* about the Defendants' purported conduct as a general matter, rather than concealing facts that give rise to a claim or an element of that claim. Indeed, according to Plaintiffs, to establish this element, any facts concealed would merely need to be those that would prompt the Plaintiffs' inquiry notice, as opposed to facts that give rise to a cause of action. *See, e.g.,* Tr. at 40 ("Does lying about what you are doing to try and calm people to relax, is that a pretextual reason[.] [S]hould that create [grounds for] equitable tolling.").

[6] Indeed, when the Court asked the parties about the omission of jurisdiction-by-jurisdiction analyses in their papers, the parties appropriately conceded that a jurisdiction-by-jurisdiction analysis would have been appropriate. Tr. at 16:10-11 (responding "to a certain extent, yes" to the question of whether a state-by-state analysis of the law of concealment is necessary); *id.* at 43:1 (remarking that it "may have been a legal mistake" not to engage in a state-by-state analysis).

App. Ct. 1993)* ("The wrongful concealment sufficient to toll a statute of limitations requires a positive act by the defendant taken for the purpose of preventing detection of the cause of action."); **[*17]** *Sanchez v. South Hoover Hosp., 18 Cal. 3d 93, 132 Cal. Rptr. 657, 553 P.2d 1129, 1133-34 (Cal. 1976)* ("It has long been established that the defendant's fraud in concealing a cause of action against him tolls the applicable statute of limitations . . . ."); *Bernson v. Browning-Ferris Indus., 7 Cal. 4th 926, 30 Cal. Rptr. 2d 440, 873 P.2d 613, 616 n.3 (Cal. 1994)* ("The rule of fraudulent concealment is applicable whenever the defendant intentionally prevents the plaintiff from instituting suit. . . ."); *Drake v. McNair, 993 A.2d 607, 619 (D.C. 2010)* ("It is well established that affirmative acts employed by a party to fraudulently conceal either the existence of a claim or facts forming the basis of a cause of action toll the running of limitations periods." (quoting *Estate of Chappelle v. Sanders, 442 A.2d 157, 158 (D.C.1982))*); *Berisford v. Jack Eckerd Corp., 667 So.2d 809, 811 (Fla. App. Ct.1995)* ("'[T]he statute of limitations will be tolled when it can be shown that fraud has been perpetrated on the injured party sufficient to place him in ignorance of his right to a cause of action or to prevent him from discovering his injury.'. . . In order to establish fraudulent concealment sufficient to toll the statute, the plaintiff must show 'both successful **[*18]** concealment of the cause of action and fraudulent means to achieve that concealment.'" (quoting *Nardone v. Reynolds, 333 So.2d 25, 37 (Fla. 1976)*, *modified on other grounds,* *Tanner v. Hartog, 618 So.2d 177 (Fla. 1993)))*; *Langner v. Simpson, 533 N.W.2d 511, 522 (Iowa 1995)* ("Under Iowa law, proof of fraudulent concealment requires evidence of affirmative steps independent of and in addition to the original wrongdoing which prevented the plaintiff from discovering the wrongdoing."); *Christy v. Miulli, 692 N.W.2d 694, 702 (Iowa 2005)* ("The foundational elements of equitable estoppel are well established: (1) The defendant has made a false representation or has concealed material facts . . . . With respect to the first element, a party relying on the doctrine of fraudulent concealment must prove the defendant did some affirmative act to conceal the plaintiff's cause of action independent of and subsequent to the liability-producing conduct." (citations omitted)); *Friends Univ. v. W. R.*

Plaintiffs must meet the minimum threshold as to each jurisdiction at issue for purposes of Rule 8. Furthermore, another common standard by which all of the Plaintiffs' fraudulent concealment claims must be assessed is Rule 9(b).[8] Based upon these standards, the Court determines that Plaintiffs have failed to adequately plead the 17

Grace & Co., 227 Kan. 559, 608 P.2d 936, 941 (Kan. 1980) ("To constitute concealment of a cause of action within the general rule tolling the statute of limitations on that ground the concealment must be fraudulent or **[*19]** intentional and, in the absence of a fiduciary or confidential relationship, there must be something of an affirmative nature designed to prevent, and which does prevent, discovery of the cause of action. There must be some actual artifice to prevent knowledge of the fact, some affirmative act of concealment, or some misrepresentation to exclude suspicion and prevent injury." (internal quotation marks and citation omitted)); Bowen v. Westerhaus, 224 Kan. 42, 578 P.2d 1102, 1105 (Kan. 1978) ("A party asserting equitable estoppel must show that another party, by its acts, representations, admissions, or silence when it had a duty to speak, induced it to believe certain facts existed. It must also show it rightfully relied and acted upon such belief and would now be prejudiced if the other party were permitted to deny the existence of such facts. . . ." (quoting United American State Bank & Trust Co. v. Wild West Chrysler Plymouth, Inc., 221 Kan. 523, 561 P.2d 792, 795 (Kan. 1977))); Weast v. Duffie, 272 Mich. 534, 262 N.W. 401, 402 (Mich. 1935) ("The fraudulent concealment which will postpone the operation of the statute must be the concealment of the fact that plaintiff has a cause of action."); Draws v. Levin, 332 Mich. 447, 52 N.W.2d 180, 183 (Mich. 1952) **[*20]** ("[T]he fraudulent concealment which will work a postponement of the statute must be a concealment produced by affirmative acts or misrepresentations. A mere silence on the part of the defendant is not enough. The plaintiff must show some arrangement or contrivance on the part of the defendant, of an affirmative character, designed to prevent subsequent discovery."); Hydra-Mac, Inc. v. Onan Corp., 450 N.W.2d 913, 918 (Minn. 1990) (recognizing that fraudulent concealment tolls the statute of limitations "if it is the very existence of the facts which establish the cause of action which are fraudulently concealed" (quotations omitted)); Miss. Code Ann. § 15-1-67 ("If a person liable to any personal action shall fraudulently conceal the cause of action from the knowledge of the person entitled thereto, the cause of action shall be deemed to have first accrued at, and not before, the time at which such fraud shall be, or with reasonable diligence might have been, first known or discovered."); Andres v. McNeil Co., Inc., 270 Neb. 733, 707 N.W.2d 777, 787 (Neb. 2005) ("[I]n order to successfully assert the doctrine of fraudulent concealment and thus estop the defendant from claiming a statute of limitations **[*21]** defense, the plaintiff must show the defendant has, either by deception or by a violation of a duty, concealed from the plaintiff material facts which prevent the plaintiff from discovering the [misconduct]." (internal quotations omitted)); Rucker v. Ward, 131 Neb. 25, 267 N.W. 191, 195 (Neb. 1936) (observing that "defendant cannot avail himself of the statutes of limitation as a defense," when defendant "wrongfully conceals a material fact necessary to the accrual of a cause of action against him, and such concealment causes the opposite party to delay the filing of suit," (internal quotations omitted)); Putter v. North Shore University Hosp., 7 N.Y.3d 548, 858 N.E.2d 1140, 1142, 825 N.Y.S.2d 435 (N.Y. 2006) ("[E]quitable estoppel will preclude a defendant from using the statute of limitations as a defense 'where it is the defendant's affirmative wrongdoing . . . which produced the long delay between the accrual of the cause of action and the institution of the legal proceeding.' A plaintiff seeking to apply the doctrine of equitable estoppel must 'establish that subsequent and specific actions by defendants somehow kept [him or her] from timely bringing suit.'" (citations omitted)); In re Covington's Will, 252 N.C. 546, 114 S.E.2d 257, 260 (N.C. 1960) **[*22]** ("[T]he essential elements of an equitable estoppel as related to the party estopped are: (1) Conduct which amounts to a false representation or concealment of material facts, or at least, which is reasonably calculated to convey the impression that the facts are otherwise than, and inconsistent with, those which the party afterwards attempts to assert . . . ."); Roether v. National Union Fire Ins. Co., 51 N.D. 634, 200 N.W. 818, 819 (N.D. 1924) ("[T]here must be some affirmative act or representation designed to prevent, and which does in fact prevent, discovery of the cause of action, or lulls suspicion as to its existence."); Bruske v. Hille, 1997 SD 108, 567 N.W.2d 872, 879 (S.D. 1997) ("In the absence of some trust or confidential relationship between the parties there must be some affirmative act or conduct on the part of the defendant designed to prevent, and which does prevent, the discovery of the cause of action. Mere silence, in the absence of a duty to speak, is not ordinarily sufficient." (quoting Koenig v. Lambert, 527 N.W.2d 903, 905-06 (S.D.1995)); Benton v. Snyder, 825 S.W.2d 409, 414 (Tenn. 1992) ("Generally, a plaintiff seeking to establish fraudulent concealment must prove that the defendant **[*23]** took affirmative action to conceal the cause of action and that the plaintiff could not have discovered the cause of action despite exercising reasonable diligence."); Berenda v. Langford, 914 P.2d 45, 51 (Utah 1996) ("[W]hen a plaintiff alleges that a defendant took affirmative steps to conceal the plaintiffs cause of action, . . . the plaintiff can avoid the full operation of the discovery rule by making a prima facie showing of fraudulent concealment and then demonstrating that given the defendant's actions, a reasonable plaintiff would not have discovered the claim earlier."); 12 V.S.A. § 555 ("When a person entitled to bring a personal action is prevented from so doing by the fraudulent concealment of the cause of such action by the person against whom it lies, the period prior to the discovery of such cause of action shall be excluded in determining the time limited for the commencement thereof.").

[8] The parties agree that in pleading fraudulent concealment the Plaintiffs must meet the requirements of Rule 9(b). *See also* Byrnes v. DeBolt Transfer, Inc., 741 F.2d 620, 626 (3d Cir. 1984) ("We agree, **[*24]** of course, that fraud, and thus fraudulent

fraudulent concealment claims because the alleged facts do not sufficiently demonstrate that Defendants concealed a material fact or a fact that would prompt a plaintiff's inquiry notice about the alleged wrong for purposes of *Rules 8* and *9(b)*.

Plaintiffs contend that the Defendants' "affirmative acts of concealment" misrepresented the reasons for increased prices of eggs that allegedly occurred as a result of the Defendants' purported conspiracy. Plaintiffs argue that:

> Defendants issued misleading and false statements regarding the legitimacy of their actions and the cause of increased egg prices—in essence the statements concealed the conspiracy to restrict supply. Properly understood, the truly public statements . . . *are* the fraud. Defendants . . . launched a scheme . . . to explain the supply reductions using the pretexts of animal care and market conditions.

Pls.' Resp. at 2 (emphasis in original).

Plaintiffs claim that each of their 17 claims of fraudulent concealment, and more specifically, each of the elements of "affirmative acts of concealment," arise from the same factual allegations in the IPSAC. According to Plaintiffs, the alleged facts that demonstrate the Defendants' misrepresentations include:

> (a) "stamps" on egg cartons, (*E.g.,* ¶¶ **[*25]** 224, 298-300), (b) marketing and comments to the public and distributors attributing the price increases to legitimate actions or market factors (*E.g.,* ¶¶ 172, 182, 184, 185, 187, 238, 296-300, 304-07, 405; *see also* [Defs.'] Motion at 8-11), and (c) the fact that the statements and standards as communicated to the public were misleading and pretextual (*E.g.,* ¶¶ 192, 196, 239, 298-301, 304-07).

Id. at 9.

The Court will discuss the adequacy of these factual allegations for pleading purposes. The Court will assume, *arguendo,* that the reasons for the alleged offending increased egg prices, such as, by way of example, the "coordinated efforts" undertaken by Defendants to advance their conspiracy, constitute either material facts as to the state antitrust, consumer protection, and unjust enrichment claims at issue, or a fact that would prompt a plaintiff's inquiry notice into those claims.[9]

To start, the Court determines that many of the factual allegations that Plaintiffs contend demonstrate the Defendants' misrepresentations **[*26]** or false statements fail to satisfy *Rule 9(b)*'s particularity requirement. For example, the IPSAC's allegations as to the UEP Certification Program's "logo" or "stamp" are insufficiently particular. The IPSAC contains no specific allegations concerning the use of the logo in terms of what kinds of egg cartons were stamped, who stamped them, when the stamp was used, and so forth. As to what "message" the logo communicated, it can be fairly inferred from the IPSAC that the logo was supposed to indicate to its intended audience: "(a) the level of care given to hens under the [UEP Certification Program] standards, (b) the nature of the auditing process used to ensure compliance with the standards, (c) the role of the scientific advisory committee in developing the standards, (d) the comparative benefits of eggs produced by farmers implementing the standards, and (e) the comparative quality of animal care for hens in UEP-certified facilities." IPSAC ¶ 299. However, it is unclear from the IPSAC what the actual substance of the logo's "message" was in terms of type of alleged care, benefits, and so forth, and thus whether such a "message" was actually misleading.

Although Plaintiffs have alleged **[*27]** that the UEP entered into agreements with the Federal Trade Commission ("FTC") and 16 states concerning the logo and the UEP Certification program, those allegations do not do the legwork that the Plaintiffs attempt to assign them. The allegations concerning the FTC simply outline that following an FTC investigation into the "use of the name 'Animal Care Certified' (the original name for the Certification Program) as being potentially misleading," UEP agreed to no longer use the logo on egg cartons. *Id.* ¶ 298. This

---

concealment, must be pleaded with particularity." (citing *Fed. R. Civ. P. 9(b)* and *Walters v. Ditzler, 424 Pa. 445, 227 A.2d 833 (1967))*).

[9] In light of the Court's ruling here, the Court need not decide at this time whether such alleged facts are material as to each of the state claims that Plaintiffs assert.

allegation does not inexorably suggest, contrary to the Plaintiffs' insinuation otherwise, that the use of the logo was ever misleading; instead, this allegation stands only for what it states, that at some point the logo was no longer used on egg cartons.

The same is equally true for the IPSAC's allegations concerning the Plaintiffs' reliance on allegations that the UEP entered into an Assurance of Voluntary Compliance ("AVC") with 16 states. Under the AVC, UEP allegedly agreed to "not misrepresent, directly or by implication, the level or type of care given to hens under the standards; the role of any scientific advisory committee in devising the standards ultimately adopted **[*28]** by UEP; or the comparative quality of animal care for hens in UEP certified facilities." *Id.* ¶ 300. This allegation only signifies that UEP agreed not to engage in certain conduct, and thus does not provide any factual insight as to the actual nature of the Defendants' use of the logo or similar conduct prior to entering into the agreement.

Likewise, Plaintiffs have alleged certain other general facts as to the nature of the Defendants' alleged misrepresentations and false statements that are devoid of precise allegations of date, time, or place, fail to identify the speaker or the audience, provide no indication as to the medium through which the statements were conveyed, and have no other measure of precision. These include the IPSAC allegations that:

• ". . . Defendants misleadingly promoted the UEP Certified Program to retailers and consumers nationwide as making for better eggs." *Id.* ¶ 172.

• "Defendants . . . falsely represented to Plaintiffs and members of the Class that the prices they paid for shell eggs were fair and competitive." *Id.* ¶ 304.

• The "Defendants' false representations and public statements attributed price increases to normal market conditions and factors other **[*29]** than their illegal conspiracy." *Id.* ¶ 305.

• Defendants gave "explanations for the pricing behavior of [eggs]" which "in some instances . . . involved proprietary or otherwise non-public information within Defendants' exclusive control." *Id.* ¶ 305. "Such explanations made by the Defendants include assertions that they could not effectively respond to supply reductions as a result of limitations imposed by animal husbandry guidelines that had the effect of reducing cumulative cage space, as well as their attributing price increases to other external factors including supply-side wear-and-tear, the increased price of fuel and feed, and the upward adjustment of other costs of production." *Id.* ¶ 306.

• The "Defendants' illegal price-fixing and supply control conspiracy . . . was undertaken solely for financial gain and not for humane reasons as Defendants repeatedly claimed." *Id.* ¶ 307.[10]

• "Defendants, by the design, intent and nature of their conspiracy failed to reveal material facts regarding the price and supply of shell eggs and egg products . . . ." *Id.* ¶ 405.

There are simply no particularized facts in the IPSAC that serve to substantiate these particular allegations. The IPSAC contains **[*30]** no allegations that any of the Defendants made any specific statements that might appropriately correspond with any of these more general factual allegations.

Rather, there are specific facts in the IPSAC—facts that Plaintiffs also contend demonstrate the Defendants' misrepresentations or false statements—that undercut some of these allegations. For example, Plaintiffs allege that:

> In a December 11, 2003 article [in the *Buffalo News*], a UEP member admitted that the UEP's certification program was increasing egg prices:

---

[10] The Court assumes that through this allegation Plaintiffs did not intend to imply that they were contemporaneously aware of the alleged conspiracy at the time it supposedly was occurring. It appears that Plaintiffs meant to allege that the "coordinated efforts" that advanced the conspiracy, to the extent Plaintiffs contemporaneously knew of them, such as the UEP Certification Program guidelines, were "undertaken solely for financial gain and not for humane reasons as Defendants repeatedly claimed."

> Numerous industry experts have pointed to the popularity of lowcarbohydrate, high-protein diets, but Scott Kreher, a partner in Kreher's Farm Fresh Eggs in Clarence, believes **[*31]** the spike is due more to diminished supply than diet-fueled demand.
>
> "Eggs are primarily a non-elastic demand item. People always need eggs," said Kreher, whose egg farm supplies many local grocers. "What's really affecting egg prices are the houses chickens are being placed in."
>
> Specifically, new guidelines adopted by United Egg Producers, a national cooperative of egg producers to which Kreher's belongs, have gradually raised the amount of space it recommends each egg-laying chicken be given inside its housing—from the current industry average of 53 square-inches per bird to 61 square-inches in April of 2005.

Id. ¶ 182 (emphasis omitted). This allegation stands in direct contrast to the Plaintiffs' more general allegation that "Defendants' false representations and public statements attributed price increases to normal market conditions and factors other than their illegal conspiracy." *Id.* ¶ 305. Indeed, Mr. Kreher's alleged comment specifically identifies an alleged "coordinated effort" that purportedly advanced the Defendants' conspiracy, *i.e.,* the UEP Certification program guidelines, as the reason for the alleged increased egg prices.

As to the few specific allegations concerning **[*32]** the Defendants' purported comments that were published in regional newspapers or made during Congressional testimony—allegations that Plaintiffs claim are illustrative of the Defendants' misrepresentations or false statements—those allegations are not sufficient to plausibly suggest that Defendants concealed a material fact or a fact that would prompt a plaintiff's inquiry notice about the alleged wrong for purposes of *Rule 8*.[11] In other words, while these allegations may pass *Rule 9(b)* muster, they fail to adequately plead the "affirmative act of concealment" element as to each jurisdiction. Mr. Kreher's comment illustrates this in that his comment spoke specifically to an alleged reason for the increased egg prices. *See id.* ¶ 183.

Indeed, the other specific Defendant statements published in regional newspapers, which Plaintiffs claim support their fraudulent concealment claims, suggest that increased egg prices were due to the cage space guidelines of the UEP Certification Program. *See id.* ¶ 184 ("In a December 13, 2003 article, Fred Adams, the CEO of Defendant Cal-Maine, acknowledged that high prices were a result of industry efforts to hold down supplies: **[*34]** 'The supplies are adequate, but just barely. . . . The industry also says production is down as new guidelines . . . have reduced the number of hens allowed in a cage.'" (alterations in original)); *id.* ¶ 185 ("Gary Bethel, an officer of several Hillandale Farms entities, was quoted in a December 13, 2003 article discussing increased egg prices, in which he explained how Hillandale Farms had reduced supply . . . ."); *id.* ¶ 187 ("The President of Defendant R.W. Sauder, Paul Sauder, expressed similar sentiments: 'The [UEP] program is one of several causes cited for the recent surge in egg prices, because it's helping to dampen supply short-term . . . .['] A key guideline, which concerns the amount of space per hen in a cage, will result in reducing the number of hens per cage from nine to seven by April 2008. Asked if that's a significant change, Sauder replied, 'Absolutely. That's a 22 percent reduction in capacity. That's huge.'" (alterations in original)). As alleged in the IPSAC, the cage space guidelines were part of the Defendants' "coordinated efforts" to advance the alleged conspiracy to decrease the supply of eggs and

---

[11] Insofar that Plaintiffs contend that IPSAC Paragraph 238 falls into this category of allegations that demonstrate the Defendants' alleged misrepresentations made in regional newspaper articles, the Court does not consider it sufficient for *Rule 9(b)* purposes because it does not contain any direct quote or comment made by a Defendant, but rather entails a generalized observation attributable to "poultry experts." *See id.* ¶ 238 ("A December 2008 Star Tribune **[*33]** article identified the industry's collective actions as the cause of high prices: [T]he most significant influence on pricing may well have been the industry's own doing. Over the past two years, after a several-year slump, egg farmers have cut back on the size of their hen flocks at a pace not seen in more than 20 years. The result: Fewer hens means fewer eggs, which in turn means higher prices. In dozens of interviews, poultry experts point to the industry's move in 2002 to give hens more room as an underlying cause of higher prices. The United Egg producers (UEP), the industry's leading trade group, adopted guidelines for hens to have at least 67 square inches of space. Many producers used cages of just 50 to 60 square inches." (alteration in original).

increase egg prices, and so the Defendants' comments in these **[*35]** newspapers articles cannot be fairly said to be false or misrepresentative.[12]

Similarly, allegations concerning Gene Gregory's testimony before a House Subcommittee in regard to the role a scientific advisory committee played in developing UEP's Certification Program do not plausibly suggest that the Defendants affirmatively concealed a material fact or a fact that would prompt a plaintiff's inquiry notice as to their wrongdoings. As **[*36]** pled in the IPSAC, Mr. Gregory testified:

> [T]o ensure its objectivity the [scientific advisory] committee did not include any producers as members. The scientific committee recommended significant changes in egg production practices. UEP accepted the recommendations and today about 85% of our industry has implemented them. [ ] As the years have gone by, the scientific committee has made a number of additional recommendations. UEP has never rejected a recommendation by the committee - a remarkable track record that reflects our industry's determination to follow the best available science. [ ] The committee's recommendations became what is now know as the UEP Certified Program.

Id. ¶ 296 (alterations in original). Plaintiffs further plead that the author of the UEP Certification Program's guidelines was the UEP's "Animal Welfare" Committee and that its members drafted "the guidelines based on the economic analysis performed by Donald Bell, not based on any concern whatsoever for humane treatment of poultry." *Id.* ¶ 297. Contrary to the Plaintiffs' intimation otherwise, however, these factual allegations do not plausibly suggest that Mr. Gregory's testimony concerning the scientific committee **[*37]** was an affirmative concealment of a material fact. Indeed, it is entirely unclear from the IPSAC what the Animal Welfare Committee actually recommended in terms of "changes in egg production practices." In their arguments, Plaintiffs appear to suggest that the committee's recommendations concerned animal welfare and husbandry practices and did not contemplate economic considerations, but no allegations in the IPSAC suggest such a fact. Thus, although the IPSAC pleads that the guidelines were based upon economic analyses, such an allegation does not undermine the truth of Mr. Gregory's statement that the scientific committee's recommendations were never rejected by the UEP Animal Welfare Committee in developing the UEP Certified Program and that the committee's recommendations "became" the Program.

It follows from this assessment of the IPSAC's factual allegations that Plaintiffs have insufficiently addressed the demands of *Rules 8* and *9(b)* to plead the "affirmative act of concealment" element as to each of the 17 jurisdictions at issue. Accordingly, the Court grants the Defendants' motion to dismiss without prejudice for Plaintiffs to seek leave to amend the IPSAC as to statutes of **[*38]** limitations and equitable tolling.

C. Fraudulent Concealment Doctrine Under Kansas Law

Defendants seek the partial dismissal of the Plaintiffs' antitrust and unjust enrichment claims arising under Kansas law on the grounds that they are barred by the applicable statutes of limitation. They argue that fraudulent concealment in Kansas is unavailable to toll the statute of limitations for such claims.

However, the Court need not consider at this time whether Kansas courts recognize the fraudulent concealment doctrine in relation to the Plaintiffs' Kansas Restraint of Trade Act and unjust enrichment claims. Even assuming, *arguendo,* that the doctrine is available as to those claims, in accord with the discussion in Section B, *supra,* the

---

[12] Plaintiffs do not argue that the Defendants' statements failed to enumerate all of the various coordinated efforts allegedly undertaken to advance the conspiracy, or the existence of the alleged agreement among Defendants, and that omissions of such information rise to the level of a misrepresentation.

Additionally, no parties have argued whether the Defendants' comments as published in newspaper articles (and ostensibly are excerpts from interviews with reporters) can constitute an affirmative act of concealment *made by* Defendants when the IPSAC does not allege that Defendants were the actual authors of the newspaper articles, nor plead any facts to suggest that Defendants exercised some control or influence over the drafting of the newspaper articles.

Court has determined that Plaintiffs have failed to allege facts sufficient to plead fraudulent concealment under Kansas law.

IV. Conclusion

The Court grants the Defendants' motion to dismiss without prejudice in light of the pleading deficiencies discussed herein with respect to *Rules 8* and *9(b)*. Plaintiffs may seek leave to amend their complaint as to fraudulent concealment and equitable tolling so long as they do so expeditiously.

An Order consistent with this **[*39]** Memorandum follows.

BY THE COURT:

/s/ Gene E.K. Pratter

GENE E.K. PRATTER

United States District Judge

ORDER

AND NOW, this 4th day of April, 2012, upon consideration of the Defendants' Motion to Dismiss the Indirect Purchaser Plaintiffs' Claims for Damages Barred by the Statutes of Limitations of Various States (Doc. No. 331), the Plaintiffs' response (Doc. No. 353) and the Defendants' reply (Doc. No. 384), and the parties' supplemental filings thereto, and for the reasons stated in the accompanying Memorandum, it is hereby ORDERED that the Motion (Doc. No. 331) is GRANTED without prejudice.

Accordingly, the following claims for damages are dismissed without prejudice:

a. All claims for damages arising before November 17, 2004 for violation of the Arizona Antitrust Act or for unjust enrichment under Arizona common law contained in Count II.

b. All claims for damages arising before November 13, 2004 for violation of the Cartwright Act or California's Unfair Competition Law contained in Count III.

c. All claims for damages arising before November 17, 2005 for violation of the District of Columbia Consumer Protection Procedures Act or for unjust enrichment under District of Columbia common law **[*40]** contained in Count IV.

d. All claims for damages arising before November 17, 2004 for violation of the District of Columbia Antitrust Act contained in Count IV.

e. All claims for damages arising before December 2, 2004 for violation of the Florida Deceptive Trade Practices Act or for unjust enrichment under Florida common law contained in Count V.

f. All claims for damages arising before February 27, 2005 for violation of the Iowa Competition Law contained in Count VI.

g. All claims for damages arising before February 27, 2004 for unjust enrichment under Iowa common law contained in Count VI.

h. All claims for damages arising before November 17, 2005 for violation of the Kansas Antitrust Act, or for unjust enrichment under Kansas common law contained in Count VII.

i. All claims for damages arising before January 8, 2005 for violation of the Michigan Antitrust Reform Act contained in Count X.

j. All claims for damages arising before November 17, 2004 for violation of the Minnesota ***Antitrust Law*** contained in Count XI.

k. All claims arising before November 17, 2002 for unjust enrichment under Minnesota common law contained in Count XI.

l. All claims for damages arising before February 27, 2006 **[*41]** for violation of the Mississippi Antitrust Act or for unjust enrichment under Mississippi common law contained in Count XII.

m. All claims for damages arising before November 17, 2004 for violation of the Nebraska Consumer Protection Act or for unjust enrichment under Nebraska common law contained in Count XIII.

n. All claims for damages arising before November 17, 2004 for violation of the Donnelly Act contained in Count XVI.

o. All claims arising before November 17, 2002 for unjust enrichment under New York common law contained in Count XVI.

p. All claims for damages arising before November 17, 2005 for unjust enrichment under North Carolina law contained in Count XVII.

q. All claims for damages arising before November 17, 2004 for violations of the North Carolina Unfair and Deceptive Trade Practices Act contained in Count XVII.

r. All claims for damages arising before February 27, 2005 for violation of the North Dakota Antitrust Act contained in Count XVIII.

s. All claims for damages arising before January 8, 2005 for violation of South Dakota ***antitrust law*** contained in Count XX.

t. All claims for damages arising before January 8, 2004 for unjust enrichment under South Dakota common law **[*42]** contained in Count XX.

u. All claims for damages arising before January 8, 2006 for violation of the Tennessee Trade Practices Act or for unjust enrichment under Tennessee common law contained in Count XXI.

v. All claims for damages arising before February 27, 2005 for unjust enrichment under Utah common law contained in Count XXII.

w. All claims arising before December 2, 2002 for violation of the Vermont Consumer Fraud Act or for unjust enrichment under Vermont common law contained in Count XIII.

BY THE COURT:

Judges: Robert E. Payne, Senior United States District Judge.

Opinion by: Robert E. Payne

Opinion

MEMORANDUM OPINION

This matter is before the Court on the MOTION FOR SUMMARY JUDGMENT (Docket No. 254) filed by E.I. du Pont Nemours and Company ("DuPont"). For the reasons set forth below, DuPont's motion will be granted and the counterclaim will be dismissed with prejudice.

PROCEDURAL HISTORY

On February 3, 2009, DuPont filed a Complaint against Kolon claiming, inter alia, that Kolon had "engaged in concerted and persistent actions to wrongfully obtain DuPont's trade secrets and confidential information about [DuPont's] KEVLAR [] aramid fiber." Compl. ¶ 1. DuPont also alleged claims for conspiracy, business torts, and conversion. All claims, but the trade secret misappropriation claim, were dismissed either voluntarily by DuPont before trial or upon motion by Kolon before the case was submitted to the **[*3]** jury. Hereafter, the action by DuPont will be referred to as the "Trade Secrets Case."

On April 20, 2009, Kolon filed its ANSWER and a COUNTERCLAIM alleging that DuPont had violated *Section 2* of the Sherman Act, *15 U.S.C. § 2*, by engaging in anticompetitive activity, attempted monopolization (FIRST CAUSE OF ACTION) and monopolization (SECOND CAUSE OF ACTION). See Defs.' Answer at 35. DuPont filed a MOTION TO DISMISS the antitrust counterclaim which was granted, with leave to amend. On August 25, 2009, Kolon filed its AMENDED COUNTERCLAIM (Docket No. 50); and on August 31, 2009, Kolon filed its SECOND AMENDED COUNTERCLAIM ("SACC") (Docket No. 59) which was dismissed, again for failing to state a claim, but also with leave to amend (Docket No. 100).

Kolon declined to further amend the counterclaim and, after the Court entered an Order under *Fed. R. Civ. P. 54(b)*, Kolon appealed the dismissal of the counterclaim. On March 11, 2011, the United States Court of Appeals for the Fourth Circuit decided that Kolon adequately had pled antitrust claims of monopolization and attempted monopolization and remanded the matter for further proceedings. *E.I. du Pont de Nemours and Co. v. Kolon Industries, Inc., 637 F.3d 435 (4th Cir. 2011)*. **[*4]** The counterclaim will be referred to as the "Antitrust Case." Following remand, the parties engaged in several months of discovery. Thereafter, DuPont filed this motion for summary judgment.

BACKGROUND FACTS

The following generally applicable facts are either undisputed or recited giving all favorable inferences to Kolon, the non-moving party. Other facts will be recited in the legal analysis to which they are pertinent and those facts also are either not in dispute or recited giving all favorable inferences to Kolon.

The product at issue in the Antitrust Case, as well as the Trade Secrets Case, is para-aramid fiber. Dupont's para-aramid product is Kevlar. Kolon's corresponding product is Heracron.

Para-aramid fiber is a high-strength, non-conductive, lightweight material with no melting point and high resistance to abrasion. Production of para-aramid is very time-intensive and expensive. Typically, a seller of para-aramid must "qualify" its product with a purchaser before the product can be sold. This involves laboratory testing, in-use testing in the customer's product, and in-use testing on a larger scale, and it takes anywhere from six months to three years. See Mem. Supp. Summ. J. **[*5]** SOF ¶ 11 (uncontested fact); Opp. Summ. J. at 4-5. The para-aramid product comes in three general forms: filament (yarn), staple (yarn cut into short pieces); and pulp (yarn cut up then manipulated, which comes in both wet and dry varieties). Mem. Supp. Summ. J. SOF ¶ 1. In 1965, DuPont invented para-aramid fiber. DuPont began production of its para-aramid fiber in 1971 and trademarked its product Kevlar in 1973. Id. at 3.

Para-aramid fiber is used in, amongst other things, tires, fiber optic cables, body armor, cables, sporting goods, and automotive belts, hoses, and gaskets. DuPont was the only manufacturer of para-aramid in the United States from 1971 until the 1980s. Mem. Supp. Summ. J. SOF ¶ 2. At that time, Akzo N.V., a Dutch company, which was later purchased by Teijin Aramid, sought to introduce its para-aramid product, Twaron, into the United States market. Teijin started selling Twaron in the United States and worldwide in 1987. From 1990 to 2009, Teijin's share of the United States para-aramid market increased as DuPont's share decreased. By 2006, Teijin controlled 41 percent of the United States market, and by 2009, it controlled 44 percent of that market. See Mem. Supp. **[*6]** Summ. J. at Exhibit 21, Dr. Bamberger Rpt. at 17. Teijin surpassed DuPont in the worldwide para-aramid market in 2006. DuPont's global market share went from 91 percent in 1990 to 46 percent in 2006. Reply Mem. Supp. Summ. J. at 7 n. 3. DuPont's share in the United States went from 100 percent to 59 percent during that same time period. Mem. Supp. Summ. J. at 5 at Exhibit 21, Dr. Bamberger Rpt. at 16. By 2009, DuPont's market share in the United States had decreased further to 55 percent. Id.

In 2006, Kolon began producing its para-aramid product, Heracron, and thereafter started to market it in the United States. SACC ¶ 8 (Docket No. 2); Opp. Summ. J. at 6.[1] To that end, Kolon engaged seven sales agents in the United States: Aramid Fiber Systems (Michael Mitchell), Gane, Inc. (H.K. Jung), K-Tex, LLC (Joe Kaminsky), KTL Trading Resource (Bruce Lindley), Scarponi Textiles (David Scarponi and David Murphy), Sekka-Tex (Brian Seekamp), and Techtrade (Steve S.K. Chung). In its SACC, Kolon alleged that:

> DuPont's substantial market power is evidenced by its historic market shares, a shortage of U.S. supply and high U.S. prices for Kevlar. Upon information and belief, DuPont's market share remains **[*7]** greater than 70% of all sales by purchase volume of para-aramid. ¶ 17.
> The relevant product market is the market for para-aramid fibers . . . . ¶ 18.
> The relevant geographic market is worldwide supply of para-aramid fiber to commercial purchasers in the United States . . . . ¶ 24.
> Over the past three years, for example, DuPont committed various high volume U.S. para-aramid fiber buyers to multi-year supply agreements that required the customer to purchase from 80% to 100% of the customer's requirements from DuPont (¶ 29) . . . the depressed supplier acceptance caused by DuPont's long-term supply arrangements has reduced Kolon's sales volume and consequent market share to a level significantly lower than it would have been in the absence of these arrangements (¶ 34).

In sum, the central allegation of Kolon's case is that DuPont's use of long-term, multi-year, supply contracts with high volume para-aramid purchasers from January 2006 to April 20, 2009 (the relevant time period)[2] were evidence of attempted monopolization and monopolization of the para-aramid market (the relevant product market) in the United States (the relevant geographic market). See also *E.I. du Pont de Nemours and Co. v. Kolon Industries, Inc., 637 F.3d 435 (4th Cir. 2011)* **[*8]** (reviewing the SACC and noting that Kolon had alleged that DuPont violated the Sherman Act through the use of exclusive contracts with high-volume customers).

The foregoing facts form the basic context for the assessment of DuPont's motion for summary judgment. **[*9]** Other facts will be outlined in the discussion of the analytical component to which they relate.

THE POSITION OF THE PARTIES

---

[1] Kolon had attempted for several years in the 1990's to develop a commercial para-aramid product. That effort was unsuccessful and in 1995 Kolon abandoned the effort. See Sept. 7, 2011 Trade Secrets Case Trial Tr. at 5067 (3:09cv58); Kolon's Opp. Permanent Injunction at Exhibit 3 (3:09cv58) (Docket No. 1641). It resumed the effort in approximately 2004. Id.

[2] The relevant time period begins when Kolon says it first attempted to enter the relevant market and ends on April 20, 2009, the date on which Kolon first filed the counterclaim in the Antitrust Case. Kolon does not dispute that the relevant supply agreements are those within the January 2006 to April 20, 2009 time frame. See Mem. Opp. Summ. J. at 5 n. 5. Kolon disputes whether it is confined to the 2006 to 2009 time period to show its harm for the purposes of damages calculation. That, however, is a moot point given that DuPont's motion for summary judgment will be granted.

In its First Cause of Action, Kolon alleges that, during the relevant period, DuPont monopolized the para-aramid market in the United States. DuPont raises five contentions in support of its motion for summary judgment on the monopolization claim: (1) Kolon has not proven that DuPont possessed monopoly power during the time period in question; (2) Kolon has not proven harm to competition; (3) there is no evidence of substantial market foreclosure; (4) Kolon does not have standing to pursue its claims because it cannot prove antitrust injury and because it was not a lawful competitor of DuPont during the relevant time period; and (5) Kolon cannot prove damages.

First, DuPont points out that Kolon's own expert, Dr. Bamberger, estimated that DuPont's relevant share of the market was no more than 59 percent during the relevant time period. Mem. Supp. Summ. J. at 28. According to DuPont, decisional law in the Fourth Circuit establishes that at least 70-75 percent market share is required to support a finding of monopolization. Id. (citing *R.J. Reynolds Tobacco Co. v. Philip Morris Inc., 199 F. Supp. 2d 362 (M.D.N.C. 2002)*, **[*10]** aff'd sub nom. *67 F. App'x 810 (4th Cir. 2003)*; *E.I. DuPont de Nemours & Co. v. Kolon Indus., Inc., 637 F.3d 435, 450 (4th Cir. 2011)* (quotations omitted)). DuPont also emphasizes that Teijin, its major competitor, obtained a majority share of the global para-aramid market in 2006, and that Teijin's market share continued to increase as DuPont's market share decreased during the relevant time period. Id. at 29.

Second, DuPont argues that Kolon has not satisfied its burden of showing harm to competition. DuPont points out that Kolon's own expert testified that any harm occurred after the relevant time period; and, according to DuPont, the fact that no harm took place during the relevant time period eliminates the basis for Kolon's Counterclaim. Id. at 30.

Third, DuPont claims that none of its agreements with customers excluded Kolon from a "substantial share" of the market. Id. at 31 (citing *Chuck's Feed & Seed Co. v. Ralston Purina Co., 810 F.2d 1289, 1293 (4th Cir. 1987)* (citing *Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 328, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961)))*. According to DuPont, Kolon has not quantified any portion of the relevant market that DuPont allegedly foreclosed. Id. at 32. Kolon's expert, **[*11]** Dr. Bamberger, testified that the only United States customers that could have been foreclosed by DuPont are those with whom Kolon attempted to become qualified who then declined Kolon's business for reasons related to DuPont's activities. Id. at 33. DuPont points out that Kolon attempted to become qualified with nine such customers during the relevant time period, eight of which had no supply agreement with DuPont, and one of which declined Kolon's business because of Kolon's price increase. Id. at 33-34. Finally, on this point, DuPont says that, wholly apart from Dr. Bamberger's testimony, Kolon's own witnesses identified only three customers (out of nearly 1,000 commercial customers) with whom Kolon allegedly could not do business. Id. at 34.[3] According to DuPont, Kolon has not shown any market foreclosure, and it has not come close to establishing the minimum threshold. Id. (citing *R.J. Reynolds Tobacco Co. v. Philip Morris Inc., 199 F. Supp. 2d 362, 388 (M.D.N.C. 2002)*, aff'd sub nom. *67 F. App'x 810 (4th Cir. 2003)* (noting that "provisions involving foreclosure as high as 50% have been upheld")).

Fourth, DuPont contends that Kolon does not have standing because it cannot show that its commercial activities as a competitor were lawful, and also cannot show that it would have had more customers but for DuPont's allegedly unlawful supply contracts. Id. at 37. See *Schuylkill Energy Res., Inc. v. Pa. Power & Light Co., 113 F.3d 405, 415 (3d Cir. 1997)*. According to DuPont, Kolon could not make sales because of its low quality products, lack of supply, long shipment times, high prices, and practice of requiring full payment before shipping. Id. at 39-40.

Fifth, DuPont contends that Kolon has not shown, and cannot show, damages. Because Kolon lacked the capacity to make any alleged "lost sales," there are no possible damages. Id. at 42. Even if there were, says DuPont, **[*13]** Dr. Bamberger has used Kolon's European market share as a predicate for determining damages in the

[3] According to DuPont, these three customers were: (1) Goodyear, which rejected Kolon's **[*12]** products because of poor quality, and which, therefore, did not qualify Kolon's products; (2) Akebono, which sought Kolon's business but was told that Kolon did not have sufficient supply; and (3) OFS, which requested bids from Kolon, DuPont, and Teijin for a supply contract, and which was told 'by Kolon that Kolon did not have sufficient supply to fulfill the contract and therefore was not submitting a bid. Id. at 34-36.

United States, which is inappropriate considering that the United States market (and Kolon's business in it) is considerably different from the European market. Id.[4]

Unsurprisingly, Kolon suggests several reasons why DuPont's motion should be denied.

First, Kolon argues that DuPont's share of 54 to 59 percent of the market is enough to establish monopolization when coupled with the high barriers to entry in the United States para-aramid market, the market's highly concentrated nature, DuPont's use of price discrimination, and DuPont's alleged decision to shut down production to control prices. Opp. Summ. J. at 3, 28 (citing *Reazin v. Blue Cross & Blue Shield of Kan., 899 F.2d 951, 968 (10th Cir. 1990)*; **[*14]** *Defiance Hosp. v. Fauster-Cameron, Inc., 344 F. Supp. 2d 1097, 1113 (N.D. Ohio 2004)*; *Hayden Pub. Co. v. Cox Broad Corp., 730 F.2d 64, 69 (2d Cir. 1984)*; *Domed Stadium Hotel, Inc. v. Holiday Inns, Inc., 732 F.2d 480, 489 (5th Cir. 1984))*. See also id. at 29 (citing *Fineman v. Armstrong World Indus., Inc., 980 F.2d 171, 212 (3d Cir. 1992))*.

Second, Kolon submits that supply agreements, by their very nature, result in foreclosure of the market. Id. at 3, 31 (citing *LePage's, Inc. v. Minnesota Mining & Mfg., 324 F.3d 141, 147 (3d Cir. 2003)* (citations omitted)).

Third, Kolon argues that it need not show that DuPont foreclosed any quantum of the market in order to prevail, so long as it shows that DuPont severely restricted the market. Id. at 33. (citing *LePage's, 324 F.3d at 161-62*); *United States v. Microsoft Corp., 253 F.3d 34, 70, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)*; *Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 328-29, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961))*. Fourth, Kolon argues that DuPont's anticompetitive conduct prevented it from conducting business with Goodyear, AFL, Corning, Akebono, Federal Mogu, Nisshinbo, Garlock, and Hollingsworth & Vose. Fifth, Kolon contends that DuPont is guilty of "attempted monopolization" because **[*15]** DuPont had a "dangerous probability" of achieving a monopoly. Id. at 36-37.

Sixth, Kolon contends that it has presented adequate evidence of damages because there is "sufficient evidence of causation," *Perkins v. Standard Oil Co. of Cal., 395 U.S. 642, 648, 89 S. Ct. 1871, 23 L. Ed. 2d 599 (1969)*, and because "the illegality" was "a material cause of [Kolon's] injury." *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 114 n.9, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)*. Kolon points out that its market share in Europe is seven times as high as its market share in the United States. Id. at 39.

Seventh, Kolon argues that it can show harm to competition because it can show that consumers now have less choice about who they purchase para-aramid products from, and because it can also show that, in 2011, it was forced to suspend the TROY-2 expansion project, which would have doubled Kolon's manufacturing capacity for Heracron and reduced prices for the product for consumers. Id. at 40.

Eighth, Kolon rejects DuPont's argument that its activity was procompetitive, claiming that stable supply and pricing could have been achieved without the near-exclusive contracts used by DuPont. Id. at 41.

Ninth, Kolon contends that it does have standing because public **[*16]** policy favors antitrust suits and promoting fair competition and because a plaintiff's conduct cannot bar it from asserting an antitrust action. Id. (citing *Burlington Indus., Inc. v. Milliken & Co., 690 F.2d 380, 388 (4th Cir. 1982)*; *Memorex Corp. v. Int'l Business Machines Corp., 555 F.2d 1379 (9th Cir. 1977))*.

Finally, Kolon contends that DuPont's motion is premature because of the ongoing discovery disputes and outstanding motions related thereto. Id. at 43 (citing *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 250 n.5, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*; *Phillips v. Gen. Motors Corp., 911 F.2d 724, 1990 WL 117981, at *4 (4th Cir. 1990)*; *Ingle v. Yelton, 439 F.3d 191, 196 (4th Cir. 2006))*. Kolon asks the Court to deny or stay the summary

[4] DuPont also notes that, even if Kolon could show a monopoly, damages, harm to competition, and foreclosure, it cannot show that DuPont's activities were not "procompetitive." According to DuPont, market foreclosure can be justified when it is "procompetitive." (citing *Chuck's Feed, 810 F.2d at 1294*). DuPont claims its supply agreements were economically beneficial, ensuring stable supply and pricing. Id. at 44.

judgment motion pursuant to Rule 56(d) until the resolution of Kolon's pending motions to compel and pending receipt by Kolon of any subsequently ordered discovery. Id. at 45.

SUMMARY JUDGMENT STANDARD

"Summary judgment is an important tool for dealing with antitrust cases." See Oksanen v. Page Memorial Hosp., 945 F.2d 696, 708 (4th Cir. 1991) (citing Steuer v. National Med. Enterps., Inc., 672 F. Supp. 1489, 1500-01 (D.S.C. 1987) (noting that the Supreme Court and the **[*17]** Fourth Circuit have found summary judgment to be important in deciding antitrust cases)); see also Thompson Everett, Inc. v. Nat'l Cable Adver., L.P., 57 F.3d 1317, 1322 (4th Cir. 1995) ("Because of the unusual entanglement of legal and factual issues frequently presented in antitrust cases, the task of sorting them out may be particularly well-suited for Rule 56 utilization."). Granting summary judgment is appropriate where there is no genuine issue as to any material fact in a case. Fed. R. Civ. P. 56(c); see also Celotex Corp. v. Catrett, 477 U.S. 317, 327, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986) ("Rule 56 must be construed with due regard [] for the rights of persons asserting claims and defenses that are adequately based in fact to have those claims and defenses tried to a jury."). Once a motion for summary judgment is properly made and supported, the opposing party has the burden of showing that a genuine dispute exists. Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 586-87, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986). A material fact in dispute appears when its existence or non-existence could lead a jury to different outcomes. Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986). A genuine issue of material fact exists when **[*18]** there is sufficient evidence on which a reasonable jury could return a verdict in favor of the non-moving party. Id.

Hence, summary judgment is only appropriate when, after discovery, the non-moving party has failed to make a "showing sufficient to establish the existence of an element essential to that party's case, and on which that party will bear the burden of proof at trial." Celotex, 477 U.S. at 322. When a motion for summary judgment is made, the evidence presented must always be taken in the light most favorable to the non-moving party. Smith v. Virginia Commonwealth Univ., 84 F.3d 672, 675 (4th Cir. 1996).

Nevertheless, a party cannot "create a genuine issue of material fact through mere speculation or the building of one inference upon another." Beale v. Hardy, 769 F.2d 213, 214 (4th Cir. 1985). Accordingly, the party who bears the burden of proof at trial cannot survive summary judgment without sufficient evidence to sustain his or her burden of proof on that point. Celotex Corp., 477 U.S. at 327.

In sum, summary judgment is called for when no reasonable jury could return a verdict in favor of the non-moving party. Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248-49, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986). **[*19]** When the fact record is in that posture on a claim, or on an element of a claim, the non-moving party cannot prevail as a matter of law. Id.; Celotex, 477 U.S. at 322.

DISCUSSION

A. Preliminary Matters

There are three preliminary matters that must be addressed before considering the substance of the summary judgment motion. First, Kolon argues that the motion is premature and ought to be deferred pursuant to Rule 56(d). Second, DuPont contends that its motion should be granted because Kolon's response brief is in violation of Local Civil Rule 56(B) which requires a brief in opposition to summary judgment to contain a section that confronts - item by item - each fact that the movant shows to be undisputed and supports that response by listing record citations proving the dispute. Third, DuPont contends that Kolon lacks standing to assert an antitrust claim because, in the Trade Secrets Case, Kolon was found to have acted wrongfully in misappropriating DuPont's trade secrets.

1. *Fed. R. Civ. P. 56(d)*

Kolon argued in its brief opposing summary judgment that, pursuant to *Rule 56(d)*, the Court should stay or deny DuPont's motion for summary judgment. *Rule 56(d)* gives the Court discretion to **[*20]** defer or deny consideration of a summary judgment motion "if a nonmovant shows by affidavit or declaration, that, for specified reasons, it cannot present facts essential to justify its opposition."[5]

Courts look to whether the nonmovant's requested information has the potential to "create [] a genuine issue of material fact sufficient to defeat summary judgment," whether the sought-information is "the subject of pending discovery requests," and whether the information is "wholly within the defendants' possession" to determine whether to stay proceedings under *Rule 56(d)*. *Ingle v. Yelton, 439 F.3d 191, 197 n. 2 (4th Cir. 2006)* (quoting *Strag v. Bd. of Trustees, 55 F.3d 943, 954 (4th Cir. 1995))*; see also *Crawford-El v. Britton, 523 U.S. 574, 600, 118 S. Ct. 1584, 140 L. Ed. 2d 759 (1998)* **[*21]** (describing the Court's discretion to postpone a decision on summary judgment in situations where a plaintiff "needs additional discovery to explore 'facts essential to justify the party's opposition.'") (citing *Rule 56(f)*).

Exhibit 74 to Kolon's opposition brief, the Declaration of Daniel Goldman, articulated Kolon's reasons for asking the Court to postpone consideration of, or to deny, DuPont's summary judgment motion. The affidavit identifies several specific then-pending discovery motions as warranting denial or deferral under *Rule 56(d)*. The Court resolved all of those motions, with one exception, in February, granting some and denying others.[6] The discovery motions that formed the basis for the *Rule 56(d)* request will be briefly addressed below.

a. Long-Term Supply Agreements

First, in its opposition brief, Kolon argued that the Court should delay or deny summary judgment because its Motion to Compel Production of Documents (Docket No. 133) was still pending. In that motion, Kolon contended that DuPont had failed to produce all of the 2008 supply agreements that were requested in its Second Set of Requests for Production. Opp. Summ. J. at Exhibit 74, ¶¶ 5-6. To make that point, Kolon relied on a PowerPoint presentation conducted by a DuPont employee suggesting that 36 such agreements existed. Id. ¶ 6. The Court granted Kolon's motion in part on February 22, 2012, ordering DuPont to turn over all relevant 2008 contracts (Docket No. 402).

b. Pricing Data and High Variable Margins

Kolon next contended that the pricing and margin-related data it requested in its Motion to Compel Production of Economic and Financial Data (Docket No. 145), which it claimed it also requested in its First Set of Interrogatories, its Second Set of Requests for Production, and its Third Set of Requests **[*23]** for Production, was essential to proving monopoly power. Id. ¶¶ 10-11. On February 23, 2012, the Court granted Kolon's Motion to Compel with respect to Interrogatory No. 9 and Request No. 17, and denied Kolon's Motion to Compel in all other respects.

---

[5] In 2010, the Federal Rules of Civil Procedure were revised, and *Rule 56(d)* replaced *Rule 56(f)*. Committee Notes on Rules - 2010 Amendments ("*Subdivision (d)* carries forward without substantial change the provisions of former *subdivision (f)*."). *Rule 56(f)* provided that, if a party, for good reason, could not present facts "essential to justify the party's opposition," the Court could stay a summary judgment motion to allow for further discovery.

[6] The Court waited to address one of the motions upon the request of the parties, who represented that they believed they could come to an agreement on the issues therein. The only unresolved issue goes to specific intent, an element of the attempted monopolization claim. However, as explained below, the Court has assumed, for purposes of the summary judgment motion, that a triable issue of fact on the specific intent element has been made **[*22]** out. Thus, any additional discovery Kolon might receive before trial helping it prove specific intent would not aid the Court in deciding summary judgment.

(Docket No. 406). Interrogatory No. 9 requested "aggregate" gross and net profits and Request No. 17 concerned worldwide pricing data.

c. DuPont's Lobbying Efforts, the ITC Proceedings, and Akzo Litigation

Kolon also argued that the Court should employ *Rule 56(d)* because of its then-pending request for *Rule 30(b)(6)* deposition testimony and third-party subpoenas (Docket No. 139) respecting Dupont's lobbying efforts, certain 1987 ITC proceedings, and the patent litigation between Akzo and DuPont. Kolon contended that production of this discovery might help to establish DuPont's specific intent to monopolize, an element of an attempted monopolization claim. Id. ¶ 14.

On March 13, 2012, the parties informed the Court that they had reached an agreement concerning Kolon's Motion to Compel *30(b)(6)* Deposition Testimony as to the lobbying and ITC points. (Docket No. 139). Thus, the only unresolved aspect of the outstanding discovery was that relating **[*24]** to the patent litigation between Akzo and DuPont. After a hearing on Friday, March 16, 2012, the Court ordered Kolon to provide a list of all relevant claims that DuPont had brought against Akzo, on which DuPont did not prevail, that Kolon believed to be "sham litigation." Mar. 16, 2012 Tr. 43. If the Court found that the request had merit, the Court advised that it would order DuPont to produce a witness to testify about the business reasons for bringing the alleged "sham litigations." Id. Thereafter, Kolon submitted the list, and the Court concluded that three items on the list could be inquired of in a *Rule 30(b)(6)* deposition. Order, Mar., 22, 2012 (Docket No. 539). As Kolon has acknowledged, the issues to be examined on those three depositions may bear on the intent element of the attempted monopolization claim. For purposes of determining DuPont's motion for summary judgment, it will be assumed that there is a triable issue respecting intent. Thus, the pending *Rule 30(b)(6)* deposition on the allowed topic does not preclude consideration of the motion for summary judgment.[7]

d. Pascal Renaud's Deposition

Finally, Kolon also asserted that the motion for summary judgment was premature because the Court had not yet decided a Motion to Compel the Deposition of Pascal Renaud, DuPont's former previous competitive intelligence manager. Id. ¶ 15. Kolon had also filed a Motion for Issuance of Letters Rogatory to Pascal Renaud (Docket No. 113) in the event the Court denied the Motion to Compel that was still pending when Kolon filed its brief opposing summary judgment. On February 22, 2012, the Court resolved both motions, issuing an Order denying Kolon's Motion to Compel and granting its request for Issuance of Letters Rogatory (Docket No. 401).

And, at the hearing on February 27, 2012, counsel for Kolon represented that taking the deposition of Pascal Renaud might take more than a month and that "at this point we would not be in favor of **[*26]** moving the trial date just because we think we have to take the deposition of Pascal Renaud." Feb. 27, 2012 Tr. 32.

As the record now stands, the discovery motions on which Kolon sought delay of the summary judgment motion decision no longer stand as impediments to deciding the motion. The summary judgment hearing was held on March 16, 2012, and, at that hearing, Kolon did not suggest that any of the February Orders had not been complied with, that it was in need of further discovery, or that it was not prepared to go forward with the motion. Nor, after receiving the discovery ordered by the Court, did Kolon supplement its brief opposing summary judgment.

For the foregoing reasons, there is no reason under *Rule 56(d)* to defer deciding the motion for summary judgment or to deny it. Hence, the motion will be decided on its merits.

---

[7] At one stage in the briefing process, Kolon argued that discovery into the patent litigations between Akzo **[*25]** and DuPont was relevant to the existence of monopolization. Mem. Supp. Motion to Compel *30(b)(6)* at 17 (Docket No. 140). However, that conclusory argument was not supported in the *Rule 56(d)* affidavit. See Opp. Summ. J. at Exhibit 74 ¶ 14. Nor was it ever explained sufficiently to warrant allowing the deposition for that purpose.

2. Local Civil Rule 56(B)

Local Civil Rule 56(B) provides that:

> (B) Summary Judgment - Listing Of Undisputed Facts: Each brief in support of a motion for summary judgment shall include a specifically captioned section listing all material facts as to which the moving party contends there is no genuine issue and citing the parts of the record relied on to support **[*27]** the listed facts as alleged to be undisputed. A brief in response to such a motion shall include a specifically captioned section listing all material facts as to which it is contended that there exists a genuine issue necessary to be litigated and citing the parts of the record relied on to support the facts alleged to be in dispute.
>
> In determining a motion for summary judgment, the Court may assume that facts identified by the moving party in its listing of material facts are admitted, unless such a fact is controverted in the statement of genuine issues filed in opposition to the motion.

DuPont's brief in support of the motion for summary judgment complied with the first sentence in the rule. Kolon's response did not comply with the second sentence, which imposes duties on the non-moving party.

While Kolon's brief contained a section entitled "MATERIAL CONTESTED FACTS," that section did not identify which of the material facts asserted by DuPont as undisputed were thought by Kolon to be in dispute. Nor did that section set out citations showing why there was dispute as to the facts that DuPont had asserted (with record support) to be undisputed. Instead, that section of Kolon's brief **[*28]** was 24 pages of argument, positing some factual assertions that were followed by citations to the record and many others that were not. And, indeed, many of the factual assertions in that section were not in dispute but instead, were facts that DuPont asserted to be undisputed which Kolon merely recast in argumentative style.

That approach, predictably, made it difficult and time-consuming to sort out what, if any, facts really were in dispute and whether any asserted dispute was genuine or related to material facts. This kind of obfuscatory presentation is exactly what *Local Civil Rule 56(B)* is intended to prevent.

These violations of the local rule would warrant a finding that the facts listed by DuPont are not in dispute and, thereafter, a resolution of the motion in DuPont's favor. However, given the significance of summary judgment and considering the interest of justice, it is preferable to determine the motion on its merits, rather than on Kolon's breach of *Local Civil Rule 56(B)*.[8]

3. Standing

DuPont contends that Kolon lacks standing because Kolon wrongfully **[*29]** appropriated DuPont's trade secrets. And, as evinced by the verdict in the Trade Secrets Case, Kolon certainly did misappropriate many of DuPont's trade secrets and has used them to its competitive advantage. However, Kolon's wrongful conduct does not render DuPont immune from an antitrust suit by Kolon. See *Perma Life Mufflers, Inc. v. Int'l Parts Corp., 392 U.S. 134, 139, 88 S. Ct. 1981, 20 L. Ed. 2d 982 (1968)* (explaining that "[t]he plaintiff who reaps the reward of treble damages [in an antitrust suit] may be no less morally reprehensible than the defendant, but the law encourages his suit to further the overriding public policy in favor of competition"); *Burlington Indus., Inc. v. Milliken & Co., 690 F.2d 380, 388 (4th Cir. 1982)* ("[U]nclean hands is no bar to antitrust recovery.").

I. THE MONOPOLIZATION CLAIM: FIRST CAUSE OF ACTION

---

[8] Violations of like kind by other litigants in other cases likely will not be met with as charitably by any judge of this Court.

"To prove a *Section 2* monopolization offense, a plaintiff must establish two elements: (1) the possession of monopoly power; and (2) willful acquisition or maintenance of that power . . . ." *E.I. du Pont de Nemours & Co. v. Kolon Indus., Inc., 637 F.3d 435, 441 (4th Cir. 2011)* (citing *Eastman Kodak Co. v. Image Technical. Servs., Inc., 504 U.S. 451, 480, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)* and *Cavalier Tel., LLC v. Verizon Va., Inc., 330 F.3d 176, 183 (4th Cir. 2003))*. **[*30]** Of course, the monopoly power must exist in the relevant market. *Id. at 450*. For purposes of proceedings in this Court, the relevant product market is para-aramid fiber, and the relevant geographic market is the United States.[9] The defendant "must engage in conduct 'to foreclose competition, gain a competitive advantage, or to destroy a competitor.'" Id. (quoting *Eastman Kodak, 504 U.S. at 480*).

1. Monopoly Power

A defendant possesses "monopoly power in the relevant market," if it is "truly predominant in the market." *White Bag Co. v. Int'l Paper Co., 579 F.2d 1384, 1387 (4th Cir. 1974)*. The Fourth Circuit observed that: "[p]redominance" is established in situations where the defendant controls "seventy to one-hundred per cent of the relevant market." *E.I. du Pont de Nemours, 637 F.3d at 450* (quoting *White Bag, 579 F.2d at 1387*). In situations where the defendant controls less than seventy percent of the relevant market, it is unlikely that the plaintiff will be able to establish **[*31]** the requisite predominance. *R.J. Reynolds Tobacco Co. v. Philip Morris Inc., 199 F. Supp. 2d 362 (M.D.N.C. 2002)*, aff'd sub nom. *67 F. App'x 810 (4th Cir. 2003)* ("Seventy to seventy-five per cent is generally considered the minimum market share necessary to support a finding of monopoly power.") (citing *White Bag, 579 F.2d at 1387*).

Notwithstanding the foregoing observations, there has been much discussion amongst and within circuits about whether a certain percentage market share dispositively resolves whether monopoly power is extant or nonexistent. The Supreme Court of the United States provided some guidance in *United States v. United States Steel Corp., 251 U.S. 417, 444, 40 S. Ct. 293, 64 L. Ed. 343 (1920)* in which it reasoned that no monopoly power could exist on a market share of less than 50 percent ("The power attained was much greater than that possessed by any one competitor - it was not greater than that possessed by all of them . . . monopoly, therefore, was not achieved . . ."). Since its decision in United States Steel, the Supreme Court has never found a party with less than 75 percent market share to have monopoly power. See Antitrust Laws & Trade Regulation: Desk Ed. § 3.02 (2011).

Judge Learned **[*32]** Hand, evaluating the issue for the Second Circuit, concluded that, although a market share of over 90 percent is enough to constitute a monopoly, "it is doubtful whether sixty or sixty-four per cent" is sufficient "and certainly thirty-three percent is not." *United States v. Aluminum Co. of Am., 148 F.2d 416, 424 (2d Cir. 1945)*, superseded by statute on other grounds; see also Antitrust Laws & Trade Regulation: Desk Ed. § 3.02 (2011).

Many courts have found monopoly power of less than 70 percent insufficient to support a claim of monopolization. See *Fineman v. Armstrong World Indus., Inc., 980 F.2d 171, 201 (3d Cir. 1992)*, cert. denied, *507 U.S. 921, 113 S. Ct. 1285, 122 L. Ed. 2d 677 (1993)* (55 percent share insufficient); *R.J. Reynolds Tobacco Co. v. Philip Morris Inc., 199 F. Supp. 2d 362 (M.D.N.C. 2002)*, aff'd sub nom. *67 F. App'x 810 (4th Cir. 2003)* (51.3 percent share insufficient); *Holleb & Co. v. Produce Terminal Cold Storage Co., 532 F.2d 29, 33 (7th Cir. 1976)* ("Even if plaintiff had properly defined a relevant market, [it would not prevail because] it failed to prove that Produce Terminal had a dominant share exceeding 60 percent of the market."); *Hiland Dairy, Inc. v. Kroger Co., 402 F.2d 968, 974, 974 n. 6 (8th Cir. 1968)*, **[*33]** cert. denied, *395 U.S. 961, 89 S. Ct. 2096, 23 L. Ed. 2d 748 (1969)* (noting that "a substantial part of the market must be controlled by the monopolist to enable the raising and lowering of prices and the undue restriction on competition" and citing nine monopolization cases in which the market share ranged from 70 to 90 percent); *Colorado Interstate Gas Co. v. Natural Gas Pipeline Co., 885 F.2d 683, 694 n. 18 (10th Cir. 1989)* (citing 2 E. Kintner, Federal ***Antitrust Law*** § 12.6 (1980)) ("While the Supreme Court has refused to specify a minimum market share necessary to indicate a defendant has monopoly power, lower courts generally require a minimum market share of between 70 percent and 80 percent.").

---

[9] SACC ¶¶ 18, 24; Opp. Summ. J. at 4 ("The relevant market in this case is para-aramid fiber for commercial applications in the United States."). The Fourth Circuit has approved this definition of the relevant market.

Other decisions have given somewhat different signals. In *Broadway Delivery Corp. v. United Parcel Serv., 651 F.2d 122, 130 (2d Cir. 1981)*, cert. denied, *454 U.S. 968, 102 S. Ct. 512, 70 L. Ed. 2d 384 (1981)*, the Second Circuit held that a jury instruction was erroneous because the instruction suggested that, if a party had less than 50 percent market share, the party could not be guilty of monopolization. In *Cliff Food Stores, Inc. v. Kroger, Inc., 417 F.2d 203, 207 n. 2 (5th Cir. 1969)*, the Fifth Circuit held that no monopoly power exists if market share **[*34]** is less than 50 percent without discussing higher percentages. In *Arthur S. Langenderfer, Inc. v. S.E. Johnson Co., 917 F.2d 1413, 1443 (6th Cir. 1990)*, cert. denied, *502 U.S. 808, 112 S. Ct. 51, 116 L. Ed. 2d 29 (1991)*, the Sixth Circuit found that an average market share of 58 percent over a 7 year-period, where market share did not decrease, coupled with other factors, was enough to defeat a motion for directed verdict, but quoted "prominent authority" for the proposition that "there is substantial merit in a presumption that market shares below 50 or 60 percent do not constitute monopoly power" (quoting Areeda & Hovenkamp, ***Antitrust Law*** § 518.3 (1988 Supp.)). In *Reazin v. Blue Cross & Blue Shield of Kan., 899 F.2d 951, 968 (10th Cir. 1990)*, cert. denied, *497 U.S. 1005, 110 S. Ct. 3241, 111 L. Ed. 2d 752 (1990)*, the Third Circuit held that a market share of 60 percent did not preclude a finding of monopoly power, at least where the power possessed was "durable."

In sum, market share is quite important in determining whether monopoly power exists, but it is not the only consideration. Thus, courts finding monopoly power even in the absence of a 70 percent or higher market share generally do so after analyzing the "durability" of the defendant's power. **[*35]** Areeda & Turner, ***Antitrust Law*** ¶ 505 (1989 supp.) (noting that "durability" and not just "degree" determine the "significance of market power"); *E.I. du Pont de Nemours, 637 F.3d at 451* (noting that some courts have analyzed the "durability of the defendant's market power" along with the degree of market share) (citing *Reazin v. Blue Cross & Blue Shield of Kan., 899 F.2d 951, 967-68 (10th Cir. 1990))*. The Reazin Court commented that market share alone is not enough to show the presence or absence of monopoly power in cases in which it does "not reflect actual power to control price or exclude competition." *899 F.2d at 967* (citations omitted); see *United States v. E.I. DuPont de Nemours & Co., 351 U.S. 377, 391, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)* ("Monopoly power is the power to control prices or exclude competition."). The durability inquiry then is conducted to decipher whether a defendant had the ability to manipulate pricing and define the field of competition.

Durability is the ability to maintain power over pricing and competition "for a significant period without erosion by new entry or expansion." 2B Phillip E. Areeda, et al., ***Antitrust Law*** P 501, at 111 (3d ed. 2007) (defining monopoly power to include **[*36]** this durability element). In determining whether market power is "durable," courts have examined: (1) the existence of entry barriers;[10] (2) the difference in the defending party's market share and the next closest competitors' share; and (3) whether the defendant's market share declined or increased throughout the relevant time period.[11] In Reazin, the Third Circuit considered several factors in determining that a jury could reasonably have found monopoly power, notwithstanding that the defendant's market was approximately 60 percent. First, the court looked for the existence of "entry barriers." *899 F.2d at 968* ("Entry barriers are particular characteristics of a market which impede entry by new firms into that market."). Second, the court noted that, although the market share was low enough to possibly support a presumption against monopoly, the defendant

---

[10] The Fourth Circuit noted other courts' analysis of entry barriers in its discussion of durability. *E.I. du Pont de Nemours, 637 F.3d at 451*.

[11] See, e.g., *Adv. Health-Care Servs. v. Giles Memorial Hosp., 846 F. Supp. 488, 494 (W.D. Va. 1994)* ("If the defendants' market share is declining and/or other competitors' market shares are rising, then the defendants can hardly possess monopoly power."); *Richter Concrete Corp. v. Hilltop Concrete Corp., 691 F.2d 818, 826 (6th Cir. 1982)* (noting that a defendant's declining market share undermined any "inference of capacity to monopolize" that could be drawn from the size of the defendant's market share in considering an attempted monopolization claim); *United States v. Syufy Enterprises, 903 F.2d 659, 666-70 (9th Cir. 1990)* (emphasizing the importance of evaluating the ability of a defendant to "maintain" market share and, after noting the defendant's declining market share, affirming the district court's finding that no monopoly power existed); *Greyhound Computer Corp. v. International Business Machines Corp., 559 F. 2d 488, 496 n. 18 (9th Cir. 1977)* **[*38]** (noting that declining market share "may reflect an absence of market power"); *Alpha Lyracom Space Communs. V. Comsat Corp., 968 F. Supp. 876, 895 (S.D.N.Y. 1996)* (granting defendant's motion for summary judgment after noting that although entry barriers existed, the defendant's market share declined rather than increased during the relevant time period).

completely dominated the market, receiving some 62 percent of all earned health insurance premiums while its closest competitors retained less than 5 percent. *Id. at 969 n. 26*. Third, the court observed that, while it was possible that the defendant's share might have declined some during the relevant time period, that alone was **[*37]** not enough to make the jury's finding unreasonable. *Id. at 970*. Based on all these facts, the Third Circuit found that a jury reasonably could have found that the defendant had monopoly power.

The Fourth Circuit previously considered Kolon's SACC in this case and found that it alleged "sufficient facts to state a claim that [wa]s 'plausible on its face.'" *E.I. DuPont de Nemours & Co. v. Kolon Indus., Inc., 637 F.3d 435, 440 (4th Cir. 2011)* (quoting *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. With respect to Kolon's monopolization claim, the Court of Appeals pointed to Kolon's allegation that DuPont's market share was "over 70 percent." *Id. at 451*. Thus, taking Kolon's allegation to be true, the Fourth Circuit concluded that it appeared possible that DuPont had "predominated" the relevant market. Hence, the Court of Appeals left it to discovery to ascertain whether what Kolon had alleged about DuPont's market power (more than 70 percent) was factually correct.

Now, months after extensive discovery, it is clear, **[*39]** and both parties readily admit, that DuPont did not control more than 70 percent of the relevant market during the relevant time period. See Mem. Supp. Summ. J. at 29; Opp. Summ. J. at 28. In fact, Kolon's own expert takes the view that DuPont had a maximum market share of 59 percent during the relevant time period, and that DuPont's market share decreased to 55 percent during that three year period rather than increased. Mem. Supp. Summ. J. at Exhibit 21, Dr. Bamberger Rpt. at 16-17.

And, as the uncontested facts demonstrate, DuPont's decline in market share did not begin in 2006. The recent decrease in market share is simply part of a longer trend that began when Teijin first entered the para-aramid market in 1987. DuPont initially controlled the entire domestic para-aramid market, but its market share has steadily declined to present levels. In 2006, when Kolon says it first tried to enter the United States market, Teijin controlled 41 percent of the relevant market. By 2009, Teijin controlled 44 percent of that market. See Mem. Supp. Summ. J. at Exhibit 21, Dr. Bamberger Rpt. at 17.

Further, Dr. Bamberger's entire report is based on the assumption that European and United States' **[*40]** markets are properly comparable. See id. at 30 ("In particular, Kolon's experience in Europe is a reasonable benchmark for Kolon's but-for world experience in the United States."). If the two markets were comparable and DuPont had control over pricing and competition, it would defy logic for DuPont to charge lower prices in the United States than in the European market. Yet, it is not disputed that DuPont's prices in the United States are lower than in Europe.

Kolon argues that there are significant entry barriers to the para-aramid market. Assuming that to be true for the purposes of summary judgment, that fact alone is not sufficient to show monopoly power. Here, DuPont indisputably controlled less than 70 percent of the market. And, it had not demonstrated the ability to maintain power "for a significant period without erosion." To the contrary. DuPont's market share steadily declined from 1990 to 2009. And, unlike the defendant in Reazin, DuPont had a major competitor who controlled almost as much of the market as it did during the relevant time period. DuPont also charged lower prices than "comparable" markets were charging. On this record, virtually undisputed as to the relevant **[*41]** product and geographic markets, the fact that there are significant entry barriers is insufficient to fill the factual gaps in Kolon's monopolization claim.[12]

---

[12] Kolon also argues that DuPont engaged in "price discrimination" (sometimes Kolon calls it "value pricing") and asserts that the fact that DuPont reduced production dramatically in 2009 should raise suspicion. There is no evidence presented here that DuPont's use of value pricing supports an inference that it possessed monopoly power. Quite the opposite. Kolon's expert admitted that Kolon also engages in the same practice; that it is, in fact, a common practice; that it is not generally an anticompetitive practice; and that it can promote efficiency. Reply Mem. Summ. J. at 6, Exhibit 3, Bamberger Tr. 293; id. at Exhibit 2, Bamberger Tr. 199-201.

With respect to DuPont's decrease in production in 2009, Kolon itself admitted that the United States was facing an economic crisis in 2009; that it is not anticompetitive to reduce production when demand decreases; and that Kolon itself had decreased sales during the same time period. Id. at Exhibit 2, Bamberger Tr. 45-46; see generally Reply Supp. Summ. J. at 7. And, as with

DuPont clearly lacks the power to control prices and exclude competition - otherwise, it would have been able to prevent the decrease in its market share and the rise of one of its major competitors. On this record, no reasonable jury could conclude that DuPont had monopoly power during the relevant time period. Summary judgment is granted with respect to Kolon's First Cause of Action on that ground alone.

2. Willful Maintenance — Substantial Foreclosure

Even if Kolon had presented a triable issue on the monopoly power element, Kolon would also need to show that DuPont willfully maintained that power. On this element of its monopolization claim, Kolon's theory is that DuPont maintained its monopoly power through the use of long-term multi-year, exclusive supply agreements.[13] Kolon also has failed to make out a triable issue on this element.

It is, of course, necessary to remember that exclusive dealing arrangements, in and of themselves, are not illegal. To violate antitrust laws, exclusive dealing arrangements must "foreclose competition in a substantial share of the line of commerce affected." *E.I. DuPont de Nemours & Co. v. Kolon Indus., Inc., 637 F.3d 435, 451 (4th Cir. 2011)* (quoting *Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 327, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961))*. **[*44]** The burden is on Kolon to demonstrate substantial foreclosure. *United States v. Microsoft Corp., 253 F.3d 34, 69, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)* ("[I]n all cases, the plaintiff must both define the relevant market and prove the degree of foreclosure.").

Courts considering substantial foreclosure claims evaluate the proven percentage/degree of foreclosure, with the focus being on the competing manufacturers that have been closed-out of the relevant market due to the exclusive arrangements. Id.[14] ("Following Tampa Electric, courts considering antitrust challenges to exclusive contracts have taken care to identify the share of the market foreclosed."). Exclusive arrangements which "affect[] a small fraction of a market clearly cannot have the requisite harmful effect upon competition." Id.

Decisional law has not defined clearly a threshold at which foreclosure becomes substantial. Some courts have found foreclosure of 15 percent or less to be insubstantial. See *Chuck's Feed & Seed Co. v. Ralston Purina Co., 810 F.2d 1289, 1293 (4th Cir. 1987)* (noting the same and citing cases that have done so, *American Motor Inns, Inc. v. Holiday Inns, Inc., 521 F.2d 1230, 1252 (3d Cir. 1975)*; *Cornwell Quality Tools Co. v. CTS Co., 446 F.2d 825, 831 (9th Cir. 1971)*, cert. denied, *404 U.S. 1049, 92 S. Ct. 715, 30 L. Ed. 2d 740 (1972))*. Other courts have noted or found that foreclosure of 40 to 50 percent was insubstantial. See *R.J. Reynolds Tobacco Co. v. Philip Morris Inc., 199 F. Supp. 2d 362, 388 (M.D.N.C. 2002)*, aff'd sub nom. *67 F. App'x 810 (4th Cir. 2003)* (citing *Sewell Plastics, Inc. v. Coca-Cola Co., 720 F. Supp. 1196, 1213, 1218-20 (W.D.N.C. 1989)*, aff'd in part, *912 F.2d 463 (4th Cir. 1990)* (40 percent lawful where no anticompetitive harm shown)); *Barry Wright Corp. v. ITT Grinnell Corp., 724 F.2d*

---

value pricing, **[*42]** Kolon presented no evidence linking DuPont's decreased production to its claim that DuPont possessed monopoly power during the relevant time period.

[13] See SACC ¶¶ 28-37, 29 (alleging that, from 2006 to 2009, DuPont committed "various high-volume United States para-aramid fiber buyers to multi-year supply agreements that required the customer to purchase **[*43]** from 80% to 100% of the customer's requirements from DuPont," and that, "[b]ecause Dupont's supply contracts severely restricted access to customers and preclude effective competition, DuPont's conduct has had a direct, substantial and adverse effect on competition"); *E.I. DuPont de Nemours & Co. v. Kolon Indus., Inc., 637 F.3d 435, 451 (4th Cir. 2011)* ("As to the second element of a monopolization claim, willful maintenance of monopoly power, Kolon's Counterclaim focuses on DuPont's use of essentially exclusive agreements with key para-aramid fiber purchasers."); Opp. Summ. J. at 2 (stating that DuPont attempted to maintain its monopoly power through "restrictive, long-term supply agreements"). As was the case with Kolon's market share allegations, its allegations about the supply agreements were not borne out in discovery.

[14] See *Chuck's Feed & Seed Co. v. Ralston Purina Co., 810 F.2d 1289, 1295 (4th Cir. 1987)* (noting that courts evaluating exclusive dealing arrangements also consider: (1) the type of goods and the geographic area; (2) how much of the market has been closed off to competing manufacturers because of the exclusive dealing arrangements of the defendant, and, in conjunction with this, whether competitors have found or are **[*45]** likely to find it difficult to enter or remain in the market; and (3) the procompetitive effects of the dealing arrangements that might justify their use).

227, 236-37 (1st Cir. 1983) (50 percent lawful where little **[*46]** anticompetitive harm)); see also United States v. Microsoft Corp., 253 F.3d 34, 70, 346 U.S. App. D.C. 330 (D.C. Cir. 2001) (indicating that foreclosure of 40 to 50 percent might be considered insubstantial absent "certain circumstances."). And, at least one court has found that foreclosure of 24 percent, in the context of 10 year requirements contracts, was substantial. See Reynolds, 199 F. Supp. 2d at 388 (citing Twin City Sportservice, Inc. v. Charles O. Finley & Co., Inc., 676 F.2d 1291, 1301, 1304 (9th Cir. 1982)).

In Tampa Electric and Chuck's Feed, the Supreme Court and the Fourth Circuit, respectively, discussed the substantial foreclosure analysis and the role of percentages in conducting that analysis. In Tampa Electric, the Court first determined the relevant market, and then determined the percent of that market that the defendant's exclusive dealing arrangement, which was a 20-year, 100 percent requirements contract, foreclosed. 365 U.S. at 330-33. Finding that foreclosure was less than 1 percent, it determined that there could be no substantial foreclosure based on this percentage. Id. at 333. It then went on to analyze whether the contract at issue had substantially lessened competition in the **[*47]** relevant market. Id. It examined the contract dollar amount and the amount of product locked into the contract in the context of the annual profits and product traded in the relevant market. Id. at 334. Noting the many advantages of exclusive dealing arrangements, and that the contract constituted but a small portion of the relevant market, the Court held that the arrangement did not substantially decrease the volume of competition. Id. at 335.

In Chuck's Feed, a dog food company had an exclusive dealing arrangement with a pet food owner for an indeterminate period of time. Chuck's Feed & Seed Co. v. Ralston Purina Co., 810 F.2d 1289, 1291 (4th Cir. 1987). The dog food company terminated the arrangement when the pet owner added a competing brand of dog food to his inventory. Id. After conducting the substantial foreclosure analysis, the Court of Appeals found that the district court had erred in failing to grant judgment notwithstanding the verdict. Id. at 1295. The Court explained that the plaintiff was required to "show a negative impact on competition in the market as a whole." Id. Because the plaintiff had not met its burden to show "the extent to which [the dog food company] may **[*48]** have used exclusive dealing arrangements to 'foreclose the market,' or in other words, to keep competing brands of feed out of a substantial percentage of the [relevant market]," his claim failed as a matter of law. Id. (emphasis added).

The relevant market here is para-aramid fiber in the United States. Turning then to the matter of substantial foreclosure of that market and following the approach in Tampa Electric and Chuck's Feed, the Court must look first to what Kolon has shown with respect to the degree of foreclosure, or "how much of the market has been closed off" as a result of DuPont's supply agreements. Kolon simply has not made such a showing. In fact, Kolon has not even attempted to quantify foreclosure of the relevant market or to show how much of the market was closed off by DuPont's supply agreements.

Kolon's only analysis of percentage or degree is in its discussion of three particular segments of the para-aramid market. See Opp. Summ. J. at 9, 12. Possibly recognizing that it could not show substantial foreclosure in the relevant market it had defined in the SACC and has pressed throughout the case, Kolon switched gears in its opposition to summary judgment, arguing **[*49]** there that it was foreclosed from operating in three particular segments of the para-aramid market. Kolon's evidence of the degree of foreclosure in those segments, which is scant at best,[15] does nothing to reveal the amount of foreclosure in the market as a whole, a market which consists of numerous segments of varying size and a market that extends well beyond the few segments to which Kolon now points.[16]

---

[15] Kolon does not quantify one of those three segments (tires) at all; it fails to address a significant portion of the pulp segment (omitting discussion of gaskets), and its analysis of fiber optic cable and the brakes sub-segment of pulp is incomplete and rife with false assumptions. Opp. Summ. J. at 9, 12.

[16] See DuPont, 637 F.3d at 452 n. 12 (noting that, although Kolon had failed to calculate a specific percentage of market foreclosure in its SACC, it would not dismiss the counterclaim on that basis because the litigation was in the "pre-discovery" phase and Kolon had "insufficient information" to calculate the percentage at this stage). Of course, discovery is now over and Kolon has not done what the law clearly requires it to do.

Perhaps Kolon has abandoned any attempt to prove **[*50]** the extent of market foreclosure[17] because it realizes that the record shows that the degree of foreclosure here, if it exists at all, is de minimus. DuPont had supply agreements with, at most, 21[18] out of approximately 1,000 potential commercial United States para-aramid customers during the relevant time period, resulting in, at best, 2 percent of that market being foreclosed. Mem. Supp. Summ. J. SOF ¶ 23 (uncontested fact); Mar. 16, 2012 Tr. 68.[19] But, examination of the agreements themselves reveals that this 2 percent figure greatly exaggerates the percent of foreclosure. Many, if not most, of the 21 agreements cannot even be classified as "exclusive" or "multi-year."

Some of the contracts were not volume requirements contracts at all, imposed no obligation on customers to purchase from DuPont, and can certainly not be considered "exclusive."[20] Even the volume requirements contracts themselves are not all "exclusive" because they ranged in their **[*52]** requirements, with some requiring the purchase of a certain amount of pounds per month or per year, and with others obligating customers to purchase from 58 percent to 100 percent of their requirements from DuPont.[21] Further, the volume requirement contracts, with the exception of Akebono,[22] were all of two years or less duration. Several agreements were active for only one-year of the relevant time period, and several others were active for only a few months.[23]

The **[*54]** non-exclusivity and the relatively short length of time the contracts were in place allowed for DuPont's competitors to conduct business with these 21 customers, belying any claim of foreclosure. Several of those 21 customers did business with Teijin, Kolon, or both, during the relevant time period.[24] Others sought to do business

---

17 In fact, in its opposition, Kolon impliedly agrees with DuPont's assertion that its supply agreements did not tie up a significant portion of the customer base. Opp. Summ. J. at 33 ("[T]hat DuPont did not tie up the entire or even a significant portion of the customer base with onerous contracts is irrelevant.").

18 An examination of the summary judgment papers, considering every agreement mentioned by both sides, reveals agreements with the following 21 customers to be potentially at issue: AFL, Akebono, OFS, Sumitono, **[*51]** Oceaneering, Corning, Nisshinbo, Affinia, Garlock, Gates, Goodyear, Avon, Hollingsworth & Vose, Federal Mogul, MW Customer Papers, Toray, Fabric Development, Interface, Micro-Coax, Saint Gobain, and Tex Tech.

Kolon mentioned in its opposition to summary judgment that it believed contracts existed that had not yet been produced. This contention is based on arguments in Kolon's Motion to Compel Production of Documents (Docket No. 133). That motion was pending when Kolon filed its opposition brief on December 23, 2011. (Docket No. 275). The Court granted the motion on February 22, 2012 (Docket No. 402). Kolon has not since altered its brief on this point. Nor did Kolon thereafter tell the Court that DuPont had not supplied all the relevant contracts.

19 Even if the relevant market only included DuPont's 400 United States commercial para-aramid customers, the percent of foreclosure would be, at most, 5 percent.

20 See, e.g., Mem. Supp. Summ. J. at Exhibits 63 (Interface), 65 (MW Custom Papers), 67 (Saint-Gobain).

21 See, e.g., Mem. Supp. Summ. J. at Exhibits 69 (Affinia Group 100 percent requirements contract); 76 (MW Custom Papers 58 percent requirements contract); 81 (Federal Mogul 300,000 lbs/year contract).

22 The parties agree that, of the 21, certain agreements did not contain volume requirements. However, they disagree as to the number. DuPont claims that nine contracts did not contain volume requirements. Kolon contends that three of these contracts, one with Akebono, one with Oceaneering, and one with Fabric Development, were in fact volume requirements contracts. See Opp. Summ. J. at 15 n. 25. For the purposes of summary judgment, **[*53]** the Court will assume that Kolon's representations are correct.

23 Goodyear, Corning, and Oceaneering are among those who entered into contracts with obligations that lasted approximately one-year during the relevant time period. AFL, Tex Tech, and OFS are among those who had contract-obligations that lasted only a few months of the relevant time period. Many of the contracts allowed customers to terminate the contract without cause or with a certain amount of notice. See, e.g., Mem. Supp. Summ. J. at Exhibits 69 (Affinia group; terminable without cause on 90 days-notice); 70 (AFL; terminable without cause on 180 days-notice); 72 (Corning; terminable yearly); 76 (MW Custom Papers; terminable without cause on 1 year-notice); 82 (Nisshinbo; terminable without cause on 3 months-notice after first year of contract); 83 (Nisshinbo (second contract); terminable without cause on 180 days-notice).

with Kolon but were turned away due to qualification or capacity issues.[25] And, there is no dispute that these 21 customers were not the only customers in the various para-aramid segments in which they operated (tires, MRG, pulp, fiber optic cable). Nor is there any dispute that the supply agreements, as a group, left entire areas and segments of the para-aramid market in the United States completely untouched.

The supply agreements made up only a small fraction of DuPont's revenue from sales of Kevlar in the United States. And, because DuPont's share of the market was 59 percent or less during the relevant time period, those agreements accounted for an even smaller fraction of the total revenue from para-aramid sales in the United States. Pl. Mem. Supp. Motion to Compel at 5 (Docket No. 164); Mem. Supp. Summ. J. at 11.

On this record, the percentage of foreclosure here, cannot as a matter of law, constitute sufficient grounds for a finding of substantial foreclosure. And, no reasonable jury could find otherwise.

The inquiry next turns to the record respecting the effect of the supply agreements, such as they were, on overall competition, focusing on whether other competitors **[*57]** have been able to remain in or to enter the market. See *Chuck's Feed & Seed Co. v. Ralston Purina Co., 810 F.2d 1289, 1295 (4th Cir. 1987)*. Kolon has put forth no evidence demonstrating that other competitors have been shut-out of the market. All the evidence in the record is to the contrary. Teijin's market share grew during the relevant time period as DuPont's declined. Hyosung, a Korean company, began marketing para-aramid in the United States in early 2008. Mem. Supp. Summ. J. SOF ¶ 5 n. 7 (uncontested fact). In a market as specialized as the para-aramid market, where DuPont was the only seller in the United States throughout the 1970s and well into the 1980s, the entry of two new competitors (Kolon and Hyosung) along with the continued, relentless ascendance of a third competitor (Teijin) is marked evidence that renders hollow Kolon's contention that the supply agreements adversely affected overall competition in the relevant period.

Along with foreclosure percentage and competitor viability, in determining the degree of foreclosure caused by an exclusive dealing arrangement, courts also consider "the duration of the agreement, the ability of consumers to comparison shop and their **[*58]** propensity to switch products, the existence of barriers to entry, and the availability of alternative channels of distribution." *R.J. Reynolds Tobacco Co. v. Philip Morris Inc., 199 F. Supp. 2d 362, 389 (M.D.N.C. 2002)*, aff'd sub nom. *67 F. App'x 810 (4th Cir. 2003)* (citing *Ryko Mfg. Co. v. Eden Servs., 823 F.2d 1215, 1232 (8th Cir. 1987))*; XI Herbert Hovenkamp ***Antitrust Law*** 1821d (1998)). "The lower the foreclosure percentage, the more salient these factors become in determining whether there has been substantial foreclosure." Id.

---

[24] See, e.g., Mem. Supp. Summ. J. at Exhibit 16, Decl. Jerry Peters, Supply Chain Manager at Gates (explaining that Gates had purchased from Teijin, Kolon, and DuPont during the relevant time period, and that decisions were based on pricing); Mem. Supp. Summ. J. at Exhibit 10, Decl. Paul Williams, Prior Purchasing Manager OFS (explaining that OFS has started to purchase yarn from Kolon despite DuPont's recent supply agreement with OFS and that OFS did **[*55]** not do so previously because Kolon did not have adequate supply); see also Mem. Supp. Summ. J. SOF ¶ 47 (uncontested fact) (explaining that Kolon sold Heracron to Corning, Garlock, Federal Mogul, and MW Custom Papers during the relevant time period).

[25] See, e.g. Mem. Supp. Summ. J. at Exhibit 30, Dep. of David Murphy, Kolon United States sales representative, at 28-29, 31:17-32:20, 151-152 (explaining that he did not approve sales to Goodyear during the relevant time period, and that Kolon did not qualify its product with Goodyear until 2011); Mem. Supp. Summ. J. at Exhibit 12, Decl. of Mr. Jain, Chief Engineer Team Leader at Goodyear, ¶ 21 ("Prior to February 2011, Goodyear could not have and would not have purchased Heracron because it had not met Goodyear's standards and specifications."); Opp. Summ. J. at Exhibit 44-A, Aug. 2008 email from Mr. Kang in response to Akebono's request for quotations for Heracron ("Several month back, we negotiated with Akebono brake (Japan) for long term biz plan and Quality . . . [s]o, we don't have enough room for supplying to Akebono Brake Corporation in North America this year."); Mem. Supp. Summ. J. at Exhibit 96, email from United States Kolon **[*56]** sales representative Michael Mitchell to OFS ("Thank you for the opportunity to bid on the OFS business . . . unfortunately, all our production capacity for high modulus yarn has already been allocated to existing customers."); see also Seo Dep. Mem. Supp. Summ. J. at Exhibit 56, 140-41 ("The overall amount to be used by OFS is 255 tons . . . [f]or us, to provide a price for 80 percent of that, that is too much of a quantity.").

Here, these factors show a lack of substantial foreclosure. First, as explained above, the duration of nearly all of the agreements on which Kolon rests its case was approximately two years or less. Second, the evidence does not show that consumers have difficulty comparison shopping. The record shows that, amongst others, Corning, Garlock, Federal Mogul, OFS, Gates, Akebono, MW Customer Papers, and Goodyear all did business with Kolon during the relevant time period. See Mem. Supp. Summ. J. SOF ¶ 47 (uncontested fact); supra n. 24 & n. 25. And, Kolon has not demonstrated that consumers have a low propensity to switch sellers. In fact, the record shows that **[*59]** OFS and Goodyear actually did switch some of their business to Kolon after Kolon increased its supply capacity and was qualified. Id. Further, Gates switched between Teijin, Kolon, and DuPont during the relevant time period. The record on this aspect of the analysis also disproves substantial foreclosure.

There is no question that the para-aramid market, by its very nature, presents entry barriers, and taking the evidence in the light most favorable to Kolon for the purposes of summary judgment, these barriers are even higher in the United States where the Berry Amendment prevents international firms from providing para-aramid fiber to the United States Department of Defense. SACC ¶ 27 (Docket No. 2). However, the existence of entry barriers alone does not demonstrate substantial foreclosure.[26]

Not surprisingly, Kolon does not now contend that it has shown any particular degree of foreclosure or that DuPont's supply agreements have locked up a significant portion of the market. Instead, Kolon argues that it has met its burden by demonstrating that the exclusive dealing arrangements at issue formed a "critical bridge" to "high volume" customers, thereby substantially foreclosing competition. Kolon cites to *LePage's, Inc. v. Minnesota Mining & Mfg., 324 F.3d 141, 147 (3d Cir. 2003)* and *United States v. Dentsply Int'l, Inc., 399 F.3d 181, 189 (3d Cir. 2005)* in support of this argument.

In LePage's, the defendant had a 90 percent market share and conceded that it had monopoly power. *324 F.3d at 144*. The Third Circuit was left to determine whether the defendant's exclusive dealing arrangements, when coupled with bundled rebate packages it had offered to induce the plaintiff's major customers into reducing or eliminating their business with the plaintiff, substantially foreclosed the relevant market.

The Court found **[*61]** that, in light of the facts that the defendant had monopoly power and that the plaintiff had shown that it had been foreclosed from doing business with most of its major customers by the defendant's purposeful use of the new bundled rebate programs, a jury could reasonably find that there was substantial foreclosure. *Id. at 152-62*. It noted that "a monopolist is not free to take certain actions that a company in a competitive [] market may take, because there is no market constraint on a monopolist's behavior," *id. at 150*, and that "exclusionary conduct by a monopolist [is] more likely to be anticompetitive than ordinary *§ 1* exclusionary conduct." *Id. at 159* (citing *United States v. Microsoft Corp., 253 F.3d 34, 70-71, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)* in which the monopolist had a 95 percent market share)).

In United States v. Dentsply, the defendant-manufacturer had a 75-80 percent market share, while the next largest competitor had a 5 percent market share. *399 F.3d at 188*. The defendant-manufacturer made strategic exclusive dealing arrangements with product distributors, such that the only way for competitors to enter the market was by selling directly to product users. Id. The district court determined **[*62]** that, because other manufacturers could still sell directly, the market was not foreclosed. Id. The Court of Appeals held that the district court had erred in discerning the relevant market by failing to recognize that the mode of business in the market was to work through distributors, and that direct selling was not practical. *Id. at 189-90* ("[T]he Court's scrutiny should have been applied not to the 'ultimate consumers' who used the [product], but to the 'customers' who purchased the [product].").

---

[26] If this were true, then both Kolon and Teijin would have "substantially foreclosed" the market during the relevant time period, because both entered into long-term exclusive supply contracts in the para-aramid market during that time frame. See Mem. Supp. Summ. J. SOF ¶¶ 22, 47 (uncontested fact).

Supply agreements, even in markets with high-entry barriers, have certain advantages for both customers **[*60]** and producers. In fact, customers often request these agreements to ensure stable pricing and supply. See *Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 334, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961)*.

In *LePage's*, the plaintiff's description of the "exclusionary conduct" at issue specifically covered: (1) exclusionary dealing contracts; and (2) bundled rebate programs with major distributors. Unlike in this case, the plaintiff demonstrated that the defendant's "bundle rebate" program effectively cut off its business with the major retailers in the relevant market, and that this rebate program was introduced in response to the plaintiff's entry into the market with the purpose of reducing/eliminating plaintiff's sales to the retailers. The plaintiff also showed that the defendant's efforts had been successful, that the defendant had reached out to many of its former customers and that, **[*63]** as a result, those customers had reduced business with the plaintiff. In this case, on the other hand, it is undisputed that DuPont had supply contracts before 2006, and Kolon has not shown that customers it reached out to refused to do business with it because of the supply contracts.[27] And, in *Dentsply*, unlike in this case, the issue was the definition of the relevant market. This, of course, is at the heart of cases finding substantial foreclosure based on the "critical bridge" line of reasoning. In markets where, to be truly competitive, one must sell to a specific group of individuals "distributors," who then sell to "consumers," or in which there is necessarily a "middle-man," defining the relevant market to include both the distributors and the consumers is misleading. If a monopolist ties up the distributors, there is no practical way to reach the consumers and effectively compete.

That simply is not what the record shows here. Kolon has not argued that the customers with whom DuPont has supply agreements are "distributors" or "middle-men." The record presents no reason to think that Kolon could not sell to other customers occupying the same segment of the para-aramid market (pulp, tires, MRG, fiber optic cables) as customers that have supply agreements with DuPont. Further, Kolon offered no explanation as to why DuPont's supply agreements prevent it and other competitors from seeking business in other unimpeded segments of the para-aramid market. Nor has Kolon shown why the particular segments on which it focuses are, in fact, "key" or "critical" in the para-aramid market.

In sum, neither LePage's nor Dentsply is applicable here. In both cases, monopoly power was clearly established. The courts necessarily viewed the substantial foreclosure inquiry through that lens. *E.I. DuPont de Nemours & Co. v. Kolon Indus., Inc., 637 F.3d 435, 441 (4th Cir. 2011)* ("Conduct that might otherwise be lawful may be impermissibly exclusionary under ***antitrust law*** when practiced **[*66]** by a monopolist."). Moreover, the facts in LePage's and Dentsply simply are not present in this case. On the whole, the facts of those cases and the presence there of clearly established monopoly power make it impossible to conclude, as Kolon would have it, that those cases govern this quite different case.

Having failed to establish that DuPont had monopoly power, and having failed to prove substantial foreclosure, Kolon cannot defeat DuPont's motion for summary judgment on the First Cause of Action.[28]

---

[27] Kolon cites to two portions of its sales representatives' testimony to support its argument that DuPont's supply agreements interfered with its business: (1) Mr. Mitchell testified that he believed that Corning did business only with DuPont and Teijin because of supply agreements Corning had with **[*64]** them; and (2) Mr. Murphy testified that he was unable to sell Heracron to Goodyear because of Goodyear's supply agreement with DuPont. Opp. Summ. J. at 17.

However, the records shows both Mr. Mitchell and Mr. Murphy testified that factors other than the supply agreements were responsible for their lack of business. Mem. Supp. Summ. J. at Exhibit 7, Mitchell Tr. 84 (explaining that he was not "aware" that DuPont's or Teijin's contracts limited Kolon's ability to sell in the United States); id. at Exhibit 30, Murphy Tr. 28. (explaining that Kolon could not sell to Goodyear during the relevant time period because of qualification and approval issues).

During the relevant time period, Kolon acknowledged that, out of approximately 1,000 potential United States commercial para-aramid customers in the United States, it attempted to qualify Heracron with only nine customers and contacted approximately 68. See Mem. Supp. Summ. J. SOF ¶ 46 (uncontested fact) (citing Exhibit 97, Kolon's Resp. to 2nd Set of Interrogs., 10/4/09, at 5-10). Thus, it attempted to qualify Heracron with less than 1 percent of United States customers and actually contacted less than 7 percent. The record shows that this **[*65]** frail effort, and not DuPont's supply agreements, explains Kolon's low market share in the United States.

[28] It is not necessary to address whether DuPont's activity was "procompetitive" since it is clear that DuPont did not have monopoly power and since Kolon has not proven foreclosure.

II. THE ATTEMPTED MONOPOLIZATION CLAIM: SECOND CAUSE OF ACTION

A party is guilty of "attempted monopolization" if it employs "methods, means, and practices which would, if successful[] accomplish monopolization, and which, though falling short, nevertheless approach so close as to create a dangerous probability of it." See, e.g., *American Tobacco Co. v. United States, 328 U.S. 781, 785, 66 S. Ct. 1125, 90 L. Ed. 1575 (1946)*. To prevail on a claim of attempted monopolization then, a plaintiff must demonstrate:

(1) a specific intent to monopolize **[*67]** a relevant market;

(2) predatory or anticompetitive acts;

(3) a dangerous probability of successful monopolization.

R.J. Reynolds Tobacco Co. v. Philip Morris Inc., 199 F. Supp. 2d 362, 394 (M.D.N.C. 2002), aff'd sub nom. *67 F. App'x 810 (4th Cir. 2003)* (citing *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993))*.

Kolon alleges that DuPont's past conduct and direct statements demonstrate that it had specific intent to monopolize the para-aramid market. Kolon further alleges that DuPont has engaged in anticompetitive activity through its supply agreements with high-volume para-aramid customers. See SACC ¶ 44 ("DuPont's long-term supply contracts severely restrict access to key United States para-aramid purchasers necessary to gaining threshold sales required to effectively compete in the United States."); see also *E.I. DuPont de Nemours & Co. v. Kolon Indus., Inc., 637 F.3d 435, 452, 453 (4th Cir. 2011)* ("Here, Kolon alleged that DuPont's use of multi-year exclusive contracts with high-volume para-aramid fiber purchasers constituted improper anticompetitive conduct."). And, Kolon claims that DuPont's market share, prices in the United States, and supply shortage in the United States **[*68]** for para-aramid "indicate a dangerous probability of success." SACC ¶ 44.

1. Anticompetitive Conduct[29]

We turn first to Kolon's contention that DuPont engaged in anticompetitive acts through its use of exclusive agreements with high-volume para-aramid customers. As explained in Part I.2 above, exclusive agreements are not per se illegal. **[*69]** See *Chuck's Feed & Seed Co. v. Ralston Purina Co., 810 F.2d 1289, 1293 (4th Cir. 1987)*. To violate antitrust laws, an exclusive dealing arrangement must "foreclose competition in a substantial share of the line of commerce affected." *E.I. DuPont de Nemours & Co. v. Kolon Indus., Inc., 637 F.3d 435, 451 (4th Cir. 2011)* (quoting *Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 327, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961))*; *Chuck's Feed, 810 F.2d at 1293* (quoting the same and also citing *Standard Oil Company of California v. United States, 337 U.S. 293, 314, 69 S. Ct. 1051, 93 L. Ed. 1371 (1949)* and *Standard Fashion Co. v. Magrane-Houston Co., 258 U.S. 346, 356-57, 42 S. Ct. 360, 66 L. Ed. 653 (1922)* for the proposition)).

For the reasons set forth above in Part I.2, Kolon has failed to show that there is a genuine issue of material fact that DuPont has substantially foreclosed the relevant market with the so-called long-term supply agreements. The

---

[29] It will be assumed for purposes of the motion for summary judgment that there is a triable issue of fact as to whether DuPont had specific intent to monopolize the para-aramid market in the United States. Kolon's argument on this point is that DuPont discovered the segments of the market that Kolon planned to enter and then implemented supply contracts in order to prevent Kolon's entry. See Mem. Opp. Summ. J. at 6-9.

Of course, the desire to prevent a competitor from taking one's customers or to prevent the loss of market share is not, in and of itself, illegal. The purpose of the antitrust laws is to promote and protect competition, not to thwart it. See *Abcor Corp. v. AM Int'l, Inc., 916 F.2d 924, 931 (4th Cir. 1990)* (citing *Brown Shoe Co. v. United States, 370 U.S. 294, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962))*. No competitor can be expected to welcome news of a new entrant in the market.

supply agreements at issue constituted a small percentage of DuPont's total sales. DuPont's market share decreased from 59 to 55 percent during the relevant time period. Out of a pool of some 1,000 customers, DuPont had supply agreements with only 21, exclusive volume agreements with only 14, and exclusive volume agreements that were **[*70]** active for a period longer than one-year during the relevant time period with only 11 customers.[30] There were entire segments of the para-aramid market in which DuPont had no supply agreements.[31] And, important customers with which DuPont had supply agreements actually conducted and sought business with Kolon and with Teijin during the relevant period. And, during the relevant period, Kolon and Teijin both had their own supply agreements with para-aramid customers in the United States; Hyosung, a Korean competitor, entered the United States market; and Teijin's market share continued to grow.

On this record, no reasonable jury could find that the so-called long-term contracts constituted substantial foreclosure of the para-aramid market in the relevant period. Therefore, there is no genuine issue of material fact on the anticompetitive element of the attempted monopolization claim, and DuPont's motion for summary judgment as to that claim must be granted for that reason alone.

2. Dangerous Probability of Success

Even if Kolon had made out a triable issue on the anticompetitive element of its Second Cause of Action, it would have to prove the third element of an attempted monopolization claim: that there was a dangerous probability of successful monopolization. An analysis of this element looks at the defendant's ability to control the relevant market. *E.I. du Pont de Nemours & Co. v. Kolon Industries, Inc., 637 F.3d 435, 453 (4th Cir. 2011)*. The analysis examines market share, the ability to control prices and the ability to exclude competitors. The plaintiff must prove that the alleged anticompetitive **[*72]** acts and the specific intent to monopolize "result in a reasonable probability that monopolization will sooner or later occur." O'Malley, Grenig, Lee, Federal Jury Practice and Instruction, § 150.32 (5th ed. 2001); Sand, Siffert, Reiss, Batterman, Modern Federal Jury Instructions (Civil), Instruction 80-29; *Spectrum Sports v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)* (citing *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 767-68, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)* ([conduct] "is unlawful only when it threatens actual monopolization . . . judging unilateral conduct in this manner reduces the risk that the antitrust laws will dampen the competitive zeal of a single aggressive entrepreneur.")).

This record shows that, in the relevant years, DuPont's market power declined from 59 percent to 55 percent, a continuation of a 17 year decline in market power. At the same time, the market power of Teijin was increasing, and significantly so. Teijin went from 41 percent market share in 2006 to 44 percent in 2009. Two new companies, Hyosung and Kolon, entered the market.

The record does not establish that DuPont had the ability to control prices. Indeed, the record shows that DuPont had to charge lower prices in the United **[*73]** States market than in the European market, a market Kolon claims to have been comparable to the United States market and a market in which Kolon says it was able to compete.

And, while it appears that Kolon had difficulty entering the United States market, the record shows that was through no fault of DuPont. Instead, the record shows that, during and after the relevant time period (2005-2011), Goodyear, one of DuPont's biggest customers, wanted to buy from Kolon and was helping Kolon in an effort to qualify Heracron to meet Goodyear specifications. Mem. Supp. Summ. J. at Exhibit 30, Dep. of David Murphy, Kolon United States sales representative, at 28-29, 31:17-32:20, 151-152. Kolon, however, could not achieve qualification

---

[30] Some of these 11 customers could terminate the contract without cause after a certain period of time, most often one-year, so those contracts would likely be considered one-year contracts instead of multi-year contracts. And, some could be considered non-exclusive in the sense that they had low volume requirements, only required the buyer not to exceed a maximum amount of purchases per year, or only limited purchases of a particular type. However, granting every inference in Kolon's favor for the purposes of summary judgment, the Court assumes they could be classified as multi-year contracts.

[31] Kolon **[*71]** has offered no evidence as to why it did not do business in these other segments or as to what percent of the market each segment (tires, MRG, aerospace, pulp, etc.) covered.

during the relevant period. Id. In addition, OFS solicited bids from Kolon in 2008, but Kolon chose not to bid because of its own capacity limitations. Mem. Supp. Summ. J. at Exhibit 96, email from Kolon's sales representative in the United States, Michael Mitchell, to OFS.[32] And, other customers that had supply contracts with DuPont actually did business with Kolon during the relevant time period.[33] On this record, it cannot be said that Kolon has shown a triable **[*74]** issue respecting DuPont's ability to exclude competitors from the market.

Indeed, Kolon has not demonstrated the existence of evidence that would permit a reasonable jury to find that the alleged anticompetitive acts (which have not been shown) and the alleged intent to monopolize (as to which a triable issue is assumed) presented a reasonable probability that monopolization would sooner or later occur.

Hence, there is no triable issue of fact on the "anticompetitive acts" or the "dangerous probability" elements of Kolon's Second Cause of Action: Attempted Monopolization. Therefore, that claim cannot withstand summary judgment.

CONCLUSION

For the foregoing reasons, Dupont's MOTION FOR SUMMARY JUDGMENT (Docket No. 254) will be granted.

It is so ORDERED.

MEMORANDUM

Padova, J.

I. INTRODUCTION

Presently before the Court in this class action suit alleging violations of sections 1 and 2 of the Sherman Act, *15 U.S.C. §§ 1*, *2*, is the motion of Defendants **[*5]** Comcast Corporation, Comcast Holdings Corporation, Comcast Cable Communications, Inc., Comcast Cable Communications Holdings, Inc., and Comcast Cable Holdings, LLC (collectively "Comcast") for summary judgment pursuant to *Fed. R. Civ. P. 56*. The Third Amended Complaint alleges that Comcast entered into agreements with its competitors to allocate the nation's regional cable markets amongst themselves through swaps of their respective cable assets. The Class alleges that, as a result of all the swap agreements, Comcast unreasonably restrained trade and willfully obtained and maintained monopoly power in the relevant geographic market, the Philadelphia direct marketing area ("DMA"). The Class contends that Comcast has used its monopoly power to raise cable prices to artificially high, supra-competitive levels. For the following reasons, we grant Comcast's motion for summary judgment on the Class's section 1 claim, insofar as it charges that Comcast's conduct was a *per se* violation of the antitrust laws. We also grant the motion in part on the Class's *section 2* claims.

II. SUMMARY JUDGMENT STANDARD

Summary judgment is appropriate "if the movant shows that there is no genuine dispute as to **[*6]** any material fact and the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*. An issue is "genuine" if "the evidence is such that a reasonable jury could return a verdict for the nonmoving party." *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. A factual dispute is "material" if it might affect the outcome of the case under governing law. Id.

"[A] party seeking summary judgment always bears the initial responsibility of informing the district court of the basis for its motion, and identifying those portions of [the record] which it believes demonstrate the absence of a genuine issue of material fact." *Celotex Corp. v. Catrett, 477 U.S. 317, 323, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*. When the moving party also bears the burden of proof at trial, that party must support its motion with sufficient evidence that would entitle it to a directed verdict. *In re Bressman, 327 F.3d 229, 237 (3d Cir. 2003)* (citations omitted). Once the moving party has made such a showing, the non-moving party can defeat the motion "with probative evidence that would demonstrate the existence of a triable issue of fact." *Id. at 238* (citations omitted).

III. SECTION 1 *PER SE* LIABILITY BASED UPON HORIZONTAL MARKET [*7] ALLOCATION

In order to prove its antitrust claims, the Class must establish: (1) a violation of the antitrust laws, here *sections 1* and *2* of the Sherman Act, (2) individual injury resulting from that violation (antitrust impact), and (3) measurable damages. *15 U.S.C. § 15*; *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d 305, 311 (3d Cir. 2008)* (citing *Am. Bearing Co. v. Litton Indus., Inc., 729 F.2d 943, 948 (3d Cir. 1984))*. Section 1 of the Sherman Act condemns contracts, conspiracies, and combinations in restraint of trade. *15 U.S.C. § 1*. Because even beneficial legitimate contracts or combinations restrain trade to some degree, *section 1* has long been interpreted to prohibit only those contracts or combinations that are "unreasonably restrictive of competitive conditions." *Standard Oil Co. of N.J. v. United States, 221 U.S. 1, 58, 31 S. Ct. 502, 55 L. Ed. 619 (1911)*. "Three general standards have emerged for determining whether a business combination unreasonably restrains trade under *section 1*." *United States v. Brown Univ., 5 F.3d 658, 668 (3d Cir. 1993)*.

Under traditional "rule of reason" analysis, a fact finder "weighs all of the circumstances of a case in deciding whether a restrictive practice should **[*8]** be prohibited as imposing an unreasonable restraint on competition." *Continental T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 49, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)*. "The inquiry is whether the restraint at issue 'is one that promotes competition or one that suppresses competition.'" *Deutscher Tennis Bund v. ATP Tour, Inc., 610 F.3d 820, 830 (3d Cir. 2010)* (quoting *National Soc. of Professional Engineers v. United States, 435 U.S. 679, 691, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978))*. To establish a section 1 violation under the rule of reason test, a plaintiff must prove: (1) concerted action by the defendants; (2) that produced anti-competitive effects within the relevant product and geographic markets; (3) that the concerted action was illegal; and (4) that the plaintiff was injured as a proximate result of the concerted action. *Rossi v. Standard Roofing, Inc., 156 F.3d 452, 464-65 (3d Cir. 1998)* (citation omitted).

> "The plaintiff bears an initial burden under the rule of reason of showing that the alleged combination or agreement produced adverse, anticompetitive effects within the relevant product and geographic markets." *Brown [Univ.], 5 F.3d at 668*. "The plaintiff may satisfy this burden by proving the existence of actual

> anticompetitive effects," or **[*9]** defendant's market power. Id. "If a plaintiff meets his initial burden of adducing adequate evidence of market power or actual anti-competitive effects, the burden shifts to the defendant to show that the challenged conduct promotes a sufficiently pro-competitive objective." *Id. at 669*. "To rebut, the plaintiff must demonstrate that the restraint is not reasonably necessary to achieve the stated objective." Id.

Deutscher Tennis Bund, 610 F.3d at 830.

Certain restraints are *per se* illegal '"because of their pernicious effect on competition and lack of any redeeming virtue. . . .'" Id. (quoting *Brown Univ. 5 F.3d at 669*); see also *N.W. Wholesale Stationers, Inc. v. Pac. Stationery and Printing Co., 472 U.S. 284, 289-90, 105 S. Ct. 2613, 86 L. Ed. 2d 202 (1985)*. However, '"[p]er se liability is reserved for only those agreements that are so plainly anticompetitive that no elaborate study of the industry is needed to establish their illegality.'" *Deutscher Tennis Bund, 610 F.3d at 830* (quoting *Texaco Inc. v. Dagher, 547 U.S. 1, 5, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006)* (stating "this Court presumptively applies rule of reason analysis. . . .") (quoting *Nat'l Soc'y of Prof'l Eng'rs, 435 U.S. at 692*)); see also *State Oil v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)* ("Per **[*10]** se treatment is appropriate '[o]nce experience with a particular kind of restraint enables the Court to predict with confidence that the rule of reason will condemn it.'" (quoting *Arizona v. Maricopa County Med. Soc'y, 457 U.S. 332, 344, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982)* (alteration in original)). A horizontal market allocation agreement is one of the species of perniciously anticompetitive conduct that is *per se* illegal. See *Palmer v. BRG of Ga., Inc., 498 U.S. 46, 49-50, 111 S. Ct. 401, 112 L. Ed. 2d 349 (1990)* (per curiam); *United States v. Topco Assocs., Inc., 405 U.S. 596, 608, 92 S. Ct. 1126, 31 L. Ed. 2d 515 (1972)*.

Finally, courts apply an intermediate or "quick look" rule of reason analysis "in cases where *per se* condemnation is inappropriate but where no elaborate industry analysis is required to demonstrate the anticompetitive character of an inherently suspect restraint." *Deutscher Tennis Bund, 610 F.3d at 830* (quoting *Brown Univ., 5 F.3d at 669* (internal quotation marks omitted)). "Under 'quick look' analysis, the competitive harm is presumed, and 'the defendant must promulgate 'some competitive justification' for the restraint.'" *Id. at 831* (quoting *Brown Univ., 5 F.3d at 669* quoting *National Collegiate Athletic Ass'n v. Board of Regents, 468 U.S. 85, 110, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984))*. [1]

Comcast argues that application of the *per se* rule here is improper for several reasons. First, it asserts that courts are increasingly reluctant to apply the *per se* label, especially where the economic **[*12]** impact of the challenged business practice is not immediately obvious. Second, no court has previously condemned as a *per se* violation transactions that have been approved by federal antitrust or regulatory agencies. [2] Third, it asserts that the alleged

---

[1] The selection of the mode of **[*11]** analysis to apply to an antitrust claim is a question of law for the court to determine. *California ex rel. Harris v. Safeway, Inc., 651 F.3d 1118, 1124 (9th Cir. 2011)* (holding that the selection of the proper mode of antitrust analysis is a question of law, to be reviewed *de novo* on appeal (citing XI Phillip Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 1909b, at 279 (2d ed. 2005))); *Stop & Shop Supermarket Co. v. Blue Cross & Blue Shield of R.I., 373 F.3d 57, 61 (1st Cir. 2004)* (stating that whether a plaintiff's alleged facts comprise a *per se* claim is normally a question of legal characterization that can often be resolved by the judge on a motion to dismiss or for summary judgment); *Deutscher Tennis Bund, 610 F.3d at 833* (holding that the "application of the quick look analysis is a question of law to be determined by the court," and therefore has no application to jury inquiry (citing ABA Section of ***Antitrust Law***, Model Jury Instructions in Civil Antitrust Cases A-8 n. 2 (2005))).

[2] Comcast's argument about *per se* liability and regulatory approval is not new. In deciding Comcast's Rule 12(b)(6) motion, we rejected - both on initial review and on reconsideration - its argument that the initial Class Complaint failed to state a *per se* violation, finding that the allegations supported a claim that the swap agreements constituted a horizontal market allocation. Addressing one of Comcast's **[*13]** main arguments, we held that "[t]he mere fact that regulatory and law enforcement agencies may have reviewed and approved the challenged transactions is not ground for dismissal of Plaintiffs' claims." *Glaberson v. Comcast Corp., Civ. A. No. 03-6604, 2006 U.S. Dist. LEXIS 62672, 2006 WL 2559479, at *10 (E.D.Pa. Aug. 31, 2006)* *modified by* *Glaberson v. Comcast Corp., Civ. A. No. 03-6604, 2006 U.S. Dist. LEXIS 91990, 2006 WL 3762028 (E.D.Pa. Dec. 19, 2006)* (citing *Otter Tail Power Co. v. United States, 410 U.S. 366, 372, 93 S. Ct. 1022, 35 L. Ed. 2d 359 (1973)* (explaining that "[a]ctivities which come under the jurisdiction of a regulatory agency nevertheless maybe subject to scrutiny under the antitrust

market allocation here was not among competing firms. [3] Finally, Comcast contends that the swap transactions were not naked restraints on trade because no markets were actually allocated since the swap agreements did not contain no-compete clauses restricting the Counterparties from re-entering the market and competing with one another. The Class responds that the summary judgment record establishes a horizontal allocation of markets between competitors that is a naked restraint on trade constituting a *per se* violation of *section 1*.

A. Comcast's Acquisition of Cable Companies and Cable Assets

Beginning in 1998, Comcast embarked upon a course of conduct to create a cable "cluster" in the Philadelphia DMA by acquiring the cable systems of other large multi-system operators ("MSOs") that operated and offered multichannel video programming distributor ("MVPD") service in various franchise areas in the Philadelphia DMA. (See Class Certification Memorandum Opinion, Doc. No. 430, entered January 7, 2010 ("Class Cert. Mem."), at 7-8 n. 8; Def. Ex. 59, Deposition of Michael A. Williams, Ph. D. on May 29, 2009 ("Williams Dep."), at 104-105.) In the first acquisition transaction, occurring in April 1998, Comcast acquired from Marcus Cable certain cable systems operating as the incumbent wireline MVPD provider in franchise areas located in Kent County, Delaware, serving approximately 27,000 subscribers. (See Compl., ¶ 52(a) [4]; Class Cert. Mem., p. 7-8 n.8.) In June 1999, Comcast acquired from Greater Philadelphia Cablevision, Inc. certain cable systems operating as the incumbent wireline MVPD provider in franchise **[*15]** areas located in one of the four franchise areas in the City of Philadelphia. The system had approximately 79,000 subscribers. (Compl. ¶ 52(b); Class Cert. Mem., p. 7-8 n.8.)

In January 2000, Comcast acquired certain cable systems previously owned and operated by Lenfest Communications, Inc. ("Lenfest") in the Philadelphia region. The Lenfest systems operated as the incumbent wireline MVPD operator in franchise areas located in Berks, Bucks, Chester, Delaware, and Montgomery Counties, Pennsylvania; Atlantic, Camden, Burlington, Cape May, Cumberland, and Salem Counties, New Jersey; and New Castle County, Delaware. These cable systems served approximately 1.1 million cable subscribers. (See Compl., ¶ 52(c); Class Cert. Mem., p. 7-8, n.8.) Comcast also acquired Lenfest's ownership interests in Garden State Cablevision L.P. and its 212,000 subscribers located in the Philadelphia DMA. (Expert Decl. of Michael Williams, Ph.D. ¶ 113 ("Williams Decl.").) Thus, Comcast acquired a total of approximately 1.25 million subscribers from Lenfest.

Comcast's acquisition of the Lenfest systems was part of a larger course **[*16]** of conduct of swapping cable assets to build Comcast's cable cluster in the Philadelphia DMA. In December 2000 and April 2001, Comcast and AT&T Corporation swapped certain cable system assets that were previously owned by MediaOne Group, Inc., including AT&T-owned systems operating as the incumbent wireline MVPD provider in franchise areas located in the Philadelphia region. (See Compl., ¶ 55(a), (c); Class Cert. Mem., p. 7-8, n. 8.) Prior to the transaction, Comcast had sought a merger agreement with MediaOne, but AT&T had made a superior bid. (Pl. Ex. 32 at COM-PA1151021.) Rather than engage in "another round of competitive bidding," Comcast and AT&T "reach[ed] an amicable and acceptable alternative" calling for Comcast to terminate its proposed merger and for the two companies to divide the MediaOne assets between themselves. (Id.) In the transaction, Comcast acquired from AT&T approximately 1.365 million MediaOne and legacy AT&T subscribers in the Philadelphia DMA - representing all of AT&T's cable assets and subscribers in the Philadelphia DMA - in exchange for AT&T's receipt of all of Comcast's cable assets and subscribers in Chicago and certain parts of California, Colorado, **[*17]** Florida, Georgia and Pennsylvania (all of which were outside the Philadelphia DMA). (Williams' Decl. ¶ 113; Compl. ¶ 55(b).) As a result of the transaction, AT&T exited the Philadelphia DMA.

---

laws"); *Cableamerica Corp. v. Fed. Trade Comm'n, 795 F. Supp. 1082, 1092 (N.D. Ala.1992)* (stating that "'[a]ntitrust immunity is not conferred by the bare fact that defendants' activities might be controlled by an agency having broad powers over their conduct'" and that "'[t]here is no general presumption that Congress intends the antitrust laws to be displaced whenever it gives an agency regulatory authority over an industry'" (quoting *Phonetele, Inc. v. Am. Tel. & Tel. Co., 664 F.2d 716, 729 (9th Cir. 1981))))*.

[3] Comcast argues that because the transactions were not among competitors, **[*14]** the entire section 1 claim fails, even if analyzed under the rule of reason. We will return to this issue *infra.*

[4] All references herein to the Complaint are to the Class's Third Amended Complaint.

Leo Hindery, the former CEO of TCI, as well as AT&T Broadband after it acquired TCI, authored a book in which he described how Comcast's acquisition of Lenfest was intimately tied to the AT&T/Comcast/MediaOne swap transaction. At that time, AT&T owned 50% of Lenfest, with the other 50% owned by the company's founder, Harold "Gerry" Lenfest, and his family. Hindery, who wanted to acquire MediaOne to both build AT&T's cable business and to create cross-marketing opportunities for AT&T's branded telephone service, developed a strategy to combat Comcast's bid for MediaOne by attempting to purchase the other half of Lenfest in order to offer it as "trade bait" to Comcast in exchange for Comcast dropping its pursuit of MediaOne. (Pl. Ex. 52, Hindery, The Biggest Game of All, p. 133, 146-151.) Hindery was successful, and the combined result of the transactions gave Comcast control of its own legacy franchises in the Philadelphia DMA, the much larger holdings of Lenfest, and AT&T's former legacy franchises **[*18]** in the Philadelphia DMA.

In January 2001, Comcast and Adelphia Communications Corporation swapped certain cable system assets, including Adelphia-owned systems operating as the incumbent wireline MVPD provider in franchise areas located in Chester, Delaware and Montgomery Counties, Pennsylvania, involving 464,000 subscribers - representing all of Adelphia's cable assets and subscribers in the Philadelphia DMA. As a result of the transaction, Adelphia exited the Philadelphia DMA. (See Compl., ¶ 55(b); Class Cert. Mem., p. 7-8, n. 8; Williams Decl. ¶ 113.)

In July 2006, Time Warner Cable, Inc. ("Time Warner") and Comcast acquired, pursuant to a joint bid, certain cable systems from the bankruptcy estate of Adelphia (the "Time Warner/Comcast/Adelphia Transaction"). As part of the Time Warner/Comcast/Adelphia Transaction, Comcast and Time Warner swapped certain cable systems, including both self-owned systems as well as Adelphia-owned systems. One of the systems Comcast acquired was a Time Warner-owned cable system operating as the incumbent wireline MVPD provider in the city of Philadelphia, serving approximately 40,000 subscribers. (See *Adelphia Comm'ns Corp., 21 FCC Rcd 8203 (2006)* ("Time **[*19]** Warner/Comcast/Adelphia Order"), ¶ 12; see also Class Cert. Mem., p. 7-8, n. 8.) The transaction involved all of Time Warner's cable assets and subscribers in the Philadelphia DMA. As a result of the transaction, Time Warner exited the Philadelphia DMA.

Finally, in August of 2007, Comcast acquired from Patriot Media & Communications ("Patriot") certain cable systems operating as the incumbent wireline MVPD provider in franchise areas located in Somerset, Hunterdon, Morris and Mercer counties in New Jersey, serving approximately 81,000 subscribers. (See Class Cert. Mem., p. 7-8, n. 8; Def. Ex. 38, Plaintiffs' Class Certification Hearing Ex. 91; see also Def. Ex. 27, Comcast Press Release, Comcast Corporation to Acquire Patriot Media, April 3, 2007.)

B. The Class's Evidence of Comcast's Anticompetitive Intent in Forming the Philadelphia Cluster.

The Class presents evidence in several areas to support its contention that there are genuine issues of material fact concerning whether Comcast had anticompetitive intent in entering into the swap transactions.

1. Evidence that Comcast had a long-standing corporate strategy to develop clusters.

The Class cites to internal Comcast documents evincing **[*20]** a twenty-year strategy of acquiring cable properties in contiguous areas, including the Philadelphia DMA. (See e.g., Pl. Ex. 49, "Comcast History - 1998-1999," p. 3 ("For nearly twenty years, Comcast had pursued a strategy of acquiring cable properties in contiguous areas, especially in the Atlantic seaboard region. . . ."); Pl. Ex. 51, Special Board Mtg. Minutes of May 24, 1999, p. 1 (concerning the Adelphia swaps, Comcast CEO Brian Roberts "noted that the Company, under the proposed swaps, would acquire cable systems in New Jersey and Eastern Pennsylvania to enhance the Company's clustering strategy in its mid-Atlantic region.").) In announcing the bid to acquire MediaOne assets, CEO Roberts emphasized that the combination would have a direct clustering effect, giving Comcast clusters in the top 20 markets representing 80% of the cable market and would leave Comcast a "well-clustered company." (Pl. Ex. 54, Tr. of Conf. Call of March 22, 1999, p. 2.) After the agreement with AT&T supplanted Comcast's initial MediaOne bid, and resulted in Comcast and AT&T allocating Lenfest's cable systems to Comcast, Roberts stated that Comcast's "clustering position becomes even better." (Pl. Ex. **[*21]** 49, Comcast History 1998-1999, p.12.) Comcast COO Steven Burke testified that Comcast's goal was "to have clusters that were as big as possible in each DMA, our goal was and is." (Pl. Ex. 82, Dep. of Steven Burke on December 5, 2008 ("S. Burke Dep."), 117:10-12.) Burke wrote to the attendees of a corporate retreat that, "[f]ully 85% of our 8.2 million subscribers will be in clusters over 200,000 subscribers. These clusters represent a unique opportunity to maximize our business if we learn how to manage them as efficiently as possible." (Pl. Ex. 63, "Clusters/2000 Management Retreat," p.1 (emphasis in original).) Robert Pick, Comcast's executive in charge of corporate development wrote that clustering "is the impetus for the next wave of cable acquisitions." (Pl. Ex. 26A, "Trades/Swap Memo.") In testimony before the FTC in the Adelphia acquisition case, Pick stated that Comcast and Time Warner agreed to divide Adelphia assets between themselves to enable geographic clustering, which "was really most important to Comcast. . . . [T]o the extent we could get an entire market, that was important because we wanted - we wanted clustering." (Pl. Ex. 26, Dep. of Robert Pick of July 19, 2005, **[*22]** 36:5-21.)

2. Evidence that the purpose behind the swaps and acquisitions strategy was to control, dominate and consolidate cable markets.

The Class cites numerous Comcast internal documents as evidencing its strategy to gain control over cable markets. In announcing Comcast's acquisition of Lenfest, Roberts stated that "Comcast views geographic consolidation of key markets as critically important to the company's future." (Pl. Ex. 62, Comcast Press Release of January 18, 2000, p.1.) Joseph Donnelly of Comcast's corporate development unit wrote about the Adelphia acquisition, "step back and say where does it get us - ie - can we dominate mkt, etc." (Pl. Ex. 29, Handwritten note on Letter of July 22, 1999.) An analysis of a Toledo, Ohio cable company noted its acquisition "would present Comcast with the opportunity to own approximately 50% of the 66th largest DMA in the nation." (Pl. Ex. 39, Memo of May 27, 1999.) An analysis of Cablevision properties stated that the "Cleveland market offers Comcast the opportunity to consolidate the 13th largest DMA in the country, as currently, no MSO dominates this market" and the "Kalamazoo system offers Comcast the opportunity to dominate a top-50 **[*23]** DMA, provided Comcast does a second swap with AT&T to obtain its subscriber base in this market." (Pl. Ex. 40, Memo of October 13, 1999, p. 4.) A 2005 memo about New Hampshire stated Comcast had a "real opportunity to consolidate this market along DMA-rational lines and effectively lock up one of the real growth areas in New England." (Pl. Ex. 41, Email of October 19, 2005.)

3. Evidence that clustering was a common strategy among market participants.

In his book, Leo Hindery declared that shared markets made no sense in the cable industry; that the industry would benefit from clustering with one cable operator per market; and to effectuate this happening, cable operators would have to voluntarily swap systems across the country. (Pl. Ex.52, Hindery, The Biggest Game of All, p. 73-74. [5]) In his deposition, Hindery testified that "the whole premise . . . was that some operators would leave an area and others would stay and you would become the significant operator in that DMA." (Pl. Ex. 89, Dep. of Leo Hindery of November 14, 2008 ("Hindery Dep."), 190:14-16.) He stated that "all of the cable operators by 1997, 1998, at TCI's urging, adopted [his strategy]. . . . Every major company participated **[*24]** in the exchange of systems over those 24 months, roughly." (Id. at 86:14-18.)

When asked about Comcast's desire to control DMAs, Brian Roberts stated in his deposition that, during the time frame of the July 2006 Time Warner/Comcast/Adelphia swap transaction, "there was a lot of swapping going on, as you referred to, that Mr. Hindery facilitated. Satellite is there, as a real competitor. There are other competitors in the market, real and future competitors, like phone companies. I think it's, **[*25]** you know, the notion of aggregating more customers in one cluster. Once you do so, there's only an incumbent cable company in each of these different 30,000 franchises, and if somebody is able to secure acquiring them, then they have a major presence in the market." (Pl. Ex. 93, Roberts Dep., 127:22-128:11.)

---

[5] Hindery wrote that cable systems owning spread out franchises,

> had always struck me as nonsensical. It was inefficient for cable operators and confusing for customers. I strongly believed that the entire industry, including TCI, would benefit enormously by "clustering" cable systems into specific markets, with one cable operator per market. To make this plan work, however, we'd have to convince other cable operators to voluntarily swap systems across the country. This was no small challenge. To pull it off, we'd have to get everybody to agree to basic valuations and stick to them. But I knew it was quite doable, provided we could get everybody rowing in the same direction.

(Pl. Ex.52 at 73-74.)

4. Evidence that the swap agreements were naked restraints of trade as market and customer allocations.

To support its position that Comcast engaged in an illegal market allocation scheme, the Class cites to numerous Comcast internal documents, wherein company executives discussed "rationalizing" the cable industry through possible cable swaps and acquisitions that would consolidate Comcast's position in certain markets in exchange for its giving up positions in other markets. (See Pl. Ex. 28, Memo of August 15, 1996, p. 2 ("Both Comcast and Adelphia would like to obtain the other's eastern Florida systems."); Pl. Ex. 32, Special Bd. Mtg. Minutes of May 4, 1999, p. 3 (listing systems to be swapped between Comcast and AT&T); Pl. Ex. 36, Memo of July 11, 1996 (discussing Philadelphia DMA as a "Comcast Sacrosanct System"; and proposing swaps in California); Pl. Ex. 37, Memo of September **[*26]** 29, 1997 (discussing swap of Pittsburgh system for New Jersey and Tennessee systems to "further rationalize the NYC"); Pl. Ex. 38, Memo of May 25, 1999 (discussing clustering opportunity in Southeast Georgia and South Carolina, including swaps of Savannah and Macon, Georgia systems where Comcast "currently dominates each of these markets"); Pl. Ex. 42, Memo of April 6, 2000 (discussing swap of Muncie, Indiana for Kentucy systems to enable Comcast to "get even better clustered" in the Indianapolis DMA in exchange for "get[ting] out of Kentucky"); Pl. Ex. 44 at COM-PA2107968, (attachment to email of April 8, 2003 discussing swaps in Ohio, Kentucy, Indiana, and New Mexico "to rationalize the large Ohio markets"); Pl. Ex. 46, Email of November 13, 2003 (discussing swaps in Tennessee, Colorado and New Mexico that were never consummated)). The Class also cites Steve Burke's testimony that Comcast and AT&T agreed to swap their respective cable assets in Philadelphia and Chicago because "there was no clear path to [Comcast] having a big cluster in Chicago, it would make more sense for us to get Philadelphia and to swap Chicago." (Pl. Ex. 82, S. Burke Dep. 109-110.) Robert Pick described the **[*27]** swapping of cable assets between Comcast and Time Warner as "horse trading" among the companies. (Pl. Ex. 26, Pick FTC Testimony, at 23:25-25:6; Pl. Ex. 92, Pick Dep. 228:3-8.)

5. Evidence that Comcast had anticompetitive intent to allocate markets.

The Class asserts that Comcast had an anticompetitive intent to allocate the Philadelphia DMA in entering into the AT&T transaction, based primarily upon the content of Leo Hindery's book describing the negotiations between Comcast and AT&T. [6] The Class describes the deal as an agreement by Comcast to stand down from competitive bidding with AT&T for MediaOne in return for receiving Lenfest. (Class Pl. Mem. at 43.) Its evidence of anticompetitive intent includes the Comcast Board minutes describing "discussions with AT&T to reach an amicable and acceptable alternative to another round of competitive bids," (Pl. Ex. 32, Special Mtg. Of Bd. Minutes of May 4, 1999, p. 2), as well as deposition evidence that the transaction made Comcast the dominant cable operator in the Philadelphia DMA. (See Pl. Ex. 31, Donnelly "Lenfest Due Diligence" Memo at 4 ("The acquisition of Lenfest will make Comcast the dominant CATV operator in the Philadelphia DMA **[*28]** (rank - 4th)"); Pl. Ex. 89, Hindery Dep., 53:16-20 ("Q. When it attained Lenfest, did Comcast become dominant within the Philadelphia DMA? . . . A. It certainly became the largest cable operator in that market, yes.); Pl. Ex. 102, AT&T Bd. of Directors Mtg. of March 17, 1999 "Executive Summary" (noting Lenfest "is the leading cable television operator in the greater Philadelphia market."). [7]

---

[6] In his book, Hindery wrote,

> Comcast, which is based in Philadelphia, had been trying for years to buy Lenfest Communications, which owned the cable systems in suburban Philadelphia. Gerry Lenfest, the company's founder and namesake, had always refused to sell. Luckily for me, AT&T owned 50 percent of Lenfest. To entice Brian [Roberts] to stand down on MediaOne, I decided to offer him Lenfest Communications. . . .
>
> I told Brian flat out that he could have Lenfest, and therefore the Philadelphia systems he'd wanted for so long, on one condition. He had to promise right then and there not to fight me on MediaOne. He had to agree to take Lenfest as a consolation prize and walk away. . . . Brian considered my offer, then extended his had to shake on the deal.

(Pl. Ex. 52, Hindery, The Biggest Game of All, **[*29]** p. 2.)

[7] In response to this evidence, Comcast asserts that the Class's reliance upon the Lenfest transaction to support a *per se* claim of market allocation is improper because the Lenfest transaction was an acquisition transaction, not a swap of cable assets. Comcast argues that the Class seeks to mischaracterize the Lenfest sale as a swap because we have previously held that the

6. Evidence of non-compete provisions.

The Class argues that the existence of non-compete clauses further supports application of the *per se* rule. Contrary to Comcast's factual assertion, the Class asserts that following **[*30]** the MediaOne deal, Comcast obtained non-compete agreements with Gerry Lenfest and members of his family. (Pl. Ex. 25, Non-Compete Agreement of January 18, 2000.) The term was 3 years and covered Pennsylvania, Delaware and New Jersey. (Id.) While it does not assert that the non-compete agreements were themselves a *per se* violation, [8] the Class asserts that the non-compete agreements are evidence that Lenfest exited the market, and of Comcast's intention to dominate the Philadelphia market.

7. Evidence of the consequences of the swaps.

Finally, the Class contends that there is ample evidence of anticompetitive consequences arising from Comcast's clustering activity. It offers Dr. Williams' opinions that Comcast's gain in market share was a consequence of the swap transactions, making the Philadelphia DMA more concentrated, creating entry barriers, removing firms that competed in the geographic **[*31]** market, deterring overbuilding, and increasing prices. (Williams Decl. ¶ 56 ("In sum, economic analysis shows that Comcast's alleged anticompetitive conduct in the Philadelphia DMA reduced the extent of competition provided by overbuilders in the Philadelphia DMA. Econometric evidence shows that reductions in overbuilding cause cable rates to increase, all else equal. Thus, Comcast's conduct led to rates being increased or maintained above the level that would prevail in the absence of that conduct throughout the Philadelphia DMA."); ¶ 120 ("the effect of the swaps is to allocate that geographic market between the firms;" "market allocation has diminished competition in the Philadelphia DMA".)

C. Comcast's Evidence of Pro-Competitive Justifications.

Comcast responds to the Class's evidence by contending that none of the swap transactions were "naked" market allocation agreements with no other purpose or effect; that each involved real, substantial exchanges of plant, infrastructure, employees, contracts and other business resources; and its growth strategy to use clustering did not transform otherwise lawful swap agreements into a horizontal market allocation because cable firms have **[*32]** legitimate business reasons for clustering that have been recognized by regulators and the Class's own experts. Comcast asserts that the summary judgment record establishes that clustering the Philadelphia DMA allowed it to introduce new products, such as high-speed internet, telephone, pay per view, video on demand, digital video recorders, digital cable, substantially increased channel choice and high-definition television. (Def. Statement of Undisputed Facts ¶ 48; Def. Ex. 50, Doyle Dep., 91:12-92:3. [9]). It also asserts that the economies of scale associated with clustering enable cable providers to compete against DBS companies with a national

---

per se claim is limited to the Class's allegations in the Third Amended Complaint that only the swap agreements constituted *per se* violations, while the Class separately alleged that the acquisition agreements were subject to rule of reason analysis. See *Glaberson, 2006 U.S. Dist. LEXIS 62672, 2006 WL 2559479, at *9 n.7* (citing Third Amended Complaint ¶¶ 73-74.) Based on the Hindery evidence, we find that the Class has met its summary judgment burden to demonstrate a genuine issue of fact whether AT&T's agreement to sell the Lenfest assets was an integral part of a broader agreement to swap cable assets between AT&T and Comcast.

[8] We have previously held that non-compete agreements executed upon the sale of a business are generally not recognized as antitrust violations, see Class Cert. Mem. at 18-19, and rejected the Class Expert's market structure analysis to the extent he relied upon the Lenfest non-compete agreement. (Id.)

[9] Michael Doyle, the president of Comcast's Eastern Division, testified that

> one additional advantage of the clustering, too, is your ability of getting into the new products. In a lot of Comcast acquisitions where companies were smaller, they didn't have and didn't spend the capital necessary to offer the new products. **[*34]** And so certainly the advantage to clustering is you have the resources and you have the personnel who can run the new products. And in this day and age, as well as it's been over the last years, it's not a video industry anymore. It's a video, Internet, and telephone industry. It's a commercial business application.
>
> So, I think the clustering certainly gives you the ability to offer more advanced services to consumers.

(Def. Ex. 50, Doyle Dep., 91:12-92:3.)

footprint, as well as telephone companies, who by virtue of their existing telephone clusters, and possessing vastly larger resources, were emerging as competitors in multiple product markets - video, data and telephone. (Def. Statement of Undisputed Facts ¶ 49-51; Def. Ex. 54, Deposition of Robert S. Pick on October 28, 2008 ("Pick Dep."), 56:1-57:23 [10]; see also Def. Ex. 51, Hindery Dep., 132:11-15 [11]; Def. Ex. 56, Roberts Dep., 144:23-145:22. [12]). Finally, it asserts that the FCC has recognized the efficiencies associated with clustering **[*33]** and expressly considered the potential effects of clustering when it approved the Time Warner/Comcast/Adelphia transaction in 2006, well after clustering in the Philadelphia DMA had already occurred. (Def. Statement of Undisputed Facts ¶ 52-53; Def. Ex. 17, FCC 99-418, Sixth Annual Competition Report, ¶¶ 161-162 [13]; see also Def. Ex. 18, FCC 01-1, Seventh Annual Competition Report, ¶ 166 (clustering "permits cable operators to . . . gain efficiencies related to economies of scale and scope resulting in lower administrative costs, enhanced deployment of new technologies and services, and encouraging the extension into previously unserved areas"); Def. Ex. 19, FCC 01-389, Eighth Annual Competition Report, ¶ 14 ("By clustering their systems, cable operators may be able to achieve efficiencies that facilitate the provision of cable and other services, such as telephony.").).

---

[10] Robert Pick, Comcast's senior vice president of corporate development, testified that

> the idea of clustering just sort of morphed from the industry. Part of it was competitively driven when you have - when you had like the direct broadcast satellite providers come into being. Their footprint by nature is national. They just put a satellite up in the air and then the signal can reach most of the country.
>
> So when their footprint is national, you know, and we're dealing with small franchises, we obviously cannot compete effectively. They can tell one story. They have an upgraded network. They give one channel lineup. They can offer more channels. So for us to compete when we're just a particular franchise in a market makes it more difficult. **[*35]** It also started to develop as the telephone companies got into the business and their - their footprint by nature is much larger than ours. And so - and then it just sort of happened when you - you know, TCI at one point in time was the largest cable operator in the U.S. and they were financially and operationally stressed at one point in time, so they looked to create clusters or they were giving - they've either sold systems or created joint ventures with - with operators where they would put the systems, clustered systems, on a local basis and said to an operator, here, you run it, you're better able to run these things because of the scale economies within a cluster.

(Def. Ex. 54, Pick Dep., 56:6-57:13.)

[11] Hindery testified that clustering "had nothing to do with controlling the market. It had everything to do with putting ourselves in an operating cost structure that mirrored as closely as possible our nearest and closest competitors." (Def. Ex. 51, Hindery Dep., 132:11-15.)

[12] Roberts testified that

> [t]here was, post-'92, as I have said repeatedly, a desire to take this patchwork of cable systems, and create more sensible businesses so we can compete more effectively in the future **[*36]** against the oncoming competitors, who all had complete DMAs, where in case of satellite, two competitors for every market who had a hundred percent market share in the United States. So every home in America can get the product. They [national footprint DBS providers] can run an ad in the middle of the Super Bowl, let alone, in local broadcast television.
>
> So there was, no question, a lot of desire to try to get larger in markets.

(Def. Ex. 56, Roberts Dep., 144:23-145:22.)

[13] The FCC stated that

> Clustering of cable systems can create greater economies of scale and size. Accordingly, it can enable cable operators to offer a wider variety of broadband services at lower prices to customers in geographic areas that are larger than single cable franchise areas. Clustering can thus make cable operators more effective competitors to LECs whose local service areas are usually much larger than a single cable franchise area. The General Accounting Office, in its report on the changing status of competition to cable television, also found that ownership ties and clustering strategies may provide cost savings and possible competitive advantages.

(Def. Ex. 17, FCC 99-418, Sixth Annual Competition Report, **[*37]** ¶ 162.)

Based in large part upon these governmental reports, Comcast's expert Dr. David Tecce opined that the entry of the DBS companies, who were capable of offering higher quality digital television in a nationwide footprint, created a competitive crisis for cable firms, who up to that time were providing analog signals to non-contiguous individual franchise areas.

> The need to make significant investments in order to upgrade cable systems to compete with DBS providers led to consolidation among cable operators. DBS had large-scale national operations, which gave them ability to take advantage of scale economies. To compete effectively, most cable firms needed to achieve larger scale.

(April 10, 2009 Expert Report of David J. Teece, Ph.D. ("Teece Report") at ¶ 17.) "As a result, cable firms sought to achieve economies of scale through mergers and acquisitions. Many old-line cable firms decided to sell their systems rather than make the investments in system upgrades necessary to stay competitive with DBS providers in the new competitive environment." (Id. ¶ 18.) Teece recounts the history of the "deployment of digital cable transmission that paved the way for cable firms to offer other **[*38]** advanced services. In addition to offering superior video picture quality, digital transmission allows for the provision of several other advanced digital services such as HDTV, Video-on-Demand ("VOD"), Digital Video Recorder ("DVR"), broadband Internet, and cable telephony. These technological advances have ushered a new paradigm in the telecommunications industry, dubbed 'convergence,' under which multiple forms of telecommunications content (audio, video, and data) are delivered to the consumer by a single firm." (Id. ¶ 16 (citations omitted).) He concludes that:

> Regional clustering created significant efficiencies, including achieving economies of scale in upgrading systems to digital and to offer advanced services such as broadband Internet and cable telephony. . . . Clustering allowed cable operators to achieve regional scale comparable to DBS providers and ILECs. For instance, a former TCI and AT&T executive testified that clustering "had everything to do with putting ourselves in an operating cost structure that mirrored as closely as possible our nearest and closest competitors."

(Id. ¶ 21.)

Comcast also presents evidence that the entry of incumbent local exchange carriers ("LECs" **[*39]** or "ILECs") such as Verizon's FiOS system, also created new competition for the cable industry. Dr. Teece reports that ILEC competition, which by 2008 had captured 18% market share, is expected to continue to provide significant competition to cable and DBS firms in the next few years. (Id. ¶ 25-26.) He states:

> The threat of competition from ILECs has been another factor contributing to cable operators' clustering strategy. Because the ILECs' phone footprints were much larger than a typical cable franchise area, clustering allowed cable firms to capture economies of scale and compete effectively in offering advanced services and selling advertising. According to testimony from a former TCI and AT&T executive, clustering was designed to "meet the challenge of these regional phone companies coming and providing video and providing Internet over their existing phone lines.

(Id. ¶ 28 (citations omitted).) Dr. Teece concludes that Comcast's clustering in response to new sources of competition has benefitted consumers. He asserts that consumers benefit from the programming diversity brought about by increased MVPD channel capacity (id. ¶ 32-33), and from the ability of a clustered system to **[*40]** provide advanced services such as HDTV, internet and cable telephony (id. ¶ 34-39). [14]

---

[14] Michael Salinger, Director of the Federal Trade Commission's Bureau of Economics, testified before the Senate Judiciary Committee on the Time Warner/Comcast/Adelphia transaction that:

> It was also very clear from the outset that the parties' principal objective in making the acquisition and asset swap was to increase "clustering" in the TWC and Comcast cable assets. Clustering enables cable firms to realize economies of scale associated with providing cable service in contiguous areas. By acquiring contiguous systems, TWC and Comcast could lower several categories of costs, such as management, administrative and marketing costs, as well as the expense of providing system upgrades. In addition, TWC and Comcast could use clustering to position themselves better to compete with local telephone companies and other providers in the delivery of video and telephone service.

(Def. Ex. 22, Michael Salinger, Dir. Bureau of Econ., Prepared Statement of the FTC: Sports Programming and Cable Distribution: The Comcast/Adelphia/Time Warner Transaction (Dec. 7, 2006), p. 4.)

Another Comcast expert, Dr. Stanley Besen, **[*41]** opines that entry into the MVPD market by ILECs, who are essentially in the same shoes as wireline overbuilders, has not been impeded by clustering. He opines that,

> Verizon is currently an actual competitor, providing service that is comparable to that provided by the other operators in large sections of the Philadelphia Cluster. Moreover, Verizon is a well-financed, sophisticated company, with access to the same programming that is available to Comcast, an established brand-name, and long-standing consumer relationships. In addition, it is able to offer both telephone and high-speed internet services along with television programming, in what has come to be called "Triple Play" packages. In short, it poses a formidable competitive threat to Comcast and other cable operators not only as a potential but as an actual competitor. Verizon was not eliminated as either an actual or potential competitor by the transactions at issue so that, on Plaintiffs' theory, households in the areas that they serve, or might serve in the future, have not been harmed by the transactions at issue.

(May 6, 2009 Expert Report of Dr. Stanley Besen ¶ 32 (citations omitted).)

D. Analysis

The United States Supreme **[*42]** Court has held that the *per se* test applies to naked restraints on trade, one where the "purpose of the practice are to threaten the proper operation of our predominantly free-market economy - that is, whether the practice facially appears to be one that would always or almost always tend to restrict competition and decrease output, and in what portion of the market, or instead one designed to 'increase economic efficiency and render markets more, rather than less, competitive.'" *Broad. Music, Inc v. CBS., 441 U.S. 1, 19-20, 99 S. Ct. 1551, 60 L. Ed. 2d 1 (1979)* ("BMI") (quoting *United States v. United States Gypsum Co., 438 U.S. 422, 441 n.16 (1978)*; see also 2 Areeda and Hovenkamp, ***Antitrust Law***, § 305 (3d ed. 2007) (*per se* rule "rests on various judgments about facts, economics, and social policy: that naked price fixing usually harms the economy if the collaborators have any marked power; that legitimate objectives are so rarely present that they should be disregarded; and that little or nothing worthwhile is lost by a categorical prohibition, which dispenses with unnecessary and costly litigation about power, purpose, effect, or claimed redeeming virtues, and which establishes the 'bright line' permitting those severe **[*43]** punishments that deter and guide private conduct."). The geographic division of markets among competitors is a *per se* violation of the Sherman Act. See *Palmer, 498 U.S. at 49* (per curiam) ("[A]greements between competitors to allocate territories to minimize competition are illegal"); *Topco Assocs., Inc., 405 U.S. at 608* ("This Court has reiterated time and time again that '[h]orizontal territorial limitations . . . are naked restraints of trade with no purpose other than stifling of competition.' Such limitations are *per se* violations of the Sherman Act." (alteration in original; internal citations omitted)).

However, even when the *per se* label has been applied to a category of anticompetitive conduct, the cases establish that courts may still look to see whether the economic effects of a particular practice in a particular industry justify abandoning a rule of reason analysis. In BMI, the Court found that, because the blanket license at issue, granting a licensee access to an entire music catalog, created an entirely different product from one that any given composer was able to sell by himself, and did not restrain the right of any individual copyright owner to sell his own compositions **[*44]** separately to any buyer at any price, it could not "be wholly equated with a simple horizontal arrangement among competitors." *441 U.S. at 23-24*. The Court cautioned that when reviewing courts "have some doubt . . . about the extent to which [a] practice threatens the 'central nervous system of the economy,' . . . that is, competitive pricing as the free market's means of allocating resources," application of the *per se* rule should not be used to short circuit a more critical analysis of the practice. Id. (quoting *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 226 n.59, 60 S. Ct. 811, 84 L. Ed. 1129 (1940))*. Similarly, in Eichorn, the United States Court of Appeals for the Third Circuit held that even where the plaintiff alleged a classic variety of *per se* violation, in that case a group boycott, where the facts used to establish the antitrust violation "are substantially different from the classic *per se* horizontal price fixing and group boycott conspiracies the Court has generally found to be *per se* antitrust violations," the rule of reason must be used to determine whether the practice is condemned by *section 1*. *Eichorn, 248 F.3d at 139* (citing *BMI, 441 U.S. at 8* ("Easy labels [like price fixing] do not **[*45]** always supply ready answers.")).

The authorities agree that this "modern approach" to antitrust analysis should apply where the rationale of the *per se* rule does not neatly fit the industry involved. In BMI, the Supreme Court held that countervailing pro-competitive virtues, like the creation of efficiencies in the operation of a market or in the provision of goods and services, made application of the *per se* test inappropriate to blanket licenses for copyrighted music. *441 U.S. at 20* ("The blanket license, as we see it, is not a 'naked restrain[t] of trade with no purpose except stifling of competition,' *White Motor Co. v. United States, 372 U.S. 253, 263, 83 S.Ct. 696, 702, 9 L.Ed.2d 738 (1963)*, but rather accompanies the integration of sales, monitoring, and enforcement against unauthorized copyright use.")

In light of BMI, the earlier Topco decision, holding that horizontal market allocation agreements were a *per se* section 1 violation, has been criticized as going too far. One commentator stated,

> The Court in Topco was a bit like a driver who, because of his "rule" never to pick up hitchhikers, refuses to give a ride to a close friend whose car has broken down. This wooden approach **[*46]** to *per se* rules has been abandoned in subsequent horizontal restraint cases, particularly Broadcast Music, which emphasized the need to characterize restraints before applying a *per se* rule. . . . [U]nder Broadcast Music, a court must determine whether the restraint at issue is one to which the rationale of the rule applies. The Topco association could not possibly have been a cartel, because no licensee had a significant market share in its designated territory; the market shares were so trivial, that the licensees could have merged - at least under modern standards - without drawing the attention of the enforcement agencies. Moreover, the defendants articulated and proved procompetitive benefits. The association seems clearly to have been ancillary to a larger productive purpose.

2 Kintner, Federal ***Antitrust Law***, § 11.39 (2002) (citing Eichorn; *Polk Bros. v. Forest City Enter., 776 F.2d 185, 189-90 (7th Cir. 1985)* (holding that *per se* rule is designed for "naked" restraints rather than agreements that facilitate productive activity)); see also *Augusta News Co. v. Hudson News Co., 269 F.3d 41, 48 (1st Cir. 2001)* ("Despite unguardedly broad language in [Topco], it is commonly understood **[*47]** today that *per se* condemnation is limited to 'naked' market division agreements, that is, to those that are not part of a larger pro-competitive joint venture."). In Polk Bros., the United States Court of Appeals for the Seventh Circuit noted that courts "must distinguish between 'naked' restraints, those in which the restriction on competition is unaccompanied by new production or products, and 'ancillary' restraints, those that are part of a larger endeavor whose success they promote." *Id. at 188* (citing *National Collegiate Athletic Assoc. v. Bd. of Regents of Univ. of Oklahoma, 468 U.S. 85, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984))*. Noting the Supreme Court's admonition in *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 767-68, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)* that "it is sometimes difficult to distinguish robust competition from conduct with long-run anti-competitive effects," Polk Bros. stressed that

> a court must be very sure that a category of acts is anti-competitive before condemning that category *per se.* See [BMI] and *NCAA, supra*, both of which assess under the Rule of Reason horizontal agreements that also involve cooperation among rivals that might produce larger output and more desirable products. Both BMI and NCAA emphasize **[*48]** that condemnation *per se* is an unusual step, one that depends on confidence that a whole category of restraints is so likely to be anticompetitive that there is no point in searching for a potentially beneficial instance.

776 F.2d at 189; accord *Texaco Inc. v. Dagher, 547 U.S. 1, 5, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006)* ("Accordingly, 'we have expressed reluctance to adopt *per se* rules . . . 'where the economic impact of certain practices is not immediately obvious." " quoting *State Oil Co., 522 U.S. at 10*); *Eichorn, 248 F.3d 131, 144 n.2*.

We find that the Class has failed to meet its summary judgment burden with respect to whether the swap transactions were naked market division agreements, rather than merely ancillary restraints on trade. The Class's evidence, for example, that Comcast executives, as well as Leo Hindery, had a long standing desire to "rationalize" the cable industry by consolidating positions in certain markets in exchange for giving up positions in other markets, does not support the conclusion that the swap agreements were naked restraints of trade that were "'so plainly anticompetitive that no elaborate study of the industry is needed to establish their illegality.'" *Deutscher Tennis Bund, 610 F.3d at 830* **[*49]** (quoting *Texaco Inc., 547 U.S. at 5*). Moreover, the ability of cable companies to provide new and advanced services, achieved through clustering their systems, requires proof of facts that "are substantially different from the classic *per se* horizontal price fixing and group boycott conspiracies the Court has generally found to be *per se* antitrust violations.'" *Eichorn, 248 F.3d at 139*. The competitive efficiencies achieved by clustering - economies of scale needed to upgrade systems to digital service, and creating the ability to offer advanced services such as broadband Internet and cable telephony in larger geographic footprints to effectively compete with DBS providers and ILECs - are the type of pro-competitive conditions that the Third Circuit held can render an industry practice "substantially different from the classic" horizontal restraints subjected to *per se* treatment. *Eichorn 248 F.3d at 139* (citing *BMI, 441 U.S. at 8* ("Easy labels [like price fixing] do not always supply ready answers.")). Like the creation of the blanket license in BMI, creation of cable clusters in order to allow MVPD providers to offer new and improved products is not a categorically "naked restrain[t] **[*50]** of trade with no purpose except stifling of competition." *BMI, 441 U.S. at 20*. Accordingly, we hold that the rule of reason test is the proper method of analyzing the Class's section 1claim.

IV. SECTION 1 RULE OF REASON ANALYSIS - ACTUAL AND POTENTIAL COMPETITION

Having addressed the parties' arguments on the issue of *per se* liability, the only section 1 issue remaining to be decided is Comcast's argument that summary judgment must be entered in its favor because the transaction counterparties were never "competitors." In granting class certification, we determined that class treatment of the section 1 liability issue was limited to whether the Class could demonstrate that Comcast conspired **with competitors** to allocate markets. (See Amended Class Certification Order, Doc. No. 432, entered January 13, 2010 ("1/13 Order"), ¶ 11(a) (emphasis added).) Comcast argues that, even applying a rule of reason analysis to the section 1 claim, the Class has failed to meet its *Rule 56* burden to create a genuine issue of fact that Comcast conspired with its competitors to allocate markets because the Transaction Counterparties never directly competed for cable subscribers. We find that the Class has **[*51]** met its *Rule 56* burden to create a jury issue on whether Comcast and the Counterparties were competitors.

A. Evidence of Actual Competition.

Comcast concedes that, prior to the Transactions, Comcast and the Counterparties each offered cable services to subscribers in the Philadelphia DMA. However, it asserts that they were never "competitors" because, at all times, they operated cable systems in their own respective, non-overlapping franchise areas and never offered services to the same subscribers, at the same time, anywhere in the Philadelphia region. (Def. Ex. 59, Williams Dep., at 80:12-25, 104:24-105:3; Def. Ex. 46, Deposition of Steve Burke on December 5, 2008 ("S. Burke Dep."), at 15:23-16:6; 24:23-25:1, 51:17-22, 205:19-21; Def. Ex. 47, Deposition of Scott Burnside on November 11, 2008 ("Burnside Dep."), at 183:16-184:5; Def. Ex. 55, Deposition of Thomas Steel on July 17, 2008 ("RCN 30(b)(6) Dep."), at 192:21-193:17; Def. Ex. 51, Deposition of Leo Hindery, Jr., on November 14, 2008 ("Hindery Dep."), at 94:5-8; 167:9-12; Def. Ex. 52, Deposition of Harold (Gerry) Lenfest on November 18, 2008 ("Lenfest Dep.") at 89:14- 90:5, 95:9-14; Def. Ex. 50, Deposition of Michael Doyle on November **[*52]** 6 and 20, 2008 ("Doyle Dep."), at 155:1-18; Def. Ex. 56, Deposition of Brian Roberts on September 23, 2008 ("Roberts Dep."), at 208:14-17.)

Prior to the Transactions, no class member had the option of simultaneously obtaining video programming from both Comcast and any of the Counterparties at the same household or within the same local franchise area. (See Def. Ex. 59, Williams Dep., at 104:24-105:3; Def. Ex. 51, Hindery Dep., at 167:9-12; Def. Ex. 46, S. Burke Dep., at 15:23-16:6; 24:23-25:1, 51:17-22, 205:19-21; Def. Ex. 50, Doyle Dep., at 155:1-18; Def. Ex. 56, Roberts Dep., at 208:14-17.) Because each cable company offered MVPD service within separate, non-overlapping franchise areas, Comcast asserts that it did not actually and directly compete with any Counterparty for the business of any cable subscriber. (See Def. Ex. 51, Hindery Dep., at 94:5-8, 167:9-12; Def. Ex. 52, Lenfest Dep., at 89:14-90:5, 95:9-15; Def. Ex. 46, S. Burke Dep., at 24:23-25:1; see also Def. Ex. 22, Michael Salinger, Dir., Bureau of Econ., Prepared Statement of the FTC, before the Cmte. on the Judiciary United States Senate: Sports Programming and Cable Distribution: The Comcast/Time Warner/Adelphia Transaction **[*53]** (Dec. 7, 2006), at 4 (testifying that "the FTC staff determined that [Time Warner] and Comcast were not acquiring any cable assets that competed with their existing assets. In other words, the transaction eliminated no horizontal competition between the parties.")

Comcast supports its assertion by citing the rationale of the Federal Communications Commission in rejecting an objection to the Time Warner/Comcast/Adelphia Transaction that it reduced competition between Comcast and Adelphia or Time Warner. The FCC determined that, prior to the Transaction, Comcast did not compete directly with Adelphia or Time Warner because each offered cable services in adjacent franchises and, thus, consumers did not have the ability to choose between them. [15] (See Def. Ex. 16, Time Warner/Comcast/Adelphia Order, ¶ 82.) Similarly, the FCC rejected an objection to the Comcast/AT&T/MediaOne Transaction on the ground that Comcast and AT&T, or AT&T and MediaOne were competitors, finding that actual competition exists only among cable firms that overbuild each other's franchise areas and that there was no evidence that Comcast and AT&T, or AT&T and MediaOne, would have overbuilt one another in the absence **[*54]** of the transactions. [16] (See Def. Ex. 15, AT&T/Comcast Order, ¶ 94; Def. Ex. 14, *MediaOne Group, Inc., 15 FCC Rcd 9816 (2000)* ("AT&T/MediaOne Order"), ¶¶ 94-95.) Finally, Comcast asserts that the swap agreements did not contain non-compete or other enforceable provisions restricting Comcast or the Counterparties from re-entering the area and competing with one another. However, as noted, the Lenfest acquisition agreement involved a contractual covenant not to compete binding upon Gerry Lenfest, and other family member owners of Lenfest.

The Class responds that each Counterparty offered the same product in the same geographic market; namely, each operated as an MVPD distributor at the same level of the market within **[*57]** the Philadelphia DMA, and therefore were actual competitors prior to the Transactions. Its economics expert, Dr. Michael A. Williams, opines that Comcast and each of the Counterparties were competitors because they engaged in the same business in the same product market and geographic market. (Williams Decl. ¶ 164; Expert Reply Decl. Of Michael Williams, Ph.D. ("Williams Reply Decl.") ¶ 15 (stating that at least eight cable companies provided service in the Philadelphia DMA in areas adjacent to Comcast franchises, before being acquired by Comcast)).

---

[15] The FCC's Time Warner/Comcast/Adelphia Order stated, in response to an objection to the proposed merger that:

> In DMAs where both Time Warner and Comcast currently operate, however, they generally do not compete directly for subscribers. Their systems usually operate in adjacent franchise areas within a DMA, and consumers do not have the ability to choose between them. Accordingly, the elimination of Time Warner's or Comcast's presence in a particular DMA does not likely indicate the loss of head-to-head competition.

(Def. Ex. 16 ¶ 82.) The Class concedes that the FCC approved the transaction, but contends that neither the FCC's approval nor its legal **[*55]** conclusion are proper evidence of competition. (Counterstatement of Facts ¶ 33.)

[16] In approving the Comcast/AT&T Transaction, the FCC stated:

> CFA offers no evidence to suggest that AT&T and Comcast would overbuild each other's cable systems such that the proposed merger would diminish competition in these local franchise areas. Applicants deny having any intentions to overbuild, and confirm that they have not overbuilt in each other's franchise areas, with the exception of the few non-consolidated affiliate systems. Accordingly, we cannot conclude from the record that AT&T and Comcast had intentions of overbuilding each other's local markets, or that they were likely to do so.

(Def. Ex. 15 ¶ 94.) In the AT&T/MediaOne order, the FCC found:

> BellSouth argues that the merger will eliminate current and future MVPD competition between AT&T and MediaOne in local areas where the Applicants have overlapping or adjacent cable franchise areas. BellSouth contends that, in the absence of the proposed merger, AT&T and MediaOne would build over ("overbuild") each other's cable systems, thereby offering consumers in those areas two MVPD cable choices. However, we find no evidence in the record to suggest **[*56]** that AT&T and MediaOne would overbuild each other's cable systems such that the proposed merger would diminish competition in these local areas.
>
> . . .
>
> Since the initial acquisition of the Fayetteville and Powder Springs overbuilt systems, the system owners have not constructed anymore overbuilds, and there is no evidence to suggest that AT&T and MediaOne would overbuild one another absent the merger. AT&T and MediaOne hold overlapping franchise authority in 13 other areas, but have no overbuilds in these areas. There is no evidence that they would overbuild each other in these areas absent the merger. We find that the proposed merger is unlikely to diminish MVPD competition between the Applicants to a degree that would warrant the denial of the Application or the imposition of conditions.

(Def. Ex. 14 ¶¶ 94-95.) The Class concedes that the FCC approved the transactions, but contends that neither the FCC's approval nor its legal conclusion are proper evidence of competition. (Counterstatement of Facts ¶ 34.)

Comcast's internal documents show that the company itself viewed other MSOs as its competitors. (See Pl. Ex. 134 (Comcast internal emails identifying companies that are Comcast's major competitors.)) Comcast required the CEO of Lenfest to sign a non-compete agreement as part of the Lenfest acquisition. According to Dr. Williams, the non-compete clause "demonstrate[s] that in Comcast's view, the relevant geographic area where these individuals represented a continuing competitive threat to Comcast was not only larger than [a local franchise area], it was larger than the footprints [in which the companies had previously provided service] . **[*58]** . . showing that Comcast viewed MVPD companies in these neighboring geographic locations as competitors and/or potential competitors, even though Comcast was not an incumbent cable provider in those locations at that time." (Williams Decl. ¶ 79-80.) [17]

Comcast also viewed other MSOs as competitors for the purchase of cable assets and customers. (Pl. Ex. 32, "Minutes of a Special Mtg. of Bd. of Directors of Comcast Corp. of May 4, 1989, at COM PA1151021 (describing the arrangement by which Comcast and AT&T agreed to abandon their competition to purchase MediaOne's cable assets and, instead, "reach[ed] an amicable and acceptable alternative to another round of competitive bids," involving a swap of various AT&T and Comcast cable assets resulting in the addition of 750,000 subscribers for Comcast.) Dr. Williams cites the MediaOne transaction, as well as the competition between Comcast, Lenfest and Mediacom for **[*59]** Marcus Cable's Eastern Shore Systems, and the competition between Comcast and several other MSOs for the assets of Cablevision systems in Ohio, Massachusetts and Michigan, to support his assertion that Comcast competed with the Counterparties to acquire cable assets before they were themselves acquired by Comcast. (Williams Decl. ¶ 122.) Brian Roberts, Comcast's CEO, also acknowledged that Lenfest, prior to its acquisition, was a potential competitor for other cable systems in the Philadelphia DMA. (Pl. Ex. 93, Roberts Dep., 231-32.)

Finally, the Class contends that Comcast's competitors also considered other MSOs to be competitors. For example, AT&T Board of Directors' internal documents list other MSOs, including Comcast, as competitors. (Pl. Ex. 101, October 1999 AT&T Bd. of Directors Mtg., "Competitive Cable TV Statistics"; Pl. Ex. 102, March 1999 AT&T Bd. of Directors Mtg. "Acquisition of 50% Interest in Lenfest Communications Executive Summary".) Gerry Lenfest likewise testified that Comcast was a "competitor in acquiring systems," although he stated that Comcast was not a direct competitor for subscribers. (Pl. Ex. 90, Dep. of Harold Lenfest on November 18, 2008, 89:10-25.) [18]

B. Evidence of Potential Competition.

Comcast also argues that the Class cannot create a genuine issue of material fact that the transactions eliminated any potential competition between itself and the Counterparties because there is no evidence that it or any Counterparty ever intended to enter another's market as an overbuilder. Comcast asserts that the Class has produced no evidence that Comcast, Lenfest, or any of the other Counterparties intended to overbuild one another in the Philadelphia DMA at some future time. (See 10/15 Tr. 84:24-85:16; Def. Ex. 59, Williams Dep., 105:9-106:18. [19]) It also asserts that there is no evidence that any Counterparty had any intention of **[*61]** overbuilding Comcast or took affirmative steps toward doing so. Rule 30(b)(6) representatives of Lenfest and AT&T, the only two Counterparties deposed by Plaintiffs, each testified that the companies had no intention of overbuilding Comcast,

---

[17] Dr. Williams also notes that a non-compete agreement was executed between Comcast and executives at Prime Communications, as part of a loan agreement. (Williams Decl. ¶ 23.) There is no evidence that Prime Communication was involved in any of the acquisition or swap transactions.

[18] The **[*60]** Class makes additional arguments that Comcast also competed with other MSOs for original cable franchises and engaged in "benchmark competition" with other MSOs. We have already rejected these portions of the Class expert's market structure analysis. (See Class Cert. Mem. at 18 (rejecting theory of competition for the award of original franchises because all awards occurred before the class period); id. at 51-52 (rejecting theory of benchmark competition as not capable of proof at trial through common evidence).)

[19] Dr. Williams conceded that, in reviewing all of the documents and depositions in the case, he had seen no business plan suggesting that Comcast or another MSO was planning to overbuild another MSO in the Philadelphia DMA. (Def. Ex. 59, Williams Dep., 105:9-106:18.)

had not taken any affirmative steps toward doing so, and did not consider overbuilding to be economically viable. (See 10/14 Tr., 140:9-14; Def. Ex. 52, Lenfest Dep., 82:25-85:3, 89:23-90:5; Def. Ex. 51, Hindery Dep., 181:7-23.)

Comcast also asserts:

• It had no interest in, or intent to, overbuild any Counterparty nor had it taken any affirmative steps toward doing so, such as seeking to obtain the necessary franchise approvals, building out infrastructure, setting aside capital for that purpose or otherwise performing any planning whatsoever for such a move, because Comcast did not consider overbuilding to be an economically viable business model. (See Def. Ex. 46, S. Burke Dep., 13:7-14:8, **[*62]** 52:16-57:7; Def. Ex. 56, Roberts Dep., 173:4-174:24.)

• Its pricing decisions were not based on a concern that other MSOs might overbuild Comcast. (See Def. Ex. 46, S. Burke Dep., 207:14-20; Def. Ex. 50, Doyle Dep., 183:14-23; Def. Ex. 57, Deposition of David Scott on December 3, 2008 ("Scott Dep."), 107:19-108:6.)

• There is no evidence that any of the Counterparties based their pricing decisions on Comcast prices. To the contrary, Gerry Lenfest testified that Lenfest did not base its pricing decisions on a concern that Comcast might overbuild Lenfest franchise areas. (Def. Ex. 52, Lenfest Dep., 70:8-16, 72:6-73:16, 90:21-91:9.)

• The Federal Communications Commission determined in evaluating several of the Transactions that the merging entities had no intention of overbuilding one another's franchise areas, nor were they likely to do so. (See Def. Ex. 15, AT&T/Comcast Order, ¶ 94; Def. Ex. 14, AT&T/MediaOne Order, ¶¶ 94-95.)

Based upon these averments, Comcast argues that the Class cannot demonstrate a jury issue that any Counterparty's presence on the fringe of a Comcast franchise prior to the merger, tempered Comcast's competitive behavior.

The Class responds that it has produced evidence **[*63]** that there was a "potential for incumbent MSOs in the Philadelphia DMA to overbuild each other's territories, since they have done so in other markets," and that the FCC recognizes that adjacent cable operators are the most likely entrants. (Counterstatement of Facts ¶ 36). To support its factual assertions of potential overbuilding in the Philadelphia DMA, the Class relies upon specific instances of overbuilding in **other** parts of the country; [20] deposition testimony from Leo Hindery that it is not uncommon for MSOs to overbuild each other's franchise areas (Pl. Ex. 89, Hindery Dep. at 95-96); an assertion by its expert, Dr. Williams, that "there's certainly a potential for the incumbent MSOs in the Philadelphia DMA to overbuild each other's territories because they have done it in other places, (Pl. Ex. 100, Williams Dep. at 46-47); and the FCC's Thirteenth Annual Report, which states that "clustering can present a barrier to entry for the most likely potential overbuilder, (i.e. an adjacent cable operator)" (Pl. Ex. 146, Thirteenth Annual Report ¶ 180 (parenthetical in original)). It asserts that, to the extent that Comcast and other MSOs avoid overbuilding adjacent franchise areas,

---

[20] See Counterstatement of Facts ¶ 8. The Class cites overbuilding that occurred in **New York City** (Pl. Ex. 89, Hindery Dep., 95-96); **Dover, Delaware** (where Storer Cable, a competitor to a corporate predecessor of Marcus Cable - itself now a Comcast corporate predecessor - overbuilt approximately 500 homes) (Pl. Ex. 27 at COM-PA0776597); **Terre Haute, Indiana** (where 20-25% of Time Warner's territory had been overbuilt by Charter) (Pl. Ex. 23 at COM-PA1130645); **Tampa, Florida** (where an Adelphia franchise was overbuilt by Time Warner) (Pl. Ex. 35); **Kalamazoo, Michigan** (where Cablevision overbuilt approximately 300 homes served by Adelphia) (Pl. Ex. 40 at COM-PA1835049); **Ann Arundel County, Maryland** (where Millenium Cable and AT&T had overbuilt each other's areas representing 50,000 homes passed) (Pl. Ex. 92 at 294-95; Pl. Ex. 103 at COM-DOJ273974-75); **City of Aventura, Florida** (where a Comcast area was overbuilt by Cablevision and Comcast overbuilt AT&T areas) (Pl. Ex. 120 at COM-PA1082923); **Alameda, California** (5,300 homes overbuilt by Comcast) (Pl. Ex. 124 at **[*65]** COM-PA1267909); **Newman County, Georgia** (18,000 subscribers overbuilt by Charter and Comcast) (Id. at COM-PA1267922); **Oshtemo County, Michigan** (Cablevision overbuilt an Adelphia franchise area) (Pl. Ex. 133 at COM-PA1835049); **Orlando, Florida area** (Brighthouse overbuilt an Adelphia franchise area) (Pl. Ex. 106 at COM-PA00011036); **Powhatan, Virginia** (80,000 homes overbuilt by Adelphia) (Pl. Ex. 112 at COM-PA0374859); and **Dolthan, Alabama** (6,500 homes in a Comcast franchise area overbuilt by Time Warner) (Pl. Ex. 125 at COM-PA1382980).

[*64] record evidence shows that they do so as part of, and in support of, collusive and illegal agreements to allocate cable markets.

C. Analysis

We find that the Class has produced evidence from which a jury could find in its favor on the section 1 claim's requirement that Comcast conspired with competitors to allocate markets. Comcast's assertions that the Counterparties were not its actual competitors - because each operated cable systems in their own respective, non-overlapping franchise area, and never offered services to the same subscribers, at the same time, anywhere in the Philadelphia region - would have some purchase had we determined that the relevant geographic market was the individual franchise area. However, in the class certification proceedings, we specifically rejected **[*66]** the opinion of Comcast expert Dr. Teece that the relevant geographic market should be pegged at the franchise level or, alternatively at the even smaller household level because the Class showed that it could establish by common evidence that the relevant geographic market should be the DMA. [21] Importantly, Comcast has not challenged at the summary judgment stage the Class's position that the relevant geographic market is the DMA.

We find that the Class need not show that Comcast competed with the Counterparties in the same franchise areas for those Counterparties to be deemed its actual competitors. Rather, based upon the proposed market definitions, it is sufficient that each provided MVPD services in the Philadelphia DMA. Were we to agree with Comcast's assertion that parties to an alleged market allocation scheme must have actually competed with **[*67]** one another for the same customers irrespective of market definitions, bizarre results could ensue. Assume, for example, that two firms at opposite ends of the country - who have never grown so large as to be able to expand to the center of the country - agree they will never cross the Mississippi River to directly compete with one another. In a suit against both firms asserting a nationwide geographic market definition, their agreement would satisfy all of the elements of an illegal horizontal market allocation. But each firm could immunize itself from antitrust liability merely by agreeing to the allocation early enough to avoid being deemed direct competitors. Clearly, the teaching of Palmer and Topco prohibits this result. See *Palmer 498 U.S. at 49-50* (noting that "[t]he defendants in Topco had never competed in the same market, but had simply agreed to allocate markets"). Given the relevant product and geographic market definitions presumed by Comcast, it necessarily follows that each Counterparty could be its actual competitor in the market. [22] Accordingly, we conclude that Comcast's contentions that (1) each company operated within its own respective, non-overlapping franchise **[*68]** area, and (2) never offered services to the same subscribers at the same time anywhere within the Philadelphia DMA, cannot eliminate the Class's market allocation claim as a matter of law where the Class has created a genuine issue of material fact that each company offered MVPD services in the Philadelphia DMA prior to the swap transactions.

We find, however, that the Class has failed to meet its summary judgment burden to create a genuine issue of material fact that Comcast or a Counterparty was a potential overbuild competitor. The two variants of potential competition theory apply *section 7* of the Clayton Act to prohibit mergers and acquisitions by **[*69]** one company with another if "the effect of such acquisition may be substantially to lessen competition." *United States v. Marine Bancorporation, 418 U.S. 602, 622, 94 S. Ct. 2856, 41 L. Ed. 2d 978 (1974)*. [23] The Class's assertion that

---

[21] We concluded that "[b]ecause the record evidence shows that consumers throughout the DMA can face similar competitive choices and suffer the same alleged antitrust impact resulting from Comcast's clustering conduct in the Philadelphia DMA, we find that it can be the appropriate geographic market definition." (Class Cert. Mem. at 14-15.)

[22] We reject Comcast's reliance upon *Volvo Trucks N. Am., Inc. v. Reeder-Simco GMC, Inc., 546 U.S. 164, 174-75, 126 S. Ct. 860, 163 L. Ed. 2d 663 (2006)* and *Feesers, Inc. v. Michael Foods, Inc., 498 F.3d 206, 214 (3d Cir. 2007)*. Volvo Trucks and Feesers were not Sherman Act market allocation cases. Rather they were decisions construing Section 2(a) of the Robinson-Patman Act, *15 U.S.C. § 13(a)*, involving claims of price discrimination by a manufacturer against entities in the market position of a wholesaler. See *Volvo Trucks, 546 U.S. at 171*; *Feesers, 498 F.3d at 208-11*.

[23] As we stated in the class certification proceedings,

> Under the first theory, "perceived potential competition," the Supreme Court held that competition might be diminished if a company that industry participants had thought might actually enter the market on its own, instead simply acquired a

overbuilding has occurred in other markets does not create a genuine factual issue that there was any potential for overbuilding in the Philadelphia DMA among the transaction Counterparties prior to the mergers. Evidence that other MSOs in other parts of the country engaged in overbuilding, and evidence that neighboring MSOs are the most likely overbuilder entrants, is insufficient to establish a genuine issue of material fact on whether (1) the transaction Counterparties here would likely have entered a competitor's franchise area in the near future as a potential overbuilder had they not been acquired by Comcast or (2) that they had any intention to potentially overbuild each others' franchise areas, when the record evidence of those parties' intentions is directly to the contrary. Accordingly, we conclude that the section 1 rule of reason claim may proceed on the Class's theory that Comcast and the Counterparties were "competitors" prior to the Transactions, but not upon its theory **[*70]** that they were potential overbuild competitors. [24]

V. SECTION 2 CLAIM - PREDATORY CONDUCT

The Third Amended Complaint contains two claims under *section 2* of the Sherman Act, **[*72]** [25] monopolization (Count II) and attempted monopolization (Count III) [26]. The Class identifies two types of allegedly predatory conduct to support its *section 2* claims: Comcast's clustering conduct and its conduct toward RCN, a cable overbuilder that attempted to overbuild Comcast franchises in Delaware County, Pennsylvania. (Compl. ¶¶ 83-103.) Comcast argues it is entitled to summary judgment because its clustering strategy had legitimate business justifications, and, accordingly, cannot be deemed to be predatory anticompetitive conduct. It asserts that the Class has failed to meet its summary judgment burden to create a genuine issue of material fact that the transactions creating the cluster, either singly or collectively, lacked a legitimate non-pretextual business purpose. Additionally, it argues that its conduct in relation to RCN was not predatory or exclusionary, and that no jury could find that either (1) Comcast's conduct in licensing Comcast SportNet Philadelphia ("CSN Philadelphia") to RCN, (2) RCN's inability to engage contractors, or (3) Comcast's price discounts to potential RCN subscribers, constituted predatory conduct. [27]

> company already in that market. See *Marine Bancorporation, 418 U.S. at 625* ("[T]he Court has interpreted *§ 7* as encompassing what is commonly known as the 'wings effect'- the probability that the acquiring firm prompted premerger procompetitive effects within the target market by being perceived by the existing firms in that market as likely to enter de novo. . . . The elimination of such present procompetitive effects may render a merger unlawful under *§ 7*."). Under these cases, "perceived potential competition focuses on the premerger effect on prices of the perception that if profits rise, a new company will enter the market and drive down both prices and profits." *Alberta Gas Chemicals Ltd. v. E.I. Du Pont de Nemours & Co., 826 F.2d 1235 (3d Cir. 1987)*.
>
> . . .
>
> The actual potential competition doctrine has not received a clear stamp of validity **[*71]** from the Supreme Court, but other courts have applied it where the plaintiff can show: (1) that the relevant market is oligopolistic; (2) that absent the acquisition [of the incumbent cable operator], the acquiring company [Comcast] would likely have entered the market in the near future either de novo or through a toehold acquisition; and (3) that such entry by the acquiring company [Comcast] would carry a substantial likelihood of ultimately producing deconcentration of the market or other significant procompetitive effects. *Tenneco, Inc. v. FTC, 689 F.2d 346, 352 (2d Cir. 1982)* (citing *Marine Bancorporation, 418 U.S. at 630, 633)*.

Behrend v. Comcast, 245 F.R.D. 195, 207 (E.D. Pa. 2007).

[24] We also find that the Class, to the extent that it raises the issues, cannot rely upon other forms of competition identified by its expert Dr. Williams, namely benchmark competition, competition for original cable franchises, and competition for bargaining power with programming content providers, which we have previously rejected as unsupported by evidence common to the class.

[25] *Section 2* of the Sherman Act states: "Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations" is guilty of an offense and subject to penalties. *15 U.S.C. § 2*.

[26] Comcast argues with respect to both claims that the Class has failed to show predatory conduct. Accordingly, our analysis of the two *section 2* claims is identical for the purposes of the Motion.

Rather, it asserts, the summary judgment record **[*73]** demonstrates that RCN's inability to compete in the Philadelphia DMA resulted from its own financial difficulties in raising capital. The Class responds that it has presented ample evidence demonstrating the transactions were anticompetitive and lacked valid business justifications. It also asserts that genuine issues of fact exist regarding Comcast's conduct toward RCN.

The elements of a *section 2* monopolization claim are (1) the possession of monopoly power and (2) the willful acquisition and maintenance of that power as distinguished from growth or development or consequences **[*75]** of a superior product, business acumen, or historical accident. *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*; *Crossroads Cogeneration Corp. v. Orange & Rockland Utils., Inc., 159 F.3d 129, 141 (3d Cir. 1998)*. The elements of *section 2* attempted monopolization are (1) that the defendant has a specific intent to monopolize, and (2) that the defendant has engaged in anticompetitive conduct that, taken as a whole, creates (3) a dangerous probability of achieving monopoly power. *West Penn Allegheny Health Sys., Inc. v. UPMC, 627 F.3d 85, 108 (3d Cir. 2010)* (citing *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993))*. [28] The distinction between the two claims is that "monopolization requires proof of monopoly power, while attempted monopolization requires only proof of a dangerous probability of achieving a monopoly. Courts interpret the latter requirement to imply a showing of market share somewhat less than that required for monopoly power." 2 Kintner, Federal ***Antitrust Law*** § 14.9.

The possession of monopoly power "will not be found unlawful unless it is accompanied by an element of anticompetitive conduct." *Verizon Commc'ns Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 407, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)* (emphasis deleted); *Broadcom Corp. v. Qualcomm Inc., 501 F.3d 297, 308 (3d Cir. 2007)* ("the acquisition or possession of monopoly power must be accompanied by some anticompetitive conduct on the part of the possessor"); *Morris Comm'ncs Corp. v. PGA Tour, Inc., 364 F.3d 1288, 1295 (11th Cir. 2004)* ("Unlawful monopoly power requires anticompetitive conduct, which is 'conduct without a legitimate business purpose that makes sense only because it eliminates competition.'" (quoting *Gen. Indus. Corp. v. Hartz Mountain Corp., 810 F.2d 795, 804 (8th Cir. 1987)))*; *LePage's Inc. v. 3M, 324 F.3d 141, 153-54 (3rd Cir. 2003)*. **[*77]** Antitrust conduct, also called exclusionary conduct or predatory conduct, "is central to the offenses of both monopolization and attempted monopolization." 2 Kintner, Federal ***Antitrust Law***, § 14.9. The analysis of predatory conduct is the same under both sections. Id.

Courts follow a sequential analysis in examining predatory conduct. First, the burden of proof of demonstrating predatory conduct and anticompetitive effect rests on the plaintiff. *United States v. Microsoft Corp., 253 F.3d 34, 58, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)* (citing *Monsanto, 465 U.S. at 763*). If a plaintiff successfully demonstrates anticompetitive conduct, the defendant must demonstrate a "procompetitive justification" for its conduct. *Id. at 59* (citing *Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 483, 112 S. Ct. 2072, 119 L. Ed. 2d 265*

---

[27] In the class certification proceedings, we rejected two other theories presented by the Class to demonstrate predatory conduct. We rejected the Class's assertion that Comcast's anti-RCN lobbying activity could be used as proof of predatory conduct, because it was at odds with the Noerr-Pennington doctrine. **[*74]** (Class Cert. Mem. at 46 (citing *Eastern R.R. Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*; *United Mine Workers of Am. v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)* (holding that an individual is immune from antitrust liability for exercising *First Amendment* right to petition the government)).) We also extensively discussed the issue of Comcast's conduct in denying access to its DBS competitors to CSN Philadelphia in the last class certification opinion, which was based on the same record currently before us on summary judgment. We rejected Dr. Williams' and Dr. Singer's opinions tying Comcast's clustering activity in the Philadelphia DMA to reduced DBS penetration rates as susceptible to proof at trial through available evidence common to the class. (Id. at 26-28.) In its summary judgment brief and in its Counterstatement of Facts, the Class concedes that these issues have been rejected and does not reraise them, other than to preserve an objection to the prior rulings.

[28] To determine whether there exists a viable claim of monopolization or attempted monopolization, a court must inquire into the relevant product and geographic market. *Spectrum Sports, Inc., 506 U.S. at 459*. **[*76]** We have already held in the class certification proceeding that the Class can establish through common evidence its definitions that the relevant product market is the provision of multichannel video programming service ("MVPS") and the relevant geographic market is the Philadelphia DMA. For the purposes of its summary judgment motion, Comcast does not challenge these definitions.

(1992)). A "procompetitive justification" is a "nonpretextual claim that [the monopolist's] conduct is indeed a form of competition on the merits because it involves, for example, greater efficiency or enhanced consumer appeal. . . ." Id., see also LePage's Inc., 324 F.3d at 163 ("'In general, a business justification is valid if it relates directly or indirectly to the enhancement of consumer welfare. Thus, pursuit **[*78]** of efficiency and quality control might be legitimate competitive reasons . . . , while the desire to maintain a monopoly market share or thwart the entry of competitors would not.'" (quoting Data Gen. Corp. v. Grumman Sys. Support Corp., 36 F.3d 1147, 1183 (1st Cir. 1994))) (alteration in original); see also 2 Kintner, Federal ***Antitrust Law*** § 14.35 ("practices that harm other firms without harming competition, or that harm rivals because of the defendant's superior efficiency cannot constitute unlawfully exclusionary conduct in the attempt context.") [29]. Once the defendant has met its burden to demonstrate a valid business justification, [30] the burden shifts back to the plaintiff to show that the proffered business justification is pretextual. See Image Technical Servs., Inc. v. Eastman Kodak Co., 125 F.3d 1195, 1212 (9th Cir. 1997). [31]

---

[29] Kintner explains,

> In considering exclusionary practices, it is critical to bear in mind that all competition excludes. Every act of innovation, price cutting, new entry or expanded output harms competitors, excluding them from some part of the market, sometimes to the point of destruction. But the antitrust laws actively promote this kind of harm to **[*79]** competitors. . . . [I]t is only when firms engage in practices that are *inefficiently* exclusionary - practices that predictably will lead to lower output and higher prices by reducing competition in the market as a whole - that ***antitrust law*** may intervene to enjoin or penalize the conduct.

2 Kintner, Federal ***Antitrust Law***, § 14.14.

[30] At least one court has held that the question is **not** whether the business justification is sufficient, but merely whether defendant establishes it had one. Bell v. Dow Chem. Co., 847 F.2d 1179, 1186 (5th Cir. 1988) (stating that the Supreme Court's decision in Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 597, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985) "does not hold that a jury can weigh the sufficiency of a legitimate business justification against the anticompetitive effects of a refusal to deal in or order to find intent by a defendant to monopolize. . . . The fact determination that may be left to a jury is whether the defendant has a legitimate business reason for its refusal, *not* whether that reason is sufficient. The Aspen jury presumably found all of [defendant's] business justifications to be unpersuasive, *not* persuasive but insufficient.").

[31] We note that in Microsoft **[*80]** the United States Court of Appeals for the District of Columbia Circuit offered an alternative route to demonstrating that the conduct was predatory, holding that "if the monopolist's procompetitive justification stands unrebutted, then the plaintiff must demonstrate that the anticompetitive harm of the conduct outweighs the procompetitive benefit." Microsoft, 253 F.3d at 59; see also Abbott Labs. v. Teva Pharms. USA, Inc., 432 F. Supp. 2d 408, 422 (D. Del. 2006) (stating that Microsoft's rubric allowed alternate means to plaintiff to rebut defendant's justification: as pretextual or, alternatively, by demonstrating that the anticompetitive harm of the conduct outweighs the procompetitive benefit). The Third Circuit has never specifically adopted this alternative. See e.g., United States v. Dentsply Intern., Inc., 399 F.3d 181, 187, 196 (3d Cir. 2005) (acknowledging business justification defense to predatory conduct claim without mentioning balancing) (citing LePage's Inc. 324 F.3d at 152); Broadcom Corp., 501 F.3d at 318 (same). Other post-Microsoft appellate decisions have also been silent on whether this alternative is available. See e.g., Morris Commc'ns Corp. v. PGA Tour, Inc., 364 F.3d 1288, 1295 (11th Cir. 2004) **[*81]** (holding that once the defendant has met its burden to show its valid business justification, the burden shifts to the plaintiff to show that the proffered business justification is pretextual); ACT, Inc. v. Sylvan Learning Sys., Inc., 296 F.3d 657, 670 (8th Cir. 2002) (holding that when a valid business reason exists for the conduct alleged to be predatory or anti-competitive, that conduct cannot support the inference of a section 2 violation; plaintiff's evidence did not create a triable jury question on whether defendant's proffered business reasons were legitimate); see also 3 Areeda and Hovenkamp, ***Antitrust Law***, § 658 (3d ed. 2007) (noting generally that few decisions have discussed the burden shifting issue in any detail).

In their discussion of the section 2 issues, neither party relied upon the alternative balancing test, made any argument that the test is applicable under Third Circuit case law, or attempted to apply the test to the summary judgement record. Moreover, the Class initially advised the Court that it was not relying upon the alternative balancing test. (N.T. 4/2/12 at 3:16-5:3.) However, in a later correspondence, the Class noted that, as part of its argument that **[*82]** Comcast lacked a valid business justification, it had argued in a footnote that a reasonable jury could conclude that the harm caused by Comcast's anticompetitive conduct "far overshadowed" any claimed business justification. (See Pl. Mem. at 72 n.55.)

We find that any reliance upon the alternative balancing test was waived. The Class's footnote was entirely devoted to the pretext issue, not the balancing test. Moreover, arguments "raised in passing (such as, in a footnote), but not squarely argued,

A. Creation of the Philadelphia cluster.

1. Has the Class created a genuine issue of material fact that the creation of the Philadelphia DMA cluster was predatory?

The Class contends that building the Philadelphia cluster was predatory conduct because it was accomplished through the use of the swap agreements to allocate the market between Comcast, AT&T and Time Warner. (Compl. ¶ 83.) In addition to the evidence already discussed, the Class points to Dr. Williams' opinions that the swaps and acquisitions caused large increases in Comcast market share and market concentration. Its market share rose from 23.9% in 1998 to 77.8% in 2Q2002, ending at 69.5% in 4Q2007. (Williams Decl. ¶ 114.) Williams opined that Comcast "would be expected to exercise substantial market or monopoly power, unless barriers to entry were low." (Id. ¶ 117.) However, he opined, there exist substantial barriers to entry into the MVPD market, both wire-based and satellite, including substantial sunk capital cost, strategic **[*84]** behavior by incumbents designed to raise their rivals' costs, such as limiting programming availability, local and state level regulations, and technological limitations. (Id. ¶ 118.) Dr. Williams contends that, among the anticompetitive results from Comcast's acquisition of market power from its clustering the Philadelphia DMA was its ability to deter overbuilding. (Id. ¶ 131; Williams Supp. Decl., Table 5; see also Singer Reply Decl. ¶¶ 42-59.) Because, Dr. Williams opines, the presence of an overbuilder restrains cable prices (see Williams Decl. ¶ 133 and App. IV), the Class contends there is ample evidence from which a reasonable jury could conclude that Comcast's clustering of the Philadelphia DMA decreased overbuilding and led to increased prices. Relying upon the Supreme Court's decision in Grinnell Corp., the Class argues that the swaps transactions are thus sufficient proof of anticompetitive conduct, standing alone, to permit a jury to find for the Class on its *section 2* claims.

In Grinnell, the Court held that acquiring competitors in order to perfect a monopoly is predatory conduct. *384 U.S. at 576* [32]; see also 2 Kintner, Federal ***Antitrust Law*** § 14.13 ("The conduct element **[*85]** of the monopolization offense can be satisfied by a merger (or series of mergers) to monopoly or by inefficient exclusionary conduct. . . . An acquisition or series of acquisitions that threaten to achieve monopoly power may establish the requisite conduct and specific intent for an attempt to monopolize."). Because the Class has presented evidence creating genuine issues of material fact that (1) the swaps resulted in a dominate market share, (2) the anticompetitive results from Comcast's acquisition of market power from its clustering the Philadelphia DMA included its ability to deter overbuilding and (3) the presence of an overbuilder restrains cable prices, the Class may rely upon the transactions themselves and evidence of Comcast's resultant increase in market share as proof of predatory conduct.

---

are considered waived." *John Wyeth & Bro. Ltd. v. CIGNA Int'l Corp., 119 F.3d 1070, 1076 n.6 (3d Cir. 1997)* (finding cursory arguments contained in footnote in appellate brief were waived). The Class's correspondence, issued after it had stated on the record that it was not relying upon the test, is insufficient to raise an argument that it did not include in its formal brief. See *Acumed LLC v. Advanced Surgical Servs., Inc., 561 F.3d 199, 223 (3d Cir. 2009)* (holding that a party has sufficient notice before a summary judgment is entered against it if it had reason to believe that the court might reach the matter at issue on the pending summary judgment application and the party had an opportunity **[*83]** to support its position fully); *Warren G. v. Cumberland County Sch. Dist., 190 F.3d 80, 84 (3d Cir. 1999)* (holding that an issue is waived if it is not raised in a party's initial appellate brief).

[32] The Court stated:

> We have said enough about the great hold that the defendants have on this market. The percentage is so high as to justify the finding of monopoly. And, as the facts already related indicate, this monopoly was achieved in large part by unlawful and exclusionary practices. The restrictive agreements that pre-empted for each company a segment of the market where it was **[*86]** free of competition of the others were one device. Pricing practices that contained competitors were another. The acquisitions by Grinnell of ADT, AFA, and Holmes were still another. Grinnell long faced a problem of competing with ADT. That was one reason it acquired AFA and Holmes. Prior to settlement of its dispute and controversy with ADT, Grinnell prepared to go into the central station service business. By acquiring ADT in 1953, Grinnell eliminated that alternative. Its control of the three other defendants eliminated any possibility of an outbreak of competition that might have occurred when the 1907 agreements terminated. By those acquisitions it perfected the monopoly power to exclude competitors and fix prices.

Grinnell, 384 U.S. at 576.

2. Has Comcast stated a "procompetitive justification" for its conduct?

Comcast argues it is entitled to summary judgment on the *section 2* claim because it had legitimate, procompetitive justifications in creating the Philadelphia cluster, and the Class has failed to create a triable issue negating this claim. Based on the evidence already discussed in conjunction with the arguments on the *per se* claim, Comcast argues that each transaction was **[*87]** undertaken for valid business purposes. It argues that its decision to create a cluster in the Philadelphia DMA was undertaken to achieve greater efficiency, a prototypically valid business purpose.

Comcast asserts that contemporaneous Comcast documents identify the efficiencies and advantages associated with clustering, including opportunities in the areas of general management, new product introductions, marketing, brand building, retail presence, ad sales, government and community relations, local programming, call centers, training, and business communications services. (Def. Mem. at 34-35; Def. Ex. 29, "Clusters/2000 Management Retreat Memo.," at COM-PA0214427-28 (outlining management opportunities created by large clusters, including general management, new product introduction, marketing, ad sales, government/community relations, local programming, call centers and training); Def. Ex. 28 (same).) It adds that testimony confirmed that clustering enabled Comcast to realize marketing efficiencies by increasing its presence across a DMA (thereby enabling its self-advertising to reach a wider audience), and to realize other efficiencies such as consolidating infrastructure, operations, **[*88]** call centers, and management. (Def. Statement of Undisputed Facts ¶¶ 46-47; Def. Ex. 56, Roberts Dep., 116:2-117:16 [33]; Def. Ex. 50, Doyle Dep., 90:3-92:3 (stating that a benefit of clustering was the ability to recruit better people and manage business more efficiently); Def. Ex. 53, Marshall Dep., 32:24-33:22 (stating that a benefit of clustering was better ad sales and economies of scale).) As noted in the discussion of *per se* liability, Comcast asserts that clustering also allowed it to introduce new products such as high-speed internet, telephone, pay per view, video on demand, digital video recorders, digital cable, substantially more channels, and high-definition television. (Def. Statement of Undisputed Facts ¶ 48.) The economies of scale associated with clustering enabled cable providers to compete with satellite companies with a national footprint, and telephone companies possessing vastly larger resources and clusters, who were emerging as competitors in multiple product markets - video, data, and telephone. (Id. ¶ 49; Def. Ex. 54, Pick Dep., 56:1-57:23; Def. Ex. 51, Hindery Dep., 132:11-15; Def. Ex. 56, Roberts Dep., 144:23-146:7.). We find that Comcast has stated procompetitive **[*89]** justifications for its clustering conduct.

3. Has the Class created a genuine issue of material fact that the proffered business justification for clustering is pretextual?

The Class does not dispute that Comcast has identified efficiencies purportedly associated with clustering. (Counterstatement of Facts ¶ 46.) Rather, the Class asserts that Comcast did not present evidence that it conducted any post-transaction studies to see whether its assumptions about efficiencies were correct and there is

---

[33] CEO Roberts testified that among the advantages of clustering were

> economies of scale and improved consumer benefits. And I would say that those two categories are what I've been talking about with clustering, that I think in '99 you - depending on the scale, now this total acquisition would have done what I said earlier, make us substantially larger, so we would have qualified for programing discounts.
>
> We would be able to consolidate managers within a market. We'd be able to open up call centers within those markets, that would be open 24 hours a day, instead of kicking over to an answering service at night. When most people watch television, historically, that's how cable service was provided. Now you had a much larger area, and you're able to use new technology, as well as have a bigger scale of operations.
>
> We are able to recruit better executives because it's closer to the caliber of being a TV station general manager. Often considered the best job in media was to run one of the local markets, because you had the entire market in the broadcast industry or the radio industry, or the newspaper industry, or frankly, the phone industry. You **[*90]** were in charge of either a state or a city. So heretofore, we would have, you know, lower paid, smaller area of line of responsibility. So there's a myriad of benefits that happened in that situation.

Def. Ex. 56, Roberts Dep., 116:2-117:16

no evidence in the record creating a genuine issue of material fact that the transactions actually resulted in increased efficiency for Comcast. It argues that a reasonable jury could conclude from Comcast's "lack of interest" in whether its stated justification was true that its claimed efficiency justification was pretextual. (Class Pl. Mem. at 70.)

In contrast to the lack of evidence of actual efficiencies, the Class argues that the evidence creates a genuine issue of material fact that, with each **[*91]** transaction Comcast raised its prices, suggesting that the claim of efficiency is pretextual. (Class Pl. Mem. at 72-73 (citing Pl. Ex. 6, "Analysis of Adelphia New Jersey Rates," at COM-PA0513589 (stating "it appears that Adelphia's rates could rise about $8.53 to be in line with Comcast's rates."); Pl. Ex. 126, Peyton Email of March 30, 2006 (stating with regard to the Adelphia/Time Warner swap transaction that a "factor[] driving the brand transition timing" was "[a] desire to take as many scheduled rate increases as possible under the existing Adelphia or TW system name."); Pl. Ex. 5, "Rating Agency Presentation January 2002," at COM-PA0206424 (noting that operating cash flow per former subscriber of E. W. Scripps, Jones Intercable and Lenfest increased, on average, 30% within one year of Comcast's acquisition of those systems.); Pl. Ex. 130, "Key Messages," (noting after integration of AT&T systems revenues increased by 9.8%, operating cash flow by 22.9%, margins by 8.2 points, and operating cash flow per subscriber by 23.4%; after integration of Adelphia systems revenues increased by 15.3%, operating cash flow by 28%, margins by 12 points, and operating cash flow per subscriber **[*92]** by 23.4%); Pl. Ex. 113, Presentation of Brian Roberts at Salomon Smith Barney 12th Annual Entertainment, Media & Telecommunications Conference, at COM-PA0470175 (stating that "in every other acquisition we've been able to get the Comcast margin to 42 percent within two years"); Pl. Ex. 123, Announcement of Adelphia and Time Warner Transactions, at COM-PA1137177-178 (showing acquired Adelphia systems' operating cash flow margin increasing from 30% to 39% after acquisition, showing history of increases after AT&T and prior Adelphia acquisitions).) When asked about projecting revenues models after completing acquisitions, Robert Pick testified that Comcast "generally assume[d] there [would] be rate increases in the - over the modeling period." (Pl. Ex. 92, Pick Dep., 87:2-4.) David Scott, Comcast's executive vice-president of finance and administration, testified that Comcast's cable headquarters "directionally" advised how much it expected companywide prices to increase in its budgeting model each year, while allowing individual franchises to vary across the country. (Pl. Ex. 96, Scott Dep., 26:22-28:14.)

The Class also asserts that Comcast did not need to allocate markets in order to **[*93]** achieve efficiency; that it could have built its cluster by overbuilding its competitors rather than acquiring them or swapping for their assets. (Pl. Mem. at 75-76.) It argues that a reasonable jury could find that Comcast's decision to pursue efficiency through swaps and acquisitions, rather than through overbuilding, harmed competition, was unnecessarily restrictive, and was thus anticompetitive, even if Comcast was allegedly engaging in those transactions in pursuit of increased efficiency.

Comcast responds that (1) the Class cites no authority for its assertion that a company claiming efficiency must conduct formal studies to establish that its goal was achieved, (2) the Class itself elicited testimony that Comcast had achieved efficiencies, (3) the Class's experts conceded that clustering can lead to efficiencies, (4) the FCC concluded that clustering increased efficiencies, and (5) the Class itself elicited testimony that obvious efficiencies were observed by Comcast after the transactions. [34] It points out that it raised cable prices annually both before and after the transactions, in both legacy and in newly acquired franchises. (Def. Sup. Ex. 93, S. Burke Dep., 44:5-20, 45:5-8. **[*94]** [35]) Thus, it argues that its intention to raise prices after acquiring systems does not establish

---

[34] Robert Pick testified in response to a question by Class counsel about whether Comcast studied whether its estimated efficiencies were realized that,

> I'm not aware - I'm not sure or at least I'm not aware of any specific studies that were done to see if they were achieved or not achieved. Some of them obvious were obvious. For instance, I think in the operating efficiencies, we assumed that we could bring margins of the AT&T systems to that level close to or similar to the Comcast system.
>
> And so it's just obvious that you could see during the financial - looking at financial results that if the margins of those things approved - improved at or close to Comcast systems, you would see that we were able to do that.

(Pl. Ex. 92, Pick Dep., 305:12-22.)

pretext. It also emphasizes that it is undisputed that it introduced new services into its acquired territories that were not previously available, like digital cable, DVRs, and telephone and internet service.

We **[*96]** find that the Class has not met its summary judgment burden to create a genuine issue of material fact that Comcast's claim of efficiency as a justification for clustering was a pretext. The Class's evidence that Comcast raised prices does not refute the claim of efficiency. While the Class did not have to present direct evidence establishing pretext to meet its summary judgment burden, it had to present probative evidence that would demonstrate the existence of a triable issue of fact upon which a reasonable jury could disbelieve what Comcast asserts. It has tried to do this by arguing that Comcast could have achieved the same efficiency of clustering by overbuilding its competitors, rather than acquiring them or swapping for their assets, and asserting that Comcast never studied whether it was achieving its goals. We reject these contentions for several reasons.

First, the underlying assumptions - that clustering efficiencies can be similarly created through overbuilding, and that creating a cluster through overbuilding is an equally efficient business model - are unsupported by any evidence. Second, the fact that Comcast could have achieved efficiencies differently is insufficient **[*97]** to show that Comcast's efficiency justifications were a pretext. Third, there is no authority that an antitrust defendant's expectations of efficiency proved accurate. Similarly, the fact that Comcast did not study its efficiencies is also insufficient to show that the efficiency justification was a pretext. Moreover, the evidence in the record supports the fact that clustering in fact leads to efficiencies of scale. [36] Finally, the Class does not dispute that Comcast was able to provide significant new services to its customers as a result of clustering.

Accordingly, we grant summary judgment to Comcast on the Class's *section 2* claim regarding Comcast's clustering **[*98]** conduct. The Class has failed to create a genuine issue of material fact that Comcast's proffered business justification was pretextual.

B. RCN

As noted above, the Class argues that Comcast's conduct toward RCN was predatory in three respects: (1) its conduct blocking RCN's access to cable infrastructure installation contractors, (2) its conduct in licensing CSN Philadelphia to RCN, and (3) its practice of offering price discounts to potential RCN subscribers. We shall examine each claim individually.

1. Access to cable infrastructure installation contractors.

a. Has the Class created a genuine issue of material fact that Comcast's actions blocking RCN's access to cable infrastructure installation contractors were predatory?

---

[35] COO Burke testified that

> Basic cable rates in virtually every system in every cable company in every state in the country are raised every **[*95]** year because our programming costs go up every year. And, so, there were basic rate increases I would say in virtually all of the systems in the Philadelphia area every year during the period of time.
>
> . . .
>
> We raise prices every year because our programming increases every year.

(Def. Sup. Ex. 93, S. Burke Dep., 44:5-20, 45:5-8.)

[36] See Def. Ex. 18, Seventh Annual Competition Report, ¶ 166 (clustering "permits cable operators to . . . gain efficiencies related to economies of scale and scope resulting in lower administrative costs, enhanced deployment of new technologies, and encouraging the extension into previously unserved areas"); Def. Ex. 19, FCC 01-389, Eighth Annual Competition Report, ¶ 14 ("By clustering their systems, cable operators may be able to achieve efficiencies that facilitate the provision of cable and other services, such as telephony.").

In June 1998, RCN sought and received certifications to operate Open Video Systems [37] ("OVS") in four counties in the Philadelphia DMA (Delaware, Bucks, Chester, and Montgomery). (Def. Statement of Undisputed Facts ¶ 54.) Of those four counties, RCN chose to enter Delaware County first, breaking ground on its overbuild cable system in the Borough of Folcroft in late 1999. (Id. ¶ 55.) From there, RCN continued its overbuilding throughout Delaware County. In 2000, RCN **[*99]** overbuilt in Folcroft, Ridley Township, Eddystone, Norwood, Sharon Hill, Prospect Park and Collingdale. In 2001 RCN overbuilt in Glenolden, Ridley Park, Upper Darby, Colwyn, Morton, Tinicum Township, Clifton Heights, Darby Township and Darby Borough. In 2002, RCN overbuilt in Rutledge, Milbourne, East Lansdowne and Lansdowne. In 2003, RCN overbuilt in Yeadon. (Id. ¶ 57; Def. Ex. 41, Laura Burke Deposition Exhibit 13.).)

On May 29, 2002, RCN sent a letter to the FCC complaining that "it [was] aware of no less than fifteen (15) contractors in the Philadelphia market - representing virtually all of the viable construction and installation contractors in the area - whom Comcast or, prior to its acquisition by Comcast, Suburban Cable, have prevented or tried to prevent from doing business with RCN." [38] (Def. Ex. 43, RCN 30(b)(6) Dep. Ex. 22 at RCN 0000237.) After Suburban merged into Comcast, **[*100]** those Suburban personnel responsible for the company's contractor non-compete policy "went to work for Comcast, where the practice of intimidating contractors continued." (Id. at RCN 0000238.) Scott Burnside, RCN's Senior Vice President for Regulatory and Governmental Affairs, testified that RCN suffered "delays and setbacks by not having full cooperation from the outside contractors that it would normally expect to have." (Pl. Ex. 83, Burnside Dep., 81:13-16.)

James Cleaver, an installation subcontractor who had worked for Suburban Cable, testified that several subcontractors who had worked for Comcast were barred from further work when Comcast became aware that they were working as subcontractors for his company on the RCN build out. (Pl. Ex. 84, Cleaver Dep., 61:9-77:22.) When Cleaver's company began working for RCN as a subcontractor, he received an email from Chris Patterson of Suburban Cable, which was about to be acquired by Comcast. (Def. Ex.43, RCN 30(b)(6) Dep. Ex. 22, at RCN0000241.) Patterson told **[*101]** Cleaver:

> You suggest that Suburban did not have a problem with you working for other area cable companies and you were right, because they were not in direct competition with Suburban Cable as RCN is. Every mile of rear buss plant that you build gives RCN, our competitor the ability to take customers away from Suburban Cable. Our company and the Cable industry does not share the same perspective that you do in regards to competition.
>
> . . .
>
> You are correct, you are a business man and as we discussed on the phone you need to take the proper business decisions for your company. In my opinion your business decision should have been to stay with Suburban and become a part of our major project. You also know that we will become part of a larger cluster under Comcast ownership which will span the Tri-state area and south through Baltimore and Washington. You need to know that they have a more intense feeling about competing with RCN than Suburban does, and our intensity is pretty strong. Why you choose to work for a smaller company such as RCN in light of things to come are more of a short term decision vs looking at the long term in this area with Comcast. Again, you made a business decision **[*102]** for your company any your employee's [sic] and that is fine. Suburban had to act on a legal document that you signed for Non-compete. This is the only reason why Suburban terminated your contracts, because it was in breach.

(Id.) Cleaver testified on cross examination at his deposition that when he worked for Suburban Cable he had access to the company's design plans and used Suburban's equipment. (Def. Ex. 48 Cleaver Dep. 101:14-25.) He

---

[37] An OVS is a "facility consisting of a set of transmission paths and associated signal generation, reception, and control equipment that is designed to provide cable service which includes video programming and which is provided to multiple subscribers within a community. . . ." *47 C.F.R. § 76.1500(a)*.

[38] Dr. Singer, a class expert, opined that the fifteen area contractors constituted approximately 53% of the available contractors in the Philadelphia area. (Singer Decl. ¶ 124.)

understood that Suburban had concerns because its design plans were confidential and also concerns about equipment being mixed up with the equipment of other companies. (Id. at 101:14-104:7.) He also testified that he currently continues to get work from Comcast, even though he also works for RCN and Verizon. (Id. at 79:13-17.) Finally, Cleaver testified that RCN paid contractors higher rates "because they wanted to lure whoever [sic] they could, and the only way you are going to get them on is to pay the money." (Pl. Ex. 84, Cleaver Dep., 118:2-23.)

Notwithstanding the evidence of RCN's complaint to the FCC and the Burnside and Cleaver testimony, Comcast offers evidence that by April 2001, RCN was able to complete its buildout in Delaware County, achieving **[*103]** a penetration rate of 20 - 21%, which was above its 20% minimum target required to keep its operations viable and generate a return. (Def. Statement of Undisputed Facts ¶ 58; Def. Ex. 55, RCN Rule 30(b)(6) Dep., 62:12-18.) It adds that, when deposed by the Class, RCN did not identify any barriers to entry created by Comcast in the Philadelphia DMA; instead, RCN's 30(b)(6) designee stated that the only barriers to entry RCN faced in entering the Philadelphia DMA were (i) physical access to the poles that were owned by the utilities to build its system and (ii) obtaining a franchise from each municipality to provide the service. (Def. Statement of Undisputed Facts ¶ 59; Def. Ex. 55, RCN 30(b)(6) Dep., 47:17-49:4, 55:11-21.) The Rule 30(b)(6) witness testified that the company had not experienced "any lack of contractors" at the hands of Comcast, and that it was able to retain all the cable construction and installation contractors necessary to build out its cable systems in Delaware County. (Def. Statement of Undisputed Facts ¶ 67-69; Def. Ex. 55, RCN 30(b)(6) Dep., 152:24-153:1; see also Def. Ex. 47, Burnside Dep., 158:25-159:13. [39]) Comcast has also presented evidence that the pool **[*104]** of cable installers and construction contractors available to build out cable systems in Eastern Pennsylvania numbered in the hundreds, including both locally-based contractors and national companies. (Def. Statement of Undisputed Facts ¶ 66; Def. Ex. 48, Deposition of James Cleaver on May 14, 2008 ("Cleaver Dep."), 114:23-117:16; Def. Ex. 40, Cleaver Dep. Ex. 9.) Comcast notes that RCN stated to the FCC that Comcast had exclusive arrangements with only 15 of these contractors. (Def. Ex. 43, RCN 30(b)(6) Dep. Ex. 22 at RCN 0000237.)

Although RCN complained to the FCC that Comcast had tied up fifteen installation contractors with non-compete agreements, the record contains evidence of only two signed contractor non-compete agreements - the one discussed in the Cleaver deposition between Suburban Cable TV Co. (which was later acquired by Comcast) and Installation Technologies, Inc. ("ITI"), dated April 22, 1999 and terminated on November 26, 1999, (Def. Ex. 39, Cleaver Deposition Exhibit 6); and another between Suburban and Lewis Communications dated April 9, 1999. (Def. Statement of Undisputed Facts ¶ 71; Def. Ex. 43, RCN 30(b)(6) Dep. Ex. 22 at RCN000242-45.) Both non-compete agreements were executed before the class period. Those provisions prohibited the contractors from working for anyone besides Comcast during the term of the principal contract in geographic areas where Comcast faced competition. (Def. Ex. 43; Def. Ex. 39.) In the Suburban/ITI contract, the term of the non-compete extended for **[*106]** six months after termination of the contract, i.e., May 2000. (Def. Statement of Undisputed Facts ¶ 73; Def. Ex. 39.) It is undisputed that Comcast never brought an action to enforce this provision and ITI continued to

---

[39] After offering direct testimony that RCN had suffered set backs and delays due to Comcast's interference with contractors, on cross-examination at his deposition, RCN executive Scott Burnside confirmed the testimony of the Rule 30(b)(6) witness:

> Q. And you testified about access to contractors. RCN was able to get contractors to build out in Delaware County, right?
>
> . . .
>
> THE WITNESS: To some degree, yes.
>
> BY MR. KORPUS:
>
> Q. To a degree sufficient to build out its system in Delaware County to its specifications, right?
>
> MR. WOODWARD: Objection. Form.
>
> THE WITNESS: To do construction in Delaware County, they were able to get construction people willing to do work in **[*105]** Delaware County.

(Def. Ex. 47, Burnside Dep., 158:25-159:13.). Burnside also testified that some contractors left Comcast to work for RCN because they did not like Comcast's "bullying tactics." (Id. at 160:25-161:11.)

work for RCN after Comcast terminated the contract for cause. (Def. Statement of Undisputed Facts ¶ 74; Counterstatement of Facts ¶ 74.) The Suburban/Lewis non-compete only lasted for the duration of the contract. Moreover, it is undisputed that, when asked by Comcast to honor the agreement, Lewis instead chose to work for RCN. (Def. Statement of Undisputed Facts ¶ 75; Counterstatement of Facts ¶ 75.)

Comcast also presents evidence that RCN's tenuous financial condition, rather than any problems it experienced with the availability of contractors, caused the company to ultimately abandon its efforts to overbuild in the Philadelphia DMA. In December 2000, while its build-out of Delaware County was underway, RCN announced that, in order to conserve cash, the company had abandoned its plans to enter any new markets where it did not already provide video service. This announcement applied nationwide - not just to Philadelphia. (Def. Statement of Undisputed Facts ¶ 80; Def. **[*107]** Ex. 45, RCN 30(b)(6) Dep. Ex. 34.) RCN confirmed in its public filings pursuant to the federal securities law and in statements to the FCC that it had abandoned plans to engage in further overbuilding (in Philadelphia or elsewhere) because it lacked the necessary capital. (Def. Statement of Undisputed Facts ¶ 81-83; Def. Ex. 3, RCN 2001 10-K405, p. 51.; Def. Ex. 42, RCN 30(b)(6) Dep. Ex. 8 (Initial Comments of RCN Corp. in re Annual Assessment of the State of Competition, dated August 3, 2001), p. 7; see also Def. Ex. 47, Burnside Dep., 170:7-171:22.) Consistent with the announced change in its strategy, RCN did not start any new overbuild construction, and instead actually sought to free itself from its build-out obligations in the Philadelphia DMA and elsewhere. RCN did not even build out franchise areas where it already had franchise approvals and therefore the legal obligation to build. (Def. Statement of Undisputed Facts ¶ 84; Def. Ex. 3, RCN 2001 10-K405, p. 20, 52; Def. Ex. 55, RCN 30(b)(6) Dep., 159:9-160:13; Def. Ex. 3, RCN 2001 10-K405, p. 20, 26; Def. Ex. 4, RCN 2002 10-KA, p. 22, 28; Def. Ex. 5 RCN 2003 10-K, p. 32; Def. Ex. 6, RCN 2004 10-K, p. 16; Def. Ex. 7, RCN 2005 **[*108]** 10-K, p. 19.) Among the areas affected by RCN's strategic retrenchment were communities in Bucks County where RCN had franchise approvals and build out obligations. In 2002 and 2003, due to its continuing net losses and ongoing inability to raise capital, RCN reiterated in its public disclosures that it would not be able to honor its build-out requirements in certain communities across the country, including in Eastern Pennsylvania. (Def. Statement of Undisputed Facts ¶ 88; Def. Ex. 3, RCN 2001 10-K405, p 20, 24, 51-52; Def. Ex. 4, RCN 2002 10-KA, p. 22, 26-27; Def. Ex. 5, RCN 2003 10-K, p. F-1, F-26, F-29, F-39; Def. Ex. 55, RCN 30(b)(6) Dep., 164:20-165:6, 167:20-168:24.) In May 2004, RCN filed for bankruptcy. (Def. Statement of Undisputed Facts ¶ 89; Counterstatement of Facts ¶ 89.) Even after emerging from bankruptcy, RCN's financial problems persisted, and its losses continued to mount. It is undisputed that, in May 2005, RCN disclosed that it was continuing its efforts to terminate or renegotiate franchise agreements in communities across the country, including Eastern Pennsylvania, to avoid breaches and related penalties, and announced that it expected to continue to experience **[*109]** net losses "for the foreseeable future." (Def. Statement of Undisputed Facts ¶ 93; Counterstatement of Facts ¶ 93.)

The Class does not dispute that RCN was suffering from financial problems. It contends that RCN, in part, blamed its problems on "the inability to secure, or the uncertainty about whether it will be able to secure, essential programming," (Def. Ex. 42, Initial Comments of RCN Corp to FCC, p. i-ii) and that RCN repeatedly complained to the FCC about Comcast. It contends that RCN's financial problems are evidence of the toll Comcast exacted on its competitor through its anticompetitive conduct in the Philadelphia DMA, i.e, by limiting RCN's access to contractors, as well as its conduct in targeting price discounts to prospective RCN subscribers - which we discuss below - Comcast raised RCN's costs. (See Singer Merits Reply Decl. ¶ 34 ("Comcast's contractor-foreclosure strategy directly raised RCN's costs of supplying MVPD service in the Philadelphia DMA and thereby provided Comcast with an artificial cost advantage vis-a-vis RCN. Dr. Teece's proposed remedy - importing contractors from distant areas - is also an example of raising rivals' costs."); see also Teece Decl. ¶ **[*110]** 176 (finding that "a number of Philadelphia area contractors chose to work solely (or mostly) with RCN," but noting also that "RCN apparently paid contractors more than Comcast in order to incentivize them to work with RCN.").)

Drawing all inferences in favor of the Class as the non-moving party, we find that the Class has succeeded in creating a genuine issue of material fact that Comcast acted with predatory intent regarding RCN's access to cable infrastructure installation contractors. There is a genuine issue of fact with regard to the reasons why RCN encountered problems in its build out in Delaware County. Comcast's evidence showing a larger pool of contractors, that RCN was able to complete its build out in Delaware County with available contractors, that Comcast never enforced non-compete agreements with contractors, and that RCN's problems arose from its lack of capital, does not establish that it is entitled to judgment as a matter of law on the issue. The contrary evidence Comcast presents merely counters the Class's evidence; it does not establish that no jury could find predatory conduct on the part of Comcast if it chose to believe the Class's evidence.

b. Has Comcast stated **[*111]** a "procompetitive justification" for its conduct?

Comcast's stated justification for "tying up" contractors with non-compete clauses is that it utilized non-compete clauses with contractors to protect its proprietary customer information, confidential design plans, and equipment. (Def. Statement of Undisputed Facts ¶ 76; Def. Ex. 46, S. Burke Dep., 167:15-168:21; Def. Ex. 48, Cleaver Dep., 103:18-104:4 (acknowledging that Comcast personnel expressed concerns about confidential design plans and mixing up equipment on the same truck)). Comcast's Steve Burke testified generally that the company was concerned that an installation contractor, who had access to Comcast's customer lists, might also work for DirecTV or RCN:

> we don't like the fact that you have names of our customers and now you are doing business with DirecTV, and the potential for somebody to make a bigger commission by doing business with DirecTV than Comcast, all of a sudden we lose a customer. So I think it's totally appropriate to tell a contractor, you know, we have enough work for 50 people, you work for us, we don't want you working for our competitor. But I don't know in the specific case of RCN whether that was done **[*112]** in Philadelphia.

(Def. Ex. 46, S. Burke Dep. 167:16-168:1.) He added,

> It's not a matter of company policy that if a company does work for anyone else they can't do work for us, but just as a matter of common business sense, if someone - if you have someone who is doing a lot of business with you and a lot of business with one of your competitors and you suspect that that is damaging you because they are taking your names and customers to someone else, boy, if I was running a system in Sarasota, Florida, I would stop it.

(Id. 168:13-22.) We find that Comcast has stated a legitimate procompetitive justification for its conduct with regard to cable infrastructure installation contractors.

c. Has the Class created a genuine issue of material fact that the proffered business justification is pretextual?

We find that the Class has failed to create a genuine issue of material fact that Comcast's stated justification was a pretext for predatory conduct. Indeed, in its summary judgment brief, the Class does not address Comcast's justifications for imposing no-compete terms on cable installers, i.e., the need for cable companies to protect their customer lists, design plans, and equipment. [40] Accordingly, **[*113]** we conclude that the Class has failed to meet its summary judgment burden on the issue of whether Comcast's justifications for requiring no-compete clauses by cable infrastructure installation contractors were pretextual.

2. RCN's access to CSN Philadelphia.

The Class contends that CSN Philadelphia, Comcast's regional sports network, is "must have" programming needed by MVPDs, including RCN, to compete in the Philadelphia DMA. (Pl. Ex. 83, Burnside Dep., 83:14-85:12.) The Third **[*114]** Amended Complaint alleges that Comcast initially refused to provide RCN, and then provided only on a short-term basis, access to Comcast SportsNet Philadelphia, refusing to enter into a stable, multi-year license for the content until only shortly before the Third Amended Complaint was filed. (Compl. ¶¶ 86-90.) The Class asserts that RCN's initial attempt to license CSN Philadelphia was "initially rebuffed," and that Comcast later indicated it would terminate RCN's access to CSN Philadelphia during the time period that it was building out its Delaware County communities. (Counterstatement of Facts ¶ 61; Pl. Ex. 97, RCN 30(b)(6) Dep., 69:16-20; Pl. Ex.

---

[40] We note that Dr. Singer addresses the issue in his declaration, opining that "[t]here does not appear to be a compelling justification for [the contractor no-compete] conduct, as one Comcast official noted to another that 'I am not entirely sure what problem a[n] [exclusivity] program would be designed to solve' and that exclusive contracting 'has not bubbled up from the field as an urgent need and so I am not sure what we are trying to fix.'" (Singer Decl. ¶ 112 (quoting COM-PA1456482).) While it is unclear whether Dr. Singer was aware of Comcast's stated justifications when he stated there did not appear to be one, his opinion denying that Comcast had stated any justifications is not supported by the record.

118.) It presents evidence that, during this time frame when RCN was attempting to sign up customers in its new operating areas, Comcast call center workers were directed to tell subscribers cancelling in favor of RCN that RCN will no longer have the right to carry Comcast SportsNet after October 1, 2000. (Pl. Ex. 81, S. Burke Dep., 123:6-19; Pl. Ex. 83, Burnside Dep., 116:22-118:8). While conceding that "Comcast eventually allowed RCN access to the 'must-have' programming on a series of short term, month-to-month contracts," it characterizes **[*115]** this arrangement as "outside the industry norm." (Counterstatement of Facts ¶ 61 (citing Pl. Ex. 135, Letter of April 16, 2001, p. 6.).) [41]

In his report, Dr. Singer opined that Comcast sought to deny RCN access to CSN Philadelphia, and then sought to raise its rival's costs by artificially inflating the price, once the FCC determined that Comcast **[*118]** was required to provide access to its wireline competitors. (Singer Decl. ¶ 97.) Dr. Singer opines that, "[e]ven though Comcast ultimately was compelled to supply RCN with [CSN Philadelphia], the episode reveals Comcast's anticompetitive intent and highlights the competitive implications of such exclusionary conduct in the downstream market." (Singer Decl. ¶ 100.)

Comcast responds that RCN has had access to CSN Philadelphia continuously from before the class period to the present day and that RCN's own corporate designee testified that lack of access to CSN Philadelphia programming did not constitute a barrier to entry for RCN into the Philadelphia DMA. (Def. Statement of Undisputed Facts ¶ 61; Def. Ex. 55, RCN 30(b)(6) Dep., p. 127:17-22; Def. Ex. 47, Burnside Dep., 143:16-144:12.) It adds that RCN had a "most-favored-nation" clause guaranteeing that it would receive CSN Philadelphia on terms no less favorable than those provided to other licensees. (Def. Statement of Undisputed Facts ¶ 63; Def. Ex. 31, 32.) Comcast asserts that it licensed the programming to RCN, its competitor, on exactly the same terms offered to all CSN Philadelphia licensees (including Comcast Cable itself). (Def. **[*119]** Statement of Undisputed Facts ¶ 64; Def. Ex. 49, Deposition of Joseph Donnelly on November 19, 2008 ("Donnelly Dep."), 162:15-19 (stating "I can tell you that the

---

[41] We note that the summary judgment record includes testimony from Scott Burnside that Comcast used CSN Philadelphia to create an entry barrier. Burnside, referring to the month-to-month contract period, testified "it gave Comcast some leverage . . . over RCN and where RCN might go into other competitive - other communities in that greater Philadelphia market. (Pl. Ex. 83, Burnside Dep., 104:23-105:2.; but see Def. Ex. 47, Burnside Dep., 114:18-21 (stating "RCN still does have the programming required to be competitive because they are there and competing on a daily basis."); see also Def. Ex. 55, RCN 30(b)(6) Dep., 49:5-15 (stating that obtaining programming is not an entry barrier)).

However, we find that the evidence cited for the "outside the industry norm" proposition, as well as the claim that Comcast told RCN it would terminate its access to CSN Philadelphia, is taken out of context. CSN Philadelphia's CEO Jack Williams informed RCN on May 25, 2000 that, due to changes in the cost of programming, the market, and the needs of Comcast's affiliates, **[*116]** Comcast would not be able "to extend its arrangement with your system **at the price and on the other terms and conditions currently in effect** when your agreement expires this coming October." (Pl. Ex. 118, Letter of May 25, 2000 (emphasis added).) The letter states that this same notice was being given to all CSN Philadelphia affiliates. The Class concedes that RCN received a long-term contract executed in December 2003, and made effective as of October 1, 2001, the termination date of its prior long-term contract. (Pl. Ex. 79.)

The contention that the intervening short-term contracts were "outside the industry norm" is based upon a letter Comcast CEO Brian Roberts sent to Senator Arlen Specter. In describing Comcast's relations with RCN, he stated that RCN "has had, and continues to have, a contractual agreement to carry Comcast SportsNet on its systems in the network's greater Philadelphia service area;" that in "October 2000, *every* Comcast SportsNet affiliate was offered a six-month carriage renewal (through March 2001), after which the carriage agreement would remain in place on a continuous, month-to-month basis; while this month-to-month agreement is in place, either Comcast SportsNet **[*117]** or the affiliate has the right to terminate the agreement on 90 days' notice." (Pl. Ex. 135, Letter of April 16, 2001, p. 6 (emphasis in original).) Roberts told Specter that Comcast did this "to assure affiliates of continuous service while the company reviewed its business plan and structure" and Roberts stated that Comcast advised RCN that, on completion of that review, it would offer "*all* affiliates a standard new contract whose terms and length will be consistent with established industry practices." (Id. (emphasis in original).) The Class reads the statement that the new contract would "be consistent with industry standards" as evidence that the interceding month-to-month arrangement was outside the norm. This characterization ignores the evidence, undisputed by the Class, that the interceding arrangement was imposed on all affiliates and was instituted by Comcast "to assure affiliates of continuous service while the company reviewed its business plan and structure." (Id.)

Comcast SportsNet rates in Philadelphia are the same for everybody. And there are competitors, people who are, like Verizon who get it and pay the same rate as we do, RCN who pays the same rate as we do."); Def. Ex. 60, Deposition of Jack Williams on December 16, 2008 ("Jack Williams Dep."), 45:20-46:2; 69:12-18; Def. Ex. 55, RCN 30(b)(6) Dep. 139:6-12, 141:16-143:20.) The "short-term" agreements, which were the same for all licensees, occurred only during a one-year period when Comcast was conducting an internal review of pricing strategy. (Def. Statement of Undisputed Facts ¶ 65; Def. Ex. 60, Jack Williams Dep., p. 45:8-46:23 (stating "When RCN came on in Philadelphia, we offered a contract that would expire at the same time of all the other contracts. That contract was then extended for a year, as were all of the others.").)

Construing the evidence in the light most favorable to the Class, we find that the Class has failed to create a genuine issue of material fact that Comcast acted with predation toward RCN with regard **[*120]** to its carriage of CSN Philadelphia. While the Class contends that Comcast acted with predation toward RCN because it was overbuilding Comcast's Delaware County franchises, the Class failed to create a genuine issue of material fact that Comcast treated RCN differently from all of its other CSN Philadelphia affiliates during the relevant time frame. Comcast advised each affiliate that its contract would not be renewed on the existing terms; it offered each affiliate short term contracts extending their carriage during the period in which Comcast was reassessing its terms of carriage; and it eventually offered RCN - like every other affiliate - a long term carriage contract back dated to the end of the prior long term contract, with no interruption in service. Information provided by Comcast call center workers to prospective RCN subscribers, that RCN had access to CSN Philadelphia on a short term basis, was truthful and there is no evidence that Comcast offered dissimilar information to inquiries from non-RCN prospective subscribers. The Class offered no evidence to create a genuine issue that Comcast threatened to cancel RCN's carriage or that Comcast acted "outside the industry norm" **[*121]** in placing all of its affiliates on short term carriage contracts while it reassessed its terms of carriage. Accordingly, we find that the Class has failed to create a genuine issue of material fact that Comcast acted with predatory intent in dealing with RCN's carriage of CSN Philadelphia.

3. Targeted price discounts.

Finally, the Class asserted in the Third Amended Complaint that Comcast's policy of offering targeted price discounts to prospective RCN customers to convince them not to switch service was predatory conduct. (Compl. ¶¶ 93-94.) The summary judgment record shows that, beginning in the winter of 2000 when RCN was about to offer service in Folcroft, Delaware County, Comcast offered discounts in the form of the "Comcast Advantage Plan" or "CAP" to customers in Folcroft. CAP offered a price freeze and free premium channels for eighteen months to customers who signed a written agreement not to cancel service during that period. (Def. Statement of Undisputed Facts ¶ 77-78; Counterstatement of Facts ¶ 77.) Customers who switched to another provider or otherwise terminated the contract incurred a termination penalty ranging from $30 to $75 dollars. (Pl. Ex. 2 at COM-PA0982337; **[*122]** Pl. Ex. 81, Dep. of Laura Burke of April 25, 2008 ("L. Burke Dep.") 37:13-38:4.) Comcast did not use written contracts for customers in any other franchise area in the Philadelphia DMA at the time it offered CAP to customers in Folcroft. (Pl. Ex. 81, L. Burke Dep., 42:4-17.) The early termination penalty was also unique to CAP. (Id. at 44:13-17.) Comcast enforced the penalty, collecting the termination fee by including it as a separately itemized line on the customer's monthly cable bill. (Pl. Ex. 81, L. Burke Dep., 92:3-93:11.) Although it began offering CAP in Folcroft, Comcast adjusted and changed the program over time, extending the offer to other areas that RCN entered as an overbuilder. (Id. at 97:4-99:3.)

The purpose of CAP was to keep customers from switching cable providers. (Pl. Ex. 85, Dep. of Frank Dingianni of June 25, 2008 ("Dingianni Dep."), 19:22-24.) Specifically, Comcast

> wanted to hold RCN at bay. . . . There was a certain percentage number that they were trying to hit, that they thought that RCN wouldn't be able to survive. . . . If they held them under 30 percent . . . . The amount of subscribers that RCN could get out of the areas and then maintain profitability. **[*123]** . . . [T]here was a break point where they wouldn't be viable, RCN.

(Id. at 40:8-19, 42:22-24.) In Folcroft, an area "[s]wept by CAP reps in March/April," as of June 2000, Comcast was able to sign up 70% of its subscribers to CAP contracts; for Ridley Township, which was "[s]wept by CAP reps in

May/June," Comcast was able to sign up 77% of its subscribers to CAP contracts. (Pl. Ex. 1, "Marketing Overview".) Dr. Singer opined for the Class that

> Comcast believed that RCN's minimum viable scale was a 50 percent penetration rate. . . . Comcast documents demonstrate that Comcast's CAP program held RCN to 10 percent penetration, and that the CAP program ensured that RCN could not under any circumstances achieve a penetration rate of more than 16 percent. By holding RCN to a penetration rate below this minimum viable scale, Comcast ensured that RCN's business model was doomed to fail. Facing these "unfavorable economics," RCN would incur a loss on every subscriber it successfully wrested from Comcast. Accordingly, Comcast's exclusionary conduct significantly impaired competition from RCN.

(Singer Merits Reply Decl. ¶ 41.) According to Dr. Singer, because of the price freeze in RCN areas and **[*124]** increased prices in non-RCN areas, "Comcast customers in RCN areas received rates that were 18 to 38 percent below the rate paid by Comcast customers in non-RCN areas. The implications of this disparate pricing policy are clear - but for RCN's failure to enter the City of Philadelphia, Comcast's customers in those areas would have enjoyed significantly lower prices." (Singer Decl. ¶ 115.)

Comcast responds that CAP was a purely voluntary program, which subscribers were free to accept or reject. It notes too that the Class's own expert opined that price discounts in response to entry by a new competitor are a consumer benefit of competition. (See Williams Decl., ¶¶ 142-43, Table 6. [42]) Finally, it asserts, and the Class does not dispute, that there is no evidence that the prices charged under CAP were lower than any relevant measure of Comcast's costs. (Def. Statement of Undisputed Facts ¶ 78; Counterstatement of Facts ¶ 78.) It argues that, irrespective of the evidence marshaled by the Class that Comcast specifically targeted CAP to maintain its subscriber base against incursion by RCN, its CAP pricing cannot be deemed predatory absent evidence that Comcast offered cable services below **[*125]** cost to drive RCN out of the market.

We find that the fact that Comcast never charged below cost prices to potential RCN customers does not mandate a summary judgment finding that CAP was not exclusionary conduct. While Comcast is correct that *section 2* claims based upon predatory pricing require evidence that the defendant has cut prices below some measure of its costs in providing the product, **[*126]** see *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 222-23, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)* ("a plaintiff seeking to establish competitive injury resulting from a rival's low prices must prove that the prices complained of are below an appropriate measure of its rival's costs"), the theory upon which the Class proceeds is not that Comcast's pricing policy was predatory. The Class asserts that CAP constituted predatory conduct because it was an exclusionary practice, entered into by a monopolist, to block the entry of a new competitor.

The Class has presented evidence that CAP was an exclusivity arrangement, that its purpose was to prevent RCN from attaining market penetration by locking up customers to an incentivized long term commitment to receiving their MVPD services from Comcast, and included penalty provisions if a customer chose to switch providers. An exclusivity arrangement by monopolists can constitute an exclusionary practice. *LePage's Inc., 324 F.3d at 157* (citing *U.S. Healthcare, Inc. v. Healthsource, Inc., 986 F.2d 589, 593 (1st Cir. 1993)*. [43] An exclusionary practice is

---

[42] In the section of his report entitled "Incumbent Cable Operators Reduce Rates when Competitors Enter," Dr. Williams opines

> The evidence illustrates, through individual pricing decisions, how incumbent cable operators responded to new entrants. The econometric analyses reviewed above establish that competition lowers rates, while the evidence shown in the table illustrates how incumbent cable operators compete for subscribers using lower rates and other promotional incentives. Comcast's anticompetitive conduct, which created and increased barriers to entry, reduced the extent of that entry, which would have required Comcast to offer such lower rates and promotions.

(Williams Decl., ¶ 143.) As evidence supporting his opinion, Dr. Williams specifically cites the CAP program in Folcroft. (Id., Table 6.)

[43] In addition to relying upon the decision in LePage's, Inc., the Class cites to *Telecor Communs., Inc. v. Southwestern Bell Tel. Co., 305 F.3d 1124, 1139-40 (10th Cir. 2002)* **[*128]** to also support the proposition that conduct by a monopolist to lock up

"'a method by which a firm . . . trades a part of its monopoly profits, at least temporarily, for a larger **[*127]** market share, by making it unprofitable for other sellers to compete with it.'" *Id. at 164* (alteration in original) (quoting Richard A. Posner, ***Antitrust Law***: An Economic Perspective 28 (1976)). In discussing the antitrust impact of an exclusivity arrangement in the form of bundled rebates, the *en banc* court in LePage's, Inc. held that "[w]hen a monopolist's actions are designed to prevent one or more new or potential competitors from gaining a foothold in the market by exclusionary, i.e. predatory, conduct, its success in that goal is not only injurious to the potential competitor but also to competition in general." *Id. at 159*. Most importantly, LePages's, Inc. rejected the proposition advanced by 3M and repeated here by Comcast that "after Brooke Group, no conduct by a monopolist who sells its product above cost — no matter how exclusionary the conduct — can constitute monopolization in violation of *§ 2* of the Sherman Act." *Id. at 147*. *LePage's, Inc.* unequivocally closes the door in this Circuit on an assertion that above cost pricing safe-harbors otherwise exclusionary conduct.

While a new entrant may engage in "promotional" activity, such as offering a discount in exchange for a period of exclusivity, or offering below cost pricing in the short term in order to introduce itself or a new product to the market, "[w]hen a firm has considerable market power in the very product or service being promoted, the promotional pricing defense disappears." 3A Areeda and Hovenkamp, ***Antitrust Law***, § 746 (3d Ed. 2008); see also id. at § 1807 (discount contracts are "problematic" **[*129]** when the defendant is a dominant firm in a position to force "an all-or-nothing choice"). The Class has created a genuine issue of material fact that Comcast, a firm possessing market power, was able to lock up 70% to 77% of the potential customer base available to the new entrant. Because it possessed market power, its decision to target promotional discounts to deter a new entrant may be deemed predatory and an exercise of market power to maintain its monopoly. As Comcast makes no arguments that CAP had otherwise legitimate business justifications, we conclude that the claim must be submitted to a jury. [44]

VI. ANTITRUST [*130] INJURY

We have previously determined that proof of antitrust impact of the *section 1* and *section 2* claims must be limited to the one theory the Class successfully demonstrated could be proved by evidence common to the Class, namely, that Comcast's clustering conduct deterred the entry of overbuilders in the Philadelphia DMA. (Class Cert. Mem. at 45-47; Order of January 13, 2010 at ¶ 11.) Comcast argues that summary judgment should be entered on all claims because the Class has failed to create a trial issue on this sole remaining theory of antitrust injury. [45] Comcast

---

customers with long term contracts in anticipation of competition is exclusionary. The case is inapposite. At the referenced pin cite, the United States Court of Appeals for the Tenth Circuit, discusses whether the "state action doctrine" immunized conduct under state ***antitrust law***, declining to reach the question because "it is clear that no state policy expressly permitted Southwestern Bell to attempt to lock up customers contractually long beyond the November 1996 introduction of competition in an effort to stymie that competition." Id. The Court was clearly discussing an inapposite doctrine concerning an inapposite state law issue.

[44] We note that Comcast asks that, in the event we should only find that there is a genuine issue of fact as to whether its conduct toward RCN was predatory, we amend our class certification order to limit the Class to subscribers residing in Delaware County. (See Def. Mem. at 50-51.) Because we conclude that the Class may present to a jury its section 1 rule of reason claim that Comcast's clustering conduct unreasonably restrained trade, as well as its *section 2* monopolization claim based upon the targeted discounts in Delaware County, we find no cause to amend our order.

[45] Individual antitrust injury or antitrust impact, must be established for a plaintiff to have standing under *section 1* or **[*131]** *section 2* of the Sherman Act. *Bell v. Dow Chem. Co., 847 F.2d 1179, 1182 (5th Cir. 1988)* (holding that "Antitrust injury is a component of the standing inquiry, not a separate qualification."). This requirement is inferred from section 4 of the Clayton Act, *15 U.S.C. § 15*, which affords a remedy to any person injured in his business or property "by reason of" an antitrust violation. In *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*, the Supreme Court described antitrust injury as

> . . . injury of the type the antitrust laws were intended to prevent and that flows from that which makes the defendants' acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation. It should, in short, be "the type of loss that the claimed violations . . . would be likely to cause."

argues that (1) the Class has failed to prove the antitrust impact of clustering on RCN, and (2) Dr. Williams' theories of the general antitrust impact of clustering are purely theoretical and divorced from the factual record. It argues that some amount of empirical evidence is required to show antitrust impact; because the Class cannot present empirical evidence to support Dr. Williams' theory, the fact that the Class has successfully stated a theory should not prevent the grant of summary judgment.

Because we have found the Class has presented evidence from which a jury could find that Comcast had monopoly power derived from its creation of its cluster in the Philadelphia DMA, and acted **[*132]** with predation toward RCN in its targeted discounts to prospective RCN subscribers, it follows that the Class has met its summary judgment burden on the causation issue of antitrust impact. The Class has presented evidence from which a jury could find that Comcast's conduct did deter overbuilding, as well as evidence that RCN stopped overbuilding because of Comcast's conduct. Genuine issues of fact exist on both these issues rendering summary judgment inappropriate.

We also reject Comcast's arguments that the Class cannot show antitrust impact on a theory that clustering deters overbuilding in general. Comcast argues that the Class has failed to meet its summary judgment burden because it has not presented empirical evidence to support Dr. Williams' theory that clustering deterred overbuilding. (Def. Mem. at 57 (citing, among others, *In re Baby Food Antitrust Litig., 166 F.3d 112, 135 (3d Cir. 1999)* (holding that expert's unsupported economic theory and assumptions must be rejected where the opinion was not supported by actual record evidence); *Mass. School of Law v. Am. Bar Ass'n, 107 F.3d 1026, 1040 (3d Cir. 1997)* (holding that economic expert's report was properly disregarded where **[*133]** it was based on general and theoretical observations and was not tied to evidence in the record)). In granting class certification, we found that, although Dr. Williams' other theories of antitrust impact were not capable of proof common to the class, his clustering theory was supported by empirical evidence and was based upon the factual record. (Class Cert. Mem. 29-47.) Dr. Williams had theorized that econometric studies showed that, "all else equal, ownership of a cable system by a large MSO (typically defined as one of the ten largest MSOs) generally results in higher [cable] rates of approximately 5% to 10%." (Williams Decl. ¶ 52.) He concluded that studies showed that an MSO "can increase its profits by clustering its cable systems so that they share their boundaries with one another and share as little total boundary as possible with other cable providers serving adjacent franchise areas. Such contiguous clustering is profit-enhancing for an MSO because it reduces the likelihood or amount of overbuilding into its franchise areas." (Id. ¶ 88.) He identified several anticompetitive consequences arising from the resulting reduction in overbuilding within the MSO's franchise areas, **[*134]** and supported his theories by presenting (1) two economic models of overbuilding (Williams Decl. App'x II at 107-26; Williams Cl. Reply Decl. App'x I at 13-18.), (2) citations to reports issued by the FCC and the General Accounting Office, and (3) at least six scholarly articles. (Class Cert. Mem. 34-38.)

In accepting Dr. Williams' general theory on the anticompetitive impact of clustering, we rejected competing opinions offered by Comcast's experts and concluded that the Class "has successfully shown, through Dr. Williams' model, as well as his citations to empirical studies conducted by governmental agencies and private researchers, that the presence of an overbuilder constrains cable prices." (Class Cert. Mem. at 45-46.) We found that the Class "has also shown that Comcast engaged in conduct designed to deter the entry of overbuilders in the Philadelphia DMA, including denying RCN access to the services of cable installation contractors." (Id. at 46.) While that last portion of our decision has now been shown to be unsupported by the summary judgment record, the Class has presented the governmental and scholarly research supporting the general antitrust impact theory that clustering **[*135]** deters overbuilding, as well as evidence that the CAP discounts were predatory. Accordingly, we find that the Class has met its summary judgment burden of presenting evidence sufficient to create a genuine fact issue on the antitrust impact theory that clustering deters overbuilding.

VII. CONCLUSION

Id. (citing *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 125, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969))*; see also *Atl. Richfield, 495 U.S. at 342-44*.

We find that the Class can proceed to trial on Count I of the Third Amended Complaint, the Sherman Act section 1 rule of reason claim, based upon the theory that Comcast's creation of the Philadelphia cluster through its acquisition of competing cable companies and its swapping of cable assets constituted a horizontal allocation of markets. However, *per se* treatment of the section 1 claim is rejected because Comcast has succeeded in showing that the clustering of its cable assets created pro-competitive economic efficiencies and allowed it to offer new products and services to consumers. The portions of Count II, asserting a *section 2* monopolization claim, and Count III, asserting an attempted monopolization claim, which contend that Comcast acted with predation in creating its anti-RCN targeted discounts, may also proceed to trial. We grant summary judgment to Comcast on those portions of **[*136]** Counts II and III contending that (1) Comcast's clustering conduct, (2) its conduct blocking RCN's access to cable infrastructure installation contractors, and (3) its conduct in licensing CSN Philadelphia to RCN, constituted acts of monopolization or attempted monopolization.

An appropriate order will be entered.

BY THE COURT:

/s/ John R. Padova

John R. Padova, J.

ORDER

AND NOW, this 12th day of April 2012, upon consideration of Defendants' Motion for Summary Judgment (Docket Entry 441), all responses and documents filed in connection thereto, oral argument heard by the Court on January 24, 2012, and for the reasons stated in the accompanying Memorandum, **IT IS HEREBY ORDERED** that the Motion is **GRANTED IN PART AND DENIED IN PART** as follows:

1. Defendants' Motion is **GRANTED** insofar as it seeks judgment in Defendants' favor on

   a. Count I of Plaintiffs' Third Amended Complaint, to the extent that it asserts a Sherman Act *section 1* *per se* liability claim;

   b. those portions of Counts II and III of Plaintiffs' Third Amended Complaint asserting that Comcast's (1) clustering conduct, (2) its conduct blocking RCN's access to cable infrastructure installation contractors, and (3) its conduct in licensing **[*137]** CSN Philadelphia to RCN, constituted acts of monopolization or attempted monopolization under Sherman Act *section 2*.

   JUDGMENT IS ENTERED in favor of Defendants and against Plaintiffs on these claims.

2. The Motion is **DENIED** insofar as it seeks judgment in Defendants' favor on

   a. Count I of Plaintiffs' Third Amended Complaint, to the extent that it asserts a Sherman Act section 1rule of reason claim;

   b. those portions of Counts II and III of Plaintiffs' Third Amended Complaint asserting that Comcast's targeted discounts constituted acts of monopolization or attempted monopolization under Sherman Act *section 2*.

Opinion

ORDER

THIS CAUSE comes for consideration on Defendant Cessna **[*2]** Aircraft Company's ("Cessna") Motion to Dismiss (Doc. 8) to which Plaintiffs WM Aviation, LLC and Tricor International Corporation (collectively "Plaintiffs") responded in opposition (Doc. 10). For the following reasons, Cessna's motion is granted in part and denied in part.

I. BACKGROUND

This dispute began after Plaintiffs' Cessna Citation X jet skidded off the runway at John F. Kennedy International Airport on April 3, 2008. (Doc. 1 at 3.) On February 19, 2004, Plaintiffs entered into a contract to purchase the aircraft. (Id. at 2.) On February 2, 2008, Plaintiffs brought the aircraft to Cessna's Citation Service Center in Orlando, Florida to resolve a "hydraulic leak at the left engine pylon." (Id. at 3.) Cessna's mechanics recommended that the hydraulic reservoir be replaced at the aircraft's next service. (Id.) On April 2, 2008, Cessna's mechanics replaced the aircraft's hydraulic reservoir and approved the aircraft for a return to service. (Id.) Plaintiffs allege that Cessna did not inform Plaintiffs that the replacement hydraulic reservoir had been refurbished after being taken out of another aircraft due to a broken fluid level indicator. (Id.) The following day, Plaintiffs' crew attempted to **[*3]** return the aircraft from the Citation Service Center to John F. Kennedy International Airport in New York. (Id.) During the flight, the newly-serviced hydraulic system malfunctioned, causing the aircraft's primary brake system to fail. (Id.) After the aircraft's emergency brake system also failed, the aircraft skidded off the runway, causing extensive damage to its fuselage, left wing, left main landing gear, and other, unspecified components. (Id.)

Plaintiffs allege that they learned a number of facts after the damage to the aircraft occurred. First, Plaintiffs learned that Cessna did not have a method of testing the emergency brakes on Citation series jets. (Id.) Second, Plaintiffs learned that only Cessna is able to repair the sort of damage Plaintiffs' aircraft sustained because Cessna "refuses to share its proprietary data with third-parties." (Id.) Finally, Plaintiffs learned that Cessna "is the only entity that can certify that repairs to a Citation X jet are sufficient to return a repaired aircraft to service." (Id. at 4.)

Plaintiffs allowed Cessna to inspect the aircraft and develop an estimate for repairs, and Cessna developed four repair scenarios and, ultimately, two estimates. (**[*4]** Id.) However, Plaintiffs did not agree with Cessna's proposed repairs, and the aircraft has remained out of service since April 3, 2008. (Id.) Plaintiffs insurers refused to pay for repairs in excess of the amount suggested by Cessna in its estimates, and Plaintiffs sued their insurers to recover the amount of the limit on their policy. (Id.) Plaintiffs settled the case against their insurers who assigned to Plaintiffs the insurer's subrogation rights under the policy. (Id.)

In addition to repair costs, Plaintiffs allege consequential damages for hangar rental fees, insurance premiums paid on the aircraft since the date it was damaged, financing costs, loss in value of the aircraft, business interruption, and the cost of chartering a replacement aircraft since April 3, 2008. (Id. at 5.) Plaintiffs brought this Complaint against Cessna alleging: (1) negligence, (2) products liability, (3) negligent misrepresentation, (4) violation of the Clayton Act, (5) violation of the Florida Deceptive and Unfair Trade Practices Act, and (6) alternative violations of Florida antitrust laws. Cessna now moves to dismiss all counts of Plaintiffs' Complaint.

II. LEGAL STANDARD

Every complaint must contain "a short **[*5]** and plain statement of the claim showing that the pleader is entitled to relief." *Fed. R. Civ. P. 8(a)(2)*. A complaint may be dismissed for failure to state a claim upon which relief can be granted. *Fed. R. Civ. P. 12(b)(6)*. In reviewing a 12(b)(6) motion to dismiss, a court must accept the factual allegations in the complaint as true and consider them in the light most favorable to the plaintiff. *Erickson v. Pardus, 551 U.S. 89, 93-94, 127 S. Ct. 2197, 167 L. Ed. 2d 1081 (2007)*. To survive a motion to dismiss, a plaintiff's complaint must include "enough facts to state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. This plausibility standard requires a two-step inquiry: first, a court must identify only those pleadings that go beyond conclusory allegations—such pleadings are entitled to an assumption of truth; second, a court must determine if, assuming the veracity of those pleadings, they plausibly state a claim for relief. *Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937, 1950, 173 L. Ed. 2d 868 (2009)*.

III. ANALYSIS

As an initial matter, a district court sitting in diversity applies the substantive law of the state in which it sits. See *Erie R.R. Co. v. Tompkins, 304 U.S. 64, 78, 58 S. Ct. 817, 82 L. Ed. 1188 (1938)*; *Flintkote Co. v. Dravo Corp., 678 F.2d 942, 945 (11th Cir. 1982)*. Therefore, Florida's substantive law applies to Plaintiffs' state-law claims. "In determining the law of the state, federal courts must follow the decisions of the state's highest court, and in the absence of such decisions on an issue, must **[*6]** adhere to the decisions of the state's intermediate appellate courts unless there is some persuasive indication that the state's highest court would decide the issue otherwise." *Flintkote, 678 F.2d at*

945. However, "where no state court has decided the point in issue may a federal court make an educated guess as to how that state's supreme court would rule." Benante v. Allstate Ins. Co., 477 F.2d 553, 554 (5th Cir. 1973).[1]

A. Tort Claims

Cessna argues that Count I (negligence), Count II (products liability), and Count III (negligent misrepresentation) should be dismissed because each claim is barred by Florida's economic loss rule. The economic loss rule is a judicially created doctrine under which a tort action is prohibited if the parties are in privity of contract and the only damages suffered are economic losses. Indem. Ins. Co. of N. Am. v. Am. Aviation, Inc., 891 So. 2d 532, 536 (Fla. 2004). "The prohibition against tort actions to recover solely economic damages for those in contractual privity is designed to prevent parties to a contract from circumventing the allocation of losses set forth in the contract by bringing an action for economic loss in tort." Id. "[W]hen the parties are in privity, contract principles are generally more appropriate for determining remedies for consequential damages that the parties have, or could have, addressed **[*7]** through their contractual agreement." Id. at 536-37.

The economic loss rule also extends to bar tort claims for economic losses where "a defect in a product . . . causes damage to the product but causes no personal injury or damage to other property." Id. at 536. In this regard, the economic loss rule applies even where the parties are not in privity of contract. Id. at 541.

1. Negligence Claim

In Count I, Plaintiffs allege that, during the services that began on February 2, 2008, Cessna negligently conducted repairs and maintenance on Plaintiffs' Citation X jet, causing the aircraft to slide off of the runway during landing and sustain damage shortly after Cessna completed its services and returned the aircraft to Plaintiffs. (See Doc. 1 at 5-6.) Plaintiffs claim to have suffered damages to the aircraft and consequential damages, namely hangar rental fees, insurance premiums on the unrepaired jet, financing costs, loss in value of the jet, business interruption, and the cost of chartering a replacement aircraft since the date of the incident. (Id. at 6.) Plaintiffs do not allege damage to any property other than their Citation X jet, nor do they allege any personal injury. As discussed above, Plaintiffs and Cessna were in contractual **[*8]** privity with respect to the maintenance and repair services. Therefore, Plaintiffs' negligence claim is squarely within the ambit of Florida's economic loss rule. See Cessna Aircraft Co. v. Avior Technologies, Inc., 990 So. 2d 532, 537 (Fla. 3d DCA 2008) (holding that the economic loss rule barred the plaintiffs claim that the defendant negligently failed to repair plaintiff's jet because the parties were in contractual privity as to service to be performed on the plaintiff's aircraft). Accordingly, Count I must be dismissed.

2. Products Liability Claim

In Count II, Plaintiffs allege that Cessna sold the aircraft to Plaintiffs in a defective and unreasonably dangerous condition because the aircraft's emergency brake system was defective and Cessna does not have any procedure to test the emergency brake system. (Doc. 1 at 6-7.) Because plaintiffs allege that this defect caused damage to the aircraft itself with no accompanying personal injury or damage to other property,[2] this claim is barred by Florida's economic loss rule. Accordingly, Count II must be dismissed.

---

[1] The Eleventh Circuit adopted as binding precedent decisions of the Fifth Circuit rendered prior to October 1, 1981. Bonner v. City of Prichard, 661 F.2d 1206, 1209 (11th Cir. 1981)*(en banc)*.

[2] Despite Plaintiffs' somewhat convoluted argument, the "other property" exception to the economic loss rule plays no part in Plaintiffs' product liability claim. Based on Plaintiffs' complaint, the aircraft was sold, as a single "integrated package," with the allegedly defective emergency brake system. See East River S.S. Corp. v. Transamerica Delaval, Inc., 476 U.S. 858, 867, 106 S. Ct. 2295, 90 L. Ed. 2d 865 (1986). Therefore, the aircraft should be considered a single product with respect to the economic loss rule. See id.; Turbomeca, S.A. v. French Aircraft Agency, 913 So. 2d 714, 717 (Fla. 3d DCA 2005) (citing Casa Clara Condo. Ass'n v. Charley Toppino & Sons, Inc., 620 So. 2d 1244 (Fla. 1993)) ("Courts have refused to bifurcate products into parts where a component part harms or destroys the finished product.); Jarmco, Inc. v. Polyguard. Inc.. 668 So. 2d 300, 303 (Fla. 4th DCA 1996), *approved*, ***Polyguard, Inc. v. Jarmco, Inc., 684 So. 2d 732 (Fla. 1996)*** ("[T]he 'other' property exception

3. Negligent Misrepresentation Claim

In Count III, Plaintiffs allege that Cessna "falsely represented to the Plaintiffs that [Cessna] properly performed the maintenance on the [a]ircraft's hydraulic **[*9]** system and that it was safe for return to service." (Doc. 1 at 7.) Plaintiffs contend that this claim is not barred by Florida's economic loss rule because an exception to the rule exists for negligent misrepresentation. However, the negligent misrepresentation exception is more nuanced than Plaintiffs suggest. See *Vesta Const. & Design. LLC v. Lotspeich & Assocs, Inc., 974 So. 2d 1176, 1181 (Fla. 5th DCA 2008)*. Negligent misrepresentations that induce a party to enter a contract-that is, a misrepresentation independent of the breach of contract-are not barred by the economic loss rule. *Hotels of Key Largo v. RHI Hotels, Inc., 694 So. 2d 74, 76 (Fla. 3d DCA 1997)*. However, "[m]isrepresentations relating to the breaching party's performance of a contract do not give rise to an independent cause of action in tort, because such misrepresentations are interwoven and indistinct from the heart of the contractual agreement." *Id. at 78*; see also *Vesta Const. & Design, 974 So. 2d at 1182*. Therefore, the economic loss rule bars a negligent misrepresentation claim where the alleged misrepresentation "is inseparable from the essence of the parties' agreement . . . ." *Hotels of Key Largo, 694 So. 2d at 78*.

Specifically, Plaintiffs allege that Cessna negligently misrepresented that it properly performed repairs on Plaintiff's aircraft. (Doc. 1 at 7-8.) Also, Plaintiffs allege that Cessna did not inform Plaintiffs that Cessna replaced the aircraft's hydraulic **[*10]** reservoir with a refurbished reservoir that was removed from another aircraft for failure to correctly indicate its hydraulic fluid level. (Id.) Finally, Plaintiffs allege that Cessna failed to tell Plaintiffs that the aircraft's hydraulic systems had not been "cold tested." (Id.) Each of these alleged misrepresentations relates to Cessna's performance of the contract for service and repair of Plaintiffs' aircraft and is "interwoven and indistinct from the heart of the contractual agreement." *Hotels of Key Largo, 694 So. 2d at 78*. Therefore, Plaintiffs' negligent misrepresentation claim is also barred by Florida's economic loss rule, and Count III must be dismissed.

B. Violation of the Clayton Act

In Count IV, Plaintiffs allege that Cessna violated *Section 3* of the Clayton Act, *15 U.S.C. § 14*, by tying the sale of its Citation X jet to maintenance and repair services for the aircraft. (See Doc. 1 at 9.) *Section 3* of the Clayton Act provides, in relevant part:

> It shall be unlawful for any person engaged in commerce, in the course of such commerce, to lease or make a sale or contract for sale of *goods, wares, merchandise, machinery, supplies, or other commodities* ... on the condition, agreement, or understanding that the lessee or purchaser thereof shall **[*11]** not use or deal in the *goods, wares, merchandise, machinery, supplies, or other commodities* of a competitor or competitors of the lessor or seller, where the effect of such lease, sale, or contract for sale or such condition, agreement, or understanding may be to substantially lessen competition or tend to create a monopoly in any line of commerce.

15 U.S.C. § 14 (emphasis added). The plain language of *Section 3* strongly implies that it applies only where both the tying product and tied product are tangible goods. It does not apply to contracts for service. *Hodge v. Vill. of Homestead Homeowners Ass'n, 726 F. Supp. 297, 297 (S.D. Fla. 1989)* (citing *Chelson v. Oregonian Publ'n Co., 715 F.2d 1368, 1372 (9th Cir. 1983)* and *Crossland v. Canteen Corp., 711 F.2d 714, 718 n.1 (5th Cir. 1983))*. Even the incidental purchase of goods does not bring "an essentially service-oriented contract" within Section 3's prohibition. *Id. at 298* (citing *Satellite Television v. Cont'l Cablevision, 714 F.2d 351, 358 (4th Cir. 1983)* and *Hudson Valley Asbestos Corp. v. Tougher H. & P. Co., 510 F.2d 1140, 1145 (2d Cir. 1975))*. Because Plaintiffs fail to allege that Cessna unlawfully tied two tangible goods, they fail to state a claim for violation of the Clayton Act. Accordingly, Count IV must be dismissed.

---

to the [economic loss rule] must be limited to property that is unrelated and unconnected to the product sold and there is no privity between the owner of the property damaged and the distribution chain for the product causing the damage.").

C. Violations of Florida Antitrust Laws

In Count VI, Plaintiffs allege that Cessna violated *section 542.18, Florida Statues*, or, in the alternative, *section 542.19*, *Florida Statutes. Section 542.32*, Florida Statutes, states that in construing Florida's antitrust laws, "due consideration and great weight be given to the interpretations of the federal courts relating to comparable federal antitrust statutes." **[*12]** *Sections 542.18* and *542.19* are "substantially identical" to their federal "counterparts," *sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1-2*, respectively. *St. Petersburg Yacht Charters v. Morgan Yacht, 457 So. 2d 1028, 1032 (Fla. 2d DCA 1984)*. Florida courts analyze allege violations of *sections 542.18* and *542.19* according to "the body of ***antitrust law*** developed by the federal courts under the Sherman Act." Id.

1. Conspiracy to Monopolize

Section 542.18, Florida Statutes, states: "Every contract, combination, or conspiracy in restraint of trade or commerce in this state is unlawful." Plaintiffs allege that Cessna violated *section 542.18* by failing to disclose to Citation X jet purchasers that: (1) Cessna acts as the sole investigating agent at crash sites; (2) Cessna does not disclose its proprietary data regarding the Citation X's fuselage to third parties; (3) no other entity can repair the Citation X's fuselage without Cessna's proprietary data; (4) Cessna is "the only entity with authority to determine the airworthiness of an aircraft" after repair. (Doc. 1 at 12.)

Plaintiffs fail to state a claim for conspiracy because *section 542.18*, like *§ 1* of the Sherman Act, does not reach unilateral conduct—only "unreasonable restraints of trade effected by a 'contract, combination ... or conspiracy' between *separate* entities.'" *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 768, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)* (quoting *Albrecht v. Herald Co., 390 U.S. 145, 149, 88 S. Ct. 869, 19 L. Ed. 2d 998 (1968))*; see also *Monsanto v. Spray-Rite Serv. Corp., 465 U.S. 752, 760, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)*; *Spanish Broad. Svs. of Florida v. Clear Channel Commc'ns. Inc., 376 F.3d 1065, 1071 (11th Cir. 2004)* (citing *Fisher v. City of Berkeley, 475 U.S. 260, 266, 106 S. Ct. 1045, 89 L. Ed. 2d 206 (1986)* ("Section One applies only to agreements **[*13]** between two or more businesses; it does not cover unilateral conduct.") "In any conspiracy, two or more entities that previously pursued their own interests separately are combining to act as one for their common benefit." Copperweld Corp., 467 U.S. at 769. Because Plaintiffs fail to allege that Cessna contracted, combined, or conspired with any other entity to unreasonably restrain trade or commerce, their *section 542.18* claim must be dismissed.

2. Attempt to Monopolize

Section 542.19, Florida Statutes, states: "It is unlawful for any person to monopolize, attempt to monopolize, or combine or conspire with any other person or persons to monopolize any part of trade or commerce in this state." Plaintiffs allege that Cessna attempted to monopolize the repair, service and maintenance market for Citation X jets, thereby violating *section 542.19*, by refusing to share its proprietary data with third parties, "ensuring that purchasers of Citation X jets must use Cessna to repair, service, and maintain" those jets. (Doc. 1 at 12.) An attempted monopolization claim has three elements: "(1) the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power." *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)*.

"*Rule 12(b)(6)* dismissals are **[*14]** particularly disfavored in fact-intensive antitrust cases." *Spanish Broadcasting System, 376 F.3d at 1070* (citing *Quality Foods de Centro America, S.A. v. Latin American Agribusiness Dev. Corp., S.A., 711 F.2d 989, 994-95 (11th Cir. 1983))*. This is because an attempted monopolization claim requires "harm to competition that must occur within a 'relevant' . . . market, with a specific set of geographical boundaries and a narrow delineation of the products at issue." *Id. at 1074*. Additionally, "the alleged monopolist must possess enough power or potential power in this 'relevant market' in order to harm competition." Id. (citing *Morris Communication Corp. v. PGA Tour, Inc., 364 F.3d 1288, 1293-94 (11th Cir. 2004))*. Harm to competition is "critical" to an attempted monopolization claim—"conduct that injures individual firms rather than competition in the market as a whole does not violate *[section 542.19*]." *Id. at 1075*.

Under a notice pleading standard, Plaintiffs sufficiently allege facts to support their claim that Cessna violated *section 542.19* by attempting to monopolize the market for repair, service, and maintenance of Citation X jets. Further, Plaintiffs sufficiently allege that competition in general was harmed by Cessna's conduct in that it "forecloses a substantial volume of commerce" in Florida by precluding any third-party from offering repair services on Cessna's Citation X jets. Therefore, Count VI will not be dismissed to the extent it alleges violation of *section 542.19, Florida Statutes.*

D. Violation of ***[*15]*** *the Florida Deceptive and Unfair Trade Practices Act*

FDUTPA provides that an individual may initiate a civil action against a party who has engaged in "[u]nfair methods of competition, unconscionable acts or practices, and unfair or deceptive acts or practices in the conduct of any trade or commerce." *Fla. Stat. § 501.204(1)*. To state a claim under FDUTPA, a plaintiff must allege: (1) a deceptive or unfair practice; (2) causation; and (3) actual damages. *Rollins. Inc. v. Butland, 951 So. 2d 860, 869 (Fla. 2d DCA 2006)*. For FDUTPA purposes, "deception occurs if there is a representation, omission, or practice that is likely to mislead the consumer acting reasonably in the circumstances, to the consumer's detriment." *PNR, Inc. v. Beacon Prop. Mgmt., Inc., 842 So. 2d 773, 777 (Fla. 2003)* (internal quotation marks and citations omitted). Further, "[a]n unfair practice is one that offends established public policy and one that is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers." Id. (quoting *Samuels v. King Motor Co. of Ft. Lauderdale, 782 So. 2d 489, 499 (Fla. 4th DCA 2001))* (internal quotation marks omitted). However, FDUTPA "only reaches conduct that is unfair or deceptive as judged by controlling case law." *Id. at 777 n.2*.

Plaintiffs base their FDUTPA claim on Cessna's non-disclosure of two facts prior to the sale of the Citation X jet between Plaintiffs and Cessna: (1) "that Cessna is the only entity **[*16]** that could certify that any repairs were sufficient to return the [a]ircraft to service because [Cessna] will not share its proprietary engineering data with third-parties[,]" thereby making Cessna the only entity capable of repairing a Citation X jet, and (2) that Cessna "is the only federally-certified investigator of any crash sites involving [a Citation X jet]." (Doc. 1 at 10-11.) However, Plaintiffs fail to cite any legal authority in their response to Cessna's motion to dismiss to support the proposition that these omissions are unfair or deceptive as judged by controlling Florida case law. Additionally, the Court cannot locate any authority from a Florida court that supports the position that a manufacturer-seller's failure to disclose to a purchaser, prior to sale, that it does not disclose its proprietary engineering data to third parties and that the manufacturer-seller is the only federally-certified investigator of sites of incidents involving the product sold is an unfair or deceptive practice. Because this sort of conduct has not been held to be unfair or deceptive by controlling Florida case law, Plaintiffs fail to state a cause of action under FDUTPA. Therefore, Plaintiffs **[*17]** FDUTPA claim (Count V) must be dismissed.

E. Leave to Amend

Plaintiffs request leave to amend their products liability claim contained in Count II to a claim for gross negligence. After a responsive pleading has been filed, a litigant must obtain leave to amend the complaint, and "the Court should freely give leave when justice so requires." *Fed. R. Civ. P. 15(a)(2)*. However, a court may deny leave to amend the complaint because of "undue delay, bad faith or dilatory motive on the part of the movant, repeated failure to cure deficiencies by amendments previously allowed, undue prejudice to the opposing party by virtue of allowance of the amendment, [or] futility of amendment . . . ." *Forman v. Davis, 371 U.S. 178, 182 (1962)*. As discussed above, Florida's economic loss rule bars all tort claims if the parties are in privity of contract and the only damages suffered are economic losses. *Indem. Ins. Co. of N. Am., 891 So. 2d at 536*. Plaintiffs' prospective gross negligence claim would also be barred by Florida's economic loss rule. Therefore, leave to amend, as requested, would be futile. Accordingly, Plaintiffs' request for leave to amend their complaint is denied.

IV. CONCLUSION

For the foregoing reasons, Cessna's Motion to Dismiss (Doc. 8) is **GRANTED in part and DENIED in part**. Counts I, II, **[*18]** III, IV, and V are **DISMISSED without prejudice**. Count VI is **DISMISSED without prejudice** to the extent Plaintiffs allege violation of *section 542.18, Florida Statutes.* Plaintiffs' request for leave to amend their complaint is **DENIED**.

DONE and **ORDERED** in Orlando, Florida on this 13 day of April, 2012.

Opinion

[*892] OPINION OF THE COURT

HARDIMAN, *Circuit Judge.*

Almost ten years ago, George Bocobo, M.D., brought a congeries of claims **[**2]** **[*893]** against a hospital, its director of radiology, and two radiology physician groups after they denied him participation in an exclusive contract. He appeals the District Court's summary judgment for Defendants on several of those claims. For the reasons explained below, we will affirm.

I

Dr. Bocobo began performing diagnostic radiology services at South Jersey Health System's (SJHS's) Millvale and Bridgeton divisions in 1985. According to Bocobo, he began "complaining" almost immediately about inadequacies in SJHS's policies and practices. In 1993, Bocobo entered into a Business Relationship Agreement and a Shareholder Agreement with Dr. Paul Chase, who then was SJHS's Radiology Department Director, and Drs. Steven Rothfarb and Craig Taylor to form Radiology Consultants of South Jersey, P.A. (RCSJ). Pursuant to an exclusive contract (Exclusive Contract I), RCSJ served as the sole provider of radiology services for SJHS's Millvale and Bridgeton hospitals from 1993 until 2001. Exclusive Contract I provided:

> Should [RCSJ] terminate its relationship with one or more of [its] Physicians, the status of such . . . Physicians, as members of [SJHS's] Medical Staff, and all accompanying privileges, **[**3]** shall terminate automatically and immediately, and such termination shall not be subject to a due process hearing or review by [SJHS's] Medical Staff or Board of Directors.

Bocobo's employment as a radiologist in the RCSJ group was governed by a separate contract (the Employment Contract), which took effect on October 1, 1993, and was set to terminate on September 30, 1995, if either RCSJ or Bocobo gave ninety days' notice. Paragraph two of the Employment Contract further provided:

> In the absence of [such] notice, this Employment Contract shall continue in force with the right of either party to terminate with ninety (90) days' written notice. Notwithstanding the above, this Agreement shall <u>immediately</u> terminate and [Dr. Bocobo] shall cease to be an Employee of [RCSJ] upon the occurrence of any of the following events: . . . (f) upon the dissolution of [RCSJ]; [or] (g) for cause . . . .
> In the event of termination pursuant to the above, [Dr. Bocobo] agrees to resign from the Medical Staff of Bridgeton and Millvale Hospitals without the right to due process . . . , such resignation to be effective on the date of termination as set forth above.

During his nearly eight-year employment with **[**4]** RCSJ performing radiology at SJHS hospitals, Bocobo was the subject of several complaints. According to SJHS's files and deposition testimony, Bocobo harassed technologists and secretaries, wasted time, behaved hostilely towards coworkers, demanded personal medical treatment in his office, and boasted about his romantic prowess with female staff. In a certification filed with the District Court, Bocobo challenged the written reports as false and misleading "one-sided anecdotal memos" that should not have been secretly kept by SJHS. [1]

Apart from the disputed complaints in SJHS's files, Chase testified that Bocobo sometimes did not respond to emergency calls. SJHS staff claim that he was routinely inaccessible. Others insist they preferred not to work with

---

[1] Because Bocobo disputes the veracity of the reports maintained by SJHS in a "secret personal file," we will not consider that evidence at the summary judgment stage.

Bocobo because he made work less efficient and more difficult. Various hospital staff called Bocobo "self-centered," "standoffish," "perseverative, **[*894]** argumentative and unreasonable." On one occasion, a referring physician was so disappointed with Bocobo's handling of his **[**5]** patient that he "request[ed] that Dr. Bocobo not look at any of [his] patients or read any of the films from [his] patients." Bocobo claims that SJHS and Chase ultimately grew dissatisfied with him not based on his purported misconduct, but rather due to his "vocal patient advoca[cy]" regarding legitimate concerns about hospital policies and practices.

Around December 1998, in anticipation of its construction of a regional medical center, SJHS began entertaining plans to select one radiology group to service its three area hospitals: Bridgeton and Millvale, for which RCSJ then served as the exclusive radiology group, and Newcomb, for which Vineland Radiology Association (Vineland) provided exclusive radiology services at the time. An update to Exclusive Contract I between RCSJ and SJHS provided that the contract would end in January 2000 and could be terminated with notice any time after January 1999. Accordingly, beginning in January 2001, SJHS's exclusive contract with RCSJ proceeded on a month-to-month basis. In soliciting proposals for a new exclusive radiology provider, SJHS recommended that Chase and Dr. Ernesto Go, the head of Vineland, jointly bid for the contract. SJHS's President **[**6]** and CEO believed the radiology departments would be less disrupted in the transition to a single site if the existing radiology chiefs collaborated. Chase and Go made a presentation to SJHS on behalf of a planned consolidated group to be called Alliance Radiology. A different group, Booth Radiology, won the exclusive contract, but when Booth unexpectedly declined the contract, SJHS offered it to Alliance. Alliance was officially formed in March 2001, and it contracted with SJHS to become the exclusive provider of radiology services at all three of SJHS's hospitals in Cumberland County (Exclusive Contract II).

Bocobo was excluded from the new group. On April 12, 2001, RCSJ's legal counsel gave Bocobo ninety days' notice that he was being terminated pursuant to paragraph two of the Employment Contract. According to Chase, Bocobo was not invited to join Alliance because he was "cantankerous [and] . . . uncooperative . . . [and] wouldn't conform to decisions . . . made [by] the group." Rothfarb and Taylor likewise testified that Bocobo was excluded because his colleagues at RCSJ "did not wish to associate with him further" and because "he was disruptive, he was not a team player, [and] **[**7]** he had difficult relations with referring physicians, and [did not] accomodat[e] the referring physicians' requests."

At his deposition, Bocobo offered "no opinion as to why" RCSJ terminated him. Nevertheless, he now claims that SJHS played a substantial role in his exclusion from Alliance. Bocobo asserts that Chase's decisions for RCSJ were motivated primarily by his concern for maintaining RCSJ's exclusive contract with SJHS. Bocobo points to testimony by SJHS's Vice President of Medical Affairs, Dr. Joseph Zeccardi, indicating that Zeccardi mentioned to Chase a situation in which Zeccardi previously "had a similar responsibility of dissolving one group and forming another and hav[ing] a member of [the] group that [he] did not . . . want[] to hire." Bocobo claims further that because not inviting him to the Alliance group left only five radiologists, one short of the minimum acceptable number under Exclusive Contract II, Chase obtained SJHS's consent before excluding Bocobo. In support of this claim, Bocobo cites testimony indicating that Chase "spoke to administration" before Alliance was created and that "administration supported Dr. Chase['s **[*895]**] . . . actions and decisions." Bocobo **[**8]** argues that "SJHS authorized Chase to terminate [his] employment and his medical staff privileges, so that SJHS, as a 50% shareholder in RCSJ's outpatient radiology business, could reap [his] interests in RCSJ." To the contrary, both RCSJ's legal counsel and SJHS's President and CEO, who recommended the merger of RCSJ and Vineland, claim they had "no discussion . . . whatsoever" regarding what might happen to Bocobo when Alliance was formed.

Within two weeks of his termination, Bocobo was hired as a radiologist by a University of Pennsylvania hospital that is closer to his Villanova home than to SJHS's Millvale or Bridgeton locations. His starting annual salary ($190,000) was $20,000 less than his salary with RCSJ.

On April 12, 2002, Bocobo filed a twelve-count complaint against RCSJ, Alliance, Chase, and SJHS (collectively, Defendants). [2] In Counts 1 and 2, Bocobo alleged that Defendants violated the Sherman Act, *15 U.S.C. §§ 1* and *2*, and the New Jersey Antitrust Act (NJAA), *N.J. Stat. Ann. § 56:9-1 to -19*. Count 3 alleged that RCSJ, Alliance, and Chase terminated Bocobo's employment in violation of New Jersey's whistleblower statute, the New Jersey Conscientious Employee Protection **[**9]** Act (CEPA), *N.J. Stat. Ann. § 34:19-1 to -14*. Count 4 asserted that SJHS revoked Bocobo's hospital privileges contrary to public policy. Count 5 pleaded that RCSJ, Alliance, and Chase breached their fiduciary duties to Bocobo, and it was later amended to assert a civil conspiracy claim alleging that SJHS assisted and encouraged that breach. Count 6 claimed Defendants breached Bocobo's Employment Contract. [3] Count 8 asserted that Defendants defamed Bocobo and committed trade libel against him. Finally, Count 10 alleged that Defendants tortiously interfered with Bocobo's prospective economic advantages.

On February 25, 2004, the District Court granted Defendants' motion for partial summary judgment and dismissed Bocobo's federal and state antitrust claims (Counts 1 and 2). On November 22, 2005, the Court granted complete summary judgment for SJHS on all remaining claims against it (Counts 4, 5, 6, 8, and 10) and for RCSJ, Alliance, and Chase on Counts 3, 8, and 10. On Counts 5 and 6, the District Court granted RCSJ, Alliance, and Chase only partial summary judgment, dismissing those claims only insofar as they were grounded in Bocobo's loss of medical staff privileges at SJHS. Bocobo then proceeded to a jury trial against RCSJ, Alliance, and Chase on his shareholder-based claims and an alleged breach of a Deferred Compensation Agreement with RCSJ. The jury found in Bocobo's favor and awarded him $300,000. The District Court has resolved all post-judgment motions, and Bocobo's timely appeal of the summary judgment orders is now properly before us. [4]

[*896] II

We exercise plenary review over the District Court's orders. *Groman v. Twp. of Manalapan, 47 F.3d 628, 633 (3d Cir. 1995)*. Summary judgment is appropriate only where, viewing the facts "in the light most favorable to the nonmoving party," *Scott v. Harris, 550 U.S. 372, 380, 127 S. Ct. 1769, 167 L. Ed. 2d 686 (2007)*, there is "no genuine dispute as to any material fact," such that he is "entitled to judgment as a matter of law," *Fed. R. Civ. P. 56(a)*. Ultimately, "[w]here the record taken as a whole could not lead a rational trier of fact to find for the non-moving party, there is no genuine issue for trial." *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 587, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)* (citation and internal quotation marks omitted).

A

We begin with Bocobo's antitrust claims under sections one and two of the Sherman Act and the NJAA. [5] With respect to Sherman Act *§ 1*, which prohibits contracts, combinations, and conspiracies that impose unreasonable

---

[2] Bocobo's brief does not assert error in the resolution of Counts 7, 9, 11, and 12, or in Counts 13, 14, and 15, which were added in an amended complaint. Additionally, it offers no argument regarding his defamation claim under Count 8. Therefore, he has waived any arguments regarding the resolution of Counts 7, 8 (as to defamation only), 9, and 11 through 15. *See* *United States v. Pelullo, 399 F.3d 197, 222 (3d Cir. 2005)*.

[3] Although it is unclear from Bocobo's complaint whether he intended to include SJHS as a defendant in Count 6, the District Court found the conduct charged in Count 6 **[**10]** "factually interrelated" to other counts in which SJHS was a named defendant and treated SJHS as a Count 6 defendant. We do the same.

[4] The District Court had jurisdiction pursuant to *15 U.S.C. §§ 1*, *2*, and *15*, and *28 U.S.C. §§ 1331* and *1332*. **[**11]** We have jurisdiction under *28 U.S.C. § 1291*.

[5] Substantively, the NJAA is "virtually identical" to the Sherman Act, and the New Jersey legislature "intended the [NJAA] as consistent with federal ***antitrust law***, and expressly provided that it 'be construed in harmony with ruling judicial interpretations of comparable Federal antitrust statutes and to effectuate, insofar as practicable, a uniformity in the laws.'" *Ideal Dairy Farms, Inc. v. Farmland Dairy Farms, Inc., 282 N.J. Super. 140, 659 A.2d 904, 920 (N.J. Super. Ct. 1995)* (quoting *N.J. Stat. Ann. §*

restraints on trade, *15 U.S.C. § 1*; *W. Penn Allegheny Health Sys., Inc. v. UPMC, 627 F.3d 85, 99 (3d Cir. 2010)* (citing *Standard Oil Co. v. United States, 221 U.S. 1, 58, 31 S. Ct. 502, 55 L. Ed. 619 (1911))*, Bocobo alleges that Defendants conspired to boycott **[**12]** him in the local radiology market and used illegal tying arrangements to link radiology services to hospital services. He also asserts that SJHS and Chase violated *§ 2* by signing exclusive contracts intended to monopolize the outpatient and hospital radiology markets. *See* *15 U.S.C. § 2* (creating liability for "[e]very person who shall monopolize, or attempt to monopolize . . . any part of the trade or commerce among the several States"). This, Bocobo says, was designed to free SJHS from competing on quality and led to substandard radiology services.

Bocobo's ability to bring an antitrust claim is dependent on § 4 of the Clayton Act, *15 U.S.C. § 15*, which limits private antitrust suits to those who have been injured by conduct forbidden by the antitrust laws. *Brader v. Allegheny Gen. Hosp., 64 F.3d 869, 875 (3d Cir. 1995)* (citing *15 U.S.C. § 15(a)*). To establish his standing to sue, Bocobo must demonstrate: (1) that he has suffered an "antitrust injury"; and (2) that he is the proper plaintiff to bring the claim. *See, e.g.,* *Alberta Gas Chems., Ltd. v. E.I. DuPont de Nemours & Co., 826 F.2d 1235, 1240 (3d Cir. 1987)*. "An antitrust injury is an 'injury of the type the antitrust laws were intended to prevent and that flows from that which makes [the] defendants' acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation.'" *W. Penn Allegheny Health, 627 F.3d at 101* (alteration in original) (citation omitted) (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977))*. "If antitrust **[**14]** injury is not found, **[*897]** further inquiry is unnecessary." *City of Pittsburgh v. W. Penn Power Co., 147 F.3d 256, 265 (3d Cir. 1998)*.

The District Court granted summary judgment to Defendants after finding that Bocobo had not demonstrated antitrust injury. Defining the market for radiology jobs as including, "at the very least, southern New Jersey and the Philadelphia area," *Bocobo v. Radiology Consultants of S. Jersey (Bocobo I), 305 F. Supp. 2d 422, 426 (D.N.J. 2004)*, the District Court concluded that Bocobo had presented no evidence that his exclusion from Alliance had negatively impacted that market. Looking to the consumer market for radiology services, the District Court likewise found no indication in the record that Bocobo's exclusion from SJHS's Cumberland County hospitals had affected consumer choice or the price or quality of radiology services.

Bocobo argues that the District Court abandoned the summary judgment standard, made conclusions that are reserved to experts and the jury, and improperly rejected his proposed definitions of the relevant product and geographic markets. We find no such errors in the District Court's reasoning. [6]

Viewing the evidence in his favor, Bocobo has not established a nexus between his purported exclusion from the market for radiology jobs and the anticompetitive effects on that market that would make Defendants' exclusive contracts or alleged boycott illegal under the antitrust laws. *See, e.g.,* *Atl. Richfield Co. v. USA Petrol. Co., 495 U.S. 328, 335-36, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)* (holding that losses resulting from a competitor's vertical, maximum price-fixing agreements were not "'*antitrust* injury,' since [the] losses d[id] not flow from the aspects of vertical, maximum price fixing that render it illegal"); *Brunswick, 429 U.S. at 489*; *W. Penn Allegheny Health, 627 F.3d at 102* (finding **[**16]** no antitrust injury to a hospital where "Highmark's elimination of [its low-cost insurance plan] violated the antitrust laws, if at all, because it tended to reduce competition in the . . . market for *health insurance*," not medical services (emphasis added)); *Balaklaw v. Lovell, 14 F.3d 793, 799 (2d Cir. 1994)* (upholding summary judgment based on a lack of standing where an anesthesiologist-plaintiff alleging exclusive dealing failed to show that multi-state and national competition for anesthesiologist positions had been hampered).

56:9-18). **[**13]** Accordingly, our analysis of Bocobo's federal antitrust claims in Count 1 applies to his NJAA claims in Count 2, and we resolve both counts together.

[6] Preliminarily, we reject Bocobo's objections **[**15]** to the District Court's act of defining the relevant product and geographic markets rather than preserving that question for the jury. It was proper for the District Court to delimit the market in order to assess antitrust injury at the summary judgment stage. *Cf., e.g.,* *Barton & Pittinos, Inc. v. SmithKline Beecham Corp., 118 F.3d 178, 182 (3d Cir. 1997)* (upholding summary judgment based on a lack of antitrust injury where the district court's decision depended heavily on its definition of the relevant product market).

Bocobo has not shown that he was excluded entirely from the radiology job market; [7] within two weeks of his termination **[*898]** from RCSJ, he obtained a radiology position with a nearby hospital. *Compare, e.g., Angelico v. Lehigh Valley Hosp., Inc., 184 F.3d 268, 274 (3d Cir. 1999)* (reversing summary judgment for the defendant where "the injury [Angelico] suffered, when *shut out* of competition for anticompetitive reasons, [was] indeed among those the antitrust laws were designed to prevent" (emphases added)), *with, e.g., Untracht v. Fikri, 454 F. Supp. 2d 289, 309-10 (W.D. Pa. 2006)* (finding no antitrust injury, even where the plaintiff's staff privileges were revoked **[**17]** at several hospitals, because he maintained the option of practicing at at least one area hospital).

Nor has Bocobo demonstrated that Defendants' conduct was anticompetitive. Specifically, he has failed to show that their behavior leading to his exclusion—the change of contractor in a long-standing practice **[**18]** of exclusive contracting for radiology services—is the type that might lessen competition among radiology providers for the right to practice in the eastern Pennsylvania and south New Jersey areas. *See, e.g., B & H Med., LLC v. ABP Admin., Inc., 526 F.3d 257, 266 (6th Cir. 2008)* (finding no antitrust injury where the "record [was] devoid of evidence that *competition as a whole* ha[d] suffered as a result of [an] exclusive [contract] . . . program" (citation and internal quotation marks omitted)); *Balaklaw, 14 F.3d at 799*; *Steuer v. Nat'l Med. Enters., Inc., 672 F. Supp. 1489, 1501-02 (D.S.C. 1987)* (finding no standing where former exclusive contractors brought antitrust conspiracy claims against the hospital and the successor exclusive contractor because "reduced to its essentials, [the] plaintiffs' . . . Complaint rest[ed] not on any showing of lessened competition, but merely on the fact that they [were] disappointed competitors who [were forced to] provide their services elsewhere").

Finally, Bocobo has failed to establish that his displacement stemmed directly from conduct that is illegal because of its anticompetitive effects on the price, output, or quality of radiology services **[**19]** available to consumers, such as illegal tying arrangements or monopoly behavior. *See, e.g., Jefferson Parish, 466 U.S. at 26* (measuring the anticompetitive effects of tying anesthesiology services to hospital care by looking to the consumer market for anesthesiology). *See generally Angelico, 184 F.3d at 274* (noting that the "directness of the injury" bears on antitrust standing). Bocobo argues that Defendants' market position and exclusive contracts allow them to provide substandard radiology services and reduce consumer choice, but there is no indication that Defendants' actions that resulted in Bocobo's ouster from SJHS hospitals or Cumberland County might cause such harms. As the District Court explained, consumers of radiology services rarely shop around for radiologists or learn who interpreted their scans and X-rays. If consumers are likely to be harmed by Defendants' exclusive contracts, those "effects will not be missed by patient-consumers or insurers," who are better positioned than Bocobo to challenge Defendants' practices. *Kochert v. Greater Lafayette Health Servs., Inc., 463 F.3d 710, 719 (7th Cir. 2006)*.

Viewed in Bocobo's favor, the evidence shows merely that Bocobo **[**20]** was displaced when SJHS granted its exclusive contract to a new company better suited for SJHS's plans to consolidate its hospitals. Losing out in such competition is not an anticompetitive harm. *Cf., e.g., Race Tires Am., Inc. v. Hoosier Racing Tire Corp., 614 F.3d 57, 83 (3d Cir. 2010)* ("It is well established **[*899]** that competition among businesses to serve as an exclusive supplier should actually be *encouraged.*"). In the absence of a link between Bocobo's losses and the anticompetitive aspects of exclusive contracts, boycotts, tying arrangements, and monopolies, we agree with the District Court that Bocobo lacks standing to assert his antitrust claims. Therefore, summary judgment was appropriate on Counts 1 and 2.

B

---

[7] We find the District Court's definition of the relevant geographic market for radiology jobs proper, given uncontested evidence that: (1) SJHS recruited radiologists from Colorado; (2) Chase was hired from Camden County, New Jersey; and (3) Bocobo himself searched for a new position at least as far as the Philadelphia area. *See, e.g., Jefferson Parish Hospital Dist. No. 2 v. Hyde, 466 U.S. 2, 29, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984)* (noting that the market for anesthesiologist jobs "is not necessarily the same as the market in which hospitals compete in offering services to patients . . . [and that] it may encompass competition among anesthesiologists for exclusive contracts . . . and might be statewide or merely local"), *abrogated in part on other grounds by Ill. Tool Works Inc. v. Indep. Ink, Inc., 547 U.S. 28, 126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006)*; *Balaklaw, 14 F.3d at 799*; *Collins v. Assoc. Pathologists Ltd., 844 F.2d 473, 478-79 (7th Cir. 1988)*.

We next consider Bocobo's claim at Count 3 that RCSJ, Alliance, and Chase violated New Jersey's whistleblower statute by terminating him based on his complaints regarding their radiology policies and practices. [8] *See* CEPA, N.J. Stat. Ann. § 34:19-1 to -8. A CEPA plaintiff must show that

> (1) he . . . reasonably believed that his . . . employer's conduct was violating either a law, rule, or regulation promulgated pursuant to law, or a clear mandate of public policy; (2) he . . **[**21]** . performed a "whistle-blowing" activity . . . ; (3) an adverse employment action was taken against him . . . ; and (4) a causal connection exists between the whistle-blowing activity and the adverse employment action.

Dzwonar v. McDevitt, 177 N.J. 451, 828 A.2d 893, 900 (N.J. 2003). The plaintiff need not "set forth facts that, if true, would constitute a violation of [a statute]," *id. at 903*, but he must establish a "substantial nexus between the complained-of conduct and a law or public policy identified by the court or the plaintiff," *id. at 901*; *accord* Caver v. City of Trenton, 420 F.3d 243, 254 (3d Cir. 2005).

The District Court granted summary judgment for Defendants, finding the absence of a genuine issue of material fact regarding the causation element **[**22]** of Bocobo's CEPA claim. Specifically, the Court reasoned that Bocobo had been complaining since 1985 and that no reasonable jury could find that his termination in 2000 was motivated by anything other than his own "difficult personality." Bocobo v. Radiology Consultants of S. Jersey, PA (Bocobo II), No. 02-1697, 2005 U.S. Dist. LEXIS 29321, 2005 WL 3158053, at *4 (D.N.J. Nov. 21, 2005). Bocobo argues that the District Court misapplied the summary judgment standard by implicitly crediting testimony indicating that he was excluded from Alliance merely because hospital staff and RCSJ colleagues disliked working with him. Defendants respond that summary judgment was fully supported by both a lack of causation and Bocobo's failure to identify the specific regulations or laws he complained were being violated. We agree with the District Court that, as is true "in most CEPA cases," Bocobo's claim "turn[s] on the fourth element: evidence of a causal connection" between his termination and his purported whistle-blowing. Donofry v. Autotote Sys., Inc., 350 N.J. Super. 276, 795 A.2d 260, 269 (N.J. Super. Ct. 2001). Because we also agree that no genuine issue of material fact exists as to whether Bocobo's termination resulted from his complaints, **[**23]** rather than his own failings, we will affirm the grant of summary judgment on Bocobo's CEPA claim.

[*900] Bocobo's CEPA claim depends on circumstantial evidence, so we apply the burden-shifting framework of McDonnell-Douglas Corp. v. Green, 411 U.S. 792, 93 S. Ct. 1817, 36 L. Ed. 2d 668 (1973). *See* Fleming v. Corr. Healthcare Solutions, Inc., 164 N.J. 90, 751 A.2d 1035, 1041 (N.J. 2000). Even assuming that Bocobo has made out a prima facie case of retaliation, he cannot satisfy his burden of discrediting Defendants' legitimate, non-retaliatory explanation for his exclusion from Alliance as implausible, inconsistent, incoherent, or contradictory. *Compare, e.g.,* Blackburn v. UPS, Inc., 179 F.3d 81 (3d Cir. 1999) (upholding summary judgment for UPS where Blackburn raised alarms of potential antitrust violations without any sophisticated knowledge of antitrust and where the record provided him no fodder to undermine UPS's proffered legitimate explanations that it terminated him for his own violations of UPS's anti-nepotism, favoritism, integrity and accountability policies); Campbell v. Abercrombie & Fitch, Co., No. 03-3159, 2005 U.S. Dist. LEXIS 11507, 2005 WL 1387645 (D.N.J. June 9, 2005) (granting summary judgment on a store employee's CEPA claim, despite his allegations **[**24]** that he was fired for voicing concerns about discriminatory hiring practices, because no evidence assailed Abercrombie & Fitch's legitimate, non-retaliatory explanation that the employee had misrepresented himself at other store locations in order to conduct unauthorized undercover investigations), *with, e.g.,* Schlichtig v. Inacom Corp., 271 F. Supp. 2d 597 (D.N.J. 2003) (finding that Inacom's explanation that it fired the plaintiff for conducting unauthorized background checks of other employees, rather than for reporting a coworker's marijuana use to police against Inacom's instructions, was discredited by evidence that, after first learning of the unauthorized background checks, Inacom gave express permission for the plaintiff to conduct further investigations).

---

[8] We reject Defendants' argument that Bocobo's CEPA claim is barred by the statute of limitations. In CEPA cases, "the employee's cause of action . . . accrues on the date of actual discharge[,] . . . [which is] the last day for which the employee is paid a regular salary or wage," Alderiso v. Med. Ctr. of Ocean Cnty., Inc., 167 N.J. 191, 770 A.2d 275, 277 (N.J. 2001), and Bocobo brought his suit well within one year of his final day of work, July 13, 2001.

As in *Blackburn* and *Campbell*, the record in Bocobo's case is replete with evidence bolstering Defendants' non-retaliatory explanation for his termination. The record indicates that he caused delays in the operations of the radiology department, refused to cooperate, and generated friction through his idiosyncratic practices and requests. We need not weigh the credibility of the witnesses who offered such testimony—and neither **[**25]** did the District Court—because Bocobo offers no contrary evidence aside from his own self-serving allegations. Rather, he merely posits the alternative view that he was terminated for expressing his disagreements with Defendants' patient care. But that claim is significantly undermined by the fact that RCSJ and Chase took no action in response to his complaints for at least eight years—from the creation of RCSJ in 1993 until its dissolution in 2001. The temporal proximity of a CEPA plaintiff's termination to his alleged whistle-blowing is important circumstantial evidence of the employer's motivation, *see, e.g., Kachmar v. SunGard Data Sys., 109 F.3d 173, 177 (3d Cir. 1997)*, and Bocobo's lengthy employment despite his complaints distinguishes his case from those in which CEPA claims have been countenanced, *see, e.g., Caver, 420 F.3d at 249-52* (alleged retaliation within six months of first complaints); *Schlichtig, 271 F. Supp. 2d at 613* (termination two weeks after complaints). Given the strong evidence supporting Defendants' proffered legitimate, non-retaliatory reason for excluding Bocobo from Alliance and Bocobo's failure to call that justification into question, we readily conclude **[**26]** that no reasonable jury could have found in Bocobo's favor on his CEPA claim. Accordingly, we will affirm the District Court's summary judgment on Count 3.

[*901] C

We now turn to Bocobo's claim of trade libel in Count 8. Under New Jersey law, to prove trade libel a plaintiff must show

> publication of a matter derogatory to the plaintiff's property or business, of a kind designed to prevent others from dealing with him or otherwise to interfere with plaintiff's relations with others. . . . The communication must be made to a third person and must play a material part in inducing others not to deal with plaintiff. . . . [W]hereas the need to demonstrate damages is [sometimes] waived in a defamation suit[,] . . . proof of damages is essential in an action for trade libel.

Patel v. Soriano, 369 N.J. Super. 192, 848 A.2d 803, 834 (N.J. Super. Ct. 2004) (internal citations omitted); *accord Arista Records, Inc. v. Flea World, Inc., 356 F. Supp. 2d 411, 424 (D.N.J. 2005)* (Trade libel requires proof of: "(1) publication, (2) with malice, (3) of false allegations concerning [the plaintiff's] property, product or business, and (4) special damages." (citing *FDIC v. Bathgate, 27 F.3d 850, 870-71 (3d Cir. 1994))*.

Bocobo dedicates **[**27]** only one sentence of his opening brief to his trade libel claim. He argues that the District Court's finding that he could not demonstrate special damages was based on the erroneous conclusion that RCSJ could terminate him without cause under the Employment Contract. [9]

As the Court noted, Bocobo had to "'allege either loss of particular customers by name, or a general diminution of business, and extrinsic facts showing that such special damages were the natural and direct result of the false publication.'" *Bocobo II, 2005 U.S. Dist. LEXIS 29321, 2005 WL 3158053, at *8* (quoting **[**28]** *Mayflower Transit, LLC v. Prince, 314 F. Supp. 2d 362, 378 (D.N.J. 2004))*. We agree with the District Court that his trade libel claim fell short in this respect. His complaint pleaded only general losses, including avoidance by his peers, loss of goodwill and respect, and "substantial money damages, including but not limited, to damages to his personal and business reputation." Bocobo failed to allege any loss of patients, let alone specifically named patients, and he did not show that the difference between his prior salary with RCSJ and his current salary with the University of

---

[9] In his reply brief, as in his briefs before the District Court, Bocobo asserts in much greater detail that SJHS and Chase collected "anecdotal allegations" about him in a "secret personal file" and published false and misleading statements to hospital personnel, RCSJ, and Alliance based on "one-sided and incomplete portrayals of events." **(Reply 22.)** Bocobo claims SJHS and Chase knew the stories were false or recklessly disregarded their unreliability. Because Bocobo did not raise this argument in his opening brief, he waived it, *see Pelullo, 399 F.3d at 222*, and we consider only his challenge to the District Court's ruling on special damages.

Pennsylvania, even if construed as specific damages, was a *direct* result of Defendants' purportedly libelous statements. Rather, the only reasonable reading of the record shows that Bocobo's colleagues at RCSJ believed he was "difficult" and did not wish to associate with him further based on their own extensive personal interactions with him and his work-related deficiencies, such as inaccessibility and combativeness. Therefore, we will uphold summary judgment for SJHS and Chase on Count 8.

D

Bocobo's remaining claims at Counts 4, 5, 6, and 10 can be disposed of summarily.

1

At Count 4, Bocobo alleged a violation **[**29]** of public policy under *Nanavati v.* ***[*902]*** *Burdette Tomlin Memorial Hospital, 107 N.J. 240, 526 A.2d 697 (N.J. 1987)*. Although *Nanavati* stands for the proposition that a hospital must afford a physician due process before revoking his privileges, the case is inapposite here because, from SJHS's perspective, Bocobo's privileges were terminated not because of any belief as to his medical competence or personality, but rather by operation of contract once he ceased practicing radiology for SJHS's exclusive provider. *See* *Bloom v. Clara Maass Med. Ctr., 295 N.J. Super. 594, 685 A.2d 966, 973 (N.J. Super. Ct. 1996)* (holding that the "decision to award an exclusive contract for the provision of radiological services, which le[ads] to the revocation of [a doctor's] staff privileges, constitute[s] a reasonable management decision" under *Nanavati*); *Courtney v. Shore Mem'l Hosp., 245 N.J. Super. 138, 584 A.2d 817, 819 (N.J. Super. Ct. 1990)* ("*Nanavati* deals with disharmony-personality difficulties which are largely subjective . . . . An objective violation of a specific rule or regulation is quite different.") (holding that revocation of the plaintiff's privileges when he let his medical malpractice insurance lapse did not have to satisfy *Nanavati*).

2

At Count **[**30]** 5, Bocobo alleged civil conspiracy against SJHS. This claim fails for two independent reasons. First, we readily agree with the District Court's conclusion that, under the plain language of the Employment Contract, after September 30, 1995, either party could terminate Bocobo's employment upon ninety days' notice, with or without cause. The additional clause providing for immediate termination without notice "for cause" did not alter RCSJ's ability under the preceding clause to terminate Bocobo merely upon ninety days' notice. Because Bocobo's termination was permitted under his contract, any collaboration among Defendants to terminate Bocobo lacked the "unlawful purpose or . . . lawful purpose achieved by unlawful means" or the "wrongful act" required for Bocobo's civil conspiracy and aiding and abetting claims under Count 5. *See, e.g.,* *Morganroth & Morganroth v. Norris, McLaughlin & Marcus, 331 F.3d 406, 414-15 (3d Cir. 2003)* (setting forth the elements of civil conspiracy and aiding and abetting). Second, we agree with the District Court that Bocobo failed to adduce sufficient evidence suggesting that SJHS participated in or encouraged his ouster from RCSJ and exclusion from Alliance. **[**31]** Evidence that Chase had discussions with the SJHS administration prior to terminating Bocobo—even including Zeccardi's testimony that he told Chase of an instance in which a newly formed physicians' group eliminated a prior partner—does not establish that SJHS recommended that Bocobo be removed from the radiology group. Indeed, the only direct testimony presented on the subject consists of SJHS's CEO's and RCSJ's legal counsel's flat denials that they ever discussed Bocobo "whatsoever" in preparation for Exclusive Contract II between SJHS and Alliance.

3

At Count 6, Bocobo alleged breach of contract by all Defendants. This claim fails against RCSJ and Chase because, as we explained above, Bocobo's Employment Contract permitted termination without cause so long as he received ninety-days' notice. As to SJHS, Exclusive Contract I contemplated that Bocobo's privileges would be revoked automatically the moment he was no longer employed by RCSJ, so SJHS committed no breach by denying Bocobo hospital privileges.

4

Finally, at Count 10, Bocobo alleged tortious interference against SJHS, **[*903]** RCSJ, and Chase. Pitting Defendants against each other, he claims that SJHS interfered with his prospective **[**32]** contractual relationship with RCSJ and Chase, and vice versa. But SJHS could not have committed tortious interference because after September 30, 1995, the Employment Contract gave Bocobo no "reasonable expectation of economic benefit or advantage" in his position with RCSJ, which is an essential element of a tortious interference claim. *See, e.g., Fineman v. Armstrong World Indus., Inc., 980 F.2d 171, 186 (3d Cir. 1992)* (citing *Printing Mart-Morristown v. Sharp Elecs. Corp., 116 N.J. 739, 563 A.2d 31, 37 (N.J. 1989))*; *Printing Mart-Morristown, 563 A.2d at 37* ("A complaint based on tortious interference must allege facts that show some protectable right—a prospective economic or contractual relationship."). Nor could RCSJ have interfered with Bocobo's prospective contractual relationship with SJHS. It merely fired him pursuant to the Employment Contract, which could not constitute a "wrongful, intentional interference." *See Fineman, 980 F.2d at 186*; *accord* *Printing Mart-Morristown, 563 A.2d at 39*. Moreover, after September 30, 1995, when he became terminable from RCSJ without cause, Bocobo lacked a reasonable expectancy in his SJHS privileges, which were dependent on his RCSJ employment.

5

In sum, **[**33]** because Bocobo's termination from RCSJ, exclusion from Alliance, and loss of staff privileges at SJHS were all permissible under the governing contracts, and because the revocation of his privileges was automatic upon his termination from RCSJ, summary judgment was appropriate for all Defendants on Bocobo's claims for wrongful termination (Count 4), civil conspiracy and aiding and abetting (Count 5), breach of contract (Count 6), and tortious interference (Count 10).

III

For the foregoing reasons, we will affirm the District Court's summary judgment on all counts and against all Defendants.

LexisNexis® Headnotes

Evidence > Judicial Notice > Adjudicative Facts > Judicial Records

HN1[] **Adjudicative Facts, Judicial Records**

A court may take notice of proceedings in other courts, both within and without the federal judicial system, if those proceedings have a direct relation to matters at issue.

Evidence > Judicial Notice > Adjudicative Facts > Public Records

HN2[] **Adjudicative Facts, Public Records**

A court may take judicial notice of the existence of matters of public record, such as a prior order or decision, but not the truth of the facts cited therein.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN3[] **Motions to Dismiss, Failure to State Claim**

A court may consider documents referenced in, but not attached to, a complaint without converting a motion to dismiss for failure to state a claim into one seeking summary judgment.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN4[] **Motions to Dismiss, Failure to State Claim**

A motion to dismiss pursuant to *Fed. R. Civ. P. 12(b)(6)* for failure to state a claim upon which relief can be granted tests the legal sufficiency of a claim. Dismissal under *Rule 12(b)(6)* may be based on either (1) the lack of a cognizable legal theory, or (2) the absence of sufficient facts alleged under a cognizable legal theory. While detailed factual allegations are not required, a complaint must include sufficient facts to state a claim to relief that is plausible on its face. A claim has facial plausibility when a plaintiff pleads factual content that allows a court to draw the reasonable inference that a defendant is liable for the misconduct alleged. The factual allegations must be enough to raise a right to relief above the speculative level.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN5[] **Motions to Dismiss, Failure to State Claim**

For purposes of ruling on a *Fed. R. Civ. P. 12(b)(6)* motion to dismiss for failure to state a claim, a court accepts all allegations of material fact as true and construes the pleadings in the light most favorable to the plaintiffs. The court need not, however, accept as true pleadings that are no more than legal conclusions or the formulaic recitation of the elements of a cause of action. Mere conclusory allegations of law and unwarranted inferences are insufficient to defeat a motion to dismiss for failure to state a claim. However, when there are well-pleaded factual allegations, the court should assume their veracity and then determine whether they plausibly give rise to an entitlement to relief.

Antitrust & Trade Law > Sherman Act > Claims

HN6[] **Sherman Act, Claims**

Section 1 of the Sherman Act, *15 U.S.C.S. § 1*, prohibits every contract, combination, or conspiracy in restraint of trade. To state a claim under *§ 1*, a plaintiff must allege that (1) there was an agreement, conspiracy, or combination between two or more entities; (2) the agreement was an unreasonable restraint of trade under either a per se or rule of reason analysis; and (3) the restraint affected interstate commerce. The plaintiff must plead enough factual matter (taken as true) to suggest that an agreement was made. Asking for plausible grounds to infer an agreement does not impose a probability requirement at the pleading stage; it simply calls for enough facts to raise a reasonable expectation that discovery will reveal evidence of an illegal agreement. An allegation of parallel conduct and a bare assertion of conspiracy will not suffice.

Antitrust & Trade Law > Regulated Practices > Private Actions > Prioritizing Resources & Organization for Intellectual Property Act

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN7[] **Private Actions, Prioritizing Resources & Organization for Intellectual Property Act**

Section 4 of the Clayton Act creates a private right of action under the Sherman Act for a plaintiff who has been injured in his business or property by reason of anything forbidden in the antitrust laws. *15 U.S.C.S. § 15(a)*. Thus, an antitrust plaintiff must have suffered antitrust injury, that is, injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful.

Antitrust & Trade Law > Sherman Act > Claims

HN8[] **Sherman Act, Claims**

In order to plausibly state an antitrust claim under *Section 1* of the Sherman Act, *15 U.S.C.S. § 1*, plaintiffs must allege something more than parallel conduct and a conclusory allegation of agreement at some unidentified point. When allegations of parallel conduct are set out in order to make a *§ 1* claim, they must be placed in a context that raises a suggestion of a preceding agreement, not merely parallel conduct that could just as well be independent action. To establish a conspiracy, the conspirators must have a unity of purpose or a common design and understanding. A co-conspirator need not know of the existence or identity of the other members of the conspiracy or the full extent of the conspiracy. In antitrust conspiracy cases, the plaintiffs should be given the full benefit of their proof without tightly compartmentalizing the various factual components and wiping the slate clean after scrutiny of each. The character and effect of a conspiracy are not to be judged by dismembering it and viewing its separate parts, but only by looking at it as a whole.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN9[] **Sherman Act, Claims**

There is no requirement that the market definition elements of an antitrust claim be pled with specificity. An antitrust complaint therefore survives a *Fed. R. Civ. P. 12(b)(6)* motion to dismiss for failure to state a claim unless it is apparent from the face of the complaint that the alleged market suffers a fatal legal defect. The existence of a relevant market is typically a factual inquiry for the jury. The complaint may be dismissed on this ground only if the market definition is facially unsustainable.

Constitutional Law > ... > Case or Controversy > Standing > Elements

HN10[] **Standing, Elements**

The requirements for U.S. Const. art. III standing are: (1) injury in fact; (2) causal connection; (3) redressability.

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

HN11[] **Private Actions, Sherman Act**

In general, antitrust injury requires a plaintiff to have suffered its injury in the market where competition is being restrained. However, it is not the status as a consumer or competitor that confers antitrust standing, but the relationship between a defendant's alleged unlawful conduct and the resulting harm to the plaintiff. Where an employee is the direct and intended object of an employer's anticompetitive conduct, that employee has standing to sue for antitrust injury.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN12[] **State Regulation, Claims**

California's Unfair Competition Law (UCL), *Cal. Bus. & Prof. Code § 17200 et seq.*, does not prohibit specific activities but instead broadly proscribes any unfair competition, which means any unlawful, unfair, or fraudulent business act or practice. The UCL provides for restitutionary, injunctive, and declaratory relief. *Cal. Bus. & Prof. Code § 17203*. Damages and disgorgement are unavailable under the UCL.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN13[] **State Regulation, Claims**

Under California's Unfair Competition Law (UCL), *Cal. Bus. & Prof. Code § 17200 et seq.*, the concept of restoration or restitution is not limited only to the return of money or property that was once in the possession of a plaintiff. Instead, restitution is broad enough to allow the plaintiff to recover money or property in which he or she has a vested interest. For example, a plaintiff has a vested interest in unpaid wages and therefore may state a restitution claim under the UCL to recover such lost money or property. However, a mere expectation interest is not a vested interest for purposes of stating a claim for restitution under the UCL.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Business & Corporate Compliance > ... > Labor & Employment Law > Wage & Hour Laws > Wage Payments

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN14[] **State Regulation, Claims**

Earned wages that are due and payable pursuant to *Cal. Lab. Code § 200 et seq.* are as much the property of the employee who has given his or her labor to the employer in exchange for that property as is property a person surrenders through an unfair business practice. Restitutionary awards encompass quantifiable sums one person owes to another.

Constitutional Law > Congressional Duties & Powers > District of Columbia & Federal Property

HN15[] **Congressional Duties & Powers, District of Columbia & Federal Property**

Any state law enacted after a property becomes a federal enclave cannot be enforced on the enclave unless Congress specifically authorizes its enforcement on the federal enclave.

Constitutional Law > Congressional Duties & Powers > District of Columbia & Federal Property

HN16[] **Congressional Duties & Powers, District of Columbia & Federal Property**

The federal enclave doctrine only applies when the locus in which the claim arose is the federal enclave itself. In federal enclave cases, the jurisdiction of the federal court depends upon the locus in which the claim arose. That a defendant is located on a federal enclave, therefore, does not automatically bar all state law claims brought against it. Rather, the federal enclave doctrine bars only those claims which arose on a federal enclave.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN17[] **State Regulation, Claims**

To state a claim under California's Cartwright Act, *Cal. Bus. & Prof. Code § 16720, et seq.*, plaintiffs must allege: (1) the formation and operation of a conspiracy; (2) illegal acts done pursuant thereto; and (3) damage proximately caused by such acts.

Opinion

[*1107] ORDER GRANTING IN PART AND DENYING IN PART DEFENDANTS' JOINT MOTION TO DISMISS; DENYING LUCASFILM LTD.'S MOTION TO DISMISS

Before the Court are Defendants' Joint Motion to Dismiss the Consolidated **[*1108]** Amended Complaint ("Joint Mot."), ECF No. 79, and Defendant Lucasfilm Ltd.'s Motion to Dismiss ("Lucasfilm Mot."), ECF No. 83. The Court held a hearing on the motions on January 26, 2012. Having considered the parties' submissions, arguments, and the relevant law, the Court GRANTS IN PART and DENIES IN PART Defendants' joint motion to dismiss, **[**3]** and DENIES Lucasfilm's motion to dismiss.

I. BACKGROUND

This is a consolidated class action brought by employees alleging antitrust claims against their employers, all of whom are high-tech companies with a principal place of business in the San Francisco-Silicon Valley area of California. Plaintiffs challenge an alleged conspiracy among Defendants to fix and suppress employee compensation and to restrict employee mobility.

The Court recites the factual allegations as pled in the Consolidated Amended Complaint ("CAC"), ECF No. 65, and as indicated in judicially noticed documents. The Court then recounts the procedural background.

A. Factual Background

Unless otherwise noted, the following allegations are taken from the CAC and presumed to be true for purposes of ruling on Defendants' motions to dismiss. *See* *Marder v. Lopez, 450 F.3d 445, 447 n.1 (9th Cir. 2006)*. The Court also takes judicial notice of documents from a related Department of Justice ("DOJ") investigation and civil lawsuit that are referenced in the CAC or attached as exhibits to the Declaration of Christina J. Brown ("Brown Decl."), ECF No. 79-1, and the Declaration of Dean M. Harvey (Harvey Decl."), ECF No. 93. ***HN1***[] A court "may **[**4]** take notice of proceedings in other courts, both within and without the federal judicial system, if those proceedings have a direct relation to matters at issue." *United States ex rel. Robinson Rancheria Citizens Council v. Borneo, Inc., 971 F.2d 244, 248 (9th Cir. 1992)*. ***HN2***[] A court may also take judicial notice of the existence of matters of public record, such as a prior order or decision, but not the truth of the facts cited therein. *See* *Lee v. City of L.A., 250 F.3d 668, 689-90 (9th Cir. 2001)*. ***HN3***[] The Court may consider documents referenced in, but not attached to a complaint without converting a motion to dismiss into one seeking summary judgment. *See* *Swartz v. KPMG LLP, 476 F.3d 756, 763 (9th Cir. 2007)*.

1. The Parties

Defendants include the following high-tech companies with principal places of business located in the following cities in California: Adobe Systems Inc. ("Adobe"), San Jose; Apple Inc. ("Apple"), Cupertino; Google Inc. ("Google"), Mountain View; Intel Corp. ("Intel"), Santa Clara; Intuit Inc. ("Intuit"), Santa Clara; Lucasfilm Ltd. ("Lucasfilm"), San Francisco; and Pixar, Emeryville. CAC ¶¶ 16-20.

Plaintiffs Michael Devine, Mark Fichtner, Siddharth Hariharan, Brandon Marshall, **[**5]** and Daniel Stover (collectively "Named Plaintiffs"), all worked as software engineers for some of the Defendants. *Id.* ¶¶ 21-27. Mr. Devine worked for Adobe in the State of Washington from October 2006, through July 7, 2008. *Id.* ¶ 16. Mr. Fichtner worked for Intel in Arizona from May 2008 through May 2011. *Id.* ¶ 17. Mr. Hariharan worked for Lucasfilm in California from January 8, 2007, through August 15, 2008. *Id.* ¶ 18. Mr. Marshall worked for Adobe in California from July 2006 through December 2006. *Id.* ¶ 19. Finally, Mr. Stover worked for Intuit in California from July 2006 through December 2010. *Id.* ¶ 20.

[*1109] Named Plaintiffs purport to represent the following nationwide class of similarly situated individuals:

> All natural persons employed by Defendants in the United States on a salaried basis during the period from January 1, 2005 through January 1, 2010 (the "Class Period"). Excluded from the Class are: retail employees; corporate officers, members of the boards of directors, and senior executives of Defendants who entered into the illicit agreements alleged herein; and any and all judges and justices, and chambers' staff, assigned to hear or adjudicate any aspect of this litigation.

Id. **[**6]** ¶ 30.

2. DOJ Investigation

Many of the factual allegations in the CAC come directly from two civil complaints filed by the DOJ in the United States District Court for the District of Columbia (the "D.C. District Court"). *See* Joint Mot. 5-6. Plaintiffs reference these documents in the CAC, and both Defendants and Plaintiffs have attached documents from the DOJ lawsuit to their briefing. *See* Harvey Decl. Exs. A-B; Brown Decl. Exs. A-F.

From 2009 through 2010, the Antitrust Division of the DOJ conducted an investigation into Defendants' employment and recruitment practices. CAC ¶¶ 3, 111. After receiving documents produced by Defendants and interviewing witnesses, the DOJ concluded that Defendants reached "facially anticompetitive" agreements that "eliminated a significant form of competition . . . to the detriment of the affected employees who were likely deprived of competitively important information and access to better job opportunities." DOJ Complaint against Adobe, et al. ("DOJ Adobe Compl."), Harvey Decl. Ex. A, at ¶¶ 2, 14; DOJ Complaint against Lucasfilm ("DOJ Lucasfilm Compl."), Harvey Decl. Ex. D, at ¶¶ 2, 15, 22; CAC ¶ 112. The DOJ also determined that the agreements "were not **[**7]** ancillary to any legitimate collaboration," "were much broader than reasonably necessary for the formation or implementation of any collaborative effort," and "disrupted the normal price-setting mechanisms that apply in the labor setting." DOJ Adobe Compl. ¶ 16; DOJ Lucasfilm Compl. ¶ 17; CAC ¶ 112. The DOJ concluded that Defendants entered into agreements that were naked restraints of trade that were *per se* unlawful under the antitrust laws. DOJ Adobe Compl. ¶ 35; DOJ Lucasfilm Compl. ¶ 3; CAC ¶ 112.

On September 24, 2010, the DOJ filed a complaint against Adobe, Apple, Google, Intel, Intuit, and Pixar regarding Defendants' agreements. DOJ Final J. against Adobe, et al. ("DOJ Adobe J."), Brown Decl. Ex. A, at 2; CAC ¶ 114. On December 14, 2010, the DOJ filed another complaint against Lucasfilm and Pixar regarding Defendants' agreements. DOJ Final J. against Lucasfilm ("DOJ Lucasfilm J.") Order at 1, *United States v. Lucasfilm, Inc., No. 10-02220-RBW, 2011 U.S. Dist. LEXIS 70171, 2011 WL 2636850 at *1 (D.D.C. June 3, 2011)*; [1] CAC ¶ 114. In both cases, the DOJ filed stipulated proposed final judgments in which Adobe, Apple, Google, Intel, Intuit, Lucasfilm, and Pixar agreed that the DOJ's complaints "state[] a claim **[**8]** upon which relief may be granted" under federal ***antitrust law***. DOJ Proposed Final J. against Lucasfilm ("DOJ Proposed Lucasfilm J."), Brown Decl. Ex. B, at 2; CAC **[*1110]** ¶ 114. [2] Although Defendants did not admit any wrongdoing or violation of law, Defendants agreed to

---

[1] The D.C. District Court Order suggests that the DOJ's complaint against Lucasfilm was filed on December 21, 2010, whereas the CAC states that it was filed on December 14, 2010. The difference is immaterial here, but the Court takes the date as pled in the CAC to be true for purposes of these motions.

[2] Plaintiffs ask this Court to apply the doctrine of judicial **[**9]** estoppel to prevent Defendants from taking a position on this motion that is inconsistent with the position they took before the D.C. District Court that the same allegations "stated a claim upon which relief may be granted." Opp'n to Joint Mot. 6 n.2 (citing *New Hampshire v. Maine, 532 U.S. 742, 750-51, 121 S. Ct. 1808, 149 L. Ed. 2d 968 (2001))*. The Court declines to apply the judicial estoppel doctrine here. Defendants' apparent concession that the DOJ stated a claim under *Section 1* of the Sherman Act is not clearly inconsistent with Defendants' position here that Plaintiffs fail to state a claim under *Section 4* of the Clayton Act. *Section 1* of the Sherman Act governs a claim to relief

be "enjoined from attempting to enter into, maintaining or enforcing any agreement with any other person or in any way refrain from, requesting that any person in any way refrain from, or pressuring any person in any way to refrain from soliciting, cold calling, recruiting, or otherwise competing for employees of the other person." DOJ Adobe J. at 5; DOJ Proposed Lucasfilm J. at 4; CAC ¶ 115. The D.C. District Court entered the stipulated proposed final judgments on March 17, 2011, and June 2, 2011, respectively. DOJ Adobe J. at 12, DOJ Lucasfilm J. at 1; CAC ¶ 115. [3]

3. Alleged Conspiracy[4]

Plaintiffs allege that Defendants engaged in a conspiracy to eliminate competition between them for skilled labor, with the intent and effect of suppressing the compensation and mobility of Defendants' employees. CAC ¶ 55.

According to Plaintiffs, the conspiracy consisted of an interconnected web of express bilateral agreements, each with the active involvement and participation of a company under the control of the late Steven P. Jobs ("Mr. Jobs") and/or a company whose board shared at least one member of Apple's board of directors. *Id.* Defendants' senior executives actively participated in negotiating, executing, monitoring compliance with, and policing violations of the bilateral agreements. *Id.* **[**11]** ¶¶ 56, 65, 74, 79, 84, 85, 91, 98, 102, 104, 107. Defendants' senior executives also actively concealed each bilateral agreement, and Defendants' employees were not informed of, nor did they agree to, the terms of any of the agreements. *Id.* ¶¶ 64, 77, 82, 89, 100, 105.

From 2005 to 2007, each pair of Defendants in a bilateral agreement entered into nearly identical "Do Not Cold Call" agreements, whereby each company placed the names of the other company's employees on a "Do Not Cold Call" list and instructed recruiters not to cold call the employees of the other company. *See id.* ¶¶ 67, 78, 83, 90, 101. [5] In a properly functioning and **[*1111]** lawfully competitive labor market, each Defendant would compete for employees by "cold calling," that is, soliciting current employees of one or more other Defendants. *Id.* ¶ 41. Cold calling includes communicating directly in any manner (including orally, in writing, telephonically, or electronically) with another company's employee who has not otherwise applied for a job opening. *Id.* The use of cold calling among competitors commonly increases total compensation and mobility of all Defendants' employees. *Id.* ¶ 50.

Each bilateral agreement in this case applied to all employees of a given pair of Defendants; was not limited by geography, job function, product group, or time period; and was not related to a collaboration between that pair of Defendants. *Id.* ¶¶ 63, 76, 81, 88, 100, 105. The bilateral relationships between pairs of Defendants are described in more detail below.

Pixar and Lucasfilm. In January 2005, while Mr. Jobs was CEO of Pixar, senior executives of Pixar and Lucasfilm entered into express, written agreements to eliminate competition between them for skilled labor. *Id.* ¶¶ 58, 62. Pixar drafted the terms of the agreements in Emeryville, California and sent those terms to Lucasfilm. *Id.* ¶ 62. Pixar and Lucasfilm entered into agreements: (1) not to cold call each other's employees; (2) to notify the other company

---

by the government. Section 4 of the Clayton Act governs a claim to relief by an individual and has the additional requirement of antitrust injury, which is inapplicable to the government's Section 1 claim.

[3] As with the discrepancy in the date of the filing of the DOJ's complaint against Lucasfilm, as described in footnote 1, the D.C. District Court Order suggests that the final judgment against Lucasfilm was filed on June 3, 2011, whereas the CAC states that it was filed on June 2, 2011. The difference is immaterial here, but the Court **[**10]** takes the date as pled in the CAC to be true for purposes of this motion.

[4] Plaintiffs included additional factual allegations supporting a conspiracy, allegedly uncovered in discovery, in their section of the Joint Case Management Statement. ECF No. 109. Although the Court does not opine on the eventual admissibility of this evidence, the Court presently gives no weight to these additional factual allegations as they are not properly before the Court on these motions.

[5] As discussed below, Pixar and Lucasfilm **[**12]** entered into other agreements in addition to entering into a "Do Not Cold Call" agreement.

when making an offer to an employee of the other company, even if that employee had applied for the prospective position on his own initiative in the absence of cold calling; and (3) not to engage in "bidding wars," i.e., counteroffer above the initial offer, if either company made an **[**13]** offer to the employee of the other company. *Id.* ¶¶ 59-61.

In 2007, Pixar twice contacted Lucasfilm regarding suspected violations of the agreement, and Lucasfilm responded by changing its conduct to conform to the agreement. *Id.* ¶ 65.

Apple and Adobe. In May 2005, while Mr. Jobs was CEO of Apple (concurrently serving as CEO of Pixar), Apple, and Adobe entered into an express "Do Not Cold Call" agreement, similar to the first agreement between Pixar and Lucasfilm. *Id.* ¶¶ 72, 73. Apple and Adobe reached the agreement through direct and explicit communications between their senior executives, who actively managed and enforced the agreement through further direct communications. *Id.* ¶ 74.

Apple and Google. In 2006, while Arthur D. Levinson ("Mr. Levinson") sat on the boards of both Apple and Google, these two companies entered into an express "Do Not Cold Call" agreement identical to the "Do Not Cold Call" agreement between Apple and Adobe. *Id.* ¶ 79.

In February and March 2007, Apple contacted Google to complain about suspected violations of the agreement. In response, Google conducted an internal investigation and reported its findings back to Apple. *Id.* ¶ 84.

Apple and Pixar. In April 2007, **[**14]** Apple entered into an agreement with Pixar that was identical to Apple's earlier "Do Not Cold Call" agreements with Adobe and Google. *Id.* ¶ 85. At this time, Mr. Jobs, as the single largest shareholder of the Walt Disney Company ("Disney"), continued to exert substantial control over Pixar. *Id.* ¶ 87. Disney had acquired Pixar in 2006, and Mr. Jobs thereafter sat on Disney's board of directors and continued to oversee Pixar's animation business. *Id.* ¶ 15.

Google and Intuit. In June 2007, Google entered into an express "Do Not Cold Call" agreement with Intuit that was identical **[*1112]** to Google's earlier agreement with Apple, and identical to the earlier agreements between Apple and Adobe, and between Apple and Pixar. *Id.* ¶ 103. At this time, Google CEO Eric Schmidt ("Mr. Schmidt") sat on Apple's board of directors, along with Mr. Levinson, who continued to sit on the boards of both Apple and Google. *Id.*

Google and Intel. In September 2007, Google entered into an express "Do Not Cold Call" agreement with Intel that was identical to Google's earlier agreements with Apple and Intuit, and identical to Apple's earlier agreements with Adobe and Pixar. *Id.* ¶ 98. At this time, Google CEO Mr. Schmidt **[**15]** continued to sit on Apple's board of directors, along with Mr. Levinson, who continued to sit on the boards of both Apple and Google. *Id.* ¶ 97.

Plaintiffs allege that each member of the Class was harmed by each and every agreement described above, which together made up "an overarching conspiracy" to decrease competition for skilled labor, reduce employee mobility, and suppress compensation. *Id.* ¶¶ 108-110. Each Defendant is alleged to have entered into this conspiracy with knowledge of the other Defendants' participation in the conspiracy, and with the intent of suppressing Plaintiffs' compensation and mobility through eliminating competition for skilled labor. *Id.* ¶¶ 55, 108. The elimination of competition and suppression of compensation and mobility had a cumulative effect on all Class members. *Id.* ¶ 110.

Plaintiffs allege that in August 2007, Mr. Jobs contacted the CEO of Palm Inc. ("Palm"), Edward T. Colligan ("Mr. Colligan"), to propose that Apple and Palm also agree to refrain from cold calling and hiring each other's employees. *Id.* ¶¶ 92, 94. Mr. Jobs said to Mr. Colligan, "We must do whatever we can" to stop cold calling each other's employees and other competitive recruiting **[**16]** efforts between the companies. *Id.* ¶ 94. Mr. Jobs also threatened litigation to intimidate Palm into entering into a "Do Not Cold Call" agreement. *Id.* Mr. Colligan declined Mr. Jobs's proposal, telling him, "Your proposal that we agree that neither company will hire the other's employees, regardless of the individual's desires, is not only wrong, it is likely illegal." *Id.* ¶ 95.

4. Claims

Plaintiffs' CAC contains four claims for relief under the following statutes: (1) Section 1 of the Sherman Act, 15 U.S.C. § 1; (2) California's Cartwright Act, *Cal. Bus. & Prof. Code §§ 16720, et seq.*; (3) *Cal. Bus. & Prof. Code § 16600* [6]; and (4) California's Unfair Competition Law ("UCL"), *Cal. Bus. & Prof. Code §§ 17200, et seq.* *Id.* ¶¶ 119-152. Plaintiffs seek damages, restitution, costs, attorneys' fees, and prejudgment and post-judgment interest. *Id.* ¶¶ 153-164. [7]

B. Procedural Background

The original complaints in the five actions underlying this consolidated action were filed in California state court. *Hariharan v. Adobe Sys. Inc.*, Case No. 11574066 (Alameda Super. Ct. filed May 4, 2011); *Marshall v. Adobe Sys. Inc.*, Case No. 11-CV-204052 (Santa Clara Super. Ct. filed June 28, 2011); *Devine v. Adobe Sys.* ***[*1113]*** *Inc.*, Case No. 11-CV-204053 (Santa Clara Super. Ct. filed June 28, 2011); *Fichtner v. Adobe Sys. Inc.*, Case No. 11-CV-204187 (Santa Clara Super. Ct. filed June 30, 2011); *Stover v. Adobe Sys. Inc.*, Case No. 11-CV-25090 (Santa Clara Super. Ct. filed July 14, 2011). [8] Defendants subsequently removed the five state court actions to the United States District Court for the Northern District of California. *Hariharan v. Adobe Sys. Inc.*, Case No. 11-CV-2509-JCS (removed May 23, 2011); *Marshall v. Adobe Sys. Inc.*, Case No. 11-CV-3538-HRL (removed July 19, 2011); *Devine v. Adobe Sys. Inc.*, Case No. 11-3539-HRL (removed July 19, 2011); *Fichtner v. Adobe Sys. Inc.*, Case No. 11-CV-3540-PSG (removed July 19, 2011); *Stover v. Adobe* ***[**18]*** *Sys. Inc.*, Case No. 11-CV-3541-PSG (removed July 19, 2011).

On June 1, 2011, the lead case, *Hariharan v. Adobe Systems Inc.*, was reassigned from Magistrate Judge Spero to Judge Armstrong. ECF No. 24. On July 19, 2011, Intuit filed a motion to relate the five underlying actions, ECF No. 41, which Judge Armstrong granted on July 27, 2011, ECF No. 52. On August 2, 2011, Plaintiff Siddharth Hariharan moved to transfer the five underlying actions to the San Jose Division, ECF No. 56, which Judge Armstrong granted on August 4, 2011, ECF No. 58.

On August 5, 2011, the underlying actions were reassigned to the undersigned judge. The Court consolidated the five underlying actions on September 12, 2011, ECF No. 64, and Plaintiffs filed the CAC on September 13, 2011. ECF No. 65.

On October 26, 2011, the Court held a Case Management Conference, where the Court granted in part and denied in part Defendants' joint motion to stay discovery, ECF No. 80. *See* ECF No. 88. The Court ordered that Defendants **[**19]** respond to Plaintiffs' Document Request Nos. 1-7 and produce responsive, non-privileged documents already produced to the DOJ. *See id.* Pursuant to the Court's instructions at the Case Management Conference, Plaintiffs withdrew their prayer for injunctive relief, ECF No. 89, and voluntarily dismissed a related case, *Lieff, Cabraser, Heimann & Bernstein, LLP v. U.S. Dep't of Justice, Antitrust Div.*, Case No. 11-CV-5105-HRL (N.D. Cal. Oct. 18, 2011), ECF No. 90.

Defendants filed the instant joint motion to dismiss on October 13, 2011, ECF No. 79, and, with leave of the Court, Lucasfilm filed its separate motion to dismiss on October 17, 2011, ECF No. 83. Plaintiffs opposed both of these motions on November 4, 2011. ECF Nos. 91, 92. Defendants filed their joint reply on December 2, 2011, ECF No. 97, and Lucasfilm filed its reply that same day, ECF No. 96.

---

[6] After the hearing, Plaintiffs withdrew their claim under ***Cal. Bus. & Prof. Code § 16600***. ECF No. 111. Accordingly, Defendants' joint motion to dismiss as to this claim is DENIED as MOOT.

[7] The CAC originally contained a prayer for injunctive relief, *see* CAC 126, 135, 143, and declaratory relief, *see id.* 143, 152, 154, 155, 157, 158. However, **[**17]** Plaintiffs have since withdrawn their prayer for injunctive relief, *see* ECF No. 89, and declaratory relief, *see* ECF No. 111.

[8] While the name of each Superior Court case listed only Adobe Systems Inc. as the defendant, the Superior Court complaints also named as defendants Apple, Google, Intel, Intuit, Lucasfilm, Pixar, and Does 1-200.

II. Legal Standard

HN4[] A motion to dismiss pursuant to *Rule 12(b)(6)* for failure to state a claim upon which relief can be granted "tests the legal sufficiency of a claim." *Navarro v. Block, 250 F.3d 729, 732 (9th Cir. 2001)*. Dismissal under *Rule 12(b)(6)* may be based on either (1) the "lack of a cognizable legal theory," or (2) "the absence **[**20]** of sufficient facts alleged under a cognizable legal theory." *Balistreri v. Pacifica Police Dep't, 901 F.2d 696, 699 (9th Cir. 1990)*. While "'detailed factual allegations'" are not required, a complaint must include sufficient facts to "'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937, 1949, 173* ***[*1114]*** *L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id.* The "[f]actual allegations must be enough to raise a right to relief above the speculative level . . . ." *Twombly, 550 U.S. at 544*.

HN5[] For purposes of ruling on a *Rule 12(b)(6)* motion to dismiss, the Court accepts all allegations of material fact as true and construes the pleadings in the light most favorable to the plaintiffs. *Manzarek v. St. Paul Fire & Marine Ins. Co., 519 F.3d 1025, 1031 (9th Cir. 2008)*. The Court need not, however, accept as true pleadings that are no more than legal conclusions or the "'formulaic recitation of the elements' of a cause of action." *Iqbal, 129 S. Ct. at 1949* (quoting **[**21]** *Twombly, 550 U.S. at 555*). Mere "conclusory allegations of law and unwarranted inferences are insufficient to defeat a motion to dismiss for failure to state a claim." *Epstein v. Wash. Energy Co., 83 F.3d 1136, 1140 (9th Cir. 1996)*; *accord Iqbal, 129 S. Ct. at 1949-50*. However, "[w]hen there are well-pleaded factual allegations, a court should assume their veracity and then determine whether they plausibly give rise to an entitlement to relief." *Iqbal, 129 S. Ct. at 1940-41*.

III. ANALYSIS

The Court addresses Defendants' joint motion to dismiss before turning to Lucasfilm's motion to dismiss.

A. Defendants' Joint Motion to Dismiss

Defendants jointly move to dismiss the CAC on the grounds that it fails to state an antitrust claim under federal and California law because: (1) the CAC fails to allege evidentiary facts to support the claim of an "overarching conspiracy" among all Defendants to suppress their employees' wages; (2) such a conspiracy is implausible on its face; and (3) the CAC fails to plead antitrust injury. Defendants also argue that Plaintiffs' claims under the UCL fail for the same reasons as Plaintiffs' antitrust claims. Finally, Defendants argue that Plaintiffs lack standing **[**22]** to assert claims for injunctive or declaratory relief because Plaintiffs are former employees with no stated intention of working for any Defendant, and the alleged conduct has already been enjoined by the DOJ. The Court need not reach this last argument, however, because it was rendered moot by Plaintiffs' withdrawal of their prayer for declaratory and injunctive relief. ECF Nos. 89, 111.

1. Antitrust Claims Under the Sherman Act and California's Cartwright Act

The parties appear to agree that Plaintiffs' federal and state antitrust claims rise and fall together. "Indeed, the analysis under California's ***antitrust law*** mirrors the analysis under federal law because the Cartwright Act was modeled after the Sherman Act." *Cnty. of Tuolumne v. Sonora Cmty. Hosp., 236 F.3d 1148, 1160 (9th Cir. 2001)*; *see also Nova Designs, Inc. v. Scuba Retailers Ass'n, 202 F.3d 1088, 1091 (9th Cir. 2000)*. Thus, if Plaintiffs plead a valid Sherman Act claim, they likewise plead a valid Cartwright Act claim.

a. Legal Standard

HN6[] Section 1 of the Sherman Act, *15 U.S.C. § 1*, prohibits "[e]very contract, combination . . . , or conspiracy, in restraint of trade." To state a claim under *Section 1*, a plaintiff must allege **[**23]** that "(1) there was an agreement, conspiracy, or **[*1115]** combination between two or more entities; (2) the agreement was an unreasonable restraint of trade under either a per se or rule of reason analysis; [9] and (3) the restraint affected interstate commerce." [10] *Am. Ad Mgmt., Inc. v. GTE Corp., 92 F.3d 781, 784 (9th Cir. 1996)*; *see also Tanaka v. Univ. of S. Cal., 252 F.3d 1059, 1062 (9th Cir. 2001)*. The Supreme Court has stated that a plaintiff must plead "'enough factual matter (taken as true) to suggest that an agreement was made. Asking for plausible grounds to infer an agreement does not impose a probability requirement at the pleading stage; it simply calls for enough fact[s] to raise a reasonable expectation that discovery will reveal evidence of an illegal agreement . . . . [A]n allegation of parallel conduct and a bare assertion of conspiracy will not suffice.'" *Kendall v. Visa U.S.A., Inc., 518 F.3d 1042, 1047 (9th Cir. 2008)* (quoting *Twombly, 550 U.S. at 556-57*).

HN7[] *Section 4* of the Clayton Act creates a private right of action under the Sherman Act for a plaintiff who has been "injured in his business or property by reason of anything forbidden in the antitrust laws." *15 U.S.C. § 15(a)*. Thus, an antitrust plaintiff must have suffered antitrust injury, that is, "injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Am. Ad Mgmt., Inc. v. Gen. Tel. Co. of Cal., 190 F.3d 1051, 1055 (9th Cir. 1999)*.

b. [25] Failure to State a Claim**

Defendants argue that Plaintiffs fail to allege sufficient facts to establish an "overarching conspiracy." Specifically, Defendants argue that: (1) Plaintiffs fail to plead the "who, what, where, and when" describing the alleged conspiracy, and (2) Plaintiffs have not alleged the requisite knowledge and intent to show a conspiracy. Joint Mot. 2 (citing *Kendall, 518 F.3d 1042*). Defendants also contend that an "overarching conspiracy" consisting of six bilateral agreements is implausible on its face, primarily because each Defendant remained free to cold call most of the other Defendants' employees. *Id.* at 3. Finally, Defendants argue that Plaintiffs have failed to plead antitrust injury. The Court addresses these arguments in turn.

i. Who, What, to Whom, Where, and When

Defendants argue that Plaintiffs fail to plead the "who, what, where, and when" of the alleged overarching conspiracy. Defendants urge the Court to ignore Plaintiffs' "labels and conclusions" and mere "formulaic recitation[s] of the elements of a cause of action." Joint Mot. 9 (citing *Iqbal, 129 S. Ct. at 1949*). While it is true, as Defendants note, that Plaintiffs refer to the "overarching conspiracy," **[**26]** CAC ¶¶ 55, 108, as an "interconnected web of agreements," **[*1116]** *id.* ¶¶ 1, 55, 108, these labels are not the only facts that Plaintiffs have alleged here.

Defendants rely primarily on *Kendall* to support their argument that Plaintiffs have failed to allege sufficient facts supporting an overarching conspiracy. *Kendall*, however, is distinguishable. Even after conducting depositions, the plaintiffs in *Kendall* did "not allege *any* facts to support their theory that the [defendants] conspired or agreed with each other . . . to restrain trade." *Kendall, 518 F.3d at 1048* (emphasis added). The Ninth Circuit held that the

---

[9] Defendants' briefing does not contest that the individual bilateral agreements are horizontal agreements between competitors in restraint of trade, which are either *per se* unlawful, *Am. Ad Mgmt., 92 F.3d at 786*, or at **[**24]** least, as alleged here, prima facie anticompetitive under the rule of reason analysis. *See* *Brantley v. NBC Universal, Inc., 675 F.3d 1192, 2012 U.S. App. LEXIS 6441, 2012 WL 1071257, at *3 (9th Cir. Mar. 30, 2012)*. As an initial matter, the parties agree that the Court need not decide, at this stage, whether the rule of reason or *per se* analysis applies to this case. Reply 9; Tr. 29:15-17. Thus, whether Defendants had a procompetitive justification for their bilateral agreements, a consideration that is relevant only under a rule of reason analysis, is properly decided in later stages of litigation. *See* *Arizona v. Maricopa Cnty. Med. Soc'y, 457 U.S. 332, 343, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982)*.

[10] The third factor, whether the alleged restraint affected interstate commerce, is not in dispute.

plaintiffs' allegations of mere parallel conduct, without more, were insufficient to plead a *Section 1* violation. *Id. at 1049*. The Ninth Circuit also held that, to survive a motion to dismiss, a *Section 1* claim should "answer the basic questions: who, did what, to whom (or with whom), where, and when?" *Id. at 1048*.

Plaintiffs here have alleged much more than mere parallel conduct, despite not having any discovery before filing the CAC. Unlike the plaintiffs' complaint in *Kendall*, Plaintiffs' CAC details the actors, effect, victims, location, and timing of the six bilateral agreements **[**27]** between Defendants.

Who. Plaintiffs allege that the agreements were negotiated, executed, and, in most cases, enforced by Defendants' "senior executives." CAC ¶¶ 62, 64, 65, 74, 77, 79, 84, 85, 91, 98, 102, 107. The Ninth Circuit has expressed concern that "[a] bare allegation of a conspiracy is almost impossible to defend against, particularly where the defendants are large institutions with hundreds of employees entering into contracts and agreements." *Kendall, 518 F.3d at 1047*. This concern, however, is inapplicable here, where Plaintiffs allege that, at all relevant times, at least one of three individuals had significant influence over at least one party to each of the six bilateral agreements: Apple CEO and Pixar CEO Mr. Jobs; Apple and Google board member Mr. Levinson; and Google CEO and Apple board member Mr. Schmidt. CAC ¶¶ 55, 57, 58, 72, 79, 87, 97, 103, 108. Specifically, Mr. Jobs exerted significant influence over companies involved in four of the bilateral "Do Not Cold Call" agreements: Pixar-Lucasfilm; Apple-Pixar; Apple-Google; and Apple-Adobe. *Id.* ¶¶ 58, 72, 79, 85, 87. Mr. Schmidt, CEO of Google, sat on Apple's board of directors when Google entered into agreements **[**28]** with Intel and Inuit. *Id.* ¶ 97. Mr. Levinson sat on the boards of both Apple and Google when the two companies entered into their bilateral agreement; when Google entered into agreements with Intel and with Intuit; and when Apple entered into an agreement with Pixar. *Id.* ¶¶ 79, 97, 103.

Moreover, the identical nature of the six bilateral agreements may support the inference that these individuals played a role in shaping these agreements. For example, it strains credulity that Apple and Adobe reached an agreement in May 2005 that was identical to the "Do Not Cold Call" agreement Pixar entered into with Lucasfilm in January 2005, *id.* ¶¶ 58, 72, without some communication or coordination between these two sets of Defendants. The only apparent link between the Apple-Adobe agreement and the Pixar-Lucasfilm agreement is Mr. Jobs, who controlled Apple, *id.*, and who oversaw Pixar. *Id.* ¶ 87. Plaintiffs allege that all of the bilateral agreements were reached in secrecy. *Id.* ¶¶ **[**29]** 56-91. Thus, the identical nature of the six secret bilateral agreements further supports the plausible inference that the agreements were negotiated, reached, and policed at the highest levels of the Defendant companies.

Furthermore, Plaintiffs provide an example of Mr. Jobs personally negotiating a **[*1117]** potential "Do Not Cold Call" agreement directly with the CEO of Palm, Mr. Colligan. *Id.* ¶¶ 92-96. Plaintiffs quote Mr. Jobs as allegedly telling Mr. Colligan, "'We must do whatever we can' to stop cold calling each other's employees and other competitive recruiting efforts between the companies." *Id.* ¶ 94. Based on Mr. Jobs's attempt to negotiate a "Do Not Cold Call" agreement directly with Palm's CEO, it is reasonable to infer that such agreements were negotiated directly CEO to CEO.

Finally, because the bilateral agreements were not limited by geography, job function, product group, or time period, and were not related to a collaboration between defendants. *Id.* ¶¶ 63, 76, 81, 88, 100, 105, it is reasonable to infer that such significant wide-ranging, company-wide, and worldwide policies would have been approved at the highest levels.

The Court finds that at the pleading stage, Plaintiffs **[**30]** have sufficiently pled who negotiated and entered into the bilateral "Do Not Cold Call" agreements.

What, to Whom, Where, and When. Plaintiffs also allege that the agreements removed cold calling as an upward pressure on Plaintiffs' salaries, resulting in artificially lower salaries. CAC ¶¶ 70, 72, 79, 85, 98. As discussed in greater detail in Section III.A.1.b.ii, *infra*, Plaintiffs describe a plausible scenario as to how, in light of basic economic principles, these agreements formed an overarching conspiracy that resulted in artificially lower salaries. Plaintiffs also set forth how the nearly identical agreements, of identical scope, were entered into in various cities and counties in California, *id.* ¶¶ 62, 75, 80, 86, 99, between 2005 and 2007. *Id.* ¶¶ 58, 73, 79, 85, 98, 103. Plaintiffs allege how these agreements were the subject of a DOJ investigation in which the DOJ found the agreements to be "*per se* unlawful" and in which Defendants agreed that the DOJ stated a federal antitrust claim. *Id.* ¶¶ 112, 114. Indeed, Defendants note that "virtually all of the facts alleged in the Complaint relate to six bilateral agreements among Defendants," apparently conceding that Plaintiffs have **[**31]** pled sufficient facts to establish the existence of these bilateral agreements. Joint Mot. 9.

Unlike the plaintiffs in *Kendall*, Plaintiffs here have "answer[ed] the basic questions: who, did what, to whom (or with whom), where, and when?" *Kendall, 518 F.3d at 1047*. Moreover, Plaintiffs have alleged facts beyond mere parallel conduct that "tend[] to exclude the possibility of independent action." *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 764, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)* (holding that "evidence that tends to exclude the possibility of independent action . . . create[s] a jury issue"); *see also Harkins Amusement Enters., Inc. v. Gen. Cinema Corp., 850 F.2d 477, 484 (9th Cir. 1988)* ("concerted action may be inferred from circumstantial evidence of the defendant's conduct and course of dealings") (internal citation omitted); *In re Text Messaging Antitrust Litig., 630 F.3d 622, 627-29 (7th Cir. 2010) cert. denied*, *131 S. Ct. 2165, 179 L. Ed. 2d 937 (2011)* (holding that where a "complaint allege[d] a mixture of parallel behaviors, details of industry structure, and industry practices, that facilitate collusion," this "constitute[d] supporting evidence of collusion," and "provide[d] a sufficiently plausible case of price **[**32]** fixing to warrant allowing the plaintiffs to proceed to discovery").

Accordingly, failure to plead the "who, what, to whom, where, and when" is not a basis to dismiss Plaintiffs' *Section 1* claims here. *Cf. In re Cathode Ray Tube (CRT) Antitrust Litig., 738 F. Supp. 2d 1011, 1018 (N.D. Cal. 2010)* (Conti, J.) (distinguishing *Kendall* on the ground that the CRT "complaints **[*1118]** allege[d] a governmental investigation, hundreds of meetings between 1995 and 2007, and detailed allegations concerning the structure and typical pattern of those meetings").

ii. Knowledge and Intent

Defendants argue that Plaintiffs have failed to show "some meeting of the minds." Specifically, Defendants argue that the mere fact of overlapping board members is not evidence of a conspiracy and that multiple bilateral agreements do not make up an overarching conspiracy. Joint Mot. 11-12. The Court is not persuaded.

HN8[] In order to plausibly state a *Section 1* claim, Plaintiffs must allege something more than parallel conduct and a conclusory allegation of agreement at some unidentified point. "[W]hen allegations of parallel conduct are set out in order to make a § 1 claim, they must be placed in a context that raises a suggestion **[**33]** of a preceding agreement, not merely parallel conduct that could just as well be independent action." *Twombly, 127 S. Ct. at 1966*. To establish a conspiracy, the conspirators must have a unity of purpose or a common design and understanding. *Am. Tobacco Co. v. United States, 328 U.S. 781, 810, 66 S. Ct. 1125, 90 L. Ed. 1575 (1946)*. A co-conspirator need not know of the existence or identity of the other members of the conspiracy or the full extent of the conspiracy. *Beltz Travel Serv. Inc. v. Int'l Air Transp. Ass'n, 620 F.2d 1360, 1366-67 (9th Cir. 1980)* ("Participation by each conspirator in every detail in the execution of the conspiracy is unnecessary to establish liability, for each conspirator may be performing different tasks to bring about the desired result."); *cf. Blumenthal v. United States, 332 U.S. 539, 557, 68 S. Ct. 248, 92 L. Ed. 154 (1947)* (stating the same proposition in the criminal context). In antitrust conspiracy cases, "plaintiffs should be given the full benefit of their proof without tightly compartmentalizing the various factual components and wiping the slate clean after scrutiny of each . . . . [T]he character and effect of a conspiracy are not to be judged by dismembering it and viewing its separate parts, but only **[**34]** by looking at it as a whole . . . ." *Continental Ore Corp. v. Union Carbide & Carbon Corp., 370 U.S. 690, 699, 82 S. Ct. 1404, 8 L. Ed. 2d 777 (1962)*.

Plaintiffs allege that Defendants had the means, the motive, and the opportunity to implement a conspiracy to restrain competition for employees. Plaintiffs allege that Defendants' senior executives negotiated, executed, monitored, and policed a series of identical "Do Not Cold Call" agreements in an effort to eliminate competition for skilled labor. CAC ¶¶ 1, 56, 74, 79, 85, 98, 104. Furthermore, Plaintiffs allege that, at all relevant times, at least one of three individuals had significant influence over at least one party to each of the six bilateral agreements: Apple and Pixar CEO Mr. Jobs, Apple and Google board member Mr. Levinson, and Google CEO and Apple board member Mr. Schmidt. *Id.* ¶¶ 55, 57, 58, 72, 79, 87, 97, 103, 108.

Defendants cite *Jicarilla Apache Tribe v. Supron Energy Corp., 728 F.2d 1555, 1561 (10th Cir. 1984)*, for the proposition that service on multiple boards is "not evidence of a conspiracy." Joint Mot. 12. However, *Jicarilla* does not stand for this proposition. To the contrary, the *Jicarilla* Court acknowledged that overlapping board membership **[**35]** "may indicate an opportunity to conspire . . . ." *Jicarilla, 728 F.2d at 1561*. This is precisely the reason for which Plaintiffs allege overlapping board membership here: to indicate an opportunity to conspire.

Specifically, Mr. Levinson sat on the boards of both Apple and Google when the **[*1119]** two companies entered into their bilateral agreement; when Google entered into an agreement with Intel and Intuit; and when Apple entered into an agreement with Pixar. *Id.* ¶¶ 79, 97, 103. Mr. Schmidt, CEO of Google, sat on Apple's board of directors when Google entered into agreements with Intel and Inuit, *id.* ¶ 97. Mr. Levinson's and Mr. Schmidt's positions on the boards of companies entering into virtually identical, yet secret, bilateral "Do Not Cold Call" agreements provided an opportunity for Defendants to share knowledge and to conspire. Thus, their overlapping board membership lends plausibility to Plaintiffs' allegations that each Defendant entered into this conspiracy "with knowledge of the other Defendants' participation in the conspiracy, and with the intent of . . . reduc[ing] employee compensation and mobility through eliminating competition for skilled labor." *Id.* ¶ 55; *see also id.* ¶ **[**36]** 108. These bilateral "Do Not Cold Call" agreements were negotiated by senior executives and represented the "policies" of several hi-tech companies. *Id.* ¶ 116. Thus, it is reasonable to infer that such significant policies would have to be approved at the highest levels. The Court agrees with Plaintiffs, Opp'n to Joint Mot. 10, that it is plausible to infer that the overlapping board membership here provided an opportunity to conspire and an opportunity for transfer of the requisite knowledge and intent regarding the bilateral agreements.

The plausibility of these inferences increases when the Court considers that Mr. Jobs also exerted significant influence over companies involved in four of the bilateral "Do Not Cold Call" agreements: Pixar-Lucasfilm; Apple-Pixar; Apple-Google; and Apple-Adobe. Plaintiffs provide an example of Mr. Jobs personally negotiating the same kind of "Do Not Cold Call" agreement directly with the CEO of Palm. *Id.* ¶¶ 92-96. Notwithstanding the fact that this example involved a non-Defendant, Mr. Jobs's alleged personal involvement lends further plausibility to Plaintiffs' allegations that the agreements at issue here were executed, policed, and enforced by senior **[**37]** executives. Furthermore, Plaintiffs quote Mr. Jobs as allegedly telling Palm's CEO, Mr. Colligan, "'We must do whatever we can' to stop cold calling each other's employees and other competitive recruiting efforts between the companies." *Id.* ¶ 94. From this quote it is reasonable to infer that Mr. Jobs had the intent to reduce competition for skilled labor and was aware that "Do Not Cold Call" agreements were effective means of doing so. Given that Mr. Jobs, as CEO of Apple, had contact with Messrs. Levinson and Schmidt, who were members of Apple's Board, it is also reasonable to infer that the overlapping board membership provided an opportunity for Mr. Jobs to expand the conspiracy. Thus, Plaintiffs have alleged sufficient facts plausibly suggesting "a unity of purpose[,] a common design and understanding, or a meeting of minds in an unlawful arrangement." *Monsanto, 465 U.S. at 764* (internal citation omitted).

Defendants also argue that six bilateral "Do Not Cold Call" agreements do not add up to an overarching conspiracy. Defendants rely principally on *In re Iowa Ready-Mix Concrete Antitrust Litigation, 768 F. Supp. 2d 961 (N.D. Iowa 2011)*, to support this argument. In addition to **[**38]** not being binding on this Court, *Iowa Ready-Mix Concrete* is distinguishable. There, the plaintiffs sought to rely on bilateral agreements — which were the basis for three of the defendants' guilty pleas to criminal antitrust violations — to show one conspiracy among all defendants. *Id. at 972*. The plaintiffs' complaint alleged that the defendants "did those things which they combined and conspired to do, including, **[*1120]** among other things, discussing, forming and implementing agreements to raise and maintain at artificially high levels the prices for Ready-Mix Concrete," an allegation that, without more, was not only "conclusory," but also "tautolog[ical]." *Id. at 974-75*. In dismissing the complaint, the court noted that the plaintiffs failed to allege: (1) "parallel conduct," *id. at 974*; (2) a "larger picture from which inferences of a wider conspiracy can be drawn from guilty pleas to separate bilateral conspiracies," *id. at 975*; (3) "any facts that could tie together the specific, discrete incidents of admitted misconduct and the overarching all-defendant four-plus year conspiracy . . . ," *id. at 972*; and (4) "that the defendants ever systematically interacted with each other, much less **[**39]** that they had some mechanism to operate the alleged conspiracy, allocate its profits, and police its participants," *id.* The plaintiffs' complaint had the additional defect of failing to allege when, where, and from whom plaintiffs purchased the allegedly price-fixed product. *Id. at 964*.

As discussed above, Plaintiffs here have alleged a "larger picture" of senior executives from closely connected high-tech companies in Northern California contemporaneously negotiating and enforcing six bilateral "Do Not Cold Call" agreements. The fact that all six identical bilateral agreements were reached in secrecy among seven Defendants in a span of two years suggests that these agreements resulted from collusion, and not from coincidence. Unlike the plaintiffs in *Iowa Ready-Mix Concrete*, therefore, Plaintiffs here have alleged facts plausibly suggesting "a unity of purpose[,] a common design and understanding, or a meeting of minds in an unlawful arrangement." *Monsanto, 465 U.S. at 764* (internal citation omitted). Whether Plaintiffs can adduce sufficient evidence in discovery to *prove* an overarching conspiracy is a question that is not before the Court today. At the pleading stage, Plaintiffs have **[**40]** alleged sufficient "factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Iqbal, 129 S. Ct. at 1949*. Accordingly, failure to plead sufficient evidentiary facts supporting an overarching conspiracy is not a ground for dismissal of Plaintiffs' antitrust claims.

iii. Plausibility of the Conspiracy Theory

Defendants also argue that Plaintiffs' theory of an overarching conspiracy is implausible. Joint Mot. 14 (citing *William O. Gilley Enters., Inc. v. Atl. Richfield Co., 588 F.3d 659, 662 (9th Cir. 2009 ("Gilley"))*. While it is true that the facts alleged must be "'plausible' in light of basic economic principles," *Gilley, 588 F.3d at 662*, Plaintiffs' allegations meet this plausibility standard here.

As Defendants note, the bilateral "Do Not Cold Call" agreements alleged in Plaintiffs' CAC do not cover all possible pairings between Defendants—that is, while Adobe cannot cold call Apple employees or vice versa, nothing in the CAC indicates that Adobe could not cold-call Adobe, Intuit, Google, Lucasfilm, and Pixar. Joint. Mot. 15. In fact, of the 21 possible pairings between the 7 Defendants, only 6 pairings have a bilateral **[**41]** "Do Not Cold Call" agreement, leaving competition open among the remaining 15 pairings. *Id.* Defendants argue that the economics of this situation evidence the lack of an overarching conspiracy, as a rational conspiracy would seek to eliminate these additional price pressures in order to make the existing bilateral constraints effective. *Id.* Relatedly, Defendants argue that Plaintiffs' alleged conspiracy is implausible because Plaintiffs have failed to allege that Defendants have market power over a relevant **[*1121]** market. *Id.* at 16. For the reasons below, neither of these arguments prevails.

First, the Court does not agree with Defendants that Plaintiffs' allegations of an overarching conspiracy are implausible on their face. While Defendants accurately point out that only 6 bilateral "Do Not Cold Call" agreements have been alleged, Plaintiffs nonetheless adequately allege that the "compensation effects of cold calling are not limited to the particular individuals who receive cold calls, or to the particular individuals who would have received cold calls but for the anticompetitive agreements alleged herein. Instead, the effects of . . . eliminating cold calling . . . commonly impact all salaried **[**42]** employees of the participating companies." *Id.* ¶ 50. Plaintiffs allege that "Plaintiffs and each member of the Class were harmed by each and every agreement herein alleged. The elimination of competition and suppression of compensation and mobility had cumulative effect on all Class members." *Id.* ¶ 110. For example, "an individual who was an employee of Lucasfilm received lower compensation and faced unlawful obstacles to mobility as a result of not only the illicit agreements with Pixar, but also as a result of Pixar's agreement with Apple." *Id.*

Defendants do not attack Plaintiffs' allegations of the cumulative harm of the bilateral agreements beyond calling the allegations "conclusory." Joint Mot. 17. The Court disagrees with Defendants' characterization. Far from asserting mere conclusions of law, Plaintiffs' CAC details how cold calling normally works in the labor market for skilled employees in the high-tech industry and how eliminating cold calling would reduce such employees' compensation and mobility. CAC ¶¶ 41-54. Plaintiffs provide specific examples of various ways in which cold calling significantly impacts employee compensation. First, Plaintiffs allege that when an employee **[**43]** of Company A receives a cold call from rival Company B, the current employee may either move to Company B, or use Company B's offer as leverage to negotiate increased compensation from Company A. *Id.* ¶ 46. Second, when a current employee of Company A receives a cold call from rival Company B, that information is likely to spread through informal employee communication channels, empowering other Company A employees to use that information in their own compensation negotiations. *Id.* ¶ 47. Third, when rival Company B cold calls a Company A employee, Company B is likely to glean information about Company A's compensation practices. As a result, in a normal, competitive labor market, Company B is likely to match or exceed the compensation package offered by its rivals. This iterative process tends to lead to increased compensation levels across the industry, as companies vie for rivals' employees. *Id.* ¶ 48. Finally, when Company A knows that its employees may be cold called by rival Company B, Company A is more likely to forfend prospective poaching of its employees by preemptively increasing the compensation of its current employees. *Id.* ¶ 49.

While these allegations concerning the labor **[**44]** market effects of cold calling remain to be proven, the Court presumes these factual allegations to be true for purposes of ruling on a motion to dismiss. In light of Plaintiffs' specific allegations concerning the industry-wide procompetitive effects of cold calling recruiting practices, it is plausible to infer that even a single bilateral agreement would have the ripple effect of depressing the mobility and compensation of employees of companies that are not direct parties to the agreement. Plaintiffs' allegations of six parallel bilateral agreements render the inference of an anticompetitive ripple effect that much more plausible. **[*1122]** Accordingly, the Court finds that Plaintiffs have sufficiently pled facts alleging the economic plausibility of the conspiracy.

Defendants' second argument, which challenges the plausibility of Plaintiffs' conspiracy theory based on Plaintiffs' failure to allege a relevant market and that Defendants have power within that market, also fails. ***HN9***[] "There is no requirement that [the market definition] elements of the antitrust claim be pled with specificity." *Newcal Indus., Inc. v. Ikon Office Solution, 513 F.3d 1038, 1045 (9th Cir. 2008)*. "An antitrust complaint **[**45]** therefore survives a *Rule 12(b)(6)* motion unless it is apparent from the face of the complaint that the alleged market suffers a fatal legal defect." *Id.* The existence of a "relevant market" is typically a factual inquiry for the jury. *Id.* A complaint may be dismissed on this ground only if the market definition is "facially unsustainable." *Id.*

Here, Plaintiffs allege that Defendants are high-tech companies in the market for skilled labor, where cold calling plays an important role in determining salaries and labor mobility. CAC ¶¶ 41-54. Plaintiffs further allege that the labor market for skilled high-tech labor is national. *Id.* ¶¶ 30, 39. Finally, Plaintiffs allege that "Defendants succeeded in lowering the compensation and mobility of their employees below what would have prevailed in a lawful and properly functioning labor market." *Id.* ¶ 108. Thus, the Court accepts as true, as the Court must on a motion to dismiss, Plaintiffs' allegation that Defendants succeeded in distorting the market through their agreements. Accordingly, it is reasonable to infer that Defendants had the market power to do so. *Cf. Theme Promotions, Inc. v. News Am. Mktg. FSI, 546 F.3d 991, 1001 (9th Cir. 2008)* **[**46]** ("Evidence of restricted output and supracompetitive prices is direct evidence of market power." (quoting *Forsyth v. Humana, Inc., 114 F.3d 1467, 1475 (9th Cir. 1997))*.

Moreover, the Court need not engage in a market analysis until the Court decides whether to apply a *per se* or rule of reason analysis. *See F.T.C. v. Ind. Fed'n of Dentists, 476 U.S. 447, 462, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986)*; *National Soc. of Professional Engineers v. United States, 435 U.S. 679, 692, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)*. Defendants' argument relies on the false assumption that the Court should apply a rule of reason analysis, but as the parties agree, Joint Mot. 9; Tr. 29:15-17, the Court need not decide now whether *per se* or rule of reason analysis applies. Indeed, that decision is more appropriate on a motion for summary judgment. *See Pecover v. Elecs. Arts Inc., 633 F. Supp. 2d 976, 983 (N.D. Cal. 2009)* (deferring market analysis under rule of reason, under Cartwright Act, until after deciding motion to dismiss); *In re Beer Distrib. Antitrust Litig., 188 F.R.D. 557, 564 (N.D. Cal. 1999)* (Williams, J.). Plaintiffs have successfully pled a *per se* violation of the Sherman Act for purposes of surviving a 12(b)(6) motion, *see* CAC ¶¶ 2, 32(b), 125, 134, 155; Opp'n to Joint **[**47]** Mot. 1, and therefore no market analysis is required at this time. *See United States v. Socony-Vacuum Oil, 310 U.S. 150, 224 n.59, 60 S. Ct. 811, 84 L. Ed. 1129 (1940)* (noting that a *per se* *Section 1* violation does not require evidence of market power or the ability to affect prices); *Datagate, Inc. v. Hewlett-Packard Co., 60 F.3d 1421, 1425 (9th Cir.*

1995) ("The foundational principle of *per se* antitrust liability is that some acts are considered so inherently anticompetitive that no examination of their impact on the market as a whole is required."); *In re WellPoint, Inc. Out-of-Network UCR Rates Litig.,* **[*1123]** *No. MDL 09-2074-PSG, 2011 U.S. Dist. LEXIS 89512, 2011 WL 3555610, at *14 (C.D. Cal. Aug. 11, 2011)*.

For all these reasons, Plaintiffs' antitrust claims cannot be dismissed on the basis of implausibility.

iv. Antitrust Injury[11]

Defendants argue that Plaintiffs have not alleged antitrust injury. Joint Mot. 16. The Court disagrees.

HN11[] In general, "[a]ntitrust injury requires the plaintiff to have suffered its injury in the market where competition is being restrained." *Am. Ad Mgmt., 190 F.3d at 1057*. However, "it is not the status as a consumer or competitor that confers antitrust standing, but the relationship between the defendant's alleged unlawful conduct and the resulting harm to the plaintiff." *Id. at 1058*. The Ninth Circuit has held that, where, as here, an employee is the direct and intended object of an employer's anticompetitive conduct, that employee has standing to sue for antitrust injury. *Ostrofe v. H.S. Crocker Co., Inc., 740 F.2d 739, 742-43 (9th Cir. 1984)*; *accord* *Eichorn v. AT & T Corp., 248 F.3d 131, 140-41 (3d Cir. 2001)*; *Roman v. Cessna Aircraft Co., 55 F.3d 542 (10th Cir. 1995)*.

Plaintiffs **[**49]** have asserted that their salary and mobility were suppressed by Defendants' agreements not to cold call, and that the alleged agreements were entered into to suppress competition for skilled labor. CAC ¶¶ 108-10. Plaintiffs have specifically alleged that they were injured by Defendants' alleged anticompetitive conduct, *id.* ¶¶ 16-20, 70, 108, 110; have explained the means by which Defendants allegedly caused this injury, *id.* ¶¶ 41-55, 108; and have suggested how this injury should be quantified, *id.* ¶ 32(h). In alleging that Defendants conspired to fix salaries at artificially low levels, Plaintiffs have alleged "an example of the type of injury the antitrust laws are meant to protect against." *Doe v. Ariz. Hosp. & Healthcare Ass'n, No. CV07-1292-PHX-SRB, 2009 U.S. Dist. LEXIS 42871, 2009 WL 1423378, at *4 (D. Ariz. Mar. 19, 2009)* (citing *Am. Ad Mgmt., 190 F.3d at 1054*). Plaintiffs have further alleged that Defendants' attempts to suppress competition had the intended "effect of fixing the compensation of [Plaintiffs] at artificially low levels." CAC ¶ 108. Plaintiffs have thus also alleged that their injury is a direct result of Defendants' conduct. *Ariz. Hosp., 2009 U.S. Dist. LEXIS 42871, 2009 WL 1423378, at *4*.

Thus, Plaintiffs have adequately **[**50]** pled antitrust injury. [12] Accordingly, Defendants' motion to dismiss Plaintiffs' Sherman Act claim and Cartwright Act claim is DENIED.

2. *Cal. Bus. & Prof. Code § 16600*

Plaintiffs have voluntarily dismissed their claim under *Cal. Bus. & Prof. Code § 16600*. **[*1124]** *See* ECF No. 111. Defendants' Joint Motion to Dismiss this claim is therefore DENIED as MOOT.

---

[11] Defendants focus their arguments on antitrust injury, but appear cursorily to attack Plaintiffs' Article III standing. Joint Mot. 9. **HN10**[] Plaintiffs meet the requirements for Article III standing: (1) injury in fact; (2) causal connection; (3) redressability. *Takhar v. Kessler, 76 F.3d 995, 999-1000 (9th Cir. 1996)* (internal quotations omitted). Plaintiffs allege that their salaries were artificially reduced as a result **[**48]** of Defendants' alleged anticompetitive conduct and that their injury can be redressed through the payment of damages should Plaintiffs establish liability. As Plaintiffs were directly affected by the alleged agreement to eliminate competition, they have antitrust standing as well. *AGC v. Cal. State Council of Carpenters, 459 U.S. 519, 545, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*.

[12] Defendants repeat their argument that Plaintiffs have failed to allege a relevant market and control of that market, *see* Section III.A.1.b.iii, *supra*, to argue that Plaintiffs have also failed to allege antitrust injury. *See* Joint Mot. 18-19. As discussed above, the Court declines to require a market analysis at the motion to dismiss stage.

3. UCL

Plaintiffs also allege that Defendants' actions violate ***HN12***[] California's UCL, which does not prohibit specific activities but instead broadly proscribes "any unfair competition, which means 'any unlawful, unfair or fraudulent business act or practice.'" *In re Pomona Valley Med. Group, Inc., 476 F.3d 665, 674 (9th Cir. 2007)* (quoting *Cal. Bus. & Prof. Code §§ 17200, et seq.*); *see also* *Boschma v. Home Loan Ctr., Inc., 198 Cal. App. 4th 230, 251-52, 129 Cal. Rptr. 3d 874 (2011)*.

The UCL provides for restitutionary, injunctive, and **[**51]** declaratory relief. *See* *Cal. Bus. & Prof. Code § 17203* (authorizing injunctive and restitutionary relief); *AICCO, Inc. v. Ins. Co. of N. Am., 90 Cal. App. 4th 579, 590, 109 Cal. Rptr. 2d 359 (2001)* (authorizing declaratory relief). Damages and disgorgement are unavailable under the UCL. *Korea Supply Co. v. Lockheed Martin Corp., 29 Cal. 4th 1134, 1152, 131 Cal. Rptr. 2d 29, 63 P.3d 937 (2003)*. As discussed above, Plaintiffs withdrew their prayers for injunctive and declaratory relief. Thus, the only relief Plaintiffs seek under the UCL is restitution. However, because, as explained below, Plaintiffs are not entitled to restitution, Plaintiffs' UCL claim is DISMISSED.

Plaintiffs' alleged injury is in the form of elimination of competition and suppression of compensation and mobility. CAC ¶ 110. In their claim under the UCL, Plaintiffs pray that Defendants be required to "disgorge their illegal gains for the purpose of making full restitution to all injured class members." *Id.* ¶ 150.

HN13[] Under the UCL, "'the concept of restoration or restitution . . . is not limited only to the return of money or property that was once in the possession of that person. Instead, restitution is broad enough to allow a plaintiff to recover money or property in which **[**52]** he or she has a vested interest.'" *Lozano v. AT&T Wireless Servs. Inc., 504 F.3d 718, 733-34 (9th Cir. 2007)* (quoting *Juarez v. Arcadia Fin., Ltd., 152 Cal. App. 4th 889, 61 Cal. Rptr. 3d 382 (2007))*. For example, a plaintiff has a vested interest in unpaid wages and therefore may state a restitution claim under the UCL to recover such lost money or property. *See* *Cortez v. Purolator Air Filtration Prods. Co., 23 Cal. 4th 163, 177-78, 96 Cal. Rptr. 2d 518, 999 P.2d 706 (2000)*. The California Supreme Court has made clear, however, that a mere "expectation interest" is not a "vested interest" for purposes of stating a claim for restitution under the UCL. *See* *Pineda v. Bank of Am., 50 Cal. 4th 1389, 1401-02, 117 Cal. Rptr. 3d 377, 241 P.3d 870 (2010)*.

The Court finds that the speculative higher compensation Plaintiffs may have gotten in the absence of the alleged conspiracy, unlike unpaid wages, is not a vested interest. In *Cortez*, the California Supreme Court held that ***HN14***[] "earned wages that are due and payable pursuant to *section 200 et seq. of the Labor Code* of the Labor Code are as much the property of the employee who has given his or her labor to the employer in exchange for that property as is property a person surrenders through an unfair business practice." *23 Cal. 4th at 178*. "[R]estitutionary **[**53]** awards encompass quantifiable sums one person owes to another." *Id.* The Court agrees with Defendants that the salaries Plaintiffs may have been able to negotiate in the absence of the alleged conspiracy is an "attenuated expectancy" — akin to "lost business opportunity" or lost revenue — which cannot serve as the basis for restitution. *Korea Supply, 29* ***[*1125]*** *Cal. 4th at 1150-51*. Plaintiffs are notably silent in response to Defendants' arguments that Plaintiffs are not entitled to restitutionary relief. Plaintiffs request for disgorgement is also foreclosed, because this remedy is available "only to the extent that it constitutes restitution." *Id. at 1145*. Any profits Defendants made through the alleged conspiracy at the expense of Plaintiffs' wages are likewise attenuated expectancies. Accordingly, Plaintiffs are entitled neither to restitution nor to disgorgement.

Thus, because "the only relief the UCL provides is unavailable here, [Plaintiffs'] UCL claim fails." *Doe v. Starbucks, Inc., No. SACV 08-0582 AG (CWx), 2009 U.S. Dist. LEXIS 118878, 2009 WL 5183773, at *15 (C.D. Cal. Dec. 18, 2009)*. Accordingly, Defendants' joint motion to dismiss Plaintiffs' UCL claim is GRANTED. [13]

---

[13] The Court notes that even if Plaintiffs' **[**54]** UCL claim were to survive a motion to dismiss, the UCL claim would likely face an insurmountable hurdle at the class certification stage given that the Ninth Circuit has foreclosed the certification of nationwide classes under the UCL. *See* *Mazza v. Am. Honda Motor Co., Inc., 666 F.3d 581, 585 (9th Cir. 2012)*.

B. Lucasfilm's Motion to Dismiss

In addition to joining the other Defendants' joint motion to dismiss, Lucasfilm brings its own motion to dismiss premised on the federal enclave doctrine.

Pursuant to *Federal Rule of Civil Procedure 12(b)(6)*, Lucasfilm seeks to dismiss Plaintiffs' Cartwright Act claim. Lucasfilm argues that Plaintiffs' Cartwright Act claim fails as a matter of law because, under the federal enclave doctrine, the Act does not apply to conduct on the Presidio, where Lucasfilm has been located since July 2005. Lucasfilm Mot. 3. All other Defendants join Lucasfilm's motion on the ground that some of the events of the alleged overarching conspiracy occurred on the Presidio. Joint Mot. 1 n.1. The Court disagrees with Defendants.

The parties appear to agree that since July 2005, Lucasfilm has been located on the Presidio of San Francisco — a federal enclave that was ceded **[**55]** to the United States government by the state of California in 1897. Lucasfilm Mot. 1. The parties also agree that ***HN15***[] any state law enacted after a property becomes a federal enclave cannot be enforced on the enclave unless Congress specifically authorizes its enforcement on the federal enclave. Plaintiffs' only remaining state law claim is under the Cartwright Act. The parties apparently agree that, because the Cartwright Act was enacted after 1897, and Congress has not authorized its enforcement on the Presidio, the Cartwright Act does not apply to the Presidio. The parties disagree, however, on the nexus required between the Cartwright Act claim and the Presidio for the federal enclave doctrine to bar Plaintiffs' Cartwright Act claim here.

Defendants argue that the federal enclave doctrine applies as long as some of the alleged events occurred on the federal enclave. Plaintiffs, on the other hand, argue that ***HN16***[] the federal enclave doctrine only applies when the locus in which the claim arose is the federal enclave itself. The Court agrees with Plaintiffs. The Ninth Circuit has held that in federal enclave cases, "the jurisdiction of the federal court depends upon . . . the locus in which **[**56]** the claim arose." *Alvares v. Erickson, 514 F.2d 156, 160 (9th Cir. 1975)*. [14] That Lucasfilm **[*1126]** is now located on the Presidio, therefore, does not automatically bar *all* state law claims brought against it. Rather, the federal enclave doctrine bars only those claims which arose "on a federal enclave." *Totah v. Bies, No. 10-CV-05956-CW, 2011 U.S. Dist. LEXIS 39940, 2011 WL 1324471, at *2 (N.D. Cal. Apr. 6, 2011)*. Thus, the Court looks to whether the locus in which Plaintiffs' Cartwright Act claim arose is the Presidio.

HN17[] To state a claim under the Cartwright Act, Plaintiffs must allege, "(1) the formation and operation of the conspiracy; (2) illegal acts done pursuant thereto; and (3) damage proximately caused by such acts." *Kolling v. Dow Jones & Co., 137 Cal. App. 3d 709, 718, 187 Cal. Rptr. 797 (1982)*. Plaintiffs allege that Lucasfilm and Pixar formed a conspiracy by entering into a bilateral agreement "no later than January 2005." CAC ¶ 128. Though Plaintiffs allege that this conspiracy would later expand to include numerous other players, Plaintiffs have successfully alleged that the conspiracy had already formed and was operating by January 2005, six months before Lucasfilm moved to the Presidio. Plaintiffs also allege that the negotiation, execution, and enforcement of this bilateral agreement — the first of the six such agreements in the overarching conspiracy — took place in Emeryville, CA. *Id.* ¶¶ 62, 65-70. Thus, the locus **[**58]** of the first two Cartwright Act elements was not the Presidio.

The Court recognizes that the federal enclave doctrine may extinguish the Cartwright Act claims of a putative subclass of Plaintiffs, and may not extinguish the Cartwright Act claims of another putative subclass of Plaintiffs. For

---

[14] To the extent *Corley v. Long-Lewis, Inc., 688 F. Supp. 2d 1315, 1336 (N.D. Ala. 2010)*, conflicts by suggesting that the federal enclave doctrine applies as long as "some of the events alleged . . . occurred on a federal enclave," the Court instead follows the Ninth Circuit, which has held to the contrary. While it is true, as Lucasfilm notes, Lucasfilm Reply 2, that Judge Wilken applied the federal enclave doctrine to bar plaintiff's defamation claim in *Totah* even though the defamatory statement was uttered and republished outside of the Presidio, *Totah* is not an example of a sister court adopting *Corley*'s "some of the events" standard. Judge Wilken stated that "the substance and consummation of the **[**57]** tort [of libel] occurs when and where the third person receives, reads, and comprehends the libelous matter," and held that federal enclave jurisdiction applied because the allegedly libelous statements at issue in that case had been received on a federal enclave. *Totah, 2011 U.S. Dist. LEXIS 39940, 2011 WL 1324471, at *2*.

example, the named Plaintiff who suffered the earliest injury, Mr. Marshall, began work at Adobe in July 2006, over a year after Adobe had entered into its bilateral "Do Not Cold Call" agreement with Apple. *Id.* ¶¶ 73. Although Mr. Marshall's injury did not arise until a year after Lucasfilm had moved to a federal enclave, Adobe is not located on the Presidio, and nothing in the CAC suggests that Mr. Marshall was injured on the Presidio. Thus, regardless of the fact that Lucasfilm had already moved to the Presidio by the time of Mr. Marshall's alleged injury in 2006, all three elements of Mr. Marshall's Cartwright Act claim arose outside the Presidio. Accordingly, the locus in which Mr. Marshall's Cartwright Act claim arose was not the Presidio, and the federal enclave doctrine does not extinguish Mr. Marshall's Cartwright Act claim.

Defendants' federal enclave defense is more appropriately addressed **[**59]** when the Court considers class certification, and is not ground to dismiss Plaintiffs' CAC. Accordingly, Lucasfilm's motion to dismiss is DENIED.

IV. CONCLUSION

For the reasons set forth above, the Court rules as follows on Defendants' joint **[*1127]** motion to dismiss and Lucasfilm's motion to dismiss:

1. Defendants' joint motion to dismiss is DENIED as to Plaintiffs' *Section 1* Sherman Act claim.

2. Defendants' joint motion to dismiss is DENIED as to Plaintiffs' Cartwright Act claim.

3. Defendants' joint motion to dismiss is DENIED, as moot, as to Plaintiffs' *Cal. Bus. & Prof. Code § 16600* claim.

4. Defendants' joint motion to dismiss is GRANTED as to Plaintiffs' UCL claim.

5. Defendants' joint motion to dismiss is DENIED, as moot, as to Plaintiffs' prayer for injunctive and declaratory relief.

6. Lucasfilm's motion to dismiss is DENIED.

IT IS SO ORDERED.

HN1[] **Standards of Review, De Novo Review**

A motion to dismiss is infrequently granted because its purpose is to test the law of the claim, not the facts that support it. In reviewing a district court's decision to dismiss for failure to state a claim, the appellate court accepts as true all well-pleaded factual allegations in the complaint and resolves all doubts in favor of the complaint's sufficiency. A N.M. R. Ann. 1-012(B)(6) motion is only proper when it appears that plaintiff can neither recover nor obtain relief under any state of facts provable under the claim. A district court's decision to dismiss a case for failure to state a claim under Rule 1-012(B)(6) is reviewed de novo. Whether a party has standing to litigate a particular issue is a question of law, which the appellate court reviews de novo.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN2[] Motions to Dismiss, Failure to State Claim

Dismissals under N.M. R. Ann. 1-012(B)(6) are proper when the claim asserted is legally deficient. A plaintiff's standing is a jurisdictional prerequisite to an action.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

HN3[] Sherman Act, Claims

Antitrust legislation barring monopolistic restraint of trade began with the federal Sherman Antitrust Act (Sherman Act), enacted by Congress in 1890, *15 U.S.C.S. §§ 1 through 7 (2004)*. One year later, in 1891, the New Mexico Territorial Legislature enacted the New Mexico Antitrust Act (NMAA) that is based on the Sherman Act, *N.M. Stat. Ann. §§ 57-1-1 through -19*. In 1914, Congress enacted a follow-up statute, the Clayton Act, to bolster the original act's enforcement mechanisms, *15 U.S.C.S. § 15(a)*. The NMAA contains a similar provision and allows recovery to any person threatened with injury or injured in his business or property by a violation of the NMAA, *N.M. Stat. Ann. § 57-1-3*.

Antitrust & Trade Law > Sherman Act > General Overview

HN4[] Antitrust & Trade Law, Sherman Act

The New Mexico Antitrust Act (NMAA) shall be construed in harmony with judicial interpretations of the federal antitrust laws. This construction shall be made to achieve uniform application of the state and federal laws prohibiting restraints of trade and monopolistic practices, *N.M. Stat. Ann. § 57-1-15*. According to the New Mexico Supreme Court, the underlying purposes behind both the federal and state laws are the same, to establish a public policy of first magnitude; that is, promoting the national interest in a competitive economy. The state and federal antitrust statutes should be read in harmony: It is therefore the duty of the courts to ensure that New Mexico ***antitrust law*** does not deviate substantially from federal interpretations of ***antitrust law***. New Mexico courts therefore look to federal ***antitrust law*** to determine the meaning of provisions of the NMAA.

Civil Procedure > ... > Justiciability > Standing > Injury in Fact

Civil Procedure > ... > Justiciability > Standing > Personal Stake

HN5[] Standing, Injury in Fact

New Mexico has adopted a three-part test to address standing in general: To acquire standing to litigate a particular issue, a party must demonstrate (1) an injury in fact, (2) a causal relationship between the injury and the challenged conduct, and (3) a likelihood that the injury will be redressed by a favorable decision. Even where a party demonstrates these three elements, standing may be denied if the interest the complainant seeks to protect is not within the zone of interests protected or regulated by the statute or constitutional provision the party is relying upon. The concepts of injury and zone of interest are thus intertwined.

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

HN6[] Standing, Sherman Act

An antitrust violation may be expected to cause ripples of harm to flow through the nation's economy; but despite the broad wording of *15 U.S.C.S. § 4* there is a point beyond which the wrongdoer should not be held liable. It is reasonable to assume that Congress did not intend to allow every person tangentially affected by an antitrust violation to maintain an action to recover threefold damages for the injury to his business or property. It is plain, therefore, that the question whether the plaintiff may recover for the injury it allegedly suffered by reason of the defendants' coercion against certain third parties cannot be answered simply by reference to the broad language of *15 U.S.C.S. § 4*.

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

HN7[] **Standing, Sherman Act**

There are five factors to consider in analyzing the issue of standing: (1) whether the plaintiffs were participants in the allegedly restrained market; (2) the directness of the plaintiff's alleged harm; (3) whether there is a better potential plaintiff; (4) whether the plaintiff's theory of damages is speculative; and (5) the complexity of apportioning damages and the risk of duplicative liability.

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN8[] **Private Actions, Sherman Act**

The United States Supreme Court has emphasized the importance of avoiding either the risk of duplicate recoveries on the one hand, or the danger of complex apportionment of damages on the other. The Court feared that such damage calculations would often require additional long and complicated proceedings involving massive evidence and complicated theories.

Opinion by: CELIA FOY CASTILLO

Opinion

[774]** **CASTILLO, Chief Judge.**

[*1] Plaintiff Nass-Romero, seeking to represent a class of New Mexico consumers, brought suit against two credit card companies alleging common law claims, violations of the New Mexico **[***2]** Antitrust Act (NMAA), *NMSA 1978, Sections 57-1-1 through -15* (1891, as amended through 1987), and violations of the New Mexico Unfair

Practices Act (UPA), NMSA 1978, Sections 57-12-1 through -26 (1967, as amended through 2009). The district court dismissed the complaint. Plaintiff appeals the dismissal of only those claims under the NMAA. We affirm.

[**775] I. BACKGROUND

[*2] We begin by providing a short history of the events leading to the filing of this complaint. In 1996, merchants and retail trade associations sued Visa U.S.A. Inc., and MasterCard International Incorporated (Visa, MasterCard, or, together, Defendants) alleging that Defendants violated federal antitrust laws by forcing merchants who accepted their credit cards in the regular course of business to also accept the companies' debit cards. *See* In re Visa Check/MasterMoney Antitrust Litig., 192 F.R.D. 68, 73 (E.D.N.Y. 2000), *aff'd*, 280 F.3d 124 (2d Circ. 2001). The merchants claimed that such a "tying" arrangement was an attempt to monopolize the debit card market, forcing the merchants to pay debit card fees that were higher than those provided by other debit networks. *See id.* A class of more than four million merchants was certified **[***3]** in 2000. *See* id. at 73. In 2003, the parties settled, and Visa and MasterCard agreed to pay more than $3 billion into a settlement fund. *See* In re Visa Check/MasterMoney Antitrust Litig., 297 F. Supp. 2d 503, 506-07 (E.D.N.Y. 2003). The settlement was approved by the court, *see* id. at 512, and affirmed at the appellate level. *See* Wal-Mart Stores, Inc. v. Visa U.S.A., Inc., 396 F.3d 96, 124 (2d Cir. 2005).

[*3] On the heels of that massive lawsuit and settlement, consumers in eighteen other states and the District of Columbia filed class-action suits against Defendants alleging violations of the individual states' antitrust laws and, in some cases, violations of the states' consumer protection laws. The consumers claimed that the tying arrangements that resulted in higher debit processing fees for merchants forced those merchants to pass the cost along to all consumers in the form of higher prices for all retail goods subsequently sold. Courts dismissed the consumer cases in fourteen states and in the District of Columbia. [1] In two states, Florida and Nevada, consumers voluntarily dismissed their complaints. In West Virginia, the state attorney general brought a *parens patriae* action on behalf **[***4]** of the state's consumers, and the attorney general decided to settle the case after the district court denied Defendants' motion for summary judgment. *See W. Va. v. Visa U.S.A., Inc.*, Civil Action No. 30-C-551 (Memorandum Order Denying Defendants' Motion for Summary Judgment, Oct. 14, 2005); Darrell V. McGraw, Jr., *2009 Annual Report: The West Virginia Attorney General's Report on the Activities of the Consumer Protection and Antitrust Divisions*, 62-63, http://www.wvago.gov/pdf/annualreports/2009_report.pdf.

[*4] In New Mexico, Plaintiff filed a 186-paragraph complaint with essentially the same allegations as claimed in the suits filed by the merchants in the federal action and by other state consumers—that the anti-competitive behavior of Visa and MasterCard regarding their debit card fee-processing system forced merchants **[***6]** to pass on costs to consumers. Specifically, Plaintiff claims she bought retail goods from "one or more [m]erchants located in New Mexico who were forced by Visa and/or MasterCard to accept their customers' *Visa Check* and/or *MasterMoney* debit cards when those debit cards were presented by them for payment as a condition of being able to accept Visa and/or **[**776]** MasterCard credit cards." She also alleges that Visa and MasterCard's debit card

Visa U.S.A., Inc.*, 2004 WL 2475281 (Neb. Dist. Ct., Oct. 19, 2004); Kanne v. Visa U.S.A. Inc., 272 Neb. 489, 723 N.W.2d 293 (Neb. 2006); ***Ho v. Visa U.S.A., Inc., 16 A.D.3d 256, 793 N.Y.S.2d 8 (N.Y. App. Div. 2005)***; Crouch v. Crompton Corp., 2004 NCBC LEXIS 6, 2004 WL 2414027 (N.C. Super. Ct., Oct. 26, 2004); Beckler v. Visa U.S.A., Inc., 2004 WL 2475100 (N.D. Dist. Ct., Sept. 21, 2004); *Cornelison v. Visa U.S.A., Inc.*, No. 03-1350 (S.D. Cir. Ct., Sept. 29, 2004); Bennett v. Visa U.S.A. Inc., 198 S.W.3d 747 (Tenn. Ct. App. 2006); Fucile v. Visa U.S.A. Inc., 2004 Vt. Super. LEXIS 42, 2004 WL 3030037 (Vt. Super. Ct., Dec. 27, 2004); *Strang v. Visa U.S.A., Inc.*, 2005 WL 1403769 (Wis. Cir. Ct., Feb. 8, 2005).

transaction fees are significantly higher than the fees charged by providers of debit services and that the alleged debit card scheme imposes a hidden sales tax on every retail transaction affecting hundreds of thousands of consumers in New Mexico, regardless of whether a credit or debit transaction took place during a given purchase. Plaintiff also seeks class certification on behalf of "tens of thousands" of New Mexico consumers who have made purchases of any number of goods from merchants who accepted Visa and MasterCard's credit and debit cards as a form of payment.

[*5] Six years into the proceedings, the district court granted Defendants' motion to dismiss. It ruled that Plaintiff did not have standing to bring a claim under either the NMAA or the UPA **[***7]** and that Plaintiff failed to state a claim under the UPA. The district court dismissed the common law claims of unjust enrichment and of money had and received, finding that Defendants realized no benefit in the alleged scheme. In this appeal, Plaintiff limits her challenge to the dismissal of her claims under the NMAA. Specifically she argues that the district court erred (1) in determining that Plaintiff's injuries were too remote to provide standing to bring suit under the NMAA; and (2) in failing to find that Plaintiff was within the target area of the actions of Visa and MasterCard.

II. DISCUSSION

A. Standard of Review

[*6] ***HN1***[] A motion to dismiss "is infrequently granted because its purpose is to test the law of the claim, not the facts that support it." *Envtl. Improvement Div. v. Aguayo, 1983- NMSC 027, 99 N.M. 497, 499, 660 P.2d 587, 589 (1983)*. In reviewing a district court's decision to dismiss for failure to state a claim, "we accept as true all well-pleaded factual allegations in the complaint and resolve all doubts in favor of the complaint's sufficiency." *N.M. Pub. Schs. Ins. Auth. v. Arthur J. Gallagher & Co., 2008 NMSC 67, ¶ 11, 145 N.M. 316, 198 P.3d 342*. "A Rule [1-0]12([B])(6) [NMRA] motion **[***8]** is *only* proper when it appears that plaintiff can neither recover nor obtain relief under any state of facts provable under the claim." *Valdez v. State, 2002 NMSC 28, ¶ 4, 132 N.M. 667, 54 P.3d 71* (internal quotation marks and citation omitted). "A district court's decision to dismiss a case for failure to state a claim under Rule 1-012(B)(6) is reviewed de novo." *Valdez*, 2002 NMSC 28, ¶ 4. "Whether a party has standing to litigate a particular issue is a question of law, which we review de novo." *City of Sunland Park v. Santa Teresa Servs. Co., 2003 NMCA 106, ¶ 39, 134 N.M. 243, 75 P.3d 843*.

B. Plaintiff Lacks Standing to Bring a Claim Under the NMAA

[*7] We turn first to Plaintiff's assertion of error in the district court's dismissal of the action for lack of standing.***HN2***[] "Dismissals under Rule 1-012(B)(6) are proper when the claim asserted is legally deficient." *Delfino v. Griffo, 2011 NMSC 15, ¶ 9, 150 N.M. 97, 257 P.3d 917*. A plaintiff's standing is a "jurisdictional prerequisite to an action." *ACLU of N.M. v. City of Albuquerque, 2008 NMSC 45, ¶ 9 n.1, 144 N.M. 471, 188 P.3d 1222* (internal quotation marks and citation omitted).

[*8] To evaluate whether Plaintiff has standing sufficient to assert **[***9]** a claim here, we look at the text of the NMAA. ***HN3***[] Antitrust legislation barring monopolistic restraint of trade began with the federal Sherman Antitrust Act (Sherman Act), enacted by Congress in 1890. *See 15 U.S.C. §§ 1 through 7 (2004)*. One year later, in 1891, the New Mexico Territorial Legislature enacted the NMAA that is based on the Sherman Act. *See §§ 57-1-1 through -19*. In 1914, Congress enacted a follow-up statute, the Clayton Act, to bolster the original act's enforcement mechanisms. *See 15 U.S.C. § 15(a)*. The NMAA contains a similar provision and allows recovery to "any person threatened with injury or injured in his business or property" by a violation of the *NMAA. Section 57-1-3*.

[*9] Our determination regarding standing involves a question of statutory interpretation that in turn involves an understanding **[**777]** of the interplay between federal and state ***antitrust law***. ***HN4***[] The NMAA "shall be construed in harmony with judicial interpretations of the federal antitrust laws. This construction shall be made to achieve uniform application of the state and federal laws prohibiting restraints of trade and monopolistic practices." *Section 57-1-15*. According to our Supreme Court, "[t]he underlying **[***10]** purposes behind both the federal and state [l]aws are the same, to establish a public policy of first magnitude; that is, promoting the national interest in a competitive economy." *United Nuclear Corp. v. Gen. Atomic Co., 1979- NMSC 036, 93 N.M. 105, 125, 597 P.2d 290, 310 (1979)* (internal quotation marks and citation omitted). Recently, the Court reaffirmed that the state and federal antitrust statutes should be read in harmony: "It is therefore the duty of the courts to ensure that New Mexico ***antitrust law*** does not deviate substantially from federal interpretations of ***antitrust law***." *Romero v. Philip Morris Inc., 2010 NMSC 35, ¶ 18, 148 N.M. 713, 242 P.3d 280*. New Mexico courts therefore look to federal ***antitrust law*** to determine the meaning of provisions of the NMAA. *See* *State v. Ray Bell Oil Co., 1983- NMCA 068, 101 N.M. 368, 370, 683 P.2d 50, 52 (Ct. App. 1983)*.

[*10] With this as a background, we now turn to Plaintiff's challenge to the district court's finding that she lacked standing under the NMAA. ***HN5***[] New Mexico has adopted a three-part test to address standing in general: "To acquire standing to litigate a particular issue, a party must demonstrate (1) an injury in fact, (2) a causal relationship between the injury **[***11]** and the challenged conduct, and (3) a likelihood that the injury will be redressed by a favorable decision." *City of Sunland Park, 2003 NMCA 106, ¶ 40* (internal quotation marks and citations omitted). Plaintiff here asks us to break the standing question into several parts—the above three-step analysis as well as a discussion of whether consumers were in the "target area" of Defendants' actions or whether the harm to Plaintiff that flowed from Defendants' actions was "foreseeable" enough to create standing in Plaintiff. We decline Plaintiff's invitation because her suggested tangents are subsumed into the basic analysis of standing. "Even where a party demonstrates these three elements, standing may be denied if the interest the complainant seeks to protect is not within the 'zone of interests' protected or regulated by the statute or constitutional provision the party is relying upon. The concepts of injury and zone of interest are thus intertwined." *Id.* In support of her position, Plaintiff cites *Key v. Chrysler Motors Corp., 1996 NMSC 38, 121 N.M. 764, 768, 918 P.2d 350, 354*, for the proposition that a claimant must show "that the interest sought to be protected by the complainant **[***12]** is arguably within the zone of interests to be protected or regulated by the statute[,]" and she contends that she meets this test. *Id.* (internal quotation marks and citation omitted). We first observe that this is not an antitrust case. And while we agree that the cited statement is contained in *Key*, there is more. *Key* goes on to state that in order to assess a plaintiff's standing "we must look to the Legislature's intent as expressed in the [applicable] Act or other relevant authority." *Id.* Here, the Legislature has clearly spoken, requiring that the *NMAA* be interpreted in harmony with federal law.

[*11] Plaintiff also argues that she should have standing because the economic effect on her and other consumers was foreseeable. This argument has been considered elsewhere and, like those other courts, we decline to adopt such a standard for antitrust cases. *See* *Reibert v. Atlantic Richfield Co., 471 F.2d 727, 731 (10th Cir. 1973)* ("Antitrust violations admittedly create foreseeable ripples of injury to individual stockholders, consumers[,] and employees, but the law has not allowed all of these standing to sue for treble damages."); *Southard, 734 N.W.2d at 197* (stating in a parallel case **[***13]** against Visa and MasterCard that "[t]he remoteness doctrine is not based upon a factual inquiry to determine whether the damages claimed were foreseeable or whether they were a proximate cause; rather, it is a legal doctrine incorporating public policy considerations" (internal quotation marks and citation omitted)); *Fucile, 2004 Vt. Super. LEXIS 42, 2004 WL 3030037, at *4* (stating in a parallel case against Visa and MasterCard that "[t]he defendants could not be expected to foresee an antitrust violation affecting **[**778]** merchants to result in increased cost of goods throughout the entire consumer base and to so injure that consumer base as to result in liability to every consumer in the country"). Instead, we follow the direction of the NMAA itself, rely on the general guidance regarding standing found in *Key*, and conduct a standing analysis for the NMAA that is in harmony with federal court interpretations of antitrust jurisprudence. *See* *City of Sunland Park, 2003 NMCA 106, ¶ 41* ("Cases in New Mexico are clear that injury—whether actual or threatened—is not enough by itself to confer standing. To be accorded standing on a particular issue the party must show that the statute or constitutional **[***14]** provision relied on reaches or provides protection against the injury.").

[*12] Having rejected the alternative approaches put forth by Plaintiff, we proceed to evaluate whether Plaintiff has standing based on the provisions of the NMAA and on federal antitrust jurisprudence. Both parties agree that the relevant precedent guiding a standing analysis in federal antitrust litigation is *Associated General Contractors v. California State Council of Carpenters (AGC), 459 U.S. 519, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*. There, the

United States Supreme Court suggested that the loose concepts of "zone of interest" and "foreseeability" are not adequate to confer standing.

> ***HN6***[] An antitrust violation may be expected to cause ripples of harm to flow through the [n]ation's economy; but despite the broad wording of [*15 U.S.C.] § 4* there is a point beyond which the wrongdoer should not be held liable. It is reasonable to assume that Congress did not intend to allow every person tangentially affected by an antitrust violation to maintain an action to recover threefold damages for the injury to his business or property.
>
> It is plain, therefore, that the question whether the [plaintiff] may recover for the injury **[***15]** it allegedly suffered by reason of the defendants' coercion against certain third parties cannot be answered simply by reference to the broad language of [*15 U.S.C.] § 4*.

Id. at 534-35 (internal quotation marks and citations omitted).

[*13] In *AGC*, the Court was concerned with "keeping the scope of complex antitrust trials within judicially manageable limits." *Id. at 543*. In this regard, the *AGC* Court ***HN7***[] set out five factors to consider in analyzing the issue of standing: (1) whether the plaintiffs were participants in the allegedly restrained market; (2) the directness of the plaintiff's alleged harm; (3) whether there is a better potential plaintiff; (4) whether the plaintiff's theory of damages is speculative; and (5) the complexity of apportioning damages and the risk of duplicative liability. *Id. at 538-45*. We now turn to each of the factors and evaluate them based on Plaintiff's allegations.

1. Market Participation

[*14] The market at issue is the debit processing service of Visa and MasterCard that involves Defendants, their member banks, and the merchants who honor their cards. Plaintiff is neither a consumer nor a competitor in the market allegedly being restrained by Defendants and does not **[***16]** appear in that chain of distribution; thus, she cannot be identified as a consumer of the service provided by Visa and MasterCard. Plaintiff, instead, is a consumer of goods sold by merchants who happen to be part of the affected market. Other jurisdictions agree. *See, e.g., Kanne, 723 N.W.2d at 298* (concluding that the consumer-plaintiffs were "not competitors in the allegedly affected market, which is the business of providing debit network processing services to merchants . . . [n]or . . . consumers of those services"); *Southard, 734 N.W.2d at 199* (characterizing consumer plaintiffs as "neither consumers of the defendants' products nor competitors of the defendants").

2. Directness of Harm

[*15] Here, Plaintiff alleges that Defendants' tying arrangements led to "exorbitant fees . . . passed on to . . . Plaintiff and [c]lass members in the form of artificially higher and advanced prices." Plaintiff's allegations do not show that she was directly harmed by the actions of Visa and MasterCard; **[**779]** nor do they show that she was indirectly harmed through the chain of distribution of the debit card services. The alleged harm caused by Defendants' tying scheme takes an abrupt left turn after reaching **[***17]** the merchants and branches off into supposed higher prices for all goods throughout New Mexico, mutating into a different form of harm to consumers. Plaintiff's injury is better characterized as remote or derivative. *See Southard, 734 N.W.2d at 199* ("Clearly, the injuries alleged by the plaintiffs are not even indirect, as the plaintiffs are not in the chain of distribution. Their injuries are better described as derivative."); *Ho, 793 N.Y.S.2d at 9* ("Those injuries are too remote and derivative to countenance such a cause of action.").

3. A Better Plaintiff

[*16] In the case before us, Plaintiff is a consumer who is not directly affected by the alleged tying arrangement. The better plaintiffs to challenge Defendants' business practices have already come forward. They are the merchants themselves, led by Wal-mart, who first brought suit in 1996 and who settled with Visa and MasterCard in 2003, setting up a $3.1 billion fund to make whole the merchants affected by debit card transaction fees. Preventing Plaintiff here from bringing a claim under the NMAA will not "leave a significant antitrust violation undetected or unremedied." *AGC, 459 U.S. at 542*; *see* *Ho, 793 N.Y.S.2d at 9* (finding that Visa **[***18]** and MasterCard "have been subjected to judicial remediation for their wrongs, and any recovery here would be duplicative").

4. Speculative Damages

[*17] We now evaluate the nature of Plaintiff's alleged damages. Plaintiff asserts that her damages are based on the overcharges she paid on every retail item she bought from every merchant in New Mexico that accepted Visa and MasterCard credit and debit cards over the course of several years. By way of example, Plaintiff would ask a court to find that paying, say, $1.99 for a dozen eggs rather than $1.89 during a random shopping trip to a particular grocer was the indirect result of the excessive debit card transaction fees paid by the grocer to the member banks of Visa and MasterCard. Plaintiff would be alleging that for this particular purchase, and for the millions of small purchases made by "tens of thousands" of New Mexicans at dozens or perhaps hundreds of retail outfits throughout the state, the merchant chose not to absorb the debit card transaction fee but rather passed that cost on to the consumer. Such a calculation would ignore the countless considerations that go into the set price of any given product at any given store on any given **[***19]** day. *See* *Kanne, 723 N.W.2d at 299* (stating that "the claimed price increases over a period of years could have resulted from myriad independent reasons unrelated to the alleged violation" (internal quotation marks and citation omitted)). Because the alleged damages could have been produced by numerous independent factors, Plaintiff's damage claim is speculative.

5. Complexity of Apportioning Damages; Risk of Duplicative Liability

[*18] ***HN8***[] The United States Supreme Court has emphasized "the importance of avoiding either the risk of duplicate recoveries on the one hand, or the danger of complex apportionment of damages on the other." *AGC, 459 U.S. at 543-44*. The Court feared that such damage calculations "would often require additional long and complicated proceedings involving massive evidence and complicated theories." *Id. at 544* (internal quotation marks and citation omitted). As the Maine Superior Court stated in a parallel case against Defendants,

> [t]o determine what portion of any overcharge was passed on by any given merchant, with respect to which products, and to which consumers is a task of monumental uncertainty and complexity. Depending on their other costs, their competitive position **[***20]** in the market, their profit margins, and the specific products they sold, some merchants could have absorbed a substantial portion of any overcharge instead of passing it on.

[780]** *Knowles, 2004 Me. Super. LEXIS 227, 2004 WL 2475284, at *6*. "For any given consumer, the issue is even more complicated and speculative because the inquiry would involve what items that particular consumer purchased, what that consumer paid for each item, and what percentage of overcharge, if any, was contained in that price." *Id.*; *see* Kellen S. Dwyer, *With the* Illinois Brick *Wall Down, What's Left? Determining Antitrust Standing Under State Law*, *3 J. Bus. Entrepreneurship & L. 255, 279* (2010) (hereinafter Dwyer) ("Showing the pass-on would require an estimation of the elasticity of demand for almost every product sold in the state. Even if that feat were possible, it is hard to imagine how the funds could be apportioned."). In addition, the risk of duplicative liability is apparent. Defendants settled with merchants nine years ago for more than $3 billion and thus were made to pay for the alleged antitrust violations. Under Plaintiff's theory of the case, merchants who benefitted from the settlement could conceivably **[***21]** have turned around and lowered the prices of their goods, thus providing consumers with relief from any previously passed-along costs emanating from the debit card transaction fees. Apportioning damages would be a complex task, and there is a risk of duplicative damages.

[*19] The *AGC* factors do not fall in Plaintiff's favor. Taking the factors in sum, we conclude that Plaintiff's claim fails the test and fails to prove she has standing to bring a claim under the NMAA.

[*20] As an alternative, Plaintiff argues that *AGC* should not apply to her claim at all because the facts of *AGC* can be distinguished from the facts of her case. Plaintiff points out that she is a consumer facing overcharges, whereas the plaintiff labor union in *AGC* was not a consumer and was not subject to overcharges. However, the Court in *AGC* made it clear that its five-factor analysis applied to the broad spectrum of antitrust claims, including those involving consumers. *See* *459 U.S. at 538* (stating that "the Sherman Act was enacted to assure customers the benefits of price competition, and our prior cases have emphasized the central interest in protecting the economic freedom of participants in the relevant market"). And the **[***22]** author of *AGC*, Justice Stevens, more recently reiterated the broad application of that five-factor analysis. *See* *Verizon Commc'ns Inc. v. Law Offices of Curtis V. Trinko, 540 U.S. 398, 416, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)* (Stevens, Souter & Thomas, JJ., concurring) (applying the *AGC* factors and reasoning that "we have eschewed a literal reading of [*15 U.S.C.] § 4*, particularly in cases in which there is only an indirect relationship between the defendant's alleged misconduct and the plaintiff's asserted injury"); *see also* *Hawaii v. Standard Oil Co., 405 U.S. 251, 264 n.14, 92 S. Ct. 885, 31 L. Ed. 2d 184 (1972)* ("The lower courts have been virtually unanimous in concluding that Congress did not intend the antitrust laws to provide a remedy in damages for all injuries that might conceivably be traced to an antitrust violation."). We conclude that *AGC*is applicable to the case before us even though its facts are distinguishable.

[*21] Plaintiff further argues, though, that the NMAA offers a broader basis for consumers to bring an antitrust action and that it diverges from federal law by allowing suits to be brought by those "indirectly" harmed by monopolistic behavior. *Section 57-1-3*. **[***23]** The NMAA was modified in 1979 to counteract the U.S. Supreme Court's decision in *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*, which had barred antitrust suits by "indirect" purchasers in a distribution scheme. New Mexico, as did other states, responded by clarifying its statute to allow suits by those claiming to have been harmed indirectly. Plaintiff thus suggests that the revised NMAA deserves an expansive reading that finds a broad legislative intent to protect consumers.

[*22] First, as stated above, we reject Plaintiff's claim that she is an indirect purchaser in the distribution scheme at hand; rather, her claim is distinct from and derivative of a distribution network for debit card services that involves Defendants, their member banks, and merchants. Further, Plaintiff misreads the Supreme Court's opinion in *Illinois Brick* and conflates its statutory analysis with an analysis of standing. The *Illinois Brick* Court was focused not on standing **[**781]** but rather on a straight interpretation of the statute amid the Court's concerns about allowing multiple treble damages liability throughout a given chain of distribution of goods. *Id. at 736-37*. The Court **[***24]** was careful to distinguish between the issue presented—the question of whether the federal antitrust act allows an indirect purchaser to bring suit—and the broader issue of standing: "[W]e do not address the standing issue, except to note . . . that the question of which persons have been injured by an illegal overcharge . . . *is analytically distinct* from the question of which persons have sustained injuries too remote to give them standing to sue for damages under [*15 U.S.C.] § 4*." *Illinois Brick, 431 U.S. at 728 n.7* (emphasis added). Even the *Illinois Brick* dissent by Justice Brennan acknowledged that "there is a point beyond which the wrongdoer should not be held liable." *Id. at 760* (Brennan, Marshall, & Blackmun, JJ., dissenting). The dissent continued: "Courts have therefore developed various tests of antitrust 'standing' . . . to define that point." *Id.* The full Court, in a subsequent case, reiterated that standing requirements and questions of "which persons have sustained injuries that are too remote" remain "[a]nalytically distinct" from *Illinois Brick*'s bar against indirect purchasers. *Blue Shield v. McCready, 457 U.S. 465, 476, 102 S. Ct. 2540, 73 L. Ed. 2d 149 (1982)* (emphasis, **[***25]** internal quotation marks, and citation omitted). Thus, "[b]ecause *Illinois Brick* did not alter the Court's antitrust standing jurisprudence, *Illinois Brick*'s repeal should imply nothing about standing." *Dwyer, supra, at 263* (emphasis added).

[*23] Plaintiff can point to only one other jurisdiction that has ruled in favor of consumers in a similar case against Defendants: *W. Virginia*, Civil Action No. 30-C-551. This is an unpublished decision in which the court prefaces its discussion by stating that it was not conducting a full analysis of the issue of standing. *Id.* Further, the West Virginia district court's discussion of *Illinois Brick* repealer statutes suffers from lack of nuance and falls short of a full assessment of standing in such cases. Thus, it stands alone as an unreliable outlier against every other jurisdiction that has denied standing to similarly situated plaintiffs bringing derivative actions against Visa and MasterCard.

See, e.g., Kanne, 723 N.W.2d at 299-300; *Knowles, 2004 Me. Super. LEXIS 227, 2004 WL 2475284 at *3*; *Stark*, 2004 WL 1879003 at *3-4. The Minnesota Supreme Court, in a follow-up case to its consumer suits against Defendants, observed that "*Illinois Brick* addressed **[***26]** the scope of antitrust injury, not standing, under the Clayton Act." *Lorix v. Crompton Corp., 736 N.W.2d 619, 629 (Minn. 2007)*. The court concluded: "Whatever the precise prudential limits on Minnesota antitrust standing, we do not believe that the legislature intended to create 'consumer standing' by allowing every person in the state to sue for an antitrust violation simply by virtue of his or her status as a consumer." *Id. at 632*. We similarly conclude that Plaintiff lacks standing to bring a claim against Visa and MasterCard under the NMAA for the alleged tying scheme that forced merchants to accept Defendants' debit cards at inflated transaction-fee rates.

III. CONCLUSION

[*24] For the foregoing reasons, we affirm the decision of the district court.

[*25] IT IS SO ORDERED.

CELIA FOY CASTILLO, Chief Judge

Judges: David Alan Ezra, United States District Judge.

Opinion by: David Alan Ezra

Opinion

ORDER: (1) GRANTING DEFENDANTS' MOTION TO DISMISS AND (2) GRANTING PLAINTIFF LEAVE TO AMEND

On April 18, 2012, the Court heard Defendants' Motion to Dismiss. Richard E. Lehrfeld, Esq., appeared at the hearing on behalf of Plaintiff Lac Hoilien ("Plaintiff"); David B. Rosen, Esq., appeared at the hearing on behalf of Defendants OneWest Bank, FSB ("OneWest") and Mortgage Electronic Registration Systems, Inc. ("MERS") (collectively, "Moving Defendants"). After reviewing the motion and the supporting and opposing memoranda, the Court GRANTS Moving Defendants' Motion to Dismiss. (Doc. # 26.)

BACKGROUND

According to the First Amended Complaint ("FAC") and documents of which the Court takes judicial notice, on or about March 9, 2007, Plaintiff Lac Hoilien ("Plaintiff") entered into a loan transaction **[*2]** for $520,000 with IndyMac Bank, F.S.B. ("IndyMac"), which was secured by a mortgage encumbering real property located at 95 Wilikona Place, Wailuku, HI 96793 (the "Subject Property"). [1] ("RJN," Doc. # 29, Ex. C; see also "FAC," Doc. # 24 ¶¶9-10.) The Mortgage was recorded in the State of Hawaii Bureau of Conveyances ("Bureau" or "Bureau of Conveyances") on April 13, 2007. [2] (RJN, Ex. C.) IndyMac is listed on the Mortgage as the lender, and MERS is listed as the mortgagee "acting solely as a nominee for Lender and Lender's successors and assigns." (Id.) Plaintiff alleges that she had the sole ownership interest in the Subject Property when an IndyMac representative offered to loan her money to pay off her "then existing loan of approximately $200,000.00 and provide her an additional sum of approximately $300,000.00." (FAC ¶7.) Plaintiff alleges that IndyMac told her that after it "paid off [her existing loan] she would receive the balance" of the $520,000 loan through an escrow account with Defendants Stewart Title Guaranty Co., Inc. ("Stewart"), and Richmond Title Services, Inc ("Richmond"), but that she never received the money. (Id. ¶ 9.)

MERS assigned the Mortgage to OneWest by an Assignment of Mortgage recorded in the Bureau of Conveyances ("Bureau") on January 11, 2010. (RJN, Ex. D.) On January 11, 2010, OneWest, as mortgagee, recorded in the Bureau a Notice of Mortgagee's Intention to Foreclose Under Power of Sale. (Id., Ex. E.) On March 24, 2010, OneWest recorded in the Bureau a Mortgagee's Affidavit of Foreclosure Under Power of Sale. (Id., Ex. F.) On July 12, 2010, a Quitclaim Deed naming OneWest as grantee was recorded in the Bureau. (Id., Ex. G.)

On July 27, 2010, OneWest commenced an ejectment action in the District Court of the Second Circuit of Hawaii ("Maui District Court"). (Id., Ex. H.) On January 13, 2011, the Maui District Court entered a Judgment for Possession and a Writ of Possession in favor of OneWest. [3] (Id., Exs. I-J.) According to Defendants, on February 9, 2011, Plaintiff appealed the ejectment action, which is currently **[*5]** pending in the Intermediate Court of Appeals of the State of Hawaii. (See Doc. # 26 at 6.)

On June 6, 2011, Plaintiff, proceeding pro se, filed a Complaint in this Court against Defendants OneWest and MERS. (Doc. # 1.) On November 20, 2011, Plaintiff, represented by counsel, filed the present First Amended Complaint against Defendants OneWest, MERS, Stewart, and Richmond. (Doc. # 24.) The FAC asserts the following claims:

•Count I: Injunctive Relief (FAC ¶¶ 44-52);

---

[1] The Court notes that Plaintiff, while represented **[*3]** by counsel, previously filed a complaint in this Court regarding the same subject property, but voluntarily dismissed her suit on June 4, 2010. See Hoilien v. OneWest Bank, No. 10-00121, Doc. # 11. Plaintiff has also filed three other suits in this Court against mortgage lenders regarding other properties. See *Hoilien v. Bank of Am., No. 10-00761, 2011 U.S. Dist. LEXIS 89155, 2011 WL 3494523 (D. Haw. Aug. 10, 2011)*; *Hoilien v. Bank of Am., No. 10-00760, 2011 U.S. Dist. LEXIS 67662, 2011 WL 251831 (D. Haw. June 23, 2011)*; *Hoilien v. Bank of Am., No. 10-00712, 2011 U.S. Dist. LEXIS 27863, 2011 WL 976699 (D. Haw. Mar. 17, 2011)*.

[2] Defendants have submitted copies of the Mortgage, Assignment of Mortgage, Notice of Mortgagee's Intention to Foreclose Under Power of Sale, Mortgagee's Affidavit of Foreclosure Under Power of Sale, and Mortgagee's Quitclaim Deed Pursuant to Power of Sale as exhibits to their Request for Judicial Notice. (Doc. # 29, Exs. C-G.) The Court takes judicial notice of those documents, which are public documents recorded in the Bureau of Conveyances. See ***United States v. 14.02 Acres of Land More or Less in Fresno Cnty., 547 F.3d 943, 955 (9th Cir. 2008)*** (citing *Lee v. City of Los Angeles, 250 F.3d 668, 688 (9th Cir. 2001)* ("Although, as a general rule, a **[*4]** district court may not consider materials not originally included in the pleadings in deciding a Rule 12 motion, *Fed. R. Civ. P. 12(d)*, it 'may take judicial notice of matters of public record' and consider them without converting a Rule 12 motion into one for summary judgment.")).

[3] Moving Defendants requested that the Court take judicial notice of their Verified Complaint for Ejectment and the Maui District Court orders. Pursuant to *Rule 201 of the Federal Rules of Evidence*, the court may take judicial notice of papers filed in state court and of state court orders. See *Porter v. Ollison, 620 F.3d 952, 955 n.1 (9th Cir. 2010)*; ***Burbank-Glendale-Pasadena Airport Auth. v. City of Burbank, 136 F.3d 1360, 1364 (9th Cir. 1998)***. The state court documents are relevant to the present matter. Therefore, the Court grants the request for judicial notice.

• Count II: Wrongful Sale of Subject Property (id. ¶¶ 53-54);

• Count III: Fraudulent Concealment-Tolling of Statute (id. ¶¶ 55-56);

• Count IV: Unfair or Deceptive **[*6]** Acts or Practices (id. ¶¶ 57-68);

• Count V: Truth in Lending Act Violations: Loan Rescission and Recoupment (id. ¶¶ 69-85);

• Count VI: Truth in Lending Act Violations: Loan Damages (id. ¶¶ 86-88);

• Count VII: Real Estate Settlement Procedures Act "RESPA" Violations (id. ¶¶ 89-91);

• Count VIII: Fraud (id. ¶¶ 92-100);

• Count IX: Sherman Anti-Trust Act Violations (id. ¶¶ 101-113);

• Count X: Hawaii Anti-Trust/Anti-Monopoly Acts Violations (id. ¶¶ 114-117);

• Count XI: Failure to Act in Good Faith (id. ¶¶ 118-123);

• Count XII: Unjust Enrichment (id. ¶¶ 124-129);

• Count XIII: Mistake (id. ¶¶ 130-131);

• Count XIV: Hawaii Bureau of Conveyance Regulations Violations (id. ¶¶ 132-138);

• Count XV: Improper Restrictions Resulting from Securitization Leaves Note and Mortgage Unenforceable (id. ¶¶ 139-146);

• Count XVI: Wrongful Conversion of Note - Mortgagor Never Consented to Securitization (id. ¶¶ 147-152);

• Count XVII: Breach of Contract (id. ¶¶ 153-158);

• Count XVIII: Conversion (id. ¶¶ 159-162).

On December 23, 2011, Defendants OneWest and MERS filed the instant Motion to Dismiss First Amended Complaint. ("Mot.," Doc. # 26.) On February 13, 2012, Defendants entered a Notice of No Opposition Having **[*7]** Been Filed to their Motion to Dismiss after Plaintiff failed to submit an opposition by February 6, 2012, the filing deadline. (Doc. # 35.) On February 17, 2012, Plaintiff's counsel informed this Court that counsel's wife, who also acted as his sole legal assistant, had been in a car accident on February 6, 2012, and that consequently, counsel was unable to timely file an Opposition. In light of counsel's personal circumstances, the Court continued the hearing and gave Plaintiff until March 28, 2012 to file an Opposition.

On March 28, 2012, Plaintiff filed her Opposition to the Motion. ("Opp'n," Doc. # 38.) In the Opposition, Plaintiff's counsel explained that the FAC had been erroneously entwined with a filing from another case, "and the wrong Amended Complaint was filed in this case." (Id. at 4.) Plaintiff's counsel further explained that it was not until February 27, 2012 that he "was made aware by the Court that his pleadings were incorrect." (Id.) Plaintiff attached the "correct" FAC to the Opposition, requesting that the Court "allow and consider the pleading to be superseded by the attached FAC." (Id. at 5.)

The Court declines Plaintiff's request. A request for leave to amend **[*8]** should have been brought by a separation motion, not in an opposition to Defendants' motion to dismiss. *Federal Rule of Civil Procedure 15(a)(1)* allows a party to amend its pleading once as a matter of course within: (a) 21 days after serving it, or (B) 21 days after service of a responsive pleading or 21 days after service of a motion under *Rule 12(b)*, *(e)*, or *(f)*, whichever is earlier. However, where, as here, a party has already amended its pleading once as a matter of course, any subsequent amendment is permitted "only with the opposing party's written consent or the court's leave." *Fed. R.*

Civ. P. 15(a)(2). Since Plaintiff has neither properly requested nor received leave from the Court to amend her Complaint, the FAC remains the operative complaint.

On March 4, 2012, Defendants submitted a Reply in further support of their Motion to Dismiss. (Doc. # 39.)

STANDARD OF REVIEW

I. *Federal Rule of Civil Procedure 12(b)(6)*

Pursuant to *Rule 12(b)(6) of the Federal Rules of Civil Procedure* ("Rule"), a motion to dismiss will be granted where the plaintiff fails to state a claim upon which relief can be granted. Review is limited to the contents of the complaint. See *Clegg v. Cult Awareness Network, 18 F.3d 752, 754 (9th Cir. 1994)*. **[*9]** A complaint may be dismissed as a matter of law for one of two reasons: "(1) lack of a cognizable legal theory, or (2) insufficient facts under a cognizable legal claim." *Robertson v. Dean Witter Reynolds, Inc., 749 F.2d 530, 534 (9th Cir. 1984)* (citation omitted). "A trial court may dismiss a claim sua sponte under *[Rule] 12(b)(6)*. Such a dismissal may be made without notice where the claimant cannot possibly win relief." *Omar v. Sea-Land Serv., Inc., 813 F.2d 986, 991 (9th Cir. 1987)*. Allegations of fact in the complaint must be taken as true and construed in the light most favorable to the plaintiff. See *Livid Holdings Ltd. v. Salomon Smith Barney, Inc., 416 F.3d 940, 946 (9th Cir. 2005)*.

A complaint need not include detailed facts to survive a *Rule 12(b)(6)* motion to dismiss. See *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555-56, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. In providing grounds for relief, however, a plaintiff must do more than recite the formulaic elements of a cause of action. See *id. at 556-57*; see also *McGlinchy v. Shell Chem. Co., 845 F.2d 802, 810 (9th Cir. 1988)* ("[C]onclusory allegations without more are insufficient to defeat a motion to dismiss for failure to state a claim.") (citation omitted). **[*10]** "The tenet that a court must accept as true all of the allegations contained in a complaint is inapplicable to legal conclusions," and courts "are not bound to accept as true a legal conclusion couched as a factual allegation." *Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937, 1949, 173 L. Ed. 2d 868 (2009)* (internal quotations and citations omitted). Thus, "bare assertions amounting to nothing more than a formulaic recitation of the elements" of a claim "are not entitled to an assumption of truth." *Moss v. U.S. Secret Serv., 572 F.3d 962, 969 (9th Cir. 2009)* ("[T]he non-conclusory 'factual content,' and reasonable inferences from that content, must be plausibly suggestive of a claim entitling the plaintiff to relief.") (internal quotations and citations omitted).

A court looks at whether the facts in the complaint sufficiently state a "plausible" ground for relief. See *Twombly, 550 U.S. at 570*. A plaintiff must include enough facts to raise a reasonable expectation that discovery will reveal evidence and may not just provide a speculation of a right to relief. *Id. at 586*. When a complaint fails to adequately state a claim, such deficiency should be "exposed at the point of minimum expenditure of time and money by **[*11]** the parties and the court." *Id. at 558* (citation omitted). If a court dismisses the complaint or portions thereof, it must consider whether to grant leave to amend. *Lopez v. Smith, 203 F.3d 1122, 1130 (9th Cir. 2000)* (finding that leave to amend should be granted "if it appears at all possible that the plaintiff can correct the defect") (internal quotations and citations omitted).

II. Federal Rule of Civil Procedure 8

Federal Rule of Civil Procedure 8 mandates that a complaint include a "short and plain statement of the claim," *Fed. R. Civ. P. 8(a)(2)*, and that each allegation "be simple, concise, and direct." *Fed. R. Civ. P. 8(d)(1)*. A complaint that is so confusing that its "'true substance, if any, is well disguised'" may be dismissed for failure to satisfy *Rule 8*. *Hearns v. San Bernardino Police Dep't, 530 F.3d 1124, 1131 (9th Cir. 2008)* (quoting *Gillibeau v. City of Richmond, 417 F.2d 426, 431 (9th Cir. 1969))*; see also *McHenry v. Renne, 84 F.3d 1172, 1180 (9th Cir. 1996)* ("Something labeled a complaint but written ..., prolix in evidentiary detail, yet without simplicity, conciseness and clarity as to whom plaintiffs are suing for what wrongs, fails to perform the essential functions **[*12]** of a complaint."); *Nevijel v. N. Coast Life Ins. Co., 651 F.2d 671, 673 (9th Cir. 1981)* ("A complaint which fails to comply with [*Rule 8*] may be dismissed with prejudice[.]").

Put slightly differently, a complaint may be dismissed for failure to comply with Rule 8 where it fails to provide the defendants fair notice of the wrongs they have allegedly committed. See McHenry, 84 F.3d at 1178-80 (affirming dismissal of complaint where "one cannot determine from the complaint who is being sued, for what relief, and on what theory, with enough detail to guide discovery"); cf. Mendiondo v. Centinela Hosp. Med. Ctr., 521 F.3d 1097, 1105 n. 4 (9th Cir. 2008) (finding dismissal under Rule 8 was in error where "the complaint provide[d] fair notice of the wrongs allegedly committed by defendants and [did] not qualify as overly verbose, confusing, or rambling"). Rule 8 requires more than "the-defendant-unlawfully-harmed-me accusation[s]" and "[a] pleading that offers labels and conclusions or a formulaic recitation of the elements of a cause of action will not do." Iqbal, 129 S. Ct. at 1949 (citations and quotations omitted). "The propriety of dismissal for failure to comply with Rule 8 does not **[*13]** depend on whether the complaint is wholly without merit." McHenry, 84 F.3d at 1179.

The court may "begin by identifying pleadings that, because they are no more than conclusions, are not entitled to the assumption of truth." Iqbal, 129 S. Ct. at 1950. Legal conclusions must be supported by factual allegations. Id. "When there are well-pleaded factual allegations, a court should assume their veracity and then determine whether they plausibly give rise to an entitlement to relief." Id.

III. Federal Rule of Civil Procedure 9(b)

Federal Rule of Civil Procedure 9(b) requires that "[i]n alleging fraud or mistake, a party must state with particularity the circumstances constituting fraud or mistake." Fed. R. Civ. P. 9(b). Under Ninth Circuit law, "Rule 9(b) requires particularized allegations of the circumstances constituting fraud." In re GlenFed, Inc. Sec. Litig., 42 F.3d 1541, 1547-48 (9th Cir. 1994) (en banc), superseded on other grounds by 15 U.S.C. § 78u-4.

In their pleadings, plaintiffs must include the time, place, and nature of the alleged fraud; "mere conclusory allegations of fraud are insufficient" to satisfy this requirement. Id. at 1548 (quoting Moore v. Kayport Package Express, Inc., 885 F.2d 531, 540 (9th Cir. 1989)). **[*14]** "[T]he circumstances constituting the alleged fraud [must] 'be specific enough to give defendants notice of the particular misconduct . . . so that they can defend against the charge and not just deny that they have done anything wrong.'" Kearns v. Ford Motor Co., 567 F.3d 1120, 1124 (9th Cir. 2009) (quoting Bly-Magee v. California, 236 F.3d 1014, 1019 (9th Cir. 2001)); see also Moore, 885 F.2d at 540 (finding that Rule 9(b) requires a plaintiff to attribute particular fraudulent statements or acts to individual defendants). However, "[m]alice, intent, knowledge, and other conditions of a person's mind may be alleged generally." Fed. R. Civ. P. 9(b); see also In re GlenFed, Inc. Sec. Litig., 42 F.3d at 1547 ("We conclude that plaintiffs may aver scienter . . . simply by saying that scienter existed."); Walling v. Beverly Enter., 476 F.2d 393, 397 (9th Cir. 1973) (finding that Rule 9(b) "only requires the identification of the circumstances constituting fraud so that the defendant can prepare an adequate answer from the allegations" (citations omitted)).

A motion to dismiss for failure to plead with particularity is the functional equivalent of a motion to dismiss under Rule 12(b)(6) **[*15]** for failure to state a claim. Vess v. Ciba-Geigy Corp. USA, 317 F.3d 1097, 1107 (9th Cir. 2003). In considering a motion to dismiss, the court is not deciding the issue of "whether a plaintiff will ultimately prevail but whether the claimant is entitled to offer evidence to support the claims." Scheuer v. Rhodes, 416 U.S. 232, 236, 94 S. Ct. 1683, 40 L. Ed. 2d 90 (1974) overruled on other grounds by Davis v. Scherer, 468 U.S. 183, 104 S. Ct. 3012, 82 L. Ed. 2d 139 (1984).

DISCUSSION

Moving Defendants contend that the FAC is based on conclusory and unsupported allegations and therefore should be dismissed for failure to comply with Federal Rule of Civil Procedure 12(b)(6). [4] This Court agrees.

---

[4] The Court notes that Plaintiff's FAC is a boilerplate complaint alleging many of the same causes of action that she has alleged in previous actions against mortgage lenders and that have been alleged in numerous actions by other pro se plaintiffs before this Court. This Court has dismissed these complaints for failure to state a claim, explaining in detail the complaints' deficiencies.

I. Role of MERS

It appears that Plaintiff's allegations are based in part on her misconception of MERS' role in the mortgage lending process. For example, Plaintiff alleges that IndyMac or OneWest "sold and/or transferred the Note and Mortgage to, or through 'MERS' without proper endorsement or assignments during the life of the loan, resulting in said Defendants not having the right and interest to foreclose upon the subject property." (FAC ¶ 33.) Plaintiff further alleges that "none of said Defendants [IndyMac, OneWest, or MERS] have Plaintiff's original Note and as a consequence, they have no authority to enforce the provisions of the Mortgage and Note against Plaintiff, or Plaintiff's property." (Id. ¶ 34.)

As a preliminary matter, the Court notes that MERS acted solely as a nominee for the Lenders. (See RJN, Ex. C.) Moreover, MERS assigned its interest in the Mortgage to OneWest prior to One West's initiation of foreclosure proceedings on January 10, 2010. (See id., Exs. D, E.) As such, MERS did not have any role in the foreclosure process, which was conducted solely by OneWest. (See id., Ex. F.) Therefore, Plaintiff's **[*17]** assertions that MERS attempted to enforce provisions of the Mortgage or Note are wholly without merit.

Further, insofar as Plaintiff's claims are based on allegations that MERS' involvement invalidly split the Note and Mortgage, the Court concludes that these contentions are not tenable in light of the Ninth Circuit's decision in Cervantes v. Countrywide Home Loans, which expressly rejected the "note-splitting" theory and upheld the MERS system. See *656 F.3d 1034, 1044 (9th Cir. 2011)* ("Even if we were to accept the plaintiffs' premises that MERS is a sham beneficiary and the note is split from the deed, we would reject the plaintiffs' conclusion that, as a necessary consequence, no party has the power to foreclose."); see also *Velasco v. Sec. Nat'l Mortg. Co., 823 F. Supp. 2d 1061, 2011 U.S. Dist. LEXIS 118956, 2011 WL 4899935, at *11 (D. Haw. Oct. 14, 2011)* ("[A]ny argument that MERS lacked the authority to assign its right to foreclose and sell the property based on its status as 'nominee' cannot stand in light of Cervantes."); *Johnson v. Homecomings Fin., 2011 U.S. Dist. LEXIS 106216, 2011 WL 4373975, at *7 (S.D. Cal. Sept. 20, 2011)* (rejecting the note-splitting theory as a "discredited theory."). [5]

Accordingly, Plaintiff's allegations that the foreclosure was improper solely because of MERS' involvement are not viable.

II. Count I: Injunctive Relief

Plaintiff seeks an injunction to enjoin OneWest from selling, transferring, or "denying Plaintiff possession" of the Subject **[*19]** Property during the pendency of the action. (FAC ¶ 45.)

As an initial matter, to the extent that Plaintiff seeks a preliminary injunction, she may not do so in a complaint. Pursuant to *Local Rule 10.2*, an "application for a temporary restraining order or preliminary injunction shall be made in a document separate from the complaint."

See, e.g., *Vertido v. GMAC Mortg. Corp., 2012 U.S. Dist. LEXIS 5117, 2012 WL 139212 (D. Haw. Jan. 17, 2012)*; *Hoilien v. Bank of Am., 2011 U.S. Dist. LEXIS 89155, 2011 WL 3494523 (D. Haw. Aug. 10, 2011)*; *Hoilien v. Bank of Am., 2011 U.S. Dist. LEXIS 67662, 2011 WL 2518731 (D. Haw. June 23, 2011)*; **[*16]** *Phillips v. Bank of Am., 2011 U.S. Dist. LEXIS 6745, 2011 WL 240813 (D. Haw. Jan. 21, 2011)*.

[5] In addition to the Ninth Circuit's instruction **[*18]** on MERS, this Court has previously instructed Plaintiff on the insufficiency of bald assertions about MERS. For example, in a 2011 order in another case filed by Plaintiff against mortgage lenders, this Court noted:

> Plaintiff appears to be alleging that MERS may not foreclose, or has improperly foreclosed, because it is not a holder of the note. As it stands, however, Plaintiff's Count XII makes little sense because standing is a requirement for a plaintiff in order to proceed in a lawsuit, not one that a defendant must establish. Further, Plaintiff's statement that MERS has no legal standing to foreclose is a conclusory allegation insufficient to state a claim upon which relief may be granted.

*Hoilien v. Bank of Am., 2011 U.S. Dist. LEXIS 89155, 2011 WL 3494523, at *11 (D. Haw. Aug. 10, 2011)*; see also *Hoilien v. Bank of Am., 2011 U.S. Dist. LEXIS 67662, 2011 WL 251831, at *13 (D. Haw. June 23, 2011)*; *Hoilien v. Bank of Am., 2011 U.S. Dist. LEXIS 27863, 2011 WL 976699, at *14 (D. Haw. Mar. 17, 2011)*.

Moreover, the Court follows the well-settled rule that a claim for injunctive relief cannot stand as an independent cause of action. See, e.g., *Long v. JP Morgan Chase Bank, N.A., ___ F. Supp. 2d ___, 2012 U.S. Dist. LEXIS 8458, 2012 WL 220791, at * 10 (D. Haw. Jan. 25, 2012)* (explaining that "injunctive relief standing alone is not a cause of action"); *Jensen v. Quality Loan Serv. Corp., 702 F. Supp. 2d 1183, 1201 (E.D. Cal. 2010)* ("A request for injunctive relief by itself does not state a cause of action ....A pleading can . . . request injunctive relief in connection with a substantive claim, but a separately pled claim or cause of action for injunctive relief is inappropriate.") (internal quotations and citations omitted); *Plan Pros, Inc. v. Zych, 2009 U.S. Dist. LEXIS 28780, 2009 WL 928867, at *2 (D. Neb. Mar. 31, 2009)* (stating that "no independent cause of action for injunction exists"); *Motley v. Homecomings Fin., LLC, 557 F. Supp. 2d 1005, 1014 (D. Minn. 2008)* **[*20]** (same); see also *Kendall v. Visa U.S.A., Inc., 518 F.3d 1042, 1051 (9th Cir. 2008)*. Injunctive relief may be available if Plaintiff prevails—or satisfies requirements for such relief under *Rule 65 of the Federal Rules of Civil Procedure*—on an independent cause of action. The Court therefore **DISMISSES** Count I.

III. Count II: Wrongful Sale of Subject Property

Count II alleges that Defendants "wrongfully and without legal right" conducted a non-judicial foreclosure of the Subject Property. (FAC ¶ 54.) As a preliminary matter, it is unclear to the Court specifically what cause of action Plaintiff is asserting in this Count. Plaintiff fails to cite any relevant statute or law pursuant to which Defendants' alleged behavior is prohibited. Neither Defendants nor the Court are required to speculate as to which law Plaintiff is suing under or how Defendants violated such law. Vague allegations containing mere labels and conclusions are insufficient to survive a motion to dismiss. See *Twombly, 550 U.S. at 555*. On these grounds alone, Plaintiff's claim for wrongful sale fails.

Additionally, Plaintiff has alleged no facts to support her allegation that the sale was wrongful. Plaintiffs have not identified **[*21]** any procedural errors in the foreclosure process itself that would make the foreclosure "wrongful." See *Doran v. Wells Fargo Bank, 2011 U.S. Dist. LEXIS 126418, 2011 WL 5239738, at *9 (D. Haw. Oct. 31, 2011)* (indicating that a "wrongful foreclosure" claim failed under Hawaii law because the notice of foreclosure was procedurally proper under HRS Ch. 667). Moreover, although Hawaii has not specifically recognized a common law wrongful foreclosure cause of action, "[s]ubstantive wrongful foreclosure claims [in other jurisdictions] typically are available after foreclosure and are premised on allegations that the borrower was not in default, or on procedural issues that resulted in damages to the borrower." *Cervantes, 656 F.3d at 1043 (9th Cir. 2011)*. Plaintiff does not claim that she was not in default on the Mortgage, nor does she identify any procedural issues that resulted in damages to her. She merely alleges that Defendants initiated and conducted a non-judicial foreclosure of Plaintiff's property, and sold the property to themselves at the foreclosure sale. (FAC ¶ 54.) This is not wrongful in light of the fact that OneWest had a legal right under the Mortgage to enforce its foreclosure rights in the event of **[*22]** default. [6] (See Doc. # 29, Ex. C.) Accordingly, the Court **DISMISSES** Count II.

IV. Count IV: Unfair or Deceptive Acts or Practices

Plaintiff claims that IndyMac, OneWest, and MERS violated *Hawaii Revised Statutes ("H.R.S.") section 480-2(a)* by engaging in unfair or deceptive acts or practices ("UDAP"). [7] (FAC ¶¶ 61, 64, 68.) *Section 480-2(a)* prohibits "[u]nfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce[.]" Plaintiff makes six allegations that comprise the basis of her UDAP claim: (1) "[t]argeting financially unsophisticated and otherwise vulnerable consumers for inappropriate crew products"; (2) "[f]ailing to adequately disclose the true costs and risks of the subject loan and its inappropriateness for Plaintiff"; (3) "[m]aking a refinance loan that resulted in little net economic benefit to Plaintiff with the primary objective **[*23]** of general fees"; (4) "[m]aking the loan based on the value of the collateral, without regard to Plaintiff [sic] ability to repay the loan"; (5)

[6] The Mortgage explicitly provides, "Borrower does hereby mortgage, grant and convey to MERS (solely as nominee for Lender and Lender's successors and assigns) and to the successors and assigns of MERS, with power of sale, the following described property ...." (emphasis added) (Doc. # 29, Ex. C, at 2.)

[7] Plaintiff also asserts a violation of *§ 481A-3(a)*, but this statute is inapplicable to mortgage transactions. See *Cavaco v. Mortg. Elec. Registration Sys., 2011 U.S. Dist. LEXIS 44484, 2011 WL 1565979, at *7 n.1 (D. Haw. Apr. 25, 2011)*.

[f]ailing to provide Plaintiff with a timely Good Faith Estimate "GFE" and a fully executed Truth I [sic] Lending Disclosure Statement"; and (6) "[a]ttempting to deprive Plaintiff of her legal right to cancel the loan." (Id. ¶ 61.)

As an initial matter, *12 C.F.R. § 560.2(b)* preempts state claims predicated on TILA violations, including failures to make required disclosures. *Kajitani v. Downey Sav. & Loan Assoc., F.A., 647 F. Supp. 2d 1208, 1220 (D. Haw. 2008)*. Consequently, to the extent that Plaintiff's UDAP is based on an alleged failure to provide TILA disclosure documents, those claims are preempted by federal law.

Next, Plaintiff's UDAP claim is subject to a four-year statute of limitations, which starts to run at the time of a cause of action's accrual. *Haw. Rev. Stat. § 480-24(a)*. Plaintiff's first five allegations in this Count **[*24]** occurred either prior to or at the time of the loan consummation. Because the loan was consummated on March 9, 2007, and because Plaintiff did not file her complaint until June 6, 2011, these claims are time-barred.

Finally, Plaintiff's sixth allegation does not satisfy the pleading requirements set forth in *Rule 8*. Plaintiff asserts that Defendants attempted to deprive Plaintiff of her legal right to cancel the loan but the allegations do not make clear what actions Defendants engaged in that allegedly deprived Plaintiff this right. [8] Because Plaintiff does not provide sufficient factual detail to support this conclusory allegation, Plaintiff has failed to state a valid UDAP claim. See *Iqbal, 129 S. Ct. at 1949*.

Accordingly, the Court **DISMISSES** Count IV.

V. Count V: Truth in Lending Act Violations: Loan Rescission and Recoupment

Plaintiff asserts that because IndyMac failed to provide her with disclosure documents required by TILA, Plaintiff is entitled to **[*25]** rescission, reasonable attorney's fees and costs, and recoupment. (FAC ¶¶ 74, 77-84.)

TILA provides a borrower with the right to rescind a loan transaction "until midnight of the third business day following the consummation of the transaction or the delivery of the information and rescission forms required under this section . . . , whichever is later ...." *15 U.S.C. § 1635(a)*. However, this right to rescind expires "three years after the date of consummation of the transaction or upon the sale of the property, whichever occurs first, notwithstanding the fact that the information and forms required under this section or any other disclosures required under this part have not been delivered to the obligor...." Id. *§ 1635(f)*. Because *§ 1635(f)* is an absolute statute of repose, it is not subject to equitable tolling. See *Caraang v. PNC Mortg., 795 F. Supp. 2d 1098, 1113 (D. Haw. 2011)*.

Here, Plaintiff entered into the loan transaction on March 9, 2007, but did not file her original complaint until over four years later, on June 6, 2011. Consequently, her rescission claim is time-barred.

Plaintiff tries to overcome the three-year absolute bar to bringing a TILA rescission claim by asserting **[*26]** a right to recoupment pursuant to *§ 1640(a)* and *(e)*. (FAC ¶ 84.) This claim fails for two reasons. First, *§ 1640* only provides for a recoupment defense, not a cause of action. See *Henderson v. GMAC Mortg. Corp., 347 Fed. Appx. 299, 302 (9th Cir. 2009)* (citing *Beach v. Ocwen Fed. Bank, 523 U.S. 410, 415, 118 S. Ct. 1408, 140 L. Ed. 2d 566 (1998))* (explaining that because the borrowers initiated the action, they could not succeed under a theory of recoupment). [9] Second, rescission in the nature of recoupment is subject to the same three-year statute of repose as a claim for rescission. See *Beach v. Ocwen Fed. Bank, 523 U.S. 410, 418-19, 118 S. Ct. 1408, 140 L. Ed. 2d 566 (1998)* ("[TILA] permits no federal right to rescind, defensively or otherwise, after the 3-years period of *§ 1635(f)* has run.").

---

[8] As the Court previously explained, Plaintiff cannot base her claim on either occurrences that happened prior to June 6, 2007, or TILA violations, including Defendants' alleged failure to provide her with a Notice of Right to Cancel.

[9] Although not published, Henderson was issued after January 1, 2007, and may be cited pursuant to ***Federal Rule of Appellate Procedure 32.1(a)*** and *Ninth Circuit Rule 36-3(b)*.

Accordingly, the Court **DISMISSES** Count V on the ground that these claims are time barred.

VI. Counts III and VI: Fraudulent Concealment-Tolling of Statute; Truth in Lending Act Violations: Loan Damages[10]

Plaintiff claims that she is entitled to damages pursuant to *15 U.S.C. §§ 1635(g)* and *1640* for Defendants' alleged failure to allow rescission and failure to comply with TILA's requirements. (FAC ¶¶ 87-88.)

Section 1635(g) allows a court to provide relief for violations relating to the right to rescind. As explained above, however, Plaintiff's rescission claim is time-barred. She therefore cannot state a valid claim under *§ 1635(g)*. *Section 1640(a)(1)* provides a cause of action for damages from breaches of TILA. *Section 1640*, however, is governed by the one-year statute of limitations of *§ 1640(e)*. Plaintiff asserts that because of the fraudulent misrepresentation and concealment of the terms of Plaintiff's loan and mortgage, the statute of limitations on Plaintiff's TILA claim should be equitably **[*28]** tolled. (FAC ¶¶ 55-56.)

As a general matter, "[e]quitable tolling may be applied if, despite all due diligence, a plaintiff is unable to obtain vital information bearing on the existence of his claim." *Santa Maria v. Pac. Bell, 202 F.3d 1170, 1178 (9th Cir. 2000)*. For TILA damages claims, equitable tolling may apply to suspend the limitations period "until the borrower discovers or had reasonable opportunity to discover the fraud or nondisclosures that form the basis of the TILA action." *King v. California, 784 F.2d 910, 915 (9th Cir. 1986)*. However, equitable tolling does not apply if a plaintiff does not allege facts demonstrating that discovery of the purported TILA violation would not have been possible with reasonable diligence. *Hubbard v. Fid. Fed. Bank, 91 F.3d 75, 79 (9th Cir. 1996)* (holding that equitable tolling did not apply where "nothing prevented [the plaintiff] from comparing the loan contract, Fidelity's initial disclosures, and TILA's statutory and regulatory requirements."); see also *Garcia v. Wachovia Mortg. Corp., 676 F. Supp. 2d 895, 906 (C.D. Cal. 2009)* (construing Hubbard as establishing that "the mere existence of TILA violations and lack of disclosure does not **[*29]** itself equitably toll the statute of limitations"). Further, where the basis for equitable tolling is fraudulent concealment, the circumstances constituting fraud must be pled with particularity pursuant to *Rule 9(b)*. See *389 Orange St. Partners v. Arnold, 179 F.3d 656, 662 (9th Cir. 1999)*.

Here, although Plaintiff has alleged that IndyMac failed to provide required TILA disclosures, Plaintiff has not asserted any facts to support the conclusion that, despite her best diligence, Plaintiff could not have discovered the alleged TILA violations. As such, Plaintiff has not alleged a basis for tolling the limitations period set forth in the *§ 1640(e)*.

For the reasons set forth above, the Court **DISMISSES** Counts III and VI.

VII. Count VII: Real Estate Settlement Procedures Act (RESPA) Violations

Plaintiff alleges that she did not receive a Good Faith Estimate in violation of RESPA requirements. (FAC ¶ 90.) However, no private right of action exists under RESPA for such a violation. *Araki v. One West Bank FSB, 2010 U.S. Dist. LEXIS 140797, 2010 WL 5625969, at *8 (D. Haw. Sept. 8, 2010)* (citing *Collins v. FMHA-USDA, 105 F.3d 1366, 1367 (11th Cir. 1997)* ("[T]here is no private civil action for a violation of *12 U.S.C. § 2604(c)*, **[*30]** or any regulations relating to it.")); see also *Palestini v. Homecomings Fin., LLC, 2010 U.S. Dist. LEXIS 72985, 2010 WL 3339459, at *4 (S.D. Cal. Aug. 23, 2010)* ("[T]here is no private right of action under [*§§ 2603-04*] for Defendants' alleged failure to provide accurate disclosures, good faith estimates, or settlement statements."); *Pressman v. Meridian Mortg. Co., 334 F. Supp. 2d 1236, 1242 n.4 (D. Haw. 2004)*. Accordingly, the Court **DISMISSES** Count VII.

VIII. Count VIII: Fraud

---

[10] Count III of Plaintiff's FAC alleges "Fraudulent Concealment—Tolling of Statute." Equitable **[*27]** tolling, however, is not an independent cause of action; it is a doctrine that serves to toll a statute of limitations that would otherwise bar a plaintiff from bringing a cause of action. See *King v. California, 784 F.2d 910, 915 (9th Cir. 1986)*. Thus, the Court reads Plaintiff's third Count requesting tolling of TILA's statute of limitations in conjunction with Plaintiff's claim for TILA damages.

As the basis for her fraud claim against IndyMac, Plaintiff asserts that IndyMac falsely evaluated Plaintiff's income and falsely represented the true costs and risks of the loan, and "the nature and extent of the documents." [11] (FAC ¶¶ 93-95.)

Plaintiff's allegations of fraud do not meet *Rule 9(b)*'s heightened pleading standards, which require a pleading to "identify the who, what, when, where and how of the misconduct charged, as well as what is false or misleading about [the purportedly fraudulent] statement, and why it is false." *Cafasso v. Gen. Dynamics C4 Sys., 637 F.3d 1047, 1055 (9th Cir. 2011)* (internal quotation marks omitted). In her FAC, Plaintiff does not identify what the allegedly false or misleading representations were, when and where they were made, who made these representations, or why they were false or misleading. Plaintiff offers only vague allegations of false evaluations or representations and has therefore failed to allege with sufficient particularity the elements of a claim for fraud. *In re GlenFed, 42 F.3d at 1548*.

Accordingly, the Court **DISMISSES** Count VIII.

IX. Antitrust Violations

a. Count IX: Sherman Anti-Trust Act Violations

Count IX alleges a violation of the Sherman Antitrust **[*32]** Act, *15 U.S.C. § 2*. (FAC ¶ 112.) Plaintiff alleges that Defendants "engaged in predatory conduct and anti-competitive conduct in an attempt to monopolize the mortgage lending and servicing market." (Id. ¶ 102.) Further, Plaintiff alleges that Defendants "worked to create the collapse of the mortgage market, which in turn created an economic collapse unprecedented since the Great Depression." (Id. ¶ 110.) Plaintiff seeks monetary relief for this alleged violation, presumably pursuant to Section 4 of the Clayton Antitrust Act, *15 U.S.C. § 15*.

Section 2 of the Sherman Act makes it illegal to "monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations." Id. *§ 2*. Monopolization and attempted monopolization are the two traditional claims asserted under *Section 2*. To state a claim for monopolization, the plaintiff must sufficiently allege: "'(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, **[*33]** or historic accident.'" *John Doe 1 v. Abbott Labs., 571 F.3d 930, 933 n.3 (9th Cir. 2009)* (quoting *Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 481, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992))*.

To state a claim for attempted monopolization, the plaintiff must allege: "'(1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power.'" *Cascade Health Solutions v. PeaceHealth, 515 F.3d 883, 893 (9th Cir. 2008)* (quoting *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993))*.

An antitrust plaintiff must also demonstrate that the injury in question is "injury of the type the antitrust laws were intended to prevent." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*. Indeed, the antitrust laws "were enacted for 'the protection of competition, not competitors.'" *Id. at 488* (quoting *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1961))*.

A plaintiff seeking damages pursuant to Section 4 of the Clayton Act must show causal antitrust injury, and, to obtain injunctive relief pursuant to *Section 16* of the Clayton Act, a plaintiff must allege threatened antitrust injury.

---

[11] Although Plaintiff's allegations of fraud are not against the Moving Defendants, the Court addresses this issue sua sponte because Plaintiff alleges that the Moving Defendants "are subject to the Mortgage and Note violations of all of its predecessors and said violations serve to bar said Defendants from taking any action against Plaintiff and/or the 'property'...." (FAC ¶ 37.) Plaintiff further alleges that the Moving Defendants "knew or should have known" of IndyMac's alleged violations. (FAC **[*31]** ¶ 38.) These bare assertions are not entitled to an assumption of truth. See *Iqbal, 129 S. Ct. at 1951*. Moreover, the underlying fraud allegations against IndyMac do not state a claim for relief.

Cargill, Inc. v. Monfort of Colo., Inc., 479 U.S. 104, 109-13, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986). **[*34]** The purpose of the antitrust injury requirement is to "ensure[ ] that the harm claimed by the plaintiff corresponds to the rationale for finding a violation of the antitrust laws in the first place, and it prevents losses that stem from competition from supporting suits by private plaintiffs for either damages or equitable relief." Atlantic Richfield Co. v. USA Petroleum, Inc., 495 U.S. 328, 342, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990). As such, "[t]o show antitrust injury, a plaintiff must prove that his loss flows from an anticompetitive aspect or effect of the defendant's behavior [because] it is inimical to the antitrust laws to award damages for losses stemming from acts that do not hurt competition." Rebel Oil Co., Inc. v. Atlantic Richfield Co., 51 F.3d 1421, 1433 (9th Cir. 1995) (citing Atlantic Richfield, 495 U.S. at 334); see also *Cascade, 515 F.3d at 902* ("'Plaintiffs must prove antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation.'") (quoting Brunswick, 429 U.S. at 489).

In **[*35]** addition to antitrust injury, antitrust plaintiffs must also properly allege a relevant market. See Newcal Indus., Inc. v. Ikon Office Solution, 513 F.3d 1038, 1044 (9th Cir. 2008) (finding that to state a claim under either Section 1 or Section 2 of the Sherman Act, the plaintiff must sufficiently allege a relevant market). The Ninth Circuit recently reaffirmed that a complaint may be dismissed under Rule 12(b)(6) if its relevant market definition is "facially unsustainable." Id. at 1045 (citing Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430, 436-37 (3d Cir. 1997)). The relevant market includes both the product market and the geographic market. Brown Shoe, 370 U.S. at 324; Newcal Indus., 513 F.3d at 1045 n.4. As to the product market, it must "encompass the product at issue as well as all economic substitutes for the product." Newcal Indus., 513 F.3d at 1045 (citing Brown Shoe, 370 U.S. at 325). It must therefore include "the group of sellers or producers who have the 'actual or potential ability to deprive each other of significant levels of business.'" Forsyth v. Humana, Inc., 114 F.3d 1467, 1476 (9th Cir. 1997) (quoting Thurman Indus., Inc. v. Pay 'N Pak Stores, Inc., 875 F.2d 1369, 1374 (9th Cir. 1989)); **[*36]** see also Brown Shoe, 370 U.S. at 325 ("The outer boundaries of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it."). "In limited settings, however, the relevant product market may be narrowed beyond the boundaries of physical interchangeability and cross-price elasticity to account for identifiable submarkets or product clusters." Thurman Indus., 875 F.2d at 1374 (citation omitted). To establish the existence of a legally cognizable submarket, "the plaintiff must be able to show (but need not necessarily establish in the complaint) that the alleged submarket is economically distinct from the general product market." Newcal Indus., 513 F.3d at 1045; see also Brown Shoe, 370 U.S. at 325 (listing several "practical indicia" of an economically distinct submarket).

Here, Plaintiff asserts that the relevant market is the "mortgage lending and servicing market" (FAC ¶ 113) but the complaint is utterly devoid of any explanation or elaboration to support this contention. For example, the FAC does not contain any allegations concerning economic substitutes for the proposed product market, **[*37]** and it is entirely unclear to the Court why Plaintiff defined the relevant market in the way that they did. Moreover, the FAC fails to specify a relevant geographic market. As such, Plaintiff's relevant market definition is "facially unsustainable." Newcal, 513 F.3d at 1044.

In addition, Plaintiff alleges no facts to indicate that Defendants engaged in any sort of predatory or anticompetitive conduct. The Court cannot glean from Plaintiff's purely conclusory allegations that Defendants engaged in the type of conduct that the Sherman Act aims to prevent. In fact, Plaintiff's allegations in this count sound more in fraud. For example, Plaintiff alleges that Defendants "knew the scheme would cause a liquidity crisis that would devastate Plaintiff's home value ....Defendants did not care because their plan was based on insider training [sic]" (FAC ¶ 106) and "[t]his massive fraudulent scheme was a disaster both foreseen by Defendants and waiting to happen" (id. ¶ 108). Such vague and sweeping assertions are woefully insufficient to state a claim for monopolization or attempted monopolization in violation of the Sherman Act.

The Supreme Court acknowledged, in a case involving an alleged Sherman **[*38]** Antitrust Act violation, that "a district court must retain the power to insist upon some specificity in pleading before allowing a potentially massive factual controversy to proceed." Associated Gen. Contractors of Cal., Inc. v. Cal. State Counsel of Carpenters, 459 U.S. 519, 528 n. 17, 103 S. Ct. 897, 74 L. Ed. 2d 723; see also Twombly, 550 U.S. at 558 ("[I]t is one thing to be cautious before dismissing an antitrust complaint in advance of discovery . . . , but quite another to forget that proceeding to antitrust discovery can be expensive."); *Kendall v. Visa U.S.A., Inc., 518 F.3d 1042, 1046-47 (9th Cir. 2008)* (concluding that the Supreme Court clarified antitrust pleading requirements in Twombly "because discovery in antitrust cases frequently causes substantial expenditures and gives the plaintiff the opportunity to extort large settlements even where he does not have much of a case") (citing *Twombly, 550 U.S. at 558-59*). Because Plaintiff has provided nothing more than conclusory allegations in support of her antitrust claim, this claim must be dismissed.

b. Count X: Hawaii Anti-Trust Act and Monopolization Act

Plaintiff attempts to state a claim pursuant to the Hawaii Antitrust Act (*Haw. Rev. Stat. § 480-13*), **[*39]** and the Hawaii Monopolization Act (*Haw. Rev. Stat. § 480-9*) by relying exclusively on the allegations set forth in Count IX for her alleged Sherman Act claim. (FAC ¶ 115.)

The close relationship between federal ***antitrust law*** and Hawaii ***antitrust law*** has been well-established. See, e.g., *Robert's Hawaii Sch. Bus v. Laupahoehoe Transp. Co., Inc., 91 Haw. 224, 982 P.2d 853, 881 n.29 (Haw. 1999)* (noting the similarities between *Section 2* of the Sherman Antitrust Act and *Haw. Rev. Stat. § 480-9*). Indeed, the "[l]egislative history of Hawaii's ***antitrust law*** clearly indicates that the state laws are to be interpreted and construed in harmony with analogous federal antitrust laws." *Island Tobacco Co., Ltd. v. R. J. Reynolds Indus., Inc., 513 F. Supp. 726, 738 (D. Haw. 1981)*. As with federal courts applying federal ***antitrust law***, Hawaii courts require plaintiffs in antitrust proceedings to plead the "nature of the competition" to "ensure that the injury results from a competition-reducing aspect of the defendant's behavior." *Davis v. Four Seasons Hotel Ltd., 122 Haw. 423, 228 P.3d 303, 325 (Haw. 2010)* (citing and relying on federal law).

As with Plaintiff's Sherman Act claim, Plaintiff's state antitrust claim is entirely **[*40]** conclusory and fails to set forth sufficient factual allegations to withstand a motion to dismiss. Broad assertions of state ***antitrust law*** violations of the type presented here simply do not give Defendants an opportunity to properly defend themselves. See *Iqbal, 129 S. Ct. at 1949* ("A pleading that offers labels and conclusions or a formulaic recitation of the elements of a cause of action will not do."); see also *Pickern v. Pier 1 Imports (U.S.), Inc., 457 F.3d 963, 968 (9th Cir. 2006)* ("*Federal Rule of Civil Procedure 8(a)(2)* requires that the allegations in the complaint give the defendant fair notice of what the plaintiff's claim is and the grounds upon which it rests.") (internal quotation and citation omitted). Accordingly, the Court **DISMISSES** Count X.

X. Count XI: Failure to Act in Good Faith

Plaintiff next alleges that IndyMac and/or DOE Defendants "owed Plaintiff a fiduciary duty to deal with her in good faith and in a fair manner" and that IndyMac and/or DOE Defendants breached that duty by failing to deal with Plaintiff in good faith and in a fair manner. [12] (FAC ¶¶ 119-20.)

It is well-established that absent "special circumstances," lenders generally owe no fiduciary duties to their borrowers. See, e.g., *Isagawa v. Homestreet Bank, 769 F. Supp. 2d 1225, 1237 (D. Haw. 2011)*; *Bank of Am. Corp. v. Superior Court, 198 Cal. App. 4th 862, 130 Cal. Rptr. 3d 504, 510 n.7 (Cal. Ct. App. 2011)* ("Absent special circumstances, a loan transaction is at arm's length and there is no fiduciary relationship between the borrower and lender."); *Jones v. Thompson, 338 S.W.3d 573, 583 (Tex. App. 2010)*("[N]o fiduciary relationship exists between a lender and a borrower."); *Miller v. U.S. Bank of Wash., N.A., 865 P.2d 536, 543, 72 Wn. App. 416 (Wash. App. 1994)* ("The general rule . . . is that a lender is not a fiduciary of its borrower."); *Huntington Mortg. Co. v. DeBrota, 703 N.E.2d 160, 167 (Ind. App. 1998)* ("A lender does not owe a fiduciary duty to a borrower absent some special circumstances."); *Ellipso, Inc. v. Mann, 541 F. Supp. 2d 365, 373 (D.D.C. 2008)* ("[T]he relationship between a debtor and a creditor is ordinarily a contractual relationship . . . and is not fiduciary in nature."); *BHC Interim Funding, L.P. v. Finantra Capital, Inc., 283 F. Supp. 2d 968, 989 (S.D.N.Y. 2003)* **[*42]** ("[T]he relationship between a lender and borrower is not fiduciary in nature.").

---

[12] Even though this claim is not alleged directly against Moving Defendants, the Court reviews this issue sua **[*41]** sponte insofar as Plaintiff attempts to impute liability for these alleged violations on the Moving Defendants.

Plaintiff does not allege any facts to support a finding that there exists "special circumstances" that would trigger a fiduciary duty here. Merely stating that Defendants "owed Plaintiff a fiduciary duty to deal with her in good faith and in a fair manner" is conclusory and insufficient to establish a fiduciary duty on the part of the lender. Based on the facts alleged in the Complaint, this Court has no reason to believe that Plaintiff's relationship with IndyMac or the Doe Defendants was anything other than an ordinary, arm's-length, lender-borrower relationship. *Iqbal, 129 S. Ct. at 1949*. Accordingly, the Court **DISMISSES** Count XI.

XI. Count XII: Unjust Enrichment

Plaintiff alleges that she is entitled to restitution and attorney's fees because IndyMac and/or DOE Defendants were unjustly enriched by "charging a higher interest rate, fees, rebates, kickbacks, profits and gains from any resale of mortgages and notes using Plaintiff's identity, credit score, appraisal and reputation without consent, right, justification or excuse" and "through the receipt of payment from third parties ...." [13] (FAC **[*43]** ¶¶ 126-29.)

The two elements of an unjust enrichment claim are that: (1) Plaintiff has conferred a benefit upon Defendant, and (2) retention of that benefit would be unjust. *Porter v. Hu, 116 Haw. 42, 169 P.3d 994, 1007 (Haw. App. 2007)*. Unjust enrichment is available only where there is "an absence of an adequate remedy at law." Id. Thus, as a general rule, "[a]n action for unjust enrichment cannot lie in the face of an express contract." *Id. at 1006*; see also *AAA Haw., LLC v. Haw. Ins. Consultants, Ltd., 2008 U.S. Dist. LEXIS 92300, 2008 WL 4907976, at *3 (D. Haw. Nov. 12, 2008)* ("It is also well settled in federal courts that equitable remedies are not available when an express contract exists between the parties concerning the same subject matter.").

Plaintiff does not allege any facts demonstrating that she conferred a benefit on IndyMac or any other Defendant. Furthermore, an express contract exists between IndyMac and Plaintiff, governing the rights and obligations of the parties under the loan transaction. (FAC ¶ 9.) Plaintiff therefore **[*44]** cannot bring a claim for unjust enrichment. The Court therefore **DISMISSES** Count XII.

XII. Count XIII: Mistake

Plaintiff alleges that if Defendants' actions were not fraudulent, then "the underlying transaction was entered into based upon mutual mistake ...." (FAC ¶ 131.) Based on this purported wrongdoing, Plaintiff seeks actual damages, including all costs paid to obtain the loan. (Id.)

As with Plaintiff's fraud claim in Count VIII, Plaintiff's allegations of mistake are insufficient to meet the rigorous requirements under *Rule 9*. See *Fed. R. Civ. P. 9(b)* (requiring a party to state with particularity the circumstances constituting fraud or mistake). Plaintiff's conclusory allegation that the parties entered into the loan based upon mutual mistake is not sufficient to survive a motion to dismiss. Plaintiff utterly fails to assert any "particularized allegations of the circumstances" constituting mistake, such as the time, place, and nature of the alleged actions, and how each Defendant participated in the mistake. See *In re GlenFed, Inc. Sec. Litig., 42 F.3d at 1547-48*. Since Plaintiff has failed to state a claim based on mistake, the Court **DISMISSES** Count XIII.

XIII. Count XIV: Hawaii **[*45]** Bureau of Conveyance Regulations/FDCPA Violations

Count XIV alleges a violation of both (1) Hawaii Bureau of Conveyance Regulations, and (2) the Federal Fair Debt Collection Procedures Act ("FDCPA"), *15 U.S.C. § 1692(e)*.

a. Hawaii Bureau of Conveyances Regulations Violations

Plaintiff alleges that IndyMac's foreclosure of Plaintiff's real property violated Hawaii law, which allegedly provides that "before an entity would be entitled to receive a distribution from the sale of real property, their interest therein must have been recorded." (FAC ¶ 133.) To the extent that Plaintiff attempts to allege a violation of Hawaii state statutes governing the Bureau of Conveyances, Plaintiff fails to state a claim.

---

[13] As with the previous Count, the Court reaches this issue sua sponte insofar as Plaintiff's theory of liability against the Moving Defendants is predicated on IndyMac's purported wrongdoings.

As a preliminary matter, the Court notes that Plaintiff fails to cite any provision of Hawaii law, statutory or otherwise, to support this allegation. As previously noted, neither Defendants nor the Court are required to speculate as to what law Plaintiff is suing under or how Defendants violated such law.

Moreover, the Court has not found any provision of Hawaii law that requires an entity to record its interest in a property before receiving a distribution from the sale. Indeed, recordation **[*46]** of a conveyance is only relevant for the purpose of providing notice to subsequent bona fide purchasers of the property. (See *Haw. Rev. Stat. § 502-8*.)[14] Because Plaintiff is not a subsequent bona fide purchaser of the Subject Property, this provision does not apply.

Accordingly, the Court finds that Plaintiff fails to state a claim for a violation of Hawaii state law with respect to recordation of a conveyance.

b. Federal Debt Collections Practices Act

Although not titled as such, Count XIV appears to also allege a claim for violation of the FDCPA. Plaintiff alleges that IndyMac's

> act of pursuing a non-judicial foreclosure action without the requisite legal title, while falsely stating that it had such title, and while lacking the right to engage in trust business in Hawaii, constitutes a false, deceptive or misleading representations or means in connection with the collection of a debt, in violation of the Federal **[*47]** Fair Debt Collection Procedures [sic] Act ....

(FAC ¶ 134.)

The FDCPA was enacted to "eliminate abusive debt collection practices by debt collectors, to insure that those debt collectors who refrain from using abusive debt collection practices are not competitively disadvantaged, and to promote consistent State action to protect consumers against debt collection abuses." *15 U.S.C. § 1692(e)*. To be liable for a violation of the FDCPA, the defendant must, as a threshold requirement, be a "debt collector" within the meaning of the FDCPA. *Heintz v. Jenkins, 514 U.S. 291, 294, 115 S. Ct. 1489, 131 L. Ed. 2d 395 (1995)*. The FDCPA defines a "debt collector" as:

> [A]ny person who uses any instrumentality of interstate commerce or the mails in any business the principal purpose of which is the collection of any debts, or who regularly collects or attempts to collect, directly or indirectly, debts owed or due or asserted to be owed or due another .... The term does not include—
>
> > (A) any officer or employee of a creditor while, in the name of the creditor, collecting debts for such creditor ....

15 U.S.C. § 1692a(6).

Plaintiff alleges that Defendants are "debt collectors" because "they regularly use instrumentalities of interstate commerce, **[*48]** and the mails, in attempting to collect, directly, or indirectly, debts owed or due or asserted to be owed or due to another ...." (FAC ¶ 135.) This conclusory assertion merely restates the definition of "debt collector" provided in the FDCPA. Plaintiff alleges no facts to suggest that Defendants are in fact "debt collectors" as contemplated by the FDCPA. This proposition is not self-evident as many district courts across the country have held that mortgage servicing companies are not debt collectors liable under the FDCPA. See e.g., *Williams v. Countrywide Home Loans, Inc., 504 F. Supp. 2d 176, 190 (S.D. Tex. 2007)* ("[L]enders and mortgage companies are not 'debt collectors' within the meaning of the FDCPA."); *Hulse v. Ocwen Fed Bank FSB, 195 F. Supp. 2d 1188, 1204 (D. Or. 2002)* (noting that the "activity of foreclosing on [a] property pursuant to a deed of trust is not the collection of a debt within the meaning of the" FDCPA). Indeed, one important factor in determining whether a "mortgage servicing company" is a "debt collector" is whether "the debt was [ ] in default at the time it was assigned." *Caraang, 795 F. Supp. 2d at 1123* (quoting *Perry v. Stewart Title Co., 756 F.2d 1197, 1208 (5th Cir.*

---

[14] The provision provides, "Every such conveyance not so recorded is void as against any subsequent purchaser, lessee, or mortgagee, in good faith and for a valuable consideration, not having actual notice of the conveyance of the same real estate ...." (*Haw. Rev. Stat. § 502-8*.)

1985)). **[*49]** Because the FAC alleges no facts to suggest that any of the Defendants are "debt collectors," this claim fails. Accordingly. the Court **DISMISSES** Count XIV.

XIV. Improper Securitization of the Loan

Counts XV and XVI both appear to arise from the securitization of Plaintiff's loan.

a. Count XV: Improper Restrictions Making Note and Mortgage Unenforceable

Count XV alleges that the securitization of the Mortgage via Defendants' "Pooling Arrangement" imposed "improper restrictions . . . leav[ing] the Note and Mortgage unenforceable." (FAC ¶¶ 141, 145.) Plaintiff alleges that she "was neither informed of, nor asked to consent to the securitization of the Mortgage" and that "[s]uch consent is required for changes pursuant to the terms of the original Mortgage." (Id. ¶ 146.) Plaintiff lists a variety of restrictions that the securitization process allegedly imposed on the Mortgage. [15]

Insofar as Count XV appears to allege wrongful securitization, the Court finds that Plaintiff fails to state a claim. This Court and others in the Ninth Circuit have consistently rejected similar claims as having no statutory or common law basis. See *Menashe v. Bank of N.Y., 850 F. Supp. 2d 1120, 2012 U.S. Dist. LEXIS 13945, 2012 WL 397437, at *18 (D. Haw. Feb. 6, 2012)* (noting that "numerous courts in this Circuit have likewise rejected that securitization of a mortgage loan provides the mortgagor a cause of action.").

Indeed, Plaintiff does not provide the Court with any legal authority for her claim, nor does Plaintiff point to any provision of the Note or Mortgage that prevents the lender from securitizing the loan or requires Plaintiff's consent prior to securitization. To the contrary, the Note expressly provides, "The Note or a partial interest in the Note (together with this Security Instrument) can be sold one or more times without prior notice to Borrower." (RJN, Ex. C ¶ 20 (emphasis added.)) Because Plaintiff does not allege facts indicating that Defendants' securitization of **[*51]** the loan was improper, Plaintiff fails to state a claim. Accordingly, the Court **DISMISSES** Count XV.

b. Count XVI: "Wrongful Conversion of Note — Mortgagor Never Consented to Securitization"

The allegations in Count XVI are similar to those set forth in Count XV. Plaintiff alleges, "[t]he securitization is a conversion of the Mortgage rendering it null, void and unenforceable. The consent required for changes to the Mortgage does not entail the right to convert the Mortgage into a security." (FAC ¶ 147.) Further, Count XVI alleges that "[t]he conversion of the Mortgage to Mortgage backed securities improperly attempts to divide the Note from the Mortgage to make the Note a separately enforceable interest." (Id. ¶ 151.)

Under Hawaii law, the elements of conversion are: "(1) [a] taking from the owner without his consent; (2) an unwarranted assumption of ownership; (3) an illegal use or abuse of the chattel; and (4) a wrongful detention after demand." *Pourny v. Maui Police Dep't., Cnty. of Maui, 127 F. Supp. 2d 1129, 1146 (D. Haw. 2000)* (citation omitted).

As discussed above, Defendants have an express contractual right to sell the Note or any portion thereof without prior notice to the Borrower. **[*52]** (See RJN, Ex. C ¶ 20.) Since Plaintiff's consent was not necessary, Plaintiff cannot satisfy the first element of conversion. Moreover, insofar as Plaintiff attempts to allege conversion based on Defendants' allegedly improper division of the Note from the Mortgage (see FAC ¶ 151), the Court notes that the Ninth Circuit has expressly rejected this "note-splitting" theory, as discussed above.

For these reasons, the Court **DISMISSES** Count XVI.

XVI. Count XVII: Breach of Contract

---

[15] These restrictions allegedly include "[i]mposing restrictions to modification required to avoid double taxation and make collection of payments by the trust and payment to the investors a single pass through taxable event," "[i]mposing restrictions upon the number of Mortgages in the pool which may be modified," **[*50]** and "[p]roviding a procedure for foreclosure but no procedure to modify the loan as an alternate dispute resolution." (FAC ¶ 144.)

Plaintiff alleges that under the terms of her loan agreement with IndyMac, IndyMac agreed to loan Plaintiff $520,000. (FAC ¶ 9.) IndyMac was to pay off Plaintiff's prior mortgage and then pay Plaintiff the remainder through an escrow account with Stewart and Richmond. (Id. ¶¶ 7, 9.) Plaintiff contends that IndyMac, Stewart, and Richmond are liable for breaching the loan agreement by not giving Plaintiff a copy of the executed agreement and associated documents and by not tendering the money to Plaintiff. (Id. ¶ 157.)

To allege a breach of contract, "the complaint must, at minimum, cite the contractual provision allegedly violated. Generalized allegations of a contractual breach are not sufficient." *Otani v. State Farm Fire & Cas. Co., 927 F. Supp. 1330, 1335 (D. Haw. 1996)*; **[*53]** see *Menashe, __ F. Supp. 2d __, 2012 U.S. Dist. LEXIS 13945, 2012 WL 397437, at *14* ("[A] breach of contract claim requires a plaintiff to identify (1) the contract at issue; (2) the parties to the contract; (3) whether Plaintiff performed under the contract; (4) the particular provision of the contract allegedly violated by the Defendant; (5) when and how the Defendant allegedly breached the contract; and (6) how Plaintiff was injured.").

Plaintiff has not alleged any facts to support a breach of contract claim against OneWest or MERS. Indeed, Plaintiff has not even alleged the existence of a contract between her and either of the Moving Defendants, let alone establish a breach of any such agreement. The only contract identified in the complaint is between her and IndyMac. Since the Moving Defendants were not parties to any contract with Plaintiff, the Court **DISMISSES** Count XVII as to those Defendants.

XVII: Count XVIII: Conversion

Plaintiff asserts that IndyMac, OneWest, Stewart, and Richmond are liable for conversion of loan funds that Plaintiff allegedly never received. (FAC ¶¶ 160-61.) As outlined above, the elements of a conversion claim are: "(1) A taking from the owner without his consent; (2) an unwarranted **[*54]** assumption of ownership; (3) an illegal use or abuse of the chattel; and (4) a wrongful detention after demand." *Tsuru v. Bayer, 25 Haw. 693, 1920 WL 830, at * 2 (Haw. 1920)*; see also *Restatement (Second) of Torts § 222A*; *Pourny, 127 F. Supp. 2d at 1146*. Since conversion is an intentional tort, proof of "a constructive or actual intent to injure" is required to establish liability. See *Brooks v. Dana Nance & Co., 113 Haw. 406, 153 P.3d 1091, 1100 (2007)* (citing *Iddings v. Mee-Lee, 82 Haw. 1, 919 P.2d 263, 271 (1996)* ("[T]he commission of an intentional tort includes a constructive or actual intent to injure.")).

With regard to Plaintiff's claim that OneWest is liable for conversion, Plaintiff does not allege any of the requisite elements of conversion. Plaintiff does not allege that OneWest is a party to the loan transaction, that OneWest allegedly assumed ownership of and subsequently illegally used or abused Plaintiff's money, or that OneWest retained Plaintiff's money after Plaintiff requested its return. Accordingly, the Court **GRANTS** Defendants' Motion to Dismiss as to Count XVIII.

XVIII: Leave to Amend

Pursuant to *Rule 15(a)(2)*, courts should "freely give leave [to amend] when justice so requires." "[R]equests **[*55]** for leave should be granted with extreme liberality." *Moss, 572 F.3d at 972*. "Dismissal without leave to amend is improper unless it is clear . . . that the complaint could not be saved by an amendment." Id. In determining whether to grant leave to amend, courts consider factors including: "undue delay, bad faith or dilatory motive on the part of the movant, repeated failure to cure deficiencies by amendments previously allowed, undue prejudice to the opposing party by virtue of allowance of the amendment [or] futility of amendment.'" *Zucco Partners, LLC v. Digimarc Corp., 552 F.3d 981, 1007 (9th Cir. 2009)* (quoting *Foman v. Davis, 371 U.S. 178, 182, 83 S. Ct. 227, 9 L. Ed. 2d 222 (1962))*. "Further, '[t]he district court's discretion to deny leave to amend is particularly broad where plaintiff has previously amended the complaint.'" *Cafasso, 637 F.3d at 1058* (quoting *Ascon Props., Inc. v. Mobil Oil Co., 866 F.2d 1149, 1160 (9th Cir. 1989))*.

The Court grants Plaintiff leave to file a second amended complaint by no later than May 4, 2012. However, Plaintiff is not granted leave to amend Counts I, V, and VII because those claims cannot be cured by further amendment. See *Zucco Partners, 552 F.3d at 1007*. Additionally, **[*56]** Plaintiff may not add any new parties, new legal theories, or other new claims in her amended complaint. Failure to timely file an amended pleading and to cure the pleading deficiencies identified above will result in dismissal of this action with prejudice. The Court cautions Plaintiff that this will be Plaintiff's final opportunity to amend. Plaintiff is advised that any amended complaint must clearly identify the specific causes of action alleged and the factual allegations upon which those claims are based.

Further, the Court orders counsel for both parties to meet and confer to address those matters as discussed at the hearing.

CONCLUSION

For the reasons stated above, the Court **GRANTS** Moving Defendants' Motion to Dismiss, **DISMISSES** Counts I, V, and VII, and **DISMISSES** all remaining claims **WITHOUT PREJUDICE.**

IT IS SO ORDERED.

Opinion by: RICHARD SEEBORG

Opinion

ORDER DENYING MOTIONS TO DISMISS

I. INTRODUCTION

The original "master" consolidated complaints in this Multi-District Litigation alleged a conspiracy beginning in 2006 among defendants **[*13]** to fix the prices of "Optical Disc Drives" ("ODDs") and "Optical Disc Drive Products" ("ODD Products"). The complaints were dismissed, with leave to amend, on grounds that plaintiffs had not set out a plausible factual basis for inferring the existence of a conspiracy of the scope and nature alleged. As the amended complaints have alleged a substantially narrower, and more plausible, conspiracy, and are otherwise adequately pleaded, the present motions to dismiss will be denied.

II. BACKGROUND

As described more fully in the order dismissing the first consolidated complaints, two groups of plaintiffs bring price fixing claims against defendants involved in the manufacturing and/or sales of ODDs—either as standalone products or which are incorporated into electronic devices such as computers and videogame consoles. One group of plaintiffs seek to represent a class of "Direct Purchasers"—individuals or entities who acquired ODDs directly from named defendants, and who, as such, arguably have standing to bring damage claims under federal ***antitrust law***. *See* *Illinois Brick Co. v. Illinois, 431 U.S. 720, 745-46, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*; *Del. Valley Surgical Supply Inc. v. Johnson & Johnson, 523 F.3d 1116, 1120-21 (9th Cir. 2008)* **[*14]** ("a bright line rule emerged from *Illinois Brick:* only direct purchasers have standing under § 4 of the Clayton Act to seek damages for antitrust violations.") A separate complaint is brought on behalf of "Indirect Purchasers," individuals and entities who did not purchase directly from the named defendants, and whose primary claims are therefore brought under the laws of various states that do not follow the *Illinois Brick* rule.

The Direct Purchasers' first consolidated complaint alleged a conspiracy to fix prices of both ODDs *and* what it defined as "ODD Products." While the Indirect Purchasers' first consolidated complaint defined the terms slightly differently, and included some language suggesting an intent only to claim a conspiracy to fix ODD prices, read as a whole, it likewise alleged a conspiracy that extended to price fixing of both ODDs and ODD Products. One of the primary reasons the first consolidated complaints were dismissed was the absence of facts to support the plausibility of such a wide-ranging conspiracy among not only the named defendants but also numerous unnamed entities that manufacture and sell products containing ODDs. [1]

---

[1] Additionally, as noted in the prior **[*15]** dismissal order, under the conspiracy theory then-articulated, entities such as HP and Dell who purchased ODDs from named defendants in allegedly rigged auctions and incorporated those ODDs into products sold to the public, would somehow have been both knowing co-conspirators and unwitting victims of the price-fixing.

The Second Consolidated Direct Purchaser Class Action Complaint ("DP SAC") and the Indirect Purchasers' Corrected Second Amended Class Action Complaint ("IP SAC") each make clear that plaintiffs are now alleging only a conspiracy to fix prices of ODDs, not the prices of products that contain them. [2] There remain some troubling issues, particularly in the DP SAC, with respect to how the products have been defined. For example, it is unclear why the Direct Purchasers continue to distinguish between ODDs and what they now call "ODD Devices." Direct Purchasers have (in their briefing and at oral argument) specifically *excluded* from the definition of the latter term computers, videogame consoles, and camcorders and have expressly alleged that the cost of the ODD typically constitutes the major portion of the cost of an "ODD Device." If, as seems likely, Direct Purchasers intend **[*16]** their claims extend to ODDs manufactured by defendants and preinstalled in computers, videogame consoles, and camcorders sold by defendants or their affiliates (despite the fact that the ODDs might *not* constitute the major portion of the cost of such devices), defining "ODD Devices" separately would appear to serve little purpose. A number of other uncertainties exist as to whether the definitions in the two complaints are entirely consistent with the various ways in which ODDs are actually sold, and whether the two groups of plaintiffs have correctly distinguished between what should be characterized as "direct" and "indirect" purchases. [3]

Those issues will require further clarification at the class certification stage, and may necessitate some modification to the class definitions from what is presently alleged in the complaints. At the pleading stage, however, such details do not substantially undermine the plausibility of the basic claims, and are not fatal. [4] Critically, both complaints have now made clear that the conspiracy was limited to the named defendants, and perhaps a few unnamed co-conspirators, but did not extend generally to the vast number of entities involved in the manufacturing and selling of products containing ODDs obtained from those defendants. Apart from these amendments that effectively narrow the scope of the claimed conspiracy, both the DP SAC and IP SAC lay out factual allegations that largely parallel those described in the prior dismissal order. **[*18]** Significant additions have been made in only three basic categories: (1) the complaints now allege a series of over two dozen instances of "bid-rigging" involving procurements of ODDs by Dell and HP, and one involving Microsoft, whereas the prior complaints specifically identified only three such events; (2) plaintiffs have articulated a more specific theory as to how the pattern of bid rigging reflects an overall effort to stabilize ODD prices, and; (3) the amendments include allegations of additional communications between various entities.

Furthermore, after the amended complaints were filed, indictments issued and guilty pleas were entered by certain defendants in connection with the Department of Justice investigation referenced in the prior and amended complaints. Plaintiffs have moved to strike materials relating to those indictments submitted by defendants to support their argument that there was no single overarching conspiracy of the nature alleged by plaintiffs. While plaintiffs' motion is well-taken as a technical matter as to what may properly be considered on a motion to dismiss, it is also effectively moot **[*20]** because, as explained in the hearing, the inferences defendants seek to draw from the materials are not tenable. As the criminal cases have been related to this action, the Court is aware of the indictments and guilty pleas. Even though those matters do not appear on the face of the complaints, they are

---

[2] The Indirect Purchasers, in particular, do contend that the *effect* of the alleged ODD price fixing was to raise the prices they paid for products containing them, but not that there was a conspiracy to fix the prices of those products per se.

[3] For example, the Indirect Purchasers assert claims regarding "ODDs designed to be attached externally to devices such as computers." Putting aside standalone ODD player/recorders designed primarily for audio or visual entertainment purposes that may include additional features and circuitry, such devices typically **[*17]** consist of little other than the ODD, a case, USB connection circuitry and cabling. As such, it seems unlikely that they are typically, if ever, manufactured and sold by entities unrelated to the manufacturers of the ODDs. If so, it is unclear why such products would be part of the Indirect Purchasers' case, rather than that of the Direct Purchasers.

[4] In a related issue, the IP SAC does *not* **[*19]** name the Sony entity that manufactures and sells the PlayStation as a defendant. Presumably Indirect Purchasers contend that entity was not involved in the conspiracy, and that they can therefore recover for any effect that price-fixing of ODDs had on the price of PlayStations. Direct Purchasers, however, have named that Sony entity as a defendant, and apparently contend that their class includes PlayStation purchasers, under the theory that the first transaction outside the conspiracy is a direct purchase. While this presents a conflict between the two complaints, it does not support dismissal of either.

subject to judicial notice. They serve to tip the DOJ investigation from a "non-factor," as it was described in the prior order, to an item of relevance as to the plausibility of plaintiffs' conspiracy claims, albeit well short of dispositive on the breadth of the claimed conspiracy.

III. LEGAL STANDARD

Under *Federal Rule of Civil Procedure 12(b)(6)*, a district court must dismiss a complaint that fails to state a claim upon which relief may be granted. To survive a *Rule 12(b)(6)* motion to dismiss, the plaintiff must allege "enough facts to state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. This "facial plausibility" standard requires the plaintiff to allege facts that add up to "more than a sheer possibility that a defendant has acted unlawfully." *Ashcroft v. Iqbal, 556 U.S. 662, 129 S.Ct. 1937, 1949, 173 L. Ed. 2d 868 (2009)*. While courts do not require "heightened **[*21]** fact pleading of specifics," a plaintiff must allege facts sufficient to "raise a right to relief above the speculative level." *Twombly, 550 U.S. at 544, 555*.

In deciding whether the plaintiff has stated a claim upon which relief may be granted, the Court must assume that plaintiff's allegations are true and must draw all reasonable inferences in plaintiff's favor. *See* *Usher v. City of Los Angeles, 828 F.2d 556, 561 (9th Cir.1987)*. However, the Court is not required to accept as true "allegations that are merely conclusory, unwarranted deductions of fact, or unreasonable inferences." *In re Gilead Scis. Sec. Litig., 536 F.3d 1049, 1055 (9th Cir. 2008)*. [5]

IV. DISCUSSION

A. Plausibility

The overarching thrust of defendants' attack on the sufficiency of the averments of the amended complaints to state a plausible **[*22]** claim is that plaintiffs have only shored up potential antitrust violations specifically related to bid-rigging, but have added nothing of substance to support a claim of any broader agreement among all the named defendants to fix ODD prices generally across the class period. Defendants fail to assign sufficient import, however, to the changes that have *narrowed* the scope of the alleged conspiracy, thereby rendering the claims substantially more plausible.

As the prior dismissal order stated, plaintiffs' original allegations, particularly those in the Indirect Purchasers' complaint, were enough to suggest that a conspiracy to fix ODD prices was "at least conceivable." August 3, 2011 Order at 14:17-18; 16:21-17:1. Dismissal was required because not only was the notion of a conspiracy involving untold numbers of third parties who make and sell devices containing ODDs beyond fanciful, the affirmative allegations that at least some of those third parties were *victims* of the conspiracy stood in flat contradiction to any such claim. *See* August 3, 2011 Order at 12:9-14 ("At least in the specific instance of ODD devices manufactured and sold by Dell and HP, plaintiffs have alleged that those **[*23]** third party sellers were unwitting dupes of the illegal activity, not co-conspirators. The most reasonable inference is that most, if not all, of the other sellers of ODD devices who are not directly affiliated with defendants likewise were victims of any agreement to fix ODD prices, not participants in a conspiracy to fix prices of the ODD devices they sold.")

The amended complaints have addressed that problem. Both sets of plaintiffs make clear that they are only contending the prices of ODDs were fixed. The DP SAC specifically alleges that Dell and HP are members of the putative class, as would be any other similarly situated entities that bought ODDs from defendants to incorporate

[5] Subsequent to the hearing, the parties have submitted several statements of recent decisions they contend bear on the issues in this action. In at least one instance, such a statement was simply filed, in others, they were accompanied by requests for leave to submit them, as is required by *Civil Local Rule 7-3(d)*. All the statements of recent decision will be deemed properly filed.

into products made and sold by those entities. [6] The alleged conspiracy, while still large, now entails a discrete number of entities, many of which are interrelated.

The prior order cautioned that it "likely" would not be enough for plaintiffs merely to limit the **[*24]** scope of the conspiracy to price-fixing of ODDs. Indeed, plaintiffs have done more, particularly in alleging with specificity a more sustained series of bid rigging and tying it (albeit with some allegations more conclusory or argumentative than factual) to an overall theory explaining the various ways in which the alleged conspiracy was carried out. While defendants have pointed to certain gaps, arguable inconsistencies, and potentially differing inferences that could be drawn across the whole spectrum of allegations plaintiffs have offered, viewed holistically, there is no doubt that the amended complaints more strongly support the plausibility of a conspiracy, even apart from the fact that it is far narrower.

As *Twombly* cautioned, "[a]sking for plausible grounds to infer an agreement does not impose a probability requirement at the pleading stage . . . a well-pleaded complaint may proceed even if it strikes a savvy judge that actual proof of those facts is improbable, and that a recovery is very remote and unlikely." *550 U.S. at 556* (citations and footnote omitted). The net effect of the amendments is that both the Direct and Indirect Plaintiffs have, in *Twombly's* terms, "nudged **[*25]** their claims across the line from conceivable to plausible." *See id. at 570*.

B. *Illinois Brick*

As noted above, *Illinois Brick* created a "bright line rule" that only plaintiffs who purchased products directly from alleged price-fixers have standing to pursue damages claims under federal law. The prior dismissal order concluded that, under the conspiracy then alleged, the Direct Purchasers could not in fact be deemed to be direct purchasers of "ODD Products" that had been manufactured and sold by third parties not part of any conspiracy. [7] In addressing the Direct Purchasers' argument that their claims could go forward under *Royal Printing Co. v. Kimberly Clark Corp., 621 F.2d 323, 326 (9th Cir. 1980)* to the extent they had alleged purchases from divisions or subsidiaries of a co-conspirator, the prior order also observed that *Royal Printing* only provides an exception to the bar on claims by *indirect* purchasers; it does not transform indirect purchasers into direct purchasers. The order suggested that for plaintiffs to pursue such claims, counsel for the two groups would have to determine whether it was preferable for them to go forward as a subset of the so-called Direct Purchasers' complaint, **[*26]** or as part of the Indirect Purchasers' claims.

As observed above, the definitions in the DP SAC are not entirely clear, and there is some uncertainty as to the scope of the putative class and the products involved. Seizing on that ambiguity, defendants argue that the Direct Purchasers are impermissibly attempting to evade the *Illinois Brick* rule, and that they still have not alleged facts plausibly showing they are actually direct purchasers, particularly with respect to what they now label as "ODD Devices." Because the Direct Purchasers have unambiguously disclaimed any intent to include products manufactured by non-defendants, their inartful allegations do not present a fatal defect.

While further delineation of product categories and marketing channels may at some point become necessary, at this juncture the DP SAC implicates three basic types of ODD purchases. First, the putative class includes those who purchased ODDs that were not incorporated into any other device. The most obvious examples are entities **[*27]** such as HP and Dell that purchased ODDs designed to be installed internally into computers or other devices. Such devices are also available to consumers to be used as replacements or upgrades in existing computers or other products, thereby extending the putative class to individuals (or non-manufacturing entities) that made such purchases as well. Additionally, so called "external" ODDs, consisting of little more than an internal ODD in a case, are available to consumers. There is no apparent basis to treat such devices, when manufactured and sold by defendants, any differently than "internal" ODDs that are sold prior to installation in another product. [8]

---

[6] Defendants question whether it is realistic that Dell and HP ultimately will participate as class members in this action. While that may present certification issues, it does not undermine the plausibility of the claims at the pleading stage.

[7] To the extent plaintiffs contended that *all* manufacturers and sellers of ODD products were part of the purported conspiracy, they failed to allege facts making such a claim plausible.

With respect to all of these "ODD-only" sales, there is no tenable argument that the putative class members in the DP SAC are not true "direct purchasers" or that *Illinois Brick* stands as a bar to their claims. [9]

A second category of ODDs implicated by the DP SAC is what it (perhaps improvidently) defines as "ODD Devices." As alleged, these are "stand-alone players that typically plug into a television or other audiovisual device . . . that are manufactured by any of the named Defendants or their affiliates or subsidiaries." [10] The Direct Purchasers have explicitly excluded computers, videogame consoles, and camcorders from that definition. [11] While presumably any number of unrelated third parties also manufacture and sell "stand-alone" players using ODDs they buy from defendants, the Direct Purchasers have avoided that aspect of their prior *Illinois Brick* problem by excluding those devices from their claims.

As defendants point out, however, where an ODD manufactured by one defendant is incorporated into a larger product, even if by an affiliate, subsidiary, or co-conspirator of the manufacturing entity, *Royal Printing* and the prior dismissal order suggest that any claim is better characterized as *indirect*, rather than direct. This issue, though, is one of nomenclature rather than substance. *Royal Printing* itself did not involve separate complaints by groups of plaintiffs characterized as direct or indirect. Indeed, by stating that certain claims could not go forward because they involved purchases that were "*truly* indirect," *621 F.2d at 328* (emphasis added), the decision implies that it would not be entirely wrong to characterize claims permitted under its reasoning as equivalent to those involving "direct" **[*30]** purchases.

Moreover, the prior order expressly left to plaintiffs the decision as to whether these claims should be pursued as part of the Direct Purchasers' complaint or that of the Indirect Purchasers. While it would have been preferable for plaintiffs to have clarified that a consensus was reached to include these claims in the DP SAC rather than the IP SAC, there is no legal reason to bar them from going forward in the same complaint as the other more clearly "direct" claims.

The final category of ODDs within the scope of the DP SAC comprises those sold preinstalled in computers, videogame consoles, or camcorders manufactured and sold by defendants, their affiliates, or subsidiaries. [12] Conceptually, such products are no different than what the DP SAC denominates as "ODD Devices," except that in the case of computers, videogame consoles, and camcorders it is unlikely that the ODD constitutes the major portion of the cost of the device. At the pleading stage at least, that distinction is insufficient to bar the claims from going forward. As *Royal Printing* explained, the *Illinois Brick* rule is grounded in two concerns. First, at least where a product passes through the hands of a "middleman" **[*31]** unconnected to a price-fixing manufacturer, there would exist "intolerable complexities of proof and economics" as to how much, if any, of the inflated cost was passed on to

---

[8] As noted, however, the indirect purchasers may be contending that such external ODDs are encompassed in their complaint. Unless there are third party entities that purchase "internal" ODDs, put them in a case and resell them, this issue may need to be resolved at a later stage, and in any event, further clarity will be **[*28]** required.

[9] Defendants complain that the allegations regarding the *named* plaintiffs' purchases are too vague to determine what kinds of products they purchased. Whether the named plaintiffs can serve as adequate class representatives upon refinement of the class definitions remains to be seen, but it would be premature to parse and dismiss some portion of the claims for lack of standing at this stage.

[10] To the extent this definition might be construed as encompassing "external" ODDs that are **[*29]** designed for use with computers and are essentially just "internal" ODDs in cases, such devices are better classed in the preceding category, as discussed above.

[11] Defendants argue that the DP SAC does not contain any such clear exclusion. To the extent the pleading itself is ambiguous, plaintiffs will be held to the representations made in their briefing and at the hearing.

[12] Again, the definitions of the products and descriptions of the claims are sufficiently unclear that it is arguable that plaintiffs have omitted any claim related to ODDs preinstalled in computers, videogame consoles, and camcorders manufactured by defendants from *both* the DP SAC and the IP SAC. Read liberally, however, it is apparent that the DP SAC should be construed as intending to assert such a claim.

the indirect purchaser, as opposed to being absorbed by the middleman. *Royal Printing, 621 F.2d at 325* (citing *Illinois Brick, 431 U.S. at 731-32, 737-45)*. Second, "allowing indirect purchasers to sue remote price-fixers would open the door to multiple liability for defendants." *Id.*

Here, it is unclear to what the degree the first concern of the *Illinois Brick* court is even implicated, as subsidiaries and affiliates in conspiracy with and/or controlled by alleged price-fixers presumably would pass on all of the inflated cost. *See* *Illinois Brick, 431 U.S. at 736 n.16* (suggesting potential exception where "the direct **[*32]** purchaser is owned or controlled by its customer.") Moreover, as *Royal Printing* observed, "blind application" of the *Illinois Brick* rule should be avoided where it "would eliminate the threat of private enforcement." *621 F.2d at 326 n.7*. Where a price-fixing manufacturer sells through a subsidiary, affiliate, and/or co-conspirator, not only is there little risk of multiple liability (since the "middleman" in such instances is unlikely to sue) it would undermine the private enforcement mechanisms of the ***antitrust law*** to preclude the only party with an interest in pursuing the claim from proceeding. *See* *id. at 327* ("Because, as we have already shown, as a practical matter the direct purchasers here will never sue, barring Royal Printing's suit would close off every avenue for private enforcement of the antitrust laws in such cases. This would be intolerable.").

Accordingly, without prejudging what issues of proof might arise in connection with establishing a "pass on" of any price-fixing, the Direct Purchasers are entitled to pursue claims arising from purchases of preinstalled ODDs in computers, videogame consoles, and camcorders, manufactured and sold by defendants, their affiliates, **[*33]** or subsidiaries. Whether such purchases are better characterized as "direct" or "indirect" is immaterial, for the same reasons discussed above in connection with the claims regarding "ODD Devices."

Defendants' remaining arguments regarding *Illinois Brick* and similar issues they contend are implicated under *Associated General Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. 519, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)* ("*AGC*"), rest on the premise that plaintiffs must establish a conspiracy to fix prices of products containing ODDs, not just of the ODDs themselves, if they wish to pursue claims arising from purchases of those products. Plaintiffs' previous attempt to allege such a conspiracy, of course, was rejected as implausible. They need not resurrect that theory to proceed. Plaintiffs may face formidable problems of proof in showing, for example, that a defendant sold its own computers containing ODDs at inflated prices, even assuming they succeed in showing that same defendant was simultaneously engaged in a price-fixing conspiracy that stabilized the prices of ODDs it was selling to other OEM manufacturers. Any such potential hurdles, however, do not warrant dismissal at the pleading **[*34]** stage.

C. Statute of Limitations

Defendants raised no statute of limitations argument as to the prior complaints, but have done so now. If accepted, defendants' arguments would at most cut off some portion of plaintiffs' claims, at varying points in times based on when each defendant was first named in one of the underlying complaints in this action.

Generally, a cause of action accrues and the statute begins to run when a defendant commits an act that injures a plaintiff. *Zenith Radio Corporation v. Hazeltine Research, Inc., 401 U.S. 321, 338, 91 S. Ct. 795, 28 L. Ed. 2d 77*. "In the context of a continuing conspiracy to violate the antitrust laws . . . this has usually been understood to mean that each time a plaintiff is injured by an act of the defendants a cause of action accrues to him to recover the damages caused by that act and that, as to those damages, the statute of limitations runs from the commission of the act. *Id.* The statute is subject to tolling by fraudulent concealment, which is the plaintiff's burden to plead and prove. *Conmar Corp. v. Mitsui & Co. (U.S.A.), Inc., 858 F.2d 499, 505 (1988)*.

While Defendants contend that plaintiffs' allegations in support of fraudulent concealment are unduly conclusory, **[*35]** they have not shown them to be so deficient as to warrant dismissal at this juncture. Additionally, even assuming plaintiffs may be unable to prove a basis for fraudulent concealment, defendants have not shown exactly what effect that would have on the claims, given the context of an alleged continuing conspiracy, and the differing cutoff dates for various defendants. Issuing a naked statement that plaintiffs claims are barred prior to various specific dates would serve little purpose at this stage of the proceedings, in the absence of more clarity as to what, if any, effect that would have on the scope of the recoverable damages or other matters.

D. Particular Defendants

Several groups of related defendants have each filed separate motions to dismiss arguing, in essence, that even assuming the complaints state viable claims as to other entities more clearly involved in the alleged conspiracy, they lack sufficient factual averments to tie the moving defendants to any wrongful conduct. [13] As observed in the prior dismissal order, while detailed "defendant by defendant" allegations are not required, a complaint "must allege that each individual defendant joined the conspiracy and played **[*36]** some role in it because, at the heart of an antitrust conspiracy is an agreement and a conscious decision by each defendant to join it." *In re TFT-LCD (Flat Panel) Antitrust Litigation, supra, 586 F.Supp.2d at 1117* (quoting *In re Elec. Carbon Prods. Antitrust Litig., 333 F.Supp.2d 303, 311-12 (D.N.J. 2004)*.

Here, as to those defendants who are alleged to have formed and participated in the joint ventures at the heart of the claimed conspiracy, the complaints plainly are sufficient to meet this standard. While such defendants may ultimately be able to show that they are not responsible **[*37]** for the conduct of the joint ventures under any legal theory, or for otherwise directly participating in any conspiracy, dismissal at the pleading stage is not appropriate.

Those defendants who were not constituents of any of the relevant joint ventures present a closer call, and in some instances the allegations tying them to the alleged conspiracy are especially thin. Nevertheless, review of the complaints reveals no defendant as to which allegations of fact are so wholly lacking that dismissal would be warranted. Accordingly, the separate motions to dismiss must be denied.

E. Injunctive Relief in the IP SAC

Defendants contend that the Indirect Purchasers' claim for injunctive relief fails for lack of a sufficient threat of imminent or continuing harm. "[A]n antitrust plaintiff seeking injunctive relief need only show a *threatened* injury, not an actual one." *Lucas Auto. Engineering v. Bridgestone/Firestone, Inc., 140 F.3d 1228, 1235 (9th Cir. 1998)* (emphasis in original). Given the nature of the conspiracy alleged, the IP SAC's allegations are sufficient to support a claim for injunctive relief.

F. State Law Claims

Defendants challenge the adequacy of the IP SAC claims under the laws **[*38]** of eight specific states and the District of Columbia. While the details of the argument varies from jurisdiction to jurisdiction, defendants' basic contention is that the Indirect Plaintiffs have not pleaded an adequate nexus to, or effect on commerce in, the District of Columbia, New York, Michigan, Mississippi, North Carolina, South Dakota, Tennessee, Wisconsin, and West Virginia. Defendants have not persuasively shown that an alleged conspiracy based outside these jurisdictions is insufficient to give rise to liability under the local laws. Plaintiffs' allegations are adequate, at least at the pleading stage, to show the requisite impact on commerce from the claimed conspiracy in each of those nine jurisdictions.

Defendants' additional challenge to the claim under *New York Gen. Business Law § 349* would unduly limit the scope of that statute to fraudulent misrepresentation. The allegations of the IP SAC are sufficient. *See* ("Antitrust-type claims have been recognized under *§ 349(a)*."). *In re Graphics Processing Units Antitrust Lit., 527 F.Supp.2d 1011, 1030 (N.D. Cal. 2007)*.

Contending that a *Rule 9* heightened pleading standard applies to claims under Florida and Missouri consumer **[*39]** protection statutes, defendants further argue the IP SAC fails to meet that standard. While it is unclear whether heightened pleading requirements apply to claims not grounded in fraud, the detailed facts plaintiffs have pleaded are sufficient.

---

[13] The separate motion filed by defendants Quanta Storage Inc. and Quanta Storage America Inc. is an exception because it focuses on an argument that plaintiffs lack Article III standing for failure to plead sufficient facts to establish cognizable injury. Although framed in different terms, the contentions advanced by the Quanta entities are effectively a subset of the issues raised in the joint motions, in that they contend any price-fixing in connection with the Dell and HP auctions does not support an inference that the prices of other ODDs were affected. This argument fails in light of the analysis above.

Finally, plaintiffs' claims under South Carolina law are not subject to dismissal notwithstanding a limitation on class actions in the state statute. *See* *Shady Grove Orthopedic Assocs. v. Allstate Ins. Co., 559 U.S. 393, 130 S.Ct. 1431, 1437-38, 176 L. Ed. 2d 311 (2010)* (holding that *Rule 23* applies in Federal Court diversity actions). Defendants' attempts to distinguish *Shady Grove* are not persuasive. Accordingly, the motion to dismiss the state law claims must be denied. [14]

V. CONCLUSION

The motions to dismiss are denied. Defendants shall file answers within 45 days of the date of this order. **[*40]** The parties shall appear for a Case Management Conference on Friday, June 29, 2012 at 10:00 a.m. This order disposes of Docket Nos. 434, 436, 438, 441, 442, 445, 446, 449, 458, 460, 463, and 471.

IT IS SO ORDERED.

Dated: 4/19/12

RICHARD SEEBORG

UNITED STATES DISTRICT JUDGE

End of Document

[14] The Indirect Purchasers concede their claims under New Hampshire and Utah antitrust laws are limited to the time periods beginning January 1, 2008, and May 1, 2006, respectively. For that reason it would be equally appropriate to characterize that one aspect of the motion as having been granted. Regardless how the disposition is characterized, plaintiffs will be held to their concession.

Opinion

[1110] ORDER GRANTING SANDISK CORPORATION'S MOTION TO DISMISS WITH LEAVE TO AMEND**

Plaintiff PNY Technologies, Inc. ("PNY") filed suit against Defendant SanDisk Corporation ("SanDisk") alleging antitrust violations stemming from SanDisk's extensive patent portfolio in the flash memory technology upstream market. In summary, PNY alleges that SanDisk is misusing the market power inherent in its patent portfolio to demand multi-tiered licensing and royalties in the downstream **[*2]** markets which then suppresses price competition in the United States. PNY's Complaint alleges Monopolization and Attempted Monopolization under *Section 2* of the Sherman Act, *15 U.S.C. § 2*, (First and Second Counts); Conspiracy under Section 1 of the Sherman Act, *15 U.S.C. § 1*, between SanDisk and certain of its licensees (Third Count); and state law claims for intentional interference (Fourth Count) and unfair competition under *California Business & Professions Code §§ 17200 et seq*. (Fifth Count). PNY seeks a **[**1111]** declaratory judgment, damages, restitution and injunctive relief.

SanDisk moves to dismiss all five claims for failure to state a claim pursuant to *Rule 12(b)(6) of the Federal Rules of Civil Procedure*. In particular, SanDisk argues that the Complaint is not specific enough to meet federal pleading standards in antitrust cases.

Having carefully considered the papers and the pleadings submitted, and the argument of counsel, for the reasons set forth below, the Court hereby **GRANTS** the Motion to Dismiss **WITH LEAVE TO AMEND.**

I. Background

A. THE MARKETS

PNY's Complaint, Dkt. No. 1, alleges as follows: PNY and SanDisk are competitors in the flash memory market. *Id.* ¶ 1. Flash memory is **[*3]** a type of removable data storage device for computer memory. *Id.* ¶¶ 22-23. The technology is used in consumer products such as Universal Serial Bus drives ("USB flash drives"), Compact Flash cards, and solid-state drives. *Id.* ¶ 23. Consumers throughout the United States use these products which are considered one of the most important forms of data storage in the marketplace. *Id.* ¶ 27. In 2010 alone, over one billion dollars of flash memory products were sold in the United States. *Id.*

A flash memory product is comprised of three parts: one, a "device," commonly referred to as a memory chip [1]; two, a "controller," which acts as the interface between the flash memory device and the computer; and three, a flash memory "system," which combines the component parts into a "systems product," such as a USB flash drive, which is the end product sold to the consumer. *Id.* ¶¶ 24-26. The distribution chain that results in the eventual sale of flash memory systems products (such as USB flash drives) has four segments: first, developers and licensors of the flash memory technology needed to manufacture flash memory devices, systems, and products; second, device manufacturers; third, aggregators that **[*4]** purchase component parts and assemble systems products; and fourth, purchasers of "finished" systems products (called resellers) for resale. *Id.* ¶¶ 29-31, 71. The flash memory device is by far the largest part of the overall cost of any flash memory system or product. *Id.* ¶ 28.

Some companies, such as SanDisk, are vertically-integrated, producing flash memory devices, systems, and products both for their own use (*e.g.*, SanDisk-branded products that are ultimately sold to consumers), and for sale to aggregators and resellers. *Id.* ¶¶ 30, 33, 71. In 2010, SanDisk-branded flash memory products accounted for more than 40% of all retail sales of flash memory products in the United States. *Id.* ¶ 42. Other companies manufacture only flash memory devices. *Id.* ¶ 29. PNY is an aggregator, which means that it does not manufacture its own flash memory devices, but instead purchases the devices from manufacturers and assembles those devices with other component parts to create a flash memory systems product. *Id.* ¶¶ 31-33. Aggregators can take

[1] The parties use the terms "device" and "chip" interchangeably in their papers. The Court will use the term "device" in this Order.

advantage of an oversupply **[*5]** of flash memory devices and produce lower-cost flash memory systems products. *Id.* ¶ 33.

B. SANDISK'S PRESENCE IN THE FLASH MEMORY MARKET

According to the Complaint, SanDisk claims to own more than 1,400 United States patents related to flash memory technology that cover 100% of the flash memory technologies that are or can be used to manufacture or assemble flash memory devices, flash memory systems, or flash memory products for sale in the United States. *Id.* ¶ 36. PNY alleges there are no closely suitable substitute technologies to which a manufacturer or aggregator of flash memory devices, systems, or products can switch to avoid using SanDisk's flash memory patented technology. *Id.* ¶ 40. Additionally, PNY alleges that SanDisk has taken the position that any firm manufacturing, assembling, or selling flash memory devices, flash memory systems, or flash memory products in the United States is using one or more of SanDisk's patents and must pay a royalty to SanDisk or face litigation. *Id.* ¶¶ 36, 42-43, 50-51, 55-83.

PNY alleges that there are significant barriers to entering the flash memory market. Specifically, PNY alleges that developing a new portable technology for storing and transferring **[*6]** data that would function as a suitable substitute for flash memory technology could cost billions of dollars. *Id.* ¶¶ 44-45, 49. And these high costs would prevent new competition from entering the technology market for at least two years. *Id.* ¶¶ 44, 52. **[**1112]**

C. SANDISK'S ALLEGED ANTICOMPETITIVE LICENSE AND LICENSING PROGRAM

PNY alleges that SanDisk uses the specter of expensive and endless patent infringement litigation to coerce its competitors into signing (under the guise of a settlement) its uniform, non-negotiable license, which gives SanDisk control over the pricing of flash memory technology and products sold to its competitors and, ultimately, to consumers. *Id.* ¶¶ 1-2, 4-6, 42-43, 50-51, 55-62, 69-70, 75-76, 80, 85-86, 88, 97, 99, 100-05. According to the Complaint, SanDisk's license violates the antitrust laws because it requires licensees to: (1) pay multiple royalties on the same product as it is sold downstream, once when the flash memory device is sold by one of SanDisk's flash memory device manufacturer licensees, and again (after SanDisk's patent rights have been exhausted) after the flash memory device is incorporated into a "system" or "product" and sold by an aggregator **[*7]** such as PNY, *id.* ¶¶ 4, 42-43, 50-51, 77-80, 91-99, 116; (2) pay a royalty on worldwide sales (including sales in countries where SanDisk does not have any patent rights), *id.* ¶¶ 4, 8, 84-89, 116; (3) license an omnibus, unspecified patent portfolio (rather than specific individual patents), *id.* ¶¶ 4, 84-89, 116; and (4) grant-back to SanDisk a worldwide, royalty-free cross-license to all future flash memory-related technological innovations within the scope of the portfolio developed by the licensee, inhibiting efforts to design around SanDisk's patents and stifling licensees' incentives to innovate, *id.* ¶¶ 3-4, 8, 38, 90, 104, 116, 121, 133. Additionally, the royalty structure of SanDisk's licensing agreement allegedly is anticompetitive because it ensures that SanDisk's competitors: (a) purchase products from SanDisk at prices set by SanDisk; (b) purchase products from a supplier licensed by SanDisk and pay a royalty on patented technology to SanDisk, in addition to the royalty already paid by the licensed supplier; (c) purchase the products from an unlicensed supplier and pay SanDisk a very high royalty; or (d) manufacture the product and pay SanDisk the same very high royalty on **[*8]** sales. *Id.* ¶ 143. The cost of the royalty is passed on to consumers in the form of increased retail prices. *Id.* ¶ 88.

D. SANDISK'S ALLEGEDLY PREDATORY BEHAVIOR

In January 2008, PNY entered into such a licensing agreement with SanDisk in order to settle two patent infringement lawsuits, "under the threat of continuing patent litigation." *Id.* ¶ 1. PNY was "willing to enter the license because at that time, 95% of [its] flash memory related purchases were of . . . finished end-user products . . . sold by Toshiba and Samsung." *Id.* ¶ 71. "[T]he license was expected to have minimal impact on PNY's business" because at that time, PNY functioned primarily as a reseller of Toshiba and Samsung flash memory products and the license would not require PNY to pay any royalties on these purchases, and entering into the license would settle SanDisk's patent infringement lawsuit against PNY. *Id.* "But as the markets changed and the availability of lower cost flash memory devices and systems from other manufacturers grew, PNY changed its purchasing mix to de-emphasize the purchase of flash memory systems products, and instead focus on purchasing the component parts" for assembly and resale. *Id.* ¶ 72. In **[*9]** addition to the changing market conditions, PNY claims to have altered its purchasing behavior because Toshiba and Samsung's pricing of finished products (a market in which PNY functioned only as a reseller) "was no longer competitive." *Id.* ¶ 73.

PNY alleges that SanDisk, Toshiba, Samsung and other vertically-integrated manufacturers conspired to increase or hold steady the prices of the flash memory system products so that resellers, like PNY, would purchase the component parts and assemble the flash memory systems products themselves, and pay a royalty to PNY. *Id.* ¶ 74. PNY also alleges that SanDisk's conspiracy with the other vertically-integrated manufacturers (like Toshiba and Samsung), with whom SanDisk also has licenses, has forced low-cost aggregators like PNY to pay duplicate and inflated royalties to SanDisk when they purchase flash memory devices, systems, or products from SanDisk or one of its vertically-integrated licensees. *Id.* ¶¶ 2, 6, 42, 50, 74-80, 93-95, 98, 140-45. Through these licenses, PNY alleges SanDisk ensures that it controls the prices at which flash memory technology and products are sold and SanDisk precludes its competitors from selling low-cost flash memory **[*10]** products.

PNY also alleges that SanDisk's licensing scheme has caused competitors to exit one of these markets, though it does not specify which market. For example, PNY believes that SanDisk entered into a licensing agreement with one of SanDisk's larger competitors, Buffalo, "that requires Buffalo to exit one or more of the Relevant Markets." *Id*. ¶ 82. In addition, PNY alleges that "[s]everal **[**1113]** competitors, including Buffalo, have exited or significantly reduced their presence in one or more of the Relevant Markets as a result of SanDisk's anticompetitive licensing scheme." *Id.* ¶ 103.

PNY alleges that SanDisk's licensing and royalty scheme harms competition in the United States markets for flash memory by keeping the prices for flash memory artificially high and under SanDisk's control. PNY further alleges that SanDisk's exclusionary licensing and royalty scheme operates to preserve and enhance SanDisk's existing monopoly power in all flash memory-related markets or threatens to monopolize additional downstream product markets in violation of *Sections 1* and *2* of the Sherman Act, *15 U.S.C. § 1 et seq.*, and California business tort law.

II. LEGAL STANDARD

To survive a motion to dismiss pursuant **[*11]** to *Federal Rule of Civil Procedure 12(b)(6)*, "a complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 557, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. In the antitrust context, "a court must determine whether an antitrust claim is 'plausible' in light of basic economic principles." *William O. Gilley Enters., Inc. v. Atl. Richfield Co., 588 F.3d 659, 662 (9th Cir. 2009)* (citing *Twombly, supra, 550 U.S. at 556*). Although the court must construe all allegations of material fact in the light most favorable to the plaintiff, "a plaintiff's obligation to provide the grounds of his entitle[ment] to relief requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Twombly, supra, 550 U.S. at 555* (alteration in original). If the allegations in the complaint fail to give rise to a plausible claim for relief, "'this basic deficiency should . . . be exposed at the point of minimum expenditure of time and money by the parties and the court.'" *Id. at 558* (citations omitted). *Twombly* was itself an antitrust **[*12]** case and the Supreme Court's caution to proceed in these cases only upon a complaint with specific allegations is particularly apt.

III. DISCUSSION

A. TENSION BETWEEN PATENT RIGHTS AND ANTITRUST CLAIMS

Courts continue to define at what point conduct stemming from the legitimate exercise of patent rights is transformed into an antitrust claim and/or a defense based on the patent misuse doctrine. [2] It has long been held that a "patentee has the exclusive right to manufacture, use and sell his invention." *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 136, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)* (*citing* *Bement & Sons v. Nat'l Harrow Co., 186 U.S. 70, 88-89, 22 S. Ct. 747, 46 L. Ed. 1058, 1902 Dec. Comm'r Pat. 666 (1902))*. The Supreme Court continued: "The heart of his legal monopoly is the right to invoke the State's power to prevent others from utilizing his discovery without his consent. The law also recognizes that he may assign to another his patent, in whole or in part, and may license others to practice his invention." *Id.* (internal citations omitted).

Although the patent **[*13]** laws grant the inventor a limited monopoly over the patented invention, "the ultimate goal of the patent system is to bring new designs and technologies into the public domain through disclosure." *Bonito Boats, Inc. v. Thunder Craft Boats, Inc., 489 U.S. 141, 151, 109 S. Ct. 971, 103 L. Ed. 2d 118 (1989)*; *see also,* *Quanta Computer, Inc. v. LG Elecs., Inc., 553 U.S. 617, 626, 128 S. Ct. 2109, 170 L. Ed. 2d 996 (2008)* ("the primary purpose of our patent laws is not the creation of private fortunes for the owners of patents but is 'to promote the progress of science and useful arts'") (quoting *Motion Picture Patents Co. v. Universal Film Mfg. Co., 243 U.S. 502, 511, 37 S. Ct. 416, 61 L. Ed. 871, 1917 Dec. Comm'r Pat. 391 (1917))*. [3] Thus, the patent laws strike a balance: the inventor is rewarded with a limited patent monopoly, which enables the inventor to reap the financial rewards of the invention, in return for full disclosure of the patented invention and its dedication to the public domain on expiration of the patent. *Scott Paper Co. v. Marcalus Mfg. Co., 326 U.S. 249, 66 S. Ct. 101, 90 L. Ed. 47, 1946 Dec. Comm'r Pat. 616 (1945)* *rehearing denied 326 U.S. 811, 66 S. Ct. 263, 90 L. Ed. 495*. The "patent empowers the owner to exact royalties as high as he can negotiate with the leverage of that monopoly," *Brulotte v. Thys Co., 379 U.S. 29, 33, 85 S. Ct. 176, 13 L. Ed. 2d 99 (1964)*; and, subject to the general law, refuse to **[*14]** license an invention altogether. *Image Technical* ***[**1114]*** *Servs., Inc. v. Eastman Kodak Co., 125 F.3d 1195, 1218 (9th Cir. 1997)* (noting that it could find "no reported case in which a court ha[s] imposed antitrust liability for a unilateral refusal to sell or license a patent"). However, once the patent owner has sold or licensed the invention, "it may fairly be said that the patentee has received his reward for the use of the patent." *United States v. Masonite Corp., 316 U.S. 265, 278, 62 S. Ct. 1070, 86 L. Ed. 1461, 1942 Dec. Comm'r Pat. 777 (1942)*.

Courts have established limits which the patentee must not exceed in employing the leverage of his patent to control or limit the operations of the licensee. A patent owner may not "extend the monopoly of his patent to derive a benefit not attributable to use of the patent's teachings." *Zenith Radio Corp., supra, 395 U.S. at 136*.

Under **[*15]** the doctrine of patent exhaustion, the initial "authorized sale of an article that substantially embodies a patent exhausts the patent holder's rights" under the patent. *Quanta Computer, Inc., supra, 553 U.S. at 638*. After a patent right is exhausted, it is no longer enforceable by the patentee. *Id. at 626*. Accordingly, a patent holder may not collect a "double royalty," that is, collect a royalty from both a licensee and a purchaser of the licensee's product under the same patent for the same patented product without violating the patent exhaustion doctrine. *PSC Inc. v. Symbol Techs., Inc., 26 F. Supp. 2d 505, 510 (W.D.N.Y. 1998)*. However, patent exhaustion is not a cause of action, but an affirmative defense to a patent infringement lawsuit that "prohibits patent holders from selling a patented article and then 'invoking patent law to control the postsale use of the article.'" *ExcelStor Tech., Inc. v Papst Licensing GMBH & Co. KG, 541 F.3d 1373,1376 (Fed. Cir. 2008)* (quoting *Quanta Computer, Inc., supra, 553 U.S. at 638*).

---

[2] See discussion of historical context in Geoffrey D. Oliver, *Princo v. International Trade Commission:* ***Antitrust Law*** *and the Patent Misuse Doctrine Part Company*, 25 ANTITRUST 62, 63 (2011).

[3] The Patent Clause of the Constitution grants Congress the power "[t]o promote the Progress of Science and useful Arts, by securing for limited Times to Authors and Inventors the exclusive Right to their respective Writings and Discoveries." *U.S. Const. art. I, § 8, cl. 8*. The means adopted by Congress of promoting the progress of science is by granting the inventor a limited patent monopoly.

While the patent system serves to encourage innovation, the antitrust laws serve to foster competition. *See* *Intergraph Corp. v. Intel Corp., 195 F.3d 1346, 1362 (Fed. Cir. 1999)* **[*16]** (citing *Loctite Corp. v. Ultraseal Ltd., 781 F.2d 861, 866-67 (Fed. Cir. 1985)*. Thus, the statutory rights extended by intellectual property laws do not confer upon the patent owner a privilege or immunity to violate the antitrust laws. *Id.*; *Atari Games Corp. v. Nintendo of Am., Inc., 897 F.2d 1572, 1576 (Fed Cir. 1990)* (patent does not shield patent owner from the antitrust laws). But the Supreme Court has cautioned that even if patent misuse exists, "it does not necessarily follow that the misuse embodies the ingredients of a violation of either *§ 1* or *§ 2* of the Sherman Act." *Zenith Radio Corp., supra, 395 U.S. at 140*. The intersection between these two competing concepts continues to develop.

The tension between these concepts is particularly important here, as the gravamen of Plaintiff's Complaint arises from a change in market conditions and Plaintiff's current dissatisfaction with the licenses entered into in January 2008. However, because Plaintiff has styled these allegations of patent misuse as violations of ***antitrust law***, they must be analyzed as such under the *Twombly* standard. [4]

B. [*18] SHERMAN ACT *§ 2* CLAIMS: MONOPOLIZATION AND ATTEMPTED MONOPOLIZATION

Section 2 of the Sherman Act makes it unlawful to monopolize, attempt to monopolize, or combine or conspire to monopolize. [5] PNY brings claims for both Monopolization (Count **[**1115]** I) and Attempted Monopolization (Count II) in *each* of the flash memory-related markets.

To state a cause of action for the offense of monopoly under *Section 2* of the Sherman Act, a plaintiff must plead two elements: (1) possession of monopoly power in the relevant market; and (2) willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident. *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*.

If a defendant does not possess monopoly power, a Sherman Act *Section 2* claim may be maintained for attempted monopolization if (1) there **[*19]** is "a dangerous probability" that the defendant may be able to achieve monopoly power and (2) the defendant is engaged in predatory or anticompetitive conduct with (3) "a specific intent to monopolize." *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)*; *Cost Mgmt. Servs., Inc. v. Wash. Natural Gas Co., 99 F.3d 937, 949 (9th Cir. 1996)* (the elements for attempted

---

[4] PNY urges the Court to look at the overall scheme alleged in the Complaint to determine whether **[*17]** it has stated a claim for antitrust violation. Pl.'s Opp'n 14 (citing *Continental Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 699, 82 S. Ct. 1404, 8 L. Ed. 2d 777 (1962)* (courts should not "tightly compartmentaliz[e] the various factual components and wip[e] the slate clean after scrutiny of each"). While the slate need not be "wiped clean" after scrutiny of a particular theory, each legal theory must be examined for its sufficiency separately. In *City of Groton v. Conn. Light & Power Co., 662 F.2d 921, 928-29 (2d Cir. 1981)* (quoted in *Intergraph Corp., supra, 195 F.3d at 1367*) , the Second Circuit explained:

> [W]e reject the notion that if there is a fraction of validity to each of the basic claims and the sum of the fraction is one or more, the plaintiffs have proved a violation of *section 1* or *2* of the Sherman Act. The proper inquiry is whether, qualitatively, there is a "synergistic effect."

While the ultimate determination of an antitrust violation rests on the "overall combined effect" of the alleged acts, *see* *City of Anaheim v. S. Cal. Edison Co., 955 F.2d 1373, 1376 (9th Cir. 1992)*, "there can be no synergistic result" if none of the acts alleged is an antitrust violation. *Cal. Computer Prods. v. Int'l Bus. Machs., Corp., 613 F.2d 727 (9th Cir. 1979)*.

[5] *15 U.S.C. § 2*. Monopolizing trade a felony; penalty

> Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a felony . . .

monopolization are "(1) specific intent to control prices or destroy competition; (2) predatory or anticompetitive conduct to accomplish monopolization; (3) dangerous probability of success; and (4) causal antitrust injury").

Additionally, because PNY seeks relief under Sections 4 and 16 of the Clayton Act, *15 U.S.C. §§ 15*, *26*, [6] it must allege that it has suffered (*Section 4*) or faces the threat of (*Section 16*) antitrust injury of "'the type the antitrust laws were designed to prevent and that flows from that which makes defendants' acts unlawful.'" *Cargill, Inc. v. Monfort of Colo., Inc., 479 U.S. 104, 113, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)* (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977))*.

The first step in the analysis is to define the relevant market or markets. No dispute appears to exist that the relevant markets are (a) the upstream market consisting of the flash memory technology itself and (b) the downstream markets flowing therefrom consisting of flash memory devices, systems, and products. Further, all relevant markets are based only in the United States. Accordingly, the Court will discuss the remaining elements in turn. The Court further notes, at this juncture, that because PNY does little to separate the facts alleged for the conduct relative to each market, the discussion of each element, to the extent necessary, will be analyzed with each specific market in mind.

1. Nature of SanDisk's Market Power in the Relevant Markets

All *Section 2* Sherman Act claims require that the plaintiff adequately plead either monopoly power or "a dangerous probability" that **[*21]** the defendant may be able to achieve monopoly power. *Newcal Indus. v. Ion Office Solution, 513 F.3d 1038, 1044 n.3 (9th Cir. 2008)*. The Supreme Court defines monopoly power as the "power to control prices or exclude competition." *See* *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 393, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*. For purposes of a motion to dismiss, a plaintiff may plead this market power through allegations concerning (i) direct evidence showing the effects of the anticompetitive behavior or (ii) indirect evidence of market power. "If the plaintiff puts forth evidence of restricted output and supracompetitive prices, that is direct proof of the injury to competition which a competitor with market power may inflict, and thus, of the actual exercise of market power." *Rebel Oil Co., Inc. v. Atl. Richfield Co., 51 F.3d 1421, 1434 (9th Cir. 1995)* (summary judgment). To demonstrate market power indirectly, or circumstantially, a plaintiff must define the relevant market, and show that (i) the defendant owns a dominant share of that market and (ii) there are significant barriers to entry and existing competitors lack the capacity to increase their output in the short run. *Id. at 1439* (the "barriers **[*22]** to entry" test looks at not only whether "there are significant barriers to entry [but also whether] . . . existing competitors lack the capacity to increase their output in the short run").

a) Upstream Market: flash memory technology

i. Market share

PNY alleges that SanDisk is a monopolist in the flash memory technology market because SanDisk purports to own 100% of the United States patents in flash memory technology. Complaint ¶ 36. Courts generally require a 65% market share to establish a prima facie showing of market power. *Image Technical Servs., supra, 125 F.3d at 1206* (evidence supported jury verdict finding defendant **[**1116]** controlled monopoly share of parts market where jury instruction required 65% market share in order to find that defendant monopoly power).

---

[6] Section 4 of the Clayton Act provides that "any person who shall be injured in his business or property by reason of anything **[*20]** forbidden in the antitrust laws may sue therefor." *15 U.S.C. § 15*. Section 16 of the Clayton Act provides that "[a]ny person, firm, corporation, or association shall be entitled to sue for and have injunctive relief . . . against threatened loss or damage by a violation of the antitrust laws." *15 U.S.C. § 26*.

Thus, although ownership of a patent does not necessarily confer market power, *see* *Illinois Tool Works, Inc. v. Indep. Ink, Inc., 547 U.S. 28, 126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006)*, the allegation that SanDisk owns 100% of the technology patents is sufficient to plead a dominant share of the market.

ii. Barriers to entry

PNY combines its allegation of 100% ownership of United States patents with other allegations, showing not just a dominant market share, but **[*23]** the ability to control prices and the existence of entry barriers. Specifically, PNY alleges: "there are no closely suitable technologies to which a manufacturer of flash memory systems products could switch in the event of a price increase for the patents SanDisk claims cover all forms of flash memory technology." Complaint ¶ 40. In other words, if SanDisk owns all the flash memory technology patents, it has the ability to set the price to license its patents. Additionally, PNY alleges that the flash memory technology market is characterized by high entry barriers, which would prevent new competition from entering the market. *Id.* ¶¶ 44-46, 52, 118, 130. To support this factual conclusion PNY further alleges that new competitors would require two years of time and billions of dollars in capital investment to develop the technology to compete in this upstream market. *Id.*

SanDisk does not dispute the significant investment to develop flash memory technology, but instead argues that PNY fails to allege any facts of market power or exclusionary conduct beyond that inherent in SanDisk's patents. SanDisk's Motion to Dismiss, Dkt. No. 29, ("Mot. to Dismiss") 13. SanDisk notes that PNY alleges **[*24]** that "alternative designs [of flash memory systems products] exist that do not infringe some or all of SanDisk's patents." *Id.* (citing Complaint ¶ 83). Thus, according to SanDisk, both the availability of competing technologies and the existence of other flash memory technology patent holders negate any inference that SanDisk is a monopolist in the upstream flash memory technology market. *Id.*

Based upon the specificity of the allegations in the Complaint, which support at least the inference of SanDisk's total dominance of the upstream market, the Court finds that PNY has sufficiently pled this element of a *Section 2* Sherman Act violation for monopolization of the upstream flash memory technology market. Consequently, the corresponding element under a claim for attempted monopolization is satisfied as an alternative theory.

b) Downstream Markets: flash memory devices, systems, and products

With respect to the downstream markets consisting of (i) devices, (ii) systems, and (iii) products, PNY alleges that SanDisk has a "monopolistic grip" over these markets and brings *Section 2* Sherman Act claim under theories of both monopolization and attempted monopolization. Complaint ¶¶ 42, 50.

PNY **[*25]** alleges that SanDisk possesses the power to control prices and exclude competition in the downstream markets and, thus, argues that it has alleged direct proof that SanDisk is a monopolist in all the downstream markets. [7] The conclusory allegations, which mirror the requisite elements, are based on the allegation that SanDisk uses its licenses to extract a royalty on the same patented technology on all downstream market sales, which has the effect of controlling prices. Pl.'s Opp'n 16-17 (citing Complaint ¶¶ 2, 4-6, 38, 74, 76, 80, 88, 97, 99, 101-02, 104, 117, 121, 128-29, 133, 142-43, 151). It is unclear from the Complaint or PNY's opposition brief how collecting royalties demonstrates the ability to set prices. Perhaps there is an effect, but whether the effect is specific to PNY or to the market generally is an important distinction. Without more, these allegations do not support the claim that SanDisk has the power *to control* prices and thus, PNY has not alleged facts to show market power directly. *See* *United States v. Syufy Enters., 903 F.2d 659, 670 (9th Cir. 1990)* (defendant lacked power to control prices where evidence showed he did not possess power to set prices).

[7] PNY's **[*26]** reasoning is somewhat circular: "SanDisk's anticompetitive licensing scheme has given it the power to control prices and exclude competition, as evidenced by SanDisk's actual exercise of control over prices and the actual exclusion of competition in the Relevant Markets." Complaint 117.

PNY further suggests that it has plausibly alleged that SanDisk has the power to exclude competition based on the allegation that SanDisk entered into contracts with "several competitors, including Buffalo, a large manufacturer of electronic devices," which required them "to exit one or more of the Relevant Markets." *See* Complaint ¶¶ 82, 103. **[**1117]** PNY fails to specify which market the competitors allegedly exited. Moreover, PNY needs to support this conclusion with facts that show SanDisk has the "power to exclude competition from the relevant market generally, not just to exclude a particular competitor." *L.A. Land Co. v. Brunswick Corp., 6 F.3d 1422, 1426-27 (9th Cir. 1993)*. The allegation that SanDisk contracted with a small number [8] of competitors to exit "one or more of the Relevant Markets" does not support the conclusion that SanDisk has sufficient power to exclude all competition *generally* from any **[*27]** of the downstream markets. *See id.* Further, unlike the specific claims of exclusionary conduct and suppression of competition in *Continental Ore, supra*, PNY has identified only one specific instance of a competitor leaving the market. *See* *370 U.S. at 694* (alleging defendants' monopolistic and restrictive practices caused producers and distributors of iron ore, including plaintiffs, to be eliminated from market).

The facts alleged do not show directly that SanDisk has market power in any of the downstream markets. Accordingly, the Court next will analyze whether PNY alleges sufficient facts concerning market share and barriers to entry in any of the downstream markets to show indirectly that SanDisk has monopoly power or a dangerous probability thereof.

i. Market share

> In terms of market share, PNY alleges that SanDisk has at least a 40% market share of retail sales of flash memory products, such as USB flash drives. *Id.* ¶¶ 36, 42. PNY admits **[*28]** that it does not know SanDisk's market share in the two other downstream markets, but alleges that SanDisk exerts direct control over those downstream markets through its uncompetitive licenses.

As stated above, generally, courts require a 65% market share to establish a prima facie showing of monopolistic market power. *See* *Image Technical Servs., supra, 125 F.3d at 1206*. PNY's Complaint in its current form at best articulates only a 40% share in the retail market for products. With respect to the other two downstream markets, the allegations regarding this element are wholly lacking. Accordingly, PNY has failed to plead sufficient facts supporting an allegation of monopoly power in these downstream markets either directly or circumstantially.

The next question is whether PNY has sufficiently alleged the first element regarding market power to state a claim for attempted monopolization. PNY must plead facts sufficient to allege that "a dangerous possibility" exists that SanDisk may be able to achieve monopoly power. In *Rebel Oil, supra*, the Ninth Circuit found a market share of 44% to be sufficient in an attempt case, although it cautioned against a purely mathematical analysis. *51 F.3d at 1438 & n.10* **[*29]** .

However, PNY admits that it has does not know the extent of SanDisk's share *at all* for the downstream markets for (i) flash memory devices or (ii) flash memory systems. Without any quantitative or qualitative allegations of market share, PNY may not pursue claims for attempted monopolization of the flash memory devices or systems market.

By contrast, PNY does allege that SanDisk possesses a 40% share of the retail market for flash memory products. A 40% share of the retail market is a sufficient share of the market for an attempt case provided there are barriers to entering the market.

ii. Barriers to entry

---

[8] The Court assumes that PNY uses the term "several" in its ordinary meaning: a small number; more than two or three but not very many. OXFORD ENGLISH DICTIONARY ONLINE, *http://www.oed.com/viewdictionaryentry/Entry/176914* (last visited Apr. 17, 2012).

> To establish, as PNY alleges, that SanDisk has a "monopolistic grip" over the downstream markets, PNY also must allege facts that show there are significant barriers to entry and that existing competitors lack the capacity to increase their output in the short run. *Rebel Oil, supra, 51 F.3d at 1439*. There are no factual allegations that could support the conclusion that there are barriers to entry in any of the downstream markets. As an initial matter, PNY's allegations of barriers to entry into the downstream market focus on barriers existing in the upstream market. PNY alleges **[*30]** that significant barriers exist because it would require two years of time and billions of dollars in capital investment to develop new *technology.* Complaint ¶¶ 44-45, 52. However, the flash memory technology market, which PNY defines as "the technology needed to manufacture, import, and sell flash memory devices, systems, and products," *id.* ¶ 35, is not the relevant market to analyze barriers to entering the downstream markets. PNY does not allege facts of such barriers to entering into any of the downstream markets.

In addition, the facts alleged do not show that existing competitors lack the capacity to increase output in the short run; actually, the facts alleged in the Complaint show the opposite. **[**1118]** According to the Complaint, after SanDisk and other vertically-integrated firms conspired to increase prices in the flash memory systems products market to a supracompetitive level, PNY and other companies increased output in the flash memory systems products market. *Id.* ¶¶ 72-75. Thus, the evidentiary facts, which are pled - that existing competitors increased output in the short run in response to a price increase - contradict PNY's conclusion that existing competitors do not have the **[*31]** capacity to increase output in the short run.

Based upon the foregoing, the Court finds that PNY has not sufficiently pled that SanDisk has a monopoly in any of the downstream markets or that there is "a dangerous probability" that SanDisk may be able to achieve monopoly power in any of the downstream markets. Thus, PNY fails to state a claim for monopolization or attempted monopolization of the downstream markets for flash memory devices, systems, and products.

2. Allegations of Anti-Competitive Conduct

a) Legal Framework

> For a claim of monopoly, the second and final element to be pled "is the use of that monopoly power to foreclose competition, to gain a competitive advantage, or to destroy a competitor." *Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 482-83, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)* (quoting *United States v. Griffith, 334 U.S. 100, 107, 68 S. Ct. 941, 92 L. Ed. 1236 (1948))*. If SanDisk uses its license "as part of a scheme of willful acquisition or maintenance of monopoly power, it will have violated *§ 2*." *Id.* (citing *Grinnell Corp., supra, 384 U.S. at 570-71*; *United States v. Aluminum Co. of Am., 148 F.2d 416, 432 (2d Cir. 1945)*; *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 600-605, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)*. Thus, **[*32]** mere possession of monopoly power will not be found unlawful unless it is accompanied by an element of anticompetitive conduct done with the intent to maintain or acquire a monopoly.

Similarly, for a claim of attempted monopolization, a plaintiff must allege facts to demonstrate that the defendant is engaged in predatory or anticompetitive conduct with "a specific intent to monopolize." *Spectrum Sports, Inc., supra, 506 U.S. at 456*. Or, as further explained by the Ninth Circuit, the plaintiff must allege "predatory or anticompetitive conduct to accomplish monopolization" with the "specific intent to control prices or destroy competition." *Cost Mgmt. Servs., Inc., supra, 99 F.3d at 949*. Therefore, the relevant inquiry for a *Section 2* claim of attempted monopolization is whether the defendant has engaged in improper conduct that has or is likely to have the effect of controlling prices or excluding competition, thus, creating or maintaining market power. *See* *PepsiCo, Inc. v. Coca-Cola Co., 315 F.3d 101, 108 (2d Cir. 2002)*.

b) Factual Allegations

> PNY alleges that SanDisk has either extended or sought to extend its patent monopolies related to flash memory technology, devices, systems, and **[*33]** products beyond their lawful grants through (1) anticompetitive terms in its uniform, nonnegotiable license (double royalty, worldwide royalty-free cross license on future innovations, payment of royalties on worldwide sales, and portfolio licensing of patents); and (2) execution of its coercive licensing scheme against all of its low-price competitors in the United States markets for flash memory technology, devices, systems, and products. Complaint ¶¶ 1-6, 8, 38, 42-43, 50-51, 55-62, 69-70, 75-80, 84-99, 100-05, 116, 121, 133.

An overarching inadequacy with PNY's Complaint is its failure to distinguish factual allegations regarding the alleged antitrust violations without distinguishing between and among the various markets and causes of action. The Complaint admits that SanDisk's monopoly in the flash memory technology market is a consequence of the patent laws. The Complaint is devoid of any allegations of "willful acquisition" of this monopoly. Further, while PNY alleges "anticompetitive conduct" generally, it fails to relate that conduct to the maintenance of SanDisk's legally obtained monopoly of the patented technology. Accordingly, at its most basic level, PNY fails to state **[*34]** a *Section 2* claim for monopolization in the flash memory technology market. [9]

[1119]** *iii. Conduct Relative to the Licenses*

> First, PNY alleges that SanDisk's licensing agreements violate the patent exhaustion doctrine because SanDisk collects a royalty on the sale of a flash memory device twice: first when the device is sold by the manufacturer and PNY charges a second royalty on the sale of the same device after the device is incorporated into a flash memory system or product. Pl.'s Opp'n 10-11; Complaint **[*35]** ¶ 79. To the extent PNY believes SanDisk is charging a double royalty on its patents, PNY needs to set out its claim more clearly to state a Sherman Act claim. The Complaint alleges that any firm manufacturing, assembling or selling flash memory devices, systems or products is practicing one of SanDisk's patents and thus must pay SanDisk a royalty. *See id.* ¶ 36. The Complaint also alleges that the patent portfolio consists of 1,400 patents. *Id.* This suggests that SanDisk is not collecting a "double royalty," but rather enforcing its rights under the patent laws by collecting a separate royalty for a different set of patent rights. Accordingly, PNY has failed to allege anticompetitive conduct.

Second, SanDisk's license allegedly requires licensees to "grant-back" a "cross-license" that covers any new technological innovations developed by the licensee on flash memory-related technology within the scope of the patent portfolio license, thereby stifling the incentive to innovate. *Id.* ¶ 90. According to the Complaint, "requiring licensees to share their future technological innovations with SanDisk on a worldwide royalty-free basis" is anticompetitive because "even if a licensee develops **[*36]** or obtains access to an alternative technology that it could use to practice fewer or none of SanDisk's patents, the licensee would still be required to pay a royalty to SanDisk on any sales of the new product and SanDisk would have the right to use the new technology on a worldwide royalty-free basis." Complaint ¶¶ 4(d), 90. PNY alleges that this "grant-back" provision in SanDisk's license is part of SanDisk's unlawful scheme to maintain its market power and suppress competition.

There is nothing inherently illegal or anticompetitive about a grant-back provision in a patent license. *Transparent-Wrap Mach. Corp. v. Stokes & Smith Co., 329 U.S. 637, 647, 67 S. Ct. 610, 91 L. Ed. 563, 1948 Dec. Comm'r Pat. 662 (1947)* (finding no antitrust behavior and holding grant-back provision "is not per se illegal and unenforceable," but noting the possibility of abusing this practice). With respect to this claim, the mere transfer of a valid patent "has no antitrust significance," but merely shifts a lawful monopoly to different hands." *See Brunswick Corp. v. Riegel*

---

[9] PNY alleges in its Complaint that Kingston's Counterclaim in *SanDisk Corp. v. Kingston Tech. Co.*, 10-cv-00243 (W.D. Wis.) survived a motion to dismiss. In its opposition, it adds that "PNY's allegations are nearly identical to the claims that were the subject of a trial in the Western District of Wisconsin." Pl.'s Opp'n 1-2. The Counterclaim in *Kingston* (which was filed under seal) does not nudge PNY's claims in this case across the line from possible to plausible. Moreover, the Court notes that in the *Kingston*, after a full trial on the merits, the Judge's findings of fact do not support many of PNY's allegations about SanDisk's market power or the barriers to entry into the downstream markets.

Textile Corp., 752 F.2d 261, 266 (7th Cir. 1984). To show that a grant-back provision is unlawful, PNY must allege facts that demonstrate a restraint on competition that violates the antitrust **[*37]** laws. *See* Cutter Laboratories v. Lyophile-Cryochem Corp., 179 F.2d 80, 92 (9th Cir. 1949) (citing United States v. Line Material Co., 333 U.S. 287, 68 S. Ct. 550, 92 L. Ed. 701 (1948); Morton Salt Co. v. Suppiger Co., 314 U.S. 488, 62 S. Ct. 402, 86 L. Ed. 363, 1942 Dec. Comm'r Pat. 733 (1942); and Hartford-Empire Co. v. United States, 323 U.S. 386, 65 S. Ct. 373, 89 L. Ed. 322, 1945 Dec. Comm'r Pat. 607 (1945)).

While it is possible that, as PNY alleges, the grant-back provision is part of an overall scheme by SanDisk to maintain control of a patent monopoly in the flash memory technology market, PNY does not allege facts to show that the grant-back provision is anticompetitive. Instead, PNY alleges the conclusion that the license provision violates the antitrust laws but no facts to support such a conclusion. Indeed, though PNY alleges that the grant-back provision lessens the incentive to innovate, PNY stops short of alleging that this licensing provision actually *has* stifled innovation. *See* Complaint ¶¶ 3, 90. [10] To state a Section 2 Sherman Act claim based upon the grant-back provision, PNY will need to do more than allege the ultimate conclusion of anticompetitive behavior; it will need to allege facts, which if proven, would establish anticompetitive conduct.

Third, PNY alleges that the license is anticompetitive because it requires a licensee to pay for a broad and unspecified patent portfolio, rather than specific, individual patents; and to pay royalties on worldwide sales, which would include sales in geographic markets that are not covered by its patents. *Id.* ¶¶ 84-86. [11] The fact that PNY entered into a **[**1120]** form license over which SanDisk was able to negotiate more favorable terms does not constitute anticompetitive conduct for antitrust purposes. Spectrum Sports, Inc., supra, 506 U.S. at 458 ("The law directs itself not against conduct which is competitive, even severely so, but against conduct which unfairly tends to destroy competition itself."). PNY must allege facts — not conclusions — that would tend to demonstrate anticompetitive conduct that has the effect of maintaining, or a dangerous probability of creating, a monopoly.

For the reasons set forth above, PNY has not sufficiently alleged the anticompetitive behavior required to state a Section 2 Sherman Act claim for monopolization or attempted monopolization.

3. Antitrust Injury

To bring a private action for violation of the antitrust laws, PNY must allege that it has suffered or faces the threat of antitrust injury of "'the type the antitrust laws were designed to prevent and that flows from that which makes defendants' acts unlawful.'" Cargill, Inc. v. Monfort of Colo., Inc., 479 U.S. 104, 113, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986) (quoting Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)). **[*40]** Thus, it is not enough to allege that the complained of acts are linked to anticompetitive conduct, "unless [the injury] is attributable to an anti-competitive aspect of the practice under scrutiny." Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 334, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990). SanDisk argues that PNY does not allege causal antitrust injury because the alleged injury flows from the financial terms of the parties' license agreement, to which PNY willingly and voluntarily agreed, rather than any claimed competition-reducing conduct by SanDisk. Mot. to Dismiss 6-8. PNY counters that its alleged injury flows directly from the oppressive SanDisk license itself, and the fact that PNY submitted to SanDisk's market power and coercion when it signed SanDisk's license does not immunize the terms of that license from

---

[10] At best, PNY alleges patent misuse through this licensing **[*38]** provision. Complaint 90. While this may suffice as an equitable defense to a patent infringement lawsuit, it stops well short of establishing a Sherman Act violation.

[11] SanDisk cites court cases upholding, as procompetitive, licensing agreements, much like its contract with PNY, requiring royalty payments on sales **[*39]** of products not covered by the licensor's patents where the parties' contract contained a clause stating that this method for calculating royalties was a convenient means to calculate royalties. Mot. to Dismiss 7-9. Because all of the cases cited were decided on with the benefit of a full evidentiary record, either following trial or on summary judgment, it is not clear whether, as a matter of law, because the parties' contract contains such a convenience of the parties license recital, PNY is precluded from alleging that the method for calculating royalties is anticompetitive.

> the antitrust laws. Pl.'s Opp'n 7. Although in one paragraph PNY indicates that it entered into the contract willingly, elsewhere it alleges SanDisk used coercion to force the terms of the contract upon PNY.

The "injury" alleged here arises out of the payment of royalties to practice SanDisk's patents. SanDisk argues that this is not antitrust injury because all of PNY's alleged harm flows from **[*41]** the terms of the contract into which it voluntarily entered. Because PNY has not adequately pled that it entered into the unfavorable license with SanDisk as a result of anticompetitive conduct, [12] or how exactly it has suffered antitrust injury based upon the terms of the contract, it cannot rely upon its performance of the terms of that contract to establish causal antitrust injury.

Based on the foregoing analysis, the Court hereby **GRANTS** the Motion to Dismiss as to PNY's *Section 2* Sherman Act claims, Counts I and II **WITH LEAVE TO AMEND.**

C. SHERMAN ACT § 1 CONSPIRACY CLAIM: COMBINATION IN RESTRAINT OF TRADE[13]

Liability under Section 1 of the Sherman Act, *15 U.S.C. § 1*, requires a "contract, combination . . ., or conspiracy, in restraint of trade or commerce." *Twombly, supra, 550 U.S. at 548*. To state a claim under *Section 1* of the Sherman Act, the claimant must plead not just ultimate facts (such as a conspiracy), but evidentiary facts which, if true, will prove: (1) a contract, combination or conspiracy among two or more persons or distinct business entities; (2) by which the persons or entities intended to harm or restrain trade or commerce; (3) which actually injures competition. *Id.* "[A] conclusory allegation of agreement at some unidentified point does not supply facts adequate to show illegality" for purposes of *Section 1*. *Id. at 557*. To plead an "agreement between antitrust co-conspirators, **[**1121]** the complaint must allege facts such as a 'specific time, place, or person involved in the alleged conspiracies' to give a defendant seeking to respond **[*43]** to allegations of a conspiracy an idea of where to begin." *Kendall v. Visa U.S.A., Inc., 518 F.3d 1042 (9th Cir. 2008)* (quoting *Twombly, supra, 550 U.S. at 565 n.10*).

PNY has failed to allege any evidentiary facts of a conspiracy. Rather, it alleges "[u]pon information and belief, SanDisk and certain manufacturers of flash memory technology products licensed by SanDisk, including Toshiba, Samsung, and others have entered into continuing and ongoing contracts, combinations, agreements, and/or conspiracies to unreasonably restrain trade and commerce in the Relevant Markets." *Id.* ¶ 140. This "conclusory allegation of agreement at some unidentified point does not supply facts adequate to show illegality" for purposes of *Section 1*. *Twombly, supra, 550 U.S. at 557*. Accordingly, PNY fails to plead evidentiary facts to state a cause of action for a Section 1 conspiracy. [14]

Based on the foregoing analysis, the Court hereby **GRANTS** the Motion to Dismiss as to PNY's Section 1 Sherman Act claim, Count III, **WITH LEAVE TO AMEND.**

---

[12] PNY alleges that it entered into the agreement to put an end to a patent infringement lawsuit PNY brought against it, but it does not suggest that the lawsuit was a "sham litigation" or "bad faith prosecution." *See Handgards, Inc. v. Ethicon, Inc., 601 F.2d 986 (9th Cir. 1979)* (prosecution of patent enforcement actions are presumed to be in good faith, but if prosecuted in bad faith, it may violate antitrust laws).

[13] *15 U.S.C. § 1*. Trusts, *etc.*, in restraint of trade illegal; penalty

> Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade **[*42]** or commerce among the several States, or with foreign nations, is declared to be illegal. Every person who shall make any contract or engage in any combination or conspiracy hereby declared to be illegal shall be deemed guilty of a felony . . .

[14] PNY argues in its opposition that through discovery it expects to get more information about the contracts. Pl.'s Opp'n 20. Unfortunately, PNY cannot save its Section 1 claim based on the expectation that through discovery it might find a factual basis for its conspiracy claim. In *Twombly, supra*, the Supreme Court cautioned **[*44]** "a district court must retain the power to insist on some specificity in pleading before allowing a potentially massive factual controversy to proceed." *550 U.S. at 558*. Based on the present state of the pleadings, PNY may not obtain this discovery.

D. Count IV — Intentional Interference with Business Relationships

The elements for a cause of action for intentional interference with contractual relations and for intentional interference with prospective economic advantage essentially are: (1) a contract or other economic relationship between plaintiff and a third party; (2) the defendant's knowledge of the contract or relationship; (3) defendant's intentional acts designed to induce a breach or disrupt the contract or relationship; (4) actual breach or disruption; and (5) damage. *Quelimane Co. v. Stewart Title Guaranty Co., 19 Cal. 4th 26, 55, 77 Cal. Rptr. 2d 709, 960 P.2d 513 (Cal. 1998)*; *Korea Supply Co. v. Lockheed Martin Corp., 29 Cal. 4th 1134, 1153, 131 Cal. Rptr. 2d 29, 63 P.3d 937 (Cal. 2003)*. PNY provides no facts from one can discern the relationships with which SanDisk has interfered (or at least **[*45]** more specific than every contractual relationship PNY has ever or will ever enter into). PNY's alleges: "PNY has existing and valuable business relationships, as well as reasonable expectations of further and future relationships, with manufacturers, retailers, and purchasers relating to flash memory technology," that "SanDisk was aware of these prospective business and actual contractual relationships and engaged in intentional and wrongful conduct designed or calculated to disrupt and interfere with those relationships" and that "SanDisk's conduct in interfering with such prospective business and actual contractual relations is intentional, malicious, and without justification." Complaint ¶¶ 149-151. These are not "facts." They are legal conclusions.

The parties dispute whether PNY needs to identify the particular third-party with whom Plaintiff has a relationship. The contractual party "must be identified in some manner." *Ramona Manor Convalescent Hosp. v. Care Enters., 177 Cal. App. 3d 1120, 1133, 225 Cal. Rptr. 120 (Cal. Ct. App. 1986)*. Here, PNY provides no facts from which the Court can discern impacted relationships. Without any details of the relationships with which SanDisk allegedly interfered, **[*46]** SanDisk cannot be expected to frame an answer to these allegations. Accordingly, PNY has failed to state a claim for either intentional interference with contractual relations or intentional interference with prospective economic advantage.

Based on the foregoing analysis, the Court hereby **Grants** the Motion to Dismiss as to PNY's claim for intentional interference with contractual relations and for intentional interference with prospective economic advantage, Count IV, **With Leave to Amend.**

E. Count V — Unfair Competition in Violation of *California Business & Professions Code §§ 17200 et seq.*

California's UCL statute prohibits "any unlawful, unfair or fraudulent business act or practice." *Cal. Bus. Prof. Code. § 17200*; *Cel-Tech Comm., Inc. v. L.A. Cellular Tel. Co., 20 Cal. 4th 163, 180, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (Cal. 1999)*. PNY purports to plead claims under the unlawful and unfair prongs of the UCL. Complaint ¶¶ 158-59. With respect to PNY's allegations under the unlawful prong of the UCL, PNY simply borrows from its federal antitrust claims, claiming that the alleged federal antitrust violations are the "unlawful" conduct which the UCL **[**1122]** claim is directed to. *Id.* ¶ 159. If the antitrust claims were adequately **[*47]** plead, this would establish the unlawful prong. But because PNY has failed to adequately plead its antitrust claims, its unlawful-prong UCL claim necessarily fails as well. *See* *Ingels v. Westwood One Broadcasting Servs., Inc., 129 Cal. App. 4th 1050, 1060, 28 Cal. Rptr. 3d 933 (Cal. Ct. App. 2005)* ("'If the [underlying] claim is dismissed, then there is no 'unlawful' act upon which to base [] the derivative Unfair Competition claim'") (second alteration in original); *Scripps Clinic v. Sup. Ct., 108 Cal. App. 4th 917, 934-39, 134 Cal. Rptr. 2d 101 (Cal. Ct. App. 2003)*; *see also* *Krantz v. BT Visual Images, 89 Cal. App. 4th 164, 107 Cal. Rptr. 2d 209 (Cal. Ct. App. 2001)* (the viability of an unlawful UCL claim stands or falls with the underlying claim).

Likewise, PNY's unfair-prong UCL claim also is deficient. Where, as here, a competitor alleges a violation of the UCL's unfair-prong, "unfair" "means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *Cel-Tech Commc'ns, supra, 20 Cal. 4th at 186-87*; Complaint ¶ 1 ("PNY and SanDisk are competitors."). **[*48]** Because PNY has not adequately pled its federal antitrust claims, and because its UCL claims are not materially different than its federal antitrust claims, it follows then, that PNY's claim under the unlawful and unfair prongs of the UCL fails as well. [15]

Based on the foregoing analysis, the Court hereby **GRANTS** the Motion to Dismiss as to PNY's claim for Unfair Competition in Violation of *Cal. Bus. Prof. Code §§ 17200 et seq.*, Count V, **WITH LEAVE TO AMEND.**

IV. CONCLUSION

For the reasons set forth above, Defendant's Motion to Dismiss is **GRANTED WITH LEAVE TO AMEND.** Plaintiff shall file an amended complaint within 28 days from the date this Order is filed. Defendant shall file its response to the amended complaint within 28 days of service.

This Order Terminates Docket Number 29.

IT IS SO ORDERED.

April 20, 2012

/s/ Yvonne Gonzales Rogers

YVONNE GONZALES ROGERS

UNITED STATES DISTRICT COURT JUDGE

End of Document

[15] In its opposition, PNY indicates that the claim for intentional interference could satisfy the unfair prong. Because this is not pled as a basis for the UCL claim, and also because the claim for intentional interference fails to state a claim, this argument cannot prevent dismissal.

Opinion

MEMORANDUM

GENE E.K. PRATTER, J.

I. Introduction

Nine Defendant egg producers and trade groups raise specific arguments for dismissal of the Indirect Purchaser Plaintiffs' Second Amended Consolidated Class Action Complaint (hereinafter, the "IPSAC") as to the individual movants, contending, *inter alia*, that the pleading fails to allege facts plausibly suggesting that they specifically were parties to an alleged federal antitrust conspiracy. [1] On these grounds, Defendants respectively assert that all claims brought against them—a Sherman Act Section 1 claim, and 46 state antitrust, consumer protection, and unjust enrichment claims arising under the laws of 22 state jurisdictions [2]—should be dismissed pursuant to *Federal Rule of Civil Procedure 12(b)(6)*.

These motions, however, do not provide occasion for Defendants to entirely fly the coop of this case. The Court grants in part the four motions of Daybreak Foods, Inc., Hillandale-Gettysburg L.P., Hillandale Farms Inc., and Hillandale Farms East, Inc. (collectively, the "Hillandale Entities"), United Egg Association ("UEA"), and Land O'Lakes, Inc. as to the Sherman Act Section 1 claim and denies in part the remainder of their motions as to the state claims. The Court denies the other three motions brought by Defendants Michael Foods, Inc., Rose Acre Farms, Inc., and Ohio Fresh Eggs, LLC. [3] The Court's basis for these rulings is laid out in this Memorandum.

II. Background, Factual Allegations, and Legal Standards

The background of this litigation and the core factual allegations contained in the IPSAC are set forth at length in the Court's *March 19, 2012 Opinion and Order, 841 F. Supp. 2d 867, 2012 U.S. Dist. LEXIS 37265, 2012 WL 935669* (Doc. Nos. 631 and 632). That Opinion also discussed the applicable legal standards for reviewing a motion to dismiss in this case, including the relevance of the *Erie* doctrine's precepts to the Court's consideration of the

---

[1] The Motions addressed here are: Motion to Dismiss Indirect Purchaser Second Amended Consolidated Complaint as to Defendants Michael Foods, Inc. and Papetti's **[*2]** Hygrade Egg Products, Inc. (Doc. No. 327) (hereinafter, "Michael Foods Mot."); Defendant Rose Acre Farm, Inc.'s Motion to Dismiss Indirect Purchasers' Second Consolidated Amended Class Action Complaint (Doc. No. 328) (hereinafter, "Rose Acre Mot."); Defendant Ohio Fresh Eggs, LLC's Renewed Motion to Dismiss the Indirect Purchasers' Second Consolidated Amended Class Action Complaint (Doc. No. 330) (hereinafter, "Ohio Fresh Mot."); Defendant Daybreak Foods, Inc.'s Motion to Dismiss Indirect Purchasers' Second Amended Consolidated Class Action Complaint (Doc. No. 324) (hereinafter, "Daybreak Mot."); Motion to Dismiss the Indirect Purchaser Plaintiffs' Second Consolidated Amended Class Action Complaint on Behalf of Defendants Hillandale-Gettysburg, L.P., Hillandale Farms, Inc., and Hillandale Farms East, Inc. (Doc. No. 326) (hereinafter, "Hillandale Entities Mot."); United Egg Association's Motion to Dismiss the Claims Against it in Indirect Purchasers' Second Consolidated Amended Class Action Complaint (Doc. No. 329) (hereinafter, "UEA Mot."); Defendant Land O'Lakes, Inc.'s Motion to Dismiss Indirect Purchasers' Second Amended Consolidated Class Action Complaint (Doc. No. 325) (hereinafter, **[*3]** "Land O'Lakes Mot."). The Plaintiffs' responded to the Motions (Doc. No. 354), and the Defendants' filed reply briefs (Doc. Nos. 375, 377, 378, 379, 381, 382, 383). Additionally, the parties filed various supplemental materials in support of their positions. The transcript of the oral argument on the Motions is contained in the record at Docket No. 597.

[2] Certain claims in the IPSAC are presently not, or are no longer, subject to these motions, namely, those state claims which the Court dismissed by granting in part a prior joint defense motion to dismiss—the consumer protection claims arising under the laws of Kansas, New York, and West Virginia, the North Dakota unjust enrichment claim, the Plaintiffs' Utah Antitrust Act claim with respect to alleged damages occurring prior to May 1, 2006, and certain federal and state antitrust claims with respect to alleged injuries relating to purchases of manufactured products incorporating processed eggs—and those claims that Plaintiffs voluntarily withdrew, namely, all claims brought under Maine or Puerto Rico law, and the consumer protection claims brought under the laws of Michigan, South Dakota, and Wisconsin. *See March 19, 2012 Op. and Order, 841 F. Supp. 2d 867, 2012 U.S. Dist. LEXIS 37265, 2012 WL 935669* **[*4]** (Doc. Nos. 631 and 632). The Court also has dismissed all damages for pending claims outside the various applicable statutes of limitation periods. *See Apr. 4, 2012 Mem. and Order, 2012 U.S. Dist. LEXIS 48321, 2012 WL 1137100* (Doc. Nos. 650 and 651). To the extent that the motions *sub judice* seek to dismiss any such claims that are no longer a part of the case, the Court does not address that aspect of these motions.

[3] Although movant Papetti's Hygrade Egg Products, Inc., identifies itself as a wholly-owned subsidiary of Defendant Michael Foods and has jointly **[*5]** filed a motion to dismiss with Michael Foods, Michael Foods Mot. at 1, this movant is not named as a defendant in the IPSAC. Only Paragraph 129 refers to Papetti's Hygrade Egg Products, Inc. as a "Defendant," but given the structure of the IPSAC, the Court concludes such a reference is an editorial oversight. Ergo, Papetti's Hygrade Egg Products, Inc. is not a party in this suit and lacks standing to bring a motion to dismiss. As such, the Court denies Papetti's Hygrade Egg Products, Inc.'s motion to dismiss insofar that it seeks dismissal from the suit. The Court does not include Papetti's Hygrade Egg Products, Inc. in its count of the nine moving Defendants.

Plaintiffs' state law claims, as well as *Federal Rules of Civil Procedure 8* **[*6]** and *12(b)(6)*. Therefore, the Court will not repeat that legal framework in this Memorandum except to incorporate the prior Opinion by reference. *See 2012 U.S. Dist. LEXIS 48321, [WL] at *1-6*. Insofar as any such previously-discussed matters arise in-depth as a predicate to the Court's rulings here, the Court includes more explicit discussion as appropriate.

III. Legal Discussion

The Court first addresses whether the IPSAC states a Sherman Act Section 1 claim as to each moving Defendant. The Court then addresses the Defendants' arguments for dismissal of the various state antitrust, consumer protection, and unjust enrichment claims.

A. Sherman Act § 1 Claims

Each of the nine Defendants argues that the IPSAC's allegations are insufficient to support a Section 1 Sherman Act claim against it. They all contend that the allegations fail to plausibly suggest that the individual Defendants were respectively parties to the alleged conspiracy to manipulate the supply of, and thereby fix prices for, domestically-sold eggs, by joining and participating in it. The Court addressed similar, if not identical, arguments once before with respect to the Direct Purchaser Plaintiffs' case. *See Sept. 26, 2011 Mem., 821 F. Supp. 2d 709, 2011 U.S. Dist. LEXIS 109641, 2011 WL 4465355* (Doc. **[*7]** No. 562). In that decision, the Court also explained the relevant legal framework pertinent to a Sherman Act Section 1 claim, which the Court references here. *See 2011 U.S. Dist. LEXIS 109641, [WL] at *5-8*.

In that case, many of the same defendants individually moved to dismiss the Direct Purchaser Plaintiffs' Second Consolidated Amended Class Action Complaint (hereinafter, the "SAC") on the grounds that the facts pled against them were insufficient to demonstrate that they joined and participated in the alleged conspiracy. The Court concluded that, in light of the entirety of the complaint, a defendant's agreement to join and participate in the conspiracy was plausibly suggested by allegations that the defendant was involved with trade group associations and attended trade group meetings where allegedly key decisions fundamental to the alleged conspiracy were made or where effects of alleged coordinated actions were extolled, in conjunction with allegations that the defendant participated in, or complied with, the guidelines of the United Egg Producers Certification Program ("UEP Certification Program"). *See 2011 U.S. Dist. LEXIS 109641, [WL] at *11, 24, 26*; *see also 2011 U.S. Dist. LEXIS 109641, [WL] at *19* (concluding that a defendant's adoption of the Certification Program's **[*8]** chick hatch reduction guidelines, in addition to involvement with trade group associations and certain meetings, was consistent with agreement to the conspiracy). As alleged, the UEP Certification Program guidelines, which mandated lower cage space densities for hens, embraced particular features which were anti-competitive with no apparent alternative pro-competitive benefits, including, *inter alia*, chick hatch reduction, prohibition on the practice of backfilling, and requirement that egg producers to commit 100% of their facilities to the guidelines. *2011 U.S. Dist. LEXIS 109641, [WL] at *12-14*. The Court also found additional allegations against certain defendants suggestive of agreement to the conspiracy, such as public and private comments reflecting awareness of certain features of the egg market that could be manipulated by actions that impacted supply, participation in the United States Egg Marketers export program, a commitment with other egg producers to undertake an early molting and disposal initiative, and a written commitment agreeing to disposal or flock reduction within fixed time periods. *2011 U.S. Dist. LEXIS 109641, [WL] at *18-19, 22-24, 26*.

Based upon this assessment, the Court held that Direct Purchaser Plaintiffs sufficiently **[*9]** alleged that Defendants Michael Foods, Daybreak, Rose Acre, and Ohio Fresh joined and participated in the conspiracy to reduce the supply of eggs. Accordingly, the Court denied the corresponding motions to dismiss.

As to the other defendants that moved to dismiss the Direct Purchaser Plaintiffs' SAC, the Court considered whether the alleged facts sufficiently connected those defendants to the conspiracy on the grounds of either independent liability, or some other basis for imputing liability, *i.e.*, secondary liability. In considering the motion to dismiss filed by the Hillandale Entities, the Court first determined that "[t]here simply is an absence of specific factual allegations in the [complaint] to connect each (or any) of the Hillandale Entities directly to the conspiracy." *2011 U.S. Dist. LEXIS 109641, [WL] at *28*. Additionally, the Court recognized that the SAC's "general allegations as to 'Hillandale Farms' or 'Hillandale' are insufficient to give notice to the Hillandale Entities of the claims against them." *2011 U.S. Dist. LEXIS 109641, [WL] at *32*.

The Court then determined that allegations that the Hillandale Entities were "vertically integrated" and had overlapping ownership and control were insufficient to support a claim that the **[*10]** Hillandale Entities and a fourth entity, Defendant Hillandale Farms of Pa., Inc., "were so linked that they effectively function as a single entity with respect to alleged antitrust conduct." *2011 U.S. Dist. LEXIS 109641, [WL] at *31*. The Court also concluded that Direct Purchaser Plaintiffs had not presented any legal authority that would support a "single enterprise" theory for imputing liability, and indeed, that there was legal authority to the contrary. *2011 U.S. Dist. LEXIS 109641, [WL] at *29-30*. Accordingly, the Court granted the Hillandale Entities' motion to dismiss without prejudice to Direct Purchaser Plaintiffs to seek leave to amend their complaint.

The Court similarly granted without prejudice UEA's motion to dismiss, concluding that the allegations in the SAC were insufficient to state a claim against the trade group. *2011 U.S. Dist. LEXIS 109641, [WL] at *37*. The Court found that the complaint's allegations of, *inter alia*, common resources in terms of leadership, staff, and membership between incorporated trade groups, United Egg Producers ("UEP") and United States Egg Marketers ("USEM"), as well as allegations that UEA and UEP held meetings at concurrent times and places and was in an "alliance" with UEP and USEM, could not sustain a claim that UEA joined **[*11]** or participated in the alleged conspiracy. *2011 U.S. Dist. LEXIS 109641, [WL] at *35-36*. Moreover, the Court found that allegations concerning the conduct of certain UEA leaders or staff did not plausibly suggest that UEA could be liable for antitrust violations of its agents premised on a theory of apparent authority. *2011 U.S. Dist. LEXIS 109641, [WL] at *36*. As to the facts pled against UEA that alleged "UEA's actual conduct as an entity," which included allegations that UEA's "Further Processors" division invited the UEP Executive Committee to a meeting on April 27, 2004 and that UEA approved the provision of funds for UEP to apply to "animal welfare research projects," UEP's "management," and UEP's "programs and management," the Court determined that they were inadequate to support a claim against UEA. *2011 U.S. Dist. LEXIS 109641, [WL] at *37*.

Here, the IPSAC's allegations against the nine moving Defendants are generally almost identical to—and certainly, in most respects, not materially different from—those allegations that the Court previously examined in its ruling on the individual motions to dismiss the Direct Purchaser Plaintiffs' complaint. Indeed, many parties explicitly acknowledge that the two complaints are on the whole factually identical. *See, e.g.*, Daybreak **[*12]** Mot. at 1, 4-5; Ohio Fresh Mot. at 1; Tr. at 126:10-17; *see also* *March 19, 2012 Op., 2012 U.S. Dist. LEXIS 37265, 2012 WL 935669, at *2* (recognizing the similarities between the two pleadings). By way of example, the complaints contain virtually identical allegations about the various facets of the UEP Certification Program guidelines, ranging from the reduced cage densities of hens to the 100% facilities commitment rule, prohibition on backfilling, and chick hatch reduction. *See, e.g.*, IPSAC ¶¶ 159, 174-75, 202, 295; *see also* *March 19, 2012 Op., 2012 U.S. Dist. LEXIS 37265, 2012 WL 935669, at *2-3*.

Akin to the Direct Purchaser Plaintiffs' SAC, the IPSAC alleges that Michael Foods, Rose Acres, and Ohio Fresh were involved with egg trade group associations as members and leaders of committees or boards, attended trade group meetings where allegedly key decisions instrumental to the conspiracy were made or where effects of alleged coordinated actions were extolled, and participated in the UEP Certification Program. *See, e.g.*, IPSAC ¶¶ 74, 163, 177, 204, 209, 211, 215, 218, 224, 245, 259, 260, 269. Additionally, Plaintiffs allege that Ohio Fresh both (1) made a commitment with other egg producers to undertake an early molting and disposal initiative, **[*13]** and (2) made a written commitment agreeing to disposal or flock reduction within fixed time periods. *Id.* ¶¶ 198, 210, 218. [4]

---

[4] At this time, the Court notes that several Defendants request the Court's judicial notice of certain documents in order to bolster their arguments in support of dismissal. However, the Court declines to consider any of the proffered documents for purposes of evaluating the adequacy of the IPSAC.

Based upon these allegations and in consideration of the complaint in its entirety, the Court concludes that the allegations as to these three Defendants are sufficient to give notice of the contours of the Sherman Act Section 1 claim against them. The IPSAC's allegations plausibly suggest that those Defendants joined and participated in the alleged conspiracy to reduce the supply of eggs. Accordingly, the Court denies the Motions of Michael Foods, Rose Acres, and Ohio Fresh.

However, unlike the Direct Purchaser Plaintiffs' SAC, the IPSAC does not allege that Daybreak adopted or followed the UEP Certification guidelines generally, or specifically as to chick hatch. Instead, Plaintiffs **[*17]** allege that Daybreak was a member of and held leadership positions in UEP and attended UEP meetings where allegedly key decisions instrumental to the conspiracy were made or where effects of alleged coordinated actions were extolled. *Id.* ¶¶ 91, 204, 211, 215, 218, 245. Additionally, the IPSAC alleges that Daybreak's President made a comment published in *Egg Industry* "attributed high shell egg prices to the 'United Egg Producer's animal welfare program that most shell egg producers participate in.'" *Id.* ¶ 233. These allegations alone are insufficient to plausibly suggest that Daybreak participated or joined the conspiracy. *See* *Sept. 26, 2011 Mem., 2011 U.S. Dist. LEXIS 109641, 2011 WL 4465355, at *9, 18*. Thus, the Court grants without prejudice Daybreak's Motion as to the Sherman Act Section 1 claim.

Additionally, the IPSAC does not contain sufficient facts to state a claim against the Hillandale Entities or UEA. Plaintiffs point to the same facts upon which Direct Purchaser Plaintiffs relied in defending the SAC and which the Court found unpersuasive. Like the SAC, the IPSAC lacks factual allegations that connect any of the Hillandale Entities directly to the conspiracy, and general allegations as to "Hillandale **[*18]** Farms" or "Hillandale" are

---

Michael Foods asks for notice of a Declaration of William L. Greene, counsel for Michael Foods, and several attachments purportedly comprising certain UEP meeting minutes, for the purposes of demonstrating that "Michael Foods was selling egg products made with non-UEP Certified eggs" prior to its joining the UEP Certified Program. Michael Foods Mot. at 11; *see also id.* at 6-7. Michael Foods also cites the Declaration in relation to arguments concerning whether trade group meeting attendance allegations can sustain the claim that Michael Foods joined the alleged conspiracy. Michael Foods Reply at 7. In seeking to refute factual allegations suggestive of its agreement to the alleged conspiracy, Rose Acre seeks judicial notice of several documents cited in the IPSAC—four **[*14]** news or periodical articles and a document purported to be UEP's Animal Husbandry Guidelines for U.S. Egg Laying Flocks (2000 ed.). Rose Acre Mot. at 6-7 & n.7, 12; *see also id.*, Ex. C; Rose Acre Reply at 7. Additionally, Land O'Lakes asks the Court to judicially notice January 25, 2005 UEP meeting minutes to demonstrate that its representative was present at the meeting but did not participate. Land O'Lakes Mot. at 3.

Neither these materials, nor the Defendants' arguments in support of judicial notice of these materials, provide occasion for the Court to deviate from the general rule that "a district court ruling on a motion to dismiss may not consider matters extraneous to the pleadings." *In re Burlington Coat Factory Sec. Litig., 114 F.3d 1410, 1426 (3d Cir. 1997)* (citation omitted). In ruling on a *Rule 12(b)(6)* motion, "a court must consider only the complaint, exhibits attached to the complaint, matters of public record, as well as undisputedly authentic documents if the complainant's claims are based upon these documents." *Mayer v. Belichick, 605 F.3d 223, 230 (3d Cir. 2010)* (citation omitted). Here, the Court need not consider the Defendants' proffered materials because none **[*15]** of the exceptions apply. Plaintiffs did not attach the materials to the IPSAC as exhibits; the materials are not incorporated through citation or limited quotation; and it is unclear whether the authenticity of the materials are unchallenged. *See* *Sept. 26, 2011 Mem., 2011 U.S. Dist. LEXIS 109641, 2011 WL 4465355, at *23*. Additionally, the Plaintiffs' federal and state claims are not central to, based upon, or integral to these proffered materials. *See id.*

The Court recognizes that if any of the proffered materials verges on being central to the Plaintiffs' claims, it would be Rose Acre's proffered UEP Animal Husbandry Guidelines. *See* *2011 U.S. Dist. LEXIS 109641, [WL] at *23 n. 32* ("By illustrative contrast [to certain other documents offered for judicial notice], the UEP Certification guidelines are arguably integral to Plaintiffs' antitrust claim . . . . . But this example is purely academic ...."). However, as is true of the other Defendants' extrinsic documents, it is unclear whether the authenticity of Rose Acre's document is challenged or not. Moreover, as alleged in the IPSAC, the UEP Certification guidelines are not static, but instead constitute an ever-evolving set of documented standards that over time were modified to incorporate **[*16]** many of the features that the Court has concluded are anti-competitive, such as the prohibition on backfilling, the 100% rule, and so forth *See, e.g., id.* ¶¶ 62, 170, 174-75, 202, 224, 295. So although the "UEP Certification guidelines" as a general concept are central to the Plaintiffs' claims, as the guidelines are described in the IPSAC, no single version of the guidelines as embodied by a single document could be so integral to the Plaintiffs' claims as to be properly before the Court on a motion to dismiss.

inadequate to plausibly suggest that the Hillandale Entities joined or participated in the conspiracy. *See* 2011 U.S. Dist. LEXIS 109641, [WL] at *32. For the same reasons the Court articulated as to the Direct Purchaser Plaintiffs' SAC, the Court finds that the IPSAC's allegations concerning "vertical integration" and overlapping ownership and control across the Hillandale Entities and Defendant Hillandale Farms of Pa., Inc. do not sustain a claim against the Hillandale Entities on basis of imputed Section 1 liability. *See* 2011 U.S. Dist. LEXIS 109641, [WL] at *31; *cf.* 2011 U.S. Dist. LEXIS 109641, [WL] at *25. Thus, the Court concludes that it is appropriate to grant the Hillandale Entities' Motion, again without prejudice, subject to the same provisos. *See* 2011 U.S. Dist. LEXIS 109641, [WL] at *32 n.39 ("[T]he Court would expect any new effort by Plaintiffs to amend as to any of the Hillandale Entities would represent and entail a meaningfully more substantive claim as to the individual entities than was mounted against any one of—or all of—them in the [complaint].").

As in the Direct Purchaser Plaintiff's SAC, the IPSAC alleges that UEA had overlapping membership, leadership, and staff with UEP and USEM, held meetings at concurrent times and locations as UEP, invited the UEP Executive **[*19]** Committee to a meeting on April 27, 2004, and provided financial support to UEP projects. *See, e.g.*, IPSAC ¶¶ 50, 138, 139, 255-60, 271-74. Like the SAC, the IPSAC sets forth facts concerning the conduct of certain UEA leaders and staff, as well as UEA members' attendance at UEP meetings. *See, e.g., id.* ¶¶ 195, 206, 257, 264-65. As the Court has already determined, such allegations, in light of the entirety of the facts pled, do not sustain a claim that UEA joined or participated in the alleged conspiracy, nor that it can be liable for Section 1 violations on account of secondary liability. *See* Sept. 26, 2011 Mem., 2011 U.S. Dist. LEXIS 109641, 2011 WL 4465355, at *33-37. The Court thereby grants UEA's Motion without prejudice.

As a final matter, the Court concludes that the IPSAC does not adequately state a Section 1 claim against Land O'Lakes. Although the Court previously has not ruled on a motion to dismiss by Land O'Lakes as to any complaint in this litigation, nor has the Court considered factual allegations specific to Land O'Lakes before, the Court already has assessed facts similar to those made against Land O'Lakes and found them deficient for pleading purposes. In the IPSAC, the specific facts pled as **[*20]** to Land O'Lakes include charges that a Land O'Lakes employee attended as a member or guest [5] a January 25, 2005 meeting of the UEP Board of Directors at which "a motion was made and seconded that extended through Labor Day the 'intentions program' whereby members agreed to dispose of their flocks 4 weeks earlier than previously scheduled and/or reduce flock size by 5%" and no dissents to the vote were recorded. IPSAC ¶¶ 215-218. The IPSAC also alleges that Land O'Lakes formed Moark LLC in a "joint venture" with Moark Productions in 2000, "acquired 100% of the ownership" of Moark LLC in 2006, is the parent company of Moark LLC, and "operat[ed] through its subsidiary, Moark [LLC]," to market and process eggs. IPSAC ¶¶ 62, 64. The IPSAC sets forth various alleged facts as to Moark LLC, including its membership in UEP and UEA, attendance at trade group meetings, and so forth, however, without reference to Land O'Lakes. [6] These allegations, when considered in view of the entirety of the IPSAC, do not plausibly suggest that Land O'Lakes is independently liable for a Section 1 violation. [7] Likewise, there are insufficient allegations that would sustain a claim

[5] The IPSAC designates the Land O'Lakes employee's attendance at the meeting as either a UEP member or guest. IPSAC ¶ 215. The IPSAC, however, does not explicitly allege that Land O'Lakes was ever a member of UEP.

[6] As an exception to this, Land O'Lakes is ambiguously referred to parenthetically in an allegation that Moark LLC applied and was certified under the UEP Certification Program: "The following Defendants submitted applications for certification and agreed to implement the [UEP Certification Program] guidelines: as of March 22, 2002, . . . Moark (Land O'Lakes) . . . ." *Id.* ¶ 163. However, this allegation is simply too vague to provide adequate notice to Land O'Lakes of its supposed offense.

[7] Because the applicable pleading standards do not allow the Court to consider allegations that are unsupported and bald conclusions, the Court cannot appropriately consider the IPSAC's allegation that "Land O'Lakes has been an active participant in . . . Moark's, UEP's, and its co-conspirators' efforts to reduce supply and fix prices" as anything more than **[*22]** a conclusory allegation. *Id.* ¶ 62. There are simply no specific facts in the IPSAC to support Land O'Lakes' alleged "active participation" in the conspiracy, and as such the Court need not accept such a charge as true. *See* Doug Grant, Inc. v. Greate Bay Casino Corp., 232 F.3d 173, 183-84 (3d Cir. 2000); Morse v. Lower Merion Sch. Dist., 132 F.3d 902, 906 (3d Cir. 1997).

that Land O'Lakes is secondarily **[*21]** liable for Moark's alleged conduct as a parent company or otherwise. [8] Accordingly, the Court grants Land O'Lake's Motion without prejudice.

B. State Antitrust, Consumer Protection, and Unjust Enrichment Claims

All moving Defendants essentially have placed their arguments as to all federal and state claims in one basket. To wit, Defendants seek dismissal of the various state claims brought against them on the grounds that Plaintiffs have not alleged facts that plausibly suggest that any of the moving Defendants joined or participated in the alleged conspiracy to reduce the supply of eggs—the same standard upon which they rely in urging the dismissal of the Sherman Act Section 1 claims. The Court does not find that such arguments provide appropriate grounds for dismissal of the various state claims at this time.

Defendants have not provided any appropriate legal authority to demonstrate that the federal antitrust conspiracy principles that they appear to invoke apply to any of the state antitrust, consumer protection, or unjust enrichment claims. The case law upon which Defendants rely is focused upon Sherman Act claims. **[*24]** [9] And indeed, the issue of whether a defendant has joined or participated in an alleged antitrust conspiracy is consistent with a Section 1 claim because such a claim is contingent upon the existence of an agreement to the conspiracy. *See Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 553, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* ("Because *§ 1 of the Sherman Act* 'does not prohibit [all] unreasonable restraints of trade ... but only restraints effected by a contract, combination, or conspiracy," [t]he crucial question' is whether the challenged anticompetitive conduct 'stem[s] from independent decision or from an agreement, tacit or express," (quoting *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 775, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)* and *Theatre Enters., Inc. v. Paramount Film Distrib. Corp., 346 U.S. 537, 540, 74 S. Ct. 257, 98 L. Ed. 273 (1954))*; *In re Ins. Brokerage Antitrust Litig., 618 F.3d 300, 315 (3d Cir. 2010)* (stating that the "existence of an agreement is the hallmark of a Section 1 claim"); *see also* note 9, *supra* (citing cases that recognize the same).

Defendants, however, have not demonstrated the propriety of applying federal **[*26]** antitrust conspiracy principles to the particular 46 state antitrust, consumer protection, or unjust enrichment claims posed here. Defendants have not established whether any of the 22 jurisdictions under which Plaintiffs have brought their state claims have adopted, follow, or would follow this standard as to each type of claim asserted.

---

[8] To the extent that Plaintiffs seek to premise secondary liability on a "joint venture" liability theory, Pls.' Resp. at 57-58, and assuming, *arguendo*, this theory is applicable in the federal antitrust context, there are insufficient facts to adequately plead such a form of liability. In the absence of any other specific facts pled, the conclusory and vague accusation that Land O'Lakes and Moark were in a "joint venture" simply does not suffice for pleading purposes. *See generally, e.g.*, *Restatement (Third) of Agency § 3.03 cmt. (e)(2)* (2006) ("An association limited to a single project is a joint venture. A joint venture is treated as a form of partnership, in which duties and authority are limited by the scope of the venture."); Uniform Partnership Act § 202 (1997) (discussing criteria for forming a partnership); *id.* **[*23]** § 306 ("Except as otherwise provided in subsections (b) and (c), all partners are liable jointly and severally for all obligations of the partnership unless otherwise agreed by the claimant or provided by law.").

[9] Defendants cite case law that speaks to Section 1 claims in support of the proposition that a defendant must have joined and participated in the alleged conspiracy in order for a claim against them to **[*25]** be sufficiently pled. *See* Michael Foods Mot. at 3-4 (citing *Jung v. Ass'n of Am. Med. Colls., 300 F. Supp. 2d 119, 161 (D.D.C. 2004)*, *Hinds County v. Wachovia Bank N.A., 620 F. Supp. 2d 499, 513 (S.D.N.Y. 2009)*, *In re TFT-LCD (Flat Panel) Antitrust Litig., 586 F. Supp. 2d 1109, 1117 (N.D. Cal. 2008))*; Ohio Fresh Mot. at 2 (citing *TFT-LCD (Flat Panel), 586 F. Supp. 2d at 1117* and *Jung, 300 F. Supp. 2d at 161*); Rose Acre Mot. at 8-9 (citing *TFT-LCD (Flat Panel), 586 F. Supp. 2d at 1110*, *In re Travel Agent Comm'n Antitrust Litig., No. 03-30000, 2007 U.S. Dist. LEXIS 79918, 2007 WL 3171675, at *1-2, *3 n.4 (N.D. Ohio 2007)*, *aff'd*, *583 F.3d 896 (6th Cir. 2009)*, and *Jung, 300 F. Supp. 2d at 161*); Daybreak Mot. at 3 (citing *Jung, 300 F. Supp. 2d at 160-61*); Hillandale Entities Mot. at 5 (citing *TFT-LCD (Flat Panel), 586 F. Supp. 2d at 1117*); UEA Reply at 2 (citing *In re OSB Antitrust Litig., No. 06-826, 2007 U.S. Dist. LEXIS 56573, 2007 WL 2253419, at *5 (E.D. Pa. Aug. 3, 2007)* and *TFT-LCD (Flat Panel), 586 F. Supp. 2d at 1117*); Land O'Lakes Mot. at 3 (citing *TFT-LCD (Flat Panel), 586 F. Supp. 2d at 1117*, *Hinds County, 620 F. Supp. 2d at 513*, and *Jung, 300 F. Supp. 2d at 161*).

The Court certainly recognizes that federal ***antitrust law*** often serves as an analogue to, or controlling in the interpretation of, jurisdiction-specific ***antitrust law***, and that, accordingly, it is not an unreasonable proposition to argue that the principles of federal ***antitrust law*** might apply in determining whether a defendant joined or participated in the alleged conspiracy. *See* 1 ABA Section of ***Antitrust Law***, ***Antitrust Law*** *Developments*, 624 (6th ed. 2007) ("Many states have statutory provisions that require varying degrees of deference to federal precedent in applying state ***antitrust law*** to practices also subject to federal law. These statutes are often called 'harmonization statutes.' Some courts in states without harmonization statutes have adopted similar policies of deference, also varying in degree, to federal antitrust precedent."). [10] Nonetheless, **[*27]** in some jurisdictions, state ***antitrust law*** is not always a symbiont of federal ***antitrust law***. Moreover, the parties have not presented this issue in the context of jurisdiction-specific law that would permit the Court draw the conclusion that each of the state antitrust claims should be treated consistently with the Plaintiffs' Section 1 claim for purposes of stating a state antitrust claim against each Defendant.

Furthermore, any symbiosis that the Plaintiffs' state law claims generally might have with federal ***antitrust law*** becomes more attenuated when considering the state consumer protection and unjust enrichment claims at issue. As demonstrated by the Court's March 19, 2012 Opinion, which assessed many of the Plaintiffs' state consumer protection and unjust enrichment claims, these types of claims proscribe conduct that is not exclusively limited to anticompetitive activities among conspirators akin to ***antitrust law***. The Court's earlier decision also exemplifies **[*28]** the degree of variation among these claims across jurisdictions. It follows that the various jurisdictions' laws as to consumer protection or unjust enrichment claims may not necessarily embrace any federal conspiracy principles (or any principles of civil conspiracy for that matter). [11] But, in the absence of any meaningful jurisdiction-specific legal authority and given the spare nature of the Defendants' arguments as presented to the Court, the Court cannot conclude at this time that the various state consumer protection and unjust enrichment claims (or any claims that Defendants conspired to violate those laws) embrace federal antitrust conspiracy principles in determining whether Plaintiffs have stated these claims against individual Defendants. [12] Accordingly, the Court denies each of the Defendants' Motions as to the state claims.

IV. Conclusion

For the foregoing reasons, the Court denies the Motions of Defendants Michael Foods, Inc., Rose Acre Farms, Inc., and Ohio Fresh Eggs, LLC. The Court also grants in part the Motions of Daybreak Foods, Inc., Hillandale-Gettysburg L.P., Hillandale Farms Inc., and Hillandale Farms East, Inc., United Egg Association, and Land O'Lakes,

---

[10] Ostensibly, this observation also would hold true for the Plaintiffs' consumer protection claims that arise from violations of ***antitrust law*** in jurisdictions that follow or have adopted federal antitrust conspiracy principles.

[11] The same would be true for various jurisdictions' civil conspiracy claims—in the event that Plaintiffs are relying on civil conspiracy to establish the individual Defendants' vicarious or joint liability for the underlying consumer protection or unjust enrichment claims, as opposed to individual liability.

[12] It may well be that each and every one of **[*29]** the jurisdictions at issue has adopted federal antitrust conspiracy principles or follows similar, if not identical, principles of civil conspiracy as to the various antitrust, consumer protection, and unjust enrichment claims. Yet, in light of the Defendants' failure to proffer any meaningful legal authority in support of their arguments, the Court presently has no means of evaluating or recognizing the validity *vel non* of those arguments. The Court simply is not in a position to rule as a matter of law as to any state claim that Plaintiffs must plausibly suggest that Defendants joined or participated in the alleged conspiracy in order to state a claim against each moving Defendant. The Court shall not and cannot assume the burden of deciding this matter as to the 46 state claims when the Defendants have elected not to do so.

The Court recognizes that Plaintiffs also rely on similar legal authority as Defendants in responding to the Defendants' individual motions. Nonetheless, a motion to dismiss requires a defendant to bear the onus of raising and properly supporting arguments for dismissal. As such, in these circumstances, the Plaintiffs' equivalent failure to address relevant jurisdiction-specific **[*30]** case law cannot constitute grounds for dismissal.

Inc. as to the Sherman Act Section 1 claim without prejudice to Plaintiffs to seek leave to amend their pleading [13] and denies in part their Motions as to the state claims.

An Order consistent with this Memorandum follows.

BY THE COURT:

/s/ Gene E.K. Pratter

GENE E.K. PRATTER

United States District Judge

ORDER

AND NOW, this 24th day of April, 2012, upon **[*31]** consideration of the seven motions to dismiss filed by Defendants Michael Foods, Inc., [1] Rose Acre Farms, Inc., Ohio Fresh Eggs, LLC, Daybreak Foods, Inc., Hillandale-Gettysburg, L.P., Hillandale Farms, Inc., and Hillandale Farms East, Inc., United Egg Association, and Land O'Lakes, Inc. (Doc. Nos. 327, 328, 330, 324, 326, 329, 325), and the Indirect Purchaser Plaintiffs' response (Doc. No. 354), the Defendants' replies (Doc. Nos. 375, 377, 378, 379, 381, 382, 383), and the parties' supplemental filings thereto, and for the reasons stated in the accompanying Memorandum, it is hereby ORDERED as follows:

1. Motion to Dismiss Indirect Purchaser Second Amended Consolidated Complaint as to Defendants Michael Foods, Inc. and Papetti's Hygrade Egg Products, Inc. (Doc. No. 327) is DENIED.

2. Defendant Rose Acre Farm, Inc.'s Motion to Dismiss Indirect Purchasers' Second Consolidated Amended Class Action Complaint (Doc. No. 328) is DENIED.

3. Defendant Ohio Fresh Eggs, LLC's Renewed Motion to Dismiss the Indirect Purchasers' Second Consolidated Amended Class Action Complaint (Doc. No. 330) is DENIED.

4. Defendant Daybreak Foods, Inc.'s Motion to Dismiss Indirect Purchasers' Second Amended Consolidated **[*32]** Class Action Complaint (Doc. No. 324) is GRANTED without prejudice as to Count I and DENIED as to the other claims. Plaintiffs may seek leave to file an amended complaint consistent with the terms of the Court's Memorandum.

5. Motion to Dismiss the Indirect Purchaser Plaintiffs' Second Consolidated Amended Class Action Complaint on Behalf of Defendants Hillandale-Gettysburg, L.P., Hillandale Farms, Inc., and Hillandale Farms East, Inc. (Doc. No. 326) is GRANTED without prejudice as to Count I and DENIED as to the other claims. Plaintiffs may seek leave to file an amended complaint consistent with the terms of the Court's Memorandum.

6. United Egg Association's Motion to Dismiss the Claims Against it in Indirect Purchasers' Second Consolidated Amended Class Action Complaint (Doc. No. 329) is GRANTED without prejudice as to Count I and DENIED as to the other claims. Plaintiffs may seek leave to file an amended complaint consistent with the terms of the Court's Memorandum.

7. Defendant Land O'Lakes, Inc.'s Motion to Dismiss Indirect Purchasers' Second Amended Consolidated Class Action Complaint (Doc. No. 325) is GRANTED without prejudice as to Count I and DENIED as to the other claims. Plaintiffs **[*33]** may seek leave to file an amended complaint consistent with the terms of the Court's Memorandum.

---

[13] "Leave to amend must generally be granted unless equitable considerations render it otherwise unjust." *Arthur v. Maersk, Inc., 434 F.3d 196, 204 (3d Cir. 2006)* (citing *Foman v. Davis, 371 U.S. 178, 182, 83 S. Ct. 227, 9 L. Ed. 2d 222 (1962)*, and *Lorenz v. CSX Corp., 1 F.3d 1406, 1414 (3d Cir. 1993))*. No Defendant has raised arguments that provide sufficient grounds to weigh against permitting Plaintiffs to seek leave to amend those claims that the Court dismisses without prejudice.

[1] Jointly with non-party movant, Papetti's Hygrade Egg Products, Inc.

LexisNexis® Headnotes

Patent Law > Infringement Actions > Exclusive Rights > Manufacture, Sale & Use

Patent Law > ... > Defenses > Patent Invalidity > General Overview

HN1[] **Exclusive Rights, Manufacture, Sale & Use**

In a type of patent litigation settlement known as a pay for delay or reverse payment agreement, a patent holder pays the allegedly infringing generic drug company to delay entering the market until a specified date, thereby protecting the patent monopoly against a judgment that the patent is invalid or would not be infringed by the generic competitor.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food & Drugs Act

Patent Law > Infringement Actions > Exclusive Rights > Manufacture, Sale & Use

HN2[] **Agriculture & Food, Federal Food & Drugs Act**

No one can market or sell a new drug in the United States without first gaining the approval of the Food and Drug Administration (FDA). *21 U.S.C.S. § 355(a)*. The particular pathway to approval depends largely on the type of drug involved. One pathway is for pioneer drugs, which are ones that have never before received FDA approval. To initiate that approval process, an applicant files a New Drug Application (NDA). The NDA must contain detailed information about the drug, including its chemical composition, full reports of investigations about its safety and efficacy, descriptions of its production and packaging processes, and proposed labeling language. *§ 355(b)(1)*. An NDA applicant must also provide the FDA with the patent number and the expiration date of any patent that a generic manufacturer would infringe by making or selling the applicant's drug. If the FDA approves the NDA, it publishes the drug and patent information in a book called "Approved Drug Products with Therapeutic Equivalence and Evaluations," commonly referred to as the Orange Book. *21 U.S.C.S. § 355(j)(7)(A)*. The pioneer company may then market and sell the drug.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food & Drugs Act

Patent Law > Infringement Actions > Exclusive Rights > Manufacture, Sale & Use

HN3[] **Agriculture & Food, Federal Food & Drugs Act**

A more streamlined pathway to approval is reserved for generic versions of pioneer drugs that the Food and Drug Administration (FDA) has already approved and listed in a book called "Approved Drug Products with Therapeutic Equivalence and Evaluations," commonly referred to as the Orange Book. To begin the generic drug approval process, an applicant files an Abbreviated New Drug Application (ANDA). *21 U.S.C.S. § 355(j)*. The ANDA allows an applicant to piggyback on the safety and efficacy studies conducted for the pioneer drug and thereby gain Food and Drug Administration approval by establishing that the generic drug is chemically identical to a pioneer drug already listed in the Orange Book. *21 U.S.C.S. § 355(j)(2)(A)*. Rather than providing independent evidence of safety and efficacy, the typical ANDA shows that the generic drug has the same active ingredients as, and is biologically equivalent to, the brand-name drug.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food & Drugs Act

Patent Law > Infringement Actions > Exclusive Rights > Manufacture, Sale & Use

HN4[] **Agriculture & Food, Federal Food & Drugs Act**

An Abbreviated New Drug Application that piggybacks on a drug listed in a book called "Approved Drug Products with Therapeutic Equivalence and Evaluations," commonly referred to as the Orange Book, must make one of four paragraph certifications with respect to any patents affiliated with the listed drug. It must certify that: (I) no patent information for the brand name drug has been filed with the Food and Drug Administration; (II) the patent has expired; (III) the patent will expire on a specifically identified date; or (IV) the patent is invalid or will not be infringed by the manufacture, use, or sale of the new drug for which the application is submitted. *21 U.S.C.S. § 355(j)(2)(A)(vii)*.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food & Drugs Act

Patent Law > Infringement Actions > Exclusive Rights > Manufacture, Sale & Use

HN5[] **Agriculture & Food, Federal Food & Drugs Act**

It matters which *21 U.S.C.S. § 355* certification is made. If the Abbreviated New Drug Applicant (ANDA) certifies under paragraphs I or II, the Food and Drug Administration (FDA) reviews the ANDA and may approve it. *§ 355(j)(5)(B)(i)*. If the applicant certifies under paragraph III, however, the FDA will not approve the application until the patent for the listed drug has expired. *§ 355(j)(5)(B)(ii)*. If the applicant certifies under paragraph IV, the ANDA applicant must send notice to the patent holder of its position that the patent listed in a book called "Approved Drug Products with Therapeutic Equivalence and Evaluations," commonly referred to as the Orange Book, is invalid or will not be infringed by the applicant's generic drug. *§ 355(j)(2)(B)*. The patent holder then has 45 days to file an infringement lawsuit against the ANDA applicant. *§ 355(j)(5)(B)(iii)*. If the patent holder does not sue within that time frame, the FDA proceeds with the ANDA approval process. *21 U.S.C.S. § 355(j)(5)(B)(iii)*. If a suit is timely filed, however, the FDA stays the ANDA approval process for 30 months to allow the parties or a court to resolve the infringement dispute. If, during that 30-month stay, a court decides that the patent is invalid or not infringed, the FDA's approval of the ANDA, if any, is effective on the date that the court enters its judgment. *§ 355(j)(5)(B)(iii)(I)(aa)*.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food & Drugs Act

Patent Law > Infringement Actions > Exclusive Rights > Manufacture, Sale & Use

HN6[] **Agriculture & Food, Federal Food & Drugs Act**

Federal law encourages generic drug manufacturers to file paragraph IV certifications. The first Abbreviated New Drug Applicant (ANDA) applicant making a paragraph IV certification that receives Food and Drug Administration (FDA) approval is granted a 180-day exclusivity period during which the FDA postpones its approval process for other ANDA applications for generic versions of the same Orange Book listed drug. *21 U.S.C.S. § 355(j)(5)(B)(iv)*. That exclusivity period begins to run after the date of the first commercial marketing of the generic drug. *§ 355(j)(5)(B)(iv)(I)*. As a result, the first generic manufacturer to make a paragraph IV certification could receive a 180-day head start to compete with the pioneer drug, which is a significant incentive for generic manufacturers to challenge weak or narrow drug patents.

15 U.S.C.S. § 45(a)(1) bans unfair methods of competition in or affecting commerce, and unfair or deceptive acts or practices in or affecting commerce.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN9[] **Motions to Dismiss, Failure to State Claim**

An appellate court reviews de novo the district court's grant of a motion to dismiss under *Fed. R. Civ. P. 12(b)(6)* for failure to state a claim. In doing so, the court accepts the allegations in the complaint as true and construe them in the light most favorable to the plaintiff. A complaint must state a plausible claim for relief, and 'a claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. Stated differently, the factual allegations in a complaint must possess enough heft to set forth a plausible entitlement to relief.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > Federal Trade Commission Act

Antitrust & Trade Law > Federal Trade Commission Act > Scope

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN10[] **Sherman Act, Claims**

The analysis of whether a reverse payment agreement gives rise to antitrust liability is the same for claims brought under the Sherman Antitrust Act and under the Federal Trade Commission Act.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > Federal Trade Commission Act

Antitrust & Trade Law > Federal Trade Commission Act > Scope

HN11[] **Sherman Act, Claims**

Antitrust laws typically prohibit agreements where one company pays a potential competitor not to enter the market, but reverse payment settlements of patent litigation present atypical cases because one of the parties owns a patent. The patent makes all the difference because it meant that the patent holder had a lawful right to exclude others from the market.

Antitrust & Trade Law > Federal Trade Commission Act > General Overview

Civil Procedure > Settlements > Settlement Agreements > General Overview

Patent Law > Infringement Actions > Exclusive Rights > Manufacture, Sale & Use

HN12[] **Antitrust & Trade Law, Federal Trade Commission Act**

A court must judge the antitrust implications of a reverse payment settlement in a patent infringement action as of the time that the settlement was executed. The mere subsequent invalidity of the patent does not render the patent irrelevant to the appropriate antitrust analysis.

Antitrust & Trade Law > Federal Trade Commission Act > General Overview

Civil Procedure > Settlements > Settlement Agreements > General Overview

Patent Law > Infringement Actions > Exclusive Rights > Manufacture, Sale & Use

HN13[] **Antitrust & Trade Law, Federal Trade Commission Act**

Even a court judgment about a patent's actual exclusionary power, unless that judgment comes before settlement, does not count in an antitrust analysis of the settlement. What does count is the patent's potential exclusionary power as it appeared at the time of settlement.

Antitrust & Trade Law > Federal Trade Commission Act > Scope

Civil Procedure > Settlements > Settlement Agreements > General Overview

Patent Law > Infringement Actions > Exclusive Rights > Manufacture, Sale & Use

HN14[] **Antitrust & Trade Law, Federal Trade Commission Act**

Discussion about the potential exclusionary power of patents does not mean that all reverse payment settlements of patent litigation are immune from antitrust attack. A patent holder and any of its challengers cannot enter into an agreement that excludes more competition than the patent has the potential to exclude. If a reverse payment settlement reduces generic competition to a greater extent than the patent grant potentially does, the holder of the patent has used the settlement to buy exclusionary rights that are not contained in the patent grant, and those additional rights are vulnerable to antitrust attack. The patent exception to antitrust liability is limited by the terms of the patent and the statutory rights granted the patentee. Put another way, a patent gives its holder a bundle of rights, but any new exclusionary rights the holder buys to add to that bundle do not fall within the scope of the patent grant and for that reason do not fall within the scope of the patent's antitrust immunity.

Governments > Courts > Judicial Precedent

HN15[] **Courts, Judicial Precedent**

The United States Court of Appeals for the Eleventh Circuit has adopted as binding precedent all decisions of the former United States Court of Appeals for the Fifth Circuit handed down before October 1, 1981.

Antitrust & Trade Law > Federal Trade Commission Act > Scope

Civil Procedure > Settlements > Settlement Agreements > General Overview

Patent Law > Infringement Actions > Exclusive Rights > Manufacture, Sale & Use

HN16[] **Antitrust & Trade Law, Federal Trade Commission Act**

Parties to a reverse payment settlement should be immune from antitrust liability if the anticompetitive effects of their settlement fall within the scope of the exclusionary potential of the patent. If any provisions of the settlement create restraints on competition beyond that scope, however, those excesses may then be subject to traditional antitrust analysis to assess their probable anticompetitive effects in order to determine whether they violate *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*. The traditional antitrust analysis consists of two tests: the per se test and the rule of reason test. Under the per se test, the challenged restraint categorically violates the antitrust laws because it is so obviously anticompetitive, or so unlikely to be pro-competitive, that it can be deemed to violate the antitrust laws without much more than an examination of the agreement itself and the relationships of the parties to the agreement. Under the rule of reason test, the legality of the challenged restraint hinges upon whether it promotes or suppresses competition.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Civil Procedure > Settlements > Settlement Agreements > General Overview

Patent Law > Infringement Actions > Exclusive Rights > Manufacture, Sale & Use

HN17[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

Neither the rule of reason nor the per se test is an appropriate way to analyze the antitrust implications of a reverse payment settlement of patent litigation. That traditional analysis is inappropriate because one of the signatories to the settlement holds a patent, and a patent conveys the right to cripple competition. The proper analysis requires an examination of: (1) the scope of the exclusionary potential of the patent; (2) the extent to which the agreements exceed that scope; and (3) the resulting anticompetitive effects. The essence of this three-prong analysis is an evaluation of whether the settlement agreements contain provisions that restrict competition beyond the scope of the exclusionary potential of the patent.

Civil Procedure > Settlements > General Overview

HN26[] **Federal Trade Commission Act, US Federal Trade Commission**

An after-the-fact inquiry by the Federal Trade Commission (FTC) into the merits of underlying litigation is not only unlikely to be particularly helpful in addressing an antitrust complaint against a patent infringement settlement, but also likely to be unreliable. As a general matter, tribunals decide patent issues in the context of a true adversary proceeding, and their opinions are informed by the arguments of opposing counsel. Once a case settles, however, the interests of the formerly contending parties are aligned. A generic competitor that has agreed to delay its entry no longer has an incentive to attack vigorously the validity of the patent in issue or a claim of infringement. For those reasons, the FTC has concluded that it would not be necessary, practical, or particularly useful to embark on an inquiry into the merits of the underlying patent dispute when resolving antitrust issues in patent settlements. The FTC was right then for the same reasons it is wrong now.

Patent Law > Jurisdiction & Review > Subject Matter Jurisdiction > Appeals

Patent Law > Infringement Actions > General Overview

Opinion by: CARNES

Opinion

[*1561]** **[*1300]** CARNES, Circuit Judge:

The system of developing new drugs in this country exemplifies the maxims "no risk, no reward" and "more risk, more reward." Developing new drugs is a risky, lengthy, and costly endeavor, but it also can be highly lucrative. Only one in every 5,000 medicines tested for the potential to treat illness is eventually approved for patient use, and studies estimate that developing a new drug takes 10 to 15 years and costs more than $1.3 billion.[1] No rational actor would take that kind of a risk **[***1562]** over that period of time without the prospect of a big reward. The reward, if any, comes when the drug is approved and patented, giving the pioneer or "brand name" company that developed it a monopoly over the sale of the new drug for the life of the patent. The pioneer company can then exploit the patent monopoly by charging higher prices than it could if competitors were allowed to sell bioequivalent or "generic" versions of **[**3]** the drug. In that manner, the pioneer company is usually able to recoup its investment and gain a profit, sometimes a super-sized one.

Another maxim might also apply to the patent monopoly of drug pioneers: "more money, more problems." The huge profits that new drugs can bring frequently attract competitors in the form of generic drug manufacturers that challenge or try to circumvent the pioneer's monopoly in the market. Patent litigation often results, threatening the pioneer's monopoly and profits. Instead of rolling the dice and risking their monopoly profits in the infamously costly

[*] Honorable Jerome Farris, United States Circuit Judge for the Ninth Circuit, sitting by designation.

[1] Bret Dickey, Jonathan Orszag & Laura Tyson, An Economic Assessment of Patent Settlements in the Pharmaceutical Industry, 19 Annals Health L. 367, 369 & n.10 (2010).

and notoriously unpredictable process of patent litigation, many patent-holding companies choose to settle **[*1301]** lawsuits in order to preserve their patents and keep the monopoly profits flowing.

This case involves ***HN1***[] a type of patent litigation settlement known as a "pay for delay" or "reverse payment" agreement. In this type of settlement, a patent holder pays the allegedly infringing generic drug company to delay entering the market until a specified **[**4]** date, thereby protecting the patent monopoly against a judgment that the patent is invalid or would not be infringed by the generic competitor. This case began when the Federal Trade Commission filed a complaint in district court alleging that the reverse payment settlements between the holder of a drug patent and two generic manufacturers of the drug are unfair restraints on trade that violate federal antitrust laws. The FTC claims that the settlements are simply tools that the three manufacturers used to avoid a judgment that the patent was invalid or would not be infringed by the generics, thereby protecting monopoly profits that the companies divvied up by means of payments from the patent holder to the generic manufacturers. The key allegation in the FTC's complaint is that the patent holder was "not likely to prevail" in the infringement actions that it brought against the generic manufacturers and then settled. According to the FTC, the reverse payment settlements unlawfully protected or preserved a monopoly that likely was invalid and that should not be shielded from antitrust attack.

The drug companies counter that, far from being devices designed to dodge antitrust restrictions, **[**5]** reverse payment settlements are simply a way that patent holders protect and maintain the lawful exclusionary rights patent law grants them. Cf. *Walker Process Equip., Inc. v. Food Mach. & Chem. Corp., 382 U.S. 172, 177, 86 S.Ct. 347, 350, 15 L. Ed. 2d 247 (1965)* ("A patent . . . is an exception to the general rule against monopolies . . . ." (quotation marks omitted)); *Precision Instrument Mfg. Co. v. Auto. Maint. Mach. Co., 324 U.S. 806, 816, 65 S.Ct. 993, 998, 89 L. Ed. 1381, 1945 Dec. Comm'r Pat. 582 (1945)* (same). They say that punishing a patent holder for paying a potential competitor to stay out of the market as part of a settlement agreement would penalize precisely what patents are designed to permit: the exclusion of competition. That erosion of patent rights, the drug companies argue, would weaken incentives for investing in drug development, which would reduce the number of life-saving or life-enhancing innovations that benefit consumers.

The FTC would like us to hold that reverse payment settlements, like the ones in this case, are presumptively unlawful restraints of trade. It argues that such settlements allow brand name and generic drug companies to be partners in unlawful monopolies. Monopoly profits, the FTC says, will typically **[**6]** exceed the sum of the individual profits that the two drug companies could make by competing against each other. So even if the generic drug company is likely to win the infringement suit, it has a strong economic incentive to drop its lawsuit in exchange for a share of the brand name company's monopoly profits.[2] **[*1302]** Viewed **[***1563]** this way, a reverse payment settlement ending patent litigation is a "win-win" for the two companies. The brand name drug company maintains its monopoly by enforcing a patent that may be invalid, and the generic drug company makes more money under the settlement than it could have earned by competing in a market free of the patent's restraints. While the drug companies are the big winners in this scenario, consumers are the big losers; they continue paying monopoly prices for the drug even though the patent creating the monopoly is likely invalid or would not be infringed by generic competition. The FTC estimates that reverse payment settlements cost consumers about $3.5 billion per year in the form of higher drug prices.

---

[2] The FTC's brief offers this explanation of the economic incentives involved:

> According to a study conducted by the FTC of the industry as a whole . **[**7]** . ., a branded manufacturer typically loses about 90 percent of its unit sales over the course of generic entry. While generic entrants gain that unit volume, they do not gain all the revenues lost by the branded manufacturer because, as generic competition sets in, the price falls, on average, to about 15 percent of what the branded manufacturer was charging. Thus, a branded manufacturer can expect that, if a drug is earning $1 billion a year before generic entry, the manufacturer will only earn about $100 million a year once generic competition has matured, and all the generic companies put together will only earn about $135 million a year (90% x 15% x $1 billion), thus leaving approximately $765 million a year for the public through the benefits of competition. The parties have a strong economic incentive to avoid that result.

Appellant Br. 33-34 (footnotes omitted).

I.

The usual protocol in opinions is to put the facts and procedural history of the case before a discussion of the applicable statutes, but in this case the facts make more sense after a discussion of the statutory process for introducing new drugs to the market.

HN2[] No one can market or sell a new drug in the United States **[**8]** without first gaining the approval of the Food and Drug Administration. See *21 U.S.C. § 355(a)*. The particular pathway to approval depends largely on the type of drug involved. One pathway is for pioneer drugs, which are ones that have never before received FDA approval. To initiate that approval process, an applicant files a New Drug Application. See id. The NDA must contain detailed information about the drug, including its chemical composition, "full reports of investigations" about its safety and efficacy, descriptions of its production and packaging processes, and proposed labeling language. Id. *§ 355(b)(1)*. An NDA applicant must also provide the FDA with "the patent number and the expiration date of any patent" that a generic manufacturer would infringe by making or selling the applicant's drug. Id.; see also *21 C.F.R. § 314.53(b)*. If the FDA approves the NDA, it publishes the drug and patent information in a book called "Approved Drug Products with Therapeutic Equivalence and Evaluations," commonly referred to as the "Orange Book." See *21 U.S.C. § 355(j)(7)(A)*; see also *Caraco Pharm. Labs., Ltd. v. Novo Nordisk A/S, No. 10-844, 132 S. Ct. 1670, 182 L. Ed. 2d 678, 2012 U.S. LEXIS 3106, 2012 WL 1288732, at *5 (U.S. Apr. 17, 2012)*. The **[**9]** pioneer company may then market and sell the drug.

HN3[] A more streamlined pathway to approval is reserved for generic versions of pioneer drugs that the FDA has already approved and listed in the Orange Book. To begin the generic drug approval process, an applicant files an Abbreviated New Drug Application. See *21 U.S.C. § 355(j)*. The ANDA allows an applicant "to piggyback on the safety and efficacy studies conducted for the pioneer drug" and thereby gain FDA approval by establishing that the generic drug is chemically identical to a pioneer drug already listed in the Orange Book. *Valley Drug Co. v. Geneva Pharms., Inc., 344 F.3d 1294, 1296 (11th Cir. 2003)*; see *21 U.S.C. § 355(j)(2)(A)*; *Caraco Pharm. Labs., 2012 U.S. LEXIS 3106, 2012 WL 1288732, at *5* ("Rather than providing independent evidence of safety and efficacy, the typical ANDA shows that the generic drug has the same **[*1303]** active ingredients as, and is biologically equivalent to, the brand-name drug.").

HN4[] An ANDA that piggybacks on a drug listed in the Orange Book must make one of four "paragraph certifications" with respect to any patents affiliated with the listed drug. It must certify that: (I) no patent information for the brand name drug has been filed **[**10]** with the FDA; (II) the patent has expired; (III) the patent will expire on a specifically identified date; or (IV) the "patent is invalid or will not be infringed by the manufacture, use, or sale of the new drug for which the application is submitted." *21 U.S.C. § 355(j)(2)(A)(vii)*.

HN5[] It matters which certification is made. If the applicant certifies under paragraphs I or II, the FDA reviews the ANDA and may approve it. See id. *§ 355(j)(5)(B)(i)*. If the applicant certifies under paragraph III, however, the FDA will not approve the application until the patent for the listed drug has expired. See id. *§ 355(j)(5)(B)(ii)*.

If the applicant certifies under paragraph IV, things get complicated. The ANDA applicant must send notice to the patent holder of its position **[***1564]** that the patent listed in the Orange Book is invalid or will not be infringed by the applicant's generic drug. See id. *§ 355(j)(2)(B)*. The patent holder then has 45 days to file an infringement lawsuit against the ANDA applicant. Id. *§ 355(j)(5)(B)(iii)*; cf. *35 U.S.C. § 271(e)(2)(A)* (making it a constructive act of infringement to file a paragraph IV certification); *Caraco Pharm. Labs., 2012 U.S. LEXIS 3106, 2012 WL 1288732, at *6* ("Filing a paragraph **[**11]** IV certification means provoking litigation."). If the patent holder does not sue within that time frame, the FDA proceeds with the ANDA approval process. *21 U.S.C. § 355(j)(5)(B)(iii)*. If a suit is timely filed, however, the FDA stays the ANDA approval process for 30 months to allow the parties or a court to resolve the infringement dispute. Id. If, during that 30-month stay, a court decides that the patent is invalid or not infringed, the FDA's approval of the ANDA, if any, is effective on the date that the court enters its judgment. Id. *§ 355(j)(5)(B)(iii)(I)(aa)*.

HN6[] Federal law encourages generic drug manufacturers to file paragraph IV certifications. The first ANDA applicant making a paragraph IV certification that receives FDA approval is granted a 180-day "exclusivity period" during which the FDA postpones its approval process for other ANDA applications for generic versions of the same Orange Book listed drug. Id. *§ 355(j)(5)(B)(iv)*. That exclusivity period begins to run "after the date of the first commercial marketing of the [generic] drug." Id. *§ 355(j)(5)(B)(iv)(I)*; see also *21 C.F.R. § 314.107(c)(1)*. As a result, the first generic manufacturer to make a paragraph IV certification **[**12]** could receive a 180-day head start to compete with the pioneer drug, which is "a significant incentive for generic manufacturers to challenge weak or narrow drug patents." *Valley Drug, 344 F.3d at 1298*.

II.

With that statutory approval process in mind, we turn to the facts of this case. ***HN7***[] Because this appeal arises from the district court's Rule 12(b)(6) dismissal of the FTC's complaint for failure to state a claim, we accept as true all of the factual allegations in that complaint. *Thaeter v. Palm Beach Cnty. Sheriff's Office, 449 F.3d 1342, 1352 (11th Cir. 2006)*.

A.

Besins Healthcare, S.A., developed the prescription drug AndroGel, a topical gel that treats the symptoms of low testosterone in men. Chemicals in the gel gradually **[*1304]** penetrate the skin and enter the bloodstream, providing a sustained release of synthetic testosterone. In August 1995, Besins granted Solvay Pharmaceuticals, Inc., a license to sell AndroGel in the United States and agreed to provide a commercial supply of the drug if the FDA approved it for sale. Solvay filed an NDA for AndroGel in April 1999, which the FDA approved in February 2000. Solvay then began marketing and selling the drug with great success. Between 2000 **[**13]** and 2007, revenue from the sale of AndroGel in the United States exceeded $1.8 billion, far more than it cost to develop the drug.

Shortly after the FDA approved AndroGel, Solvay filed a patent application with the Patent and Trademark Office. A prior patent covering the synthetic testosterone used in AndroGel had expired decades earlier, but Solvay's application sought patent protection for a particular gel formulation of it. The Patent and Trademark Office granted Solvay's application on January 7, 2003, and jointly awarded Solvay and Besins Patent Number 6,503,894 ("the '894 patent"), which expires in August 2020. Within 30 days of being granted the patent, Solvay asked the FDA to include the '894 patent information in the Orange Book alongside the AndroGel listing. Cf. *21 U.S.C. § 355(c)(2)* (requiring successful NDA applicants to inform the FDA within 30 days of receiving a new patent for a listed drug).

Other drug manufacturers soon developed generic versions of AndroGel. Two of those companies, Watson Pharmaceuticals, Inc. and Paddock Laboratories, Inc., filed ANDAs with the FDA in May 2003. Watson was the first to file its ANDA, which made it eligible for the 180-day exclusivity **[**14]** period under *21 U.S.C. § 355(j)(5)(B)(iv)*. Both companies made paragraph IV certifications, claiming that their generic AndroGel products did not infringe on the '894 patent or that the patent was invalid. Within the relevant 45-day window, id. *§ 355(j)(5)(B)(iii)*, Solvay filed in federal district court a patent infringement lawsuit **[***1565]** against Watson and Paddock.[3] That filing triggered the 30-month stay of the FDA's approval process for Watson's and Paddock's generic versions of AndroGel. See id. The stay was set to expire in January 2006.

The parties litigated the infringement action for the next few years. To spread the risks and costs of litigation, Paddock partnered with Par Pharmaceutical Companies, Inc., which agreed to share the costs of litigation with Paddock in exchange for part of the potential profits from Paddock's generic AndroGel product if that product gained final FDA approval. After conducting discovery, Watson and Par/Paddock, the defendants in the patent infringement lawsuit, filed motions for summary judgment on the validity of the '894 patent. Those **[**15]** motions were fully briefed and ready for decision when the statutorily imposed 30-month stay on the FDA's approval process for Watson's ANDA ended in January 2006. The FDA approved Watson's generic AndroGel product that same month.

[3] Besins filed a separate lawsuit against Watson and Paddock, but the outcome of that case is not relevant to this appeal.

As a result, Solvay was facing the possibility of losing its monopoly in the AndroGel market in early 2006. If the district court granted Watson's motion for summary judgment either on the ground that the '894 patent was invalid or that it would not be infringed by the generic drugs, Watson could immediately flood the market with generic versions of AndroGel **[*1305]** without fear of being found to have violated Solvay's patent (unless the district court's decision was overturned on appeal). See *21 U.S.C. § 355(j)(5)(B)(iii)(I)(aa)*. Watson forecast that its generic version of AndroGel would sell for about 25% of the price of branded AndroGel, which could decrease the sales of branded AndroGel by 90% and cut Solvay's profits by $125 million per year. A lot was riding on the outcome of the patent litigation.

Before the district court ruled on Watson's and Par/Paddock's motions for summary judgment, and before any generic AndroGel was brought to market, the parties resolved **[**16]** their patent dispute with several settlement agreements. Under the terms of the settlements, Watson, Par, and Paddock agreed not to market generic versions of AndroGel until August 31, 2015, unless another manufacturer launched one before then. In addition, Watson agreed to promote branded AndroGel to urologists, and Par agreed to promote it to primary care doctors. Par also agreed to serve as a backup manufacturer for branded AndroGel but assigned that part of the agreement to Paddock.

For its part, Solvay agreed to pay Par/Paddock $10 million per year for six years and an additional $2 million per year for the backup manufacturing assistance. Solvay also agreed to share some of its AndroGel profits with Watson through September 2015, projecting that those payments would be between $19 million and $30 million per year. After finalizing the agreements, all of the parties—Solvay, Watson, Par, and Paddock—filed in district court a stipulation of dismissal terminating the patent infringement lawsuit.

B.

After the settlement agreements ending the patent litigation were reported to the FTC as required by *21 U.S.C. § 355* note (2003) (Federal Trade Commission Review), the FTC filed an antitrust **[**17]** lawsuit against Solvay, Watson, Par, and Paddock. That lawsuit was then transferred to the Northern District of Georgia, which is where the parties had litigated the patent infringement claims. The FTC then filed an amended complaint against all four drug companies.[4]

The FTC's amended complaint claimed that the settlement agreements, in which Solvay promised to pay Watson and Par/Paddock in exchange for those companies not selling generic AndroGel until 2015, are unlawful agreements not to compete in violation of *Section 5(a)* of the Federal Trade Commission Act. ***HN8***[] *15 U.S.C. § 45(a)(1)* (banning "[u]nfair methods of competition in or affecting commerce, and unfair or deceptive acts or practices in or affecting commerce"). It alleged that the settlement agreements were attempts to "defer" generic competition with branded AndroGel by postponing the entry date of the generic drugs, thereby maintaining Solvay's monopoly and allowing the parties to share **[**18]** monopoly profits "at the expense of the consumer savings that would result from price competition." **[***1566]**

The lynchpin of the FTC's complaint is its allegation that Solvay probably would have lost the underlying patent infringement action—that is, Watson and Par/Paddock had a strong case that the '894 patent did not bar their entry into the generic AndroGel market. More specifically, the complaint alleges that "Solvay was not likely to prevail" in the patent litigation because "Watson and Par/Paddock developed **[*1306]** persuasive arguments and amassed substantial evidence that their generic products did not infringe the ['894] patent and that the patent was invalid and/or unenforceable" (emphasis added). According to the FTC, because the '894 patent "was unlikely to prevent generic entry," Solvay's reverse payments to the generic drug producers continued and extended a monopoly that the patent laws did not authorize. By doing that, it argues, the reverse payment agreements unlawfully restrain competition.

---

4 Two other sets of plaintiffs—direct and indirect purchasers of AndroGel—joined the FTC in the district court and made a variety of state law claims. None of those plaintiffs joined the FTC in this appeal, and their claims are not before us.

The four defendants moved to dismiss the FTC's complaint under *Rule 12(b)(6)*, arguing that this Court's precedent immunizes reverse payment settlements from antitrust attack unless a settlement "imposes **[**19]** an exclusion greater than that contained in the patent at issue." Because the FTC had not alleged the settlements did that, the defendants argued, the complaint failed to state a claim on which relief could be granted. The district court agreed with the defendants, concluded that the FTC did "not allege that the settlements exceed the scope of the '894 patent," and granted the defendants' motion to dismiss. The FTC then filed this appeal, contending that it had sufficiently pleaded an antitrust claim by alleging that the parties had entered into the settlement agreements even though Solvay was "not likely to prevail" in the infringement actions against the generic producers.

HN9[] "We review de novo the district court's grant of a motion to dismiss under *12(b)(6)* for failure to state a claim . . . ." *Ironworkers Local Union 68 v. AstraZeneca Pharms., LP, 634 F.3d 1352, 1359 (11th Cir. 2011)* (quotation marks omitted). In doing so, we accept the allegations in the complaint as true and construe them "in the light most favorable to the plaintiff." *Clark v. Riley, 595 F.3d 1258, 1264 (11th Cir. 2010)* (quotation marks omitted). "A complaint must state a plausible claim for relief, and '[a] **[**20]** claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged.'" *Sinaltrainal v. Coca-Cola Co., 578 F.3d 1252, 1261 (11th Cir. 2009)* (quoting *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 1949, 173 L. Ed. 2d 868 (2009))* (alteration in Sinaltrainal). "Stated differently, the factual allegations in a complaint must 'possess enough heft' to set forth 'a plausible entitlement to relief' . . . ." *Fin. Sec. Assurance, Inc. v. Stephens, Inc., 500 F.3d 1276, 1282 (11th Cir. 2007)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 557, 559, 127 S.Ct. 1955, 1966-67, 167 L. Ed. 2d 929 (2007))*.

A.

The difficulty at the heart of this case is deciding how to resolve the tension between the pro-exclusivity tenets of patent law and the pro-competition tenets of ***antitrust law***. That difficulty is made less difficult, however, by the law's pro-precedent tenets. Our earlier decisions carry us much of the way to a resolution in this case.

This Court first confronted an antitrust challenge to a reverse payment settlement in *Valley Drug Co. v. Geneva Pharmaceuticals, Inc., 344 F.3d 1294 (11th Cir. 2003)*. The facts of **[**21]** that case parallel the facts of this one: Two generic manufacturers alleged that the patent for a drug listed in the Orange Book was invalid, the patent holder filed infringement claims against the generic manufacturers, and the parties settled before a court decided the merits of the claims. *Id. at 1298-300*. One generic manufacturer received millions of dollars in exchange for acknowledging the validity **[*1307]** of the pioneer's patent and agreeing not to enter the market until another generic manufacturer did or until the patent expired, whichever came first. *Id. at 1300*. The other generic manufacturer, also in exchange for millions of dollars, agreed not to enter until one of those two events occurred or until a court held that the patent was invalid, whichever came first. Id.

Several private parties filed an antitrust lawsuit against the three manufacturers alleging that their settlement agreements were per se illegal contracts in restraint of trade in violation of *Section 1* of the Sherman Act.[5] See *id. at 1295-96*; see also *15 U.S.C. § 1* ("Every **[***1567]** contract . . . in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal."). The district court **[**22]** agreed with the plaintiffs and granted their motion for partial summary judgment. See *Valley Drug, 344 F.3d at 1295, 1301*. After the court granted the drug companies' request for permission to take an interlocutory appeal, see *28 U.S.C. § 1292(b)*, we reversed. *Valley Drug, 344 F.3d at 1295, 1313*.

Our Valley Drug decision began by acknowledging that ***HN11***[] antitrust laws typically prohibit agreements where one company pays a potential competitor not to enter the market, but we reasoned that reverse payment

[5] ***HN10***[] The analysis of whether a reverse payment agreement gives rise to antitrust liability is the same for claims brought under the Sherman Antitrust Act, which was involved in Valley Drug, and under the Federal Trade Commission Act, which is involved in this case. See *Schering-Plough Corp. v. FTC, 402 F.3d 1056 (11th Cir. 2005)* (applying the same antitrust analysis to Sherman Act and FTC Act claims).

settlements of patent litigation presented atypical cases because "one of the parties own[s] a patent." *Id. at 1304*. The patent made all the difference because it meant that the patent holder had a "lawful right to exclude others" from the market. Id.; see also *35 U.S.C. § 154(a)(1)* ("Every patent **[**23]** shall . . . grant to the patentee . . . the right to exclude others from making, using, offering for sale, or selling the invention throughout the United States . . . ."); *Dawson Chem. Co. v. Rohm & Haas Co., 448 U.S. 176, 215, 100 S.Ct. 2601, 2623, 65 L. Ed. 2d 696 (1980)* ("[T]he essence of a patent grant is the right to exclude others from profiting by the patented invention."). The district court, we explained, "failed to consider" those exclusionary rights in its antitrust analysis when it held that the agreements were per se illegal. *Valley Drug, 344 F.3d at 1306*. Because one party to the reverse payment agreements held a patent, the agreements did not necessarily decrease the level of competition in the market. *Id. at 1309*. It followed that the district court had erred in using a per se test for determining the legality of the agreements. See id. ("If [the patent holder] had a lawful right to exclude competitors, it is not obvious that competition was limited more than that lawful degree by paying potential competitors for their exit."); see also *Schering-Plough Corp. v. FTC, 402 F.3d 1056, 1065-66 (11th Cir. 2005)* ("By their nature, patents create an environment of exclusion, and consequently, **[**24]** cripple competition. The anticompetitive effect is already present."); cf. *Asahi Glass Co. v. Pentech Pharms., Inc., 289 F. Supp. 2d 986, 994 (N.D. Ill. 2003)* (Posner, J., sitting by designation) ("In a reverse-payment case, the settlement leaves the competitive situation unchanged from before the [generic manufacturer] tried to enter the market.").

After deciding to reverse the district court's partial grant of summary judgment in favor of the plaintiffs in Valley Drug, we went on to discuss several other matters **[*1308]** "that promise[d] to be relevant on remand." *Valley Drug, 344 F.3d at 1306*. We first addressed the plaintiffs' argument that the analysis on remand should disregard the patent altogether because after the parties had entered into their settlement agreements a federal district court had invalidated the patent at issue. According to the plaintiffs in Valley Drug, that post-settlement invalidation meant the patent holder "never had any patent rights," which meant the settlements necessarily excluded more competition from the market than the patent holder was lawfully entitled to exclude (namely, none). *Id. at 1306-07*. Which meant, according to the plaintiffs, there were no patent **[**25]** rights to shield the settlements from antitrust attack, which meant the settlements were "subject to per se condemnation." *Id. at 1306*.

We rejected that argument, explaining that ***HN12***[] a court must judge the antitrust implications of a reverse payment settlement as of the time that the settlement was executed. Id. "[T]he mere subsequent invalidity of the patent does not render the patent irrelevant to the appropriate antitrust analysis." *Id. at 1306-07*. For that reason, even though the patent at issue in Valley Drug was in fact invalid, its terms had to be given full effect. See *id. at 1305* (explaining that, at the time of settlement, the patent holder had "the right to exclude others from making, using, or selling anhydrous terazosin hydrochloride until October of 2014, when [the patent] is due to expire").

Our decision to give full effect to the patent's terms in Valley Drug means that ***HN13***[] even a court judgment about a patent's actual exclusionary power, unless that judgment comes before settlement, does not count. What does count is the patent's "potential exclusionary power" as it appeared at the time of settlement. *Id. at 1311* (emphasis added). The patent in Valley Drug had the potential **[**26]** to exclude competition at the time of settlement because, **[***1568]** at that time, "no court had declared [the] patent invalid." *Id. at 1306*; cf. *35 U.S.C. § 282* ("A patent shall be presumed valid."). Because the patent had that potential at the time of settlement, we treated the holder as though it had an exclusionary right at that time. See *Valley Drug, 344 F.3d at 1306*.

HN14[] Our discussion in Valley Drug about the "potential exclusionary power" of patents did not mean, however, that all reverse payment settlements of patent litigation are immune from antitrust attack. A patent holder and any of its challengers cannot enter into an agreement that excludes more competition than the patent has the potential to exclude. If a reverse payment settlement reduces generic competition to a greater extent than the patent grant potentially does, the holder of the patent has used the settlement to buy exclusionary rights that are not contained in the patent grant, and those additional rights are vulnerable to antitrust attack. See *id. at 1312* ("[T]he patent exception to antitrust liability . . . is limited by the terms of the patent and the statutory rights granted the patentee."); cf. *United States v. Masonite Corp., 316 U.S. 265, 277, 62 S.Ct. 1070, 1077, 86 L. Ed. 1461, 1942 Dec. Comm'r Pat. 777 (1942)* **[**27]** ("The owner of a patent cannot extend his statutory grant by contract or agreement. A patent affords no immunity for a monopoly not fairly or plainly within the grant."). Put another way, a patent gives its holder a "bundle of rights," CMS Indus., Inc. v. L. P. S. Int'l, Ltd., 643 F.2d 289, 294 (5th Cir. 1981),[6] but any new exclusionary rights **[*1309]** the holder buys to add to that bundle do not fall within the scope of the patent grant and for that reason do not fall within the scope of the patent's antitrust immunity.

In keeping with those principles, we said in Valley Drug that ***HN16***[] parties to a reverse payment settlement should be immune from antitrust liability if the anticompetitive effects of their settlement fall "within the scope of the exclusionary potential of the patent." *344 F.3d at 1311*. If any provisions of the settlement create restraints on competition beyond that scope, however, those excesses "may then be subject to traditional antitrust analysis **[**28]** to assess their probable anticompetitive effects in order to determine whether [they] violate *§ 1* of the Sherman Act."[7] *Id. at 1312*. What was left for the district court to do on remand was to consider "the scope of the exclusionary potential of the patent [and] the extent to which the[] provisions of the Agreements exceed that scope." Id.

B.

Our next decision involving an antitrust challenge to a reverse payment settlement of patent litigation came in *Schering-Plough Corp. v. FTC, 402 F.3d 1056 (11th Cir. 2005)*. **[**29]** Schering, which held the patent for a drug called K-Dur 20, settled lawsuits it had filed against two generic drug manufacturers, Upsher-Smith Laboratories, Inc. and ESI Lederle, Inc. *Id. at 1058-60*. Schering's settlement with Upsher had two main parts: (1) Upsher agreed not to enter the K-Dur 20 market until five years before Schering's patent expired, and (2) Schering paid Upsher more than $60 million to license some of Upsher's other drug products. *Id. at 1059-60*. Schering's settlement with the other generic manufacturer, ESI, also had two main parts: (1) ESI agreed not to enter the K-Dur 20 market until almost three years before Schering's patent expired; and (2) Schering paid ESI $5 million in legal fees and $15 million to license some of ESI's other drug products, plus another $10 million if ESI's generic drug received FDA approval. *Id. at 1060-61 & n.8*.

The FTC determined in an administrative proceeding that the settlement agreements violated the FTC Act and the Sherman Act. *Id. at 1058*. Although it did not expressly say that reverse payment agreements are per se illegal, the FTC's order nonetheless announced a rule prohibiting all reverse payment settlements in which the generic **[**30]** company receives anything **[***1569]** of value in exchange for deferring its research, development, or entry to market. *Id. at 1062*. The defendant drug companies petitioned this Court to review the order, we did so, and we vacated it. *Id. at 1076*.

We began our review of the FTC's order by reiterating what we had said in Valley Drug: ***HN17***[] neither the rule of reason nor the per se test is an appropriate way to analyze the antitrust implications of a reverse payment settlement of patent litigation. **[*1310]** *Id. at 1065*. That traditional analysis is inappropriate because one of the signatories to the settlement holds a patent, and a patent conveys the right to "cripple competition." *Id. at 1066*. The proper analysis, we explained, "requires an examination of: (1) the scope of the exclusionary potential of the patent; (2) the extent to which the agreements exceed that scope; and (3) the resulting anticompetitive effects." *Id.* (citing *Valley Drug, 344 F.3d at 1312*). The essence of this three-prong analysis is an evaluation of whether the settlement agreements contain provisions that restrict competition beyond the scope of the exclusionary potential of the patent. Cf. *United States v. Singer Mfg. Co., 374 U.S. 174, 196-97, 83 S.Ct. 1773, 1785, 10 L. Ed. 2d 823, 1963 Dec. Comm'r Pat. 547 (1963)* **[**31]** ("[I]t is . . . well settled that the possession of a valid patent or patents does not give

---

[6] In *Bonner v. City of Prichard, 661 F.2d 1206, 1209 (11th Cir. 1981)* (en banc), ***HN15***[] we adopted as binding precedent all decisions of the former Fifth Circuit handed down before October 1, 1981. The CMS decision was issued on April 22, 1981.

[7] The traditional antitrust analysis consists of two tests: the "per se" test and the "rule of reason" test. See *Schering-Plough Corp. v. FTC, 402 F.3d 1056, 1064 (11th Cir. 2005)*. Under the per se test, the challenged restraint categorically violates the antitrust laws because it is "so obviously anticompetitive, or so unlikely to be pro-competitive, that [it] can be deemed to violate [the antitrust laws] without much more than an examination of the agreement itself and the relationships of the parties to the agreement." *Valley Drug, 344 F.3d at 1303*. Under the rule of reason test, the legality of the challenged restraint hinges upon whether it promotes or suppresses competition. See *Schering-Plough, 402 F.3d at 1064*.

the patentee any exemption from the provisions of the Sherman Act beyond the limits of the patent monopoly."); *In re Tamoxifen Citrate Antitrust Litig., 466 F.3d 187, 213 (2d Cir. 2006)* ("[T]here is no injury to the market cognizable under existing ***antitrust law***, as long as competition is restrained only within the scope of the patent.").

After describing that analysis in Schering-Plough, we defined the potential exclusionary scope of the K-Dur 20 patent, giving full force to the exclusionary rights it potentially conveyed. Under the patent, Schering could exclude both of the generic companies from the K-Dur 20 market. *Schering-Plough, 402 F.3d at 1066*. The patent also gave Schering the "right to grant licenses, if it so chooses." *Id. at 1067*. Those exclusionary and licensing rights existed until the patent expired on September 5, 2006, or until the generic manufacturers "proved either that the . . . patent was invalid or that their products . . . did not infringe Schering's patent." *Id. at 1066-67*.

With the potential exclusionary scope of the patent defined in Schering-Plough, we then evaluated **[**32]** whether the settlements extended Schering's exclusionary rights beyond that scope. That was simple to do. The settlement with Upsher permitted that company to market its generic K-Dur 20 product more than five years before the expiration of Schering's patent, and the settlement with ESI allowed it to market its generic product almost three years before the patent expired. *Id. at 1068-71*. The settlements excluded competition for a shorter period of time (five years less and three years less) than the face of the patent allowed. For that reason, we held that the reverse payment settlements did not impermissibly extend Schering's patent monopoly.

Our Schering-Plough decision also rejected the FTC's argument that Schering had agreed to pay too much money to settle the case and that the generic companies had agreed to stay off the market for too long. See *id. at 1073*. If that were true, the FTC asserted, it meant that Schering must have paid the generic companies not only to settle the infringement lawsuit but also to obtain increased exclusionary rights in the K-Dur 20 market. See id. In other words, the FTC claimed that Schering used the reverse payment settlements not just to protect **[**33]** its legitimate bundle of patent rights, but also to mask a "naked payment" to horizontal competitors in order to expand the scope of its monopoly. *Id. at 1070, 1072*.

We rejected the FTC's contention in part because it did not take into account the underlying patent litigation, which was "certain[ ] to be a bitter and prolonged process." *Id. at 1072*; see also *id. at 1075* ("[T]he size of the payment . . . should not dictate the availability of a settlement remedy."). We emphasized that ***HN18***[] "[t]he general **[*1311]** policy of the law is to favor the settlement of litigation," *id. at 1072*, and reiterated that patent litigation is costly and complex, see *id. at 1073-74*. All three drug companies in Schering-Plough were facing high risks and costs if they continued to litigate the infringement action. See *id. at 1075* (discussing the costs of attorney fees, expert fees, and discovery expenses, and noting the "caustic environment of patent litigation" that may increase the "period of uncertainty" for patenting and marketing new drugs). The agreements among the parties reflected that high-stakes reality, so their settlements "fell well within the protections of the **[***1570]** [K-Dur 20] patent, and were therefore not **[**34]** illegal." *Id. at 1076*.[8]

C.

Our third and most recent decision involving the antitrust implications of reverse payment settlements is *Andrx Pharmaceuticals, Inc. v. Elan Corp., 421 F.3d 1227 (11th Cir. 2005)*. The district court in that case granted a patent holder's motion for **[**35]** judgment on the pleadings, but we reversed the judgment because the plaintiff had sufficiently pleaded an antitrust claim. It had done so in two ways. First, the complaint in Andrx alleged that the

---

[8] The FTC's brief in this case places great weight on our statement in Schering-Plough that a proper antitrust analysis of reverse payment agreements needs to "evaluate the strength of the patent." *402 F.3d at 1076* (emphasis added). The FTC argues that evaluating the "strength of the patent" means evaluating "the strength of the patent holder's claims of validity and infringement, as objectively viewed at the time of settlement." We disagree. ***HN19***[] When read in the context of the facts and the reasoning of Schering-Plough, the phrase "strength of the patent" refers to the potential exclusionary scope of the patent—that is, the exclusionary rights appearing on the patent's face and not the underlying merits of the infringement claim. Nowhere in the *Schering-Plough* opinion did we actually evaluate the merits of the infringement claim when defining how much competition the patent could potentially exclude from the market.

generic manufacturer had agreed "to refrain from ever marketing a generic" version of the patented drug. Id. at 1235 (emphasis added). If true, that meant the settlement agreement blocked generic competition after the patent expired, and in that way excluded competition beyond "the scope of exclusion intended by the . . . patent." Id.

The other way the complaint in Andrx stated a plausible antitrust claim was by alleging that the settlement agreement allowed the generic company to retain its 180-day exclusivity period of 21 U.S.C. § 355(j)(5)(B)(iv) even though that company had "no intention of marketing its generic drug." Andrx, 421 F.3d at 1231. If true, that meant the 180-day period, which begins to run "after the date of first commercial marketing," 21 U.S.C. § 355(j)(5)(B)(iv)(I), would never be "trigger[ed]," Andrx, 421 F.3d at 1231. As a result, the exclusivity period would have acted like a cork in a bottle, blocking other generic competition from pouring into the market.[9] By doing **[**36]** that, the settlement created anticompetitive effects beyond the scope of the patent. Id. at 1235; see also id. at 1231 ("[T]he settlement agreement **[*1312]** had the effect of preventing any generic competition in the . . . market and constituted a conspiracy to restrain trade." (emphasis added)). For those reasons, we held that the complaint in Andrx stated a plausible antitrust claim. Id. at 1236.

IV.

Our Valley Drug, Schering-Plough, and Andrx decisions establish the rule that, ***HN21***[] absent sham litigation **[**37]** or fraud in obtaining the patent, a reverse payment settlement is immune from antitrust attack so long as its anticompetitive effects fall within the scope of the exclusionary potential of the patent.[10] The issue in this case is whether, under that test, the FTC's complaint states an antitrust claim by alleging that Solvay was "not likely to prevail" in the underlying infringement action against Watson, Par, and Paddock. **[***1571]**

The FTC argues that its "not likely to prevail" allegation sufficiently states an antitrust claim because a patent has no exclusionary potential if its holder was not likely to win the underlying infringement suit. And if the patent has no exclusionary potential, the FTC continues, then any reverse payment settlement that excludes any competition from the market necessarily exceeds the potential exclusionary scope of the patent and must be seen as the patent holder's illegal "'buying off' of a serious threat to competition." Consistent with that reasoning, the FTC urges us to adopt "a rule that an exclusion payment is unlawful **[**39]** if, viewing the situation objectively as of the time of the settlement, it is more likely than not that the patent would not have blocked generic entry earlier than the agreed-upon entry date." Under that rule, the FTC's allegation that Solvay was "not likely to prevail" in the patent litigation would state a plausible antitrust claim.

---

[9] ***HN20***[] In 2003 Congress amended the statutory provisions governing the 180-day exclusivity period to keep corks out of the bottle by providing that the first paragraph IV ANDA filer forfeits its right of exclusivity if it fails to market a generic drug within certain time periods. See 21 U.S.C. § 355(j)(5)(D). A grandfather provision of that amendment specified that the changes would not apply to paragraph IV ANDAs filed before the date of enactment. Medicare Prescription Drug, Improvement, and Modernization Act of 2003, ***Pub. L. No. 108-173, § 1102(b)(1), 117 Stat. 2066***. See generally Caraco Pharm. Labs., Ltd. v. Forest Labs., Inc., 527 F.3d 1278, 1284 n.2 (Fed. Cir. 2008) (discussing the amendment).

[10] There was no allegation in our first two decisions that the patents were fraudulently obtained or that the litigation giving rise to the settlement was a sham. See Valley Drug, 344 F.3d at 1307-09 & nn.19, 21; Schering-Plough, 402 F.3d at 1068. The plaintiff in our third decision did contend that there had been sham litigation, but we rejected that contention as unfounded. See Andrx, 421 F.3d at 1233-34.

We stated in Valley Drug that: "[A]ppellees have neither alleged nor asserted that the patent was procured by fraud, that appellants knew the patent was invalid, that there was no objective basis to believe that the patent was valid, or any such similar allegations. We therefore are not called upon to decide what the antitrust consequences of such circumstances might **[**38]** be." 344 F.3d at 1307 n.19. We make the same observations about this case and limit our decision in the same way. Although the FTC's complaint alleges that Solvay was "not likely to prevail" in its infringement actions against Watson and Par/Paddock, it does not contend that any of the three companies knew that the patent was invalid or not infringed or that there was no objective basis to believe the patent was valid and infringed. Accordingly, we do not rule out the possibility that sufficient allegations of any of those facts would state a valid antitrust claim.

We decline the FTC's invitation and reject its argument. The FTC's position equates a likely result (failure of an infringement claim) with an actual result, but *HN22*[] it is simply not true that an infringement claim that is "likely" to fail actually will fail. "Likely" means more likely than not, and that includes a 51% chance of a result one way against a 49% chance of a result the other way. Cf. *United States v. Frazier, 387 F.3d 1244, 1280-81 (11th Cir. 2004)* ("[I]t is more likely than not—that is, there is more than a fifty-percent chance—that [the event] would have occurred."). Giving the word its plain meaning, as many as 49 out of 100 times that an infringement claim is "likely" to fail it actually will succeed and keep the competitor out of the market. Our decisions focus on **[*1313]** the potential exclusionary effect of the patent, not the likely exclusionary **[**40]** effect. See, e.g., *Valley Drug, 344 F.3d at 1305*; *Schering-Plough, 402 F.3d at 1066*; *Andrx, 421 F.3d at 1235*.

In few cases that are settled is the probability needle pointing straight up. One side or the other almost always has a better chance of prevailing, but a chance is only a chance, not a certainty. Rational parties settle to cap the cost of litigation and to avoid the chance of losing. Those motives exist not only for the side that is likely to lose but also for the side that is likely, but only likely, to win. A party likely to win might not want to play the odds for the same reason that one likely to survive a game of Russian roulette might not want to take a turn. With four chambers of a seven-chamber revolver unloaded, a party pulling the trigger is likely (57% to 43%) to survive, but the undertaking is still one that can lead to undertaking.

Patent litigation can also be a high stakes, spin-the-chambers, all or nothing undertaking. See *Valley Drug, 344 F.3d at 1308*; *Schering-Plough, 402 F.3d at 1075-76*. For the company with a patented drug, it obviously makes sense to settle the infringement action if it is "not likely to prevail," even though that company may have a substantial **[**41]** (up to 49%) chance of winning. On the other side of the settlement equation is the generic drug company that is only "likely to prevail" in the action; with a substantial (up to 49%) chance of losing, that company also has a legitimate motive for settling. When both sides of a dispute have a substantial chance of winning and losing, especially when their chances may be 49% to 51%, it is reasonable for them to settle. That companies with conflicting claims settle drug patent litigation in these circumstances is not a violation of the antitrust laws.

The FTC argues in its brief that "Solvay's patent was vulnerable," that it "knew that its patent was in trouble," and that "its claims of infringement were very much in doubt." Those arguments not only go beyond *HN23*[] the allegations of the complaint, which is all that we can consider in this appeal from a Rule 12(b)(6) dismissal, but they also do little more than reflect the reality of patent litigation and the risks it presents to the patent holder. That reality and those risks are precisely why a party is likely to choose to settle a patent dispute even if it might well prevail. When hundreds of millions of dollars of lost profits are at stake, **[**42]** "even a patentee confident in the validity of its patent might pay a potential infringer a substantial sum in settlement." *Valley Drug, 344 F.3d at 1310*; cf. *In re Ciprofloxacin Hydrochloride Antitrust Litig., 261 F. Supp. 2d 188, 208 (E.D.N.Y. 2003)* ("No matter how valid a patent is—no matter how often it has been upheld in other litigation or successfully reexamined—it is still a gamble to place a technology case in the hands of a lay judge or jury. Even the confident patent owner knows that the chances of prevailing in patent litigation rarely exceed seventy percent. Thus, there are risks involved even in that rare **[***1572]** case with great prospects." (alterations and quotation marks omitted)).

There are other reasons to reject the FTC's approach. It would require an after-the-fact calculation of how "likely" a patent holder was to succeed in a settled lawsuit if it had not been settled. *HN24*[] Predicting the future is precarious at best; retroactively predicting from a past perspective a future that never occurred is even more perilous. And it is too perilous an enterprise to serve as a basis for antitrust liability and treble damages. See *Valley **[*1314]** Drug, 344 F.3d at 1308* ("Patent litigation is too **[**43]** complex and the results too uncertain for parties to accurately forecast whether enforcing the exclusionary right through settlement will expose them to treble damages if the patent immunity were destroyed by the mere invalidity of the patent."); cf. *Whitmore v. Arkansas, 495 U.S. 149, 159-60, 110 S.Ct. 1717, 1725, 109 L. Ed. 2d 135 (1990)* ("It is just not possible for a litigant to prove in advance that the judicial system will lead to any particular result in his case.").

The FTC's retrospective predict-the-likely-outcome-that-never-came approach would also impose heavy burdens on the parties and courts. It would require, in the FTC's words, "viewing the situation objectively as of the time of the settlement." In this case, assaying the infringement claim "as of the time of settlement" would have required mining through mountains of evidence—when the lawsuit settled, more than 40 depositions had been taken and one side alone had produced more than 350,000 pages of documents. The settlement made that unnecessary, but the FTC's approach would put that burden back on the parties and the court, undo much of the benefit of settling patent litigation, and discourage settlements. Our legal system can ill afford **[**44]** that. See *Schering-Plough, 402 F.3d at 1075* (***HN25***[] "There is no question that settlements provide a number of private and social benefits as opposed to the inveterate and costly effects of litigation."); see also *Valley Drug, 344 F.3d at 1309* (noting "the important role played by settlement in the enforcement of patent rights"); cf. *In re Tamoxifen Citrate, 466 F.3d at 202* ("Where a case is complex and expensive, and resolution of the case will benefit the public, the public has a strong interest in settlement." (quotation marks omitted)); *Flex-Foot, Inc. v. CRP, Inc., 238 F.3d 1362, 1368 (Fed. Cir. 2001)* (noting "the important policy of enforcing settlement agreements").

There is also the fact that retrospective prediction, at least in this type of case, is unlikely to be reliable. The FTC itself has recognized as much in the past. In its order in the Schering-Plough case, the full Commission explained that:

> ***HN26***[] An after-the-fact inquiry by the Commission into the merits of the underlying litigation is not only unlikely to be particularly helpful, but also likely to be unreliable. As a general matter, tribunals decide patent issues in the context of a true adversary proceeding, and their opinions **[**45]** are informed by the arguments of opposing counsel. Once a case settles, however, the interests of the formerly contending parties are aligned. A generic competitor that has agreed to delay its entry no longer has an incentive to attack vigorously the validity of the patent in issue or a claim of infringement.

*In re Schering-Plough Corp., 136 F.T.C. 956, 2003 WL 22989651, at *22 (F.T.C. 2003)*, vacated by *Schering-Plough, 402 F.3d 1056*. For those reasons, the FTC concluded that "it would not be necessary, practical, or particularly useful . . . to embark on an inquiry into the merits of the underlying patent dispute when resolving antitrust issues in patent settlements." *136 F.T.C. 956, Id. at *23*. The FTC was right then for the same reasons it is wrong now.

There is another reason to reject the FTC's new approach. ***HN27***[] Congress has given the United States Court of Appeals for the Federal Circuit exclusive appellate jurisdiction over patent cases. See *28 U.S.C. § 1295(a)(1)*; see also *Cardinal Chem. Co. v. Morton Int'l, Inc., 508 U.S. 83, 89, 113 S.Ct. 1967, 1971, 124 L. Ed. 2d 1 (1993)*; *Christianson v. Colt Indus. Operating Corp., 486 U.S. 800, 807, 108 S.Ct.* ***[*1315]*** *2166, 2173, 100 L. Ed. 2d 811 (1988)*. This Court and the other non-specialized circuit **[**46]** courts have no expertise or experience in the area. We are ill-equipped to make a judgment about the merits of a patent infringement claim, which is what we would have to do in order to decide how likely the claim was to prevail if it had been pursued to the end. The FTC's approach is in tension with Congress' decision to have appeals involving patent issues decided by the Federal Circuit. **[***1573]**

As we discussed at the beginning of this opinion, the FTC warns that the alternative to its approach of looking back to decide what the likely outcome of settled infringement claims would have been is unacceptable. The alternative, according to the FTC, will allow patent holders and potential competitors "to forgo litigation over patent infringement and split up an ongoing stream of monopoly profits, even in situations in which it is evident that it is more likely than not that the patent would be found invalid or not infringed." The FTC believes that, because drug prices will be higher in the absence of competition, the profits generated by a patent holder's monopoly will typically exceed the aggregated profits that all companies individually would earn through competition. As a result, a potential **[**47]** competitor can make more money by dropping its patent challenge in return for a share of the holder's monopoly profits than it can by continuing to attack an invalid patent and bringing a less expensive version of the drug to market before the patent expires.

The FTC's ominous forecast discounts the reality that there usually are many potential challengers to a patent, at least to drug patents. If the patent actually is vulnerable, then presumably other generic companies, which are not bound by the first challenger's reverse payment settlement, will attempt to enter the market and make their own challenges to the patent. Blood in the water can lead to a feeding frenzy. Although a patent holder may be able to escape the jaws of competition by sharing monopoly profits with the first one or two generic challengers, those profits will be eaten away as more and more generic companies enter the waters by filing their own paragraph IV certifications attacking the patent. Cf. Herbert Hovenkamp, Sensible Antitrust Rules for Pharmaceutical Competition, *39 U.S.F. L. Rev. 11, 25 (2004)* ("In a world in which there are numerous firms willing and able to enter the market, an exit payment to one particular **[**48]** infringement defendant need not have significant anticompetitive effects. If there is good reason for believing the patent [is] invalid others will try the same thing.").

In closing, it is worth emphasizing that what the FTC proposes is that we attempt to decide how some other court in some other case at some other time was likely to have resolved some other claim if it had been pursued to judgment. If we did that we would be deciding a patent case within an antitrust case about the settlement of the patent case, a turducken task. Even if we found that prospect palatable, we would be bound to follow the simpler recipe for deciding these cases that is laid out in our existing precedent. As we interpret that precedent, the FTC loses this appeal.

AFFIRMED.

County of San Mateo v. CSL Ltd. (In re Plasma-Derivative Protein Therapies Antitrust Litig.)

Opinion by: ARLANDER KEYS

Opinion

MEMORANDUM OPINION AND ORDER

Pending before the Court are Defendants', CSL Behring, CSL Limited, and CSL Plasma Inc. ("CSL" or "Defendants"), Motion to Compel the Mayo Clinic ("Mayo") to Produce Documents [411] in response to its May 10, 2011 subpoena, Defendants' Motion to Compel Downstream Discovery [425] in both the direct and indirect purchaser actions, and the Direct Purchaser Class Plaintiffs', The University of Utah, Hospital Damas Inc., and Ravi Patel, M.D., Inc. D/b/a Comprehensive Blood and Cancer Center ("Plaintiffs"), Motion for a Protective Order Quashing Subpoenas and Precluding Downstream Discovery [420]. For the reasons set forth below, Defendants' Motion to Compel Mayo Clinic [411] is granted in part and denied in part, Defendants' Motion to Compel Downstream Discovery [425] is denied, **[*8]** and Plaintiffs' Motion for a Protective Order Quashing Subpoenas and Precluding Downstream Discovery [420] is denied.

DISCUSSION

The Court is tasked with deciding the proper scope of discovery in a class action suit pursuant to the Sherman Act. Prior to consolidation of this multidistrict litigation, Mayo Clinic was one of the initial individual plaintiffs that filed a complaint against CSL and other Defendants alleging a conspiracy to restrict the supply of two plasma-derivative protein therapies, immune globulin ("Ig") and albumin, within the United States in violation of *Section 1 of the Sherman Act*. On June 29, 2010, Mayo Clinic filed for voluntarily dismissal, and is now an absent class member. Mayo contends that, as an absent class member, Defendants' Motion to Compel should be denied as legally irrelevant, unduly burdensome, and because CSL has not met its burden of showing entitlement to such discovery.

While absent class members are not required to submit to discovery as a matter of course, the court has the power to authorize the use of discovery procedures under the Federal Rules of Civil Procedure if the court determines that justice to all parties requires that the absent **[*9]** parties furnish certain information and if adequate precautionary measures are taken to insure that the absent class members are not misled. *Brennan v. Midwestern United Life Ins. Co., 450 F.2d, 999, 15 Fed. R. Serv. 2d 351, 13 A.L.R. Fed. 243 (7th cir. 1971)*.

Before ordering discovery from absent class members, the court must be assured that the requested information is actually needed in preparation for trial and that the discovery devices are not used to take unfair advantage of absent class members or as a stratagem to reduce the number of claimants. Moreover, adequate notice must be given to absent class members, so that such persons are fully informed of the discovery order and the possible consequences of their noncompliance. *Id.*

I. Relevance of Subpoenaed Documents

Mayo's first contention against production of the information requested by CSL is that it pertains to "downstream information," or documents and data reflecting a purchaser's use or sale of a product after the purchase. Mayo opines that such information is irrelevant as a matter of law and inadmissable. Plaintiffs cite to *Hanover Shoe v. United Shoe Machinery Corp., 392 U.S. 481, 489, 88 S.Ct. 2224, 20 L.Ed.2d 1231 (1968)* **[*10]** and *Illinois Brick Co. v. Illinois, 431 U.S. 720, 745-46, 97 S.Ct. 2061, 52 L.Ed.2d 707 (1977)* for the proposition that antitrust defendants cannot avoid liability for damages on the grounds that plaintiffs were able to pass-on any additional costs, and a string of district court rulings barring discovery of downstream data as irrelevant given the unavailability of the "pass-on" defense. Mayo concludes that CSL is attempting to rely upon a pass-on defense which courts generally prohibit in price-fixing cases. (Dkt. #419, P's Opp'n at 6-7.)

CSL argues that out of the 33 document requests contained in their subpoena, the majority of the categories sought are entirely unrelated to downstream information. Therefore, Defendants contend that Mayo has no excuse for failing to produce the majority of the categories of requested information. (Dkt. #424, Def.'s Reply at 3.) Moreover, CSL maintains entitlement to the data that is in fact downstream information, asserting that *Hanover Shoe* and *Illinois Brick* have no applicability here because defendants are not seeking the downstream data in order to assert a pass-on defense. Hedging all bets, CSL opines that this MDL proceeding is not limited **[*11]** to the direct purchaser claims, but also those of the putative indirect purchaser class, and "at a minimum, information relating to [Mayo's] downstream sales of Ig and albumin are relevant to the claims in the indirect purchasers action." (Dkt. #424, Def's Reply at 5.)

The Court must first clarify the *direct purchaser vs. indirect purchaser* distinction. This MDL proceeding consists of two parts - a *direct purchaser* class action, which Mayo Clinic's action has been consolidated into, (Consolidated Am. Compl. [Dkt. #222] ¶ 262, *In re Plasma-Derivative Protein Therapies Antitrust Litig.*, 1:09-cv-07666 (N.D. Ill. June 4, 2010)), and an *indirect purchaser* class action (Class Action Compl.[Dkt. #1] ¶¶ 300-01, *County of San Mateo v. CSL Ltd.*, 1:11-cv-01468 (N.D. Ill. Dec 14, 2010)). The named *direct purchaser* class brings a putative class action that purports to comprise any entity or person who bought Ig and/or albumin directly from Defendants during the class period, whereas the putative *indirect purchaser* class purports to comprise any entity or person who bought Ig and/or albumin indirectly from Defendants during the class period. Mayo Clinic remains a member of the putative direct purchaser **[*12]** class on whose behalf this action is being asserted.

Plaintiffs seek to highlight the line distinguishing between the direct purchasers and indirect purchasers, arguing that they are two very different groups, represented by different counsel, and are consolidated herein solely for pretrial purposes by the MDL. (Hr'g Tr.17,Feb. 15, 2012.) However, Defendants opine that the distinction is not as clear, pointing to the fact that the substantive allegations of both groups are identical, there are common questions of fact, and that both the "direct and indirect plaintiffs' complaints are verbatim." (Id. at 17.) Defendants seek to blur the line between the two groups in an effort to solicit downstream information from both. Otherwise, Defendants would generally be prohibited from downstream discovery in a direct purchaser action, yet are able to demand such discovery from an indirect purchaser.

Mayo directs the Court to a plethora of case law in which courts analyzing facts similar to those herein did not permit discovery into downstream data and financial information. *See In re Auto. Refinishing Paint Antitrust Litig., 2006 U.S. Dist. LEXIS 34129, 2006 WL 1479819, at *7-*8 (E.D. Pa. May 26, 2006)* (declining to "depart **[*13]** from the longheld practice of proscribing discovery of downstream data" in a price-fixing case); *see also, e.g., In re Air Cargo Shipping Svcs. Antitrust Litig., 2010 U.S. Dist. LEXIS 125623, 2010 WL 4916723, at *2-*3 (E.D.N.Y. Nov. 24, 2010)*; *Meijer Inc. et al. v. Abbott Labs., 251 F.R.D. 431, 433-36 (N.D. Cal. 2008)*; *In re Aspartame Antitrust Litig., 2008 U.S. Dist. LEXIS 121490, 2008 WL 2275528, at *4 (E.D. Pa. April 8, 2008)*; *In re K-Dur Antitrust Litig., 2007 U.S. Dist. LEXIS 96066, 2007 WL 5302308, at *10-*15 (D.N.J. Jan. 2, 2007)*; *In re Pressure Sensitive Labelstock*

Antitrust Litig., 226 F.R.D. 492, 497-98 (M.D. Pa. 2005) (noting that courts "generally proscribe downstream discovery" in price-fixing cases); *In re Plastics Additives Antitrust Litig., 2004 U.S. Dist. LEXIS 23989, 2004 WL 2743591, at *16 (E.D. Pa. Nov. 29, 2004)* ("courts have refused to require production of downstream data in antitrust price-fixing cases"); *In re Vitamins Antitrust Litig., 198 F.R.D. 296, 298-301 (D.D.C. 2000)*; *In re Folding Cartons Antitrust Litig., No. MDL 250, 1978 U.S. Dist. Lexis 20409, at *4-9 (N.D. Ill. May 5, 1978)* (holding plaintiff's financial data irrelevant to the issue of whether defendants conspired to fix prices).

Notwithstanding the above selection of case law in which courts prohibited downstream **[*14]** discovery, some even despite the actions also involving a related indirect purchaser such as the instant case, Defendants, nonetheless, aver that they have a right to the information as "none of the cases addressed the point that a pass-on defense, while not allowed under federal ***antitrust law***, is permitted under the state laws asserted by the County of San Mateo in the indirect purchaser action. *See, e.g., Clayworth v. Pfizer, Inc., 49 Cal. 4th 758, 111 Cal. Rptr. 3d 666, 233 P.3d 1066, 1086 (Cal. 2010)*; *In re Vitamins Antitrust Litig., 259 F. Supp. 2d 1, 4-8 (D.D.C. 2003)*." (Dkt. #424, Def's Repl, p.5 n.3.) While Defendants may have realized a possible nuance that arguably distinguishes the facts herein from the long-held case law above, it is futile due to Judge Gottschall, on March 23, 2012, recommending that the Judicial Panel on Multidistrict Litigation remand the indirect purchaser action (*County of San Mateo v. CSL Ltd.*, Case No. 11 C 1468) back to the Northern District of California. (*See* Dkt. #446). For the purpose of the ruling on the instant motion, the Court wil assume that Judge Gottschall's recommendation will be followed.

Aside from the now moot point that the MDL proceeding contains both groups, Defendants **[*15]** state that they "laid out several independent reasons the Court should allow downstream discovery in both the direct and indirect actions." (Dkt. #455, Defs.' Response p. 1.) However, the Court found none of the other arguments articulated sufficiently, and only the relevance to the indirect purchaser action to be the most compelling reason to grant such discovery in an antitrust case. Without the indirect purchaser action being consolidated herein, the Court cannot justify going against the long-held precedent of proscribing downstream discovery in antitrust litigation. Thus, due to Judge Gottschall's recommendation of remanding the indirect purchaser action, the Court will not grant Defendants' Motion to Compel Downstream Discovery, and will instead wait for the JPML's ruling on remand. Therefore, Defendants' Motion to Compel Downstream Discovery [425] is denied.

Defendant is correct, however, that a large number of requests contained in the subpoena are not related to downstream discovery whatsoever, and that Mayo should not be allowed to hide behind the possibility of a pass-on defense as a reason to be totally unresponsive to the subpoena. The Court agrees. Plaintiffs' attempt to **[*16]** cast the entirety of the subpoena in a light of downstream information is unavailing. On the other hand, Mayo is correct that many of the requests, as they are currently worded, are too broad in scope and burdensome to produce. However, the Court finds no compelling reason as to why Plaintiffs should not respond to the other, non-downstream categories of requested documents as long as the parameters of production are not unnecessarily broad.

II. Burden of Subpoenaed Documents

Plaintiff asserts that the information Defendants request is unduly burdensome to produce and that therefore, Mayo should not be compelled to produce any further data. (Dkt. #419, P's Opp'n at 8-9.) For example, Mayo points out that subpoenaed request 22 demands "'[a]ll communications with physicians or patients regarding uses or substitutes for Ig/and/or albumin,'" and Mayo contends that "[i]nformation related to each and every use of Ig or albumin since 2003 cannot be derived without a detailed search of individual patient records." (Id. at 8.) Defendants argue that the information sought need not be unduly burdensome, if only Plaintiff would cooperate in efforts to refine the discovery process together. During **[*17]** a meet-and-confer conference call on November 3, 2011, CSL's counsel, "in an effort to explore whether there was any scope for agreement with mayo Clinic on production of a subset of the materials sought by the Subpoena," indicated to Mayo 8 of the 33 requests that CSL sought as a matter of priority. (Dkt. #411, Defs.' Motion at 3) However, Mayo offered only to produce the additional limited set of documents "if CSL would agree to consider Mayo's obligations under the subpoena satisfied with that production." (Dkt. #419, Response, at 5, n.5) The Court agrees that Defendants' subpoena is overly broad, and that discovery into individual patient records poses substantial patient-privacy concerns. However, the Court believes that the parties did not optimally utilize their meet-and-confer opportunities, and that it is possible for the parties to reconvene and possibly devise a mutually agreed upon set of requests for production.

Mayo argues that Defendants' Motion should be denied because Defendants have not moved to compel production of documents by the named Plaintiffs, yet seek them from Mayo, a non-party. (Dkt. #419, Pl.'s Opp'n at 9-12.) Defendants assert that the named Plaintiffs **[*18]** have agreed to produce many of the categories of documents requested, the parties have negotiated search terms to be employed, and "while the University of Utah (one of the named direct purchaser Plaintiffs) recently produced more than 90,000 pages of documents in response to Defendants' requests, Mayo Clinic has refused to produce anything other than the 157 pages of documents it produced to the Federal Trade Commission." (Dkt. #424, Defs.'Reply at 8) The Court finds Mayo's argument misplaced, as the number of pages of documents the named Plaintiffs have produced, or not, is not at all relevant to CSL's motion to compel Mayo Clinic specifically. Mayo argues that CSL is improperly using its subpoena power to target a non-party versus compelling the named Plaintiffs. However, service of subpoenas for documents on third parties is a common and accepted practice, regardless of what other parties are involved. Pursuant to the *Federal Rule of Civil Procedure Rule 45*, a "party can also subpoena a third party to produce materials." (*Rule 45*).

III. Entitlement to Subpoenaed Documents

Finally, Mayo asserts that its status as a non-party warrants consideration in the analysis of the reasonableness **[*19]** of CSL's requests, and relies upon *McPhail v. First Command Financial Planning, Inc., 251 F.R.D. 514, 517 (S.D. Cal. 2008)* to assert that any further discovery by CSL should be denied. *McPhail* requires a party seeking individualized discovery of an absent class member to satisfy four factors: (1) that the discovery is not designed "as a tactic to take undue advantage of the class members or as a stratagem to reduce the number of claimants," (2) the discovery is "necessary," (3) responding to the discovery would not require "the assistance of technical and legal advice,", and (4) the discovery does not seek information already known to the requesting party. (*Id.*) Mayo contends that CSL does not satisfy any of the four *McPhail* factors, while Defendants argue that not only do they meet all of the four factors, but that *McPhail* is distinguishable and inapplicable to an absent class member such as Mayo. The Court agrees with Defendants.

Mayo Clinic is not your garden variety absent class member. Prior to their voluntary dismissal, Mayo Clinic was one of the initial individual plaintiffs that filed a complaint against CSL and other Defendants, which was ultimately consolidated in this MDL. **[*20]** Mayo successfully sought appointment of its chosen counsel as one of the two lead firms representing the putative direct purchaser class in the instant lawsuit, on the basis that Mayo was the individual plaintiff with the most at stake - an "empowered plaintiff" in fact. (Pl.'s Mayo Clinic's Resp. To Appl. To Serve on the Pls.' Steering Comm. [133] 1-2.) Since filing for voluntary dismissal, Mayo attempts to detract from its original active role as a class representative, arguing that "Mayo's prior posture is legally irrelevant to the question whether certain information is relevant or not to a claim by direct purchasers under the Sherman Act." (Dkt. #419, Pl.'s Opp'n at 2.)

While the Court agrees with Mayo that its prior posture in this proceeding indeed is irrelevant to CSL's right to downstream discovery and unduly burdensome document requests, it is, however, instrumental in determining the appropriate limits that the Court will set regarding its discovery. A court should inquire as to whether the information sought from absent class members is available from other sources, and whether the proposed discovery will require class members to obtain personal legal counsel or technical **[*21]** advice from an expert. However, a court's flexibility in this arena is wide-ranging. Where some courts have held that absent class members are not parties for the purpose of discovery by interrogatories, others have permitted limited numbers of interrogatories upon a showing of need, or imposed on defendants the added cost of mailing otherwise permissible interrogatories to absent members of a plaintiff class. (*Manual for Complex Litigation*, Fourth § 21.41 (2011).)

It is clear that deposing absent class members requires a greater justification than written interrogatories, and accordingly, a subpoena solely for documents requires even less justification. Defendants argue that the "cases cited by Mayo Clinic in support of its contention that CSL's *Rule 45* third-party subpoena should be quashed are off-point because those concerned discovery requests, such as interrogatories and requests for admission, that the Federal Rules only permit to be served upon a *party*, rather than non-party subpoenas for documents under *Rule 45*." (Dkt. #424, Defs.'Reply at 9.) The Court agrees that Plaintiffs' reliance on *McPhail* and the like is readily distinguishable and warrants no further analysis of each **[*22]** factor, as *McPhail* sought interrogatories and requests for admission -not documents. Moreover, *McPhail* addressed discovery from absent members of a certified class. In the instant case, the discovery is sought of a "putative but as-yet *uncertified* [emphasis added] class." (Id.) The Court is not convinced by the precedent that Plaintiff relies on, and does not find Mayo's status as an absent class member a compelling reason to shield it from further non-downstream discovery.

The Court is well aware that one of the principal advantages of class actions over massive joinder or consolidation would be lost if all class members were routinely subjected to discovery. However, herein, the Court is assured that the requested information is actually needed in preparation for trial, and that the discovery devices are not used to take unfair advantage of Mayo as an absent class members or as a stratagem to reduce the number of claimants. Therefore, Defendant's Motion to Compel Mayo Clinic [411] is granted in part and denied in part. The Motion is denied as it relates to any requested downstream information, or broad/vague terminology. However, it is granted as to the other non-downstream related **[*23]** categories of requested information. Defendants must remove all requests for downstream information and narrow the other categories of information sought. The Court encourages the parties to again hold a meet-and-confer, and this time to ardently work together in an effort to agree upon production of non-downstream, relevant, and streamlined categories of data that will be helpful in resolving this litigation. In the event that no mutual agreement can be reached, CSL is ordered to modify its requests in a manner that is consistent to what has been advised herein, and resubmit its motion to compel. The modified motion to compel will be considered without prejudice.

Finally, a court must "quash or modify a subpoena if it fails to allow a reasonable time for compliance or subjects the deponent to an undue burden." *CSC Holdings Inc. v. Redisi, 309 F.3d 988, 993 (7th Cir. 2002.)* (citing *Fed.R.Civ.P. 45*.) In deciding whether to grant a motion to quash or modify, a court "must evaluate such factors as timeliness, good cause, utility, and materiality." (*Id.*) (citation omitted) Although Defendants' subpoena warrants redrafting, it is nonetheless timely and brought forward in good faith. Overall, **[*24]** the subpoena seeks relevant and material information. Once modifications are made to remove requests for downstream information and better parameters for information are implemented to control for breadth, CSL's subpoena will be fully enforceable. Therefore, Plaintiffs' Motion for a Protective Order Quashing Subpoenas and Precluding Downstream Discovery [420] is denied.

In conclusion, the Court suggests that the parties again hold a meet-and-confer, and ardently work together in an effort to agree upon production of non-downstream, relevant, and streamlined categories of data that will be helpful in resolving this litigation and not unduly burdensome to produce.

CONCLUSION

For the reasons set forth above, Defendants' Motion to Compel Mayo Clinic [411] is granted in part and denied in part. Defendants' Motion to Compel Downstream Discovery [425] is denied. Lastly, Plaintiffs' Motion for a Protective Order Quashing Subpoenas and Precluding Downstream Discovery [420] is denied.

Judges: JAMES J. BRADY, UNITED STATES DISTRICT JUDGE.

Opinion by: JAMES J. BRADY

Opinion

RULING

This matter is before the Court on motions to dismiss Plaintiff's antitrust and RICO claims filed by various Defendants in this matter as well as cross- motions for summary judgment on the issue of joint venture. In a prior ruling, the Court addressed numerous claims, dismissing some but not others. (Doc. 313). As the Court had allowed Plaintiff CamSoft Data Systems, Inc. ("CamSoft") to amend its Petition again on only its antitrust and RICO claims, the Court did not address those claims at that time. These new allegations are contained in the Third Amended Complaint ("TAC"). CamSoft filed omnibus oppositions in response to the antitrust **[*7]** (doc. 341) and RICO (doc. 342) claims. Defendants filed the their motions and replies individually as follows: Active Solutions, LLC, Brian Fitzpatrick, Henry J. Burkhardt, Ignace A. Perrin III, and Southern Electronics Supply, Inc. ("Southern") (collectively, the "Active-Southern Defendants") (docs. 324, 356); Motorola Solutions Inc. ("Motorola") (doc. 325, no reply); CIBER Inc. ("CIBER") (doc. 326, no reply); MMR Constructors, Inc. ("MMR") (docs. 327, 350); EarthLink, Inc. ("EarthLink") (docs. 328, 347); Donald Berryman and Bill Tolpegin (together with EarthLink, "EarthLink Defendants") (docs. 329, 348); Dell Inc. and Dell Marketing, L.P. ("Dell") (docs. 330, 354); Billy Ridge (doc. 331, no reply); Heather Smith and Steve Reneker (doc. 332, no reply) (together with Dell, "Dell Defendants") and Mark Kurt (doc. 333, no reply), the former director of technology for the City of New Orleans. At the direction of the Court, the parties filed cross-motions for summary judgment on whether a joint venture existed between CamSoft and the Active-Southern Defendants. CamSoft filed several briefs on this subject (docs. 315, 337, 339, 340), as did Active-Southern and the associated individuals **[*8]** (docs. 319, 321, 338, 346, 349, 370). Nearly all other Defendants also filed motions (docs. 317, 320, 322) relating to the potential CamSoft/Active-Southern joint venture.

By this point, many judicial resources have been consumed trying to unravel the New Orleans crime camera project. There have been criminal convictions and civil verdicts handed down against former city employees and technology vendors—many of whom are named in this lawsuit. CamSoft's role in this is either that of a partner of the Active-Southern Defendants who has not had its day in court yet or that of a former subcontractor with limited recourse against the Defendants. What follows is the factual background as it relates to CamSoft. As the parties tell it, CamSoft won favorable press coverage for work it was doing on wi-fi networking in Baton Rouge in 2003. Southern's president, Mr. Fitzgerald, emailed CamSoft's president, Mr. MacDonald, to congratulate him. The two then had a telephone discussion wherein Fitzgerald told MacDonald about a pilot program they were working on for the City of New Orleans ("the city") related to crime cameras. The two discussed ways they might be able to put their heads together—along **[*9]** with other technology vendors, including Active—to make the crime camera system work in New Orleans by incorporating CamSoft's networking abilities in with Southern's camera system. CamSoft was a licensed retailer for TROPOS, a networking hardware company. The alliance they formed will be discussed below, but nothing was reduced to writing. The pilot project was completed—with varying levels of success, depending on which party is telling the story—and the city put out a request for proposals ("RFP") for a large scale implementation of a wireless crime camera network. Southern won the July 19, 2004 contract ("the contract") and CamSoft participated in the implementation, although without a written agreement with Southern—the two sides had been trading subcontractor proposals without agreement. The terms of the contract called for Southern to supply crime cameras to the city on a per camera basis with certain minimum purchase requirements but no concrete commitments. At some point, Southern quietly replaced CamSoft with Dell and Ciber. Later Southern itself was replaced—again quietly—through the machinations of members of the Mayor's Office of Technology ("MOT"). This suit seeks damages **[*10]** against Active and Southern for their role in cutting CamSoft out of the work and also against the other defendants for their role in cutting Southern—and by extension CamSoft—out. As the existence, or lack thereof, of a joint venture could be critical to CamSoft's standing to bring these antitrust and RICO claims, the Court will address the cross motions for summary judgment first.

Joint Venture

A motion for summary judgment should be granted when the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, show that there is no genuine dispute as to any material fact and that the moving party is entitled to a judgment as a matter of law. *Fed. R. Civ. P. 56(a)*. While multiple Defendants have filed motions on the joint venture issue, the Court will focus on CamSoft's and the Active-Southern Defendants' briefs, noting that there are no allegations of a joint venture existing between CamSoft and any of the other Defendants.

In Louisiana joint ventures are fiduciary in nature and are generally governed by partnership law. *Scheffler v. Adams and Reese, LLP, 950 So.2d 641, 648 n. 2 (La. 2007)*. The Louisiana Civil Code defines partnership as "a **[*11]** juridical person, distinct from its partners, created by a contract between two or more persons to combine their efforts or resources in determined proportions and to collaborate at mutual risk for their common profit or commercial benefit." *La. Civ. Code Art. 2801*. The Louisiana First Circuit developed a test in *Cajun Elec. Power Co-op Inc. v. McNamara* that incorporates these principals. *452 So. 2d 212, 215 (La. App. 1 Cir. 1984)*. The Seven elements of the *Cajun Electric* test are as follows:

(1) A contract between two or more persons;
(2) A juridical entity or person is established;
(3) Contribution by all parties of either efforts or resources;
(4) The contribution must be in determinate proportions;
(5) There must be joint effort;
(6) There must be a mutual risk vis-á-vis losses;
(7) There must be a sharing of profits.

The Court notes that this *Cajun Electric* test is the only one formulated after the 1980 revision to the Louisiana Civil Code. And while some Louisiana circuits use older tests, the Court finds that there is no substantial differences between those tests and the *Cajun Electric* test that would change the analysis in this case. The Active Southern Defendants claim CamSoft cannot **[*12]** prove the existence of any of these elements and that there is no joint venture as a result. (Doc. 369 at 19). The Court need not decide whether Southern is correct as to all the elements, as it finds there was no contract to enter a joint venture, the first element. The parties agree that there was a telephone conversation in June 2003 between Mr. MacDonald, CamSoft's president, and Mr. Fitzgerald, Southern's president. During this call, Fitzgerald was interested in a networking project MacDonald was doing in Baton Rouge [1] and told MacDonald about the crime camera project the City of New Orleans was planning. The two discussed how those cameras might run on the network CamSoft was building in Baton Rouge. MacDonald testified in his deposition that during the call "at that time we both agreed to let's work together to see if we can come up with a solution to answer the thousand cameras using the networks that we were building." (Doc. 315-3 at 2). Nothing was

[1] The Baton Rouge project was being performed by Verge, a wholly owned subsidiary of CamSoft. For the sake of clarity, the Court will not distinguish between Verge and CamSoft.

reduced to writing, nor was it fleshed out for specific details. The parties ultimately worked together through the pilot project program, which featured TROPOS wireless antennas. The city subsequently put out a request for proposals **[*13]** ("RFP") for the overall camera project. The question before the Court is whether this conversation constitutes the formation of a contract that binds the parties through not only the pilot project but also the RFP process and ultimately the crime camera program, and beyond to Baton Rouge, and Jacksonville. The Court finds it does not.

While the phone conversation could be enough to form a binding oral agreement, the Court finds the lack of specificity and the subsequent actions of the parties indicate that, at most, the parties agreed to join together for the pilot program but not the subsequent crime camera program. This is borne out by the subsequent actions of the parties. Southern, which won the crime camera contract, and CamSoft began trading contract proposals. Both parties' proposals referred to CamSoft as a subcontractor. And while the determination of the relationship is made based on the facts, not the representations of the parties, the Court wonders why CamSoft would have negotiated at all if it felt **[*14]** it was already in a joint venture relationship with Southern. The proper response to a contract proposal from Southern would seem to have been a statement to the effect of, "Hey, we're partners, remember our agreement?" Nowhere is such a sentiment expressed by CamSoft. The January 30, 2004 email clearly shows CamSoft felt it deserved better due to the work it had done and the value it presented—not because of a contractual relationship. In fact, nowhere in the email does he mention being a joint venture or a partner or anything other than a businessman making a pitch to other business people to use more of his services. The Court finds the depositions, emails, and other documents indicate that CamSoft, as a TROPOS retailer, participated in the pilot program with the hope that it would be involved in future projects relating to this area. All the parties participated in the pilot program in hopes that more work would come from it. The fact that there ultimately was more work—though the city contract— bears this out. CamSoft, however, was not pleased with its new role and complained to Southern. Had there been no RFP process and the scope of work been the same on the crime camera project **[*15]** as on the pilot program, CamSoft would have a stronger argument. However, this was not the case.

The cases CamSoft puts forth are inapposite in that they both involve parties who clearly agreed to form a joint venture and then fought later over the terms. See *Joyner v. Liprie, 44,852 (La. App. 2 Cir. 1/29/10), 33 So. 3d 242*; *Gonzales Man. & Ind. Mach. Works, Inc. v. Hoover, 415 So.2d 359 (La. App. 1 Cir. 1982)*. In the case at bar, it is the contractual formation element is at issue. Had such a contract been formed, these cases would help with the other element so of joint venture.

As the Court finds there was no contract to enter a joint venture, the Court will not address the other elements of joint venture. This is not the say there was no enforceable relationship between CamSoft and the Active-Southern Defendants. Rather, the Court only finds it cannot be based on joint venture.

Antitrust and RICO Standing

Several Defendants allege CamSoft does not have standing to bring its anti-trust and RICO claims and request dismissal under *Rule 12(b)(1)*. The Court will address standing as it relates to the Active and Southern Defendants and the non-Active and Southern Defendants separately.

First, **[*16]** as to the antitrust claims, in order to have standing, a plaintiff must show: (1) injury-in-fact, an injury to the plaintiff proximately caused by the defendant's conduct; (2) antitrust injury; and (3) and proper plaintiff status, which assures that other parties are not better situated to bring suit. *Doctor's Hospital of Jefferson, Inc. v. Southeast Medical Alliance, Inc., 123 F.3d 301, 305 (5th Cir. 1997)*. The Court notes that this standing inquiry should not "become the tail wagging the dog in 'classical' antitrust cases [] by an allegedly excluded competitor." *Id. at 306*. "Another way to explain the standing inquiry is that is ensures the plaintiff's demand for relief ultimately serves the purposes of ***antitrust law*** to increase consumer choice, lower prices and assist competition, not competitors." *Id.* An antitrust injury is an injury "of the type the antitrust laws were intended to prevent and that flows from that which makes the defendant's act unlawful." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*. In assessing whether a party is the proper plaintiff to bring antitrust claims, a court may consider the following factors: 1) the nature of plaintiff's alleged **[*17]** injury; 2) the directness of the injury; 3) the speculative measure of the harm; 4) the risk of duplicative recovery; and 5) the complexity in apportioning damages. *Bell v. Dow Chemical Co., 847 F.2d 1179, 1183 (5th Cir. 1988)*, citing *Associated General Contractors v. Carpenters, 459 U.S. 519, 535 n. 31, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*.

As it relates to the non-Active-Southern Defendants, the Court finds CamSoft is not a proper plaintiff. In making this finding, the Court notes that all of the *Associated General* factors weigh against CamSoft. The injury alleged is interference with the July 19, 2004 contract between Southern and the city. And while this may well be the sort of injury that flows from the alleged antitrust activity, the Court finds the lack of contractual privity between CamSoft and the Active-Southern Defendants renders it too speculative and indirect in nature. It is undisputed that CamSoft was not a signatory to the contract, which was signed by Southern on behalf of Active and Southern. As the Court has found there is not a joint venture between CamSoft and Active and Southern, CamSoft has no connection to the July 19, 2004 contract. Therefore, any injury it may have sustained through interference **[*18]** with the contract is too speculative in nature to provide standing for an antitrust suit. As for CamSoft's allegations of disruption of sales and marketing efforts the Court finds this at least as speculative and indirect as the contract claim. Further, the allowing CamSoft to proceed would open Defendants to the risk of duplicative recovery by every company that has conducted marketing in the relevant markets during that time frame. Finally, apportioning damages under the latter theory would be difficult if not impossible.

Because CamSoft is not a proper party, all federal and state antitrust claims against the non-Active-Southern Defendants are dismissed for lack of standing.

As to the antitrust claims against the Active-Southern Defendants, the Court agrees that CamSoft cannot show an antitrust injury caused by Active-Southern. (Doc. 324-1 at 4). The Court notes the case law from the Fifth Circuit that holds a "downstream firm merely substitutes one supplier for another, there is certainly injury-in-fact" but seldom antitrust injury to that supplier. *Jebaco, Inc. v. Harrah's Operating Co., 587 F.3d 314, 320 (5th Cir. 2009)*. Active-Southern found a new supplier to provide camera equipment **[*19]** under its contract with the city. Nothing about this injured competition in general. To the extent Active-Southern were originally part of a conspiracy to circumvent public bid laws, it seems they themselves were cut out by their conspirators before Active-Southern committed any antitrust violations. The Court finds CamSoft has not alleged an antitrust injury; therefore, it does not have standing to bring the federal and state claims against Active-Southern and they are dismissed.

Next, in order to have standing to bring a RICO claims, a person must "be injured in his business or property by reason of a violation of" *18 U.S.C. § 1962*. *18 U.S.C. § 1964(c)*. The Fifth Circuit requires a RICO plaintiff to show two elements, injury and causation. *Price v. Pinnacle Brands, Inc. 138 F.3d 602, 606 (5th Cir. 1998)*. Speculative damages are not allowed, instead "concrete financial loss" in terms of money is necessary. *Anderson v. Kutak, Rock and Campbell, 51 F.3d 518, 523 (5th Cir. 1995)*. Further, "lost opportunity by itself does not constitute an injury that confers RICO standing." *Id.*

Again, CamSoft alleges its injury is interference with the July 19, 2004 contract. Because of the Court's ruling **[*20]** on joint venture, this is not a concrete injury, CamSoft cannot complain about a contract it was not a part of. As for its lost opportunity claims relating to its good faith marketing efforts, the Court finds again that this is not a concrete injury. The same is true for CamSoft's good faith marketing efforts. Nowhere in the Complaint can the Court find an allegation that CamSoft bid on and would have won a contract were it not for the alleged RICO activities of the Defendants. CamSoft alleges in its brief that it was one of "possibly three" Louisiana TROPOS resellers and that its good faith marketing efforts in Baton Rouge "went nowhere" due to alleged RICO activities and that it was denied the opportunity to bid in other markets. (Doc. 342). Even assuming these allegations are contained in the Complaint—CamSoft was not kind enough to direct the Court to them—the Court finds these are not the kind of concrete injury that is required to have RICO standing.

The same is true of the RICO claims against the Active-Southern Defendants, the injury is not concrete and therefore CamSoft has not satisfied the injury element of the standing analysis. The RICO claims against them are dismissed **[*21]** as well.

As CamSoft does not have standing to bring either antitrust or RICO claims, the Court will not discuss elements of the claims; these claims are dismissed as to all Defendants under *Rule 12(b)(1)*.

For these reasons, Defendants' motiosn for summary judgment (doc. 317, 319, 320, 322) are GRANTED and CamSoft's motion (doc. 315) is DENIED. As the Court finds CamSoft does not have standing to bring antitrust and RICO claims against any of the Defendants, their motions to dismiss (docs. 324, 325, 326, 327, 328, 329, 330, 331, 332) are GRANTED under *Rule 12(b)(1)*. As all of the federal claims have been dismissed, the Court will follow the "general rule" and decline to exercise jurisdiction over the remaining state law claims. *Brookshire Bros. Holding, Inc. v. Dayco Prods., Inc., 554 F.3d 595, 601-02 (5th Cir. 2009)*. The parties are hereby put on notice that the Court intends to remand those claims to the state court in five (5) days. Any opposition (less than two pages) to this must be filed within three (3) days.

Signed in Baton Rouge, Louisiana, on April 30, 2012.

Civil Procedure > Trials > Bench Trials

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > Appeals > Standards of Review > Questions of Fact & Law

HN1[] **Trials, Bench Trials**

When reviewing a bench trial, the standard of review is whether there was competent evidence to support the trial court's findings of fact and whether its conclusions of law were proper in light of the facts. The trial court's conclusions of law are reviewed de novo. Whether probable cause exists is a mixed question of law and fact, but where the facts are admitted or established, the existence of probable cause is a question of law for the court.

Torts > ... > Malicious Prosecution > Elements > General Overview

HN2[] **Malicious Prosecution, Elements**

To prove a claim for malicious prosecution, a plaintiff must establish four elements: (1) the defendant initiated the earlier proceeding; (2) malice on the part of the defendant in doing so; (3) lack of probable cause for the initiation of the earlier proceeding; and (4) termination of the earlier proceeding in favor of the plaintiff.

Torts > Intentional Torts > Malicious Prosecution > Defenses

Torts > ... > Malicious Prosecution > Elements > Malice

Torts > ... > Elements > Lack of Probable Cause > Evidence

HN3[] **Malicious Prosecution, Defenses**

The plain language of *N.C. Gen. Stat. § 58-79-40(c)* is clear that immunity applies in absence of fraud or malice. Although a want of probable cause may not be inferred from malice, the rule is well settled that malice may be inferred from want of probable cause, e.g., as where there was a reckless disregard of the rights of others in proceeding without probable cause.

Evidence > Types of Evidence > Judicial Admissions > General Overview

HN4[] **Types of Evidence, Judicial Admissions**

A stipulation admitting a material fact becomes a judicial admission in a case and eliminates the necessity of submitting an issue in regard thereto to the jury.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

HN5[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

The Noerr-Pennington doctrine immunizes conduct undertaken to influence or petition government bodies from antitrust liability. Attempts to influence the legislative process, even if prompted by an anticompetitive intent, are immune from antitrust liability. This doctrine rests on two grounds: the First Amendment's protection of the right to petition the government, and the recognition that a representative democracy, such as ours, depends upon the ability of the people to make known their views and wishes to the government.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

HN6[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

Noerr-Pennington doctrine applies to citizen communications with police.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN7[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

The Noerr-Pennington doctrine has been recognized in North Carolina and is applicable to cases involving claims under *N.C. Gen. Stat. § 75-1.1*.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN8[] **Deceptive & Unfair Trade Practices, State Regulation**

Chapter 75 of the North Carolina General Statutes was modeled after that federal ***antitrust law***, and federal decisions may provide guidance in determining the scope and meaning of chapter 75.

Opinion

[*213] **[**639]** Appeal by Plaintiff from orders and judgment entered 7 February 2011 by Judge Wayland J. Sermons, Jr. in Superior Court, Wilson County. Heard in the Court of Appeals 8 November 2011.

[640]** McGEE, Judge.

[*214] The North Carolina Farm Bureau Mutual Insurance Company (Plaintiff) filed a complaint on 24 February 2009 against Cully's Motorcross Park, Inc. (Cully's); Laurie Volpe (Ms. Volpe) (together, Defendants); and Louis Volpe (Mr. Volpe). Plaintiff sought declaratory judgment regarding Plaintiff's liability as insurer of real property owned by Defendants and Mr. Volpe. Defendants, along with Mr. Volpe, filed a motion for **[***2]** a change of venue and an answer and counterclaim on 23 March 2009. They asserted claims of breach of contract, unfair claims settlement practices, bad faith, and unfair and deceptive trade practices. [1] Defendants also sought punitive damages. They filed an amended answer and counterclaim on 22 June 2009, adding an additional claim for malicious prosecution.

Mr. Volpe died in the summer of 2010 and, prior to trial, Plaintiff dismissed Mr. Volpe as a party. Following a bench trial, the trial court entered judgment on 7 February 2011. The trial court ordered, *inter alia*, that Ms. Volpe recover the sum of $26,075.00 from Plaintiff for Ms. Volpe's malicious prosecution claim, treble damages in the amount of $30,000.00 for her *Section 75-1.1* claim, and attorney's **[***3]** fees. Plaintiff appeals.

I. Factual Background

The following facts in this case are undisputed. Ms. Volpe was the president and sole shareholder of Cully's, a dirt bike and cart racing track originally based in Florida. Mr. Volpe was the secretary of Cully's. Cully's purchased an historic building (the Building) in Wilson from James Skinner (Mr. Skinner) for $31,500.00 on 19 December 2007. Cully's paid $25,000.00 in cash and executed a purchase money note and deed of trust in the amount of $6,500.00. Plaintiff issued an insurance policy to Cully's, insuring the Building with a policy limit of $60,000.00.

During the late evening of 5 September and early morning hours of 6 September 2008, the Building burned in a fire. A red gas can labeled "Race Fuel" was found, tilted on its side, in a room at the end of a "burn trail" that led from the fire. Cully's owned similar red gas cans. Randall Loftin (Mr. Loftin), an investigator for Plaintiff's Special Investigations Unit, was in charge of investigating Cully's insurance claim related to the Building.

[*215] Both Mr. Volpe and Ms. Volpe provided a recorded statement to Plaintiff on 3 October 2008. In their statements, they each denied knowledge of the **[***4]** fire. Mr. Volpe told Plaintiff's agents that Cully's intended to sell the remnants of the Building to "a Hispanic male for salvage value." Ms. Volpe, on behalf of Cully's, executed a "Sworn Proof of Loss" statement for the damage to the Building. In her proof of loss statement, Ms. Volpe did not indicate that the Building was subject to a mortgage, but she did disclose that Cully's owed $6,500.00 on the Building. At trial, Ms. Volpe testified that "she did not consider a purchase money deed of trust due in one year that did not require monthly payments[] to be a mortgage."

Plaintiff requested that Mr. Volpe and Ms. Volpe submit to examinations under oath. Ms. Volpe complied on 5 January 2009, but Mr. Volpe refused to submit to an examination. Mr. Loftin became convinced that Mr. Volpe and Ms. Volpe were experiencing financial difficulties and had attempted to hide the deed of trust on the Building from Plaintiff. Plaintiff denied Cully's claim on 23 February 2009.

[641]** After Plaintiff filed its complaint, and Defendants and Mr. Volpe filed their answer, Mr. Loftin met with Sergeant J.C. Lucas (Sgt. Lucas) of the Wilson Police Department on 16 April 2009. Mr. Loftin provided Sgt. Lucas with **[***5]** documentation of the sale of the Building for salvage, as well as documentation of the deed of trust in the amount of $6,500.00. Mr. Loftin also informed Sgt. Lucas that Ms. Volpe had sold the Building to Jose Giron (Mr. Giron) without paying off the deed of trust. Sgt. Lucas thereafter met with Mr. Giron, who confirmed that he had purchased the Building.

---

[1] We note that the parties in this case, as well as the trial court, refer to "unfair and deceptive trade practices" claims. Because *N.C. Gen. Stat. § 75-1.1* refers to "unfair or deceptive acts or practices in or affecting commerce[,]" and no longer contains the word "trade," we will refer to Defendants' claims as "*Section 75-1.1* claims." *See* *N.C. Gen. Stat. § 75-1.1* (2011); *see also* *Talbert v. Mauney, 80 N.C. App. 477, 343 S.E.2d 5 (1986)*.

Sgt. Lucas executed a warrant for the arrest of Ms. Volpe for obtaining property by false pretenses, on the ground that Ms. Volpe had allegedly sold the Building to Mr. Giron without paying the $6,500.00 secured by the deed of trust. Ms. Volpe retained an attorney and the charges against her were dismissed on 18 May 2009. Defendants and Mr. Volpe amended their answer and counterclaim on 22 June 2009, adding a claim for malicious prosecution.

The trial court conducted a bench trial during the week of 6 December 2010. Prior to entry of judgment, Plaintiff filed a motion to amend the pleadings and to make additional findings, or in the alternative, for a new trial. The trial court granted Plaintiff's motion to amend the pleadings in order to consider the issue of the *Noerr-Pennington* doctrine. In an order entered 7 February 2011, the trial **[***6]** court concluded that the *Noerr-Pennington* doctrine was inapplicable **[*216]** as a defense. In its judgment, also entered 7 February 2011, the trial court ordered: (1) that Defendants recover nothing from Plaintiff as to Defendants' breach of contract claim; (2) that Defendants recover nothing from Plaintiff as to Defendants' *Section 75-1.1* claim based on Plaintiff's refusal to pay the insurance claim; (3) that Ms. Volpe recover from Plaintiff $26,075.00 for malicious prosecution; and (4) that Ms. Volpe recover from Plaintiff treble damages of $30,000.00 for her *Section 75-1.1* claim arising from the malicious prosecution claim. The trial court also awarded Ms. Volpe attorney's fees in the amount of $29,752.50 and costs in the amount of $2,400.28.

II. Issues on Appeal

Plaintiff raises the following issues on appeal: (1) whether the trial court erred by determining that Plaintiff initiated criminal proceedings against Ms. Volpe; (2) whether the trial court erred by finding probable cause lacking to charge Ms. Volpe with obtaining property by false pretenses; (3) whether Plaintiff was entitled to immunity under *N.C. Gen. Stat. § 58-79-40*; (4) whether the trial court erred by entering judgment in **[***7]** favor of Ms. Volpe as to her *Section 75-1.1* claim; (5) whether the *Noerr-Pennington* doctrine immunized Plaintiff from a *Section 75-1.1* claim; (6) whether the trial court erred in awarding Ms. Volpe damages for both her *Section 75-1.1* claim and her malicious prosecution claim; and (7) whether the trial court erred in granting Ms. Volpe attorney's fees under *N.C. Gen. Stat. § 75-16.1*.

III. Standards of Review

HN1[] When reviewing a bench trial, the standard of review is "'whether there was competent evidence to support [the trial court's] findings of fact and whether its conclusions of law were proper in light of the facts.'" *City of Wilmington v. Hill, 189 N.C. App. 173, 175, 657 S.E.2d 670, 671-72 (2008)* (citation and alteration omitted). "The trial court's conclusions of law are reviewed *de novo.*" *Id. at 176, 657 S.E.2d at 672*. "Whether probable cause exists is a mixed question of law and fact, but where the facts are admitted or established, the existence of probable cause is a question of law for the court." *Best v. Duke University, 337 N.C. 742, 750, 448 S.E.2d 506, 510 (1994)*.

IV. Malicious Prosecution

> ***HN2***[] "To prove a claim for malicious prosecution, a plaintiff must establish four elements: **[***8]** (1) the defendant initiated the earlier proceeding; (2) malice on the part of the defendant in doing so; (3) lack of probable cause for the initiation of the earlier proceeding; **[*217]** and (4) termination of the earlier proceeding in favor of the plaintiff."

Kirschbaum v. McLaurin Parking Co., 188 N.C. App. 782, 789, 656 S.E.2d 683, 687-88 (2008) (citation omitted).

[642]** a. Initiation

Plaintiff first argues that it did not initiate the criminal proceedings against Ms. Volpe. Plaintiff argues that "[b]y merely giving honest assistance and information to law-enforcement, [Plaintiff] did not initiate the criminal proceeding against [Ms.] Volpe." Plaintiff contends that the trial court's findings of fact did not support its conclusions of law. Plaintiff challenges the following findings of fact by the trial court:

> 44. That Plaintiff instituted or caused to be instituted a criminal proceeding[] without probable cause, said criminal proceeding being Wilson County criminal case number 09 CR 52084, charging [Ms.] Volpe with Obtaining Property with False Pretenses.
> 45. That Plaintiff instituted or caused to be instituted said criminal proceedings against [Ms.] Volpe with malice.
> . . . .
>
> 61. That Plaintiff did **[***9]** cause to be instituted a criminal proceeding against [Ms.] Volpe, when it had full knowledge of the debt owed [Mr.] Skinner upon the [Building], by being told of the same by [Ms.] Volpe in her recorded statement on October 3, 2008, and further with full knowledge that [Mr.] Loftin, the investigator for the Plaintiff, had been told that the property had been sold to someone else, as early as October 3rd, 2008,and further was present at the October 3, 2008 statements given to the Plaintiff concerning the debt and the fact that the structure had been sold to a Hispanic male for salvage value, but did not release or pursue this information to Detective Lucas or any other officer of the Wilson Police Department until April 2009, after a counter claim had been filed by [Ms.] Volpe and Cully's Motorcross Park Inc against Plaintiff.
>
> 62. That the acts of the Plaintiff in providing all such information, which does not amount to a crime, to Detective J.C. Lucas, an experienced officer but unfamiliar with fire investigations, were designed to achieve leverage in this action, and the [c]ourt specifically finds that it was highly unlikely that **[*218]** Detective Lucas would have ever known about all the circumstances **[***10]** concerning the debt to [Mr.] Skinner and the sale to [Mr.] Giron, and further never have pursued criminal charges based upon that evidence, without the instigation of Plaintiff through [Mr.] Loftin.

Plaintiff also cites the following findings of fact:

> 34. That on or about April 16, 2009, [Mr.] Loftin met with Detective J.C. Lucas of the Wilson Police Department, at the Wilson Farm Bureau office, at Loftin's request. Detective Lucas had been out on sick leave for a number of months and was just returning to the case. Detective Lucas was mainly a sex offense investigator and this was his second fire case. Loftin provided Lucas with the real estate documents showing the $6,500 debt and the deed to Giron.
> 35. That Loftin informed Lucas of the conveyance of the property to Mr. Giron and the failure of [Ms.] Volpe to pay off the $6500 owed Mr. James Skinner pursuant to the terms of the deed of trust.

Plaintiff argues that findings of fact 34 and 35 "amount to nothing more than merely providing honest assistance and information, which is insufficient to establish initiation."

Plaintiff's argument that it did not initiate the criminal proceedings against Ms. Volpe relies on *Harris v. Barham, 35 N.C. App. 13, 239 S.E.2d 717 (1978)* **[***11]** and *Shillington v. K-Mart Corp., 102 N.C. App. 187, 402 S.E.2d 155 (1991)*. In *Harris*, this Court held that the trial court had properly granted summary judgment in favor of the defendant on the following facts. A person using the plaintiff's name had opened a bank account and had written several checks which had been returned for insufficient funds. *Harris, 35 N.C. App. at 14, 239 S.E.2d at 718*. Raleigh police officers contacted the bank where the account had been opened, inquired about the account, and asked an officer of the bank, Mr. Mangum, to notify police officers if a person with the plaintiff's name came to the bank. *Id.* The plaintiff entered the bank to obtain traveler's checks, for which he paid cash. *Id. at 15, 239 S.E.2d at 718*. Mr. Mangum approached the plaintiff, asked his name, and requested that the plaintiff accompany him to a side room where he had the **[**643]** plaintiff write out his signature several times. *Id. at 15, 239 S.E.2d at 718-19*. Mr. Mangum informed the plaintiff of the account and the checks written thereon, and the plaintiff denied opening the account. *Id. at 15, 239 S.E.2d at 718*.

[*219] The plaintiff was detained by police officers after the bank notified them of the **[***12]** plaintiff's presence. *Id. at 15, 239 S.E.2d at 719*. This Court held there was insufficient evidence that the bank, or its agents, had initiated the proceedings against the plaintiff, citing the following facts:

> It is undisputed that neither [Mr.] Mangum nor any other employee of the Bank ever signed any warrant or otherwise directly instituted any criminal proceeding against the plaintiff, nor did they procure anyone else to do so. Neither [Mr.] Mangum nor any other employee appeared at the preliminary hearing or before the grand jury. Indeed, the entire extent of [Mr.] Mangum's or the Bank's participation in this matter was to notify the police, as

> [Mr.] Mangum had been requested by them to do, when a person named George Harris came into the Bank. This he did only after information given him by the police and his own investigation indicated that someone using that name had perpetrated a fraud. This falls short of being the participation in a criminal prosecution required to establish the first element of a valid claim for malicious prosecution.

Id. at 16, 239 S.E.2d at 719. This Court concluded that the bank had merely given honest assistance to the police officers and reiterated that **[***13]** "'[m]erely giving honest assistance and information to prosecuting authorities . . . does not render one liable as a co-prosecutor.'" *Id.* (citation omitted).

In *Shillington*, this Court held that there was insufficient evidence of initiation, when the arresting "[o]fficer . . . testified that he and his supervisor decided to arrest plaintiff based on the information they received from defendant, but defendant's agents neither directed that they do so nor did defendant's agents press charges themselves, nor did they appear at the magistrate's office at any time." *Shillington, 102 N.C. App. at 196, 402 S.E.2d at 160*. The Court noted that the "[o]fficer . . . testified that he also considered the fact that plaintiff had entered an area he had been warned to stay out of." *Id.* The plaintiff in *Shillington* had been wandering around near a K-Mart store that had recently suffered tornado damage. *Id. at 191, 402 S.E.2d at 157*. The plaintiff worked near the K-Mart store and there was uncertainty as to whether the plaintiff had actually crossed onto K-Mart property when he was arrested. *Id.*

[*220] In the present case, Plaintiff contends that Sgt. Lucas initiated the criminal proceedings on his own accord. **[***14]** In support of this argument, Plaintiff cites the Restatement Second of Torts:

> When a private person gives to a prosecuting officer information that he believes to be true, and the officer in the exercise of his uncontrolled discretion initiates criminal proceedings based upon that information, the informer is not liable [for malicious prosecution] even though the information proves to be false and his belief was one that a reasonable man would not entertain. The exercise of the officer's discretion makes the initiation of the prosecution his own and protects from liability the person whose information or accusation has led the officer to initiate the proceedings.

Restatement (Second) of Torts § 653 cmt. g (1977). Plaintiff also argues that, when asked at trial whether Mr. Loftin or Plaintiff had initiated the criminal proceeding against Ms. Volpe, Sgt. Lucas gave the following answer: "No, no. . . . I have probable cause. I felt like I could win this case in court, and I wanted to go forward with it. That was my decision, my decision only." Plaintiff argues that "Sgt. Lucas's uncontroverted testimony establishes that the trial court erred in finding that [Mr.] Loftin's 'investigation' **[***15]** brought about the criminal charge."

In support of their counter-argument, Defendants cite *Williams v. Kuppenheimer Manufacturing Co., 105 N.C. App. 198, 412 S.E.2d 897 (1992)*. Citing *Williams*, Defendants argue that "where 'it is unlikely there would have been a criminal prosecution of [a] plaintiff' except for the efforts of a defendant, this Court has held a genuine issue of fact **[**644]** existed and the jury should consider the facts comprising the first element of malicious prosecution." In *Williams*, the plaintiff was a retail employee of the defendant company and had resigned after being confronted with a number of suspicious sales receipts. *Id. at 198-99, 412 S.E.2d at 898-99*. The plaintiff denied any wrongdoing, but an agent of the defendant company contacted the Charlotte Police Department and "turned over the evidence which [the agent] had compiled against plaintiff." *Id. at 199, 412 S.E.2d at 899*. This Court also noted the following facts:

> According to testimony of law enforcement officials, they relied on the evidence compiled by [the plaintiff's supervisor]. In the course of their investigation, law enforcement officials reviewed the materials provided by [the plaintiff's supervisor] **[***16]** and the only witnesses that Detective Job, the investigator for **[*221]** the Police Department, contacted were the three people she talked to by telephone whose names had been furnished by [the plaintiff's supervisor] as being persons who had alterations performed on garments purchased that had been voided.

Id. This Court held that there was sufficient evidence of initiation to submit the question to the jury, conducting the following analysis:

> Defendant brought all the documents used in the prosecution to the police. As discussed earlier, these documents included the eleven suspicious void sales, the three suspicious alteration tickets, and the names and addresses of witnesses to be contacted. From the record it appears the only additional investigation undertaken by the authorities was to contact the three individuals who had suspicious alterations performed. Law enforcement officials never interviewed other customers, store employees or plaintiff prior to the time of his arrest. Except for the efforts of defendant, it is unlikely there would have been a criminal prosecution of plaintiff. Under these circumstances, the trial court was correct in determining this was a factual matter for the **[***17]** jury.

Id. at 201, 412 S.E.2d at 900.

We find *Williams* more analogous to the facts before us. Mr. Loftin had all of the information he provided to Sgt. Lucas as early as 3 October 2008. On 16 April 2009, after Defendants' counterclaim was filed, Mr. Loftin called Sgt. Lucas and set up a meeting at which Mr. Loftin informed Sgt. Lucas of Ms. Volpe's actions. Sgt. Lucas thereafter interviewed Mr. Giron, and Ms. Volpe was then arrested. We find competent evidence in the record to support the trial court's determination that Plaintiff initiated the proceedings against Ms. Volpe on the grounds that: "Except for the efforts of [Plaintiff], it is unlikely there would have been a criminal prosecution of [Ms. Volpe]. Under these circumstances, the trial court was correct in determining this was a factual matter[.]" *Id. at 201, 412 S.E.2d at 900*. Thus, on the facts before us, we are not persuaded that the trial court erred in determining that Plaintiff initiated the proceedings against Ms. Volpe.

b. Probable Cause

Plaintiff also argues that "the trial court erred by finding probable cause lacking to criminally charge [Ms.] Volpe with obtaining property by false pretenses." Plaintiff contends that **[***18]** "[t]he test for determining probable cause in a claim for malicious prosecution . . . **[*222]** is whether a reasonable man of ordinary prudence and intelligence would have believed there was probable cause, not whether a crime was in fact committed."

At trial, Mr. Loftin was asked during direct examination what crime he suspected Ms. Volpe of committing. Mr. Loftin testified that he thought "she had committed insurance fraud in an attempt, material misrepresentation with an attempt to hide the fact that there was a $6,500 payment that was due on this house with a deed of trust involved." However, the trial court found that Plaintiff "had been told as early as [Ms.] Volpe's statement on September 8, 2008, that [Defendants] owed $6,500 on the property." We conclude that there was competent evidence in the record for the trial court to conclude that a reasonable person would not have believed Ms. Volpe was hiding information that she had already provided to Plaintiff. In light of the testimony at trial, and the findings of fact made by the trial court, we find no error in the trial court's finding that probable cause was lacking.

[645]** V. Immunity Pursuant to N.C. Gen. Stat. § 58-79-40

Plaintiff argues **[***19]** that the trial court erred in failing to find, pursuant to *N.C. Gen. Stat. § 58-79-40*, that Plaintiff was immune from civil liability. *N.C. Gen. Stat. § 58-79-40(c)* (2011) provides in pertinent part:

> In the absence of fraud or malice, no insurance company (or insurance agency), or person who furnishes information on its behalf, shall be liable for damages in a civil action or subject to criminal prosecution for any oral or written statement made or any other action that is necessary to supply information required pursuant to this section.

Plaintiff contends that, in the absence of malice or fraud, it cannot be held liable for its own, or its agent's, conduct in providing information that the police requested.

Plaintiff asserts that: "All information provided by [Plaintiff] to the Wilson Police Department was supplied in accordance with [Plaintiff's] obligations under *N.C. Gen. Stat. § 58-79-40*." Plaintiff also argues that the "record is void of any allegation or evidence of fraud." Plaintiff next contends that, in order to overcome *N.C.G.S. § 58-79-40* immunity, Defendants were required to show that Plaintiff acted with "actual malice[.]" Specifically, Plaintiff contends that "[a] holding **[***20]** that anything less than actual malice can overcome the immunity provided by *§ 58-79-40(c)* would not only conflict with the common law **[*223]** privilege, but would improperly frustrate the legislative intent behind enactment of the statute."

Plaintiff argues that "[t]he record is void of any evidence that [Plaintiff] acted with actual malice when it provided truthful information relevant to an incendiary fire, information it was statutorily obligated to provide[.]" Citing *Dobson v. Harris, 352 N.C. 77, 86, 530 S.E.2d 829, 837 (2000)*, Plaintiff contends that "[a]ctual malice requires proof of ill-will or personal hostility, or a showing that the declarant published a statement with knowledge that it was false[.]"

However, we can find no cases interpreting *N.C.G.S. § 58-79-40(c)* that require "actual malice." ***HN3***[] The plain language of the statute is clear that immunity applies "in absence of fraud or malice[.]" *N.C.G.S. § 58-79-40(c)*. In the present case, the trial court found that Mr. Lofton acted without probable cause. "Although a want of probable cause may not be inferred from malice, the rule is well settled that malice may be inferred from want of probable cause, *e.g.*, as where there was a reckless **[***21]** disregard of the rights of others in proceeding without probable cause." *Cook v. Lanier, 267 N.C. 166, 170, 147 S.E.2d 910, 914 (1966)*; *see also* *Dickerson v. Refining Co., 201 N.C. 90, 96, 159 S.E. 446, 450 (1931)* ("Malice, in the sense in which it is used in actions for malicious prosecutions . . . is inferable from the absence of probable cause."). We therefore find Plaintiff's argument to be without merit.

VI. Ms. Volpe's *Section 75-1.1* Claim

Plaintiff next argues that the trial court erred by entering judgment for Ms. Volpe as to her counterclaim under *Section 75-1.1* because the claim was premised on the malicious prosecution claim. As we have held that the trial court did not err with respect to Ms. Volpe's malicious prosecution claim, Plaintiff's argument is without merit. Plaintiff also asserts that the acts which the trial court determined were unfair or deceptive were not "in or affecting commerce." Plaintiff contends that Mr. Lofton did not engage in commerce by merely reporting Ms. Volpe's conduct to the police. Defendants contend that Plaintiff stipulated to the actions as being involved in commerce. Plaintiff counters this argument by contending that it stipulated only to **[***22]** the business of insurance affecting commerce, and not to the alleged malicious prosecution affecting commerce.

The trial court held a conference with the parties to establish the issues the trial court would resolve. During the conference, the trial court enumerated each element of each claim brought by the parties, **[*224]** and determined whether the elements would be listed among the issues to be determined by the trial court. When the trial court reached the issue of the *Section 75-1.1* claim, the following exchange occurred:

> **[**646]** [THE COURT:] 5. Did Farm Bureau participate in unfair and deceptive acts in the malicious prosecution of Laurie Volpe. We talked about that, and I think that that is allowable under the unfair trade practices. Now, what say[] you, Mr. Salsman [(Plaintiff's Counsel)]?
>
> MR. SALSMAN: Your Honor, our position would be that that's a claim that belongs to Laurie Volpe. There's been no evidence that Cully's, the corporation, had any involvement in the alleged malicious prosecution, certainly no evidence that Cully's was ever harmed in any way by any alleged malicious prosecution of Laurie Volpe by Farm Bureau.
>
> . . . .
>
> THE COURT: So in this particular request for special instructions **[***23]** or special issues, can you — how does the malicious prosecution of Laurie Volpe enter into the benefit of or claim by corporation?
>
> I can see how we would — I guess if we couch this in the terms of did Farm Bureau — as to the claim of Laurie Volpe for unfair trade practice, is the malicious prosecution of Laurie Volpe an unfair trade practice, but not as to the corporation.
>
> MR. HEMMINGS [(Defendant's Counsel)]: Well, it happened during the claim process that the corporation was making.
>
> . . . .
>
> MR. SALSMAN: In order to submit — one of the elements, and I'm jumping a little ahead on this first issue still is that damages were proximate in cause. There was absolutely no evidence put on that Cully's suffered any damages proximately caused by the alleged malicious prosecution of Laurie Volpe.

She talked about how she personally suffered harm, but there's no evidence to show that Cully's suffered any harm as a result of the criminal prosecution of Laurie Volpe. So I just — I don't think there's any damages proximately caused to Cully's as a result of that alleged conduct.

[*225] THE COURT: Well, obviously we're just talking about now the special interrogatories as to the actions. The unreasonable refusal **[***24]** — without conducting a reasonable investigation could have nearly benefit Cully's thereby making number 3 appropriate. So if perhaps since we have a claim by corporation and a claim by Laurie Volpe for unfair deceptive trade practices, we will have to consider them separately. They're separately made in separately filed answers. I don't see why we wouldn't separate them out then if we have this issue of problems of —

MR. SALSMAN: Your Honor, we think that's important when we — if you were to find some unfair and deceptive trade practices and figure out what damages might be attributed to that. If it was because of the malicious prosecution, I think the damages are perhaps much more limited for that, so I think it's important to separate out.

THE COURT: I'm going to separate out the damages — I mean separate out the claims, so I'm going to do a claim for unfair deceptive for the corporation. I'm going to use number 1 without conducting a reasonable investigation.

And I don't have any other grounds — do you have any additional grounds that you would like for me to submit as a basis for question of fact on for the corporation other than without conducting a reasonable investigation understanding **[***25]** that the other three that you suggested I've already indicated I will not give?

MR. HEMMINGS: No.

THE COURT: Then I'm only going to give number 1.

Sticking with the corporation, second issue will be: Was it in commerce or did it affect commerce? Will the Plaintiff[] stipulate that insurance is commerce?

MR. SALSMAN: Yes, Your Honor, and we in fact admitted that in our answer.

THE COURT: I will not consider that.

Number 3, I will consider was any conduct the proximate cause of any injuries that may have been given for Cully's.

And then number 4, what amount, if any, has Cully's been injured.

[*226] Thus, the trial court determined that the element of whether a course of conduct was "in or affecting commerce" was stipulated by **[**647]** Plaintiff as to the *Section 75-1.1* claim brought by Cully's. The trial court then addressed the *Section 75-1.1* claim brought by Ms. Volpe:

And then going back to the unfair and deceptive trade practices claim for Laurie Volpe, I'm going to give number 1 without conducting a reasonable investigation, and number 5, did they participate in unfair and deceptive acts. Second issue I'm going to not consider, having been stipulated.

The "second issue" with respect to Cully's was the determination **[***26]** of whether insurance was commerce. With respect to Ms. Volpe, the determination would have been whether Plaintiff's malicious prosecution was "in or affected commerce." However, the trial court clearly stated: "I'm not going to consider [that issue], having been stipulated." Immediately following the above-quoted material, the trial court moved on to the remaining issues. At no point did Plaintiff object to the trial court's statement that Plaintiff stipulated to the "second issue" as to Ms. Volpe; i.e. whether Plaintiff's actions giving rise to Ms. Volpe's *Section 75-1.1* claim were in or affecting commerce. The trial court also a provided a final summary of the issues as follows:

THE COURT: All right. Let me try to restate then the Defendant's contested issues then. All right.

. . . .

Number 2 — I mean number 3. Excuse me. Before number 3, label this Unfair and Deceptive Trade Practices.

Number 3. Did Farm Bureau refuse to pay the claim submitted by Cully's Motorcross Park, Inc. without conducting a reasonable investigation based upon all available information?

Number 4. Was Farm Bureau's conduct — well, strike. Go back and eliminate Laurie Volpe from that question so it just reads — so **[***27]** it just reads Cully's Motorcross Park, Inc.

> Number 4 then would be, was Farm Bureau's conduct a proximate cause of Cully's Motorcross Park, Inc.'s injuries?
> Number 5 will read, what amount of damages, if any, were sustained by Cully's Motorcross Park, Inc.?
>
> **[*227]** Next issue. Did Farm Bureau refuse to pay the claim submitted by Laurie Volpe without conducting a reasonable investigation based upon all available information?
> Next issue. Did Farm Bureau participate in an unfair and deceptive act in the malicious prosecution of Laurie Volpe?
> Number next. Was Farm Bureau's conduct a proximate cause of Laurie Volpe's injuries?
> Number 6. What amount, if any, has Laurie Volpe been injured?
> . . . .
> Comments on those, Mr. Salsman?
> MR. SALSMAN: No, sir.
> THE COURT: Mr. Hemmings. Other than the objections that you made for failure to give punitive damages and failure to give your other contentions of unfair and deceptive trade practices which are preserved for appellate review.
> MR. HEMMINGS: Just wanted to make sure four elements and you asked that we stipulate to the fourth one.
>
> THE COURT: Yeah. I did not include the elements that we've already stipulated to and the facts that would have been established, four are **[***28]** in commerce. I think everybody stipulates the insurance already had. And the last one on malicious prosecution, the claim was clearly dismissed. That's not an issue of fact that I would submit to a jury. I would instruct them summarily on that.
> . . . .
> All right. Anything else from the Plaintiff in regards to the issues or the jury instructions or applicable law that I'm going to consider that we haven't talked about?
> MR. SALSMAN: No, sir.
> THE COURT: Thank you very much. Anything else for the Defendant other than to note your objections to the requested instructions or issues that I have indicated I will not give, anything other than those?
> MR. HEMMINGS: No, sir.

[648]** **[*228]** Reviewing this colloquy, it is clear that, during the discussion establishing the issues to be decided by the trial court, Plaintiff was given the opportunity to address the *Section 75-1.1* claim. When setting forth this issue, the trial court was clear that Ms. Volpe's *Section 75-1.1* claim arose from the malicious prosecution. Regarding the second element of the claim, Plaintiff was asked: "Was it in commerce or did it affect commerce? Will the Plaintiff[] stipulate that insurance is commerce?" Plaintiff clearly stipulated to this **[***29]** second element, and the trial court concluded that it would not address the second element with respect to Cully's.

While we acknowledge that the specific language of the stipulation was "insurance is commerce[,]" it is clear from the colloquy quoted above that Plaintiff was aware the trial court was discussing the element of "affecting commerce" with respect to Ms. Volpe's *Section 75-1.1* claim. Because Plaintiff failed to object to the trial court's statement that Plaintiff stipulated to the fact, Plaintiff allowed the trial court to determine all issues as discussed during the colloquy, and did not require the trial court to determine whether Ms. Volpe's *Section 75-1.1* claim involved actions "in or affecting commerce."

This situation is analogous to those circumstances arising when a plaintiff fails to request specific jury instructions or fails to object to instructions provided. We therefore agree with Defendants that, on the facts arising from the transcript, Plaintiff stipulated to this element and is bound by that stipulation. *See* *Crowder v. Jenkins, 11 N.C. App. 57, 62, 180 S.E.2d 482, 485 (1971)* (***HN4***[ ]) "[A] stipulation admitting a material fact becomes a judicial admission in a case **[***30]** and eliminates the necessity of submitting an issue in regard thereto to the jury.").

Plaintiff further argues that, because the trial court found Ms. Volpe's counterclaims to be frivolous and malicious, she was not entitled to recover under *Section 75-1.1*. Plaintiff asserts that, because the trial court concluded that Plaintiff was not liable for breach of contract with respect to the fire policy on the Building, Ms. Volpe did not suffer any damage as a result of Plaintiff's unfair and deceptive act in seeking to gain leverage in the lawsuit. However, we note that the trial court found that Ms. Volpe had "sustained damages in the amount of $10,000.00 as a result of such unfair trade practices of Plaintiff." Plaintiff contends this finding of fact was unsupported by the evidence.

[*229] However, there is ample evidence in the transcript and the record concerning the legal fees and other costs that Ms. Volpe incurred from her arrest and malicious prosecution. Plaintiff's argument would require us to hold that, because the unfair and deceptive act was intended to "gain leverage in the civil action," the only damages the trial court should have considered would have been those that Ms. Volpe suffered **[***31]** as a result of Plaintiff's having gained such leverage. In other words, because Ms. Volpe did not prevail in her breach of contract counterclaim against Plaintiff, she suffered no damages for the purposes of the *Section 75-1.1* claim. However, Plaintiff cites no authority in support of this argument. We hold that the trial court was correct in concluding that Plaintiff, by engaging in the unfair and deceptive act of malicious prosecution in order to gain leverage in the civil action, caused Ms. Volpe to suffer damages in the form of legal fees and other costs deriving from her prosecution.

VII. The *Noerr-Pennington* Doctrine

Plaintiff next argues that the trial court erroneously found the *Noerr-Pennington* doctrine inapplicable to the present case. ***HN5***[] The *Noerr-Pennington* doctrine immunizes conduct undertaken to influence or petition government bodies from antitrust liability:

> In *Noerr* and *Pennington*, the Supreme Court held that attempts to influence the legislative process, even if prompted by an anticompetitive intent, are immune from antitrust liability. This doctrine rests on two grounds: the *First Amendment's* protection of the right to petition the government, and the recognition that **[***32]** a representative democracy, such as ours, depends upon the ability of the people to make known their views and wishes to the government.

[649]** *Potters Medical Center v. City Hosp. Ass'n, 800 F.2d 568, 578 (6th Cir., 1986)*. Citing *Forro Precision, Inc. v. Intern. Business Machines, 673 F.2d 1045 (9th Cir. 1982)*, Plaintiff argues that providing information to the police triggers the *Noerr-Pennington* doctrine.

In *Forro*, the plaintiff company (Forro) had its business searched by police officers who were "accompanied by and aided in the search by employees" of the defendant company (IBM). *Forro, 673 F.2d at 1049*. "Forro brought suit against IBM on the basis of its participation in the search[.]" *Id.* The claims were eventually limited to whether "IBM had intentionally interfered with prospective business advantage under California law and had monopolized and attempted to monopolize in violation of *section 2* of the Sherman Act." *Id.* IBM **[*230]** asserted "a counterclaim under California law that Forro had misappropriated its trade secrets." *Id.* The jury returned a verdict in favor of Forro as to its "intentional interference claim and awarded actual damages in the amount of $2,739,010." *Id.* The jury also "found **[***33]** in favor of IBM on the misappropriation claim and awarded actual damages in the sum of $260,777, but deadlocked on the antitrust claims and on both parties' claims for punitive damages." *Id.*

The police involvement in *Forro* arose from IBM's cooperation with police agents in an effort to "discourage trade secret thievery." *Id. at 1051*. The cooperation resulted in a widely publicized search of Forro's place of business which caused Forro to "incur[] out-of-pocket expenses in the amount of $79,000 as a result of the search, and allegedly suffer[] further losses in sales and profits as a result of the adverse publicity." *Id.* The police operation resulted in ten indictments, none of which was "sought against Forro or any of its employees or principals." *Id.*

On appeal, the Ninth Circuit Court of Appeals reviewed, *inter alia*, the Sherman Act antitrust claims. The Ninth Circuit conducted the following discussion of whether IBM's involvement with the police warranted the application of the *Noerr-Pennington* doctrine:

> We do not liken an approach to the police for aid in apprehending wrongdoers to political activity. However, we think that the public policies served by ensuring the free flow of information **[***34]** to the police, although somewhat different from those served by *Noerr-Pennington*, are equally strong. Encouraging citizen communication with police does not generally promote the free exchange of ideas, nor does it provide citizens with the opportunity to influence policy decisions. Nonetheless, it would be difficult indeed for law enforcement

> authorities to discharge their duties if citizens were in any way discouraged from providing information. We therefore hold that the ***HN6***[] *Noerr-Pennington* doctrine applies to citizen communications with police.

Id. at 1060 (citation omitted). We note, however, that the underlying cause of action to which the Ninth Circuit held *Noerr-Pennington* applicable was Forro's claim of an attempted "violation of the Sherman Act's proscription of monopolization [which] must establish three things: (1) possession of monopoly power in the relevant market; (2) willful acquisition or maintenance of that power; and (3) causal 'antitrust' injury." *Id. at 1058* (citation omitted).

[*231] In the present case, the trial court's order making additional findings and conclusions of law in response to Plaintiff's *Noerr-Pennington* argument contains the following conclusion of law:

> Defendant's **[***35]** reliance upon *Forro Precision, Inc. v. International Business Machines Inc., 673 F. 2d 1045 (9th circuit 1982)* and *Ottensmeyer vs. Chesapeake and Potomac Telephone Company of Maryland 756 F. 2d 986 (1985)* is misplaced and the [c]ourt distinguishes each case from the factual situation present herein. Those cases dealt with claims of intentional interference with prospective business advantage, and antitrust claims in Forro, and Sherman Act issues regarding telephone service in the state of Maryland, both issues of wide spread commercial interest and protection of the public at large from monopolization and unfair business practices to the community **[**650]** as a whole. The Court distinguishes those cases from the facts herein, which deal with a single fire insurance policy claim affecting only the Plaintiff and Defendants.

HN7[] The *Noerr-Pennington* doctrine has been recognized in North Carolina in *Good Hope Hosp., Inc. v. N.C. Dep't of Health & Human Servs., 174 N.C. App. 266, 275, 620 S.E.2d 873, 881 (2005)* ("We hold that *Noerr* applies in the state courts of North Carolina."). This Court has also held it is applicable to cases involving claims under *N.C. Gen. Stat. § 75-1.1*. *See* *Reichhold Chems., Inc. v. Goel, 146 N.C. App. 137, 156, 555 S.E.2d 281, 293 (2001)* **[***36]** ("We therefore hold that the reasoning of *Noerr* and *PRE* apply to *N.C.G.S. § 75-1.1*.").

"This Court has noted that***HN8***[] Chapter 75 of the North Carolina General Statutes was modeled after that federal ***antitrust law***, and that federal decisions may 'provide guidance in determining the scope and meaning of chapter 75.'" *Reichhold, 146 N.C. App. at 156, 555 S.E.2d at 293* (citation omitted). In *Reichhold*, this Court discussed whether a plaintiff, bringing an objectively reasonable lawsuit, was protected from liability by the holdings in either *Noerr* or another Supreme Court case, *Professional Real Estate Investors v. Columbia Pictures Indus., 508 U.S. 49, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993)* (*PRE*). In *Reichhold*, this Court stated that "[u]nder *PRE*, a plaintiff may not be held liable under federal ***antitrust law*** for bringing an objectively reasonable lawsuit, regardless of the plaintiff's subjective intent in bringing the suit." *Reichhold, 146 N.C. App. at 157, 555 S.E.2d at 293*. After concluding that the lawsuit in question was objectively reasonable, this Court held that the plaintiff's action in bringing **[*232]** the objectively reasonable lawsuit was not "an unfair trade practice under *N.C.G.S. § 75-1.1*." *Id.*

We **[***37]** first note that *Forro* involved Forro's lawsuit concerning the "Sherman Act's proscription of monopolization[.]" *Forro, 673 F.2d at 1058*. *Reichhold* concerned whether the plaintiff's objectively reasonable lawsuit was shielded from unfair and deceptive practices liability by *Noerr* and *PRE*. *Reichhold, 146 N.C. App. at 157, 555 S.E.2d at 293*. In the present case the action underlying the *Section 75-1.1* claim was Plaintiff's instigation of a malicious prosecution without probable cause, which the trial court found to be done for the improper purpose of gaining leverage in a lawsuit. We find the present case distinguishable from both *Reichhold* and *Forro* and hold that *Noerr-Pennington* does not apply on these facts. We therefore find the trial court's reasoning sound and find *Noerr-Pennington* inapplicable to the facts of the present case. *See, e.g.* *Reichhold, 146 N.C. App. at 148, 555 S.E.2d at 288* ("Because we see no relation between the tort of tortious interference and the legislative intent behind federal ***antitrust law***, we decline to attempt to conform the reasoning of *Noerr* to the present case.").

VIII. Damages

Plaintiff argues that the trial court erred by concluding that Ms. Volpe suffered **[***38]** separate injuries resulting from the malicious prosecution and from the *Section 75-1.1* claim because the conduct giving rise to those causes of action was the same. Plaintiff, citing *MRD Motorsports, Inc. v. Trail Motorsports, LLC, 204 N.C. App. 572, 576, 694 S.E.2d 517, 520 (2010)* (citation omitted), asserts that a claimant is "'entitled to only one redress for a single wrong[.]'" However, in this case, the trial court found that "Plaintiff's actions in having [Ms.] Volpe arrested constitute a separate and distinctive injury to [Ms. Volpe] . . . in that it was done for such improper purpose [of gaining leverage in their civil action], and Plaintiff is liable . . . to [Ms.] Volpe for such unfair and deceptive trade practice." Plaintiff does not address the trial court's conclusion that there was a separate, additional element involved in the *Section 75-1.1* claim. Because the trial court found an additional element, we are not persuaded by Plaintiff's argument.

IX. Attorney's Fees

Plaintiff's final argument is that the trial court erred in awarding attorney's fees in favor of Ms. Volpe because she should not have prevailed **[*233]** in her *Section 75-1.1* claim. In light of our holding with respect **[***39]** to Ms. **[**651]** Volpe's *Section 75-1.1* claim, this argument is without merit.

Affirmed.

Opinion by: W. Keith Watkins

Opinion

ORDER

Before the court is a Renewed Motion to Exclude the Expert Report and Testimony of Michael A. Williams, Ph.D.[1] (Doc. # 574), filed by Defendant Macon County Greyhound Park ("VictoryLand"). (Docs. # 572, 503.) VictoryLand moves to exclude the expert report and testimony of Dr. Williams, an economist, based upon *Rule 702 of the Federal Rules of Evidence* and *Daubert* principles. *See Daubert v. Merrell Dow Pharms., Inc., 509 U.S. 579, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)*. For the reasons to follow, the motion is DENIED in part and DEFERRED in part.

Dr. Williams's testimony focuses on (1) whether the Bingo rules have conferred monopoly or market power on VictoryLand, (2) the effects of that power on consumers, employees and potential employees of the bingo gaming industry in Macon County, (3) the effects of such monopoly **[*5]** power on government revenues, and (4) the effects of such monopoly power on the broader public policy objectives of Macon County. (*See* Dr. Williams's Expert Decl. 2 (Ex. to Doc. # 419).) Prior to the summary judgment ruling, Plaintiffs argued that Dr. Williams's opinions were "highly pertinent" to the RICO claims and to the equal protection claims predicated on theories that the Bingo rules were facially discriminatory. (Doc. # 503, at 14-15.) Subsequently, the equal protection claims predicated on the theory that the Bingo rules were facially discriminatory and the RICO claims were dismissed on summary judgment.

In post-summary judgment briefing, Plaintiffs now argue that Dr. Williams's testimony is "directly relevant to . . . the tortious interference with contractual and business relations claim and therefore should be allowed at trial." (Doc. # 572, at 2.) Plaintiffs contend, for instance, that Dr. Williams's testimony will show Defendants' financial motive to

[1] In accordance with the court's prior Orders, VictoryLand's brief (Doc. # 574) is construed as a Renewed Motion to Exclude the Expert Report and Testimony of Michael A. Williams, Ph.D. (*See* Doc. # 563 ¶ 3; Doc. # 549 (denying the motion to exclude without prejudice with leave to renew).)

interfere with Lucky Palace's and the Charities' contracts and/or business relationships, and that Defendants' influence on the rulemaking process resulted in Bingo rules that rendered Plaintiffs' contracts impossible, and **[*6]** that, contrary to Sheriff David Warren's stated intentions, were not in the best interests of Macon County.

VictoryLand counters that Plaintiffs impermissibly have changed the theory of their case on the eve of trial and merely have attempted to shoehorn Dr. Williams's testimony into the remaining tortious interference claim as a "last ditch effort to insert extraneous testimony that paints Defendants in a negative light and to make an improper appeal to the jury." (Doc. # 574, at 2.) While VictoryLand does not challenge Dr. Williams's qualifications, it argues that Sheriff Warren's intent, VictoryLand's alleged monopoly power, and the adverse effects that the Bingo rules allegedly had on the community are not relevant to whether Mr. McGregor and VictoryLand intended to interfere with Plaintiffs' contractual and business relationships. VictoryLand further argues that Dr. Williams's testimony that, before its closure, VictoryLand operated a profitable business and was the only venue operating electronic bingo in Macon County would not be helpful to the jury, as those facts are conceded. VictoryLand also contends that Dr. Williams's methodology for measuring monopoly or market power is **[*7]** unreliable for his failure to define the "relevant market." Alternatively, Defendants argue that the probative value of Dr. Williams's testimony is substantially outweighed by its prejudicial effect.

As the Supreme Court made clear in *Daubert*, *Rule 702* compels the district court to perform a "gatekeeping" function concerning the admissibility of expert testimony to ensure that speculative and unreliable opinions do not reach the jury. *Daubert, 509 U.S. at 589 n.7*. In the Eleventh Circuit, expert testimony is admissible under *Rule 702* if it satisfies three broad requirements:

> (1) the expert is qualified to testify competently regarding the matters he intends to address; (2) the methodology by which the expert reaches his conclusions is sufficiently reliable as determined by the sort of inquiry mandated in *Daubert*; and (3) the testimony assists the trier of fact, through the application of scientific, technical, or specialized expertise, to understand the evidence or to determine a fact in issue.

United States v. Frazier, 387 F.3d 1244, 1260 (11th Cir. 2004) (quoting *City of Tuscaloosa v. Harcros Chems., Inc., 158 F.3d 548, 562 (11th Cir. 1999)*). These requirements are referred to as the "qualifications," "reliability," and "helpfulness" prongs. *See id.*

When evaluating the reliability of scientific expert testimony, the trial judge must assess "whether the reasoning or methodology **[*8]** underlying the testimony is scientifically valid and . . . whether that reasoning or methodology properly can be applied to the facts in issue." *Daubert, 509 U.S. at 592-93*. To evaluate the reliability of a scientific expert opinion, a court considers several factors: (1) whether the expert's theory can be and has been tested; (2) whether the theory has been subjected to peer review and publication; (3) whether the known or potential rate of error of the methodology is acceptable; and (4) whether the theory is generally accepted in the proper scientific community. *McDowell v. Brown, 392 F.3d 1283, 1298 (11th Cir. 2004)* (citing *Daubert, 509 U.S. at 593-94*). "[T]he trial judge [has] considerable leeway in deciding in a particular case how to go about determining whether particular expert testimony is reliable." *Kumho Tire Co. v. Carmichael, 526 U.S. 137, 152, 119 S. Ct. 1167, 143 L. Ed. 2d 238 (1999)*. Moreover, whether the expert testimony will assist the trier of fact in understanding the evidence or a fact in issue "goes primarily to relevance." *Daubert, 509 U.S. at 591*. "Expert testimony which does not relate to any issue in the case is not relevant and, ergo, non-helpful." *Id.* (citation and internal quotation marks omitted).

In this case, the court finds that it is appropriate to defer ruling on the admissibility of Dr. Williams's testimony until trial. The court has concerns with Plaintiffs' seeming **[*9]** shift in gears as to which claims Dr. Williams's testimony bears relevance. On the other hand, it appears that evidence of VictoryLand's market power would be relevant to show an alleged strong financial motive on the part of Defendants to interfere with Plaintiffs' contractual and business relationships. This court already has found that evidence from which a reasonable jury can infer a strong financial motive of interference may be used to show intentional interference. (*See* Doc. # 537, at 200-02 (citing *Ex parte Henderson, 732 So. 2d 295, 298 (Ala. 1999)* (observing that evidence of a "strong financial motive" on the part of the defendant can support a finding of intentional interference)).) Dr. Williams's testimony also may be relevant to show that Defendants engaged in conduct that had an anti-competitive effect and that conduct very well may be relevant to whether Defendants acted intentionally toward Plaintiffs. In short, although discussion of Dr.

Williams's testimony in the context of the tortious interference claim has only recently surfaced, the court is hesitant to exclude the testimony prior to Plaintiffs' having presented their factual foundation and legal framework at trial. Ruling on the issue of relevancy, thus, is **[*10]** reserved.

However, should it be determined that Dr. Williams's testimony is relevant, it will not be excluded as unreliable. While it is true that Dr. Williams's definition of monopoly or market power does not align with that employed under *Section 2* of the Sherman Act, the court declines to find unreliable Dr. Williams's methodology for analyzing monopoly or market power in a case that is outside the parameters of federal ***antitrust law***. Dr. Williams has explained his methodology. He has contended his methodology is premised on accepted economic principles that have been subjected to peer review and publication. (*See, e.g.*, Dr. Williams's Dep. at 75-81, 85-89, 96-98, 150-55, 158-59, 289-92; Dr. Williams's Expert Report, at 14-20.) Given the demonstration of reliability, the court finds that any weaknesses in the methodology bear to the weight of his testimony, not its ultimate admissibility. The court's function as gatekeeper "is not to determine whether [Dr. Williams's] analysis is ultimately correct." *Allied Erecting & Dismantling Co., Inc. v. Genesis Equip. & Mfg., Inc., No. 4:06CV114, 2009 U.S. Dist. LEXIS 70655, 2009 WL 8592874, at *3 (N.D. Ohio Aug. 12, 2009)*. Rather, generally, a challenge "to the . . . overall correctness of a proffered expert opinion 'goes to the weight of the evidence, not to its admissibility.'" *Id.* (quoting *In re Scrap Metal Antitrust Litig., 527 F.3d 517, 531-32 (6th Cir. 2009)*).

To the extent that Dr. Williams's **[*11]** opinions have loose ends, "[v]igorous cross-examination, presentation of contrary evidence, and careful instruction on the burden of proof are the traditional and appropriate means of attacking shaky but admissible evidence." *Daubert, 509 U.S. at 596*. In this case, these means are available to Defendants, and, notably, Defendants have proffered their own expert to challenge Dr. Williams's methodology and opinions. Indeed, courts have allowed trial testimony by rebuttal expert witnesses whose purpose is to criticize the reliability of the opposing side's expert's opinions, and Defendants will be permitted to do the same in this case. *See In re Cessna 208 Series Aircraft Prods. Liab. Litig., No. 05-md-1721-KHV, 2009 U.S. Dist. LEXIS 63185, 2009 WL 1649773, at *1 (D. Kan. June 9, 2009)* ("Numerous courts have permitted experts to testify at trial about the reliability of the opinions of opposing experts." (collecting cases)). In this case, as to methodology, the court finds that "[a] trial setting . . . will provide the best operating environment for the triage [that] *Daubert* demands." *Rafaela Cortes—Irizarry v. Corp. Insular De Seguros, 111 F.3d 184, 188 (1st Cir. 1997)*.

Accordingly, it is ORDERED that VictoryLand's Renewed Motion to Exclude the Expert Report and Testimony of Michael A. Williams, Ph.D. (Doc. # 574) is DENIED as to the challenge to Dr. Williams's methodology, and DEFERRED as to the challenge to reliability and, thus, to the testimony's **[*12]** ultimate admissibility.

DONE this 3rd day of May, 2012.

/s/ W. Keith Watkins

Opinion

[*761] **ORDER**

Pending before the Court is the plaintiff's motion to remand. Docket No. 19. The defendants have responded in opposition, Docket No. 25, the plaintiff has replied, Docket No. 29, and the Court is ready to rule. The motion to remand will be granted. Also pending is the defendants' motion to strike portions of the plaintiff's reply brief. Docket No. 30. That motion is fully briefed, *see* Docket Nos. 31 & 33, and will be granted.

I. Factual and Procedural History

On March 25, 2011, the State of Mississippi filed a complaint in the Chancery Court of Hinds County alleging that the defendants had engaged in price-fixing in violation of the Mississippi Consumer Protection Act ("MCPA"), *Miss. Code § 75-24-1 et seq.*, and the Mississippi Antitrust Act ("MAA"), *id.* *§ 75-21-1 et seq.* Docket No. 1-1.

The action was brought by the Attorney General of Mississippi, who sought to protect the State's "quasi-sovereign interest" in its economy and its citizens' economic well-being. *Id.* at 3. The State claimed that the number of citizens harmed by the defendants' conduct is "a sufficiently substantial segment of the State's population to establish Mississippi's quasi-sovereign interests, as relief **[**5]** is sought on behalf of all local governmental entities and consumers (not limited groups of private parties) who bought a wide range of price-fixed products." *Id.* at 4. With this and other language, the Attorney General invoked his authority to file suit as *parens patriae* on behalf of the State and its citizens. *Id.* at 3-4.

The defendants are companies that manufactured, marketed, sold, and/or distributed LCD panels, which are components of computers, televisions, and a wide variety of other electronic devices. *Id.* at 4-9. According to the State, the defendants formed an international cartel that conspired to artificially limit the supply and increase the price of LCD panels between **[*762]** 1996 and 2006, thereby increasing the price of every product containing a LCD panel during that time period. *Id.* at 3-4, 11-12, and 20. The complaint described how the defendants, who together make up over 80% of the market for LCD panels, carried out their scheme through regular meetings of high-level executives, public statements, and a tangled web of cross-licensing and cross-purchasing agreements and joint ventures. *Id.* at 11-36. As a result of these acts, when Mississippi's consumers, local governments, **[**6]** and state agencies purchased products containing LCD panels, they allegedly paid more than they otherwise would have, had the market been fair and competitive. *Id.* at 19 and 39-49.

It was further alleged that several of the defendants and their co-conspirators had pled guilty to criminal charges brought by the United States Department of Justice for this conduct and paid more than $890 million in criminal fines to the United States government. *Id.* at 3 and 38-39. The State claimed that none of those fines were dedicated to recompense Mississippi's consumers and governmental entities, nor were funds set aside for civil penalties owed to States under state laws. *Id.* at 3.

The State sought the following relief: (1) a permanent injunction prohibiting the defendants from continuing to engage in anti-competitive behavior; (2) civil penalties of $10,000 per LCD panel product sold in Mississippi during the relevant time period, pursuant to the MCPA [1]; (3) civil penalties of up to $2,000 per month, per defendant for violations of the MAA during the relevant time period; (4) restitution to the State for its own losses caused by purchasing LCD panel products during the relevant time period; (5) **[**7]** restitution to the State on behalf of its citizens and local governments who suffered losses by purchasing LCD panel products during the relevant time period; (6) punitive damages; and (7) other relief including costs of court, pre- and post-judgment interest, and attorney's fees. *Id.* at 55-56.

On June 9, 2011, the defendants jointly removed the case to this Court. Docket No. 1. They asserted that federal jurisdiction was satisfied under the Class Action Fairness Act ("CAFA"), *28 U.S.C. §§ 1332(d)* and *1453*. *Id.* at 4. That law establishes federal jurisdiction over certain suits determined to be "class actions" or "mass actions." *28 U.S.C. § 1332(d)*. The defendants further asserted that a federal question existed pursuant to the Sherman Act, *15 U.S.C. § 7 et seq.* Docket No. 1-1, at 10.

Shortly thereafter, the United States Judicial Panel on Multidistrict Litigation issued a Conditional Transfer Order transferring this case to the United States District Court for the Northern District of California, **[**8]** where Judge Illston presides over a number of other suits against LCD panel manufacturers. Docket No. 19-1; *see In re TFT-LCD (Flat Panel) Antitrust Litig., No. C 07-1827, 2011 U.S. Dist. LEXIS 17793, 2011 WL 560593 (N.D. Cal. Feb. 15, 2011)*. That Order was postponed to await a decision on the motion to remand. Docket No. 24.

II. Standard of Review

"The party seeking removal bears the burden of showing that federal jurisdiction is proper." *Lone Star OB/GYN Assocs. v. Aetna Health, Inc., 579 F.3d 525, 528 (5th Cir. 2009)* (citation omitted); *see Wilson v. Republic Iron & Steel Co., 257 U.S. 92, 97, 42 S. Ct. 35, 66 L. Ed. 144 (1921)*. "[B]ecause **[*763]** the effect of removal is to deprive the state court of an action properly before it, removal raises significant federalism concerns." *Carpenter v. Wichita Falls Indep. Sch. Dist., 44 F.3d 362, 365-66 (5th Cir. 1995)* (citations omitted). "The removal statute is therefore to be strictly construed and any doubt as to the propriety of removal should be resolved in favor of remand." *In re Hot-*

---

[1] Civil penalties recovered under the MCPA are divided evenly between the Attorney General's Office of Consumer Protection and the General Fund of the State of Mississippi. *Miss. Code § 75-24-19(1)(b)*.

Hed Inc., 477 F.3d 320, 323 (5th Cir. 2007) (citations omitted). "The court has wide, but not unfettered, discretion to determine what evidence to use in making its determination of jurisdiction." Hollinger v. Home State Mut. Ins. Co., 654 F.3d 564, 570-71 (5th Cir. 2011) **[**9]** (quotation marks and citations omitted) (affirming the district court's decision to decline federal jurisdiction pursuant to a CAFA exception).

III. Discussion

The defendants claimed two independent sources of federal jurisdiction: diversity jurisdiction under CAFA and a federal question presented under the Sherman Act. Each will be evaluated below. The Court will begin, though, with a discussion of *parens patriae* actions and a summary of a significant Fifth Circuit case that addressed some of the issues presented here.

A. The Nature of These Actions

"The concept of *parens patriae* stems from the English constitutional system, where the King retained certain duties and powers, referred to as the 'royal prerogative,' which he exercised in his capacity as 'father of the country.'" Louisiana ex rel. Caldwell v. Allstate Ins. Co., 536 F.3d 418, 425 (5th Cir. 2008) (citation omitted); *see* Alfred L. Snapp & Son, Inc. v. Puerto Rico, ex rel. Barez, 458 U.S. 592, 600-02, 102 S. Ct. 3260, 73 L. Ed. 2d 995 (1982). While the term originally meant the King's power to protect those without "the legal capacity to act for themselves," Caldwell, 536 F.3d at 425, in the United States *parens patriae* actions were "greatly expanded" over the **[**10]** 1900s, Hawaii v. Standard Oil Co. of Cal., 405 U.S. 251, 257, 92 S. Ct. 885, 31 L. Ed. 2d 184 (1972) (collecting cases). Today they are "an increasingly popular vehicle for state attorneys general to vindicate the rights of their constituents." Alexander Lemann, *Sheep in Wolves' Clothing: Removing Parens Patriae Suits Under the Class Action Fairness Act*, 111 Colum. L. Rev. 121, 122 (2011).

Parens patriae actions are brought to protect a state's "quasi-sovereign interests," which include interests in "the health and well-being - both physical and *economic* - of its residents in general . . . [and] not being discriminatorily denied its rightful status within the federal system." Snapp, 458 U.S. at 607 (emphasis added). More specifically, quasi-sovereign interests have been held to include suits seeking to abate public nuisances, maintain access to energy sources, and halt price fixing [2]. Id. at 604-06 (collecting cases).

[*764] There are boundaries on the *parens patriae* authority. "A State is not permitted to enter a controversy as a nominal party in order to forward the claims of individual citizens. But it may act as the representative of its citizens in original actions where the injury alleged affects the general population of a State in a substantial way." Maryland v. Louisiana, 451 U.S. 725, 737, 101 S. Ct. 2114, 68 L. Ed. 2d 576 (1981) (citations omitted). [3] *Parens patriae* actions are disfavored where the injury falls "on a small group of citizens who are likely to challenge" the harm directly. Id. at 739. But where "a great many citizens . . . are faced with increased costs aggregating millions of dollars per year" and "cannot be expected **[**12]** to litigate [the issue] given that the amounts paid by each consumer are likely to be relatively small," *parens patriae* suits are appropriate. *Id.* Unsurprisingly, then, "[p]arens

---

[2] In *Hawaii v. Standard Oil*, the Supreme Court held that the Clayton Act did not permit the State of Hawaii to seek damages for its citizens via a *parens patriae* suit alleging antitrust violations. *Hawaii, 405 U.S. at 260-62*. In response, Congress passed 15 U.S.C. § 15c, which authorizes state attorneys **[**11]** general to sue for antitrust violations and recover damages on behalf of their citizens. *State v. Marsh & McLennan Companies, 286 Conn. 454, 466-68, 944 A.2d 315 (2008)*; *see* *Caldwell, 536 F.3d at 427 n.5*; *TFT-LCD, 2011 U.S. Dist. LEXIS 17793, 2011 WL 560593, at *4 n.2*. The Supreme Court has acknowledged "the long history of state common-law and statutory remedies against monopolies and unfair business practices" and concluded that "this is an area traditionally regulated by the States." *California v. ARC America Corp., 490 U.S. 93, 101, 109 S. Ct. 1661, 104 L. Ed. 2d 86 (1989)*.

[3] While *Maryland* was brought in the Supreme Court as an original action, it remains a helpful explanation of the *parens patriae* authority.

patriae statutes are most common in the antitrust and consumer protection contexts." Dwight R. Carswell, *CAFA and Parens Patriae Actions*, 78 U. Chi. L. Rev. 345, 348 (2011)

The Supreme Court "has not attempted to draw any definitive limits on the proportion of the population of the State that must be adversely affected by the challenged behavior." Snapp, 458 U.S. at 607. In *Snapp*, it reiterated that a state must allege "injury to a sufficiently substantial segment of its population," not just an "injury to an identifiable group of individual residents." *Id.* A district court determines the proportion of the population that has allegedly been affected by analyzing the complaint as of the date it was filed. *See* Hollinger, 654 F.3d at 573 ("Citizenship, for purposes of proving an exception to CAFA, must be analyzed as of the date the complaint or amended complaint was filed.") **[**13]** (citations omitted).

There is a debate, both in our case and in the wider legal community, over whether *parens patriae* suits are class actions brought under a different label or *sui generis. Parens patriae* actions are certainly a form of representative action, and "attorneys general often hire plaintiffs' lawyers to help prosecute parens patriae suits. . . . [T]he conceptual similarity between [class actions and parens patriae actions] is unavoidable." Lemann, 111 Colum. L. Rev. at 133 (citations omitted).

That said, distinctions can be identified. For one, an attorney general is not a true class representative. "Rather, in representing the citizens, the State [through its Attorney General] acts more in the capacity of trustee representing beneficiaries or a lawyer representing clients, neither of which is the type of representation essential to the representational aspect of a class action." West Virginia ex rel. McGraw v. CVS Pharmacy, Inc., 646 F.3d 169, 176-77 (4th Cir. 2011); *see* LG Display Co. v. Madigan, 665 F.3d 768, 772 (7th Cir. 2011) ("This case was brought by the Attorney General, not by a representative of a class."). The Fourth Circuit has concluded that "[a]ll class actions **[**14]** are representative in nature; but not all representative actions are necessarily class actions." McGraw, 646 F.3d at 175 n.1.

There also are procedural differences between the two. *See* id. at 175-76; Madigan, 665 F.3d at 772. "Unlike private litigants, the Attorneys General have statutory authority to sue in *parens patriae* and need not demonstrate standing through a representative injury nor obtain certification of a class in order to recover on behalf of individuals." Washington v. **[*765]** Chimei Innolux Corp., 659 F.3d 842, 848 (9th Cir. 2011) (citations omitted). "Additionally, attorneys general are not always required to provide notice to the citizens whose damages they are recovering, and the citizens may not be able to opt out." Carswell, 78 U. Chi. L. Rev. at 362. Further, in some states a *parens patriae* suit may result in a recovery for the state's General Fund but not the individual victims of the fraud. Washington, 659 F.3d at 848.

The Fifth Circuit has found that a *parens patriae* suit may, in certain circumstances, constitute a CAFA mass action. Caldwell, 536 F.3d at 430. It has recited CAFA's legislative history to conclude that "the term 'class action' should be defined broadly **[**15]** to prevent 'jurisdictional gamesmanship.'" Id. at 424. But it has not held that *parens patriae* suits are necessarily class or mass actions. Id. at 430.

B. The Fifth Circuit's Decision in Caldwell

Because Caldwell controls our case and its interpretation is contested by the parties, it will be summarized here.

In *Caldwell*, the Attorney General of Louisiana filed suit against a number of insurance companies and their business partners, claiming that they had "continuously manipulated Louisiana commerce by rigging the value of policyholder claims and raising the premiums." Id. at 422 (quotation marks omitted). The complaint alleged that the defendants had systematically undervalued and underpaid policyholders' property claims in the aftermath of Hurricanes Katrina and Rita. Id. at 422-23. The suit, which was styled as a *parens patriae* action and filed in Louisiana state court, sought forfeiture of illegal profits, treble damages, and injunctive relief. Id. at 423.

The defendants removed the case to the United States District Court for the Eastern District of Louisiana, arguing federal jurisdiction under CAFA. *Id.* The district court determined that the real parties in interest were the individual

[16]** policyholders who had been harmed, and reasoned that the suit was "really an artfully pled class action." Transcript of Hearing at 32, *State of Louisiana v. Allstate Ins. Co.*, No. 07-9409 (E.D. La. Apr. 2, 2008) ("Caldwell Transcript"). The district court rejected the argument that the suit was a CAFA mass action. *Id.* at 21.

The Fifth Circuit affirmed on different grounds. It analyzed the complaint claim-by-claim, finding that Louisiana was a real party in interest as to the injunctive relief and that the policyholders were real parties in interest with respect to the treble damages. *Caldwell, 536 F.3d at 429-30*. As real parties in interest, the policyholders' citizenship had to be counted, and since they were Louisiana residents, there was minimal diversity of the parties as required by CAFA. *Id. at 430*. The Fifth Circuit declined to address whether the suit was a class action - the district court's rationale for federal jurisdiction - and found that it was a mass action: "a civil action involving the monetary claims of 100 or more persons that is proposed to be tried jointly." *Id.*

Judge Southwick, in dissent, concluded that the suit was neither a class action nor a mass action as CAFA **[**17]** defines those terms. *Id. at 433* (Southwick, J., dissenting). The Attorney General's complaint did not invoke the federal or state class action rules, and the mass action provision could not be invoked by a defendant seeking to join additional parties. *Id. at 434-35*. Instead, Judge Southwick argued that Louisiana's courts had jurisdiction over the complaint as it was pled and should first resolve whether the Attorney General **[*766]** could recover treble damages on behalf of Louisiana consumers in a representative capacity. *Id.* Under the applicable standard of review, which requires doubts and uncertainties to be resolved against a finding of federal jurisdiction, he thought the case should have been remanded. *Id. at 433*. [4]

C. The Present Dispute

1. The Class Action Fairness Act

"Congress enacted CAFA to encourage federal jurisdiction over interstate class action lawsuits of national interest." *Preston v. Tenet Healthsystem Mem'l Med. Ctr., Inc., 485 F.3d 793, 797 (5th Cir. 2007)*. "The CAFA exceptions are 'designed to draw a delicate balance between making a federal forum available to genuinely national litigation and allowing the state courts to retain cases when the controversy is strongly linked to that state.'" *Id. at 803* (quoting *Hart v. FedEx Ground Package Sys., Inc., 457 F.3d 675, 682 (7th Cir. 2006))*; *see* McGraw, 646 F.3d at 178 ("CAFA is also sensitive to deeply-rooted principles of federalism, reserving to the States primarily local matters.").

To establish jurisdiction under CAFA, the removing party must first show that the parties are minimally diverse, which means that:

> (A) any member of a class of plaintiffs is a citizen of a State different from any defendant;
>
> (B) any member of a class of plaintiffs is a foreign state or a citizen or subject of a foreign state and any defendant is **[**19]** a citizen of a State; or
> (C) any member of a class of plaintiffs is a citizen of a State and any defendant is a foreign state or a citizen or subject of a foreign state.

28 U.S.C. § 1332(d)(2)(A)-(C). The removing party must then prove that the action is a class action or a mass action.

A CAFA class action is "any civil action filed under *rule 23 of the Federal Rules of Civil Procedure* or similar State statute or rule of judicial procedure authorizing an action to be brought by 1 or more representative persons as a

[4] *Caldwell* was "groundbreaking," Lemann, *111 Colum. L. Rev. at 133*, and has been discussed in a number of circuit and district court decisions, discussed below. It also has been the subject of academic attention, perhaps because of an emerging circuit split. *E.g., id.*; Jacob Durling, *Waltzing Through a Loophole: How Parens Patriae Suits Allow Circumvention of the Class Action Fairness Act*, *83 U. Colo. L. Rev. 549 (2012)*; Carswell, *78 U. Chi. L. Rev. at 353-57*; Guyon Knight, **[**18]** *The CAFA Mass Action Numerosity Requirement: Three Problems with Counting to 100*, *78 Fordham L. Rev. 1875 (2010)*.

class action." *Id.* § 1332(d)(1)(B). A class action must have 100 or more "members of all proposed plaintiff classes" and an aggregate amount in controversy in excess of $5 million. *Id.* § 1332(d)(2), (d)(5)(B), and (d)(6).

CAFA defines a mass action as:

> any civil action . . . in which monetary relief claims of 100 or more persons are proposed to be tried jointly on the ground that the plaintiffs' claims involve common questions of law or fact, except that jurisdiction shall exist only over those plaintiffs whose claims in a mass action satisfy the jurisdictional amount requirements under subsection (a).

Id. § 1332(d)(11)(B)(i). The jurisdictional amount requirement in 28 U.S.C. § 1332(a) **[**20]** is $75,000. *Id.* § 1332(a). Therefore, in a mass action, federal courts have jurisdiction "only" over plaintiffs whose individual claims exceed $75,000, exclusive of interest and costs. *Id.* § 1332(d)(2) and (d)(11)(B)(i). Mass actions may not be transferred to a multidistrict litigation court "unless a majority of the plaintiffs in the action request transfer." *Id.* § 1332(d)(11)(C)(I).

[*767] Once the removing party meets its burden to establish federal jurisdiction, the party seeking remand can attempt to prove one of CAFA's exceptions to jurisdiction. *Hollinger, 654 F.3d at 571*. One of those exceptions states that "the term 'mass action' shall not include any civil action in which . . . all of the claims in the action are asserted on behalf of the general public (and not on behalf of individual claimants or members of a purported class) pursuant to a State statute specifically authorizing such action." *28 U.S.C. § 1332(d)(11)(B)(ii)* and *(d)(11)(B)(ii)(III)*.

2. Arguments

The State argues that when the complaint is viewed as a whole, the real party in interest is the State of Mississippi, not its citizens and local governments. Docket No. 20, at 5-7. Because the State is not a 'citizen' for purposes **[**21]** of diversity jurisdiction, it concludes that there is no minimal diversity. *Id.* at 5. The State next claims that the action is not a CAFA class action because it was not filed pursuant to *Federal Rule of Civil Procedure 23* or an analogous state rule; in fact, Mississippi lacks a class action rule. *Id.* at 9-10. Finally, the State argues that its suit is not a mass action pursuant to an exception in CAFA denying mass action status to suits brought on behalf of the general public. *Id.* at 10-11.

The defendants agree that the State is the real party in interest as to the damages it seeks on its own behalf, civil penalties, and injunctive relief. Docket No. 25, at 6. They argue, though, that because the complaint also seeks damages for injuries incurred by Mississippi's consumers and local governments, those consumers and local governments are also real parties in interest. *Id.* at 6-9. Because Mississippi's consumers and local governments are obviously citizens of Mississippi, and none of the defendants are citizens of Mississippi, the defendants conclude that minimal diversity is established. *Id.* The defendants next challenge the State's interpretation of "class action," claiming that this **[**22]** suit is one within the meaning of CAFA. *Id.* at 9-12. Finally, they argue that the suit is a mass action that does not fall into the State's claimed statutory exception, again because "individual Mississippi consumers are the real parties in interest when the State seeks to recover damages on their behalf in a representative capacity." *Id.* at 12.

In its reply, the State explains in more detail its contention that *parens patriae* actions are procedural vehicles separate and distinct from class actions. Docket No. 29, at 5-9. It again claims that mass action status should be denied because the case is brought on behalf of the general public, arguing that the products at issue "are ubiquitous in modern life and inflated prices for these products would affect nearly every single Mississippi resident." *Id.* at 12 n.6.

3. The Defendants' Motion to Strike

The State's reply brief then argues that the defendants failed to prove CAFA's amount in controversy requirements. *Id.* at 13-17. It denies that the defendants have put forward any evidence that the aggregate amount sought in the complaint exceeds $5 million and that at least one consumer or local government seeks more than $75,000. *Id.* The State **[**23]** claims that the defendants were required to provide such proof in their Notice of Removal. *Id.* at 14-16. Finally, it recites that if this case is a mass action, the Court should bifurcate the suit. *Id.* at 19.

The defendants have moved to strike these arguments, claiming that these grounds were not briefed in the State's original motion to remand. Docket No. 30, at 2-3. In the alternative, the defendants ask for leave to file a sur-reply and attach affidavits to establish the amount in controversy **[*768]** requirements. *Id.* They have included a summary of their argument to be made in any sur-reply. *Id.* at 3-8. The State opposes the motion, Docket No. 31, and the defendants have responded, Docket No. 33. The defendants' response brief contains the affidavits they would have attached to any sur-reply. *See* Docket Nos. 33-1; 33-2; 33-3.

The defendants' motion is well-taken and will be granted. The State should have presented all of its arguments for remand in its original motion. *Kennedy v. BAE Sys. Info. Tech., Inc., No. 1:09-cv-254, 2011 U.S. Dist. LEXIS 144227, 2011 WL 6211171, at *7 (S.D. Miss. Dec. 14, 2011)* ("A reply memorandum is not the appropriate place to raise new arguments"). The State's new arguments will be stricken **[**24]** and the defendants are excused from proving CAFA's amount in controversy requirements. Further, for reasons that will become apparent later, the State's suggestion of bifurcation is moot.

4. Analysis

a. Minimal Diversity

The State of Mississippi is not a 'citizen' for purposes of diversity jurisdiction. *In re Katrina Canal Litig. Breaches, 524 F.3d 700, 706 (5th Cir. 2008)* ("*Road Home*"). In this situation, "a federal court must disregard nominal or formal parties and rest jurisdiction only upon the citizenship of real parties to the controversy." *Navarro Sav. Ass'n v. Lee, 446 U.S. 458, 461, 100 S. Ct. 1779, 64 L. Ed. 2d 425 (1980)* (citations omitted). The question is whether Mississippi's citizens and local governments are real parties in interest and must be counted for citizenship purposes.

"[T]he 'real party in interest' is the party who, by substantive law, possesses the right sought to be enforced, and not necessarily the person who will ultimately benefit from the recovery." *Richards v. Reed, 611 F.2d 545, 546 n.2 (5th Cir. 1980)* (quotation marks and citation omitted). *Federal Rule of Civil Procedure 17* states that actions "must be prosecuted in the name of the real party in interest." *Fed. R. Civ. P. 17(a)(1)*. It **[**25]** also states, however, that executors, administrators, guardians, and parties "authorized by statute" "may sue in their own names without joining the person for whose benefit the action is brought." *Id.; see Proctor v. Gissendaner, 579 F.2d 876, 880 (5th Cir. 1978)*.

In *Caldwell*, the property insurance policyholders who had been injured by the defendants' conduct were considered real parties in interest as to the claim for treble damages, because Louisiana law granted the policyholders the right to bring suit on their own for those damages.

> We conclude that as far as the State's request for treble damages is concerned, the policyholders are the real parties in interest. The text of *§ 137 of the Monopolies Act*, which authorizes the recovery of treble damages, plainly states that "any person who is injured in his business or property" under the Monopolies Act "shall recover[] treble damages." The plain language of that provision makes clear that individuals have the right to enforce this provision. Accordingly, we agree with the district court and hold that under *§ 137* the policyholders, and not the State, are the real parties in interest.

Caldwell, 536 F.3d at 429 (brackets omitted); *see* ***[**26]*** *West Virginia ex rel. McGraw v. Comcast Corp., 705 F. Supp. 2d 441, 450 (E.D. Pa. 2010)* (finding that "a discrete group of Comcast's premium subscribers" were real parties in interest as to an attorney general's claim for treble damages on their behalf).

[*769] Here, the MCPA permits individuals to sue for damages incurred as a result of prohibited business practices. *Miss. Code § 75-24-15(1)*. Before filing such an action, the consumer "must have first made a reasonable attempt to resolve any claim through an informal dispute settlement program approved by the Attorney General." *Id. § 75-24-15(2)*. The MAA also permits individuals to sue when "injured or damages by a trust and combine . . . or by its effects direct or indirect." *Id. § 75-21-9*. Under *Caldwell*, Mississippi's consumers are considered real parties in interest with respect to the State's request for restitution on their behalf. Caldwell, 536 F.3d at 429; *accord* Hood v. F. Hoffman-La Roche, Ltd., 639 F. Supp. 2d 25, 31-33 (D.D.C. 2009).

These statutes afford local governments similar rights. The MCPA provides a remedy to "any person who purchases or leases goods or services primarily for personal, family or household purposes" who **[**27]** is injured by a prohibited business practice. Miss. Code § 75-24-15(1). A local government is considered a person under the law, *id.* § 75-24-3(a), and at least one state court has found that a governmental entity purchases goods for its own, "personal" uses, *id.* § 75-24-15(1). *Hood ex rel. State v. BASF Corp.*, No. 56863, 2006 WL 308378, at *12 (Miss. Ch. Jan. 17, 2006). Further, local governments have the right to sue under the MAA for "all damages of every kind sustained . . . and in addition a penalty of five hundred dollars ($500.00)." Miss. Code § 75-21-9.

As a result, the State of Mississippi, its consumers, and its local governments are all real parties in interest in this action. While the State has no citizenship for purposes of diversity jurisdiction, Mississippi's consumers and local governments are obviously citizens of Mississippi. Counting their citizenship, and seeing that no defendant is a citizen of Mississippi, CAFA's requirement of minimal diversity has been met. *See* 28 U.S.C. § 1332(d)(2)(A).

b. Class Action

This suit is not a CAFA class action because it was not brought pursuant to Federal Rule of Civil Procedure 23 or a "similar **[**28]** State statute or rule of judicial procedure." *Id.* § 1332(d)(1)(B). The action was not originally filed in federal court under Rule 23 and the parties agree that Mississippi has no rule permitting class actions. [5] None of the state laws under which this action was brought impose class action-like requirements of adequacy, numerosity, commonality, or typicality, nor is the Attorney General, with his distinct duties, powers, and interests, a typical class representative. *See* Madigan, 665 F.3d at 772; McGraw, 646 F.3d at 174-77; In re Vioxx Prods. Liab. Litig., MDL No. 1657, 843 F. Supp. 2d 654, 2012 U.S. Dist. LEXIS 2526, 2012 WL 10552, at *7-8 (E.D. La. Jan. 3, 2012).

In a recent decision addressing issues much like our own, Judge Fallon of the Eastern District of Louisiana found that "Congress chose to define 'class action' not **[*770]** in terms of joinder of individual claims or by representative relief in general, but in terms of the statute or rule the case is filed under." Vioxx, 2012 U.S. Dist. LEXIS 2526, 2012 WL 10552, at *8 (citing 28 U.S.C. § 1332(d)(1)(B)). Because the Attorney General of Kentucky's *parens patriae* suit was not brought under such a federal or state statute or rule, it was remanded to Kentucky state court. [6] *Id.* Judge Fallon reasoned, "[i]f this is a formalistic outcome, it is a formalism dictated by Congress. Moreover, it is an understandable bright-line rule." *Id.* The Fifth Circuit declined to review the decision. Order, In re Vioxx Prod. Liab. Litig., No. 12-90002 (5th Cir. Feb. 24, 2012).

The defendants in our case interpret CAFA more broadly. They rely upon **[**30]** CAFA's legislative history to argue that "generally speaking, lawsuits that *resemble* a purported class action should be considered class actions for the purpose of applying CAFA." Docket No. 25, at 11 (brackets omitted) (quoting S. Rep. No. 109-14, at 35). But the word "resemble" is not found in 28 U.S.C. § 1332(d). That omission leads to an ongoing debate about whether the Senate Report relied upon by the defendants is a reliable source to discern Congress's intent in enacting CAFA.

---

[5] To be clear, class actions are not authorized in Mississippi courts. USF&G Ins. Co. of Miss. v. Walls, 911 So. 2d 463, 467 (Miss. 2005) ("Since there is no rule or statute which expressly or impliedly provides for class actions, we are compelled to conclude that they are not permitted in any legal proceedings in our state courts.").

The MCPA also bars class actions attempted to be brought under its auspices. Miss. Code § 75-24-15(4). "Thus, any purported class action complaint or master complaint on behalf of several plaintiffs asserting violations of Section 75-24-5 is **[**29]** arguably improper." Walker W. Jones, III & Jason R. Bush, *An Overview of the Mississippi Consumer Protection Act*, Mississippi Defense Lawyers Assoc. Quarterly, Winter 2006, at 12 (collecting cases).

[6] The defendant in *Vioxx* did not argue that the suit was a mass action. Vioxx, 2012 U.S. Dist. LEXIS 2526, 2012 WL 10552, at *5 n.4.

The Fourth Circuit has found that the Senate Report in question "was issued 10 days *after* CAFA was signed into law, and for that reason alone, it is a questionable source of congressional intent. . . . *Post hoc* statements of a congressional Committee are not entitled to much weight." McGraw, 646 F.3d at 177 (citations, quotation marks, and brackets omitted); *see* Blockbuster, Inc. v. Galeno, 472 F.3d 53, 58 (2d Cir. 2006) (same). The Second and Third Circuits declined to rely upon this Senate Report to establish CAFA's burden-shifting framework, where CAFA's text did not address burden-shifting. Galeno, 472 F.3d at 57-58; Morgan v. Gay, 471 F.3d 469, 472-73 (3d Cir. 2006). The Seventh Circuit also found **[**31]** this Senate Report problematic, reasoning that "when the legislative history stands by itself, as a naked expression of 'intent' unconnected to any enacted text, it has no more force than an opinion poll of legislators - less, really, as it speaks for fewer." Brill v. Countrywide Home Loans, Inc., 427 F.3d 446, 448 (7th Cir. 2005); *see also* Abrego Abrego v. The Dow Chem. Co., 443 F.3d 676, 685-86 (9th Cir. 2006).

The Eleventh Circuit thought the Senate Report of greater value, observing that although it "was issued ten days following CAFA's enactment, it was submitted to the Senate on February 3, 2006 - while that body was considering the bill." Lowery v. Alabama Power Co., 483 F.3d 1184, 1206 n.50 (11th Cir. 2007) (citation omitted). But that court used legislative history to interpret the "statutory labyrinth" of CAFA's mass action provisions, not the relatively more straightforward class action provisions. Id. at 1199. The Fifth Circuit has quoted the Senate Report and the language relied upon by the defendants, but also did not address whether the suit before it was a class action. Caldwell, 536 F.3d at 424 and 430. Others have found "no clear answer" on the Senate Report's validity **[**32]** for a legislative history analysis. Guyon Knight, *The CAFA Mass Action Numerosity Requirement: Three Problems with Counting to 100*, 78 Fordham L. Rev. 1875, 1892 (2010).

"[A] powerful line of Supreme Court authority suggests that legislative history should rarely be used in statutory interpretation, **[*771]** because only the text of the law has been passed by Congress, not the often-contrived history." Stanley ex rel. Estate of Hale v. Trinchard, 579 F.3d 515, 518 n.6 (5th Cir. 2009) (quotation marks and citations omitted). "[T]here is no reason to recite legislative history" when the statutory text is clear, in part because "as is often the case with legislative history, statements can be pulled from the record to support the contrary proposition as well." Khalid v. Holder, 655 F.3d 363, 371 (5th Cir. 2011) (citation omitted); *see* Wheeler v. Pilgrim's Pride Corp., 591 F.3d 355, 377 (5th Cir. 2009) (collecting cases). [7]

Because **[**33]** CAFA unambiguously defines class action, it is unnecessary to consider the legislative history on this point. This Court will apply the "understandable bright-line rule" articulated in Vioxx, 2012 U.S. Dist. LEXIS 2526, 2012 WL 10552, at *8.

The conclusion that this suit is not a class action accords with rulings by the Fourth, Seventh, and Ninth Circuits. 2012 U.S. Dist. LEXIS 2526, [WL] at *6-8 (citing Madigan, 665 F.3d at 770-72; Washington, 659 F.3d at 846-48 [8]; and McGraw, 646 F.3d at 174-77); *see also* Kentucky ex rel. Conway v. Daymar Learning, Inc., No. 4:11-cv-103, 2012 U.S. Dist. LEXIS 39221, 2012 WL 1014989, *6 (W.D. Ky. Mar. 22, 2012). Nor is it in conflict with the Fifth Circuit's decision in *Caldwell*, which again did not resolve whether Louisiana's suit was a CAFA class action. Vioxx, 2012 U.S. Dist. LEXIS 2526, 2012 WL 10552, at *5-6 and 8 (quoting Caldwell, 536 F.3d at 429-30).

---

[7] An opinion from the United States District Court for the District of New Jersey aptly illustrates one way in which CAFA's legislative history can be manipulated to support either party's position. *See* Harvey v. Blockbuster, Inc., 384 F. Supp. 2d 749, 752-54 (D.N.J. 2005).

[8] *Madigan* and *Washington* involved the same issues pending before this Court: whether the attorney generals of Illinois, Washington, and California could, via *parens patriae* suit alleging antitrust violations by LCD panel makers, seek restitution, damages for their citizens, injunctive relief, and civil penalties in their own state courts. Madigan, 665 F.3d at 770; Washington, 659 F.3d at 846.

The Attorney General **[**34]** of South Carolina brought a similar suit in state court. The defendants removed the action to federal court for reasons akin to those argued here. The action was remanded. South Carolina v. AU Optronics Corp., No. 3:11-cv-731, 2011 U.S. Dist. LEXIS 104213, 2011 WL 4344079 (D.S.C. Sept. 14, 2011).

c. Mass Action

Under Caldwell, this suit is a mass action. It is a civil action "in which monetary relief claims of 100 or more persons are proposed to be tried jointly on the ground that the plaintiffs' claims involve common questions of law or fact." 28 U.S.C. § 1332(d)(11)(B)(i). *Caldwell* stands for the proposition that the words "persons" and "plaintiffs" in this subsection are to be defined as "real parties in interest." Here, as there, this suit is a mass action because there are more than 100 real parties in interest that seek a joint trial on common questions of law or fact. [9]

[*772] The State argues that a statutory exception requires remand. [10] CAFA denies federal jurisdiction to any mass action in which "all of the claims in the action are asserted on behalf of the general public (and not on behalf of individual claimants or members of a purported class) pursuant to a State statute specifically authorizing such action." *Id. § (d)(11)(B)(ii)(III)*. This will be referred to as the "general **[**38]** public exception."

Other courts have found the general public exception to exclude *parens patriae* suits from federal jurisdiction. *See* *Madigan, 665 F.3d at 772* ("By the plain language of that provision, too, this case is not a mass action."); *Connecticut v. Moody's Corp., No. 3:10-cv-546, 2011 U.S. Dist. LEXIS 780, 2011 WL 63905, at *4 (D. Conn. Jan. 5, 2011)* ("Because the State is a real party in interest and sues to protect and vindicate the rights of its public in general under *Conn. Gen. Stat. § 42-110m*, this action is not a 'mass action.'"); *see also* *South Carolina v. AU Optronics Corp., No. 3:11-cv-731, 2011 U.S. Dist. LEXIS 104213, 2011 WL 4344079, at *7 (D.S.C. Sept. 14, 2011)* (same). [11] Several commentators also believe this exception applies to *parens patriae* suits. *See* Marcy Hogan

---

[9] Although *Caldwell* forecloses it, there is a possibility that a "mass action" should be thought of as a "mass joinder." Courts apply CAFA's mass action provisions to mass joinders, and typically decline to apply the mass action provisions to suits lacking 100 named plaintiffs. *See* *Lowery, 483 F.3d at 1198* ("CAFA's mass action provisions extend **[**35]** federal diversity jurisdiction to certain actions brought individually by large groups of plaintiffs.") (evaluating an amended complaint listing over 400 plaintiffs under CAFA's mass action provisions); *Abrego Abrego, 443 F.3d at 678* (evaluating a complaint filed by 1,160 plaintiffs as a mass action); *Nevada v. Bank of America Corp., 672 F.3d 661, 672 (9th Cir. 2012)* (holding that the State of Nevada's *parens patriae* suit was not removable as a mass action because the state was the real party in interest and thus "the action [fell] 99 persons short of a 'mass action'"); *Anderson v. Bayer Corp., 610 F.3d 390, 393 (7th Cir. 2010)* ("The instant cases contain fewer than 100 plaintiffs and thus are not removable under the plain language of the statute."); *Nunn v. Monsanto Co., No. 4:11-cv-1657, 2011 U.S. Dist. LEXIS 128375, at *8 (E.D. Mo. Nov. 7, 2011)* ("In order for this Court to have jurisdiction under the mass action provisions, defendants must demonstrate that there really are 100 plaintiffs."); *TFT-LCD, 2011 U.S. Dist. LEXIS 17793, 2011 WL 560593, at *8* ("courts have held that the plaintiffs in a mass action must be individually named plaintiffs with their own direct claims in order to be counted toward CAFA's 100 person requirements.") **[**36]** (collecting cases); *see also* Nan S. Ellis, *The Class Action Fairness Act of 2005: The Story Behind the Statute*, *35 J. Legis. 76, 104-05 (2009)*; Hittner et al., Fed. Civ. Pro. Before Trial - 5th Cir. Ed. ¶ 2:3027 (2011) (mass actions require 100 or more plaintiffs and CAFA can be avoided "by filing separate lawsuits, each involving fewer than 100 plaintiffs").

Mississippi's own history sheds some light on the issue. Because Mississippi law prohibits class actions, mass joinders became a popular work-around. *See, e.g.,* *Harold's Auto Parts, Inc. v. Mangialardi, 889 So. 2d 493, 494 (Miss. 2004)* ("The case before us has endured seven amended complaints, and now involves the claims of 264 plaintiffs against 137 named defendants who have identified approximately 600 different employers where asbestos exposure might have taken place."). Mass joinders were arguably so popular that CAFA's drafters made them removable; at least, some lawyers have concluded as much: "The inclusion of 'mass actions' in [CAFA's] definition of 'class action' was a Congressional attempt to address notorious joinder abuses at the state level in Mississippi and other states." Anthony Rollo & Gabriel A. Crowson, *Mapping **[**37]** the New Class Action Frontier - A Primer on the Class Action Fairness Act and Amended Federal Rule 23*, 59 Consumer Fin. L. Q. Rep. 11, 14 (Spring-Summer 2005); *see also* S. Amy Spencer, *Once More Into the Breach, Dear Friends: The Case for Congressional Revision of the Mass Action Provisions in the Class Action Fairness Act of 2005*, *39 Loy. L.A. L. Rev. 1067, 1081 (2006)* (discussing the mass action provision's attempt to address "cases with claims joined under liberal West Virginia or Mississippi statutes"); 14B Charles A. Wright et al., Fed. Practice & Procedure § 3724, at 910-11 (4th ed. 2009) ("The mass actions made removable [by CAFA] typically are actions brought in states whose court systems do not provide for class actions."); Knight, *78 Fordham L. Rev. at 1878*.

[10] "Indeed, [CAFA] is not complete without its exceptions." *Hollinger, 654 F.3d at 569*.

Greer & Paul L. Peyronnin, *The Class Action Fairness Act of 2005, in* A Practitioner's Guide to Class Actions 241, 282 (Marcy Hogan Greer, ed. 2010) ("a mass action does not include state attorney general actions"); Peter M. Cummins, *Parens Patriae Suits Filed by State AGs*, For the Defense, Feb. **[*773]** 2008 ("CAFA similarly offers no hope to defendants in this situation because **[**39]** enforcement actions filed by State AGs are specifically excluded from the statute's coverage."); Catherine M. Sharkey, *CAFA Settlement Notice Provision: Optimal Regulatory Policy?*, *156 U. Pa. L. Rev. 1971, 1979 n.33 (2008)* ("CAFA permits defendants to remove 'mass actions' (or class-action-like lawsuits) from state to federal court, but it contains an exception for parens patriae actions."); Antitrust Modernization Commission, Report and Recommendations 272 (2007) ("CAFA also does not apply to *parens patriae* actions by state attorneys general."); Gregory P. Joseph, *Federal Class Action Jurisdiction After CAFA, Exxon Mobil and Grable*, *8 Del. L. Rev. 157, 181 (2006)*.

Whether the general public exception can be invoked in the Fifth Circuit is contested. *Caldwell* determined that the State of Louisiana's suit was a mass action without addressing whether the exception applied. **[**40]** One possible reason for this is that the Attorney General of Louisiana failed to argue the exception to the Fifth Circuit. *See* Brief of Appellant, State of Louisiana ex rel. Caldwell v. Allstate Ins. Co., No. 08-30465 (5th Cir. May 19, 2008); *see also* *South Carolina, 2011 U.S. Dist. LEXIS 104213, 2011 WL 4344079, at *4* (noting that the Attorney General of Louisiana waived another argument on appeal as well). The failure to brief the issue resulted in the State forfeiting any claim it had to the exception. *See* *United States v. Delgado, 672 F.3d 320, 329 n.6 (5th Cir. 2012)*. Nor did the district court need to consider the general public exception, as it considered the suit a class action only. *See* Caldwell Transcript at 21.

With no such procedural default here, this Court will proceed to consider whether this action satisfies CAFA's general public exception.

i. "Claims . . . Asserted on Behalf of the General Public"

The exception first states that all of the claims in the suit must be asserted on behalf of the general public, not individuals or a purported class. *28 U.S.C. § 1332(d)(11)(B)(ii)(III)*. The facts of *Caldwell* would not have satisfied this requirement. The State of Louisiana's claim for treble damages was **[**41]** brought on behalf of a limited subset of its population: those policyholders who had paid premiums to certain defendants for particular kinds of insurance policies. *See* *Ohio v. GMAC Mortg., LLC, 760 F. Supp. 2d 741, 748 (N.D. Ohio 2011)* (denying motion to remand *parens patriae* suit where relief sought "would benefit only a specific subset of Ohio citizens . . . and would do little to protect Ohio citizens generally").

In contrast, the complaint in our case alleges that the defendants, who control over 80% of the market for LCD panels, have substantially affected a product contained in laptops, desktop computer monitors, mobile phones, digital cameras, video cameras, televisions, motor vehicles, and other electronic devices commonly used and purchased in everyday life. Docket No. 1-1, at 4 and 17. [12] United States census data shows that during the relevant time period, computers and mobile phones were present in more than half of America's households. Docket No. 1-1, at 4 n.1. [13] The alleged price-fixing was so **[*774]** broad and pervasive as to affect the general public, and the State's claims in this suit are asserted on behalf of the general public. *See* *TFT-LCD, 2011 U.S. Dist. LEXIS 17793, 2011 WL 560593, at *5* ("In **[**42]** contrast to *Comcast* and *Caldwell*, where the States sued on behalf of limited groups of private parties (premium cable subscribers and insurance policyholders), here the States

---

[11] At least one court has found the exception applicable outside of the *parens patriae* context, in a case where the sole plaintiff was a citizen suing on behalf of the general public. *Breakman v. AOL LLC, 545 F. Supp. 2d 96, 100-01 (D.D.C. 2008)*. The defendant conceded that the general public exception applied. *Id. at 101*.

[12] The State further alleged that LCD panels are not minor components of those devices, claiming that LCD technology has a "virtually 100% market share for laptops and flat panel computer monitors, and at least 80% market share for flat panel TVs." Docket No. 1-1, at 14.

[13] Courts may take judicial notice of census data. *Hollinger, 654 F.3d at 571-72* ("United States census data is an appropriate and frequent subject of judicial notice.") (citations omitted).

are suing on behalf of all consumers in their respective states who purchased a wide range of allegedly price-fixed products.").

There also are significant differences between the insurance market at issue in *Caldwell* and the electronics market here that broaden the latter's reach into the general population. The insurance industry has a paper trail documenting each agreement between insured and insurer, and more importantly, each insured is readily identifiable. But electronics retailers permit customers to pay with cash and do not record personally identifiable **[**43]** information on every transaction. It is unlikely that the defendants have records identifying every Mississippian who purchased a product containing a LCD panel between 1996 and 2006. There also is a person-to-person resale market of electronic goods that does not exist in the insurance industry, which further expands the percentage of the population affected by the violations alleged in this suit. Moreover, the sheer number of LCD panel products purchased and used by consumers - including computers, mobile phones, toys, car navigation systems, and televisions, among others - indisputably fall within the state's quasi-sovereign interest. If this collection of items did not implicate the overall economic well-being of Mississippi's citizens, then the Court would be hard pressed to find something which does.

ii. Pursuant to a "Statute Specifically Authorizing Such Action"

The second and final element of the general public exception is satisfied, as the claims in this action are brought under state statutes specifically authorizing these kinds of suits.

The Attorney General of Mississippi is generally empowered by a state law granting him "the powers of the Attorney General at common law." **[**44]** *Miss. Code § 7-5-1*; *see* *Hood ex rel. Mississippi v. Microsoft Corp., 428 F. Supp. 2d 537, 544-45 (S.D. Miss. 2006)*. Under Mississippi common law, the Attorney General has the "power and authority . . . to institute, conduct and maintain all suits necessary for the enforcement of the laws of the State, preservation of order and the protection of public rights." *Hood v. AstraZeneca Pharms., LP, 744 F. Supp. 2d 590, 595 (N.D. Miss. 2010)* (citations omitted). *Parens patriae* suits to protect the State's quasi-sovereign interest in its citizens' economic well-being are a part of that common law tradition. *See* Part III.A, *infra*. A number of state and federal courts have recognized the Attorney General's *parens patriae* authority to represent Mississippi's consumers. *See BASF*, 2006 WL 308378, at *3 (collecting cases); *Microsoft, 428 F. Supp. 2d at 544-46*.

More specifically, the MCPA and the MAA provide statutory grounds for the relief sought in this suit. Under the MCPA,

> [w]henever the Attorney General has reason to believe that any person is using, has used, or is about to use any method, act or practice prohibited by Section 75-24-5, and that proceedings would be in the public interest, he may **[**45]** bring an action in the name of the state against such person to restrain by temporary **[*775]** or permanent injunction the use of such method, act or practice.

Miss. Code § 75-24-9. The next section confirms that in those suits, "[t]he court may make such additional orders or judgments, including restitution, as may be necessary to restore to any person in interest any monies or property, real or personal, which may have been acquired by means of any practice prohibited by this chapter." *Id.* *§ 75-24-11*. Civil penalties, investigative costs, and reasonable attorney's fees are authorized by a later section. *Id.* *§ 75-24-19(1)(b)*.

The MAA not only authorizes persons to recover damages for anti-competitive behaviors, *id.* *§ 75-21-9*, but permits the Attorney General and the Attorney General alone to recover civil penalties for those behaviors, *id.* *§ 75-21-7*. "This statute clearly gives the Attorney General of the State the authority to bring suit in the name of the State for violations of Mississippi ***antitrust law***." *Moore ex rel. State of Miss. v. Abbott Laboratories, Inc., 900 F. Supp. 26, 31 (S.D. Miss. 1995)*. Further, a Mississippi state court has found punitive damages to be available for violations **[**46]** of the MAA. *BASF*, 2006 WL 308378, at *11.

Taken together, these statutes authorize the Attorney General to receive all of the relief sought in the complaint. Because "all of the claims in the action are asserted on behalf of the general public (and not on behalf of individual claimants or members of a purported class)," and are brought "pursuant to a State statute specifically authorizing such action," this suit satisfies the general public exception. 28 U.S.C. § 1332(d)(11)(B)(ii)(III).

Having determined that this case is neither a class action nor a mass action that does not fall into a statutory exception, the case will be remanded to state court.

D. The Future of This Case

An exception to the usual law of remand permits the defendants to seek an immediate appeal. *See* Road Home, 524 F.3d at 702 n.1 (quoting 28 U.S.C. § 1453(c)(1)). Should the Fifth Circuit reverse and remand this case here as a CAFA mass action, the Court will now describe its understanding of what the law requires upon its return. All involved have an interest in there being only one appeal.

If returned here as a mass action, the case will be severed in accordance with the command of 28 U.S.C. § 1332(d)(11)(B)(i). The **[**47]** State's interests in permanent injunctive relief; civil penalties; restitution for losses incurred by the State in its proprietary capacity; and restitution for losses incurred by individuals [14] claiming less than or equal to $75,000 each, including individual punitive damages but excluding interest and costs; will all be remanded to state court. In mass actions, federal jurisdiction extends "only" to individual claims that exceed $75,000. 28 U.S.C. § 1332(d)(11)(B)(i). This Court's supplemental jurisdiction cannot be extended to those individuals with claims under $75,000. *See* Lowery, 483 F.3d at 1206 n.51.

The defendants argue that the State's request for punitive damages suffices to permit every individual claim to remain in federal court, because the aggregate amount of punitive damages exceeds $75,000 and is imputed to each individual. Docket No. 1, at 8 (citing Allen v. R & H Oil & Gas Co., 63 F.3d 1326, 1335-36 (5th Cir. 1995)). But Allen was determined to conflict with a previous panel decision and therefore is no longer good law as to that point. "Because Lindsey is the earliest, **[**48]** and thus controlling, decision in this circuit, **[*776]** the punitive damages claims of the putative class cannot be aggregated and attributed to each plaintiff to meet the jurisdictional requirement." H&D Tire and Automotive-Hardware, Inc. v. Pitney Bowes Inc., 227 F.3d 326, 330 (5th Cir. 2000) (discussing Lindsey v. Alabama Tel. Co., 576 F.2d 593 (5th Cir. 1978)). Other circuits have recognized that *Pitney Bowes* effectively overruled this part of *Allen. E.g.,* Martin v. Franklin Capital Corp., 393 F.3d 1143, 1148 (10th Cir. 2004); Smith v. GTE Corp., 236 F.3d 1292, 1301 (11th Cir. 2001).

It is not clear how much in restitution the State is seeking on behalf of individuals. Assuming without deciding that this case merits punitive damages under Mississippi law, the parties are bound by constitutional limits on punitive damages. *See* State Farm Mut. Auto. Ins. Co. v. Campbell, 538 U.S. 408, 425, 123 S. Ct. 1513, 155 L. Ed. 2d 585 (2003) ("in practice, few awards exceeding a single-digit ratio between punitive and compensatory damages, to a significant degree, will satisfy due process"); *see also* Church v. Nationwide Ins. Co., No. 3:10-cv-636, 2011 U.S. Dist. LEXIS 58956, 2011 WL 2112416, at *4 n.2 (S.D. Miss. May 26, 2011) (citing Munro v. Golden Rule Ins. Co., 393 F.3d 720, 721 (7th Cir. 2004) **[**49]** (discussing constitutional limits on punitive damages imposed in cases of simple economic loss)). Again assuming that the maximum punitive damages allowed under due process would apply, an individual claim could remain in state court by seeking only an amount of restitution, plus a punitive damages multiplier in accordance with *Campbell*, that totals $75,000 or less. *See id.; accord* Smith, 236 F.3d at 1304 (applying similar reasoning).

Whether the case will develop in that fashion remains to be seen; the purpose of this section is to minimize the necessity for a second appeal on a jurisdictional question by resolving the parties' dispute over *Allen*. This Court

[14] In this discussion, "individuals" and "individual claims" includes consumers and local governments.

recognizes uncertainty about the application of the $75,000 amount in controversy clause, *see* Lowery, 483 F.3d at 1203-07, and certifies that guidance would help this case proceed should it remain in federal court. [15]

There is another practical concern that **[**51]** could be clarified on appeal. In a later part of CAFA - in a sub-section not presented to the *Caldwell* court - the statute states that mass actions removed to federal court "shall not thereafter be transferred to any other court pursuant to section 1407, or the rules promulgated thereunder, unless a majority of the plaintiffs in the action request transfer **[*777]** pursuant to section 1407." 28 U.S.C. § 1332(d)(11)(C)(i). "[S]ection 1407" refers to the federal statute authorizing and governing multidistrict litigation. *See id.* § 1407. CAFA thus bars a transfer to a MDL court unless a majority of plaintiffs in the mass action consent. [16]

The concern is this: in our case, who may grant or deny such consent? The State of Mississippi is the sole plaintiff. While Mississippi's consumers constitute hundreds of thousands if not millions of real parties in interest, they are not plaintiffs and there is no mechanism through which they can consent to transfer this case to a MDL court. In *Caldwell*, the real parties in interest were fewer and identifiable, and there **[**52]** was an opportunity for them to be found and offered a chance to participate in the case pursuant to the statute. In contrast, applying this sub-section to our real parties in interest would require a substantial number of people to be polled about their preferred forum. This is not an outcome directed by the plain language of CAFA. Nor is it one that comports with traditional standards of judicial economy and efficiency. *See* State of N.J. v. State of N.Y., 345 U.S. 369, 372-73, 73 S. Ct. 689, 97 L. Ed. 1081 (1953) (describing, in a *parens patriae* action brought pursuant to the Supreme Court's original jurisdiction, "a working rule for good judicial administration" that places a "practical limitation on the number of citizens . . . who would be entitled to be made parties" alongside the state as sovereign). If this case is returned to federal court, the parties will be asked to provide supplemental briefing on how to resolve this issue.

E. Federal Question Under the Sherman Act

As recited above, "[t]he party seeking removal bears the burden of showing that federal jurisdiction is proper," Lone Star, 579 F.3d at 528 (citation omitted), and "any doubt as to the propriety of removal should be resolved in favor of remand," **[**53]** Hot-Hed, 477 F.3d at 323 (citations omitted).

1. Arguments

The State contends that state antitrust remedies supplement federal remedies and are not completely preempted by them. Docket No. 20, at 11-12. It claims that the defendants' commercial activities are subject to the MAA and that any substantive defect in the complaint is for the state courts to resolve. *Id.* at 13-15. The State argues that

---

[15] Other courts have recognized the difficulty in construing CAFA's mass action provisions. The Eleventh Circuit found that "CAFA's mass action provisions present an opaque, baroque maze of interlocking cross-references that defy easy interpretation." Lowery, 483 F.3d at 1198. The Ninth Circuit called the mass action **[**50]** language "bewildering" and once declined to rule on some of its "thorniest" provisions. Abrego Abrego, 443 F.3d at 682, 686. Commentators have agreed. Andrew D. Weinstock & Philip G. Watson, *Where Defendants Fear to Tread*?, For The Defense, Apr. 2009, at 15, 17 ("Unfortunately, the language of the [mass action] provision is dense and ambiguous. . . . [Congress] passed a law that is puzzling, overly complex, and at times contradictory."); Spencer, 39 Loy. L.A. L. Rev. at 1073 ("CAFA's plain language by no means provides clear guidelines for attorneys or the judiciary.").

Fortunately, then, mass actions "are apparently not common. Clermont and Eisenberg's study [of federal cases decided under CAFA between February 18, 2005 and August 18, 2007] unearthed only two cases that involved a mass action and only three others that discussed a mass action." Stephen B. Burbank, *The Class Action Fairness Act of 2005 in Historical Context: A Preliminary View*, 156 U. Pa. L. Rev. 1439, 1449 n.29 (2008) (citing Clermont & Eisenberg, *CAFA Judicata: A Tale of Waste and Politics*, 156 U. Pa. L. Rev. 1553, 1566 n.34 (2008) (describing federal mass actions as "rare")).

[16] In other cases, this sub-section has been moot because the action had already been transferred to a MDL court. *E.g.,* Vioxx, 2012 U.S. Dist. LEXIS 2526, 2012 WL 10552.

federal question jurisdiction here is foreclosed by existing Supreme Court caselaw. Docket Nos. 20, at 11-12; 29, at 17-19.

The defendants respond that the Sherman Act, *15 U.S.C. § 7 et seq.*, completely preempts Mississippi's antitrust laws in this instance because the alleged violations are interstate and international in nature. Docket No. 25, at 14. "Mississippi antitrust laws apply only to intrastate activity." *Id.* (citing *Standard Oil Co. of Ky. v. State, 107 Miss. 377, 65 So. 468, 470-71 (Miss. 1914))*. They acknowledge caselaw holding that there is no complete federal preemption in this area, but argue it is inapposite because "the Attorney General here has artfully pleaded phantom Mississippi state antitrust remedies, which do not exist for interstate conduct and transactions." *Id.* at 15.

2. Discussion

"We **[**54]** start with the long-established axiom that a plaintiff is master of his complaint and may generally allege only a state law cause of action even where a federal remedy is also available." *Bernhard* ***[*778]*** *v. Whitney Nat'l Bank, 523 F.3d 546, 551 (5th Cir. 2008)* (citation omitted). "In determining whether a case arises under federal law, we look to whether the plaintiff's well-pleaded complaint raises issues of federal law." *Budget Prepay, Inc. v. AT&T Corp., 605 F.3d 273, 278 (5th Cir. 2010)* (quotation marks and citation omitted).

The defendants have invoked "the 'artful pleading' doctrine, which is an 'independent corollary' to the well-pleaded complaint rule." *Bernhard, 523 F.3d at 551* (citation omitted). "Under this principle, even though the plaintiff has artfully avoided any suggestion of a federal issue, removal is not defeated by the plaintiff's pleading skills in hiding the federal question." *Id.* (citation omitted). But the artful pleading doctrine "applies *only* where state law is subject to complete preemption." *Id.* (citation omitted).

"[A] **[**55]** state claim may be removed to federal court . . . when a federal statute wholly displaces the state-law cause of action through complete pre-emption." *Beneficial Nat'l Bank v. Anderson, 539 U.S. 1, 8, 123 S. Ct. 2058, 156 L. Ed. 2d 1 (2003)*. In *Beneficial*, "the dispositive question" was whether "the National Bank Act provide[d] the exclusive cause of action for usury claims against national banks." *Id. at 9*. A review of that Act and "the special nature of federally chartered banks" supported that the answer was 'yes'; federal jurisdiction was appropriate. *Id. at 10*. This was a rare instance of complete preemption, which is an "extraordinary" finding. *Metropolitan Life Ins. Co. v. Taylor, 481 U.S. 58, 65, 107 S. Ct. 1542, 95 L. Ed. 2d 55 (1987)*; *see* *Hoskins v. Bekins Van Lines, 343 F.3d 769, 773 (5th Cir. 2003)* (collecting the few cases finding complete preemption).

"The question in complete preemption analysis is whether Congress intended the federal cause of action to be the exclusive cause of action for the particular claims asserted under state law." *Elam v. Kansas City S. Ry. Co., 635 F.3d 796, 803 (5th Cir. 2011)* (quotation marks and citations omitted). Courts presume that state laws are not preempted until Congress clearly states otherwise. *Id. at 803-04*. **[**56]** "This assumption applies with 'particular force' when Congress legislates in a field traditionally occupied by state law." *Id. at 804* (citation omitted).

The Supreme Court has concluded that "Congress intended the federal antitrust laws to supplement, not displace, state antitrust remedies." *California v. ARC America Corp., 490 U.S. 93, 102, 109 S. Ct. 1661, 104 L. Ed. 2d 86 (1989)* (citations omitted). "And on several prior occasions, the Court has recognized that the federal antitrust laws do not pre-empt state law." *Id.* (citations omitted); *Moore, 900 F. Supp. at 33*.

The defendants concede the existence of *ARC America*, even as they observe that it did not address Mississippi law. Docket No. 25, at 15. They have not pointed to any statute indicating that Congress intended federal antitrust laws to completely preempt state antitrust laws and be the exclusive remedy for claimed violations of state antitrust laws. The defendants further acknowledge that "the Fifth Circuit has not decided whether a Mississippi state antitrust claim based on interstate activity is preempted by the Sherman Act," and rely instead upon two district court decisions in New York that allegedly found state antitrust laws preempted. Docket Nos. 1, **[**57]** at 11; 25, at 17-18.

That is not enough. The defendants have not met their burden to show that federal antitrust laws completely preempt Mississippi's antitrust laws. There is no federal question jurisdiction. *See* *Adams v. General Motors*

Acceptance Corp., 307 F. Supp. 2d 812, 817 (N.D. Miss. 2004) (citing **[*779]** *Waste Control Specialists, LLC v. Envirocare of Tex., Inc., 199 F.3d 781, 784 (5th Cir.)* (holding that federal court lacked jurisdiction to consider whether state law claims were viable "considering the absence of complete preemption in the antitrust context"), *withdrawn and superseded in part*, *207 F.3d 225 (5th Cir. 2000))*.

IV. Conclusion

The Attorney General of Mississippi filed this action in a Mississippi state court, to enforce Mississippi's consumer protection and antitrust laws, for the protection of the economic well-being of Mississippi's consumers and governmental entities. *See* *McGraw, 646 F.3d at 178*. The State's motion to remand [Docket No. 19] is granted. The defendants' motion to strike [Docket No. 30] is granted. This cause will be remanded to the Chancery Court of Hinds County, Mississippi.

SO ORDERED, this the third day of May, 2012.

/s/ Carlton W. Reeves

UNITED STATES **[**58]** DISTRICT JUDGE

Astrotel, Inc. v. Verizon Fla., LLC

United States District Court for the Middle District of Florida, Tampa Division

May 4, 2012, Decided; May 4, 2012, Filed

Case No. 8:11-cv-2224-T-33TBM

Reporter

2012 U.S. Dist. LEXIS 63172 *; 2012-1 Trade Cas. (CCH) P77,887; 2012 WL 1581596

LexisNexis® Headnotes

Civil Procedure > ... > Pleadings > Complaints > General Overview

HN1[] **Pleadings, Complaints**

A demand for relief is not a complaint count.

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN2[] **Defenses, Demurrers & Objections, Motions to Dismiss**

On a motion to dismiss, a court accepts as true all the allegations in the complaint and construes them in the light most favorable to the plaintiff. Further, the court favors the plaintiff with all reasonable inferences from the allegations in the complaint.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN3[] Motions to Dismiss, Failure to State Claim

While a complaint attacked by a Fed. R. Civ. P. 12(b)(6) motion to dismiss does not need detailed factual allegations, a plaintiff's obligation to provide the grounds of his entitlement to relief requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do. Factual allegations must be enough to raise a right to relief above the speculative level. Further, courts are not bound to accept as true a legal conclusion couched as a factual allegation.

Antitrust & Trade Law > Regulated Industries > Communications > Telecommunications Act

HN4[] Communications, Telecommunications Act

Competitors in the telecommunications industry have no duty to cooperate with one another. Courts should be hesitant to enforce antitrust liability where there is a complex regulatory scheme already in place (as is the case with the Telecommunications Act of 1996).

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN5[] Regulated Practices, Price Fixing & Restraints of Trade

As a general matter, ***antitrust law*** does not restrict the long recognized right of a trader or manufacturer engaged in business, freely to exercise his own independent discretion as to the parties with whom he will deal.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

HN6[] Price Fixing & Restraints of Trade, Horizontal Refusals to Deal

Although Trinko forestalls antitrust claims based on refusals to deal with a competitor, Trinko does not prevent a plaintiff from bringing antitrust claims based on other valid antitrust theories.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN7[] Scope, Monopolization Offenses

Section 2 (15 U.S.C.S. § 2) of the Sherman Act prohibits monopolization, attempts to monopolize, and conspiracy to monopolize any part of trade or commerce. 15 U.S.C.S. § 2. The Act and subsequent case law have distinguished anticompetitive behavior from growth or development as a consequence of a superior product, business acumen, or historic accident.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN8[] Actual Monopolization, Claims

The offense of monopolization under Sherman Act § 2 (15 U.S.C.S. § 2) has two elements: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power. Monopoly power is defined as the power to control prices or exclude competition, and may be inferred from a firm's predominant share of a market. This market must be defined for both the product and the location where the alleged monopolizer is operating.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN9[] Actual Monopolization, Monopoly Power

The second prong of Grinnell requires the willful acquisition or maintenance of monopoly power. However, the line between lawful competitive conduct and unlawful monopolization is difficult to draw. It is sometimes difficult to distinguish robust competition from conduct with long-term anticompetitive effects. Unlawful anticompetitive conduct is conduct without a legitimate business purpose that makes sense only because it eliminates competition. Examples of such unlawful anticompetitive conduct include instituting sham litigation, providing false information to retailers, and systematically removing a competitor's display racks or products from retail establishments. However, even an act of pure malice by one business competitor against another, without more, fails to state a claim under the federal antitrust laws.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

HN10[] Attempts to Monopolize, Elements

To state a claim for attempted monopolization, a plaintiff must show (1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power. Anticompetitive conduct is conduct which unfairly tends to destroy competition itself. In addition, ***antitrust law*** was created for the protection of competition not competitors. To be actionable, a defendant's conduct must harm the competitive process and thereby harm consumers. Harm to one or more competitors does not suffice.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

HN11[] Attempts to Monopolize, Elements

A plaintiff claiming attempted monopolization must allege that the defendant specifically intended to control prices or destroy competition and took action to effectuate that result.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

HN12[] Regulated Practices, Monopolies & Monopolization

Monopoly leveraging involves a firm using its market power in one market to gain more market share in another market, other than by competitive means.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN13[] **Price Fixing & Restraints of Trade, Tying Arrangements**

Tying is an agreement by a party to sell one product but only on the condition that the buyer also purchases a different (or tied) product.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN14[] **Tying Arrangements, Sherman Act Violations**

Not all tying arrangements violate the Sherman Act; a plaintiff must allege five elements of an illegal tying arrangement: (1) an actual tying and tied product, (2) some evidence of coercion showing that the seller in fact forced the buyer to purchase the tied product, (3) some evidence that the seller has sufficient market power to carry out the coercion, (4) anticompetitive effects in the tied market, and (5) more than an insubstantial amount of interstate commerce in the tied product market.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN15[] **Price Fixing & Restraints of Trade, Tying Arrangements**

The essential nature of a tying arrangement requires that the products in the first element, the tying and tied product, be distinct. Distinctness in tying claims rests on the character of demand for the two items, not just the functional relationship between them.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > General Overview

HN16[] **Racketeer Influenced & Corrupt Organizations, Claims**

To state a Racketeer Influenced and Corrupt Organizations Act claim, a plaintiff must plead (1) that the defendant (2) through the commission of two or more acts (3) constituting a "pattern" (4) of "racketeering activity" (5) directly or indirectly participates in the specific prohibited activity in (6) an "enterprise" (7) that affects interstate or foreign commerce.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > Fraud

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > Elements

Criminal Law & Procedure > ... > Fraud Against the Government > Mail Fraud > General Overview

Criminal Law & Procedure > ... > Fraud > Wire Fraud > General Overview

HN17[] **Claims, Fraud**

The federal Racketeer Influenced and Corrupt Organizations Act statute includes both mail and wire fraud in the definition of "racketeering activity." *18 U.S.C.S. § 1961(1)(B)*.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

Torts > ... > Fraud & Misrepresentation > Actual Fraud > General Overview

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN18[] **Heightened Pleading Requirements, Fraud Claims**

A plaintiff's allegations of fraud must not only comply with the pleading requirements articulated in Twombly and Iqbal but also with the heightened pleading standard of *Fed. R. Civ. P. 9(b)*, which requires a party alleging fraud to state with particularity the circumstances underlying the fraud claim. To meet this burden, the plaintiff must allege: (1) the precise statements, documents, or misrepresentations made; (2) the time, place, and person responsible for the statement; (3) the content and manner in which these statements misled the plaintiff; and (4) what the defendant gained by the alleged fraud.

Business & Corporate Compliance > ... > Federal Unfair Competition Law > False Advertising > Elements of False Advertising

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Lanham Act > Scope

HN19[] **False Advertising, Elements of False Advertising**

See *15 U.S.C.S. § 1125(a)(1)(B)*.

Business & Corporate Compliance > ... > Federal Unfair Competition Law > False Advertising > Elements of False Advertising

HN20[] **False Advertising, Elements of False Advertising**

Although the Lanham Act does not define either "advertising" or "promotion," courts within the Eleventh Circuit use the following four-part test set forth in Gordon & Breach Science Publishers S.A. v. American Institite of Physics and American Physical Society in determining whether a representation falls within the ambit of the Lanham Act: In order for representations to constitute "commercial advertising or promotion" under the Lanham Act, they must be (1) commercial speech; (2) by a defendant who is in commercial competition with the plaintiff; (3) for the purpose of influencing consumers to buy the defendant's goods or services. While the representations need not be made in a "classical advertising campaign," but may consist instead of more informal types of "promotion," the representations (4) must be disseminated sufficiently to the relevant purchasing public to constitute "advertising" or "promotion" within that industry.

Torts > ... > Business Relationships > Intentional Interference > Elements

Torts > ... > Contracts > Intentional Interference > Elements

HN21[] **Intentional Interference, Elements**

In order to properly plead a claim for tortious interference with a contractual or business relationship under Florida law, a plaintiff must assert: (1) the existence of a business relationship that affords the plaintiff existing or prospective legal rights; (2) the defendant's knowledge of the business relationship; (3) the defendant's intentional and unjustified interference with the relationship; and (4) damage to the plaintiff.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

HN22[] **Intentional Interference, Elements**

A claim for interference with a prospective business relation will lie if the parties' understanding would have been completed if not for the defendant's intervention. However, no cause of action exists for tortious interference with a business's relationship to the community at large.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN23[] **Regulated Practices, Trade Practices & Unfair Competition**

Unfair competition is a creature of common law and serves as an umbrella for all statutory and nonstatutory causes of action arising out of conduct that is contrary to honest practice in industrial and commercial matters.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

HN24[] **State Regulation, Claims**

To state a claim for unfair competition under Florida common law a party must plead (1) deceptive or fraudulent conduct of a competitor and (2) likelihood of consumer confusion.

Torts > Business Torts > Trade Libel > Elements

HN25[] **Trade Libel, Elements**

The reputation of a corporation can be injured by a false publication of defamatory matter, which prejudices its trade or business, or deters third persons from dealing with it.

Torts > ... > Concerted Action > Civil Conspiracy > Elements

HN26[] **Civil Conspiracy, Elements**

A civil conspiracy requires: (a) an agreement between two or more parties, (b) to do an unlawful act or to do a lawful act by unlawful means, (c) the doing of some overt act in pursuance of the conspiracy, and (d) damage to the plaintiff as a result of the acts done under the conspiracy.

Torts > ... > Concerted Action > Civil Conspiracy > Defenses

HN27[] **Civil Conspiracy, Defenses**

Pursuant to the intra-corporate conspiracy doctrine, alleged agreements between an employee and the company the employee works for cannot form the basis for a civil conspiracy claim. The officers of a single firm are not separate economic actors pursuing separate economic interests, so agreements among them do not suddenly bring together economic power that was previously pursuing divergent goals. This doctrine also applies to a parent-subsidiary relationship: there can be little doubt that the operations of a corporate enterprise organized into divisions must be judged as the conduct of a single actor and the coordinated activity of a parent and its wholly owned subsidiary must be viewed as that of a single enterprise.

Torts > ... > Concerted Action > Civil Conspiracy > Defenses

HN28[] Civil Conspiracy, Defenses

If a subsidiary is wholly owned by a parent company, the intra-corporate conspiracy doctrine cannot be overcome. However, if the subsidiary is not a wholly owned subsidiary, a plaintiff may be able to plead factors showing separateness of the subsidiary from its parent company in order to overcome the doctrine.

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN29[] Equitable Relief, Quantum Meruit

To state a claim for unjust enrichment, a plaintiff must plead the following elements: (1) the plaintiff has conferred a benefit on the defendant; (2) the defendant has knowledge of the benefit; (3) the defendant has accepted or retained the benefit conferred; and (4) the circumstances are such that it would be inequitable for the defendant to retain the benefit without paying fair value for it.

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN30[] Equitable Relief, Quantum Meruit

Liability in unjust enrichment has nothing to do with fault. Indeed, an unjust enrichment claim should be premised on circumstances under which it would be inequitable for the defendant to retain the benefit without paying for it. The law of unjust enrichment is concerned solely with enrichments that are unjust independently of wrongs and contracts. When the plaintiff relies on a breach of a contract to supply the "unjustness" of the defendant's holdings, the right on which he or she relies arises from the breach of the contract, not from an unjust enrichment; analogously, when the plaintiff relies on a wrong to supply the "unjust factor," the causative event is a wrongful enrichment rather than an unjust enrichment. The paradigm examples of unjust enrichment are mistaken transfers. Where a plaintiff predicates its unjust enrichment claim on wrongful conduct of a defendant, then the plaintiff's right of recovery, if any, arises from the wrong of the alleged tort rather than unjust enrichment.

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN31[] Equitable Relief, Quantum Meruit

As soon as a claimant relies on a wrong to supply the unjust factor, the right on which he relies arises from that wrong, not from unjust enrichment. Thus, the plaintiff's right of recovery, if any, for the alleged wrongful conduct of the defendant arises in tort or statutory law, which, if proven, might entitle the plaintiff to damages, rather than unjust enrichment. The law of unjust enrichment is concerned solely with enrichments that are unjust independent of alleged wrongs.

Civil Procedure > Remedies > Equitable Accountings > Grounds for Accountings

HN32[] **Equitable Accountings, Grounds for Accountings**

To successfully plead a claim for equitable accounting under Florida law, a plaintiff must allege that (1) a fiduciary relationship or complex transaction exists, and (2) a remedy at law would be inadequate.

Business & Corporate Law > Agency Relationships > Fiduciaries > Definitions

Business & Corporate Law > Agency Relationships > Fiduciaries > Formation

HN33[] **Fiduciaries, Definitions**

A fiduciary relationship may be either express or implied. Express fiduciary relationships are created by contract, such as principal/agent, or can be created by legal proceedings in the case of a guardian/ward. A fiduciary relationship which is implied in law is based on the circumstances surrounding the transaction and the relationship of the parties and may be found when confidence is reposed by one party and a trust accepted by the other.

Judges: VIRGINIA M. HERNANDEZ COVINGTON, UNITED STATES DISTRICT JUDGE.

Opinion by: VIRGINIA M. HERNANDEZ COVINGTON

Opinion

ORDER

This matter comes before the Court pursuant to Defendants Verizon Florida, LLC and Verizon Communications, Inc.'s Motion to Dismiss (Doc. # 27), filed on November 4, 2011. Plaintiff AstroTel, Inc., filed a Response to Verizon's Motion to Dismiss on December 2, 2011. (Doc. # 32). For the reasons that follow, the Court grants in part and denies in part Verizon's Motion to Dismiss.

I. Factual and Procedural Background

AstroTel is a Bradenton, Florida-based company that provides basic local telephone services, **[*2]** enhanced services, and Internet access to Florida residences and small to mid-size businesses. (Doc. # 9 at ¶ 7). AstroTel also operates its own telecommunications network which provides services to more than half of the state. (Id.). In providing these services, AstroTel directly competes with Verizon. [1] (Id. at ¶ 17). Due to the nature of the telephone industry, significant infrastructure is required to provide both basic and enhanced telephone services. [2] (Id. at ¶¶ 19-21). Verizon currently owns the only facilities capable of providing these services in AstroTel's operating area. (Id. at ¶ 23). AstroTel leases access to portions of Verizon's network such as local loops and transports, so that AstroTel may provide basic local phone services. (Id. at ¶ 22).

AstroTel filed suit against Verizon (Doc. # 8) and subsequently filed an Amended Complaint on **[*3]** October 3, 2011. (Doc. # 9). In the Amended Complaint AstroTel describes numerous acts of allegedly anticompetitive behavior by Verizon, including:

> (1) failing to timely install services ordered by AstroTel;
> (2) failing to meet due dates without reasonable explanation;
> (3) ordering field installers to close AstroTel's orders as completed even though they were not complete;
> (4) repeatedly billing for services not installed;
> (5) disparaging and misrepresenting AstroTel's products to the public and damaging AstroTel's reputation;
> (6) supplying false bills at rates substantially higher than those approved by the state;
> (7) using AstroTel's confidential information for Verizon's own marketing purposes in an attempt to persuade AstroTel subscribers to switch companies;
> (8) failing or refusing to provide access to facilities information; and
> (9) cross-subsidizing its unregulated services such as Internet Access Services, wireless mobile telephone service and television service with its regulated local telecommunications services creating an illegal price squeeze in an effort to prevent AstroTel from competing in the market for local telephone service.

(Id. at ¶ 8).

The Amended Complaint contains six **[*4]** counts arising under federal law: (Count 1) monopolization, (Count 2) attempted monopolization, (Count 3) monopoly leveraging, (Count 4) tying, (Count 5) civil RICO, and (Count 6) Lanham Act violations. The remaining seven counts arise under Florida law: (Count 7) tortious interference with contract, (Count 8) interference with prospective business relations, (Count 9) unfair competition, (Count 10) business defamation and disparagement, (Count 11) civil conspiracy, (Count 12) unjust enrichment, and (Count 13) equitable accounting. [3] Verizon moves to dismiss the Amended Complaint in its entirety pursuant to *Fed. R.Civ. P. 12(b)(6)*.

II. Legal Standard

HN2[] On a motion to dismiss, this Court accepts as true all the allegations in the complaint and construes them in the light most favorable to the plaintiff. *Jackson v. Bellsouth Telecomms., 372 F.3d 1250, 1262 (11th Cir. 2004)*. Further, this Court favors the plaintiff with **[*5]** all reasonable inferences from the allegations in the complaint. *Stephens v. Dep't of Health & Human Servs., 901 F.2d 1571, 1573 (11th Cir. 1990)* ("On a motion to dismiss, the facts stated in [the] complaint and all reasonable inferences therefrom are taken as true.").

However, the Supreme Court explains that:

---

[1] Verizon Communications, Inc. is the parent corporation of Verizon Florida, LLC. (Doc. # 9 at ¶ 5). The Court collectively refers to both entities as "Verizon" herein.

[2] Basic local telephone services connect one customer to another using telephone lines or wires. (Id. at ¶ 18). Enhanced services include features such as voice mail. (Id.).

[3] AstroTel's Amended Complaint also contains "Count 14" in which AstroTel requests a permanent injunction. As ***HN1***[] a demand for relief is not a complaint count, it is not necessary to examine AstroTel's request for injunctive relief under the rubric of *Rule 12(b)(6), Fed.R.Civ.P.*

> HN3[] While a complaint attacked by a Rule 12(b)(6) motion to dismiss does not need detailed factual allegations, a plaintiff's obligation to provide the grounds of his entitlement to relief requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do. Factual allegations must be enough to raise a right to relief above the speculative level.

Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)(internal citations omitted). Further, courts are not "bound to accept as true a legal conclusion couched as a factual allegation." *Papasan v. Allain, 478 U.S. 265, 286, 106 S. Ct. 2932, 92 L. Ed. 2d 209 (1986)*.

By attaching various documents to the Motion to Dismiss and by referencing facts and legal actions, including arbitration proceedings, not mentioned in the Amended Complaint, Verizon has invited the Court to broaden the scope of its review beyond the four corners of **[*6]** the Amended Complaint. The Court declines to do so. [4]

III. Analysis

A. Antitrust Liability under Trinko

Verizon challenges the sufficiency of AstroTel's antitrust claims on the basis of *Verizon Commc'ns, Inc. v. Law Offices of Curtis V. Trinko, 540 U.S. 398, 408-09, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)* and its progeny. In a case with strikingly similar facts to the present suit, the Trinko Court emphasized that ***HN4***[] competitors in the telecommunications industry have no duty to cooperate with one another. [5] *540 U.S. at 408*. The Trinko Court also highlighted that courts should be hesitant to enforce antitrust liability where there is a complex regulatory scheme already in place (as we have in this case, with the Telecommunications Act of 1996). *540 U.S. at 411*.

HN6[] Although Verizon is generally correct in the assertion that Trinko forestalls antitrust claims based on refusals to deal with a competitor, Trinko does not prevent AstroTel from bringing antitrust claims based on other valid antitrust theories, to wit:

> In Trinko, the plaintiff brought a claim under *§ 2* of the Sherman Act, arguing that Verizon failed to fulfill orders of rival carriers in violation of a detailed regulatory scheme enacted by Congress. The Court found that the legislation at issue did not foreclose antitrust claims. Nevertheless, the Court ruled that the plaintiff failed to state a claim under traditional antitrust principles because plaintiff's claim would not have existed in the absence of the legislation—prior to the legislation, Verizon had no obligation to share its facilities with its competitors.

*Parsons v. Bright House Networks, Case No. 2:09-cv-267-AKK, 2010 U.S. Dist. LEXIS 55277, at *26-27 (N.D. Ala. Feb. 23, 2010)*(citing *Trinko, 540 U.S. at 404-11*)(internal citations and **[*8]** emphasis omitted). If AstroTel's antitrust allegations were limited to its complaint that Verizon failed to share its essential facilities and otherwise failed to deal with AstroTel, the Court would end its antitrust analysis here, based on Trinko. However, the Amended Complaint raises other antitrust claims that do not sound in failure to deal with a competitor, such as disparagement, monopolization, tying, and price squeezing. Accordingly, the Court declines to dismiss the antitrust claims based on Trinko's holding.

---

[4] Although the Court could consider the external documents and convert the Motion to Dismiss into a Motion for Summary Judgment pursuant to *Rule 12(d), Fed.R.Civ.P.*, the Court determines that it would not be appropriate to do so at this early juncture. The Court will give the parties an opportunity to conduct discovery before moving forward with Summary Judgment analysis.

[5] ***HN5***[] As a general matter, ***antitrust law*** "does not restrict the long recognized right of [a] trader or **[*7]** manufacturer engaged in . . . business, freely to exercise his own independent discretion as to the parties with whom he will deal." *United States v. Colgate & Co., 250 U.S. 300, 307, 39 S. Ct. 465, 63 L. Ed. 992, 1919 Dec. Comm'r Pat. 460 (1919)*.

1. Count 1 - Monopolization

HN7[] *Section 2* of the Sherman Act prohibits monopolization, attempts to monopolize, and conspiracy to monopolize any part of trade or commerce. *15 U.S.C. § 2*. The Act and subsequent case law have distinguished anticompetitive behavior from "growth or development as a consequence of a superior product, business acumen, or historic accident." *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*.

HN8[] "The offense of monopolization under Sherman *§ 2* has two elements: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power." *Id.* Monopoly power is defined as the power to control prices **[*9]** or exclude competition, and may be inferred from a firm's predominant share of a market. *Id. at 571*. This market must be defined for both the product and the location where the alleged monopolizer is operating. *Smithkline Corp. v. Eli Lilly & Co., 575 F.2d 1056, 1063-64 (3d Cir. 1978)*.

AstroTel defines the product market as "(1) basic analog dial-tone service to residences and small to medium-sized businesses" and "(2) 'enhanced services'" and defines the geographic market as the State of Florida. (Doc. # 9 at ¶¶ 18, 24). AstroTel alleges that Verizon controls more than 75% of this relevant market, enough to infer that Verizon enjoys monopoly status under Grinnell. Verizon does not dispute the market definitions or the market share alleged by AstroTel. Therefore, prong one of the *Grinnell* monopolization test is met.

HN9[] The second prong of Grinnell requires the willful acquisition or maintenance of monopoly power. *384 U.S. at 570-571*. However, the line between lawful competitive conduct and unlawful monopolization is difficult to draw. As stated in *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 458-59, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)*, "It is sometimes difficult to distinguish robust competition from conduct with **[*10]** long-term anticompetitive effects." Unlawful anticompetitive conduct is "conduct without a legitimate business purpose that makes sense only because it eliminates competition." *Morris Commc'ns Corp. v. PGA Tour, Inc., 364 F.3d 1288, 1295 (11th Cir. 2004)*.

Examples of such unlawful anticompetitive conduct include instituting sham litigation, [6] providing false information to retailers, and systematically removing a competitor's display racks or products from retail establishments. [7] However, the Eleventh Circuit has remarked that "even an act of pure malice by one business competitor against another, without more, fails to state a claim under the federal antitrust laws." Id. (internal citation and quotation marks omitted).

The Court determines that AstroTel meets its burden for establishing monopolization with respect to the second prong, concerning willful maintenance of monopoly power. The Amended Complaint alleges several acts committed by Verizon including falsification of records for services that were not installed, billing for services that were not installed, misuse of confidential and protected information, price squeezing, and misrepresentation regarding AstroTel's services, and false billing. (Doc. # 9 at ¶¶ 8). At this preliminary juncture, these actions are sufficient to allege the type of anticompetitive behavior contemplated by the statute. The Motion to Dismiss is therefore denied as to Count 1 of the Amended Complaint.

2. Count 2 - Attempted Monopolization

---

[6] *Prof'l Real Estate Investors, Inc. v. Columbia Pictures Indus., Inc., 508 U.S. 49, 56, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993)*(defining "sham litigation" in the context of ***antitrust law***); *Andrx Pharms., Inc. v. Elan Corp., 421 F.3d 1227, 1233* (same).

[7] See, e.g., *Conwood Co., L.P. v. U.S. Tobacco Co., 290 F.3d 768, 776, 783-88 (6th Cir. 2002)*(finding Sherman violation when defendant (1) deliberately provided false information to retail establishments to exclude competitors from the market and (2) removed **[*11]** the competitor's point of sale racks from retail establishments).

HN10[] To state a claim for attempted monopolization, AstroTel must show "(1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power." *Spectrum Sports, 506 U.S. at 456*.

Anticompetitive conduct is "conduct which unfairly tends to destroy competition itself. *Id. at 458*. **[*12]** In addition, ***antitrust law*** was created "for the protection of *competition* not *competitors*." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*(emphasis in original). To be actionable, Verizon's conduct "must harm the competitive *process* and thereby harm consumers . . . . Harm to one or more *competitors* [does] not suffice." *United States v. Microsoft Corp., 253 F.3d 34, 58, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)*(emphasis added). As noted above, this Court has preliminarily determined that AstroTel has sufficiently alleged that Verizon engaged in anticompetitive conduct.

HN11[] A plaintiff claiming attempted monopolization must allege that the defendant specifically intended to control prices or destroy competition and took action to effectuate that result. *Times-Picayune Pub. Co. v. United States, 345 U.S. 594, 626, 73 S. Ct. 872, 97 L. Ed. 1277 (1953)*. AstroTel describes Verizon's "deliberate," "intentional," and "conscious strategy" to maintain its monopoly in the detailed, 54-page Amended Complaint. (Doc. # 9 at ¶ 8). Among other allegations, AstroTel complains that Verizon has utilized "a variety of tactics with one unshakeable goal: to protect and defend the monopoly that it inherited and to defeat and dismantle competition **[*13]** in any possible manner. To achieve this goal, Verizon has undertaken a variety of actions for the sole purpose of preventing the erosion of its monopoly power." Id. at ¶ 30.

Verizon's actions as alleged in the Amended Complaint are sufficient to establish the specific intent necessary to support AstroTel's claim. Thus, AstroTel meets the pleading requirements to state a claim for attempted monopolization under Sherman *§ 2*. The Court therefore denies the Motion to Dismiss as to Count 2 of the Amended Complaint.

3. Count 3 - Monopoly Leveraging

HN12[] Monopoly leveraging involves a firm using its market power in one market to gain more market share in another market, other than by competitive means. See *Aquatherm Indus., Inc. v. Fla. Power & Light Co., 145 F.3d 1258, 1262 (11th Cir. 1998)*.

Eastman Kodak Co. v. Xerox Corp., 504 U.S. 451, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992), provides an example of monopoly leveraging. In Eastman, the Kodak sold copiers to customers, allowing the customers to service their own machines or go through an independent service organization. *Id. at 456*. Once Kodak achieved substantial sales, it claimed all of the repair work for itself. Id. The court found that this move had the potential to raise the **[*14]** total cost of the copier/service package above the competitive level and above the price that Kodak could have charged had it begun with the copier/service package from the outset. Id.

Here, AstroTel alleges that Verizon used its market power in the basic services market to gain an advantage in the enhanced services market. (Doc. # 9 at ¶¶ 64-67). Specifically, AstroTel alleges that Verizon has denied and delayed AstroTel's ability to combine basic and enhanced services by increasing costs and limiting access to information. (Id.). At this preliminary juncture, the Court determines that AstroTel has satisfied its burden. Accordingly, Count 3 of the Amended Complaint survives the Motion to Dismiss.

4. Count 4 - Tying

Count 4 of AstroTel's Amended Complaint alleges Verizon's violation of Sherman *§ 1* by tying internet and television services with basic local telephone service. (Doc. # 9 at ¶ 67). ***HN13***[] Tying is "an agreement by a party to sell one product but only on the condition that the buyer also purchases a different (or tied) product." *N. Pac. Ry. Co. v. United States, 356 U.S. 1, 5, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958)*.

HN14[] Not all tying arrangements violate the Sherman Act; a plaintiff must allege five elements of an illegal **[*15]** tying arrangement: (1) an actual tying and tied product, (2) some evidence of coercion showing that the seller in fact forced the buyer to purchase the tied product, (3) some evidence that the seller has sufficient market power to carry out the coercion, (4) anticompetitive effects in the tied market, and (5) more than an insubstantial amount of interstate commerce in the tied product market. *Amey, Inc. v. Gulf Abstract & Title, Inc., 758 F.2d 1486, 1502-03 (11th Cir. 1985)*.

HN15[] The essential nature of a tying arrangement requires that the products in the first element be distinct. *N. Pac. Ry. Co., 356 U.S. at 5*. Distinctness in tying claims rests on the character of demand for the two items, not just the functional relationship between them. *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 19, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984)*, abrogated on other grounds by *Ill. Tool Works Inc. v. Indep. Ink, Inc., 547 U.S. 28, 126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006)*. AstroTel alleges that Verizon is tying its internet and television service to the enhanced and basic telephone services. (Doc. # 9 at ¶ 72). This allegation is sufficient to meet the first element of a tying claim.

Although AstroTel has alleged tied services, the Court agrees with Verizon that **[*16]** "[t]he complaint fails to plead specific factual allegations regarding . . . anticompetitive effects, or level of involvement in interstate commerce . . . Furthermore, the complaint alleges no coercion by Verizon that could have forced customers to purchase the tied product." (Doc. # 27 at 13). Therefore, the Court dismisses Count 4 of the Amended Complaint without prejudice and with leave to Amend.

5. Civil RICO - Count 5

HN16[] "To state a RICO claim, a plaintiff must plead (1) that the defendant (2) through the commission of two or more acts (3) constituting a 'pattern' (4) of 'racketeering activity' (5) directly or indirectly [participates in the specific prohibited activity in] (6) an 'enterprise' (7) [that affects] interstate or foreign commerce." *McCulloch v. PNC Bank Inc., 298 F.3d 1217, 1225 (11th Cir. 2002)*. Verizon has challenged the sufficiency of elements four and six arguing that "the complaint fails to adequately plead the predicate acts of racketeering activity." (Doc. # 27 at 14).

In the Amended Complaint, AstroTel alleges that Verizon has engaged in the predicate acts of mail fraud pursuant to *18 U.S.C. § 1341*, and wire fraud pursuant to *18 U.S.C. § 1343*. (Doc. # 9 at ¶ 81). **[*17]** *HN17*[] The federal RICO statute includes both mail and wire fraud in the definition of "racketeering activity." *18 U.S.C. § 1961(1)(B)*.

However, *HN18*[] AstroTel's allegations of fraud must not only comply with the pleading requirements articulated in *Twombly* and Iqbal but also with the heightened pleading standard of *Rule 9(b), Fed.R.Civ.P.*, which require a party alleging fraud to "state with particularity" the circumstances underlying the fraud claim. *Am. Dental Ass'n v. Cigna Corp., 605 F.3d 1283, 1290 (11th Cir. 2010)*. To meet this burden, AstroTel must allege: "(1) the precise statements, documents, or misrepresentations made; (2) the time, place, and person responsible for the statement; (3) the content and manner in which these statements misled [AstroTel]; and (4) what [Verizon] gained by the alleged fraud." *Id. at 1291*.

AstroTel has failed to carry its burden regarding the predicate acts of mail and wire fraud. The Amended Complaint bases the predicate acts upon "continued submission of false and fraudulent invoices and other information to AstroTel." (Doc. # 9 at ¶ 82). The most specific allegation simply alleges that Verizon "supplied false bills to AstroTel for services it has not ordered **[*18]** or received, services which were ordered but never provided, services which had been previously ordered disconnected, or services billed at rates substantially higher than those approved by state regulators." (Id. at ¶ 8(k)). AstroTel fails to plead the necessary "who, what, when, where, and how" of the alleged fraud as required by *Rule 9(b)*. See *Mizzaro v. Home Depot, Inc., 544 F.3d 1230, 1237 (11th Cir. 2008)*. As a result, the Court dismisses Count 5 of the Amended Complaint without prejudice and with leave to amend.

6. Count 6 - Lanham Act

The Lanham Act prohibits false advertising as follows:

> ***HN19***[] Any person who, on or in connection with any goods or services . . . uses in commerce any word, term, name, symbol, or device, or any combination thereof, or any false designation of origin, false or misleading description of fact, or false or misleading representation of fact, which—in *commercial advertising or promotion*, misrepresents the nature, characteristics, qualities, or geographic origin of his or her or another person's goods, services, or commercial activities, shall be liable in a civil action by any person who believes that he or she is likely to be damaged by such act.

15 U.S.C. § 1125(a)(1)(B)(emphasis **[*19]** added).

Here, Verizon contends that AstroTel cannot meet the requirement that the alleged representations be made in an advertisement or promotion. ***HN20***[] Although the Lanham Act does not define either "advertising" or "promotion," courts within the Eleventh Circuit use the following four-part test set forth in *Gordon & Breach Science Publishers S.A. v. American Institite of Physics and American Physical Society, 859 F. Supp. 1521, 1535-36 (S.D.N.Y. 1994)*, in determining whether a representation falls within the ambit of the Lanham Act:

> In order for representations to constitute "commercial advertising or promotion" under [the Lanham Act], they must be: (1) commercial speech; (2) by a defendant who is in commercial competition with plaintiff; (3) for the purpose of influencing consumers to buy defendant's goods or services. While the representations need not be made in a "classical advertising campaign," but may consist instead of more informal types of "promotion," the representations (4) must be disseminated sufficiently to the relevant purchasing public to constitute "advertising" or "promotion" within that industry.

See *Futuristic Fences, Inc. v. Illusion Fence Corp., 558 F. Supp. 2d 1270, 1279 (S.D. Fla. 2008)*(finding **[*20]** that the Gordon four-part test has been adopted by the majority of other circuits and is utilized by the district courts within the Eleventh Circuit).

AstroTel bases its Lanham Act allegations on: (1) instances where Verizon has characterized AstroTel as a "middleman," (2) Verizon's communications to AstroTel's customers about Verizon's superior service, and (3) Verizon's representations to AstroTel's customers that AstroTel did not pay its bills. (Doc. # 9 at ¶¶ 8(i)-(j), 9). The Court finds that these communications do not rise to the level necessary to constitute an advertisement or promotion under the Lanham Act because the communications were not disseminated sufficiently to the relevant purchasing public within the telecommunications industry. See *Fashion Boutique of Short Hills, Inc. v. Fendi USA, Inc., 942 F. Supp. 209, 216 (S.D.N.Y. 1996)*(holding that an employee's disparaging comments to twelve customers and nine investigators was not an advertising or promotion under the Lanham Act because the relevant purchasing public was comprised of thousands of customers).

AstroTel has failed to state a claim under the Lanham Act because it did not sufficiently allege that Verizon's conduct **[*21]** constituted an advertisement or promotion. Thus, Count 6 of the Amended Complaint is dismissed without prejudice and with leave to amend.

7. Count 7 - Tortious Interference with a Contract

HN21[] In order to properly plead a claim for tortious interference with a contractual or business relationship under Florida law, a plaintiff must assert: "(1) the existence of a business relationship that affords the plaintiff existing or prospective legal rights; (2) the defendant's knowledge of the business relationship; (3) the defendant's intentional and unjustified interference with the relationship; and (4) damage to the plaintiff." *Int'l Sales & Serv., Inc. v. Austral Insulated Prods., Inc., 262 F.3d 1152, 1154 (11th Cir. 2001)* (quoting *Ethan Allen, Inc. v. Georgetown Manor, Inc., 647 So. 2d 812, 814 (Fla. 1994))*.

AstoTel has alleged facts sufficient to survive Verizon's motion to dismiss. Verizon allegedly interfered with relationships between AstroTel and at least one customer. (Doc. # 9 at ¶ 96). Although AstroTel does not plead specific customer contracts that were injured, that is not necessary at this point in the litigation. AstroTel meets the remaining requirements by alleging that Verizon **[*22]** knew of this relationship and intentionally interfered with it, resulting in the customer switching from AstroTel to Verizon. (Doc. # 9 at ¶ 96-100). Count 7 of the Amended Complaint thus survives Verizon's Motion to Dismiss.

8. Count 8 - Interference with Prospective Business Relations

AstroTel alleges that Verizon intentionally excluded AstroTel from competing in the Florida region and, as a result, improperly interfered with AstroTel's prospective business relations with customers. (Doc. # 9 at ¶¶ 105-06). ***HN22***[] A claim for interference with a prospective business relation will lie if the parties' understanding would have been completed if not for the defendant's intervention. *Collins & Co. v. City of Jacksonville, 38 F. Supp. 2d 1338, 1347 (M.D. Fla. 1998)*.

However, "No cause of action exists for tortious interference with a business's relationship to the community at large." *Ethan Allen, Inc., 647 So. 2d at 815*. Rather than alleging that Verizon interfered with an identifiable prospective business relationship, AstroTel has alleged that Verizon interfered with its ability to do business in general. Accordingly, AstroTel failed to allege facts sufficient to support this claim. Count 8 of **[*23]** the Amended Complaint is accordingly dismissed without prejudice and with leave to amend.

9. Count 9 - Unfair Competition

HN23[] Unfair competition is a creature of common law and serves as an "umbrella for all statutory and nonstatutory causes of action arising out of conduct that is contrary to honest practice in industrial and commercial matters." *Third Party Verification, Inc. v. Signaturelink, Inc., 492 F. Supp. 2d 1314, 1325 (M.D. Fla. 2007)*(internal citation omitted). ***HN24***[] "To state a claim for unfair competition under Florida common law a party must plead (1) deceptive or fraudulent conduct of a competitor and (2) likelihood of consumer confusion." *Id. at 1324*.

AstroTel has met its burden of pleading deceptive or fraudulent conduct of a competitor. The statements by Verizon employees to AstroTel customers are sufficient to meet the federal pleading standards. (Doc. # 9 at ¶ 8(i)). AstroTel has also met its burden in pleading a likelihood of consumer confusion. The nature of the statements to AstroTel customers, including an assertion that AstroTel is a "useless middleman," has the possibility of confusing AstroTel customers about the nature of AstroTel's business. (Id.). Accordingly, Count **[*24]** 9 of the Amended Complaint survives Verizon's Motion to Dismiss.

10. Count 10 - Business Defamation and Disparagement

Verizon has allegedly made several false statements and misrepresentations about AstroTel to AstroTel's customers. (Doc. # 9 at ¶¶ 8; 116). AstroTel bases its claim for business defamation and disparagement on these statements. (Id.). ***HN25***[] "The reputation of a corporation can be injured by a false publication of defamatory matter, which prejudices its trade or business, or deters third persons from dealing with it." *St. Paul Fire & Marine Ins. Co. v. Naples Cmty. Hosp., Inc., 585 So. 2d 374, 376 (Fla. 2d DCA 1991)*. AstroTel has sufficiently pled facts to support a claim for defamation and disparagement. The Amended Complaint contains numerous allegations that Verizon made false representations about AstroTel and that those representations have harmed AstroTel's business. (Doc. # 9 at ¶¶ 116-20). Thus, Count 10 survives Verizon's Motion to Dismiss.

11. Count 11 - Civil Conspiracy

AstroTel alleges that Verizon entered into a civil conspiracy with "other defendants" to "unlawfully depriv[e] AstroTel of its legal rights." (Doc. # 9 at ¶ 49).

> ***HN26***[] A civil conspiracy requires: (a) an agreement **[*25]** between two or more parties, (b) to do an unlawful act or to do a lawful act by unlawful means, (c) the doing of some overt act in pursuance of the conspiracy, and (d) damage to plaintiff as a result of the acts done under the conspiracy.

Nationwide Mut. Co. v. Ft. Myers Total Rehab Ctr., Inc., 657 F. Supp. 2d 1279, 1291 (M.D. Fla. 2009) (citing *Charles v. Fla. Foreclosure Placement Ctr., LLC, 988 So. 2d 1157, 1159-60 (Fla. 3d DCA 2008))*. AstroTel's civil conspiracy claim fails because, under the facts and circumstances alleged in the Amended Complaint, it cannot meet the first element—an agreement between two or more parties.

The defendants in this case include Verizon Communications, Inc. and Verizon Florida, LLC. (Doc. # 9 at ¶ 2). As previously explained, Verizon Florida is a subsidiary of Verizon Communications. (Id.). ***HN27***[] Pursuant to the intra-corporate conspiracy doctrine, alleged agreements between an employee and the company the employee works for cannot form the basis for a civil conspiracy claim. *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 769, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*(holding that "[t]he officers of a single firm are not separate economic actors pursuing separate economic interests, **[*26]** so agreements among them do not suddenly bring together economic power that was previously pursuing divergent goals").

This doctrine also applies to a parent-subsidiary relationship: "there can be little doubt that the operations of a corporate enterprise organized into divisions must be judged as the conduct of a single actor [and] the coordinated activity of a parent and its wholly owned subsidiary must be viewed as that of a single enterprise." *Id. at 770-71*. [8] Therefore, the Court dismisses Count 11, civil conspiracy, without prejudice and with leave to amend.

12. Count 12 - Unjust Enrichment

AstroTel alleges that Verizon unjustly enriched itself by accumulating profits from unfairly appropriated customers. (Doc. # 9 at ¶¶ 125-27).

> ***HN29***[] To state a claim **[*27]** for unjust enrichment, a plaintiff must plead the following elements: 1) the plaintiff has conferred a benefit on the defendant; 2) the defendant has knowledge of the benefit; 3) the defendant has accepted or retained the benefit conferred; and 4) the circumstances are such that it would be inequitable for the defendant to retain the benefit without paying fair value for it.

Baptista v. JP Morgan Chase Bank, N.A., 640 F.3d 1194, 1198 at n.3 (11th Cir. 2011). AstroTel fails to plead facts sufficient to meet the first element of unjust enrichment. The Amended Complaint contains no allegation of a benefit conferred from AstroTel to Verizon but instead, business profits obtained from customers "unjustly appropriated" from AstroTel. (Doc. # 9 at ¶¶ 125-27). AstroTel has not conferred a benefit on Verizon under these facts.

In addition, it should be noted that ***HN30***[] "Liability in unjust enrichment has nothing to do with fault." *Tilton v. Playboy Entm't Grp., Inc., 8:05-cv-692-T-30TGW, 2007 U.S. Dist. LEXIS 1393, 2007 WL 80858, at *3 (M.D. Fla. Jan. 8, 2007)* (citations omitted). Indeed, an unjust enrichment claim "should be premised on circumstances under which it would be inequitable for the defendant to retain the benefit **[*28]** without paying for it." Id. In other words:

> [t]he law of unjust enrichment is concerned solely with enrichments that are unjust independently of wrongs and contracts. When the plaintiff relies on a breach of a contract to supply the "unjustness" of the defendant's holdings, the right on which he or she relies arises from the breach of the contract, not from an unjust

---

[8] At this juncture, the Court is not certain as to whether Verizon Florida LLC is a wholly owned subsidiary. ***HN28***[] If it is wholly owned by Verizon Communications, the intra-corporate conspiracy doctrine cannot be overcome. However, if is a not a wholly owned subsidiary, AstroTel may be able to plead factors showing "separateness of [the] subsidiary from its parent company" in order to overcome the doctrine. *Copperweld, 467 U.S. at 772, at n. 18*.

> enrichment; analogously, when the plaintiff relies on a wrong to supply the "unjust factor," the causative event is a wrongful enrichment rather than an unjust enrichment.

Flint v. ABB, Inc., 337 F.3d 1326, 1330 n.2 (11th Cir. 2003). "The paradigm examples of unjust enrichment are mistaken transfers." *Guyana Tel. & Tel. Co., Ltd. v. Melbourne Intern. Commc'ns, Ltd., 329 F.3d 1241, 1245 n.3 (11th Cir. 2003)*. "Where a plaintiff predicates their unjust enrichment claim on wrongful conduct of a defendant, then the plaintiff's right of recovery, if any, arises from the wrong of the alleged tort rather than unjust enrichment." *Tilton, 2007 U.S. Dist. LEXIS 1393, 2007 WL 80858, at *3*.

Here, AstroTel's unjust enrichment claim is not based on a mistake by which Verizon unjustifiably came to hold AstroTel's property and should be required to return it. Rather, **[*29]** AstroTel's claim is based upon Verizon's alleged wrongful conduct. In essence, AstroTel has not "conferred" any benefit on Verizon, but instead has had a benefit taken away from it by Verizon's alleged wrongful conduct. ***HN31***[] "As soon as a claimant relies on a wrong to supply the unjust factor, the right on which he relies arises from that wrong, not from unjust enrichment." *Guyana, 329 F.3d at 1245 n.3*. Thus, AstroTel's right of recovery, if any, for the alleged wrongful conduct of Verizon arises in tort or statutory law, which, if proven, might entitle AstroTel to damages, rather than unjust enrichment. Since the law of unjust enrichment is concerned solely with enrichments that are unjust independent of alleged wrongs, AstroTel's unjust enrichment claim must be dismissed.

Accordingly, the Court dismisses Count 12 of the Amended Complaint without prejudice and with leave to amend.

13. <u>Count 13 - Equitable Accounting</u>

AstroTel requests an equitable accounting of "the charges that Verizon contends [AstroTel] owes, the amount of overcharges by Verizon, or individualized charges pertaining to particular network facilities." (Doc. # 9 at ¶ 130). ***HN32***[] To successfully plead a claim for equitable accounting **[*30]** under Florida law, a plaintiff must allege that (1) a fiduciary relationship or complex transaction exists, and (2) a remedy at law would be inadequate. *Zaki Kulaibee Establishment v. McFlicker, 788 F. Supp. 2d 1363, 1370 (S.D. Fla. 2011)*.

AstroTel failed to plead the existence of a fiduciary relationship.

> ***HN33***[] A fiduciary relationship may be either express or implied. Express fiduciary relationships are created by contract, such as principal/agent, or can be created by legal proceedings in the case of a guardian/ward. A fiduciary relationship which is implied in law is based on the circumstances surrounding the transaction and the relationship of the parties and may be found when "confidence is reposed by one party and a trust accepted by the other."

Maxwell v. First United Bank, 782 So. 2d 931, 932 (Fla. 4th DCA 2001)(internal citations omitted). The Amended Complaint does not describe such a relationship. In addition, while the transaction at issue may be sufficiently complex to warrant an equitable accounting, AstroTel has not demonstrated that a remedy at law would be inadequate. Count 13 of the Amended Complaint, for equitable accounting, is accordingly dismissed without prejudice and **[*31]** with leave to amend.

Accordingly, it is

ORDERED, ADJUDGED, and **DECREED**:

(1) The Motion to Dismiss is **GRANTED** without prejudice with respect to Counts 4-6, 8, and 11-13 of the Amended Complaint. The Motion to Dismiss is otherwise denied.

(2) AstroTel may file a Second Amended Complaint by May 15, 2012.

DONE and **ORDERED** in Chambers in Tampa, Florida, this <u>4th</u> day of May 2012.

Opinion by: BOUDIN

Opinion

[*490] BOUDIN, Circuit Judge. On July 21, 2010, Marcia Liu filed a complaint in federal district court in Massachusetts charging Amerco, Inc. and its wholly owned subsidiary U-Haul International, Inc. **[*491]** --collectively "U-Haul"--with violating Massachusetts General Laws ch. 93A. The complaint asserted that U-Haul had engaged in what was in substance an attempted price-fixing scheme and the complaint sought damages on behalf of both Liu and a large class of persons who rented U-Haul vehicles for certain trips within a specified period.

Ordinarily, when a seller of goods or services attempts to fix prices with a competitor but fails in that endeavor, no consumer is damaged; but Liu's complaint alleged peculiar facts not uncovered by Liu but recounted in documents **[**2]** stemming from an investigation by the Federal Trade Commission ("FTC"); the documents included the summary of a proposed consent order between U-Haul and the agency made public in the month before Liu filed her own law suit. *Federal Trade Commission, U-Haul Int'l, Inc. and AMERCO, 75 Fed. Reg. 35033, 35034 (June 21, 2010)* (hereinafter "FTC Summary").

According to the FTC complaint and the summary of the proposed consent order, in 2006 Edward Shoen--the chairman and president of Amerco and the chairman and chief executive officer of U-Haul--planned and took steps to implement a scheme to collude with U-Haul's major competitors--Avis Budget Group, Inc. ("Budget") and Penske Truck Leasing Co., L.P. ("Penske")--to raise prices in the market for one-way truck rentals. As summarized by the FTC, the initial strategy was straightforward:

> Mr. Shoen instructed U-Haul regional managers to raise rates for truck rentals, and then contact Budget to inform Budget of U-Haul's conditional rate increase and encourage Budget to follow, or U-Haul's rates would be reduced to the original level.
>
> At about the same time, Mr. Shoen also instructed local U-Haul dealers to communicate with their counterparts at **[**3]** Budget and Penske, with the purpose of re-enforcing the message that U-Haul had raised its rates, and competitors' rates should be raised to match the increased U-Haul rates.

FTC Summary, 75 Fed. Reg. at 35034.

According to the FTC, this "plan" was communicated to U-Haul's regional managers and local dealers in memoranda sent by Shoen in October and November of 2006.[1] The memoranda even included suggested talking points for managers making calls to competitors. The FTC recounted evidence from a U-Haul regional manager in Tampa, Florida, who corroborated the existence of the memoranda, confirmed that he acted in conformity with the plan as described, and wrote a follow-up email to U-Haul's senior executives describing his actions to implement the plan. *In re U-Haul Int'l, Inc., 2010 FTC LEXIS 61, 2010 WL 2966779 at *3*.

The FTC also set forth comments made by Shoen during an earnings conference call with analysts that took place on February 7, 2008. Shoen was allegedly aware that Budget would monitor the call, so he announced U-Haul's unilateral price increase and said that U-Haul would keep its prices at the elevated level if Budget responded in kind with rates that were **[*492]** within 3 to 5 percent of U-Haul's.[2] The FTC made no findings as to the consequences of the direct or indirect attempts, concluding that the overtures were unlawful regardless of whether the parties

---

[1] The FTC complaint quoted specific portions of the memoranda. For example: "Budget continues in some markets to undercut us on One-Way rates. Either get below them or go up to a fair rate. Whatever you do, LET BUDGET KNOW. Contact a large Budget Dealer and tell them. Contact their company store and let the manager know . . . My direction is either get up to a fair rate or get down below the **[**4]** competitor. EITHER WAY, LET THEM KNOW." *In re U-Haul Int'l, Inc., 2010 FTC LEXIS 61, 2010 WL 2966779, at *2-3 (F.T.C. July 14, 2010)*.

[2] Specific examples of the comments included: "we're very, very much trying to function a price leader [sic] and not give away [market] share"; "me trying to get us to exercise price leadership every time we get what we consider to be an opportunity, it's another indicator to [Budget] as to, hey, don't throw the money away"; "[i]f [Budget] cave[s] on prices the net effect is we got less money"; "if [Budget] perceive[s] **[**5]** that we'll let them come up a little bit [on price], I remain optimistic they'll come up, and it has a profound effect on us." *In re U-Haul Int'l, Inc., 2010 FTC LEXIS 61, 2010 WL 2966779 at *4-5*.

reached and successfully implemented an agreement to collude on prices. FTC Summary, 75 Fed. Reg. at 35034-35.

The FTC concluded that U-Haul's "particularly egregious conduct," FTC Summary, 75 Fed. Reg. at 35035, violated **HN1**[] Section 5 of the Federal Trade Commission Act ("FTC Act"), 15 U.S.C. § 45(a)(1), which forbids "[u]nfair methods of competition in or affecting commerce, and unfair or deceptive acts or practices in or affecting commerce." The proposed consent order provided injunctive relief designed to prevent U-Haul "from inviting collusion and from entering into or implementing a collusive scheme." FTC Summary, 75 Fed. Reg. at 35035. U-Haul consented to the relief sought, but did not admit either to the conduct or to the violation. In re U-Haul Int'l, Inc., 2010 FTC LEXIS 61, 2010 WL 2966779 at *20-21.

Liu's suit was a follow-on action brought after a proposed government consent decree--fairly common in antitrust cases; but, as the FTC Act contains no private right of action and the Sherman Act--which does create such a right--is of doubtful application to a failed attempt to conspire on prices, see note 4, below, Liu's suit rested **[**6]** instead on chapter 93A. **HN2**[] Chapter 93A, like section 5, prohibits "[u]nfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce," Mass. Gen. Laws ch. 93A, § 2(a), but also provides a right of action to consumers and permits class actions. Id. § 9.

Liu alleged that U-Haul's "intentional and purposeful anticompetitive acts"--pertinently, the invitations to collude and U-Haul's price increases incident to those invitations--caused her to pay at least 10 percent more for two one-way truck rentals than she would have absent U-Haul's unlawful action. Chapter 93A is limited to transactions connected to Massachusetts, § 1(b); Liu's proposed class included "[a]ll persons who purchased one-way truck rentals from [U-Haul] for transportation to, from or within . . . Massachusetts between September 2006 and September 2008."

U-Haul filed a motion to dismiss for failure to state a claim, Fed. R. Civ. P. 12(b)(6), which the district court granted in a short written opinion. The district court assumed arguendo that an invitation to collude was actionable under chapter 93A; but it found that Liu had failed plausibly to allege injury, noting that she had **[**7]** failed to "set forth any facts about her own transactions, such as what she paid . . . or what available competitors' rates were at the time." Liu v. Amerco, No. 10-11221, 2011 U.S. Dist. LEXIS 93641 at *2 (D. Mass. Aug. 22, 2011).

Liu has now appealed, contending that her complaint did set forth a claim under chapter 93A and that it adequately alleged injury and should have survived the motion to dismiss. **HN3**[] Both issues raise questions of law that are reviewed de novo. Poirier v. Mass. Dep't of Corr., 558 F.3d 92, 94 (1st Cir. 2009); United States v. Troy, 618 F.3d 27, 35 (1st Cir. 2010). But **[*493]** we begin by noting sua sponte, as we are required to do, an unaddressed question as to the district court's subject matter jurisdiction.

Diversity of citizenship exists between Liu and the defendants, but there is no likelihood that damages for her two rentals would meet the ordinary requirement for diversity cases that the amount in controversy exceed $75,000. 28 U.S.C. § 1332(a). However, the Class Action Fairness Act of 2005, 28 U.S.C. § 1332(d), provides an alternative basis for jurisdiction so long as (1) minimal diversity exists (as it does here) and (2) the amount in controversy for aggregated claims of the whole **[**8]** class exceeds $5 million. Id.

Liu has limited her class to rentals to, from or within Massachusetts during the period in which U-Haul prices were allegedly elevated. Questioned by the court at argument, Liu contended that the minimum statutory damages under chapter 93A--$25 per incident (which could potentially be trebled under that statute to $75, Mass. Gen. Laws ch. 93A, § 9(3)-(3A))--would exceed the minimum $5 million figure given the thousands of U-Haul rentals to, from and within Massachusetts that would likely be encompassed by the two year period.[3]

---

[3] Whether prospective attorneys' fees would be included is a question we need not resolve. **HN4**[] Spielman v. Genzyme Corp., 251 F.3d 1, 7 (1st Cir. 2001), held that the plaintiff's own fees could be included in a chapter 93A claim but not those of the class; but Spielman was not dealing there with CAFA which looks to aggregated class damages to meet the $5 million threshold.

Given the good faith representations by Liu's counsel, which have not been challenged, see *Coventry Sewage Assocs. v. Dworkin Realty Co., 71 F.3d 1, 5-6 (1st Cir. 1995)*, we find the jurisdiction to exist. Further, the statutory damages are merely a minimum under chapter **[**9]** 93A; conceivably some of the class member rentals were for larger sums; and the 10 percent estimate of damages was seemingly a floor figure rather than a ceiling. It is not clear to a legal certainty that the amount in controversy is less than $5 million. *Id. at 6*. So we proceed to the merits.

The district court's dismissal rested solely on the lack of an adequate allegation of harm--the full, albeit brief, holding is quoted below--but defendants, while agreeing with the court that injury was inadequately alleged, also suggest that the allegations of wrongdoing fail to state a cognizable claim under chapter 93A. We decide both issues in the interest of judicial economy, see *New Hampshire Motor Transp. Ass'n. v. Flynn, 751 F.2d 43, 52 (1st Cir. 1984)* (Breyer, J.), and begin with the question of whether the alleged acts violate chapter 93A.

As alleged in the complaint, U-Haul is the largest U.S. provider of one-way truck rentals with about 54 percent of the market; Budget is their largest competitor, bringing their joint share to about 70 percent. But market size and definition would not matter under the antitrust laws if U-Haul's alleged proposal to fix prices had been accepted: U-Haul **[**10]** and Budget compete in truck rentals, and ***HN5***[] price fixing is a per se offense, *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 223-24, 60 S. Ct. 811, 84 L. Ed. 1129 (1940)*, entailing both criminal and civil liability under section 1 of the Sherman Act, *15 U.S.C. § 1*.

HN6[] *Section 1* of the Sherman Act, however, does not condemn an attempt to conspire,[4] nor a solicitation to conspire, **[*494]** compare *18 U.S.C. § 373* (solicitation to commit a crime of violence); there is no general federal attempt statute; and the general solicitation statute, *18 U.S.C. § 2*, is violated only if the underlying crime is completed. *United States v. Korab, 893 F.2d 212, 213 (9th Cir. 1989)*. The federal mail and wire fraud statutes, *18 U.S.C. §§ 1341 et seq.*, have sometimes been deployed against attempted price-fixing, e.g. *United States v. Ames Sintering Co., 927 F.2d 232 (6th Cir. 1990)*, but have no civil-remedy provisions.

But ***HN8***[] while such an unsuccessful attempt is not a violation of *section 1* of the Sherman Act, section 5 of the FTC Act, *15 U.S.C. § 45(a)(1)*, embraces unilateral acts by one defendant, *FTC v. Brown Shoe Co., 384 U.S. 316, 322, 86 S. Ct. 1501, 16 L. Ed. 2d 587 (1966)*; a proposal to engage in horizontal price fixing is dangerous merely because of its potential to cause harm to consumers if the invitation is accepted; and the FTC's complaint in this case makes clear that it has adopted such a theory.[5] Nothing said by defendants suggests any obvious flaw in that position.

Chapter 93A's relevant language parallels that of section 5, and the Massachusetts legislature in chapter 93A provided that ***HN10***[] "[i]t is the intent of the legislature that in construing [the Act] . . . courts will be guided by the interpretations given **[**12]** by the Federal Trade Commission and the Federal Courts to section 5(a)(1) of the Federal Trade Commission Act . . . ." *Mass. Gen. Laws ch. 93A, § 2(b)*. The courts have been thus guided. *In re TJX Cos. Retail Sec. Breach Litig., 564 F.3d 489, 495-97 (1st Cir. 2009)*; *Ciardi v. F. Hoffmann-La Roche, Ltd., 436 Mass. 53, 762 N.E.2d 303, 309 (Mass. 2002)*.

Defendants say that there is no Massachusetts decision finding that an unsuccessful attempt to fix prices violates chapter 93A; but naturally precedent is scarce since an unsuccessful attempt rarely causes damages. ***HN11***[] Assuming consumer harm were proved (a quite separate question), we would expect Massachusetts courts to follow FTC precedent that sensibly holds unlawful pernicious conduct with a clear potential for harm and no

---

[4] ***HN7***[] Section 2 of the Sherman Antitrust Act, *15 U.S.C. § 2*, does cover "attempt[s] to monopolize"; and one circuit court did treat a failed attempt to conspire in a two-carrier market as attempt at "shared" monopolization, *United States v. Am. Airlines, Inc., 743 F.2d 1114 (5th Cir. 1984)*--a debatable approach. VI Areeda ***Antitrust Law*** ¶ 1407 , at 36-39 (1986) **[**11]** .

[5] ***HN9***[] *FTC Summary, 75 Fed. Reg. at 35034* ("[I]nvitations to collude increase the risk of anticompetitive harm to consumers, and as such, can violate Section 5 of the FTC Act."); see also *id. at 35034 n.3* (listing prior FTC actions based on invitations to collude); In re Valassis Commc'ns, Inc., 2006 WL 1367833 (F.T.C. Apr. 19, 2006); *In re Stone Container Corp., 125 F.T.C. 853, 854 (1998)*.

redeeming value whatever. *In re TJX, 564 F.3d at 497*. If U-Haul did what is alleged, its conduct perfectly fits this paradigm.[6]

The **[**13]** alleged conduct is not mere oligopolistic pricing in which a unilateral price increase is made by a dominant player in the hope that competitors will follow with matching increases. ***HN12***[] Pure parallel pricing gambits in markets with few competitors are not easily regulated and are not automatically condemned under the Sherman Act. *Theatre Enters., Inc. v. Paramount Film Distrib. Corp., 346 U.S. 537, 540-41, 74 S. Ct. 257, 98 L. Ed. 273 (1954)*; see generally, VI Areeda, ***Antitrust Law*** ¶¶ 1432-33. What is alleged here are express proposals to a competitor **[*495]** to raise prices, which are unambiguous, more dangerous, and serve no proper purpose.

HN13[] A spurned attempt to fix prices standing alone would--because spurned--cause no direct harm to consumers. But here Liu alleged conduct that did not consist merely of unrequited proposals; it included as part of the plan unilateral increases by U-Haul as an indicator of its intentions and a target for increases by competitors. As alleged, the increases were part of an orchestrated illegal effort to conspire with Budget to raise prices, tainting the U-Haul increases even if Budget failed to follow them.

And if such harm did occur, recovery would not be barred by any notion that the harm was **[**14]** outside of the zone of interests which the statute was meant to protect. Cf. *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*; *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 334, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)*. The very reason for chapter 93A to encompass a failed attempt to fix prices is because of the threat that the attempt could result in price increases. If Liu is correct, the attempt to conspire did result in just such harm.

Rule v. Fort Dodge Animal Health, Inc., 607 F.3d 250 (1st Cir. 2010), cited to us by U-Haul, did not involve an attempt to conspire with a competitor to raise prices; it concerned undisclosed risks. There, the defendant sold a medicine to prevent canine heartworms and, so far as anyone knows, the medicine did provide such protection to the plaintiff's dog. *Id. at 251-52*. The plaintiff's chapter 93A claim was that the medicine also had an undisclosed capacity to cause harm to the dog, although it was conceded that the medicine had not caused any harm to the plaintiff's dog. Id.

We concluded that no economic damage had been inflicted on the plaintiff under chapter 93A since plaintiff had gotten the protection sought and had suffered no detriment from the concealed **[**15]** latent defect. *Rule, 607 F.3d at 254-55*. In Rule, disclosure of the defect would not have lowered the price, but would instead have eliminated the product. *Id. at 253*. Here, by contrast, plaintiff has alleged that the defendants' attempted price fixing scheme directly raised the price charged by U-Haul and paid by Liu--economic damage by any test.

This brings us to the question whether Liu properly pled enough detail to show damages. The district judge, as already noted, rested his dismissal on the ground that Liu "has failed plausibly to allege an injury." *Liu, No. 10-11221, 2011 U.S. Dist. LEXIS 93641 at *2*. The court recognized that Liu had claimed to have undertaken two U-Haul rentals--one from New York to Massachusetts in 2007 and the other an intra-Massachusetts trip in 2008--but then explained why the court deemed this inadequate:

> The plaintiff does not set forth any facts about her own transactions, such as what she paid for her one-way truck rentals or what available competitors' rates were at the time. Even if U-Haul had committed an actionable wrong that had a price-raising effect generally on the national market, the basic facts about the plaintiff's individual transactions are necessary to **[**16]** judge whether she was in fact harmed by those general phenomena. Whether she overpaid, and whether such overpayment was caused by U-Haul's unrequited attempts to collude with Avis Budget Group, Inc., is left entirely to conjecture.

---

[6] U-Haul argues that Liu must satisfy the FTC's "consumer injury test" to state a claim for unfairness under Chapter 93A. The test is limited to consumer unfairness claims and does not govern Liu's claim based on an alleged unfair method of competition. See FTC Policy Statement on Unfairness appended to *In re Int'l Harvester Co., 104 F.T.C. 949, 1070-76 (1984)*.

*2011 U.S. Dist. LEXIS 93641at *2*.

HN14[] Causation of damages is required for a chapter 93A claim, *Hershenow v.* ***[*496]*** *Enterprise Rent-A-Car Co., 445 Mass. 790, 840 N.E.2d 526, 532-33 (Mass. 2006)*; and Liu might (as the district court implied) have compared her rental price with that of Budget for comparable service if she knew what Budget was then charging. But a comparison is not the only way to show injury; and here Liu--relying on the FTC's allegations--asserted that U-Haul had raised its own prices and that these "price increases were themselves an essential element of the unlawful effort to collude."

The FTC had already pointed to evidence that Shoen "instructed U-Haul regional managers to raise rates for truck rentals, and then contact Budget to inform Budget of U-Haul's conditional rate increase and encourage Budget to follow," *FTC Summary, 75 Fed. Reg. at 35034*, and "also instructed local U-Haul dealers to communicate with their counterparts at Budget and Penske, with the purpose of re-enforcing the **[**17]** message that U-Haul had raised its rates, and competitors' rates should be raised to match the increased U-Haul rates." Id. These factual assertions were backed by references to specific documents uncovered in the FTC investigation.

The FTC's aim to achieve injunctive relief did not depend on proving price effects, and it pointed to only one written admission of impact: the regional manager in Florida, already mentioned, who reassured senior executives in writing that he had implemented the plan. But one may infer that managers and dealers generally did what the head of the company instructed.[7] If this is disputed, the matter can be resolved by evidence of U-Haul's managers and staff in Massachusetts and a review of its records of price changes there.

Additionally, the complaint (1) incorporates a graph of truck **[**18]** rental prices, of which U-Haul is described as a driver because of its large market share, showing a substantial jump of over 40 percent in the index from September 2006 to September 2008 followed by a substantial drop; and (2) describes a study comparing truck rental prices and car rental prices for the same period indicating that truck rental prices markedly diverge upward when compared to car rentals during the two year period of Liu's complaint.

Attributing the greater divergence to U-Haul's actions, Liu says that the economic analysis in the study suggests an overcharge of at least 10 percent. This exercise provides some further grounding for Liu's claim that U-Haul's representatives did increase prices in response to Shoen's directive and that prices remained at a super-competitive level for a considerable period and until natural market forces compelled U-Haul to roll them back. Taken with Shoen's instructions, this is hardly a complaint lacking in evidence of damage to Liu.

U-Haul's brief raises fair questions about the power of the analysis--for example, arguing that the indices used for truck rentals are not specific to U-Haul and clearly include rental of buses, truck tractors **[**19]** and semi-trailers in addition to the self-drive trucks mainly deployed by U-Haul and Budget. And U-Haul says it is unclear, and unproved, that passenger car rentals are a good yardstick for comparison, noting that input costs and demand **[*497]** may well vary as between the two industries.

HN15[] *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* and *Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*, require that facts and not mere generalities be set forth in a complaint, but only enough facts to make the claim plausible, and at this stage reasonable inferences are taken in favor of the pleader. *SEC v. Tambone, 597 F.3d 436, 441 (1st Cir. 2010)*. The place to test factual assertions for deficiencies and against conflicting evidence is at summary judgment or trial; Liu's complaint is not "threadbare or speculative." *Penalbert-Rosa v. Fortuno-Burset, 631 F.3d 592, 595 (1st Cir. 2011)*.

Of course, the underlying FTC allegations themselves remain to be proved: the consent decree is neither an adjudication nor an admission by U-Haul. But Liu's complaint does recite specific facts that make her claim plausible; and while damages to Liu are surely modest, class actions for damages that are significant only when

---

[7] A manager might well have balked at calling Budget if the knowledge that price-fixing is a federal felony carrying a jail sentence has spread beyond lawyers. But managers could easily not understand that merely raising prices would be a basis for civil actions under section 5 and chapter 93A if the increases were part of Shoen's plan that the increases be accompanied by calls.

aggregated **[**20]** for the class are common. See *Skirchak v. Dynamics Research Corp., 508 F.3d 49, 58 (1st Cir. 2007)*. Whether this is a suitable case for a class action is not before us.

The judgment of the district court is vacated and the matter remanded for further proceedings consistent with this decision. Liu is entitled to costs on the appeal.

It is so ordered.

O'Brien v. Leegin Creative Leather Prods.

LexisNexis® Headnotes

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN1[] **Trade Practices & Unfair Competition, State Regulation**

The Supreme Court of Kansas has observed generally that the Kansas Restraint of Trade Act, *Kan. Stat. Ann. § 50-101 et seq.*, is broad in scope but that the bulk of its provisions have not been meaningfully interpreted by Kansas courts.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Governments > Legislation > Interpretation

Governments > Courts > Judicial Precedent

HN2[] Trade Practices & Unfair Competition, State Regulation

While cases interpreting federal antitrust statutes may be persuasive authority for any state court interpreting its antitrust laws, such authority is not binding upon any court in Kansas interpreting Kansas antitrust laws.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Constitutional Law > Separation of Powers

Governments > Courts > Authority to Adjudicate

Governments > State & Territorial Governments > Legislatures

HN3[] Trade Practices & Unfair Competition, State Regulation

In relation to price-fixing practices specifically, the Supreme Court of Kansas concluded more than 50 years ago that it may not substitute its judgment for that of the legislature as to whether price fixing is good or bad for the economic life of the state. It is the role of the legislature, not the Court, to set antitrust policy.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Price Fixing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

HN4[] Vertical Restraints, Price Fixing

Price-fixing may be either vertical or horizontal. Vertical price-fixing involves participants at different rungs of the distribution ladder, e.g., a wholesaler and a retailer. Horizontal price-fixing involves participants who are at the same rung of the distribution ladder, e.g., two or more retailers.

Civil Procedure > Trials > Bench Trials

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > Preservation for Review

HN5[] Trials, Bench Trials

When neither party challenges the district court's findings of fact on appeal, they become conclusive for appellate review purposes.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

HN6[] Entitlement as Matter of Law, Appropriateness

Summary judgment is appropriate when the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, show that there is no genuine issue as to any material fact and that the moving party is entitled to judgment as a matter of law.

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

HN7[] **Summary Judgment, Evidentiary Considerations**

The trial court is required to resolve all facts and inferences which may reasonably be drawn from the evidence in favor of the party against whom the summary judgment ruling is sought.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

HN8[] **Burdens of Proof, Nonmovant Persuasion & Proof**

When opposing a motion for summary judgment, an adverse party must come forward with evidence to establish a dispute as to a material fact. In order to preclude summary judgment, the facts subject to the dispute must be material to the conclusive issues in the case.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN9[] **Summary Judgment, Entitlement as Matter of Law**

On appeal, the Supreme Court of Kansas applies the same rules and where it finds reasonable minds could differ as to the conclusions drawn from the evidence, summary judgment must be denied.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

HN10[] **Entitlement as Matter of Law, Appropriateness**

Summary judgment should not be used to prevent the necessary examination of conflicting testimony and credibility in the crucible of a trial.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Governments > Legislation > Interpretation

Civil Procedure > Appeals > Standards of Review > Questions of Fact & Law

HN11[] **Standards of Review, De Novo Review**

Statutory interpretation raises a question of law over which the Supreme Court of Kansas has unlimited review.

Governments > Legislation > Interpretation

HN12[] **Legislation, Interpretation**

The most fundamental rule of statutory interpretation is that the intent of the legislature governs if that intent can be ascertained. An appellate court must first attempt to ascertain legislative intent through the statutory language enacted, giving common words their ordinary meanings. When a statute is plain and unambiguous, the court must give effect to its express language, rather than determine what the law should or should not be. The court will not speculate on the legislative intent and will not read the statute to add something not readily found in it. If the statute's language is clear, there is no need to resort to statutory construction.

Governments > Legislation > Interpretation

HN13[] Legislation, Interpretation

Only if the statute's language or text is unclear or ambiguous does the court employ canons of construction, legislative history, or other background considerations to divine the legislature's intent and construe the statute accordingly.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

HN14[] Standards of Review, Abuse of Discretion

Trial judges are afforded substantial discretion in determining whether a class should be certified. The amount and degree of judicial discretion will vary depending on the character of the question presented for determination. In general, when a discretionary decision is made within the legal standards and takes the proper factors into account in the proper way, the trial court's decision is protected even if not wise. However, abuse is found when the trial court has gone outside the framework of legal standards or statutory limitations, or when it fails to properly consider the factors on that issue given by the higher courts to guide the discretionary determination.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > Special Proceedings > Class Actions > Appellate Review

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN15[] Standards of Review, Abuse of Discretion

While the trial court has substantial discretion in determining whether a class should be certified, the provisions of *Kan. Stat. Ann. § 60-223* must be applied and rigorously analyzed. In conducting its analysis, the trial court should consider evidence when submitted by the parties and make those factual determinations necessary to a determination of whether the prerequisites for a class action are met. The presence of individual questions, while tending to diminish the weight of class facts, does not necessarily defeat a prima facie showing the class prerequisites are satisfied or mean that there has been an abuse of discretion in certifying the class.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN16[] Regulated Practices, Price Fixing & Restraints of Trade

See *Kan. Stat. Ann. § 50-101*.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN17[] Regulated Practices, Price Fixing & Restraints of Trade

Kan. Stat. Ann. § 50-102 denies all persons within the state the right to form or be in any manner interested, either directly or indirectly, as principal, agent, representative, consignee or otherwise, in any trust as defined in Kan. Stat. Ann. § 50-101.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN18[] Regulated Practices, Price Fixing & Restraints of Trade

See Kan. Stat. Ann. § 50-112.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

HN19[] Private Actions, Standing

See Kan. Stat. Ann. § 50-108.

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN20[] Private Actions, Purchasers

See Kan. Stat. Ann. § 50-115.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN21[] Private Actions, State Regulation

See Kan. Stat. Ann. § 50-147.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN22[] Private Actions, State Regulation

See Kan. Stat. Ann. § 50-161.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN23[] State Regulation, Claims

The concept of antitrust injury invoked in the district court comes from federal antitrust jurisprudence. Essentially, it equates to the Kansas concept of causation, or the requirement that a plaintiff's theory of damages correspond to an economic effect that the statute or case law rule invoked as the basis for liability aims to prevent.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN24[] State Regulation, Claims

Under the plain language of *Kan. Stat. Ann. § 50-101*, there are several optional theories under which a Kansas Restraint of Trade Act, *Kan. Stat. Ann. § 50-101 et seq.*, plaintiff may proceed. Under the most forgiving of those theories, a plaintiff must prove the existence of a trust for the purpose to fix any standard or figure, whereby price to the public shall be, in any manner, controlled or established. *Kan. Stat. Ann. § 50-101* Fourth. As defined in *§ 50-101*, to establish the existence of a trust, a plaintiff need only show a combination of capital, skill, or acts, by two or more persons. A plaintiff need not show a relationship rising to the level of an agreement. Furthermore, it is enough to demonstrate that the combination is for the purpose to fix prices; a plaintiff does not have to show that the combination actually succeeds in increasing prices. "For the purpose" contemplates a subjective standard, one that requires examination of the intent behind a defendant's behavior.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN25[] State Regulation, Claims

Under the plain language of *Kan. Stat. Ann. § 50-112*, there are alternate theories under which a Kansas Restraint of Trade Act, *Kan. Stat. Ann. § 50-101 et seq.*, plaintiff may proceed: A plaintiff may prove the existence of an arrangement, contract, agreement, trust, or combination designed to advance, reduce, or control price, or one that tends to advance, reduce, or control price. Mere arrangements between persons are within the scope of the statute; again, a plaintiff does not have to show a relationship rising to the level of an agreement. In addition, it is enough to show that the arrangement is designed to or tends to control prices; again, a plaintiff does not have to show that the arrangement actually succeeds in increasing prices. Like "for the purpose" in *Kan. Stat. Ann. § 50-101*, the phrase "designed to" contemplates a subjective standard. On the other hand, "tend to" contemplates an objective standard, one that requires examination of the defendant's behavior to discern whether it would reasonably be expected to produce a particular result, regardless of the defendant's intention.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN26[] **State Regulation, Claims**

Under the plain language of *Kan. Stat. Ann. §§ 50-108*, *50-115*, and *50-161*, a plaintiff must show that the plaintiff was injured or damaged by the defendant's forbidden behavior.

Evidence > Admissibility > Circumstantial & Direct Evidence

HN27[] **Admissibility, Circumstantial & Direct Evidence**

Circumstantial evidence can serve as proof of the elements of a theory of liability even though other reasonable theories are not excluded by such evidence.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Evidence > Admissibility > Circumstantial & Direct Evidence

HN28[] **State Regulation, Claims**

Neither the Kansas Restraint of Trade Act, *Kan. Stat. Ann. § 50-101 et seq.*, nor the Supreme Court of Kansas's limited caselaw interpreting it requires concrete evidence to prove injury or damage in the form of a benchmark analysis to avoid summary judgment on antitrust injury.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

HN29[] **State Regulation, Claims**

Neither *Kan. Stat. Ann. §§ 50-101* nor *50-112* mentions reasonableness or a rule of reason. Rather, *Kan. Stat. Ann. § 50-101(d)* provides that any such combinations are hereby declared to be against public policy, unlawful and void, and *§ 50-102* denies the right to form or to be in any manner interested, either directly or indirectly, as principal, agent, representative, consignee or otherwise, in any trust as defined in *§ 50-101*. *Section 50-112* provides that all arrangements, contracts, agreements, trusts or combinations between persons, designed or which tend to advance, reduce or control the price or the cost to the producer or to the consumer of any such products or articles are hereby declared to be against public policy, unlawful and void.

Governments > Legislation > Interpretation

HN30[] **Legislation, Interpretation**

Federal precedents interpreting, construing, and applying federal statutes have little or no precedential weight when the task is interpretation and application of a clear and dissimilar Kansas statute.

Governments > Courts > Judicial Precedent

HN31[] **Courts, Judicial Precedent**

Although stare decisis is not an inexorable command, the Supreme Court of Kansas does not lightly overrule its prior cases.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN32[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Careful examination of Supreme Court of Kansas precedent demonstrates that the reasonableness rubric they instituted had and has nothing to do with evaluation of an alleged price-fixing arrangement.

Governments > Legislation > Interpretation

HN33[] **Legislation, Interpretation**

Under the pattern for interpretation of statutes that the Supreme Court of Kansas has now firmly established, it is loathe to read unwritten elements into otherwise clear legislative language. The Court takes the legislature at its word, unless there is ambiguity, because the legislature, unlike the judiciary, is one of the branches of government charged with development of public policy on behalf of the electorate and because the Court's deference to clear statutory language leads to long-term predictability and stability in Kansas law.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN34[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

As *Kan. Stat. Ann. §§ 50-101* and *50-112* now read, the proper approach is not to determine whether the restraint is reasonable in view of all of the facts and circumstances, or to attempt to distinguish between restraints with anticompetitive effect and restraints that stimulate competition. The clear statutory language of *§§ 50-101* and *50-112* leaves no room for such an approach. The simple, per se rule of *Mills v. Cleveland, 87 Kan. 549, 125 P. 58*, *United Artists Corp. v. Mills, 135 Kan. 655, 11 P.2d 1025*, and *Joslin v. Steffen Ice & Ice Cream Co., 143 Kan. 409, 54 P.2d 941*, survives. The reasonableness rubric of *Heckard v. Park, 164 Kan. 216, 223-24, 188 P.2d 926*, and *Okerberg v. Crable, 185 Kan. 211, 217, 341 P.2d 966*, is overruled.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Price Fixing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN35[] **Vertical Restraints, Price Fixing**

The governing Kansas Restraint of Trade Act, *Kan. Stat. Ann. § 50-101 et seq.*, provisions, *Kan. Stat. Ann. §§ 50-101* and *50-112*, neither differentiate between vertical and horizontal price-fixing nor outline a particular approach to a dual-distribution situation. Rather, they forbid all price-fixing combinations or arrangements, regardless of the applicable label.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN36[] Private Actions, State Regulation

For persons injured or damaged by price-fixing prohibited under *Kan. Stat. Ann. §§ 50-101* and *50-112*, recovery of damages sustained, full consideration damages, and treble damages are permitted. *Kan. Stat. Ann. §§ 50-108*, *50-115*, and *50-161(b)*.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN37[] Private Actions, State Regulation

The Kansas Restraint of Trade Act (KRTA), *Kan. Stat. Ann. § 50-101 et seq.*, explicitly establishes a cause of action for individuals to sue and recover general damages as well as specific types of damages. *Kan. Stat. Ann. §§ 50-102*, *50-108*, *50-115*, and *50-161*. It thus creates not only a new procedure for relief, but also new substantive rights. In addition, the Supreme Court of Kansas notes that the remedies for persons under the KRTA are separate and distinct from the civil penalties the attorney general is empowered to seek. *Kan. Stat. Ann. § 50-103(a)(5)*.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN38[] Trade Practices & Unfair Competition, State Regulation

In the words of *Kan. Stat. Ann. § 60-512(2)*, an action based on the Kansas Restraint of Trade Act (KRTA), *Kan. Stat. Ann. § 50-101 et seq.*, is upon a liability created by statute. Likewise, an action based on the KRTA qualifies for the one-word description of *Kan. Stat. Ann. § 60-514(c)*: It is statutory.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Governments > Legislation > Statute of Limitations > Time Limitations

HN39[] State Regulation, Claims

The Supreme Court of Kansas holds that neither a purchaser's claim for full consideration damages nor a claim for treble damages qualifies as an action for a statutory penalty or forfeiture. They are both subject to the three-year statute of limitations under *Kan. Stat. Ann. § 60-512(2)*.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN40[] State Regulation, Claims

Kan. Stat. Ann. §§ 50-101 and *50-112* prohibit more than agreements to fix prices. But even a combination under *§ 50-101* must be by two or more persons, and an arrangement under *§ 50-112* must be between persons.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN41[] **State Regulation, Claims**

Because *Kan. Stat. Ann. § 50-112* and *15 U.S.C.S. § 1* of the Sherman Act share the "between persons" language, and the language of *Kan. Stat. Ann. § 50-101* is equivalent, the Supreme Court of Kansas looka to interpreting United States Supreme Court precedent for assistance in understanding what, short of an express agreement, qualifies as more than merely unilateral behavior.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Price Fixing

HN42[] **Sherman Act, Claims**

In case law, the United States Supreme Court ruled that, under *15 U.S.C.S. § 1* of the Sherman Act, a price-fixing case must include evidence that tends to exclude the possibility of independent action by the manufacturer and distributor. There must be direct or circumstantial evidence that reasonably tends to prove that the manufacturer and others had a conscious commitment to a common scheme designed to achieve an unlawful objective, and neither communication between a manufacturer and its retailers nor the existence of complaints about discounting would be enough alone for a plaintiff in a price-fixing action to sustain its burden of proof. The Court acknowledged that evidence of complaints about discounting can be probative; however, there must be additional evidence of unlawful conduct.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN43[] **Class Actions, Prerequisites for Class Action**

Class actions are governed by *Kan. Stat. Ann. § 60-223*, which was modeled after and has traditionally been interpreted like *Fed. R. Civ. P. 23*.

Civil Procedure > Special Proceedings > Class Actions > Appellate Review

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN44[] **Class Actions, Appellate Review**

Under judicial precedent, the Supreme Court of Kansas does not judge the propriety of a class certification by hindsight but rather to ensure that the district judge applied and rigorously analyzed the requirements of *Kan. Stat. Ann. § 60-223* in its decision to certify the class. If a district judge evaluates the proper factors, his or her decision will be granted deference on appeal.

Civil Procedure > Trials > Bench Trials

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

HN45[] **Trials, Bench Trials**

The Supreme Court of Kansas determined that *Kan. Stat. Ann. § 60-252(a)* and *Kan. Sup. Ct. R. 165*, which require that a district court judge find, and either orally or in writing state, the controlling facts and the judge's conclusions of law thereon and state the controlling facts required by *Kan. Stat. Ann. § 60-252*, and the legal principles controlling the decision, apply to a district judge's class certification decision. Generally litigants and their counsel bear the responsibility of objecting to inadequate findings of fact and conclusions of law to give the trial court the opportunity to correct them, and in the absence of an objection, omissions in findings will not be considered on appeal. Where no objection is made, the Supreme Court will presume the trial court found all facts necessary to support its judgment. However, the Supreme Court may still consider a remand if the lack of specific findings precludes meaningful review.

Syllabus

BY THE COURT

1. Cases interpreting federal antitrust statutes may be persuasive authority for any state court interpreting its antitrust laws, but such authority is not binding upon any court in Kansas interpreting Kansas antitrust statutes.

2. Vertical price-fixing involves participants at different rungs of the distribution ladder, e.g., a wholesaler and a retailer. Horizontal price-fixing involves participants who are at the same rung of the distribution ladder, e.g., two or more retailers.

3. Under the plain language of *K.S.A. 50-101*, there are several optional theories under which a Kansas restraint of trade plaintiff may proceed. Under the most forgiving of those theories, a plaintiff must prove the existence of a trust "for . . . the . . . purpose[] . . . [t]o fix any standard or figure, whereby . . . price to the public shall be, in any manner, controlled or established." *K.S.A. 50-101* Fourth. As defined in *K.S.A. 50-101*, to establish the existence of a trust, a plaintiff need only show a "combination of capital, skill, or acts, by two or more **[***2]** persons." A plaintiff need not show a relationship rising to the level of an agreement. Furthermore, it is enough to demonstrate that the combination is for the purpose to fix prices; a plaintiff does not have to show that the combination actually succeeds in increasing prices. The phrase "for the purpose" contemplates a subjective standard, one that requires examination of the intent behind a defendant's behavior.

4. Under the plain language of *K.S.A. 50-112*, there are alternate theories under which a Kansas restraint of trade plaintiff may proceed: A plaintiff may prove the existence of an arrangement, contract, agreement, trust, or combination between persons designed to advance, reduce, or control price, or one that tends to advance, reduce, or control price. Mere arrangements between persons are within the scope of the statute; a plaintiff does not have to show a relationship rising to the level of an agreement. In addition, it is enough to show that the arrangement is designed to or tends to control prices; a plaintiff does not have to show that the arrangement actually succeeds in increasing prices. Like "for the purpose" in *K.S.A. 50-101*, the phrase "designed to" contemplates **[***3]** a subjective standard. On the other hand, "tend to" contemplates an objective standard, one that requires examination of the defendant's behavior to discern whether it would reasonably be expected to produce a particular result, regardless of the defendant's intention.

5. The concept of "antitrust injury" from federal antitrust jurisprudence essentially equates to the Kansas concept of causation.

6. In this case, the named plaintiff and class have come forward with enough evidence that the defendant's pricing policy and written applications and agreements were for the purpose of fixing prices or designed to control prices, that they tended to control prices, and that the named plaintiff and class members were injured or damaged to survive defendant's summary judgment motion.

7. The "rule of reason" of federal antitrust jurisprudence does not apply to lawsuits under the Kansas Restraint of Trade Act. *K.S.A. 50-101*, *K.S.A. 50-102*, and *K.S.A. 50-112* forbid all vertical and horizontal price-fixing by two or more persons or between persons. Contrary holdings in *Okerberg v. Crable, 185 Kan. 211, 341 P.2d 966 (1959)*, and *Heckard v. Park, 164 Kan. 216, 188 P.2d 926 (1948)*—decided during the period **[***4]** when the Kansas Fair Trade Act, R.S. 1937, 50-301 et seq., was in effect—are overruled.

8. The Kansas Restraint of Trade Act does not differentiate between vertical and horizontal price-fixing or outline a particular approach to a dual-distribution situation. In this case, named plaintiff and the class have alleged both vertical and horizontal price-fixing, and they are free to pursue the alternative theories as long as they are supported by the evidence.

9. The 3-year statute of limitations in *K.S.A. 60-512(2)* controls both full consideration and treble damages claims under the Kansas Restraint of Trade Act.

10. *K.S.A. 50-101* and *K.S.A. 50-112* do not demand that a defendant in a price-fixing case have had an explicit written agreement with the other person with whom the defendant engages in the unlawful behavior. However, more than unilateral behavior by the defendant is required. In this case, named plaintiff and the class have marshaled sufficient evidence to avoid summary judgment with respect to purchases made at stores other than those subject to explicit applications and agreements.

11. An appellate court reviews a district judge's decision to certify a class action under *K.S.A. 60-223* **[***5]** to ensure that the judge has applied and rigorously analyzed the requirements of the statute. In this case, the district judge's findings of fact and legal conclusions are inadequate to support meaningful appellate review of the predominance factor for certification. A pending motion for decertification will be ripe for decision on remand to the district court, and the judge and the parties will have another opportunity to make and preserve a record sufficient for any eventual appellate review.

Counsel: Robert W. Coykendall, of Morris, Laing, Evans, Brock & Kennedy, Chartered, of Wichita, argued the cause, and Will B. Wohlford and John W. Johnson, of the same firm, were with him on the briefs for appellants/cross-appellees.

James M. Armstrong, of Foulston Siefkin LLP, of Wichita, argued the cause, and Timothy B. Mustaine and Jeffrey A. Jordan, of the same firm, were with him on the briefs for appellee/cross-appellant.

Kristafer R. Ailslieger, deputy solicitor general, Clay Britton, assistant solicitor general, and Lynette Bakker, assistant attorney general, were on the brief for amicus curiae State of Kansas.

Rex A. Sharp, of Gunderson, Sharp & Walke L.L.P., of Prairie Village, was on the brief **[***6]** for amicus curiae Quin Jackson.

Judges: BEIER, J. MALONE, J., assigned. [1]

Opinion by: BEIER

Opinion

---

[1] REPORTER'S NOTE: Pursuant to the authority vested in the Supreme Court by K.S.A. 20-3002(c), Judge Thomas E. Malone, of the Kansas Court of Appeals, was appointed to hear case No. 101,000 to fill the vacancy on the court created by the retirement of Chief Justice McFarland.

[*320] **[**1067]** The opinion of the court was delivered by

BEIER, J.: This appeal and cross-appeal concern a dispute over retail pricing practices by a fashion accessories company.

Named plaintiff Sue O'Brien and a class of similarly situated consumers (O'Brien) sued the maker of Brighton handbags, other accessories, and luggage, defendant Leegin Creative Leather Products, Inc. (Brighton), alleging violations of the Kansas Restraint of Trade Act (KRTA), *K.S.A. 50-101 et seq.* We understand O'Brien to contend that Brighton's practices as a wholesale supplier and retailer constituted illegal price-fixing in violation of *K.S.A. 50-101* and *K.S.A. 50-112*, entitling her and other class members to recovery under *K.S.A. 50-108*, *K.S.A. 50-115*, *K.S.A. 50-147*, and *K.S.A. 50-161*.

[*321] Brighton moved for summary judgment in the district court. In the alternative, it sought partial summary **[***7]** judgment and moved to decertify the class. District Judge Jeffrey E. Goering granted Brighton's motion for summary judgment, granted its motion for partial summary judgment in part, and did not reach the issue of decertification.

O'Brien appealed, and Brighton cross-appealed. We transferred this matter from our Court of Appeals on O'Brien's unopposed motion. We reverse and remand to the district court for further proceedings consistent with the rulings below.

ISSUES

We have reformulated and reorganized the questions presented by the parties for ease and flow of analysis. The six questions are:

(1) Did the district judge correctly interpret the KRTA on the issue of "antitrust injury"?

(2) Did the district judge err in relying on a "rule of reason" to evaluate whether there has been a violation of the KRTA?

(3) Does this case involve a claim for horizontal price-fixing as well as vertical price-fixing, and, if so, was summary judgment on that claim properly granted by the district judge?

(4) Did the district judge identify the correct statute of limitations applicable to a treble damages claim and to a full consideration claim under the KRTA?

(5) Did the district judge correctly determine that **[***8]** an explicit written agreement with each retailer was not a necessary prerequisite to liability under the KRTA?

(6) Did the district judge properly evaluate predominance when granting class certification?

INTRODUCTION

Before we set forth the pertinent factual and procedural background, a brief review of basic principles governing the relationship between Kansas and federal ***antitrust law*** and the types of price-fixing that can occur is in order.

Although there are federal antitrust statutes, e.g., the Sherman Act, *15 U.S.C. § 1 (2006) et seq.*, and a large body of interpreting **[*322]** caselaw, ***antitrust law*** has traditionally **[**1068]** been the province of the states. *McShares, Inc. v. Barry, 266 Kan. 479, 488-89, 970 P.2d 1005, cert. denied 526 U.S. 1158, 119 S. Ct. 2048, 144 L. Ed. 2d 215 (1998)* (citing *California v. ARC America Corp., 490 U.S. 93, 109 S. Ct. 1661, 104 L. Ed. 2d 86 [1989])*. In addition, we have noted in the past that federal ***antitrust law*** is intended to supplement the remedies available under Kansas law, not to replace Kansas antitrust provisions. *266 Kan. at 488-89*.

Kansas' ***antitrust law*** under the KRTA, originally enacted in 1897, remains largely undeveloped; very few cases have reached this court. See *Bergstrom v. Noah, 266 Kan. 829, 843, 974 P.2d 520 (1999)*. **[***9]** ***HN1***[] We have observed generally that the KRTA is broad in scope but that the bulk of its provisions have not been meaningfully interpreted by Kansas courts. *266 Kan. at 843*.

While the KRTA and federal antitrust statutes share some similarities, they are not, in fact, the same. *266 Kan. at 844*. Thus, ***HN2***[] "[w]hile . . . cases [interpreting federal antitrust statutes] may be persuasive authority for any state court interpreting its antitrust laws, such authority is not binding upon any court in Kansas interpreting Kansas antitrust laws." *266 Kan. at 845*.

HN3[] In relation to price-fixing practices specifically, this court concluded more than 50 years ago that it "may not substitute [its] judgment for that of the legislature as to whether price fixing is good or bad for the economic life of the state." *Quality Oil Co. v. du Pont & Co., 182 Kan. 488, 495, 322 P.2d 731 (1958)*. It is the role of the legislature, not this court, to set antitrust policy.

This case concerns allegations that defendant engaged in price-fixing. ***HN4***[] Price-fixing may be either "vertical" or "horizontal." Vertical price-fixing involves participants at different rungs of the distribution ladder, *e.g.*, a wholesaler and a retailer. Horizontal **[***10]** price-fixing involves participants who are at the same rung of the distribution ladder, *e.g.*, two or more retailers. See Black's Law Dictionary 1227-28 (8th ed. 2004).

FACTUAL AND PROCEDURAL BACKGROUND

The bulk of the following facts are taken from District Judge Goering's findings of uncontroverted fact. ***HN5***[] Neither party challenges **[*323]** these facts on this appeal, making them conclusive for our purposes. See *McShares, Inc., 266 Kan. at 480*.

Brighton's Business

Brighton is a designer, manufacturer, and retailer of fashion accessories and luggage. It primarily markets its accessories to independent retailers, but it also maintains retail stores of its own called "Brighton Collectibles." The first Brighton Collectibles store opened in 1999, and there are now more than 100 stores nationwide. A substantial portion of Brighton's profits come from its own retail stores.

Brighton's Pricing Practices

Since April 1997, Brighton has provided its retailers with copies of its suggested pricing and promotional policy. Brighton's policy calls for retailers to sell Brighton products at "keystone," which is an amount equal to twice wholesale plus a small amount that varies by product. Under the policy, retailers **[***11]** may discount out-of-season products and products that are not selling well that the retailer will not reorder. Brighton ships its products to its retailers with tags displaying the manufacturer's suggested retail price (MSRP). For at least 1 year, Brighton required its retailers to initial and sign an acknowledgement that a violation of its pricing policy was grounds for dismissal.

According to Jerry Kohl, Brighton's owner and president, Brighton's pricing policy was not adopted to thwart competition from other manufacturers of similar products. When asked if he had thought about how the pricing policy affected the profitability of retail sales of the Brighton line, Kohl responded that he had not thought about it. Further, Laura Young, Brighton's second-in-command, said that prices were set without regard to retailers' profits. Brighton admits that its pricing policy was not created in **[**1069]** response to any problem with retailers failing to provide desired service to customers. It has made certain of its decisions about its pricing policies after consulting with its retailers, such as when "birthday club" discounting was approved.

[*324] Many retailers of Brighton products have advertised discounts **[***12]** of Brighton products, but it is unclear which, if any, of these advertisements violated Brighton's pricing policy. Young stated in her affidavit:

> "Since the promulgation of the universal retail price policy, Brighton has never undertaken any systematic, comprehensive effort aimed at determining whether its retailers are following that policy. But Brighton from time

to time has acquired information from various sources (*e.g.*, consumers, other retailers, advertisements, and Brighton's sales force), to the effect that some Brighton retailers are or might be violating the suggested retail price policy, and Brighton has occasionally enforced that policy against retailers in states other than Kansas by refusing to deal with retailers believed to have intentionally violated Brighton's policy."

Kohl also testified in his deposition that Brighton sometimes becomes aware of retailers selling products at prices other than the MSRP. Kohl further testified that Brighton keeps reports documenting customer inquiries, including those about Brighton's pricing policies. Kohl testified:

"Q: . . . And one of the things you do with the reports is keeping [sic] track of whether or not the particular retailer **[***13]** is complying with the pricing policy of [Brighton]?
"A: Well, that's a big stretch. I surely wouldn't call it that. We keep comments regardless of what they might be, everything from talk to Joe about a handbag was damaged. So we keep comments that people give us.
"Q: Those comments include whether or not the retail customer of [Brighton]'s is discounting or is not following the pricing policy; is that a fair statement?
"A: Well, again, I wouldn't put it the way you did. You know, there are times when there's comments about pricing policies, but to say they include them implies that it's a regular situation. And the answer is no, it isn't.
"Q: Well, if a retailer was abiding by the pricing policy, there wouldn't be any need to put information like that in an inquiry report.
"A: That's correct.
"Q: And your point is most of the retailers comply with the retail pricing policies of [Brighton]?
"A: As far as I know, yes.
"Q: And those who don't, when you find out about it, are terminated, correct?

"A" "Those who don't and who are aware of our pricing policy and is [sic] willfully disregarding our pricing policy, yes, they are terminated or I should say put on hold until we make a decision on what **[***14]** we're going to do."

In the past, Brighton has rejected at least one promotion for violating its retail price maintenance policy. When rejecting the promotion, a proposed shoe trade-in, Young stated in an email:

[*325] ". . . . Did someone tell you it was ok to do this?
"The reason I ask is this will spread like cancer . . . one person does it . . . sells more shoes than normal. And they and you tell more people and before you know it the world will be holding their own shoe trade in.

"It cannot be an individual store authorize [*sic*] event. We have a very clear SRP (Suggested Retail Pricing Policy) and this would be in violation of it. . . .
"SO, please no matter what/who said its ok, it's not."

Young also expressed the following in another email:

"[W]hen one store begins to lure customers in with an incentive for purchasing . . . the next store thinks they need to 'one up' the competition, and then the third customer needs to 'two up them both' and so on . . . and after a while it's out of control. What happens is the customers then get confused on if they need to wait for the best offer to purchase Brighton.

[1070]** "Our Suggested Retail Pricing and Promotional Policy basically was designed to create an **[***15]** environment for the consumer to shop with confidence that they were being treated fairly. We have always wanted consumers to be able to feel that wherever Brighton is sold—authorized dealers—they can buy now! And not worry if they're getting the 'best deal.'"

One of O'Brien's experts was Gregory T. Gundlach, Professor of Marketing and Senior Fellow at the American Antitrust Institute. He asserted in his prepared report that there was no evidence that a cartel existed among Brighton's retailers in Kansas or elsewhere and that there was no evidence that Brighton's pricing policy was instituted by Brighton at the request of its retailers. Gundlach also concluded, however, that Brighton engaged in vertical price-fixing and in horizontal price-fixing. Gundlach further concluded that Brighton's price-fixing necessarily raised the price at which consumers may purchase its products. In addition, Gundlach concluded that Brighton's price-fixing limited price competition between retailers and that, as a result of the suppression of competition, consumers were denied potential savings.

Gundlach also opined that the higher prices faced by consumers were not offset by benefits to competition or to **[***16]** consumers, stating that no facts supported various theories advanced by Brighton's experts to support a pro-competitive explanation of the company's price-fixing. According to him, the more compelling scenario was that Brighton's price-fixing shielded its own stores and those of its **[*326]** retailers from competition by more efficient forms of retailing to the detriment of consumers.

Christopher Charles Pflaum, Ph.D., an economist specializing in business and financial economics and the other expert for the plaintiff class, testified about class certification and the measure of damages.

Brighton's Heart Store and Luggage Applications

Since 1998, Brighton has offered a "Heart Store" program to retailers, which offers incentives for retailers to expand their business with Brighton. In exchange for these incentives, Heart Stores are expected to maintain certain levels of Brighton inventory, to display Brighton products in a dedicated section of the store, and to service Brighton products regardless of where they were purchased.

A retailer becomes a Heart Store by signing an application, which is then approved by Brighton. Less than 5 percent of Brighton's retailers are Heart Stores.

Applications for **[***17]** Heart Store status must be submitted each calendar year. The Heart Store applications for the years 2001 and 2002 included language that the applicant would maintain minimum inventory, showcase Brighton products in dedicated spaces, "[s]ell Brighton products for the suggested price every day, 365 days a year," and "close out markdown styles you do not plan to reorder." The Heart Store applications for 2003 and later do not include that language, but they do include a statement that "Brighton reserves the right to withdraw Heart Store benefits from any store that does not represent Brighton in a positive and quality manner."

To sell Brighton luggage, a separate agreement must be signed by the retailer. As with the Heart Stores, a retailer must apply to become a Brighton luggage retailer. Luggage retailers must maintain a certain inventory of products. About 5 percent of Brighton retailers sell Brighton luggage.

The application to sell Brighton luggage for calendar year 2003 included language that the applicant agreed to display a certain number of pieces and agreed to "sell the luggage at the suggested **[*327]** retail price." The luggage applications for prior and subsequent years did not include **[***18]** such language.

Brighton never made any express or explicit promise to enforce its retail pricing policy against other Brighton retailers as an incentive for a retailer to become a Heart Store or luggage store.

Brighton in Kansas

In the relevant time period for this lawsuit, after April 12, 2001, Brighton has sold to more than 100 independent retailers in Kansas. **[**1071]** Most of Brighton's retailers in the state are small boutiques or specialty stores, but Brighton also sells to certain department stores and specialty chains. The independent retailers typically carry products from both Brighton and other brands. There is only one Brighton Collectibles store in Kansas; it opened in December 2006.

O'Brien, the class representative, testified that she owns numerous other brands of accessories and that she made purchases of these accessories in both department stores and specialty stores. O'Brien testified that she shops in all different types of retail establishments.

Several of Brighton's Kansas retailers have sworn that they generally sell at the MSRP and do not discount unless an item is out of season or selling poorly. Further, the retailers swore that this is true for both Brighton and non-Brighton **[***19]** products.

Ten Brighton retailers in Kansas who submitted affidavits in this case have sworn that they generally price products at keystone. These retailers also swore that their pricing of Brighton products would have been the same in the absence of Brighton's pricing policy. Four Kansas Brighton retailers have stated in affidavits that they voluntarily follow Brighton's pricing policies and that they had no agreement with Brighton to sell Brighton products at the suggested retail price.

Since adopting its pricing policy, Brighton has not determined that any Kansas retailer violated the policy and has not refused to deal with or taken other adverse action against any Kansas retailer for an actual or suspected violation. However, Brighton did follow up on a report that one of its Kansas retailers may have been discounting. **[*328]** It concluded that the reported discounting had not occurred.

Six independent retailers in Kansas submitted Heart Store applications for the years 2001 and 2002, and Brighton accepted the six as Heart Stores for those years. Three Kansas Heart Stores, as well as three other Brighton Kansas retailers, submitted luggage applications for 2003 and were accepted as luggage **[***20]** stores for that year.

The Accessories Market

Products of a quality and price similar to Brighton's are sold in department stores, specialty chains, and over the Internet. According to figures arrived at by using Accessories magazine, an industry trade publication relied on by the experts on both sides, the value of retail sales of Brighton's products in 2005 was approximately $357 million. Accessories magazine reports that the total amount of retail sales in the accessories industry in 2005 was $30.2 billion. Based on these figures, Brighton's sales accounted for less than 2 percent of total sales in the accessories market in 2005. Accessories magazine also reported that 2005 retail sales of accessories in specialty boutiques totaled $4.1 billion. If all of Brighton's sales had occurred in specialty boutiques, which was not the case, Brighton's retail sales would constitute 6.2 percent of the sales in specialty boutiques in 2005. From 2001 to 2004, Brighton's estimated sales as a percentage of retail sales were in the 1 percent to 2 percent range; and Brighton's estimated sales as a percentage of specialty boutique sales were in the 5 percent to 7 percent range.

Gundlach drew conclusions **[***21]** about the relevant market and Brighton's market dominance. He defined the relevant market for this case as women's accessories distributed through specialty boutique dealers. He further defined boutique retailers as those who generally are independent and provide an intimate experience for shoppers. Gundlach recognized that Brighton seeks to focus its retail distribution on small, independent specialty retailers or boutique retailers. He also determined that the specific characteristics of consumers who shop often in boutique retail outlets are important to understanding whether products generally distributed **[*329]** through boutique retailers compete with products not distributed through boutique retailers. Gundlach concluded that these characteristics are important in defining the market in this case. In addition to his analysis of the relevant market, Gundlach also concluded that Brighton was the dominant vendor in women's accessories distributed through specialty boutique retailers. He **[**1072]** stated that Brighton's dominant power was derived from its extensive retail distribution network, its broad product lines, and its differentiated product.

This Lawsuit

The class in this case consists of named **[***22]** plaintiff O'Brien and "[a]ll persons who, in the period from January 1, 1997, . . . to the date of trial, have purchased any Brighton product from any Brighton retailer."

In the petition that launched this litigation, an earlier named plaintiff alleged that Brighton engaged in pricing practices prohibited by *K.S.A. 50-101*, *K.S.A. 50-102*, and *K.S.A. 50-112*. Specifically, plaintiff alleged that "[t]he arrangements made between [Brighton] and its retailer dealers are made with the purpose of controlling the price of Brighton goods to the customer, and are prohibited trust arrangements outlawed in Kansas."

Plaintiff further alleged that plaintiff and the class were entitled to damages pursuant to *K.S.A. 50-108*, *K.S.A. 50-137*, and *K.S.A. 50-161*, including full consideration damages, treble damages, and attorneys fees and costs. We note that the statutory citations on damages appear to be in error in two respects. First, *K.S.A. 50-115* is omitted, even though it is the support for the full consideration claim. Second, *K.S.A. 50-137* does not apply, as it deals exclusively with unlawful restraints by grain dealers. It is obvious that the citation was intended to be *K.S.A. 50-147* instead. Neither **[***23]** of these errors appears to have confused the parties, so we will address the class damages claims on this appeal as though the petition's citation errors did not occur.

The district judge held that O'Brien's claims that Brighton's resale price maintenance (RPM) agreements and RPM policy violate the KRTA were to be evaluated under a "rule of reason" framework. **[*330]** The district judge cited both *K.S.A. 50-101* and *K.S.A. 50-112* in this portion of his summary judgment decision, but he failed to address the statutory language in either statute or any potential differences between the two provisions. Although the district judge ruled that genuine issues of material fact remained on whether Brighton's RPM policy or agreements were unreasonable, the district judge also ruled that O'Brien would be unable to prove antitrust injury. The judge therefore granted Brighton's summary judgment motion.

Judge Goering also determined that O'Brien did not make out a claim of horizontal price-fixing. District Judge William Sioux Woolley held that O'Brien's claim for treble damages was subject to a 1-year statute of limitations, while O'Brien's full consideration claim was subject to a 3-year statute of limitations. **[***24]** Judge Goering did not reach Brighton's motion to decertify the class.

On this appeal by O'Brien and cross-appeal by Brighton, in addition to the parties' briefs, we have received and reviewed *amici* briefs from the State of Kansas and from Quin Jackson, a plaintiff in a separate Kansas antitrust class action. Brighton submitted briefs responding to the *amici* briefs, which we have also considered.

DISCUSSION

Three standards of appellate review are influential in this case.

First is our familiar standard for summary judgment:

> ***HN6***[] "Summary judgment is appropriate when the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, show that there is no genuine issue as to any material fact and that the moving party is entitled to judgment as a matter of law. ***HN7***[] The trial court is required to resolve all facts and inferences which may reasonably be drawn from the evidence in favor of the party against whom the ruling is sought. ***HN8***[] When opposing a motion for summary judgment, an adverse party must come forward with evidence to establish a dispute as to a material fact. In order to preclude summary judgment, the facts subject to the dispute must be material **[***25]** to the conclusive issues in the case. ***HN9***[] On appeal, we apply the same rules and where we find reasonable minds could differ as to the conclusions drawn from the evidence, summary judgment must be denied. [Citations omitted.]" *Shamberg, Johnson & **[**1073] [**1074]** Bergman, Chtd. v. Oliver, 289 Kan. 891, 900, 220 P.3d 333 (2009)*.

[*331] We have also emphasized that ***HN10***[] ""[s]ummary judgment should not be used to prevent the necessary examination of conflicting testimony and credibility in the crucible of a trial.'" [Citations omitted.]" *Esquivel v. Watters, 286 Kan. 292, 296, 183 P.3d 847 (2008)*.

The second relevant standard of review affects interpretation of statutes, such as the KRTA. ***HN11***[] Statutory interpretation raises a question of law over which this court has unlimited review. *State v. Arnett, 290 Kan. 41, 47, 223 P.3d 780 (2010)*. ***HN12***[] The most fundamental rule is that the intent of the legislature governs if that intent can be ascertained. *290 Kan. at 47*. An appellate court must first attempt to ascertain legislative intent through the statutory language enacted, giving common words their ordinary meanings. *State v. Raschke, 289 Kan. 911, 914, 219 P.3d 481 (2009)*.

"When a statute is plain and unambiguous, we must give **[***26]** effect to its express language, rather than determine what the law should or should not be. We will not speculate on the legislative intent and will not read the statute to add something not readily found in it. If the statute's language is clear, there is no need to resort to statutory construction. [Citations omitted.]" *Graham v. Dokter Trucking Group, 284 Kan. 547, 554, 161 P.3d 695 (2007)*.

HN13[] Only if the statute's language or text is unclear or ambiguous does the court employ canons of construction, legislative history, or other background considerations to divine the legislature's intent and construe the statute accordingly. *State v. Trautloff, 289 Kan. 793, 796, 217 P.3d 15 (2009)*.

Our third relevant standard of review applies to questions about class action certification:

HN14[] "'Trial judges are afforded substantial discretion in determining whether a class should be certified.' [Citation omitted.] . . . '"[T]he amount and degree of judicial discretion will vary depending on the character of the question presented for determination."' [Citations omitted.] . . . In general, when a discretionary decision is made within the legal standards and takes the proper factors into account in the **[***27]** proper way, the [trial court's] decision is protected even if not wise. [Citation omitted.] . . . However, 'abuse is found when the trial court has gone outside the framework of legal standards or statutory limitations, or when it fails to properly consider the factors on that issue given by the higher courts to guide the discretionary determination.' [Citations omitted.]" *Dragon v. Vanguard Industries, Inc., 277 Kan. 776, 779, 89 P.3d 908 (2004)*.

[*332] ***HN15***[] "While the trial court has substantial discretion in determining whether a class should be certified, the provisions of *K.S.A . . . 60-223* must be applied and rigorously analyzed." *277 Kan. at 780*. In conducting its analysis, the trial court "should consider evidence when submitted by the parties and make those factual determinations necessary to a determination of whether the prerequisites for a class action are met." *277 Kan. at 783*. "[T]he presence of individual questions, while tending to diminish the weight of class facts, does not necessarily defeat a prima facie showing the class prerequisites are satisfied, [citation omitted,] or mean that there has been an abuse of discretion in certifying the class. [Citation omitted.]" *277 Kan. at 793*.

KRTA ***[***28]*** *Provisions*

K.S.A. 50-101, one of the KRTA sections setting out elements of O'Brien's cause of action, provides in pertinent part:

HN16[] "A trust is a combination of capital, skill, or acts, by two or more persons, for either, any or all of the following purposes:

. . . .

"*Second*. To increase or reduce the price of merchandise, produce or commodities, or to control the cost or rates of insurance.

. . . .

"*Fourth*. To fix any standard or figure, whereby such person's price to the public shall be, in any manner, controlled or established, any article or commodity of merchandise, produce or commerce intended for sale, use or consumption in this state.

"*Fifth*. To make or enter into, or execute or carry out, any contract, obligation or agreement of any kind or description by which such person shall: (a) Bind or have to bind themselves not to sell, manufacture, dispose of or transport any article or commodity, or article of trade, use, merchandise, commerce or consumption below a common standard figure;
(b) agree in any manner to keep the price of such article, commodity or transportation at a fixed or graded figure;

(c) in any manner establish or settle the price of any article or commodity or transportation **[***29]** between them or themselves and others to preclude a free and unrestricted competition among themselves or others in transportation, sale or manufacture of any such article or commodity; or
(d) agree to pool, combine or unite any interest they may have in connection with the manufacture, sale or transportation of any such article or commodity, that such person's price in any manner is affected. Any such combinations are hereby declared to be against public policy, unlawful and void."

[*333] ***HN17***[] *K.S.A. 50-102* denies "[a]ll persons within this state" the right to form "or be in any manner interested, either directly or indirectly, as principal, agent, representative, consignee or otherwise," in any trust as defined in *K.S.A. 50-101*.

K.S.A. 50-112, the KRTA section setting out elements of what appears to be O'Brien's alternative statutory cause of action, provides in pertinent part:

HN18[] "All arrangements, contracts, agreements, trusts, or combinations between persons made with a view or which tend to prevent full and free competition in the importation, transportation or sale of articles imported into this state, or in the product, manufacture or sale of articles of domestic growth or product of domestic **[***30]** raw material, . . . , and all arrangements, contracts, agreements, trusts or combinations between persons, designed or which tend to advance, reduce or control the price or the cost to the producer or to the consumer of any such products or articles, . . ., are hereby declared to be against public policy, unlawful and void."

K.S.A. 50-108 provides for a private right of action against those who violate *K.S.A. 50-101* and *K.S.A. 50-102*:

HN19[] "[A]ny person that may be damaged by any such agreement, trusts or combinations described in *K.S.A. 50-101* and *50-102*, and amendments thereto, may sue for and recover in any court of competent jurisdiction in this state, of any person operating such trust or combination, such damages sustained, together with reasonable attorney fees."

K.S.A. 50-115 does likewise but applies to *K.S.A. 50-112*:

HN20[] "[A]ny person injured or damaged by any such arrangement, contract, agreement, trust or combination, described in *K.S.A. 50-112* and *50-113*, and amendments thereto, may sue for and recover in any court of competent jurisdiction in this state, of any person, the full consideration or sum paid by such person for any goods, wares, merchandise and articles included in or advanced **[***31]** or controlled in price by such combination . . . ."

K.S.A. 50-147 speaks to the cumulative nature of rights and remedies under the KRTA:

HN21[] "The rights and remedies given by this act shall be construed as cumulative of all other laws in force in this state, and shall not affect, change or repeal any other remedies or rights now existing in this state for the enforcement, payment or collection of fines, penalties and forfeitures."

K.S.A. 50-161 defines certain terms, again authorizes a private right of action, and discusses remedies:

[*334] ***HN22***[] "(a) As used in this section, the term 'person' means any individual, corporation, partnership, firm, company or other association of persons . . . .

"(b) . . . [A]ny person who may be damaged or injured by any agreement, monopoly, trust, conspiracy or combination which is declared unlawful by any of the acts contained in chapter 50 of the Kansas Statutes Annotated, relating to unlawful acts, agreements, monopolies, trusts, conspiracies **[**1075]** or combinations in restraint of trade, shall have a cause of action against any person causing such damage or injury. Such action may be brought by any person who is injured in such person's business or property by reason of anything **[***32]** forbidden or declared unlawful by this act, regardless of whether such injured person dealt directly or

> indirectly with the defendant. The plaintiff in any action commenced hereunder in the district court of the county wherein such plaintiff resides, or the district court of the county of the defendant's principal place of business, may sue for and recover treble the damages sustained. In addition, any person who is threatened with injury or additional injury by reason of any person's violation of such acts may commence an action in such district court to enjoin any such violation, and any damages suffered may be sued for and recovered in the same action in addition to injunctive relief . . . .
> "(c) . . . The remedies provided herein shall be alternative and in addition to any other remedies now provided by law."

Antitrust Injury

In this case, the district judge concluded that O'Brien was vulnerable to summary judgment in favor of Brighton because "[p]laintiff has to have some concrete evidence that she personally paid higher prices for Brighton products as a result of Defendant's RPM Policy" and, viewing the evidence in the record in the light most favorable to O'Brien, "[p]laintiff **[***33]** has not demonstrated that she paid higher prices for the Defendant's products than she would have paid absent Defendant's RPM policy." Thus, in the district judge's view, O'Brien was unable to prove "antitrust injury."

HN23[] The concept of antitrust injury invoked in the district court comes from federal antitrust jurisprudence. See, *e.g., Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)* ("Plaintiffs must prove antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation."). Essentially, it equates to the Kansas concept **[*335]** of causation, or the "require[ment] that a plaintiff's theory of damages . . . correspond to an economic effect that the statute or case law rule invoked as the basis for liability aims to prevent." See Davis, *Standing on Shaky Ground: The Strangely Elusive Doctrine of Antitrust Injury*, 70 Antitrust L.J. 697, 698 (2003).

HN24[] Under the plain language of *K.S.A. 50-101*, there are several optional theories **[***34]** under which a KRTA plaintiff may proceed. Under the most forgiving of those theories, a plaintiff must prove the existence of a trust "for . . . the . . . purpose[]" [t]o fix any standard or figure, whereby . . . price to the public shall be, in any manner, controlled or established." *K.S.A. 50-101 Fourth*. As defined in *K.S.A. 50-101*, to establish the existence of a trust, a plaintiff need only show a "combination of capital, skill, or acts, by two or more persons." A plaintiff need not show a relationship rising to the level of an agreement. Furthermore, it is enough to demonstrate that the combination is "for the . . . purpose[] . . . [t]o fix prices; a plaintiff does not have to show that the combination actually succeeds in increasing prices. "For the purpose" contemplates a subjective standard, one that requires examination of the intent behind a defendant's behavior.

HN25[] Under the plain language of *K.S.A. 50-112*, there are alternate theories under which a KRTA plaintiff may proceed: A plaintiff may prove the existence of an arrangement, contract, agreement, trust, or combination "designed to" advance, reduce, or control price, or one that "tend[s] to" advance, reduce, or control price. **[***35]** Mere arrangements between persons are within the scope of the statute; again, a plaintiff does not have to show a relationship rising to the level of an agreement. In addition, it is enough to show that the arrangement is "designed to" or "tends to" control prices; again, a plaintiff does not have to show that the arrangement actually succeeds in increasing prices. Like "for the purpose" in *K.S.A. 50-101*, the phrase "designed to" contemplates **[**1076]** a subjective standard. On the other hand, "tend to" contemplates an objective standard, one that requires examination of the defendant's behavior to discern whether it would reasonably be expected to produce a particular result, regardless of the defendant's intention.

[*336] In addition, ***HN26***[] under the plain language of *K.S.A. 50-108*, *K.S.A. 50-115*, and *K.S.A. 50-161*, a plaintiff must show that the plaintiff was injured or damaged by the defendant's forbidden behavior.

The **[***36]** language in Brighton's pricing policy and written Heart Store and luggage store applications and agreements is probative on whether Brighton's pricing policy and pricing agreements were for the purpose of fixing prices or designed to control prices and on whether they tended to control prices.

Brighton's 1997 "Brighton Retail Pricing and Promotional Policy" sets the "Suggested Brighton Retail Pricing" for each Brighton product. Although limited discounting is permitted by the policy for items that will not sell and that the retailer will not reorder, the policy explicitly states that Brighton "stand[s] firm on [its] Suggested Retail Prices" and that "[e]xceptions are not favored, should not be assumed, and will be granted only in extraordinary circumstances as determined independently by Brighton." The policy also states that "[c]onsumers are confused by the ever popular sale, sale, sale, etc.," *i.e.*, discounting by retailers, and that one purpose of the policy is to seek to reassure customers that prices are always "consistent." Pricing policies promulgated for subsequent years are nearly identical.

The language of Brighton's pricing policy certainly is subject to an inference that **[***37]** it was for the purpose of fixing prices and was designed to and tended to control the prices of Brighton's goods. While some discounting is allowed under the policy, it is permitted only under terms set by Brighton. Moreover, discounting is intended to be the exception rather than the rule, and discounting approval must be granted in advance by Brighton. Ensuring that prices are the same each day and at each store where Brighton goods are sold is a part of Brighton's business strategy to build consumer confidence by letting the customers know that they do not need to hunt for deals.

Further, for the relevant years of 2001 and 2002, Brighton's Heart Store applications included an explicit agreement between Brighton and its retailers that retailers agree to "[s]ell Brighton products for the suggested price every day, 365 days a year." The Heart Store agreements also allowed retailers to close out styles **[*337]** they would not reorder, but advertising of such closeouts was not permitted. No other discounting appears to have been permissible under the Heart Store agreements.

The 2003 luggage application is similar. It required the same agreement by retailers to sell at the price suggested by Brighton, **[***38]** stating that applicants "also agree that you will sell the luggage at the suggested retail price." The luggage agreement did not appear to allow for any discounting.

Both Heart Store and luggage store applications required applicants' signatures.

The Heart Store and luggage applications explicitly required retailers who wished to qualify for Heart Store or luggage store status to sell Brighton products at the same amount each and every day. The language of the agreements gives an even stronger indication that they were "for . . . the . . . purpose[] . . .[t]o fix any standard or figure, whereby . . . price to the public shall be, in any manner, controlled or established," "designed to . . . control the price or the cost . . . to the consumer of any such products or articles," and would "tend to advance, reduce or control the price or the cost to the . . . consumer" by explicitly limiting discounting.

Evidence of Brighton's enforcement practices also is relevant to Brighton's subjective intention, intention logically necessary if the plaintiff's theory is that Brighton's arrangements were "for . . . the . . . purpose[]" or "designed to" fix prices. O'Brien came forward with probative evidence **[***39]** of Brighton's enforcement of its pricing policy.

Although Brighton insisted that it has "never undertaken any systematic, comprehensive effort aimed at determining whether its retailers are following th[e] [suggested **[**1077]** retail price] policy," it does maintain a file titled "Pending Pricing Issues," in which it keeps complaints from retailers and customers, as well as advertisements offering discounts of Brighton products. In addition, it maintained a specific file on a particular Kansas retailer. It contains one entry stating that Brighton received a tip on the retailer's discounting and a later entry stating that, after a Brighton representative visited the store, it determined that no discounting was occurring. Also, logs produced by Brighton show a notation that one of Brighton's **[*338]** Kansas retailers reported another for discounting; the log also shows that a Brighton representative would be notified of the report.

In addition to tracking potential violations, Brighton's management actively discouraged departures from Brighton's pricing policy and pricing agreements. On this point, Young emphatically rejected a retailer's proposed promotional event, reminding the retailer of the pricing **[***40]** policy and stating that the rejected promotion was to be avoided because it would "spread like cancer." Kohl said that Brighton would rather retailers not pursue such promotions because "the other retailers in the area feel they have to compete and before long [it's] chaos." Kohl also said that "[t]hose who don't [follow the pricing policies] and who are aware of our pricing policy . . . are terminated."

The above-described evidence of Brighton's enforcement practices is circumstantial support for O'Brien's assertion that Brighton's written pricing policy and written pricing agreements were "for. . . the . . . purpose[]" or "designed to" at least control, if not advance, the prices at which defendant's products were sold to consumers and that they "tend[ed] to" do the same. If controlling prices was not at least part of Brighton's intent, then enforcement would be unnecessary.

It is true that Brighton attempted to counter O'Brien's evidence on purpose or design and tendency with testimony from certain Kansas retailers who would charge the same price for Brighton products regardless of Brighton's pricing policy. But such evidence makes summary judgment less appropriate, not more. It translates **[***41]** to the existence of a genuine issue of material fact on a dispositive issue—here, one of the essential components of O'Brien's cause of action.

To avoid summary judgment, however, O'Brien must also come forward with evidence that the class has been injured or damaged by Brighton's pricing combination or arrangement. See *K.S.A. 50-108* ("damaged"); *K.S.A. 50-115* ("injured or damaged"); *K.S.A. 50-161* ("damaged or injured").

The district judge followed Brighton's lead and established a "concrete evidence" standard for injury, requiring O'Brien to prove **[*339]** actual Brighton consumer purchases at prices higher than they would have been absent Brighton's unlawful pricing practices. Again, the district judge based his decision on federal law.

The district judge cited federal antitrust cases for the proposition that market studies are the proper bases for determining whether prices have been higher because of a defendant's alleged violation of the antitrust laws. See *American Seed Co., Inc. v. Monsanto Co., 238 F.R.D. 394, 400 (D. Del. 2006)*; *Weisfeld v. Sun Chemical Corp., 210 F.R.D. 136, 144 (D. N.J. 2002)*; *In re Aluminum Phosphide Antitrust Litigation, 905 F. Supp. 1457, 1462 (D. Kan. 1995)*. The **[***42]** federal cases strongly favor this approach, although they appear to stop short of stating that a market study is the *only* way to demonstrate a difference in prices. See, *e.g., In re Aluminum Phosphide Antitrust Litigation, 905 F. Supp. at 1462* ("In order for plaintiffs to make a submissible case on damages, they must provide evidence which would allow the jury to compare actual prices during the conspiracy period with reasonably estimated prices that would have prevailed during that same period, absent the conspiracy."); Proving Antitrust Damages: Legal and Economic Issues, Section of ***Antitrust Law***, American Bar Association, pp. 31-39 (1996).

Brighton argued, in particular, for use of what is known as a "benchmark analysis" under federal law, positing that this was the only way O'Brien could show cognizable injury. Under this approach, O'Brien would have needed: (1) to conduct a benchmark **[**1078]** analysis comparing the actual retail prices of Brighton products before and after Brighton allegedly crossed the line between a lawful pricing policy and unlawful pricing agreements, (2) to compare the prices of Brighton accessories against the prices of similar accessories from manufacturers who did **[***43]** not impose price restraints, or (3) to collect affidavits from Kansas retailers who were prevented from discounting. In Brighton's view, the methodology and opinion of Gundlach, based on academic theory and economic literature rather than an empirical analysis of the Kansas market, was not a suitable substitute. In addition, O'Brien's other expert, Pflaum, was inadequate because he was "asked to simply assume the fact of injury" in order to calculate damages. This same expert admitted **[*340]** that, absent defendant's conduct, "there could be [the] possibility" that prices would increase and some class members might have paid more, and it was not his testimony that every Brighton retailer would lower prices. Brighton also relied upon its affidavits from certain Brighton retailers in Kansas who swore that their pricing practices would be the same absent Brighton's policy.

O'Brien argued to this court that the language of Brighton's written pricing policy, its written pricing agreements, and its enforcement practices—plus the testimony of Gundlach—created a genuine issue of material fact on injury and thus precluded summary judgment. Gundlach opined that Brighton's practices fixed the prices of **[***44]** Brighton's products, which severely limited discounting, and he observed that retailers who willfully failed to comply with the pricing arrangement were terminated or their shipments put on hold. He further concluded that, as a result, Brighton's price-fixing limited price competition by retailers selling Brighton goods. Gundlach based his conclusions on information from Brighton regarding its practices, a survey of "authoritative opinion" on the effects of vertical price-fixing in general, and "empirical evidence" of the impact of price-fixing documented by other scholars, studies that were not specific to Brighton.

Brighton's demand that O'Brien come forward with proof of injury or damage in the form of a benchmark analysis sets too high a bar. It over-interprets federal law, which, at best, is persuasive rather than controlling. It also is contrary to this court's usual posture of hospitality to circumstantial evidence. See *Dieker v. Case Corp., 276 Kan. 141, 160, 73 P.3d 133 (2003)* (***HN27***[] circumstantial evidence can serve as proof of the elements of a theory of liability even though other reasonable theories are not excluded by such evidence). ***HN28***[] Neither the KRTA nor our limited caselaw **[***45]** interpreting it, see, *e.g., Bergstrom v. Noah, 266 Kan. 829, 974 P.2d 520 (1999)*; *United Artists Corp. v. Mills, 135 Kan. 655, 11 P.2d 1025 (1932)*; *Mills v. Ordnance Co., 113 Kan. 479, 215 P. 314 (1923)*; requires this particular form of "concrete evidence" to avoid summary judgment on antitrust injury. O'Brien has directed the court's attention to adequate circumstantial evidence that consumers actually paid prices for Brighton goods inflated by its pricing combinations or **[*341]** arrangements with retailers, and the district judge erred in ruling otherwise. Summary judgment in favor of Brighton based on the nonexistence of "antitrust injury" as a matter of law must be reversed.

"Rule of Reason" Violation Standard

Brighton's next line of defense—raised as a contingent issue in the appeal of the plaintiff class—is its insistence that only price-fixing that violates a "rule of reason" can subject it to liability under the KRTA. In essence, Brighton argues that the district judge's decision to grant it summary judgment can be upheld as right for the wrong reason. See, *e.g., State v. Robinson, 293 Kan. 1002, 1025, 270 P.3d 1183 (2012)*. We must therefore reach the merits of this issue.

As with the **[***46]** issue of antitrust injury, Brighton references federal law, in particular, the United States Supreme Court's employment of "rule of reason" analysis in an earlier case involving at least some of the same pricing practices at issue here, *Leegin Creative Leather Products, Inc. v. PSKS, Inc., 551 U.S. 877, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)*.

In *Leegin*, a case brought under the Sherman Act, *15 U.S.C. 1 et seq.*, by PSKS, Inc., operator of Kay's Kloset, a Texas women's apparel store, the Court stated that the goal **[**1079]** of the required federal rule of reason is to distinguish between "restraints with anticompetitive effect that are harmful to the consumer and restraints stimulating competition that are in the consumer's best interest." *551 U.S. at 886*.

The district judge in this case followed Brighton half as far as it would have had him go. He accepted Brighton's argument that reasonableness or a rule of reason sets the standard for violation of the KRTA, invoking language in two Kansas restraint-of-trade cases: *Heckard v. Park, 164 Kan. 216, 223-24, 188 P.2d 926 (1948)* ("The real question is never whether there is any restraint of trade but always whether the restraint is reasonable in **[***47]** view of all the facts and circumstances and whether it is inimical to the public welfare."), and *Okerberg v. Crable, 185 Kan. 211, 217, 341 P.2d 966 (1959)* (quoting same language from *Heckard*). But he stopped **[*342]** short of granting summary judgment on this issue to Brighton because he believed there were genuine issues of material fact on whether Brighton's pricing policies could pass muster under a reasonableness standard. Brighton challenges this part of the district judge's ruling on its cross-appeal—arguing that O'Brien cannot show that it had market power within a properly defined market or that its pricing practices had anticompetitive effects. We need reach these cross-appeal issues only if we first agree with the district judge's decision that reasonableness sets the standard for when price-fixing violates the KRTA.

HN29[] Neither *K.S.A. 50-101* nor *K.S.A. 50-112* mentions reasonableness or a rule of reason. Rather, *K.S.A. 50-101(d)* provides that "[a]*ny* such combinations are hereby declared to be against public policy, unlawful and void," (emphasis added) and *K.S.A. 50-102* denies "the right to form or to be in any manner interested, either directly or indirectly, as principal, agent, representative, **[***48]** consignee or otherwise, in any trust as defined in *K.S.A. 50-*

101. K.S.A. 50-112 provides that "[a]*ll* arrangements, contracts, agreements, trusts or combinations between persons, designed or which tend to advance, reduce or control the price or the cost to the producer or to the consumer of any such products or articles . . . are hereby declared to be against public policy, unlawful and void." (Emphasis added.)

This clear statutory language draws a bright line. The question is therefore whether *Heckard* and *Okerberg* or federal antitrust rulings invoking a rule of reason compel its erosion.

We address the federal antitrust rulings first and briefly: We conclude that they compel nothing. O'Brien is correct in arguing that ***HN30***[] federal precedents interpreting, construing, and applying federal statutes have little or no precedential weight when the task is interpretation and application of a clear and dissimilar Kansas statute. See Bergstrom, 266 Kan. at 845 (Kansas courts not bound by federal approach in interpreting antitrust laws); see also State v. Sellers, 292 Kan. 346, 357, 253 P.3d 20, 28 (2011) (court will give effect to plain language of unambiguous statute); State v. Raschke, 289 Kan. 911, 914, 219 P.3d 481 (2009) **[***49]** (court must first attempt to ascertain legislative intent through statutory language enacted, giving **[*343]** common words ordinary meanings); Graham v. Dokter Trucking Group, 284 Kan. 547, 554, 161 P.3d 695 (2007) ("If the statute's language is clear, there is no need to resort to statutory construction."). Brighton's scholarly exegesis on the holdings and reasoning of federal cases, though impressive, is inapposite.

Pronouncements in our Kansas precedents are another matter. ***HN31***[] Although stare decisis is not an "inexorable command," see Hall v. Dillon Companies, Inc., 286 Kan. 777, 787, 189 P.3d 508 (2008) (doctrine of stare decisis does not compel perpetuation of incorrect analysis of the law); see also Bergstrom v. Spears Manufacturing Co., 289 Kan. 605, 610, 214 P.3d 676 (2009) (citing Coleman v. Swift-Eckrich, 281 Kan. 381, 388, 130 P.3d 111 [2006] ["This court is not inexorably bound by precedent; it will reject rules that were originally erroneous or are no longer sound."]), we do not lightly overrule this court's prior cases. See Rhoten v. Dickson, 290 Kan. 92, 112, 223 P.3d 786 (2010) (court of last resort will follow rule of law established in earlier cases unless clearly convinced rule **[***50]** was originally erroneous, no **[**1080]** longer sound because of changing conditions, more good than harm will come by departing from precedent). Thus it is necessary for us to conduct a careful examination of the development of the antitrust violation standard in Kansas to discern whether any reasonableness gloss that has been read into the KRTA is first, sound, and, second, applicable to the vertical or horizontal price-fixing claims here.

The first case to address vertical price-fixing in our state was 1923's Mills v. Ordnance Co., 113 Kan. 479, 215 P. 314. In that case, this court considered a contract for the purchase of tractors that required the purchaser to maintain the seller's list prices when reselling the tractors to consumers. This qualified as a vertical price-fixing agreement, although the opinion did not use that description. At the time, the governing provision was Section 6409 of the General Statutes of 1915, the legislative ancestor of today's K.S.A. 50-101. Section 6409 provided in part:

> "A **[***51]** trust is a combination of capital, skill, or acts, by two or more persons, firms, corporations, or associations of persons, or either two or more of them, for either, any or all of the following purposes:
> . . . .
>
> **[*344]** "*Fifth*, To make or enter into, or execute or carry out, any contract, obligation or agreement of any kind or description by which they shall bind or have to bind themselves not to sell, manufacture, dispose of or transport any article or commodity, or article of trade, use, merchandise, commerce or consumption below a common standard figure; or by which they shall agree in any manner to keep the price of such article, commodity or transportation at a fixed or graded figure; or by which they shall in any manner establish or settle the price of any article or commodity or transportation between them or themselves and others to preclude a free and unrestricted competition among themselves or others in transportation, sale or manufacture of any such article or commodity; or by which they shall agree to pool, combine or unite any interest they may have in connection with the manufacture, sale or transportation of any such article or commodity, that its price may in any manner be **[***52]** affected. And any such combinations are hereby declared to be against public policy, unlawful and void." (L. 1897, ch. 265, sec. 1.)

This court held that the tractors purchase contract violated Section 6409 and was therefore unenforceable:

> "[The parties] tried to have the contract apply to a restricted territory and apparently attempted to give to the plaintiff the exclusive right to sell tractors in that territory. In doing so, the parties fixed the price at which the tractors should be sold by the plaintiff after they had been purchased from the defendant. They could not make such a contract because it violated the law of this state." *Mills, 113 Kan. at 481*.

Nine years later, this court decided *United Artists Corp. v. Mills, 135 Kan. 655, 11 P.2d 1025*, another vertical price-fixing case. By that time, the Revised Statutes of 1923 had replaced the General Statutes of 1915, see *State, ex rel., v. Davis, Governor, 116 Kan. 663, 229 P. 757 (1924)*; and R.S. 1923, 50-101, the predecessor to today's *K.S.A. 50-101*, precisely mirrored Section 6409, as quoted above.

This court examined a contract between a photoplay distributor and exhibitor, which included a provision requiring the exhibitor to charge a minimum **[***53]** admission fee to customers, and concluded that the provision "plainly . . . violate[d] the inhibition against price[-]fixing contained in . . . R.S. 50-101." *United Artists Corp., 135 Kan. at 656*.

In 1936, this court again refused to enforce a contract that included a vertical price-fixing agreement, this time concerning ice, in *Joslin v. Steffen Ice & Ice Cream Co., 143 Kan. 409, 54 P.2d 941* **[*345]** *(1936)*. Again, we relied on R.S. 1923, 50-101, as well as R.S. 1923, 50-112, which provided that

> "all arrangements, contracts, agreements, trusts, or combinations between persons or corporations made with a view or which tend to prevent full and free competition in the importation, transportation or sale of articles imported into this state, or in the **[**1081]** product, manufacture or sale of articles of domestic growth or product of domestic raw material, or for the loan or use of money, or to fix attorneys' or doctors' fees, and all arrangements, contracts, agreements, trusts or combinations between persons or corporations, designed or which tend to advance, reduce or control the price or the cost to the producer or to the consumer of any such products or articles, or to control the cost or rate of insurance, **[***54]** or which tend to advance or control the rate of interest for the loan or use of money to the borrower, or any other services, are hereby declared to be against public policy, unlawful and void." (L. 1889, ch. 257, sec. 1.)

We concluded: "A manufacturer of ice may fix the price at which he may sell his product, but the law will not permit him and his buyer to agree as to the price the latter will charge when he in turn sells that product to third parties." *143 Kan. at 411*. The vertical price-fixing arrangement in the ice contract was "in plain violation" of the statutes. *143 Kan. at 411-12* (citing *Mills, 113 Kan. at 481*).

The following year, the legislature enacted the Kansas Fair Trade Act (KFTA), R.S. 1937, 50-310 *et seq.* See *Quality Oil Co. v. du Pont & Co., 182 Kan. 488, 493, 322 P.2d 731 (1958)* (citing to KFTA in L. 1937, ch. 165, secs. 1-10). It specifically permitted contracts controlling resale prices, G.S. 1949, 50-302, and explicitly authorized private suits to punish deviation from them. G.S. 1949, 50-306. Such suits could be brought against not only a reseller who was party to the newly legal price-fixing contract, but also against a third-party retailer who had never agreed **[***55]** to the price control. G.S. 1949, 50-306; see *Quality Oil, 182 Kan. at 493-94* (discussing KFTA provisions).

In 1958, this court struck down the third-party provision as "statutory price[-] fixing by compulsion," in conflict with the Kansas Constitution. *Quality Oil, 182 Kan. at 495-96*. This court stated:

> "[W]e conclude the nonsigner clause of the Fair Trade Act is an unconstitutional attempt to delegate legislative power to private persons in violation of *Art. 2, § 1 of the Kansas Constitution.* The statute, beyond permitting voluntary contracts or agreements between a trade-mark owner and a retailer to fix a minimum resale **[*346]** price binding upon the signing retailer, gives legislative sanction to the trade-mark owner to fix minimum resale prices binding upon nonsigners.
>
> . . . .

". . . The legislature is powerless to clothe a private person with power to fix minimum resale prices, binding upon all who acquire and sell his trade-mark commodity with whom he has no direct contractual relation. An attempt to confer such power is an attempt to delegate legislature power, which is futile." 182 Kan. at 495-96.

The legislature repealed the KFTA in 1963. This repeal, in theory, returned Kansas to the **[***56]** simple, per se rule developed by *Mills, United Artists*, and *Joslin*: Vertical price-fixing arrangements again were *always* impermissible in Kansas. None of the pre-KFTA cases or the statutory provisions they applied had imposed a threshold judicial evaluation of the reasonableness of the subject contract's trade restraint before a violation preventing enforcement could be recognized.

If anything about that simple, per se rule changed between 1937 and 1963, that is, while the KFTA was in effect, it had to have changed because of *Heckard* and *Okerberg*, the only two relevant cases decided during the period.

In 1948's *Heckard*, Bessie B. Heckard and singer Lucile Jeannie Park entered into a vocal training contract. Under the contract, Park agreed to certain restrictive covenants, including: "[n]ot to employ or accept tutelage from any musical instructor without plaintiff's written consent"; "[t]o engage plaintiff's services as defendant's exclusive manager and agent"; and "[t]o pay plaintiff 10% of all, if any, professional earnings equal or exceeding $100.00 per week which defendant might obtain during, but only during, the next seven years following the execution of the written agreement." **[***57]** 164 Kan. at 221 ***[**1082]*** . Heckard sued Park for an accounting and for specific performance of the written contract under G.S. 1935, 50-101 and G.S. 1935, 50-112, which were identical in all relevant respects to today's K.S.A. 50-101 and K.S.A. 50-112. There was no allegation that the contract contained any vertical price-fixing provisions.

This court held in favor of Heckard and said that "[t]he real question is never whether there is any restraint of trade but always **[*347]** whether the restraint is reasonable in view of all the facts and circumstances and whether it is inimical to the public welfare." 164 Kan. at 223-24. Because the court viewed the contract as reasonable under all of the circumstances, it could be enforced despite the covenants. 164 Kan. at 224 (citing Mills v. Cleveland, 87 Kan. 549, 125 P. 58 [1912] [contract "limiting the right of a physician to practice a specialty and limiting his right to sell or disclose certain formulas used in such practice" upheld as valid because "reasonable[] under all the circumstances"]; Kent Oil Co. v. Waddill, 127 Kan. 704, 274 P. 1113 [1929] [contract limiting former employee "not to engage in that kind of work [for which employee was employed] for **[***58]** himself or any other person within the city for a period of two years after the termination of the employment" upheld as reasonable; order granting temporary restraining order to enforce the contract affirmed]; Berkey v. Smith, 138 Kan. 792, 796, 28 P.2d 763 [1934] [contract in which apprentice "promise[d] not to enter into competition with undertaker within radius of ten miles in consideration of undertaker's instructing apprentice in art of embalming and funeral directing" upheld as reasonable; injunction affirmed]; Southwest Kan. Oil & G. Co. v. Argus P. L. Co., 141 Kan. 287, 39 P.2d 906 [1935] [reasoning that "[a] bargain in restraint of trade is illegal, not if there is restraint, but if the restraint be unreasonable" and upholding "[c]ontract whereby producers agreed to sell, at fixed price, and distributor to buy, all gas produced from producers' well up to requirements of distributor"]).

In 1959's *Okerberg*, this court upheld contracts regulating milk routes against an antitrust challenge under G.S. 1949, 50-101 and G.S. 1949, 50-112. 185 Kan. at 219. The contracts set territories, required approval from a committee of the milk producers for route changes, required haulers to **[***59]** serve all producers within their territories who sold to a specific creamery, protected haulers against encroachment on their routes, and provided for sale or transfer of tank hauling rights. 185 Kan. at 218-19. Vertical price-fixing was not in issue.

We quoted *Heckard* with approval, treating reasonableness as a threshold inquiry when an antitrust violation was alleged, and examined **[*348]** "'fundamental elements of common fairness in view of the facts and circumstances of the parties.'" 185 Kan. at 217 (quoting Heckard, 164 Kan. at 224). As with the vocal training contract in *Heckard*, because this court viewed the *Okerberg* milk route contracts as reasonable, they also were enforceable. The contracts' limiting effect on the parties' market behavior did not make them illegal under the ostensibly governing statutes. 185 Kan. at 219.

HN32[] Careful examination of *Heckard* and *Okerberg* demonstrates that the "reasonableness" rubric they instituted had and has nothing to do with evaluation of an alleged price-fixing arrangement. This is also true of the cases upon which *Heckard*, and, in turn *Okerberg*, relied. The restraints of trade at issue—for example, covenants not to compete and a requirements contract—are **[***60]** factually and legally distinct from the vertical and horizontal price-fixing alleged in this case under K.S.A. 50-101 and K.S.A. 50-112.

There is another, more basic reason not to apply the reasonableness rubric of *Heckard* and *Okerberg* to this price-fixing case: **HN33**[] Under the pattern for interpretation of statutes that this court has now firmly established, we are loathe to read unwritten elements into otherwise clear legislative language. See State v. Arnett, 290 Kan. 41, 47, 223 P.3d 780 (2010) ("'The legislature is presumed to have expressed its intent through the language of the statutory scheme it enacted.'"). We take the legislature at its word, unless there is ambiguity, because the **[**1083]** legislature, unlike the judiciary, is one of the branches of government charged with development of public policy on behalf of the electorate and because our deference to clear statutory language leads to long-term predictability and stability in Kansas law. See Quality Oil, 182 Kan. at 495 (decision on whether K.S.A. 50-112 reflects sound economic policy not the court's to make). This means that, if the *Heckard* and *Okerberg* contracts were to come before us now, it is all but certain we would not append **[***61]** a requirement that an antitrust plaintiff demonstrate the unreasonableness of a defendant's trade restraint to show a statutory violation, because the clear language of the governing statutes does not require it. See K.S.A. 50-101 ("[a]*ny* such combinations are hereby declared to be against public policy, unlawful and void.") (Emphasis added.); K.S.A. 50-112 ("[a]ll arrangements, **[*349]** contracts, agreements, trusts or combinations between persons, designed or which tend to advance, reduce or control the price or the cost to the producer or to the consumer of any such products or articles . . . are hereby declared to be against public policy, unlawful and void.") (Emphasis added.). If the legislature had wanted to make such a showing part of an antitrust action, it certainly was capable of doing so. In the absence of the policy message such a legislative addition would send, we have no confidence in the soundness of the *Heckard* language—"The real question is never whether there is any restraint of trade, but always whether the restraint is reasonable in view of all the facts and circumstances and whether it is inimical to the public welfare"—at the time it was written and today.

HN34[] As K.S.A. 50-101 **[***62]** and K.S.A. 50-112 now read, the proper approach is not to determine "whether the restraint is reasonable in view of all of the facts and circumstances," or to attempt to distinguish between restraints with anticompetitive effect and restraints that stimulate competition. *Cf.* Heckard, 164 Kan. at 223-24; Leegin, 551 U.S. at 886. The clear statutory language of K.S.A. 50-101 and K.S.A. 50-112 leaves no room for such an approach. The simple, per se rule of Mills, United Artists, and Joslin survives. The reasonableness rubric of Heckard and Okerberg is overruled.

Because we decide that reasonableness does not set the antitrust violation standard in Kansas, we need not reach Brighton's cross-appeal arguments that O'Brien's claims are blocked by the rule of reason.

Horizontal Price-fixing

O'Brien has also contended that Brighton's ownership of stores that sell Brighton products qualifies it as a competitor to the retailers with which it entered into pricing agreements; this, in turn, would support a claim for horizontal price-fixing. Brighton has one retail store in Kansas and more than 100 such stores nationwide. Brighton has countered that its status as a dual-distributor, *i.e.*, both a wholesale **[***63]** supplier and a retailer of its own products, does not support a horizontal price-fixing claim because dual-distribution systems are treated as vertical arrangements under federal law.

[*350] On appeal, Brighton has asserted that O'Brien raised any challenge to the district judge's rejection of any horizontal price-fixing claim too late to preserve it for our review. Our review of the record and briefs in this matter indicates otherwise, and we therefore consider the merits of the challenge.

The district judge concluded in a one-paragraph footnote to his Memorandum Decision on summary judgment that "the claims made do not involve horizontal price-fixing." He reasoned that the Heart Store agreements at issue were between Brighton as the wholesale supplier of Brighton products and its retailers, and that the RPM policy set forth the relationship between Brighton as the wholesale supplier of Brighton products and its retailers. In other words, both had vertical rather than horizontal structure and impact.

We have not previously evaluated a dual distribution price-fixing case. ***HN35***[] The governing KRTA provisions, *K.S.A. 50-101* and *K.S.A. 50-112*, neither differentiate between vertical and horizontal price-fixing **[***64]** nor outline a particular approach to a dual-distribution situation. Rather, as fully discussed above, they **[**1084]** forbid all price-fixing combinations or arrangements, regardless of the applicable label. Were this case in federal court, flawless labeling would have more bite, because horizontal price-fixing is still subject to a per se prohibition while vertical price-fixing—held to include dual-distribution situations by every circuit to examine the question—is analyzed under the rule of reason. See *Leegin, 551 U.S. at 893* (vertical price-fixing subject to rule of reason analysis); *AT&T Corp. v. JMC Telecom, LLC, 470 F.3d 525, 531 (3d Cir. 2006)* (dual-distribution treated like vertical price-fixing); *EEC v. Toshiba America Consumer Products, Inc., 129 F.3d 240, 243 (2d Cir. 1997)* (same); *Smalley & Co. v. Emerson & Cuming, Inc., 13 F.3d 366, 368 (10th Cir. 1993)* (same); *Illinois Corporate Travel v. American Airlines, 889 F.2d 751, 753 (7th Cir. 1989)* (same); *International Logistics Group v. Chrysler Corp., 884 F.2d 904, 906 (6th Cir. 1989)* (same); *Ryko Mfg. Co. v. Eden Services, 823 F.2d 1215, 1230 (8th Cir. 1987)* (same); *Donald B. Rice Tire Co. v. Michelin Tire Corp., 638 F.2d 15, 16 (4th Cir. 1981)* **[***65]** (same); compare *Red Diamond Supply, Inc. v. Liquid Carbonic Corp., 637 F.2d 1001, 1004-1007 (5th Cir. **[*351]** 1981)* (same); *Glacier Optical, Inc. v. Optique du Monde, 1995 U.S. App. LEXIS 1108, 1995 WL 21565 (9th Cir. 1995)* (unpublished opinion) (same).

Because this state court case arises under the KRTA rather than federal law, the rule of reason does not apply. To the extent O'Brien's horizontal price-fixing claim rests on conduct identical to that supporting her vertical price-fixing claim, horizontal price-fixing is an alternative theory of liability. Proof of an alternative theory does not entitle a plaintiff to additional damages, but it gives a factfinder another way to get to judgment in the plaintiff's favor. O'Brien, like any civil plaintiff, could pursue an alternative theory of liability if it is supported by evidence. The district judge erred in ruling that the class "claims do not involve horizontal price-fixing." They do. Because the district judge did not, evidently, reach the next question of whether O'Brien has come forward with enough evidence to avoid summary judgment on horizontal price-fixing, we do not reach it either.

Statute of Limitations on Full Consideration and Treble Damages Claims

HN36[] For persons **[***66]** injured or damaged by price-fixing prohibited under *K.S.A. 50-101* and *K.S.A. 50-112*, recovery of damages sustained, full consideration damages, and treble damages are permitted. See *K.S.A. 50-108* (applying to *K.S.A. 50-101*; "such damages sustained"); *K.S.A. 50-115* (applying to *K.S.A. 50-112*; "full consideration or sum paid"); *K.S.A. 50-161(b)* (applying to all of KRTA; "treble the damages sustained," "any damages suffered"); see also *K.S.A. 50-147* ("The rights and remedies given by this act shall be construed as cumulative of all other laws in force in this state, and shall not affect, change or repeal any other remedies or rights now existing in this state for the enforcement, payment or collection of fines, penalties and forfeitures."). The parties disagree on the applicable statute of limitations and the attendant downward pressure it may exert on any eventual full consideration or treble damages award. We now address the merits of this disagreement.

O'Brien argues in favor of application of the 3-year statute of limitations in *K.S.A. 60-512(2)*. It provides that "[a]n action upon a liability created by a statute other than a penalty or forfeiture" **[*352]** must be brought in 3 years. O'Brien **[***67]** argues that both the full consideration and the treble damages provisions are civil remedies, not penalties, designed to encourage consumers to exercise their rights under the KRTA.

Brighton advocates for application of the 1-year statute of limitations in *K.S.A. 60-514(c)*, which governs "[a]n action upon statutory penalty or forfeiture." Brighton argues that both the full consideration and treble damages provisions are statutory penalties because they award more than actual damages and are cumulative with actual damages.

We also note as an initial matter that *amicus* Quin Jackson, in addition to supporting O'Brien's argument for application of the 3-year statute of limitations, states that the discovery rule of *K.S.A. 60-510* applies and that "fraudulent concealment and other tolling **[**1085]** issues may be raised as well." Neither of the parties has ever made an issue of either the discovery rule or any tolling doctrine, and we therefore do not address their merit or lack of merit. See State ex rel. Six v. Kansas Lottery, 286 Kan. 557, 561, 186 P.3d 183 (2008) (court will not address arguments raised only by nonparty *amici curiae*).

District Judge Woolley split the baby. He ruled that the full consideration **[***68]** claim under K.S.A. 50-115 was not a claim for a penalty and was, therefore, subject to the 3-year statute of limitations under K.S.A. 60-512(2). He also ruled that the treble damages claim under K.S.A. 50-161 was a claim for a penalty and was, therefore, governed by the 1-year statute of limitations under K.S.A. 60-514(c).

HN37[] The KRTA explicitly established a cause of action for individuals to sue and recover general "damages" as well as specific types of damages. See K.S.A. 50-102; K.S.A. 50-108; K.S.A. 50-115; K.S.A. 50-161. It thus creates not only a new procedure for relief, but also new substantive rights. See Wright v. Kansas Water Office, 255 Kan. 990, 997, 881 P.2d 567 (1994); see also Four B Corp. v. Daicel Chemical Industries, Ltd., 253 F. Supp. 2d 1147, 1155-56 (D. Kan. 2003) (concluding plaintiff's antitrust claims under Kansas law arise out of antitrust statute). In addition, we note that the remedies for persons under the KRTA are separate and distinct from the civil **[*353]** penalties the attorney general is empowered to seek. See K.S.A. 50-103(a)(5); see also K.S.A. 50-160(a) ("The commission of any act or practice declared to be a violation of the Kansas restraint of trade act **[***69]** shall render the violator liable to the state for the payment of a civil penalty in a sum set by the court of not less than $100 nor more than $5,000 for each day such violation shall have occurred."); K.S.A. 50-160(b) ("Any person who willfully violates the terms of any court order issued pursuant to the Kansas restraint of trade act shall forfeit and pay a civil penalty of not more than $10,000 per violation, in addition to other penalties that may be imposed by the court . . . . [T]he district court issuing an order shall retain jurisdiction, and in such cases, the attorney general may petition for recovery of civil penalties.").

HN38[] In the words of K.S.A. 60-512(2), an action based on the KRTA is "upon a liability created by statute." See Alexander v. Certified Master Builders Corp., 268 Kan. 812, 821, 1 P.3d 899 (2000) (quoting Wright, 255 Kan. at 997) (liability '"created by statute'" when '"liability for resultant damages would not arise but for the statute'"). Likewise, an action based on the KRTA qualifies for the one-word description of K.S.A. 60-514(c): It is "statutory." The rest of the relevant language from the two statutes of limitation requires construction. See Brennan v. Kansas Insurance Guaranty Ass'n, 293 Kan. 446, 450, 264 P.3d 102 (2011) **[***70]** (when legislative intent not clear from statutory language court moves to applying canons of construction or legislative history). Although an action seeking a "penalty or forfeiture" is plainly excluded by K.S.A. 60-512(2) and plainly included by K.S.A. 60-514(c), "penalty or forfeiture" is not clearly defined. And we have not previously construed "penalty or forfeiture" as applied to either full consideration damages or treble damages under the KRTA. In the only one of our cases in which the KRTA statute of limitations was in issue, we did not decide the question because the plaintiff's action would have been barred by either limitations provision under consideration. McCue v. Franklin, 156 Kan. 1, 131 P.2d 704 (1942).

Judge Carlos Murguia of the federal District of Kansas did reach the issue of the statute of limitations applicable to the KRTA treble damages remedy in Four B Corp., 253 F. Supp. 2d at 1155-56, **[*354]** deciding the 3-year statute of limitations in K.S.A. 60-512(2) applied. Judge Murguia cited this court's decision in Alexander, 268 Kan. at 820, in support of the proposition that "[a] claim which arises from a statute does not automatically constitute a 'penalty' or 'forfeiture' **[***71]** so as to trigger a one-year statute of limitations period, even if a plaintiff is entitled to recover more than his actual damages." Four B Corp., 253 F. Supp. 2d at 1154-55. The question of which statute of limitations should apply to KRTA full consideration **[**1086]** damages was not before the court in Four B Corp.

In an action brought under the Kansas Consumer Protection Act (KCPA), we stated that "in many instances where a statute gives accumulative damages to the party grieved, it is not a penal action." Alexander, 268 Kan. at 824 (citing Huntington v. Attrill, 146 U.S. 657, 667-69, 13 S. Ct. 224, 36 L. Ed. 1123 [1892]). We observed that under the KCPA a consumer had the option to seek either damages or a civil penalty, not both. 268 Kan. at 823. But we said that the key question was whether a statutory provision was more remedial or punitive in nature. 268 Kan. at 823.

In *Alexander*, we examined the KCPA statutory scheme and concluded that "the KCPA provides a private remedy to consumers in the hope that they will enforce the KCPA as 'private attorneys general,'" and that consumer suits allowed individuals to gain "reimbursement for the private wrong done." *268 Kan. at 822, 824*. We ultimately **[***72]** determined that both an action seeking a civil penalty and one seeking actual damages should be subject to the 3-year statute of limitations because treating the two differently would frustrate the intent of the statute to create an effective remedy for Kansas consumers. *268 Kan. at 823-24*. We said that a 1-year statute of limitations would be appropriate "if the legislature had provided for a separate penalty in addition to a damage recovery." *268 Kan. at 824*.

As Brighton has noted, both the full consideration damages and treble damages recoverable under the KRTA would exceed actual damages, and it makes sense to subject both provisions to the same statute of limitations analysis. See *268 Kan. at 824* (under KCPA, applying "two different statutes of limitation would force the consumer to file within 1 year, or find his or her options for recovery **[*355]** reduced to merely actual damages"). But, otherwise, we regard O'Brien's statute of limitations argument as generally more consistent with our reasoning in *Alexander*.

The 3-year statute of limitations in *K.S.A. 60-512(2)* gives a greater incentive to consumers to exercise their statutory rights by bringing private actions under the KRTA. Like **[***73]** the KCPA, the KRTA enables individuals to gain "reimbursement for the private wrong done." See *268 Kan. at 824*. Also like the KCPA, the KRTA's provisions allowing private suits permit consumers to act as "'private attorneys general'" to enforce the provisions of the statute and prevent further wrongdoing. See *268 Kan. at 822*. We also are persuaded that both full consideration damages and treble damages under the KRTA are "more remedial in nature than punitive." See *268 Kan. at 823*. They are chiefly, if handsomely, designed to compensate an individual who has been injured by a trade restraint, while the Attorney General is explicitly empowered to seek civil penalties to punish a violation on behalf of the rest of the citizens of the state. *K.S.A. 50-103(a)(5)*; *K.S.A. 50-160*.

HN39[] We therefore hold that neither O'Brien's claim for full consideration damages nor her claim for treble damages qualifies as an action for a statutory penalty or forfeiture. They are both subject to the 3-year statute of limitations under *K.S.A. 60-512(2)*. This holding compels us to affirm the district judge's partial summary judgment ruling on the question of full consideration damages and to reverse his summary **[***74]** judgment ruling on the question of treble damages.

Necessity of Explicit Written Agreement

Brighton argues on its cross-appeal that it was entitled to partial summary judgment against O'Brien on any purchases made at Kansas retailers that were not Heart Stores in 2001or 2002 and/or luggage stores in 2003, that is, for any purchases made at all but nine Kansas stores during the specified years. Brighton asserts that the KRTA, like federal law, demands that a plaintiff alleging vertical price-fixing come forward with proof of "agreement and concerted action" between each specific retailer and Brighton. In its view, the evidence O'Brien has gathered cannot possibly demonstrate **[*356]** that there was the necessary meeting of the minds between Brighton and the overwhelming majority of Kansas retailers subject only to Brighton's **[**1087]** pricing policy and not designated a Heart Store nor authorized to sell luggage.

O'Brien responds that the written agreements between Brighton and nine of its Kansas retailers were merely the clearest evidence of a larger, unwritten price-fixing arrangement between Brighton and all of its Kansas retailers. She urges us to consider all of her evidence and the reasonable inferences **[***75]** a jury may be permitted to draw from it in context, arguing there is plenty in the record to enable her to escape summary judgment on the issue of whether Brighton acted unilaterally or in unlawful conjunction with its Kansas retailers.

Judge Goering denied partial summary judgment to Brighton on this issue. He determined that "[t]he KRTA requires concerted action by two or more persons or entities to fix prices," without citation to a specific KRTA provision. The district judge reasoned that O'Brien established the existence of a genuine issue of material fact on the scope of any arrangement or agreement. He noted, in particular, evidence of Brighton's enforcement practices and the dispute between the parties over the purpose of Brighton's RPM policy.

As we observed above, ***HN40***[] *K.S.A. 50-101* and *K.S.A. 50-112* prohibit more than "agreements" to fix prices. But even a "combination" under *K.S.A. 50-101* must be "by two or more persons" and an "arrangement" under *K.S.A. 50-112* must be "between persons." Both requirements demand something more than merely a unilateral pricing policy adopted by a wholesale supplier in the position of Brighton.

HN41[] Because *K.S.A. 50-112* and *§ 1* of the Sherman Act share **[***76]** the "between persons" language, and the language of *K.S.A. 50-101* is equivalent, we look to interpreting United States Supreme Court precedent for assistance in understanding what, short of an express agreement, qualifies as more than merely unilateral behavior. Has O'Brien mustered enough evidence to avoid summary judgment on those purchases made at Brighton retailers who were not parties to Heart Store or luggage store applications or agreements?

[*357] ***HN42***[] In *Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, 763, 768, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)*, the Court ruled that, under *§ 1* of the Sherman Act, a price-fixing case must include "evidence that tends to exclude the possibility of independent action by the manufacturer and distributor." "[T]here must be direct or circumstantial evidence that reasonably tends to prove that the manufacturer and others had a conscious commitment to a common scheme designed to achieve an unlawful objective," and neither communication between a manufacturer and its retailers nor the existence of complaints about discounting would be enough alone for a plaintiff in a price-fixing action to sustain its burden of proof. *465 U.S. at 768*. The Court **[***77]** acknowledged that evidence of complaints about discounting can be probative; however, there must be additional evidence of unlawful conduct. *465 U.S. at 764*.

In this case, Brighton emphasizes evidence from several retailers who said that they independently decided to charge the suggested price for Brighton products. It reminds us that Brighton's officers testified that Brighton had not actually terminated any Kansas retailer for a pricing policy violation and that Brighton had not made explicit promises to Heart Stores or luggage stores that it would enforce its pricing policy against other retailers.

But the record contains ample conflicting evidence in support of O'Brien's claim that an unlawful pricing arrangement existed between Brighton and Kansas retailers beyond the nine Heart Stores and/or luggage sellers.

Brighton's pricing policy was distributed to all retailers. And for at least 1 year, Brighton required all of them to initial an acknowledgment stating that violation of the policy was grounds for dismissal. Brighton's owner testified that the company "require[d] everybody to charge the same price." Unauthorized promotions were not allowed because they would "spread like cancer." **[***78]** Brighton maintained a "Pending Pricing Issues" file, and it conducted investigations into at least two Kansas retailers suspected of discounting. One of those investigations was launched when one retailer who was not a **[**1088]** Heart Store or luggage seller reported another in the same category.

[*358] All of this evidence provides relevant context for the written agreements Brighton entered into with Heart Stores and luggage sellers and at least circumstantially supports a reasonable inference of more than a unilateral policy or action by Brighton.

This evidence also is reminiscent of that before the United States Supreme Court in *Monsanto Co.* In that case, a manager testified that the company advised distributors who were discounting that they were in danger of receiving less than their desired amount of company product. A company representative contacted a distributor's parent company, which then told the subsidiary distributor to comply with the pricing plan. The Court recognized such evidence as "relevant and persuasive as to a meeting of minds." *465 U.S. at 765*. In addition, one distributor sent a newsletter to his customers, in which he discussed the company's efforts to "'get [t]he "marketplace **[***79]** in order"'" and emphasized the company's efforts to maintain minimum prices. *465 U.S. at 765-66*.

The Court ultimately stated in *Monsanto Co.* that it was reasonable to conclude that the termination of a noncomplying distributor was pursuant to a pricing agreement rather than unilateral pricing policy because it was "necessary for competing distributors contemplating compliance with suggested prices to know that those who do not comply will be terminated." *465 U.S. at 767*. The Court decided that the plaintiff had marshaled enough evidence to raise a jury issue. *465 U.S. at 768*.

We reach a similar conclusion here. There is more than enough evidence in the record before us to hold that the district judge was correct in denying Brighton partial summary judgment on the issue of whether there was an unlawful combination "by two or more persons" under K.S.A. 50-101 or an arrangement "between persons" under K.S.A. 50-112 with an effect on the prices paid for purchases at retailers other than Heart Stores and luggage sellers. This is not a case in which the plaintiff can show only a unilateral pricing policy or action. A genuine issue of material fact remains for trial, and weighing of evidence **[***80]** by this court or by the district judge reviewing a summary judgment motion would be improper. See *Underhill v. Thompson, 37 Kan. App. 2d 870, 878, 158 P.3d 987*, *rev. denied 285 Kan. 1177 (2007)*.

[*359] *Certification of the Plaintiff Class*

The last issue raised in Brighton's cross-appeal concerns class certification. We address its status to provide guidance to the district court on remand.

HN43[] Class actions are governed by K.S.A. 60-223, which was modeled after and has traditionally been interpreted like Fed. R. Civ. Proc. 23. *Dragon v. Vanguard Industries, Inc., 277 Kan. 776, 778, 89 P.3d 908 (2004)* (*Dragon I*). The class in this case is composed of named plaintiff O'Brien and "[a]ll persons who . . . from January 1, 1997, . . . to the date of trial, have purchased any Brighton product from any Brighton retailer."

At the time this case was filed, K.S.A. 60-223(b)(3), the subsection of the statute that is relevant here, stated that a class should be certified if

> "the court finds that the questions of law or fact common to the members of the class predominate over any questions affecting only individual members, and that a class action is superior to other available methods for the fair and efficient **[***81]** adjudication of the controversy. The matters pertinent to the findings include: (A) The interest of members of the class in individually controlling the prosecution or defense of separate actions; (B) the extent and nature of any litigation concerning the controversy already commenced by or against members of the class; (C) the desirability or undesirability of concentrating the litigation of the claims in the particular forum; (D) the difficulties likely to be encountered in the management of a class action."

District Judge Richard T. Ballinger ordered certification of the class, Brighton filed an interlocutory appeal challenging that certification. The appeal was denied by the Court of Appeals without explanation. **[**1089]** Brighton also moved to decertify the class in the district court, but, given Judge Goering's summary judgment ruling in favor of Brighton on antitrust injury, the judge never ruled on the motion to decertify.

On its cross-appeal, Brighton challenges only Judge Ballinger's analysis of K.S.A. 60-223(b)(3), the predominance requirement. It seeks a ruling from us that the district judge abused his discretion in certifying the class.

Brighton makes two arguments: (1) O'Brien and **[***82]** the class lack a method of common proof for showing injury, *i.e.*, payment of a **[*360]** price higher than the price that would have been paid absent an unlawful restraint; and (2) O'Brien and the class lack a common method of proof for showing each Kansas retailer entered into an illegal arrangement with Brighton.

In response to Brighton's first point, O'Brien asserts that there is common proof that every purchase was made at a fixed price in a distorted market. In response to Brighton's second point, O'Brien asserts that there is common proof of Brighton's written agreements, its pricing policy, and its monitoring and enforcement activities—all of which, taken together, establish the extent of the arrangement.

HN44[] Under *Dragon I*, we do not judge "'the propriety of a class certification by hindsight'" but rather to ensure that the district judge applied and "'rigorous[ly] analy[zed]'" the requirements of K.S.A. 60-223 in its decision to certify the class. *277 Kan. at 780*; see also *Critchfield Physical Therapy v. Taranto Group, Inc., 293 Kan. 285, 292, 263 P.3d 767 (2011)*. If a district judge evaluates the proper factors, his or her decision will be granted deference on appeal. See *277 Kan. at 779*.

Here, **[***83]** the district judge incorporated the transcript of the oral argument on the motion for class certification into his decision in this case. During the oral argument, the judge stated that he had reviewed all of the documents filed by the parties, and he concluded that "the requirements of *223(a)(1) through 4* are clearly met" because "[t]here's no factual issue. The legal issues are really common, whether or not there is one person or there are a thousand people who have bought belts from [Brighton]." Specifically regarding the factors to be considered on predominance, the judge said:

> "The interest of the members, the extent and nature of the litigation controversy, the desirable concentration in the litigation, certainly the judicial economy comes into play in there, too, but of course that's not determinative, and the difficulties likely to be encountered in the management of the class action, those are all considerations and clearly tend to show that a class action is appropriate in this case."

[*361] In his journal entry, the judge repeated that he had

> "considered and carefully examined the evidence in relation to:
>
> "(A) the interest of members of the class in individually controlling the prosecution **[***84]** or defense of separate actions;
> "(B) the extent and nature of any litigation concerning the controversy already commenced by or against members of the class;
> "(C) the desirability or undesirability of concentrating the litigation of the claims in the particular forum; [and]
> "(D) the difficulties likely to be encountered in the management of the class action."

But, as at oral argument, the judge did not make factual findings or explain how he had considered or applied the statutory factors to arrive at his legal conclusions. He said merely that he had reached its ultimate conclusions regarding predominance "in light of the evidence."

After the district judge's certification ruling, we handed down our decision in *Dragon v. Vanguard Industries, 282 Kan. 349, 144 P.3d 1279 (2006)* (*Dragon II.*). In that case, ***HN45***[] we determined that *K.S.A. 60-252(a)* and *Supreme Court Rule 165* (2011 Kan. Ct. R. Annot. 246)—which require that a district court judge "find, and either orally or in writing state, the controlling facts and the judge's conclusions of law thereon" and "state the controlling facts required by *K.S.A. 60-252*, and the legal principles controlling the decision"—apply to a district **[**1090]** judge's class **[***85]** certification decision. *282 Kan. at 356*. Generally litigants and their counsel bear the responsibility of objecting to inadequate findings of fact and conclusions of law

> "to give the trial court the opportunity to correct them, and in the absence of an objection, omissions in findings will not be considered on appeal. [Citation omitted.] Where no objection is made, this court will presume the trial court found all facts necessary to support its judgment. However, this court may still consider a remand if the lack of specific findings precludes meaningful review. [Citation omitted.]" *Dragon II, 282 Kan. at 356*.

In this case, it does not appear that Brighton objected specifically to inadequate findings and conclusions on certification, but it did attempt to pursue a timely interlocutory appeal. When the Court of Appeals rebuffed that effort, Brighton filed a motion to decertify **[*362]** the class. And it included the predominance issue in its prophylactic cross-appeal.

Because Brighton made a consistent effort to keep its challenge to certification alive, both in the district court and before this court, and because the district judge's insufficient factual findings and legal conclusions preclude **[***86]** meaningful appellate review of class certification at this procedural juncture, we merely observe that Brighton's motion to decertify the class remains pending. It will, on remand, be ripe for decision. When that motion is heard and decided, the parties and the district judge will have the opportunity to ensure creation of a record adequate to support any future appropriate appellate review.

CONCLUSION

After a thorough review of the record and the parties' extensive arguments on this appeal and cross-appeal, we hold that the district judge erred in his demand for proof of a "concrete injury" in this price-fixing case under *K.S.A.*

50-101 and K.S.A. 50-112. This holding requires reversal of the district judge's summary judgment in favor of defendant Brighton, and this case must be remanded to district court.

Brighton also was not entitled to summary judgment under a "rule of reason," which is not applied in a price-fixing action brought under K.S.A. 50-101 and K.S.A. 50-112 of the KRTA.

The **[***87]** district judge erred in ruling that the claims of the plaintiff class do not involve horizontal price-fixing. The named plaintiff and class have made an alternative allegation of unlawful horizontal restraint.

We affirm in part and reverse in part on the district judge's statute of limitations rulings. The limitations provision applicable to the class claims for both full consideration damages and treble damages is the 3-year statute of K.S.A. 60-512(2).

We hold that the district judge correctly determined that a genuine issue of material fact remained for trial on the issue of whether there was an unlawful combination or arrangement under K.S.A. 50-101 and K.S.A. 50-112 between Brighton and its retailers who had no express agreements as Heart Stores or luggage sellers.

[*363] And, finally, the insufficiency of the district judge's findings of fact and conclusions of law on class certification preclude meaningful appellate review of the predominance issue raised in Brighton's cross-appeal. On remand, Brighton's motion to decertify the class will be ripe for decision under the guidance of this court's opinions in Dragon I, 277 Kan. at 778-93, and Dragon II, 282 Kan. at 360-64.

Reversed and remanded **[***88]** to the district court for further proceedings consistent with this opinion.

MALONE, J., assigned. [1]

End of Document

[1] **REPORTER'S NOTE:** Pursuant to the authority vested in the Supreme Court by K.S.A. 20-3002(c), Judge Thomas E. Malone, of the Kansas Court of Appeals, was appointed to hear case No. 101,000 to fill the vacancy on the court created by the retirement of Chief Justice McFarland.

Mercer v. Am. Brokers Conduit

United States District Court for the Central District of California

May 9, 2012, Decided; May 9, 2012, Filed

Opinion by: Philip S. Gutierrez

Opinion

CIVIL MINUTES - GENERAL

Proceedings: (In Chambers) Order DENYING preliminary injunction, GRANTING motion to dismiss, and ORDERING Plaintiff to SHOW CAUSE RE DISMISSAL pursuant to *Federal Rule of Civil Procedure 4(m)*

Before the Court are Plaintiff Jeanine Mercer's motion for preliminary injunction and Defendants' motion to dismiss. The Court finds the matters appropriate for decision without oral argument. *See* *Fed. R. Civ. P. 78*; *L.R. 7-15*. Having read and considered the moving and opposing papers, the motion for preliminary injunction is DENIED and the motion to dismiss is GRANTED.

I. Background

This is a wrongful foreclosure case. Plaintiff Jeanine Mercer ("Plaintiff") is the owner of a piece of real property located in Ontario, California (the "Subject Property"). Plaintiff seeks to enjoin Defendants American Brokers Conduit ("AB Conduit"), Mortgage Electronic Registration Systems, Inc. ("MERS"), Residential Credit Solutions, Inc. ("RCS"), National Default Servicing Corporation ("NDSC"), and Ticor Title (collectively, "Defendants") from conducting a nonjudicial foreclosure sale of the Subject Property. **[*2]** In turn, Defendants RCS, MERS, and NDSC move to dismiss Plaintiff's First Amended Complaint ("FAC") for failure to state a claim.[1]

On July 12, 2007, Plaintiff refinanced the Subject Property with a loan she obtained from AB Conduit in the amount of $322,500.00 secured by a Deed of Trust. *See Compl.*, Ex. 1. The Deed of Trust names AB Conduit as Lender, Ticor Title as Trustee, and MERS as nominee beneficiary. *See id.* At the time the Deed of Trust was recorded, and as reflected on that document, the Assessor Parcel Number ("APN") for the Subject Property was APN 0218-351-38. *See id.* ¶ 15. Sometime between 2004 and 2009, the San Bernardino County Assessor changed the APN to 1083-211-07. *See Garber Decl.*, Exs. C, D. Accordingly, APN 1083-211-07 is reflected on the Corporation Assignment of the Deed of Trust, Notice of Default, and Notice of Trustee's Sale, but not on the original granting documents. *See id.*, Exs. B, C - H.

RCS acquired the servicing rights under Plaintiff's Loan in October 2010.[2] *PI Mot.* 4:19-20; *see Garber Decl.*, Ex. M. On or about November 2, 2010, Plaintiff fell behind on her payments. *See Compl.* ¶ 16. On November 22, RCS offered Plaintiff a Modification **[*3]** Trial Period Plan ("Trial Plan") providing for payments of $1888.15 per month from December 2010 through May 2011, which Plaintiff accepted. *See PI Opp.* 5:1-2; *Garber Decl.*, Ex. N; *Compl.* ¶ 17, Ex. 5. Plaintiff, however, was not able to meet the financial commitments of the Trial Plan and stopped making payment in April 2011 because an injury at work forced her to expend all of her sick pay and vacation pay. *See Garber Decl.*, Ex. O; *Compl.* ¶ 18. In response to Plaintiff's request for further assistance with her loan, RCS granted her a second loan modification plan that extended payments of $1900.09 per month from June 2011 through May 2013, with 295 monthly payments in the amount of 2073.46 due thereafter. *See Compl.* ¶ 19. However, Plaintiff was unable to meet this commitment due to her reduced salary, and chose to reject this offer and submit a new loan modification application. *See id.* ¶ 20. Plaintiff informed RCS that her return-to-work date was anticipated for November 2011. *Id.*

On June 30, 2011, MERS, as nominee for AB Conduit, the original beneficiary, granted, assigned and transferred to RCS all beneficial interest in the Deed of Trust by means of a Corporate Assignment of Deed **[*4]** of Trust recorded on July 7, 2011. *See Compl.* ¶ 22, Ex. 2. Because Plaintiff had not cured her default, NDSC, as agent for RCS, issued a Notice of Trustee's Sale setting a November 1 sale date. *Todd Decl.* ¶¶ 5-6; Exs. A, B; *Compl.* ¶ 26. RCS and Plaintiff continued to communicate regarding reaching a third loan modification agreement to stop the foreclosure proceedings. *See Compl.* ¶ 23. As late as October 2011, RCS informed Plaintiff that a Permanent Loan Modification would still be viable if Plaintiff could provide two current paystubs. *See id.* Instead, Plaintiff obtained a temporary restraining order to halt the foreclosure sale. *See PI Opp.* 6:6-7; *Garber Decl.*, Ex. S. Plaintiff contends RCS acted in bad faith by "failing to allow the requisite time to pass" so that Plaintiff could gather the necessary verification of income. *See Compl.* ¶ 30.

Plaintiff filed a verified complaint on October 14, 2011, stating claims for breach of contract, violation of *California Business and Professions Code § 17200*, quiet title, an accounting, and declaratory relief. *See* Dkt. # 1. On December 13, 2011, Plaintiff moved for a preliminary injunction enjoining the foreclosure sale for "two to three months maximum," representing the time it would purportedly **[*5]** take Plaintiff to return to full employment and

---

[1] Remaining Defendants AB Conduit, Ticor Title, and American Home Mortgage Servicing Inc. have not appeared in this action and the Notice of Removal states that they have not been served with the summons and complaint. *See* Dkt. # 1. Plaintiff's complaint was filed on October 17, 2011. No proof of service of summons and complaint against these Defendants has been filed. *Federal Rule of Civil Procedure 4(m)* provides that "[i]f a defendant is not served within 120 days after the complaint is filed the court - on motion or on its own after notice to the plaintiff - must dismiss the action without prejudice against that defendant or order that service be made within a specified time." Accordingly, Plaintiff is ORDERED TO SHOW CAUSE in writing why this action should not be dismissed without prejudice against Ticor Title, AB Conduit and American Home Mortgaging Service Inc. Plaintiff shall file proof of service of summons and complaint evidencing that Defendants were served within *Rule 4(m)*'s 120-day window or show good cause for her failure to do so. *See Fed. R. Civ. P. 4(m)*. Plaintiff's response is due no later than **May 23, 2012**.

[2] On June 30, 2011, MERS, as nominee for AB Conduit, executed the Corporate Assignment of the Deed of Trust (the "Assignment") resulting in the assignment of all beneficial interest under the Deed of Trust to RCS. Garber Decl. ¶ 6.

obtain the documentation necessary for a permanent loan modification. *See PI Mot.* 12:18-24. On January 9, 2012, RCS approved Plaintiff for a third permanent loan modification agreement, this time for payments totaling $1,591.78 per month, which Plaintiff again rejected on January 21, 2012. *See Garber Decl.* ¶¶ 28, 29, Ex. T. Moving Defendants seek dismissal with prejudice on the grounds that the Complaint does not, and the record before the Court indicates that Plaintiff cannot, state any viable claims for relief against Defendants.

II. Legal Standard

A. Preliminary Injunction

A preliminary injunction is an "extraordinary and drastic remedy." *Munaf v. Geren, 553 U.S. 674, 689-90, 128 S. Ct. 2207, 171 L. Ed. 2d 1 (2008)* (quotation marks and citation omitted). A party seeking a preliminary injunction must make a "clear showing" of each of the following elements: (1) a likelihood of success on the merits, (2) a likelihood of irreparable injury to the plaintiff if injunctive relief is not granted, (3) a balance of hardships favoring the plaintiff, and (4) an advancement of the public interest. *See Winter v. Natural Res. Def. Council, 555 U.S. 7, 20, 129 S. Ct. 365, 172 L. Ed. 2d 249 (2008)*. A preliminary injunction may also be appropriate "when a plaintiff demonstrates that serious questions going to the merits **[*6]** were raised and the balance of hardships tips sharply in the plaintiff's favor," so long as the other *Winter* factors are met. *See Alliance for the Wild Rockies v. Cottrell, 632 F.3d 1127, 1134-35 (9th Cir. 2011)* (citation and modification omitted) (allowing for a post-*Winter* "sliding scale" analysis in preliminary injunction inquiries where "the elements of the preliminary injunction test are balanced, so that a stronger showing of one element may offset a weaker showing of another").

B. 12(b)(6)

Under *Federal Rule of Civil Procedure 12(b)(6)*, a defendant may move to dismiss a cause of action if the plaintiff fails to state a claim upon which relief can be granted. In evaluating the sufficiency of a complaint under *Rule 12(b)(6)*, the courts must be mindful that the Federal Rules of Civil Procedure require that the complaint contain "a short and plain statement of the claim showing that the pleader is entitled to relief." *Fed. R. Civ. P. 8(a)(2)*. Nevertheless, the U.S. Supreme Court has instructed that "a complaint that offers 'labels and conclusions' or 'a formulaic recitation of the elements of a cause of action will not do.'" *Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937, 1949, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*.

In resolving a *Rule 12(b)(6)* motion, the Court must first accept as true all non-conclusory, factual allegations made in the complaint. *See Leatherman v. Tarrant County Narcotics Intelligence & Coordination Unit, 507 U.S. 163, 164, 113 S. Ct. 1160, 122 L. Ed. 2d 517 (1993)*. Based upon these allegations, the Court must draw all reasonable inferences **[*7]** in favor of the plaintiff. *See Mohamed v. Jeppesen Dataplan, Inc., 579 F.3d 943, 949 (9th Cir. 2009)*. After accepting as true all non-conclusory allegations and drawing all reasonable inferences in favor of the plaintiff, the Court must then determine whether the complaint alleges a plausible claim to relief. *See Iqbal, 129 S. Ct. at 1950*. In determining whether the alleged facts cross the threshold from the possible to the plausible, the Court is required "to draw on its judicial experience and common sense." *Id.* "*Rule 8* marks a notable and generous departure from the hyper-technical, code-pleading regime of a prior era, but it does not unlock the doors of discovery for a plaintiff armed with nothing more than conclusions." *Id.*

III. Discussion

As set forth below, the Court finds that Plaintiff fails to show a likelihood of success on, or raise "serious questions" going to, the merits of her claims. To the contrary, the record before the Court strongly suggests that Plaintiff's claims fail on the merits. Because the Court's analysis of Plaintiff's likelihood of success overlaps with its determination of whether the Complaint states any claims upon which relief may be granted, for the reasons set forth in that section, the Court also grants Defendants' motion to dismiss. Before evaluating **[*8]** Plaintiff's likelihood of success on her individual claims and the other *Winter* factors, the Court disposes of several threshold theories common to multiple causes of action.

A. The Tender Requirement Applies To This Case

Under California law, in action to set aside a trustee's sale, a plaintiff must demonstrate that he has made a valid and viable tender offer of payment of the indebtedness. *Pantoja v. Countrywide Home Loans, Inc., 640 F. Supp. 2d 1177, 1183 (N.D. Cal. 2009)*. "Although Plaintiff seeks to enjoin an impending foreclose sale, rather than set aside a foreclosure sale, her failure to allege tender is likewise fatal to her claims insofar as each claim seeks to avoid a foreclosure sale." *Arroyo v. Aurora Bank, FSB, et al., No. EDCV 11-2063-DOC (JEMx), 2012 U.S. Dist. LEXIS 5477, 2012 WL 137854, at *1 (C.D. Cal. Jan. 18, 2012)*. Neither the Complaint nor Plaintiff's moving papers contains an unconditional offer to tender the full amount of her indebtedness. Rather, Plaintiff alleges only that she "is prepared to tender payment by means of a new loan or a loan modification." *See Compl.* ¶ 54. An offer to tender "payment" in some unspecified amount "by means of a new loan or a loan modification" that Defendants are not obligated to provide under the terms of the Deed of Trust is not an unconditional offer to tender the full amount of Plaintiff's **[*9]** indebtedness. *See* *Singh v. Wells Fargo Bank, No. 1:10-CV-1659 AWI SMS, 2012 U.S. Dist. LEXIS 28015, 2012 WL 691705, at * (E.D. Cal., Mar. 2, 2012)* ("A tender is an offer of performance made with the intent to extinguish the obligation. A tender must be one of full performance and must be unconditional to be valid. Offering to make the payments specified by the Permanent Modification is insufficient.") (internal quotations and citations omitted); *Garber Decl.*, Ex. B.

Nor does this case present any equitable considerations that have been held to justify a waiver of the tender requirement. *See* *Onofrio v. Rice, 55 Cal. App. 4th 413, 424, 64 Cal. Rptr. 2d 74 (1997)* ("tender may not be required where it would be inequitable to do so"). "In most cases where a plaintiff seeks to reverse a foreclosure sale, the plaintiff is in default on the mortgage." *Singh, 2012 U.S. Dist. LEXIS 28015, 2012 WL 691705, at *9* (citing *Karlsen v. American Sav. & Loan Assn., 15 Cal. App. 3d 112, 115, 92 Cal. Rptr. 851 (1971))*. The tender rule "is premised upon the equitable maxim that a court of equity will not order that a useless act be performed." *Arnolds Mgmt. Corp. v. Eischen, 158 Cal. App. 3d 575, 579, 205 Cal. Rptr. 15 (1984)*. Plaintiff admits that she is in default on the original loan and failed to make the payments as required by her first loan modification agreement. She also admits that she rejected a second permanent loan modification offer in May 2011, and evidence submitted by RCS in opposing the motion for a preliminary **[*10]** injunctions shows that she was offered a third permanent loan modification on January 9, 2012, by which time Plaintiff should have returned to full time employment and secured the requisite documentation according to the allegations in her Complaint. Nonetheless, Plaintiff also rejected this offer on January 21, 2012. *See Garber Decl.* ¶¶ 28, 29, Ex. T. The Complaint pleads no facts to support a plausible dispute as to the outstanding balance due on the loan or the amount of Plaintiff's default under the Deed of Trust and the original loan modification agreement. Rather, the Complaint merely avers that the sale is void "ab initio resulting in no tender being required as it is inequitable to do so" because RCS purportedly lacks standing to foreclose. *See Compl.* ¶ 50. "Under [these] circumstances, returning the property to a plaintiff leaves the plaintiff in default. Thus, the dispute between the parties is not resolved as a plaintiff who recovers the property is likely to continue missing mortgage payments; he/she is likely to lose the property at a later date in a second foreclosure proceeding." *Singh, 2012 U.S. Dist. LEXIS 28015, 2012 WL 691705, at *9*.

Given Plaintiff's admitted default under the Deed of Trust and the loan modification agreement **[*11]** and her rejection of two subsequent offers, Plaintiff's failure to unconditionally allege a present ability to tender her indebtedness shows that enjoining the foreclosure sale would be a useless act. Thus, Plaintiff's failure to allege tender alone bars her request for injunctive relief and to quiet her title to the Subject Property. *See* *Shimpones v. Stickney, 219 Cal. 637, 649, 28 P.2d 673 (1934)* ("It is settled in California that a mortgagor cannot quiet his title against the mortgagee without paying the debt secured.").

B. The APN on the Foreclosure Notices Were Correct

Plaintiff also attacks Defendant's standing to foreclose and their compliance with California's statutory non-judicial foreclosure procedures because the APN on the recorded documents differs from the APN on the original grant deed. According to Plaintiff, because the Assignment refers to a different APN than the original grant deed, the Assignment "is not and cannot be the same property at issue since each property only has one APN number []." *PI Mot.* 3: 15-16.

The record before the Court makes clear that the APN on the foreclosure notices is accurate and refers to the Subject Property. The documents provided by Defendants, which include copies of the 2004 and 2009 San

Bernardino **[*12]** County Assessor's Parcel Maps and a printout of the current property information taken from the San Bernardino County Auditor-Controller/Treasurer/Tax Collector website, show that the San Bernardino County Assessor's Office simply changed the APN on the Subject Property from 0218-315-38 to 1083-211-07 sometime between 2004 and 2009. *See Garber Decl.*, Exs. C, D. Thus, Plaintiff's argument that the foreclosure notices refer to a different property is without merit. Moreover, even assuming the APN was incorrect, the Court is not aware of any legal authority enjoining an impending foreclosure sale due to a discrepancy relating to an assessor parcel number. *California Civil Code § 2924, et seq.* covers "every aspect" of the foreclosure process and the requirements it sets forth are "intended to be exhaustive." *See* *Nool v. HomeQ Servicing, 653 F. Supp. 2d 1047, 1053 (E.D. Cal. 2009)* (citing *I.E. Assoc. v. Safeco Title Ins. Co., 39 Cal. 3d 281, 285, 216 Cal. Rptr. 438, 702 P.2d 596 (1985)*; *Moeller v. Lien, 25 Cal. App. 4th 822, 834, 30 Cal. Rptr. 2d 777 (1994))*. This framework does not require that APNs be included on foreclosure-related documents. Accordingly, even if the APNs on the recorded documents were erroneous, Plaintiff's claim would still be without merit.

C. Defendants Acted in Good Faith

Contrary to Plaintiff's conclusory assertion that Defendants acted in bad faith "during negotiation of alternatives to foreclosure and in failing to postpone the trustee's **[*13]** sale . . .," the allegations elsewhere in the Complaint and the record before the Court demonstrates that Defendants engaged in multiple good faith attempts to renegotiate Plaintiff's payment schedule, which they were not obligated to do under the terms of the Deed of Trust. *Reply* 7:17-18. As Defendants point out, RCS offered Plaintiff a modification to her payment schedule on November 22, 2010, May 4, 2011, and January 9, 2012. The first two offers provided for reduced fixed interest and monthly payments of approximately $1,900.00, while the third modification offer reduced the monthly payments to $1,591.78 for a significant period of time. Nonetheless, Plaintiff either was unable to make the payments or rejected each of RCS's loan modification proposals. Accordingly, Plaintiff's bad faith claim is without merit.

D. Defendants Complied With Notice Requirements

As succinctly summarized in *Knapp v. Doherty, 123 Cal. App. 4th 76, 88-89, 20 Cal. Rptr. 3d 1 (2004)*, the procedural requirements for a non-judicial foreclosure sale are as follows:

> Upon default by the trustor under a deed of trust containing a power of sale, the beneficiary may declare default and proceed with a nonjudicial foreclosure sale. The foreclosure process is commenced by the recording of **[*14]** a notice of default and election to sell by the trustee. After the notice of default is recorded, the trustee must wait three calendar months before proceeding with the sale. After the 3-month period has elapsed, a notice of sale must be published, posted and mailed 20 days before the sale and recorded 14 days before the sale.

Knapp, 123 Cal. App. 4th at 88-89 (citations, alterations, and quotations omitted).

In *Knapp*, the court emphasized that *section 2924 et seq.* does not require actual receipt by a trustor of a notice of default or notice of sale, but that the statutory framework only "mandates certain procedural requirements reasonably calculated to inform those who may be affected by a foreclosure sale and who have requested notice in the statutory manner that a default has occurred and a foreclosure sale is imminent." *See* *123 Cal. App. 4th at 88-89* ("The trustor need not receive *actual notice* of the trustee's sale so long as notice is provided to the trustor that is in compliance with the statute.") (emphasis in original).

Defendants submit "affidavits of mailing" and other relevant declarations as evidence that it satisfied the requirements of *section 2924*. *See Todd Decl.* ¶¶ 5, 6; Exs. A-B. NDSC, as agent for RCS, recorded a notice of default on July 7, 2011. *See Garber* ***[*15]*** *Decl.*, Ex. F. A notice of Trustee's sale was recorded on October 11, 2011, more than three months later. *See Graber Decl.*, Ex. G. An affidavit of mailing reflects that Defendant mailed a copy of the notice of trustee's Sale to Plaintiff via certified registered mail on October 11, 2011 and posted the Notice of Trustee's Sale on the front door of the property on October 10. *See Todd* Decl. ¶¶ 5-6; Exs. A, B. The Trustee's sale was set for November 2, 2011, exactly 20 days after the Notice was mailed and recorded and 21 days after it was posted. Under these circumstances, the Court concludes that Plaintiff's claim that Defendants violated the notice requirements of Civil Code *§ 2924, et seq.* lacks merit.

E. RCS's Standing to Foreclose

Plaintiff attacks RCS's standing to foreclose on the grounds that the Corporate Assignment of Deed of Trust is invalid for three reasons. First, Plaintiff points to the fact that the APN on the recorded Corporate Assignment differs from that on the Deed of Trust. For reasons discussed *supra*, this argument is meritless. Second, Plaintiff offers the bare assertion that "Heath Carpenter [as] Vice President of RCS is not MERS' assistant secretary and fraudulently assigned the **[*16]** beneficial interest to his own company RCS." *See PI Mot.* 9:6-10. Plaintiff presents no facts or evidence to support her conclusory allegation that Mr. Carpenter was not authorized to execute the Assignment on behalf of MERS, nor any authority to suggest that an agent authorized to execute an Assignment on behalf of an Assignor cannot also be employed by the Assignee. Defendants submit evidence under penalty of perjury that this is what transpired. *See Garber Decl.* ¶¶ 7-8; *Brown v. U.S. Bankcorp, No. CV 11-6125 CAS (PJWx), 2012 U.S. Dist. LEXIS 26226, 2012 WL 665900, at *4 (C.D. Cal., Feb. 27, 2012)* (dismissing with prejudice declaratory relief claim premised on conclusory assertion that the assignment of the deed of trust "was invalid because it was not assigned by an employee of [] the beneficiary").

Finally, Plaintiff contends that MERS, as a mere "nominee" beneficiary under the Deed of Trust, lacked the authority to execute the Corporate Assignment. *See PI Mot.* 10:20-12:12. Applying the California Court of Appeals recent decision in *Gomes v. Countrywide Home Loans, Inc., 192 Cal. App. 4th 1149, 1155, 121 Cal. Rptr. 3d 819 (2011)*, courts in this judicial district have recognized that "a plaintiff cannot challenge a named beneficiary's authority to initiate a non-judicial foreclosure under *Cal. Civ. Code § 2924(a)*." *See, e.g., Aguirre v. Cal-Western Reconveyance Corp., No. CV 11-6911 CAS (AGRx), 2012 U.S. Dist. LEXIS 12060, 2012 WL 273753, at *6 (C.D. Cal. Jan. 30, 2012)* (citing *Gomes* ***[*17]*** and holding that "as a named beneficiary, MERS was authorized to assign the mortgage to Aurora"). This is because the "recognition of the right to bring a lawsuit to determine a nominee's authorization to proceed with foreclosure on behalf of the noteholder would fundamentally undermine the nonjudicial nature of the process and introduce the possibility of lawsuits filed solely for the purpose of delaying valid foreclosures." *Gomes, 192 Cal. App. 4th at 1155*. Here, the Deed of Trust named MERS as a beneficiary and acknowledges that "MERS...has the right [to] foreclose and sell the Property." *See Garber Decl.*, Ex. B. Accordingly, Plaintiff's assertion that MERS lacked authority to initiate foreclosure fails as a matter of law. *See Gomes, 192 Cal. App. 4th at 1155*. In any event, Plaintiff cannot credibly claim any injury resulting from the allegedly improper execution of the Corporate Assignment, as by law the recorded Assignment operated as constructive notice to Plaintiff regarding its contents, *see Cal. Civ. Code § 2934*, and if Mr. Carpenter or MERS "indeed lacked authority to make the assignment, the true victim was not plaintiff but the original lender...." *See Fontenot v. Wells Fargo, 198 Cal. App. 4th 256, 272, 129 Cal. Rptr. 3d 467 (2011)*.

Having concluded the above theories are deficiently pleaded and without merit, the Court turns to a claim-by-claim **[*18]** evaluation of Plaintiff's likelihood of success on the merits.

F. Likelihood of Success on the Merits

1. Breach of Contract

To state a claim for breach of contract under California law, a plaintiff must allege: (1) the existence of a contract between the parties; (2) the plaintiff's performance or excuse for nonperformance; (3) the defendant's breach of contract (failure to perform); and (4) resulting damages. *Kaui Scuba Center, Inc. v. PADI Americas, Inc., No. SACV 10-1579 DOC (MANx), 2011 U.S. Dist. LEXIS 75704, 2011 WL 2711177, at *4 (C.D. Cal. July 13, 2011)* (citing *Durell v. Sharp Healthcare, 183 Cal. App. 4th 1350, 1367, 108 Cal. Rptr. 3d 682 (2010)*. The Complaint lumps all five defendants together and contains only a conclusory averment that Defendants "alone, and with others, breached the terms of the loan agreement between the Plaintiff and the said Defendants by reason of the conduct described in the following causes of action." *See Compl.* ¶ 35. Under *Iqbal*, such "threadbare recitals of a cause of action's elements, supported by mere conclusory statements" are insufficient. *See 129 S.Ct. at 1940*. More importantly, there is no allegation with respect to Plaintiff's performance under the Deed of Trust, and the allegations pleaded elsewhere in the Complaint and in Plaintiff's own supporting declaration demonstrate that it was Plaintiff who breached its terms. Specifically, **[*19]** Plaintiff alleges and declares that she became unable to make her payments beginning in November 2010. *See Compl.* ¶ 17; *Mercer PI Decl.* ¶ 4. Further, she admits she also breached the terms of the Permanent Loan Modification. *See Compl.* ¶ 18; *Mercer PI Decl.* ¶ 6. Accordingly, the Court concludes that the Complaint fails to state a claim for breach of contract and that Plaintiff has not shown any likelihood of success on the merits.

2. UCL

The UCL prohibits any "unlawful, unfair, or fraudulent business act or practice and unfair, deceptive, untrue or misleading advertising," as well as any act prohibited by California's false advertising statute. *See Ariz. Cartridge Remanufacturers Ass'n v. Lexmark Int'l, Inc., 421 F.3d 981, 985 (9th Cir. 2005)* (*quoting Cal. Bus. & Prof. Code § 17200*). An "unlawful" business act under *§ 17200* is any business practice that is prohibited by law, whether "civil or criminal, statutory or judicially made . . . , federal, state or local." *McKell v. Washington Mutual, Inc., 142 Cal. App. 4th 1457, 1474, 49 Cal. Rptr. 3d 227 (2006)* (citations omitted). A business act is "unfair" under *§ 17200* "if it violates established public policy or if it is immoral, unethical, oppressive or unscrupulous and causes injury to consumers which outweighs its benefits," *see id. at 1473*, or if it "threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its **[*20]** effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *Byars v. SCME Mortgage Bankers, Inc., 109 Cal. App. 4th 1134, 1147, 135 Cal. Rptr. 2d 796 (2003)*. Finally, a "fraudulent" business practice under *§ 17200* is "one which is likely to deceive the public," and "may be based on representations to the public which are untrue, and also those which may be accurate on some level, but will nonetheless tend to mislead or deceive." *See id. at 1471*. UCL claims based on fraud are subject to the heightened pleading requirements of *Rule 9(b)*. *See Kearns v. Ford Motor Co., 567 F.3d 1120, 1124-25 (9th Cir. 2009)*. Plaintiffs must plead "the who, what, when, where, and how of the alleged fraudulent conduct" and explain "why [a] statement or omission complained of was false and misleading." *In re Actimmune Mktg. Litig., 2009 U.S. Dist. LEXIS 103408, 2009 WL 3740648, at *13 (N.D. Cal. Nov. 6, 2009)*.

Plaintiff's UCL claim is deficiently pleaded because it relies on many of the same meritless or erroneous theories discussed above. *See FAC* ¶¶ 40, 42-45; *PI Mot.* 9:23-25, 10:1-19. To recap, the Court has already concluded that Plaintiff's argument as it relates to assessor parcel numbers is erroneous and that Plaintiff's argument concerning Defendants use of an unauthorized agent is insufficiently pleaded. As these are the only factual allegations pleaded in support of Plaintiff's UCL claim, the Court concludes that Plaintiff **[*21]** fails to state a UCL and that this claim is not likely to succeed on the merits.

3. Quiet Title

Plaintiff seeks to quiet title in her home. In order to state a claim for quiet title, the complaint must be verified and include (1) a legal description of the property and its street address or common designation; (2) the title of the plaintiff and the basis of the title; (3) the adverse claims to the title of the plaintiff; (4) the date as of which the determination is sought; and (5) a prayer for the determination of the title of the plaintiff against the adverse claims. Cal. Civ. Code § 761.020. A plaintiff "shall name as defendants in the action the persons having adverse claims to the title of the plaintiff against which a determination is sought." *Id.* § 762.010. In an action to quiet title, the plaintiff must stand on the strength of his or her own title and not the weaknesses of the defendant's title. *Millyard v. Faus, 268 Cal. App. 2d 76, 82, 73 Cal. Rptr. 697 (1968)*; *Deerinck v. Heritage Plaza Mortg. Inc., 2012 U.S. Dist. LEXIS 45728, 2012 WL 1085520, at * 8 (E.D. Cal. Mar. 30, 2012)*. Finally, "[i]t is settled in California that a mortgagor cannot quiet his title against the mortgagee without paying the debt secured." *See Shimpones v. Stickney, 219 Cal. 637, 649, 28 P.2d 673 (1934)*; *accord Rabago v. Deutsche Bank. Nat. Trust Co., No. 5:10-CV-1917-JST (DTBx), 2011 U.S. Dist. LEXIS 60262, 2011 WL 2173811, at *5 (C.D. Cal. June 1, 2011)*.

As discussed *supra*, Plaintiff's failure to unconditionally allege tender requires dismissal of her quiet **[*22]** title claim and precludes a showing of likelihood of success on the merits. Moreover, Plaintiff's quiet title claim is based on her assertion that "Defendants have no right, title, estate, lien, or interest in the property," and not on the strength of her own title. *See Compl.* ¶ 49. Accordingly, Plaintiff's quiet title claim is dismissed and does not support issuance of a preliminary injunction.

4. Accounting

Under California law, an accounting "is not an independent cause of action but merely a type of remedy and an equitable remedy at that." Wise v. Wells Fargo Bank, N.A., 850 F. Supp. 2d 1047, 2012 WL 1058887, at *6 (C.D. Cal. 2012) (quoting Batt v. City & County of San Francisco, 155 Cal. App. 4th 65, 82, 65 Cal. Rptr. 3d 716 (2007)). An accounting may be brought to compel a defendant to account to a plaintiff for money where (1) a fiduciary duty exists; or (2) where no fiduciary duty exists but "the accounts are so complicated that an ordinary legal action demanding a fixed sum is impracticable." *Id.* (quoting Civic Western Corp. v. Zila Industries, Inc., 66 Cal. App. 3d 1, 14, 135 Cal. Rptr. 915 (1977) ("A suit for an accounting will not lie where it appears from the complaint that none is necessary or that there is an adequate remedy at law."); *accord* Barajas v. Countrywide Home Loans, Inc., No. CV 10-07961 DDP (AGRx), 2012 U.S. Dist. LEXIS 24237, 2012 WL 628007, at *7 (C.D. Cal. Feb. 24, 2012) ("An action for an accounting is not available where the plaintiff alleges the right to recover a sum **[*23]** certain or a sum that can be made certain by calculation.").

The Complaint and Plaintiff's moving papers fail to establish either ground for seeking an accounting. Plaintiff alleges only that "[a]ny amount of money still owed to Defendants named herein[,] is unknown to Plaintiff and cannot be determined without an accounting." *See Compl.* ¶ 54. It is well established in California that a financial institution owes no fiduciary duty to borrowers when the institution's involvement in the loan transaction does not exceed the scope of its role as a lender of money. *See* Nymark v. Heart Fed. Sav. & Loan Ass'n, 231 Cal. App. 3d 1089, 1096, 283 Cal. Rptr. 53 (1991); *accord* Oaks Mgmt. Corp. v. Superior Court of San Diego Cnty., 145 Cal. App. 4th 453, 466, 51 Cal. Rptr. 3d 561 (2006) ("a loan transaction is at arms-length and there is no fiduciary relationship between the borrower and lender."). In addition, the monetary balance at issue is readily ascertainable. The Complaint pleads no facts to the contrary, and, as Defendants point out, the Notice of Default states the amount of delinquency and the Notice of Trustee's Sale states the unpaid principal balance. *See PI Opp.* 23:10-16, Exs. F, H. Accordingly, the Court concludes that Plaintiff's accounting claim fails as a matter of pleading and, in all likelihood, on the merits as well.

5. Declaratory Relief

Plaintiff's fifth and final cause of action **[*24]** is for declaratory relief. Plaintiff alleges a declaration is necessary to resolve "the disputes regarding the loan, and default, the entry of default, any violations of the laws of the State of California and the rights and liabilities of all of the parties involved in the matters alleged in this complaint." *See Compl.* ¶ 56. This cause of action is defective on multiple levels.

First, as the name suggests, declaratory relief is a form of relief and not an independent cause of action. *See* Santos v. Countrywide Home Loans, No. 2:09-02642-WBS-DAD, 2009 U.S. Dist. LEXIS 103453, 2009 U.S. Dist. LEXIS 103453, at *13 (E.D. Cal. Nov. 6, 2009). As such, a claim for declaratory relief is improper where, as here, the claim merely replicates other substantive causes of action asserted in the pleading. *See* Lai v. Quality Loan Service Corp., No. 2:10-cv-02308 PSG, 2010 U.S. Dist. LEXIS 97121, 2010 WL 3419179, at *3 (C.D. Cal. Aug. 26, 2010) ("The object of [declaratory relief] is to afford a new form of relief where needed and not to furnish a litigant with a second cause of action for determination of identical issues.") (internal quotations omitted). Second, the Court has rejected each of the theories upon which Plaintiff seeks a declaration. Finally, Plaintiff's declaratory relief claim fails on the addition ground that Plaintiff fails to allege tender. *See e.g.,* ***[*25]*** Rodriguez v. Litton Loan Servicing LP, No. 2:09-cv-00029-MCEDAD, 2009 U.S. Dist. LEXIS 43143, 2009 WL 1326339, at *7 (E.D. Cal. 2009) (dismissing claim for declaratory relief when "Plaintiff failed to [] allege his willingess and ability to tender the loan proceeds."). Accordingly, Plaintiff fails to plead a cognizable claim for declaratory relief.

In sum, the complaint fails to state any viable claims, and Plaintiff has failed to show a likelihood of success on or even raise "serious questions" going to the merits. Although it "is well-established that the loss of an interest in real property constitutes an irreparable injury," *see* Park Village Apartment Tenants Ass'n v. Mortimer Howard Trust, 636 F.3d 1150, 1159 (9th Cir. 2011), Plaintiff's failure to state any viable claims or show that serious questions go to the merits warrants dismissal and denial of the preliminary injunction. *See* Arroryo v. Aurora Bank, FSB, No. EDCV 11-2063-DOC (JEMx), 2012 U.S. Dist. LEXIS 5477, 2012 WL 137854, at *3 (C.D. Cal., Jan. 18, 2012) (noting that if a plaintiff "cannot state a valid claim [] or show even some likelihood of prevailing, the impending foreclosure sale will be an unfortunate result, but not an inequitable one.").

The Court also concludes that the balance of the hardships does not strongly favor Plaintiff and that an injunction would not be in the public interest. First, Plaintiff's Loan is only paid through January 2011; thus, Plaintiff is more than one **[*26]** year delinquent. Second, despite owing nearly $330,499.56 as of September 9, 2011 and representing that she needed only a few months to secure the requisite loan modification documents, Plaintiff did not accept RCS's January 2012 Permanent Loan Modification agreement when it was offered to her. *See Garber Decl.*, Exs. U, T; *PI Opp.* 6:7-11. Finally, Plaintiff has continued living at the Subject Property without making any payments to Defendants for the last year. *Opp.* 25:8-10. Given RCS's numerous good faith efforts to reach a satisfactory loan modification agreement with Plaintiff and her ongoing inability to make payments toward her sizeable debt, the Court concludes that further postponing Defendants' lawful relief is not in the public interest and offers nothing to tip the balance in favor of Plaintiff. *See Alcaraz v. Wachovia Mortg. FSB, 592 F. Supp. 2d 1296, 1306 (E.D. Cal. 2009)*.

IV. Conclusion

In conclusion, Plaintiff's motion for a preliminary injunction is DENIED and the temporary restraining order issued by the state court is DISSOLVED. Defendants' motion to dismiss is GRANTED. The Court is mindful that in granting a motion to dismiss, leave to amend should be given unless it appears that doing so would be futile. *See Deveraturda v. Globe Aviation Sec. Servs., 454 F.3d 1043, 1049-50 (9th Cir.2006)*. Accordingly, the Court grants **[*27]** Plaintiff leave to amend her Complaint. Plaintiff shall file an amended complaint by no later than **May 30, 2012**. Plaintiff shall file a response to the Court's Order to Show Cause regarding dismissal pursuant to *Federal Rule of Civil Procedure 4(m)* by no later than **May 23, 2012**.

IT IS SO ORDERED.

Opinion

REPORT AND RECOMMENDATION

THIS CAUSE is before the Court upon Plaintiff/Counter-Defendant Motorola Mobility Inc.'s ("Motorola") Motion to Dismiss Defendant/Counter-Plaintiff, CT Miami, LLC's ("CT") Amended Counterclaim **[DE16]**, and an Order of Referral entered by the Honorable Marcia G. Cooke on February 28, 2012. **[DE26]**. A hearing on this Motion took place before the undersigned on April 23, 2012.

Upon review of the Motion **[DE16]**, the Response **[DE21]**, the Reply **[DE24]**, the court file, hearing argument from counsel, and being otherwise duly advised in the premises, the undersigned **[*2]** makes the following findings.

Background

This action was filed by Motorola against CT on October 7, 2011. **[DE1]**. The Complaint alleges, among other things, breach of contract in connection the purchase of cellular phone handsets, and outstanding invoices in the amount of $2,171,700. Id. CT is an international distributor of cellular telephones headquartered in Miami, Florida. **[DE15, 8]**. CT entered into a Distribution Agreement ("Agreement") with Motorola's predecessor in interest[1] on, or about, December 11, 2009. Compl. **[DE1-3,Ex. A]**. Pursuant to the Agreement, "Motorola engaged CT as an authorized non-exclusive distributor" of its cellular handset kits in certain countries in Latin America. Id. at ¶ 1.1.

In response to the Complaint, CT has lodged several antitrust allegations against Motorola. Am. Countercl. **[DE15]**. Specifically, CT filed a three count counterclaim[2] against Motorola, alleging, *inter alia*, Count I-Violation of the Florida Antitrust Act of 1980, Count II - Violation of the Florida Deceptive and Unfair Trade Practices Act ("FDUTPA"); and Count III - Breach of the Covenant of Good Faith and Fair Dealing. Am. Counterclaim. Id.

CT's main claim is that Motorola **[*3]** discriminated against it when it sold products to other distributors at prices lower than those charged to CT. Id. Specifically, CT alleges that Motorola "offered and sold identical [p]roducts to other companies in Asia, namely, Niti International Ltd. and Electrade . . . at prices significantly lower than those it was charging CT pursuant to Motorola's 'then current price list.'" Id. at ¶ 15.

Instant Motion

The instant Motion was filed on January 17, 2012. **[DE16]**. In the Motion, Motorola argues, among other things, that CT fails to meet the heightened pleading standard under the Twombly case, discussed further *infra*. In this connection, Motorola argues that CT makes only " bare assertions that Motorola engaged in price discrimination and that it condoned transshipment by other distributors" in violation of the Agreement. Id. That, without more, says Motorola, is insufficient to survive a motion to dismiss under Rule 12(b)(6), under either Florida's Antitrust Act, or FDUTPA. Id. Motorola also challenges CT's claim for Breach of Covenant of Good Faith and Fair Dealing. CT, of course, opposes the Motion.

Legal Standard

When considering a Rule 12(b)(6) motion to dismiss, the Court must accept a plaintiff's factual **[*4]** allegations as true and construe them broadly, in the light most favorable to the plaintiff. See *Watts v. Fla. Int'l Univ., 495 F.3d 1289, 1295 (11th Cir. 2007)*; *Cottone v. Jenne, 326 F.3d 1352, 1355 (11th Cir. 2003)*. In reviewing the motion, the Court "may only examine the four corners of the complaint and not matters outside the complaint without converting the motion to dismiss to a motion for summary judgment." *Caravello v. American Airlines, 315 F. Supp. 2d 1346, 1348 (S.D. Fla. 2004)*; see also *St. George v. Pinellas County, 285 F.3d 1334, 1337 (11th Cir. 2002)*. Generally speaking, all that is required is a short and plain statement of the claim showing that the pleader is entitled to relief. See *United States v. Baxter International, Inc., 345 F.3d 866, 880 (11th Cir. 2003)*.

The Supreme Court expanded on the liberal pleading requirements in *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. In so doing, the Court explained that a complaint must offer more than a "formulaic recitation of the elements of a cause of action." Id. Nevertheless, "it remains black-letter law today that in the ordinary case, a complaint need not provide detailed factual allegations in order to withstand 12(b)(6) scrutiny." *Caytrans BBC, LLC v. Equipment Rental & Contractors Corp., 2009 U.S. Dist. LEXIS 23953, 2009 WL 857554, at *2 (S.D. Ala. Mar. 25, 2009)*(citing *Wilchombe v. TeeVee Toons, Inc., 555 F.3d 949, 958 (11th Cir. 2009)*. Twombly neither eliminated nor marginalized those permissive, liberal rules. *Caytrans, 2009 U.S. Dist. LEXIS 23953, 2009 WL 857554, at *2*. Twombly simply noted that the factual allegations in a complaint "must be enough to raise a right to relief above the speculative level on the **[*5]** assumption that all the allegations in the complaint are true (even if doubtful in fact)." *Sinaltrainal v. Coca-Cola Co., 578 F.3d 1252, 1261 (11th Cir.*

[1] The Agreement was entered into by Motorola Inc. and Motorola Industrial, Ltda. (collectively "Motorola") and CT. **[DE1-3, Ex.A]**.

[2] For present purposes, the currently operative pleading is CT's Amended Counterclaim. **[DE15]**.

2009)(citing Twombly, 550 U.S. at 555)(internal citations and emphasis omitted). In sum, the post-Twombly rules of pleading do not require heightened fact specific pleading, but only enough to state a claim to relief that is plausible on its face.

Analysis

State Law Claims

Florida's Antitrust Act of 1980, *Fla. Stat. § 542.18*, states in relevant part, "Every contract, combination, or conspiracy in restraint of trade or commerce in this state is unlawful." *Fla. Stat. § 542.18*. In this regard, Motorola argues that CT has failed to state a claim under Florida's Antitrust Act of 1980, because it has not alleged a conspiracy between Motorola and the purported competitors.

CT, on the other hand, contends that it need not make such allegations. Applying the law to the facts of this case, the undersigned disagrees.

In interpreting the Florida's Antitrust Act, existing case law holds that a court must rely on the body of federal case law interpreting the Sherman Act. *Vitacost.com, Inc. v. Gaia Herbs, Inc., 2007 U.S. Dist. LEXIS 22266, 2007 WL 951768, *2 (S.D. Fla. Mar. 28, 2007)*(quoting *All Care Nursing Serv. v. High Tech Staffing Servs., 135 F. 3d. 740, 746 (11th Cir. 1998)*. The Florida legislature has, in effect, adopted as the law of Florida the body of ***antitrust law*** developed by the federal courts under the Sherman Act. *St. Petersburg Yacht Charters, Inc. v. Morgan Yacht, Inc., 457 So. 2d 1028, 1032 (Fla. 2d Dist. Ct.App. 1984)*. In other words, *§542.18* is analogous to *§ 1* of the Sherman **[*6]** Act. *All Care Nursing Serv., 135 F.3d at 745, n.11 (11th Cir. 1998)*. Thus, for present purposes, the Sherman Act is applicable to CT's state antitrust claims.

Section 1 of the Sherman Act states in pertinent part, "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several states, or with foreign nations, is hereby declared to be illegal." *15 U.S.C. § 1*. The threshold element of a *section 1* claim is "concerted activity." *JES Properties, Inc. v. USA Equestrian, Inc., 2005 U.S. Dist. LEXIS 43122, 2005 WL 1126665, *12 (M.D. Fla. 2005)*. Unilateral conduct is insufficient. *Cooperweld Corp. v. Independence Tube Corp., 467 U.S. 752 (1984)*.

Here, as correctly noted by Motorola, CT fails to allege facts suggesting the existence of an agreement or conspiracy on the part of Motorola and other distributors. Accordingly, pursuant to *§542.18*, which, as noted above, mirrors the Sherman Act, and case law interpreting same, the undersigned finds that CT has failed to state a claim under Florida's Antitrust Act of 1980. Accordingly, it is hereby RESPECTFULLY RECOMMENDED that CT's Florida Antitrust claims be DISMISSED.

FDUTPA Claims

In order to state a claim for damages under FDUTPA, one must allege: (1) a deceptive act or unfair practice; (2) causation; and (3) damages. *Gavron v. Weather Shield Mfg., Inc., 819 F. Supp.2d 1297 (S.D. Fla. 2011)*(quoting *Rollins v. Butland, 951 So.2d 860, 869 (Fla. 2d Dist. Ct. App. 2006)*. A deceptive act occurs when "there is a representation, omission, or practice that is likely to mislead." *PNR, Inc. v. Beacon Prop. Mgmt., Inc., 842 So.2d 773, 777 (Fla. 2003)*. In other words, **[*7]** FDUTPA focuses on whether an act is deceptive, not whether a defendant knew that the allegedly violative conduct was occurring. Gavron, 819 F. Supp. at 1302 (citing *Orkin Exterminating Co. v. FTC, 849 F.2d 1354, 1368 (11th Cir. 1988)*.

Here, CT makes the following allegations,

> 30. By engaging in horizontal discrimination and openly and knowingly condoning violative transhipping by the Competing Companies, Motorola has engaged in deceptive and unfair trade practice[s] and has also violated

> laws that proscribe unfair methods of competition or unfair, deceptive or unconscionable acts or practices, including the Florida Antitrust Act of 1980.

Am. Countercl. **[DE15, ¶ 30]**.

> 31. As a result of Motorola's deceptive and unfair trade practices and violations of these laws, CT has suffered actual damages including, but not limited to, the difference in price afforded to the Competing Companies for the identical Products known to be subject to transshipment into CT's territory, and the loss of revenue CT incurred by having to ultimately sell its Products at well below market pricing during the flood of Product caused by the violative transshipments.

Id. at ¶ 31.

> 32. Motorola's price discrimination practices against CT were international, wanton, malicious, wilful, and made with a reckless disregard **[*8]** for CT's rights.

Id. at ¶32.

Applying the law to the facts alleged in the Amended Counterclaim, the undersigned finds that CT has plead sufficiently, at this stage in the litigation, to survive a motion to dismiss. The undersigned makes no findings as to the merits of CT claim, or whether it will ultimately prevail in this litigation. Upon careful consideration, however, the Court finds that these matters are better addressed by way of summary judgment motions after the appropriate discovery. Accordingly, it is **RESPECTFULLY RECOMMENDED** that Motorola's Motion be **DENIED** as to CT's FDUTPA claims.

Covenant of Good Faith and Fair Dealing

For purposes of this issue, the parties concede that Delaware law applies. The parties likewise agree that under Delaware law "the implied covenant requires a party in a contractual relationship to refrain from arbitrary or unreasonable conduct which has the effect of preventing the other party to the contract from receiving the fruits of the bargain." *Wilgus v. Salt Pond Inv. Co., 498 A.2d 151, 159 (Del. Ch. 1985)*. The parties, however, disagree as to whether the allegations raised by CT are sufficient.

Here, CT's claim is based largely on § 7.2 of the Agreement, which states:

> 7.2 Prices stated on the Distributor's Purchase **[*9]** Orders shall conform to Motorola's then current price list for Distributor Managed Accounts, such shall be made available to Distributor as soon as reasonably possible.

Compl. **[DE1-3, Ex. A, § 7.2]**.

In the Counterclaim CT alleges as follows,

> 35. In connection with the performance of its obligations under the Distribution Agreement, Motorola had a duty to act in good faith and to deal fairly with CT.

Am. Countercl. **[DE15, ¶ 35]**.

> 36. Pursuant to 7.2 of the Distribution Agreement, Motorola was required to provide a "then current" price list to CT as soon as reasonably possible identifying the prices to be charged to Distributor Managed Accounts . . .

Id. at ¶ 36.

> 37. Motorola breached 7.2 of the Distribution Agreement when it failed to provide CT a current price list for CT's customers in the Territory, and engaged in horizontal price discrimination by providing a different price list to the Competing Companies with full knowledge that the Competing Companies were transshipping the Products into CT's Territory.

Id. at ¶ 37.

> 38. Motorola breached its duty of good faith and fair dealing when it condoned and continues to condone the sale of Motorola's Products into the Territory for the Competing Companies **[*10]** at lower prices than those offered to CT, rendering it impossible for CT to compete when its own customers are able to pay much lower prices than what CT is being charged by Motorola for the same products.

Id. at ¶ 38.

> 39. This conduct has caused damage to CT's reputation in the industry.

Id. at ¶ 39.

> 40. As a result of Motorola's breach of its duty of good faith and fair dealing, CT has suffered damages including, but not limited to, the loss of business, sales, profits, and the loss of goodwill.

Id. at ¶40.

Upon careful review, and taking as we must, the allegations as true, the Court finds that the Counterclaim is sufficiently plead to survive a motion to dismiss. Again, as noted *supra*, in this Court's view, these matters may be better suited for resolution by way of a summary judgment motion.

Consistent with the above, it is **RESPECTFULLY RECOMMENDED** that Plaintiff's Motion **[DE16]** be **GRANTED-IN-PART** and **DENIED-IN-PART**.

Pursuant to *28 U.S.C. § 636(b)(1)(C)*, the parties may file written objections to this Report and Recommendation with the Honorable Marcia G. Cooke, United States District Judge, within fourteen (14) days of receipt. Failure to file timely objections shall bar the parties from attacking on appeal **[*11]** any factual findings contained herein. *RTC v. Hallmark Builders, Inc., 996 F.2d 1144, 1149*, reh'g denied, *7 F.3d 242* (1 1 th Cir. 1993); *LoConte v. Duggar, 847 F.2d 745 (11th Cir. 1988)*, cert. denied, *488 U.S. 958, 109 S. Ct. 397 (1988)*.

RESPECTFULLY RECOMMENDED in Chambers a Miami, Florida on this 10 day of May 2012.

/s/ William C. Turnoff

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

HN1[] **Agriculture & Food, Federal Food, Drug & Cosmetic Act**

The Federal Food, Drug, and Cosmetic Act, *21 U.S.C.S. §§ 301-392*, provides that the Food and Drug Administration (FDA) must approve all drugs before they may be introduced into interstate commerce. Companies seeking to market drugs may file applications for approval under one of two procedures. Under the first procedure, the applicant files a New Drug Application (NDA), which must contain examples of the proposed labeling for the drug as well as clinical data demonstrating the drug's safety and efficacy. Among other things, the NDA must also contain the patent number and expiration date of any patent that claims either the drug or a method of using the drug if a claim of patent infringement could reasonably be asserted. The FDA publishes the names of approved drugs and their associated patents in what is commonly known as the Orange Book. *21 U.S.C.S. § 355(b)*.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

HN2[] **Agriculture & Food, Federal Food, Drug & Cosmetic Act**

The United States Congress established the second new drug approval procedure in 1984 with the Drug Price Competition and Patent Term Restoration Act (the Hatch-Waxman Act). Pub. L. No. 98-417, 98 Stat. 1585 (1984). Under the Hatch-Waxman Act, companies seeking to manufacture and market a generic version of a previously approved pioneer drug (known as the listed drug) need not file an New Drug Application. Instead, they are permitted to file an Abbreviated New Drug Application (ANDA). The ANDA permits the applicant to rely on the safety and efficacy data for the listed drug if the applicant can show that the generic product is bioequivalent to the listed drug. *21 U.S.C.S. § 355(j)(2)(A)(iv)*, *(j)(8)(B)*.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

HN3[] **Agriculture & Food, Federal Food, Drug & Cosmetic Act**

As part of the Abbreviated New Drug Application process, a generic manufacturer must make one of four certifications regarding each patent associated in the Orange Book with the listed drug: (I) that the patent information has not been filed; (II) that the patent has expired; (III) that the patent is set to expire; or (IV) that the patent is invalid or will not be infringed by the generic drug. This fourth certification is known as a paragraph IV certification. *21 U.S.C.S. § 355(j)(2)(A)(vii)(IV)*. A generic manufacturer that files a paragraph IV certification must give notice to the patent holder and provide a detailed statement of the factual and legal basis of the opinion of the applicant that the patent is invalid or will not be infringed. *§ 355(j)(2)(B)*.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

Patent Law > Infringement Actions > General Overview

HN4[] **Agriculture & Food, Federal Food, Drug & Cosmetic Act**

The Hatch-Waxman Act provides that if the patent holder files an infringement suit within 45 days after receiving notice, the patent holder benefits from a statutory stay on Food and Drug Administration (FDA) approval of the Abbreviated New Drug Application (ANDA) for a period of 30 months or until the resolution of the infringement suit, whichever is shorter. *21 U.S.C.S. § 355(j)(5)(B)(iii)*. The first generic company to file an ANDA containing a paragraph IV certification (the first filer) also receives an exclusivity period of 180 days during which the FDA may not approve any later-filed paragraph IV ANDA based on the same New Drug Application. *§ 355(j)(5)(B)(iv)*. The 180-day period begins to run from (1) the date that the first filer begins to market its drug or (2) the date of a final judgment that the patent is invalid or not infringed, whichever is earlier. *§ 355(j)(5)(B)(iv)*, *(D)*.

Administrative Law > Agency Rulemaking > General Overview

Administrative Law > Agency Adjudication > General Overview

HN5[] **Administrative Law, Agency Rulemaking**

Federal regulations provide that an interested person may petition the Food and Drug Administration (FDA) to issue, amend, or revoke a regulation or order, or to take or refrain from taking any other form of administrative action. *21 C.F.R. § 10.25*. A citizen petition must describe the FDA action requested, include a statement of the factual and legal grounds on which the petitioner relies, and certify that the petition includes all information and views on which the petition relies, and that it includes representative data and information known to the petitioner which are unfavorable to the petition. *21 C.F.R. § 10.30(a)*. Within 180 days of receiving the petition, the FDA must furnish a response to the petitioner either approving, denying, or providing a tentative response that indicates why the agency has been unable to reach a decision on the petition. *§ 10.30(e)(2)*.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN6[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

A party who petitions the government for redress is generally immune from antitrust liability. Under what is known as the Noerr-Pennington doctrine, the *First Amendment* protects the right to petition all types of government entities, including the right to bring legitimate disputes to the courts for judicial resolution. Noerr-Pennington immunity, however, is not absolute. It is subject to a sham exception for activities that are a mere sham to cover an attempt to interfere directly with the business relationships of a competitor. The sham exception is applicable not only to lawsuits but also to administrative petitions. In Professional Real Estate Investors, Inc. v. Columbia Pictures Indus., Inc., the United States Supreme Court set forth a two-tiered definition of the sham exception. The first prong is concerned with the objective merit of the lawsuit or petition at issue, and the second focuses on the antitrust defendants' subjective intentions.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

Evidence > Burdens of Proof > Allocation

HN7[] **Noerr-Pennington Doctrine, Sham Exception**

Under the first prong of the sham exception test to the Noerr-Pennington doctrine, the party invoking the sham exception must show that the defendants' conduct is objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits. Put another way, if an objective litigant could conclude that the suit is reasonably calculated to elicit a favorable outcome, the suit is immunized under Noerr, and an antitrust claim premised on the sham exception must fail. The existence of probable cause to institute proceedings is an absolute defense to antitrust liability. Loss on the merits of the underlying proceeding, although instructive, is not determinative on the issue of objective baselessness. The United States Supreme Court specifically warned courts to resist the understandable temptation to engage in post hoc reasoning by concluding that an ultimately unsuccessful action must have been unreasonable or without foundation. Where there is no dispute over the predicate facts of the underlying legal proceeding, a court may decide probable cause as a matter of law.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN8[] **Noerr-Pennington Doctrine, Sham Exception**

Only if an action is objectively baseless may a court proceed to the second prong of the sham exception definition to the Noerr-Pennington doctrine. Under the subjective second prong, a court should examine whether the baseless suit or petition conceals an attempt to interfere directly with the business relationships of a competitor through the use of the governmental process, as opposed to the outcome of that process, as an anticompetitive weapon.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

Patent Law > Infringement Actions > General Overview

HN9[] **Agriculture & Food, Federal Food, Drug & Cosmetic Act**

An infringement inquiry triggered by an Abbreviated New Drug Application (ANDA) filing is focused on the product that is likely to be sold following Food and Drug Administration approval. Because the potentially infringing drug has not yet been marketed when the patent holder files suit, the inquiry is a hypothetical one that asks the fact finder to determine whether the drug that will be sold upon approval of the ANDA will infringe the asserted patent. Thus, because drug manufacturers are bound by strict statutory provisions to sell only those products that comport with the ANDA's description of the drug, an ANDA specification defining a proposed generic drug in a manner that directly addresses the issue of infringement will control the infringement inquiry.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

Patent Law > Infringement Actions > General Overview

HN10[] **Agriculture & Food, Federal Food, Drug & Cosmetic Act**

The infringement provision of the Hatch-Waxman Act, *35 U.S.C.S. § 271(e)(2)(A)*, states that it is an act of infringement to submit an Abbreviated New Drug Application that describes a drug claimed in a patent. Thus, the patent holder may sue before the product goes to market.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

HN11[] **Agriculture & Food, Federal Food, Drug & Cosmetic Act**

The Food and Drug Administration regulations require Abbreviated New Drug Application (ANDA) applicants to include a list of all components used in the manufacture of the drug product, regardless of whether they appear in the drug product, as well as a statement of the composition of the drug product. *21 C.F.R. § 314.50*. ANDA applicants must also identify and characterize the inactive ingredients in the proposed drug product. *§ 314.94(a)(9)(ii)*.

Evidence > Inferences & Presumptions > Presumptions

Patent Law > Infringement Actions > Claim Interpretation > Construction Preferences

Patent Law > ... > Specifications > Description Requirement > General Overview

Patent Law > Infringement Actions > Claim Interpretation > Scope of Claim

HN12[] Inferences & Presumptions, Presumptions

It is a bedrock principle of patent law that the claims of a patent define the invention to which the patentee is entitled the right to exclude. It is also well-settled that in interpreting an asserted claim, courts look first to intrinsic evidence - e.g., the patent itself, including the language of the claims, the specification, and the prosecution history. There is a heavy presumption that claim terms mean what they say and have the ordinary meaning that would be attributed to those words by persons skilled in the relevant art. When intrinsic evidence unambiguously describes the scope of a patented invention, reliance on extrinsic evidence is improper. Trial testimony regarding the meaning of a claim cannot vary the meaning of a claim that is established either by the claim itself or by the claim as correctly understood by reference to the specification and the file history. Nevertheless, extrinsic evidence such as expert testimony can help the court determine what a person of ordinary skill in the art would understand claim terms to mean.

Patent Law > Infringement Actions > Claim Interpretation > Construction Preferences

Patent Law > Claims & Specifications > General Overview

HN13[] Claim Interpretation, Construction Preferences

When a claim term has an accepted scientific meaning, that meaning is generally not subject to restriction to the specific examples in the specification. It is established that as a general rule claims of a patent are not limited to the preferred embodiment or to the examples listed within the patent specification.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Evidence > Burdens of Proof > Allocation

HN14[] Regulated Practices, Private Actions

The elements of an antitrust claim are (1) a violation of the antitrust laws; (2) individual injury resulting from that violation; and (3) measurable damages. It is not necessary to show with total certainty the exact amount of damages sustained, just that the defendants' anti-competitive acts caused the antitrust injury suffered by the plaintiff.

Patent Law > Infringement Actions > Claim Interpretation > Construction Preferences

HN15[] Claim Interpretation, Construction Preferences

The starting point for any claim construction must be the claims themselves.

Evidence > Inferences & Presumptions > Presumptions

Patent Law > Infringement Actions > Claim Interpretation > Construction Preferences

HN16[] Inferences & Presumptions, Presumptions

When different words or phrases are used in separate claims, a difference in meaning is presumed. Differences among claims can also be a useful guide in understanding the meaning of particular claim terms.

Patent Law > Infringement Actions > Claim Interpretation > Construction Preferences

Patent Law > Claims & Specifications > General Overview

HN17[] **Claim Interpretation, Construction Preferences**

Claims must be read in view of the specification, of which they are a part. However, the distinction between using the specification to interpret the meaning of a claim and importing limitations from the specification into the claim can be a difficult one to apply in practice.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN18[] **Noerr-Pennington Doctrine, Sham Exception**

In the context of the sham exception test to the Noerr-Pennington doctrine, a successful effort to influence governmental action certainly cannot be characterized as a sham. Thus, a winning lawsuit is by definition a reasonable effort at petitioning for redress and therefore not a sham.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN19[] **Noerr-Pennington Doctrine, Sham Exception**

The Professional Real Estate Investors, Inc. v. Columbia Pictures Indus., Inc. (PRE) standard for objective baselessness is a forward-looking standard from the point in time when the suit or petition was filed. In setting forth the standard, the United States Supreme Court used the language of expectancy: The lawsuit must be objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits. If an objective litigant could conclude that the suit is reasonably calculated to elicit a favorable outcome, the suit is immunized under Noerr, and an antitrust claim premised on the sham exception must fail. To examine post hoc whether it was the petition that caused the government to reach a certain outcome would be contrary to the forward-looking language in PRE.

Administrative Law > Agency Adjudication > General Overview

HN20[] **Administrative Law, Agency Adjudication**

See *21 C.F.R. § 10.35 (2005)*.

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN21[] **Scope, Exemptions**

The Sherman Act does not prohibit an anticompetitive restraint imposed by a state as an act of government. This so-called Parker or state action immunity protects the states' act of governing and expresses the principle that the antitrust laws regulate business, not politics. The doctrine is grounded in principles of federalism and respect for state sovereignty, and relies heavily on the clarity of the state's goals and actions. Conflicts similar to those created by state regulation and policy can arise in the context of federal regulation. Some statutes explicitly preclude application of ***antitrust law***. Where statutes are silent, however, courts must determine whether they implicitly preclude application of the antitrust laws, which determination turns on the relation between the antitrust laws and the regulatory program set forth, and the specific conduct at issue.

Antitrust & Trade Law > Exemptions & Immunities > General Overview

Governments > Legislation > Expiration, Repeal & Suspension

HN22[] **Antitrust & Trade Law, Exemptions & Immunities**

Repeal of the antitrust laws by implication is not favored and not casually to be allowed. Only where there is a plain repugnancy between the antitrust and regulatory provisions will repeal be implied. Absent express immunity conferred by the United States Congress, immunity will be implied only if Congress has clearly supplanted the antitrust laws and their model of competition with a differing competitive regime, defined by particularized competitive standards and enforced by an administrative agency, and has thereby purged an otherwise obvious antitrust violation of its illegality.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

HN23[] **Agriculture & Food, Federal Food, Drug & Cosmetic Act**

The Hatch-Waxman Act, Food and Drug Administration (FDA) regulations, and FDA guidance only require generics to prove bioequivalence to the reference listed drug. *21 U.S.C.S. § 355(j)(2)*, *(8)*; *21 C.F.R. § 314.94*.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Evidence > Burdens of Proof > Allocation

HN24[] **Regulated Practices, Private Actions**

An antitrust plaintiff must prove a causal connection between the antitrust violation and actual damages suffered.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

Evidence > Burdens of Proof > Allocation

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Evidence > Inferences & Presumptions > Inferences

HN25[] **Sherman Act, Claims**

Antitrust co-conspirators are jointly and severally liable for all damages caused by the conspiracy to which they were a party. Both a conspiracy claim under *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, and a conspiracy to monopolize claim under *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*, require the existence of agreement or concerted action. To show agreement or concerted action, antitrust plaintiffs must produce evidence allowing a jury to reasonably infer a unity of purpose or a common design and understanding, or a meeting of minds in an unlawful arrangement. Direct proof of an express agreement is not required, but ***antitrust law*** limits the range of permissible inferences from ambiguous evidence. Conduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy. To withstand a motion for summary judgment, a plaintiff must present evidence that tends to exclude the possibility that the alleged conspirators acted independently. The plaintiff must show that the inference of conspiracy is reasonable in light of the competing inferences of independent action or collusive action that could not have harmed them.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Evidence > Inferences & Presumptions > Inferences

Torts > ... > Concerted Action > Civil Conspiracy > General Overview

HN26[] **Conspiracy to Monopolize, Elements**

Courts generally reject conspiracy claims that seek to infer an agreement from communications despite a lack of independent evidence tending to show an agreement and in the face of uncontradicted testimony that only informational exchanges took place. Furthermore, proof of opportunity to conspire, without more, will not sustain an inference that a conspiracy has taken place.

MEMORANDUM

McLaughlin, J.

TABLE OF CONTENTS

MEMORANDUM

McLaughlin, **[*4]** J.

Wellbutrin XL is a once-a-day antidepressant containing the active pharmaceutical ingredient bupropion hydrochloride. It is produced by Biovail Corporation, Biovail Laboratories, Inc., and Biovail Laboratories International SRL [1] (together, "Biovail"), and distributed by SmithKline Beecham Corporation and GlaxoSmithKline, PLC (together, "GSK"). The plaintiffs, direct and indirect purchasers of Wellbutrin XL, have sued Biovail and GSK for illegally conspiring to prevent generic versions of Wellbutrin XL from entering the American market by filing sham patent infringement lawsuits and a citizen petition with the Food and Drug Administration ("FDA"), and entering into agreements with generic companies to settle the lawsuits.

Biovail and GSK now each move for summary judgment, arguing that their conduct is protected from antitrust liability under the Noerr-Pennington doctrine, and that the settlement **[*5]** agreements are not independently actionable. GSK also argues that it had no involvement in some of the allegedly anticompetitive conduct and, therefore, cannot be held conspiratorially liable for it. The Court will grant the motions as to the four lawsuits and the citizen petition, and defer decision as to the settlement agreements until a future date.

I. Legal and Factual Background[2]

A. The Drug Approval Process and Regulatory Framework

HN1[] The Federal Food, Drug, and Cosmetic Act, *21 U.S.C. §§ 301-92* ("FDCA"), provides that the Food and Drug Administration ("FDA") must approve all drugs before they may be introduced into interstate commerce. Companies **[*6]** seeking to market drugs may file applications for approval under one of two procedures.

Under the first procedure, the applicant files a New Drug Application ("NDA"), which must contain examples of the proposed labeling for the drug as well as clinical data demonstrating the drug's safety and efficacy. Among other things, the NDA must also contain the patent number and expiration date of any patent that claims either the drug or a method of using the drug if "a claim of patent infringement could reasonably be asserted." The FDA publishes the names of approved drugs and their associated patents in what is commonly known as the "Orange Book." *21 U.S.C. § 355(b)*.

HN2[] Congress established the second new drug approval procedure in 1984 with the Drug Price Competition and Patent Term Restoration Act (the "Hatch-Waxman Act"). Pub. L. No. 98-417, 98 Stat. 1585 (1984). Under the Hatch-Waxman Act, companies seeking to manufacture and market a generic version of a previously approved pioneer drug (known as the "listed drug") need not file an NDA. Instead, they are permitted to file an Abbreviated New Drug Application ("ANDA"). The ANDA permits the applicant to rely on the safety and efficacy data for **[*7]** the listed drug if the applicant can show that the generic product is "bioequivalent" to the listed drug. *21 U.S.C. §§ 355(j)(2)(A)(iv)*, *(j)(8)(B)*.

HN3[] As part of the ANDA process, a generic manufacturer must make one of four certifications regarding each patent associated in the Orange Book with the listed drug: (I) that the patent information has not been filed; (II) that the patent has expired; (III) that the patent is set to expire; or (IV) that the patent is invalid or will not be infringed by

[1] The Biovail defendants have changed their names or corporate structures following a merger. See Notice of Change of Names of Biovail Defs. (08-cv-2431 ECF No. 407; 08-cv-2433 ECF No. 375). For the sake of continuity, the Court will continue to refer to these defendants collectively as "Biovail."

[2] The facts here are undisputed unless otherwise noted. The Court will frequently cite to the following documents: Biovail Stmt. (ECF No. 413/ECF No. 381); GSK Stmt. (ECF No. 411/ECF No. 379); Pls.' Stmt. Resp. (ECF No. 431/ECF No. 394); Pls.' Stmt. (ECF No. 430/ECF No. 393). Where the Court refers to ECF numbers in this memorandum, the first number listed corresponds to the docket entry in 08-cv-2431, and the second corresponds to 08-cv-2433. The Court will cite Biovail exhibits as "BX," GSK exhibits as "GX," and plaintiffs' exhibits as "PX."

the generic drug. This fourth certification is known as a "paragraph IV certification." *21 U.S.C. § 355(j)(2)(A)(vii)(IV)*. A generic manufacturer that files a paragraph IV certification must give notice to the patent holder and provide a "detailed statement of the factual and legal basis of the opinion of the applicant that the patent is invalid or will not be infringed." *21 U.S.C. § 355(j)(2)(B)*.

HN4[] The Hatch-Waxman Act provides that if the patent holder files an infringement suit within 45 days after receiving notice, the patent holder benefits from a statutory stay on FDA approval of the ANDA for a period of 30 months or until the resolution of the infringement suit, whichever is shorter. *21 U.S.C. § 355(j)(5)(B)(iii)*. **[*8]** The first generic company to file an ANDA containing a paragraph IV certification (the "first filer") also receives an "exclusivity" period of 180 days during which the FDA may not approve any later-filed paragraph IV ANDA based on the same NDA. Id. *§ 355(j)(5)(B)(iv)*. The 180-day period begins to run from (1) the date that the first filer begins to market its drug or (2) the date of a final judgment that the patent is invalid or not infringed, whichever is earlier. Id. *§§ 355(j)(5)(B)(iv)*, *355(j)(5)(D)*.

B. The Citizen Petition Process

HN5[] Federal regulations provide that an interested person may petition the FDA to "issue, amend, or revoke a regulation or order, or to take or refrain from taking any other form of administrative action." *21 C.F.R. § 10.25*. A citizen petition must describe the FDA action requested, include a statement of the factual and legal grounds on which the petitioner relies, and certify that the petition includes "all information and views on which the petition relies, and that it includes representative data and information known to the petitioner which are unfavorable to the petition." *21 C.F.R. § 10.30(a)*. Within 180 days of receiving the petition, the FDA must **[*9]** furnish a response to the petitioner either approving, denying, or providing a tentative response that indicates why the agency has been unable to reach a decision on the petition. [3] Id. *§ 10.30(e)(2)*.

C. Wellbutrin IR, Wellbutrin SR, and Wellbutrin XL

Buproprion hydrochloride, an active pharmaceutical ingredient for treating depression, was first approved by the FDA for the treatment of major depressive disorder in 1985 in an immediate release formulation known by its branded name, Wellbutrin IR. Wellbutrin IR provides for rapid release of the active ingredient and is taken three times a day. The FDA approved Wellbutrin IR on the basis of human clinical trials that demonstrated the safety and efficacy of buproprion **[*10]** hydrochloride and set the maximum recommended daily dose at 450 mg/day. Clinical data indicated an increase in seizure risk above that recommended daily dose. Biovail Stmt. ¶¶ 77-78; Pls.' Stmt. Resp. ¶¶ 77-78; GSK Stmt. ¶ 1; Pls.' Stmt. Resp. ¶ 1.

The next bupropion hydrochloride product to reach the market was the sustained release Wellbutrin SR, which is taken twice a day. Wellbutrin SR was approved on the basis of bioequivalence to Wellbutrin IR. The maximum recommended daily dose for Wellbutrin SR is also 450 mg/day. Biovail Stmt. ¶ 79; Pls.' Stmt. Resp. ¶ 79.

Biovail acquired the rights to two U.S. patents covering extended release formulations of bupropion hydrochloride: U.S. Patent No. 6,096,341 (the "'341 patent") and U.S. Patent No. 6,143,327 (the "'327 patent"). Both patents are set to expire on October 30, 2018. GSK Stmt. ¶ 3; Pls.' Stmt. Resp. ¶ 3.

Previous patents had covered bupropion hydrochloride tablets that contained "stabilizers," which are ingredients that prevent bupropion hydrochloride from degrading. Biovail Stmt. ¶ 1; Pls.' Stmt. Resp. ¶ 1. The '341 patent's summary of the invention, however, describes a controlled release tablet comprising:

> (i) a core comprising **[*11]** bupropion hydrochloride and conventional excipients, free of stabilizer; and

---

[3] In 2007, Congress amended the FDCA to provide that the FDA shall not delay approval of an ANDA on account of a pending citizen petition unless the FDA determines that "a delay is necessary to protect the public health." Food & Drug Administration Amendments Act of 2007, Pub. L. No. 110-85, § 914, 121 Stat. 823, 954 (2007) (codified as amended at *21 U.S.C. § 355(q)(1)(A)(ii)*). The 2007 amendments occurred after Biovail filed its citizen petition and are not applicable to this case.

(ii) a coating consisting essentially of a water-insoluble, water-permeable film-forming polymer, a plasticizer and a water-soluble polymer.

'341 Patent (BX 1) (emphasis added).

On October 26, 2001, Biovail and GSK entered into an agreement to develop a once-a-day extended release bupropion hydrochloride tablet that practiced the '341 patent. The extended release formulation, brand-named Wellbutrin XL, would be taken once a day and allow for the continuous and slow release of bupropion hydrochloride into the bloodstream over time. In August 2002, GSK filed an NDA for Wellbutrin XL and included the '341 and '327 patents for listing in the Orange Book. The FDA approved the NDA for Wellbutrin XL in August 2003 on the basis of bioequivalence to Wellbutrin IR and SR. Thereafter, GSK began to market the drug to great commercial success. As with Wellbutrin IR and SR, the recommended daily dose for Wellbutrin XL was 450 mg/day, although the adult target dose is 300 mg/day. Biovail Stmt. ¶¶ 2, 80; Pls.' Stmt. Resp. ¶¶ 2, 80; GSK Stmt. ¶ 7; Pls.' Stmt. Resp. ¶ 7.

D. *Noerr-Pennington* Immunity and the Sham Exception

HN6[] A party **[*12]** who petitions the government for redress is generally immune from antitrust liability. *Professional Real Estate Investors, Inc. v. Columbia Pictures Indus., Inc. ("PRE"), 508 U.S. 49, 56, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993)*; *Cheminor Drugs, Ltd. v. Ethyl Corp., 168 F.3d 119, 122 (3d Cir. 1999)*. Under what is known as the Noerr-Pennington doctrine, the *First Amendment* protects the right to petition all types of government entities, including the right to bring legitimate disputes to the courts for judicial resolution. *Eastern R.R. Presidents Conf. v. Noerr Motor Freight, Inc., 365 U.S. 127, 136, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*; *United Mine Workers of Am. v. Pennington, 381 U.S. 657, 670, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*; *California Motor Transp. Co. v. Trucking Unltd., 404 U.S. 508, 510, 92 S. Ct. 609, 30 L. Ed. 2d 642 (1972)*.

Noerr-Pennington immunity, however, is not absolute. It is subject to a "sham" exception for activities that are a "mere sham to cover . . . an attempt to interfere directly with the business relationships of a competitor." *PRE, 508 U.S. at 56* (citing *Noerr, 365 U.S. at 144*). The sham exception is applicable not only to lawsuits but also to administrative petitions. [4] *Cheminor Drugs, Ltd. v. Ethyl Corp., 168 F.3d 119, 123 (3d Cir. 1999)*; *In re: DDAVP Direct Purchaser Antitrust Litig., 585 F.3d 677, 686 (2d Cir. 2009)*. **[*13]** In *PRE*, the Supreme Court set forth a two-tiered definition of the sham exception. The first prong is concerned with the objective merit of the lawsuit or petition at issue, and the second focuses on the antitrust defendants' subjective intentions.

HN7[] Under the first prong of the test, the party invoking the sham exception, here the plaintiffs, must show that the defendants' conduct is "objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits." *PRE, 508 U.S. at 60*. Put another way, "[i]f an objective litigant could conclude that the suit is reasonably calculated to elicit a favorable outcome, the suit is immunized under Noerr, and an antitrust claim

[4] The Third Circuit has applied the sham exception to petitions to the Department of Commerce and the U.S. International Trade Commission. *Cheminor Drugs, Ltd. v. Ethyl Corp., 168 F.3d 119, 123 (3d Cir. 1999)*. However, it does not appear to have decided whether the sham exception applies to FDA citizen petitions.

Biovail does not dispute that the sham exception applies to its citizen petition. See Biovail Br. 47. The Court therefore does not address the argument considered and rejected by the court in In re Prograf Antitrust Litigation that the sham exception to Noerr-Pennington immunity is unavailable in the FDA citizen petition context. See *In re Prograf Antitrust Litig., No. 11-md-2242, 2012 U.S. Dist. LEXIS 12053, 2012 WL 293850, at *5 (D. Mass. Feb. 1, 2012)*. In that case, the antitrust defendant cited Kottle v. Nw. Kidney Centers for the proposition that the sham exception does not apply because the FDA resembles a political entity more than a judicial body. See *Kottle v. Nw. Kidney Ctrs., 146 F.3d 1056, 1062 (9th Cir. 1998)* **[*14]** ("Only when administrative officials must follow rules is it meaningful to ask whether a petition before an agency was 'objectively baseless' . . . ."). The Prograf court rejected the application of *Kottle. 2012 U.S. Dist. LEXIS 12053, 2012 WL 293850, at *5*; see also *In re Flonase Antitrust Litig., 795 F. Supp. 2d 300, 310 n.11 (E.D. Pa. 2011)*.

premised on the sham exception must fail." Id. The existence of probable cause to institute proceedings is an absolute defense to antitrust liability. [5] *Cheminor Drugs, 168 F.3d at 122* (citing *PRE, 508 U.S. at 62-63*).

Loss on the merits of the underlying proceeding, although instructive, is not determinative on the issue of objective baselessness. See *PRE, 508 U.S. at 65* (holding that a copyright action in which the party lost on summary judgment was not sham litigation); *FilmTec Corp. v. Hydranautics, 67 F.3d 931, 937 (Fed. Cir. 1995)*. The PRE Court specifically warned courts to "resist the understandable temptation to engage in post hoc reasoning by concluding that an ultimately unsuccessful action must have been unreasonable or without foundation." *508 U.S. at 61 n.5* (internal citations and quotation marks omitted). Where there is no dispute over the predicate facts **[*16]** of the underlying legal proceeding, a court may decide probable cause as a matter of law. *PRE, 508 U.S. at 63*.

HN8[] Only if an action is objectively baseless may a court proceed to the second prong of the sham exception definition. Under the subjective second prong, a court should examine whether the baseless suit or petition "conceals an attempt to interfere directly with the business relationships of a competitor through the use of the governmental process - as opposed to the outcome of that process - as an anticompetitive weapon." *PRE, 508 U.S. at 61* (internal quotation marks and citations omitted).

E. Standard of Proof as to Objective Baselessness

The parties dispute whether the plaintiffs must establish objective baselessness using a preponderance of the evidence standard or a clear and convincing evidence standard. The Court of Appeals for the Federal Circuit has not published a decision that explicitly sets forth the standard of proof for showing that a lawsuit or petition was objectively baseless in the sham exception context. [6]

In C.R. Bard, Inc. v. M3 Sys., Inc., the Federal Circuit cited with approval Handgards, a Ninth Circuit case that required clear and convincing evidence of bad faith to invoke the sham exception. *157 F.3d 1340, 1368-69 (Fed. Cir. 1998)* (citing *Handgards, Inc. v. Ethicon, Inc., 743 F.2d 1282 (9th Cir. 1984))*.ca However, Handgards predates PRE's division of the sham exception inquiry into objective and subjective prongs, and C.R. Bard did not explicitly adopt the clear and convincing evidence standard for the objective baselessness prong. The only Federal Circuit decision to do so in the Noerr-Pennington context is unpublished. *Mitek Surgical Prods., Inc. v. Arthrex, Inc., 230 F.3d 1383 (Fed. Cir. 2000)* (unpublished table disposition).

Nevertheless, the Federal Circuit has imposed a clear and convincing evidence standard in other contexts where the parties must establish objective baselessness **[*18]** under PRE. See, e.g., *800 Adept, Inc. v. Murex Sec. Ltd., 539 F.3d 1354, 1370 (Fed. Cir. 2008)*; *Dominant Semiconductors Sdn. Bhd. v. OSRAM GmbH, 524 F.3d 1254, 1263-64 (Fed. Cir. 2008)*. The issue in those cases was whether state tort claims against patent holders were preempted by federal patent law. Preemption turned on whether the patent holder acted in "bad faith" in the publication or enforcement of its patent. Part of the bad faith analysis required clear and convincing evidence that the patent holder's infringement allegations were objectively baseless, as defined in PRE. *Murex, 539 F.3d at 1369-70*.

---

[5] The Supreme Court compared the notion of probable cause here to the same notion in the common law tort of wrongful civil proceedings, frequently called "malicious prosecution." *PRE, 508 U.S. at 62, 62 n.7*. **[*15]** In PRE, the Court also cited the standard from *Federal Rule of Civil Procedure 11* in finding that the defendant's copyright action was "warranted by existing law" or, at the very least, "based on an objectively good faith argument for the extension, modification, or reversal of existing law." *Id. at 65*. Justice Souter's concurrence cautioned, however, against "transplanting every substantive nuance and procedural quirk of the common-law tort of wrongful civil proceedings into federal ***antitrust law***." *Id. at 67* (Souter J., concurring).

[6] "Whether conduct in procuring or enforcing a patent is sufficient to strip a patentee of its immunity from the antitrust laws is to be decided as a question **[*17]** of Federal Circuit law." *Nobelpharma AB v. Implant Innovations, Inc., 141 F.3d 1059, 1068 (Fed. Cir. 1998)*; see also *Honeywell Int'l Inc. v. Univ. Avionics Sys. Corp., 488 F.3d 982, 1000-01 (Fed. Cir. 2007)*; *In re Wellbutrin SR Antitrust Litig., No. 05-396, 2006 U.S. Dist. LEXIS 9687, 2006 WL 616292, at *11 (E.D. Pa. Mar. 9, 2006)*.

The Federal Circuit has not clarified in a published decision whether the clear and convincing evidence standard required to show objective baselessness in preemption cases also applies in the sham exception context. However, both the unpublished Mitek table disposition and other district court decisions suggest that a clear and convincing evidence standard of proof may be appropriate. [7] See *Teva Pharms. USA, Inc. v. Abbott Labs., 580 F. Supp. 2d 345, 362 (D. Del. 2008)* (requiring clear and convincing evidence of objective baselessness); *In re Relafen Antitrust Litig., 346 F. Supp. 2d 349, 360 (D. Mass. 2004)* **[*19]** (same). Nevertheless, the Court need not decide in this case whether a clear and convincing evidence or a preponderance of the evidence standard is the proper standard in the context of a sham exception claim because the Court's decision on summary judgment would be the same under either standard.

II. Overview

Between September 2004 and May 2005, four different generic companies - Anchen, Abrika, Impax, and Watson - filed ANDAs with the FDA, each seeking approval of a generic version of Wellbutrin XL. In each case, Biovail filed a lawsuit against the generic company, claiming infringement of the '341 patent. [8] With respect to most of the generic products, the lawsuits were filed within 45 days of receiving the generic companies' paragraph IV notices, thus triggering the 30-month statutory stay on ANDA approval. GSK joined Biovail in the lawsuits against Anchen and Abrika, but later withdrew. Biovail Stmt. ¶ 2; Pls.' Stmt. Resp. ¶ 2; GSK Stmt. ¶ 9; Pls.' Stmt. Resp. ¶ 9.

On December **[*21]** 20, 2005, Biovail filed a citizen petition (the "Citizen Petition") with the FDA. GSK did not join the filing. The FDA issued its final response granting in part and denying in part Biovail's Citizen Petition on December 14, 2006, the same day that it approved Anchen's ANDA. Citizen Petition (BX 96); FDA Final Resp. (BX 108); Anchen Approval Ltr. (GX 42). Shortly thereafter, the defendants reached a series of agreements with Anchen, Impax, Watson, and another generic pharmaceutical company, Teva Pharmaceuticals, that settled or otherwise disposed of the Anchen, Impax, and Watson patent infringement lawsuits and set a schedule for generic entry. Biovail also separately settled the Abrika lawsuit.

The plaintiffs allege that the defendants' lawsuits and the Citizen Petition constituted an illegal conspiracy to delay entry of generic versions of Wellbutrin XL in violation of the Sherman Antitrust Act. The defendants contend that their conduct is immune from antitrust liability under the Noerr-Pennington **[*22]** doctrine. The plaintiffs also contend that the agreements disposing of some of the lawsuits independently violated the antitrust laws, even if the lawsuits themselves were not sham litigation.

The Court will grant the defendants' motions for summary judgment as to the four patent infringement lawsuits and the Citizen Petition because they do not fall within the sham exception to *Noerr-Pennington* immunity. The Court does not decide today whether the settlement agreements independently violated the antitrust laws, as that issue is still being briefed. The Court will omit the settlement agreements from the recitation of facts and discussion of law below.

III. Biovail's Conduct

---

[7] The plaintiffs argue that the proper burden of proof is the preponderance of the evidence standard for civil cases, but cite only one case, which predates PRE, in support of this proposition. See *Litton Sys., Inc. v. Am. Tel. & Tel. Co., 700 F.2d 785, 813 (2d Cir. 1983)* ("We see no reason to impose any higher burden of proof on the antitrust plaintiff asserting sham than would ordinarily be applicable in any civil issue."). To the extent that non-Federal Circuit law from before PRE is relevant, the Court notes that case law from other circuits adopted a clear and convincing evidence standard. See *Handgards, Inc. v. Ethicon, Inc., 743 F.2d 1282, 1288 (9th Cir. 1984)* (requiring clear and convincing evidence of bad faith prosecution of patent suit); *MCI Commc'ns. Corp. v. Am. Tel. & Tel. Co., 708 F.2d 1081, 1155 (7th Cir. 1983)* (approving jury instructions that emphasized the clear and convincing **[*20]** evidence standard, on account of the *First Amendment* concerns at issue).

[8] The Orange Book also listed the '327 patent as covering Wellbutrin XL. Infringement of the '327 patent was asserted in the Anchen, Abrika, and Watson lawsuits, but claims relating to the '327 patent were eventually dropped from each of the cases. See BX 12 (Anchen); BX 13 (Abrika); BX 14 (Watson). The Court does not understand the plaintiffs to be challenging conduct relating to the '327 patent as a violation of the antitrust laws.

A. The *Anchen* Lawsuit

1. Facts as to *Anchen*

On September 21, 2004, Anchen Pharmaceuticals, Inc. filed an ANDA with the FDA, seeking permission to sell a generic version of Wellbutrin XL. Anchen provided Biovail and GSK with its paragraph IV notice by cover letter dated November 12, 2004, claiming that its product did not infringe the '341 patent. Anchen's paragraph IV notice claimed non-infringement because its "tablet core contains a stabilizing amount of hydrochloric acid" and hence was not "free of stabilizer," the **[*23]** term used in the '341 patent. Anchen also provided selected portions of its ANDA to Biovail and GSK. Biovail Stmt. ¶¶ 3-5; Pls.' Stmt. Resp. ¶¶ 3-5.

Anchen's ANDA did not quantify the amount of hydrochloric acid in its product on a per unit basis. The ANDA described a product that used hydrochloric acid as a "stabilizing agent" in the manufacturing process, but stated that the acid was "evaporated during processing" and indicated a "-" under the column designated "MG PER TABLET." Similarly, the percentage of hydrochloric acid was listed as "-" and ingredients other than hydrochloric acid were shown in the ANDA to add up to 100.0% of the finished product. See Biovail Br. Exs. A, B. A list in the ANDA that compared the Anchen product to Wellbutrin XL did not include hydrochloric acid as an ingredient in Anchen's product. Biovail Br. Ex. C.

On November 16, 2004, four days after Anchen sent its paragraph IV notice, Stan Hull, senior vice president of GSK, emailed Carol Chapuis, a Biovail vice president, proclaiming the "need to get aligned on our main messages and position" regarding the ANDA. Ms. Chapuis's response referenced a Joint Steering Committee meeting to expand on the topics that **[*24]** Mr. Hull mentioned. PX 380.

Shortly after receiving Anchen's paragraph IV notice, Biovail and GSK reached a Common Interest Agreement with respect to their common legal interest in potential infringement of the '341 and '327 patents by Anchen or filers of additional ANDAs and paragraph IV notices, and regarding any litigation in response thereto. The Common Interest Agreement related to the paragraph IV certifications of Anchen, Abrika, and Impax, and to the Anchen and Abrika lawsuits. Stip. of Parties Concerning Defs.' Common Interest Claims ¶ 1 (ECF No. 363/ECF No. 347).

On December 21, 2004, within 45 days of receiving Anchen's paragraph IV notice, Biovail and GSK jointly initiated a patent infringement action against Anchen in the Central District of California. The lawsuit triggered the 30-month statutory stay under Hatch-Waxman. The case was assigned to the Honorable James V. Selna. Anchen answered the complaint, denying infringement and asserting counterclaims for non-infringement and invalidity. Biovail Stmt. ¶¶ 8-9; Pls.' Stmt. Resp. ¶¶ 8-9; Anchen Compl. (BX 2). After GSK moved to withdraw as a plaintiff, the Anchen court approved the parties' stipulation of GSK's withdrawal **[*25]** from the suit on April 25, 2005. Biovail continued the lawsuit following GSK's withdrawal. GSK Stmt. ¶¶ 43, 44; Pls.' Stmt. Resp. ¶¶ 43, 44.

During the claim construction portion of the litigation, Biovail argued that in the '341 patent, the term "free of stabilizer" should be construed to mean that "the core lacks an effective stabilizing amount of an organic or inorganic acid capable of inhibiting the degradation of bupropion hydrochloride . . . ." Biovail Prelim. Cl. Constr. Br. 9 (BX 17). By contrast, Anchen argued that the term "free of stabilizer" should mean "not united with, attached to, combined with, or mixed with . . . any substance or agent that tends to prevent changes to the chemical or physical integrity of the tablet, or enhances the ability of the tablet to maintain protection against microbiological contamination." Anchen Opening Cl. Constr. Br. 11-12 (BX 18).

On February 8, 2006, Judge Selna issued a Claim Construction Order finding that "free of stabilizer" meant that "the core is free of any substance or agent that tends to prevent changes to the chemical integrity of the tablet." Am. Order on Cl. Constr. Hr'g 5 (PX 182). See also Order Clarifying Court's Cl. Constr. **[*26]** 2 (BX 19). Regarding Biovail's claim construction argument, Judge Selna's order stated:

> Biovail's proposed definition of "stabilizer" is not found anywhere in the '341 patent, and actually contradicts the summary of the invention.

Am. Order on Cl. Constr. Hr'g 9 (PX 182).

Following Judge Selna's ruling on claim construction, the parties filed cross-motions for summary judgment. Judge Selna issued a tentative minute order denying Anchen's motion, finding a genuine issue of material fact regarding whether Anchen's ANDA directly addressed the infringement inquiry. Biovail Stmt. ¶¶ 19, 21; Pls.' Stmt. Resp. ¶¶ 19, 21; Tentative Summ. J. Order (BX 34).

However, after oral argument, Judge Selna granted Anchen's motion for summary judgment on August 1, 2006. Judge Selna denied Biovail's motion for reconsideration, then entered judgment on August 25, 2006. Biovail appealed to the Federal Circuit, challenging both the claim construction and summary judgment orders. Biovail Stmt. ¶¶ 22-24; Pls.' Stmt. Resp. ¶¶ 22-24; PX 216.

Following full briefing and after holding oral argument on September 5, 2007, the Federal Circuit granted Biovail's motion to withdraw its appeal on June 11, 2008. Order Granting **[*27]** Mot. to Withdraw (BX 38).

2. Analysis as to *Anchen*

The Anchen lawsuit centered around the term "free of stabilizer," which appears in each claim in the '341 patent. See '341 Patent (BX 1). Anchen argued for a plain reading of the term and contended that its generic product did not infringe the '341 patent because it contains hydrochloric acid, a commonly used stabilizer. Biovail argued on claim construction that "stabilizer" should be construed to have a functional component. Separately, Biovail argued that Anchen's ANDA described and sought approval to market a product that did not contain a stabilizer, and that Biovail was entitled to rely on the representations in the ANDA. The Court finds that the plaintiffs have not met their burden of showing that the Anchen lawsuit was objectively baseless.

a. Claim Construction

On the claim construction question, Biovail put forth a colorable argument in the underlying proceeding that "stabilizer" should have been construed as a functional term - something that actually stabilizes the tablet. First, as a matter of plain meaning, the Court does not find Biovail's argument that a stabilizer ordinarily means something that actually provides stability **[*28]** to be unreasonable. Second, the Manual of Patent Examining Procedure provides for the patentability of functional limitations, which it defines as "an attempt to define something by what it does, rather than by what it is." MPEP § 2173.05(g) (BX 117). Various courts, including the Federal Circuit, have read patent terms containing the suffix "-er" to contain a functional limitation. For example, in Kim v. ConAgra Foods, Inc., the Federal Circuit interpreted "potassium bromate replacer" as a composition that actually replaces, or performs the same function as potassium bromate. *465 F.3d 1312, 1318 (Fed. Cir. 2006)*. See also, e.g., Allergan, Inc. v. Watson Labs., Inc., No. 09-511 (D. Del. Dec. 8, 2010), Cl. Constr. Order 3 n.10 (BX 118) (interpreting "release controlling polymer" to mean that the polymer must actually function to control the rate of release); *Profile Prods. LLC v. Encap, LLC, No. 09-92, 2009 U.S. Dist. LEXIS 60282, at *11 (W.D. Wis. July 15, 2009)* (requiring a "binder" to "actually bind" as opposed to merely having the ability to bind). Thus, the '341 patent attempted to distinguish itself from two prior patents because those earlier formulations "require[d] a stabilizer **[*29]** to achieve sufficient stability," whereas the '341 patent did not. '341 Patent col. 1 ll. 22-24 (BX 1) (emphasis added).

Based on the above, the Court cannot say that it was objectively baseless to argue on claim construction that a stabilizer must actually function to stabilize the tablet as opposed to merely having the ability to stabilize. The Anchen court (and, later, the Abrika and Impax courts) eventually rejected Biovail's proposed claim construction. The court instead construed "free of stabilizer" to mean that "the core is free of any substance or agent that tends to prevent changes to the chemical integrity of the tablet." Am. Order on Cl. Constr. Hr'g 5 (BX 182). However, although the outcome is instructive, the Court does not find it determinative in this case. See *PRE, 508 U.S. at 65*.

b. Anchen's ANDA

More importantly, Biovail had a colorable legal argument that (1) Biovail was entitled to rely on the representations in the ANDA when initiating suit, and that (2) Anchen had an obligation under FDA regulations and guidance to quantify even residual amounts of HCl if the ingredient tended to stabilize the final tablet.

HN9[] An infringement inquiry triggered by an ANDA filing is focused **[*30]** on the product that is likely to be sold following FDA approval. Because the potentially infringing drug has not yet been marketed when the patent holder files suit, [9] the inquiry is a hypothetical one that asks the fact finder to determine whether the drug that will be sold upon approval of the ANDA will infringe the asserted patent. *Bayer AG v. Elan Pharm. Research Corp., 212 F.3d 1241, 1248-49 (Fed. Cir. 2000)*. Thus, "[b]ecause drug manufacturers are bound by strict statutory provisions to sell only those products that comport with the ANDA's description of the drug, an ANDA specification defining a proposed generic drug in a manner that directly addresses the issue of infringement will control the infringement inquiry." *Abbott Labs. v. TorPharm, Inc., 300 F.3d 1367, 1373 (Fed. Cir. 2002)*; see also *Glaxo, Inc. v. Novopharm, Ltd., 110 F.3d 1562, 1569 (Fed. Cir. 1997)* (inquiry is "properly grounded in the ANDA application and the extensive materials typically submitted in its support"). In Anchen, whether the ANDA directly addressed the issue of infringement turned on whether Anchen was required to quantify hydrochloric acid in its ANDA.

HN11[] FDA regulations require ANDA applicants to include a list of all components used in the manufacture of the drug product, regardless of whether they appear in the drug product, as well as a statement of the composition of the drug product. *21 C.F.R. § 314.50*. ANDA applicants must also "identify and characterize the inactive ingredients in the proposed drug product." Id. *§ 314.94(a)(9)(ii)*. In 2003, the FDA issued a "Guidance for Industry" that states:

> The function (i.e., role) of each component in the formulation should be stated. Components that are used in the manufacture of the drug product and do not appear in the finished drug product except at residual levels (e.g., some solvents) should be identified as processing agents.
>
> The target amount of each component by definite weight or other measure should be provided on a per unit basis.

2003 FDA Guidance 8 (BX 25). Thus, in its pre-NDA submission to the FDA, the brand manufacturers of the original Wellbutrin IR had quantified a target amount **[*32]** per tablet of 0.5 mg of hydrochloric acid in the 50 mg formulation and 1.0 mg in the 100 mg formulation of Wellbutrin IR. BX 132 at GSKWXL0054379-80. Similarly, the NDA submitted for Wellbutrin SR indicated a target amount per tablet of 16.20 mg of cysteine hydrochloride, a different kind of acid stabilizer. BX 131 at GSKWXL0072506.

The instruction to quantify the target amount of each component does not apply, however, to "processing agents." 2003 FDA Guidance 9 (BX 25). The FDA guidance does not clearly define "processing agent." Biovail presented expert testimony that processing agents are components that appear in the finished tablet only at residual levels and have no function to perform in the finished tablet. See Fleischer WBXL Rpt. ¶ 14 (BX 24); Lin Rpt. ¶¶ 11, 17 (BX 27). The plaintiffs do not expressly set forth their own definition of "processing agent" or explain why hydrochloric acid is a processing agent. However, citing expert testimony from both sides, the plaintiffs argue that the FDA only wants to know whether a drug is stable, and that the FDA does not require stabilizing agents present in such small trace amounts to be quantified. Kaplan Dep. 48-49 (PX 147) ("FDA **[*33]** policy is such that if the ingredient is not more than one percent it need not be quantified."); Lin Dep. 67-68 (PX 148).

The Court need not decide in this case whether the FDA rules, regulations, and the 2003 guidance required Anchen to quantify the amount of hydrochloric acid on a per unit basis -only whether it was objectively baseless to argue that they did. Notwithstanding the expert testimony cited by the plaintiffs regarding FDA policy, the text of the 2003 guidance itself is not inconsistent with Dr. Fleischer's and Biovail's definition of a processing agent. 2003 FDA Guidance 8 (BX 25). The guidance states that "[t]he function . . . of each component in the formulation should be stated," but qualifies that "[c]omponents that are used in the manufacture of the drug product and do not appear in the finished drug product except at residual levels . . . should be identified as processing agents." Id. One plausible reading of this language is that processing agents have no function to perform in the final tablet, because if they did, the function would need to be stated. Therefore, it was not objectively baseless to contend that if hydrochloric acid

[9] ***HN10***[] The infringement provision of the Hatch-Waxman **[*31]** Act, *35 U.S.C. § 271(e)(2)(A)*, states that it is an act of infringement to submit an ANDA that describes a drug claimed in a patent. Thus, the patent holder may sue before the product goes to market.

tended to stabilize the chemical **[*34]** integrity of the final product, it was not a "processing agent" and, thus, needed to be quantified on a per unit basis. [10]

Anchen's ANDA, as set forth in the facts, did not quantify hydrochloric acid on a per unit basis. The plaintiffs point out that it is industry convention to use a symbol such as "-" or "**" to signify that a component remains in the final pharmaceutical product in a residual, non-zero, but **[*35]** non-numerically quantified amount. Pls.' Br. 46-47. But industry convention would be inapposite if a court sided with Biovail on its argument that Anchen was required to numerically quantify any hydrochloric acid in the product.

Thus, Biovail had at least a colorable legal argument in Anchen that under Abbott Laboratories and the applicable FDA regulations and policy, Anchen's ANDA controlled the infringement inquiry and suggested that the Anchen product was not "free of stabilizer," as ultimately defined by Judge Selna on claim construction. The Court finds that Anchen does not fit the profile of objectively baseless sham litigation.

B. The *Watson* Lawsuit

1. Facts as to *Watson*

Watson Pharmaceuticals filed an ANDA with the FDA on May 19, 2005, seeking permission to sell a generic version of the 150 mg Wellbutrin XL. Watson later requested permission for the 300 mg Wellbutrin XL as well. Watson provided its paragraph IV notices to Biovail and GSK on July 21, 2005 and July 27, 2005, claiming non-infringement. As with Anchen, Watson claimed that its generic product "will contain a stabilizer, namely hydrochloric acid." Biovail Stmt. ¶¶ 72-73; Pls.' Stmt. Resp. ¶¶ 72-73.

Watson's ANDA, like **[*36]** Anchen's, did not quantify the amount of hydrochloric acid in its product on a per unit basis. Although diluted hydrochloric acid is identified as a "stabilizer," the ANDA indicated a "-" under the column designated "AMOUNT PER TABLET." The composition statement in the ANDA indicated that "[w]ater is removed during processing." Similarly, the percentage of hydrochloric acid was listed as "-" and ingredients other than hydrochloric acid were shown in the ANDA to add up to 100.0% of the finished product. A list in the ANDA that compared the generic product to Wellbutrin XL did not include hydrochloric acid as an ingredient in Watson's product. BX 88. Biovail's counsel signed an offer of confidential access with Watson for access to certain portions of Watson's ANDA. PX 320.

On September 6, 2005, Biovail filed a patent infringement suit against Watson in the Southern District of New York. The Honorable Kenneth M. Karas was assigned to the case. On February 26, 2007, while discovery was ongoing, and before reaching the claim construction stage, the Watson lawsuit settled. Biovail Stmt. ¶¶ 74, 76; Pls.' Stmt. Resp. ¶¶ 74, 76.

2. Analysis as to *Watson*

The Watson case, like Anchen, centered **[*37]** around the issue of whether Watson's generic product was "free of stabilizer," according to Watson's representations in the ANDA. Watson and Biovail made the same legal arguments in Watson as Anchen and Biovail did in Anchen. Because the Court finds that the plaintiffs have not met their burden of showing objective baselessness as to Anchen, the Court concludes that the plaintiffs have also not met their burden with respect to Watson.

C. The *Abrika*Lawsuit

1. Facts as to *Abrika*

---

[10] The Court notes that although Judge Selna later changed his mind, his minute order on summary judgment had tentatively found a genuine issue as to what the FDA's ANDA requirements were as to Anchen. Tentative Summ. J. Order 13-17 (BX 34).

Similarly, although the Court of Appeals did not have the opportunity to opine on the Anchen case, the panel at oral argument repeatedly asked Anchen's counsel questions about whether the FDA required hydrochloric acid to be listed and quantified if it tended to stabilize the product. See, e.g., Biovail Reply Ex. D at 16-17.

On September 23, 2004, Abrika Pharmaceuticals, LLLP filed an ANDA with the FDA, seeking permission to sell a generic version of the 150 mg formulation of Wellbutrin XL. On October 1, 2004, Abrika amended its ANDA to seek permission for the 300 mg formulation of Wellbutrin XL as well. Abrika sent its paragraph IV certification to Biovail and GSK on November 12, 2004. The paragraph IV certification informed the defendants that Abrika's product exhibited a different dissolution profile from the one claimed in the '341 patent when tested in 0.1N HCl. Biovail Stmt. ¶¶ 53-55; Pls.' Stmt. Resp. ¶¶ 53-55; Abrika Para. IV Notice 2 (PX 232).

Prior to filing suit, Biovail requested but did not receive access to Abrika's ANDA. **[*38]** On December 21, 2004, Biovail and GSK filed a patent infringement action against Abrika in the Southern District of Florida. The Honorable Cecilia M. Altonaga was assigned to the case. Biovail Stmt. ¶ 56; Pls.' Stmt. Resp. ¶ 56. As in Anchen, GSK later moved to withdraw as a plaintiff in Abrika, which motion the court approved on April 20, 2005. Biovail continued to litigate the case following GSK's withdrawal. GSK Stmt. ¶¶ 28, 31; Pls.' Stmt. Resp. ¶¶ 28, 31.

Abrika's main claim of non-infringement was that its product did not meet the specified dissolution profile in the '341 patent. A dissolution profile is derived from a dissolution test, which involves adding the drug product to a water-based dissolution medium. The dissolution profile will vary depending on the medium and test selected. Because Abrika's product contains what is called an "enteric" coating, it does not dissolve in acidic mediums such as hydrochloric acid (abbreviated as "HCl"). Abrika's product is designed not to dissolve in the acidic stomach, but in the more neutral environment of the small intestine. Biovail Stmt. ¶¶ 58-59, 61; Pls.' Stmt. Resp. ¶¶ 58-59, 61. The claim language in the '341 patent relating to **[*39]** the dissolution profile did not specify or reference the test conditions used to obtain the covered profile.

On claim construction, Abrika argued that the relevant dissolution medium to use for dissolution profile testing was 0.1N HCl (in which its enteric-coated product does not dissolve) because that medium was the only one mentioned in the patent examples. Thus, Abrika's paragraph IV certifications only provided dissolution profile results obtained using the 0.1N HCl medium. Biovail Stmt. ¶ 62; Pls.' Stmt. Resp. ¶ 62; BX 64; BX 65.

Biovail argued, however, that a proper dissolution medium to use for testing should mimic what occurs in the human body. Thus, Biovail contended, enteric-coated products such as Abrika's drug should be tested under procedures specified in the United States Pharmacopeia ("USP"), a compendium that describes industry standard methods for the testing of pharmaceutical products. The USP's dissolution test for enteric-coated products is called the "pH switch test." BX 76 at 1791. It is undisputed that Abrika provided testing to the FDA that showed that its product fell within the dissolution profile of the '341 patent if tested using the USP's pH switch test. **[*40]** Biovail Stmt. ¶¶ 62-63, 66, 68; Pls.' Stmt. Resp. ¶¶ 62-63, 66, 68; Kaplan Dep. 148 (PX 147).

The proper medium for dissolution profile testing was not a disputed issue in either the Anchen or Impax litigation. Anchen and Impax argued in those suits that the "dissolution profile" claim limitation was indefinite. Both the Anchen and Impax courts adopted Biovail's proposed USP-based construction of the term "dissolution profile." Biovail Stmt. ¶ 64; Anchen Cl. Constr. Order 14 (BX 114); Impax Cl. Constr. Order 34 (BX 53).

Judge Altonaga disagreed with those courts and adopted Abrika's proposed construction of the term "dissolution profile." Abrika Cl. Constr. Order 15-16 (BX 79). Judge Altonaga found that Abrika's construction "better reflects the disclosures in the specification and more closely conforms to the patentee's own expressed description of his invention." Id. at 26. Regarding Biovail's proposed construction, Judge Altonaga wrote:

> Given the clear guidance of the specification and prosecution history, it is evident that Biovail's construction of the disputed "dissolution profile" limitation is impermissibly broad. Biovail's broad construction of the disputed term finds no support **[*41]** in the intrinsic record.

Id. at 25. In addition, as in Anchen and Impax, Judge Altonaga sided with the generic company on the "free of stabilizer" issue. Id. at 28-29.

The parties settled the Abrika lawsuit in July 2007, prior to any other court decisions in the case, including summary judgment. Biovail Stmt. ¶ 69; Pls.' Stmt. Resp. ¶ 69.

2. Analysis as to *Abrika*

The defendants make two separate arguments as to why they are entitled to summary judgment as to the Abrika litigation. First, they contend that the suit was not objectively baseless. Second, they argue that the filing of the suit had no impact on the date when Abrika entered the market. Whether the Abrika suit was objectively baseless is a close question, but it is one that the Court need not decide in this case because this suit did not cause the delay in the entry of the Abrika generic product to the market.

a. Objective Baselessness

The issue in the Abrika litigation was whether Abrika's generic product met the dissolution profile in the '341 patent, which answer turned on the claim construction question of what dissolution medium should be used to obtain the dissolution profile. Abrika maintained that testing should be conducted **[*42]** in an acidic medium (0.1N HCl), as set forth in examples in the patent specification and according to prosecution history. Biovail and GSK contended that the USP-based pH switch test applied since Abrika's product was enteric-coated. The Court declines to find at this juncture that the defendants' position on claim construction was objectively baseless.

The defendants argue as a preliminary matter that in the Hatch-Waxman context, they had a reasonable basis to institute suit against Abrika because Abrika did not provide pre-filing access to its ANDA. Biovail Br. 41 (citing *Hoffmann La Roche, Inc. v. Invamed Inc., 213 F.3d 1359 (Fed. Cir. 2000))*. They contend that they had to sue to confirm that Abrika's product had an enteric coating and that the product infringed the '341 patent if tested using the pH switch test. This argument only holds weight, however, if this Court agrees that the defendants could reasonably expect success on the merits of their claim construction argument as to the term "dissolution profile." The Court therefore considers whether dissolution testing in a 0.1N HCl medium is the only reasonable construction of "dissolution profile."

HN12[] It is a "bedrock principle of patent **[*43]** law that the claims of a patent define the invention to which the patentee is entitled the right to exclude." *Phillips v. AWH Corp., 415 F.3d 1303, 1312 (Fed. Cir. 2005)* (en banc) (internal quotation marks and citation omitted). It is also well-settled that in interpreting an asserted claim, courts look first to intrinsic evidence - e.g., the patent itself, including the language of the claims, the specification, and the prosecution history. *Vitronics Corp. v. Conceptronic, Inc., 90 F.3d 1576, 1582 (Fed. Cir. 1996)*. There is a heavy presumption that claim terms mean what they say and have the ordinary meaning that would be attributed to those words by persons skilled in the relevant art. *Resonate Inc. v. Alteon Websys., Inc., 338 F.3d 1360, 1364 (Fed. Cir. 2003)*. "When intrinsic evidence unambiguously describes the scope of a patented invention, reliance on extrinsic evidence is improper." *Biovail Corp. Int'l v. Andrx Pharms., Inc., 239 F.3d 1297, 1300 (Fed. Cir. 2001)*; see also *J.T. Eaton & Co., Inc. v. Atl. Paste & Glue Co., 106 F.3d 1563, 1570 (Fed. Cir. 1997)* ("[T]rial testimony regarding the meaning of a claim cannot vary the meaning of a claim that is established either by the claim **[*44]** itself or by the claim as correctly understood by reference to the specification and the file history."). Nevertheless, extrinsic evidence such as expert testimony can help the court determine what a person of ordinary skill in the art would understand claim terms to mean. *Phillips, 415 F.3d at 1319*.

In Abrika, the claims in the '341 patent in which the dissolution profile limitations appear do not specify the appropriate testing conditions. See, e.g., '341 Patent cl. 1 (BX 1). The examples in the patent specification all either state that the dissolution profile was obtained using the hydrochloric acid medium, or reference the example that did. However, none of the examples specifically concern an enteric-coated product. See, e.g., id., col. 5 ll. 12-13, col. 8 l. 14. As the Abrika court recognized, the construction of the "dissolution profile" claim limitation thus required walking the "fine line between reading a claim in light of the specification, and reading a limitation into the claim from the specification." Abrika Cl. Constr. Order 14 (BX 79) (citing *Phillips, 415 F.3d at 1323*). The claim construction analysis also implicated the principle that

> ***HN13***[] When a claim term has an accepted **[*45]** scientific meaning, that meaning is generally not subject to restriction to the specific examples in the specification. It is established that as a general rule claims of a patent are not limited to the preferred embodiment . . . or to the examples listed within the patent specification.

Glaxo Wellcome Inc. v. Andrx Pharms., Inc., 344 F.3d 1226, 1233 (Fed. Cir. 2003).

The plaintiffs here rely chiefly on two cases in which the Court of Appeals for the Federal Circuit evaluated claim language that covered a particular test result but was silent on the appropriate testing methodology. In each case, the Federal Circuit examined intrinsic evidence to determine what methodology to use to obtain the claimed test result. In Genentech, the disputed claim term was a numerical figure, "500,000 IU/mg," which measurement varied depending on the assay used for measurement. *Genentech, Inc. v. Wellcome Found. Ltd., 29 F.3d 1555 (Fed. Cir. 1994)*. As here, the claim language itself was silent on the appropriate assay for measurement. The Genentech court looked at intrinsic evidence - specifically, the patent's prosecution history, which revealed that the 500,000 figure was obtained using a "bovine fibrin **[*46]** plate assay." *Id. at 1562-63*.

Similarly, in J.T. Eaton, the disputed claim limitation surrounded an adhesive that had to withstand "plastic flow temperature above 120 degrees < F." *J.T. Eaton & Co. v. Atl. Paste & Glue Co., 106 F.3d 1563, 1565 (Fed. Cir. 1997)*. The expert witnesses disagreed over the length of time the product needed to be tested at 120 degree heat. In its analysis, the Federal Circuit looked to the patent's prosecution history rather than to conflicting expert testimony to find the testing conditions that were used during the patent reexamination process. *Id. at 1570*. In doing so, the court stated: "trial testimony regarding the meaning of a claim cannot vary the meaning of a claim that is established either by the claim itself or by the claim as correctly understood by reference to the specification and the file history." Id.

In the instant case, two forms of intrinsic evidence support the contention that the '341 patent only claimed the dissolution profile as tested in a hydrochloric acid medium. First, as noted above, the examples in the specification all recite 0.1N HCl testing conditions. [11] Second, the patent prosecution history reveals that the patentee explained **[*47]** to the patent office that unlike prior art, which was "silent on the dissolution medium and conditions that are used," "[t]he dissolution medium and conditions that are used in the invention is . . . disclosed in example 1, page 8. (It corresponds to gastric juice.)" '341 Patent File History, Amendment 6 (Aug. 11, 1999) (PX 7).

Nevertheless, the defendants have a colorable legal argument that *Genentech* and *J.T. Eaton* are distinguishable, and that plain meaning supports their claim construction. In those cases, the dispositive claim limitation was a "term unknown to those of ordinary skill in the art at the time the patent application was filed." *J.T. Eaton, 106 F.3d at 1570*. By contrast, here, the defendants have pointed to non-conflicting expert testimony that persons skilled in the art would know to consult the USP to determine the proper dissolution medium. As noted above, the Federal Circuit has instructed that extrinsic evidence can help the court determine what a person of ordinary skill in the **[*48]** art would understand claim terms to mean. *Phillips, 415 F.3d at 1319*.

Glaxo Wellcome is instructive. In that case, the issue on claim construction was whether the claim was limited to the grade and weight of hydroxypropyl methylcellulose (HPMC), a release agent, that was set forth in the specification examples. Because the properties and usage of HPMC to control release were "well known" and patentability of the agent turned on characteristics other than its grade or weight, the court found that the claim terms were not limited to the grade and weight recited in the specification examples. *344 F.3d at 1233*.

Similarly, the plaintiffs in this case do not dispute that the USP is the industry standard compendium for methods of dissolution testing of pharmaceutical products. Biovail Stmt. ¶ 66; Pls.' Stmt. Resp. ¶ 66. The USP's pH switch test applies

> [w]here the label states that an article is enteric-coated, and a dissolution or disintegration test that does not specifically state that it is to be applied to enteric-coated articles is included in the individual monograph . . . unless otherwise specified in the individual monograph.

BX 76 at 1791. The 0.1N HCl examples in the '341 patent did **[*49]** not concern enteric-coated articles or otherwise specify that the 0.1N HCl medium applied to enteric-coated products. The plaintiff's expert, Dr. Kaplan, conceded

---

[11] Although there are scattered references in the '341 patent to the USP, they do not relate to the dissolution profile testing conditions. See, e.g., '341 Patent col. 3, ll. 28-31 (BX 1).

that dissolution testing is typically done under conditions that mimic or attempt to mimic what will happen to the drug when ingested. Kaplan Dep. 144 (BX 72). Furthermore, Dr. Kaplan admitted that since an enteric-coated product such as the Abrika product is designed not to dissolve in the acidic stomach, "one of ordinary skill in the art typically employs the dissolution testing methodology described above as a pH-switch protocol." [12] Kaplan Rpt. ¶ 99 (July 20, 2011) (BX 121). See also Kaplan Dep. 145 (BX 72).

Given the above, the Court cannot say as a matter of law that the defendants' USP-based claim construction was objectively baseless. The plaintiffs are correct that courts generally consider intrinsic evidence such as the specification and prosecution history before extrinsic evidence such as expert testimony. *Vitronics, 90 F.3d at 1582*. However, **[*50]** based on the undisputed expert testimony about the testing protocol typically employed to test enteric-coated products, and the stature of the USP in the scientific community, the Court is not persuaded that it was unreasonable to argue that those skilled in the art would interpret "dissolution profile" to incorporate the USP-based pH switch test as a matter of plain meaning.

Furthermore, it is not clear to this Court that the intrinsic evidence unambiguously describes the scope of the invention such that reliance on extrinsic evidence is improper. *Andrx, 239 F.3d at 1300*. The specification examples say nothing regarding conditions for enteric-coated tablets, and the patentee's reference to "gastric juice" in the prosecution history could reasonably be interpreted to reference the fact that the dissolution medium disclosed in the specification corresponds to tablets that dissolve in the stomach. Cf. Kaplan Dep. 144 (BX 72) (dissolution testing generally attempts to mimic what actually happens to tablets).

The defendants' position finds further support in the fact that both the Anchen and Impax courts adopted Biovail's argument that reliance on the USP to determine the proper dissolution **[*51]** test was proper. Anchen Cl. Constr. Order 14 (BX 114); Impax Cl. Constr. Order 34 (BX 53). The plaintiffs protest that those courts were not actually confronted with the same claim construction arguments as in Abrika. But one of the plaintiffs' arguments in this case is that construing "dissolution profile" without reference to the test conditions set forth in the specification examples results in indefiniteness. Pls.' Br. 63-64. The Anchen and Impax courts each considered the generic companies' argument that Biovail's USP-based dissolution test rendered the claim indefinite. The Anchen court found reliance on the USP to be proper and not indefinite. Anchen Cl. Constr. Order 14 (BX 114). Similarly, the Impax court agreed that one skilled in the art would look to the USP to determine the appropriate dissolution medium, while deferring the question of indefiniteness. Impax Cl. Constr. Order 35 (BX 53).

The Court is therefore not inclined to hold that the Abrika lawsuit was not reasonably calculated to elicit a favorable outcome. Nevertheless, for the reasons below, the Court need not ultimately decide whether the Abrika suit was objectively baseless.

b. Delay

The Court finds that the plaintiffs **[*52]** cannot survive summary judgment as to the Abrika suit because they have not shown that this suit caused any delay in Abrika's entry into the market.

HN14[] The elements of an antitrust claim are (1) a violation of the antitrust laws; (2) individual injury resulting from that violation; and (3) measurable damages. *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d 305, 311 (3d Cir. 2008)*. It is not necessary to show with total certainty the exact amount of damages sustained, just that the defendants' anti-competitive acts caused the antitrust injury suffered by the plaintiff. *Rossi v. Std. Roofing, Inc., 156 F.3d 452, 483-84 (3d Cir. 1998)*; *Sound Ship Bldg. Corp. v. Bethlehem Steel Co., 533 F.2d 96, 98-99 (3d Cir. 1976)* (affirming grant of summary judgment because plaintiff failed to show required causal link between the antitrust transgression and damages suffered).

In this case, the purported antitrust violation is that the Abrika lawsuit was sham litigation that delayed the entry of Abrika's generic product into the market and caused purchasers to pay higher prices. The Hatch-Waxman stay on

[12] Thus, Abrika used the pH switch test as part of its quality control parameters for its enteric-coated product in its ANDA submission. Kaplan Rpt. ¶ 99 (July 20, 2011) (BX 121).

Abrika's product ended 30 months after the initiation of the Abrika lawsuit, or June 21, 2007. Biovail **[*53]** Stmt. ¶ 71; Pls.' Stmt. ¶ 71. Yet, as the plaintiffs stipulated, absent all of the conduct challenged by the plaintiffs, Abrika would have begun selling its generic products on August 18, 2008. ECF No. 343/ECF No. 335. It is undisputed that Abrika did not actually receive approval for its 300 mg product until August 18, 2008, and that Abrika's 150 mg product did not receive final approval until December 1, 2008. Id. The plaintiffs' expert conceded that "[t]he sole reason that Abrika did not receive [final approval] for its 150 mg dosage strength on August 15, 2008 was . . . the then-unexpired 180-day [first-to-file] marketing exclusivity of another applicant (Anchen)." Blume Rpt. ¶ 102 (BX 87) (internal quotation marks omitted). Plaintiffs thus appear to concede that the Abrika lawsuit itself did not delay the entry of the Abrika generic product.

The plaintiffs' only response in opposition is to argue that the defendants' conduct caused delay in Abrika's FDA approval because they sued Anchen, the first filer. In doing so, defendants triggered a 30-month stay for ANDA approval for Anchen, on top of the 180-day exclusivity period for Anchen as the first-filing generic. Pls.' Br. 72. But **[*54]** Anchen's 180-day exclusivity period is a creature of statute, and this Court has already found above that the Anchen lawsuit was not objectively baseless (and hence entitled to Noerr-Pennington immunity). *21 U.S.C. § 355(j)(5)(B)(iv)*. The plaintiffs' response pertains to whether the *Anchen* lawsuit caused the plaintiffs' injury, not the Abrika lawsuit. The plaintiffs have not adduced any facts to show that independently of the Anchen lawsuit, the Abrika lawsuit caused any delay or damages. Thus, even if the Court were to conclude that the Abrika suit was objectively baseless, the plaintiffs' inability to show causation of injury warrants summary judgment in defendants' favor as to the Abrika litigation.

D. The *Impax*Lawsuit

1. Facts as to *Impax*

On November 30, 2004, Impax filed an ANDA with the FDA seeking permission to sell a generic version of the 150 mg formulation of Wellbutrin XL. Impax later amended its ANDA to request permission for a 300 mg strength tablet as well. On January 20, 2005, and January 24, 2005, Impax provided paragraph IV notices to Biovail and GSK, claiming non-infringement. The notices stated that Impax's product "is not a tablet in which the delayed release of a **[*55]** drug is obtained by a controlled release coating (as required by every claim of the '341 patent)." Biovail Stmt. ¶¶ 26, 29-30; Pls.' Stmt. Resp. ¶¶ 26, 29-30; BX 40 at 2; BX 43 at 3.

On March 7, 2005, Biovail filed a patent infringement action against Impax in the Eastern District of Pennsylvania, alleging that Impax's 150 mg generic product infringed the '341 patent. The Honorable Anita J. Brody was assigned to the case. Impax Compl. (BX 44). A month later, Biovail amended its complaint to assert infringement against Impax's 300 mg generic product as well. Since Biovail did not file its infringement claim against the 300 mg product within the 45-day period prescribed by the Hatch-Waxman Act, Biovail only received a 30-month stay on ANDA approval for Impax's 150 mg product. Biovail Stmt. ¶¶ 31, 33; Pls.' Stmt. Resp. ¶¶ 31, 33.

The parties submitted extensive briefing concerning proper construction of the '341 patent. As in the Anchen lawsuit, the parties disputed the proper construction of "free of stabilizer." The key disputed term, however, was "delayed release tablet." Biovail argued that the phrase did not need to be construed, but if it did, the term should mean "a tablet that exhibits **[*56]** [a particular dissolution profile]" and should not be construed to require a controlled release coating. Biovail Stmt. ¶¶ 35, 37-38; Pls.' Stmt. Resp. ¶¶ 35, 37-38.

Impax's position was that "delayed release tablet" should be construed to mean "a tablet comprising a core which includes bupropion hydrochloride and conventional excipients and a coating designed to achieve a controlled release of bupropion hydrochloride, said coating comprising a water-insoluble, water-permeable film-forming polymer, together with a plasticizer and a water-soluble polymer." Impax Cl. Constr. Br. 10 (BX 50). In other words, Impax requested a claim construction that addressed "both the structure (a core and a coating comprising specific components) and the functional characteristics (the coating controls the release of the active ingredient) of the claimed delayed release tablet." Id.

On May 23, 2006, Judge Brody issued an order on claim construction. As to the term "delayed release tablet," Judge Brody found that although the proper construction of the term was a "close question," Impax's proposed construction was ultimately the correct one when read in light of the patent's specification. Impax Cl. Constr. **[*57]** Order 16, 17 (BX 53). Regarding the term "free of stabilizer," Judge Brody agreed with the Anchen court and rejected Biovail's proposed functional construction. Id. at 28.

Judge Brody denied reconsideration of the claim construction order on August 11, 2006. Shortly thereafter, Impax filed a motion for summary judgment of non-infringement. However, on March 6, 2007, before Judge Brody had a chance to rule on the motion, the parties agreed to settle and dismiss their claims. Biovail Stmt. ¶¶ 48-51; Pls.' Stmt. Resp. ¶¶ 48-51; Joint Stip. of Dismiss. (BX 60).

2. Analysis as to *Impax*

The central issue in the Impax litigation was whether the term "delayed release tablet" should be construed to cover only tablets with the delayed release mechanism in the coating, or whether it should be construed to cover any tablet that exhibited the specified dissolution profile. The plaintiffs do not dispute that if the Impax court had accepted Biovail's construction of "delayed release tablet," Impax's generic product would have infringed the '341 patent. The Court finds that the plaintiffs have not met their burden of showing that the Impax lawsuit was objectively baseless sham litigation.

HN15[] "The starting **[*58]** point for any claim construction must be the claims themselves." *Pitney Bowes, Inc. v. Hewlett-Packard Co., 182 F.3d 1298, 1305 (Fed. Cir. 1999)*. It is a "bedrock principle" of patent law that "the claims of a patent define the invention to which the patentee is entitled the right to exclude." *Phillips v. AWH Corp., 415 F.3d 1303, 1312 (Fed. Cir. 2005)*. The majority of the claims in the '341 patent explicitly limit coverage to tablets with a particular release mechanism in the coating. For example, Claim 1 claims a delayed release tablet comprising: (1) a core comprising bupropion hydrochloride and excipients and (2) "a coating consisting essentially of a water-insoluble, water-permeable film-forming polymer, a plasticizer and a water-soluble polymer" that exhibits a specified dissolution profile. '341 patent cl. 1 (BX 1); see also, e.g., id. cls. 26, 28.

By contrast, Claim 30 notably omits the language describing the coating. Claim 30 reads as follows:

> A bupropion hydrochloride delayed release tablet free of stabilizer and free of pore-forming agent, exhibiting a dissolution profile such that after 1 hour, from 0 up to 30% of the bupropion hydrochloride is released, after 4 hours, from **[*59]** 10 to 60% of the bupropion hydrochloride is released, after 6 hours, from 20 to 70% of the bupropion hydrochloride is released, after 8 hours, more than 40% of the bupropion hydrochloride is released.

'341 patent cl. 30 (BX 1) (emphasis added). The Federal Circuit has articulated that ***HN16***[] "[w]hen different words or phrases are used in separate claims, a difference in meaning is presumed." *Nystrom v. TREX Co., Inc., 424 F.3d 1136, 1143 (Fed. Cir. 2005)*. See also *Phillips, 415 F.3d at 1314* ("Differences among claims can also be a useful guide in understanding the meaning of particular claim terms."). Under the claim interpretation principle set forth in Nystrom, this Court cannot say that it was baseless to argue that the omission of the coating language from Claim 30 meant that its coverage was not limited to tablets with the release mechanism in the coating.

The plaintiffs contend that Claim 30's reference to "free of pore-forming agent" only makes sense if Claim 30 required a coating, because pore-forming agents only relate to a coating. Pls.' Br. 77. But under Biovail's proposed claim construction, Claim 30 covers any delayed release tablet that exhibits the specified dissolution profile, **[*60]** whether the release mechanism is in the coating or elsewhere. The appearance of the phrase "free of pore-forming agent" therefore does not control the inquiry.

Biovail's reading of Claim 30 also finds support in the plain meaning of the claim language as understood by one of ordinary skill in the art. See *Bell Atl. Network Servs., Inc. v. Covad Commc'ns Grp., 262 F.3d 1258, 1268 (Fed. Cir. 2001)* (noting a heavy presumption in favor of ordinary meaning). As the trial judge in Impax recognized, the parties agreed that "one skilled in the art would understand a 'delayed release tablet' to be any tablet that does not release its active ingredient immediately." Impax Cl. Constr. Order 14-15 (BX 53). The plain meaning of "delayed release tablet," in other words, does not include a controlled release coating.

Impax's claim construction in the underlying suit relied on the principle that **HN17**[] claims "must be read in view of the specification, of which they are a part." *Phillips, 415 F.3d at 1315*. As many courts have observed, however, the distinction between using the specification to interpret the meaning of a claim and importing limitations from the specification into the claim can be a difficult **[*61]** one to apply in practice. See, e.g., *Phillips, 415 F.3d at 1323*; Impax Cl. Constr. Order 40 (BX 53).

The "Summary of the Invention" of the '341 patent states that

> The invention . . . provides a new bupropion hydrochloride controlled release composition under the form of a tablet free of stabilizer of any kind . . . . Also, the controlled release is obtained thanks to a semi-permeable release coating, free of (monomeric) pore-forming agent. The tablets of the invention exhibit specific dissolution profiles.

'341 Patent col. 1, ll. 53-59 (BX 1). The "Detailed Description of the Invention" also states that "[t]he invention consists in a tablet comprising a core and a coating." Id. col. 1, ll. 66-67. The plaintiffs argue that, read in light of the specification, "delayed release tablet" can only be construed to include the coating. Given the competing plain meaning of the term "delayed release tablet" and the omission of coating language from Claim 30, however, the Court is not persuaded that Biovail's proposed claim construction was objectively baseless.

Judge Brody ultimately found that Impax's proposed construction of "delayed release tablet" aligned most naturally with the patent's description **[*62]** of the invention in the specification. However, the Court finds it significant that Judge Brody regarded this dispositive question as a "close question," noting that "both parties' positions were ably presented in their briefs and at oral argument." Impax Cl. Constr. Order 16 (BX 53)(emphasis added). Judge Brody went to considerable lengths to reject Biovail's claim construction in the underlying infringement suit. Such a litigation history simply does not fit the profile of objectively baseless litigation. See *GP Indus., Inc. v. Eran Indus., Inc., 500 F.3d 1369, 1375 (Fed. Cir. 2007)*.

E. The Citizen Petition

1. Facts

On December 20, 2005, Biovail filed a Citizen Petition with the FDA. The Citizen Petition requested that the FDA require any ANDA for a generic version of Wellbutrin XL to satisfy the following four criteria:

> (1) All bioequivalence trials should calculate and evaluate parameters based on concentrations of the parent drug and active metabolites [hereinafter the "metabolites evaluation request"];
>
> (2) Any generic formulation should be shown to be bioequivalent to Wellbutrin XL, sustained release and immediate release bupropion [hereinafter the "bioequivalence drift request"];
>
> (3) **[*63]** The bioequivalence studies should be conducted at steady-state evaluating the performance of the dosage form based on AUC, Cmax, Cmin [hereinafter the "steady-state request"]; and
>
> (4) Data using the FDA's approach for evaluating the effect of alcohol on the performance of the controlled-release dosage form should be required to ensure the absence of "dose dumping" [hereinafter the "dose dumping request"].

Biovail Stmt. ¶ 91; Citizen Pet. 1 (BX 96).

On June 7, 2006, the FDA issued an interim response to Biovail, stating: "FDA has been unable to reach a decision on your petition because it raises complex issues requiring extensive review and analysis by Agency officials . . . . We will respond to your petition as soon as we have reached a decision on your request." Biovail Stmt. ¶ 92; FDA Interim Resp. (BX 107).

Approximately six months later, on December 14, 2006, the FDA issued its final response, stating that the Citizen Petition was granted in part and denied in part, as follows. FDA Final Resp. (BX 108).

Request #1: Metabolites Evaluation Request

Biovail's Citizen Petition requested that all bioequivalence trials of generic versions of Wellbutrin XL measure and evaluate parameters based **[*64]** on concentrations of the parent drug as well as three active metabolites (hydroxy-, threo-and erythro-). The Citizen Petition explained that bupropion hydrochloride is extensively metabolized and that the active metabolites "contribute to both the activity and the toxicity of bupropion formulations, and represent the majority of what circulates in blood following doses of bupropion." Citizen Pet. 4 (BX 96). The petition represented that "[t]he metabolites of bupropion play a very significant role in the clinical performance of Wellbutrin XL and any generic version should demonstrate similar results in order to assure that the generic will provide similar effects." Id. at 7.

The NDA for Wellbutrin XL itself had contained bioequivalence testing data for the parent drug as well as for its three metabolites, for comparison to prior formulations of Wellbutrin. BX 99 at 18-19. In its review of the Wellbutrin XL NDA, the FDA Center for Drug Evaluation and Research stated that "[a]lthough bioequivalence could not be demonstrated for the parent compound . . . consideration should be given to the active metabolites, since they are responsible for more than 90% of the exposure following administration **[*65]** of bupropion." Id. at 1. Thus, the FDA found that "the comparable exposure and the role of the metabolites in the exposure and pharmacologic activity support the approval of the WELLBUTRIN XL formulation." Id.

Prior to Biovail's Citizen Petition, a May 2005 document titled Draft Guidance on Bupropion Hydrochloride had stated that manufacturers of extended release tablets of buproprion hydrochloride should test both bupropion and "[h]ydroxybupropion (active metabolite of bupropion)." The draft guidance contained a notice stating that "once finalized, [it] will represent the [FDA's] current thinking on this topic. It . . . does not operate to bind FDA or the public." 2005 Draft Guidance (PX 732).

In response to Biovail's metabolites evaluation request, the FDA granted the request with respect to the hydroxy-metabolite, finding that it

> contributes meaningfully to the safety and/or efficacy of the drug product. Consequently, we agree that the metabolite, hydroxybupropion, should be measured in bioequivalence testing, and the Agency expects ANDA applicants for generic bupropion HCl extended-release tablets to measure both the parent drug bupropion and the metabolite hydroxybupropion in their **[*66]** BE studies.

FDA Final Resp. 10 (BX 108). However, the FDA denied the request as to the other two (threo- and erythro-) metabolites, finding that "there is currently insufficient scientific evidence upon which we can reasonably determine" whether it is appropriate to measure the other two metabolites. Id. at 9, 10.

The FDA response noted not only the absence of evidence showing the other two metabolites' contribution to the safety and efficacy of Wellbutrin XL, but also evidence to the contrary. The FDA referenced Wellbutrin XL labeling that explained that these two metabolites were "five-fold less potent than bupropion." In addition, the FDA pointed out that

> [an exhibit attached to the Petition] states that erythrohydrobupropion has only a minor contribution to the overall pharmacological activity due to its low potency.

Id. at 10 n.32 (citation and quotation marks omitted) (emphasis added).

Request #2: Bioequivalence Drift Request

The Citizen Petition requested that any generic version of Wellbutrin XL demonstrate bioequivalence to Wellbutrin XL, SR, and IR. The petition cited

> potential for significant variations . . . between a generic version of a RLD [reference listed drug] and the immediate **[*67]** release version of the drug to which the RLD was shown to be bioequivalent. The relevance and accuracy of data regarding seizure incidence and other side effects is open to question if the generic drug has not been shown to be bioequivalent to the same reference that was relied upon for approval of the RLD.

Citizen Pet. 6 (BX 96). In response to this request, the FDA stated:

> [A]n ANDA applicant for generic bupropion HCl extended-release tablets is not required to demonstrate bioequivalence to Wellbturin SR and Wellbturin [IR].
>
> . . . .
>
> The fact that there is equivalency information in the approved labeling of Wellbutrin XL does not, as you claim, require the ANDA applicant to independently demonstrate bioequivalence or equivalence to sustained-release and immediate-release formulations of Wellbutrin in addition to the RLD [Wellbutrin XL].

FDA Final Resp. 6 (BX 108).

Request #3: Steady-State Request

The steady-state request was a derivative request. Biovail asked that the testing it requested for the parent drug and active metabolites and for bioequivalence to Wellbutrin XL, SR, and IR be conducted "at steady-state." Citizen Pet. 1 (BX 96).

In response to the steady-state request as to bioequivalence **[*68]** drift, the FDA stated that the request was "irrelevant" because the FDA did not agree with the bioequivalence drift request. FDA Final Resp. 12 (BX 108). As to the steady-state request regarding the parent drug and metabolites, the FDA stated that "based on our experience and expertise . . . a single-dose study is the preferred approach - not a multiple-dose study." Id.

Request #4: Dose Dumping Request

Dose dumping is the "[u]nintended, rapid drug release in a short period of time of the entire amount or a significant fraction of the drug contained in a modified release dosage form." It can pose a "significant risk to patients, either due to safety issues or diminished efficacy or both." BX 104 at 1. Alcohol can induce dose dumping in some modified release (also known as controlled release) drug products. Biovail Stmt. ¶ 25; Pls.' Stmt. Resp. ¶ 25.

On October 26, 2005, approximately two months before Biovail filed its Citizen Petition, the FDA's Advisory Committee for Pharmaceutical Sciences held a meeting in which doctors presented information about the potential for alcohol-related dose dumping in controlled release formulations. They discussed the need for testing and for a general **[*69]** "regulatory decisional framework to minimize risk of alcohol-induced dose dumping." See PX 92 at 9-35; id. at 21-22. One speaker testified that the Center for Drug Evaluation and Research was conducting ongoing in vitro testing on existing controlled release products to see whether alcohol could undermine the controlled release characteristics of the products. Id. at 13-15.

Although the FDA was investigating alcohol-related dose dumping in controlled release formulations, it is undisputed that as late as November 2005 (one month before the Citizen Petition was filed), the FDA did not require ANDA applicants to submit dose dumping data on all controlled release drugs. Indeed, for Wellbutrin XL, a controlled release drug, the FDA granted tentative approval of Anchen's ANDA on November 14, 2005 without requesting or receiving data on alcohol-related dose dumping. FDA Tentative Approval Ltr. (BX 105). Specifically, the FDA concluded that the Anchen drug was "safe and effective for use as recommended in the submitted labeling" and stated that it was only "unable to grant final approval to your ANDA at this time because of the patent issue." Id.

Biovail filed the Citizen Petition containing **[*70]** the dose dumping test request for generic Wellbutrin XL products on December 20, 2005. Citizen Petition (BX 96). On September 11, 2006, the Deputy Director of the Division of Bioequivalence of the FDA sent a memo to the Citizen Petition docket as well as to several ANDA applicants for generic versions of Wellbutrin XL. The memo referenced Biovail's Citizen Petition and stated that a working group of scientists had "developed an in vitro test to evaluate the potential for dose-dumping in the presence of alcohol (in vitro dose-dumping test)." In early 2006, the Office of Generic Drugs ("OGD") had asked all ANDA applicants for generic versions of Wellbutrin XL to conduct the in vitro dose-dumping study. BX 109; see also BX 110 (Anchen response to OGD request, dated February 23, 2006); BX 111 (FDA deficiency letter to Anchen, requesting in vitro dose-dumping study results, dated July 25, 2006).

In its final response to Biovail's dose dumping test request on December 14, 2006, the FDA stated:

> FDA asked ANDA applicants for generic bupropion HCl extended-release tablets to submit data from in vitro dissolution studies using various concentrations of ethanol in the dissolution medium to evaluate **[*71]** the possible interaction between alcohol and the excipients in both Wellbutrin XL and generic bupropion HCl extended-release tablets. FDA will evaluate the results of the in vitro data submitted by the ANDA applicants and consider these results when determining whether to approve each ANDA.

FDA Final Resp. 13 (BX 108).

2. Analysis

Biovail makes four separate arguments in favor of summary judgment as to the Citizen Petition: (1) First, that because the dose dumping request was granted, and the metabolites evaluation request was granted in part, the entire petition is immunized from antitrust liability under the Noerr-Pennington doctrine; (2) Second, that any competitive harm is immune from antitrust liability because it resulted from government decision; (3) Third, that even if the entire petition is not immunized, the unsuccessful requests were not objectively baseless; and (4) Finally, that even if the unsuccessful requests were objectively baseless, the plaintiffs have not shown that they caused any delay. The Court addresses each argument in turn.

a. Mixed Sham and Non-Sham Petitions

(1) Did the Citizen Petition Contain Successful Requests?

The Court finds that Biovail's dose dumping **[*72]** request and hydroxy- metabolite evaluation request were successful and, thus, non-sham by definition under PRE.

HN18[] "A successful effort to influence governmental action . . . certainly cannot be characterized as a sham." *PRE, 508 U.S. at 58*. Thus, the PRE Court declared that "[a] winning lawsuit is by definition a reasonable effort at petitioning for redress and therefore not a sham." *Id. at 61 n.5*. The FDA, in its final response to the Citizen Petition on December 14, 2006, stated that it asked ANDA applicants for generic Wellbutrin XL for dose dumping test data, and would evaluate and consider the results when determining whether to approve each ANDA. FDA Final Resp. 13 (BX 108). Indeed, the record shows that in early 2006, after Biovail filed the Citizen Petition, the FDA had asked ANDA applicants for generic versions of Wellbutrin XL to conduct a dose dumping study. [13] BX 109; see also BX 110 (Anchen response to OGD request, dated February 23, 2006); BX 111 (FDA deficiency letter to Anchen, requesting in vitro dose dumping study results, dated July 25, 2006). The FDA also granted Biovail's request for hydroxy- metabolite testing, noting that it "contributes meaningfully to the safety **[*73]** and/or efficacy of the drug product." FDA Final Resp. 10 (BX 108).

The plaintiffs contend, however, that petitioning the FDA to do something it has already done or to act on an issue about which it is already aware cannot be characterized as successful or objectively reasonable. They argue that PRE requires a causal connection between the petition and the favorable outcome in order for the petition to be objectively reasonable as a matter of law. Pls.' Br. 90. The plaintiffs' reading of PRE goes too far.

PRE does not define success in the context of a citizen petition, but it does state that the petition must be calculated to "elicit" a favorable outcome or to "influence" governmental action. *508 U.S. at 58, 60*. However, this Court does not read *PRE* to have imported concepts of legal and factual causation into the objective baselessness analysis. ***HN19***[] The *PRE* standard for objective baselessness is a forward-looking standard from the point in time when the suit or petition was filed. In setting forth the standard, **[*74]** the Supreme Court used the language of expectancy:

[13] The FDA also requested that GSK conduct dose dumping testing for Wellbutrin XL itself in October 2006. See PX 487 at GSKWXL50373034 (referencing correspondence from October 13, 2006).

> [T]he lawsuit must be objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits. If an objective litigant could conclude that the suit is reasonably calculated to elicit a favorable outcome, the suit is immunized under Noerr, and an antitrust claim premised on the sham exception must fail.

508 U.S. at 60 (emphasis added). To examine post hoc whether it was the petition that caused the government to reach a certain outcome would be contrary to the forward-looking language in PRE. [14]

In support of their proposed causal connection requirement, the plaintiffs rely chiefly on In re Flonase Antitrust Litigation. 795 F. Supp. 2d 300, 315 (E.D. Pa. 2011). [15] In that case, the brand manufacturer requested through a citizen petition that the FDA reconsider its endorsement of something called the geometric mean **[*75]** ratio method. The manufacturer, the antitrust defendant, argued that the FDA's ultimate endorsement of a different method over the geometric mean ratio method implied that its request succeeded on the merits. The Flonase court rejected the argument, finding that "[a]bsent evidence connecting the FDA's change in position to [manufacturer's] criticism, the FDA's action[s] are minimally probative, if probative at all, of the substantive merits of [manufacturer's] criticisms." 795 F. Supp. 2d 300, 315 (E.D. Pa. 2011). Similarly, in Louisiana Wholesale Drug. Co., Inc. v. Sanofi-Aventis, the court stated that "if [plaintiffs] can establish the [defendant] never intended or could reasonably expect to affect FDA labeling policy with respect to the five ANDAs, and filed the Petition solely to delay or impede the approval of generics, Noerr-Pennington immunity will be unavailable." La. Wholesale Drug Co., Inc. v. Sanofi-Aventis, No. 07-7343, 2008 U.S. Dist. LEXIS 3611, 2008 WL 169362, at *5 (S.D.N.Y. Jan. 18, 2008).

Even if Flonase and Louisiana Wholesale Drug were binding case law, this Court does not read them to require a showing of causation. The instant case is also distinguishable in that here, there is evidence connecting the FDA's favorable action to Biovail's Citizen Petition - at least with respect to the dose dumping request. In its September 11, 2006 memorandum to the Citizen Petition docket and to additional ANDA applicants, the FDA specifically referenced the Biovail Citizen Petition when it noted that the Office of Generic Drugs had asked ANDA applicants for dose dumping test data in early 2006. BX 109.

The plaintiffs argue that as a policy matter, the lack of **[*77]** a causal connection requirement is an unworkable standard in that it "allows brand companies to file abusive petitions with impunity, simply by including a request that the FDA adopt a policy or practice that it knows that the FDA has already adopted (or was developing)." Pls.' Br. 101. However, the plaintiffs' position is equally unworkable from a public policy standpoint, especially as applied to policies or procedures still in development. FDA regulations permit the filing of citizen petitions to issue, amend, or revoke a regulation, or to take or refrain from taking any other form of administrative action. 21 C.F.R. § 10.30. The plaintiffs ask this Court to strip citizen petition requests that were granted by the FDA from Noerr-Pennington immunity merely because the FDA was already aware of the concerns discussed therein. But to do so would discourage companies from attempting to shape the development of and contribute to the discourse surrounding FDA policies once the FDA becomes aware of an issue.

In this case, the undisputed facts indicate that the FDA had not yet adopted a policy of requesting dose dumping data before Biovail filed its Citizen Petition. The FDA had held a meeting **[*78]** to discuss the dose dumping problem and to consider developing a "regulatory decisional framework to minimize risk of alcohol-induced dose

---

[14] The plaintiffs have not elaborated upon whether, in their view, the petition must be the but-for or proximate cause, or whether the petition must be the sole cause of the favorable outcome, or just one contributing cause. Nor have they cited any case law discussing the proper standard.

[15] In addition, the plaintiffs cite two paragraphs in the report of the defendants' expert, Douglas Sporn, for the proposition that the Citizen Petition had no impact on the FDA's policy and practice regarding **[*76]** alcohol-related dose dumping. Pls.' Br. 100 (citing Sporn Rpt. ¶¶ 94, 95 (PX 80)). But the Court does not read Mr. Sporn's report as an expert admission that the Citizen Petition had no impact on the FDA's policy and practice on dose dumping. Rather, Mr. Sporn appeared to be commenting on the impact of the Citizen Petition as to the timing of FDA action - that is, opining that the Petition did not cause the delay in ANDA approval, which is an element of the plaintiffs' affirmative antitrust case. Sporn Rpt. ¶¶ 94, 95 (PX 80).

dumping." See PX 92 at 9-35; id. at 21-22. But although the FDA was generally aware of dose dumping, it had not specifically required applicants for generic bupropion hydrochloride to submit testing. Indeed, the FDA granted tentative approval to Anchen in November 2005, one month before the Citizen Petition was filed, without requesting or receiving dose dumping data. See FDA Tentative Approval Ltr. (BX 105).

Similarly, the FDA had not issued a final guidance on hydroxy- metabolite testing. The FDA had in place a draft guidance from May 2005 that requested hydroxy- metabolite testing for generic extended release bupropion hydrochloride products. But the draft guidance was non-binding and not final by it own terms:

> This draft guidance, once finalized, will represent the Food and Drug Adminsitration's (FDA's) current thinking on this topic. It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. You can use an alternative approach if the approach satisfies the requirements of the applicable statutes **[*79]** and regulations.

2005 Draft Guidance (PX 732) (emphasis added).

The Court finds that the FDA's awareness about the dangers of dose dumping and the May 2005 draft guidance regarding hydroxy- metabolite testing do not mean that those two requests were not "reasonably calculated to elicit a favorable outcome." The outcomes were not yet set in stone, and even if they were, *21 C.F.R. § 10.30* permits citizen petitions to amend or revoke regulations. To characterize these granted requests as sham requests and eliminate *Noerr-Pennington* immunity merely because the FDA was already aware of the concerns brought up therein would unreasonably curtail the *First Amendment* right to petition the government and influence policy.

(2) Is a Mixed Petition Immune?

Biovail argues that if a citizen petition includes more than one request, the entire petition is not a sham if at least one of the requests has objective merit. The question of whether a single petition containing a mix of sham and non-sham requests merits Noerr-Pennington immunity is an interesting one, but the Court need not decide it in this case.

Biovail cites two cases for the proposition that a single non-sham claim or request keeps the entire **[*80]** lawsuit or petition from being a sham. In the first case, In re Flonase Antitrust Litigation, the court examined a citizen petition that, as here, made multiple requests to the FDA. The Flonase court wrote, without analysis, that "conduct is not a sham if at least one claim in the petition has objective merit." *795 F. Supp. 2d 300, 312 (E.D. Pa. 2011)* (citing *Dentsply Int'l, Inc. v. New Tech. Co., No. 06-272, 1996 U.S. Dist. Lexis 19846 (D. Del. Dec. 19, 1996))*. In other words, "[i]f Plaintiffs cannot show that all of these requests were objectively baseless, they fail to carry their burden under PRE, and the [Citizen] Petition will be protected by Noerr-Pennington immunity." Id. (emphasis added). However, the *Flonase* court was not confronted with a case with mixed sham and non-sham requests.

The second case, Dentsply, was the unpublished case relied upon by the Flonase court. In Dentsply, patent holders brought patent infringement and trade secrets claims against defendants, who in turn filed antitrust counterclaims alleging sham litigation. The court stated that "if plaintiffs prevail on one of their counts [in their lawsuit], the sham aspect of the antitrust counterclaim must fail." **[*81]** *No. 96-272, 1996 U.S. Dist. Lexis 19846, at *9 (D. Del. Dec. 19, 1996)*. "[C]ourts have indicated that litigation will not be considered a 'sham' so long as at least one claim in the lawsuit has objective merit." Id.

The court in In re: Wellbutrin SR Antitrust Litigation disagreed and, in doing so, explained at length why the legal authority on which *Dentsply* relied does not strongly support the proposition that a single meritorious count in a lawsuit will defeat a sham litigation antitrust claim. *749 F. Supp. 2d 260, 263-64 (E.D. Pa. 2010)*. The Court finds the analysis in *Wellbutrin SR* persuasive. In that case, the manufacturer had filed two patent infringement claims based on two separate patents in a single patent suit. In the antitrust case based on the underlying patent suit, Judge Stengel granted summary judgment with respect to one patent, finding that the manufacturer had probable cause to file that infringement claim, but denied summary judgment with respect to the other. Judge Stengel then rejected the manufacturer's argument on a renewed motion for summary judgment that the assertion of at least one non-sham claim immunized the entire lawsuit from antitrust liability under **[*82]** Noerr-Pennington. Judge Stengel held that the one non-sham claim in the lawsuit was "sufficient to cause antitrust damage because it resulted in the continuation of [the manufacturer's] 30 month patent protection stay after the [sham] claim was dismissed." See id. at 266-67.

The parties have not pointed to, and this Court has not found, binding authority on the issue of whether petitions with a mix of sham and non-sham requests can be considered objectively baseless as a whole. This Court is inclined to find that they can. As Judge Stengel pointed out in Wellbutrin SR, it is theoretically possible that a sham claim in a lawsuit or sham request in a petition can cause antitrust damage above and beyond the delay caused by the non-sham claim - i.e., that the injury will exceed the portion of the conduct that is protected by Noerr-Pennington immunity. As a matter of policy, it would create poor incentives if tacking one meritorious claim onto any number of baseless ones that delay adjudication or resolution could automatically immunize the whole lawsuit or petition from antitrust liability as a matter of law.

Nevertheless, as set forth below, the Court need not opine on this question because **[*83]** the plaintiffs have not shown any evidence that the unsuccessful and arguably sham requests in the Citizen Petition actually delayed FDA approval of the generic ANDAs any further than the delay caused by the successful requests.

b. Government Action Immunity

Biovail argues that because the Citizen Petition did not trigger any automatic delay by statute or regulation, any decision to delay action on ANDA approval was the FDA's alone, and injury flowing from such a government decision is immune to private antitrust liability. Biovail Br. 53-54. In support, Biovail cites the applicable federal regulations, which provide:

> ***HN20***[] (d) Neither the filing of a petition for a stay of action nor action taken by an interested person in accordance with any other administrative procedure in this part or in any other section of this chapter, e.g., the filing of a citizen petition under *§ 10.30* . . . , will stay or otherwise delay any administrative action by the Commissioner, including enforcement action of any kind, unless . . . . (1) The Commissioner determines that a stay or delay is in the public interest and stays the action.

21 C.F.R. § 10.35 (2005) (emphasis added). The Court is not persuaded that Biovail's **[*84]** Citizen Petition is immunized from antitrust liability based on any delay that may be attributable to the FDA. Nevertheless, the Court need not ultimately decide this question.

HN21[] The Sherman Act does not prohibit an anticompetitive restraint imposed by a state as an act of government. *Parker v. Brown, 317 U.S. 341, 352, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*; *Noerr, 365 U.S. at 136*. This so-called Parker or state action immunity protects the states' act of governing and expresses the principle that "the antitrust laws regulate business, not politics." *Mass. Sch. of Law. v. ABA, 107 F.3d 1026, 1035 (3d Cir. 1997)*. The doctrine is grounded in principles of federalism and respect for state sovereignty, and relies heavily on the clarity of the state's goals and actions. *Mariana v. Fisher, 338 F.3d 189, 201 (3d Cir. 2003)*; *A.D. Bedell Wholesale Co., Inc. v. Philip Morris Inc., 263 F.3d 239, 254 (3d Cir. 2001)*.

Conflicts similar to those created by state regulation and policy can arise in the context of federal regulation. Some statutes explicitly preclude application of ***antitrust law***. See *Credit Suisse Sec. (USA) LLC v. Billing, 551 U.S. 264, 270-71, 127 S. Ct. 2383, 168 L. Ed. 2d 145 (2007)* (listing examples). Where statutes are silent, however, courts must **[*85]** determine whether they implicitly preclude application of the antitrust laws, which determination turns on the relation between the antitrust laws and the regulatory program set forth, and the specific conduct at issue. *Id. at 271*.

Biovail argues that *21 C.F.R. § 10.35 (2005)* exempts it from antitrust liability because it is the FDA Commissioner that determines whether a stay or delay is in the public interest. However, ***HN22***[] "[r]epeal of the antitrust laws by implication is not favored and not casually to be allowed. Only where there is a plain repugnancy between the antitrust and regulatory provisions will repeal be implied." *Gordon v. NYSE, Inc., 422 U.S. 659, 682, 95 S. Ct. 2598, 45 L. Ed. 2d 463 (1975)* (internal quotation marks and citation omitted). See also *United States v. Phila. Nat'l Bank,* *374 U.S. 321, 350-51, 83 S. Ct. 1715, 10 L. Ed. 2d 915 (1963)*; *Essential Commnc'ns Sys., Inc. v. Am. Tel. & Tel. Co., 610 F.2d 1114, 1117 (3d Cir. 1979)*. Absent express immunity conferred by Congress, immunity will be implied

> only if Congress has clearly supplanted the antitrust laws and their model of competition with a differing competitive regime, defined by particularized competitive standards and enforced by an administrative agency, and has thereby purged **[*86]** an otherwise obvious antitrust violation of its illegality.

United States v. NASD, Inc., 422 U.S. 694, 742-43, 95 S. Ct. 2427, 45 L. Ed. 2d 486 (1975) (emphasis added). See also *Harrison Aire, Inc. v. Aerostar Int'l, Inc., 316 F. Supp. 2d. 186, 211 (E.D. Pa. 2004)*.

Biovail has not argued that Congress has clearly supplanted the antitrust laws in this case. Nor has Biovail otherwise cited any cases in the pharmaceutical context that find that FDA delay in ANDA approval entitles filers of citizen petitions to immunity from the antitrust laws. Moreover, as a factual matter, Biovail has not linked the delay in this case to any particular FDA decision or action, as opposed to inaction. Biovail points to the FDA's interim response, which states that the "FDA has been unable to reach a decision on [the Citizen Petition] because it raises complex issues requiring extensive review and analysis by Agency officials." FDA Interim Resp. (BX 107). But even if the interim response constitutes an FDA decision to delay, the response hardly rises to the standard set forth in NASD, which confers immunity only if Congress has supplanted federal ***antitrust law*** with a "differing competitive regime." *NASD, 422 U.S. at 722-23*. In any case, the **[*87]** plaintiffs have pointed to testimony indicating that such interim FDA responses are typically boilerplate answers issued before the FDA has even reviewed and considered the petition. The FDA issues such responses to comply with regulations requiring a response to citizen petitions within six months. Morrison CP Rpt. ¶¶ 20-22 (PX 67); *21 C.F.R. § 10.30(e)(2)*. According to the plaintiffs' expert, FDA delay in ANDA approval is commonly a result of FDA backlog, limited resources, and the need to create a record in defense of anticipated litigation by brand companies. Morrison CP Rpt. ¶¶ 20-22 (PX 67); Morrison CP Rebuttal Rpt. ¶ 15 (PX 73).

Lastly, the Court notes that as a policy matter, adopting Biovail's position would essentially mean that no pharmaceutical company could be liable for antitrust injury as a result of a citizen petition - no matter how frivolous - because the FDA is the one delaying ANDA approval. Nevertheless, the Court need not decide whether Biovail is entitled to immunity that produces such sweeping immunity because the plaintiffs have not shown that the unsuccessful requests delayed ANDA approval beyond the delay stemming from the successful requests.

c. The Unsuccessful **[*88]** Requests

Because the Court does not find at this time that the Citizen Petition is immunized by the inclusion of two successful requests or by government action, the Court considers whether the remaining unsuccessful requests were objectively baseless under the *PRE* standard. However, as with the questions examined above, the Court need not ultimately decide whether the unsuccessful requests were objectively baseless because the plaintiffs have not shown that they caused antitrust injury above and beyond the delay caused by the successful, non-sham Citizen Petition requests.

(1) The Metabolites Evaluation Request as to the Other Two Metabolites

Biovail's Citizen Petition requested that the FDA require generic versions of Wellbutrin XL to provide bioequivalence data for the parent drug and all three active metabolites. [16] Citizen Petition 7 (BX 96). Biovail argues that the metabolites evaluation request as to the threo- and erythro- metabolites was reasonable because it is unknown whether bupropion or its active metabolites cause bupropion's antidepressant effect and produce the seizure risk associated with higher dosages of bupropion. Biovail Br. 59-60. Based on the summary judgment record, **[*89]** the Court cannot find at this time that Biovail had probable cause to request that the FDA require generic companies to measure the threo- and erythro- metabolites.

---

[16] The Court considered the request as to the hydroxy-metabolite, which the FDA granted, above.

Bioequivalence testing is usually limited to the parent drug - in the case of Wellbutrin XL, bupropion hydrochloride. The applicable FDA guidance on bioequivalence studies recommends testing metabolites only in cases where a metabolite "may be formed as a result of gut wall or other presystemic metabolism" and "contributes meaningfully to safety and/or efficacy." FDA Guidance for Industry, Bioavailability and Bioequivalence Studies for Orally Admin. Drug Prods. 18 (Mar. 2003) (BX 126). In May 2005, the FDA issued a draft guidance on bupropion hydrochloride that recommended testing of the parent drug and the hydroxy-metabolite. The draft guidance was silent as to the threo- and erythro- metabolites. 2005 Draft Guidance (PX 732).

The record shows, at best, a lack of scientific consensus and clarity as to the threo- and erythro- metabolites' contribution to the safety and efficacy of bupropion hydrochloride. Biovail relies chiefly on **[*90]** research conducted by and an expert report prepared by Dr. Sheldon Preskorn. In a 1991 article, Dr. Preskorn wrote that the "mechanism of action responsible for bupropion's antidepressant properties is unknown." Sheldon H. Preskorn, "Should Bupropion Dosage Be Adjusted Based Upon Therapeutic Drug Monitoring?," 27 Psychopharmacology Bull., 637, 637 (1991) (BX 101). The plaintiffs' expert, Dr. Kaplan, agreed that the "role of the metabolites in the overall activity of the drug" is unknown. Kaplan Dep. 388-89 (PX 147). In a later 1998 study, Dr. Preskorn and a colleague concluded:

> In comparing the pharmacological potency of the metabolites with their expected concentrations at therapeutic doses of bupropion, [the hydroxy- and threo- metabolites] would be expected to appear to contribute to bupropions [sic] overall antidepressant effects.

W. Dale Horst & Sheldon H. Preskorn, "Mechanism of Action and Clinical Characteristics of Three Atypical Antidepressants," 51 J. Affective Disorders 237, 241 (1998) (BX 102) (emphasis added). See also Preskorn Rpt. ¶ 34 (BX 125) ("[T]here is evidence that at least the hydroxy and threo metabolites contribute to the effects on norepinephrine and dopamine **[*91]** neurotransmission."). However, as noted in the FDA's final response, Wellbutrin XL's own labeling explained that the threo- and erythro metabolites were "five-fold less potent than bupropion." In addition,

> [an exhibit attached to the Citizen Petition] states that erythrohydrobupropion has only a minor contribution to the overall pharmacological activity due to its low potency.

FDA Final Resp. 10 n.32 (BX 108) (citation and quotation marks omitted) (emphasis added).

On the issue of drug safety, Dr. Preskorn noted that because most studies conducted during the development of bupropion hydrochloride measured only the parent drug and not the metabolites, there was an "inadequate database to establish the relationship between [levels of bupropion and/or its metabolites] and the occurrence of seizures." Preskorn, "Should Bupropion Dosage Be Adjusted," at 641 (BX 101). Nevertheless, Dr. Preskorn concluded in his report that "high levels of bupropion and/or its metabolites are the likely cause of bupropion's seizure risk." Preskorn Rpt. ¶ 35 (BX 125). The plaintiffs' expert, Dr. Kaplan, testified that the role of the metabolites in the bupropion seizure risk is unknown. Kaplan Dep. 388-89 (PX **[*92]** 147).

The record above demonstrates, at best, what appears to be scientific uncertainty as to whether and to what degree the threo- and erythro- metabolites contribute to the efficacy of or detract from the safety of Wellbutrin XL. Biovail argues that since the data is insufficient to determine which of the parent drug and the metabolites (or combination thereof) causes bupropion's antidepressant effect and seizure risk, it was not objectively baseless to ask that generic versions of Wellbutrin XL be required to provide testing data as to the parent drug and all three metabolites. Indeed, the NDA for Wellbutrin XL itself had contained bioequivalence testing data for the parent drug, bupropion, as well as for its three metabolites. BX 99 at 18-19. And the FDA had relied in part on "the comparable exposure and the role of the metabolites in the exposure and pharmacologic activity" in approving the Wellbutrin XL formulation. Id. at 1.

It may be that where there is scientific uncertainty as to the effect that the metabolites have on safety and efficacy, it would be prudent to ask that they be measured and tested. The FDA's subsequent treatment of generic versions of

Wellbutrin XL supports **[*93]** such an outlook. [17] But under the applicable FDA bioequivalence guidance when the Citizen Petition was filed, metabolite testing was only recommended where metabolites contribute meaningfully to safety and/or efficacy. In addition, as noted above, the 2005 FDA draft guidance specific to bupropion hydrochloride recommended testing only as to the parent drug and the hydroxy- metabolite. Biovail did not provide any factual or legal support in its Citizen Petition to deviate from either guidance. Nor did Biovail point to any evidence demonstrating affirmatively that the threo- and erythro- metabolites contribute meaningfully to safety or efficacy; Biovail merely pointed out a lack of clarity on the subject.

Thus, given the relevant FDA guidance and draft guidance, the Court cannot find that Biovail could realistically expect success on the merits of the metabolites evaluation request as to the threo- and erythro- metabolites. Nevertheless, as will be explained below, the Court need not ultimately decide the question of whether this request was objectively baseless.

(2) Bioequivalence Drift Request

The Court understands Biovail's basic argument with respect to bioequivalence drift to be as follows: (1) Wellbutrin IR is the only Wellbutrin formulation proven in human clinical trials to be safe and effective; (2) Wellbutrin XL was bioequivalent to Wellbutrin IR, but studies showed that XL exposed the patient to 11% less bupropion over time than Wellbutrin IR; [18] (3) hypothetically, a generic version of Wellbutrin XL could expose patients to less buproprion over time than XL; (4) hypothetically and mathematically, the compounded effect of the generic product being only mostly equal to Wellbutrin XL, which was only mostly equal to Wellbutrin IR, means that the generic version of XL could potentially not be bioequivalent to IR. Biovail Br. 56-57. **[*95]** The Court cannot find at this time that the bioequivalence drift request in the Citizen Petition was not objectively baseless.

HN23[] The Hatch-Waxman Act, FDA regulations, and FDA guidance only require generics to prove bioequivalence to the reference listed drug ("RLD") - in this case, Wellbutrin XL. See *21 U.S.C. §§ 355(j)(2)*, *(j)(8)*; *21 C.F.R. § 314.94*; FDA Guidance for Indus., Bioavailability and Bioequivalence Studies for Orally Admin. Drug Prods. 2 (Mar. 2003) (BX 126). Biovail argues, however, that the FDA has discretion to establish bioequivalence requirements for any particular drug, and that Wellbutrin's unique approval history rendered the bioequivalence drift request in the Citizen Petition objectively reasonable. Based on the current record, the Court does not find the argument persuasive.

The bioequivalence drift request appears to be purely based on hypothetical postulations and mathematical **[*96]** possibilities, as opposed to clinical evidence. Cf. *Biovail Corp. v. U.S. FDA, 519 F. Supp. 2d 39, 49 (D.D.C. 2007)* (declining to award injunctive relief based on the "speculative nature" of Biovail's allegations and on the basis of "hypothetical mathematics"). Biovail has pointed to no studies or evidence supporting its hypothetical outcome. Most importantly, Biovail does not appear to dispute the plaintiffs' argument that actual bioequivalence data for several of the generic versions of Wellbutrin XL showed no evidence of bioequivalence drift. The plaintiffs claim this data was produced to Biovail in the early stages of the underlying patent lawsuits, and before Biovail filed the Citizen Petition. See Pls.' Br. 94; Kaplan Rpt. ¶ 13 (PX 75); Pls.' Stmt. ¶ 364. Biovail does not counter those facts or make any argument as to why it was realistic to expect the FDA to grant the bioequivalence drift request based on hypothetical arguments in the face of actual data.

Moreover, the plaintiffs have cited a GSK analytical document that states the following:

---

[17] In October 2008, the FDA's Division of Bioequivalence wrote to Teva Pharmaceuticals regarding a proposed generic version of 300 mg Wellbutrin XL. In that letter, the FDA recommended measuring the parent compound as well as all three active metabolites in a study for individuals who complained of suffering from adverse events or lack-of-effect when switching from Wellbutrin XL to Teva's generic equivalent. BX 103 at TEVA_WXL00483-84. This information was not available to Biovail at **[*94]** the time the Citizen Petition was filed, however.

[18] See BX 99 at 86 (showing an AUC ratio of 0.89 for Wellbutrin XL as compared with IR). The AUC is a measurement of the extent to which a drug stays in the body and for how long. An AUC ratio of 0.89 for Wellbutrin XL means that XL's AUC is 11% lower than that of IR. Fleischer Rpt. ¶ 13 (BX 124).

Clinical Conclusions:
- No safety issues associated with potentially higher concentrations that may result from [bioequivalence] drift

- No **[*97]** efficacy issues associated with potentially lower concentrations that may result from [bioequivalence] drift

"Wellbutrin XL and Generic Entry" at GSKWXL00086996 (PX 655); see also id. at 0087029 ("No known safety or efficacy concerns from resultant values and dispersion around these values."). In other words, even assuming the existence of bioequivalent drift, GSK concluded that there were no safety or efficacy issues for the generic products. The Court also finds GSK's assessment of industry practice and precedent to be informative. According to GSK:

Industry and Agency Precedents:
- It is common practice in the industry to rely on serial bioequivalence demonstrations to qualify new formulations . . .

- No precedent for successfully arguing against this practice as regulatory standard.

Id. at 0087001 (emphasis added). It is unclear whether Biovail was aware of GSK's positions on the bioequivalence drift argument, and the Court does not impute such knowledge to Biovail in today's decision. Nevertheless, the existence of scientific conclusions from a major pharmaceutical company regarding the lack of clinical ramifications of bioequivalence drift for the safety and efficacy of generic Wellbutrin **[*98]** XL informs the Court's thinking that there was no realistic expectation of success on the merits of the bioequivalence drift request. However, as will be explained below, the Court need not ultimately decide whether the bioequivalence drift request was objectively baseless in this case.

(3) Steady-State Request

The parties agree that the steady-state request was largely derivative of the bioequivalence drift test. See Biovail Br. 59; Pls.' Br. 98. In other words, the baselessness of this request appears to turn largely on whether the underlying bioequivalence requests were baseless. Because the Court need not decide the objective merit of either the metabolites evaluation test or the bioequivalence drift test, the Court does not now consider whether the steady-state request was objectively baseless.

d. Delay

HN24[] An antitrust plaintiff must prove a causal connection between the antitrust violation and actual damages suffered. See *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d 305, 311 (3d Cir. 2008)*; *Rossi v. Std. Roofing, Inc., 156 F.3d 452, 483-84 (3d Cir. 1998)*. In this case, the plaintiffs' theory of antitrust injury is that the Citizen Petition delayed ANDA approval, thus postponing **[*99]** generic entry and permitting the brand manufacturers to maintain monopoly prices of Wellbutrin XL. Having found that two of the Citizen Petition requests were successful non-sham requests entitled to *Noerr-Pennington* immunity, however, this Court must examine whether the plaintiffs have put forth evidence of injury attributable to the unsuccessful (and arguably sham) requests.

Martha Bennett, the expert proffered by the plaintiffs to opine on the delay caused by the petition, testified that the FDA could "tackle multiple requests simultaneously rather than sequentially." Bennett Dep. 238 (BX 113). When asked how long the FDA took to resolve the dose dumping issues in the Citizen Petition, Ms. Bennett testified that:

from December of '05 when the petition was submitted to December of '06 when FDA responded to the petition [was] the length of time it took them to resolve those issues.

Id. at 240. As the plaintiffs point out, Ms. Bennett's testimony could reasonably be interpreted as merely stating the obvious - in other words, that the amount of time the FDA took to respond to each of the requests was the amount of time that the FDA took. Nevertheless, the testimony that follows is significant **[*100]** on the issue of delay:

> Q: If the citizen petition had been limited to the dose dumping and metabolite issues, how long would it have taken FDA to resolve it?
> . . . .
> A: I don't know.
> Q: Can you state to any professional certainty that it would have taken any less time than it actually took to resolve the citizen petition?
> A: No. I don't know.

Id. at 242-43. This excerpt speaks directly to the plaintiffs' expert's lack of knowledge as to what delay was attributable to the Citizen Petition independent of the successful, non-sham requests. The plaintiffs have not pointed to any other evidence in the record from which a jury could reasonably conclude that the FDA would have approved the ANDAs earlier if the Citizen Petition had been limited to the successful, non-sham requests. In other words, even if the unsuccessful requests were sham petitions not entitled to Noerr-Pennington immunity, the plaintiffs have not met their burden to show causation of anticompetitive injury. Because the plaintiffs have not raised a genuine issue of material fact as to whether the unsuccessful and allegedly sham requests caused any delay beyond the non-sham requests, the Court grants summary judgment as to the **[*101]** Citizen Petition.

IV. GSK's Conduct

HN25[] Antitrust co-conspirators are jointly and severally liable for all damages caused by the conspiracy to which they were a party. *In re Cotton Yarn Antitrust Litig., 505 F.3d 274, 284 (4th Cir. 2007)* (citation omitted); *Wilson P. Abraham Constr. Corp. v. Texas Industries, Inc., 604 F.2d 897, 904 n.15 (5th Cir. 1979)*. Both a conspiracy claim under *section 1 of the Sherman Act* and a conspiracy to monopolize claim under *section 2 of the Sherman Act* require the existence of agreement or concerted action. See *Howard Hess Dental Labs. Inc. v. Dentsply Int'l, Inc., 602 F.3d 237, 254 (3d Cir. 2010)*. To show agreement or concerted action, antitrust plaintiffs must produce evidence allowing a jury to reasonably infer "a unity of purpose or a common design and understanding, or a meeting of minds in an unlawful arrangement." Id.

Direct proof of an express agreement is not required, but ***antitrust law*** limits the range of permissible inferences from ambiguous evidence. The Supreme Court has held that conduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy. To withstand a motion **[*102]** for summary judgment, a plaintiff must present evidence that tends to exclude the possibility that the alleged conspirators acted independently. *Matsushita Elec. Indus. Co., Ltd. v. Zenith Radio Corp., 475 U.S. 574, 588, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*; *Cosmetic Gallery, Inc. v. Schoeneman Corp., 495 F.3d 46, 51 (3d Cir. 2007)*. The plaintiff must show that "the inference of conspiracy is reasonable in light of the competing inferences of independent action or collusive action that could not have harmed [them]." *Matsushita, 475 U.S. at 588*.

Thus, the Third Circuit has observed that ***HN26***[] "courts generally reject conspiracy claims that seek to infer an agreement from communications despite a lack of independent evidence tending to show an agreement and in the face of uncontradicted testimony that only informational exchanges took place." *In re Baby Food Antitrust Litig., 166 F.3d 112, 133 (3d Cir. 1999)*. Furthermore, "[p]roof of opportunity to conspire, without more, will not sustain an inference that a conspiracy has taken place." *Petruzzi's IGA Supermkts. Inc. v. Darling-Delaware Co., Inc., 998 F.2d 1224, 1235 (3d Cir. 1993)* (citation omitted).

Here, the plaintiffs have failed to proffer evidence from which a jury **[*103]** may reasonably infer that GSK and Biovail together conspired to delay generic entry by filing the Impax and Watson lawsuits and the Citizen Petition, in light of the competing inference of independent action. In other words, even if the Court were to find that the plaintiffs survive Biovail's motion for summary judgment, the plaintiffs have not met their burden to show that GSK can be held conspiratorially liable for Biovail's conduct as to Impax, Watson, and the Citizen Petition.

A. The *Impax* and *Watson* Lawsuits

1. Facts

GSK was not a party to the Impax or Watson lawsuits, though it received Impax's paragraph IV certification on January 21, 2005 and Watson's in July of 2005. PX 247 (Impax); PX 264 (Watson 150 mg); PX 265 (Watson 300 mg). GSK and Biovail's Common Interest Agreement encompassed Impax's paragraph IV certification. Stip. of Parties Concerning Defs.' Common Interest Claims ¶ 1 (ECF No. 363/ECF No. 347).

Before the Impax lawsuit was filed, GSK's outside counsel communicated directly with Impax regarding their paragraph IV notification and requested access to Impax's ANDA. GSK's outside counsel, Jason Leif, was tasked with reviewing the Impax ANDA and paragraph IV certification, **[*104]** did so, reached a conclusion as to whether the Impax generic would infringe Wellbutrin XL, and communicated that conclusion to GSK. See PX 249; PX 250; PX 251; PX 252; PX 253; PX 254; Leif Dep. 142-44, 151 (PX 137).

GSK and Biovail employees exchanged at least one email regarding Impax's paragraph IV certification. PX 418 (email from GSK to Biovail attaching Impax certification). On February 28, 2005, about a week before the Impax suit was filed, Kenneth Cancellara, Biovail's general counsel, sent an email to GSK's outside counsel, Jason Lief, indicating that

> On the Impax Notice, I [Mr. Cancellara] have not yet heard from GSK (Carol Ash) on a conference call with their expert. I do not want to let the 45-day clock expire without consciously dealing with the issue.

PX 423. Mr. Leif recalled that he did communicate at some point with Biovail's counsel regarding the Impax paragraph IV notice. Id. at 162-63 (PX 137).

As to Watson, Mr. Leif reviewed Watson's paragraph IV notice, reached a conclusion regarding whether the Watson generic infringed Wellbutrin XL, and communicated his conclusion to GSK. However, he testified that he did not recall that there were discussions regarding Watson with **[*105]** either Biovail or its counsel. Leif Dep. 190-92 (PX 137). GSK's then CEO, Jean Pierre Garnier, testified that GSK decided not to sue the newer generics coming on the market (i.e., Impax and Watson). Garnier Dep. 141 (PX 129).

2. Analysis

The facts set forth above relating to GSK's involvement in Impax and Watson do not tend to exclude the possibility that Biovail and GSK acted independently once each received the Impax and Watson paragraph IV notices.

The record is consistent with a theory that GSK independently reviewed the paragraph IV notices and the ANDAs, came to a legal conclusion about infringement, and decided not to sue Impax and Watson. GSK's outside counsel recalled discussions with Biovail's counsel only regarding Impax, and no such discussions regarding Watson. To infer concerted action from the mere existence of the Common Interest Agreement as to the Impax paragraph IV certification and discussions between the defendants' counsel would be an exercise in speculation. See *Warren Distrib. Co. v. InBev USA LLC, No. 07-1053, 2008 U.S. Dist. LEXIS 71320, 2008 WL 4371763, at *4 (D.N.J. Sept. 18, 2008)* ("The fact that a joint defense agreement was signed is not evidence of the conspiracy plaintiffs allege **[*106]** existed."). At best, the above evidence is equally consistent with informational exchange or independent action, which is not enough for the plaintiffs to survive GSK's motion for summary judgment as to these two lawsuits.

B. Biovail's Citizen Petition

1. Facts

a. Bioequivalence Drift

In April 2004, David Stout, GSK's President of U.S. Pharmaceutical Operations, emailed several other GSK employees addressing reports that up to four companies intended to file generic versions of Wellbutrin XL in the next twelve months. In the email, Mr. Stout sketched the outline of a bioequivalence drift argument that later appeared in Biovail's Citizen Petition:

> If one product is approved on a bioequivalence basis, can another product be approved based on bioequivalence to that product or should they have to prove bioequivalence to the standard product. If you are allowed to continue to approve provducts [sic] based on bioequivalence to any other product that has been

> approved on that basis, you could end up with a product that is no where near the standard for which all clinical work was based.
> How do we get these arguments in front of the FDA? Citizens [sic] petition? We need to act fast!

PX 347. In response, **[*107]** David Wheadon, GSK's Senior Vice President of U.S. Regulatory Affairs, said he would "recommend going to FDA and making the public health argument that you outlined." GSK's then CEO, Jean-Pierre Garnier, requested to be copied on the FDA submission. PX 348.

On May 4, 2004, Brian Crombie, the CFO and Senior Vice President of Biovail wrote in an email:

> David stout of gsk in a conference today said that a generic to Wellbutrin XL would have to prove bioequivilence [sic] to a three times a day IR not to XL to get approved and that that would be very challenging. Is that true?

Greg Szpunar, Biovail's head of research and development, responded: "Doesn't make sense to me. If Xl is in the orange book, with no patent, the comparator would be XL." PX 349.

An internal GSK teleconference was scheduled for May 17, 2004 to discuss bioequivalence standards for generic Wellbutrin XL - specifically, whether there are "unique considerations for bupropion that might argue for bioequivalence to IR to reduce 'bioequivalence drift.'" PX 350. GSK's Project Management Board ("PMB"), a governance body chaired by a GSK commercial leader and a research and development team leader, held a meeting in May 2004 to **[*108]** discuss a defense strategy for Wellbutrin XL. Bioequivalence drift was an "urgent agenda item" at the meeting. PX 352.

In an email to Mr. Stout (GSK's President of U.S. Pharmaceutical Operations) dated May 26, 2004, Dan Burch, GSK's Senior Vice President of Neurosciences, wrote: "I will get something organized soon to update you [on the issues raised at the May PMB meeting]. I am going to discuss this with Biovail. Are you or any others outside of JDC team members already in discussions with them about this?" PX 355. On the same day, Mr. Burch emailed a GSK employee to ask "[w]ho is the best person for me to call in Biovail to discuss work around issue?" PX 356.

GSK employees continued to discuss the bioequivalence drift argument internally, and circulated a draft outline for a presentation to GSK's PMB on June 30, 2004. PX 357. On June 22, 2004, a GSK PMB Briefing Document stated the following:

> The team has concluded that there are no safety or efficacy concerns associated with . . . 'bioequivalence drift' . . . .
>
> It is common practice in GSK and the industry to rely on serial bioequivalence demonstrations to qualify new formulations . . . . Finally, we are aware of no precedent for a **[*109]** company successfully arguing against this as a regulatory standard.

PX 368. The briefing document ended with the following proposal: "Not recommending further action at this time." Id. Slides from the internal GSK PMB meeting on June 30, 2004 reflected the above conclusions. PX 369.

At his deposition, Dan Burch (GSK's Senior Vice President of Neurosciences) testified that when he gave the presentation at the GSK PMB meeting, he "knew there was no clinical ground to stand on . . . [and] was just trying to show . . . why we wouldn't even consider this or recommend this." Burch Dep. 152 (PX 121). He cited the lack of clinical support as the primary reason why he did not think GSK should ask the FDA to require generic companies to demonstrate bioequivalence to Wellbutrin IR. Id. at 152-53.

Similarly, Mr. Stout (GSK's President of U.S. Pharmaceutical Operations) testified at his deposition that the bioequivalence drift argument "would not fly at the FDA and, therefore, we had no basis to go the FDA." Stout Dep. 115 (PX 119). Although Mr. Stout could not recall specific discussions, he testified that he was "sure" both that GSK discussed bioequivalence drift with Biovail and that he communicated **[*110]** GSK's conclusions on the bioequivalence drift argument to Eugene Melnyk at Biovail. See id. at 108-09, 135, 253, 258.

In an internal GSK email dated December 9, 2004, a GSK employee provided answers to various questions that Mr. Stout had posed regarding generic versions of Wellbutrin XL. Among them was the following question and answer, which related to the metabolites evaluation request that later appeared in Biovail's Citizen Petition:

> [Question:] Biovail is curious if we have any information on metabolites that might form the basis of a challenge to the standard bioequivalence testing/standards. In other words, is there any reason to believe that a different formulation of Wellbutrin XL might have a different metabolite profile due to differences in absorption patterns, excipients, etc.
>
> . . . .
>
> [Answer:] [F]rom a PK perspective, there isn't any reason to believe that a different formulation will have a different metabolite profile. We've seen this in our own work with Wellbutrin IR, SR and XL, which were all formulated to give bioequivalence of the parent drug, and then shown to be bioequivalent for the (major) metabolites as well.
>
> <u>This information is available internally, but has not **[*111]** been shared with Biovail, and it is our recommendation not to share metabolite data with Biovail.</u>

PX 406 (emphasis added).

On December 1, 2005, several senior GSK managers, including Mr. Burch and Mr. Stout, participated in another internal GSK teleconference with the subject "Wellbutrin XL and Generic [Bioequivalence]." PX 681. Eight days later, an internal GSK email chain referenced a meeting between GSK's David Stout and Biovail's Eugene Melnyk and Doug Squires to occur on December 12, 2005. PX 434. GSK employees were asked if anything needed to be communicated to Mr. Stout regarding the meeting with Biovail. In response, one GSK employee asked: "have they [Biovail] filed a citizens [sic] petition on XL." PX 434. Another internal GSK teleconference regarding "Wellbutrin XL and Generic [Bioequivalence]" occurred on December 16, 2005, again involving GSK senior management like Mr. Burch and Mr. Stout. PX 682.

That same day, on December 16, 2005, Keith Muir, GSK's Director of Clinical Pharmacology, wrote:

> David Stout said that he wanted a Citizen's Petition prepared by the end of next week with a Clin Pharm scientific rationale for more rigorous BE [bioequivalence] requirements for Wellbutrin **[*112]** XL than for Wellbutrin SR. So I will be working on this for the better part of Monday and Tuesday.

PX 436; <u>see also</u> PX 435 (email from Keith Muir with similar text and referencing a draft "1 page summary of the strategy").

Biovail filed its Citizen Petition on December 20, 2005. On December 21, 2005, GSK's legal counsel, Bill Zoffer, sent a letter to Kenneth Cancellara, the Senior Vice-President and Chief Legal Officer at Biovail. The purpose of the letter was to

> confirm the outcome of conversations David Stout of GSK had with Eugene Melnyk and Douglas Squires [of Biovail] on December 12, 2005, and then briefly in follow up on December 13.
>
> Those discussions touched upon Biovail's efforts to explore and develop scientific issues related to appropriate review criteria for prospective generic copies of Wellbutrin XL, and the possibility of principled advocacy with FDA along those lines.
>
> <u>This is to confirm the position that David Stout communicated in the follow up call: GSK does not wish to participate in or be associated with any such Biovail explorations, deliberations, strategizing, decision-making, or ultimate advocacy with FDA</u>.

PX 280 (emphasis added). On December 23, 2005, GSK's Bill **[*113]** Zoffer circulated Biovail's Citizen Petition internally to various GSK team members. PX 438.

In response to Bill Zoffer's letter above, Biovail's Kenneth Cancellara answered by letter on January 9, 2006. Mr. Cancellara disputed Mr. Zoffer's characterizations of the discussions between GSK's David Stout and Biovail's Eugene Melnyk and Douglas Squires:

> [I]t is more accurate to state that Biovail explained to Mr. Stout its obligations to examine emerging scientific issues as they relate to Biovail's current and future products, including Wellbutrin XL. Since Wellbutrin XL is marketed by GSK, you are correct in stating that our two Companies have a shared interest in the overall safety, quality and integrity of the product.
>
> . . . .
>
> Biovail does not seek the participation of GSK's executives or scientists in this examination and did not indicate that such was being sought. Indeed, during Mr. Stout's telephone conference with Dr. Squires, it was Mr. Stout who sought and initiated the interaction between GSK and Biovail scientific and technical staff. This interaction, I understand, has now taken place.

PX 281.

At his deposition, Biovail's Douglas Squires testified:

> Q: Had there been collaboration **[*114]** between GSK and Biovail regarding the Citizen Petition before the Citizen Petition was complete?
>
> A: No, not that I recall.

Squires Dep. 104 (PX 120).

2. Analysis

The facts set forth above regarding GSK and the Citizen Petition are, at the very least, equally consistent - if not more consistent - with a theory that GSK and Biovail independently pursued the filing of a citizen petition with the FDA.

The fact that GSK benefitted from Biovail's Citizen Petition is not, by itself, sufficient to show concerted action. In SigmaPharm, Inc. v. Mutual Pharm. Co., Inc., one company filed a citizen petition requesting that the FDA require certain labeling information from generic competitors that would implicate a method for which the company held a co-exclusive license with another company. The court held that the citizen petition was "non-inculpatory, self-interested action." "That either or both companies would seek to impede competitors does not alone suggest a conspiracy . . ." *SigmaPharm, Inc. v. Mutual Pharm. Co., Inc., 772 F. Supp. 2d 660, 671 (E.D. Pa. 2011)*, aff'd on other grounds, *454 Fed. Appx. 64, 2011 WL 6145370 (3d Cir. 2011)*.

In this case, GSK has pointed to facts suggesting that it independently **[*115]** analyzed the possibility of filing a citizen petition with the FDA, and independently came to the conclusion that there was no clinical basis for the bioequivalence drift argument and the metabolites evaluation request as to the threo-and erythro- metabolites. The evidence suggests that GSK either independently decided not to file a citizen petition, or was in the process of drafting its own separate petition. At one point, a GSK employee queried whether Biovail intended to file a petition, evincing a lack of knowledge as to the existence or contents of Biovail's Citizen Petition. PX 434. One science document even recommended that GSK not share internal GSK information with Biovail. PX 406. GSK also confirmed with Biovail its unwillingness to participate in Biovail's Citizen Petition via letter. PX 280. Furthermore, Biovail's Douglas Squires testified that he did not recall collaboration between GSK and Biovail on the Citizen Petition before it was complete. Squires Dep. 104-05 (PX 120).

In sum, the plaintiffs have not pointed to sufficient evidence to permit a jury to reasonably infer the existence of concerted action in light of all the evidence pointing to independent action by GSK. **[*116]** Therefore, even if the Court did not grant Biovail's motion for summary judgment, the Court would grant GSK's motion for summary judgment as to the Impax and Watson lawsuits as well as the Citizen Petition.

An appropriate order will follow separately.

ORDER

AND NOW, this 11th day of May, 2012, upon consideration of the Biovail Defendants' Motion for Summary Judgment (Docket No. 410 in 08-cv-2431; Docket No. 378 in 08-cv-2433), the GSK Defendants' Motion for

Summary Judgment (Docket No. 411 in 08-cv-2431; Docket No. 379 in 08-cv-2433), the plaintiffs' consolidated opposition thereto, the defendants' replies in support, the plaintiffs' post-hearing submission, and following oral argument on March 20, 2012, IT IS HEREBY ORDERED, for the reasons stated in a memorandum of law bearing today's date, that the defendants' motions are GRANTED IN PART.

The Court does not decide today the motions for summary judgment as to the settlement transaction. The motions are granted as to the patent infringement lawsuits and the citizen petition.

BY THE COURT:

/s/ Mary A. McLaughlin

CIVIL MINUTES - GENERAL

Proceedings: (In Chambers) Order GRANTING in part and DENYING in part Plaintiffs' Motion for Summary Judgment

Before the Court is Plaintiffs' motion for partial summary judgment. Dkt. # 199. The Court finds the matter appropriate for decision without oral argument. *See* *Fed. R. Civ. P. 78*; *L.R. 7-15*. After considering the supporting and opposing papers, the Court GRANTS in part and DENIES in part the motion for partial summary judgment.

I. Background and Legal Standard

In an order entered on May 11, 2012, the Court set forth the background facts and legal standard relevant to this motion. *See* Dkt. # 332. The Court incorporates that background and legal standard here.

II. Discussion

Plaintiffs seek summary judgment on the counterclaims and affirmative defenses for inequitable conduct, patent misuse, unclean hands, unfair competition, and *Walker Process* antitrust violations. The Court will address each issue in turn.

a. '723 Patent

In an order issued May 11, 2012, the Court granted Defendants' motion for summary judgment on the validity **[*2]** of the '723 Patent. *See* Dkt. # 332. This holding has rendered Plaintiffs' motion for summary judgment on the affirmative defenses and counterclaims related to the '723 Patent MOOT.

b. Inequitable Conduct

Defendants have asserted counterclaims and affirmative defenses on the basis of inequitable conduct committed by Plaintiffs. Dkts. # 21, 22, 25, 50. The doctrine of inequitable conduct is an "equitable defense to patent infringement that, if proved, bars enforcement of a patent." *Therasense, Inc. v. Becton, Dickinson and Co., 649 F.3d 1276, 1285 (Fed. Cir. 2011)* ("*Therasense*"). An inequitable conduct defense asserts that a patentee misrepresented or omitted material information with the intent to deceive the United States Patent Office ("PTO") to issue a patent. *Id. at 1287*. In 2011, the Federal Circuit, sitting en banc, heightened the standards for proving inequitable conduct in the *Therasense* decision. The defense requires a showing of both intent and materiality. *Id. at 1290*. First, "the accused infringer must prove that the patentee acted with the specific intent to deceive the PTO." *Id.* This requires a showing "that the applicant knew of the reference, knew that it was material, and made a deliberate decision to withhold it." *Id.* Second, the accused infringer must show the but-for materiality **[*3]** of the omitted or misrepresented prior art. *Id. at 1291*. The "prior art is but-for material if the PTO would not have allowed a claim had it been aware of the undisclosed prior art." *Id.* Plaintiffs argue Defendants have not produced evidence to satisfy either the intent or materiality prongs of inequitable conduct. *Mot.* 8:22-25.

1. '987 Patent

The Court will first address Defendants' claims of inequitable conduct regarding the '987 Patent. The '987 Patent covers a "speed loader," which is a "magazine loader for ammunition preloaded with a stripper clip." *See Order Construing Patent Claims*, Dkt. # 114, at 5. Defendants claim the speed loader covered by the '987 Patent is an exact copy of a speed loader made by another firearms accessories manufacturer, the Beta Company. *Opp.* 4:10-16. Moreover, Defendants assert Cheng knew about the Beta Company's speed loader before he applied for the '987 Patent. *Id.*

In support of these assertions, Defendants proffer the testimony of Jon Morgan. Morgan and Cheng are listed as the co-inventors of the speed loader on the '987 Patent. *Facts* ¶ 45. Morgan is a former Marine who came up with the design of the speed loader while he was in an Army hospital for treatment from **[*4]** wounds received in Somalia in 1993. *Facts* ¶ 46. Morgan has since realized that he did not invent the speed loader. *Id.* Instead, Morgan believes that while he was under heavy medication in the hospital, he must have seen the Beta Company speed loader being carried by Army soldiers. *Facts* ¶ 48. About ten years later, after leaving the military, Morgan developed a prototype of the speed loader. *Facts* ¶ 49. At this time, Morgan asked Cheng to enter into a joint venture with him to fully develop and market the speed loader. *Facts* ¶ 50. Soon thereafter, Morgan was attending a gun show and saw the Beta Company's speed loader. *Facts* ¶¶ 51, 52. Morgan realized that the speed loader he thought he invented was an exact copy of the Beta Company's speed loader. *Id.*

Morgan told Cheng about the Beta Company's speed loader. *Facts* ¶ 55. Cheng said they should not to be concerned, and that they should move forward with patenting their own speed loader. *Facts* ¶¶ 56, 60. Cheng said that if Morgan was worried about any legal consequences, Morgan could assign ownership of the patent to Cheng. *Id.* Morgan did so, and Cheng proceeded to apply for a patent for the speed loader. *Id.* In his application, Cheng **[*5]** did not disclose the existence of the Beta Company speed loader to the PTO. *Facts* ¶ 62.

As noted above, to prove the intent prong of inequitable conduct, an infringer must demonstrate that the applicant knew of the prior art, knew that it was material, and made a deliberate decision to withhold it from the PTO. *Therasense, 649 F.3d at 1290*. The *Therasense* court also clarified that the intent of an applicant can be inferred from indirect and circumstantial evidence. *Id.* "However, to meet the clear and convincing evidence standard, the specific intent to deceive must be the single most reasonable inference able to be drawn from the evidence." *Id.* (internal quotation marks omitted). If Morgan's testimony is credited, Cheng knew another company had been selling an exact copy of the speed loader for many years. It could be inferred Cheng knew there were potential legal problems with patenting a speed loader that was an exact copy of another company's product, because Cheng convinced Morgan to assign his ownership to Cheng in order to protect Morgan from liability. After taking these precautions, Cheng omitted reference to the Beta Company's speed loader in his application to the PTO. Based on these facts, a finder **[*6]** of fact could find that clear and convincing evidence establishes that the single most reasonable inference to be drawn is that Cheng knew of the Beta Company speed loader, knew it was material to the '987 Patent application, and deliberately withheld this reference from the PTO.

An infringer asserting inequitable conduct must also prove the but-for materiality of the reference withheld. *Therasense, 649 F.3d at 1291*. Information is material to patentability if it "establishes, by itself . . . a prima facie case of unpatentability." *37 C.F.R. § 1.56*. Because Morgan has testified he invented the speed loader ultimately patented by Cheng, and testified that the '987 Patent speed loader is an exact copy of the Beta Company speed loader, there is sufficient evidence to establish the PTO would not have issued the '987 Patent if it had known of the Beta Company speed loader. *See* 35 U.S.C. § 101 ("Whoever invents or discovers any *new* and useful process, machine, manufacture, or composition of matter . . . may obtain a patent therefor . . .") (emphasis added). Furthermore, there is an exception to the materiality requirement in cases of "affirmative egregious misconduct." *Therasense, 649 F.3d at 1292*. This type of misconduct exists where a patentee "deliberately planned and carefully **[*7]** executed" a scheme to defraud the PTO and the courts. *Id.* (internal quotation marks omitted). A reasonable fact finder could also find clear and convincing evidence that Cheng deliberately and carefully executed a plan to mislead the PTO. Cheng's offer to relieve Morgan of any potential liability could reasonably be held to infer that Cheng knew he was deceiving the PTO, but decided to proceed anyways.

For these reasons, summary judgment on the inequitable conduct claims as they relate to the '987 Patent must be DENIED.

2. Other Patents

Defendants also present evidence in support of claims for inequitable conduct regarding the other patents-in-suit. Defendants argue Cheng intentionally deceived the PTO in regards to the '605, '750, '751, and '880 Patents by not disclosing the publication of the New Century catalog. *Opp.* 1:19-2:3; *Facts* ¶¶ 22-44. As for the '455 Patent, Defendants contend Cheng intentionally deceived the PTO by stealing the design for the combo tool claimed in the '455 Patent from Jon Morgan, and then applying to the PTO as the sole inventor of the '455 Patent. *Opp.* 6:8-8:6; *Facts* ¶¶ 63-81.

In addition, the evidence of the inequitable conduct related to the '987 Patent is also potentially **[*8]** relevant to the inequitable conduct claims regarding the other patents-in-suit. *See* *Consol. Aluminum Corp. v. Foseco Intern. Ltd., 910 F.2d 804, 812 (Fed. Cir. 1990)* (finding inequitable conduct as to one patent had an "immediate and necessary relation" to other patents, thereby rendering those patents unenforceable); *Hoffmann-La Roche, Inc. v. Promega Corp, 319 F. Supp. 2d 1011, 1017 (N.D. Cal. 2004)* ("The doctrines of infectious unenforceability and unclean hands have been developed to aid in determining whether an unconscionable act that occurs during the prosecution of one patent has an immediate and necessary relation to the equity sought in the prosecution of another patent.").

However, neither Plaintiffs nor Defendants have addressed the potential of "infectious unenforceability" in their briefs. Plaintiffs have not asserted there is a lack of evidence linking the patents together, and Defendants have not explained how the patents might be related. It would be improper to rule on the potential applicability of the '987 Patent misconduct to the other patents without the benefit of a more complete record, as well as briefing on this issue. *See* *Anderson, 477 U.S. 242, 106 S. Ct. at 2513* ("Neither do we suggest that the trial courts should act other than with caution in granting summary judgment."). Therefore, summary judgment on the issue of inequitable conduct regarding the other patents-in-suit **[*9]** is DENIED.

c. Patent Misuse

In order to assert the defense of patent misuse, a defendant must "show that the patentee has impermissibly broadened the 'physical or temporal scope' of the patent grant with anticompetitive effect." *Virginia Panel Corp. v.*

MAC Panel Co., 133 F.3d 860, 868 (Fed. Cir. 1997). Examples of patent misuse include "tying" the license of a patent to purchase of a separate product or requiring payment of royalties after a patent expires. *Id. at 869*.

In opposition, Defendants' sole statement regarding patent misuse is: "Cheng's fraudulent practice of patenting ideas that are old or belong to others, and thus also the practice of the company he runs, New Century, strongly supports the claims and defenses that Cheng committed patent misuse . . ." *Opp.* 9:18-20. Evidence regarding Plaintiffs' patenting of inventions that are either old or the property of others cannot support a claim of patent misuse, because it does not demonstrate that Plaintiffs sought to impermissibly broaden the scope of their patents. Plaintiffs' motion for summary judgment on this affirmative defense is GRANTED.

d. *Walker Process*

To prove a *Walker Process* claim, Defendants must prove that: (1) Plaintiffs attempted to enforce a patent; (2) the patent issued because of intentional **[*10]** fraud; (3) Plaintiffs' attempted enforcement of the patent threatens competition in a relevant market; (4) Defendants suffered antitrust damages; and (5) all other elements of federal ***antitrust law*** are met. *See* *Unitherm Food Sys., Inc. v. Swift-Eckrich, Inc., 375 F.3d 1341, 1355 (Fed. Cir. 2004)*, *rev'd on other grounds*, *546 U.S. 394, 126 S. Ct. 980, 163 L. Ed. 2d 974 (2006)*. The other elements of federal ***antitrust law*** in the Ninth Circuit are: (1) an agreement or conspiracy; (2) which is intended to harm or unreasonably restrain competition. *See* *McGlinchy v. Shell Chem. Co., 845 F.2d 802, 811 (9th Cir. 1988)*.

In opposition to the motion for summary judgment, Defendants state: "In short, Cheng's conduct detailed above supports Defendants' claims under *Walker Process* . . ." *Opp.* 9:21-22. By merely citing to the misconduct Defendants allege in support of their inequitable conduct claims, Defendants have wholly failed to even attempt to show there is evidence to support the antitrust elements of a *Walker Process* claim. Therefore, Plaintiffs' motion for summary judgment on the *Walker Process* counterclaims is GRANTED.

e. Unclean Hands

"The unclean hands doctrine derives from the equitable maxim that 'he who comes into equity must come with clean hands.'" *Ellenburg v. Brockway, Inc., 763 F.2d 1091, 1097 (9th Cir. 1985)*. Accordingly, a party seeking equitable relief must "have acted fairly and without fraud or deceit as to the controversy in issue." *Id.* ***[*11]*** The Court's holding regarding Defendants' defense of inequitable conduct is equally applicable to the defense of unclean hands. *See* *Consol. Aluminum, 910 F.2d at 812* ("Indeed, what we have termed 'inequitable conduct' is no more than the unclean hands doctrine applied to particular conduct before the PTO."). Therefore, Plaintiffs' motion for summary judgment on the affirmative defense of unclean hands is DENIED.

f. Unfair Competition

Defendants claim Plaintiffs competed unfairly in violation of the Lanham Act, *15 U.S.C. § 1125(a)*, as well as *California Business and Professions Code §§ 17200* and *17500*. Defendants assert these counterclaims for unfair competition are predicated on the claims of inequitable conduct. *Opp.* 9:24-26. In accord with the Court's holding on the inequitable conduct claims, summary judgment on the unfair competition counterclaims is DENIED.

g. Defendants' Discovery Responses

Plaintiffs argue their motion for partial summary judgment should be granted in its entirety because Defendants failed to disclose the factual bases for their counterclaims and affirmative defenses in discovery. *Reply* 2:7-3:13. For the claims and defenses on which the Court denies summary judgment, the Court finds that the description of Defendants' responses to discovery as laid out in Plaintiffs' **[*12]** moving papers adequately stated the bases for these claims and defenses. *See Mot.* 3:3-4:6, 5:2-17. To the extent Plaintiffs believe Defendants have contradicted any discovery responses, Plaintiffs are free to attempt to use such evidence for impeachment purposes. *See* *Fed. R. Civ. P. 33(c)* ("An answer to an interrogatory may be used to the extent allowed by the Federal Rules of Evidence.").

III. Conclusion

For the foregoing reasons, Plaintiffs' motion for partial summary judgment is GRANTED in part and DENIED in part. In summary, the motion is:

• DENIED as to the inequitable conduct claims;

• GRANTED as to the patent misuse defense;

• GRANTED as to the *Walker Process* claims;

• DENIED as to the unclean hands defense;

• DENIED as to the unfair competition claims; and

• Deemed MOOT as to the '723 Patent.

IT IS SO ORDERED.

United States District Court for the Eastern District of Missouri, Eastern Division

May 18, 2012, Decided; May 18, 2012, Filed

No. 4:11-CV-2068 (CEJ)

Reporter

2012 U.S. Dist. LEXIS 69784 *; 2012-1 Trade Cas. (CCH) P77,898; 2012 WL 1829883

RICK FAVALORO, [1] Plaintiff, vs. WEBSTER GROVES/SHREWSBURY AREA CHAMBER OF COMMERCE, Defendant.

Core Terms

subject-matter, antitrust, proposed amended complaint, federal jurisdiction, motion to dismiss, motion for leave, advertisements

Counsel: **[*1]** Rick Favaloro, Plaintiff, Pro se, Webster Groves, MO.

For Webster Groves/Shrewsbury Area Chamber of Commerce, Defendant: James D. Bass, LEAD ATTORNEY, Erin E. Guffey, STINSON AND MORRISON, St. Louis, MO.

Judges: CAROL E. JACKSON, UNITED STATES DISTRICT JUDGE.

Opinion by: CAROL E. JACKSON

Opinion

MEMORANDUM AND ORDER

This matter is before the Court on the defendant's motion to dismiss plaintiff's complaint. Plaintiff has filed a response in opposition and has filed a motion for leave to amend the complaint. Defendant opposes plaintiff's request to amend. Both motions have been fully briefed and are ready for disposition.

I. Background

The defendant is an organization comprised of business owners, of which plaintiff is a former member. In his *pro se* complaint, plaintiff alleges that defendant refused to publish business advertisements submitted by plaintiff for inclusion in an annual publication. Plaintiff asserts that defendant engaged in a scheme to defraud by collecting his membership fees while refusing to publish his advertisements, in violation of [18 U.S.C. §§ 1343](#) and [1346](#). Plaintiff

---

[1] Plaintiff refers to himself as "Rick Favaloro, J.D.," and states that he is "a licensed Texas attorney with a perfect ethical record," (Doc. #11, p. 2, n. 1). While plaintiff may have a law degree, he is not licensed to practice law in Texas by reason of disbarment. See Favaloro v. Comm'n for Lawyer Discipline, 13 S.W.3d 831 (Tex. App. 2000); State Bar of Texas Lawyer Directory, Richard Favaloro, available at http://www.texasbar.com.

also claims that defendant's cancellation or non-renewal of plaintiff's membership constitutes defamation and a violation of *Mo. Rev. Stat. § 355.211(1)*. **[*2]** [2]

The defendant moves to dismiss the complaint for lack of subject-matter jurisdiction, failure to state a claim, and lack of Article III standing. In response, plaintiff argues that the motion to dismiss is premature because process has not been served on defendant nor has defendant been asked to waive service under *Fed. R. Civ. P. 4 (d)*.

On April 23, 2012, plaintiff filed a motion for leave to file an amended complaint. The proposed amended complaint seeks to add as defendants several individual members of defendant's organization, two of defendant's attorneys—one of whom represents defendant **[*3]** here, Rotary International, the Rotary Club of Webster Groves, several individual officers of the Webster Grover Rotary Club, and an attorney for the Rotary Club. (Doc. #9-1). In the proposed amended complaint, plaintiff asserts the following claims: violation of the Sherman Act and the Clayton Act, *15 U.S.C. § 1, et seq.*, for refusing to publish plaintiff's advertisements (Counts 1-5); violation of *Mo. Rev. Stat. § 355.211* for suspending or terminating plaintiff's Rotary Club and Chamber of Commerce memberships (Counts 6-9); breach of fiduciary duty (Count 10); and defamation (Count 11). In the proposed amended complaint plaintiff also seeks a declaration, pursuant to *28 U.S.C. §§ 2201* and *2202*, that he "has at all relevant times been a member in good standing of the Chamber." Id.

II. Discussion

A. Motion to Dismiss

Initially, the Court finds that defendant's motion to dismiss is not premature as argued by plaintiff. It is true that a court will not normally have jurisdiction over a party prior to service or waiver. See *Murphy Bros., Inc v. Michetti Pipe Stringing, 526 U.S. 344, 350, 119 S. Ct. 1322, 143 L. Ed. 2d 448 (1999)*. In this case, there was no service nor a request for waiver of service. However, service may be **[*4]** waived by a defendant's appearance in an action. Cf. *Xyrous Communications, LLC v. Bulgarian Telecommunications Co. AD, 2009 U.S. Dist. LEXIS 80620, 74 Fed. R. Serv. 3d 629 (E.D. Va. 2009)*; *Swanson v. City of Hammond, Ind., 411 F. App'x 913, 915-16 (7th Cir. 2011)*. Here, defendant effectively waived service by filing a motion to dismiss under *Rule 12(b), Fed. R. Civ. P.*, that did not challenge the sufficiency of service. See *Fed. R. Civ. P. 12(h)(1)* (a party waives any defense listed in *Rule 12(b)(2)-(5)* by omitting from its first-filed Rule 12 motion, assuming the defense was available at that time). Further, *Fed. R. Civ. P. 12(h)(3)* provides that if "the court determines *at any time* that it lacks subject-matter jurisdiction, the court must dismiss the action." (emphasis added). Thus, the issue of subject-matter jurisdiction is one that must be addressed by the Court, even without a motion by the defendant.

Turning to the merits of defendant's dismissal motion, the Court must first resolve defendant's argument that subject matter jurisdiction is lacking. *Carlson v. Arrowhead Concrete Works, Inc., 445 F.3d 1046 (8th Cir. 2006)*. Subject-matter jurisdiction requires that the party invoking federal jurisdiction "demonstrate **[*5]** an actual, ongoing case or controversy within the meaning of Article III of the Constitution." *Republican Party of Minn. v. Klobuchar, 381 F.3d 785, 789-90 (8th Cir.2004)* (internal quotations omitted). "Standing is always a 'threshold question' in determining whether a federal court may hear a case." *281 Care Committee, 638 F.3d at 627* (citing *Eckles v. City of Corydon, 341 F.3d 762, 767 (8th Cir.2003))*. "A party invoking federal jurisdiction has the burden of establishing that he has

---

[2] *Mo. Rev. Stat. § 355.211(1)* provides:

> No member of a public benefit corporation other than a church or convention or association of churches or mutual benefit corporation may be expelled or suspended, and no membership or memberships in such corporations may be terminated or suspended except pursuant to a procedure which is fair and reasonable and is carried out in good faith. In no event shall suspension of a member's right to use amenities, recreational facilities or such other facilities as that member may be entitled to, be considered to be a suspension by any such corporation of such member.

the right to assert his claim in federal court." *281 Care Committee v. Arneson, 638 F.3d 621, 627 (8th Cir. 2011)* (citing *Schanou v. Lancaster Cnty. Sch. Dist. No. 160, 62 F.3d 1040, 1045 (8th Cir.1995))*.

Plaintiff asserts that his claims are based on *18 U.S.C. §§ 1343* [3] and *1346*. [4] Plaintiff's citation to those statutes is insufficient to show that this action arises under federal law. First, *§ 1343* is a criminal statute that does not provide for a private cause of action. See *Wisdom v. First Midwest Bank, 167 F.3d 402 (8th Cir.1999)* (*§ 1343* does not imply private cause of action); *Napper v. Anderson, Henley, Shields, Bradford & Pritchard, 500 F.2d 634 (5th Cir.1974)*. Plaintiff lacks standing to enforce **[*6]** a criminal statute from which no private cause of action is implied. Id.; see also *United States v. Wadena, 152 F.3d 831 (8th Cir.1998)* (noting that only the federal government had standing to enforce *18 U.S.C. § 242*, the criminal equivalent to *42 U.S.C. § 1983*) (citing *Cok v. Cosentino, 876 F.2d 1, 2 (1st Cir. 1989))*. Second, *§ 1346* does not provide for any right or remedy; it merely states a definition for the phrase "scheme or artifice to defraud." As such, neither statute cited by plaintiff is sufficient to invoke federal jurisdiction.

The original complaint does not assert, nor does it appear from the record, that federal jurisdiction over plaintiff's state-law claims arises under *28 U.S.C. § 1332(a)*. As such, plaintiff's state-law claims will also be dismissed without prejudice for lack of subject-matter jurisdiction.

B. Motion for Leave to File Amended Complaint

Rule 15(a), Fed. R. Civ. P., allows for the filing of an amended complaint "only with the opposing party's written consent or the court's leave. The court should freely give leave when justice so requires." *Fed. R. Civ. P. 15(a)(2)*. "[D]enial of leave to amend a pleading is appropriate only in those limited circumstances in which undue delay, bad faith on the part of the moving party, futility of the amendment, or unfair prejudice to the nonmoving party can be demonstrated." *Roberson v. Hayti Police Dept., 241 F.3d 992, 995 (8th Cir.2001)*.

Defendant argues that plaintiff's motion for leave to amend should be denied because the proposed amendment would **[*8]** be futile. An amendment is futile if "'the amended [pleading] could not withstand' a motion to dismiss pursuant to *Rule 12, Fed.R.Civ.P.*" *Bakhtiari v. Beyer, No. 4:06-CV-01489, 2008 U.S. Dist. LEXIS 60173, 2008 WL 3200820, *1 (E.D. Mo. 2008)* (citing *In re Senior Cottages of Am., LLC, 482 F.3d 997, 1001 (8th Cir. 2007))*.

The Court agrees that the proposed amended complaint would be futile. The only federal claims asserted in the proposed amended complaint? antitrust violations under the Sherman and Clayton Acts (Counts 1-5)—would not survive a motion under *Fed. R. Civ. P. 12(b)(6)*. Private enforcement of federal ***antitrust law*** under Title 15, United States Code, requires that the plaintiff allege antitrust standing. *Cargill, Inc. v. Monfort of Colo., Inc., 479 U.S. 104, 113, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)*. This requirement is analyzed under the same pleading standard applicable to a motion under *Rule 12(b)(6), Fed. R. Civ. P.* *Sprint Nextel Corp. v. AT & T Inc., 821 F. Supp. 2d 308, 312 n.1 (D.D.C. 2011)*. Antitrust standing requires allegations which, if true, would demonstrate an antitrust injury, *i.e.*, an injury "of the type the antitrust laws were designed to prevent and that flows from that which makes the

---

[3] *18 U.S.C. § 1343* provides:

> Whoever, having devised or intending to devise any scheme or artifice to defraud, or for obtaining money or property by means of false or fraudulent pretenses, representations, or promises, transmits or causes to be transmitted by means of wire, radio, or television communication in interstate or foreign commerce, any writings, signs, signals, pictures, or sounds for the purpose of executing such scheme or artifice, shall be fined under this title or imprisoned not more than 20 years, or both. If the violation affects a financial institution, such person shall be fined not more than $1,000,000 or imprisoned not more than **[*7]** 30 years, or both.

[4] *18 U.S.C. § 1346* provides:

> For the purposes of this chapter, the term 'scheme or artifice to defraud' includes a scheme or artifice to deprive another of the intangible right of honest services.

defendants' acts unlawful." *Brunswick Corp. v. Pueblo Bowl—O—Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)* **[*9]** . Clearly, plaintiff's claims that the proposed defendants refused to print his advertisements and canceled his membership are not the sort of conduct the antitrust laws were designed to prevent. Id. (granting summary judgment and denying leave to amend regarding claims against not-for-profit organization of surgeons and its president for refusal to allow plaintiff to participate and advertise at organization events).

The remaining claims in the proposed amended complaint would be dismissed for lack of subject-matter jurisdiction. Plaintiff's cites to *28 U.S.C. §§1332*, *1367*, and *2201*, but neither statute is sufficient to invoke federal jurisdiction here. *Section 1332(a)* requires complete diversity among all adverse parties. *Strawbridge v. Curtiss, 7 U.S. 267, 2 L. Ed. 435 (1806)*. Plaintiff asserts that diversity of citizenship exists because he is a Missouri citizen and Rotary International is an Illinois citizen. His assertion, however, ignores the fact that the other defendants named in the proposed amendment are also citizens of Missouri, thus preventing complete diversity and jurisdiction under *§1332(a)*. Additionally, *28 U.S.C. § 2201* **[*10]** provides for the procedural remedy of declaratory judgment, but does not itself provide a basis for federal jurisdiction. *Aetna Life Ins. Co. v. Haworth, 300 U.S. 227, 57 S. Ct. 461, 81 L. Ed. 617 (1937)*. Finally, because the federal claims plaintiff seeks to assert in the proposed amendment would be dismissed, supplemental jurisdiction over plaintiff's state-law claims is not available under *28 U.S.C. § 1367*.

*****

For the reasons discussed above,

IT IS HEREBY ORDERED that the defendant's motion to dismiss the complaint for lack of subject-matter jurisdiction [Doc. #3] is **granted**.

IT IS FURTHER ORDERED that the plaintiff's motion for leave to file an amended complaint [Doc. #9] is **denied.**

Opinion

ORDER GRANTING MOTION TO DISMISS WITHOUT LEAVE TO AMEND

Now **[*3]** before the Court is the motion filed by Defendants SD-3C, LLC ("SD-3C"), Panasonic Corporation ("Panasonic"), Panasonic Corporation of North America ("PNA"), Toshiba Corporation ("Toshiba"), Toshiba America Electronic Components, Inc. ("TAEC"), and Sandisk Corp. ("SanDisk") (collectively, "Defendants") to dismiss the First Amended Complaint ("FAC") filed by Plaintiffs. The Court finds that this matter is appropriate for disposition without oral argument and is deemed submitted. *See Civ. L.R. 7-1(b)*. Accordingly, the hearing set for May 25, 2012 is HEREBY VACATED. Having carefully reviewed the parties' papers and considering their arguments and the relevant authority, and good cause appearing, the Court hereby GRANTS Defendants' motion to dismiss.

BACKGROUND

This antitrust action challenges an alleged patent licensing arrangement to control the availability and pricing of Secure Digital Memory Card ("SD Card") technologies and thereby restrain trade. Plaintiffs are indirect purchasers of SD Cards from March 15, 2007 to the present. SD Cards are flash memory cards used in various devices such as digital cameras and cell phones. (FAC ¶¶ 43-46.)

Plaintiffs challenge the standard-setting process **[*4]** created in the late 1990s that resulted in the SD Memory Card Specification ("Specification") and licensing arrangements. (*Id.* ¶¶ 3, 73, 74, 80.) Defendant SD-3C licenses patents and other intellectual property necessary to practice the Specification developed by the Defendants in 1999 and released in 2000. (*Id.* ¶¶ 1,3, 53, 55-59.) According to the allegations in the amended complaint, the violations Plaintiffs challenge occurred "[a]t least as early as August 29, 1999," when Panasonic, SanDisk, and Toshiba agreed to develop the Specification jointly or "at least as early as January 1, 2000," when Defendants publicly announced the establishment of the SD Association, a standard-setting organization responsible for developing subsequent versions of the Specification. (*See id.* ¶¶ 128, 142.)

Plaintiffs contend that, by virtue of a 2003 licensing agreement, companies that wish to make SD Cards and licensed the SD-3C technology would be required to pay a 6% royalty on all SD Cards sold. (*Id.* ¶¶ 3, 62.) In 2006, SD-3D offered an amendment to the 2003 SD Card License, which included a provision that allegedly serves as a "minimum **[*5]** reference price of the calculations of licensees' royalty obligations" under the SD Card License. (*Id.* ¶ 5.)

In addition, Plaintiffs incorporate the allegations in a related and previously dismissed complaint filed in *Samsung Electronics Co., Ltd. v. Panasonic Corp. et al.*, C 10-03098 JSW ("Samsung Action"). (*See* FAC ¶¶ 42.) The second amended complaint in that matter, based on the same facts and specifically incorporated here, was dismissed without leave to amend on January 3, 2012 for failure to state a cognizable claim within the statute of limitations.

Plaintiffs, indirect purchasers of the allegedly price-inflated SD Cards, filed this action on March 15, 2011. On February 21, 2012, Defendants jointly moved to dismiss the complaint.

The Court shall address specific additional facts in the remainder of this Order.

LEGAL STANDARD

A motion to dismiss is proper under *Federal Rule of Civil Procedure 12(b)(6)* where the pleadings fail to state a claim upon which relief can be granted. The complaint is construed in the light most favorable to the non-moving party and all material allegations in the complaint are taken to be true. *Sanders v. Kennedy, 794 F.2d 478, 481 (9th Cir. 1986)*. However, **[*6]** even under the liberal pleading standard of *Federal Rule of Civil Procedure 8(a)(2)*, "a plaintiff's obligation to provide the 'grounds' of his 'entitle[ment] to relief' requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (citing *Papasan v. Allain, 478 U.S. 265, 286, 106 S. Ct. 2932, 92 L. Ed. 2d 209 (1986))*.

Pursuant to *Twombly*, a plaintiff must not merely allege conduct that is conceivable but must instead allege "enough facts to state a claim to relief that is plausible on its face." *Id. at 570*. "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937, 1949, 173 L. Ed. 2d 868 (2009)* (citing *Twombly, 550 U.S. at 556*). "The plausibility standard is not akin to a probability requirement, but it asks for more than a sheer possibility that a defendant has acted unlawfully.... When a complaint pleads facts that are merely consistent with a defendant's liability, it stops short of the line between possibility and plausibility of entitlement **[*7]** to relief." *Id.* (quoting *Twombly, 550 U.S. at 556-57*) (internal quotation marks omitted). If the allegations are insufficient to state a claim, a court should grant leave to amend, unless amendment would be futile. *See, e.g., Reddy v. Litton Indus., Inc., 912 F.2d 291, 296 (9th Cir. 1990)*; *Cook, Perkiss & Liehe, Inc. v. N. Cal. Collection Serv., Inc., 911 F.2d 242, 246-47 (9th Cir. 1990)*.

ANALYSIS

A. Antitrust Causes of Action Are Barred by the Statute of Limitations.

Under the Clayton Act, *15 U.S.C. section 15b*, private antitrust claims are subject to a four-year statute of limitations. *See Hennegan v. Pacifico Creative Serv., Inc., 787 F.2d 1299, 1300 (9th Cir. 1986)*. "A civil cause of action under the [antitrust laws] arises at each time the plaintiff's interest is invaded to his damage, and the statute of limitations begins to run at that time." *AMF, Inc. v. General Motors Corp., 591 F.2d 68, 70 (9th Cir. 1979)* (quoting *Twin City Sportservice, Inc. v. Charles O. Finley & Co., 512 F.2d 1264, 1270 (9th Cir. 1975)*.

Although generally a cause of action accrues and the statute of limitations begins to run at the time a defendant commits an action that injures plaintiff's business, in the **[*8]** context of a continuing conspiracy, this has been construed to mean that "each time a plaintiff is injured by an act of the defendants a cause of action accrues to him to recover damages caused by that act and that, as to those damages, the statute of limitations runs from the commission of the act." *AMF, Inc. v. General Motors Corp., 591 F.2d 68, 71 (9th Cir. 1979)*. In this way, the continuing violations doctrine can save an otherwise barred claim. In ***antitrust law***, "[a] continuing violation is one in which the plaintiff's interests are repeatedly invaded and a cause of action arises each time the plaintiff is injured." *Pace Industries, Inc. v. Three Phoenix Co., 813 F.2d 234, 237 (9th Cir. 1987)* (citation omitted). It is clear, however, that "a continuation of harm to plaintiffs alone will not keep the cause of action alive without some overt act or continuing conduct of defendants during the limitations period." *Electroglas, Inc. v. Dynatex Corp., 497 F. Supp. 97, 105 (N.D. Cal. 1980)*. [1] "When a continuing violation exists, the limitations period runs from the 'last overt act' by the defendant, which must be (1) a new and independent act that is not merely a reaffirmation of a previous **[*9]** decision that (2) inflicts a 'new and accumulating' injury on the plaintiff." *Red Lion Medical Safety Inc. v. Ohmeda, Inc., 63 F. Supp. 2d 1218, 1223 (E.D. Cal. 1999)* (citing *Pace Industries, 813 F.2d at 238*).

In their First Amended Complaint, Plaintiffs in this action allege the same basic underlying facts as those that were dismissed in the related Samsung Action. Similarly, as this Court found there, Defendants' allegedly unlawful conduct occurred well beyond the statute of limitations period lapsed. According to both complaints, this conduct caused permanent cost differentials **[*10]** at that time. This Court, in the Samsung Action, found that the underlying facts did not create a continuing violation that restarted the statute of limitations period.

In the Ninth Circuit, "[a] cause of action in antitrust accrues each time a plaintiff is injured by an act of the defendant and the statute of limitations runs from the commission of the act." *Pace, 813 F.2d at 237*. Further damages accrued by plaintiffs do not restart the statute of limitations period, even if the injuries are continuing. *See id.* The "statute of limitations is not extended by continued sales at an allegedly monopolistic price because the 'monopolist's simple charging of its profit-maximizing price is a naturally expected consequence of a monopoly and can hardly be said to be [an] independent [act].'" *Kaiser Foundation v. Abbott Laboratories, 2009 U.S. Dist. LEXIS 107512, 2009 WL 3877513, at *7 (C.D. Cal. Oct. 8, 2009)* (quoting II Areeda & Hovenkamp, ***Antitrust Law***, ¶ 320c4, at 298-99 (3d ed. 2007)). The "statute of limitation runs from the time of commission of the act, notwithstanding that high prices may last indefinitely into the future." *See id.*

Plaintiffs contend that, as consumers of SD Cards who did not suffer any injury until **[*11]** they more recently purchased the cards at supra-competitive prices, they cannot have made a claim until defendants actually extracted an excessive price. However, the Court is not persuaded by the distinction between consumers in this action and competitors in the Samsung Action. The statute of limitations, on a continuing violation theory, runs from the time of the last overt act made by the defendant, not from the last purchase made by a potential plaintiff. Should the Court find otherwise, there would essentially be no statute of limitations bar to indirect purchaser claims. As the Areeda treatise explains, if "mere[ly] charging ... a monopoly price constitutes a 'continuing violation' tolling the statute, then we have indefinitely lengthened the statute of limitation." *Id.* (citing Areeda at ¶ 320c, at 286).

Accordingly, the Court finds, based on the same or similar facts underpinning Plaintiffs' claims in this matter and the related and incorporated claims in the Samsung Action, that Plaintiffs' antitrust claims fall outside the statute of limitations period and are therefore dismissed.

B. Remaining Claims Are Barred.

In addition, Plaintiffs' state antitrust claims fall outside the **[*12]** statute of limitations period for all of the same reasons applicable to its federal antitrust claims. *See* *Cal. Bus. & Prof. Code § 16750.1*; *Corwin v. Los Angeles Newspaper Service Bureau, Inc., 4 Cal.3d 842, 852-53, 94 Cal. Rptr. 785, 484 P.2d 953 (1971)* (Cartwright Act interpreted consistently with Sherman Act).

Plaintiffs allege a claim for unfair competition under *California Business and Professions Code § 17200* ("*Section 17200*") which prohibits unfair competition, including "any unlawful, unfair or fraudulent business act or practice." Plaintiff claims to have suffered injury from a competitor's unlawful business act or practice. (FAC ¶¶ 140-152.) An

[1] Any harm that accrues after the tolling of the statute of limitations periods but that is associated with an overt act that occurred prior to the limitations period is not remediable. However, "each separate cause of action that so accrues [during the statute of limitations period] entitles a plaintiff to recover not only those damages which he has suffered at the date of accrual, but also those which he will suffer in the future from the particular invasion, including what he has suffered during and will predictably suffer after trial." *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 338-39, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971)*.

action based on *Section 17200* "borrows" violations of other laws and treats them as unlawful practices. *Chabner v. United Omaha Life Ins. Co., 225 F.3d 1042, 1048 (9th Cir. 2000)*.

The "unlawful" prong of *Section 17200* prohibits "any practices forbidden by law, be it civil criminal, federal, state, or municipal, statutory, regulatory, or court-made." *Saunders v. Superior Court, 27 Cal. App. 4th 832, 838-39, 33 Cal. Rptr. 2d 438 (1994)* (internal quotation omitted). Because the Court has concluded that Plaintiffs have failed to state a claim under any independent law, the Court similarly finds **[*13]** that Plaintiffs have failed to state a claim under *Section 17200* for unlawful business practices and dismisses the claim.

Lastly, because the Court finds that Plaintiffs fail to state a claim under either federal or State law, their last claim for unjust enrichment and disgorgement of profits fails to state a claim for damages.

CONCLUSION

For the foregoing reasons, the Court GRANTS Defendants' motion to dismiss the entirety of the First Amended Complaint. Having been given previous three chances to amend the complaint in the related matter based on the same set of facts and having dismissed this once-amended complaint based entirely on an issue of law, the Court finds that it is appropriate to dismiss the complaint without leave to amend.

A separate judgment shall issue and the clerk may close the file.

IT IS SO ORDERED.

Opinion

ORDER ON DEFENDANT'S MOTIONS FOR SUMMARY JUDGMENT, OR, IN THE ALTERNATIVE, SUMMARY ADJUDICATION OF ISSUES

(Doc. 47)

INTRODUCTION

This is a business dispute between Plaintiff Weco Supply Company, Inc. ("Weco") and Defendant The Sherwin-Williams Company ("Sherwin-Williams"). Weco filed the initial action against Sherwin-Williams in Fresno County Superior Court on December 22, 2009. Sherwin-Williams filed a cross-complaint. On February 2, 2010, Sherwin-Williams removed the action to federal court on the basis of diversity jurisdiction. Sherwin-Williams filed a First

Amended Cross-Complaint ("FACC") on August 3, **[*2]** 2010, and Weco filed a First Amended Complaint ("FAC") on September 3, 2010. Sherwin-Williams now moves for summary judgment on the FAC and FACC or, in the alternative, summary adjudication of issues. See Court's Docket, Doc. No. 47. Weco has filed an opposition to the motion, and Sherwin-Williams has filed a reply. The matter was taken under submission without oral argument. For the reasons set forth below, Sherwin-Williams' motion is granted in part and denied in part.

BACKGROUND[1]

Plaintiff Weco is a California corporation engaged in the business of selling paint and welding supplies. See AMF No. 1. Defendant Sherwin-Williams is an Ohio corporation engaged in the business of manufacturing and distributing paint products. See Notice of Removal; AMF No. 4. For over thirty years, Weco purchased Sherwin-Williams manufactured paint for resale to its customers. See AMF No. 4. In 2002, Weco and Sherwin-Williams entered into a written agreement for the distribution of Sherwin-Williams paint products, referred to as a Direct **[*4]** Jobber Agreement (the "Jobber Agreement"). See UMF No. 1. The Jobber Agreement states "[Weco] shall exercise its best efforts to market the Products to End Users and to promote the goodwill and market reputation of [Sherwin-Williams] and the Products." See UMF No.2; FAC, Ex. A ¶ 2c. Among other things, the Jobber Agreement reserves to Sherwin-Williams the right to "sell Products directly to any jobber and/or any End User in any geographical area including the same geographical area serviced by [Weco]." See UMF No. 4; FAC, Ex. A ¶ 4b. The Jobber Agreement sets forth the following limitation of remedies clause:

> [Sherwin-Williams] shall in no event be be liable to [Weco] or to any other person claiming through [Weco], whether in contract, tort, strict product liability or otherwise, for indirect, special, incidental or consequential damages, loss of profits, demurrage, or penalties arising from any cause whatsoever.

UMF No. 7; FAC, Ex. A ¶ 6b.

Two automotive body shops, Mastercraft and Color Glow, were Weco's key customers. Mastercraft and Color Glow purchased large quantities of Sherwin-Williams' "Western" product line from Weco. See UMF No. 8; AMF No.15. In the year preceding January 2007, **[*5]** Weco purchased more "Western" paint from Sherwin-Williams, than other Sherwin-Williams product line. See DRAMF Nos. 18, 19. Weco also purchased smaller quantities of the Sherwin-Williams "Ultra" product line [2] to sell to Mastercraft and Color Glow. AMF No. 19; Sorensen Decl. ¶ 17; DRAMF No. 18, 19. Sherwin-Williams sold "Western" paint to Weco for 23% off the jobber price, plus an additional 9% off if Weco purchased in bulk. See UMF No. 32. Weco, in turn, sold the Sherwin-Williams "Western" paint to Mastercraft and Color Glow at a profit margin of 15% to 18%. UMF No. 35. Sherwin-Williams was aware of the prices Weco charged Mastercraft and Color Glow, and, as Weco's supplier, it necessarily knew Weco's paint acquisition costs. PRUMF No. 29; Sorensen Decl. ¶ 19. However, Weco undertook efforts to keep its pricing and cost information secret from the general public and its competitors. PRUMF No. 29; Sorensen Decl. ¶ 19.

---

[1] "DUMF" refers to the Amended Separate Statement of Undisputed Material Facts and Supporting Evidence in Support of Defendant's Motions for Summary Judgment, or, in the alternative Summary Adjudication of Issues. See Court's Docket, Doc. No. 50. "AMF" refers to Weco's Statement of Additional Disputed Material Facts. See id., Doc. No. 57-1. "PRDUMF" refers to Weco's Response to Sherwin-Williams' Amended Separate Statement of Undisputed Material Facts. See id. "DRAMF" refers to Sherwin-Williams' Response to Weco's Additional Disputed Facts. See id. Doc. No. 60-1. The Court will note any factual disputes where they exist, and, for purposes of summary judgment, will construe any ambiguities in the light most **[*3]** favorable to Weco, the non-moving party. See *Stegall v. Citadel Broad, Inc., 350 F.3d 1061, 1065 (9th Cir. 2003)*.

The Court notes Weco has filed written objections to the Declarations of Harvey Hill, William Turner, and Robert Latunski filed in support of the motion to dismiss. See Court's Docket, No. 57-2. Sherwin-Williams has filed written objections to the Declaration of John Sorensen filed in support of Weco's Opposition. See Court's Docket, Doc. No. 61. To the extent the facts set forth in the declarations are disputed, the Court does not rely on them, and therefore makes no rulings on the evidentiary objections, at the summary judgment stage.

[2] Weco contends the "Ultra" product line is Sherwin-Williams "top-of-the-line" automotive paint and is much more expensive than the "Western" product line. See AMF No. 20; Sorensen Decl. ¶ 7.

From time to time, William Turner, a Sherwin-Williams representative, visited the **[*6]** Mastercraft and Color Glow facilities to provide technical support and sales information. See UMF No. 49; Turner Decl. ¶¶ 3, 20. On these visits, Mr. Turner acted as Weco's supplier, not as a direct seller to Mastercraft and Color Glow. See PRDUMF No. 49; Sorensen Decl.¶ 20. Weco was aware, however, that from time to time, prior to January 2007, Mastercraft and Color Glow purchased some paint directly from the Sherwin-Williams store located in Fresno. See Sorensen Depo. 136:21-137:14.

In or about January 2007, Sherwin-Williams announced it was discontinuing the "Western" paint line and intended to replace it with another line of paint. See UMF Nos. 10, 11; Turner Decl. ¶10; PRUMF No. 11; Sorensen Depo. 100:3-13; 112:17-21. Sherwin-Williams contends its purpose in discontinuing the "Western" product line was to introduce a higher quality paint that was more compliant with California's legal limits on volatile organic compounds ("VOCs"). See UMF No. 13; Latunski Decl. ¶ 7. Weco responded to the announcement by placing a large order [3] for "Western" paint from Sherwin-Williams in late January 2007, in order to meet the continued demand of Mastercraft and Color Glow. See AMF Nos. 29, 30. **[*7]** Weco also met with Mastercraft and Color Glow to inform them that the "Western" product line was being discontinued, and to explore substitute paint lines, including alternative Sherwin-Williams paints, to meet their demand once Weco's supply of "Western" paint was exhausted. See AMF No. 31; Sorensen Decl. ¶ 13; DRAMF No. 31.

Sherwin-Williams contends Weco was attempting to sell Mastercraft and Color Glow other manufacturers' products [4] to replace Sherwin-Williams products. See UMF Nos. 16, 17, 19; Desai Depo. 46:7-49:11; Barcellos Depo. 66:16-67:12. Thereafter, Sherwin-Williams offered to sell paint directly [5] to Mastercraft and Color Glow. See UMF Nos. 20, 21; Turner Decl. ¶ 8. Before Color Glow started purchasing directly from Sherwin-Williams, it provided Sherwin-Williams with a copy of Weco's price list [6] for Sherwin-Williams paint. See UMF No. 28; Desai Depo. 26:21-27:10. The prices Sherwin-Williams offered to Mastercraft and Color Glow were intended to compete with Weco's offer to sell paint manufactured by Matrix. See UMF No. 22; Latunski Decl. ¶ 4; Turner Decl. ¶ **[*8]** 8.

After Sherwin-Williams made the offer to sell directly to Mastercraft and Color Glow, Color **[*9]** Glow agreed to purchase its paint requirements directly from Sherwin-Williams. See UMF No. 25; PRUMF No. 25; Desai Depo. 20:16-22:21. Mastercraft continued to purchase the "Western" line from Weco, but eventually began purchasing directly from Sherwin-Williams for some of its paint needs. See UMF Nos. 26, 27. The prices Sherwin-Williams charged Mastercraft and Color Glow for "Western" paint were less than the prices charged by Weco. See AMF No. 34; DRAMF No. 34. Weco was forced to sell Mastercraft the remaining "Western" paint from the large January 2007 order at the price Sherwin-Williams had quoted to Mastercraft, which cut into Weco's profit margin and caused it to lose business to its former supplier. See PRUMF No. 26; Sorensen Depo. 169:6-9; DRAMF No. 55. Sherwin-Williams maintains the price it offered to Mastercraft and Color Glow preserved a profit margin, and that it earned approximately 4% more than the price sold to Weco. See UMF No. 34; Turner Decl. ¶ 10. Weco disputes this, citing the increased number of deliveries Sherwin-Williams had to make to sell a month's worth of paint directly to Mastercraft and Color Glow, compared with making one delivery of a truck-load quantity **[*10]** to Weco, as well as increased fuel costs and extra employee time. See PRDUMF No. 31; Sorensen Decl. ¶ 16. The owner of

---

[3] As discussed below, this order is the subject of Sherwin-Williams' counterclaims. See UMF No. 43; PRUMF No. 43.

[4] Weco disputes this and maintains that, in or about 2006, it offered paint manufactured by Matrix as an alternative to Sherwin-Williams "Ultra" paint line, but only after Mastercraft and Color Glow asked for a more affordable alternative, and only so that it wouldn't lose Mastercraft and Color Glow's premium paint business. See PRUMF No. 19; Sorensen Depo. 156:11-158:7; Sorensen Decl. ¶¶ 8, 9. Weco contends it neither wanted nor attempted to replace Sherwin-Williams "Western" paint with any other paint. See AMF No. 22; Sorensen Decl. ¶¶ 8, 9.

[5] Sherwin-Williams contends it began selling directly in order to preserve Mastercraft and Color Glow's business because it viewed Weco as a competitor once Weco began offering other manufacturers' products. See UMF No. 21. Latunski Decl. ¶¶ 4, 8; Turner Decl. ¶¶ 7-8. Weco disputes this and argues Sherwin-Williams offered to sell to Mastercraft and Color Glow because it wanted to "get rid" of its jobbers, and Weco, in particular. See PRUMF No. 21; Barcellos Depo. 43:11-20.

[6] Weco contends Sherwin-Williams already had this information. See Sorensen Decl. ¶19.

Mastercraft has also testified that since 2009, Sherwin-Williams has been raising its prices by 7-10%. See AMF No. 60; Barcellos Depo. 80:24-81:21.

Weco has not paid for the January 2007 order of "Western" paint, totaling $135,083.27. See UMF No. 43; PRUMF No. 43. The unused inventory from that order remains unsold in Weco's warehouse. See Sorensen Decl. ¶ 24. Weco has offered to return the paint to Sherwin-Williams, but the parties dispute whether the Jobber Agreement obligates Sherwin-Williams to accept the unused paint. See AMF Nos. 56, 57; DRAMF No. 56, 57 ; Sorensen Decl. ¶ 24.

LEGAL STANDARD

Summary judgment is appropriate when it is demonstrated that there exists no genuine issue as to any material fact, and that the moving party is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(c)*; *Adickes v. S.H. Kress & Co., 398 U.S. 144, 157, 90 S. Ct. 1598, 26 L. Ed. 2d 142 (1970)*; *Poller v. Columbia Broadcast System, 368 U.S. 464, 467, 82 S. Ct. 486, 7 L. Ed. 2d 458 (1962)*; *Southern California Gas Co. v. City of Santa Ana, 336 F.3d 885, 888 (9th Cir. 2003)*. The standard that applies to a motion for summary adjudication of issues **[*11]** is the same as that which applies to a motion for summary judgment. See *Fed.R.Civ.P. 56(a)*, *56(c)*; *Mora v. Chem-Tronics, 16 F. Supp. 2d 1192, 1200 (S.D.Cal.1998)*. Under summary judgment practice, the moving party:

> [A]lways bears the initial responsibility of informing the district court of the basis for its motion, and identifying those portions of "the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any," which it believes demonstrate the absence of a genuine issue of material fact.

Celotex Corp. v. Catrett, 477 U.S. 317, 323, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986); *Miller v. Glenn Miller Productions, Inc., 454 F.3d 975, 987 (9th Cir. 2006)*. A fact is material if it could affect the outcome of the suit under the governing substantive law. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*; *Miller, 454 F.3d at 987*.

If the moving party meets its initial responsibility, the burden then shifts to the opposing party to establish that a genuine issue as to any material fact actually does exist. *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 586, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*; *First Nat'l Bank of Arizona v. Cities Serv. Co., 391 U.S. 253, 288-89, 88 S. Ct. 1575, 20 L. Ed. 2d 569 (1968)*; *Nissan Fire & Marine Ins. Co., Ltd. v. Fritz Companies, Inc.,210 F.3d 1099, 1103 (9th Cir. 2000)*. **[*12]** The opposing party cannot "'rest upon the mere allegations or denials of [its] pleading' but must instead produce evidence that 'sets forth specific facts showing that there is a genuine issue for trial.'" *Estate of Tucker v. Interscope Records, 515 F.3d 1019, 1030 (9th Cir. 2008)* (quoting *Fed. R. Civ. Pro. 56(e)*); *Miller, 454 F.3d at 987*. In attempting to establish the existence of this factual dispute, the opposing party is required to tender evidence of specific facts in the form of affidavits, and/or admissible discovery material, in support of its contention that the dispute exists. *Rule 56(e)*; *Matsushita, 475 U.S. at 586 n.11*; *First Nat'l Bank, 391 U.S. at 289*; *Miller, 454 F.3d at 987*. The opposing party must demonstrate that the fact in contention is material, i.e., a fact that might affect the outcome of the suit under the governing law, *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*; *Cline v. Industrial Maintenance Engineering & Contracting Co., 200 F.3d 1223, 1229 (9th Cir. 2000)*, and that the dispute is genuine, i.e., the evidence is such that a reasonable jury could return a verdict for the nonmoving party, *Anderson, 477 U.S. 248-49*; *In re Caneva, 550 F.3d 755, 761 (9th Cir. 2008)*; **[*13]** *Lindsey v. SLT Los Angeles, LLC, 447 F.3d 1138, 1144 (9th Cir. 2006)*.

In the endeavor to establish the existence of a factual dispute, the opposing party need not establish a material issue of fact conclusively in its favor. It is sufficient that "the claimed factual dispute be shown to require a jury or judge to resolve the parties' differing versions of the truth at trial." *First Nat'l Bank, 391 U.S. at 290*; *Giles v. General Motors Acceptance Corp., 494 F.3d 865, 872 (9th Cir. 2007)*. Thus, the "purpose of summary judgment is to 'pierce the pleadings and to assess the proof in order to see whether there is a genuine need for trial.'" *Matsushita, 475 U.S. at 587* (quoting *Fed. R. Civ. P. 56(e)* advisory committee's note on 1963 amendments); *International Union of Bricklayers v. Martin Jaska, Inc., 752 F.2d 1401, 1405 (9th Cir. 1985)*.

In resolving the summary judgment motion, the Court examines the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any. *Rule 56(c)*; *Poller, 368 U.S. at 468*; *Price v. Sery, 513 F.3d 962, 965 n.1 (9th Cir. 2008)*; *Lockett v. Catalina Channel Exp., Inc., 496 F.3d 1061, 1064 (9th Cir. 2007)*. "[I]n ruling **[*14]** on a motion for summary judgment, the nonmoving party's evidence 'is to be believed, and all justifiable inferences are to be drawn in that party's favor.'" *Hunt v. Cromartie, 526 U.S. 541, 552, 119 S. Ct. 1545, 143 L. Ed. 2d 731 (1999)* (quoting *Anderson, 477 U.S. at 255*); *Miller, 454 F.3d at 987*; *Stegall v. Citadel Broad, Inc., 350 F.3d 1061, 1065 (9th Cir. 2003)*. Finally, to demonstrate a genuine issue, the opposing party "must do more than simply show that there is some metaphysical doubt as to the material facts. . . . Where the record taken as a whole could not lead a rational trier of fact to find for the nonmoving party, there is no 'genuine issue for trial.'" *Matsushita, 475 U.S. at 587* (citation omitted).

Additionally, the Court has the discretion in appropriate circumstances to consider materials that are not properly brought to its attention, but the Court is not required to examine the entire file for evidence establishing a genuine issue of material fact where the evidence is not set forth in the opposing papers with adequate references. See *Southern Cal. Gas Co. v. City of Santa Ana, 336 F.3d 885, 889 (9th Cir. 2003)*; *Carmen v. San Francisco Unified Sch. Dist., 237 F.3d 1026, 1031 (9th Cir. 2001)*.

DISCUSSION

As **[*15]** a preliminary matter, the Jobber Agreement provides that the validity, interpretation, and performance of the contract is governed by Ohio law. See FAC, Ex. A ¶6e. The parties do not challenge this provision. The Court will therefore apply Ohio law to Weco's breach of contract claims, and to Sherwin-Williams' breach of contract counterclaims. Weco also asserts claims under California's unfair competition, unfair trade practices, and trade secrets laws.

First Amended Complaint

A. Unfair Business Practices - *Cal. Business & Professions Code § 17200 et seq.*

California's Unfair Competition Law ("UCL"), *Cal. Bus. & Prof. Code § 17200 et seq.*, provides: "Any person who engages, has engaged, or proposes to engage in unfair competition may be enjoined in any court of competent jurisdiction." *Cal. Bus. & Prof. Code § 17203*. Unfair competition includes "any unlawful, unfair or fraudulent business act or practice and unfair, deceptive, untrue or misleading advertising. . ." Id. *§ 17200*. The California Supreme Court has clarified that:

> When a plaintiff who claims to have suffered injury from a direct competitor's "unfair" act or practice invokes *section 17200*, the word "unfair" in that section means **[*16]** conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition.

Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co., 20 Cal.4th 163, 187, 973 P.2d 527, 544, 83 Cal .Rptr.2d 548, 565 (Cal. 1999). Under the Cel-Tech test, courts look to the federal antitrust laws to evaluate an unfair competition claim. *Watson Laboratories, Inc. v. Rhone-Poulenc Rorer, Inc., 178 F.Supp.2d 1099, 1119 (C.D.Cal. 2001)*. Courts have held that a plaintiff cannot prevail on a claim on UCL claim where the "evidence merely indicates harm to its commercial interests, rather than harm to competition." Id. (citing *Sun Microsystems, Inc. v. Microsoft Corp., 87 F.Supp.2d 992, 1001 (N.D.Cal.2000))*. "[A]n act is deemed anticompetitive under the Sherman Act only when it harms both allocative efficiency and raises the prices of goods above competitive levels or diminishes their quality." *Id. at 1119*.

The FAC's First Cause of Action alleges Sherwin-Williams used unlawful and unfair business practices by marketing directly **[*17]** to Weco's customers and using inside information to undercut Weco's pricing structure. Weco argues that although the Jobber Agreement reserved to Sherwin-Williams the right to sell to end users, it did not authorize Sherwin-Williams to compete directly with Weco. FAC ¶ 15. Rather, Weco contends the long history between the parties established a supplier/jobber relationship with an implicit understanding that while Sherwin-Williams could sell to a Weco end user in its store, it would not compete directly with Weco in its capacity as a jobber.

Here, although Sherwin-Williams' conduct undoubtedly harmed Weco's commercial interests, a factfinder could not reasonably find that Sherwin-Williams engaged in "unfair competition" under the *Cel-Tech* test. Weco presents no evidence tending to show that Sherwin-Williams' conduct raised the price to consumers, harmed allocative efficiency, or diminished the quality of paint sold. In fact, the prices offered by Sherwin-Williams to Mastercraft and Color Glow were lower than the prices offered by Weco. [11] Although there is some evidence that, since 2009, Sherwin-Williams has increased the prices it charges to Mastercraft, there is no evidence that these **[*18]** prices are above competitive levels. Any implied understanding that Sherwin-Williams could sell to end users in its stores, but not directly, is irrelevant to Weco's UCL claims. "It is well-established that a manufacturer or producer has the right to deal with whom he pleases and to select his customers at will, so long as there is no resultant effect which is violative of antitrust laws." *Ricchetti v. Meister Brau, Inc., 431 F.2d 1211, 1214 (9th Cir. 1970)*. Sherwin-Williams' conduct may have been "unfair" in the colloquial sense of the word, but the Court finds no genuine issue of material fact as to whether it was "unfair" within the meaning of the UCL. The Court therefore grants summary judgment on the First Cause of Action.

B. Unfair Practices - *Cal. Business & Professions Code § 17000 et seq.*

The California Unfair Practices Act prohibits "unfair, dishonest, deceptive, destructive, fraudulent and discriminatory practices by which fair competition is destroyed or prevented." *Cal. Bus. & Prof. Code § 17001*. Under the Unfair Practices Act,

> The secret payment or allowance of rebates, refunds, commissions, or unearned discounts, whether in the form of money or otherwise, or secretly extending to certain purchasers special services or privileges not extended to all purchasers purchasing upon like terms and conditions, to the injury of a competitor and where such payment or allowance tends to destroy competition, is unlawful.

Id. *§ 17045*. Weco alleges Sherwin-Williams provided Mastercraft and Color Glow with unearned discounts and sales on terms and conditions different from those offered to Weco, with the intent to injure Weco's business. FAC ¶¶ 20-23.

Sherwin-Williams contends **[*20]** the Unfair Practices Act does not prohibit offering a discount to meet competing offers from other distributors. Courts have held that a defendant does not violate *§ 17045* where competition was not injured by the defendant's conduct. See *E&H Wholesale v. Glaser Bros., 158 Cal. App. 3d 728, 738-39, 204 Cal. Rptr. 838 (Cal. App. 1984)*; *Design and Office Concepts, Inc. v. Haworth, Inc., 1996 U.S. Dist. LEXIS 23083, 1996 WL 617308, *4 (N.D.Cal. 1996)* (citing *Diesel Electric Sales & Service, Inc. v. Marco Marine San Diego, Inc., 16 Cal. App. 4th 202, 20 Cal.Rptr.2d 62 (Cal.App. 1993)*. Although Weco contends Sherwin-Williams attempted to put it out of business by selling directly to Mastercraft and Color Glow, it is undisputed that Weco continued to compete with Sherwin-Williams by introducing and selling other manufacturers' paint. As discussed above, Weco has failed to allege facts tending to show harm to overall competition as a result of Sherwin-Williams' actions. Accordingly, the Court grants summary judgment on the Second Cause of Action.

C. Misappropriation of Trade Secrets

---

[11] Further, Sherwin-Williams maintains it increased its profit margin by selling directly because the prices it charged to end users were greater than the prices it charged to Weco. Sherwin-Williams offers evidence that the packaging of the product remained the same, and there were no increased delivery costs because Mastercraft and Color Glow were added to an existing delivery route. As discussed above, Weco argues Sherwin-Williams necessarily incurred higher **[*19]** costs due to an increased number of deliveries and the attendant increases in fuel and labor costs. However, there is no evidence that these costs would have been greater than the price Sherwin-Williams charged to Mastercraft and Color Glow.

Weco alleges Sherwin-Williams misappropriated trade secrets in violation of the Uniform Trade Secrets Act, *Cal. Civ. Code § 3426 et seq.* To prove misappropriation of trade **[*21]** secrets, a plaintiff must show:

> (1) the existence of subject matter which is capable of protection as a trade secret; (2) the secret was disclosed to the defendant, ... under circumstances giving rise to a contractual or other legally imposed obligation on the part of the disclosee not to use or disclose the secret to the detriment of the discloser; and (3) if the defendant is an employee or former employee of the plaintiff ... the facts alleged must also show that the public policy in favor of the protection of the complainant's interest in maintaining the secret outweighs the interest of the employee in using his knowledge to support himself in other employment.

Globespan, Inc. v. O'Neill, 151 F.Supp.2d 1229, 1235 (C.D.Cal. 2001) (quoting *Cal Francisco Inv. Corp. v. Vrionis, 14 Cal.App.3d 318, 321-22, 92 Cal.Rptr. 201 (1971))*. *California Civil Code § 3426.1(d)* defines a trade secret as information that:

> (1) Derives independent economic value, actual or potential, from not being generally known to the public or to other persons who can obtain economic value from its disclosure or use; and
> (2) Is the subject of efforts that are reasonable under the circumstances to maintain its secrecy.

Cal. Civ. Code § 3426.1(d).

"To **[*22]** find misappropriation, California courts require that the trade secret be used by the Defendant or disclosed by the Defendant to a third party." *Globespan, 151 F.Supp.2d at 1235* (citing *Cal. Civil Code § 3426.1(b)*; *Cal Francisco Inv. Corp., 14 Cal.App.3d at 321, 92 Cal.Rptr. 201*). *California Civil Code § 3426.1(b)* defines misappropriation as:

> (1) Acquisition of a trade secret of another by a person who knows or has reason to know that the trade secret was acquired by improper means; or
> (2) Disclosure or use of a trade secret of another without express or implied consent by a person who:
> (A) Used improper means to acquire knowledge of the trade secret; or
> (B) At the time of disclosure or use, knew or had reason to know that his or her knowledge of the trade secret was:
> (i) Derived from or through a person who had utilized improper means to acquire it;
> (ii) Acquired under circumstances giving rise to a duty to maintain its secrecy or limit its use; or
> (iii) Derived from or through a person who owed a duty to the person seeking relief to maintain its secrecy or limit its use; or
>
> (C) Before a material change of his or her position, knew or had reason to know that it was a trade secret and that **[*23]** knowledge of it had been acquired by accident or mistake.

Cal. Civ. Code § 3426.1(b).

Weco alleges the trade secrets at issue are its pricing to end users and cost of acquisition. Although a trade secret must not be generally known to the public or to competitors, a trade secret may be disclosed to others if they are obligated to keep that information secret. See *In re Providian Credit Card Cases, 96 Cal. App. 4th 292, 304, 116 Cal. Rptr. 2d 833 (Cal. App. 2002)*. Weco does not dispute that its cost of purchasing Sherwin-Williams paint and its pricing to end users was known to Sherwin-Williams as its supplier. Rather, Weco contends Sherwin-Williams was obligated to preserve the confidentiality of that information due to its longstanding supplier/jobber relationship and mutual understanding with Weco. However, Weco provides no evidence of this understanding, aside from its own declaration stating that Sherwin-Williams had never before marketed directly to Weco's customers, and their business relationship was "more like a partnership than anything." See Sorensen Decl. ¶ 20. This is insufficient to establish a duty of confidentiality. See *F.T.C. v. Publ'g Clearing House, Inc., 104 F.3d 1168, 1171 (9th Cir.1997)* **[*24]** ("A conclusory, self-serving affidavit, lacking detailed facts and any supporting evidence, is insufficient to create a genuine issue of material fact."). Moreover, Weco cites no legal authority, and the Court can find none, for the proposition that a supplier/jobber relationship independently gives rise to a confidential relationship for the purposes of a trade secrets claim. The undisputed facts show that Weco's pricing to end users and costs of acquisition were not trade secrets within the meaning of the Uniform Trade Secrets Act. The Court therefore grants summary judgment on the Fourth Cause of Action in favor of Sherwin-Williams.

D. Intentional Interference with Prospective Economic Advantage

Under California law, in order to prevail on a claim for intentional interference with prospective economic advantage, a plaintiff must prove the following elements:

> (1) an economic relationship between the plaintiff and some third party, with the probability of future economic benefit to the plaintiff; (2) the defendant's knowledge of the relationship; (3) intentional acts on the part of the defendant designed to disrupt the relationship; (4) actual disruption of the relationship; and (5) **[*25]** economic harm to the plaintiff proximately caused by the acts of the defendant

Korea Supply Co. v. Lockheed Martin Corp., 29 Cal.4th 1134, 1153, 131 Cal. Rptr. 2d 29, 63 P.3d 937 (Cal. 2003) (quoting *Westside Center Associates v. Safeway Stores 23, Inc., 42 Cal.App.4th 507, 521-522, 49 Cal.Rptr.2d 793 (Cal. App. 1996))*. Further, the plaintiff must show that the defendant "engaged in conduct that was wrongful by some legal measure other than the fact of interference itself. *Della Penna v. Toyota Motor Sales, U.S.A., Inc., 11 Cal.4th 376, 393, 902 P.2d 740, 751, 45 Cal.Rptr.2d 436, 447 (Cal. 1995)*. An act is "independently wrongful" only if it is "unlawful," meaning it is "proscribed by some constitutional, statutory, regulatory, common law, or other determinable legal standard." *Korea Supply, 29 Cal. 4th at 1159*.

Weco argues Sherwin-Williams engaged in unfair competition by using intentional and improper methods of taking business from Weco. However, because Weco's claim relies on a violation of the California UCL, Unfair Practices Act, or Uniform Trade Secrets Act, there is no basis for an independently wrongful act. Accordingly, the Court will grant summary judgment as to the Third Cause of Action.

E. Breach of Contract

Weco **[*26]** contends Sherwin-Williams breached the Jobber Agreement by announcing it would discontinue the "Western" line of paint, and by refusing to repurchase or accept the return of Weco's unused product. Under Ohio law:

> To succeed on a breach-of-contract claim, all of the following elements must be proven: (1) that a binding contract or agreement exists, (2) that the asserting party performed their contractual obligations, (3) that the party against whom the claim is asserted failed to fulfill its contractual obligations without legal excuse, and (4) that the asserting party suffered damages as a result.

Ireton v. JTD Realty Invests., L.L.C., 162 Ohio Misc.2d 1, 16, 2010 Ohio 6692, 944 N.E.2d 1238, 1250 (Ohio Com. Pl. 2010) (citing *Garofalo v. Chicago Title Ins. Co., 104 Ohio App.3d 95, 108, 661 N.E.2d 218 (1995))*. "Ohio has applied the rule that 'contracts must be given a just and reasonable construction in order to carry out the presumed intent of the parties.'" *Butler-Peak v. Cunningham, 138 Ohio App.3d 334, 340, 741 N.E.2d 219, 223 (Ohio App. 2000)* (quoting *E.S. Preston Associates, Inc. v. Preston,, 24 Ohio St.3d 7, 10, 24 Ohio B. 5, 492 N.E.2d 441, 444-445 (Ohio 1986))*.

The parties do not dispute that the Jobber Agreement **[*27]** is a binding contract. Rather, Sherwin-Williams contends Weco breached its contractual obligation to use best efforts to market Sherwin-Williams paint by marketing another manufacturer's paint to Mastercraft and Color Glow. The Jobber Agreement provides that "[Weco] shall exercise its best efforts to market the Products to End Users and to promote the goodwill and market reputation of [Sherwin-Williams] and the Products." See FAC, Ex. A, ¶ 2c. Weco contends it exercised "best efforts" after Sherwin-Williams announced it would discontinue the "Western" product line by purchasing as much "Western" paint as possible in order to continue marketing as much Sherwin-Williams paint as it could. The Jobber Agreement is ambiguous as to what constitutes "best efforts " in Paragraph 2c. Although contract interpretation is generally a question of law, where a contract is ambiguous the parties' intent is a question of fact. See *Crane Hollow, Inc. v. Marathon Ashland Pipe Line, LLC, 138 Ohio App.3d 57, 74, 740 N.E.2d 328 (Ohio App. 2000)*; *U.S. Fid. & Guar. v. Aultman St. Elizabeth Med. Ctr., 129 Ohio App.3d 45, 55, 716 N.E.2d 1201 (Ohio App. 1999)*. The

Court finds there is a genuine issue of material **[*28]** fact as to the parties' intent in Paragraph 2c of the Jobber Agreement.

The Jobber Agreement states that "[Sherwin-Williams] hereby appoints [Weco] as a nonexclusive jobber of these automotive refinish products that are specifically designated on Exhibit A, which is attached hereto and incorporated by reference (collectively referred to herein as the 'Products')." See FAC, Ex. A., ¶ 1a. Exhibit A to the Jobber Agreement lists "Sherwin-Williams Products" and "Western Products," with checkmarks placed next to certain products in each category. See id., Ex. A to Jobber Agreement. Paragraph 3a of the Jobber Agreement provides that Sherwin-Williams "shall maintain an adequate stock of Products to service the needs of [Weco]." See id. ¶ 3a. Weco reads this provision to prohibit Sherwin-Williams from discontinuing the "Western" product line. Sherwin-Williams contends the parties did not intend Paragraph 3a to preclude Sherwin-Williams from discontinuing one product and replacing it with another. [12] However, even construing Paragraph 3a in the light most favorable to Weco, it is undisputed that after Sherwin-Williams announced it would discontinue the "Western" line, Weco was able to place **[*29]** a large order for that paint so it could continue to meet its customers' demands. See AMF No. 29; PRUMF No. 21; Sorensen Decl. ¶¶ 12, 13; Sorensen Depo. 187:24-188:8; Turner Decl. ¶¶ 9-10. Moreover, Weco itself argues that Sherwin-Williams reinstated the "discontinued" paint. [12] See AMF No. 54; Sorensen Decl. ¶ 23. Weco cannot have it both ways. The undisputed facts do not suggest that Sherwin-Williams failed to "maintain an adequate stock of Products to service the needs of [Weco]." See FAC, Ex. A., ¶ 3a. Therefore, a reasonable factfinder could not find that Sherwin-Williams breached the Jobber Agreement by its announcement that it would discontinue the "Western" product line.

Weco also alleges Sherwin-Williams breached the Jobber Agreement by refusing to repurchase or accept the return of Weco's unused product. Weco contends Sherwin-Williams terminated the Jobber Agreement by entering into direct competition with Weco. The Jobber Agreement provides:

> In the event of termination of this Agreement by [Weco] for any reason . . .[Sherwin-Williams] shall have the right, but not the obligation, to repurchase [Weco]'s inventory of unopened and salable packages or cans of Products . . .

Id. ¶ 5d.

> In the event of termination of this Agreement by [Sherwin-Williams] for any reason other than those stated in subsection (i) or (ii) paragraph (d) above, [Weco] may return for a credit all unopened and salable packages of Products **[*31]** except those Products that are deemed unsalable by SW in its sole discretion . . .

Id., ¶ 5e. With respect to termination, the Jobber Agreement provides, "[i]f this Agreement is breached by [Sherwin-Williams] or [Weco], the non-breaching party may terminate this Agreement immediately by sending written notice to the breaching party." FAC. Ex. A, ¶ 5b. Reading Paragraphs 5b and 5e together, the plain language provides that termination in the event of a breach requires written notice by the non-breaching party, and that Weco is only entitled to return products where the agreement is terminated by Sherwin-Williams. Here, there is no evidence of a written notice of termination from either party that would trigger the repurchase provisions in Paragraphs 5d and 5e. The Court therefore finds that Sherwin-Williams' alleged refusal to repurchase or accept the return of Weco's inventory cannot form the basis for a breach of contract claim.

---

[12] Sherwin-Williams also contends its decided to discontinue the "Western" line in order to comply with government clean air regulations. Under Ohio law, "[w]here performance of a contractual promise is rendered impossible by the law, nonperformance is excused." *Toledo Police Patrolmen's Assn., Local 10, IUPA v. Toledo, 94 Ohio App.3d 734, 739, 641 N.E.2d 799, 802 (Ohio App. 1994)*. However, there is no evidence that the "Western" paint line violated any specific regulations, only that Sherwin-Williams discontinued **[*30]** the "Western" line to replace it "with higher quality paint lines, which were also more compliant with increasingly stringent limitations on Volatile Organic Compounds, or VOC's." Latunski Decl. ¶ 7. Thus, there is no evidence that it was "impossible" to maintain an adequate stock of the "Western" products to service Weco's needs.

[12] However, it is undisputed that Sherwin-Williams "eventually" discontinued the "Western" line. See UMF No. 44; PRUMF No. 44.

Because there is no genuine issue of material fact as to whether Sherwin-Williams breached the terms of the Jobber Agreement, the Court will grant summary judgment on the Fifth Cause of Action.

F. Breach of the Implied Covenant of Good Faith and Fair Dealing

Weco **[*32]** alleges Sherwin-Williams breached the implied covenant of good faith and fair dealing by discontinuing the "Western" paint line, contacting Weco's customers directly, offering to sell "Western" paint to those customers directly, and then later reversing its decision to discontinue the Western paint line. Weco argues that many aspects of the business relationship between the parties were understood from the parties' history and implied in the Jobber Agreement, including the understanding that Sherwin-Williams would not compete directly with Weco, its jobber. Sherwin-Williams contends Weco cannot prove a breach of the implied covenant of good faith and fair dealing for the same reasons it cannot prove breach of contract. Sherwin-Williams further contends that selling to end users did not breach the implied covenant because Paragraph 4b of the Jobber Agreement expressly reserved to it the right to sell to end users. Finally, Sherwin-Williams maintains the allegation that it reversed its decision to discontinue the Western paint line is factually incorrect. [13]

Under Ohio law, a contract "has an implied covenant of good faith and fair dealing that requires not only honesty but also reasonableness in the enforcement of the contract." *Littlejohn v. Parrish, 163 Ohio App.3d 456, 463 2005 Ohio 4850, 839 N.E.2d 49, 54 (Ohio App. 2005)*.

> As stated by the Restatement Second of Contracts, 'Good faith performance or enforcement of a contract emphasizes faithfulness to an agreed common purpose and consistency with the justified expectations of the other party.' It also states that bad faith may consist of inaction, or may be the 'abuse of power to specify terms, or interference with or failure to cooperate in the other party's performance.'

Id. "Good faith is a compact reference to an implied undertaking not to take opportunistic advantage in a way that could have not been contemplated at the time of drafting, and which therefore was not resolved explicitly by the parties." *Ed Schory & Sons, Inc. v. Soc. Natl. Bank, 75 Ohio St. 3d 433, 443-44, 1996 Ohio 194, 662 N.E.2d 1074 (Ohio 1996))*. **[*34]** Therefore, the Court finds the Jobber Agreement contains an implied duty for the parties to act in good faith and deal reasonably with each other.

In Ohio, breach of the implied covenant of good faith and fair dealing is not a separate tort, but rather is analyzed as a breach of contract claim. In other words, "a party can be found to have breached its contract if it fails to act in good faith." *Littlejohn, 163 Ohio App. 3d at 463, 839 N.E.2d at 54*. There is a genuine issue of material fact as to whether Sherwin-Williams acted in bad faith. Viewing the evidence in the light most favorable to Weco, the non-moving party, a reasonable factfinder could determine that Sherwin-Williams took advantage of Weco, or interfered with Weco's performance of the Jobber Agreement in a way that could not have been contemplated at the time of drafting, by selling directly to Weco's customers. [14] Further, as discussed above, there is also a genuine issue of

---

[13] In light of the parties' briefs, the court assumes that under Ohio law summary judgment based on an alleged breach of a contract's **[*33]** express terms does not automatically require dismissal of a breach of contract claim premised on the implied covenant of good faith and fair dealing. In the event Ohio law is to the contrary, the court will give leave to file a supplemental dispositive motion.

[14] To the extent Sherwin-Williams seeks to enforce the limitation of remedies clause **[*35]** with respect to Weco's claim for breach of the implied covenant of good faith and fair dealing, the Court finds that the clause is unconscionable under Ohio law. "Limitation-of-liability clauses are viewed critically, but may be freely bargained for in Ohio and will be enforced 'absent important public policy concerns, unconscionability, or vague and ambiguous terms.'" *Doe v. SexSearch.com, 551 F.3d 412, 419 (6th Cir. 2008)*. The Supreme Court of Ohio has held that "[u]nconscionability has generally been recognized to include an absence of meaningful choice on the part of one of the parties together with contract terms which are unreasonably favorable to the other party." *Lake Ridge Academy v. Carney, 66 Ohio St. 3d 376, 383, 613 N.E.2d 183 (1993)*. Here, the limitation of liability clause is unreasonably favorable to Sherwin-Williams because it gives Weco no recourse for any wrongful act against it, related to the Jobber Agreement or not, and whether intentional or not. See FAC, Ex. A ¶ 6b. Weco also contends that the Jobber Agreement was not negotiated, and that after twenty-seven years of business, Weco was faced with the decision between signing the

material fact as to whether Weco used "best efforts" to perform its contractual obligations. Therefore, the Court will deny summary judgment as to the Sixth Cause of Action.

First Amended Cross-Complaint

A. Breach of Written Contract

To prove a claim for breach of contract under Ohio law, a party must show: "(1) that a binding contract or agreement exists, (2) that the asserting party performed their contractual obligations, (3) that the party against whom the claim is asserted failed to fulfill its contractual obligations without legal excuse, and (4) that the asserting party suffered damages as a result. See *Ireton v. JTD Realty Invests., L.L.C., 162 Ohio Misc.2d at 16, 944 N.E.2d at 1250*. In the FACC, Sherwin-Williams asserts a breach of contract counterclaim against Weco for failure to pay for paint products delivered. [15] See FACC ¶¶ 4-9. Sherwin-Williams also contends Weco breached the provision of the Jobber Agreement requiring Weco to use "best efforts" to market Sherwin-Williams products. It is undisputed that Weco ordered and received $135,083.27 worth of paint from Sherwin-Williams in January and/or February 2007. Weco does not dispute it has refused to pay for that paint. "When the facts presented **[*37]** in a case are undisputed, whether they constitute a performance or a breach of the contract, is a question of law for the court." *Luntz v. Stern, 135 Ohio St. 225, 237, 20 N.E.2d 241 (Ohio 1939)*. However, because the Court finds there is a genuine factual dispute as to whether Weco used "best efforts" and whether Sherwin-Williams breached the implied covenant of good faith and fair dealing, the Court will deny summary judgment on the FACC.

CONCLUSION AND ORDER

Accordingly, IT IS HEREBY ORDERED that:

1. Sherwin-Williams' Motions for Summary Judgment, or, in the alternative, Summary Adjudication of Issues are GRANTED IN PART and DENIED IN PART.
2. Summary judgment is GRANTED as to the First, Second, Third, Fourth, and Fifth Causes of Action.
3. Summary judgment is DENIED as to the Sixth Cause of Action.

4. Summary judgment **[*38]** on Sherwin-Williams' First Amended Cross-Complaint is DENIED.

IT IS SO ORDERED.

Dated: May 25, 2012

/s/ Anthony W. Ishii

CHIEF UNITED STATES DISTRICT JUDGE

End of Document

agreement or risking the loss of its business **[*36]** relationship with Sherwin-Williams. See Sorensen Decl. ¶ 11. For these reasons, the Court finds that the limitation of remedies clause is unenforceable.

[15] The FACC also asserts counterclaims for "Goods Sold and Delivered" and "Account Stated." FACC ¶¶ 10-15. These causes of action are premised on the same facts as the breach of contract counterclaim and also seek payment of the $135,083.27 allegedly due and owing. Sherwin-Williams makes no argument with respect to its counterclaims for misappropriation of trade secrets or unfair competition.

Opinion

[*139] **ORDER**

Concur by: ROSEMARY S. POOLER

Concur

ROSEMARY S. POOLER, *Circuit* ***[**2]*** *Judge*, concurring in the denial of rehearing *en banc*:

I respectfully concur in the denial of the rehearing en banc. I write briefly to emphasize that the limited holding in this case is not governed by the Supreme Court's reasoning in *AT&T Mobility LLC v. Concepcion, 131 S.Ct. 1740, 179 L. Ed. 2d 742 (2011). Concepcion* holds that the Federal Arbitration Act ("FAA") preempts state laws hostile to arbitration, and focuses its analysis on preemption issues. In contrast, analysis in *Amex III* rests squarely on a vindication of statutory rights analysis -- an issue untouched in *Concepcion*.

[*140] *Amex III* strives to give full effect to the Supreme Court's teachings that where a contractual agreement functions "as a prospective waiver of a party's right to pursue statutory remedies," then the contractual agreement may not be enforced. *Mitsubishi Motors Corp. v. Soler Chrysler-Plymouth, Inc., 473 U.S. 614, 637, n. 19, 105 S. Ct. 3346, 87 L. Ed. 2d 444 (1985)*; *see also* *Green Tree Fin. Corp. Alabama v. Randolph, 531 U.S. 79, 90, 121 S. Ct. 513, 148 L. Ed. 2d 373 (2000)*. *Amex III* is carefully cabined to hold that this waiver, on this record, is unenforceable. It creates no broad new rights.

While *Concepcion* addresses state contract rights, *Amex III* deals with federal statutory rights -- a **[**3]** significant distinction. In analyzing *Concepcion*, the Court reasoned that although the FAA's saving clause, *9 U.S.C. § 2*, preserves a generally applicable contract defense, "nothing in it suggests an intent to preserve state-law rules that stand as an obstacle to the accomplishment of the FAA's objectives." *131 S.Ct. at 1748*. The Court reasoned that invalidating a class waiver would allow a party to an arbitration agreement to demand a class-wide arbitration that is not consensual, thereby making arbitration slower, more formal and more costly, and greatly increasing risks to defendants. *Id. at 750-52*. Because its analysis focused wholly on the issue of preemption of state law by federal law, *Concepcion* is silent on the holdings of the Court's earlier cases which enforce arbitration clauses only when those clauses permit parties to effectively vindicate their federal statutory rights.

In stark contrast, *Amex III* raises a different issue: whether the FAA always trumps rights created by a competing federal statute, as opposed to rights existing under a common law of unconscionability. At issue here is not the right to proceed as a class, but the ability to effectively vindicate a federal **[**4]** statutory right that predates the FAA. Vindication of statutory rights analysis is the method of analysis proposed by the Supreme Court in *Mitsubishi* for addressing whether an arbitration clause will be enforced where the dispute implicates a federal statute. *473 U.S. at 637*; *Gilmer v. Interstate/Johnson Lane Corp., 500 U.S. 20, 28, 111 S. Ct. 1647, 114 L. Ed. 2d 26 (1991)*. This analysis is not foreign to our Court. *See, e.g.,* *Brooks v. Travelers Ins. Co., 297 F.3d 167, 168 (2d Cir. 2002)* (analysis of arbitration agreement required finding that agreement "provide[d] adequately for vindication of federal statutory rights"). There is no indication in *Concepcion* that the Supreme Court intended to overrule its previous holdings.

Mitsubishi holds that parties may agree to prosecute statutory rights via arbitration instead of litigation only where "the prospective litigant effectively may vindicate [his or her] statutory cause of action in the arbitral forum." *473 U.S. at 637*. *Gilmer* reaffirmed that principle. *500 U.S. at 28*. Nearly ten years later, the Supreme Court cited the proposition again, in *Green Tree Fin. Corp., 531 U.S. at 90*; *see also* *14 Penn Plaza LLC v. Pyett, 556 U.S. 247, 129 S. Ct. 1456, 1474, 173 L. Ed. 2d 398 (2009)* (recognizing principle **[**5]** and stating that "a substantive waiver of federally protected civil rights will not be upheld"). Our sister Circuits also engage in a vindication of rights analysis. *See, e.g.,* *Kristian v. Comcast Corp., 446 F.3d 25, 47-48 (1st Cir. 2006)* (severing as unenforceable provision of arbitration agreement limiting availability of treble damages under antitrust statute); *Hadnot v. Bay, Ltd., 344 F.3d 474, 478 n. 14 (5th Cir. 2003)* (severing restriction on available remedies from arbitration agreement after finding that "ban on punitive and exemplary damages is unenforceable **[*141]** in a Title VII case"); Morrison v. Circuit City Stores, Inc., 317 F.3d 646, 657-60 (6th Cir. 2003) (en banc) (deciding when cost-sharing deprives employees of substantive statutory rights); Shankle v. B-G Maint. Mgmt. of Colo., Inc., 163 F.3d 1230, 1234 (10th Cir. 1999) ("an arbitration agreement that prohibits use of the judicial forum as a means of resolving statutory claims must also provide for an effective and accessible alternative forum"); Paladino v. Avnet Computer Techs., Inc., 134 F.3d 1054, 1060 (11th Cir. 1998) (holding that arbitration agreement which proscribed award of Title VII damages was unenforceable **[**6]** because it was fundamentally at odds with the purposes of Title VII); Cole v. Burns Int'l Sec. Servs., 105 F.3d 1465, 1468, 323 U.S. App. D.C. 133 (D.C. Cir. 1997) ("We do not read *Gilmer* as mandating enforcement of *all* mandatory agreements to arbitrate statutory claims; rather we read *Gilmer* as requiring the enforcement of arbitration agreements that do not undermine the relevant statutory scheme.").

Equally unavailing is any reliance on Coneff v. AT&T, Corp. 673 F.3d 1155, 2012 WL 887598 (9th Cir. 2012). *Coneff* -- like *Concepcion* -- examines when the FAA preempts state contract law. Unlike *Amex III*, the *Coneff* court was not focused on individual plaintiffs lacking an effective means of enforcing their rights. Rather, the question addressed in *Coneff* was, given the small damages awards in any individual arbitration, whether the plaintiffs would have an adequate *incentive* to vindicate their rights. The Ninth Circuit expressly recognized the difference between incentive and ability. Coneff, 673 F.3d 1155, 2012 WL 887598, at *3 n. 3 (distinguishing Amex III, 667 F.3d 204, 218 (2d Cir. 2012) on the ground that in *Amex III* "the *only economically feasible means* for plaintiffs enforcing their statutory rights is via a class action.")(emphasis **[**7]** in original).

Further, in both *Coneff* and *Concepcion* the individual damages awards available to any single plaintiff were small, but fee-shifting provisions ensured that a damaged plaintiff could be made whole. The reason that a plaintiff may not bring suit was not because he would not be likely to recoup his costs, but rather because the small amount of damages was not worth his trouble. In *Amex III*, however, plaintiffs were faced with substantial upfront expenditures to prosecute their antitrust rights -- costs that were only economically feasible if the plaintiffs prosecuted their claims as a class. *Amex I* explained why the Clayton Act's treble-damages and fee-shifting provisions would not make an individual plaintiff whole:

> [Not only is] the trebling of a small individual damages award [] not going to pay for the expert fees Dr. French has estimated will be necessary to make an individual plaintiff's case here, there is an even more important legal consideration that the district court did not consider. In *Crawford Fitting Co. v. J.T. Gibbons, Inc*., the Supreme Court addressed fee-shifting for expert witnesses under Rule 54(d) of the Federal Rules of Civil Procedure in an antitrust **[**8]** case, holding that "when a prevailing party seeks reimbursement for fees paid to its own expert witnesses, a federal court is bound by the limit of [28 U.S.C.] § 1821(b). . . ." 482 U.S. 437, 439, 107 S. Ct. 2494, 96 L. Ed. 2d 385 (1987). We note that figure is now set at a $40 per diem. Further, as the plaintiffs assert, there are no provisions "in the rules of any of the arbitral bodies designated [in the Card Acceptance Agreement] that would allow such costs to be awarded where they are not authorized by the applicable fee shifting statute." Even with respect to reasonable attorney's fees, which are shifted under Section 4 of the Clayton Act, the plaintiffs must **[*142]** include the risk of losing, and thereby not recovering any fees, in their evaluation of their suit's potential costs.

554 F.3d 300, 317-18 (2d Cir. 2009) (footnotes omitted); *see also* 15 U.S.C. § 15.

We need not tarry long in addressing a final concern: that *Amex III* permits plaintiffs to evade enforcement of class action arbitration waivers simply by manufacturing an affidavit or choosing pricey attorneys. The business plaintiffs here are prosecuting antitrust claims that will likely require complex discovery and expert testimony. Other statutory claims may **[**9]** not require such extensive proof. The courts are perfectly capable of doing the analysis necessary to determine if the plaintiffs have made the necessary showing. *See, e.g.,* Adkins v. Labor Ready, Inc., 303 F.3d 496, 502 (4th Cir. 2002) (refusing to strike class arbitration waiver where plaintiff failed to make required showing that he would incur prohibitively high expenses in prosecuting claim individually); Ornelas v. Sonic-Denver T, Inc., 2007 U.S. Dist. LEXIS 6214, 2007 WL 274738, at *6 (D. Colo. Jan. 29, 2007) (refusing to strike class arbitration waiver because the evidence did not demonstrate the costs of pursuing arbitration would effectively "preclude the plaintiff from pursuing his claims"); *see also* Bonanno v. Quizno's Franchise Co., LLC, 2009 U.S. Dist. LEXIS 37702, 2009 WL 1068744, at *16 (D. Colo. April 20, 2009) (enforcing contract clause barring class actions where plaintiffs failed to demonstrate they would incur excessively high costs in proceeding individually). *Amex III* specifically admonishes that each case will need to stand on its own merits.

Amex III gives full effect to a long line of Supreme Court precedent preserving plaintiffs' ability to vindicate federal statutory rights, rather than eviscerating more than 120 **[**10]** years of ***antitrust law*** by closing the courthouse door to all but the most well-funded plaintiffs. For these reasons, I concur in the denial of rehearing en banc.

Dissent by: DENNIS JACOBS, REENA RAGGI

Dissent

DENNIS JACOBS, Chief Judge, with whom Judge CABRANES and Judge LIVINGSTON join, dissenting from the denial of rehearing in banc:

I respectfully dissent from the denial of rehearing in banc.

In 1968, it became law in this Court that, for public policy reasons, federal antitrust claims could not be arbitrated. See *Am. Safety Equip. Corp. v. J.P. Maguire & Co., 391 F.2d 821, 827-28 (2d Cir. 1968)*. The Supreme Court rejected that public policy approach in *Mitsubishi Motors Corp. v. Soler Chrysler-Plymouth, Inc., 473 U.S. 614, 636, 105 S. Ct. 3346, 87 L. Ed. 2d 444 (1985)*. And in 1991, it reiterated that federal statutory claims can be subject to valid arbitration agreements. See *Gilmer v. Interstate/Johnson Lane Corp., 500 U.S. 20, 25, 111 S. Ct. 1647, 114 L. Ed. 2d 26 (1991)*.

Now the panel opinion in this case uses public policy to hold that arbitration agreements containing class-action waivers are unenforceable when applied to federal statutory claims *if* (as is always so easy to assert) a claim would not be "economically rational" to pursue individually. *In re Am. Express Merchs.' Litig., 667 F.3d 204, 214 (2d Cir. 2012)* **[**11]** (Amex III). The panel opinion thus impairs the Federal Arbitration Act's strong federal policy favoring the enforcement of arbitration agreements, and frustrates the goals of arbitration by multiplying claims, lawsuits, and attorneys' fees. "[T]he longstanding judicial hostility to arbitration agreements," *Gilmer, 500 U.S. at 24*, is undiminished.

* * *

At issue is a provision, of a kind commonly used in arbitration agreements, that bars class actions. The underlying arbitration involves an antitrust claim. In *In **[*143]** re American Express Merchants' Litigation, 554 F.3d 300 (2d Cir. 2009)* (Amex I), the panel held that such a bar ran afoul of the federal substantive law of arbitration because the litigation expense of the antitrust suit--expert testimony, in particular--would render separate arbitrations too expensive. So the panel ruled that a class action may proceed in court notwithstanding the agreement to arbitrate. *Id. at 320*. The Supreme Court granted certiorari and vacated Amex I in light of *Stolt-Nielsen S.A. v. AnimalFeeds Int'l Corp., 130 S. Ct. 1758, 176 L. Ed. 2d 605 (2010)*. Am. Express Co. v. Italian Colors Rest*., 130 S. Ct. 2401, 176 L. Ed. 2d 920 (2010)*.

Stolt-Nielsen holds that a party to an arbitration agreement **[**12]** cannot be compelled to submit to class arbitration absent a "contractual basis for concluding that the party *agreed* to do so . . . because class-action arbitration changes the nature of arbitration to such a degree that it cannot be presumed the parties consented to it by simply agreeing to submit their disputes to an arbitrator." *130 S. Ct. at 1775*. On remand the (by then) two-judge panel reached the same conclusion as in Amex I. See *In re Am. Express Merchs.' Litig., 634 F.3d 187, 199 (2d Cir. 2011)* (Amex II).

Shortly after Amex II was published but before the mandate issued, the Supreme Court decided *AT&T Mobility LLC v. Concepcion, 131 S. Ct. 1740, 179 L. Ed. 2d 742 (2011)*, which holds that state law may not be used to invalidate a class-action waiver in an arbitration agreement on the ground that the only economical way to litigate the claim is through a class action. *Id. at 1748*. After soliciting briefing on the impact of Concepcion, the panel issued its third opinion. In Amex III, the panel yet again concludes that the class-action waiver is unenforceable on the ground that the only effective way to litigate the antitrust claims was by a class action in court. *Amex III, 667 F.3d at 218-19*.

As I **[**13]** undertake to show, the public policy rationale which Amex III relies upon is wrong because: [1] it runs counter to the public policy that the Supreme Court has made paramount in the context of the Federal Arbitration Act ("FAA"); [2] it employs a dubious ground of distinction to overcome Concepcion, which teaches that the FAA does not allow courts to invalidate class-action waivers even if "class proceedings are necessary to prosecute small-dollar claims that might otherwise slip through the legal system," *Concepcion, 131 S. Ct. at 1753*; and [3] the dicta on which the panel precariously relies--that large "arbitration costs" cannot be allowed to prevent a plaintiff from "effectively vindicating" a statutory right--is pulled out of context and distorted.

I

Amex III cannot be squared with the FAA, as it has been applied and explained by the Supreme Court. In banc review is needed because [A] the panel opinion is unbounded and can be employed to defeat class-action waivers altogether; [B] it makes the district court the initial theater of arbitral conflict on the merits (how else does a district court estimate the cost of a litigation?); and [C] it is already working mischief in the district **[**14]** courts.

A

Amex III is a broad ruling that, in the hands of class action lawyers, can be used to challenge virtually every consumer arbitration agreement that contains a class-action waiver--and other arbitration agreements with such a clause. While it purports to require a case-by-case approach, its wording is categorical: "Supreme Court precedent recognizes that the **[*144]** class action device is the only economically rational alternative when a large group of individuals or entities has suffered an alleged wrong, but the damages due to any single individual or entity are too small to justify bringing an individual action." *Amex III, 667 F.3d at 214*. Thus every class counsel and every class representative who suffers small damages can avoid arbitration by hiring a consultant (of which there is no shortage) to opine that expert costs would outweigh a plaintiff's individual loss.

The breadth of the holding is illustrated in the opinion. Amex III uncritically adopts the affidavit of a paid consultant to find that expert costs would be so high relative to potential damages, that "the only economically feasible means for plaintiffs enforcing their statutory rights is via a class action [in court]." **[**15]** *667 F.3d at 218*.

However, *Section 4* of the Clayton Act provides for the recovery of costs, including expert costs, and attorneys' fees. See *15 U.S.C. § 15(a)* ("[A]ny person who shall be injured in his business or property by reason of anything forbidden in the anti-trust laws . . . shall recover threefold the damages by him sustained, and the cost of suit, including a reasonable attorney's fee."). The Amex panel is evidently of the view that the incentivizing fees and cost afforded by the statute would not fully compensate plaintiffs for the costs of pursuing their claims. See *Amex III, 667 F.3d at 218*. But Congress deems these incentives sufficient to encourage private suits. The judgment of Congress in such a matter is entitled to deference, not the panel opinion's dismissive treatment.

Amex III does not vouchsafe what is meant for a suit to be "economically feasible," or when a hypothetical "economically rational" plaintiff might be willing to pursue a claim. *Id. at 218*. It cannot mean that a potential plaintiff must have the opportunity to be made whole and happy by recovery of damages, costs, attorneys' fees, expert charges, etc., because such a result is rarely achieved by even **[**16]** the most successful litigants. Moreover, Amex III demands more than such complete victory; it demands a "risk-of-losing" premium. *Id. at 218* ("Even with respect to reasonable attorney's fees[,] . . . the plaintiffs must include the risk of losing, and thereby not recovering any fees, in their evaluation of their suit's potential costs."). This formulation betrays a dominant consideration--that, without the class-action vehicle, no lawyer will be incentivized to pursue these claims. That may be; but Concepcion rejected this very policy rationale. See *Concepcion, 131 S. Ct. at 1753* (rejecting argument that "class proceedings are necessary to prosecute small-dollar claims that might otherwise slip through the legal system," because rules inconsistent with the FAA cannot be imposed "even if desirable for unrelated reasons"); see also *Coneff v. AT&T Corp., 673 F.3d 1155, 1159 (9th Cir. 2012)* (rejecting argument that plaintiffs had insufficient incentive to pursue individual claims as "primarily a policy rationale" that "cannot undermine the FAA").

B

Under the panel opinion, arbitration must now begin in federal court--and be litigated there on the merits in many critical respects. The courtroom **[**17]** inquiry that the panel requires to be undertaken before any class arbitration can in fact take place is searching. Whether a dispute may require expert testimony is a question inseparable from the merits (and raises Daubert and other vexed questions). Without a close inquiry into the merits, no court can decide what expert testimony would be required, or how much discovery is needed. And it cannot be decided whether any **[*145]** discovery or testimony is needed at all without deciding if the claim is dismissible--or such prior questions as the statute of limitations and laches, controlling law, res judicata, etc., etc., not to mention little things like whether the putative class is duly constituted and properly represented, without which there is no class claim.

Under the FAA, however, all those questions are for the arbitrator to decide. See, e.g., *Prima Paint Corp v. Flood & Conklin Mfg. Co., 388 U.S. 395, 403-404, 87 S. Ct. 1801, 18 L. Ed. 2d 1270 (1967)*. By requiring the district court to consider this at the threshold, Amex III effectively displaces arbitration with a trial court proceeding whenever lawyers assert a class claim. (And they will, often.) Even if arbitration is given a green light at the end of the judicial **[**18]** proceeding, the party seeking to arbitrate may have already spent many times the cost of an arbitral proceeding just enforcing the arbitration clause. And the partial list of issues above will create fertile ground for appeal, adding yet more delay, expense, and uncertainty. The predictable upshot is that Amex III will render arbitration too expensive and too slow to serve any of its purposes.

Amex III is incompatible with the FAA. The FAA "establishes that, as a matter of federal law, any doubts concerning the scope of arbitrable issues should be resolved in favor of arbitration." *Moses H. Cone Mem'l Hosp. v. Mercury Constr. Corp., 460 U.S. 1, 24-25, 103 S. Ct. 927, 74 L. Ed. 2d 765 & n.32 (1983)*. The federal substantive law of arbitration "is a congressional declaration of a liberal federal policy favoring arbitration agreements." *Id. at 24*. This is particularly true in light of Concepcion's reaffirmance of the "overarching purpose" of the FAA:

> The overarching purpose of the FAA, evident in the text of *§§ 2*, *3*, and *4*, is to ensure the enforcement of arbitration agreements according to their terms so as to facilitate streamlined proceedings. Requiring the availability of classwide arbitration interferes with fundamental **[**19]** attributes of arbitration and thus creates a scheme inconsistent with the FAA.

Concepcion, 131 S. Ct. 1740, 179 L. Ed. 2d 742.

In the six years Amex has been pending in this Court, its several iterations have been relied upon no fewer than three times in the Southern District of New York alone. See *Raniere v. Citigroup, Inc., No. 11 Civ. 2248, 827 F. Supp. 2d 294, 2011 U.S. Dist. LEXIS 135393, 2011 WL 5881926, at *13 (S.D.N.Y. Nov. 22, 2011)*; *Chen-Oster v. Goldman, Sachs & Co., No. 10 Civ. 6950, 2011 U.S. Dist. LEXIS 73200, 2011 WL 2671813, at *2-5 (S.D.N.Y. July 7, 2011)*; *Sutherland v. Ernst & Young, LLP, 768 F. Supp. 2d 547, 550-54 (S.D.N.Y. 2011)*.[1] Given the recurrent influence of Amex, this Court should subject it to in banc review.

That responsibility is even more compelling because the panel opinion now splits with a recent holding of the Ninth Circuit Court of Appeals. See *Coneff v. AT&T Corp., 673 F.3d 1155, 1158 n.2, 1159 n.3 (9th Cir. 2012)*. In Coneff, a putative class of AT&T wireless **[**20]** customers sued AT&T on a variety of claims, including a violation of the Federal Communications Act. *Id. at 1157*. The Ninth Circuit held that *Green Tree Financial Corp. v. Randolph, 531*

[1] These three cases also happen to be the only citations in Amex III that support its "vindication of rights" analysis. See *Amex III, 667 F.3d at 219*. This is of course self-referential: the citation of Second Circuit opinions by the district courts of this Circuit is not a form of endorsement.

U.S. 79, 121 S. Ct. 513, 148 L. Ed. 2d 373 (2000), was no obstacle to the enforcement of the arbitration agreement containing a **[*146]** class-action waiver because under the FAA it is irrelevant whether customers "have insufficient incentive" "to vindicate their rights." *Id. at 1159*. (citing *Concepcion, 131 S. Ct. at 1753*).

II

Amex III is thus incompatible with the longstanding principle of federal law, embodied in the FAA and numerous Supreme Court precedents, favoring the validity and enforceability of arbitration agreements. It should come as no surprise, then, that the panel opinion finds no support in the Supreme Court's case law. Instead, Amex III proceeds by selective quotation from Supreme Court dicta, and by aggressive measures to distinguish away the Supreme Court's recent holding in Concepcion.

A

Concepcion, decided after the second iteration of Amex, vindicated the FAA against an unconscionability challenge that was materially indistinguishable from the challenge upheld in Amex. In Concepcion, the Supreme Court rejected a common-law **[**21]** rule, developed by the California Supreme Court, that was applied to void class-action waivers in contracts of all types. This is what the discredited California opinion had said:

> [B]ecause . . . damages in consumer cases are often small and because a company which wrongfully exacts a dollar from each of millions of customers will reap a handsome profit, the class action is often the only effective way to halt and redress such exploitation. . . . Such one-sided, exculpatory contracts in a contract of adhesion, at least to the extent they operate to insulate a party from liability that otherwise would be imposed under California law, are generally unconscionable.

Discover Bank v. Superior Court, 36 Cal. 4th 148, 161, 30 Cal. Rptr. 3d 76, 113 P.3d 1100 (2005) (internal quotation marks, citations, and alterations omitted).

The Supreme Court ruled that this attempt by California to police arbitration agreements was inconsistent with the FAA. *Concepcion, 131 S. Ct. at 1748*. Refuting the dissent's argument that "class proceedings are necessary to prosecute small-dollar claims that might otherwise slip through the legal system," the majority affirmed that rules inconsistent with the FAA cannot be imposed "even if desirable for **[**22]** unrelated reasons." *Id. at 1753*.

After the Amex panel solicited briefing from the parties on the effect of Concepcion, the panel reissued Amex (in the form of Amex III), evading the broad language and clear import of Concepcion. Again in Amex III, the panel found that a class-waiver provision in an arbitration agreement is unenforceable if "the only economically feasible means for plaintiffs enforcing their statutory rights is via a class action." *Amex III, 667 F.3d at 218*.

Amex III tries to narrow Concepcion to (in the words of Amex III) a "path for analyzing whether a state contract law is preempted by the FAA." *Amex III, 667 F.3d at 213*. In so doing, Amex III conceives the following distinction: Concepcion decided only whether California's doctrine of unconscionability was preserved by the FAA's savings clause for "grounds as exist at law or in equity for the revocation of any contract," *9 U.S.C. § 2*, whereas Amex III invalidates the arbitration agreement (for the same reason of unconscionability) on the ground that the underlying antitrust claim was federal, a circumstance that the panel dresses up rhetorically as a "federal substantive law of arbitrability," *Amex III, 667 F.3d at 213* **[**23]** (quotation marks omitted). This labored analysis does not rise to a distinction, **[*147]** and treats the reasoning of Concepcion as an obstacle to be surmounted or evaded. Since, as the Supreme Court has held, the FAA preempts even state law that permits evasion of a class action waiver clause, it is hard for me to see any justification for a rule permitting *precisely* the same sort of evasion as part of the "federal substantive law of arbitrability."

B

The panel opinion leans on the distortion of dicta from Green Tree Financial Corp. v. Randolph, 531 U.S. 79, 121 S. Ct. 513, 148 L. Ed. 2d 373 (2000). In Green Tree, a lender sought to compel a borrower to arbitrate claims she had raised under certain federal statutes. Id. at 83. The question was "whether [her] agreement to arbitrate is unenforceable because it says nothing about the costs of arbitration, and thus fails to provide her protection from potentially substantial costs of pursuing her federal statutory claims in the arbitral forum." Id. at 89. The Court reconfirmed "that federal statutory claims can be appropriately resolved through arbitration," id. at 89, and "rejected generalized attacks on arbitration that rest on a 'suspicion of arbitration as a method of weakening **[**24]** the protections afforded in the substantive law to would be complainants,'" id. at 89-90 (quoting Rodriguez de Quijas v. Shearson/American Express, Inc., 490 U.S. 477, 481, 109 S. Ct. 1917, 104 L. Ed. 2d 526 (1989)). And the challenge failed for want of evidence of the "cost" of the arbitration. Id. at 90.

A passage in dicta (relied upon in Amex III) added that "the existence of large arbitration costs could preclude a litigant . . . from effectively vindicating her federal statutory rights." Id. at 90. However, "large arbitration costs" is not a reference to expense generally. Green Tree uses the phrase to reference the cost of *access* to an arbitral forum and is about the price of admission: "payment of filing fees, arbitrators' costs, and other arbitration expenses." Green Tree, 531 U.S. at 84. Only Amex III has suggested that a claim that may be expensive to litigate--whether in court *or* in arbitration--can for that reason be deemed to entail preclusive "arbitration costs." In any event, even if the Green Tree dicta were to have the meaning the panel ascribes to it, it is nonetheless still dicta. And it loses any persuasive power it might once have had in light of the Supreme Court's holding in Concepcion, which is **[**25]** more clear and more recent--and authoritative.

Similarly misleading is the panel's quotation of Mitsubishi, for the proposition that "should clauses in a contract operate 'as a prospective waiver of a party's right to pursue statutory remedies for antitrust violations, we would have little hesitation in condemning the agreement as against public policy.'" Amex III, 667 F.3d at 214 (quoting Mitsubishi, 473 U.S. at 637 n.19). The Court was there concerned with a hypothetical arbitral panel that might, relying on provisions concerning choice of forum or choice of law, refuse to apply American law to a federal statutory claim. Mitsubishi, 473 U.S. at 637 n.19.

Other circuit cases have excised provisions from arbitration agreements for the precise reasons anticipated by Green Tree and Mitsubishi. See Kristian v. Comcast Corp., 446 F.3d 25, 47-48 (1st Cir. 2006) (severing waiver of treble damages); Hadnot v. Bay, Ltd., 344 F.3d 474, 478 n.14 (5th Cir. 2003) (noting that waiver of exemplary and punitive damages is unenforcable); Paladino v. Avnet Computer Techs., Inc., 134 F.3d 1054, 1060 (11th Cir. 1998) **[*148]** (holding that arbitration agreement cannot force a party to arbitrate a statutory right **[**26]** and at the same time bar it from being awarded damages in the arbitral forum). All of these three cases involved an arbitration agreement that entirely foreclosed a *remedy* to which one of the parties was otherwise entitled to seek at law. None of them invalidated an arbitration agreement on the ground that the claims were costly to litigate individually.[2]

In Amex, there is zero evidence that any "arbitration costs"--within the meaning of Green Tree--would hamper the plaintiffs' ability to vindicate their statutory rights. None of the three panel opinions references the size of the filing fees, or any arbitrators' fees that would befall the plaintiffs. In finding that claim-by-claim litigation would not be

[2] Amex III asserts that "[o]ther Circuits permit plaintiffs to challenge class-action waivers on the grounds that prosecuting such claims on an individual basis would be a cost prohibitive method of enforcing a statutory right," Amex III, 667 F.3d at 216-17 (citing In re Cotton Yarn Antitrust Litig., 505 F.3d 274, 285 (4th Cir. 2007); Livingston v. Assocs. Fin., Inc., 339 F.3d 553, 555, 557 (7th Cir. 2003); Adkins v. Labor Ready, Inc., 303 F.3d 496, 502-03 (4th Cir. 2002). Each of those opinions quotes the "prohibitive costs" passage of Green Tree, but none uses the phrase as Amex III uses it--and all find in favor of the party seeking to enforce the arbitration clause. For one thing, the plaintiffs in each case failed to provide non-conclusory cost evidence. Notably, in Livingston and Adkins (upon which Cotton Yarn relies) the plaintiffs **[**27]** had raised the specter of prohibitive arbitration fees--not expenses incident to litigation. See Livingston, 339 F.3d at 557 ("Tellingly, [plaintiffs'] only 'evidence' of prohibitive arbitration costs is an unsubstantiated and vague assertion that discovery in an unrelated arbitration matter disclosed fees of nearly $2,000 per day."); Adkins, 303 F.3d at 503 ("[Plaintiff] does not even provide any evidence about the most basic element of this challenge: the size of the allegedly 'prohibitive' arbitration fee itself."). These cases were thus concerned about the price of admission.

"economically feasible," *Amex III, 667 F.3d at 204*, the panel relies solely on the affidavit of a paid consultant, Gary French, who opined that preparing an antitrust study would cost "at least several hundred thousand dollars, while a larger study can easily **[**28]** exceed $1 million." *Id. at 212*.[3] His preliminary review of the particular claim yielded a guess of nearly one million dollars. Id. However, that is beside the point: The ability to spread costs among a class is only a procedural right, the absence of which cannot render arbitration costs prohibitive. *Gilmer v. Interstate/Johnson Lane Corp., 500 U.S. 20, 25, 111 S. Ct. 1647, 114 L. Ed. 2d 26 (1991)*, is instructive: an employee sought to avoid arbitrating his ADEA claims on the ground that "arbitration is inconsistent with the ADEA." *Id. at 30*. The Supreme Court characterized that argument as "rest[ing] on suspicion of arbitration as a method of weakening the protections afforded in substantive law to would-be complainants, and as such, . . . far out of step with our current strong endorsement of the federal statutes favoring this method of resolving disputes." Id. (internal quotation marks omitted).

Gilmer's argument about the unavailability of class actions was expressly rejected:

> It **[**29]** is also argued that arbitration procedures cannot adequately further the purposes of the ADEA because they do not provide for broad equitable relief and class actions. . . . But even if the arbitration could not go forward as a class action or class relief could not be granted by the arbitrator, the fact that the [ADEA] provides for the possibility **[*149]** of bringing a collective action does not mean that individual attempts at conciliation were intended to be barred.

Id. at 32 (internal quotation marks omitted). As the passage from Gilmer reflects, the ADEA expressly provides for a collective action; a fortiori, the same result obtains under the antitrust laws, which do not. The only right to an antitrust class action is "merely a procedural one, arising under *Fed. R. Civ. P. 23*, that may be waived by agreeing to an arbitration clause." *Johnson v. W. Suburban Bank, 225 F.3d 366, 369 (3d Cir. 2000)* (enforcing, due to absence of congressional intent to the contrary, a bilateral arbitration clause "even though [such clauses] may render class actions to pursue statutory claims . . . unavailable").

JOSÉ A. CABRANES, *Circuit Judge*, dissenting from the denial of rehearing *in banc*:

I concur fully in **[**30]** the thorough opinion of Chief Judge Jacobs dissenting from the denial of *in banc* review. I write separately simply to underscore that the issue at hand is indisputably important, creates a circuit split, and surely deserves further appellate review. This is one of those unusual cases where one can infer that the denial of *in banc* review can only be explained as a signal that the matter can and should be resolved by the Supreme Court.

REENA RAGGI, Circuit Judge, with whom Judge WESLEY joins, dissenting from the denial of rehearing en banc:

I respectfully dissent from the denial of en banc review in this case. The panel decision to hold a class action waiver unenforceable is at odds with *Coneff v. AT&T Corp., 673 F.3d 1155 (9th Cir. 2012)*. This circuit split appears unwarranted in light of controlling Supreme Court precedent for the reasons forcefully advanced by Chief Judge Jacobs in his opinion dissenting from the denial of rehearing en banc. While I identify much merit in the Chief Judge's analysis, I do not join in his opinion because I think it would be useful to have the issues explored further by the full court in the adversarial context of an en banc argument. To the extent a majority **[**31]** of the court maintains this circuit split without further consideration, I must dissent.

End of Document

[3] It evidently did not occur to French or the panel that the rules of evidence do not govern arbitration, and that an arbitrator can consult treatises and articles for relevant antitrust and economic principles, and should do so in some cases.

HN1[] **Clayton Act, Claims**

Section 4 of the Clayton Act, *15 U.S.C.S. § 15*, defines who has standing to sue for a violation of the antitrust laws. It permits suits only by a person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws. Suits by persons who did not directly purchase a price-fixed product are barred.

Antitrust & Trade Law > Clayton Act > Claims

Civil Procedure > ... > Justiciability > Standing > Injury in Fact

Antitrust & Trade Law > Regulated Practices > Private Actions > Prioritizing Resources & Organization for Intellectual Property Act

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN2[] **Clayton Act, Claims**

The Clayton Act § 4, *15 U.S.C.S. § 15*, is the section of the antitrust laws that authorizes suits in federal court for antitrust violations. The basic standing to sue is defined as any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws. A person must be "injured" in order to sue. And he must be injured by something forbidden in the antitrust laws.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Direct Purchasers

Civil Procedure > ... > Justiciability > Standing > Injury in Fact

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN3[] **Purchasers, Direct Purchasers**

The clear rule of Illinois Brick v. State of Illinois is that only the overcharged direct purchaser and not others in the chain of manufacture or distribution is the party who has standing to sue under antitrust laws. That rule is established in part to avoid the litigation complexities that will otherwise be necessary in making an economic analysis at each level of the manufacture and distribution of a product. The longstanding policy of encouraging vigorous private enforcement of the antitrust laws supports adherence to the rule in Hanover Shoe Inc. v. United Shoe Machinery Corp., under which direct purchasers are not only spared the burden of litigating the intricacies of pass-on but also are permitted to recover the full amount of the overcharge. This rule will have the effect of eliminating any recovery by persons further down the chain of distribution who might in fact have been injured.

Antitrust & Trade Law > Clayton Act > Claims

Civil Procedure > ... > Justiciability > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Purchasers > Direct Purchasers

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

HN4[] **Clayton Act, Claims**

In the context of antitrust standing under § 4 of the Clayton Act, *15 U.S.C.S. § 15*, the rationales underlying Hanover Shoe Inc. v. United Shoe Machinery Corp. and Illinois Brick v. State of Illinois will not apply with equal force in all cases. Ample justification exists for not to carve out exceptions to the direct purchaser rule for particular types of markets. Even assuming that any economic assumptions underlying the Illinois Brick rule might be disproved in a particular case, it is an unwarranted and counterproductive exercise to litigate a series of exceptions.

Counsel: **[*1]** For Honorable Charles A. Legge, Special Master:Charles A. Legge, LEAD ATTORNEY, JAMS, San Francisco, CA.

For Crago, Inc., on behalf of itself and others similarly situated dba Dash Computers, Inc. a Kansas City corporation, Plaintiff: Bruce Lee Simon, LEAD ATTORNEY, Pearson Simon & Warshaw, LLP, San Francisco, CA; Guido Saveri, LEAD ATTORNEY, Saveri & Saveri, Inc., San Francisco, CA; Ashlei Melissa Vargas, Pearson, Simon & Warshaw LLP, San Francisco, CA; Christopher Wilson, Polsinelli Shughart PC, Kansas City, MO; Clifford H. Judges: Hon. Charles A. Legge (Ret.), Special Master.

Opinion by: Charles A. Legge

Opinion

REPORT AND RECOMMENDATION REGARDING DEFENDANTS' JOINT MOTION FOR SUMMARY JUDGMENT

Table of Contents

Summary, Conclusions, and Possible Results

Defendants have made a joint motion for summary judgment against nine of the direct class plaintiffs. The motion is made on the ground that those plaintiffs did not purchase an alleged price-fixed product; *i.e*. a cathode ray tube ("CRT"). Instead, they purchased a finished product ("FP"), *i.e*., a television set or a computer monitor into which the manufacturer had installed and integrated **[*63]** a CRT. Hence, defendants assert that those plaintiffs do not have standing to sue these defendants under the antitrust laws. The motion is straightforward and compelling, and the Special Master recommends granting the motion, based on the following:

1. A stipulation has eliminated FPs as accused products in the conspiracy alleged in this case. The only accused products are the CRTs.

2. The fact record demonstrates, with no issue of fact, that these plaintiffs did not purchase CRTs, but only FPs.

3. ***HN1***[] Section 4 of the Clayton Act (*15 U.S.C. § 15*) defines who has standing to sue for a violation of the antitrust laws. It permits suits only by a person "who shall be injured in his business or property by reason of anything forbidden in the antitrust laws..."

4. In interpreting that section, the United States Supreme Court in *Illinois Brick Company v. State of Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*, barred suits by persons who did not directly purchase a price-fixed product.

5. Subsequent decisions of the United States Supreme Court and the Ninth Circuit have adhered to that rule and have barred suits by persons who did not directly purchase a price-fixed product.

Those points will be discussed further **[*64]** below. And the Special Master believes that those joints, even as simply stated above, compel the granting of defendants' motion.

However, the Special Master notes some possible results of that recommended decision:

1. Although this motion is only against nine of the named plaintiffs, the decision will possibly be a basis for broader application in this direct class action case, perhaps by more encompassing motions for summary judgment, or by objections to the certification of a class.

2. The decision may also be the basis for motions for summary judgment in the direct action cases.

3. The decision may conflict with opinions of District Judge Susan Illston in the LCD cases, discussed below on page 10.

In spite of those possible results, the Special Master believes that the granting of defendants' motion is compelled by (1) the absence of any issue of fact that plaintiffs did not purchase a price-fixed product, (2) Clayton Act § 4, (3) decisions of the U.S. Supreme Court, and (4) decisions of and within the Ninth Circuit.

Procedure

Defendants filed their joint motion on January 19, 2012. It was accompanied by a factual record, primarily the responses of the nine plaintiffs to discovery, and **[*65]** the declaration of Molly M. Donovan for defendants. The direct purchaser plaintiffs filed a brief in opposition to the motion on February 24, 2012, and attached the declaration of Mr. R. Alexander Saveri and numerous exhibits. An opposition was also filed by the direct action plaintiffs, although no motion has been filed against them. Defendants filed a closing brief in support of their motion on March 9, 2012. The motion and oppositions were argued on March 20. The reporter's transcript was completed on April 9, 2012. The motion has been submitted for decision.

The Key Points of the Motion

1. The accused products are the CRTs, and not the television sets or computer monitors into which they were integrated.

The complaint in this action originally alleged a conspiracy to fix the prices of both CRTs and FPs. However, all allegations regarding the price fixing of FPs were eliminated by a stipulation and an order signed by your Honor on

August 26, 2011; document No. 996. More specifically, paragraph 3 of that stipulation and order stated that the direct purchaser plaintiffs:

> "hereby withdraw their CRT Finished Products Conspiracy Claims stated in the Direct CAC and the allegations of the **[*66]** Direct CAC purporting to allege a conspiracy encompassing Finished Products are stricken from the Direct CAC..."

The direct purchaser plaintiffs also withdrew "any and all requests for discovery regarding or relating to information in support of the CRT Finished Product Conspiracy Claims..." (paragraph 4). As a result of that stipulation and order, the only products alleged to be price-fixed in this case are the CRTs themselves.

2. The plaintiffs against whom this motion is directed did not purchase CRTs, but only FPs.

This motion is brought against nine of the alleged direct plaintiffs. They are listed in defendants' joint motion on pages 3-4, and their names are stated below in the recommendation of a form of order. Each of those nine is named as a plaintiff in the direct purchaser consolidated amended complaint, pages 3 and 4. Some of the plaintiffs listed in the complaint are not objects of this motion, but may be addressed in some future procedures by defendants. The fact record establishes, without a genuine issue, that each of the nine did <u>not</u> purchase a CRT. The supporting records are contained in the declaration of Ms. Donovan, and more precise citations to that record are contained **[*67]** in defendants' motion on pages 3 and 4. The Special Master does not believe that the supporting record needs to be cited or discussed further in this report, because plaintiffs do <u>not</u> contest that record, and do <u>not</u> argue that there is any issue of fact regarding that record, in their opposition to this motion. Indeed, at the oral argument of the motion, plaintiffs admitted the absence of any issue of fact. The following quotation is from p. 41 of the hearing transcript, (ll. 15-21):

> "**Special Master**: Alright. Now, to start out do you contest that these eight or nine plaintiffs did not purchase a CRT?
>
> **Mr. Lehmann [plaintiffs' counsel]**: Your Honor, I am unaware of any facts that would indicate that they purchased CRTs.
>
> **Special Master**: Okay.
>
> **Mr. Lehmann**: As opposed to finished products."

So there is no issue of fact that the plaintiffs against whom this motion is directed did <u>not</u> purchase a CRT, but only purchased a FP. This is the <u>only fact</u> upon which this motion is based, and it is without opposition.

3. Clayton Act Section 4 permits suits only by plaintiffs who have been injured by reason of a violation of the antitrust laws.

HN2[] Clayton Act § 4, *15 U.S.C. § 15*, is the section of the antitrust **[*68]** laws that authorizes suits in federal court for antitrust violations. The basic standing to sue is defined as "any person who shall be <u>injured</u> in his business or property <u>by reason of anything forbidden in the antitrust laws</u>..." (emphasis added). A person must be "injured" in order to sue. And he must be injured by something "forbidden in the antitrust laws." Does a person who never purchased a price-fixed product, but only purchased something which contained a price-fixed product, have standing to sue? That question was answered in the negative by the United States Supreme Court, primarily in *Illinois* Brick.

4. *Illinois Brick* bars suits by plaintiffs who did not directly purchase a price-fixed product.

The United States Supreme Court in *Illinois Brick Company v. State of Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*, discussed its earlier decision in *Hanover Shoe Inc. v. United Shoe Machinery Corp., 392 U.S. 481, 88 S. Ct. 2224, 20 L. Ed. 2d 1231 (1968)*, and reaffirmed and expanded on its holding. The Court in *Illinois Brick* stated its conclusions on pp. 728 and 729 of its opinion:

> "[W]e decline to abandon the construction given § 4 in *Hanover Shoe* that the overcharged direct purchaser, and not others in the chain of manufacture or distribution, **[*69]** is the party 'injured in his business or property' within the meaning of the section..."

HN3[] The clear rule of *Illinois Brick* is that only "the overcharged direct purchaser" and "not others in the chain of manufacture or distribution" is the party who has standing to sue. That rule was established in part to avoid the litigation complexities that would otherwise be necessary in making an economic analysis at each level of the manufacture and distribution of a product. See pages 731-2.

The Court said at pp. 745-6:

> "We think the longstanding policy of encouraging vigorous private enforcement of the antitrust laws [citation omitted] supports our adherence to the *Hanover Shoe* rule, under which direct purchasers are not only spared the burden of litigating the intricacies of pass-on but also are permitted to recover the full amount of the overcharge."

The Court recognized that its rule would have the effect of eliminating any recovery by persons further down the chain of distribution who might in fact have been injured (p. 746).

The Court intended its decision to be a bright light rule: "We reject these attempts to carve out exceptions to the *Hanover Shoe* rule for particular types of markets;" p. **[*70]** 744.

5. Subsequent Supreme Court and Ninth Circuit decisions adhere to the *Illinois Brick* rule.

The Supreme Court has subsequently reaffirmed *Illinois Brick*'s limitation of the right to sue to persons who directly purchased a price-fixed product. And it has expressly opposed the creation of exceptions. In *Kansas v. UtiliCorp United, Inc., 497 U.S. 199, 110 S. Ct. 2807, 111 L. Ed. 2d 169 (1990)*, the Court held (p. 204):

> "We must decide who may sue under § 4 when, in violation of the antitrust laws, suppliers overcharge a public utility for natural gas and the utility passes on the overcharge to its customers. Consistent with [*Hanover Shoe* and *Illinois Brick*], we hold that only the utility has the cause of action because it alone has suffered injury within the meaning of § 4."

The Court went on to discuss whether there might be variations from the *Illinois Brick* rule because of different economic factors or different factual settings. The Court said "no" and explained the reasons (pp. 216-7):

> ***HN4***[] "The rationales underlying *Hanover Shoe* and *Illinois Brick* will not apply with equal force in all cases. We nonetheless believe that ample justification exists for our stated decision not to 'carve out exceptions to the [direct purchaser] **[*71]** rule for particular types of markets.' The possibility of allowing an exception, even in rather meritorious circumstances, would undermine the rule. As we have stated:
>
> '[T]he process of classifying various market situations according to the amount of pass-on likely to be involved and its susceptibility of proof in a judicial forum would entail the very problems that the *Hanover Shoe* rule was meant to avoid. The litigation over where the line should be drawn in a particular class of cases would impact the same 'massive evidence and complicated theories' into treble-damages proceedings, albeit at a somewhat higher level of generality. [Citation omitted.]
>
> In sum, even assuming that any economic assumptions underlying the *Illinois Brick* rule might be disproved in a particular case, we think it is an unwarranted and counterproductive exercise to litigate a series of

> exceptions. Having stated the rule in *Hanover Shoe* and adhered to it in *Illinois Brick*, we stand by our interpretation of § 4."

One must conclude that *Illinois Brick* is still the law and the policy of the United States Supreme Court, and that it is a bright light rule. It applies even if otherwise meritorious claims are barred **[*72]** by the "direct purchasers only" rule.

The Ninth Circuit Court of Appeals also adheres to *Illinois Brick*.

In *Delaware Valley Surgical Supply, Inc. v. Johnson & Johnson, 523 F.3d 1116 (2008)*, the District Court had ruled that a plaintiff had no standing to assert a claim under the antitrust laws. The Ninth Circuit affirmed, because the party lacked "standing to pursue an antitrust claim under a direct purchaser theory;" p. 1118. The Court added (p. 1123):

> "Quite simply, we are bound by the sensible and straightforward rule set forth by *Illinois Brick*. Appellants argue this situation is distinguishable because [the parties had an independent contractual relationship]. However, the Supreme Court jurisprudence has been neither vague nor ambiguous in establishing the direct purchaser rule. The Supreme Court intended to make a bright light rule for identifying the proper plaintiff when an antitrust violation occurs in a multi-tiered distribution system. The Court has explicitly rejected attempts to create exceptions to that rule, even when the considerations in a particular market may undermine some of the reasoning used by the *Illinois Brick* Court."

In *Kendall v. Visa, 518 F.3d. 1042 (9th Cir. 2008)*, **[*73]** the appellate court affirmed the dismissal of an antitrust complaint because of, among other things, "the indirect purchaser rule in *Illinois Brick*;" p. 1051.

In *Coordinated Pretrial Proceedings in Petroleum Antitrust Litigation, 691 F.2d 1335 (9th Cir. 1982)*, the defendant oil companies allegedly conspired to fix the prices of refined petroleum products. Plaintiffs sued to recover for the resulting inflated retail gasoline prices paid by consumers. The Court of Appeals immediately stated that, "The principal difficulty plaintiffs have faced is the Supreme Court's intervening announcement in *Illinois Brick* that indirect purchasers of price-fixed goods may not maintain an antitrust damage action for overcharges passed on to them by direct purchasers from the defendant," (p. 1338). The Ninth Circuit affirmed the District Court's dismissal of plaintiffs' claims and denial of plaintiffs' motion to certify classes of retail consumers; (p. 1338).

District Court decisions within the Ninth Circuit have also adhered to *Illinois Brick*.

In *In re: ATM Fee Antitrust Litigation, 2010 U.S. Dist. LEXIS 97009, 2010 WL 3701912 (N.D. Cal. 2010)* plaintiffs were ATM cardholders who sought damages for alleged unlawful interchange fees **[*74]** that their respective banks had passed on to them. Plaintiffs acknowledged that they were the indirect payers of those fees, and that the banks were the direct payers. The District Court said, "In light of this concession, Defendants have moved for summary judgment, arguing that the *Illinois Brick* rule barring indirect purchasers from recovering monetary damages in an antitrust suit applies here and precludes Plaintiffs from seeking such damages. As explained below, the Court agrees." (Page 4).

In *Stanislaus Food Products Company v. USS-POSCO Industries, 2010 U.S. Dist. LEXIS 92236, 2010 WL 3521979 (E.D. Cal.) 2010*, plaintiff purchased tin cans from a manufacturer who had purchased the tin plate used to make the cans. Plaintiff sued a defendant who had allegedly fixed the price of the tin plate. The Court concluded that plaintiff was not a direct purchaser of the tin plate (p. 6), and dismissed the complaint (p. 30).

In *Sun Microsystems, Inc. v. Hynix, 608 F. Supp. 2d. 1166 (2009 N.D. Cal.)*, a computer manufacturer brought an antitrust action against manufacturers of dynamic random access memory. The Court held that the plaintiff computer manufacturer was not a direct purchaser of DRAM first purchased by an external **[*75]** manufacturer. The Court granted defendant's motion for summary judgment based on *Illinois Brick*, (p. 17).

The Special Master concludes that the above authorities of the Supreme Court, and of the appellate and district courts in this circuit, demonstrated faithful adherence to *Illinois Brick*, and resistance to, or outright rejection of, any new exception to that decision.

Plaintiffs' Arguments and Citations

Plaintiffs first argue that Your Honor has already rejected this motion in a prior order in his case, *Cathode Ray Tube Antitrust Litigation, 738 F.Supp.2d. 1011 (2010)*. The language of the order that is the basis for that contention is on page 1023:

> "Furthermore, courts have found antitrust standing where plaintiffs purchased downstream goods from manufacturers who made, and allegedly fixed the price of, a component of those goods."

The cited support for that statement was the *Linerboard* decision of the Third Circuit, which will be discussed below. However, the distinguishing points here are that the motion was for dismissal based upon the face of the complaint, and not for summary judgment based on a fact record. And at the time of that order, the allegations of the complaint included **[*76]** both CRTs and FPs; see p. 1023.

Plaintiffs rely heavily upon Judge Illston's decisions in the LCD cases. They are reported at *586 F.Supp.2d. 1109 (2008)*; *2009 U.S. Dist. LEXIS 132973, 2009 WL 533130 (2009)*; *2010 U.S. Dist. LEXIS 38111, 2010 WL 1264230 (2010)*; *267 FRD 291 (2010)*; and *2011 U.S. Dist. LEXIS 133852, 2011 WL 5357906 (2011)*. Indeed, Judge Illston's opinions contain statements which appear contrary to the Special Master's recommendation here. However, the Special Master nevertheless respectfully suggests that those statements are an incorrect interpretation of prior authority as applied to this present case, for several reasons. First, Judge Illston did not have occasion to discuss the factual setting which is controlling in this motion; that is, that the plaintiffs here admittedly did not purchase any price-fixed product from anyone. Second, LCD relied heavily on the *Sugar* and *Linerboard* cases in the Third Circuit, which the Special Master does not believe are good law in the Ninth Circuit, as discussed below.

Plaintiffs contend that the Ninth Circuit has already recognized their claimed exception to *Illinois Brick*. They cite *Royal Printing v. Kimberly Clark Corp., 621 F.2d. 323 (9th Cir. 1980)*, and *Freeman v. San Diego Association of Realtors, 322 F.3rd 1133 (9th Cir. 2003)*, **[*77]** for that proposition. *Royal Printing* is not applicable here because it dealt with the issue of from whom plaintiffs had to make a purchase in order to establish the necessary "directness." But that analysis does not answer the issue we have in this case, which is that the plaintiffs here never purchased the price-fixed product from anybody. In *Royal Printing*, the plaintiffs did in fact make some purchases of the price-fixed products; see p. 324. *Freeman* is not applicable to this motion for the same reason; that is, plaintiffs did pay the price-fixed services of the Multiple Listing Service; see p. 1147.

As noted above, plaintiffs and Judge Illston rely on two decisions from the Third Circuit arguably holding that the purchasers of a final product have standing to sue the makers of a component of that product who fixed prices of the component. *In re: Sugar Industry Antitrust Litigation, 579 F.2d. 13 (3rd Cir. 1978)*, and *In re: Linerboard Antitrust Litigation, 305 F.3d. 145 (3rd Cir. 2002)*. However, the Special Master is of the opinion that those cases are not the law of the Ninth Circuit. Their conclusions have not been adopted by the Ninth Circuit Court of Appeals or by any other circuit. **[*78]** And indeed, they are contrary to the above-cited Ninth Circuit decisions in *Delaware, Kendall*, and *Petroleum*, which decisions have applied the *Illinois Brick* bright-light rule. And they are contrary to the opinion in *Delaware Valley*, in which the Ninth Circuit stated its opposition to creating any new exceptions to *Illinois Brick* (p. 1122).

Plaintiffs have argued extensively, citing primarily *Royal Printing* and *Freeman*, about from whom plaintiffs purchased their products, and the relationships of the various defendant companies. But such an argument and such authorities do not answer the central fact in this motion: that is, plaintiffs did not purchase a price-fixed product from anyone.

Plaintiffs also contend, quite correctly, for the principle of ***antitrust law*** which encourages private actions. However, plaintiffs attempt to elevate that underlying principle into a separate exception to the *Illinois Brick* rule. But that does not satisfy the requirements of § 4 of the Clayton Act. Plaintiffs raise the specter that no one would be a direct purchaser who could bring an action. However, the Special Master does not believe that such an extensive conspiracy as the me alleged in this case, **[*79]** with its potential financial consequences, would escape prosecution by companies or persons who were indeed direct purchasers of the price-fixed CRTs. This motion is only against nine of the alleged members of the class, and not against the entire class. It is not even against all of the named class representatives. And it seems evident, without the necessity for factual development, that if there is a manufacturer of television sets or computer monitors who purchased allegedly price-fixed CRTs from one of the defendants or its affiliates, that the manufacturer would have the incentive to bring a direct suit against the CRT manufacturers. Further, the purchasers of FPs are probably indirect purchasers who can maintain causes of action, although under state law and not federal, for any economic harm to them. Indeed, many are already doing so in the related indirect class action that is presently pending. Finally, it is a matter of record that the Antitrust Division of the Department of Justice has been pursuing criminal actions against some of these defendants.

Plaintiffs finally contend that this motion is premature, because no depositions have been taken and the paper discovery is **[*80]** not quite complete. But the evidence which plaintiffs seek to develop by more discovery cannot be a defense to this motion. That is, the sole fact question in this motion is whether any of the named plaintiffs purchased a price-fixed product, a CRT, from one of the defendants or their affiliates. And in the record cited above, the evidence is already undisputed that none of these named plaintiffs purchased a price-fixed product.

In the present setting, where plaintiffs never purchased a price-fixed product from anybody, the Special Master continues to recommend that the above analysis on pages 4-9 counsels the granting of this motion.

Recommended Order

Finding who is and who is not a "direct" purchaser has resulted in numerous decisions in the application of the *Illinois Brick* rule. However, in this case, that search begins and ends with a simple fact: The plaintiffs against whom this motion is directed did not purchase any price-fixed product, *i.e*. a CRT, from anyone. They purchased, at best, a manufactured product which contained a CRT. Therefore, even the cases which have found some exception to *Illinois Brick* cannot apply in this case, because plaintiffs did not purchase a price-fixed **[*81]** product. Plaintiffs are at best indirect purchasers of a price-fixed product. Section 4 of the Clayton Act, as interpreted by the U.S. Supreme Court and the Ninth Circuit, bars a direct action suit here.

That result does not, as plaintiffs contend, create a major hole in the antitrust laws. It is consistent with the United States Supreme Court and Ninth Circuit decisions. Indeed, it is Plaintiffs' argument for another exception to *Illinois Brick* that would upset established Ninth Circuit law on antitrust standing.

The Special Master therefore recommends that defendants' motion for summary judgment be granted, and that judgment be entered against plaintiffs Arch Electronics, Inc.; Crago d/b/a Dash Computers Inc.; Electronic Design Company; Meijer, Inc. and Meijer Distribution, Inc.; Nathan Muchnick, Inc.; Orion Home Systems, LLC; Radio and TV Equipment, Inc.; Royal Data Services, Inc.; and Studio Spectrum, Inc.

Respectfully Recommended,

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN5[] **Antitrust & Trade Law, Sherman Act**

Maryland's Antitrust Act, Md. Code Ann., *Com. Law § 11-201 et seq.* (2005), was enacted to complement the body of federal law governing restraints of trade, unfair competition and related matters in order to protect the public and foster fair and honest intrastate competition. Md. Code Ann., *Com. Law § 11-202(a)(1)* (2005). This statute is essentially the same as *§ 1* of the Sherman Antitrust Act, *15 U.S.C.S. § 1*. In construing the Maryland Antitrust Act, courts are to be guided by the interpretation given by federal courts to the various federal statutes dealing with the same or similar matters. Md. Code Ann., *Com. Law § 11-202(a)(2)* (2005).

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN6[] **Sherman Act, Scope**

An undue restraint is one that tends to impair competition significantly without adequate justification. There are three modes of analysis that courts utilize in determining whether a restraint violates antitrust laws: (1) a per se analysis; (2) a "quick-look" analysis; and (3) a "rule of reason" analysis.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN7[] **Sherman Act, Scope**

Under a full "rule of reason" analysis, a court must decide whether under all the circumstances of the case the restrictive practice imposes an unreasonable restraint on competition. Under the classic formulation of the "rule of reason," the true test of legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition. To determine that question the court must ordinarily consider the facts peculiar to the business to which the restraint is applied; its condition before and after the restraint was imposed; the nature of the restraint and its effect, actual or probable. The history of the restraint, the evil believed to exist, the reason for adopting the particular remedy, the purpose or end sought to be attained, are all relevant facts. This is not because a good intention will save an otherwise objectionable regulation or the reverse; but because knowledge of intent may help the court to interpret facts and to predict consequences. The Court of Appeals has adopted the rule of reason analysis for claims arising under Maryland's Antitrust Act, Md. Code Ann., *Com. Law § 11-201 et seq.* (2005).

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Evidence > Burdens of Proof > Burden Shifting

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN8[] **Sherman Act, Scope**

Under the rule of reason, the plaintiffs bear an initial burden to demonstrate the defendants' challenged behavior had an actual adverse effect on competition as a whole in the relevant market. Because the antitrust laws protect competition as a whole, evidence that plaintiffs have been harmed as individual competitors will not suffice. If the plaintiffs satisfy their initial burden, the burden shifts to the defendants to offer evidence of the pro-competitive effects of their agreement. Assuming defendants can provide such proof, the burden shifts back to the plaintiffs to prove that any legitimate competitive benefits offered by defendants could have been achieved through less restrictive means. Ultimately, the factfinder must engage in a careful weighing of the competitive effects of the agreement—both pro and con—to determine if the effects of the challenged restraint tend to promote or destroy competition.

Business & Corporate Compliance > ... > Transportation Law > Water Transportation > Licensing & Registration

Business & Corporate Compliance > ... > Transportation Law > Water Transportation > State & Local Regulation

HN9[] **Water Transportation, Licensing & Registration**

Under Md. Code Ann., *Bus. Occ. & Prof. § 11-501(a)*, each American vessel engaged in foreign trade and each foreign vessel shall employ a licensed pilot to pilot the vessel when it is underway on the navigable waters of the State, including when the vessel is towing or being towed by another vessel. Pilotage and docking master fees are established by the Public Service Commission. Md. Code Ann., *Bus. Occ. & Prof. § 11-502*. These fees are paid by the owners of the vessels. Md. Code Ann., *Bus. Occ. & Prof. § 11-501(a)*.

Business & Corporate Compliance > ... > Transportation Law > Water Transportation > Licensing & Registration

HN10[] **Water Transportation, Licensing & Registration**

Under the Maryland Pilots Act, Md. Code Ann., *Bus. Occ. & Prof. § 11-101 et seq.* (2010), all Maryland bay pilots and docking masters who service foreign ships are licensed by the Maryland Board of Pilots. Additionally, these pilots are members of the Association of Maryland Pilots. Pilots are regulated both by the Act, which the Board has been given authority to enforce, and by work rules passed by the Association.

Business & Corporate Compliance > ... > Transportation Law > Water Transportation > Licensing & Registration

Business & Corporate Compliance > ... > Transportation Law > Water Transportation > State & Local Regulation

HN11[] Water Transportation, Licensing & Registration

It is the express power of the Maryland Board of Pilots to adopt regulations and pass orders to govern and regulate licensed pilots. Md. Code Ann., *Bus. Occ. & Prof. § 11-205(a)*. *Section 11-205(b)(2)* states that the Board shall be responsible for safety in providing pilotage. To help ensure the pilots are properly trained, Md. Code Ann., *Bus. Occ. & Prof. § 11-305* authorizes the Board to determine which potential pilots are sufficiently qualified for the positions and allows the Board to determine how many pilots are necessary to protect the commercial interests of the State. *Section 11-305(b)*.

Business & Corporate Compliance > ... > Transportation Law > Water Transportation > State & Local Regulation

HN12[] Water Transportation, State & Local Regulation

The Association of Maryland Pilots plays two important roles in the State's regulatory scheme. First, it is the collection agent for the receipt and disbursement of all pilotage fees. Md. Code Ann., *Bus. Occ. & Prof. §§ 11-503* and *11-602(c)(1)*. The Maryland Board of Pilots has the authority to require the Association of Maryland Pilots to make retirement and disability payments to certain inactive pilots, Md. Code Ann., *Bus. Occ. & Prof. §§ 11-504* and *11-505*, and to reserve a portion of its income in a capital replacement fund, disbursements from which can be made only with the Maryland Board of Pilots' approval. Md. Code Ann., *Bus. Occ. & Prof. 11-506(a)-(c)*. Second, the Association maintains work rules for its members. Rules that pertain to pilot list administration, appointments and assignment intervals must be approved by the Board, as well as rules that affect safe operations of vessels by Maryland pilots. *Md. Code Regs. 09.26.04.01*.

Business & Corporate Compliance > ... > Transportation Law > Water Transportation > State & Local Regulation

HN13[] Water Transportation, State & Local Regulation

Under Md. Code Ann., *Bus. Occ. & Prof. § 11-603*, a licensed pilot may not allow personal financial interests to conflict with professional responsibilities, *§ 11-603(b)(3)*, and can be paid for his or her services only through the Association. Section *§ 11-603(c)(1)*.

Civil Procedure > ... > Declaratory Judgments > State Declaratory Judgments > Scope of Declaratory Judgments

HN20[] **State Declaratory Judgments, Scope of Declaratory Judgments**

When a declaratory judgment action is brought and the controversy is appropriate for resolution by declaratory judgment, the court must enter a declaratory judgment, defining the rights and obligations of the parties or the status of the thing in controversy, and that judgment must be in writing and in a separate document. That requirement is applicable even if the action is not decided in favor of the party seeking the declaratory judgment. The crucial question is whether the action is appropriate for declaratory judgment, that is, whether the declaratory judgment would terminate the controversy and whether there are actual, concrete, and adverse claims or interests, as provided by Md. Code Ann., *Cts. & Jud. Proc. § 3-409*.

Headnotes/Summary

Headnotes

Maryland Antitrust Act — Under the Maryland Antitrust Act, "[a] person may not . . . [b]y contract, combination, or conspiracy with one or more other persons, unreasonably restrain trade or commerce." *Md. Code Ann. Com. Law ("CL") § 11-204(a)(1)* (1975, 2005 Repl. Vol.). Maryland's Antitrust Act was enacted "to complement the body of federal law governing restraints of trade, unfair competition [and related matters] . . . in order to protect the public and foster fair and honest intrastate competition." *CL § 11-202(a)(1)*. This statute "is essentially the same as *§ 1* of the Sherman Antitrust Act, . . . *15 U.S.C. § 1*." *Natural Design, Inc. v. Rouse Co., 302 Md. 47, 53, 485 A.2d 663 (1984)*.

Maryland Antitrust Act — Rule of Reason — There are three modes of analysis that courts utilize in determining whether a restraint violates antitrust laws: (1) a *per se* analysis; (2) a "quick-look" analysis; and (3) a "rule of reason" analysis. Under a "rule of reason" analysis, a court must "decide whether under all the circumstances of the case the restrictive practice imposes an unreasonable restraint on competition." *Ariz. v. Maricopa County Medical Soc., 457 U.S. 332, 343, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982)*. The classic formulation of the "rule of reason" was articulated by Justice Brandeis in *Chicago Board of Trade v. United States, 246 U.S. 231, 238, 38 S. Ct. 242, 62 L. Ed. 683 (1918)*. Under this scheme, a court must balance various factors—e.g., the facts peculiar to the business, the evil believed to exist and the reason for adopting the particular remedy—to determine "whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition." *Id*.

Maryland Antitrust Act — Pilots Association Work Rules — The work rules of the Association of Maryland Pilots, which establish a job assignment rotation system among docking masters, are not unreasonable and do not violate Maryland's Antitrust Act. The rules permit docking masters to perform their duties free from any consideration other than the safe and efficient mooring of a vessel. There is an incidental anti-competitive effect that stems from the rotation system but limitations on competition among pilots have long been an aspect of Maryland's pilotage law and are a typical feature of pilotage laws in the United States.

Preservation for Appellate Review — *Rule 8-131(a)* — The scope of our appellate review is determined by what "plainly appears by the record to have been raised in or decided by the trial court . . . ." *Rule 8-131(a)*.

Before the trial court, appellants argued that the Pilots Act, *BOP §§ 11-101 et seq., as a whole* was facially invalid and unconstitutional. On appeal, appellants no longer challenge the Pilots Act *as a whole*, but instead claim that the appeal is only a challenge "to the required Association membership." This much narrower question was not before the trial court. Moreover, appellants have failed to identify the portion of the Act (if not the Act as a whole) that they want invalidated. This argument has not been preserved.

Declaratory Judgment — "It has long been held that a person whose rights are affected by a statute may obtain a declaration of his rights and status." *Dewolfe v. Richmond, __ Md. __, 2012 Md. LEXIS 1, at *46 (No. 34, Sept. Term, 2011, filed January 4, 2012)* (citations and quotation marks omitted). Appellants asked for declaratory relief in their complaint. "[W]hen a declaratory judgment action is brought and the controversy is appropriate for resolution by declaratory judgment, the court must enter a declaratory judgment, defining the rights and obligations of the parties or the status of the thing in controversy, and that judgment must be in writing and in a separate document." *Id. at *47*. The trial court disposed of this case by granting appellees' motions for judgment at the close of appellants' case in chief. The court did not execute a separate judgment defining the rights and obligations of the parties and we remand this case for the court to do so.

Judges: *Panel*: Krauser, C.J., Kehoe, Hotten, JJ. Opinion by Kehoe, J.

Opinion by: Kehoe

Opinion

[*198] **[**1046]** Opinion by Kehoe, J.

At the heart of this appeal is an antitrust challenge to the work assignment rules of the Association of Maryland Pilots (the "Association") as they affect pilotage and tug services rendered to cargo ships in the Port of Baltimore.

Appellants, Krause Marine Towing Corporation ("KMTC"), a company that provides tug services, and Joseph L. Krause, Jr. ("Krause"), a docking master licensed by the Maryland Board of Pilots (the "Board"), filed a multi-count complaint in the Circuit Court for Baltimore City against the State, the Board, the Association, and several individual members of the Association.[1] At trial, the court granted appellees' motion for judgment at the conclusion of appellants' case in chief. Before this Court, only two of appellants' claims remain in dispute: (1) KMTC's assertion that the Association inhibited its ability to compete for tug business in violation of Maryland's Antitrust Act, *see* **[***2]** *Md. Code Ann., Com. Law ("CL") §§ 11-201 et seq*. (1975, 2005 Repl. Vol.), specifically, *CL § 11-204(a)* (stating that "[a] person may not . . . unreasonably restrain trade or commerce."); and (2) Krause's claim that the Maryland Pilots Act (the "Act"), *see* *Md. Code Ann., Bus. Occ. & Prof. ("BOP") §§ 11-101 et seq*. (1989, 2010 Repl. Vol.), infringes upon his right to contract freely.

Appellants present four issues to us. First, KMTC asserts that the trial court erred in granting the Association's motion for judgment on KMTC's antitrust claim. We hold that the trial court did not err because KMTC did not prove that the Association's work rules unreasonably restrained competition.

Second, KMTC argues that the trial court erred in permitting the Association to assert a statute of limitations defense at trial, **[***3]** thus limiting its claim for damages. We need not **[*199]** address this contention because we have decided against KMTC on its antitrust claim. As KMTC concedes, the statute of limitations issue would only be relevant if we decided in favor of KMTC on the merits of this appeal.

Third, Krause contends that the trial court erred in granting the State's motion for judgment on his claim that Maryland docking masters should not be required to be members of the Association. Krause argues that this requirement is an unconstitutional exercise of the State's police power. This contention, as presented to this Court, has not been preserved for appellate review.

[1] The claims against some of the individual defendants were dismissed prior to trial. The remaining individual defendants are Eric A. Nielsen, John Traut and Alan Watts. On appeal, the assertions against them are not distinct from the claims against the Association itself. When we refer to the Association as a party in this opinion, we are referring to the entity and the three members collectively.

[1047]** Finally, both appellants argue that the trial court erred by failing to issue a declaratory judgment as to their antitrust and constitutional claims. We agree. In disposing of appellants' claims, the trial court failed to enter a declaratory judgment, and we will remand the case to the circuit court for entry of a judgment declaring the rights of the parties in accordance with this opinion.

BACKGROUND

Overview: Pilotage and Tug Services in the Port of Baltimore

The majority of the relevant facts that fuel this dispute arise from tug boat activities **[***4]** in the Port of Baltimore. The Port is one of the busiest in the United States.[2] The container, **[*200]** vehicle transport, and bulk carrier ships that use the Port are enormous: they can be more than three football fields long, up to 138 feet wide and can draw nearly 48 feet. These vessels are too large to berth and unberth by themselves; they require the assistance of tug boats to safely accomplish this task.

There are two types of pilots that help guide these maritime behemoths into and out of port. The first are bay pilots (also referred to as harbor pilots), who direct vessels from the open sea through the Chesapeake Bay to the ship's port of destination (and vice versa). S.B. 237 (2000), Fiscal Note at 2.[3] The **[*201]** second are docking **[**1048]**

---

[2] "The Port of Baltimore plays a vital role in Maryland's economy, generating $3.2 billion in annual revenue and local purchases, as well as supporting 50,700 jobs." *Maryland At A Glance: Port of Baltimore*, Maryland State Archives (Mar. 27, 2012), *http://www.msa.md.gov/msa/mdmanual/01glance/html/port.html*. "It serves over 50 ocean carriers making nearly 1,800 annual visits." *Id*. "Total cargo moving through the Port in 2010 amounted to 33 million tons, up from 22.3 millions tons in 2009." *Id*. "Moreover, the value of cargo traveling through the Port in 2010 increased to $41.5 billion, up from $30.2 billion in 2009." *Id*. The Port handles more automobile, farm and construction machinery imports than any other port in the nation. *Id*. Baltimore is one of only two ports on the East coast where **[***5]** the main shipping channel is 50 feet deep. *Id*. There are two routes by which vessels can reach the Port via the Chesapeake Bay: one from the South that originates at Cape Henry and one from the North that originates at the Chesapeake and Delaware Canal.

[3] Some background information in this opinion derives from the fiscal notes of Senate Bill 237 (2000) and House Bill 884 (2004). As we will discuss more fully *infra*, Senate Bill 237 established a State Board of Docking Masters; House Bill 884 abolished the State Board of Docking Masters and transferred **[***6]** the regulatory authority of such masters to the State Board of Pilots. We will use these fiscal notes to aid our discussion of pilotage in Maryland. *See* *Robey v. State, 397 Md. 449, 457, 918 A.2d 499 (2007)* (relying on a fiscal note as evidence to support a particular statutory interpretation); *Moore v. State, 388 Md. 623, 636 n.4, 882 A.2d 256 (2005)* (explaining that a fiscal note is a part of the General Assembly bill file that may be considered in determining legislative intent).

The fiscal note to SB 237 (2000) is available at: *http://mlis.state.md.us/PDF-Documents/2000rs/fnotes/bil_0007/sb0237.pdf*.

The fiscal note to House Bill 884 (2004) is available at: *http://mlis.state.md.us/pdf-documents/2004rs/fnotes/bil_0004/hb0884.pdf*.

Other background information in this opinion is borrowed from various "sunset review" publications. Under the Maryland Program Evaluation Act, *see* *Md. Code Ann. State Gov't ("SG") §§ 8-401 et seq*. (1984, 2009 Repl. Vol.), the Department of Legislative Services conducts periodic legislative reviews of the activities of Maryland's executive branch. This review process is known as a "sunset review" because the agencies subject to review usually have termination dates in their authorizing **[***7]** statutes. *See Sunset Review*, Department of Legislative Services (Ma rch 27, 2012), *http://dls.state.md.us/Content.aspx?page=105*. The purpose of the review process is to "determine whether a governmental activity is necessary for the public interest" and to "make units that are responsible for necessary governmental activity accountable and responsive to the public interest . . . ." *SG § 8-402(b)(1)*.

masters (also called docking pilots), whose primary responsibility is to coordinate and direct the services of tugs to maneuver a ship as it moors and unmoors. H.B. 884 (2004), Fiscal Note at 5. Krause is a docking master; the regulation of docking masters (as opposed to bay pilots) is at the heart of this appeal.

Moving these ships through the Chesapeake Bay to their destination requires tightly planned coordination. Each steamship line that does business in the Port of Baltimore maintains a "ship's agent." Prior to the arrival of a vessel in the Chesapeake Bay, the ship's agent notifies the Association that a bay pilot is needed to guide the ship to Baltimore. Sunset Review (2001) at 27. As the ship nears its destination, the ship's agent makes arrangements for the mooring of the vessel **[***8]** by notifying the Association that a docking master is required and by contacting a tug company. The Association assigns jobs according to established work rules that provide for rotation among pilots and docking masters. (We will discuss these work rules more fully later).

Three ship-docking tug companies serve the Baltimore harbor: KMTC,[4] McAllister Towing of Baltimore, Inc., and Moran Towing Corporation. Each company owns a number of tugs that vary in utility for a given job because of size, design and engine power. Either directly or through affiliates, McAllister and Moran provide tug services to numerous commercial ports in the United States. KMTC focuses primarily on the Port of Baltimore. The three marine tug companies compete for business. In contrast, as we will explain, docking masters have a legally-established monopoly for their services and their fees are regulated by the Public Service Commission.

[*202] *The Disputes*

There are two separate claims that we must address in this case. One **[***9]** involves an antitrust claim brought by KMTC against the Association. The other involves a constitutional challenge to the Act brought by Krause against the State. Both claims involve the Association's work rules for docking masters.

The Association's work rules, dated February 2009, were entered into evidence before the trial court. These rules establish a rotation schedule so that each docking master is subject to approximately the same workload. Sunset Review (2009) at 4. Under these rules, docking masters work two weeks on duty and two weeks off duty, and when they are on duty they complete a three-assignment turn. When the three assignments are completed, the docking master returns to the back end of the rotation schedule. Critical to the underlying dispute in this case, when a ship's agent contacts the Association's dispatch unit to obtain a docking master for a ship, the docking master at the front end of the rotation schedule is automatically assigned to that vessel. As a result, steamship lines cannot contract directly with a particular docking master, nor can a docking master control which steamship line he or she serves on a regular basis.

[1049]** While the three tug companies actively **[***10]** compete for customers and commonly make arrangements with individual steamship lines to provide tug services to that line's vessels, the custom of the industry gives the assigned docking master final say in determining which and how many tugs are adequate for the job. *See* *Cooper/T. Smith, Inc. v. NLRB, 177 F.3d 1259, 1264-65 (11th Cir. 1999)* ("Once a docking pilot receives the schedule of ships docking and undocking in the port on a given day, he decides the number of tugs that will be needed based upon factors such as the dimensions and power of the ship and tidal conditions."); *Guy v. Donald, 203 U.S. 399, 404, 27 S. Ct. 63, 51 L. Ed. 245 (1906)* (describing the pilot, who was a member of the Virginia Pilots Association, as the "sole master of his course" with a free ability "to do what he thought best" **[*203]** and "no duty

Throughout this opinion, we will cite to the sunset review publications of November 2000 (not available online), October 2001 (available at, *http://dlslibrary.state.md.us/publications/OPA/S/F/Pilots_2001.pdf*) and December 2009 (available at, *http://dls.state.md.us/data/polanasubare/polanasubare_sunrev/Pilots.pdf*).

[4] At the time of trial, KMTC was owned by Krause's wife, Joann Krause, and his son, David Krause. From 1989 to 2000, Krause was a part owner of KMTC. In 2000, Krause relinquished his stake in KMTC.

to obey" advice from fellow pilots).[5] If the assigned pilot decides that the tugs provided by a tug company are not adequate for a job, either the shipping line or the tug company must hire additional tugs.

KMTC argues that this setup interferes with its contracts with steamship lines because the system prevents both steamship lines and KMTC from selecting the docking master of their choice. Because neither a steamship line nor a tug company can select its own docking masters, KMTC cannot ensure that the assigned docking master—given the pilot's discretion as to the type and number of tugs necessary for a particular job—will decide that KMTC's tugs are adequate, even though KMTC has a contract with the steamship line.

KMTC asserts that "[t]he prime example" of its problem with the rotation system is seen at the New Ore Pier located at Sparrows Point. It claims that, in 2004, the Association passed a special guideline that caused it to lose work. The guideline stated that vessels with a draft of 44 feet attempting to moor or unmoor at that facility must use at least three tugs, each with at least 3000 horsepower and the ability **[***12]** to maintain a 90 degree angle to the vessel. KMTC asserts that the guideline was adopted because of a dredging project in the area but that the guideline remained in place even after the dredging was completed. KMTC asserts that it does not own three tugs that comply with the guideline and that the requirements listed in the guideline are no longer necessary to safely moor vessels at Sparrows Point. As a result of the guideline, some docking masters have refused to use KMTC tugs at Sparrows Point. As explained by KMTC, if it had the power to bypass the rotation system and select its own pilot, then, in the event the initially scheduled pilot decided that **[*204]** KMTC's tugs did not meet the Sparrows Point guidelines, KMTC could select a different pilot willing to do the job.

KMTC also points to three instances when individual docking masters decided that, under the weather and environmental conditions at the time, KMTC's tugs were inadequate to safely moor a ship. As an example, Joann Krause testified on behalf of KMTC that a docking master, Captain Jankowiak, refused to dock a ship, the M/V MAKIKI, in winds blowing at 25 knots with single screw tugboats owned by KMTC. KMTC alleges that this **[***13]** is just one example of a docking master obstructing **[**1050]** the work of KMTC "under the guise of safety, to prevent [KMTC] from executing its contracts with the shipping companies."

Krause's grievance against the State is much narrower. He asserts that docking masters should not be forced to be members of the Association; instead, he argues that masters should be able to work independently of the Association's work rules. Krause challenges this required membership as an infringement on his freedom of contract rights.

The Trial Court Proceedings

KMTC and Krause filed suit in the Circuit Court for Baltimore City on July 18, 2008 and thereafter filed an eleven count amended complaint asking for compensatory and punitive damages and declarative and injunctive relief. The amended complaint listed the following defendants: the State, the Board, the Association, and various members of the Association.

In November 2009, the trial court issued several orders granting summary judgment in favor of appellees as to several counts. In December 2009, at the time of trial, only six counts remained: namely, Count V (antitrust claim by KMTC against the Pilot Defendants and the Association); Count VI (antitrust **[***14]** claim by KMTC against the State of Maryland for enacting *BOP § 11-603*); Count VII (freedom of contract claim by KMTC against the State); Count IX (antitrust claim by KMTC against the State for granting authority to the Board **[*205]** of Pilots); Count X (antitrust claim by Krause against the State); and Count XI (freedom of contract claim by Krause against the State). The court conducted a five day bench trial on these counts.

[5] This principle was confirmed by the testimony of Captain Michael Duarte, a docking master in Boston's harbors and KMTC's expert witness on tugboat capabilities, who agreed that a docking master **[***11]** must exercise discretion in "choosing how to accomplish a particular job" and stated further that this "would have a lot to do with the docking pilot, his experience, knowing his boats and the people running the boats . . . and knowing the waters and the berths."

Appellants filed a motion for declaratory judgment but, on the first day of trial, requested the court to defer a ruling on its motion until after trial, which the trial court agreed to do. Upon the conclusion of appellants' evidence, appellees moved for judgment. The court received extensive argument on the motion on January 22, 2010.

On April 22, 2010, the trial court issued an order, granting appellees' motions for judgment. The order stated:

> Having considered the plaintiff's evidence at trial on December 8, 9, 10, 11 and 14, 2009; having considered the oral and written motions of the defendants for judgment; having considered the plaintiffs' arguments in opposition; and having considered the defendants' replies thereto, it is this 22nd day of April, 2010, hereby,
>
> ORDERED **[***15]** that the "Motion for Judgment" filed by the Association of Maryland Pilots, Eric A. Nielsen, John Traut, and Alan Watts and the "Motion for Judgment" filed by the State of Maryland, the Maryland State Board of Pilots and Eric Nielsen in his capacity as a member of the Maryland State Board of Pilots are GRANTED *for the reason that the plaintiffs failed to present any credible evidence sufficient to establish any of their claims against any of the defendants*. (Emphasis added).

Appellants filed a Notice of Appeal and, after the parties obtained a clarifying order from the circuit court entering judgment in favor of appellees on Counts V, VI, VII, IX, X and XI, appellants filed a Supplemental Notice of Appeal. This Court consolidated the appeals. The appeal only concerns Counts V and XI.

ANALYSIS

Maryland Rule 2-519(b) provides that ***HN1***[] "[w]hen a defendant moves for judgment at the close of the evidence offered by the **[*206]** plaintiff in an action tried by the court, the court may proceed, as the trier of fact, to **[**1051]** determine the facts and to render judgment against the plaintiff . . . . " ***HN2***[] We review the court's legal conclusions *de novo. Cattail Assocs. v. Sass, 170 Md. App. 474, 486, 907 A.2d 828 (2006)*. In contrast, **[***16]** ***HN3***[] we set aside a trial court's factual determinations only when they are clearly erroneous and, in making that evaluation, we must "give due regard to the opportunity of the trial court to judge the credibility of the witnesses." *Maryland Rule 8-131(c)*.

The trial court found "that the plaintiffs failed to present any credible evidence sufficient to establish any of their claims." It did so without stating what specific evidence it found to be unworthy of belief. This presents a significant challenge for the appellants because it is "almost impossible for a judge to be clearly erroneous when he is simply not persuaded of something." *Bricker v. Warch, 152 Md. App. 119, 136, 831 A.2d 453 (2003)* (emphasis removed); *see also Starke v. Starke, 134 Md. App. 663, 680-81, 761 A.2d 355 (2000)* ("Mere non-persuasion, on the other hand, requires nothing but a state of honest doubt. It is virtually, albeit perhaps not totally, impossible to find reversible error in that regard."). Appellants have tailored their appellate contentions accordingly, limiting themselves to those based upon facts that were not challenged at trial.

I. The Association's Rotation System and the Maryland Antitrust Act

KMTC contends that the "Association **[***17]** has a state-granted monopoly over docking in the Port [of Baltimore]" and that the "anti-competitive effect [of the monopoly] outweighs the pro-competitive effect, if any." KMTC further argues that the Association's work rules, which allow docking masters to bypass KMTC's tugboat services, significantly harm its opportunity to compete with the two larger, higher priced towing companies. This, according to KMTC, not only negatively affects its own business, but it also raises prices in the towing market and hurts the bottom line of the steamship companies serving Maryland's ports. In short, KMTC contends that the **[*207]** Association's work rules impose an unreasonable restraint on competition and violate state antitrust laws.

The factual scenario that gives rise to this claim against the Association, and the basis of KMTC's antitrust argument, is summarized in the testimony of Joann Krause, a part owner of KMTC. She explains:

> [T]here is a serious problem with the [Association's] rotation system . . . The pilot calls [] in certain instances and says that he is not going to do the job with my tugs for whatever reason, whether it's windy, there's not enough water under the draft, it's not enough **[***18]** bollard pull,[6] it's not enough horsepower, whatever it is. [And] I don't have the luxury of going down the list [to select another pilot], even though there are pilots qualified to do the work, I'm at a standstill. I lose the work. . . . and this is my problem. And that's really why I'm here.

Thus, in a situation where a docking master decides that he or she cannot safely perform a particular job using KMTC services, KMTC believes it should have the option to designate another docking master to perform the job in the place of the docking master assigned by operation of the Association's rotation system. It is only this situation, *viz*., "where [KMTC is] not allowed to seek and secure a docking pilot who would trade with the assigned pilot and do [KMTC's] work," that KMTC **[**1052]** objects to on appeal and complains is an unreasonable restraint on trade.[7]

Before we begin our analysis of KMTC's antitrust claim, we note that, ***HN4***[] if a trial court grants a motion for judgment without clearly articulating its reason for doing so, **[*208]** we will affirm the trial court's decision to grant the motion for judgment if the record indicates that at least one of the grounds asserted by the moving party supported the court's decision. *See* *Smigelski v. Potomac Insurance Co., 403 Md. 55, 61, 939 A.2d 189 (2007)*; *Phillips v. Allstate Indem. Co., 156 Md. App. 729, 740, 848 A.2d 681 (2004)*; *Ross v. Am. Iron Works, 153 Md. App. 1, 10, 834 A.2d 962, (2003)* (stating the proposition that in a summary judgment context an appellate court will affirm a trial court's decision if the record indicates that at least one of the grounds asserted in favor of the motion for summary judgment supported the trial court's decision).

The Association based its motion for judgment on the following grounds:

(1) The Association could not constitute a "combination or conspiracy" for purposes of an antitrust violation;

(2) The Association's rules are **[***20]** not governed by the Sherman Act because they are the product of a clear policy of the State and are actively supervised by the State;
(3) Any alleged restraint of trade is not unreasonable;
(4) KMTC failed to prove the monetary damages it claimed; and
(5) Most of the monetary damages KMTC claims are time-barred.

We will focus on the Association's third issue—whether the alleged restraint of trade by the Pilots Association was reasonable—in analyzing this case.[8]

---

[6] "Bollard pull" is a term for the towing capacity of a tug.

[7] In its brief, KMTC asserts that it "does not challenge the rotation system itself" but rather challenges "the aspect of the Association's work rule rotation system . . . that restrains and excludes [KMTC] from competing to serve some of its own customers." To the extent we can distinguish **[***19]** these two positions, we interpret this to mean that KMTC only criticizes the rotation system as it affects its preexisting contracts with shipping lines, not as it operates generally.

[8] We have selected the third issue partly as a result of a process of elimination. With regard to the first issue, we cannot determine whether the concerted action by the Pilot Defendants could constitute a conspiracy to violate *§ 1* of the Sherman Act because the record contains very little relevant information. *See* *American Needle, Inc. v. NFL, __ U.S. __, 130 S. Ct. 2201, 2209, 176 L. Ed. 2d 947 (2010)* (Whether parties are engaged in a conspiracy to violate *§ 1* of the Sherman Act is not based upon legal formalities but rather on "a functional consideration of how the parties involved in the alleged anticompetitive conduct actually operate.").

As for issue two, the Association claims that it is immune from liability under the state action doctrine. **[***21]** The state action doctrine is an affirmative defense to an antitrust claim that requires a defendant to show "first, [that] the State has articulated a clear and affirmative policy to allow the anticompetitive conduct, and second, [that] the State provides active supervision of [the alleged] anticompetitive conduct undertaken by private actors." *FTC v. Ticor Title Ins. Co., 504 U.S. 621, 631, 112 S. Ct. 2169, 119 L. Ed. 2d 410 (1992)* (citation omitted). Because the trial court resolved this case on a motion for judgment, the Association

[*209] ***HN5***[] **[**1053]** Maryland's Antitrust Act was enacted "to complement the body of federal law governing restraints of trade, unfair competition [and related matters] . . . in order to protect the public and foster fair and honest intrastate competition." *CL § 11-202(a)(1)*. This statute "is essentially the same as *§ 1* of the Sherman Antitrust Act, . . . *15 U.S.C. § 1*." *Natural Design, Inc. v. Rouse Co., 302 Md. 47, 53, 485 A.2d 663 (1984)*. The General Assembly made explicit its intent "that, in construing [the Antitrust Act], courts are to be guided by the interpretation given by federal courts to the various federal statutes dealing with the same or similar matters. . . . " *CL § 11-202(a)(2)*. Decisions of federal courts interpreting the Sherman Antitrust Act guide our analysis in this case. *Id.; accord State v. Jonathan Logan, Inc., 301 Md. 63, 66-68, 482 A.2d 1 (1984)*; *Greenbelt Homes, Inc. v. Nyman Realty, Inc., 48 Md. App. 42, 426 A.2d 394 (1981)*.

"The purpose of Sherman Act *§ 1* is to prevent agreements that unduly restrain trade." 7 Phillip E. Areeda & Herbert Hovenkamp, ***ANTITRUST LAW*** **[***23]** AN ANALYSIS OF ANTITRUST PRINCIPLES AND THEIR APPLICATION, ¶ 1511c at 465 (3rd ed. 2010). ***HN6***[] "An undue restraint is one that tends to impair competition significantly **[*210]** without adequate justification." *Id*. There are three modes of analysis that courts utilize in determining whether a restraint violates antitrust laws: (1) a *per se* analysis; (2) a "quick-look" analysis; and (3) a "rule of reason" analysis.

Restraints are *per se* unlawful when "their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use." *Northern Pac. Ry. Co. v. United States, 356 U.S. 1, 5, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958)*; *accord State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)*. "*Per se* treatment is appropriate once experience with a particular kind of restraint enables the Court to predict with confidence that the rule of reason will condemn it." *State Oil, 522 U.S. at 10* (citation and quotations marks omitted).

Under the "quick-look" scheme, there is usually some pro-competitive justification for the restraint (thus, the unreasonableness of the restraint is not clear enough **[***24]** to warrant a *per se* analysis); but nonetheless, an elaborate analysis is not needed because "the great likelihood of anticompetitive effects can easily be ascertained." *Cal. Dental Ass'n v. FTC, 526 U.S. 756, 770, 119 S. Ct. 1604, 143 L. Ed. 2d 935 (1999)*. Courts apply a "quick-look" analysis only "to business activities that are so plainly anticompetitive that courts need undertake only a cursory examination before imposing antitrust liability." *Texaco Inc. v. Dagher, 547 U.S. 1, 7 n.3, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006)*. If an arrangement "might plausibly be thought to have a net procompetitive effect, or possibly no effect at all on competition," more than a "quick-look" is required, and a court must conduct "a more thorough enquiry into the consequences of those restraints . . . ." *Cal. Dental, 526 U.S. at 759, 771*.

HN7[] Under a full "rule of reason" analysis, a court must "decide whether under all the circumstances of the case the restrictive practice imposes an unreasonable restraint on competition." **[*211]** *Arizona v. Maricopa* ***[**1054]*** *County Medical Soc., 457 U.S. 332, 343, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982)*. Under the classic formulation of the "rule of reason," articulated by Justice Brandeis in *Chicago Board of Trade v. United States, 246 U.S. 231, 238, 38 S. Ct. 242, 62 L. Ed. 683 (1918)*:

> The true test of legality **[***25]** is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition. To determine

---

was never required to present evidence on its state action defense. Thus, the record is scant as to the degree to which the Board actually supervised the Association's work rules.

With regard to issue four, the trial court's order granting judgment gives us no indication as to whether the court concluded KMTC's evidence as to damages was credible.

Finally, we will not focus on the argument that most, but not all, of KMTC's claimed damages were time-barred because resolving this issue would not fully address the disputes between the parties.

In contrast, the record is sufficient for us to determine whether the anti-competitive effects of the Association's work rules are reasonable. Moreover, **[***22]** in light of the importance of docking masters to the efficient operation of the Port of Baltimore, resolution of this question is in the public interest.

> that question the court must ordinarily consider the facts peculiar to the business to which the restraint is applied; its condition before and after the restraint was imposed; the nature of the restraint and its effect, actual or probable. The history of the restraint, the evil believed to exist, the reason for adopting the particular remedy, the purpose or end sought to be attained, are all relevant facts. This is not because a good intention will save an otherwise objectionable regulation or the reverse; but because knowledge of intent may help the court to interpret facts and to predict consequences.

The Court of Appeals has adopted the rule of reason analysis for claims arising under Maryland's Antitrust Act. *Natural Design, 302 Md. at 54-55*.

We will analyze the alleged restraint in this case using the "rule of reason." On appeal, KMTC does not assert, and the Association does not contest, that either a *per se* analysis or a "quick-look" analysis is appropriate; both parties posit that the rule of reason **[***26]** applies to these facts. Our analysis proceeds from this standpoint.[9]

[*212] *The Rule of Reason applied to KMTC's Antitrust Claim*

Our first task in conducting a "rule of reason" analysis is to identify specifically the alleged practice or restraint that KMTC complains has an anti-competitive effect. Lawrence A. Sullivan, ANTITRUST, § 68 at 187 (1977) ("To apply the rule [of reason], one must first identify specifically the practice involved."). Here, the relevant restraint that KMTC challenges is the Association's rotation system; more specifically, as stated in KMTC's brief, KMTC challenges "the aspect of the Association's work rule rotation system" that "denies marine towing companies (and vessel owners) the right to seek to use an 'independent contractor' docking pilot of their choice to perform docking services for their customers." With this alleged restraint in mind, we will consider the "rule of reason" factors that are relevant **[**1055]** to the facts of this case. Because of the nature of this dispute, much of our "rule of reason" analysis will **[***28]** focus on background information and "the facts peculiar to maritime pilotage." Specifically, in this first portion of the analysis, we will address (1) the historical evolution of the Act and Maryland's pilotage regulations; (2) the authority that the Act gives to the Board; (3) the duties of the Association in administering pilotage work rules; (4) the development of the law regulating docking masters; (5) the addition of the conflict of interest provision, *BOP § 11-603*, to the Act; and (6) the effect of these developments on tug companies in the Port of Baltimore. After providing this background information and discussing "the facts peculiar to maritime pilotage," we will then proceed to address the history of the restraint, the evil sought to be addressed by the **[*213]** restraint, and the reasons for the particular remedy adopted by the Association.

We begin with the facts peculiar to maritime pilotage, "a unique institution [which] must be judged as such." *Kotch v. Board of River Port Pilot Comm'rs, 330 U.S. 552, 558, 67 S. Ct. 910, 91 L. Ed. 1093 (1947)*. Pilots must possess substantial technical skill and knowledge to guide vessels amidst the "infinite variety of navigation hazards, currents, tides, sand bars, submerged **[***29]** objects, weather conditions and the like that mark the harbors . . .

---

[9] A "rule of reason" analysis is conducted in various stages, where each party must satisfy an initial burden before a court conducts a complete review of the relevant facts. As stated in *Major League Baseball Props., Inc. v. Salvino, Inc., 542 F.3d 290, 317 (2d Cir. 2008)*:

> ***HN8***[] Under the rule of reason, the plaintiffs bear an initial burden to demonstrate the defendants' challenged behavior had an actual adverse effect on competition as a whole in the relevant market. Because the antitrust laws protect competition as a whole, evidence that plaintiffs have been harmed as individual competitors will not suffice. If the plaintiffs satisfy their initial burden, the burden shifts to the defendants to offer evidence of the pro-competitive effects of their agreement. Assuming defendants can provide such proof, the burden shifts back to the plaintiffs to prove that any legitimate competitive benefits offered by defendants could have been achieved through less restrictive means. Ultimately, the factfinder must engage in a careful weighing of the competitive effects of the agreement—both pro and con—to determine if the effects of **[***27]** the challenged restraint tend to promote or destroy competition.

(Citation omitted). For purposes of this discussion, we will assume that each party has met its initial burden and perform a full "rule of reason" analysis.

open to commercial vessels." *Jackson v. Marine Exploration Co., 583 F. 2d 1336, 1338 (5th Cir. 1978)*. These considerations apply as fully to docking masters as to other pilots. Nicholas J. Healy & Joseph C. Sweeney, THE LAW OF MARINE COLLISION 260 (1st ed. 1998) ("The tug master must know water levels, depth of water and state of the tides, currents, ordinary obstructions, width and length of channels, and clearance of bridges."). As Justice Black explained:

> Pilots are . . . indispensable cogs in the transportation system of every maritime economy. Their work prevents traffic congestion and accidents which would impair navigation in and to the ports. It affects the safety of lives and cargo, the cost and time expended in port calls, and, in some measure, the competitive attractiveness of particular ports.

Kotch, 330 U.S. at 558.

Every maritime state has both a mandatory pilotage requirement and pilot licensing regulations. Paul G. Kirchner & Clayton L. Diamond, *Unique Institutions, Indispensable Cogs, and Hoary Figures: Understanding Pilotage Regulations in the United States*, 23 U.S.F. Mar. L.J. 168, 187-89 (2011). Maryland **[***30]** is no exception. We will now address the specific aspects of Maryland's scheme at issue in this case.

(1) The History of the Act

The General Assembly first passed a law regulating pilots of vessels in 1787. 1787 Md. Laws (November Session) at 277-80.[10] **[*214]** The statute required ships above a certain size to use State-licensed pilots while in that portion of the Chesapeake Bay within the boundaries of the State, set out qualifications for licensure, and established a licensing and regulatory board.[11] *Id*. Growing from these core requirements, **[**1056]** Maryland's pilotage law has been supplemented and amended many times throughout the years and is now codified as the Act.

Among other things, the current Act establishes the manner in which pilots are employed and compensated. ***HN9***[] Under *BOP § 11-501(a)*, "[e]ach American vessel engaged in foreign trade and each foreign vessel shall employ a licensed pilot to pilot the vessel when it is underway on the navigable waters of the State, including when the vessel is towing or being towed by another vessel." Pilotage and docking master fees are established by the Public Service Commission. *BOP § 11-502*; *see also* *Md. Code Ann., Pub. Util. Cos. ("PUC") §§ 4-303(a)* and *4-303.1* (1998, 2010 Repl. Vol.) (The Public Service Commission establishes "fees and charges" for both pilotage services and docking services "at a just and reasonable rate."). These fees are paid by the owners of the vessels. *BOP § 11-501(a)*.

HN10[] Under the Act, all Maryland bay pilots and docking masters who service foreign ships are licensed by the Board. Additionally, these pilots are members of the Association. Sunset Review (2009) at 2. Pilots are regulated both by the Act, which the Board has been given authority **[***32]** to enforce, and by work rules passed by the Association. Thus, the Board and the Association play pivotal roles in the administration of pilotage **[*215]** services in Maryland. A discussion of both entities is warranted.

---

[10] The text of the law is accessible at the Maryland State Archives website (vol. 204 in the online version) available at: *http://www.msa.md.gov/megafile/msa/speccol/sc2900/sc2908/000001/000204/html/am20* 4--277.html.

[11] As stated in the Preamble to Maryland's Pilotage Act of 1787:

> WHEREAS it is necessary for the safety and preservation of vessels bound from this state to sea, or coming into Chesapeake bay . . . that able and experienced pilots should be established to conduct and pilot such vessels, for reasonable fees, to their several **[***31]** moorings, and that ignorant and unskillful persons should be prevented from undertaking such pilotage. . . .

1787 Md. Laws (November Session) at 277.

(2) The Board

The Board "has been in existence for over 200 years, and its priorities and legislative mandate remain largely the same today as when the Board was first established: to provide safety in navigation of Maryland's commercial waterways in the interests of the ships, the citizens of the State, and the environment." Sunset Review (2009) at 3. ***HN11***[] It is the express power of the Board to "adopt regulations and pass orders to govern and regulate licensed pilots." *BOP § 11-205(a)*. *BOP § 11-205(b)(2)* states that "the Board shall . . . be responsible for safety in providing pilotage." To help ensure the pilots are properly trained, *BOP § 11-305* authorizes the Board to determine which potential pilots are sufficiently qualified for the positions and allows the Board to determine how many pilots are "necessary to protect the commercial interests of the State." *BOP § 11-305(b)*.

(3) The Association

"All pilots licensed by the State Board of Pilots are also members of the Association **[***33]** of Maryland Pilots, founded in 1852." Sunset Review (2009) at 4. ***HN12***[] The Association plays two important roles in the State's regulatory scheme. First, it is the collection agent for the receipt and disbursement of all pilotage fees. *BOP § 11-503*; *§ 11-602(c)(1)*.[12] The Board **[*216]** has the authority **[**1057]** to require the Association to make retirement and disability payments to certain inactive pilots, *see BOP § 11-504* and *§ 11-505*, and to reserve a portion of its income in a capital replacement fund, disbursements from which can be made only with the Board's approval. *BOP 11-506(a)-(c)*.

Second, the Association maintains work rules for its members. Rules that pertain to "pilot list administration, appointments [and] assignment intervals" must be approved by the Board, as well as rules that "affect safe operations of vessels by Maryland pilots." *COMAR 09.26.04.01*.

(4) The Regulation of Docking Masters

Today, both the Board and the Association have the authority to regulate bay pilots and docking masters, but this was not always the case. Before 2000, docking masters were specifically exempt from the regulation and licensure requirements of the Act. Instead, docking masters held Coast Guard licenses entitling them to operate a tug and were usually employees of tug companies. Parks & Cattell, *supra*, at 999. The Coast Guard grew concerned about the accountability of docking masters because the Coast Guard licensing procedure did not involve **[***35]** an evaluation of the licensee's experience or skills in any docking master function. *Id*. at 1002. Following a series of administrative law proceedings involving negligence or misconduct by docking masters in other ports in the 1980's and 1990's, the Coast Guard "contacted the state authorities in those states in which the use of docking masters was common . . . to express concern that there were persons over whom no one was asserting jurisdictional control, who were docking and undocking vessels." *Id*. at 1002; *see also* Sunset Review (2009) at 6 ("Prior to 2000, . . . accountability in the event of a docking incident was not clearly defined.").

Maryland's Docking Master Law, enacted in 2000, addressed this regulatory gap by establishing a State Board of **[*217]** Docking Masters to license and regulate docking masters. *See* S.B. 237 (2000), Fiscal Note at 2 (explaining

---

[12] The concept of a centralized entity for collecting pilotage fees developed incrementally. By Chapter 214 of the acts of 1853, the "board of pilots" was charged with collecting license fees from vessels exempted from the mandatory pilotage requirement and distributing those revenues to licensed pilots. 1853 Md. Laws 278. The 1853 statute was codified as Article 74 § 19 of the Code of 1860. Shortly thereafter, the "board of pilots" was charged with collecting all pilotage fees. *See* Chapter 25, Acts of 1866, 1866 Md. Laws 35. This arrangement remained in effect for nearly a century. *See* MD. ANN. CODE (1904) Art. 74, § 19 **[***34]** and MD. ANN. CODE (1924) Art. 74, § 19. By Chapter 523 of the Acts of 1947, the Association was designated as the collection agent. 1947 Md. Laws 1282. Substantially the same statutory provision appeared in the 1951 and 1957 Codes, *see* MD. ANN. CODE (1951) Art. 74, § 12; MD. ANN. CODE (1957) Art. 74, § 1019, as well as in the current Act.

that the bill addresses the U.S. Coast Guard's concern "about which legal authority (the State or federal officials) has jurisdiction should there be an accident in the port itself.").

In 2004, however, with the passage of House Bill 884 (2004), the Docking Master Act was repealed, the Board of Docking Masters was abolished and the **[***36]** docking masters passed under the regulatory aegis of the State Board of Pilots. *See* BOP § 11-101(i) (defining "pilotage" to include "maneuvering a vessel during berthing and unberthing operations" and "shifting a vessel within a port with tug assistance."). Thus, beginning in 2004, both bay pilots and docking masters received their licenses from the Board and were both generally regulated by the Act.[13]

(5) BOP § 11-603—The Conflict of Interest Provision in the Act

Of particular import to this appeal, the 2004 legislation added a conflict of interest **[***37]** **[**1058]** provision to the Act. *See* BOP § 11-603.[14] ***HN13***[] Under BOP § 11-603, a licensed pilot may not **[*218]** allow "personal financial interests to conflict with professional responsibilities," § 11-603(b)(3), and can be paid for his or her services only through the Association. BOP § 11-603(c)(1).

The General Assembly's decision to prohibit financial relationships between docking masters, tug companies and steamship lines is consistent with the independence of judgment traditionally afforded pilots:

> Under law and custom [pilots] have an independence wholly incompatible with the general obligations of obedience normally owed by an employee to his employer. [] Their fees are fixed by law and their charges must not be discriminatory. As a rule no employer, no person, **[***39]** can tell them how to perform their

[13] Not all bay pilots in Maryland waters hold a license issued by the Board. The United States Coast Guard licenses pilots for vessels that travel from one domestic port to another, *see* 46 U.S.C. § 8502 (2006), while Maryland licenses pilots for ships bound to or coming from foreign ports. ***BOP § 11-501***; *see also* Alex A. Parks & Edward V. Cattell, Jr., THE LAW OF TUG, TOW, AND PILOTAGE 991 (3rd ed. 1994) ("In the United States, vessels engaged in the coastwise trade [i.e., from one domestic port to another] must be piloted by holders of Coast Guard-issued licenses, while vessels involved in foreign trade . . . must employ state-licensed pilots.").

[14] § 11-603. **Licensed pilot — Conflicts of interest**.

> ***HN14***[] (a) *Prohibited*. — A licensed pilot may not engage in conduct that constitutes a conflict of interest.
>
> (b) *Circumstances*. — A conflict of interest exists in situations in which:
>
> (1) except as provided in subsection (c) of this section, a licensed pilot solicits or accepts financial or other consideration of value from a tugboat, towing, vessel-assist, vessel-owning, or vessel-chartering company, or an agent or officer of that company, or from any other entity providing services in the port community;
>
> (2) a licensed pilot takes any action with the intent to benefit or harm the economic interests of a tugboat, towing, vessel-assist, vessel-owning, or vessel-chartering company, or any other entity providing services in the port community;
>
> (3) a licensed pilot allows personal financial interests to conflict with professional responsibilities;
>
> (4) a licensed pilot solicits **[***38]** business for a tugboat, towing, vessel-assist, vessel-owning, or vessel-chartering company, or any other entity providing services in the port community; or
>
> (5) a licensed pilot discourages a person from engaging the services of a tugboat, towing, vessel-assist, vessel-owning, or vessel-chartering company, or any other entity providing services in the port community.
>
> (c) *Circumstances — Conflict does not exist*. — A conflict of interest does not exist in situations in which:
>
> (1) remuneration is paid to the pilot through the Association in return for the provision of pilotage services; or
>
> (2) there is an exchange of nominal social pleasantries between the licensed pilot and any entity providing services to the port community.

> pilotage duties. When the law does not prescribe their duties, pilots are usually free to act on their own best judgment while engaged in piloting a vessel.

Bisso v. Inland Waterways Corp., 349 U.S. 85, 93-94, 75 S. Ct. 629, 99 L. Ed. 911 (1955) (plurality opinion) (citing, among other authorities, *The China, 74 U.S. 53, 7 Wall. 53, 67, 19 L. Ed. 67 (1869)*; and *Smith v. Pierce, 1 La. 349, 357-58 (1830)*. As two commentators explained:

> **[*219]** A key aspect of the state pilotage system is that in virtually every circumstance the state pilot is independent of the vessel and the vessel operator. . . . The primary responsibility of every state pilot is to protect the public interest by facilitating the safe and efficient movement of vessels in state waters. *In that respect, the principal customer of the pilot's services is not the vessel's operator but rather the state and its public interests*. []

Kirchner & Diamond, *supra*, at 188 (emphasis added; footnote omitted).

(6) The Effect of the Current Regulations on Tug Services in the Port of Baltimore

The Association's rotation system and the Act's conflict of interest provision, *BOP § 11-603*, both protect the independence **[**1059]** of judgment traditionally afforded to pilots in a direct **[***40]** and concrete fashion. The evidence presented by KMTC demonstrates the difficulties faced by docking masters as they guide very large, unwieldy vessels to moorings in the face of narrow channels, high winds, and adverse tide conditions. Maryland's pilotage scheme allows pilots to perform their duties in an independent fashion, separate from the pressures that may stem from the vessel's operator. This serves to ease the tension between the interests of a shipping line—to have its vessels moored and unmoored as quickly and inexpensively as possible—and a docking master's duty to the public to perform those duties safely. The facts peculiar to pilotage support the notion that Maryland's fixed rotation system, which has the effect of immunizing docking masters from pressure from the master of a vessel, is a reasonable approach to a complex problem.

Next, we will discuss, concurrently, the history of the restraint, the evil sought to be addressed, and the reasons for the particular remedy adopted by the Association. This requires us to return to the history of the *Pilots Act*.

The Association designed the rotation system to ensure that pilots have approximately the same workload and to protect **[***41] [*220]** against sending out fatigued pilots. *See* Sunset Review (2000) at 4 (explaining that "maintaining the work rotation schedules . . . ensure[s] pilots are subject to approximately the same workload and they have had enough rest prior to boarding and piloting the next ship."). While application of the Association's rotation rules to docking masters may be of relatively recent origin, Maryland's policy of diminishing competition among pilots is not. *See, e.g.*, 1787 Md. Laws 278, Vol. 204, §§ 10 and 11 (requiring licensed pilots to offer their services "first to the vessel nearest the land or in most distress" and the masters of such ships to accept the pilot). In this regard, Maryland is no different from other maritime states. *See* *Kotch, 330 U.S. at 561* (explaining that pilot associations arose to prevent competition among pilots and that "'[o]ne of the unfortunate results of intense competition was the fact that frequently pilots could not be had when wanted, [as] they might be far out to sea in quest of business.'" (quoting PILOTAGE IN THE UNITED STATES 28 (Department of Commerce 1917))).

We perceive significant benefits to the public in a work rule that allows a docking master to exercise **[***42]** discretion in calling for equipment that he or she thinks most suitable for a particular task. The rule allows the docking master to make this decision without fearing that the owner of the vessel will replace him or her with another docking master willing to attempt to perform the job with different tugs. In this regard, the work rule furthers the purpose and effect of *BOP § 11-603(b)(2)*, which prohibits pilots from taking any action with the intent to benefit, or to harm, the economic interests of a tug company.

Moreover, the corresponding harm to KMTC is limited. Not only is the type of harm suffered by KMTC discrete in nature (the fact that KMTC cannot choose its own pilots), but the frequency of harm is small as well. At oral argument, all parties agreed that there are approximately 5,000 calls for tug services per year in and around the

Port of Baltimore. Even so, at trial, KMTC presented evidence on just three instances that it believed restrained its ability to fairly and freely **[*221]** conduct business. On these three occasions, KMTC lost business because the docking master in each instance independently determined that the available KMTC tugboats were inadequate to safely moor the **[***43]** vessel in question because of weather conditions. **[**1060]** This was the extent of KMTC's harm on this issue. There was no evidence of any anti-competitive intent on behalf of the docking masters involved.[15]

Our review of the record establishes that Maryland's regulated pilotage system provides highly specialized services vital to the State's economic health as well as to the environment of the Chesapeake Bay. The Association's work rules and *BOP § 11-603* have the effect of permitting docking masters to perform their duties free from any consideration other than the safe and efficient mooring of a vessel. The work rule also allocates the burden of providing docking master services among the handful of licensees. There is an incidental anti-competitive effect but, as we have explained, limitations on competition among pilots have long been an aspect of Maryland's pilotage law and are typical features of pilotage **[***44]** laws in the United States. *See* *Kotch, 330 U.S. at 561*; *Olsen v. Smith, 195 U.S. 332, 344-45, 25 S. Ct. 52, 49 L. Ed. 224 (1904)*.

Indeed, the rotation schedule that KMTC criticizes is a common aspect of pilots associations. Parks & Cattell, *supra*, at 1049 ("The general form of a pilot association is that of a loose partnership, in which the various members maintain a central accounting and dispatch office and operate out of a pool; that is, the individual pilot members take turns piloting vessels on a rotation basis."); Thomas J. Schoenbaum, 2 ADMIRALTY AND MARITIME LAW 96 (5th ed. 2011) ("[Pilots] associations maintain a roster of pilots and a central office that receives requests for pilotage. [Pilots Associations] may dispatch pilots for duty on a rotating basis."); *accord* *Guy, 203 **[*222]** U.S. at 404* (describing the Virginia Pilot Association as an "unincorporated association" made up of pilots whom "[b]y their agreement . . . take turns in boarding vessels required by law to take a pilot"). That, on rare occasions, individual docking masters concluded that KMTC's tugs were inadequate does not weigh heavily in our analysis of the utility and reasonableness of the system.

In light of all of these considerations, we hold **[***45]** that KMTC failed to demonstrate that the Association's work rules implementing the rotation system are unreasonable or violate Maryland's Antitrust Act. The trial court did not err in granting the motion for judgment of the Association.

II. Mandatory Membership in the Association

To this Court, Krause argues, under two distinct theories, that it is an unconstitutional use of a State's police power to require a pilot to be a member of the Association. Under one theory, he contends that the Act infringes upon his freedom of contract rights in violation of the *due process clause of Article 24 of the Maryland Declaration of Rights.*[16] The other argument asserted by Krause is that, under the equal protection portion of *Article 24*,[17] the Act unfairly distinguishes **[**1061]** between pilots and "any other state professionals, licensed or otherwise" by requiring docking masters and pilots to be members of the Association. Krause asserts that, under either theory,

---

[15] Nor was there any evidence produced, assuming the job could be performed by another tug company, as to why KMTC could not purchase more modern equipment, with increased horsepower and maneuverability, to compete more effectively with the other tug companies and avoid this problem altogether.

[16] *Article 24* provides:

> ***HN15***[] That no man ought to be taken or imprisoned **[***46]** or disseized of his freehold, liberties or privileges, or outlawed, or exiled, or, in any manner, destroyed, or deprived of his life, liberty or property, but by the judgment of his peers, or by the Law of the land.

[17] The protections afforded by *Article 24* extend to equal protection of the laws. *See, e.g.,* *State Admin. Bd. of Election Laws v. Board of Supvrs., 342 Md. 586, 595 n.6, 679 A.2d 96 (1996)*.

"the required Association membership provision . . . cannot surmount the hurdles that [the law] *not* be 'unreasonable' or 'arbitrary' or 'discriminating.'" (Emphasis in original).

The State argues that Krause did not raise a due process or equal protection argument based on *Article 24* before the trial **[*223]** court and that accordingly these contentions have not been preserved for appellate review. We agree with the State but only in part.

A review of the record establishes that Krause did not raise an equal protection argument before the trial court. We will not consider this contention for the first time on appeal. With regard to Krause's due process claim, it is true that Krause presented *a* due process argument to the trial court; however, as we will discuss, the due process argument that he presents to us on appeal is radically different from and inconsistent with the argument that he offered to the trial court. Accordingly, Krause's due process argument is not preserved.

HN16[] The scope **[***47]** of our appellate review is determined by what "plainly appears by the record to have been raised in or decided by the trial court . . . ." *Rule 8-131(a)*. This rule "'is a matter of basic fairness to the trial court and to opposing counsel, as well as being fundamental to the proper administration of justice.'" *In re Kaleb K., 390 Md. 502, 513, 889 A.2d 1019 (2006)* (quoting *Medley v. State, 52 Md. App. 225, 231, 448 A.2d 363 (1982))*. Specifically, "[o]n matters of such import and significance as constitutional questions, we cannot overstress the necessity of fully preserving the issue below. The trial court should be given not only the opportunity to rule, but also the assistance of counsels' arguments and memoranda in reaching its result." *Hall v. State, 22 Md. App. 240, 245, 323 A.2d 435 (1974)*.

Throughout the proceedings before the trial court, Krause argued that the Pilots Act *as a whole*, and specifically *BOP § 11-603*, were facially invalid and unconstitutional.[18] On **[*224]** appeal, Krause's position is diametrically opposed to the position that he set forth before the trial court. He no longer challenges the Pilots Act *as a whole*, but instead claims that the appeal is only a challenge "to the required Association membership." As **[***48]** stated in his brief:

> To reiterate, this is not a challenge to the constitutionality of the Pilots Act as a whole, nor to the "conflict of interest" provision, *§ 11-603*. It is a challenge only to the required Association membership, as violative of the Declaration of Rights, MD Code, Constitution, *Art. 24*, by depriving Captain Krause of his 'liberty or property,' i.e., his freedom to work as an independent contractor docking pilot."[19]

---

[18] As stated in appellants' amended complaint, Krause requested that the trial court declare *BOP § 11-603*, "and any other piloting law requiring Joseph Krause to practice his profession only through membership in the Association, to be an unlawful restraint of the right of freedom of contract . . . ." In opening statements on the State's motion for summary judgment, counsel for Krause emphasized that "Captain Krause is challenging the validity of the statute as a whole" and that "[t]he State will argue this is not a facial attack, but it is." Again, in their opposition to the State's motion for judgment, appellants urged that "[b]oth **[***49]** Krause Marine and Captain Krause assert that the Pilots Act is an unlawful restraint on their respective freedoms of contract."

[19] To understand Krause's *volte face*, we must return briefly to the proceedings before the trial court and consider an affirmative defense raised by the State.

Prior to filing the current action, Krause was the subject of an administrative disciplinary proceeding brought by the Board against him for an alleged violation of *§ 11-603*. The Board prevailed before the administrative law judge. Krause sought judicial review and, eventually, the administrative decision was affirmed in part and reversed in part by a panel of this Court in *State Board of Pilots v. Krause*, No. 2979, September Term, 2007, (filed July 24, 2009), *cert. denied*, ***411 Md. 357, 983 A.2d 432 (2009)***. Krause did not challenge the constitutionality of *§ 11-603* in that proceeding.

Before the trial court in the instant case, the State asserted that Krause waived the right to challenge *§ 11-603* by failing to rase it in the administrative proceeding. In response, Krause argued that the requirement of exhaustion of administrative remedies was inapplicable because he was challenging the Pilots Act as a whole, citing *Ins. Comm'r v. Equitable Life Assurance Soc'y of the United States, 339 Md. 596, 619, 664 A.2d 862 (1995)*. **[***50]** Krause was adamant about characterizing his claim as a

There are problems with Krause's new position. First, this much narrower question—which **[**1062]** involves "a challenge only to the required Association membership" and not a facial challenge to the Pilots Act—was not before the trial court. Second, Krause has failed to identify the portion of the Act (if not **[*225]** the Act as a whole or *BOP § 11-603*) that he wants invalidated. Krause insists that this is a challenge "to the required Association membership," but we cannot address this assertion if Krause does not direct us to the offending provision of the Act. *See* *Maryland Rule 8-504(a)(5)*; *Citizens v. Board of Elections, 201 Md. App. 605, 622 n.18, 30 A.3d 245 (2011)* (this Court will not consider arguments that are not presented with particularity). For these reasons, Krause's due process argument has not been preserved. *Rule 8-131(a)*.[20]

III. The Declaratory Judgment

"It has long been held that ***HN17***[] a person whose rights are affected by a statute may obtain a declaration of his rights and status." *Dewolfe v. Richmond, ___ Md. ___, 2012 Md. LEXIS 1, at *46* (No. 34, Sept. Term, 2011, filed January 4, 2012) (citations and quotation marks omitted). *Section 3-406 of the Courts and Judicial Proceedings Article* states:***HN18***[] "Any person . . . whose rights, status, or other legal relations are affected **[***52]** by a statute . . . may have determined any question of construction or validity arising under the . . . statute . . . and obtain a declaration of rights, status, or other legal relations under it." *Md. Code Ann., Cts. & Jud. Proc. ("CJP") § 3-406* (1973, 2006 Repl. Vol.). Likewise, *CJP § 3-409* explains that ***HN19***[] "a court may grant a declaratory judgment or decree in a civil case, if it will serve to terminate the uncertainty or controversy giving rise to the proceeding . . . ."

As the Court of Appeals explained in *Dewolfe*:

> **[*226]** ***HN20***[] **[**1063]** when a declaratory judgment action is brought and the controversy is appropriate for resolution by declaratory judgment, the court must enter a declaratory judgment, defining the rights and obligations of the parties or the status of the thing in controversy, and that judgment must be in writing and in a separate document. That requirement is applicable even if the action is not decided in favor of the party seeking the declaratory judgment.

Id. at *47 (citations and quotation marks omitted). "The crucial question is whether the action is appropriate for declaratory judgment, that is, whether the declaratory judgment would terminate the controversy and whether there are actual, **[***53]** concrete, and adverse claims or interests, as provided by *C.J.P. § 3-409*." *Id*.

Here, appellants requested declaratory relief and the pertinent allegations in appellants' amended complaint—i.e., that the work rules of the Association violated the State's Antitrust Act and that the Act unconstitutionally limited Krause's right to freedom of contract—presented "actual, concrete, and adverse claims." In disposing of them, the trial court simply stated "that the plaintiffs failed to present any credible evidence sufficient to establish any of their claims against any of the defendants." The trial court should have executed a separate judgment defining the rights and obligations of the parties. Had the court done so, it would have entered a judgment addressing the requests for declaratory relief as presented to it, not the requests as framed before us. Our instructions on remand will be limited to the issues raised before the trial court.

---

facial attack on the constitutionality of the Act (as opposed to a challenge to a discrete, fact-specific situation) to rebut the "exhaustion of administrative remedies" defense proffered by the State.

[20] Our own review of the Act leads us to conclude that no single provision of the Act requires pilots to be members of the Association. **[***51]** *BOP § 11-603(c)(1)* prohibits pilots from receiving remuneration for their services other than through the Association and *BOP § 11-505(a)(2)(iii)* requires the Association to distribute net fees to "regularly working licensed pilots who are members in good standing of the Association." The two statutes operate together to impose an effective requirement of Association membership, at least for those pilots who wish to earn a living through their services. Krause cannot simultaneously assert that "this is not a challenge to . . . the 'conflict of interest' provision, *§ 11-603*" while also contending that this "is a challenge only to the required Association membership" when *§ 11-603* is an integral part of the statutory scheme requiring membership.

We remand this case to the trial court with instructions to enter a written judgment declaring that: (i) the February 2009 rules of the Association of Maryland Pilots implementing the rotation system did not violate *CL § 11-204(a)(1)*; and (ii) the *Pilots Act* **[***54]** does not unlawfully restrain Krause's right of freedom of contract. *See* *Donnelly Adv. Corp. v. City of Baltimore, 279 Md. 660, 672, 370 A.2d 1127 (1977)* (When the trial court dismissed plaintiff's request for a declaratory judgment **[*227]** action without a declaration of the parties' rights, remand for entry of declaratory judgment was appropriate.).

THE JUDGMENT OF THE CIRCUIT COURT FOR BALTIMORE CITY IS AFFIRMED IN PART AND VACATED IN PART AND THIS CASE IS REMANDED FOR FURTHER PROCEEDINGS CONSISTENT WITH THIS OPINION.

APPELLANTS TO PAY COSTS.

[Daniel v. Wells Fargo Bank, N.A.](#)

United States District Court for the Eastern District of California

June 4, 2012, Decided; June 4, 2012, Filed

No. 2:11-cv-02652-MCE-EFB

Reporter
2012 U.S. Dist. LEXIS 77200 *; 2012 WL 2118539

PAUL DANIEL, MARGIE DANIEL, PlaintiffS, v. WELLS FARGO BANK, N.A., et al., Defendants.

Core Terms

savings, notice, motion to dismiss, disclosure, fraudulent, judicial estoppel, good faith, origination, bankruptcy proceedings, cause of action, fair dealing, conclusory, covenant, merits, unfair, fails, state law claim, leave to amend, injunction, rescission, preempted, quotation, Mortgage, omission, statute of limitations, allegations, estopped, MOOT, factual allegations, breach of contract

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Motions to Dismiss, Failure to State Claim**

On a motion to dismiss for failure to state a claim under *Fed. R. Civ. P. 12(b)(6)*, all allegations of material fact must be accepted as true and construed in the light most favorable to the nonmoving party. *Fed. R. Civ. P. 8(a)(2)* requires only a short and plain statement of the claim showing that the pleader is entitled to relief in order to give the defendant fair notice of what the claim is and the grounds upon which it rests. Though a complaint attacked by a *Rule 12(b)(6)* motion to dismiss does not need detailed factual allegations, a plaintiff's obligation to provide the grounds of his entitlement to relief requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do. A plaintiff's factual allegations must be enough to raise a right to relief above the speculative level.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] **Complaints, Requirements for Complaint**

Fed. R. Civ. P. 8(a)(2) requires a showing, rather than a blanket assertion of entitlement to relief. Without some factual allegation in the complaint, it is hard to see how a claimant could satisfy the requirements of providing not only fair notice of the nature of the claim, but also grounds on which the claim rests. A pleading must contain only enough facts to state a claim to relief that is plausible on its face. If the plaintiffs have not nudged their claims across the line from conceivable to plausible, their complaint must be dismissed.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN3[] **Amendment of Pleadings, Leave of Court**

A court granting a motion to dismiss a complaint must then decide whether to grant leave to amend. *Fed. R. Civ. P. 15(a)* empowers the court to freely grant leave to amend when there is no undue delay, bad faith, dilatory motive on the part of the movant, undue prejudice to the opposing party by virtue of the amendment, or futility of the amendment. Leave to amend is generally denied when it is clear the deficiencies of the complaint cannot be cured by amendment. While leave to amend must be freely given, the court is not required to allow futile amendments.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Judicial Estoppel

HN4[] **Estoppel, Judicial Estoppel**

In the bankruptcy context, a party is judicially estopped from asserting a cause of action not raised in a reorganization plan or otherwise mentioned in the debtor's schedules or disclosure statements. Further, judicial estoppel will be imposed when the debtor has knowledge of enough facts to know that a potential cause of action exists during the pendency of the bankruptcy, but fails to amend his schedules or disclosure statements to identify the cause of action as a contingent asset.

Banking Law > ... > Banking & Finance > Federal Acts > Home Owners' Loan Act

Banking Law > ... > Banking & Finance > Regulators > US Office of Thrift Supervision

HN5[] **Federal Acts, Home Owners' Loan Act**

Federal savings associations, including federal savings banks, are subject to the Home Owner's Loan Act (HOLA), *12 U.S.C.S. §§ 1461 et seq.*, and are regulated by the Office of Thrift Supervision (OTS). *12 U.S.C.S. § 1464*.

Banking Law > ... > Banking & Finance > Federal Acts > Home Owners' Loan Act

Banking Law > ... > Banking & Finance > Regulators > US Office of Thrift Supervision

HN6[] **Federal Acts, Home Owners' Loan Act**

Under the Home Owner's Loan Act (HOLA), *12 U.S.C.S. §§ 1461 et seq.*, the Office of Thrift Supervision (OTS), *12 U.S.C.S. § 1464*, enjoys plenary and exclusive authority to regulate all aspects of the operations of Federal savings associations and its authority occupies the entire field of lending regulation for federal savings associations. The Ninth Circuit has stated that the enabling statute and subsequent agency regulations are so pervasive as to leave no room for state regulatory control. Under the regulations promulgated by the OTS, HOLA preempts any state law claim having to do with disclosures and advertising; processing, origination, servicing, sale, or purchase of, or investment or participation in, mortgages; terms of credit; and loan-related fees, *12 C.F.R. § 560.2(b)(4)*, *(5)*, *(9)*, *(10)*.

Banking Law > Consumer Protection > Truth in Lending > Disclosure

Banking Law > Consumer Protection > Truth in Lending > Liability for Violations

HN7[] Truth in Lending, Disclosure

The Truth in Lending Act (TILA), *15 U.S.C.S. §§ 1601 et seq.*, requires that lenders make certain disclosures to borrowers, which will give rise to a cause of action if the lender violates its disclosure requirements. Further, TILA mandates that borrowers be given three business days to rescind, without penalty, a consumer loan that uses their principle dwelling as security, *15 U.S.C.S. § 1635(a)*. A TILA claim seeking damages is subject to a one-year statute of limitations, *15 U.S.C.S. § 1640(e)*, That limitations period begins to run on the date of consummation of the transaction. If the lender has not complied with TILA's disclosure requirements, the rescission period is extended to three years, *§ 1635(f)*.

Governments > Legislation > Statute of Limitations > Tolling

HN8[] Statute of Limitations, Tolling

The Court will apply equitable tolling in situations where, despite all due diligence, the party invoking equitable tolling is unable to obtain vital information bearing on the existence of the claim.

Real Property Law > Financing > Foreclosures > General Overview

HN9[] Financing, Foreclosures

Under California law, a plaintiff challenging a foreclosure sale or any cause of action "implicitly integrated" with the sale is required to make a valid and viable tender of payment of the debt. An offer to tender is an offer to pay the full amount of the debt for which the property was security.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

Torts > ... > Fraud & Misrepresentation > Actual Fraud > Elements

HN10[] Heightened Pleading Requirements, Fraud Claims

The elements for a fraud claim are (a) a misrepresentation (false representation, concealment, or nondisclosure); (b) knowledge of falsity (or scienter); (c) intent to defraud, i.e., to induce reliance; (d) justifiable reliance; and (e) resulting damage. *Fed. R. Civ. P. 9(b)* requires a plaintiff to state with particularity the circumstances constituting fraud. This includes an account of the time, place, and specific content of the false representations as well as the identities of the parties to the misrepresentations.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN11[] Deceptive & Unfair Trade Practices, State Regulation

California's Unfair Competition Law (UCL), *Cal. Bus. & Prof. Code §§ 17200 et seq.*, defines unfair competition as any unlawful, unfair or fraudulent business act or practice. "Unlawful" practices are practices forbidden by law, be it civil or criminal, federal, state, or municipal, statutory, regulation, or court-made. To state a cause of action based on an "unlawful" business act or practice under the UCL, a plaintiff must allege facts sufficient to show a violation of some underlying law.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN12[] Deceptive & Unfair Trade Practices, State Regulation

A business act or practice is "unfair" when the conduct threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to a violation of the law, or that otherwise significantly threatens or harms competition. To sufficiently plead an action based on an "unfair" business act or practice, a plaintiff must allege facts showing the "unfair" nature of the conduct and that the harm caused by the conduct outweighs any benefits that the conduct may have.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN13[] Deceptive & Unfair Trade Practices, State Regulation

A "fraudulent" business act or practice is one in which members of the public are likely to be deceived. Thus, in order to state a cause of action based on a "fraudulent" business act or practice, the plaintiff must allege that consumers are likely to be deceived by the defendant's conduct. Furthermore, a plaintiff alleging unfair business practices under *Cal. Bus. & Prof. Code § 17200* must state with reasonable particularity the facts supporting the statutory elements of the violation.

Business & Corporate Compliance > ... > Breach > Breach of Contract Actions > Elements of Contract Claims

HN14[] Breach of Contract Actions, Elements of Contract Claims

Under California law, a claim for breach of contract requires that a plaintiff demonstrate: (1) the existence of the contract; (2) plaintiff's performance or excuse for nonperformance of the contract; (3) defendant's breach of the contract; and (4) resulting damages.

Contracts Law > Contract Interpretation > Good Faith & Fair Dealing

HN15[] Contract Interpretation, Good Faith & Fair Dealing

Under California law, every contract imposes upon each party a duty of good faith and fair dealing in its performance and its enforcement. The covenant of good faith and fair dealing requires that neither party will do anything which will injure the right of the other to receive the benefits of the agreement. The covenant is limited to assuring compliance with the express terms of the contract, and cannot be extended to create obligations not contemplated in the contract.

Contracts Law > Contract Interpretation > Good Faith & Fair Dealing

HN16[] Contract Interpretation, Good Faith & Fair Dealing

The implied covenant does not require parties to negotiate in good faith prior to any agreement.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN17[] **Injunctions, Preliminary & Temporary Injunctions**

The party requesting preliminary injunctive relief must show that he is likely to succeed on the merits, that he is likely to suffer irreparable harm in the absence of preliminary relief, that the balance of equities tips in his favor, and that an injunction is in the public interest.

Counsel: **[*1]** For Paul Daniel, Margie Daniel, Plaintiffs: Herman A. D. Franck, V, LEAD ATTORNEY, Law Offices of Herman Franck, Sacramento, CA.

For Wells Fargo Bank, N.A., Successor by Merger to Wells Fargo Bank Southwest, N.A., formerly known as Wachovia Mortgage FSB, formerly known as World Savings Bank FSB, Defendant: Tim G. Ceperley, LEAD ATTORNEY, Anglin, Flewelling, Rasmussen, Campbell & Trytten LLP, Pasadena, CA.

Judges: MORRISON C. ENGLAND, JR., UNITED STATES DISTRICT JUDGE.

Opinion by: MORRISON C. ENGLAND, JR.

Opinion

MEMORANDUM AND ORDER

Before the Court are Defendants' Motion to Dismiss Plaintiffs' First Amended Complaint ("FAC") (ECF No. 5), Defendants' Motion to Strike Portions of Plaintiffs' FAC (ECF No. 6) and Request for Judicial Notice ("RJN") (ECF No. 7). Also before the Court are Plaintiffs' Motions for: (1) Remand (ECF No. 9); (2) Untimely Filing of Opposition to Motion to Dismiss (ECF No. 13); (3) Issuance of Temporary Restraining Order ("TRO") and Preliminary Injunction ("PI") (ECF No. 20); and (4) Setting of Expedited Hearing on the Motion for TRO/PI (ECF No. 25). [1] For the reasons that follow, Defendants' Motion to Dismiss (ECF No. 5) and Request for Judicial Notice (ECF No. 7) are GRANTED and Defendants' **[*2]** Motion to Strike (ECF No. 6) is DENIED as MOOT. Plaintiffs' Motion for Remand (ECF No. 9) is DENIED, Plaintiffs' Motion for Untimely Filing of Opposition to Motion to Dismiss (ECF No. 13) is GRANTED, and Plaintiffs' Motions for TRO/PI and an expedited hearing on same (ECF Nos. 20 and 25) are DENIED as MOOT.

BACKGROUND[2]

In the spring of 2007, Plaintiffs Paul Daniel and Margie Daniel refinanced their home located at 7821 Killdeer Way, Elk Grove, California, and entered into an Option Adjustable Rate Mortgage ("ARM") with World Savings Bank, which later became Wells Fargo Bank, N.A. ("Wells Fargo"). [3] (FAC, ECF No. 1, at 7, Ex. A.)

Plaintiffs' FAC does not indicate what exactly happened following the refinancing, but **[*3]** Defendants state that Plaintiffs' original complaint was filed in state court in April of 2010 (although Defendants state they were not served with the FAC until September of 2011). (MTD, ECF No. 5 at 10; Notice of Removal and FAC, ECF No. 1.) In

---

[1] Because oral argument would not be of material assistance, the Court orders these matters submitted on the briefs. E.D. Cal. Local Rule 78-230(h).

[2] To the extent possible, the following facts are taken from Plaintiffs' FAC (ECF No. 1.) For the purposes of this Motion, the Court accepts Plaintiffs' facts as true and makes all inferences in the light most favorable to Plaintiffs.

[3] In 2008, Plaintiffs again refinanced the property into an ARM with Wells Fargo. (ECF No. 7, Ex. C.)

addition, Defendants state that Plaintiffs filed a petition for Chapter 7 bankruptcy in December 2010, and that this petition was discharged on May 17, 2011. (ECF No. 5 at 9, ECF No. 7, Exs. I and J (Voluntary Petition and Discharge of Debtor).) Defendants removed to this Court on October 7, 2011, on the basis of federal question jurisdiction.

Plaintiffs generally allege that the Option ARM is a deceptively devised financial product, which had higher interest rates than promised, and which was designed to, and did in fact, cause negative amortization of their loan to occur. [4] (FAC at 8-9.) Plaintiffs raise five claims for relief: (1) violations of the Truth in Lending Act, *15 U.S.C., §§ 1601, et seq.* ("TILA"); (2) fraudulent omissions; (3) violation of California's Unfair Competition Law, *Business and Profession Code §§ 17200, et seq.* ("UCL"); (4) breach of contract; and (5) breach of the implied covenant of good faith and fair dealing.

On October 14, 2011, Defendants filed their MTD. (ECF No. 5.) Defendants' move to dismiss, under *Fed. R. Civ. P. 12(b)(6)*, [5] on the basis that Plaintiffs': (1) claims are barred by judicial estoppel; (2) state law claims against Wachovia are barred by the Home Owner's Loan Act, *12 U.S.C. §§ 1461, et seq.* ("HOLA"); (3) TILA claims are time-barred and Plaintiffs never tendered their indebtedness; (4) fraudulent omission claim fails to satisfy the elements for such a claim; (5) have failed to state a claim for unfair business practices under the UCL; (6) failed to allege a breach of the note or deed of trust; and (7) failed to state a claim for breach of the implied covenant of good faith and fair dealing. In addition, Plaintiffs filed a Motion to Strike portions of Plaintiffs' FAC. (ECF No. 6.)

On December 10 and 16, 2011, Plaintiff Paul Daniel filed a request, which the Court interprets as a **[*5]** Motion to Remand (see ECF Nos. 9 and 10), generally asking the Court to send the case back to state court due to Mr. Daniel's deteriorating health. While the Court is sympathetic to Mr. Daniel's health issues, they are not a basis for remand, and Defendants properly removed this case on the basis of federal question jurisdiction. Therefore, the motion is denied.

On March 28, 2012, Plaintiffs filed their Motion seeking leave to untimely file their Opposition, which attached their proposed Opposition. (ECF No. 13.) The motion to permit untimely filing of the Opposition is unopposed and will be granted due to the fact that Plaintiffs' prior attorney has been indicted and Plaintiffs have only recently obtained new counsel. (See ECF No. 13, Exs. A-D.)

Thereafter, Plaintiffs filed their Motion for TRO/PI and Motion for Expedited Hearing. (ECF Nos. 20-25.) Plaintiffs contend that a TRO/PI is necessary to prevent Defendants from evicting them and because there is an unlawful detainer action proceeding in Sacramento Superior Court.

ANALYSIS

Because the Court's denial of Plaintiffs' Motion for a TRO/PI relates to the merits of their claims, the Court will first address Defendants' MTD. (ECF Nos. **[*6]** 5.) Because the Court concludes that the MTD should be granted, the MTS, (ECF No. 6), is denied as moot.

I. MOTION TO DISMISS

A. Standard

---

[4] Negative **[*4]** amortization refers to the situation where a loan payment for a particular period is less than the interest charged for that period, so the balance owed on the loan increases over time.

[5] All further references to "Rule" or "Rules" are to the Federal Rules of Civil Procedure unless otherwise noted.

HN1[] On a motion to dismiss for failure to state a claim under *Rule 12(b)(6)*, all allegations of material fact must be accepted as true and construed in the light most favorable to the nonmoving party. *Cahill v. Liberty Mut. Ins. Co., 80 F.3d 336, 337-38 (9th Cir. 1996)*. *Rule 8(a)(2)* requires only "a short and plain statement of the claim showing that the pleader is entitled to relief" in order to "give the defendant fair notice of what the. . . claim is and the grounds upon which it rests." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 554-55, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (internal citations and quotations omitted). Though "a complaint attacked by a *Rule 12(b)(6)* motion to dismiss does not need detailed factual allegations, a plaintiff's obligation to provide the 'grounds' of his 'entitlement to relief' requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Id. at 555* (internal citations and quotations omitted). A plaintiff's factual allegations must be enough to raise a right to relief above the speculative level. **[*7]** Id. (citing 5 C. Wright & A. Miller, Federal Practice and Procedure § 1216, pp. 235-36 (3d ed. 2004) ("The pleading must contain something more. . . than . . . a statement of facts that merely creates a suspicion [of] a legally cognizable right of action")).

Moreover,*HN2*[] "*Rule 8(a)(2)* . . . requires a 'showing,' rather than a blanket assertion of entitlement to relief. Without some factual allegation in the complaint, it is hard to see how a claimant could satisfy the requirements of providing not only 'fair notice' of the nature of the claim, but also 'grounds' on which the claim rests." *Twombly, 550 U.S. at 555, n.3* (internal citations omitted). A pleading must contain "only enough facts to state a claim to relief that is plausible on its face." *Id. at 570*; see also *Ashcroft v. Iqbal, 556 U.S. 662, 677-679, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. If the "plaintiffs . . . have not nudged their claims across the line from conceivable to plausible, their complaint must be dismissed." *Twombly, 550 U.S. at 570*; *Iqbal, 556 U.S. at 680*.

HN3[] A court granting a motion to dismiss a complaint must then decide whether to grant leave to amend. *Rule 15(a)* empowers the court to freely grant leave to amend when there is no "undue delay, **[*8]** bad faith[,] dilatory motive on the part of the movant, . . . undue prejudice to the opposing party by virtue of . . . the amendment, [or] futility of the amendment. . . ." *Foman v. Davis, 371 U.S. 178, 182, 83 S. Ct. 227, 9 L. Ed. 2d 222 (1962)*. Leave to amend is generally denied when it is clear the deficiencies of the complaint cannot be cured by amendment. *DeSoto v. Yellow Freight Sys., Inc., 957 F.2d 655, 658 (9th Cir. 1992)*; *Balistreri v. Pacifica Police Dep't, 901 F.2d 696, 699 (9th Cir. 1990)* ("A complaint should not be dismissed under *Rule 12(b)(6)* unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief.")(internal citations omitted). While leave to amend must be freely given, the court is not required to allow futile amendments. *Klamath-Lake Pharm. Ass'n v. Klamath Med. Serv. Bureau, 701 F.2d 1276, 1293 (9th Cir. 1983)*.

B. Analysis

Defendants generally argue this action may be dismissed on the basis of: (1) judicial estoppel; (2) HOLA; and (3) failure to state a claim on each of Plaintiffs' causes of action. Each will be addressed before the Court discusses Plaintiffs' Motion for TRO/PI.

1. Judicial Estoppel

(a) Parties' Contentions

Defendants **[*9]** first contend that Plaintiffs' claims are barred under the doctrine of judicial estoppel because Plaintiffs failed to raise any of these claims in their bankruptcy proceeding and they should be estopped from raising them after the discharge of their bankruptcy. (MTD, ECF No. 5 at 2-4.) Specifically, Defendants argue that Plaintiffs' claims all arise from either the origination of their loan, or from its subsequent refinancing, all of which occurred before Plaintiffs filed for bankruptcy. (Id. at 2-3.) Because Plaintiffs failed to assert their claims in the bankruptcy proceeding, Defendants contend they should be estopped from pursuing their claim in this proceeding. (Id. at 3.)

In their Opposition, Plaintiffs do not contest that the claims should have been first filed in the bankruptcy proceeding. (ECF No. 19 at 2-3.) Rather, Plaintiffs argue that this action should be held in abeyance while they seek to reopen the bankruptcy action to raise their claims. Id.

(b) Analysis

HN4[] "In the bankruptcy context, a party is judicially estopped from asserting a cause of action not raised in a reorganization plan or otherwise mentioned in the debtor's schedules or disclosure statements." *Hamilton v. State Farm Fire & Cas. Co., 270 F.3d 778, 783 (9th Cir. 2001)* **[*10]** (holding that plaintiff was estopped from suing an insurer subsequent to the discharge of his bankruptcy where he had notice of his claims against the insurer during the pendency of the bankruptcy action). Further, "[j]udicial estoppel will be imposed when the debtor has knowledge of enough facts to know that a potential cause of action exists during the pendency of the bankruptcy, but fails to amend his schedules or disclosure statements to identify the cause of action as a contingent asset." *Id. at 784*.
