Judges: TENA CAMPBELL, Chief Judge.

Opinion by: TENA CAMPBELL

Opinion

ORDER AND MEMORANDUM DECISION

In this antitrust case, the Plaintiffs (Flying J Inc. et al.) [1] recently added Defendant Comdata Network, Inc. to their First Amended Complaint. [2] Comdata now moves for dismissal under *Rule 12(b)(6)* of all of Plaintiffs' claims, or, in the alternative, an order striking all allegations (and exhibits) relating to pre-settlement conduct (i.e., acts occurring before May 2001 when Flying J and Comdata settled a separate antitrust action). [3] The Pilot Defendants (Pilot Travel Centers LLC and Pilot Corporation) have filed a motion to dismiss that simply joins in Comdata's motion (similarly, Flying J's opposition to the Pilot Defendants' motion incorporates by reference its memorandum opposing Comdata's motion). [4] For the reasons set forth below, the motions to dismiss or strike pre-settlement allegations are DENIED, with the exception that the court dismisses Flying J's allegations under non-Utah state antitrust statutes.

PROCEDURAL BACKGROUND

The First Amended Complaint (consisting of 148 pages of allegations and claims, 9 unsealed exhibits totaling approximately 120 pages, and a Confidential Appendix containing 43 exhibits) asserts seven claims for relief against Comdata: [5]

. First Claim for Relief: **Unlawful Group Boycott,** in violation of Sherman **[*4]** Act, *15 U.S.C. § 1*

. Second Claim for Relief: **Conspiracy to Monopolize,** in violation of Sherman Act, *15 U.S.C. § 2*

. Third Claim for Relief: **Violation of the Utah Antitrust Act and the "Antitrust Statutes of Any State Where Defendants Are Found To Have Caused Damages"**

. Fourth Claim for Relief: **Tortious Interference With Economic Relations and Prospective Economic Advantage**

. Fifth Claim for Relief: **Civil Conspiracy**

. Sixth Claim for Relief: **Unlawful Monopolization,** in violation of Sherman Act, *15 U.S.C. § 2*

. Seventh Claim for Relief: **Unlawful Attempt to Monopolize,** in violation of Sherman Act, *15 U.S.C. § 2*

Comdata raises numerous bases for dismissal, with the most central being release language in a May 2001 "Settlement Agreement and Release" (Ex. C to Comdata's Mem. Supp. [hereinafter "Settlement Agreement"]) [6]

---

[1] The "Flying J Plaintiffs" include Flying J, Inc., TCH LLC, Transportation Alliance Bank, Inc., and TON Services, Inc.

[2] Earlier **[*3]** in the case, the Flying J Plaintiffs agreed to dismiss all claims against Defendants TA Operating Corporation and TravelCenters of America LLC. The order granting their joint motion for dismissal was entered on May 5, 2008 (see Dkt # 335). Accordingly, the Defendants now consist of the Pilot Defendants (Pilot Travel Centers LLC and Pilot Corporation) and Comdata.

[3] Comdata moves to strike under *Federal Rule of Civil Procedure 12(f)*, which allows the court to "strike from a pleading an insufficient defense or any redundant, immaterial, impertinent, or scandalous matter."

[4] The Pilot Defendants did file a Reply, but it is, at least in part, improper because it relies on responses to interrogatories, which are not appropriate for consideration on a motion to dismiss. The court disregards those materials outside the pleadings that are presented by the Pilot Defendants.

[5] The first five claims for relief also name the Pilot Defendants.

[6] Because the First Amended Complaint refers to the Settlement Agreement (indeed both Comdata and Flying J attach it to their respective briefs), its contents may be considered part of the allegations the court considers when determining whether to grant

between Comdata, three of the four Plaintiffs in this case (Flying J, TCH LLC, and TON Services), and others involved in an earlier antitrust action (Flying J Inc. v. Comdata Network, Inc., No. 1:96-CV-66-DAK (D. Utah) [hereinafter Flying J I]). On similar grounds, Comdata asserts a res judicata defense, contending **[*5]** that resolution of Flying J I bars all of Flying J's claims here. Comdata also asserts specific defenses to individual claims. For example, Comdata contends that (1) Plaintiffs' conspiracy allegations do not meet the standards set forth in *Bell Atlantic v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*; (2) TON and Flying J lack "antitrust standing" as defined in *Associated Gen. Contractors v. Cal. Council of Carpenters, 459 U.S. 519, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*; (3) Flying J lacks "antitrust injury," as defined in *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)*; and (4) choice of law principles preclude consideration of other states' antitrust acts and common law of torts.

ANALYSIS

First, this Order addresses the discrete issue of whether the court should consider Comdata's alternative request to strike allegations of pre-settlement conduct. The Order then focuses on the merits of Comdata's defenses.

1. COMDATA'S REQUEST TO STRIKE ALLEGATIONS OF PRE-SETTLEMENT CONDUCT

Comdata moves to strike allegations relating to pre-settlement conduct, citing *Federal Rule of Civil Procedure 12(f)*, which allows the court to "strike from a pleading an insufficient defense or any redundant, immaterial, impertinent, or scandalous matter."

Flying J contends that it is not relying on pre-settlement conduct to establish the antitrust liability of Comdata. Instead, it says the material in the First Amended Complaint (FAC) provides context and also serves to present allegations against the Pilot Defendants, who were not party to the Settlement Agreement.

Striking the allegations of pre-settlement conduct would be an extreme measure. Given the multiple purposes of the allegations, striking them here would not be proper. Accordingly, that portion of Comdata's **[*7]** motion is DENIED.

Whether the court may consider them when determining whether Flying J has met its pleading obligations under *Rule 8* and Twombly is another matter, which is discussed below.

2. COMDATA'S MOTION TO DISMISS

a. The Fate of Flying J's Common Law and State Antitrust Statute Claims is Tied to Flying J's Federal Antitrust Claims.

Flying J alleges violations of the Utah Antitrust Act (and forty-five other state antitrust acts), [7] Tortious Interference with Prospective Economic Relations, and Civil Conspiracy. To a large extent, the fate of these causes of action is tied to the fate of the federal antitrust claims.

---

the 12(b)(6) motion to dismiss. See *GFF Corp. v. Associated Wholesale Grocers, Inc., 130 F.3d 1381, 1384 (10th Cir. 1997)* (holding that where a written contract is referred to in a complaint and is central to a breach of contract claim, but is not submitted for judicial review, an indisputably **[*6]** authentic copy of the contract may be considered on a motion to dismiss without converting motion to one for summary judgment).

[7] Flying J does not allege violations under each of the other forty-five state antitrust acts. It simply provides the citation to each statute. Because the court should apply the law of the forum in which it sits (Utah), Flying J cannot maintain its alternative claims under other states' statutes. Indeed, the Plaintiffs say they "alleged alternative claims under the applicable statute of each state that prohibits the unlawful conduct complained of in the FAC as protection in the event that this Court finds that the ***antitrust law*** of Utah is not the governing state law applicable **[*8]** to Defendants' conduct. While Plaintiffs realize that applying the law of every one of these states to the claims in this case is not feasible (and Plaintiffs have no intention of attempting to proceed to trial under each of these state statutes), asserting alternative state law claims ensures that Plaintiffs will have recourse to state ***antitrust law*** if this Court were to find that the law of Utah does not apply." (Pls.' Opp'n at 38.) Accordingly, the court dismisses those causes of action that do not arise out of Utah or federal antitrust laws.

First, in the Utah Antitrust Act, the Utah Legislature provided that it "intends that the courts, in construing this act, will be guided by interpretations given by the federal courts to comparable federal antitrust statutes and by other state courts to comparable state antitrust statutes." Utah Code Ann. § 76-10-926 ("Interpretation of Act"). And Flying J admits in its First Amended Complaint that the Utah Antitrust Act "is essentially identical to the Sherman Act." (FAC P 246.) Furthermore, Flying J relies on its Sherman Act allegations to support its claim that the Defendants violated the Utah Antitrust Act.

Second, Flying J alleges, in its **[*9]** Tortious Interference Claim, that violation of the antitrust laws satisfies the tort's "improper means" element.

Third, Flying J contends that tortious interference or violation of the federal and state antitrust statutes satisfies the Civil Conspiracy's requirement that the party prove the existence of one or more unlawful, overt acts.

At this point, no separate analysis of the state law claims is necessary because they are so closely tied to the federal antitrust claims.

b. Effect of the Settlement Agreement and Comdata's Res Judicata Defense

In 1996, Flying J brought suit against Comdata and others in the District Court of Utah, alleging antitrust and tort claims. See Flying J Inc. v. Comdata Network, Inc., Case No. 1:96-CV-66-DAK (D. Utah). In May 2001, the parties settled the action and obtained a stipulated judgment dismissing "all claims and counterclaims that have been or could have been asserted in this action." (May 18, 2001 Order Granting Stipulated Motion for Dismissal of Claims (Dkt # 572 in 1:96-CV-66).)

As part of the Settlement Agreement and Release (effective May 21, 2001), Comdata agreed to pay $ 49 million to the plaintiffs and enter into two license agreements: the "Trendar **[*10]** License" and the "Comdata License." (First Am. Compl. (FAC) P 89.) For a good description of the settlement and the licenses, see *Flying J Inc. v. Comdata Network, Inc., 405 F.3d 821 (10th Cir. 2005)*.

i. Settlement Agreement and Release

The key language of the Settlement Agreement and Release is found in two places in the document: First, the Recitals provide:

> E. WHEREAS, without admitting any wrongdoing or liability and to avoid the expense of further litigation, the Parties to the Settlement Agreement desire to settle the Utah Lawsuit and the Ceridian Lawsuit in their entirety, including all claims, whether known or unknown, that have been asserted or could have been asserted therein against any person or entity . . . .

(Settlement Agreement Recitals P E (incorporated by reference and made part of the agreement).)

Second, in the "Mutual Releases" section, the Settlement Agreement contains a very broadly worded release that reads in pertinent part as follows:

> Subject to the provisions of this Settlement Agreement, FLYING J, TCH, CFJ, TON SERVICES, and TFJ, on behalf of themselves and each of their affiliates, hereby forever release, discharge and acquit COMDATA, TRENDAR, CERIDIAN, and ARBITRON, **[*11]** and each of them, together (as applicable) with each of their successors, assigns, parent corporations, subsidiaries, affiliates, partners, and joint venturers, and each of its or their respective present or former officers, directors, employees, agents, servants, shareholders, attorneys, experts, consultants, insurers, and representatives from any and all rights, claims, obligations, liabilities, causes of action, costs, damages, losses, expenses, compensation, and demands of every kind and nature, whether known or unknown, that are based in whole **or in part** on any conduct occurring on or before the Effective Date [of May 21, 2001] including **but not limited to** conduct that **relates in any way** to i. all claims that have been asserted or could have been asserted in any respect whatsoever in the Utah Lawsuit . . . . v. any and all claims arising out of the relationship between FLYING J, TCH, CFJ, TON SERVICES, and TFJ, on

> the one hand, and COMDATA, TRENDAR, CERIDIAN and ARBITRON, on the other hand through the Effective Date.

(Settlement Agreement & Release P 5.1 (emphasis added).) The court interprets the language "and each of their affiliates" to include Transportation Alliance Bank Inc. **[*12]** (TAB), even though TAB was not actually listed in the release. (Indeed, no party argues that TAB is not subject to the release language.) Accordingly, the fact that the Settlement Agreement only lists three of the four Plaintiffs is not material, and the language of the release should be read to apply to all of the Flying J Plaintiffs.

While the language of the release is very broad, the court agrees with Flying J that it cannot be read to release claims that did not arise as of May 21, 2001, and that are based on post-settlement conduct. (See Settlement Agreement § 5.5 ("Release of Unknown Claims") (containing language agreeing that a "general release does not extend to claims which the [party] does not know or suspect to exist in his favor at the time of executing the release."). Moreover, such a prospective release of antitrust claims would be void as against public policy. See, e.g., *Mitsubishi Motors Corp. v. Soler Chrysler-Plymouth, Inc., 473 U.S. 614, 637 n.19, 105 S. Ct. 3346, 87 L. Ed. 2d 444 (1985)* (stating in *dicta* that Court would "have little hesitation in condemning [any] agreement as against public policy" if it were interpreted to be "a prospective waiver of a party's right to pursue statutory remedies **[*13]** for antitrust violations"); *Redel's Inc. v. General Elec. Co., 498 F.2d 95, 99 (5th Cir. 1974)* ("[T]he effect of [a prospective] release could be to permit a restraint of trade to be engaged in, which would have impact, not simply between the parties, but upon the public as well."); *Fox Midwest Theatres v. Means, 221 F.2d 173, 180 (8th Cir. 1955)* (holding that any contract absolving liability for future violation of antitrust statutes would be void as against public policy).

Flying J expressly states that it only alleges claims against Comdata that arose after May 21, 2001. (See FAC P 91.) Such claims are fair game here. Accordingly, Comdata may not prevail on its res judicata defense either, as discussed below.

The only question remaining is to what extent the court may consider the pre-settlement conduct allegations in analyzing the issues raised by the Motion to Dismiss. But if the court finds that post-settlement conduct alleged in the First Amended Complaint is sufficient to survive the motion to dismiss, then the question need not be answered at this point.

ii. Comdata's Res Judicata Defense

Plaintiffs have the better argument on this issue because they alleged anti-competitive acts **[*14]** that have occurred since May 2001. The United States Supreme Court decision in *Lawlor v. National Screen Service Corporation, 349 U.S. 322, 75 S. Ct. 865, 99 L. Ed. 1122 (1955)*, is the leading case addressing res judicata in the context of antitrust cases. In Lawlor, the defendants raised res judicata as a defense in a second antitrust suit brought by plaintiffs after an earlier suit between the same parties based on similar conduct was reduced to judgment in 1943. The Court stated:

> That both suits involved "essentially the same course of wrongful conduct" is not decisive. Such a course of conduct - for example, an abatable nuisance - may frequently give rise to more than a single cause of action. And so it is here. The conduct presently complained of was all subsequent to the 1943 judgment. In addition, there are new antitrust violations alleged here [that were] not present in the former action. While the 1943 judgment precludes recovery on claims arising prior to its entry, it cannot be given the effect of extinguishing claims which did not even then exist and which could not possible have been sued upon in the previous case. In the interim, moreover, there was a substantial change in the scope of the defendants' **[*15]** alleged monopoly . . . .

Lawlor, 349 U.S. at 327-328.

The overall question is whether the Plaintiffs allege the same cause of action as was alleged in the 1996 suit. The answer is "no." Clearly, Flying J has alleged anti-competitive actions occurring since May 2001. (See, e.g., FAC PP

103 (August 2001 extension of transaction fee increase to all truck stops with 5,000 or fewer Comdata Card transactions per month); 105-196 (revising "Merchant Transaction Pricing Structure"); 123-137 (attempt to punish Irving Oil for switching to TCH card in 2003); 156 (bundling of SmartFuel software with fuel card transaction fee discounts); 178-180 (post-2001 failures to enter fleet card market because of significant barriers to entry); 186 (post-2001 significant barriers to entry into POS system market); 189-194 (insisting on "reverse most favored nations" clauses in agreements with Pilot and TA). See also *Exhibitors Poster Exch., Inc. v. Nat'l Screen Serv. Corp., 421 F.2d 1313, 1318 (5th Cir. 1970)* ("[S]ignificant actions (or non actions) occurring subsequent [to the earlier judgment], either alone or in combination with acts which have been completed prior to [the judgment date] may be the basis for **[*16]** new claims for damages traceable to such [actions].").

Also, the District Court for the Southern District of New York, facing a similar issue, emphasized the "public policy considerations against giving a defendant immunity--in fact, perpetual immunity--from liability, for such violations in the future . . . . Here, as in *Lawlor*, while the course of conduct alleged may be a continuing one, the cause of action is not the same but different from that on which the judgments in the 1926 and 1949 actions were rendered." *United States v. Gen. Elec. Co., 358 F. Supp. 731, 740 (S.D.N.Y. 1973)*. See also *Exhibitors Poster Exch., 421 F.2d at 1316* ("the use of [the res judicata doctrine] can cloak a party in perpetual immunity and thus possibly protect conduct lasting long past the prior judgment - conduct that the law may grow to abhor.").

Even though some of the alleged events occurred before May 21, 2001, such as Comdata's acquisition of monopoly power, that does not bar claims asserted by Flying J which are all based on situations and conduct that existed or occurred on or after May 21, 2001.

c. Flying J's Claims Under Sherman Antitrust Act *Sections 1* & *2*

Section 1 of the Sherman Antitrust Act **[*17]** provides that "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." *15 U.S.C. § 1* (emphasis added). Flying J asserts an **"unlawful group boycott"** claim under this provision (see First Claim for Relief). [8] To establish a claim under *Section 1*, the plaintiff must allege facts that show the defendants entered into a contract, combination or conspiracy that unreasonably restrains trade in the relevant market. *TV Comm. Network, Inc. v. Turner Network Television, Inc., 964 F.2d 1022, 1027 (10th Cir. 1992)*. "Under section one we determine the illegality of a . . . conspiracy by examining whether: (1) it constitutes a per se violation of the statute; or (2) its purpose or effect is to create an unreasonable restraint of trade." *Id*. (internal alterations and quotation marks omitted). In other words, the court's analysis under *Section 1* must be either under the "per se" rule or the "rule of reason." The distinction between the two modes of analysis and the circumstances when each applies is discussed below.

Section 2 of the Sherman Antitrust Act provides that a person "shall [not] monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations . . . ." *15 U.S.C. § 2*. Flying J alleges three causes of action under this provision: **Conspiracy to Monopolize** (Second Claim for Relief), **Unlawful Monopolization** (Sixth Claim for Relief), and **Unlawful Attempt to Monopolize** (Seventh Claim for Relief). For a quick summary of the elements of each cause of action, see *TV Communications Network, 964 F.2d at 1025-26*. See also *Verizon Commc'ns. Inc. v. Law Office of Curtis V. Trinko, LLP, 540 U.S. 398, 407, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)* (addressing claim of "refusal to deal," the Court said, "the possession of monopoly power will not be found **[*19]** unlawful unless it is accompanied by an element of anticompetitive *conduct.*") (emphasis in original).

i. Brief Description of Each Party's Business and Function in the "Relevant Markets"

---

[8] The Clayton Act provides the private cause of action **[*18]** to sue under the Sherman Act and allows for monetary and injunctive relief. See *15 U.S.C. § 12* (called the Clayton Act, it nevertheless defines "Antitrust Laws" to include the Sherman Act); *§ 15* (Clayton Act Section 4) (allowing for damages to person injured by antitrust violation); *§ 26* (Clayton Act Section 16) (allowing injunctive relief for private parties).

Before getting into the legal arguments, it is important to understand the business and function of each of the parties in the markets at issue.

(a) The Parties

Flying J, Inc. owns or operates nearly 170 truck stops in the United States. It brings the case "in both its capacity as operator and also on behalf of the owners of the Flying J truck stops that Flying J operates, including itself." (FAC P 3.)

TCH (partially owned by Flying J) provides "a transportation clearinghouse and trucker fuel cards to truck fleets, trucking companies, their drivers, and independent owner/operators throughout the United States." (FAC P 4.) It "offers a Trucker Fuel Card [specifically called a 'TCH Card'] to long-haul truck drivers and their truck fleets . . . and processes Trucker Fuel Cards for other card issuers." (Id.) The Plaintiffs define "Truck Fleets" as "[l]ong-haul 'over the road' truck drivers, including both drivers who work for trucking companies and independent owner/operators." (FAC P 16.) [9] A "Trucker Fuel **[*20]** Card" (sometimes generically called a trucker fleet card) is a charge or credit card with additional features offered to Truck Fleets, including real-time data capture (information is immediately transmitted to the trucking company for monitoring driver's movements and activities, equipment, and costs), frequent and specialized reporting (e.g., for the purpose of tracking fuel taxes), purchase controls (allowing the trucking company to limit the amount and nature of the driver's purchases), and negotiated or discounted diesel fuel prices. (FAC P 25.)

> By gathering such data from truck drivers at every fuel stop, Truck Fleets are able to monitor and control such things as the location of their trucks, when fuel is purchased, the amount of fuel that is purchased, the purchases of their drivers, and other information desired by Truck Fleets. Truck Fleets rely on gathering such electronic data to control their costs and to plan effective utilization of their assets and employees. Purchase controls are essential to Truck Fleets who must monitor and control the expenditures by their truck driver employees or leased owner/operator drivers who are purchasing fuel or other goods or services using **[*21]** the Truck Fleet's money at remote locations across the United States, in an industry with high driver turnover. Individual owner/operator truck drivers use Trucker Fuel Cards for such things as credit services, recordkeeping including tracking of information needed for state fuel taxes, and to obtain special fuel pricing that is sometimes available.

(FAC P 24.) The special features of Trucker Fuel Cards are only available if the cards are used at merchants that accept those cards at their fueling locations.

Transportation Alliance Bank Inc. (TAB) (a wholly owned subsidiary of Flying J) "provides financial products and services to Truck Fleets and others." (Id. P 5.) It issues the TCH card, and extends credit to the trucking fleets. It retains a portion of fees paid by the truck stops for processing the card purchases.

TON Services Inc. (a wholly owned subsidiary of Flying J) provides "transportation related services and products to Truck Fleets and others." (FAC P 6.) For example, it provides Wi-Fi Services (e.g., wireless internet access, and mobile **[*22]** phone service) and calling cards to truckers.

The Pilot Travel Centers LLC and **Pilot Corporation** own and operate a large national chain of truck stops (travel plazas).

The now-dismissed **TA Defendants (TA Operating LLC and TravelCenters of America LLC)** are nationwide chains that own and operate travel centers to serve long-haul trucking fleets and their drivers, independent truck drivers and general motorists. They compete with Flying J and Pilot.

---

[9] "Truck Fleets" does not include local truck fleets and local truck drivers whose routes do not require an overnight stay away from home.

Comdata Network, Inc. d/b/a Comdata Corporation issues trucker fleet cards like the TCH cards, and it provides hardware and software for point-of-sale (POS) transactions (the Trendar System). Pilot and TA accept Comdata's fleet cards but refuse to accept the TCH card.

(b) The Markets

For antitrust analysis, a market has a geographic component and a product component. Areeda & Hovenkamp, ***Antitrust Law*** P 530 (3d ed. 2007). The court's inquiry under *Sections 1* and *2* of the Sherman Act usually begins by defining the "relevant market" (i.e., the "market relevant to the legal issue before the court"). *SCFC ILC, Inc. v. VISA USA, Inc., 36 F.3d 958, 966 (10th Cir. 1994)*. "'That market is composed of products that have reasonable interchangeability for **[*23]** the purposes for which they are produced--price, use, and qualities considered.'" Id. (quoting *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 404, 76 S. Ct. 994, 100 L. Ed. 1264 (1956))*.

Flying J has identified three relevant product markets: the "Trucker Fuel Card Market," the "Truck Stop POS Systems Market," and the "Major Truck Stops Market." The relevant geographic market for all three product markets is the continental United States.

Flying J discusses all three markets, which are intertwined. But the market where it alleges anti-competitive conduct (i.e., injury to competition) is the Trucker Fuel Card Market.

Plaintiffs allege antitrust violations in the Trucker Fuel Card Market, [10] which is a "two-sided" market (that is, the market serves two classes of customers: truck stops and truck fleets). The two-sided market has "network effects," meaning that "'demand for a fleet card rises with the number of truck stops that accept the card, which in turn depends on the number of fuel purchase automation systems that accept the card.'" *Flying J Inc. v. Comdata Network, Inc., 405 F.3d 821, 827 n.1 (10th Cir. 2005)* (quoting FTC analysis of antitrust issues concerning Comdata). The 2005 Tenth Circuit case **[*24]** just cited provides a very good explanation of the relationship between the parties and the details of the business transactions at issue. (See also Paragraphs 32-40 of the First Amended Complaint (discussing product and geographic markets).)

ii. Summary of Flying J Plaintiffs' Dispute with Defendants

Under *Section 1* of the Sherman Act, the Plaintiffs allege an unlawful horizontal and vertical conspiracy that harms competition in the Trucker Fuel Card Market and the Major Truck Stops Market and is perpetuated through concerted action by Comdata, Pilot, and TA. *Section 1* of the Sherman Act prohibits illegal restraints of trade. There are several categories of restraints of trade, including horizontal restraints (agreements among competitors such as TA and Pilot) and vertical restraints (agreements between purchaser and supplier, such as TA and Pilot on the one hand and Comdata on the other hand). Specifically, Flying J alleges a group boycott, also known as concerted refusals to deal, which "are agreements among **[*25]** rivals to refuse to deal either with a competitor or with third parties who deal with the competitor." Federal ***Antitrust Law*** § 9.2 (Matthew Bender & Co. 2007).

The group boycott, which has aspects of both horizontal and vertical restraints, is explained in the First Amended Complaint as follows:

> Pilot and TA, two major truck stop chains, have worked in concert with each other and with Comdata as though they are all part of one vertically integrated entity instead of three separate firms. This conspiracy, resulting from the cooperative and concerted action among Comdata, Pilot, and TA, is referred to in this Complaint as: "The Conspiracy." Both on its own and in concert with Pilot and TA, Comdata has sought to limit TCH's card acceptance network and the attractiveness of the TCH Trucker Fuel Card to Truck Fleets, through its high transactions fees to the independent truck stops that accept the TCH card and through low transaction fees as a "*quid pro quo*" to the large truck stop chains, including Defendants Pilot and TA, that are willing to maintain

[10] Flying J notes that Comdata's request to dismiss any claim relating to the POS Systems Market is moot because the Plaintiffs do not allege harm to competition in that market.

> their boycott of TCH Trucker Fuel Card transactions. [This is referred to as the two-tier pricing structure.] Comdata has induced and rewarded **[*26]** Pilot and TA to maintain their boycott of the TCH Trucker Fuel Card, while suppressing fuel discount competition between Pilot and TA. Comdata has worked closely with Pilot and TA, providing financial and other rewards to them while disadvantaging their truck stop competitors, all in exchange for their assistance in helping Comdata to maintain its dominant position in the Trucker Fuel Card Market. That structure benefits Defendants Pilot and TA by lowering their costs while dramatically increasing the costs of their rivals that also are able to accept Comdata Cards as a method of payment, the independent truck stops.

(FAC P 43.) "The Conspiracy derives its market power from Comdata's monopoly power in the Trucker Fuel Card Market and Truck Stop POS Systems Market, and the substantial combined market share of Pilot and TA in the Major Truck Stops Market." (Id. P 46.)

Under Sherman Act *§ 2*, the Plaintiffs challenge the unilateral anti-competitive conduct of Comdata, alleged to have a monopoly in the Trucker Fuel Card Market and Truck Stop POS Systems Market.

> *Section 2* [of the Sherman Act] creates three offenses: monopolization, attempted monopolization, and conspiracy to monopolize. [Plaintiffs **[*27]** have alleged all three.] Monopolization is the acquisition or maintenance of monopoly power to inefficient collusive or exclusionary means, which may include, but are not limited to restraints that violate *Section 1*. Thus, the offense requires a showing of monopoly power and inefficient acts used to acquire or maintain it. Monopolistic acts include mergers to monopoly and various exclusionary practices, like predatory pricing, refusals to deal, exclusive contracts, and so forth. Attempted monopolization is the doing of these kinds of monopolistic acts with the specific intent to monopolize in circumstances in which there is a dangerous probability of success. Thus, while monopolization and attempted monopolization typically involve similar conduct, the attempt offense requires a showing of somewhat more egregious conduct, and something less than present monopoly power.

Id. (footnotes omitted).

d. Sufficiency of Conspiracy Allegations Under *Bell Atlantic v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*.

Comdata challenges the sufficiency of conspiracy allegations supporting Flying J's First and Second Claims for Relief--Unlawful Group Boycott and Conspiracy to Monopolize--which are brought, respectively, **[*28]** under the Sherman Antitrust Act *Sections 1* and *2*. Given the "plausible" standard in *Twombly*, and taking the Plaintiffs' allegations as true, the allegations of post-settlement conduct (and inferences to be drawn from them) are sufficient to establish a conspiracy under the standards applicable to 12(b)(6) motions to dismiss. (See Pls.' Opp'n Mem. at 22-23 (citing to post-settlement conduct allegations in the First Amended Complaint and Confidential Appendix).) Consequently, the court need not determine whether the pre-settlement conduct allegations may be considered.

e. Antitrust Injury and Antitrust Standing

Antitrust injury is a component of antitrust standing, which is a concept wholly separate from traditional standing under the United States Constitution. *Abraham v. Intermountain Health Care, Inc., 461 F.3d 1249, 1267 (10th Cir. 2006)*. Antitrust standing essentially derives from the Clayton Act, which defines who may maintain an antitrust action for damages or injunctive relief, and from decisions by the United States Supreme Court. See *Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters, 459 U.S. 519, 529, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*; *Sports Racing Servs., Inc. v. Sports Car Club of America, Inc., 131 F.3d 874, 881 (10th Cir. 1997)*. **[*29]** The Tenth Circuit decision in *Sports Racing Services* contains a very good description of antitrust standing. See also, e.g., *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)* (discussing antitrust injury).

Courts apply a two-prong test to determine whether a plaintiff has antitrust standing.

> To maintain standing to bring an antitrust claim under § 4 of the Clayton Act, *15 U.S.C. § 15* [providing for treble damages], a plaintiff must show (1) an "**antitrust injury;**" and (2) a **direct causal connection** between that injury and a defendant's violation of the antitrust laws. . . . To meet the first prong, [plaintiffs] must allege a business or property injury, an antitrust injury, as defined by the Sherman Act. An antitrust injury is defined as an injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. . . . To establish the second prong of antitrust standing, [plaintiffs] must show the antitrust injury resulted directly from [defendants'] violation of ***antitrust law***.

Sports Racing Servs., 131 F.3d at 882 (internal quotations omitted; emphasis added) (providing non-exhaustive list of factors to consider when **[*30]** evaluating antitrust standing). Antitrust laws were intended to prevent injury to competition, not injury to competitors. *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*; *Tal v. Hogan, 453 F.3d 1244, 1257-58 (10th Cir. 2006)* ("The primary concern of the antitrust laws is the corruption of the competitive process, not the success or failure of a particular firm.") (citing Brunswick Corp.).

Comdata contends that Flying J has not alleged antitrust injury because the effects of the alleged conspiracy actually would benefit Flying J by hurting its rivals (other truck stops). Comdata also argues that Flying J and TON have not alleged antitrust standing because they do not compete in the relevant market (truck fleet cards) and their alleged injuries (lost sales) are indirect and too remote from the alleged restraint of competition.

First, the court finds that Flying J has established antitrust injury (that is, a business or property injury that the antitrust laws were intended to prevent and that flows from the alleged anticompetitive conduct of the Defendants). The network effects of the two-sided market shows how interconnected the parties, their businesses, and their **[*31]** markets are. See, e.g., *Blue Shield of Virginia v. McCready, 457 U.S. 465, 483-84, 102 S. Ct. 2540, 73 L. Ed. 2d 149 (1982)* (holding that "although [Plaintiff] was not a competitor of the conspirators, the injury she suffered was inextricably intertwined with the injury the conspirators sought to inflict on [the relevant] market" and that her injury was the type Congress intended to address by the antitrust laws); *Reazin v. Blue Cross & Blue Shield of Kansas, Inc., 899 F.2d 951, 963 (10th Cir. 1990)* ("[A]n antitrust plaintiff need not necessarily be a competitor or consumer.") (citing McCready). The First Amended Complaint alleges the negative "network effects" of Comdata's two-tiered pricing strategy in the two-sided market (one side is the truck stop market, which Flying J directly competes in). An antitrust injury must be "attributable to an anticompetitive aspect of the practice under scrutiny." *Atlantic Richfield v. USA Petroleum Co., 495 U.S. 328, 334, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)*. Although there may be a small "benefit" to Flying J, the overall harm is much more substantial, and the allegations establish that Flying J's loss of customers and diesel fuel sales is attributable to the anticompetitive actions alleged in the First Amended **[*32]** Complaint.

Second, the court finds that Flying J and TON have established antitrust standing. Flying J participates in the Trucker Fuel Card Market as a consumer, and consumers are favored as antitrust plaintiffs. Also, TON's injury is "inextricably intertwined with the injury the conspirators sought to inflict" on market participants. See *McCready, 457 U.S. at 484*. (See also Pls.' Opp'n Mem. at 27-31 (persuasively analyzing allegations under the factors set forth in *Elliott Indus. Ltd. P'ship v. BP America Prod. Co., 407 F.3d 1091, 1124 n.31 (10th Cir. 2005)*, and *Abraham, 461 F.3d at 1268*).)

f. Does *Per Se* Analysis Apply to Allegations of Illegal Restraint?

To determine whether an alleged restraint of trade is unreasonable (i.e., illegal) under Sherman Act *§ 1* (a reasonable restraint of trade is not actionable), the court applies either a "per se" analysis or a "rule of reason" analysis. The Tenth Circuit decision in *Gregory v. Fort Bridger Rendezvous Ass'n, 448 F.3d 1195 (10th Cir. 2006)*, provides a thorough description of the two modes of analysis.

The Plaintiffs allege that the Defendants' conduct is illegal under both a per se analysis and a rule of reason analysis. Comdata contends **[*33]** that the per se rule is not applicable here because the alleged conspiracy contains a vertical agreement (for which a per se analysis is prohibited under Tenth Circuit law) and does not rise to the level of egregiousness required to apply the per se rule.

The presumption is that the "rule of reason" analysis applies to a court's analysis of whether defendants' conduct unreasonably restrains trade. *Diaz v. Farley, 215 F.3d 1175, 1182 (10th Cir. 2002)*.

> [The rule of reason approach] requires the factfinder to weigh all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition. *Per se analysis is reserved for agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal* without elaborate inquiry as to the precise harm they have caused or the business excuse for their use.

Id. (emphasis added).

Some group boycotts have been deemed per se illegal, but not all. See *Northwest Wholesale Stationers, Inc. v. Pacific Stationery & Printing Co., 472 U.S. 284, 290, 293-94, 105 S. Ct. 2613, 86 L. Ed. 2d 202 (1985)* ("not every cooperative **[*34]** activity involving a restraint or exclusion will share with the per se forbidden boycotts the likelihood of predominantly anticompetitive consequences."); *Gregory, 448 F.3d at 1203-04* (per se approach "'has generally been limited to cases in which firms with market power boycott suppliers or customers in order to discourage them from doing business with a competitor.'") (quoting *FTC v. Ind. Fed'n of Dentists, 476 U.S. 447, 458, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986))*.

> Cases to which the U.S. Supreme Court has applied the *per se* approach have generally involved joint efforts by a firm or firms to disadvantage competitors by "either directly denying or persuading or coercing suppliers or customers to deny relationships the competitors need in the competitive struggle." In these cases, the boycott often cuts off access to a supply, facility, or market necessary to enable the boycotted firm to compete, and frequently the boycotting firms possessed a dominant position in the relevant market.

Northwest Wholesale Stationers, 472 U.S. at 294 (internal citations omitted).

The *Northwest Wholesale Stationers* description of per se illegal boycotts resembles the boycott alleged in the Plaintiffs' First Amended Complaint. The Plaintiffs **[*35]** allege that Comdata (who has a dominant position in the fleet card market) provides a *quid pro quo* to TA and Pilot (who, in combination, hold a dominant position in the truck stop market) by charging TA and Pilot much lower transaction fees in exchange for TA's and Pilot's boycott of the TCH Card. By refusing to accept the TCH Card, TA and Pilot cut off access to the dominant fuel card processing technology-- Comdata's Trendar POS system--which in turn cuts off access to an entire section of the market for fleet cards and diesel fuel and other services typically provided by travel plazas. Moreover, Plaintiffs allege that Comdata uses its market power to financially punish truck fleets and truck stops (typically independent truck stops) who use or accept the TCH card. This is akin to denial of access to a facility that TCH and independent truck stops need to compete. The allegations, taken as true, fall within the requirements of a per se rule.

The other hurdle that the Plaintiffs must clear to salvage their *per se* theory of liability is the Tenth Circuit rule that a vertical group boycott is, as a matter of law, not subject to the *per se* rule. See *Coffey v. Healthtrust, Inc., 955 F.2d 1388, 1392* **[*36]** ("In this circuit, to establish that a group boycott is *per se* illegal 'there must be an agreement among conspirators whose market positions are horizontal to each other.'") (quoting *Westman Comm'n Co. v. Hobart Int'l, Inc., 796 F.2d 1216, 1224 n.1 (10th Cir. 1986))*. "While the competitors need not be at the same market level as the plaintiff, there must be concerted activity between two or more competitors at the same market level." *Key Financial Planning Corp. v. ITT Life Ins. Corp., 828 F.2d 635, 641 (10th Cir. 1987)*.

Comdata contends that because Comdata's relationship with TA and Pilot is vertical, the Plaintiffs' per se theory fails as a matter of law. But the case law is not completely clear on this issue. Here, Plaintiffs have alleged a horizontal boycott of TCH by TA and Pilot (competitors in the same market and on the same market level). But the conspiracy also has a vertical component to it (Comdata's quid pro quo with TA and Pilot). The court is not convinced that Comdata's presence in the alleged agreement is sufficient to nullify a *per se* analysis. Comdata is not boycotting TCH; TA and Pilot are. Comdata facilitates the boycott by TA and Pilot. The court finds that the **[*37]** rule stated in Coffey does not apply here, because the concerted activity includes "two or more competitors at the same market level," as Key required. See *NYNEX Corp. v. Discon, Inc., 525 U.S. 128, 136, 119 S. Ct. 493, 142*

L. Ed. 2d 510 (1998) (holding that precedent in *Klor's, Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207, 79 S. Ct. 705, 3 L. Ed. 2d 741 (1959)*, "makes the per se rule inapplicable [in] the case before us [because it] concerns only a vertical agreement and a vertical restraint[.]") (emphasis added).

CONCLUSION

Given the detailed First Amended Complaint and the Confidential Appendix incorporated into it, Comdata and Pilot cannot prevail on their motions to dismiss. The allegations are extensive and must be taken as true. Ultimately, the Plaintiffs have the better arguments at this stage, and so the motions to dismiss are denied, with the exception that the claims under state antitrust acts other than Utah's antitrust act are dismissed.

ORDER

For the foregoing reasons, Comdata Network, Inc.'s Motion to Dismiss the Amended Complaint, or, in the Alternative, Strike All Allegations of Pre-Settlement Conduct pursuant to *Fed. R. Civ. P. 12(f)* (Docket Entry No. 346) is DENIED, with the exception that the request to dismiss all claims under **[*38]** non-Utah antitrust statutes is GRANTED. Similarly, the Pilot Defendants' Motion to Dismiss First Amended Complaint (Docket Entry No. 354) is DENIED, with the exception that the request to dismiss all claims under non-Utah antitrust statutes is GRANTED.

SO ORDERED this 14th day of November, 2008.

BY THE COURT:

/s/ Tena Campbell

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

HN1[] **Standards of Review, Abuse of Discretion**

As a general rule, a motion to amend a complaint is a matter that lies within the trial court's sound discretion, and the court's decision will not be disturbed on review in the absence of an abuse of discretion.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

HN2[] **Standards of Review, Abuse of Discretion**

An abuse of discretion is demonstrated if no reasonable person would take the view adopted by the trial court.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

HN3[] **Standards of Review, Abuse of Discretion**

A primary consideration in determining whether the court abused its discretion by denying leave to amend is whether the proposed amendment would cure the defective pleading.

Antitrust & Trade Law > General Overview

Antitrust & Trade Law > Exemptions & Immunities > General Overview

HN4[] **Antitrust & Trade Law**

740 ILCS 10/5(15) (2006) contains 15 enumerated exceptions to the application of the Illinois Antitrust Act, *740 ILCS 10/1 et seq.* (2006).

Antitrust & Trade Law > General Overview

Antitrust & Trade Law > Exemptions & Immunities > General Overview

Governments > Local Governments > Employees & Officials

HN6[] **Antitrust & Trade Law**

740 ILCS 10/5(15) (2006) means that both municipalities and their employees, agents, and officers are immune from liability under the Illinois Antitrust Act, *740 ILCS 10/1 et seq.* (2006).

Governments > Local Governments > Boundaries

Governments > Local Governments > Duties & Powers

Governments > Local Governments > Property

HN7[] Local Governments, Boundaries

Contracting with parties seeking to annex property is not an illegal municipal activity, *65 ILCS 5/11-15.1-1* (2006), and a municipality is not precluded from zoning property outside city limits when the property is subject to an annexation agreement.

Civil Procedure > Sanctions > Baseless Filings > Frivolous Lawsuits

Civil Procedure > Sanctions > Baseless Filings > General Overview

HN8[] Baseless Filings, Frivolous Lawsuits

Ill. Sup. Ct. R. 137 provides that a court may impose sanctions upon a party or his attorney, including the reasonable cost of defending an action, that is not warranted by existing law or an action that is interposed for an improper purpose, such as to harass, to cause unnecessary delay, or to increase the expense of litigation.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > Sanctions > Baseless Filings > General Overview

Civil Procedure > Sanctions > Baseless Filings > Frivolous Lawsuits

HN9[] Standards of Review, Abuse of Discretion

The trial court's ruling on a motion for *Ill. Sup. Ct. R. 137* sanctions should not be reversed on review unless the trial court abused its discretion.

Civil Procedure > Sanctions > Baseless Filings > Frivolous Lawsuits

Civil Procedure > Sanctions > Baseless Filings > General Overview

HN10[] Baseless Filings, Frivolous Lawsuits

The purpose of *Ill. Sup. Ct. R. 137* is to prevent parties from abusing the judicial process with vexatious actions unsupported by fact or law, not to punish litigants and their attorneys merely because they were unsuccessful in the litigation.

Civil Procedure > Sanctions > Baseless Filings > Frivolous Lawsuits

Governments > Courts > Rule Application & Interpretation

Civil Procedure > Sanctions > Baseless Filings > General Overview

HN11[] **Baseless Filings, Frivolous Lawsuits**

Since *Ill. Sup. Ct. R. 137* is penal in nature, it is strictly construed.

Business & Corporate Law > Corporations > General Overview

Civil Procedure > ... > Capacity of Parties > Representative Capacity > Agents

Legal Ethics > Unauthorized Practice of Law

Civil Procedure > Parties > Real Party in Interest > Required Representation

HN12[] **Business & Corporate Law, Corporations**

A corporation may not initiate actions in courts of Illinois unless the corporation is represented by an attorney. A complaint drafted by a nonattorney on behalf of a corporation constitutes the unauthorized practice of law rendering the pleading a nullity and any judgment entered on it void. An attorney's subsequent appearance and adoption of a complaint improperly drafted by a nonattorney does not absolve the drafter of the unauthorized practice of law.

Business & Corporate Law > ... > Corporate Governance > Shareholders > General Overview

Civil Procedure > ... > Capacity of Parties > Representative Capacity > Agents

Business & Corporate Law > Corporations > General Overview

Civil Procedure > Parties > Real Party in Interest > Required Representation

HN13[] **Corporate Governance, Shareholders**

A sole stockholder cannot bring a lawsuit in his own name for a cause of action belonging to a corporation except under very limited circumstances. A logical extension of this principle leads to the conclusion that an individual cannot bring an appeal in his name on behalf of separate corporate interests.

Civil Procedure > ... > Capacity of Parties > Representative Capacity > Agents

Legal Ethics > Unauthorized Practice of Law

Civil Procedure > Parties > Real Party in Interest > Required Representation

HN14[] **Representative Capacity, Agents**

A nonlawyer who initiates a lawsuit to obtain relief on behalf of another person or other corporate entities, other than himself, engages in the unauthorized practice of law.

Civil Procedure > Appeals > Frivolous Appeals

HN15[] **Appeals, Frivolous Appeals**

An award of attorney fees may be granted as a sanction if a party wilfully refuses to comply with appellate rules, or where an appeal is taken in bad faith or for an improper purpose. *Ill. Sup. Ct. R. 375*. An appeal is deemed frivolous if a reasonable, prudent attorney acting in good faith would not have brought it.

Judges: JUSTICE WRIGHT delivered the opinion of the court. McDADE, P.J., and O'BRIEN, J., concur.

Opinion by: WRIGHT

Opinion

[*1027] **[**981]** **[****455]** Modified Upon Denial of Rehearing

JUSTICE WRIGHT delivered the opinion of the court:

On January 24, 2007, plaintiff Kenin L. Edwards filed a single-count, *pro se* complaint against defendant City of Henry requesting damages for alleged violations of the Illinois Antitrust Act (Act) (*740 ILCS 10/1 et seq*. (West 2006)). The City filed a "Motion to Dismiss and for Sanctions" claiming immunity under the Act (*740 ILCS 10/5(15)* (West 2006)) and alleging that plaintiff lacked a good-faith basis for the complaint. The motion also asserted that plaintiff, a nonlawyer, improperly sought to represent two corporations. [1] The trial court granted the City's motion to dismiss but denied the requested sanctions. Edwards subsequently filed a *pro se* "Motion to Reconsider" claiming status as both an individual and as sole stockholder of both **[*1028]** corporations. The motion to reconsider also requested leave to amend the complaint. **[***2]** The court denied Edwards' motion to reconsider, and he appeals. The City cross-appeals from the denial of the motion for sanctions. We affirm in part and remand for further proceedings.

BACKGROUND

Plaintiff's complaint alleged that he was the sole stockholder of two Illinois corporations, Illinois River Holdings, Inc. (IRH) and Corsaw Log & Lumber, Inc. (Corsaw). According to the complaint, Corsaw was the record titleholder of 505 acres located in section 4 of Henry Township, located in Marshall County (County). The complaint stated that IRH was the titleholder of record of all mineral rights to the same 505-acre parcel, and Edwards individually owned mineral leases for the same land.

The complaint stated that, in 2003, Corsaw applied for a special use permit from the Marshall County zoning office to surface mine its 505 acres of land for sand and gravel. The City of Henry (City) opposed the application filed with the County because the land was within 1 1/2 miles of **[***3]** the City's boundaries. Ultimately, Corsaw withdrew its request for a special use permit from the county zoning office and, according to Edwards' complaint, the corporation began mining the land in June 2004 without a special use permit.

According to the complaint, on June 9, 2004, the City instituted litigation against Edwards, Corsaw, and IRH to enjoin the mining operation in the County. The result of that litigation is not stated, and the case (Marshall County circuit court case No. 04-CH-16) apparently remained unresolved when the instant suit was filed in 2007.

The complaint further alleged that, in October 2006, the City and Ozinga Materials, Inc., (the developer), a wholly owned subsidiary of Ozinga Bros., Inc. (Ozinga Bros.), filed joint petitions for reclassification of their acreage located in section 10 of Henry Township within Marshall County, to change the zoning from county agricultural to city heavy industrial I-2, and requested annexation of the property to the City of Henry. The City contemporaneously

[1] In the caption of the notice of appeal and appellate briefs, plaintiff did not include any reference to Corsaw Log & Lumber, Inc., or Illinois River Holdings, Inc. Accordingly, we consider Edwards, as the sole appellant.

began proceedings to amend the City's zoning ordinance to allow surface mining and the operation of a port facility with access to the Illinois River. The joint petition **[***4]** provided that, in the event the developer, Ozinga Materials, Inc., acquired **[**982]** **[****456]** additional land in sections 4 and 9 of Henry Township, the developer agreed to enter into an annexation agreement and a covenant and impact fee agreement with the City for the additional property.

On November 8, 2006, the zoning board for the City heard testimony and comments at the public meeting, held to address the **[*1029]** proposed rezoning of the property subject to the annexation agreement. The city attorney, Richard Joseph, stated that he drafted the covenant and impact fee agreement appended to the joint annexation petition of the City and the developer, Ozinga Materials, Inc. In this document, he included a provision that restricted the developer from allowing the use of the proposed port to transport materials mined from property located within 1 1/2 miles of the City's corporate limits, unless the property was also subject to the terms of an annexation agreement with the City. Joseph explained that the purpose of this clause was to make it uneconomical for persons to mine property within this 1 1/2-mile "collar" that the City did not want mined.

Based on Joseph's statement, the complaint alleged the purpose **[***5]** of the annexation petition was to make it uneconomical for a property owner, who did not have an annexation agreement with the City, to mine the section 4 property and thus diminished the value of the property in the event of a sale. According to Edwards, the City's conduct constituted a violation of the Illinois Antitrust Act by allowing the developer to acquire a monopoly over trade and commerce for the purpose of excluding him, Corsaw, and IRH as competitors. In the prayer for relief, "the plaintiff," Edwards, requested that the Court enter judgment in "their" favor and against defendant in excess of $ 50,000 and award "them" costs.

On February 22, 2007, attorney Jeffery E. Krumpe of the law firm Miller, Hall & Triggs, entered his appearance for the City and filed a motion to dismiss under *section 2-619* of the Code of Civil Procedure (*735 ILCS 5/2-619* (West 2006)). The City requested sanctions against Edwards under *Supreme Court Rule 137* (155 Ill. 2d R. 137) alleging the complaint was not filed in good faith. This motion stated that Edwards' complaint was defective and Edwards lacked standing because Corsaw owned the real estate, IRH owned all mineral rights beneath the property, **[***6]** and Edwards alleged he was the "owner of mineral leases related to the property" but attached nothing to the complaint to verify Edwards had any individual interest in the property. Additionally, the City's motion alleged that Edwards, a nonlawyer, previously had been admonished by the court in related litigation for the unauthorized practice of law by attempting to represent the corporations, Corsaw and IRH, in violation of the Illinois Attorney Act (*705 ILCS 205/1* (West 2006)). Alternatively, the City asserted section 5 of the Act (*740 ILCS 10/5* (West 2006)) provided the City with immunity from antitrust litigation. *740 ILCS 10/5* (West 2006).

On March 7, 2007, attorney Carl F. Reardon entered his appearance as counsel for Edwards, individually. Reardon did not amend, refile **[*1030]** or redraft the complaint as signed by Edwards. Instead, Reardon moved for a substitution of Judge Scott A. Shore, as a matter of right (*735 ILCS 5/2-1001(a)(2)* (West 2006)), and the cause was reassigned to Judge John A. Barra. Next, Reardon filed a motion for disqualification of attorneys Joseph and Krumpe and the law firm of Miller, Hall & Triggs. On June 15, 2007, the court denied the motion to disqualify defense **[***7]** counsel without prejudice.

[983]** **[****457]** Attorney Krumpe argued the City's combined *section 2-619* motion to dismiss and request for *Rule 137* sanctions because Edwards frivolously filed the original complaint against the City. Krumpe emphasized that the Illinois Antitrust Act unambiguously stated that units of local government were immune from liability and that the City was a unit of local government as defined by *article VII, section 1, of the Illinois Constitution* (*Ill. Const. 1970, art. VII, §1*). Krumpe contended Reardon should not have filed a motion to disqualify or argued the motion to dismiss because the complaint was filed against the City in light of this immunity. Instead, Krumpe argued that Reardon had a duty to advise his client that statutory immunity barred the lawsuit.

In response, attorney Reardon argued that the City could only act within the authority granted by the legislature. He contended that, since the section 4 property was located outside the city limits, the City could not claim immunity for unauthorized actions when the City joined with the developer to eliminate competition within a 1 1/2-mile corridor outside the City's boundaries. In reply to Reardon's argument, attorney **[***8]** Joseph argued that the Illinois

Supreme Court ruled that a municipality is authorized to enter into annexation agreements with respect to parcels of property located outside of its boundaries. (*Village of Chatham v. County of Sangamon, 216 Ill. 2d 402, 429, 837 N.E.2d 29, 297 Ill. Dec. 249 (2005)*, citing *65 ILCS 5/11-15.1-2.1(a)* (West 2002)). Finally, Reardon reiterated his position that the City was not authorized by the Illinois Municipal Code (*65 ILCS 5/1-1-1 et seq*. (West 2002)) to enter into an annexation agreement in violation of the State's ***antitrust law***. A discussion between the court and the attorneys ensued discussing that the federal antitrust statutes did not include a similar immunity provision to that which was included in the Illinois Antitrust Act.

Following the parties' arguments, Judge Barra took a brief recess to review case law. When the hearing resumed, he asked the parties whether they were conversant with *Du Page Aviation Corp. v. Du Page Airport Authority, 229 Ill. App. 3d 793, 594 N.E.2d 1334, 171 Ill. Dec. 814 (1992)*. Judge Barra reviewed the appellate court's analysis of the Illinois Antitrust Act's immunity provision at issue in that case (Ill. Rev. Stat 1989, ch. 38, par. 60-5(14)) and observed that the immunity provision **[***9]** under the **[*1031]** current Act (*740 ILCS 10/5(15)* (West 2006)) mirrored the provision considered in *Du Page Aviation*. The *Du Page Aviation* court ruled that the defendant airport authority was a "unit of local government" as defined by the Illinois Constitution of 1970 and was, therefore, immune from liability under the Illinois Antitrust Act.

Based on *DuPage Aviation*, Judge Barra granted the City's motion to dismiss with prejudice and denied sanctions. In so ruling, the court commented as follows:

> "[W]hether the Illinois Legislature made a right decision or not, it's really not for me *** to decide what they are doing is legal or illegal. The question becomes, are they immune from the Illinois Antitrust Act? And it seems about as plain of language as I can get, that it says it is. *** [T]here is an Illinois Appellate Court case on point *** and there is [sic] no other cases that say anything differently.
>
> It's not saying what they did was even legal. The only thing before me is whether it violates the Illinois Antitrust Act. And I believe and the cases say that it is immune. * * * And it's not a question of repleading, because even though you plead more facts, one thing you can't plead is that **[***10]** it is not a unit of **[**984]** **[****458]** local government.*** And therefore *** the motion is granted. The motion for sanctions is denied."

On July 13, 2007, Edwards, acting in an individual capacity and as "sole stock holder of his corporations," filed a *pro se* "Motion to Reconsider." Citing *Lathrop v. Juneau & Associates, Inc., 220 F.R.D. 330 (S. D. Ill. 2004)*, the motion requested leave to amend the complaint to assert the antitrust claim against the city officials and its attorney on the ground that these individuals acted outside the scope of their authority. Edwards did not attach a proposed amended complaint to the motion.

On August 30, 2007, immediately before Edwards presented arguments in support of the *pro se* written motion, attorney Reardon orally moved for leave to withdraw as Edwards' attorney. Reardon noted that Edwards was bringing the motion for reconsideration without counsel's assistance.

Edwards then addressed the court and argued that, pursuant to *Lathrop*, he should be allowed 28 days to file an amended complaint to add city officials as parties and to allege that the city attorney's conduct in drafting the annexation agreement exceeded the scope of his official authority. In response, **[***11]** attorney Krumpe argued the immunity provision of the Act extended to "the activities of the employees, agents and officers of a unit of local government" (*740 ILCS 10/5(15)* (West 2006)).

[*1032] After hearing the parties' arguments, the court denied the motion to reconsider which asked to amend the original complaint. Addressing the assertion that the city attorney acted outside his authority, the court observed, "[T]he only thing you've alleged now is that the lawyer may have given them bad advice. That doesn't make it outside the scope of authority." Edwards appeals this decision of the trial judge.

The City cross-appeals, contending that both plaintiff and attorney Reardon should be sanctioned for violating *Supreme Court Rules 137* and *375* (155 Ill. 2d Rs. 137, 375).

ANALYSIS

I. Appeal

Proceeding *pro se* on appeal, Edwards does not identify himself in dual capacities, but continues to argue for relief for wrongs to the corporations. On appeal, Edwards does not distinguish the causes of action he may have as an individual from an interest as the sole stock holder of either corporation. Edwards generally argues the trial court abused its discretion in denying the request to file an amended complaint. **[***12]** In response, the City contends Edwards waived this issue by failing to tender a proposed amended complaint to the trial court. The City also argues that, waiver aside, nothing contained in the *pro se* "Motion to Reconsider" gives rise to a cause of action under the Act.

HN1[] As a general rule, a motion to amend a complaint is a matter that lies within the trial court's sound discretion, and the court's decision will not be disturbed on review in the absence of an abuse of discretion. *Compton v. Country Mutual Insurance Co., 382 Ill. App. 3d 323, 331-32, 887 N.E.2d 878, 320 Ill. Dec. 734 (2008)*. ***HN2***[] An abuse of discretion is demonstrated if no reasonable person would take the view adopted by the trial court. *In re Marriage of Schneider, 214 Ill. 2d 152, 173, 824 N.E.2d 177, 291 Ill. Dec. 601 (2005)*. ***HN3***[] A primary consideration in determining whether the court abused its discretion by denying leave to amend is whether the proposed amendment would cure the defective pleading. *Compton, 382 Ill. App. 3d at 332*, **[**985]** **[****459]** citing *Loyola Academy v. S & S Roof Maintenance, Inc., 146 Ill. 2d 263, 273, 586 N.E.2d 1211, 166 Ill. Dec. 882 (1992)*.

The original complaint drafted by Edwards relied on the Illinois Antitrust Act as the only basis for the cause of action. *740 ILCS 10/1 et seq*. (West 2006). Edwards' attorney reemphasized **[***13]** this position in his argument during the motion to dismiss hearing. Edwards' complaint asserted that the City's contractual relationship with Ozinga Bros. has "made it uneconomical for *[p]laintiffs* to market *their* REAL PROPERTY." (Emphasis added.) The original complaint did not assert that Edwards was mining the property as an individual. Rather, the complaint alleged the corporation, Corsaw, began surface **[*1033]** mining the land in 2004 without a special use permit. Additionally, the original complaint did not allege that the City's actions were unauthorized, only that the effect of the City's arrangements with Ozinga Bros. caused damages.

HN4[] Section 5 of the Act contains 15 enumerated exceptions to the application of the Act and provides as follows:

> ***HN5***[] "No provisions of this Act shall be construed to make illegal:
> * * *
>
> (15) the activities of a unit of local government or school district *and the activities of the employees, agents and officers of a unit of local government or school district*." (Emphasis added) *740 ILCS 10/5(15)* (West 2006).

Citing *Lathrop v. Juneau & Associates, Inc., 220 F.R.D. 330 (S. D. Ill. 2004)*, Edwards requested the court to reconsider its dismissal and also requested leave **[***14]** to amend the complaint to assert the antitrust claim against the city officials and its attorney on the ground that these individuals acted outside the scope of their authority. Edwards did not attach a proposed amended complaint to the *pro se* motion.

As observed by the federal district court in *Lathrop*, ***HN6***[] the above-cited provision means that both municipalities and their employees, agents and officers are immune from liability under the Act. In *Lathrop*, the original complaint began by specifically naming individual municipal officers and claiming they committed a violation under the Racketeer Influenced and Corrupt Organizations Act (*18 U.S.C. §1961 et seq. (2000)*) and engages in a civil conspiracy to commit unlawful acts, both individually and in their official capacities. The court dismissed all allegations against Granite City or its municipal officers in their "official capacities," based upon municipal immunity, but ruled if Lathrop could make a showing that these individuals committed tortious acts independent of their municipal capacities, plaintiff was not precluded from proceeding on his claim for damages under the Illinois Antitrust Act. *Lathrop, 220 F.R.D. at 336*. The *Lathrop* **[***15]** court dismissed the charges relating to the city and the officials' acts in their municipal capacities, but allowed Lathrop time to amend his complaint to allege illegal acts committed by the municipal officials in their individual capacities.

In this case, unlike *Lathrop*, the complaint has not named any individuals or alleged facts indicating that any city official acted illegally, independent of their official capacities. The alleged antitrust violation cited by Edwards consisted of the City contracting with Ozinga Bros. and its wholly owned subsidiary, Ozinga Materials, Inc., to annex Ozinga Bros.' property and place controls on the port facility along the river which effectively eliminated competitors in the sand **[*1034]** and gravel mining business. It is well settled that ***HN7***[] contracting with parties seeking to annex property is not an illegal municipal activity (*65 ILCS 5/11-15.1-1* **[**986]** **[****460]** (West 2006)), and a municipality is not precluded from zoning property outside city limits when the property is subject to an annexation agreement. *Village of Chatham, 216 Ill. 2d at 432-33*.

Having failed to tender a proposed amended complaint to the trial court demonstrating an amendment would cure the defective **[***16]** pleading, and having failed to argue or present facts claiming that city officials acted outside the scope of their official authority or acted tortiously, Edwards' request to amend the complaint was inadequate. In sum, Edwards cannot overcome the bar of immunity in subsection 5(15) of the Antitrust Act. Accordingly, we conclude the trial court did not abuse its discretion by denying the request for leave to amend the complaint, and we affirm the court's ruling.

II. The City's Cross-Appeal

Next, we consider the City's argument on cross-appeal that the trial court should have granted its motion for *Rule 137* sanctions against Edwards and attorney Reardon. The City claims the court abused its discretion by denying *Rule 137* sanctions against Edwards and Reardon. ***HN8***[] *Supreme Court Rule 137* provides that the court may impose sanctions upon a party or his attorney, including the reasonable cost of defending an action, that is not warranted by existing law or an action that is interposed for an improper purpose, such as to harass, to cause unnecessary delay or to increase the expense of litigation. 155 Ill. 2d R. 137. ***HN9***[] The trial court's ruling on a motion for *Rule 137* sanctions should not be reversed **[***17]** on review unless the trial court abused its discretion. *Dowd & Dowd, Ltd. v. Gleason, 181 Ill. 2d 460, 487, 693 N.E.2d 358, 230 Ill. Dec. 229 (1998)*.

HN10[] The purpose of the rule is to prevent parties from abusing the judicial process with vexatious actions unsupported by fact or law, not to punish litigants and their attorneys merely because they were unsuccessful in the litigation. *Dismuke v. Rand Cook Auto Sales, Inc., 378 Ill. App. 3d 214, 217, 882 N.E.2d 607, 317 Ill. Dec. 727 (2007)*; *Burrows v. Pick, 306 Ill. App. 3d 1048, 1050, 715 N.E.2d 792, 240 Ill. Dec. 105 (1999)*. ***HN11***[] Since the rule is penal in nature, it is strictly construed. *Dowd & Dowd, 181 Ill. 2d at 487*.

Here, the City claims the trial court's denial of sanctions is not entitled to deference because the court "refused to take any evidence or even hear any arguments with respect to the City's motion." Our review of the report of proceedings does not support this assertion. The record shows that on June 15, 2007, the court heard several pending motions, including attorney Reardon's motion to disqualify counsel **[*1035]** for the defense and the City's combined "Motion to Dismiss and for Sanctions." After denying Reardon's motion to disqualify, the court allowed attorney Krumpe to present the City's motion to dismiss and the request for sanctions. **[***18]** In support of the motion to dismiss, Krumpe asserted the case was "so simple [that the] court should dismiss the case with prejudice and award sanctions."

Krumpe noted that, even though Edwards filed the complaint *pro se*, Reardon subsequently entered his appearance and prepared and presented other motions when he "should have told his client at that point that he had no claim." Krumpe argued that, since the Edwards complaint relied on the Illinois statutes, Edwards could not rely on cases interpreting the federal Sherman Act (*15 U.S.C. §1 et seq. (2000)*) holding that a "person" liable under the federal antitrust laws included a municipality because the federal law did not include a similar immunity provision **[****461]** **[**987]** (see, *e.g.*, *City of Lafayette, Louisiana v. Louisiana Power & Light Co., 435 U.S. 389, 400, 55 L. Ed. 2d 364, 374-75, 98 S. Ct. 1123, 1130 (1978)*). Krumpe argued statutory immunity set forth in subsection 5(15) of the Illinois Antitrust Act applied to the City as a "unit of local government." Concluding, Krumpe stated:

> "We shouldn't be here. We shouldn't have to brief any of these motions or argue the motion to disqualify or any other motion because it is clear on the statute that **[***19]** there is no cause of action."

In response, Reardon argued, when the City acted without authority to affect land use situated beyond the geographical city limits, the City could not rely on the statutory immunity under the Illinois Act for those actions. Reardon suggested that it was incumbent on the City to show that it had specific authority to take the challenged action before it could claim immunity under subsection 5(15) of the Illinois Act.

The trial judge, after briefly recessing, invited the City's attorneys to reply to Reardon's argument. Attorney Joseph responded that the supreme court ruled, in *Village of Chatham*, that cities had authority to apply their own zoning codes and enter into contracts for purposes of annexing property situated outside of city limits. Concluding, Reardon pointed out that section 11 of the Act (*740 ILCS 10/11* (West 2006)) provided that decisions of the federal courts should be used as a guide when construing language common to federal antitrust statutes and the Act, but that the Act should not be construed to restrict powers granted to units of local government by state statutes and the Illinois Constitution.

In response to the court's inquiry, Reardon **[***20]** acknowledged that the federal antitrust statute did not contain an immunity provision similar **[*1036]** to subsection 5(15) of the Illinois Antitrust Act. Continuing, Reardon posited that subsection 5(15) of the Illinois Antitrust Act should not be construed as a grant of blanket immunity, but immunity for actions taken by the City that were authorized by the Illinois Municipal Code.

The judge took another brief recess to read case law and, when the hearing resumed, he resolved the City's combined motion to dismiss and for sanctions. Relying on *Du Page Aviation*, which attorney Krumpe admitted he had read but not cited in his pleading, the court concluded that the City was immune from liability under the Act, even if the City's actions as alleged by plaintiff were beyond the City's authority. The court then granted the City's motion to dismiss with prejudice but denied its request for *Rule 137* sanctions.

Based on this record, it is apparent to this court that the City was afforded the opportunity to present its combined motion to dismiss and request for sanctions based on the frivolous nature of the lawsuit. The record shows the court gave serious consideration to the positions of both parties **[***21]** and conducted independent research before ruling on the City's argument for dismissal. The court agreed that the complaint could not withstand the City's legal immunity challenge, even if an amended complaint was filed.

However, the City requested sanctions based on two grounds. First, the City claimed the action was frivolous in light of municipal immunity. Importantly, the City also requested sanctions on the grounds that Edwards did not have standing to assert the interests of either corporation without engaging in the unauthorized practice of law. The trial court did not address the unauthorized practice of law before denying sanctions.

In lieu of remanding this issue to the trial court to conduct a hearing to determine **[**988]** **[****462]** if Edwards engaged in the unauthorized practice of law by filing the complaint and thereafter asking the court to reconsider the denial of the request to amend the complaint, we address the issue based on judicial economy.

The principles prohibiting the unauthorized practice of law are well established. ***HN12***[] A corporation may not initiate actions in courts of this state unless the corporation is represented by an attorney. *Siakepere v. City of Chicago, 374 Ill. App. 3d 1079, 1081, 872 N.E.2d 495, 313 Ill. Dec. 512 (2007)*. **[***22]** A complaint drafted by a nonattorney on behalf of a corporation constitutes the unauthorized practice of law rendering the pleading a nullity and any judgment entered on it void. *Housing Authority of the County of Cook v. Tonsul, 115 Ill. App. 3d 739, 740, 450 N.E.2d 1248, 71 Ill. Dec. 369 (1983)*. An attorney's subsequent appearance and adoption of a complaint improperly drafted by a nonattorney does not absolve the drafter of the unauthorized practice of law. *Tonsul, 115 Ill. App. 3d at 740*; *Francorp, Inc. v. Siebert, 211 F. Supp. 2d 1051 (N.D. Ill. 2002)*.

[*1037] ***HN13***[] A sole stockholder cannot bring a lawsuit in his own name for a cause of action belonging to a corporation except under very limited circumstances that do not apply to this situation based on the language of this complaint. See *Brodsky v. Frank, 342 Ill 110, 116-117, 173 N.E. 775 (1930)*; *Cashman v. Coopers & Lybrand, 251 Ill. App. 3d 730, 732-733, 623 N.E.2d 907, 191 Ill. Dec. 317 (1993)*. A logical extension of this principle leads to the conclusion that an individual cannot bring an appeal in his name on behalf of separate corporate interests.

In this case, Edwards drafted the original complaint by identifying himself in dual capacities, individually and as the sole stockholder of the separate corporations. Acting **[***23]** in an individual capacity in the trial court, Edwards could not assert an ownership interest in the real estate as a basis for standing to challenge the annexation agreement requirement before gaining access to the city port. Instead, he relied on corporate interests to attempt to create standing by identifying himself as the only stockholder of the corporations that owned the land and mineral rights at issue. Additionally, Edwards requested damages by asserting that the terms of the annexation contract have made it uneconomical for "*Plaintiffs*" to market "*their REAL PROPERTY*." ***HN14***[] A nonlawyer who initiates a lawsuit to obtain relief on behalf of another person or other corporate entities, other than himself, engages in the unauthorized practice of law.

Attorney Reardon entered his appearance without amending Edwards' complaint or denouncing the corporate interests that Edwards identified in the complaint. Reardon simply pursued the pleading and opposed the motion to dismiss presumably aware that the complaint was drafted by a nonlawyer on behalf of himself but alleging injuries sustained by two corporations. However, Reardon ended his involvement as counsel, shortly thereafter, with an **[***24]** oral motion to withdraw after Edwards filed a *pro se* motion for reconsideration to amend the original complaint, again filed in the dual capacity as individual and sole stockholder.

The City argues that attorney Reardon's oral motion to withdraw was ineffective. We disagree. In this case, the record shows that attorney Reardon did not file a written motion to withdraw as counsel for plaintiff as required. 134 Ill. 2d R. 13(c)(2)-(3). However, neither Edwards nor opposing counsel objected to the oral nature of the motion. The record also **[**989]** **[****463]** shows that Edwards was allowed to argue the motion to reconsider requesting to amend the complaint before the court. Since the judge did not require attorney Reardon to argue the motion to reconsider and amend that had been prepared by Edwards, we conclude the trial court allowed the oral motion to withdraw without objection. We will not disturb the court's decision to deny sanctions against attorney Reardon.

[*1038] The City's written request for sanctions under *Rule 137* exposed Edwards' unauthorized practice of law but failed to directly challenge the complaint as void. Nonetheless, even after the court denied the City's first request for sanctions against Reardon **[***25]** and Edwards on June 15, 2007, Edwards once again identified his status as sole stockholder as part of the motion to reconsider the motion to dismiss and the request to amend the complaint. We note the request to amend the complaint was not for the purpose of denouncing the interests of the corporation, but to add another basis for recovery based on the unauthorized actions of city officials allegedly against Edwards individually and against the interests of the corporations. Here, the City requests this court to consider sanctions as well.

To deny sanctions, we must excuse the unauthorized practice of law by ignoring the fact that Edwards was a nonattorney when he filed the motion to reconsider and amend the complaint in the trial court, when acting as both an individual and as stockholder of the corporate entities. [2] This is a position we are not willing to adopt as a court of review.

Under analogous circumstances, this court *sua sponte* granted a remand for determination **[***26]** of *Rule 137* sanctions where the underlying claim was grounded on false allegations of fact. *First of America Trust Co. v. First Illini Bancorp, Inc., 289 Ill. App. 3d 276, 291, 685 N.E.2d 351, 226 Ill. Dec. 248 (1997)*. We deem the unauthorized practice of law in the drafting of a complaint, a written motion to reconsider and a request to amend that complaint constitutes a defect at least as serious as, if not more serious than, the defects presented to this court in *First of America Trust Co. v. First Illini Bancorp, Inc., 289 Ill. App. 3d 276, 685 N.E.2d 351, 226 Ill. Dec. 248 (1997)*.

Here, the record discloses that the trial court duly admonished Edwards in earlier proceedings that the pursuit of the cause on behalf of Corsaw and IRH constituted an unauthorized practice of law in violation of the Illinois Attorney Act and warned him regarding his contemptuous behavior. Accordingly, we remand this cause to the trial court with directions to conduct an evidentiary hearing to determine the amount of reasonable sanctions that should be

---

[2] In the petition for reconsideration filed with this court on October 6, 2008, Edwards admits "this action was brought by Kenin Edwards individually *and* as sole stockholder of his corporate entities." (Emphasis added)

imposed against Edwards pursuant to *Rule 137* for the filing of the original complaint and the subsequent motion to reconsider and amend that complaint while engaging in the unauthorized practice of law.

III. *Rule 375* **[***27]** Sanctions

Finally, the City requests that the court award attorney fees **[*1039]** incurred in defending this appeal pursuant to *Rule 375*. ***HN15***[] An award of attorney fees may be granted as a sanction if a party wilfully refuses to comply with appellate rules, or where an appeal is taken in bad faith or for an improper purpose. 155 Ill. 2d R. 375. An appeal is deemed frivolous if a reasonable, prudent attorney acting in good faith would not have brought it. *Penn v. Gerig,* ***[**990] [****464]*** *334 Ill. App. 3d 345, 357, 778 N.E.2d 325, 268 Ill. Dec. 339 (2002)*.

We have previously noted that the original motion to reconsider and request to amend the complaint was drafted by Edwards, a nonlawyer, but still asserted causes of actions unique to the corporations. In spite of having an attorney of record at the time, Edwards prepared and filed the motion to reconsider *pro se* based on status as an individual and sole stockholder of the corporations. Based on the status of this record, a prudent attorney acting in good faith would not have brought this appeal to contest the court's ruling on the motion to reconsider the court's dismissal of the complaint with prejudice, prepared by a nonlawyer asserting his own *and* separate corporate interests. The motion to reconsider **[***28]** asked the trial court to amend the complaint that was drafted, signed, and filed by Edwards, once again reciting his dual capacities as individual and stockholder. The denial of this motion to reconsider forms the basis of this appeal.

We are mindful Edwards filed a *pro se* notice of appeal without naming himself as the sole stockholder of the corporations. Even though Edwards pursues this appeal in his name only, it does not cure the underlying unauthorized practice of law, and the void nature of the inartfully drafted complaint that is now the singular subject of this appeal. Further, Edwards seeks review of the trial court's decision below without denouncing the injured corporate interests or requesting that our ruling be limited to amending the complaint solely on the basis of his individual injuries.

Accordingly, we allow the City's request for *Rule 375* sanctions, and we remand this cause to the trial court to conduct an evidentiary hearing on the amount of reasonable *Rule 137* and *Rule 375* sanctions against Edwards for filing of the original lawsuit asserting corporate interests other than his own individual interests, for filing a motion to reconsider to allow him to amend the original **[***29]** complaint seeking corporate damages without the assistance of counsel, and appealing the denial of those motions drafted in violation of the Attorney Act.

CONCLUSION

For the reasons stated, the judgment of the circuit court of Marshall County is affirmed in part and reversed in part. We remand the cause for further proceedings to determine the amount of the appropriate **[*1040]** sanctions and to enter an order for sanctions in favor of the City pursuant to *Rule 137* and *Rule 375* consistent with this opinion.

Affirmed in part and remanded with directions.

McDADE, P.J., and O'BRIEN, J., concur.

Apple Inc. v. Psystar Corp.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Sherman Act, Claims**

A motion to dismiss under *Fed. R. Civ. P. 12(b)(6)* tests the legal sufficiency of the claims alleged in the complaint. All allegations of material fact are taken as true and construed in the light most favorable to a plaintiff. However, conclusory allegations of law and unwarranted inferences are insufficient to defeat a motion to dismiss for failure to state a claim. The United States Supreme Court has clarified the pleading standard for *15 U.S.C.S. § 1* Sherman Act claims. Under *Fed. R. Civ. P. 8(a)(2)*, only a short and plain statement of the plaintiff's entitlement to relief is necessary. A plaintiff's obligation to provide the "grounds" of his "entitlement to relief" requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do. Such a claim requires a complaint with enough factual matter (taken as true) to suggest that an agreement was made. Asking for plausible grounds to infer an agreement does not impose a probability requirement at the pleading stage; it simply calls for enough fact to raise a reasonable expectation that discovery will reveal evidence of illegal agreement. The Supreme Court does not require that pleadings prove the asserted claims or establish a probable violation, but does require that pleadings set forth factual allegations sufficient to establish plausible grounds for an entitlement to relief.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN2[] Market Definition, Relevant Market

A tying claim under *§ 1* of the Sherman Act, *15 U.S.C.S. § 2*, a monopoly-maintenance claim under *§ 2* of the Sherman act, *15 U.S.C.S. § 2*, and an exclusive-dealing claim under *§ 3* of the Clayton Act, *15 U.S.C.S. § 14*, each require a plaintiff to establish market power in a "relevant market." The relevant-market inquiry does not differ for the three claims in any material respect. Failure to identify a relevant market is a proper ground for dismissing a Sherman Act claim.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN3[] Market Definition, Relevant Market

The definition of an antitrust "relevant market" is typically a factual rather than a legal inquiry, but certain legal principles govern the definition. Whether products are part of the same or different markets under ***antitrust law*** depends on whether consumers view those products as reasonable substitutes for each other and would switch among them in response to changes in relative prices. The outer boundaries of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it. As such, the relevant market must include the group or groups of sellers or producers who have actual or potential ability to deprive each other of significant levels of business.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN4[] Relevant Market, Product Market Definition

In general, a manufacturer's own products do not themselves comprise a relevant product market. A company does not violate the Sherman Act by virtue of the natural monopoly it holds over its own product. Single-brand markets are, at a minimum, extremely rare. Even where brand loyalty is intense, courts reject the argument that a single branded product constitutes a relevant market.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN5[] Relevant Market, Product Market Definition

Antitrust markets consisting of just a single brand, however, are not per se prohibited; markets are defined by the "reasonable interchangeability" of use or the cross-elasticity of demand among products. In theory, it may be possible that, in rare and unforeseen circumstances, a relevant market may consist of only one brand of a product.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN6[] Motions to Dismiss, Failure to State Claim

A plaintiff's obligation to provide the "grounds" of his "entitlement to relief" requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN7[] **Sherman Act, Scope**

With regard to antitrust claims, although the responsiveness of one product to the price of another is at the heart of the market definition analysis, a mere price differential alone does not necessarily signal a distinct market. It is true that a price differential between two products may reflect a low cross-elasticity of demand, if the higher priced product offers additional service for which consumers are willing to pay a premium. The mere existence of a price differential, however, does not necessarily mean that a product is unconstrained by competition: The "market" which one must study to determine when a producer has monopoly power will vary with the part of commerce under consideration. The tests are constant. The market is composed of products that have reasonable interchangeability for the purpose for which they are produced -- price, use and qualities considered.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN8[] **Price Fixing & Restraints of Trade, Tying Arrangements**

With regard to an antitrust claim, a tying theory requires a plausible allegation that a company tied sale of one market in which it enjoys market power (the tying market) to a product in a second, distinct market (the tied market).

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN9[] **Market Definition, Relevant Market**

With regard to an antitrust claim, although the law permits an antitrust claimant to restrict the relevant market to Eastman Kodak Company v. Image Technical Services, Inc., style single-brand aftermarkets, the law prohibits an antitrust claimant from resting on market power that arises solely from contractual rights that customers knowingly and voluntarily gave to the defendant.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN10[] **Regulated Practices, Market Definition**

With regard to an antitrust claim, pre-existing markets and efforts to restrain or suppress that market both provide evidence that the tie is anti-competitive and offer courts guidance of what an efficient price may be.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN11[] **Market Definition, Relevant Market**

With regard to an antitrust claim, a court making a relevant market determination looks not to the contractual restraints assumed by a particular plaintiff when determining whether a product is interchangeable, but to the uses to which the product is put by consumers in general.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN12[] **Public Enforcement, State Civil Actions**

California's Cartwright Act, *Cal. Bus. & Prof. Code §§ 16700*-16760 was patterned after *§ 1* of the Sherman Act, and the pleading requirements under the two statutes are similar. Moreover, the Cartwright Act does not address unilateral conduct.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN13[] **Trade Practices & Unfair Competition, State Regulation**

Cal. Bus. & Prof. Code § 17200 proscribes any unlawful, unfair or fraudulent business act or practice.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN14[] **Trade Practices & Unfair Competition, State Regulation**

California courts hold that if the same conduct is alleged to be both an antitrust violation and an "unfair" business act or practice for the same reason -- because it unreasonably restrains competition and harms consumers -- the determination that the conduct is not an unreasonable restraint of trade necessarily implies that the conduct is not "unfair" toward consumers.

Opinion

[*1192] ORDER GRANTING MOTION TO DISMISS COUNTERCLAIMS

INTRODUCTION

Plaintiff Apple Inc. brought this lawsuit against defendant Psystar Corporation asserting copyright and trademark violations related to Psystar's alleged use of Apple's operating system. Psystar filed counterclaims against Apple alleging violations of federal and state antitrust laws. Apple moved to dismiss Psystar's antitrust counterclaims. For the reasons stated below, **[*1193]** Apple's motion to dismiss the counterclaims is **GRANTED**.

STATEMENT

Apple Inc. manufacturers and markets the Macintosh Computer and the OS X Operating System ("Mac OS"). Operating **[**2]** systems like Mac OS control and direct the interaction between software applications such as word processors and internet browsers, and the central processing unit and the various hardware in a computer. Apple is the exclusive manufacturer and master licensor of Mac OS (Countercl. 14, P 18, 21).

Psystar manufacturers and distributes a tailored line of computers called Open Computers. Psystar's Open Computers support a wide range of operating systems including Mac OS, Microsoft Windows XP and XP 64-bit, Windows Vista and Vista 64-bit and Linux 32 and 64-bit kernels. Psystar allows its customers to choose the operating system on the computers they purchase (Countercl. P 15).

Numerous companies manufacturer entire computer hardware systems, including (but not limited to) Dell, Acer, Lenovo, Sony and Hewlett-Packard. In addition, numerous companies manufacture and sell components -- such as hard drives, processors and graphics processing cards -- used by those computer manufacturers (Countercl. P 22-25).

The counterclaim, however, identifies no companies other than Apple and Psystar that currently sell computers compatible with Mac OS. Apple manufacturers an exclusive line of hardware systems **[**3]** that support Mac OS, including the Mac Pro, the Mac Mini, the MacBook the MacBook Air, the MacBook Pro, and the iMac. The counterclaim alleges that, by virtue of Apple's End User License Agreement and other anti-competitive conduct, consumers wishing to use Mac OS have no alternative to the Apple-label computer hardware systems. The counterclaim alleges that there is no compelling technological reason why other manufacturers could not produce computer hardware systems capable of hosting, executing and running MAC OS, and that, but for the exclusionary conduct of Apple, such third parties could and would assemble hardware components capable of running Mac OS (Countercl. PP 25-28).

The counterclaim avers that there exist two relevant markets. The first alleged market consists of one product: Mac OS. The complaint asserts that Apple's Mac OS is not reasonably interchangeable with other operating systems such as Microsoft Windows and therefore comprises its own market. The second alleged market consists of computer hardware systems capable of executing Mac OS. The counterclaim avers that, through its anti-competitive conduct, Apple's exclusive line of computer hardware systems dominate **[**4]** the market for Mac OS-capable computer hardware systems (Countercl. P 17).

Psystar offers several (related) allegations in support of its claim that Mac OS constitutes an independent market. *First*, Psystar alleges that Apple has undertaken extensive advertising campaigns -- including the "think different" campaign and the "get a Mac" campaign -- to define the Mac OS as a product separate and distinct from other operating systems, and that through those efforts customers and merchants have come to recognize Mac OS as a separate and distinct market (Compl. PP 30-35). *Second*, the counterclaim avers that, across the spectrum of the Apple-label computer line, Apple computers with traditional computer components are significantly more expensive than similarly configured computers with comparable (or superior) hardware sold by other computer companies utilizing operating systems other than Mac OS, such as Windows. **[*1194]** The counterclaim further asserts that "[n]otwithstanding the consistent upward differentiation in price across a broad spectrum . . . Apple is known for its 'market performance and brand leadership' . . . [and] is 'well known for its passionate and dedicated consumer base.'" Psystar **[**5]** avers that Apple "has made a conscious and successful effort to create inelasticity of demand through product differentiation in its Mac OS," and that there in fact exists an "insufficient" cross-elasticity of demand. Psystar alleges that Apple's customers would not consider any other operating system to be a reasonably interchangeable alternative (Countercl. PP 36-43). *Third*, the counterclaim alleges that a "small but significant non-transitory increase in price" ("SSNIP") would not result in a change in demand for Mac OS (Countercl. P 44).

Psystar claims that Apple has utilized its monopoly power in the alleged "Mac OS market" -- in which Apple is, by definition, the only participant -- in order to dominate the market for Mac OS-capable computer hardware systems. Psystar alleges that Apple has engaged in various forms of anti-competitive conduct in order to "protect its valuable monopoly in the Mac OS market and, by extension, Apple-Labeled Computer Hardware Systems from potential threats." The counterclaim asserts that the following actions constitute the illegal tying of Mac OS to Apple-labeled computer systems, monopoly maintenance or other unlawful behavior (Countercl. PP 47, **[**6]** 63-64, 67, 72-73).

First, Psystar avers that Apple's End User License Agreement for the Mac OS specifically prohibits customers from installing the operating system on non-Apple computers. The license agreement states (Countercl. P 61):

2. Permitted License Uses and Restrictions.

> A. Single Use. This license allows you to install, use and run (1) copy of the Apple Software on a single Apple-labeled computer at a time. You agree not to install, use or run the Apple Software on any non-Apple-Labeled computer or enable another to do so.

Customers, therefore, are contractually precluded from utilizing Mac OS on any computer hardware system that is not an Apple-labeled computer system (Countercl. PP 61-62, 65-66).

Second, Psystar avers that Apple has erected technical barriers that prevent Mac OS from operating on non-Apple computers. Apple, the counterclaim alleges, intentionally embeds code in Mac OS that causes the operating system to recognize any computer hardware system that is not an Apple computer. If Mac OS recognizes a non-Apple computer, Mac OS will not operate properly. The Mac OS will enter "kernel panic," meaning that the operating system believes that it has detected an internal **[**7]** and fatal error from which it can not recover, and discontinues operation. This renders the computer non-functional (Countercl. PP 58-59).

Finally, Psystar asserts that Apple had experimented with licensing its system software to other computer makers but has since abandoned the practice. In 1995, Apple launched a "Clone Program" under which it licensed Macintosh ROMs and system software to other computer makers, but Apple ended the program in 1997. Apple also purchased a computer hardware manufacturer capable of running Mac OS. Apple has since announced that it will not allow the use of Mac OS on anything other than an Apple computer (Compl. PP 49-57).

Psystar alleges that this conduct has caused harmful and anti-competitive effects in the marketplace (Compl. PP 68-77). Psystar asserts six claims for relief: (1) **[*1195]** unlawful tying in violation of Section 1 of the Sherman Act, *15 U.S.C. 1*; (2) monopoly maintenance in violation of *Section 2* of the Sherman Act; (3) exclusive dealing in violation of Section 3 of the Clayton Act, *15 U.S.C. 14*; (4) violations of California's Cartwright Act, *Cal. Bus. & Prof. Code § 16700*; (5) violations of California's unfair competition law, *Cal. Bus. & Prof. Code § 17200*, **[**8]** and (6) violations of the common law of unfair competition. Apple moved to dismiss all claims. [1]

ANALYSIS

HN1[] A motion to dismiss under *Rule 12(b)(6)* tests the legal sufficiency of the claims alleged in the complaint. "All allegations of material fact are taken as true and construed in the light most favorable to plaintiff. However, conclusory allegations of law and unwarranted inferences are insufficient to defeat a motion to dismiss for failure to state a claim." *Epstein v. Wash. Energy Co., 83 F.3d 1136, 1140 (9th Cir. 1996)*. The Supreme Court recently clarified the pleading standard for Sherman Act Section 1 claims. *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127*

[1] Apple requests that the Court take judicial notice of several documents. For the reasons that follow, this order resolves Apple's motion without recourse to those documents. The request is therefore moot.

S.Ct. 1955, 1964-65, 167 L. Ed. 2d 929 (May 21, 2007). It reiterated that under Rule 8(a)(2), only a short and plain statement of the plaintiff's entitlement to relief is necessary. Twombly, 127 S.Ct. at 1964. It also acknowledged, however, that "a plaintiff's obligation to provide the 'grounds' of his 'entitle[ment] to relief' requires more **[**9]** than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." Id. at 1964-1965 (citing Papasan v. Allain, 478 U.S. 265, 286, 106 S. Ct. 2932, 92 L. Ed. 2d 209, 232 (1986)). The decision explained,

> stating such a claim requires a complaint with enough factual matter (taken as true) to suggest that an agreement was made. Asking for plausible grounds to infer an agreement does not impose a probability requirement at the pleading stage; it simply calls for enough fact to raise a reasonable expectation that discovery will reveal evidence of illegal agreement.

Id. at 1965. *Twombly* did not require that pleadings prove the asserted claims or establish a probable violation, but it did require that pleadings set forth factual allegations sufficient to establish *plausible* grounds for an entitlement to relief.

1. FEDERAL CLAIMS.

Psystar asserted claims under Sections 1 and 2 of the Sherman Act and Section 3 of the Clayton Act. Apple contends (1) that the relevant markets alleged in the counterclaim are neither legally nor factually plausible, and (2) that the antitrust laws do not require Apple to help its competitors compete by forcing it to enter unwanted licensing agreements with them.

A. [10] Market definition: Alleged "Mac OS" market**.

As stated, Psystar asserted three federal claims: ***HN2***[] a tying claim under Section 1 of the Sherman Act, a monopoly-maintenance claim under Section 2 of the Sherman act, and an exclusive-dealing claim under Section 3 of the Clayton Act. [2] Each of these claims requires plaintiff to establish market power in a "relevant market." **[*1196]** *See* Illinois Tool Works Inc. v. Independent Ink, Inc., 547 U.S. 28, 42-43, 126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006) (tying). Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993) (monopolization); Omega Environmental, Inc. v. Gilbarco, Inc., 127 F.3d 1157, 1169 (9th Cir. 1997) (exclusive dealing). The relevant-market inquiry does not differ for the three claims in any material respect. *See* Newcal Industries, Inc. v. Ikon Office Solutions, 513 F.3d 1038, 1044 n.3 (9th Cir. 2008) (standards the same under Sections 1 and 2); Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 23 n.39, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984) (standards the same under Sherman Act Section 1 and Clayton Act Section 3). "Failure to identify a relevant market is a proper ground for dismissing a Sherman Act claim." *Tanaka v. University of Southern California, 252 F.3d 1059, 1063 (9th Cir. 2001)* (citation **[**11]** omitted).

The parties dispute whether Psystar may rely on a relevant market comprised of a single brand of a product -- a market consisting only of Apple's Mac OS but excluding other operating systems such as Microsoft's Windows. Apple asserts that the relevant markets alleged in the counterclaim are neither legally nor factually plausible. Psystar responds that market definition is normally a factual question, not to be decided at the pleading stage, and that single-brand markets are permissible.

HN3[] The definition of an antitrust "relevant market" is typically a factual rather than a legal inquiry, but certain legal principles govern the definition. Newcal Industries, Inc., 513 F.3d at 1045. Whether products are part of the same or different markets under ***antitrust law*** depends on whether consumers view those products as reasonable **[**12]** substitutes for each other and would switch among them in response to changes in relative prices:

---

[2] Psystar's tying claim arises under Section 1 of the Sherman Act. It is unclear how Section 1 is applicable, as Psystar alleges only single-firm anticompetitive conduct. Apple, however, does not challenge the counterclaim on this basis. In any event, courts also allow tying theories under Section 2, at least where there is monopolization or attempted monopolization.

> As the Supreme Court has instructed, "The outer boundaries of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it." [*Brown Shoe v. United States, 370 U.S. 294, 325, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)]*. As such, the relevant market must include "the group or groups of sellers or producers who have actual or potential ability to deprive each other of significant levels of business." *Thurman Industries, Inc. v. Pay 'N Pak Stores, Inc., 875 F.2d 1369, 1374 (9th Cir. 1989)*.

Newcal Industries, Inc. v. Ikon Office Solutions, 513 F.3d 1038, 1045 (9th Cir. 2008).

Psystar relies on Newcal Industries. That decision, plaintiff emphasizes, stated that "the law permits an antitrust claimant to restrict the relevant market to a single brand of the product at issue (as in *Eastman Kodak*)." *Id. at 1048*. *Newcal Industries*, however, merely held that a market may be comprised of a single brand in the situation the Supreme Court addressed in *Kodak*: a derivative aftermarket for products related to or dependent on a specific company's **[**13]** products. As in *Kodak*, the *Newcal Industries* plaintiffs had, the decision explained,

> allege[d] the existence of two separate but related markets in intrabrand copier equipment and service. The first market [was] an initial market for copier leases and copier service, which (as the district court correctly found) is a competitive market in which IKON has no significant market power. The second market [was] a derivative aftermarket for replacement equipment, which include[d] markets for lease "buy outs" and for "lease-end service." *As in all three of the cited cases, the relevant market here [was] not the indisputably competitive market in which the consumers first shop for the primary product.* ***[*1197]*** *It [was] an aftermarket in which the consumers claim that they should be able to shop for a secondary product* . . . . The complaint allege[d] that suppliers go through a different economic calculus when competing for consumers of replacement equipment and lease-end service than they do when competing for consumers of initial equipment leases and service contracts.

Id. at 1049 (emphasis added). Plaintiff Newcal and defendant IKON were in the copier-equipment business. The two companies competed both **[**14]** in the primary market for equipment leases and in the aftermarket for equipment upgrades. Newcal challenged certain contracts and practices which "shield[ed] IKON customers from competition in the aftermarkets for upgrade equipment and for lease-end services." *Newcal Industries, Inc., 513 F.3d at 1043-44*. As in *Kodak*, the decision found that these single-brand aftermarkets constituted relevant antitrust markets. *Id. at 1050*. The decision simply did not address the situation for which Psystar cites it -- a primary or independent market alleged to be limited, by definition, to a single brand of a product.

Neither did *Kodak*. That decision, like this case, involved claims of tying and monopolization. *Eastman Kodak Company v. Image Technical Services, Inc., 504 U.S. 451, 459, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)*. The Eastman Kodak Company, the decision explained, manufactured and sold photocopiers and micrographic equipment. Kodak also sold service and replacement parts for its equipment. Plaintiffs were a group of independent service organizations that serviced Kodak's equipment. Plaintiffs challenged Kodak policies that made it more difficult for them to compete with Kodak in servicing Kodak equipment, including limiting **[**15]** the availability of Kodak parts. Plaintiffs alleged that Kodak unlawfully tied the sale of service for Kodak machines to the sale of Kodak-compatible parts, a market in which Kodak had monopoly power. *Id. at 454-55*. Kodak parts, the decision explained, were not compatible with competitors' machines, and vice versa. *Id. at 456-57*.

A principal issue was "whether a defendant's lack of market power in the primary equipment market precludes -- as a matter of law -- the possibility of market power in derivative aftermarkets." *Id. at 455*. The Supreme Court held that it does not. *Id. at 472-77*. The decision explained that, in some instances, a single brand of a product can constitute a separate market: "[b]ecause service and parts for Kodak equipment are not interchangeable with other manufacturers' service and parts, the relevant market from the Kodak equipment owner's perspective is composed of only those companies that service Kodak machines." *Id. at 482*. Those single-brand markets, however, were "derivative aftermarkets." *Id. at 455*. *Kodak* found that single-brand aftermarkets -- markets for parts and service for Kodak equipment -- arose once customers have purchased and are "locked in" **[**16]** to Kodak photocopiers or equipment.

Here, in contrast, Psystar alleges not a single-brand aftermarket dependent on and derivative of a specific company's primary product but instead that a single brand of primary product (Apple's operating system) constitutes an independent market. Neither *Newcal Industries* nor *Kodak* addressed such a situation. Psystar has cited no decision lending support to its single-brand product market theory. [3]

[*1198] ***HN4***[] "In general, a manufacturer's own products do not themselves comprise a relevant product market . . . . [A] company does not violate the Sherman Act by virtue of the natural monopoly it holds over its own product." *Green Country Food Market, Inc. v. Bottling Group, 371 F.3d 1275, 1282 (10th Cir. 2004)*. *See also Lambtek Yogurt Machines v. Dreyer's Grand Ice Cream, Inc*., 1997 WL 108718 at * 3 (N.D. Cal. 1997) (unpublished). Single-brand markets are, at a minimum, extremely rare. "Even where brand loyalty is intense, courts reject the argument that a single branded product constitutes a relevant market." *Green Country Food Market, 371 F.3d at 1282*. *See also, e.g., Hack v. President and Fellows of Yale College, 237 F.3d 81, 86 (2d Cir. 2000)*, *abrogated on other grounds by Swierkiewicz, 534 U.S. 506, 122 S. Ct. 992, 152 L. Ed. 2d 1*; *Spahr v. Leegin Creative Leather Products, Inc., 2008 U.S. Dist. LEXIS 90079, 2008 WL 3914461 at * 9-10 (E.D. Tenn. 2008)*; *Little Caesar Enterprises, Inc. v. Smith, 34 F. Supp. 2d 459, 477 and n.30 (E.D. Mich. 1998)*; **[**18]** *Shaw v. Rolex Watch, U.S.A., Inc., 673 F. Supp. 674, 678-79 (S.D.N.Y. 1987)*. Antitrust ***HN5***[] markets consisting of just a single brand, however, are not *per se* prohibited; as stated, markets are defined by the "reasonable interchangeability" of use or the cross-elasticity of demand among products. In theory, it may be possible that, in rare and unforeseen circumstances, a relevant market may consist of only one brand of a product. Psystar's factual contentions therefore must be examined under *Twombly's* pleading standards to determine if Psystar has pled such a situation. The pleadings, however, fail to allege facts plausibly supporting the counterintuitive claim that Apple's operating system is so unique that it suffers *no* actual or potential competitors.

Psystar alleges that the "market economics" favor its cause and that a "small but significant non-transitory increase in price" ("SSNIP") would not result in a change in demand for Mac OS. These conclusory allegations offers no support for Psystar's claims; they merely restate a commonly used test for market definition without providing any factual basis for the claim. As stated, ***HN6***[] "a plaintiff's obligation to provide the 'grounds' of his **[**19]** 'entitlement to relief' requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Twombly, 127 S.Ct. at 1964-65*. Psystar also alleges that Apple computers, with Mac OS, cost more than similarly configured computers which utilize other operating systems. The import of the allegation is not self-evident. ***HN7***[] Although the *responsiveness* of one product to the price of another is at the heart of the market definition analysis, a mere price differential alone does not necessarily signal a distinct market. It is true that "[a] price differential between two products may reflect a low cross-elasticity of demand, if the higher priced product offers additional service for which consumers are willing to pay a premium." *Rebel Oil Co.* ***[*1199]*** *v. Atlantic Richfield Co., 51 F.3d 1421, 1436 (9th Cir. 1995)*. The mere existence of a price differential, however, does not necessarily mean that a product is unconstrained by competition:

> The 'market' which one must study to determine when a producer has monopoly power will vary with the part of commerce under consideration. The tests are constant. The market is composed of products that have reasonable interchangeability **[**20]** for the purpose for which they are produced -- *price, use and qualities considered*.

---

[3] Psystar's only other example of a single-brand market is *Digidyne Corp. v. Data General Corp., 734 F.2d 1336 (9th Cir. 1984)*. There, Data General manufactured a computer system called NOVA, which included a copyrighted NOVA operating system called RDOS. Plaintiffs sued on various antitrust theories, alleging that the RDOS operating system constituted its own relevant market. The Ninth Circuit agreed. The decision relied on the *per se* rule in tying cases and a presumption of market power when the tying product is copyrighted or patented. *Id. at 1339-41*. It also emphasized the presence of market imperfections such switching costs and customer "lock in." *Id. at 1342-43*. That decision, however, was implicitly overruled by *Illinois Tool Works v. Independent Ink, Inc., 547 U.S. 28, 126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006)*, **[**17]** which rejected the *per se* rule in tying cases and the presumption of market power for copyrighted or patented products. Moreover, as explained below, unlike the situation addressed in *Digidyne*, Psystar's pleadings do not suggest market imperfections such as switching costs and customer "lock in."

United States v. E.I. duPont de Nemours & Co., 351 U.S. 377, 406, 76 S. Ct. 994, 100 L. Ed. 1264 (1956) (emphasis added). In *duPont*, the Supreme Court concluded that cellophane was in the same market as other flexible packaging materials despite costing two or three times more, because the products were reasonably interchangeable despite the price difference. Id. at 401. *See also* AD/SAT v. Associated Press, 181 F.3d 216, 228 (2nd Cir. 1999); Nifty Foods Corp. v. Great Atlantic & Pacific Tea Co., 614 F.2d 832, 840 (2nd Cir. 1980). The price-differential allegation, alone, is inconclusive and must be considered in the context of the pleading as a whole.

The pleading as a whole does not allege facts that, if true, plausibly indicate that Mac OS is an independent, single-product market. The counterclaim itself explains that Mac OS performs the same functions as other operating systems (Countercl. P 21):

> Operating systems -- like the Mac OS -- manage the interaction between various pieces of hardware such as a monitor or printer. The operating system also manages various software applications running on a computer device.

The counterclaim **[**21]** further avers that "[a] seemingly infinite list of manufacturers . . . construct entire hardware systems (i.e., computers) marketed and sold to the consumer" (Countercl. P 22). Psystar's business model is predicated on a degree of interchangeability between computers utilizing Mac OS and other operating systems (Countercl. P 15):

> Psystar manufacturers and distributes computers tailored to customer choosing. As a part of its devotion to supporting customer choice, Psystar supports a wide range of operating systems including Microsoft Windows XP and XP 64-bit, Windows Vista and Vista 64-bit, Linux (32 and 64-bit kernels), and Mac OS. Psystar generally refers to this custom tailored line of computers as Open Computers.

The counterclaim admits that market studies indicate that, although Apple computers with Mac OS enjoy strong brand recognition and loyalty, they are not *wholly* lacking in competition (Countercl. P 38):

> [n]otwithstanding the consistent upward differentiation in price across a broad spectrum . . . by and between a Computer Hardware System without a Mac OS and a Apple-Labeled Computer Hardware System with the Mac OS, studies by Satmetrix Systems found that Apple is known for **[**22]** its "market performance and brand leadership" and that APPLE "far outranks its closest competitor."

Psystar fails to explain why these "competitor[s]" should be excluded from the definition of the relevant market.

Psystar also points to Apple's extensive advertising campaigns. Those advertising campaigns more plausibly support an inference contrary to that asserted in the counterclaim -- vigorous advertising is a sign of competition, not a lack thereof. If Mac OS simply had no reasonable substitute, Apple's vigorous advertising would be wasted money. The advertising campaigns suggest a need to enhance brand recognition and lure consumers from a **[*1200]** competitor. The "brand leadership" and brand loyalty Psystar alleges, if true, suggest that Apple's efforts have borne fruit.

Indeed, Psystar's allegations are internally contradictory. Psystar alleges that Mac OS is, by definition, an independent and unique market. That is, Mac OS, by definition, admits no reasonable substitutes. Psystar further avers, however, that Apple engages in the alleged anti-competitive conduct "in order to protect its valuable monopoly in the Mac OS market and, by extension, Apple-Labeled Computer Hardware Systems *from* ***[**23]*** *potential competitive threats*," and that Apple's "unreasonable restraints on trade allow APPLE to maintain its monopoly position with respect to the Mac OS and Apple-Labeled Computer Hardware Systems submarket" (Countercl. PP 47, 72, 73, 75) (emphasis added). Apple must be "protect[ing] its valuable monopoly in the Mac OS market" from something; anticompetitve behavior may be constrained by potential competitive threats. Psystar admits that operating systems constitute a "market"-- the counterclaim asserts that "there are substantial barriers to entry in the *market for operating systems*, including the Mac OS market" (Countercl. P 20; emphasis added). If this order were to accept Psystar's proposed market definition, Apple would no doubt enjoy the protections of a "barrier to entry" into the alleged market far more daunting than the listed technical, financial and logistical barriers: Psystar's own definition of the relevant market. The circular nature of Psystar's market definition becomes unavoidable: Psystar "alleges that given the prevalence of the Mac OS in the Mac OS market, customers need a computer hardware system on which to operate the Mac OS," and that Apple leverages that **[**24]** "prevalence" to dominate the Mac OS compatible computer hardware market (Countercl. P 96).

For the above-stated reasons, this order concludes that the counterclaim does not plausibly allege that Mac OS is an independent market.

B. Market definition: Alleged "Mac OS-capable computers" market.

As stated, the complaint alleges two relevant markets: Mac OS, and computer hardware systems which utilize Mac OS. All of Psystar's federal claims require the existence of these two distinct markets. Psystar has alleged tying, monopoly maintenance and exclusive dealing. ***HN8***[] The tying theory requires a plausible allegation that Apple tied sale of one market in which it enjoys market power (the "tying market") to a product in a second, distinct market (the "tied market"). *Illinois Tool Works Inc. v. Independent Ink, Inc., 547 U.S. 28, 35, 126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006)*. Similarly, Psystar's Sherman Act *Section 2* and Clayton Act *Section 3* theories -- if they differ from the tying theory -- are also dependent on the existence of a distinct "submarket" or aftermarket because Psystar challenges only the maintenance of a monopoly in, or exclusion of competitors from, that alleged submarket or aftermarket.

Psystar alleges that, by tying **[**25]** or other exclusionary behavior, Apple seeks to dominate a distinct *aftermarket*, the market for Mac OS-compatible computer hardware systems. Relying on *Newcal*, Psystar specifically asserts that this market is not an independent, stand-alone product but rather is a "submarket [] that 'would not exist' without the primary market for the Mac OS and is thus 'wholly derivative from and dependent' on that market" (Opp. at 7).

Newcal found such a single-brand aftermarket to be properly pled. *Newcal*, however, distinguished two other appellate decisions which had found that *contractually* ***[*1201]*** *created* aftermarkets could *not* be relevant antitrust markets. *Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430 (3d Cir. 1997)*; *Forsyth v. Humana, Inc., 114 F.3d 1467 (9th Cir. 1997)*. Applying *Kodak's* reasoning, *Newcal* held that, ***HN9***[] although the law permits an antitrust claimant to restrict the relevant market to *Kodak-style* single-brand aftermarkets, "the law prohibits an antitrust claimant from resting on market *power* that arises solely from contractual rights that customers knowingly and voluntarily gave to the defendant (as in *Queen City Pizza* and *Forsyth*)." *Newcal Industries, Inc., 513 F.3d at 1048* **[**26]** (emphasis in original). Psystar rests on precisely such a claim: the counterclaim alleges that, by its End User License Agreement and other means, Apple specifically restricts the use of Mac OS to Apple-labeled computer hardware systems. Customers, therefore, knowingly agree to the challenged restraint. [4]

In *Kodak*, the **[**27]** single-brand aftermarkets were distinct antitrust markets because, the decision found, customers did not adequately consider the total -- or lifecycle -- cost of the equipment, parts and service in their initial equipment purchase. Only after they were "locked in" to Kodak equipment were they forced to evaluate costs in the parts and service markets. Market imperfections such as information costs and switching costs prevented customers from doing so at the time of the original purchase or from imposing market discipline in the aftermarkets by switching among participants in the primary equipment market. *Eastman Kodak Company, 504 U.S. at 464-78*. The plaintiffs had also alleged that a market for the aftermarket service already existed (*i.e.*, firm other than Kodak already provided service for Kodak copiers) and that Kodak sought to restrain the participants in that market. ***HN10***[] Pre-existing markets and efforts to restrain or suppress that market both provide evidence that the tie is anti-

[4] *Newcal* further explained that "in determining whether the defendant's market power falls in the *Queen City Pizza* category of contractually-created market power or in the *Eastman Kodak* category of economic market power, the law permits an inquiry into whether a consumer's selection of a particular brand in the competitive market is the functional equivalent of a contractual commitment, giving that brand an agreed-upon right to monopolize its consumers in an aftermarket. The law permits an inquiry into whether consumers entered into such 'contracts' knowing that they were agreeing to such a commitment." *Id. at 1048-49*. Here, no such functional-equivalent analysis is necessary: not only did customers purchase the alleged primary- and aftermarket-products at the same time, as a package, they entered and express agreement that the former could not be used beyond the latter.

competitive and offer courts guidance of what an efficient price may be. *See* *Verizon Communications, Inc. v. Trinko, 540 U.S. 398, 409-10, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*. Unlike in *Kodak* -- where customers did not knowingly bind **[**28]** themselves to a single brand of the aftermarket and market imperfections (information costs and switching costs) prohibited customers from imposing market discipline in the *aftermarket* by switching among competitors in the *primary* market -- here Apple asks its customers to purchase Mac OS knowing that it is to be used only with Apple computers (Compl. P 28). It is certainly entitled to do so. *See* *Digital Equipment Corp. v. Uniq Digital Technologies, Inc., 73 F.3d 756, 762-63 (7th Cir. 1996)*. Psystar also asks the Court to create a non-existent market. This order declines to do so.

The aftermarket alleged here is more analogous to that addressed in *Forsyth*. That decision "reject[ed] the plaintiffs' attempt to limit the relevant market to acute **[*1202]** care hospitals used by Humana insureds. The plaintiffs used Sunrise Hospital and obtained medical care from few other hospitals because of contractual provisions in their insurance policies. This tie-in defeats the plaintiffs' argument for a submarket consisting only of those hospitals Humana insureds actually used." *Forsyth, 114 F.3d at 1476*. Here, similarly, Apple customers must utilize Mac OS only in Apple-labeled computers because they agreed **[**29]** to do so when they purchased the product. As *Queen City Pizza* explained, ***HN11***[] "[a] court making a relevant market determination looks not to the contractual restraints assumed by a particular plaintiff when determining whether a product is interchangeable, but to the uses to which the product is put by consumers in general." *Queen City Pizza, Inc., 124 F.3d at 438*. In *Queen City Pizza*, therefore, the "plaintiffs' acceptance of a franchise package that included purchase requirements and contractual restrictions is consistent with the existence of a competitive market in which franchises are valued, in part, according to the terms of the proposed franchise agreement and the availability of alternative franchise opportunities." *Id. at 442*.

Psystar also relies on two recent Northern District decisions in other litigation involving Apple. *In re Apple & AT&TM Antitrust Litigation, C. 07-5152 JW, Dkt No. 144, 2008 U.S. Dist. LEXIS 88923 (N.D. Cal. 2008)* (Ware, J.) (slip op.); *Slattery v. Apple Computer, Inc., 2005 U.S. Dist. LEXIS 32423, 2005 WL 2204981 (N.D. Cal. 2005)* (Ware, J.) (unpublished). The former explained that Apple sold the iPhone, a handheld device that acts as a cellular telephone, among other functions. AT&T Mobility provided cellular voice **[**30]** and data services over its cellular network. *In re Apple & AT&TM Antitrust Litigation* concerned a challenge to an agreement that made AT&T Mobile the exclusive cellular service provider for the iPhone for five years, through 2012. As with other cellular service providers, customers who purchased an iPhone were required to sign a two-year service agreement with AT&TM. The plaintiffs alleged, *inter alia*, that due to the five-year exclusivity agreement (which was neither public nor disclosed to customers, although parts of it had been revealed publicly), customers were effectively "locked in" to AT&TM and would be forced to renew with AT&TM beyond the agreed-upon two year contract. *In re Apple & AT&TM Antitrust Litigation, C. 07-5152, 2008 U.S. Dist. LEXIS 88923 at *3-4, *8*. The plaintiffs alleged "an aftermarket for iPhone voice and data services that 'would not exist' without the primary market for iPhones, and is thus 'wholly derivative from and dependent on the primary market.'" *2008 U.S. Dist. LEXIS 88923 at *27*. The decision concluded,

> [e]ven though Apple rightly contends that Plaintiffs entered into two-year [AT&TM] service contracts at the time of purchase, Plaintiffs allege that the aftermarket includes the full five-year period during **[**31]** which they are bound to use AT&TM voice and data services, including the three years after the initial contract expiration, which is enforced by both technological and contractual means . . . . Plaintiffs are alleging that at the point of purchase and initiation of service, Defendants involuntarily impose on consumers a contract exclusivity restriction . . . for at least five years.

Id. at 15. The decision found that the undisclosed exclusivity agreement allowed the plaintiffs to plead a viable aftermarket. The decision is inapposite because Psystar does not allege any undisclosed exclusivity agreement; like the initial two-year service contract in *In re Apple & AT&TM Antitrust Litigation*, the aftermarket restriction in this case was fully disclosed and expressly agreed upon.

[*1203] Psystar also relies on *Slattery v. Apple Computer, Inc., 2005 U.S. Dist. LEXIS 32423, 2005 WL 2204981 (N.D. Cal. 2005)* (Ware, J.) (unpublished). That decision was prior to *Newcal*, and it did not discuss the critical distinctions between *Newcal*, on the one hand, and decisions like *Queen City Pizza* and *Forsyth*, on **[**32]** the other, such as whether the market power in the alleged relevant market arose solely by contract or the functional equivalent thereof.

Finally, Psystar relies on *United States v. Microsoft Corp., 346 U.S. App. D.C. 330, 253 F.3d 34 (C.A.D.C. 2001)*. In *Microsoft*, the District Court had defined a relevant market consisting of 'the licensing of all Intel-compatible PC operating systems worldwide,' finding that there [were] 'currently no products -- and . . . there [were] not likely to be any in the near future -- that a significant percentage of computer users worldwide could substitute for [these operating systems] without incurring substantial costs.'" *Id. at 52*. The court of appeals affirmed the district court's factual findings. *Ibid*. Psystar argues that those findings aid its cause. Although some of those factual findings arguably support Psystar's claims, [5] others directly contradict it. [6] The district court made those factual findings nearly ten years ago and their continued applicability is far from certain. Moreover, although the decision found that Microsoft had attained a very large market share in the above-described operating system market, it did not limit the relevant market to a single brand **[**33]** or product, as Psystar seeks to do. The decision, similarly, did not address anticompetitive conduct targeted at a submarket or aftermarket defined with reference to a single brand of a product, as Psystar attempts to do. Rather, it addressed Microsoft's effort to utilize its operating system monopoly to gain monopoly power in "the browser market," a market that included Microsoft's Internet Explorer as well as competitors such as Netscape's Navigator. *United States v. Microsoft Corp., 87 F.Supp.2d 30, 45 (D.D.C. 2000)*. This order places no weight on the decision.

For the above-stated reasons, Psystar's claim that Mac OS-compatible **[**34]** computer hardware systems constitute a distinct submarket or aftermarket contravenes the pertinent legal standards, and Apple's motion to dismiss Psystar's federal counterclaims is therefore granted.

2. STATE CLAIMS.

Psystar's fourth claim for relief arises under California's Cartwright Act, *Cal. Bus. & Prof. Code §§ 16700-16760*. ***HN12***[] The Cartwright Act was patterned after *Section 1* of the Sherman Act, and the pleading requirements under the two statutes are similar. *See* *Dimidowich v. Bell & Howell, 803 F.2d 1473, 1476-77 (9th Cir. 1986)*. Moreover, the Cartwright Act "does not address unilateral conduct." *Ibid*. Psystar's complaint fails to allege any concerted action or inter-firm agreement. Psystar asserts that the standards under the Cartwright Act are not necessarily contemporaneous with those under federal antitrust laws, but Psystar points to no relevant distinction between the standards. As stated, Psystar's counterclaim fails to plead relevant antitrust markets, and the **[*1204]** counterclaim alleges only unilateral anticompetitive conduct. The Cartwright Act claim, therefore, must be dismissed.

Psystar's fifth claim for relief arises under California's unfair competition statute, *Cal. Bus. & Prof. Code § 17200*. **[**35]** That ***HN13***[] statute proscribes "any unlawful, unfair or fraudulent business act or practice." *Ibid*. Psystar asserts that *Section 17200* is broader than the federal antitrust laws and proscribes not only violations of those laws but also "conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co., 20 Cal. 4th 163, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (Cal. 1999)*. ***HN14***[] California courts, however, have held that "[i]f the same conduct is alleged to be both an antitrust violation and an 'unfair' business act or practice for the same reason -- because it unreasonably restrains competition and harms consumers -- the determination that the conduct

[5] For example, "[t]he District Court found that consumers would not switch from Windows to Mac OS in response to a substantial price increase because of the costs of acquiring the new hardware needed to run Mac OS (an Apple computer and peripherals) and compatible software applications, as well as because of the effort involved in learning the new system and transferring files to its format." *Id. at 52*.

[6] For example, "[t]he court also found the Apple system less appealing to consumers because it costs considerably more and supports fewer applications." *Ibid*.

is not an unreasonable restraint of trade necessarily implies that the conduct is not 'unfair' toward consumers." *Chavez v. Whirlpool Corp., 93 Cal. App. 4th 363, 375, 113 Cal. Rptr. 2d 175 (2001)*. *See also* RLH Industries, Inc. v. SBC Communications, Inc., 133 Cal. App. 4th 1277, 1286-87, 35 Cal. Rptr. 3d 469 (2005) (similar). Apart from its conclusory allegations regarding the "sweeping **[**36]** nature of *section 17200*" (Opp. at 14), Psystar fails to explain a relevant distinction in the standards. Psystar's *section 17200* claim, therefore, must be dismissed.

Psystar's sixth claim for relief alleges violations of the common law of unfair competition. Psystar, however, fails to explain the pertinent standards for the cause of action or how its counterclaim satisfies them. Psystar cites, for example, *Aydin Corp. v. Loral Corp., 1981 U.S. Dist. LEXIS 17410, 1981 WL 2178 (N.D. Cal. 1981)* (Patel, J.) (unreported). That decision stated,

> [s]uch a common law cause of action does apparently exist in California . . . . This court, however, does not locate any California decisions delineating the elements of such a cause of action, nor does plaintiff direct the court to any . . . . As with Count III, this court is unwilling to find a cause of action where plaintiff fails to demonstrate either the illegality of the contract with Moyes or the bad faith of the state action. Therefore the court finds no tortious unfair competition in this case.

The remaining cases Psystar cites are similarly unenlightening (Opp. at 14-15). Psystar's sixth claim, therefore, is dismissed.

CONCLUSION

For all of the above-stated reasons, Apple's **[**37]** motion to dismiss Psystar's counterclaims is **GRANTED**. Psystar may move for leave to amend within twenty calendar days of the date of entry of this order. Any such motion should be accompanied by a proposed pleading and the motion should explain why the foregoing problems are overcome by the proposed pleading. Plaintiff must plead its best case. Failing such a motion, all inadequately pled claims will be dismissed without further leave to amend.

IT IS SO ORDERED.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

HN1[] **Entitlement as Matter of Law, Genuine Disputes**

N.M. R. Ann. 1-056(C) states that summary judgment is appropriate where there is no genuine issue as to any material fact and the moving party is entitled to a judgment as a matter of law. An issue of fact is "genuine" if the evidence before the court considering a motion for summary judgment would allow a hypothetical fair-minded factfinder to return a verdict favorable to the non-movant on that particular issue of fact. An issue of fact is "material" if the existence (or non-existence) of the fact is of consequence under the substantive rules of law governing the parties' dispute.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

HN2[] **Entitlement as Matter of Law, Genuine Disputes**

N.M. R. Ann. 1-056(C) derives from the corresponding provision of the Federal Rules of Civil Procedure. Although New Mexico courts have continued to assume a general correspondence (except for the specific exception recognized in Bartlett) between federal and New Mexico summary judgment standards subsequent to Matsushita, Anderson, and Celotex, New Mexico appellate decisions have not relaxed the traditional stringent standard that a movant must meet in order to satisfy a New Mexico court that a dispute as to a material fact is not genuine, and unlike their federal counterparts, New Mexico courts continue to view summary judgment with disfavor. Thus, notwithstanding the correspondence between the operative language of Rule 1-056(C) and *Fed. R. Civ. P. 56(c)*, the ethos of New Mexico courts is less favorable to disposing of cases through summary judgment than that of federal courts in the period following Matsushita, Anderson and Celotex. Accordingly, the appellate court recognizes that there may be cases where a New Mexico court will allow a case to go to trial on the same record on which a federal court would grant summary judgment.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

HN3[] **Standards of Review, De Novo Review**

In reviewing a grant of summary judgment, the appellate court steps into the shoes of the district court, reviewing the motion, the supporting papers, and the non-movant's response as if the appellate court were ruling on the motion in the first instance. This standard requires the appellate court to engage in the its own independent review of the record, and the appellate court is not relieved of this responsibility merely because some other court has granted summary judgment, or upheld a grant of summary judgment, applying analogous substantive law to a similar record.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

HN4[] **Standards of Review, De Novo Review**

The principles the appellate court applies in conducting its de novo analysis are well settled. The appellate court views the facts in a light most favorable to the party opposing summary judgment and draw all reasonable inferences in support of a trial on the merits. Judges should not make credibility determinations or weigh circumstantial evidence at the summary judgment stage.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN5[] **Sherman Act, Scope**

Section 1 of the New Mexico Antitrust Act (NMAA) provides as follows: Every contract, agreement, combination or conspiracy in restraint of trade or commerce, any part of which trade or commerce is within this state, is unlawful, N.M. Stat. Ann. § 57-1-1 (1987). As the New Mexico Supreme Court has observed, this language is patterned after Section 1 of the Sherman Antitrust Act. The close relationship between the NMAA and the Sherman Act is reinforced by Section 15 of the NMAA, which directs the appellate court to construe the NMAA in harmony with judicial interpretations of the federal antitrust laws, N.M. Stat. Ann. § 57-1-15 (1979). Accordingly, the appellate court draws upon federal case law interpreting Section 1 of the Sherman Act for substantive rules defining the scope of liability under NMAA Section 1.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN6[] **Sherman Act, Scope**

Section 1 of the Sherman Act provides that every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal, 15 U.S.C.S. § 1. Section 1 of the Sherman Act does not prohibit all unreasonable restraints of trade but only restraints effected by a contract, combination, or conspiracy. The several statutory terms for combined action are usually treated interchangeably. In construing Section 1 of the New Mexico Antitrust Act, the appellate court likewise will treat the several statutory terms, "contract, agreement, combination or conspiracy," as interchangeable.

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

HN7[] **Jury Trials, Province of Court & Jury**

A plaintiff cannot make his case just by asking the jury to disbelieve the defendant's witnesses.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN8[] **Scope, Monopolization Offenses**

It is well established that antitrust conspiracies, like other conspiracies, may be proved circumstantially: Because direct proof of an illegal agreement is rarely available, an antitrust conspiracy may be proved through the use of circumstantial evidence alone.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN9[] **Scope, Monopolization Offenses**

Inferring an antitrust conspiracy from circumstantial evidence is complicated by a judge-made antitrust doctrine variously known as conscious parallelism or tacit collusion. Since early in the nineteenth century economists have argued that firms in concentrated markets can increase their prices above the competitive level without expressly communicating with one another, and certainly without the need for anything resembling a conspiracy or agreement among the parties. Courts and commentators have debated for decades whether parallel price changes by oligopolists who recognize their interdependence provide a sufficient basis for a court to infer an unlawful horizontal agreement under Sherman Act *§ 1*, *15 U.S.C.S. § 1*, and if not what additional circumstantial evidence is required to prove a conspiracy.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

***HN10*[]** **Scope, Monopolization Offenses**

Tacit collusion, sometimes called oligopolistic price coordination or conscious parallelism, describes the process, not in itself unlawful, by which firms in a concentrated market might in effect share monopoly power, setting their prices at a profit-maximizing, supracompetitive level by recognizing their shared economic interests and their interdependence with respect to price and output decisions.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

***HN11*[]** **Scope, Monopolization Offenses**

The courts are nearly unanimous is saying that mere interdependent parallelism does not establish the contract, combination, or conspiracy required by Sherman Act *§ 1*, *15 U.S.C.S. § 1*. Following the lead of federal courts as required by New Mexico Antitrust Act (NMAA), *N.M. Stat. Ann. § 57-1-15* (1979), the appellate court likewise holds that behavior of market participants characterizable as mere conscious parallelism does not satisfy the conspiracy element requirement of NMAA *Section 1*, *N.M. Stat. Ann. § 57-1-1* (1987).

Antitrust & Trade Law > Sherman Act > Claims

***HN12*[]** **Sherman Act, Claims**

Under federal ***antitrust law***, a court may not allow a Sherman Act *Section 1*, *15 U.S.C.S. § 1*, case to go to trial unless the court is persuaded that the evidence, viewed in the light most favorable to the plaintiff, would allow a reasonable factfinder to rule out legitimate conscious parallelism as the most likely explanation for the parallelism proved by the plaintiff: To survive a motion for summary judgment a plaintiff seeking damages for a violation of *§ 1* of the Sherman Act must present evidence that tends to exclude the possibility that the alleged conspirators acted independently.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

***HN13*[]** **Scope, Monopolization Offenses**

Federal courts typically characterize the evidence required by Matsushita as "plus factors." Unfortunately, the federal plus factor approach has proven to be more a complication than an analytical tool: First, federal courts rarely attempt to rank plus factors according to their probative value or to specify the minimum critical mass of plus factors that must be established to sustain an inference that the observed market behavior resulted from concerted conduct rather than from consciously parallel choices. Nor have courts generally devoted extensive effort to evaluating the likely competitive effect of each plus factor. This condition makes judgments about the disposition of future cases unpredictable and imparts an impressionistic quality to judicial decision making in agreement-related disputes.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN14[] **Sherman Act, Claims**

The variation in judicial analysis of plus factors suggests that the outcome in many cases depends upon the court's unarticulated intuition about the likely cause of observed parallel behavior. Judges appear to vary in their acceptance of the proposition that conscious parallelism does not necessarily bespeak concerted behavior. Judges who regard pricing uniformity as a sign of collaboration and market failure will give lip service to the principle that conscious parallelism does not bespeak concerted behavior but will expand the range and reduce the quantum of conduct that, when added to parallel behavior, can support a finding of agreement. Thus, some decisions go to great lengths to characterize proof as hinting of collective activity. On the other hand, judges who see parallelism as a desirable, natural manifestation of rivalry implicitly will hold the plaintiff to more rigorous standards of proof. Where these judges control the panel or court in question, their decisions are likely to display a greater reluctance to give effect to asserted plus factors and a greater willingness to entertain the defendants' explanations about why such plus factors implicate conduct that is either procompetitive or essentially benign.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN15[] **State Regulation, Claims**

The plus factor approach adds an additional layer of labels without materially advancing the analysis required by Matsushita. Rather than deferring to federal precedent accepting or rejecting a given circumstance as a plus factor, the sounder approach for a New Mexico court is to engage in an independent and rigorous evaluation of the evidence in deciding whether or not the plaintiff's evidence tends to suggest a degree of coordination that exceeds the parallelism that could be accomplished through lawful conscious parallelism.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN16[] **State Regulation, Claims**

Federal courts, drawing on economic theory, assume that some background level of supracompetitive parallelism in prices is inherent in an oligopoly such as the tobacco industry even in the absence of express coordination of prices. The non-existence of conscious parallelism is not a separate element of the plaintiff's case; rather, the doctrine of conscious parallelism merely supports an alternative, exculpatory inference that may be drawn from the parallelism proved by the plaintiff: i.e., the parallelism proved by the plaintiff is nothing more than the parallelism resulting from lawful conscious parallelism. If the plaintiff comes forward with evidence that would allow a reasonable factfinder to exclude lawful conscious parallelism as the most likely explanation for the parallelism proved by the plaintiff, then the plaintiff has made out a prima facie case that would defeat summary judgment. At trial, then, the burden of negating the exculpatory inference of lawful conscious parallelism simply merges into the plaintiff's ultimate burden of convincing the factfinder that the parallelism proved by the plaintiff was more likely than not the result of a conspiracy.

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

HN17[] Summary Judgment, Evidentiary Considerations

A party objecting to trial court's consideration of evidence in ruling on motion for summary judgment bears the burden of moving to exclude such evidence; in the absence of an objection, the trial court may consider such evidence in ruling on a summary judgment motion.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN18[] Scope, Monopolization Offenses

When the Supreme Court in Matsushita referred to the costs of "mistaken inferences" that chill the very conduct the antitrust laws are designed to protect, it was speaking in the specific context of allegations of predatory pricing, which requires the factfinder to find an anticompetitive conspiracy in the face of evidence that the defendants set prices below a competitive level. A mistaken inference of conspiracy in such a case punishes the defendants for engaging in cut-to-the-bone competition--truly the very type of behavior that antitrust laws are designed to protect. Supracompetitive pricing--is conduct that at best is tolerated by ***antitrust law***. While predatory pricing threats like the one in Matsushita always risk chilling procompetitive behavior, no comparable policy reasons justify reluctance about going after a naked price fixing conspiracy.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN19[] Scope, Monopolization Offenses

Matsushita spoke in the context of an alleged highly implausible decades-long predatory pricing conspiracy and found a severe proof requirement in such cases. Where a claim is plausible and does not implicate facially procompetitive behavior, more liberal inferences from the evidence should be permitted than in Matsushita because the attendant dangers from drawing inferences recognized in Matsushita are not present. In a case in which conspiracy is deemed quite plausible, perhaps by virtue of the industry's structure and past attempts at collusion, then a broader range of inferences can be drawn from ambiguous evidence.

Opinion by: A. JOSEPH ALARID

Opinion

[*660] [*875] ALARID, Judge.**

[1]** This is an appeal from the district court's grant of summary judgment in favor of Defendants on Plaintiffs' claim that Defendants engaged in an unlawful conspiracy to fix the prices of cigarettes sold in New Mexico. We affirm the summary judgment in favor of Defendants Liggett and Lorillard; we reverse the summary judgment in favor of Defendants Philip Morris, Brown & Williamson, and R.J. Reynolds.

BACKGROUND

[2]** Plaintiffs-Appellants are a statewide class of retail customers who purchased cigarettes manufactured by Defendants during an approximately seven-year period commencing in 1993. Defendants-Appellees are five leading domestic manufacturers of cigarettes: Philip Morris, Incorporated (Philip Morris), R.J. Reynolds Tobacco Company (R.J. Reynolds), Brown & Williamson Tobacco Corporation (Brown & Williamson), Lorillard Tobacco Company (Lorillard), and Liggett Group, Incorporated (Liggett).

[3]** The American tobacco industry **[****3]** is a textbook example of an oligopoly: an industry in which production is concentrated in a handful of manufacturers. *See generally* *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 213-15, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)*; Walter Adams & James W. Brock, *Tobacco: Predation and Persistent Market Power,* in *Market Dominance: How Firms Gain, Hold, or Lose It and the Impact on Economic Performance* 39 (David I. Rosenbaum ed. (1998)) (hereinafter *Market Dominance*). "[T]he cigarette industry is one of the most concentrated industries in the United States and has been so throughout the postwar [World War II] period." Walter Adams & James W. Brock, *The Structure of American Industry* 52 (11th ed. 2005) (hereinafter *Structure of American Industry*).

[4] [***876] [*661]** There were two major outbreaks of price competition within the domestic tobacco industry during the 20th century. The first outbreak occurred during the Great Depression of the 1930s, with the introduction of cheaply priced "ten-cent brands." *Market Dominance* at 44. "To contain this outbreak of competition, the oligopoly responded with a lethal price-cost predation squeeze." *Id.* The industry's response was both effective in suppressing the competition from **[****4]** ten-cent brands--and illegal. The United States brought criminal charges against three of the major domestic cigarette manufacturers of the time, charging that the defendants restrained and monopolized the cigarette industry in violation of the Sherman Antitrust Act. *Id.* at 45. The three defendants were convicted by a jury, and the convictions ultimately were upheld by the Supreme Court. *Am. Tobacco Co. v. United States, 328 U.S. 781, 66 S. Ct. 1125, 90 L. Ed. 1575 (1946)*.

[5]** The second major outbreak of price competition occurred in 1980, when Liggett became the first major cigarette manufacturer to promote generic cigarettes. *Liggett Group, Inc. v. Brown & Williamson Tobacco Corp., 748 F. Supp. 344, 349 (M.D. N.C. 1990)*. At one time Liggett had been one of the larger manufacturers of branded cigarettes, [1] enjoying market shares of over 20 percent; however, by 1980, Liggett's market share had declined to slightly over 2 percent, and Liggett was on the verge of going out of business. *Id.* "Out of desperation" Liggett turned to a strategy of promoting generic cigarettes. *Id.* In contrast to branded cigarettes, which have distinctive packaging, are advertised heavily, and are sold at full price, *id. n.8*, Liggett's generic **[****5]** cigarettes were sold in plain packages mimicking the packaging of generic groceries, *id.* n.9. The principal competitive advantage of generic cigarettes was their lower price. *Brooke Group, 509 U.S. at 214*. Liggett's innovation was a success, and by 1984, generic cigarettes accounted for about 4 percent of domestic cigarettes, with Liggett's generic cigarettes accounting for 97 percent of the generic segment. *Liggett Group, 748 F. Supp. at 349*.

[6]** Brown & Williamson, recognizing that it was losing a proportionally greater market share to Liggett than were other manufacturers, decided to wrest leadership of the generic segment from Liggett. *Brooke Group, 509 U.S. at 214-15*. Beginning in late May 1984 and continuing until the end of 1985, Liggett found itself embroiled in a fierce

---

[1] *Am. Tobacco, 328 U.S. at 794-96* (setting out market data demonstrating that that Liggett, along with American Tobacco Company and R.J. Reynolds, were the "Big Three" tobacco manufacturers during the 1930s).

price war in the wholesale cigarette market initiated by Brown & Williamson. Liggett Group, 748 F. Supp. at 349-50 (describing "rebate war" between Liggett and Brown & Williamson). In addition to vigorously **[****6]** competing in the marketplace, Liggett responded by suing Brown & Williamson in federal court, alleging, inter alia, that Brown & Williamson had engaged in unlawful predatory pricing by reducing the prices for its generic cigarettes below its average variable costs in order to pressure Liggett to raise its list prices for generic cigarettes. Brooke Group, 509 U.S. at 217. Liggett claimed that "[t]he resulting reduction in the list price gap . . . would restrain the growth of the economy segment and preserve Brown & Williamson's supracompetitive profits on its branded cigarettes." *Id.*

[7]** After a lengthy trial, a jury found in Liggett's favor and awarded Liggett $ 49.6 million in actual damages, which the trial court trebled, resulting in an award of nearly $ 150 million. Liggett Group, 748 F. Supp. at 348. Brown and Williamson filed various post-trial motions, including a motion for judgment notwithstanding the verdict pursuant to Rule 50(b) of the Federal Rules of Civil Procedure. *Id.* Liggett's case ultimately foundered due to key failures of proof. Liggett's expert had assumed that there was "an alignment of interest" among cigarette manufacturers in protecting the profits generated **[****7]** by premium cigarettes that would lead Brown & Williamson's competitors to join with Brown & Williamson in raising the prices of generic cigarettes so as to narrow the price gap between generic and premium **[***877]** **[*662]** cigarettes (thereby reducing the competitive advantage enjoyed by generic cigarettes and slowing the growth of the generic segment). Id. at 357. The trial court concluded that "[n]o substantial record evidence supports [Liggett's expert's] alignment of interest theory." *Id.* The trial court emphasized evidence establishing that very early in the development of generic cigarettes, R.J. Reynolds had entered and vigorously promoted the generic segment, that both R.J. Reynolds and Liggett had resisted Brown & Williamson's attempt to raise the prices of generic cigarettes, and that, by the time of trial, five of the six major manufacturers were selling some type of generic cigarettes. *Id.*

[8]** The trial court entered judgment in Brown & Williamson's favor. Id. at 366. Liggett appealed. The Court of Appeals affirmed the trial court, Liggett Group, Inc. v. Brown & Williamson Tobacco Corp., 964 F.2d 335 (4th Cir. 1992), and the United States Supreme Court affirmed the Court of Appeals, Brooke Group, 509 U.S. at 242. **[****8]** Overwhelmed by its rivals and denied protection under federal law, Liggett lost and never recovered leadership of the generic segment. *Market Dominance* at 48. During the period that the Liggett-Brown & Williamson predatory-pricing litigation was proceeding in the federal court system, the market share of generic and other discount cigarettes [2] continued to grow. The trend favoring the discount segment cigarettes continued into the next decade, so that by 1993 discount and deep discount cigarettes had captured 40 percent of the United States cigarette market. Williamson Oil Co. v. Philip Morris USA, 346 F.3d 1287, 1292 (11th Cir. 2003). However, rather than growing the overall market for cigarettes, the growth of the discount segment depended upon cannibalizing sales of premium cigarettes. Brooke Group, 509 U.S. at 214. Accordingly, the growth of the discount segment was "extremely undesirable from the perspective of premium-intensive manufacturers like [Philip Morris] and Lorillard." Williamson Oil Co., 346 F.3d at 1292. In an internal document, Philip Morris estimated that each percentage point of market share claimed by the discount segment cost the cigarette industry $ 150 million **[****9]** *per month* in income. The industry faced what Philip Morris later described as a "cycle of despair":

> Ironically, each manufacturer worked independently to create a self-reinforcing "cycle of despair." . . . [M]anufacturers compensated for the income impact of weakening premium volumes and mix by raising premium prices. These funds were reinvested to grow the Discount category to replace the los[t] volume. In essence they were fueling the very situation they were trying to counteract.

[9]** In April 1992, Philip Morris attempted to lead an industry-wide increase in the prices of non-premium cigarettes in an effort to reduce the price advantage that non-premium cigarettes enjoyed over premium brands. Williamson Oil Co., 346 F.3d at 1292. **[****10]** Philip Morris was forced to retract its price increases when R.J. Reynolds, Brown & Williamson, and Lorillard did not follow suit with parallel increases. *Id.* An attempt by Philip

[2] Generic "black and white" cigarettes were supplemented by other varieties of discount cigarettes, including branded discount cigarettes such as R.J. Reynolds's "Doral," and "Value-25s" (a 25-cigarette pack sold at the same price of a conventional 20-cigarette pack). In the late 1980s, Liggett introduced subgeneric (or deep discount) cigarettes priced even lower than discount cigarettes. The industry often refers to discount and deep discount cigarettes as "value for money" or "VFM" products.

Morris to raise the price of deep discount cigarettes in March 1993 was similarly rebuffed by Philip Morris's rivals. *Id.*

[10]** Having failed to reduce the price gap between discount and premium cigarettes from the bottom up, Philip Morris settled on a dramatic alternative: reducing the price gap from the top down by cutting the retail price of its Marlboro premium brand--the best selling brand of cigarettes in the United States--by 40 cents per pack. *Id.* April 2, 1993, the day Philip Morris announced its price cut, came to be known as "Marlboro Friday." *Id.* Soon after, Brown & Williamson, R.J. Reynolds, and Lorillard matched Philip Morris's price reductions. *Id.* "[O]n July 20, 1993, [Philip Morris] announced that **[***878]** **[*663]** its Marlboro Friday price reduction would be made permanent and [would be] expanded to all of [Philip Morris's] premium brands, e.g., Parliament and Virginia Slims. *Williamson Oil Co., 346 F.3d at 1293*. Philip Morris also "lowered the wholesale price of its discount cigarettes and raised the wholesale **[****11]** price of its deep discount brands by 10 cents per pack," thereby consolidating discount and deep discount cigarettes into a single price tier. *Id.* Philip Morris's rivals promptly followed Philip Morris's lead, consolidating their own discount and deep discount cigarettes into a single price tier. *Id.* Next, R.J. Reynolds announced that it was consolidating regular length and extra long premium cigarettes into a single price tier. *Id.* Philip Morris, Brown & Williamson, and Lorillard "quickly followed suit." *Id.* As a result of these maneuvers, a cigarette market that previously had included ten price tiers had been reduced to two. *Id.*

[11]** On November 8, 1993, R.J. Reynolds announced an increase of 4 cents per pack for both premium and discount cigarettes. By November 22, 1993, Philip Morris, Brown & Williamson, and Lorillard had matched the increases. *Id. at 1294*. These initial in-tandem increases in the prices of premium and discount cigarettes were followed by eleven more in-tandem increases in the prices of discount and premium cigarettes during the class period. *Holiday Wholesale Grocery Co. v. Philip Morris, Inc., 231 F. Supp. 2d 1253, 1264 (N.D. Ga 2002)*. During the class period, **[****12]** the market shares of the premium-intensive manufacturers such as Philip Morris rose significantly; the market shares of R.J. Reynolds and Brown & Williamson, who had focused on developing the discount market segment, declined. *Williamson Oil Co., 346 F.3d at 1295*.

ANALYSIS

Summary Judgment Standards

[12]** ***HN1***[↑] Rule 1-056(C) NMRA, states that summary judgment is appropriate where "there is no genuine issue as to any material fact and . . . the moving party is entitled to a judgment as a matter of law." An issue of fact is "genuine" if the evidence before the court considering a motion for summary judgment would allow a hypothetical fair-minded factfinder to return a verdict favorable to the non-movant on that particular issue of fact. *Goradia v. Hahn Co., 111 N.M. 779, 782, 810 P.2d 798, 801 (1991)*. An issue of fact is "material" if the existence (or non-existence) of the fact is of consequence under the substantive rules of law governing the parties' dispute. *See Farmington Police Officers Ass'n v. City of Farmington, 2006 NMCA 77, P 17, 139 N.M. 750, 137 P.3d 1204* (discussing materiality in the context of a dispute over the interpretation of a collective bargaining agreement).

[13]** In urging **[****13]** us to affirm the district court, Defendants emphasize the fact that Plaintiffs' allegations of an industry-wide price-fixing conspiracy previously were the subject of an unsuccessful lawsuit brought in the United States District Court for the Northern District of Georgia in which the plaintiffs, wholesalers and distributors of cigarettes, sued Philip Morris, Brown & Williamson, R.J. Reynolds, and Lorillard, alleging that the defendants had engaged in price fixing in violation of the Sherman Antitrust Act. In that case, the trial court granted summary judgment in the defendants' favor on the plaintiffs' federal price-fixing claim, *Holiday Wholesale Grocery Co., 231 F. Supp.2d at 1253*, and the Eleventh Circuit Court of Appeals affirmed, *Williamson Oil Co., 346 F.3d at 1291*. Defendants point out that we have previously observed that "federal and our own state's constructions of summary judgment do not differ substantively." *Wolford v. Lasater, 1999 NMCA 24, P 11, 126 N.M. 614, 973 P.2d 866*. Without formally invoking res judicata, Defendants invite us to rely on the reasoning of the Eleventh Circuit Court of Appeals. Plaintiffs, citing *Bartlett v. Mirabal, 2000 NMCA 36, 128 N.M. 830, 999 P.2d 1062*, **[****14]** argue that federal courts apply a less rigorous standard in granting summary judgment than do New Mexico courts and argue that the district court erred by following the reasoning of the Eleventh Circuit Court of Appeals, which necessarily incorporated a less rigorous federal summary judgment standard.

[14]** "Prior to 1986, the [United States] Supreme Court sent mixed messages about the availability of the [summary judgment] **[***879]** **[*664]** motion. Consequently, most commentators viewed [federal] courts during the 1938-1986 period as excessively reluctant to grant summary judgment." 11 James Wm. Moore, *Moore's Federal Practice* P 56.03[1] (3d ed. 2007). There appears to be general agreement that within the federal court system the now well-known trio of Supreme Court summary judgment opinions, *Matsushita Elect. Industrial Co. v. Zenith Radio Corp., 475 U.S. 574, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*, *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*, and *Celotex Corp. v. Catrett, 477 U.S. 317, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*, "substantially increased the availability of summary judgment and encouraged greater use of the motion by trial courts. In addition to establishing doctrine favoring greater use of summary judgment, each case gave strong rhetorical support **[****15]** to summary judgment as a means of case management and resolution." Moore et al., *supra,* P 56.03[1]; *see also* 10A Charles Alan Wright et al., *Federal Practice & Procedure* § 2727 at 467-68 (1998).

[15]** ***HN2***[] Rule 1-056(C) derives from the corresponding provision of the Federal Rules of Civil Procedure. NMSA 1953, § 21-1-1(56)(c), Compiler's Note (1954). Several reported New Mexico appellate decisions have cited *Anderson or Celotex. McElhannon v. Ford, 2003 NMCA 91, P 7, 134 N.M. 124, 73 P.3d 827* (applying Celotex in determining the sufficiency of the movant's prima facie showing in support of motion for summary judgment); *Bartlett, 2000 NMCA 36, PP 41-45, 128 N.M. 830, 999 P.2d 1062* (Alarid, J., specially concurring) (collecting cases). Our Supreme Court relied on *Matsushita* in upholding a grant of summary judgment in favor of an anti-trust defendant. *Clough v. Adventist Health Sys., Inc., 108 N.M. 801, 804, 780 P.2d 627, 630 (1989)* (citing and quoting *Matsushita* for the proposition that "if [the alleged conspirators] had no rational economic motive to conspire, and if their conduct is consistent with other, equally plausible explanations, the conduct does not give rise to an inference of conspiracy" (internal quotation **[****16]** marks omitted)). However, nothing in *Clough* suggests that the Supreme Court believed that it was departing from New Mexico's traditional summary judgment standards. We at one time expressed the opinion that "federal and our own state's constructions of summary judgment do not differ substantively," *Wolford, 1999 NMCA 24, P 11, 126 N.M. 614, 973 P.2d 866*, but we subsequently undermined that generalization in *Bartlett* by expressly rejecting *Anderson's* principal holding that a court in ruling on a defendant's motion for summary judgment must take into account the heightened burden of proof the plaintiff non-movant must satisfy at trial. *Bartlett, 2000 NMCA 36, P 39, 128 N.M. 830, 999 P.2d 1062*. Although New Mexico courts have continued to assume a general correspondence (except for the specific exception recognized in *Bartlett*) between federal and New Mexico summary judgment standards subsequent to *Matsushita, Anderson,* and *Celotex,* New Mexico appellate decisions have not relaxed the traditional stringent standard that a movant must meet in order to satisfy a New Mexico court that a dispute as to a material fact is not genuine, *e.g. Ocana v. American Furniture Co., 2004 NMSC 18, P 22, 135 N.M. 539, 91 P.3d 58*, and unlike their federal counterparts, **[****17]** New Mexico courts continue to view summary judgment with disfavor, *compare Handmaker v. Henney, 1999 NMSC 43, P 21, 128 N.M. 328, 992 P.2d 879* (noting "the policy in New Mexico disfavoring summary judgment"), *with Armstrong v. City of Dallas, 997 F.2d 62, 66 (5th Cir. 1993)* (observing that "[t]he once frequently repeated characterization of summary judgment as a disfavored procedural shortcut no longer appertains" (footnote omitted)). Thus, notwithstanding the correspondence between the operative language of Rule 1-056(C) and *Federal Rule 56(c)*, the ethos of New Mexico courts is less favorable to disposing of cases through summary judgment than that of federal courts in the period following *Matsushita, Anderson* and *Celotex.* Accordingly, we recognize that there may be cases where a New Mexico court will allow a case to go to trial on the same record on **[***880]** **[*665]** which a federal court would grant summary judgment.

[16]** ***HN3***[] In reviewing a grant of summary judgment, "we step into the shoes of the district court, reviewing the motion, the supporting papers, and the non-movant's response as if we were ruling on the motion in the first instance." *Farmington Police Officers Ass'n, 2006 NMCA 77, P 13, 139 N.M. 750, 137 P.3d 1204*. This **[****18]** standard requires us to engage in our own independent review of the record, and we are not relieved of this responsibility merely because some other court has granted summary judgment, or upheld a grant of summary judgment, applying analogous substantive law to a similar record. Therefore, although we have read with considerable interest the decisions of the federal courts in *Holiday Wholesale Grocery Co.* and *Williamson Oil Co.,* our decision in this case represents this Court's de novo analysis of the record in this case.

[17]** ***HN4***[] The principles we apply in conducting our de novo analysis are well settled. "We view the facts in a light most favorable to the party opposing summary judgment and draw all reasonable inferences in support of a trial on the merits." *Ocana, 2004 NMSC 18, P 12, 135 N.M. 539, 91 P.3d 58* (quoting *Rummel v. Lexington Ins. Co., 1997 NMSC 41, P 18, 123 N.M. 752, 945 P.2d 970*) (internal quotation marks and brackets omitted). "Judges should not make credibility determinations or weigh circumstantial evidence at the summary judgment stage." *Juneau v. Intel Corp., 2006 NMSC 2, P 23, 139 N.M. 12, 127 P.3d 548*.

Applicable Principles of *Antitrust Law*

[18]** ***HN5***[] *Section 1 of the New Mexico Antitrust Act (NMAA)* **[****19]** provides as follows:

> Every contract, agreement, combination or conspiracy in restraint of trade or commerce, any part of which trade or commerce is within this state, is unlawful.

NMSA 1978, § 57-1-1 (1987). As our Supreme Court has observed, this language is patterned after *Section 1* of the Sherman Antitrust Act. *Smith Machinery Corp. v. Hesston, Inc., 102 N.M 245, 249, 694 P.2d 501, 505 (1985)*. The close relationship between the NMAA and the Sherman Act is reinforced by *Section 15 of the NMAA*, which directs us to construe the NMAA "in harmony with judicial interpretations of the federal antitrust laws." *NMSA 1978, § 57-1-15* (1979). Accordingly, we draw upon federal case law interpreting *Section 1* of the Sherman Act for substantive rules defining the scope of liability under *NMAA Section 1*.

[19]** ***HN6***[] *Section 1* of the Sherman Act provides that "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." *15 U.S.C. § 1 (2000)*. "*[Section] 1* of the Sherman Act does not prohibit [all] unreasonable restraints of trade . . . *but only restraints effected by a contract,* ***[****20]*** *combination, or conspiracy.*" *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, ___, 127 S. Ct. 1955, 1964, 167 L. Ed. 2d 929 (2007)* (alteration in original; internal quotation marks and citation omitted; emphasis added)). As a leading authority on federal ***antitrust law*** has observed, "[t]he several statutory terms for combined action are usually treated interchangeably." VI Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law****: An Analysis of Antitrust Principles and Their Application,* P1400 at 1 (2d ed. 2003). In construing *Section 1 of the NMAA*, we likewise will treat the several statutory terms, "contract, agreement, combination or conspiracy," as interchangeable; and, for the sake of convenience, we will use the term "conspiracy" to encapsulate the concerted action among Defendants required to establish liability under *Section 1* of the Sherman Act and *Section 1 of the NMAA*.

[20]** Defendants argue that they are entitled to summary judgment because Plaintiffs' evidence does not create a genuine issue of fact as to the material element of a conspiracy to fix prices. Each Defendant's CEO denied having any knowledge of any conspiracy, combination, or agreement among Defendants to fix prices. Although a jury would **[****21]** be free to disbelieve the denials of Defendants' officers,***HN7***[] "[a] plaintiff cannot make his case just by asking the jury to disbelieve the defendant's witnesses." *In re High Fructose Corn Syrup Antitrust Litigation, 295 F.3d 651, 655* ***[*666]*** *(7th Cir. 2002)* ***[***881]***. Plaintiffs have not directed our attention to any direct evidence of a conspiracy such as testimony by a witness who was present when representatives of Defendants discussed setting prices. *Cf. City of Tuscaloosa v. Harcros Chemicals, Inc., 158 F.3d 548, 557-59, 568 (11th Cir. 1998)* (holding inculpatory statements by an officer of alleged conspirator admissible against his employer-principal; observing that the trier of fact could find in favor of the plaintiffs and against the employer based on the admissions of the officer alone).

[21]** The absence of eyewitness testimony or smoking-gun documents does not mean that Plaintiffs' case necessarily fails. Modern-day antitrust plaintiffs often find direct evidence of a conspiracy hard to come by:

> Judicial decisions that established the Sherman Act's application to written and spoken price-fixing arrangements altered firm behavior . . . . *[S]ection 1* drove many cartels underground by forcing participants **[****22]** to take precautions to avoid detection and curtail the generation of evidence of direct communications that might be used to establish the common course of action. The Sherman Act gave firms an incentive to avoid formal contracts or other written instruments in favor of spoken assurances in secret meetings or covert conversations involving industry members. Thus, for prospective cartel participants, the Sherman Act placed a premium on avoiding the generation of evidence (such as written records) from which a factfinder readily could determine that an agreement existed.

William E. Kovacic, *The Identification and Proof of Horizontal Agreements Under the Antitrust Laws,* 38 Antitrust Bull. 5, 17 (1993). ***HN8***[] It is well established that antitrust conspiracies, like other conspiracies, may be proved circumstantially: "Because direct proof of an illegal agreement is rarely available, an antitrust conspiracy may be proved through the use of circumstantial evidence alone." *Bldg. Indus. Fund v. Local Union No. 3., Int'l Bhd. of Elec. Workers, 992 F. Supp. 162, 181 (E.D. N.Y. 1996), aff'd on other grounds by, 141 F.3d 1151 (2d Cir. 1998)* (unpublished opinion). Plaintiffs may establish their claim by **[****23]** presenting circumstantial evidence from which a reasonable factfinder could infer the existence of a conspiracy to fix prices notwithstanding Defendants' denials and the absence of direct evidence of a conspiracy. *In re High Fructose Corn Syrup, 295 F.3d at 654-55*.

[22]** ***HN9***[] Inferring an antitrust conspiracy from circumstantial evidence is complicated by a judge-made antitrust doctrine variously known as "conscious parallelism" or "tacit collusion." *Brooke Group, 509 U.S. at 227*. "Since early in the nineteenth century economists have argued that firms in concentrated markets can increase their prices above the competitive level without expressly communicating with one another, and certainly without the need for anything resembling a 'conspiracy' or agreement among the parties." Herbert Hovenkamp, *Federal Antitrust Policy: The Law of Competition and Its Practice* § 4.2 at 157 (2d ed. 1999). "[C]ourts and commentators have debated for decades whether parallel price changes by oligopolists who recognize their interdependence provide a sufficient basis for a court to infer an unlawful horizontal agreement under *Sherman Act § 1*, and if not what additional circumstantial evidence is required to **[****24]** prove a conspiracy." Johnathan B. Baker, *Two Sherman Act Section 1 Dilemmas: Parallel Pricing, the Oligopoly Problem, and Contemporary Economic Theory,* 38 Antitrust Bull. 143, 144 (1993). In a highly influential law review article, Professor Donald F. Turner [3] maintained that

> oligopolists who take into account the probable reactions of competitors in setting their basic prices, without more in the way of 'agreement' than is found in 'conscious parallelism,' should not be held unlawful conspirators under the Sherman **[***882]** **[*667]** Act, even though, as in *American Tobacco [Co. v. United States, 328 U.S. 781, 66 S. Ct. 1125, 90 L. Ed. 1575 (1946)]*, they refrain from competing in price.

Donald F. Turner, *The Definition of Agreement Under the Sherman Act: Conscious Parallelism and Refusals to Deal,* 75 Harv. L. Rev. 655, 671 (1962). Turner's influence is reflected in statements such as the following:

> ***HN10***[] Tacit collusion, sometimes called oligopolistic price coordination or conscious parallelism, describes the process, not in itself unlawful, by which firms in a concentrated market might in effect share monopoly power, setting their prices at a profit-maximizing, supracompetitive level by recognizing their shared economic interests and their **[****25]** interdependence with respect to price and output decisions.

Brooke Group, 509 U.S. at 227. "Since *Matsushita,* the courts have essentially settled on Turner's approach. . . ." William H. Page, *Communication and Concerted Action, 38 Loy. U. Chi. L.J. 405, 413 (2007)*. ***HN11***[] "The courts are nearly unanimous is saying that mere interdependent parallelism does not establish the contract, combination, or conspiracy required by *Sherman Act § 1*." VI Areeda & Hovenkamp, *supra,* P 1433a at 236. Following the lead of

---

[3] "Turner, who had a Ph.D. in economics from Harvard as well as a law degree from Yale, taught for many years at Harvard Law School and was head of the Justice Department's antitrust division for several years during the 1960s. He was the nation's foremost antitrust scholar from the mid-1950s to the late 1970s and one of the first to make economic analysis the lodestar of his approach to ***antitrust law***." Richard A. Posner, ***Antitrust Law*** 55 n.4 (2d. ed. 2001).

federal courts as required by *NMAA Section 15*, we likewise hold that behavior of market participants characterizable as mere conscious parallelism does not satisfy the conspiracy element requirement of *NMAA Section 1*.

[23]** The current general **[****26]** acceptance by federal courts of the doctrine of conscious parallelism as a substantive principle of ***antitrust law*** has important procedural consequences in a case in which the defendants are oligopolists. Such cases present a risk that the factfinder--typically a jury composed of laypersons unfamiliar with prevailing economic theory and antitrust doctrine--may erroneously attribute the presence of supracompetitive parallelism to a conspiracy, when in fact the parallelism proved by the plaintiff is merely the parallelism inherent in the structure of an oligopoly. Imposing antitrust liability in such circumstances would violate substantive ***antitrust law*** creating a safe harbor for conscious parallelism. ***HN12***[] Under federal ***antitrust law***, a court may not allow a *Sherman Act Section 1* case to go to trial unless the court is persuaded that the evidence, viewed in the light most favorable to the plaintiff, would allow a reasonable factfinder to rule out legitimate conscious parallelism as the most likely explanation for the parallelism proved by the plaintiff: "To survive a motion for summary judgment . . . a plaintiff seeking damages for a violation of *§ 1 [of the Sherman Act]* must present evidence **[****27]** 'that tends to exclude the possibility' that the alleged conspirators acted independently." *Matsushita, 475 U.S. at 588* (quoting *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 764, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984))*.

[24]** ***HN13***[] Federal courts typically characterize the evidence required by *Matsushita* as "plus factors." VI Areeda & Hovenkamp, *supra,* P 1434 at 241. Unfortunately, the federal plus factor approach has proven to be more a complication than an analytical tool:

> First, [federal] courts rarely attempt to rank plus factors according to their probative value or to specify the minimum critical mass of plus factors that must be established to sustain an inference that the observed market behavior resulted from concerted conduct rather than from "consciously parallel" choices. Nor have courts generally devoted extensive effort to evaluating the likely competitive effect of each plus factor. This condition makes judgments about the disposition of future cases unpredictable and imparts an impressionistic quality to judicial decision making in agreement-related disputes. . . .
>
> Second, ***HN14***[] the variation in judicial analysis of plus factors suggests that the outcome in many cases depends upon the court's unarticulated **[****28]** intuition about the likely cause of observed parallel behavior. Judges appear to vary in their acceptance of the proposition . . . that conscious parallelism does not necessarily bespeak concerted behavior. Judges who regard pricing uniformity as a sign of collaboration and market failure will give lip service to [the principle that conscious parallelism does not bespeak concerted behavior] but will expand the range and reduce the **[***883]** **[*668]** quantum of conduct that, when added to parallel behavior, can support a finding of agreement. Thus, some decisions go to great lengths to characterize proof as hinting of collective activity.
>
> On the other hand, judges who see parallelism as a desirable, natural manifestation of rivalry implicitly will hold the plaintiff to more rigorous standards of proof. Where these judges control the panel or court in question, their decisions are likely to display a greater reluctance to give effect to asserted plus factors and a greater willingness to entertain [the] defendants' explanations about why such plus factors implicate conduct that is either procompetitive or essentially benign.

Kovcic, *supra,* at 35-37 (footnotes omitted). In our view,***HN15***[] the plus factor approach **[****29]** adds an additional layer of labels without materially advancing the analysis required by *Matsushita.* Rather than deferring to federal precedent accepting or rejecting a given circumstance as a plus factor, we think the sounder approach for a New Mexico court is to engage in an independent and rigorous evaluation of the evidence in deciding whether or not the plaintiff's evidence tends to suggest a degree of coordination that exceeds the parallelism that could be accomplished through lawful conscious parallelism. *See, e.g.,* VI Areeda & Hovenkamp, *supra,* P 1434c at 243-244 (critically examining commonly-cited plus factors of "conspiratorial motivation" and "acts against self-interest").

[25]** We summarize our understanding of conscious parallelism as follows: ***HN16***[] federal courts, drawing on economic theory, assume that some background level of supracompetitive parallelism in prices is inherent in an oligopoly such as the tobacco industry even in the absence of express coordination of prices. The non-existence of conscious parallelism is not a separate element of the plaintiff's case; rather, the doctrine of conscious parallelism merely supports an alternative, exculpatory inference that may **[****30]** be drawn from the parallelism proved by the plaintiff: i.e., the parallelism proved by the plaintiff is nothing more than the parallelism resulting from lawful conscious parallelism. If the plaintiff comes forward with evidence that would allow a reasonable factfinder to exclude lawful conscious parallelism as the most likely explanation for the parallelism proved by the plaintiff, then the plaintiff has made out a prima facie case that would defeat summary judgment. At trial, then, the burden of negating the exculpatory inference of lawful conscious parallelism simply merges into the plaintiff's ultimate burden of convincing the factfinder that the parallelism proved by the plaintiff was more likely than not the result of a conspiracy.

[26]** We set out below Plaintiffs' theory of their case as stated in their brief in opposition to summary judgment filed in the district court:

> [I]t is important to keep in mind that [P]laintiffs have not alleged a textbook functioning collusion that eliminated all competition in the market, and they have not alleged a simple market sharing or price fixing cartel. Rather the alleged conspiracy concerns the actions taken by the industry to control the competition **[****31]** that arose in the discount segment of the market in order to extend the "oligopolistic coordination" of the premium segment to the discount segments. This could only be done on an industry-wide basis and it required a major restructuring in the established ways of pricing product.

[27]** Consistent with our obligation to view the record in the light most favorable to Plaintiffs' theory of their case, we conclude that a factfinder could reason as follows: Marlboro Friday and the industry-wide price reductions that occurred afterward represented the triumph of competition over oligopolistic price coordination. As the result of competitive pressure from the discount segment, the list prices of premium cigarettes substantially declined for the first time in decades. Oligopolistic coordination, which previously had allowed Defendants to increase prices irrespective of the rate of inflation, changes in the costs of production, or shifts in consumer demand, had broken down under the pressure of competition.

[28]** Defendants were desperate to regain the enormous profits previously generated by premium cigarettes sold at the highly supracompetive prices in effect prior to Marlboro **[***884]** **[*669]** Friday. Philip Morris, **[****32]** the instigator of Marlboro Friday, was itself experiencing a staggering reduction in operating income as a consequence of the post-Marlboro Friday depression in the prices of premium cigarettes. However, no Defendant could raise the prices of its premium cigarettes without losing market share unless the remaining Defendants, including Philip Morris, joined in the increase. Philip Morris could not be expected to raise prices of its premium cigarettes unless it could do so without losing further market share to non-premium cigarettes.

[29]** Relying on oligopolistic coordination to restore market stability and supracompetive profits would have required Defendants to accept an indeterminate period of depressed profits. Moreover, because Defendants had divergent interests and because Defendants had limited information about each other's intentions, it would not have been clear to Defendants that lawful oligopolistic coordination would promptly lead to a global solution acceptable to the major manufacturers. Marlboro Friday was itself a demonstration of how badly the oligopolistic coordination that had characterized the industry prior to the introduction of generics had failed in containing **[****33]** the generic segment. Defendants began exchanging signals, possibly supplemented by clandestine communications, knowing and intending that these signals and communications would shape the market, resulting in conditions that would allow prices to immediately begin rising back to pre-Marlboro Friday levels: Philip Morris would relax its stranglehold on the prices of premium cigarettes and allow prices to gradually return to pre-Marlboro Friday supracompetitive levels; and, in return, each of the remaining Defendants--most crucially Brown & Williamson and R.J. Reynolds--would significantly reduce the competition from generic cigarettes, which would reverse the cannibalization of the premium cigarette segment. Defendants settled upon the following method to carry out their anticompetitive scheme: each increase in the prices of premium cigarettes would be matched by a corresponding increase in the prices of discount cigarettes; increases would be spread out over several years to minimize consumer resistance; [4] as prices of discount and premium cigarettes serially rose in tandem, discount cigarettes' sole competitive advantage--proportionally lower prices--gradually would be reduced; [5] and **[****34]** as discount cigarettes gradually lost their competitive advantage, the cannibalization of the premium segment would be reversed.

[30]** The terms of this hypothetical agreement were not necessarily the product of free assent and did not **[****35]** necessarily impose equal burdens on the conspirators. Philip Morris, as the largest and economically most powerful manufacturer, insisted on terms that favored manufacturers with a large presence in the premium segment, such as Philip Morris itself, who would regain market share primarily at the expense of manufacturers heavily invested in the discount segment. Even so, this hypothetical agreement would not have been a lose-lose proposition from the standpoint of any conspirator. First, a conspiracy allowed immediate relief from the depression in the prices of premium cigarettes. Second, because a conspiracy would result in higher prices for discount cigarettes, not just premium cigarettes, losses in the discount market segment would be offset by higher profits per pack on both discount and premium cigarettes. [6] The alleged conspiracy **[***885]** **[*670]** was in place by November 1993, when the first in-tandem increase in the prices of premium and discount cigarettes occurred.

[31]** **[****36]** Bearing in mind our obligation to view the evidence in the light most favorable to the non-movant and to allow the non-movant the benefit of any reasonable inferences supported by the evidence, we conclude that Plaintiffs' theory of their case is economically plausible. It accounts for the in-tandem increases in the prices of generic and premium cigarettes beginning in November 1993, as well as the shifts in market share that occurred as the competitive advantage enjoyed by discount cigarettes eroded over time. It explains why those Defendants who were heavily invested in the discount market segment acted against their apparent interest in agreeing to a scheme that reduced their respective market shares. Further, it does not depend on a showing that there was no competition at all within the cigarette industry. [7]

[32]** We next consider whether Plaintiffs have come forward with evidence that would permit a reasonable factfinder to rule out conscious parallelism as the most likely explanation for the parallelism **[****37]** exhibited by the tobacco industry subsequent to Marlboro Friday. As previously noted, the judicial doctrine of conscious parallelism is grounded in economic theory about the functioning of concentrated markets. Testimony by a qualified economics expert that the character or degree of parallelism actually exhibited by prices exceeds the parallelism that economic theory predicts would result from independent competitive behavior is precisely the type of evidence that tends to exclude the possibility that the defendants acted independently; and in our view, it constitutes an extremely forceful "plus factor" because, as evidence derived from economics, it directly engages the assumptions on which the judicial doctrine of conscious parallelism depends. In the present case, Plaintiffs' expert, Keith Leffler, Ph.D., stated in his opinion that "[t]he economic evidence indicates that it is highly unlikely that independent competitive behavior explains the price restructuring and price changes for cigarettes during the alleged conspiracy period." Dr. Leffler's opinion is backed up by his detailed analysis of the cigarette industry. Dr. Leffler's opinion testimony, if believed, would permit a **[****38]** reasonable factfinder to exclude lawful parallelism as the most likely

---

[4] Our understanding of Plaintiffs' theory of the case does not necessarily require that each subsequent increase have been expressly coordinated by the conspirators. Once an agreement to raise prices of discount and premium cigarettes in tandem was in place, the decision to implement subsequent increases could be left to traditional price leadership.

[5] Assume, by way of example, that discount cigarettes sell at retail for $ 1.00 per pack and that premium cigarettes sell for $ 2.00 per pack. At this point, a pack of discount cigarettes has a two to one price advantage over a pack of premiums. Assume that the industry adopts a $ .50 increase in the price of each type of cigarette and that discount cigarettes now sell at retail for $ 1.50 per pack and that premium cigarettes sell for $ 2.50 per pack. The *absolute* price difference between discount and premium cigarettes remains $ 1.00, but the *proportional* price advantage of discount cigarettes has been reduced.

[6] Because the conspiracy contemplated supracompetitive profits from *both* premium and generic cigarettes, pre-Marlboro Friday profits would be realized even before the prices of premium cigarettes reached pre-Marlboro Friday levels.

[7] In other words, the competition that occurred in the course of the conspiracy was among products all of which were priced supracompetitively as a consequence of the conspiracy.

explanation for the parallelism demonstrated by cigarette prices during the class period. We hold that Dr. Leffler's testimony is sufficient to meet Plaintiffs' burden of production under *Matsushita.*

[33]** Furthermore, Dr. Leffler's conclusion is supported by existing Supreme Court precedent. Although the United States Supreme Court appears to have accepted conscious parallelism as a plausible explanation for the simple parallelism in prices demonstrated by premium cigarettes in the post-World War II era prior to the introduction of discount cigarettes, *Brooke Group, 509 U.S. at 213* (implying that the Court did not view lockstep, twice-yearly increases in prices of premium cigarettes in the decades prior to the introduction of generic cigarettes as the product of unlawful price fixing), the Supreme Court clearly was much less willing to accept conscious parallelism as a plausible explanation for more complex, "multi-variable," parallel pricing scenarios, *id. at 239* (observing that "the inherent limitations of tacit collusion suggest that such multi-variable coordination is improbable").

[34]** In *Brooke Group,* Liggett **[****39]** did not allege a conspiracy, as Plaintiffs have done in the present case. Rather, Liggett alleged that Brown & Williamson had "cut prices on generic cigarettes below cost and offered discriminatory volume rebates to wholesalers to force Liggett to raise its own generic cigarette prices and introduce oligopoly pricing in the economy [cigarette] segment" *Id. at 212*. In order to prove its theory, Liggett had to demonstrate that **[***886]** **[*671]** there was a likelihood that the predatory scheme would result in Brown & Williamson's being able to recoup the losses it incurred in implementing the scheme. *Id. at 225*. Liggett theorized that Brown & Williamson sought to recoup by preserving supracompetitive profits on premium cigarettes by way of conscious parallelism. *Id. at 227*. In other words, Brown & Williamson relied on the idea that all cigarette manufacturers would independently decide to follow Brown & Williamson's lead in pricing and that the ultimate result would be preservation of supracompetitive pricing.

[35]** The Supreme Court concluded that such conscious parallelism would have been "unmanageable" in light of the large number of cigarette types and pricing variables that existed in the industry at **[****40]** the time. *Id. at 238-39*.

> The Court expressed great skepticism about [Liggett's] claim of a complex chain of causes and effects under which [Brown & Williamson] would first enter the market with its generic in competition with Liggett at the same list prices but with large rebates, thereby realizing net prices below its costs; Liggett would offer similar rebates, suffer serious losses, and yield to this predation by raising its list prices; *thereafter, all firms producing generics would reach tacit consensus on price; the price gap between branded cigarettes and generics would then decrease, and both would stabilize at oligopoly levels.*

III Areeda & Hovenkamp, *supra,* P 726 at 316 (emphasis added). As *Brooke Group* demonstrates, there are limits to the Supreme Court's willingness to accept conscious parallelism as a plausible explanation for complex types of parallelism. Although conscious parallelism in *Brooke Group* was part of the plaintiff's theory in that case, while it is Defendants' primary defense theory in the present case, the Supreme Court's analysis is equally applicable in both cases: conscious parallelism in a complex, multi-variable industry is "improbable." *509 U.S. at 239*.

[36]** **[****41]** Defendants' theory of the present case seems to us to be easily as complex as the recoupment theory rejected in *Brooke Group.* The lesson we draw from *Brooke Group* is that the exculpatory inference arising from the doctrine of conscious parallelism becomes weaker as the chain of causes and effects it is offered to explain becomes more complex and as the economic interests of the participants in the market diverge. *Id. at 239-40*. Indeed, Defendants' reliance on conscious parallelism to explain the extraordinary parallelism exhibited by the cigarette prices following Marlboro Friday is reminiscent of the "alignment of interest" theory, *Liggett Group, 748 F. Supp. at 357*, unsuccessfully advanced by Liggett in *Liggett Group* and *Brooke Group.*

[37]** Further, we have the benefit of several years of history subsequent to the events recounted in *Brooke Group.* As noted in *Brooke Group,* during the latter half of the 1980s, list prices of generics began to mimic the lockstep, twice-a-year price increases of premium cigarettes, *509 U.S. at 218*, a pattern suggesting that the price competition from generic cigarettes had been co-opted by oligopolistic price coordination. However, Liggett once again stepped **[****42]** into the competitive breach, this time introducing "subgeneric"(also called "deep discount") cigarettes, priced even lower than generic cigarettes. *Id. at 236*. Deep discount cigarettes provided an important competitive check on the prices of premium cigarettes. Most notably, a decrease in the wholesale prices of deep discount cigarettes in February to June 1992 was followed by a corresponding decrease in the wholesale prices of discount cigarettes beginning in June 1992. *Structure of American Industry,* Fig. 3-6 at 59. The decrease in the prices of discount cigarettes broke the previously established pattern of in-tandem increases in the prices of discount and premium cigarettes, reopening the price gap between discount and premium cigarettes. *Id.* Competition--this time in the form of deep discount cigarettes--trumped oligopolistic price coordination. Further, when Philip Morris attempted to lead increases in the prices of discount cigarettes in 1992 and 1993, Brown & Williamson and R.J. Reynolds did not follow its lead and Philip Morris was **[***887]** **[*672]** forced to retract each of the increases. *Id.* This evidence reinforces Dr. Leffler's opinion that by itself, lawful oligopolistic coordination was **[****43]** incapable of containing the competition from non-premium cigarettes.

[38]** Although we are not bound by the Eleventh Circuit Court of Appeals' decision, we believe that it will be helpful to the parties, and to the readers of this opinion, if we explain some of the major points of departure between our reasoning and that of the federal courts in *Holiday Wholesale Grocery Co.* and *Williamson Oil Co.*

[39]** First, and most significantly, we have Dr. Leffler's opinion. Dr. Leffler's report was not in the record before the federal courts. We are not inclined to appoint ourselves amateur economists and attempt to second guess Dr. Leffler's reasoning, nor are we inclined to engage in a sua sponte evaluation of the admissibility under *Rule 11-702 NMRA* of Dr. Leffler's opinions. [8] *See* *Chavez v. Ronquillo, 94 N.M. 442, 445, 612 P.2d 234, 237 (Ct. App. 1980)* (observing that ***HN17***[] party objecting to trial court's consideration of evidence in ruling on motion for summary judgment bears the burden of moving to exclude such evidence; in the absence of an objection, the trial court may consider such evidence in ruling on a summary judgment motion).

[40]** Second, our reading of *Brooke Group* indicates to us that we should be cautious in accepting conscious parallelism as an explanation for complex, multi-variable, multi-price-tier parallelism. The federal courts in *Holiday Wholesale Grocery Co.* and *Williamson Oil Co.* may have fallen into the error of giving the Supreme Court's dicta--i.e., "[t]acit collusion . . . describes the process, not in itself unlawful"--which comes handily packaged in quotable form, more consideration than the Supreme Court's actual analysis of the likelihood that tacit collusion could result in industrywide, in-tandem increases in the prices of both generic and premium cigarettes. *Brooke Group, 509 U.S. at 227*. The present case does not involve the type of simple price leadership in a single-tier market that characterized the tobacco industry prior to the introduction of generic cigarettes.

[41]** Third, we have some concern that the Eleventh Circuit Court of Appeals misinterpreted *Matsushita* so as to place an undue burden on antitrust plaintiffs alleging horizontal price fixing. *Williamson Oil Co., 346 F.3d at 1300*. ***HN18***[] When the **[****45]** Supreme Court in *Matsushita* referred to the costs of "mistaken inferences" that "chill the very conduct the antitrust laws are designed to protect," *475 U.S. at 594*, it was speaking in the specific context of allegations of predatory pricing, which requires the factfinder to find an anticompetitive conspiracy in the face of evidence that the defendants set prices *below* a competitive level. A mistaken inference of conspiracy in such a case punishes the defendants for engaging in cut-to-the-bone competition--truly the very type of behavior that antitrust laws are designed to protect. *See* *In re Flat Glass Antitrust Litigation, 385 F.3d 350, 357 (3d Cir. 2004)* (distinguishing *Matsushita*). The conduct at issue in the present case--supracompetitive pricing--is conduct that at best is tolerated by ***antitrust law***. "[W]hile predatory pricing threats like the one in *Matsushita* always risk chilling procompetitive behavior, no comparable policy reasons justif[y] reluctance about going after a naked price fixing conspiracy," such as the conspiracy alleged in the present case. II Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law***: An Analysis of Antitrust Principles and Their Application P 308 **[****46]** at 147 (3d ed. 2006). We therefore have the same concern--no more, no less--that we have for any other class of defendants in protecting Defendants from mistaken inferences of culpable conduct.

[8] Indeed, at this point it is not entirely clear whether Dr. Leffler's **[****44]** opinions are being offered as scientific or as non-scientific expert opinion evidence.

[42]** Moreover, the predatory pricing claim in *Matsushita* was economically implausible on its face: ***HN19***[] "*Matsushita* spoke in the context of an alleged highly implausible decades-long predatory pricing conspiracy and found a severe proof requirement in such cases." II Areeda & Hovenkamp, *supra,* P 308c3 at 137-38. Where a claim is plausible and does not implicate facially procompetitive **[***888]** **[*673]** behavior, "more liberal inferences from the evidence should be permitted than in *Matsushita* because the attendant dangers from drawing inferences recognized in *Matsushita* are not present." *In re Flat Glass Antitrust Litigation, 385 F.3d at 358* (quoting *Petruzzi's IGA v. Darling-Delaware Co., 998 F.2d 1224 (3d Cir. 1993)* (internal quotation marks omitted). "[I]n a case in which conspiracy is deemed quite plausible, perhaps by virtue of the industry's structure and past attempts at collusion, then a broader range of inferences can be drawn from ambiguous evidence." II Areeda & Hovenkamp, *supra,* 308c3 at 139. In the present **[****47]** case, the alleged conspiracy among Defendants is plausible, especially given the improbability that the pricing that occurred was the result of conscious parallelism. *See* *Brooke Group, 509 U.S. at 239* (observing that "the inherent limitations of tacit collusion suggest that such multivariable coordination is improbable").

[43]** Lastly, consistent with New Mexico summary judgment standards, we have taken seriously our obligation to construe the record in the light most favorable to Plaintiffs and to allow Plaintiffs the benefit of any reasonable inferences. Thus, for example, we have recognized that certain Defendants may have been reluctant participants, joining in the conspiracy because they lacked the financial resources to resist Philip Morris. *See* VI Areeda & Hovenkamp (2d ed. 2003), *supra,* P 1408c at 46-47 (concluding that a competitor who reluctantly participates in a cartel under economic duress may be held liable as a conspirator). Similarly, we have viewed changes in market share during the class period as consistent with a conspiracy in which Philip Morris, as the most powerful conspirator, insisted on terms favorable to manufacturers of premium brands such as Philip Morris **[****48]** itself. We have been mindful of Plaintiffs' theory of their case, which does not involve an allegation that Defendants conspired to eliminate all competition; rather, Defendants were willing to compete as long as they were competing over supracompetitive profits.

CONCLUSION

[44]** To summarize, Plaintiffs have come forward with evidence that during the class period the tobacco industry exhibited an unprecedented degree of parallelism, beginning with the July 1993 consolidation of what had previously been ten price tiers into two price tiers, and continuing through twelve in-tandem increases in the prices of both premium and discount cigarettes. This multi-variable, multi-price-tier parallelism goes well beyond the price leadership within a single-tier market demonstrated by the cigarette industry prior to the introduction of generic cigarettes. Further, the parallelism in the present case involves parallelism among market tiers which formerly had been in vigorous competition, resulting in a significant differential between the list prices of the cheapest cigarettes and the most expensive cigarettes. Attempts by Philip Morris in 1992 and 1993 to lead increases in the prices of non-premium **[****49]** cigarettes failed. The spectacular growth curve of the non-premium segment suggests that the demand among consumers for competitively priced cigarettes had not peaked as of Marlboro Friday. Indeed, as previously noted, Marlboro Friday represents the triumph of competition over oligopolistic price coordination, suggesting that as of Marlboro Friday, competition was thriving within the tobacco industry. Applying *Brooke Group,* and relying on the opinions of Dr. Leffler, we think that a reasonable factfinder could view conscious parallelism as a relatively implausible explanation for the anticompetitive scenario that played out following Marlboro Friday.

[45]** We certainly do not mean to suggest that Plaintiffs' evidence *requires* a reasonable factfinder to accept unlawful concerted action as the most likely explanation for the parallelism demonstrated by cigarette prices: a reasonable factfinder might reject Dr. Leffler's opinions or accept as truthful the testimony of Defendants' CEOs denying participation in a conspiracy. We hold merely that Plaintiffs' evidence *allows* a reasonable factfinder to reject conscious parallelism as a plausible explanation, thereby leaving the competing inference **[****50]** of conspiracy as the most likely explanation for the parallelism proven by Plaintiffs.

[*889]** **[*674]** **Lorillard & Liggett**

[46]** In its answer brief, Lorillard points out that Plaintiffs' expert, Dr. Leffler, testified during his deposition that he was unaware of any conduct by Lorillard during the class period that was not "completely consistent with conscious parallelism." In their reply brief, Plaintiffs have not addressed this crucial point. Plaintiffs' case against Liggett suffers from the same deficiency as their case against Lorillard: Dr. Leffler testified that he is unaware of any conduct by Liggett that is not either procompetitive or consistent with conscious parallelism. In view of Dr. Leffler's concessions, we conclude that Plaintiffs have not satisfied their burden under *Matsushita* of coming forward with evidence that would allow a reasonable juror to exclude lawful conscious parallelism as the most likely explanation for Lorillard's and Liggett's adoption of parallel price increases. Accordingly, we affirm the grant of summary judgment as to these two Defendants. We reverse the summary judgment in favor of Defendants Philip Morris, Brown & Williamson, and R.J. Reynolds.

[47] IT [****51] IS SO ORDERED.**

Opinion

ORDER

This cause comes before the Court on Defendant's motion to dismiss or to stay the case pending the outcome of a state trial between the parties (Doc. 10). Plaintiff opposes this motion. (Doc. 12.)

INTRODUCTION

Plaintiff is suing for a declaratory judgment that Plaintiff's interactions with Defendant did not violate certain state and federal statutes. After the present suit was filed, Defendant sued Plaintiff in state court for several violations of state law. Defendant then filed this motion to dismiss or stay the present suit pending the resolution of the state case.

BACKGROUND

Plaintiff is a grower of eucalyptus trees, the harvesting rights of which it used to sell to various companies who would then transform **[*2]** the trees and market the end product. (Compl. ¶¶ 8-9.) Defendant was a regular customer of Plaintiff, who transformed the eucalyptus trees into mulch for sale. (Id. ¶ 9.) In 2006, Plaintiff decided to take a more holistic approach to the tree business and incorporate the harvest and sale of its trees into its own business model. (Id. ¶¶ 17-18.) After exploring different ways that Plaintiff could still partner with Defendant under this new arrangement, negotiations broke down and Plaintiff decided to end its business relationship with Defendant. (Id. ¶¶ 17, 20, 26-29.)

After the termination of the parties' business relationship, Defendant sent Plaintiff a letter stating that, should Plaintiff not resume sales to Defendant, Defendant would sue Plaintiff. (Doc. 10-2; Compl. ¶ 30.) The letter referenced Plaintiff's potential liability under both the Florida and Federal antitrust laws. (Doc. 10-2.) Less than three weeks after Plaintiff received the letter, it filed the present suit seeking a declaratory judgment that Plaintiff was not guilty of monopolization under the Sherman Act, attempted monopolization under the Sherman Act, breach of contract, fraud, breach of fiduciary duty, failure **[*3]** to act in good faith, misappropriation of trade secrets, or unfair competition. (Compl.) Forty days later, when Defendant's response to the Complaint was due, Defendant filed suit against Plaintiff in state court as well as a Motion in the present suit to stay or dismiss the present case pending resolution of the state court judgment. Defendant's state court complaint charged Plaintiff with breach of contract, misappropriation of trade secrets, unfair competition, fraudulent inducement, monopolization, and attempted monopolization under Florida law. (Doc. 10, p. 2.) While the present motion was pending, the state court issued a stay in Defendant's suit pending the outcome of the present case in federal court. (Doc. 32-3.)

DISCUSSION

Pursuant to the Declaratory Judgment Act, *28 U.S.C. § 2201(a)*, a district court "may declare the rights and other legal relations of any interested party seeking such declaration, whether or not further relief is or could be sought." The Declaratory Judgment Act "confer[s] on federal courts unique and substantial discretion in deciding whether to declare the rights of litigants." *Wilton v. Seven Falls Co., 515 U.S. 277, 286, 115 S. Ct. 2137, 132 L. Ed. 2d 214 (1995)*. The discretion given to the Court over whether to invoke jurisdiction based on the Declaratory Judgment **[*4]** Act is generous. *Id. at 286-88*.

Defendant claims that the Court may not grant declaratory judgment in this case because (1) Defendant did not bring any federal claims in its state court suit, mooting those claims in the present case and thereby depriving the Court of federal question subject matter jurisdiction; and (2) the facts of this case warrant the Court's use of discretion to withhold extending its jurisdiction, as the state court is best suited to hear the case.

1. ***Declaratory Claims not Brought By Declaratory Defendant in State Court***

The Declaratory Judgement Act "allow[s] parties to precipitate suits that otherwise might need to wait for the declaratory relief defendant to bring a coercive action." *Household Bank v. JFS Group, 320 F.3d 1249, 1253 (11th Cir. 2003)* (quoting *Gulf States Paper Corp. v. Ingram, 811 F.2d 1464, 1467 (11th Cir. 1987))*. The federal courts have jurisdiction to grant declaratory relief regarding any non-frivolous claims that the declaratory—judgment defendant *might potentially bring* based on the facts alleged, regardless of whether the declaratory defendant ever actually brings all of the claims. *Id. at 1251*. A declaratory defendant cannot obviate a declaratory case, or the claims therein, simply by choosing to delay bringing certain coercive claims arising out of the allegedly offending behavior. Otherwise, the relief **[*5]** offered to the declaratory plaintiff would be illusory, since the proverbial sword of Damocles threatened by a declaratory defendant would merely be dulled, not removed by such partial relief.

Here, Defendant wrote a letter to Plaintiff which alleged violations of both federal and state antitrust laws. It not only mentioned the federal Sherman Act by name, but included extensive discussion of federal case law construing the Sherman Act. (Doc. 10-2 at 3-4.) The fact that Defendant has brought a suit in state court against Plaintiff alleging only claims of monopolization and attempted monopolization under Florida law does not belie Plaintiff's concern that Defendant might have brought, or still may bring, Federal law claims as well. It is notable that Florida ***antitrust law*** is designed and construed after its Federal counterpart, the Sherman Act. *Fla. Stat. § 542.32* ("It is the intent of the Legislature that, in construing this chapter, due consideration and great weight be given to the interpretations of the federal courts relating to comparable federal antitrust statutes"). In fact, *Sections 542.18* and *542.19* of Florida's antitrust act "are the carbon copy of *Sections 1* and *2* of the Sherman Act." *In re Jet 1 Ctr., Inc. 322 B.R. 182, 197 (M.D. Fla. 2005)*. Furthermore, Florida cases **[*6]** construing the state antitrust laws lean almost entirely on federal case law. *St. Petersburg Yacht Charters, Inc. v. Morgan Yacht, Inc., 457 So. 2d 1028, 1032 (Fla. DCA 2d. 1984)* ("the Florida legislature has, in effect, adopted as the law of Florida the body of ***antitrust law*** developed by the federal courts under the Sherman Act.").

Accordingly, the Court finds that it does have subject matter jurisdiction to determine the legal relationship between the parties with regard to the federal monopolization and attempted monopolization claims. This is both because Defendant specifically referenced the Federal Sherman Act in its letter and because the similar potential for action under the state and federal antitrust laws demonstrates the possibility that Defendant might have brought non-frivolous federal claims against Plaintiff. For these reasons, Defendant's argument that the Court lacks subject matter jurisdiction in the present suit fails.

2. ***Circumstances Affecting the Court's Discretion to Extend Jurisdiction***

The Declaratory Judgment Act gives the Court discretion in extending its jurisdiction. The first-filed rule does so as well. According to the first-filed rule, where parallel suits are filed in state and federal court, the court initially seized of the controversy is the one that **[*7]** should decide the case, absent compelling circumstances. *Merrill Lynch, Pierce, Fenner & Smith, Inc. v. Haydu, 675 F.2d 1169, 1174 (11th Cir. 1982)*.

Here, the Court finds no compelling circumstances that would require it to abdicate the hearing of this case. There is no geographical disadvantage to Defendant associated with the federal forum, as the state case was filed within the Middle District of Florida. There are Federal claims at issue, and state law claims which look to the interpretation of federal law. The resolution of the federal case would put to rest the state case, as it encompasses the claims made in the state suit; the state case if resolved, in contrast, would leave issues to be resolved here. Finally, the state court seems to agree that the present suit should go forward before its state counterpart, as the state court has already stayed its suit pending an outcome here. (Doc. 32-3.) The Court finds no compelling reason not to exercise its jurisdiction in hearing the present suit.

CONCLUSION

Accordingly, it is ORDERED AND ADJUDGED that Defendant's Motion to dismiss or stay (Doc. 10) is DENIED.

DONE AND ORDERED this 19th day of November, 2008.

LexisNexis® Headnotes

Antitrust & Trade Law > General Overview

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Antitrust & Trade Law**

A complaint must contain a short and plain statement of the claim showing that the pleader is entitled to relief. *Fed. R. Civ. P. 8(a)*. However, a plaintiff must also amplify a claim with some factual allegations in those contexts where such amplification is needed to render the claim plausible. Antitrust claims generally require such amplification.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN2[] **Sherman Act, Scope**

15 U.S.C.S. § 1 bars every contract, combination or conspiracy, in restraint of trade or commerce.

Antitrust & Trade Law > Clayton Act > Scope

HN3[] Antitrust & Trade Law, Clayton Act

See 15 U.S.C.S. § 18.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Antitrust & Trade Law > Clayton Act > Scope

HN4[] Sherman Act, Scope

While § 1 (15 U.S.C.S. § 1) of the Sherman Act regulates agreements and § 7 (15 U.S.C.S. § 18) of the Clayton Act regulates acquisitions, both focus on the potentially anticompetitive effects of the challenged conduct. However, § 1 of the Sherman Act requires actual "restraint," while § 7 of the Clayton Act requires only the possibility of an anticompetitive effect. It is therefore generally assumed that if a plaintiff's claim under § 7 of the Clayton Act cannot survive a motion to dismiss, its claim under § 1 of the Sherman Act will fail as well.

Antitrust & Trade Law > Clayton Act > Scope

HN5[] Antitrust & Trade Law, Clayton Act

Using the admittedly formal dictionary definition of "acquire" (i.e., "gain") to interpret § 7 (15 U.S.C.S. § 18) of the Clayton Act preserves the independent significance of its language regarding anticompetitive "effect," and is therefore consistent with the U.S. Supreme Court's admonition to read § 7 of the Act in the light of the overriding congressional purpose to control corporate concentrations tending to monopoly.

Antitrust & Trade Law > Clayton Act > Scope

HN6[] Antitrust & Trade Law, Clayton Act

In the context of 15 U.S.C.S. § 18, an acquisition of stock is also an acquisition of assets, under the plain meaning of that term. The term "assets" refers broadly to any tangible or intangible thing of value.

Antitrust & Trade Law > Clayton Act > Scope

HN7[] Antitrust & Trade Law, Clayton Act

In Philadelphia National Bank, the U.S. Supreme Court noted that mergers and consolidations could not be readily classified as either "pure stock acquisitions" or "pure assets acquisitions"; they fit neither category neatly. After canvassing the legislative history of § 7 (15 U.S.C.S. § 18) of the Clayton Act, the Court concluded that Congress intended to bring the entire range of corporate amalgamations, from pure stock acquisitions to pure assets acquisitions, within the scope of § 7, and that the two provisions, when read together, covered mergers and consolidations.

Antitrust & Trade Law > Clayton Act > Scope

HN8[] **Antitrust & Trade Law, Clayton Act**

In the context of 15 U.S.C.S. § 18, the prohibition on stock acquisitions applies to "any person," while the broader prohibition on asset acquisitions applies only to persons subject to the jurisdiction of the Federal Trade Commission. 15 U.S.C.S. § 18.

Business & Corporate Law > ... > Meetings & Voting > Annual Meetings > Director Elections & Removals

Business & Corporate Law > ... > Directors & Officers > Scope of Authority > General Overview

HN9[] **Annual Meetings, Director Elections & Removals**

The right to vote for a board of directors is different from the right to exercise its powers.

Civil Procedure > Judicial Officers > Magistrates > General Overview

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > Preservation for Review

HN10[] **Judicial Officers, Magistrates**

A party's failure to object to any purported error or omission in a magistrate judge's report waives further judicial review of the point.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN11[] **Amendment of Pleadings, Leave of Court**

Leave to replead is to be liberally granted.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN12[] **Standing, Requirements**

To demonstrate antitrust standing, a plaintiff must first show that he suffered an antitrust injury, which is an injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. A court must also consider other factors relevant to standing (sometimes called the "efficient enforcer" factors), including: (1) the directness or indirectness of the asserted injury; (2) the existence of an identifiable class of persons whose self-interest would normally motivate them to vindicate the public interest in antitrust enforcement; (3) the speculativeness of the alleged injury; and (4) the difficulty of identifying damages and apportioning them among direct and indirect victims so as to avoid duplicative recoveries.

Civil Procedure > Judicial Officers > Magistrates > General Overview

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > Preservation for Review

HN13[] **Judicial Officers, Magistrates**

The interests of justice are ill served by allowing a party to subsequently press an argument it failed to raise before the magistrate judge. Failure to present an argument to the magistrate judge handicaps the deliberations of both the district judge and the magistrate judge. Indeed, several circuits have squarely held that the failure to raise an argument before the magistrate judge results in its waiver. However, the issue appears to be an open question in the Second Circuit.

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

HN14[] **Standing, Clayton Act**

The fact that the structure of the antitrust laws contributes to plaintiffs' alleged injury does not, by itself, deprive them of antitrust standing--indeed, one purpose of § 7 (*15 U.S.C.S. § 18*) of the Clayton Act is to prevent combinations that will make it easier for leading members of the industry to collude on price and output without committing a detectable violation of *§ 1* (*15 U.S.C.S. § 1*) of the Sherman Act.

Bankruptcy Law > ... > Avoidance > Fraudulent Transfers > Intent

Business & Corporate Compliance > ... > Contracts Law > Standards of Performance > Creditors & Debtors

HN15[] **Fraudulent Transfers, Intent**

In the context of *N.Y. Debt. & Cred. Law § 276*, it is not necessary for plaintiffs to plead that the challenged transaction will actually hinder or delay them, they must only plead that the transaction was undertaken with the intent to do so.

Opinion

MEMORANDUM AND ORDER

JOHN GLEESON, United States District Judge:

In May 2006, the plaintiffs in the above-captioned putative class actions filed a supplemental complaint alleging that the then-pending initial public offering ("IPO") of MasterCard stock violated both federal ***antitrust law*** and state fraudulent conveyance law. Defendants MasterCard International Incorporated and MasterCard Incorporated (collectively, "MasterCard") and Bank of America, Capital One, JPMorgan Chase, Citigroup, and HSBC (collectively, the "Banks") filed various motions to dismiss the supplemental complaint. I referred these motions to Magistrate Judge James Orenstein. On February 12, 2008, he issued a Report and Recommendation ("R&R") recommending that I dismiss the state law claim, dismiss the Clayton **[*3]** Act claim against the Banks with leave to amend, and deny the motions as to the remaining federal antitrust claims. For the reasons stated below, I grant the motions to dismiss plaintiffs' amended complaint in their entirety with leave to amend.

BACKGROUND

A. *The First Amended Complaint*

As most people know, merchants may accept a "payment card," such as a credit card or a debit card, as payment for goods and services. The resolution of this motion requires a detailed understanding of how these payment card transactions work.

MasterCard runs a payment card network. It provides the infrastructure through which a customer's payment makes its way to a merchant. The Banks participate in payment card transactions as an acquiring bank, an issuing bank, or both. An issuing bank issues MasterCard-branded payment cards to customers. An acquiring bank "acquires payment transactions from merchants and acts as a liaison" between the merchant and the issuing bank. First Consolidated Amended Class Action Compl. ("AC") P 8(a). The Banks compete with each other to issue payment cards and "acquire" merchant transactions. AC P 8(a), (n). The Banks also take part in the management of MasterCard, which, prior **[*4]** to May 2006, was organized as a joint venture among more than 23,000 member banks. AC P 54.

In a standard credit card transaction, the customer/cardholder presents her MasterCard to a merchant who has contracted to accept such cards. The merchant sends the transaction data to an acquiring bank, which forwards it to the cardholder's issuing bank. The issuing bank then authorizes or denies the transaction. Following authorization, the merchant submits a payment request to the acquiring bank, which again forwards it to the issuing bank. The issuing bank pays the acquiring bank the purchase price minus a fee (the "interchange fee"). The acquiring bank then pays the merchant but also deducts a fee (the "merchant-discount fee"). MasterCard relays the communications between the acquiring and issuing banks, and its board of directors sets the amount of interchange fees charged on MasterCard's network. AC P 8(l). Visa's network processes transactions and sets fees in an analogous manner. AC P 8(l).

In April 2006 the plaintiffs, merchants who accept Visa and MasterCard payment cards, filed their first amended complaint in this action. They alleged that the Banks, by virtue of their control over **[*5]** the boards of directors of

MasterCard and Visa, dictate the amount charged as interchange fees for each network. Further, because so many banks are members of both boards, they "ensure that the Interchange Fees of Visa and MasterCard increase in parallel and stair-step fashion, rather than decreasing in response to competition from each other." AC 9 135. The plaintiffs also challenged the networks' "Anti-Steering Restraints," AC P8(c), a group of rules promulgated by both Visa and MasterCard which allegedly prevent merchants from encouraging customers to use less expensive forms of payment. AC PP 234-247. They further allege that Visa has engaged in monopolization in violation of Section 2 of the Sherman Act, *id*. at PP 248-54, and that both MasterCard and Visa have engaged in prohibited tying and exclusive dealing arrangements. *Id*. at PP 255-71, 272-88, 288-93, and 294-99. Only the allegations regarding interchanges fees are relevant to the disposition of the instant motions to dismiss.

B. *The Supplemental Complaint*

In May 2006, one month after plaintiffs filed their first amended complaint, MasterCard announced its IPO, in which it proposed to sell approximately 60 million shares of **[*6]** MasterCard Class A common stock to the public. To effectuate this offering, MasterCard first redeemed and reclassified all of its outstanding common stock, approximately 100 million shares, then held by its member banks. Each former shareholder received 1.35 shares of MasterCard Class B common stock for each share of old stock it held. All former shareholders also received a single share of Class M stock. MasterCard Incorporated, Amendment No. 8 to Form S-1 Registration, filed May 23, 2006. [1]

The three new classes of MasterCard stock convey different control rights. Class A shares have standard voting rights. These shares may not be held by MasterCard's member banks, and no individual entity may own more than 15% of the outstanding Class A stock. Class B shares have no voting rights. They may be transferred among member banks and sold to outside investors, in which case they convert to Class A shares. However, Class B shareholders **[*7]** have a right of first refusal over the sale of Class B shares to outside investors. Class Pls.' First Supplemental Class Action Complaint ("SC") P 82. Class M shareholders may vote to elect up to three members of MasterCard's board of directors, but no more than one quarter of all directors. Class M shareholders, collectively, also have the power to veto "1) any sale of all, or substantially all, of the company's assets; 2) any merger or consolidation of the company; 3) any waiver of beneficial ownership limitations in the certificate of incorporation; and 4) any discontinuation of the core payments business." *Id*. at P 83.

On May 22, 2006, the plaintiffs filed the supplemental complaint at issue here. It alleges four causes of action arising from the agreements and transactions underpinning MasterCard's IPO. They assert that the IPO is a pretext, and that the various "Ownership and Control Restrictions" it entails, specifically the 15% limit on ownership of Class A stock and the voting rights of the Class M stock, operate to preserve the Banks' control of MasterCard. SC PP 10, 100. MasterCard's purported transformation from a joint venture to a "single entity," plaintiffs allege, will **[*8]** insulate its internal actions from the prohibitions of *Section 1 of the Sherman Act*, which regulates agreements between joint venturers but does not reach the unilateral actions of individual corporations. With effective control of the post-IPO MasterCard enterprise, the Banks will be free to impose or continue the operation of allegedly anticompetitive restraints. Specifically, plaintiffs allege that MasterCard will continue to impose and increase the uniform interchange fees challenged in plaintiffs' first amended complaint and will reinstate the exclusivity arrangements found unlawful in *United States v. Visa U.S.A., 163 F. Supp. 2d 322 (S.D.N.Y. 2001)*, *aff'd* *344 F.3d 229 (2d Cir. 2003)*, whereby merchants who wish to accept MasterCard-branded cards must agree to accept only MasterCard and Visa cards and decline to accept American Express or Discover cards. SC P 114. Because these restraints will decrease competition in the relevant market, plaintiffs allege that the agreements leading to the IPO constitute a conspiracy in restraint of trade in violation of *Section 1 of the Sherman Act*, and that the stock transfers by which the IPO is effected violate *Section 7* of the Clayton Act. **[*9]** The plaintiffs also argue that MasterCard did not receive adequate consideration for its release of "its right to assess its Member Banks for liability expenses," (its

"assessment right") and that the release was therefore a fraudulent conveyance under New York law. SC PP 145, 147.

C. *Judge Orenstein's Report and Recommendation*

In the report and recommendation, Judge Orenstein recommended that I grant the motion in part and deny it in part. As to the antitrust claims, he rejected defendants' contentions that they did not "acquire" stocks or "assets" under *Section 7* of the Clayton Act. R&R 14-23. And he concluded, based on the barriers to entry in the relevant market and the ownership restrictions that would prevent an outsider from acquiring control of MasterCard, that the supplemental complaint sufficiently pleaded "that the agreements leading to the IPO will probably result in a substantial lessening of competition," and therefore stated a claim under the Clayton Act. R&R 28. As to the Sherman Act claims, Judge Orenstein noted that the parties had argued the motion "exclusively by reference to the standard relevant under *Section 7*" of the Clayton Act. *Id*. at 29. Taking this conduct **[*10]** as an indication that the parties agreed "that the Sherman Act claims stand or fall together with those under the Clayton Act," he also concluded that plaintiffs had properly pleaded their Sherman Act claims. *Id*. However, Judge Orenstein concluded that the plaintiffs had failed to plead with particularity that MasterCard acted with fraudulent intent or received inadequate consideration in exchange for relinquishing its assessment right, and therefore recommended that I dismiss plaintiffs' fraudulent conveyance claim. *Id*. at 36. MasterCard and the Banks filed objections to the report and recommendation, alleging that Judge Orenstein erred in determining that the Clayton Act applied to the challenged transactions and that plaintiffs had adequately pleaded their anticompetitive effect. *See* MasterCard's Objections to the February 12, 2008 Report and Recommendation Denying in Part Its Motion to Dismiss Class Pls.' Supplemental Compl. Directed to the MasterCard IPO ("MC's Obj."); Bank Defs.' Objections to the Report and Recommendation Regarding Bank Defs.' Mot. to Dismiss Class Pls.' First Supplemental Class Action Compl. ("Banks' Obj."). Plaintiffs responded to these arguments but filed **[*11]** no objections of their own. *See* Class Pls.' Reply to the Apr. 4, 2008 Objections of MasterCard, Bank of America, Capital One, JPMorgan Chase, Citigroup and HSBC to the Court's Feb. 12, 2008 Report and Recommendation ("Pls.' Reply").

DISCUSSION

A. *Standard of Decision*

HN1[] A complaint must contain "a short and plain statement of the claim showing that the pleader is entitled to relief." *Fed. R. Civ. P. 8(a)*. However, a plaintiff must also "amplify a claim with some factual allegations in those contexts where such amplification is needed to render the claim *plausible*." *Iqbal v. Hasty, 490 F.3d 143, 157-58 (2d Cir. 2007)*. Second Circuit precedent applying the Supreme Court's decision in *Bell Atlantic v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*, makes clear that antitrust claims generally require such amplification. *See* *In re Elevator Antitrust Litig., 502 F.3d 47, 50 & nn.3-4 (2d Cir. 2007)*.

B. *The Antitrust Claims*

Section 1 of the Sherman Act ("Section 1") ***HN2***[] bars "[e]very contract, combination . . . or conspiracy, in restraint of trade or commerce . . . ." *15 U.S.C. § 1*. *Section 7* of the Clayton Act ("*Section 7*") provides, in relevant part, that

> ***HN3***[] [n]o person engaged in commerce or in any activity affecting **[*12]** commerce shall acquire, directly or indirectly, the whole or any part of the stock or other share capital and no person subject to the jurisdiction of the Federal Trade Commission [("FTC")] shall acquire the whole or any part of the assets of another person engaged also in commerce or in any activity affecting commerce, where in any line of commerce or in any activity affecting commerce in any section of the country, the effect of such acquisition may be substantially to lessen competition, or to tend to create a monopoly.

15 U.S.C. § 18. Thus, ***HN4***[] while Section 1 regulates agreements and *Section 7* regulates acquisitions, both focus on the potentially anticompetitive effects of the challenged conduct. However, *Section 1* requires actual "restraint," while *Section 7* requires only the possibility of an anticompetitive effect. *See* *Brown Shoe Co. v. United*

States, 370 U.S. 294, 328-29, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962). It is therefore generally assumed that if a plaintiff's Section 7 claim cannot survive a motion to dismiss, its Section 1 claim will fail as well. Accordingly, the parties in this case have focused their arguments on whether the plaintiffs have stated a claim under the less demanding standard of Section 7.

To **[*13]** effect MasterCard's IPO, the Banks transferred their old MasterCard stock to MasterCard, and MasterCard then transferred new Class B and M shares to the Banks. The plaintiffs allege that MasterCard thereby "acquir[ed] from the Member Banks the right to set Interchange Fees charged to merchants" in the IPO. SC P 95. Plaintiffs allege that these transactions create the appearance, but not the reality, of an independent MasterCard, and therefore enable MasterCard and the Banks to continue and reimpose various anticompetitive practices.

The defendants first argue that Section 7 does not reach the transactions challenged in the supplemental complaint. MasterCard contends that it merely redeemed its own stock, rather than acquiring the stock or assets of another person. The Banks claim that they did not acquire any stock or assets because the net effect of the IPO was, for them, a divestment of their controlling stake in MasterCard. Thus, for different reasons, both MasterCard and the Banks argue that they did not "acquire . . .any part of the stock or other share capital . . . [or] any part of the assets of another person" in the course of the MasterCard IPO. 15 U.S.C. § 18. They also contend **[*14]** that, even if Section 7 does govern the challenged transactions, the plaintiffs have failed to adequately plead that the effect of these acquisitions "may be substantially to lessen competition." *Id*. I address each argument in turn.

1. *The Banks' Acquisition of Stock*

In addressing whether the Banks' role in the IPO implicated Section 7, Judge Orenstein first addressed a technical defect in the supplemental complaint. R&R 14. He noted that while the operative portion of plaintiffs' Section 7 claim alleged that both the Banks and MasterCard had acquired "the assets of another person," the clause of Section 7 governing the acquisition of assets covers only entities "subject to the jurisdiction of the [FTC]." 15 U.S.C. § 18. Because banks are not subject to the FTC's jurisdiction, 15 U.S.C. § 45(a)(2), he concluded that plaintiffs could not "seek relief from the Banks under Section 7 based on any acquisition of assets." R&R 14. [2] However, because he concluded that the complaint could allege a viable theory of liability based on the Banks' acquisition of "stock or other share capital" of the post-IPO MasterCard, he recommended that I grant the plaintiffs leave to amend to allege such a theory. **[*15]** R&R 15.

The Banks dispute Judge Orenstein's conclusion that they acquired stock as a result of the MasterCard IPO. The issue is whether a party "acquire[s] . . . the stock or share capital . . . of another person" under Section 7 when it exchanges existing shares of a reorganizing corporation for the shares of the restructured corporation, and the question appears to be one of first impression. Judge Orenstein concluded that under the "plain and unambiguous text of Section 7," an acquisition had occurred. R&R 15 ("By virtue of the IPO (and the agreements pursuant to which it was effected), the Banks have acquired shares in a company that did not previously exist, and that they therefore did not previously possess.").

While there is reason to doubt the description of the post-IPO MasterCard as a company "that did not previously exist," the Class B and M shares the banks received did not themselves exist prior to the IPO, and this fact renders the Banks' receipt of these shares an acquisition. As the Banks point out, the dictionary meaning of "acquire" is "gain," Banks' Obj. 21, **[*16]** and the Banks indisputably gained shares of Class B and Class M stock in MasterCard as a result of the IPO.

The Banks' contention that they also *surrendered* stock in the transaction does not alter this conclusion. They ask me to hold that they did not "acquire" stock because they "gained no greater voting control or economic interest during MasterCard's IPO than they previously possessed." Banks' Obj. 21. But this "purposive and pragmatic" interpretation of "acquire," Banks' Obj. 24, makes no semantic sense. Suppose I sell 100 shares of X Corp. on Monday and then buy 100 shares of X Corp. on Tuesday. Although I have the same equity stake and voting rights on Tuesday evening that I had on Monday morning, it seems odd to argue that I did not "acquire" stock on Tuesday

[2] The plaintiffs do not object to this conclusion, and I agree with Judge Orenstein's reasoning on this point.

based on this fact, just as it would be odd to say that I therefore did not "sell" stock on Monday. At the very least, the substantive similarity between my starting and ending positions certainly wouldn't convince a broker to waive his commission on these transactions.

Furthermore, this "substantive" interpretation of "acquire," Banks' Obj. 24, appears unworkable and threatens to render other language in Section 7 superfluous. **[*17]** The Banks suggest that, before I find that a party has acquired stock, I first determine whether the transacting party previously held a stake in the target company (or a predecessor company), and, if so, whether the transaction results in a net increase or decrease of their stake in that company. But how far back must I look, and how do I determine whether a party has increased or decreased its stake when, as here, the party initially holds one class of stock in a company and subsequently holds different classes of stock in a restructured (and possibly "new") incarnation of that company? Even if this interpretive framework could be applied coherently, it would inappropriately import into the "acquire[] . . . stock" element of a Section 7 claim the considerations that relate to whether the challenged transaction may have the effect of lessening competition. ***HN5***[] Using the (admittedly formal) dictionary definition of "acquire" to interpret *Section 7* preserves the independent significance of its language regarding anticompetitive "effect," and is therefore consistent with the Supreme Court's admonition to read *Section 7* "in the light of the overriding congressional purpose to control corporate **[*18]** concentrations tending to monopoly." *United States v. Phila. Nat. Bank, 374 U.S. 321, 338, 83 S. Ct. 1715, 10 L. Ed. 2d 915 (1963)*.

The fact that the Banks' argument conflates the separate elements of a Section 7 claim is underscored by their reliance on (*Record Club of Am., Inc. v. Capitol Records, Inc., 70-CV-3315 HRT), 1971 U.S. Dist. LEXIS 11738, 1971 WL 558 (S.D.N.Y. Sept. 8, 1971)*. In that case, defendants Capitol Records and Longines operated a number of different businesses, and were competitors in the record club market. In the challenged transaction, Capitol sold its record club assets to Longines in exchange for five percent of the stock of the "Longines Symphonette Corporation," which it subsequently exchanged for a smaller stake in the "Longines-Wittnauer Watch Company." *1971 U.S. Dist. LEXIS 11738, [WL] at *5*. The plaintiff, the operator of a rival record club, claimed that this transaction substantially lessened competition in the record club market in violation of the Clayton Act. The district court granted summary judgment as to Capitol, holding that it was "convinced by the plain language of *section 7* of the Clayton Act that a seller in a challenged transaction is not meant to be included in the statutory proscription." *1971 U.S. Dist. LEXIS 11738, [WL] at *6*.

The Banks interpret *Record **[*19]** Club* as holding that Capitol did not "acquire" Longines stock, as that term is used in *Section 7*. Banks' Obj. 22 ("The district court dismissed the Section 7 claim against the seller because the seller did not 'acquire' anything."). If this is an accurate description of the holding of *Record Club*, I cannot fathom its rationale. The district court was clearly correct to award summary judgment to Capitol, because its acquisition of Longines stock had no anticompetitive effect: "plaintiff has understandably failed to produce any factual support for its theory that Capitol's receipt of a 2.6 percent stock interest in Longines in some way restrained competition in the record club market." *Record Club, 1971 U.S. Dist. LEXIS 11738, 1971 WL 558, at *6*. However, this is the result of Section 7's "effect" language, not its use of the term "acquires." Although Capitol's receipt of stock in a watch company would not affect competition in the record club market (only Longines's acquisition of record club assets would do so), I cannot see how this fact proves that Capitol did not "acquire" any stock. To the extent that *Record Club* implicitly holds that a defendant only "acquires" stock under *Section 7* when its acquisition has **[*20]** an anticompetitive effect, I decline to follow it because it renders the "effect" language of that section superfluous.

The Banks also rely, to no avail, on the Clayton Act's legislative history. Observing that Congress originally intended *Section 7* to govern stock acquisitions by holding companies, they argue that if Congress intended to govern "holding companies' *reductions* of their economic stakes in other business," it would have said so unambiguously. Banks' Obj. at 23. As a threshold matter, because the "literal terms" of *Section 7*, specifically the term "acquires," resolve this issue, consulting the statute's legislative history is unnecessary. *See* *Phila. Nat. Bank, 374 U.S. at 337*. In addition, the Supreme Court's Clayton Act jurisprudence emphatically demonstrates that *Section 7*, particularly after its 1950 amendment, can and should cover transactions not expressly contemplated by the drafters of the 1914 Act. *See* *id. at 337-38*. More fundamentally, however, the Banks' appeal to the legislative history misrepresents plaintiffs' theory of liability -- plaintiffs do not argue that the Banks violated *Section 7* by disposing of their old MasterCard shares, but by acquiring the new **[*21]** Class B and M shares. In sum, I agree with Judge Orenstein's conclusion that the Banks "acquire[d]" stock as that term is used in *Section 7*.

2. *MasterCard's Acquisition of Stock or Assets*

a. *Acquisition of MasterCard Stock*

Section 7 provides that no party "shall acquire" the "stock or other share capital . . . of another person" if that acquisition may have an anticompetitive effect. *15 U.S.C. § 18*. Judge Orenstein concluded that the language "of another person," in this context, refers to stock *in* a separate entity; it does not include the acquirer's own corporate stock, even if that stock is *held* by a separate entity. Therefore, because MasterCard acquired only its own stock from the Banks, it did not acquire the stock "of another person." R&R 18.

The problem with this interpretation is that it arguably requires the phrase "of another person," which appears only once in *Section 7* and it is used to modify both "stock or other share capital" and "assets," *15 U.S.C. § 18*, to simultaneously convey two different meanings. The phrase "of another person" is capable of at least two meanings when it modifies "stock or share capital": it could refer to the stock *in* another person, or to stock *held* ***[*22]*** *by* that person. Used to modify "assets," only the second meaning makes sense. Thus, under MasterCard's proposed reading of *Section 7*, "of another person" would have one meaning with regard to "stock or other share capital," and a second, distinct meaning with regard to "assets." I need not endorse or reject this reading, however, because I conclude that MasterCard's redemption of its shares constitutes an acquisition of the "assets of another person."

MasterCard argues that the language of the statute, which was amended in 1950 to add the prohibition of certain asset acquisitions, draws a sharp distinction between stock acquisitions and asset acquisitions, making it erroneous to interpret the former as a subset of the latter. The first problem with MasterCard's argument is that ***HN6***[] an acquisition of stock is also an acquisition of assets, under the plain meaning of that term. Judge Orenstein correctly concluded that the term "assets" refers "broadly to any tangible or intangible thing of value." R&R 20. Accordingly, when the Banks possess Class B shares of MasterCard, those shares are simultaneously the stock of MasterCard and the assets of the Banks. MasterCard notes that it has "found **[*23]** no case that has read the term so expansively as to include stock," MC's Obj. 17, but they have similarly found no case endorsing a contrary reading. "Assets" is a capacious term, and the proposition that it is typically read to include stock is sufficiently uncontroversial that the apparent lack of litigation on the point is unsurprising. [3]

Furthermore, MasterCard's contention that Congress intended asset acquisitions and stock acquisitions to be mutually exclusive categories was rejected by the Supreme Court ***HN7***[] in *Philadelphia National Bank*. In that case, the Supreme Court noted that mergers and consolidations could not be readily **[*24]** classified as either "pure stock acquisition[s]" or "pure assets acquisition[s]"; they "fit neither category neatly." *Phila. Nat. Bank, 374 U.S. at 336-37*. After canvassing the legislative history of *Section 7*, the Court concluded that Congress intended to "bring the entire range of corporate amalgamations, from pure stock acquisitions to pure assets acquisitions, within the scope of s 7," and that the two provisions, when "read together," covered mergers and consolidations. *Id. at 342*. This conclusion cannot be reconciled with MasterCard's contention that the 1950 amendment of *Section 7* is intended to draw a sharp distinction between stock acquisitions and assets acquisitions.

MasterCard also argues that characterizing a stock acquisition as an asset acquisition renders *Section 7*'s stock acquisition language superfluous. If a stock acquisition is also an asset acquisition, it contends, the portion of the *Section 7* prohibiting stock acquisitions is superfluous. This argument fails, as it overlooks the fact that ***HN8***[] the prohibition on stock acquisitions applies to "any person," while the broader prohibition on asset acquisitions applies

[3] MasterCard correctly observes that regulations implementing the Hart-Scott-Rodino amendments to the Clayton Act provide that securities are not considered assets of another person when valuing an asset acquisition to determine whether it triggers certain notification requirements. MC's Obj. 11 n.8 (citing *16 C.F.R. § 801.21(b)*). But this regulation also underscores the proposition that stock would normally constitute an asset -- the regulation merely serves to identify a specific situation in which the conventional meaning of the "assets" should not control.

only to persons "subject to the jurisdiction of the **[*25]** Federal Trade Commission." *15 U.S.C. § 18*. Accordingly, the interpretation recommended by Judge Orenstein does not result in the asset acquisition provision swallowing the stock acquisition provision.

In essence, MasterCard urges a "purposive" definition of "assets," just as the Banks urge a purposive definition of "acquire." They contend that Congress could not have intended Section 7's asset acquisition language to apply to a company's purchase of its own stock because such purchase "could not in any event result in the type of concentration that Congress intended *Section 7* to address." MC's Obj. 16. Thus, although *Philadelphia National Bank* teaches that the Clayton Act reaches all corporate amalgamations, regardless of the form they take, MasterCard argues that the transaction here is no amalgamation at all. If this contention is correct, MasterCard will be able to demonstrate that the "effect" of its transaction is not "substantially to lessen competition, or to tend to create a monopoly," and there is no need to introduce formal exceptions to the term "assets" on a case-by-case basis.

b. *Acquisition of Rights*

Judge Orenstein also determined that the plaintiffs have plausibly alleged **[*26]** an acquisition of assets by alleging that "MasterCard obtained from the Banks a bundle of three valuable rights that previously belonged exclusively to the Banks: the right to issue MasterCard-branded payment cards . . .; the right to acquire merchants . . . ; and the right to set the level of interchange fees for transactions involving MasterCard-branded cards." R&R 19. I respectfully disagree.

Although plaintiffs allege that MasterCard "acquir[ed] from the Member Banks the right to set Interchange Fees charged to merchants," SC P 95, I find this allegation implausible. It is contradicted by plaintiffs' assertion (in which the defendants concur) that interchange fees, both before and after the IPO, are set by MasterCard's board of directors. AC P 8(1). Thus, at all relevant times, the right to set interchange fees rested with MasterCard; it did not acquire this right by virtue of the IPO. Plaintiffs suggest that the IPO shifted the right to elect the board from the Banks to MasterCard's shareholders, and by doing so it also shifted the right to set interchange fees. Pls.' Reply 23. This argument is unpersuasive. ***HN9***[] The right to vote for a board of directors is different from the right **[*27]** to exercise its powers, and the plaintiffs' own allegations establish that MasterCard at all times possessed the power to set interchange fees.

As to the rights to acquire merchants and issue cards, the complaint does suggest that these rights are transferred from the Banks to MasterCard when it states that "[t]o the extent that this IPO is a fundamental change in the MasterCard network, it operates as an acquisition by the New MasterCard of portions of the card-issuing and merchant-acquiring functions of each member bank." SC P 113. But there is neither an allegation nor a basis to infer that MasterCard did not have the right to issue cards or acquire merchants before the IPO. Nor do the plaintiffs allege that the IPO somehow diminishes the Banks' independent ability to issue cards or acquire merchants. Instead, the complaint suggests that, after the IPO, the Banks will continue to issue cards as before. SC P 13 (arguing that the post-IPO MasterCard "will be highly dependent upon the current Member Banks' continued willingness to issue" MasterCard-branded cards).

Even if the complaint could be read as plausibly alleging that MasterCard has somehow acquired the right to issue cards and **[*28]** acquire merchants in the IPO, I can discern no plausible connection between possession of these rights and the competitive harms plaintiffs allege. These harms stem only from the imposition of interchange fees and other allegedly anticompetitive restrictions on access to the MasterCard network. I see nothing in the complaint to suggest that MasterCard's ability to impose these restraints, or the Banks' ability to control MasterCard's imposition of these restraints, somehow depends on MasterCard having the right to issue cards or acquire merchants.

3. *Allegations of Anticompetitive Effect*

Plaintiffs' theory of anticompetitive effect proceeds as follows. The imposition of uniform interchange fees and other merchant restraints (such as the exclusivity rules that were found to violate the Sherman Act in the *Visa U.S.A.* case) is anti-competitive. The Banks profit from these restraints and will impose or continue them if they are able to do so. MasterCard's pre-IPO structure prevented it from imposing these restraints, but its post-IPO structure will allow it to impose such restraints without violating the antitrust laws. Post-IPO, MasterCard will impose or continue these restraints because **[*29]** it is still effectively controlled by the Banks. Because the challenged restraints will be imposed with impunity in a post-IPO regime but would be struck down in a pre-IPO regime, the effect of the IPO is to substantially lessen competition.

The defendants allege that plaintiffs have failed to adequately plead that the Banks will "retain effective control" over the post-IPO MasterCard. SC P 13. The Banks contend that "control" over MasterCard means "the power to elect a majority of the board of directors," Banks' Obj. 13, a power the Banks surrendered in the IPO. Neither the plaintiffs nor Judge Orenstein's report and recommendation offer a contrary definition of control, nor do they suggest *how* the Banks will nevertheless be able to control the board of directors, and thereby assure the continued imposition of the allegedly supracompetitive interchange fees.

Judge Orenstein concluded that the plaintiffs successfully pleaded that the "banks retain *enough* ownership and control to allow them -- effectively unmediated by outside influence -- to take unfair advantage of the greater freedom to act that MasterCard's new status as a single entity creates." R&R 28. I respectfully disagree, and **[*30]** conclude that the plaintiffs' allegations, and the reasonable inferences they create, actually demonstrate that the Banks do not retain sufficient control to allow them, for example, to continue to impose supracompetitive interchange fees.

Plaintiffs allege that "[t]he MasterCard Network could function efficiently without collectively-fixed Interchange Fees." SC P 67. They also contend that "[w]hen the Member Banks collectively set Interchange Fees, they attempt to maximize their own profits rather than those of MasterCard." *Id*. at P 49. Thus, the complaint suggests that a uniform interchange fee is not a profit-maximizing measure for MasterCard itself; rather, it only allows the Banks to charge monopolistic fees. Taking these allegations as true, I can only infer that an independent corporate director, one who seeks to maximize MasterCard's revenues, would therefore oppose such fees, while a corporate director controlled by the Banks would support them. Furthermore, plaintiffs' complaint compels the inference, supported by MasterCard's public filings relating to the IPO, that three-quarters of MasterCard's directors will be independent of the Banks and selected by the Class A shareholders. **[*31]** Given this state of affairs, plaintiffs cannot plausibly allege that MasterCard will continue to impose supracompetitive interchange fees following its IPO, because its board would not be controlled by the Banks. Rather, a majority of the board would consist of independent directors who would theoretically oppose any efforts to enrich the Banks at MasterCard's expense.

In sum, the plaintiffs' arguments overlook a middle ground between effective control of MasterCard by the Banks and effective control of MasterCard by some hypothetical outsider -- an independent MasterCard, run by directors and managers with a fiduciary duty to act in MasterCard's best interests, rather than in the interests of its customers or competitors. Plaintiffs have put forth no reason to believe that the takeover will not result in such an entity, or that this entity will continue or impose the restraints plaintiffs fear. Thus, by plaintiffs' own allegations, a takeover by some trust-busting white knight (which plaintiffs allege is impossible due to the 15% limit on ownership of Class A shares) is not required to prevent the imposition or continuation of MasterCard's allegedly anticompetitive practices. Accordingly, **[*32]** they have failed to plead that the "effect" of the IPO may be substantially to lessen competition, or to tend to create a monopoly." *15 U.S.C. § 18*. *A fortiori*, they have also failed to plead the actual anticompetitive effects necessary to sustain a claim under *Section 1* of the Sherman Act. *See, e.g., Paycom Billing Servs., Inc. v. MasterCard Int'l, 467 F.3d 283, 289-90*.

C. *The Fraudulent Conveyance Claim*

The plaintiffs allege that MasterCard's release of its right to assess its member banks for liabilities arising from litigation constitutes a fraudulent conveyance under *New York Debtor and Creditor Law §§ 275* and *276*. *Section 276* prohibits actual fraud; it deems fraudulent "[e]very conveyance made . . . with actual intent . . . to hinder, delay, or defraud present or future creditors." *N.Y. Debt. & Cred. Law § 276*. *Section 275* prohibits constructive fraud; i.e., any "conveyance made . . . without fair consideration when the person making the conveyance . . . intends or believes that he will incur debts beyond his ability to pay as they mature . . . ." *Id*. *§ 275*. Judge Orenstein rejected both theories of fraud, finding that the plaintiffs had insufficiently alleged the existence of **[*33]** actual fraudulent intent and had failed to make any allegation whatsoever regarding MasterCard's intent or belief regarding its ability to pay its debts. In light of the plaintiffs' failure to object to this portion of Judge Orenstein's report and recommendation, *see* Cephas v. Nash, 328 F.3d 98, 107 (2d Cir. 2003) (**HN10**[] "[A] party's failure to object to any purported error or omission in a magistrate judge's report waives further judicial review of the point."), I grant the motion to dismiss with respect to the fraudulent conveyance claim.

D. *Leave to Amend*

HN11[] "Leave to replead is to be liberally granted." Slayton v. Am. Express Co., 460 F.3d 215, 230 (2d Cir. 2006). While plaintiffs have failed to adequately plead fraud, or to plausibly allege that the Banks will retain control of the post-IPO MasterCard in ways that may have an anticompetitive effect, it does not appear that they would be categorically unable to do so, and Judge Orenstein recommended granting leave to amend the supplemental complaint. Defendants' papers suggest three reasons why leave to replead should not be granted. Each lacks merit.

1. *The Antitrust Claims and Antitrust Standing*

As to the antitrust claims, the Banks argue **[*34]** that plaintiffs should be denied leave to replead because they cannot demonstrate that the Banks "acquired" stock as Section 7 defines that term, Banks' Obj. 20, an argument I have already rejected. The Banks also argue that plaintiffs cannot establish antitrust standing as a matter of law. This contention requires a more in-depth discussion.

The Second Circuit has recently advised that **HN12**[] to demonstrate antitrust standing, a plaintiff must first

> show that he suffered an antitrust injury, which is an injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. A court must also consider other factors relevant to standing (sometimes called the "efficient enforcer" factors), including: (1) the directness or indirectness of the asserted injury; (2) the existence of an identifiable class of persons whose self-interest would normally motivate them to vindicate the public interest in antitrust enforcement; (3) the speculativeness of the alleged injury; and (4) the difficulty of identifying damages and apportioning them among direct and indirect victims so as to avoid duplicative recoveries.

Ross v. Bank of Am., N.A., 524 F. 3d 217, 222 n.1 (2d Cir. 2008) **[*35]** (internal citations and quotation marks omitted).

The Banks advance two arguments that plaintiffs have failed to plead antitrust standing. First, in the memorandum supporting their motion to dismiss, they argue that the plaintiffs have not demonstrated antitrust injury because they "simply seek for themselves the benefit of a transaction engaged in by others." Mem. in Support of Bank Defs.' Mot. to Dismiss Class Pls.' First Supplemental Class Action Compl. ("Banks' Mem. in Support") 19. This argument misapprehends plaintiffs' theory of injury. The plaintiffs' theory, according to the Banks, is that the agreements structuring the IPO violate ***antitrust law*** because they prevent a hypothetical "consortium of merchants," *id*. at 19, "from acquiring control of MasterCard." *Id*. at 18. However, as discussed above, plaintiffs complain that the agreements ensure that the Banks retain control of MasterCard, not just that they prevent the plaintiffs from obtaining control of it. Thus, the injury pleaded by the banks is the harm they suffer from the anticompetitive restraints that only a Bank-controlled MasterCard would seek to continue or impose.

Viewed in this way, the plaintiffs' injury is readily **[*36]** distinguishable from the injuries deemed insufficient in Brunswick Corp. v. Pueblo Bowl-O-Mat, 429 U.S. 477, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977) and Bayou Bottling, Inc. v. Dr. Pepper Co., 725 F.2d 300, 304 (5th Cir. 1984). [4] According to plaintiffs, if the Banks continued to operate

[4] In *Brunswick Corp*., the operators of several bowling centers alleged antitrust **[*37]** injury based on the acquisition of rival, financially distressed bowling centers by a leading manufacturer of bowling equipment. 429 U.S. at 479-80. Their alleged injury was the "loss of income that would have accrued had the acquired centers gone bankrupt" and ceased operations. Id. at 487. The Supreme Court observed that plaintiffs "would have suffered the identical 'loss' but no compensable injury had the acquired

MasterCard as a joint venture, plaintiffs would suffer no injury because MasterCard's challenged practices would be struck down under *Section 1* of the Sherman Act as the product of an agreement in restraint of trade. And if the Banks actually surrendered control of MasterCard to any other entity, the restraints would be lifted because they only serve to benefit the Banks. In *Brunswick* and *Bayou Bottling*, the plaintiffs would have suffered the injuries they alleged even if the businesses in question had continued under their current management or been transferred to a stranger to the litigation. By contrast, the injury pleaded here will only occur if the agreements, which allegedly violate the Sherman and Clayton Acts, are not set aside. Accordingly, this is an injury "of the type the antitrust laws were intended to prevent." *Brunswick, 429 U.S. at 489*.

The Banks also contend, in their objections to the report and recommendation, that "where an antitrust plaintiff's alleged injury is caused by operation of applicable law, " that plaintiff cannot establish antitrust standing. Banks' Obj. 18. They base this argument on *RSA Media, Inc. v. AK Media Group, Inc., 260 F.3d 10 (1st Cir. 2001)*, a First Circuit case exploring the requisite causal connection between the alleged injury and the challenged conduct. Because this argument challenges whether plaintiff's injury "flows from" defendant's conduct, *Brunswick, 429 U.S. at 489*, and not whether the injury is "of the type the antitrust laws were intended to prevent," *id*., it is distinct from the standing argument raised in the Banks' initial **[*39]** memorandum. As a result, the plaintiffs argue that the Banks have waived this argument by failing to present it to the magistrate judge.

I agree. As I have observed elsewhere, ***HN13***[] the interests of justice are ill served by allowing a party to subsequently press an argument it failed to raise before the magistrate judge. Order at *2, *Meehan v. Gristede's Supermarkets, Inc*, No. 95-CV-2104 (JG), 1997 WL 1097751 (Sept. 25, 1997) (noting that failure to present an argument to the magistrate judge "handicap[s]" the deliberations of both the district judge and the magistrate judge). Indeed, several circuits have squarely held that the failure to raise an argument before the magistrate judge results in its waiver. *Marshall v. Chater, 75 F.3d 1421, 1426-27 (10th Cir. 1996)*; *Greenhow v. Sec'y of Health & Human Servs., 863 F.2d 633, 638 (9th Cir. 1988)*, *overruled on other grounds by* *United States v. Hardesty, 977 F.2d 1347 (9th Cir. 1992)* (en banc); *Borden v. Sec'y of Health and Human Servs., 836 F.2d 4, 6 (1st Cir. 1987)* (per curiam). [5]

In any event, the argument lacks merit. The plaintiffs' claimed injury does result, in part, from the operation of the antitrust laws, because they allege that MasterCard's new status as a single entity will allow it to impose or continue anticompetitive practices that a joint venture could not legally utilize. But the Banks have failed to demonstrate that this fact renders the nexus between the challenged transactions and the plaintiffs' injury too remote to furnish antitrust standing.

As mentioned, the Banks rely primarily on *RSA Media*, in which AK Media controlled 92% of the billboards in the Greater Boston market. *260 F.3d at 12*. In addition, a stringent state regulatory scheme "ma[de] it impossible, or at least nearly impossible" to obtain a permit to build a new billboard. *Id*. Plaintiff RSA wished to enter this market, but could **[*41]** not persuade landlords who owned the land on which AK Media's billboards were located to lease that

---

centers instead obtained refinancing or been purchased by 'shallow pocket' parents . . . ." *Id*. Because this loss bore "no relationship to the size of either the acquiring company or its competitors," the Court held that plaintiffs' injury "was not of the type that the statute was intended to forestall." *Id. at 487-88* (internal quotation marks omitted).

In *Bayou Bottling*, plaintiff Bayou Bottling, which sold Pepsi-Cola products, sought to acquire the franchise rights to distribute Dr. Pepper products from Wilcox, a franchisee who was retiring. *725 F.2d at 302*. Defendant Dr. Pepper, for unexplained "business reasons," urged Wilcox to sell his franchise to a bottler of Coca-Cola products, and he did so. *Id*. Plaintiff claimed that it suffered antitrust injury as a result of **[*38]** Dr. Pepper's conduct "because it was prevented from acquiring Wilcox's franchise, an acquisition which would have improved its business position and increased its profits." *Id. at 304*. Because plaintiff "would have suffered the identical loss of sales, and economies of scale if Wilcox had retained his operation or if he had sold to a third party," the Fifth Circuit held that this theory of antitrust injury was "foreclosed by the holding in *Brunswick*." *Id*.

[5] However, the issue appears to be an open question in the Second Circuit, and there is dicta from that court, in a case decided after my order in *Meehan*, suggesting **[*40]** that an argument may not be waived for appellate review unless a party fails to raise it before both the magistrate and the district judge. *See* *Grace v. Rosenstock, 228 F.3d 40, 54 (2d Cir. 2000)* (finding waiver only after noting that plaintiffs failed to raise issue both before the magistrate judge *and* in their objections to his report and recommendation).

land to RSA instead. It claimed that AK Media caused the landlords' reluctance by "drilling" them -- telling them that if they decided to lease to RSA, AK Media would tear down its billboard on the leased land, and RSA would be unable to receive a license to build a replacement. *Id. at 13*. On a motion for summary judgment, the district court found that RSA failed to raise a genuine issue of material fact as to whether its injury -- its inability to enter the billboard market -- was caused by AK Media's allegedly anticompetitive conduct. The First Circuit affirmed, agreeing that

RSA was not excluded from the market for outdoor billboards because of AK's threats; it was excluded because of the Massachusetts regulatory scheme that prevents new billboards from being built. In short, AK's representations to landlords did not prevent those landlords from leasing their land to RSA. Even if the landlords had, foolishly perhaps, leased their land to RSA, RSA would not have been able to erect new billboards on those properties. Any injury suffered by RSA is therefore unrelated to AK's allegedly **[*42]** exclusionary conduct, and RSA lacks antitrust standing.

Id. at 15.

As this language makes clear, the fatal defect in RSA's complaint was its failure to demonstrate that AK Media's conduct was a "cause-in-fact" of its alleged antitrust injury -- the court concluded that, had AK Media simply remained passive, RSA's injury would still occur, either because the landlords would rationally refuse to negotiate a lease, or because RSA would be unable to obtain the licensure to operate billboards on the leased land. In this case, by contrast, the defendants' conduct and the applicable law are *both* "but for" causes of the alleged injury -- if the Banks were not inclined to impose anticompetitive restraints, or if *Section 1* of the Sherman Act reached the internal conduct of single entities, the injury plaintiffs allege would not come to pass. ***HN14***[] The fact that the structure of the antitrust laws contributes to plaintiffs' alleged injury does not, by itself, deprive them of antitrust standing -- indeed, one purpose of *Section 7* of the Clayton Act is to prevent combinations that "will make it easier for leading members of the industry to collude on price and output without committing a detectable violation **[*43]** of *Section 1* of the Sherman Act." *FTC v. Elders Grain, Inc., 868 F.2d 901, 905 (7th Cir. 1989)*. Accordingly, plaintiffs have sufficiently pleaded that their injury "flows from that which makes defendants' acts unlawful." *Brunswick, 429 U. S. at 489*. The fundamental defect in their complaint is their failure to plausibly allege that this injury will in fact result from defendants' challenged actions, a defect they may attempt to address in an amended complaint.

2. The Fraudulent Conveyance Claim

As to the fraudulent conveyance claim, MasterCard argues that "Class Plaintiffs cannot allege any manner in which termination of MasterCard's special assessment right might plausibly hinder or delay Class Plaintiffs, as five large Bank Defendants as to whom this assessment right was allegedly held are Defendants in this action, and Class Plaintiffs would be able to satisfy any judgment against these Defendants directly." Reply Mem. of Law in Further Support of MasterCard's Mot. to Dismiss Class Pls.' First Supplemental Class Action Compl. 2. In effect, MasterCard argues that because the alleged fraud is legally impossible (because the Banks are directly liable for the antitrust violations asserted **[*44]** by plaintiffs), plaintiffs cannot demonstrate fraudulent intent. This argument distorts the language of *Section 276*. ***HN15***[] It is not necessary for the plaintiffs to plead that the challenged transaction will actually hinder or delay them, they must only plead that the transaction was undertaken with the intent to do so.

CONCLUSION

For the reasons stated above, the motion to dismiss plaintiffs' supplemental complaint is granted in its entirety. Plaintiffs, however, may amend their complaint to address the defects noted in this opinion.

So ordered.

JOHN GLEESON, U.S.D.J.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Motions to Dismiss, Failure to State Claim**

To survive a *Fed. R. Civ. P. 12(b)(6)* motion, the plaintiff must plead 'enough facts to state a claim to relief that is plausible on its face. While a complaint attacked by a *Rule 12(b)(6)* motion to dismiss does not need detailed factual allegations, a plaintiff's obligation to provide the grounds of his entitlement to relief requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do. Factual allegations must be enough to raise a right to relief above the speculative level, on the assumption that all the allegations in the complaint are true (even if doubtful in fact). The court accepts all well-pleaded facts as true, viewing them in the light most favorable to the plaintiff.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > Sherman Act > Claims

HN2[] **Actual Monopolization, Claims**

To establish a violation of § 2 of the Sherman Act, a plaintiff must prove two elements: (1) possession of monopoly power in the relevant market, and (2) that the monopolist achieved or is maintaining monopoly power through anticompetitive conduct.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN3[] **Inequitable Conduct, Anticompetitive Conduct**

In a antitrust context, a patent's value is significantly enhanced after the patent is incorporated in a standard.

Antitrust & Trade Law > Clayton Act > Remedies > Damages

HN4[] **Remedies, Damages**

When a private plaintiff seeks damages under § 4 of the Clayton Act, that plaintiff must show not only injury to its business or property, but also that the injury is an antitrust injury. An antitrust injury is defined as an injury of the type the antitrust laws were intended to prevent. In other words, the injury should reflect the anticompetitive effect of the violation.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN5[] **Sherman Act, Scope**

The antitrust laws such as the Sherman Act are designed to protect competition, not competitors.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

HN6[] **Regulated Practices, Monopolies & Monopolization**

In a antitrust context, typical anticompetitive effects include increased prices and decreased output.

Antitrust & Trade Law > Regulated Industries > Communications > General Overview

HN7[] **Regulated Industries, Communications**

In a antitrust context, telecommunication industry standards, without the proper safeguards, are inherently anticompetitive. It follows that when an entity side-steps such safeguards in an effort to return the standard to its natural anticompetitive state, anticompetitive effects are inevitable.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > Sherman Act > Claims

HN8[] **Actual Monopolization, Claims**

The mere possession of monopoly power, and the concomitant charging of monopoly prices is not only not unlawful, it is an important element of the free-market system. As a result, the Sherman Act only makes possession of monopoly power illegal if it is accompanied by an element of anticompetitive conduct. For the harm to competition to be actionable, Sherman Act plaintiff must show that it was brought about by anticompetitive conduct, as opposed to growth or development as a consequence of a superior product, business acumen, or historic accident.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN9[] **Motions to Dismiss, Failure to State Claim**

To survive a motion to dismiss, the law merely requires that a factual allegation be enough to raise a right to relief above the speculative level, on the assumption that all the allegations in the complaint are true (even if doubtful in fact).

Opinion by: A. JOE FISH

Opinion

[*790] **MEMORANDUM OPINION AND ORDER**

Before the court are various motions of the defendant Motorola, Inc. ("Motorola" or "the defendant"). Motorola moves to dismiss all of the claims brought by the plaintiffs, Research in Motion Limited and Research in Motion Corporation **[**2]** (collectively, "the plaintiffs" or "RIM"). Motorola also moves, in the alternative, to bifurcate and stay RIM's antitrust and contract claims. Finally, Motorola seeks to dismiss, stay, or transfer RIM's declaratory judgment actions. For the reasons discussed below, all of the motions are denied.

I. BACKGROUND

A. Factual Background

This is an action brought by RIM against Motorola for patent infringement, breach of contract, and violations of the antitrust laws. *See generally* Complaint. Both Motorola and RIM are in the business of developing and marketing mobile wireless communication devices. To work properly, these devices must connect to a network provided by a mobile wireless carrier. Complaint P 15. These carriers enable consumers to place and receive telephone calls, send and receive e-mails, and connect to the Internet through mobile wireless handsets. *Id*. New wireless technologies are constantly in development. But before they can be broadly commercialized, service providers and device manufacturers must agree on common technology specifications. In other words, standards must be set. *Id*. P 16.

Standards are important for several reasons. First, they facilitate the adoption and **[**3]** advancement of technology as well as the development of products that can interoperate with one another. *Id*. P 20. Standards also lower costs by increasing product manufacturing volume, and they increase price competition by eliminating "switching costs" for consumers who desire to switch from products manufactured by one firm to those manufactured by another. *Id*. P 21. They also lead to earlier adoption of new technology. *Id*. There is, however, one downside to standards: they create "essential patents." See *id*. P 23. The term "essential patents" refers to patents that are essential to a standard -- *i.e*., patents that claim technologies selected by a standards development organization ("SDO"). *Id*. P 1. Once a patent becomes an essential patent, it gains undue significance as a result. *Id*. P 5. Companies that produce products governed by a standard become "locked in" to the technologies **[*791]** included in the standard. *Id*. P 23. Customers have no practical choice other than to buy products that comply with the standard. Thus, the owners of essential patents gain market power.

In order to reduce the likelihood that owners of essential patents will abuse their market power, SDOs have adopted **[**4]** rules, policies, and procedures that control the disclosure and licensing of essential patents. *Id*. P 25. These rules, policies, and procedures are known as intellectual property rights policies ("IPR policies"). *Id*. IPR policies usually require owners of essential patents to commit to license those patents on fair, reasonable, and nondiscriminatory ("FRAND") terms. *Id*. PP 1, 27. These "FRAND commitments" are intended to prevent owners of essential patents from acquiring too much of the market power that would otherwise be inherent in owning an essential patent. *Id*. P 28.

RIM and Motorola both produce wireless communication devices. RIM offers the well-known BlackBerry(R) device, with built in Wi-Fi capabilities. *Id*. PP 8, 29, 35. Motorola offers similar devices. *Id*. P 10. As a result, the two companies are in direct competition. *Id*. PP 34-35. Motorola, however, is the owner of several essential patents. Its patents have been incorporated into standards set by the European Telecommunications Standards Institute ("ETSI"), and the Institute of Electrical and Electronics Engineers ("IEEE"). See *id*. PP 42, 48, 59-80. Both ETSI and IEEE require all patent owners to promise that they will **[**5]** license any patents incorporated into their standards on FRAND terms. *Id*. PP 60, 61, 76. Motorola's agreements with ETSI and IEEE require it to license its essential patents on FRAND terms. See *id*.

In 2003, Motorola licensed several of its essential and non-essential patents to RIM. *Id*. PP 84-86. Motorola and RIM entered into a Cellular Essential Properties Cross License Agreement ("Cross License Agreement"). *Id*. This agreement gave RIM a license to use Motorola's essential patents for five years, and provided that in 2007, the parties would begin good faith negotiations to extend the contract. *Id*. When the license expired at the end of 2007, RIM sought to enter negotiations to extend the contract. *Id*. P 88. RIM avers that Motorola refused to negotiate reasonably and will not re-license the patents at a FRAND price. *Id*. PP 88-89.

RIM contends that Motorola's refusal to negotiate in good faith constitutes a breach of both the Cross License Agreement and the commitments Motorola made to IEEE and ETSI to license its essential patents on FRAND terms. *Id*. PP 162-67, 175-79. RIM also asserts a claim against Motorola under a theory of promissory estoppel. *Id*. PP 168-74. RIM maintains that Motorola **[**6]** promised potential licensees, via its commitments to IEEE and ETSI, that it would license its essential patents on FRAND terms. *Id*. P 169. Motorola insists that because other wireless device companies, like RIM, foreseeably relied on this promise, Motorola is estopped to deny it. *Id*. PP 170-72.

RIM brings two other causes of action against Motorola. Based on Motorola's alleged failure to license its patents on FRAND terms, RIM brings a claim for violation of *Section 2* of the Sherman Act. *Id*. PP 180-85. Finally, RIM asserts that Motorola has willfully infringed nine of RIM's patents. *Id*. PP 115-61.

B. Procedural Background

RIM filed this suit against Motorola on February 16, 2008. Only minutes later, on the same day, Motorola filed suit against RIM in the United States District Court for the Eastern District of Texas. Plaintiff Research in Motion's Notice of Supplemental Authority in Opposition to Motorola's **[*792]** Motion to Dismiss, Stay or Transfer ("Notice of

Supplemental Authority") at 1. RIM moved to transfer Motorola's suit to the Northern District of Texas. *Id*. Judge T. John Ward of the Eastern District granted this motion on October 17, 2008. Appendix in Support of Plaintiff Research **[**7]** in Motion's Notice of Supplemental Authority in Opposition to Motorola's Motion to Dismiss, Stay or Transfer ("Appendix to Notice of Supplemental Authority") at 1. His decision rested on the "first-filed" rule, holding that, although RIM filed its suit only minutes earlier than Motorola, the rule still applied. *Id*. RIM states that it will seek to consolidate Motorola's case with this one as soon as it is transferred to the Northern District of Texas. Notice of Supplemental Authority at 1.

II. ANALYSIS

A. The Motions to Dismiss

1. 12(b)(6) Standard

HN1[] "To survive a *Rule 12(b)(6)* motion, the plaintiff must plead 'enough facts to state a claim to relief that is plausible on its face.'" *In re Katrina Canal Breaches Litigation, 495 F.3d 191, 205 (5th Cir. 2007)* (quoting *Bell Atlantic Corporation v. Twombly, 550 U.S. 544, 127 S.Ct. 1955, 1974, 167 L. Ed. 2d 929 (2007))*. "While a complaint attacked by a *Rule 12(b)(6)* motion to dismiss does not need detailed factual allegations, a plaintiff's obligation to provide the grounds of his entitlement to relief requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Twombly, 127 S.Ct. at 1964-65* (citations, **[**8]** quotations marks, and brackets omitted). "Factual allegations must be enough to raise a right to relief above the speculative level, on the assumption that all the allegations in the complaint are true (even if doubtful in fact)." *Katrina Canal, 495 F.3d at 205* (quoting *Twombly, 127 S.Ct. at 1965*). "The court accepts all well-pleaded facts as true, viewing them in the light most favorable to the plaintiff." *Id*. (internal quotation marks omitted) (quoting *Martin K. Eby Construction Company v. Dallas Area Rapid Transit, 369 F.3d 464 (5th Cir. 2004))*.

2. The Motion to Dismiss the Antitrust Claim

RIM's antitrust claim alleges that Motorola violated *Section 2* of the Sherman Act. Complaint PP 180-85. ***HN2***[] To establish such a violation, RIM must prove two elements: (1) possession of monopoly power in the relevant market, and (2) that the monopolist achieved or is maintaining monopoly power through anticompetitive conduct. *Verizon Communications Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 407, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*. Motorola moves to dismiss RIM's antitrust claim under *Rule 12(b)(6)* on three separate grounds. First, Motorola argues that it does not have monopoly power in the relevant market. Defendant **[**9]** Motorola, Inc.'s Brief in Support of its Motion to Dismiss or Stay Plaintiffs' Antitrust and Contract Claims; And to Dismiss, Stay or Transfer Plaintiffs' Declaratory Judgment Patent Claims ("Motion to Dismiss") at 11. Second, Motorola argues that RIM has not pled that Motorola engaged in anticompetitive conduct. *Id*. Finally, Motorola asserts that RIM has not pled that the injury it suffered was an antitrust injury. *Id*. These grounds are discussed separately below.

a. *Does Motorola Have Monopoly Power?*

It is not clear that Motorola intends its alleged lack of monopoly power to be a ground for dismissal. Motorola's Motion to Dismiss merely references this argument obliquely in a footnote. The court will nevertheless address it briefly.

[*793] Motorola's sole argument on this point is that its mere ownership of essential patents does not per se bestow market power. Motion to Dismiss at 15 n. 18. Motorola's support for this contention comes from *Illinois Tool Works Inc. v. Independent Ink, Inc*., which states that the Federal Trade Commission should not presume that a patent, copyright, or trade secret necessarily confers market power upon its owner. *547 U.S. 28, 45-46, 126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006)*. RIM, however, correctly **[**10]** points out that this statement merely sets forth the uncontroversial proposition that "a patent does not necessarily confer market power upon the patentee." *Id. at 45*. *Independent Ink* does not address holders of *essential* patents, that is, patents that are incorporated into a standard. Essential patents are very different from normal patents, as the Third Circuit explains in *Broadcom Corporation v. Qualcomm Incorporated, 501 F.3d 297, 314 (3rd Cir. 2007)*. *Broadcom* states that non-essential patents do not confer monopoly power upon the owner because the value of a patent "is limited when alternative technologies exist." *Id*. A standard, however, by definition, eliminates alternative technologies. *Id*. As a result, ***HN3***[] a patent's value is "significantly enhanced . . . after the patent is incorporated in a standard." *Id*. Motorola's off-hand argument that it does not have a monopoly just because it has a patent is therefore unpersuasive. The argument fails to address the key fact that Motorola owns an *essential* patent. For these reasons, the court denies Motorola's motion to dismiss RIM's antitrust claim on this ground.

b. *Has RIM Suffered an Antitrust Injury?*

Next, Motorola argues that RIM has **[**11]** not pled that it suffered an antitrust injury. Motion to Dismiss at 11. RIM seeks treble damages under *Section 4* of the Clayton Act for Motorola's alleged violation of *Section 2* of the Sherman Act. Plaintiff Research in Motion's Opposition to Defendant Motorola, Inc.'s Motion to Dismiss or Stay Plaintiff's Antitrust and Contract Claims and to Dismiss, Stay or Transfer Plaintiffs' Declaratory Judgment Patent Claims ("Response") at 25. ***HN4***[] When a private plaintiff seeks damages under *Section 4* of the Clayton Act, that plaintiff must show not only injury to its business or property, but also that the injury is an antitrust injury. *Norris v. Hearst Trust, 500 F.3d 454, 465 (5th Cir. 2007)*. The Court in *Norris* defined an antitrust injury as an "injury of the type the antitrust laws were intended to prevent." *Id*. In other words, the injury "should reflect the anticompetitive effect . . . of the violation." *Id*.

RIM claims it has suffered the following injuries as a result of Motorola's conduct:

a) The threat of being forced to pay supracompetitive royalties;

b) The uncertainty created by Motorola's refusal to recognize the FRAND license and negotiate a FRAND rate;

c) The inability to obtain licenses **[**12]** to Motorola's essential patents on FRAND terms, and

d) Injury to its business and property, specifically, the threat of imminent loss of profits, loss of current and potential customers, and loss of goodwill and product image.

Response at 25-27. This list of injuries all stem from the same complaint: that Motorola has refused to honor its promise to offer its patents on FRAND terms. RIM claims this refusal has left it in a Catch-22. On the one hand, RIM could acquiesce to Motorola's non-FRAND terms. On the other hand, if it refuses to do so, its products (such as the Blackberry(R)) will no longer meet the SDOs' standards and RIM will be at a major competitive disadvantage. **[*794]** RIM argues that antitrust laws were designed to prevent just this sort of situation, and that it has therefore suffered an antitrust injury. Response at 26.

Assuming, as the court must at this stage of the proceedings, that all these facts are true, it is clear that RIM has suffered injuries as a result of Motorola's conduct. To qualify as *antitrust* injuries, however, they must be "of the type the antitrust laws were intended to prevent." *Norris, 500 F.3d at 465*. It is axiomatic that ***HN5***[] the antitrust laws were designed **[**13]** to protect "competition[,] not competitors." *Brunswick Corporation v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*. This means that RIM must plead more than just the injuries it has sustained; it must also show that Motorola's conduct negatively affects competition. *Id*.

RIM argues that Motorola's conduct has harmed competition. In fact, it asserts that Motorola's conduct has "***eliminated*** -- let alone injured -- competition in the relevant upstream technologies markets." Response at 24 (emphasis in original). In essence, RIM argues, Motorola's possession of an essential patent has turned Motorola into a gatekeeper. See *id*. Any company wishing to compete with Motorola has to have its permission, giving it the power to eliminate all competition, should it so desire. RIM argues that the danger for abuse inherent in Motorola's position is the very reason IEEE and ETSI required Motorola to promise it would allow competitors to "pass through the gates" on FRAND terms. Complaint PP 23-28. The court agrees. Even if Motorola's conduct does not eliminate competition entirely, it has the power to harm it. If Motorola licenses only at exorbitant rates, it will force its competitors to increase **[**14]** prices in the downstream market in order to make a profit. This increase in prices for all products except Motorola's will harm competition. See *Anago, Inc. v. Tecnol Medical Products, Inc., 976 F.2d 248, 249 (5th Cir. 1992)* (holding that ***HN6***[] "[t]ypical anticompetitive effects include increased prices and decreased output"), *cert. dismissed*, *510 U.S. 985, 114 S. Ct. 491, 126 L. Ed. 2d 441 (1993)*.

There are several cases supporting RIM's contention that Motorola's behavior is harmful to competition. The United States Supreme Court, as well as several circuit courts, have held that this type of gate-keeping causes exactly the kind of harm antitrust laws are designed to prevent. In *Allied Tube & Conduit Corporation v. Indian Head, Inc., 486 U.S. 492, 108 S. Ct. 1931, 100 L. Ed. 2d 497 (1988)*, the Supreme Court addressed both the risks and benefits of standard-setting. The case involved a steel manufacturing corporation that set out to convince an SDO not to change its standards in a way that would negatively affect steel manufacturers. *Id. at 495-97*. The standards-setting organization, the National Fire Protection Association, published the National Electric Code each year. Until 1981, the Code had approved only steel as an electrical conduit. When a new material **[**15]** suitable for use as an electrical conduit became available, the steel company rounded up everyone it could to vote against incorporating this new material into the code as another viable material for electrical conduits. *Id*. (stating the facts). The issue in the case was whether this behavior violated *Section 1* of the Sherman Act by unreasonably restraining trade or whether the steel company was immune from such liability because it was merely lobbying a legislative body for the result it desired. *Id. at 495* (citing *Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)* (providing antitrust immunity for individuals who **[*795]** petition the government to adopt a rule or law that would restrain trade)).

The Court held that the steel company did not enjoy any such immunity. *Id. at 509-10*. The Court noted the benefits of standards, stating that they "can have significant procompetitive advantages" when they are "based on the merits of objective expert judgments. " *Id. at 501*. But the Court was quick to point out that in order for any procompetitive advantages to come out of the existence of standards, the standards-setting organizations must have "procedures that **[**16]** prevent the standard-setting process from being biased by members with economic interests in stifling product competition." *Id*. Otherwise, a standard is nothing more than an implicit "agreement not to manufacture, distribute, or purchase certain types of products." *Id*. The Court held that the steel company, which had a clear economic interest in stifling competition from this new material, was biasing the process. It therefore refused to grant the steel company antitrust immunity. *Id. at 509-10*.

Although the issue in *Allied Tube* was very different than the issue here, the case highlights the importance of keeping biased entities out of the standard-setting process. The opinion implies that, without safeguards against bias, the very existence of standards is inherently anti-competitive. *Id. at 501*. In 2007, the Third Circuit applied the holding of *Allied Tube* to a set of facts remarkably similar to those at hand. *Broadcom Corp. v. Qualcomm, Inc., 501 F.3d 297 (3d Cir. 2007)*, involved two mobile wireless telephone companies, Broadcom Corporation ("Broadcom") and Qualcomm, Inc. ("Qualcomm"). Broadcom filed suit against Qualcomm, alleging that Qualcomm, a member of ETSI, had convinced ETSI **[**17]** to incorporate its technology into its standards "in reliance on . . . Qualcomm's commitment to license that technology on FRAND terms." *Id. at 304*. Broadcom argued that Qualcomm had later gone back on its word, and was "withholding favorable pricing" in order to obtain a bigger market share. *Id*. Based on these factual allegations, the complaint asserted a claim under *Section 2* of the Sherman Act. *Id. at 305*.

Qualcomm brought a *Rule 12(b)(6)* motion to dismiss in the district court. The district court granted the motion. The opinion reasoned that, although Qualcomm may have tricked ETSI into incorporating its technology into the standard, this was "of no moment under ***antitrust law*** . . . because no matter which company's patented technology ultimately was chosen, the adoption of a standard would have eliminated competition." *Id. at 305*. In other words, the district court believed that standards inevitably eliminated competition, and that FRAND commitments were powerless to stop it. The Third Circuit reversed. The Circuit opinion criticized the lower court for failing to realize the importance of the FRAND commitments. The court stated that the district court failed to even consider that **[**18]** "the FRAND commitments that SDOs required of vendors were intended as a bulwark against unlawful monopoly." *Id*. Alternatively, the court stated, the "SDOs might have chosen nonproprietary technologies for inclusion in the standard." *Id*. In short, the court pointed out, there were several ways the SDOs might have prevented the use of standards from automatically granting monopoly power to essential patent holders. *Broadcom* held that FRAND commitments are one such method. *Id*. This court finds the reasoning in *Broadcom* persuasive and joins the Third Circuit in concluding that these FRAND commitments are intended as a "bulwark" against the unlawful accumulation of monopoly power that antitrust laws are designed **[*796]** to prevent. Thus, Motorola's efforts to side-step this bulwark, as alleged in this case, are harmful not only to RIM but to competition in general.

In order for RIM to properly plead that it has suffered an antitrust injury, it must show not only injury to itself but injury to competition as well. *Brunswick, 429 U.S. at 489*. RIM has sufficiently alleged harm to competition. Both the Third Circuit, in *Broadcom*, and the Supreme Court, in *Allied Tube*, have stated that ***HN7***[] standards, without **[**19]** the proper safeguards, are inherently anticompetitive. It follows that when an entity side-steps these safeguards in an effort to return the standard to its natural anti-competitive state, anti-competitive effects are inevitable. Motorola's breach of the commitments to IEEE and ETSI, as a result, is harmful to competition. RIM has properly pled harm to both itself and to competition. Motorola's motion to dismiss on this ground is denied.

c. *Was Motorola Engaged in Anticompetitive Conduct?*

Motorola's final argument in support of its motion to dismiss the antitrust claim is that Motorola was not engaged in anticompetitive conduct. Motion to Dismiss at 11. The court has already concluded that, according to the allegations in the complaint, Motorola's conduct is harmful to competition. Motorola's role as a gatekeeper gives it the power to eliminate, and thus to harm, competition. If, as RIM pleads, Motorola has abused this position, such conduct will harm or eliminate competition. Harm or elimination of competition, however, is *not* unlawful under the Sherman Act. See *Verizon Communications, Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 407, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*. In fact, the law encourages **[**20]** attainment of monopoly by squeezing out competitors. As the United States Supreme Court observed recently, ***HN8***[] "The mere possession of monopoly power, and the concomitant charging of monopoly prices is not only not unlawful, it is an important element of the free-market system." *Id*. As a result, the Sherman Act only makes possession of monopoly power illegal if it is "accompanied by an element of anticompetitive *conduct*." *Id*. Here, although it is easy to see how Motorola's role as "gatekeeper" gives it monopoly power that could easily harm competition, the law requires more than this before liability may be imposed under the Sherman Act. *Id*. For the harm to competition to be actionable, RIM must show that it was brought about by anticompetitive conduct, as opposed to "growth or development as a consequence of a superior product, business acumen, or historic accident." *United States v. Grinnell Corporation, 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*.

RIM pleads that IEEE and ETSI did not incorporate Motorola's technology into their standards because of Motorola's business acumen or because its technology was superior. Instead, RIM asserts, IEEE and ETSI relied on Motorola's false promises that it would **[**21]** license its patents on FRAND terms. Response at 15. ***HN9***[] To survive a motion to dismiss, the law merely requires that a factual allegation "be enough to raise a right to relief above the speculative level, on the assumption that all the allegations in the complaint are true (even if doubtful in fact)." *Katrina Canal, 495 F.3d at 205* (internal quotation marks omitted) (quoting *Twombly, 127 S.Ct. at 1965*). As a result, this court must accept as true the allegation that Motorola obtained its position of power in the market not as a consequence of a superior product, business acumen or historic accident, but by misrepresenting its intentions. Motorola's motion to dismiss RIM's antitrust claim on the grounds that Motorola did not **[*797]** engage in anticompetitive conduct is therefore denied.

3. The Motion to Dismiss RIM's Contract Claims

RIM argues that Motorola has breached two separate contracts. First, RIM argues that Motorola has breached the contracts it made with IEEE and ETSI to license its patents on FRAND terms. Complaint P 83. Next, RIM argues that Motorola breached the contract it made with RIM in March of 2003. *Id*. P 84. On March 28, 2003, Motorola and RIM entered into the Cross License Agreement. **[**22]** This agreement gave RIM license to use Motorola's essential patents for five years, and provided that in 2007, the parties would begin good faith negotiations to extend the contract. *Id*. P 85. During the course of this five years, RIM's share of handset sales grew, while Motorola's shrank. *Id*. P 87. RIM argues that Motorola sought to regain its place in the market by demanding non-FRAND royalties with respect to its essential patents. *Id*. P 88. RIM contends that such conduct breaches the Cross License Agreement and the agreements Motorola made with IEEE and ETSI.

Motorola argues that these breach of contract claims should be dismissed. First, it contends that RIM has not adequately pled that Motorola breached its obligation to license the essential patents on FRAND terms. Motion to Dismiss at 20. All RIM can prove, it contends, is that the two parties have not yet agreed to FRAND terms. *Id*. at 16.

Motorola points out that just because the parties have not yet settled on FRAND terms does not mean Motorola is unwilling to license the patent on FRAND terms. *Id*.

This argument fails. RIM's complaint alleges that Motorola "has refused to extend FRAND . . . licensing terms to RIM for any of **[**23]** Motorola's purportedly essential patents . . . and has instead demanded of RIM terms that are unfair, unreasonable, and, on information and belief, discriminatory." Complaint P 83. Motorola's argument merely contradicts the factual accuracy of this statement. At this stage of the case, the court takes RIM's pleadings as true. RIM has adequately pled that Motorola did not honor its promise to license on FRAND terms. Motorola's contention otherwise is entitled to no weight on a *Rule 12(b)(6)* motion.

Motorola's second argument in support of dismissing the contract claims is that RIM has not suffered any damages. Motion to Dismiss at 20. The defendant contends that even if it has breached its agreements with RIM or the SDOs, eventually RIM will receive a FRAND license; either this court will determine FRAND terms or the parties will settle on FRAND terms on their own. *Id*. at 20-21. Either way, it contends, RIM will incur no injury.

This argument is inherently flawed. Motorola argues that RIM has two paths before it, both of which lead to fair licensing terms. One of these paths is this court; the other is negotiation outside the court. RIM pleads -- and the court must accept as true at the **[**24]** *Rule 12(b)(6)* stage -- that Motorola has already refused to negotiate fair terms outside this court. Motorola has blocked that path. Now, Motorola argues, the court should block the only other available path by dismissing this case. Motorola is correct that, in the end, RIM will receive fair licensing terms. But if those terms must be dictated by this court, it cannot dismiss the action before it has a chance to do so. The court will not dismiss RIM's breach of contract claims on the ground that it has suffered no injury.

B. <u>The Motion to Bifurcate and Stay the Antitrust and Contract Claims</u>

Motorola argues that if the court does not dismiss RIM's contract and antitrust **[*798]** claims, it should bifurcate those claims from the patent infringement claims pursuant to *Federal Rule of Civil Procedure 42(b)*. Motion to Dismiss at 23. It also urges the court to stay those claims pending resolution of the patent claims. Motorola argues that bifurcating and staying these claims will achieve judicial economy and efficiency. *Id*.

Motorola's desire to have the claims bifurcated appears to arise from its desire to try the patent claims in the United States District Court for the Eastern District of Texas. Motorola **[**25]** originally filed its patent infringement claims against RIM in the Eastern District. Notice of Supplemental Authority at 1. When RIM moved to transfer that case to the Northern District of Texas for possible consolidation with this case, Motorola vigorously opposed the motion and fought to keep the case in the Eastern District. Ultimately, Motorola lost that fight. Judge T. John Ward in the Eastern District transferred Motorola's suit against RIM to the Northern District of Texas on October 17, 2008. Appendix to Notice of Supplemental Authority at 1. Motorola filed the briefs supporting the instant motion before Judge Ward granted RIM's motion to transfer. As a result, Motorola's argument assumes that its case against RIM is still pending in the Eastern District. It argues that both parties have been involved in patent lawsuits in the Eastern District and that the court there is "already very familiar with the parties, their products, and the technological background common to the Motorola and RIM patent actions." Defendant Motorola, Inc.'s Reply Brief in Support of its Motion to Dismiss or Stay Plaintiffs' Antitrust and Contract Claims; and to Dismiss, Stay or Transfer Plaintiffs' **[**26]** Declaratory Judgment Patent Claims at 17. In short, Motorola argues that this court is equipped to handle its antitrust and contract claims, but that the Eastern District is better equipped to decide the patent infringement claims. This case, however, no longer has any connection with the Eastern District of Texas. Judge Ward transferred Motorola's suit against RIM to the Northern District of Texas. Notice of Supplemental Authority at 1-2. Therefore, the court will not bifurcate the patent claims from the antitrust and contract claims so that the patent claims may be tried in the Eastern District.

C. <u>The Motion to Dismiss or Transfer RIM's Declaratory Judgment Claims</u>

Motorola's final request is that the court dismiss, stay, or transfer RIM's declaratory judgment patent claims in favor of Motorola's Eastern District of Texas action. Motion to Dismiss at 29-30. RIM filed a declaratory judgment action that Motorola claims is the "mirror image" of its claims against RIM filed in the Eastern District of Texas. *Id*. at 29. In the alternative, Motorola requests that the court stay the declaratory judgment actions pending resolution of the claims in the Eastern District, or transfer the claims **[**27]** to the Eastern District for consolidation. *Id*. As discussed above, Judge Ward of the Eastern District has already transferred Motorola's suit against RIM to the Northern District of Texas. Appendix to Notice of Supplemental Authority at 1-2. Motorola's request that the court dismiss stay or transfer RIM's claims in favor of the Eastern District case is denied as moot.

III. CONCLUSION

For the reasons discussed above, Motorola's motions to dismiss, bifurcate, stay, or transfer RIM's claims are **DENIED**.

SO ORDERED.

December 11, 2008.

/s/ A. Joe Fish

A. JOE FISH

Evidence > ... > Exemptions > Statements by Coconspirators > Statements Furthering Conspiracy

HN1[] **Burdens of Proof, Preponderance of Evidence**

Fed. R. Evid. 801(d)(2)(E) permits the admission of an out-of-court statement by a coconspirator of a party during the course and in furtherance of the conspiracy. For a statement to be admissible, a plaintiff must establish by a preponderance of the evidence that a conspiracy existed, that the declarant and defendant against whom the statement is offered were members of the conspiracy, and that the statement was made in the course of and in furtherance of the conspiracy. In making the determination of whether a conspiracy has been established, the court considered the testimony and exhibits offered at the hearing, as well as plaintiff's proffer and defendants' responses.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Evidence > Inferences & Presumptions > Inferences

HN2[] Sherman Act, Scope

It has long been settled that explicit agreement is not a necessary part of a Sherman Act conspiracy. However, ***antitrust law*** limits the range of permissible inferences from ambiguous evidence in a case under *§ 1* (*15 U.S.C.S. § 1*) of the Act. Conduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy. A plaintiff must present evidence that tends to exclude the possibility that the alleged conspirators acted independently, and, if the factual context renders the plaintiff's claim implausible--if the claim is one that simply makes no economic sense--the plaintiff must come forward with more persuasive evidence to support its claim than would otherwise be necessary.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Evidence > Types of Evidence > Circumstantial Evidence

Evidence > Inferences & Presumptions > Inferences

HN3[] Sherman Act, Scope

While circumstantial evidence may support the existence of an illegal agreement under *§ 1* (*15 U.S.C.S. § 1*) of the Sherman Act, the acceptable inferences that may be drawn from it vary with the plausibility of the plaintiff's theory and the danger associated with such inferences. Consciously parallel behavior may contribute to a finding of antitrust conspiracy, but it is insufficient, standing alone, to prove conspiracy. Such parallel behavior may, however, support the existence of an illegal agreement when augmented by additional evidence from which an understanding among the parties may be inferred. The required additional evidence may include a showing that the parties are acting against their own individual business interests, or that there is motivation to enter into an agreement requiring parallel behavior. Courts traditionally have found concerted action even where one of the alleged conspirators may have been coerced to participate in an illegal scheme.

Evidence > ... > Exemptions > Statements by Coconspirators > General Overview

HN4[] Exemptions, Statements by Coconspirators

In determining whether, for purposes of the co-conspirator hearsay exception, the evidence makes the existence of a conspiracy more likely than not, a court may consider both hearsay and independent evidence. Under Bourjaily, there need only be some independent evidence linking the defendant to the conspiracy. Such independent evidence may be sufficient even when it is not substantial. Individual pieces of evidence, insufficient in themselves to prove a point, may in cumulation prove it. The sum of an evidentiary presentation may well be greater than its constituent parts. A piece of evidence, unreliable in isolation, may become quite probative when corroborated by other evidence.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN5[] Sherman Act, Scope

Independent action is not proscribed, and a mill of course has a right to deal, or refuse to deal, with whomever it likes, as long as it does so independently. Something more than evidence of complaints is needed, or mere acquiescence to a competitor's complaints about a price-cutter be present to infer a conspiracy.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Evidence > Inferences & Presumptions > Inferences

HN6[] **Sherman Act, Scope**

An inference of antitrust conspiracy may be based on response to complaints, when coupled with evidence of "plus" factors, such as threats or coercion.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

Evidence > Admissibility > Expert Witnesses

HN7[] **Expert Witnesses, Daubert Standard**

In accord with *Fed. R. Evid. 702*, the U.S. Supreme Court has determined that the trial judge must ensure that any and all scientific testimony or evidence is not only relevant, but reliable. This gatekeeper function applies to all expert testimony, not merely to that deemed to be scientific in nature.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

Evidence > Admissibility > Expert Witnesses

Evidence > Admissibility > Expert Witnesses > Helpfulness

HN8[] **Expert Witnesses, Daubert Standard**

See *Fed. R. Evid. 702*.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

Evidence > Admissibility > Expert Witnesses

Evidence > ... > Testimony > Expert Witnesses > Qualifications

HN9[] **Expert Witnesses, Daubert Standard**

In determining the admissibility of expert testimony, a court initially must decide whether the proposed expert is qualified to offer an opinion on the issues involved in the particular case. A qualified expert must possess the necessary knowledge, skill, experience, training or education relevant to the facts at issue. The court then must conduct a two-part inquiry to fulfill its Daubert gatekeeping role, determining first if the expert's proffered testimony has a reliable basis in the knowledge and experience of his or her discipline. In making this determination, the district court must decide whether the reasoning or methodology underlying the testimony is scientifically valid.

Second, the district court must inquire into whether proposed testimony is sufficiently relevant to the task at hand. Is there an appropriate fit between the evidence offered and the material issue to which it is directed?

Evidence > Admissibility > Expert Witnesses > Daubert Standard

Evidence > Admissibility > Expert Witnesses

HN10[] Expert Witnesses, Daubert Standard

In determining whether an expert's testimony meets Fed. R. Evid. 702's reliability standard, Daubert and Rule 702 provide a non-exclusive list of factors which a court should consider if they are applicable. As Fed. R. Evid. 702 cmt. (2000 Amendments) notes: The specific factors explicated by Daubert are (1) whether the expert's technique or theory can be or has been tested--that is, whether the expert's theory can be challenged in some objective sense, or whether it is instead simply a subjective, conclusory approach that cannot reasonably be assessed for reliability; (2) whether the technique or theory has been subject to peer review and publication; (3) the known or potential rate of error of the technique or theory when applied; (4) the existence and maintenance of standards and controls; and (5) whether the technique or theory has been generally accepted in the scientific community.

Evidence > Admissibility > Expert Witnesses

HN11[] Admissibility, Expert Witnesses

Fed. R. Evid. 702 cmt. (2000 Amendments) identifies a number of factors which may, in a proper case, be relevant to the determination of whether expert testimony is sufficiently reliable. These include: (1) whether the expert proposes to testify about matters growing naturally and directly out of research he/she has conducted independent of the litigation, or whether the opinion was developed expressly for the purpose of testifying, (2) whether the expert has unjustifiably extrapolated from an accepted premise to an unfounded conclusion, (3) whether the expert has adequately accounted for obvious alternative explanations, (4) whether the expert is being as careful in his/her litigation consulting work as he or she would in their regular professional work, and (5) whether the particular field of expertise claimed by the expert is one known to reach reliable results for the type of opinion sought to be given.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Evidence > Types of Evidence > Circumstantial Evidence

HN12[] Remedies, Damages

Where a wrongdoer's own acts prevent a more precise ascertainment of damages, it must bear the risk of that uncertainty. Violators of the antitrust laws rarely leave a clear paper trail or other evidence by which their collective actions might readily be separated from their individual actions. The necessary reliance on circumstantial evidence will often preclude any meaningful basis for apportionment.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN13[] Remedies, Damages

There is, in general, nothing objectionable about a damages expert assuming a plaintiff can establish liability.

Evidence > Types of Evidence > Testimony > General Overview

HN14[] Types of Evidence, Testimony

Counsel's argument is not evidence.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

HN15[] Expert Witnesses, Daubert Standard

The factors referenced in Daubert are non-exclusive and not a checklist.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Evidence > ... > Testimony > Lay Witnesses > General Overview

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN16[] Remedies, Damages

Regarding the notion that damages in an antitrust context may be shown only through the testimony of an expert witness, while undoubtedly that is the common manner of establishing the extent of claimed damages, it is not a legal requirement.

Judges: JOE HEATON, UNITED STATES DISTRICT JUDGE.

Opinion by: JOE HEATON

Opinion

ORDER

Plaintiff Champagne Metals, an aluminum distributor or "service center," **[*3]** filed this antitrust action against seven other service centers -- Ken-Mac Metals, Inc. ("Ken-Mac"), Samuel, Son & Co., Ltd., Samuel Specialty Metals, Inc. (collectively "Samuel"), Metalwest, LLC, Integris Metals, Inc. ("Integris"), Earle M. Jorgensen Co. ("EMJ"), and Ryerson Tull, Inc. ("Ryerson") (collectively the "Established Distributors"). Plaintiff claims defendants violated Section 1 of the Sherman Antitrust Act, *15 U.S.C. § 1*, by engaging in a horizontal group boycott, violated the Oklahoma Antitrust Reform Act, *79 Okla. Stat. § 203*, by unreasonably restraining trade, and tortiously interfered with its business and contractual relationships. Summary judgment was previously entered in defendants' favor on all claims, but that decision was reversed in part on appeal. *Champagne Metals v. Ken-Mac Metals, Inc., 458 F.3d 1073 (10th Cir. 2006)*.

As the Tenth Circuit opinion gives a detailed summary of the dispute, the court will not repeat the facts here except as necessary to explain its conclusions. Briefly summarized, plaintiff claims the Established Distributors conspired "to attempt to keep a new, aggressive entrant out of the market," *Champagne Metals, 458 F.3d at 1086*, by threatening **[*4]** to move their business from the mills that sold them aluminum, if those mills dealt with Champagne Metals.

A James [1] hearing was held the weeks of November 10 and 17, 2008, to determine the admissibility of various coconspirator hearsay statements, most of which plaintiff claims were made by representatives of the mills which supplied aluminum to the distributors. A Daubert hearing also was held to determine the admissibility of the testimony of Steve L. Wilsey, plaintiff's damages expert. The court's rulings pertaining to the James hearing, as well as its disposition of defendants' objection to the Wilsey testimony and defendants' renewed motion for summary judgment, are addressed below.

I. Admissibility of Coconspirator Hearsay

HN1[] *Fed. R. Evid. 801(d)(2)(E)* permits the admission of an out-of-court statement "by a coconspirator of a party during the course and in furtherance of the conspiracy." For a statement to be admissible, plaintiff must establish by a preponderance of the evidence that a conspiracy existed, that the declarant and defendant against whom the statement is offered were members of the conspiracy, and that **[*5]** the statement was made in the course of and in furtherance of the conspiracy. *United States v. Lopez-Gutierrez, 83 F.3d 1235, 1242 (10th Cir. 1996)*. In making the determination of whether a conspiracy has been established, the court considered the testimony and exhibits offered at the hearing, as well as plaintiff's proffer and defendants' responses.

[1] See generally *United States v. James, 590 F.2d 575 (5th Cir.1979)*.

The court initially must decide whether plaintiff has shown by a preponderance of the evidence that a conspiracy existed. [2] The applicable legal principles are well established. ***HN2***[] "[I]t has long been settled that explicit agreement is not a necessary part of a Sherman Act conspiracy ...." *United States v. General Motors Corp., 384 U.S. 127, 142-43, 86 S. Ct. 1321, 16 L. Ed. 2d 415 (1966)*; *Esco Corp. v. United States, 340 F.2d 1000, 1008 (9th Cir. 1965)* ("Mutual consent need not be bottomed on express agreement, for any conformance to an agreed or contemplated pattern of conduct will warrant an inference of conspiracy .... An exchange of words is not required.") (internal citation omitted). However, "***antitrust law*** limits the range of permissible inferences from ambiguous evidence in a § 1 case." *Matsushita Elec. Indus. Co., Ltd. v. Zenith Radio Corp., 475 U.S. 574, 588, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*. **[*6]** "[C]onduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy." *Id.* Plaintiff must "present evidence 'that tends to exclude the possibility' that the alleged conspirators acted independently," *id.* (quoting *Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, 764, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984))*, and, "if the factual context renders [the plaintiff's] claim implausible-if the claim is one that simply makes no economic sense-[the plaintiff] must come forward with more persuasive evidence to support [its] claim than would otherwise be necessary." *Id. at 587*.

HN3[] While "circumstantial evidence may support the existence of an illegal § 1 agreement," *Mitchael v. Intracorp. Inc., 179 F.3d 847, 858 (10th Cir. 1999)*, the acceptable inferences that may be drawn from it "'vary **[*7]** with the plausibility of the plaintiff['s] theory and the danger associated with such inferences.'" *Id.* (quoting *In re Baby Food Antitrust Litig., 166 F.3d 112, 124 (3d Cir. 1999)*. "[C]onsciously parallel behavior may contribute to a finding of antitrust conspiracy, [but] it is insufficient, standing alone, to prove conspiracy. Such parallel behavior may, however, support the existence of an illegal agreement when augmented by additional evidence from which an understanding among the parties may be inferred." *Id at 859* (internal citation and quotations omitted). The required additional evidence "may include a showing that the parties 'are acting against their own individual business interests, or that there is motivation to enter into an agreement requiring parallel behavior.'" *Id.* (quoting *Monument Builders of Greater Kansas City, Inc. v. American Cemetery Ass'n of Kansas, 891 F.2d 1473, 1481 (10th Cir. 1989)*. Courts traditionally have found concerted action even where one of the alleged conspirators may have been coerced to participate in an illegal scheme. *MCM Partners, Inc. v. Andrews-Bartlett & Assocs., 62 F.3d 967, 973-74 (7th Cir. 1995)*; *see Spectators' Commc'n Network Inc. v. Colonial Country Club, 253 F.3d 215, 221 (5th Cir. 2001)* **[*8]** ("Conspirators who are not competitors of the victim may have no interest in curtailing competition in a market in which they do not compete; nevertheless, when they have been enticed or coerced to share in an anticompetitive scheme, there is still a combination within the meaning of the Sherman Act."); *Systemcare, Inc. v. Wang Labs. Corp., 117 F.3d 1137, 1145 (10th Cir. 1997)* (coerced action satisfies the "concerted action element of *section 1* of the Sherman Act" in antitrust action alleging a tying arrangement).

HN4[] In determining "whether, for purposes of the co-conspirator hearsay exception, the evidence makes the existence of a conspiracy more likely than not," the court may consider both hearsay and independent evidence. *Champagne Metals, 458 F.3d at 1081* & n.6. "[U]nder Bourjaily, 'there need only be some independent evidence linking the defendant to the conspiracy.' *United States v. Martinez, 825 F.2d 1451, 1453 (10th Cir.1987)*. Such independent evidence may be sufficient even when it is not 'substantial.'" *United States v. Lopez-Gutierrez, 83 F.3d 1235, 1242 (10th Cir. 1996)*. "[I]individual pieces of evidence, insufficient in themselves to prove a point, may in cumulation prove **[*9]** it. The sum of an evidentiary presentation may well be greater than its constituent parts.... [A] piece of evidence, unreliable in isolation, may become quite probative when corroborated by other evidence." *Champagne Metals, 458 F.3d at 1081 n.6* (quoting *Bourjaily v. United States, 483 U.S. 171, 179-80, 107 S. Ct. 2775, 97 L. Ed. 2d 144 (1987))*.

[2] The court previously concluded that plaintiff had demonstrated the existence of a genuine issue of material fact as to whether the Established Distributors entered into a conspiracy, a different question than that which must be decided now. July 27, 2007, Order, p. 6.

The court starts from the premise that plaintiff has advanced a very credible economic theory [3] for the alleged conspiracy [4] and offered some direct evidence of collusive action. [5] Building on that is circumstantial evidence, [6] which the court finds suffices to demonstrate by a preponderance of the evidence the existence of at least a tacit agreement [7] among all defendants and the mills [8] to take collective action to exclude new entrants from the market, in this case Champagne Metals, an aggressive, price-cutting, potential competitor. [9] *See e.g.,* James P-Exhibit 53 ("Champagne covets a number of Samuel accounts."). [10] Simply put, the mills, at least in part due to pressure and threats from the defendant service centers, refused to supply plaintiff with the products it needed to compete in the aluminum industry and which they otherwise would have supplied in the absence of the **[*10]** concerted pressure. *See* *General Motors Corp., 384 U.S. at 140* ("We have here a classic conspiracy in restraint of trade: joint, collaborative action by dealers, the appellee associations, and General Motors to eliminate a class of competitors by terminating business dealings between them and a minority of Chevrolet dealers ...."); *Interstate Circuit v. United States Paramount Pictures Distrib. Co., 306 U.S. 208, 227, 59 S. Ct. 467, 83 L. Ed. 610 (1939)* ("Acceptance by competitors, without previous agreement, of an invitation to participate in a plan, the necessary consequence of which, if carried out, is restraint of interstate commerce, is sufficient to establish an unlawful conspiracy under the Sherman Act."); *Craftsmen Limousine, Inc. v. Ford Motor Co., 363 F.3d 761, 764-72 (8th Cir. 2004)*; *Spectators' Commc'n Network, 253 F.3d at 215, 221*; *Rossi v. Standard Roofing, Inc., 156 F.3d 452, 456-79 (3d Cir. 1998)*; *see*

---

[3] *Champagne Metals, 458 F.3d at 1087*.

[4] The Tenth Circuit concluded that "Champagne's theory makes sense-it is certainly economically rational for a group of established firms to attempt to keep an aggressive competitor out of the market, whether they are doing so to protect profits or simply to guard market share." *Champagne Metals, 458 F.3d at 1087*.

[5] The Circuit found that the statement by Phil Wiley of AFCO to Matt Zundel of Commonwealth that "'himself and other potential customers ... would cause other' service centers to remove their business from Commonwealth if Commonwealth continued selling to Champagne," viewed in the light most favorable to Champagne Metals, constituted direct evidence of "an agreement among service centers to take collective action." *Champagne Metals, 458 F.3d at 1083-84*. However, the court also concluded that a reasonable jury could not find defendants had entered into an illegal agreement on the basis of Wiley's statement, alone. *Id. at 1084*. The court recognizes that plaintiff is not entitled, in conjunction with the James hearing, to the same deferential summary judgment standard of review, but finds **[*12]** nonetheless that the cited statement amounts to direct evidence of collusive action.

[6] As "the alleged conspiracy is economically rational, ... restrictions on the inferences drawn from Champagne's circumstantial evidence are not warranted." *Champagne Metals, 458 F.3d at 1085*.

[7] *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 553, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* ("'[T]he crucial question' is whether the challenged anticompetitive conduct 'stem[s] from independent decision or from an agreement, tacit or express.'" (quoting *Theatre Enterprises, Inc. v. Paramount Film Distributing Corp., 346 U.S. 537, 540, 74 S. Ct. 257, 98 L. Ed. 273 (1954))*.

[8] The court finds that, at least with respect to plaintiff, the conspiracy began in 1996 and continued if not to date, close to a decade. Commonwealth's participation was brief, limited essentially to the time period surrounding its refusal to honor its initial contracts with the plaintiff.

[9] While the court generally found Mike Champagne and most of plaintiff's other witnesses to be credible, it was not persuaded by the testimony of several defense witnesses. For example, the testimony of the Samuel's representative purporting to explain his email suggesting that Samuel's president contact the president of Ormet **[*13]** was not credible. Similarly, the testimony of Debbie Veale, which recounted with complete assurance and certainty what she did not say during a conversation that occurred several years previously, appeared rehearsed and less than persuasive. In addition, the testimony of one of the defendant's CEO's to the effect that not only had he not discussed whether a mill should sell to Champagne Metals with another service center, but that no one in his organization had done so, struck the court as going beyond what any CEO would plausibly know about the acts of lower level employees in these large and sometimes far-flung corporations.

[10] The evidence, though disputed, persuaded the court that Samuel had attempted to buy Champagne Metals for a million dollars before the company was even established. This evidences the industry's view of plaintiff's potential impact on the marketplace.

generally MCM Partners, Inc. v. Andrews-Bartlett & Assocs., 62 F.3d at 972-75 (allegations that two exhibition contractors refused to rent equipment from plaintiff because of threats of labor disruption and damage to property made by "a union official in cahoots with the would-be monopolist" or competitor **[*11]** sufficed to state a claim under § 1 of the Sherman Act).

In reaching this conclusion the court recognizes that **HN5**[] "[i]ndependent action is not proscribed," and that "[a] [mill] of course has a right to deal, or refuse to deal, with whomever it likes, as long as it does so independently." Monsanto, 465 U.S. at 761. It also realizes that "something more than evidence of complaints **[*14]** is needed," id. at 764, or "mere acquiescence to a competitor's complaints about a price-cutter be present to infer a conspiracy." Abraham v. Intermountain Health Care Inc., 461 F.3d 1249, 1262 (10th Cir. 2006). However, viewing the circumstantial evidence "through the lens of a highly plausible economic theory," Champagne Metals, 458 F.3d at 1087, the court concludes plaintiff has established that the defendant service centers and mills "'had a conscious commitment to a common scheme designed to achieve an unlawful objective." Monsanto, 465 U.S. at 764 (quoting Edward J. Sweeney & Sons, 637 F.2d 105, 111 (3d Cir. 1980)).

This is one of those situations where consciously parallel behavior is sufficiently "augmented by additional evidence from which an understanding among the parties may be inferred." Mitchael, 179 F.3d at 859 (internal citation omitted). Here, for reasons discussed subsequently, there was both "motivation [for the service centers] to enter into an agreement requiring parallel behavior," and "a showing that the [mills were] acting against their own individual business interests," when they refused to sell aluminum to plaintiff. *Id. See* Abraham, 461 F.3d at 1263 (**HN6**[] inference **[*15]** of antitrust conspiracy may be based on response to complaints, when coupled with evidence of "plus" factors, such as threats or coercion).

Plaintiff established that Mike Champagne, a knowledgeable, competent businessman, started Champagne Metals with an established customer base (horse trailer industry) and a reasonable belief that he had the equipment (a cut-to-length line) [11] and suppliers (mills) needed to establish a successful aluminum service center. However, as soon as he launched the business, Champagne Metals was confronted with a series of obstacles and events unlikely to have occurred in the absence of concerted effort by the other service centers and the acquiescence of several mills.

Different **[*16]** pieces of evidence in combination suffice to establish the predicate conspiracy. Among them was Commonwealth's conduct in its initial sales negotiations with plaintiff. The mill had agreed to recognize plaintiff, actual orders had been placed, James P-Exhibits 16, 17 ("the pounds have been secured"), 18-20, [12] and credit approval was assured. James Tr., p.65-66. Commonwealth then reneged on its agreement due to pressure from major distributors, *e.g.* James Tr., p.619, combined with EMJ's refusal to sell plaintiff the cut-to-length line. The refusal to fill plaintiff's metal orders was against Commonwealth's economic interests. The business Champagne Metals was bringing was profitable business Commonwealth had developed with Mike Champagne while he was with EMJ, James Tr., p.596-601, with significant potential -- by June 2000, Champagne Metals was "the largest supplier to the $ 1 billion horse trailer market." James P-Exhibit 1, ALC 0020. The refusal also exposed the company to potential litigation and demonstrated that EMJ had been in contact with Commonwealth, informing Commonwealth that it would not sell plaintiff its cut-to length line, which plaintiff had to have to be recognized **[*17]** by Commonwealth or any other mill. [13]

---

[11] Mike Champagne had worked in the aluminum industry for approximately 13 years before he started Champagne Metals. While employed at EMJ, Champagne had discussions with management about forming a company which essentially would take over EMJ's horse trailer business, as it appeared EMJ was not interested in continuing that part of its operations. Champagne had proposed buying the equipment needed, a cut-to-length line, from EMJ and been virtually assured EMJ would sell it to him..

[12] References to the James hearing transcript will be to "James Tr., p. __." References to the James Hearing Exhibits will be "James Exhibit P-__" (plaintiff's) and "James Exhibit D-__" (defendants'). References to exhibits submitted with plaintiff's proffer will be to "Proffer Exhibit" and to exhibits submitted with defendants' response to the proffer will be to "Response Exhibit."

[13] The distributorships clearly did not operate in a vacuum, but were cognizant of their competitor's activities. E.g., James Exhibit P-63 (in an email he sent to Samuel's president, Paul Sutcliffe, a sales vice president for the company, wrote that "[r]umour has it that Mike Champagne contacted Emmett Boyle directly trying to secure a distributorship."); James Tr., pp. 179-80 (RASCO

The continued refusal of other mills, such as Ravenswood and Kaiser, to sell Champagne Metals the same pounds they had previously supplied EMJ, [14] or, as in the case of Ormet, to sell pounds it previously had sought to sell EMJ, **[*18]** makes little sense unless it was to avoid, "what happened to Commonwealth." James Hearing Tr., p. 115. [15] There was no evidence that Champagne Metals was financially unsound, produced inferior products, [16] had an inadequate facility or machinery or failed to satisfy its customers. The evidence was to the contrary. See James Tr., pp.1104-05; James Exhibits P-42, 43. The business Champagne Metals offered, though small in volume, was consistent, a significant consideration for a rolling mill, James Tr. pp. 598-99, and consisted in part of desirable "value-added products," which had a higher profit margin. *Id.*

Similarly unlikely, absent coercion, was Ravenswood's refusal to sell to plaintiff, once it was acquired by Pechiney, plaintiff's foreign supplier, or Ormet's backtracking after it had essentially committed to sell to plaintiff. *See* James Exhibits P-44 (email assigning Champagne Metals a customer code); 52 (email dated 12/7/01 regarding final approval visit for Champagne Metals); 50 (email dated 12/20/01 referring to "Exploratory Visit" to Champagne Metals). [17] The record contains persuasive evidence of continued pressure imposed by the service centers on the various mills to compel them not to recognize plaintiff, *e.g.* James Exhibits P-10, 25, 50; James Tr., p. 1146; evidence that the threats to pull pounds if a mill sold aluminum to Champagne Metal were taken seriously, *e.g.,* James Exhibit P-25, 28; Keith Forniss video depo.; *see* James Exhibit P-29 (Recorded statement by Ravenswood salesman that "[the mills] were essentially at the **[*20]** mercy of the Integrises and the Samuels and the Ryersons of the world."); James Tr., pp.1146-48 (Sneigle of Ormet told Champagne Metal's employee Borgelt that Ormet could not sell metal to plaintiff directly, as Ormet would be punished by several distributors, but suggested selling the metal through a third party); *see* Proffer Exhibit 4, P8; and evidence that Commonwealth lost business due to its sales to Champagne Metals. James Tr., pp.996-99. Even Alcoa, one of the principal, if not the premier, mills, expressed concern about recognizing Champagne Metals because "[r]elative to market coverage, they do compete with Ryerson, Rasco, VMG and we risk losing more than we would gain." James Exhibit P-1. After Commonwealth recognized plaintiff there still was incentive for the distributors to discourage other mills from selling it metal as plaintiff, with access to only one domestic mill, was at a pricing disadvantage. James Tr. pp. 641, 1051-53; 1125; and 402-04 in conjunction with James Exhibit P-75. [18]

---

and Ryerson employees were found in plaintiff's buildings); Response Exhibit 11, pp. 67-68. Employees also moved within the industry from competitor to competitor.

[14] Once EMJ was no longer in the horse trailer business, these mills would not, by selling the same metal to Champagne Metals that it had sold to EMJ for the same customers, be taking pounds away from another distributorship. Proffer Exhibit 1, P16.

[15] Despite its desire to reenter the horse trailer business, Kaiser refused to sell extrusions to plaintiff, not wanting to"get in between [Champagne Metals] and EMJ." James Tr., p. 135. Ormet also refused to sell to plaintiff even when it needed the business. James Tr., pp. 177-79. See id., p. 137 (Ormet called on Mike Champagne monthly **[*19]** when he worked at EMJ, trying to sell it metal).

[16] See James P-Exhibit 1, ALC 0020, (In a memo summarizing a visit to Champagne Metals in June, 2000, John Guest wrote that the company "ha[s] an excellent reputation for the processing of aluminum coil.").

[17] In this email from Keith Forniss, an Ormet salesman to Harry Sneigle, Ormet's sales manager, Forniss states that Ormet "must thoroughly assess the long-term ramifications against anticipated **[*21]** or projected dividend of recognizing this account. Brenda [Mcinnis], Regional VP of Purchasing [of Samuels] has been quite candid and clear in expressing concerns with Ormet selling this account. In past as well as during recent conversations that included Mr. Champagne she was most emphatic that our selling this account would be looked at negatively by the Samuels .... In no way am I suggesting that we allow Samuels Specialty or anyone dictate our marketing efforts, however I am only suggesting we weigh the significant tonnage generated by the Texas facilities and Ms. McInnis consistent support of Ormet against expectations of significant business from this account." James Exhibit P-50. See generally James Exhibit P-27(When asked if increasing the pounds purchased from one-half to one million would persuade Ormet to sell to Champagne Metals, Sneigle responded: "10 million pounds wouldn't help.").

[18] The higher prices paid by plaintiff were due, in part, to cost reductions and rebates "Tier 3" distributors received because of the volume of their purchases. *James Tr., pp. 674-77.*

Conceivably, the service centers could have been acting independently. However, as each distributor was recognized **[*22]** by some, but not all the mills, absent coordinated action a single distributor could not cut off all of Champagne Metals' sources of supply. Also, without knowledge that other service centers were simultaneously putting pressure on the same mill, a distributor, by threatening to move its business elsewhere, risked losing one of its suppliers. Statements such as Phil Wiley's to the effect that, as long as Commonwealth was doing business with Champagne Metals, its ability to do business with AFCO, as well as others in the geographic region [19] would be limited, James Tr. pp. 990-92, substantiate plaintiff's claim of concerted action among defendants. [20]

The arguments that defendants were acting independently and were too competitive to ever collaborate become less persuasive in light of the testimony that a "greenfield startup" was virtually unheard of in the industry. *See* Proffer Exhibit 10, pp. 127-28. Others before plaintiff -- Professional Metals, Orion, and MetalWest -- had tried, unsuccessfully, to become aluminum distributors. Tr. pp. 437- 443. For decades the number of service centers in the aluminum industry had not increased and the evidence demonstrated that defendants were motivated by their interest in maintaining stable prices [21] and their existing market share. [22] Although the aluminum distribution industry **[*24]** is a competitive, if not cutthroat, business, the service centers had, in the past, collaborated on prices. *See* James Tr., pp.171-72, pp. 917-18. [23] They also, through the industry practice of incumbency, continue to attempt to control their market share. [24] However aggressive the service centers were in competing among themselves, they had a shared, common interest in excluding new entrants from the market.

The evidence, however, is far from conclusive and the court views the question addressed here as close. [25] Defendants' conduct could be characterized, at least in part, as mere complaints, which were often made to employees who were not in a position to control a mill's selling decisions, James Exhibit P-28, CM 19407, CM

---

[19] Matthew Zundel testified that the reference to "others in that geographic region" was generally understood to be "the Rascos and the Vincent Metal Goods, and the Ryersons, and the other people in that general geographic region." James Tr., pp. 991-92.

[20] Zundel assumed, based on his conversation with Phil Wiley and other customers within that geographic region, that, while the distributors were not in direct communication with each other, that the "others understood … how the game is played … that there are … written and, quote, unwritten **[*23]** rules of how you should be going to market, and who you should be selling as a mill supplier to distribution … [and that Commonwealth] would be punished by the industry as a result of doing business with Champagne at that time." James Tr., pp., 992-93. For obvious reasons, particularly when dealing with sophisticated businessmen or women acquainted with the antitrust laws, the proof in an anti-trust case usually is circumstantial. See James P-Exhibit 28, CM 19412 (Commonwealth employees were trained on antitrust).

[21] Plaintiff established that defendants believed Champagne Metals had disrupted the marketplace, see e.g. James Tr., pp. 793, 795 and had or would negatively affect prices. See id. at pp. 793; 990-91; 1019.

[22] Garry Pierce, a Commonwealth sales representative testified that, while other service centers might be upset for a month or two when Commonwealth (or its predecessor) recognized a new distributor, the negative reactions to Commonwealth's recognition of Champagne Metals five years out were unique. James Tr., pp. 796-97. An obvious distinction for the lingering anger with respect to Champagne Metals was it was a new, versus an already existing, competitor/service center.

[23] See *Standard Roofing, 156 F.3d at 469*("Evidence that plaintiff's competitors/defendants] had actively considered **[*25]** fixing prices and allocating customers" prior to alleged conspiracy "to boycott and exclude [the plaintiff] from the market" was "sufficient to permit the inference that [the competitors] may have had a long-standing intent to stabilize prices in the roofing distribution business.")

[24] The comments of John Guest, an Alcoa manager, that "[r]elative to market coverage, [Champagne Metals] do[es] compete with Ryerson, Rasco, VMG and we risk losing more than we would gain" and that Champagne Metals "would be a location to recognize, if one of our existing distributors acquired them," James Exhibit P-1, evidence the mills' recognition of the distributors' desire to retain their market share.

[25] Evaluation of the testimony in this case is complicated by the fact that virtually every witness is potentially affected by self-interest. A current employee of plaintiff or a service center has an obvious interest in not jeopardizing his or her employment. Mill representatives may, due to concern with preserving service center or other client relationships, shade their testimony.

19411, and as efforts to protect incumbency. [26] Plaintiff's lack of recognition by the mills was likely influenced, at least in part, by reasons other than pressure and threats from the **[*26]** other service centers, including the mills' preference for large distributors who purchase large amounts of metal and service a large number of customers. Plaintiff also has been successful, has expanded, James Exhibit D-1, and, even with limited mill recognition, occasionally obtained pricing concessions. James Exhibit D-2; James Tr., pp.1014-16. Also, after it recognized Champagne Metals, Commonwealth's sales to many of the service centers increased, rather than decreased. *E.g.,* James Exhibits P-32, 33.

In light of this evidence, **[*27]** a different factfinder could reach a contrary conclusion as to the existence of a conspiracy and the identities of the coconspirators. However, the court concludes plaintiff has met its burden of establishing by a preponderance of the evidence that an antitrust conspiracy was formed and that all defendants and mills were members. [27] The court is not, at this time, determining the ultimate admissibility of the various statements the plaintiff seeks to introduce as coconspirator hearsay. Whether a particular statement will be admissible will depend on the circumstances in which the statement was made, including whether it was made in the course of and in furtherance of the conspiracy, and the nature of the statement.

II. Daubert Challenge to Wilsey Testimony

Defendants have moved to exclude the testimony of Steve L. Wilsey on Daubert grounds, [28] arguing that his estimate of plaintiff's claimed damages fails to meet the standards now set out in *Fed. R. Evid. 702*. [29] The court conducted a hearing on the motion on October 29 and 30, 2008, [30] and has considered **[*28]** the briefs submitted by the parties. [31] The court has also had the benefit of the evidence offered at the James hearing referenced above, which has been helpful as to context and background.

HN7[] "In accord with [*Rule 702*], the Supreme Court has determined that the [trial judge] 'must ensure that any and all scientific testimony or evidence is not only relevant, but reliable.'" *Bitler v. A.O. Smith Corp., 400 F.3d 1227, 1232 (10th Cir. 2004)* (quoting *Daubert, 509 U.S. at 589*), *cert. denied, 546 U.S. 926, 126 S. Ct. 395, 163 L. Ed. 2d 274 (2005)*. This gatekeeper function applies to all expert testimony, not merely to that deemed to be "scientific" in nature. *Kumho Tire Co. Ltd. v. Carmichael, 526 U.S. 137, 119 S. Ct. 1167, 143 L. Ed. 2d 238 (1999)*. **[*29]** *Rule 702* provides:

> ***HN8***[] If scientific, technical, or other specialized knowledge will assist the trier of fact to understand the evidence or to determine a fact in issue, a witness qualified as an expert by knowledge, skill, experience, training, or education, may testify thereto in the form of an opinion or otherwise, if (1) the testimony is based upon sufficient facts or data, (2) the testimony is the product of reliable principles and methods, and (3) the witness has applied the principles and methods reliably to the facts of the case.

HN9[] In determining the admissibility of expert testimony, the court initially must decide whether the proposed expert is qualified to offer an opinion on the issues involved in the particular case. *Ralston v. Smith & Nephew*

---

[26] In light of the absence of any objection to it by any party, the court assumes, without deciding, the industry practice of "incumbency," which protects in most circumstances a service center's relationship with a mill as to a particular customer, is unobjectionable in and of itself.

[27] As noted above, Commonwealth initially was a member, but withdrew at some point, as indicated by its conduct relative to plaintiff.

[28] *Daubert v. Merrell Dow Pharms., 509 U.S. 579, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)*.

[29] *Rule 702* now substantially incorporates the principles set out in Daubert, which interpreted an earlier version of *Rule 702*.

[30] Transcript references to testimony at the hearing are identified as "Daubert Tr., p. __".

[31] Plaintiff has sought leave to submit a post-hearing surreply brief [Doc. # 631]. However, as the court does not view the submissions at the hearing as materially changing the issues already joined, the court concludes further briefing is unnecessary.

Richards, Inc., 275 F.3d 965, 969 (10th Cir. 2001). A qualified expert must possess the necessary knowledge, skill, experience, training or education relevant to the facts at issue. *Id.* The court then must conduct a two-part inquiry to fulfill its Daubert gatekeeping role, determining first if the expert's proffered testimony has "'a reliable basis in the knowledge and experience of his [or her] discipline.'" Bitler, 400 F.3d at 1232-33 (quoting **[*30]** Daubert, 509 U.S. at 592). In making this determination, the district court must decide whether the reasoning or methodology underlying the testimony is scientifically valid. Id. at 1233. Second, the district court must inquire "into whether proposed testimony is sufficiently 'relevant to the task at hand.'" Id. at 1234 (quoting Daubert, 509 U.S. at 597). Is there an appropriate "fit" between the evidence offered and the material issue to which it is directed?

Plaintiff offers Mr. Wilsey as an expert on the amount of plaintiff's damages. His opinions are directed to the amount of lost profits plaintiff has allegedly experienced by reason of the claimed illegal agreement or conspiracy among the defendants. As noted above, plaintiff's theory of the case, broadly stated, is that defendants tacitly or explicitly agreed to pressure the domestic aluminum mills, and did so, so as to cause the mills to deny recognition to plaintiff or to otherwise limit its access to product at competitive prices. Mr. Wilsey concludes, assuming the establishment of the necessary agreement in restraint of trade, that plaintiff has sustained total lost profits of $ 12,780,000 to $ 13,994,000 by reason of the **[*31]** illegal agreement. He concludes plaintiff's damages are of two types: (1) lost profits in the amount of $ 8,844,000 from lost sales due to its inability to secure product from domestic mills at competitive prices, and (2) lost profits due to the higher prices plaintiff paid, relative to other distributors, for the product it did acquire. Mr. Wilsey estimates this latter type of damages to total between $ 3,936,000 and $ 5,150,000. [32]

Defendants have objected to Mr. Wilsey's testimony on a variety of grounds. While some of defendants' objections are unpersuasive or would, in any event, go to weight rather than admissibility, the court nonetheless concludes, for the reasons set out below, that Mr. Wilsey's opinions do not meet the Daubert/702 standards for reliability and that they must therefore be excluded. [33]

Qualifications of Mr. Wilsey

Defendants do not attack Mr. Wilsey's qualifications to address, **[*32]** in general, the issue of lost profits or damages. The evidence indicates he is a Certified Public Accountant with extensive experience in business valuations. He is recognized by the American Institute of Certified Public Accountants as an accredited business valuator (ABV). He has done over 300 business evaluations in connection with mergers and acquisitions, allocations of purchase price, shareholder disputes, and other commercial disputes. These valuations have often involved projections or estimates of future earnings for particular entities. He has testified in numerous court proceedings as to damages issues in a variety of contexts and has some limited experience with antitrust claims. [34] Although Mr. Wilsey appears to have no prior experience or involvement with the aluminum distribution or metals industry, [35] the court nonetheless concludes that he has, in general, the necessary knowledge, skill and experience to address questions of lost profits and their calculation.

Reliability of Mr. Wilsey's opinions

[32] Report of Steve L. Wilsey dated April 22, 2008 (the "Wilsey Report"), p. 16.

[33] It may be that there are certain data compilations or other matters to which Mr. Wilsey might properly testify notwithstanding this order. However, his opinions as to the amount of lost profits must be excluded.

[34] His curriculum vitae identifies two cases in this court in which he has performed a damages analysis in connection with antitrust or similar claims. Wilsey Report, Appendix 10.

[35] Mr. Wilsey's c.v. lists a variety **[*33]** of businesses which he has dealt with in his business valuation or accounting practice; none reference the aluminum or metals industry specifically. Wilsey Report, Appendix 10, p. 1. He does indicate he has undertaken substantial efforts to acquaint himself with the aluminum distribution industry for purposes of this case and the court is persuaded he has done so.

The overall thrust of defendants' objection to Mr. Wilsey's proffered testimony is that his conclusions are based on methodology which does not, for various reasons, meet the standards of *Rule 702*. ***HN10***[] In determining whether an expert's testimony meets the Rule's reliability standard, Daubert and *Rule 702* provide a non-exclusive list of factors which the court should consider if they are applicable. As the Comment to *Rule 702* (2000 Amendments) notes:

> The specific factors explicated by the *Daubert* court are (1) whether the expert's technique or theory can be or has been tested -- that is, whether the expert's theory can be challenged in some objective sense, or whether it is instead simply a subjective, conclusory approach that cannot reasonably be assessed for reliability; (2) whether the technique **[*34]** or theory has been subject to peer review and publication; (3) the known or potential rate of error of the technique or theory when applied; (4) the existence and maintenance of standards and controls; and (5) whether the technique or theory has been generally accepted in the scientific community.

HN11[] The Comment also identifies a number of other factors which may, in a proper case, be relevant to the determination of whether expert testimony is sufficiently reliable. These include: (1) whether the expert proposes to testify about matters growing naturally and directly out of research he/she has conducted independent of the litigation, or whether the opinion was developed expressly for the purpose of testifying, (2) whether the expert has "unjustifiably extrapolated from an accepted premise to an unfounded conclusion," (3) whether the expert has adequately accounted for obvious alternative explanations, (4) whether the expert is being as careful in his/her litigation consulting work as he or she would in their regular professional work, and (5) whether the particular field of expertise claimed by the expert is one known to reach reliable results for the type of opinion sought to be given. **[*35]** *Id.* Several of these factors are pertinent to the opinions sought to be offered by Mr. Wilsey.

As an initial matter, the court addresses several of defendants' objections which are not sufficient to warrant exclusion of Wilsey's testimony. Defendants object to Wilsey's failure to apportion his damages estimate between legal and illegal conduct. In part, they argue that he fails to identify those damages attributable to overt acts occurring before the limitations period (roughly April of 1998) versus those occurring after that date. They rely on references to the issue in the previous decision of the Court of Appeals. *See Champagne Metals, 458 F.3d at 1090*. This court doubts whether the Court of Appeals' opinion, or the law generally, requires the sort of apportionment that defendants apparently seek. In the circumstances existing here, where various acts (at least some of which are within the limitations period) are alleged to have contributed to a continuing conspiracy allegedly resulting in the mills' multiple refusals to deal with plaintiff on various occasions during the entire limitations period, it is difficult to see how any apportionment based on the timing of particular overt **[*36]** acts could even theoretically occur. [36] If the proof establishes that, based on the cumulative effect of multiple threats or other acts by defendants over a period of years, both prior to and within the limitations period, a mill refused to deal with plaintiff during the limitations period causing losses, how would a fact finder (or any expert purporting to assist the fact finder) effect an apportionment based on the overt acts? Would the jury add up the pre-limitation and post-limitation threats/acts and somehow allocate on that basis? Would it assess the ferocity of pre-limitation and post-limitation threats and try to figure out which acts really caused a particular mill to act in a particular way at a particular time? In light of the disposition on other grounds of the challenge to Mr. Wilsey's testimony, it is unnecessary to resolve the matter here. However, the court notes the seeming implausibility of the standard suggested by defendants and declines to rely on it as a basis for excluding Mr. Wilsey's testimony.

Defendants **[*37]** also suggest that Wilsey's opinions are irrelevant or unreliable due to his failure to apportion damages between defendants' unilateral conduct, which is not actionable in these circumstances, and their collective action, which is. The court finds persuasive the reasoning of the Third Circuit in *LePage's Inc. v. 3M, 324 F.3d 141, 166 (3d Cir. 2003)*, where the court concluded that if the defendant's actions, taken as a whole, were found to violate the Sherman Act, it would be "unnecessary, if not impossible" to establish the sort of apportionment between legal and illegal conduct such as defendants seek in this case. This court is also mindful of the Supreme Court's guidance in *Bigelow v. RKO Radio Pictures, Inc., 327 U.S. 251, 66 S. Ct. 574, 90 L. Ed. 652 (1946)* that

---

[36] The evidence does not suggest (or at least there is a factual question as to whether) any mill gave plaintiff a "final" refusal to deal in the sense discussed in *Kaw Valley Elec. Coop. Co. Inc. v. Kansas Elec. Power Coop. Inc., 872 F.2d 931 (10th Cir. 1989)*.

HN12[] where a wrongdoer's own acts prevent a more precise ascertainment of damages, it must bear the risk of that uncertainty. *Id. at 264-65*. Violators of the antitrust laws rarely leave a clear paper trail or other evidence by which their collective actions might readily be separated from their individual actions. The necessary reliance on circumstantial evidence will often preclude any meaningful basis for apportionment. [37] In the circumstances of this **[*38]** case, the proffered opinions are not rendered irrelevant or unreliable by reason of their non-apportionment of damages between individual and collective conduct.

Defendants have also objected to Mr. Wilsey's testimony on the basis that he improperly and/or uncritically based his opinions on plaintiff's version of the facts or view of the case. Mr. Wilsey is offered as a damages expert and **HN13**[] there is, in general, nothing objectionable about a damages expert assuming a plaintiff can establish liability. *See Champagne Metals, 458 F.3d at 1080 n.4*. He necessarily made certain assumptions as to the nature of plaintiff's case and circumstances and, to the extent he relied on factual information or projections from plaintiff's personnel, the court concludes he made sufficient inquiry and investigation of the information to avoid excluding his opinions on that basis alone. [38] It is true that Mr. Wilsey's report is subject to **[*39]** some of the same criticisms that previously resulted in the exclusion of the testimony and report of Dr. Murry. *See Champagne Metals, 458 F.3d at 1080 n. 4* (referencing Judge Cauthron's order excluding the Murry testimony). With respect to some of the statements in his report, it is unclear whether he is reciting facts relayed by his client, which he assumed to be accurate, or whether he is confirming facts based on his own investigation. However, these deficiencies in the report, in and of themselves, are not sufficient to warrant the exclusion of Mr. Wilsey's testimony.

Those rejected criticisms aside, the basis for the court's conclusion that Mr. Wilsey's testimony must be excluded under *Rule 702* is, at least in part, different **[*40]** for the two categories of damages which Mr. Wilsey has identified: lost sales and price differential.

Lost Profits Due to Lost Sales

Mr. Wilsey concluded that plaintiff has experienced $ 8,844,000 in lost profits due to lost sales. He computed this number for the limitations period (part of 1998 through 2007) by beginning with plaintiff's actual 1997 sales numbers and then adding to plaintiff's actual sales experience in later years additional estimated sales based on various factors. These estimated additions resulted in percentage increases in the growth of sales, over and above plaintiff's actual experience, of 10% for 1998, 33% for 1999 and 13% for 2000. [39] His estimates of sales in later years (2001 and after) corresponded, on a percentage basis, to the growth rates actually experienced by plaintiff in those years, but the rates were applied against the enhanced base due to the additions in, and compounding effect of, prior years. [40] Those increased sales figures, coupled with Wilsey's analysis of plaintiff's cost structure and profit margin, then resulted in the lost profits computation attributable to lost sales. [41]

---

[37] As noted in *Craftsmen Limousine Inc. v. Ford Motor Co., 363 F.3d 761, 771 (8th Cir. 2004)*: "Because defendants typically cannot be relied on to confess that they have entered into an unlawful agreement, conspiracy cases usually must be proved by circumstantial evidence."

[38] The evidence indicated that, among other things, Mr. Wilsey interviewed some customers of plaintiff, completed an intensive review of plaintiff's financial and other information, and tested the accuracy of certain of the information given to him by comparing it to actual facts as they later became known. Under the circumstances, this was a sufficient effort to verify the accuracy of the information provided so as to warrant his using it in forming his opinions.

[39] Wilsey Report, Schedule A-1.

[40] Wilsey made some offsetting adjustments **[*41]** in later years. In years 2004 through 2007, Wilsey reduced the projected sales otherwise indicated for those years by adjusting for what he termed "catch up sales" in the years when plaintiff had more extensive mill access. Wilsey Report, Schedule A-1.

[41] Wilsey Report, Schedules A (lost profits due to sales) and F (profit margin calculations).

The court concludes Mr. Wilsey's lost sales analysis is defective -- and fatally so as against *Rule 702*'s standards -- on two grounds.

First, Mr. Wilsey's calculation of plaintiff's lost sales is based not only on lost aluminum sales -- the focus of the alleged antitrust violation here -- but also on plaintiff's sale of steel during the various years, which, it appears, make up 75% of plaintiff's sales. [42] Mr. Wilsey testified as follows (Daubert Tr., pp. 69-70):

> Q. Now, your lost sales are calculated by looking at the increased growth rate you project and applying it to Champagne's actual sales in the first year, and that projected sales in later years, correct?
> A. Yes, that's correct.
> Q. And those sales that you utilized are Champagne's total sales, including aluminum sales --
> A. Yes.
> Q. -- and carbon steel sales, correct?
>
> A. Yes, sir. I did that on **[*42]** purpose.

Mr. Wilsey may have done it on purpose, but that purpose is not disclosed by his testimony. It is not explained (or even mentioned) in his report, nor is there, so far as the court can determine, any other evidence which explains or justifies the inclusion of steel sales in an analysis of lost aluminum sales. Plaintiff's counsel sought to explain inclusion of the steel sales numbers on the basis of "the familiar answer that sales are linked" and his assertion that persons buying aluminum "are also in the same transaction going to buy certain non-aluminum things." (Daubert Tr., p. 213). ***HN14***[] Counsel's argument is not evidence, of course, and even if it was it would fall short, without more, of a persuasive explanation as to how lost aluminum sales necessarily lead to lost steel sales at some level or of what the relationship between them is. It may be that there is some consistent, predictable relationship between aluminum sales and steel sales in this business such as would justify steel inclusion in the lost sales computation here. However, it was not disclosed by Mr. Wilsey's testimony at the hearing, his report, or other evidence in the case. *Rule 702*'s requirement of "sufficient **[*43]** facts and data" precludes simply assuming a connection in the present circumstances.

The second and more significant problem, in the court's view, with Mr. Wilsey's lost profits analysis is the fact that his estimate of lost sales is not based on any discernible, identifiable theory or technique. Rather, it is based on his consideration of multiple factors, weighed and evaluated by him as a matter of professional judgment, but not otherwise disclosed. His report indicates he considered 19 different factors in estimating lost sales. Wilsey Report, P 57. With respect to the widely varying estimates of growth for particular years, he narrows the considerations somewhat, but still fails to articulate any identifiable theory or technique to explain how he came up with particular results. [43] He acknowledged there was no formula or particular principle or principles which guided his analysis, though he did test **[*44]** his assumption or estimates in various ways. [44]

---

[42] Though somewhat unclear from the context, it appears from Mr. Wilsey's testimony that non-aluminum sales constitute the bulk of plaintiff's sales. Daubert Tr., p. 70. If that is the case, the inclusion of steel sales in the calculation plainly has a major impact on the projections.

[43] For example, paragraph 58 of the Wilsey Report states, in part: "I have estimated projected sales for Champagne Metals. The projection begins with 10% higher sales in 1998. This estimate is primarily due to the lost customers list, pricing, limited alloy breadth, and Commonwealth incumbency. The next year 1999, I project 50% growth (up from Champagne's actual 17% growth or approximately $ 7mm in lost sales) based upon Champagne's actual growth, pricing, lost sales, MetalWest's performance, the incumbency of Commonwealth, limited alloy breadth, and Champagne's history of success later when having the ability to sell from multiple domestic mills."

[44] Daubert Tr., pp. 43-44. Mr. Wiley explained how he tested his estimates of annual percentage increases this way (at 44): "I looked at several different sets of data that told me that this is in the ballpark, that my projection is in the ballpark, and it's reasonable. I compared it to Champagne's own projections, and we spoke earlier about that, that were made in 1997. I compared it to Champagne's later experience, the experience that Champagne had from '04 through '07."

Evaluating Mr. Wilsey's **[*45]** approach against the *Rule 702* standards articulated in Daubert, it clearly does not pass muster. There is no way that Mr. Wilsey's method or technique can be or has been tested by others. There is no way it can be challenged in any objective sense, as it is simply his subjective judgment about how various factors fit together. [45] There is no identifiable theory or technique to submit to review by others. There is no real basis for estimating an error rate to his approach. There are no standards of any kind that have been identified as supporting it. At base, Mr. Wilsey's methodology boils down to this: "I started with Champagne's sales estimates, considered 19 factors, tested my estimates in various ways, and, based on my professional judgment, arrived at X." The way in which those factors were put together and the conclusions that he drew are classic examples of opinion evidence that is "connected to existing data only by the *ipse dixit* of the expert." *General Elec. Co. v. Joiner, 522 U.S. 136, 146, 118 S. Ct. 512, 139 L. Ed. 2d 508 (1997)*.

Of the various factors identified for consideration in Daubert, [46] the only one that arguably supports admission of Mr. Wilsey's opinions is whether the technique or theory has been generally accepted in the scientific community (i.e. the pertinent community of expertise). Plaintiff argues that Wilsey's approach is like that routinely used in various settings in making projections of profits. Of course, the problem is that Mr. Wilsey's "technique or theory" or multiple techniques or theories are never identified beyond saying he exercised professional judgment. [47] However acceptable such a basis for opinions or estimates may be in other contexts (or might have been in a pre-Daubert world), it falls short of meeting the standard of reliability and helpfulness to the jury which guides a *Rule 702* determination.

The court's conclusion in this regard is buttressed by the fact that there are several recognized ways in which lost profits may be established in an antitrust context. [48] None are necessarily applicable or useful in all circumstances, and the court does not suggest that, in circumstances like those existing here, a lost profits determination can or should be reduced to a purely mathematical exercise. They do, however, have the merit of suggesting at least some basis or starting point for an analysis and of identifying approaches which can be used and, if necessary, adjusted. [49] Mr. Wilsey's approach, which is essentially subjective, does not. [50]

---

[45] As was suggested at the hearing, a jury would have little or no way to determine whether an estimate by Mr. Wilsey of, say, 60% growth in a particular year was more or less reliable **[*46]** than a competing expert's estimate of, hypothetically, 20% explained or justified in the same way.

[46] ***HN15***[] The factors referenced in Daubert are non-exclusive and not a checklist, but are helpful to varying degrees in assessing the testimony at issue here.

[47] If intoning "professional judgment" was enough to otherwise justify an opinion in this context, the fact that Mr. Wilsey's familiarity **[*47]** with the aluminum distribution industry was acquired for purposes of this case and that he lacks prior experience with it would be more problematic. However, the 702 standards require more in any event.

[48] The various authorities recognize at least three common approaches to measuring antitrust damages: (1) the before and after approach, (2) a yardstick or benchmark approach, and (3) regression analysis. See generally, *Conwood Co. L.P. v. U.S. Tobacco Co., 290 F.3d 768, 793 (6th Cir. 2002)*. Mr. Wilsey's analysis most closely approximates the "before **[*48]** and after" approach.

[49] The evidence suggests Mr. Wilsey initially used the experience of MetalWest as a basis for comparison, but later concluded it was not a useful "benchmark." The retreat may have been unwise. Though differences no doubt exist between the Champagne and MetalWest experiences, a more systematic comparison to MetalWest might have at least provided an identifiable baseline from which adjustments could be made.

[50] The failure to use or consider other recognized methods of analysis cuts against plaintiff's suggestion that Bigelow requires allowing the proffered testimony. Although the wide variety of market factors and other considerations present here make the application of any theory or method complex and difficult, there is no apparent reason to assume that application of one or more of them would be any more difficult than in other antitrust cases or that any difficulty was specially attributable to the acts of defendants.

In sum, Mr. Wilsey's estimate of Champagne's lost profits attributable to lost sales fails to meet the standards of Rule 702 and must be excluded.

Lost Profits Due to Additional Product Cost

Mr. Wilsey concluded that plaintiff has experienced lost profits **[*49]** of between $ 3,936,000 and $ 5,150,000 because of higher prices it paid, due to limited mill availability, for product it did acquire. As with the lost sales projections, defendants attack the admissibility of the opinion on multiple grounds.

Unlike his analysis of lost sales, Mr. Wilsey's estimates as to higher product prices are based on an identifiable technique or method. He undertook an extensive comparison of prices paid by plaintiff for various types of product at various times and compared those to prices paid by other defendant service centers in similar circumstances. Based on these comparisons, [51] he estimated the additional product cost incurred by plaintiff during the pertinent periods and, based on a range of price differentials, a resulting range of estimated lost profits. [52]

Certain of defendants' objections, such as their arguments based on the number of times Mr. Wilsey **[*50]** used a particular Champagne contract as a basis for comparison in his calculations or the potential impact of external market forces, the court views as going to the weight potentially to be accorded the opinion, rather than to its admissibility. However, defendants' objections based on Mr. Wilsey's alleged failure to account for alternative explanations of the damages he claims occurred raise more serious issues.

Defendants argue that Mr. Wilsey failed to take into account the limited mill access that plaintiff would have had even in the absence of the alleged conspiracy. Mr. Wilsey acknowledged that a service center such as Champagne does not automatically become entitled to recognition by one or more mills simply by opening its doors and that mills may deny access for reasons unrelated to pressure from other service centers. [53] There was considerable evidence offered at the James hearing to the effect that mills base their distributor recognition decisions, at least in part, on considerations of creditworthiness and the track record of the distributor in dealing with the ultimate purchasers of product. [54] More pertinent to the circumstances here, [55] they also consider the number **[*51]** of distributors in particular areas and the number of dealer relationships they want to maintain. In short, it is clear that mills do not automatically recognize all service centers and that service centers, including some or all of the defendants, routinely have access to less than all of the domestic mills. The result is that, even in the absence of actionable pressure by competitors, a service center is not guaranteed access to the most favorable pricing of a product or to other benefits that customarily accompany being recognized by one or more mills. [56]

Mr. Wilsey acknowledges that his model does not take this factor into account in any specific way. Rather, he states that he accounted for this by assuming that plaintiff would have sufficient mill access to cover or account for the differing price projections he otherwise came up with. In effect, he has assumed that whatever unfavorable price differentials plaintiff experienced were due to the alleged conspiracy. Plaintiff urges that it is reasonable for Mr.

---

[51] The comparisons involved differences both in the per pound price paid by plaintiff for product and in the "adders" for width and gauge (additional amounts sometimes charged by mills depending on the width or gauge of the aluminum purchased.)

[52] Wilsey Report, P 69; Schedule B and supporting schedules.

[53] Daubert Tr., pp. 15, 91-93. At 91: "Q …You also agree, don't you, that mills often decline to add service centers without any acts or pressure, correct? A. I'm sure that's true."

[54] Dealer recognition ordinarily involves an agreement for extension of a limited amount of short term credit.

[55] There appears to have been no question as to Champagne's creditworthiness or as to the quality of its work (i.e. processing of the metal and the like). Its overall service to customers appears to have been exceptional.

[56] Recognition also gives heightened access to depot stock (product maintained in inventory by the mill and hence more readily available **[*52]** to the distributor, without the distributor having to bear the capital cost of maintaining the inventory) and to price rebates.

Wilsey to make such an assumption and that it would be up to plaintiff to establish at trial the reasonableness of that assumption. While that may be so, in the face of clear evidence that mill recognition is not automatic and that no service center has access to all mills or products, it strikes the court as highly unlikely that plaintiff could ever prove that, but for defendants, it would have had sufficient access to achieve the most favorable pricing on every transaction or -- more to the point here -- whether it could count on pricing which, on average, equals that of larger and more established service **[*53]** centers. At the very least, the failure of Mr. Wilsey's model to account for this factor in some fashion renders its reliability suspect.

If the matter of limitations on mill access even in the absence of distributor pressure was the only alternative explanation not sufficiently accounted for by Mr. Wilsey, the court might well conclude the omission, while significant, was not sufficient to bar admission of his opinion on cost damages. However, it is not the only omission. The far more significant omission is the failure of Mr. Wilsey's analysis to take into account, in any explicit sense, the impact of volume on pricing in the industry.

The evidence clearly established, and Mr. Wilsey does not dispute, [57] the volume of a mill's sales to a particular distributor affects the price at which the mill is willing to sell. It is equally clear that Mr. Wilsey's model did not take volume into account:

> Q. And you said just a few minutes ago that you would expect a larger volume purchaser to get a better price, correct?
> A. Yes, sir.
> Q. And, in fact, you made no adjustment in your purchase price calculations to account for the total effect of volume difference, did you?
>
> A. I explained that. That's **[*54]** correct. And I explained it too.

Daubert Tr., p. 72.

One explanation Mr. Wilsey offered essentially was that Champagne, even though a new company, would have had purchases in sufficient volume to get the most favorable pricing. He relied on a statement from Bill Thomas, a former mill representative and current employee of plaintiff, who explained in his deposition that it was industry practice for mills to take volume into account for pricing based on a three-tiered classification of distributors, with distributors who purchased the most product ("Tier 3" distributors) getting the most favorable prices. [58] At the hearing, Mr. Wilsey initially suggested the projected levels of purchasing by plaintiff would have entitled it to Tier 3 status, based on Mr. Thomas' description of Tier 3 status as involving purchases of at least $ 30-40 million per year by the distributor. However, Mr. Wilsey later acknowledged that the indicated purchasing level was not based on a **[*55]** distributor's total purchases from all mills, but was instead applied on a per mill basis. And he appeared to concede that plaintiff would not have achieved that level with respect to any particular mill in the pertinent time frame. [59] If Mr. Wilsey's non-treatment of the volume issue was due to his assumption that Champagne would have qualified for Tier 3 treatment, it is clear there was no basis for such an assumption. [60]

---

[57] "The obvious issue is that Champagne is a small purchaser. And I take -- you take an Integris is buying several hundred million pounds, you obviously would expect some price differential." Daubert Tr., p. 58 (Wilsey testimony).

[58] Daubert Tr., pp. 131-135, recounting various portion of Mr. Thomas' 2008 deposition.

[59] Under Mr. Wilsey's sales projections, Champagne's purchases in total would not have exceeded $ 30 million until 2004. Wilsey Report, Schedule A-1. Thus, even if its purchases were grouped with a single mill (an assumption somewhat inconsistent with those underlying the sales projections), Champagne could not have achieved Tier 3 status with any mill until 2004. (It is unclear to what extent the inclusion of steel sales in overall sales numbers might impact this comparison.)

[60] It is reasonably clear that the entire reference to Mr. Thomas' "tier" testimony reflected an after-the-fact scramble by Mr. Wilsey to solve a problem (the impact of volume) insufficiently addressed in his **[*56]** earlier work. The deposition testimony of Mr. Thomas discussing the tier system occurred after Mr. Wilsey prepared his report. Daubert Tr., p. 74.

Mr. Wilsey also sought to discount the impact of volume on pricing by suggesting that it was just one of many factors that affected pricing or a mill's interest in a particular distributor or that its impact was offset by other factors. [61] No doubt there are factors other than volume which might affect a mill's pricing decisions, but there was no evidence offered to suggest that volume was unimportant. Indeed, the evidence was clearly to the contrary.

The bottom line is that in failing to address the impact of volume on the prices being charged to Champagne for product, Mr. Wilsey failed to account for a significant and relatively obvious alternative explanation for the pricing differentials he found to exist as to plaintiff. There are means by which he could have done so, but he did not pursue them. [62] The potential significance of volume is clear. Indeed, Mr. Wilsey could not foreclose the possibility that virtually all of the price differentials he relied on could be explained based on volume differences alone. [63]

In these circumstances, the court concludes Mr. Wilsey's opinion as to lost profits based on increased prices fails to meet the standards of *Rule 702* and must be excluded.

In light of the court's prior conclusions as to the viability of plaintiff's case on the merits, and in light of the very substantial efforts Mr. Wilsey has obviously undertaken in connection with his report and related work, not to mention its considerable cost **[*58]** to plaintiff, the court reaches its decision as to the admissibility of Mr. Wilsey's opinions with considerable reluctance. However, for the reasons stated, the court concludes that a fair application of *Rule 702* requires their exclusion and that defendants' motion to exclude the opinions and report of Mr. Wilsey [Doc. # 518] must be granted.

III. Defendants' Renewed Motion for Summary Judgment on Damages

Defendants have moved for entry of summary judgment on the basis that Mr. Wilsey's testimony is inadmissible and that, without it, plaintiff cannot prevail as to damages. They also argue, in light of the evidence that multiple mills now recognize plaintiff, that there is no basis for injunctive relief.

As to damages, defendants essentially contend that damages cannot be shown in this case without expert testimony. They cite no authority supporting ***HN16***[] the notion that damages in an antitrust context may be shown only through the testimony of an expert witness. While undoubtedly that is the common manner of establishing the extent of claimed damages, it is not a legal requirement. Here, the court has previously determined there is evidence sufficient to create justiciable issues as to all **[*59]** elements of plaintiff's case. While the exclusion of Mr. Wilsey's testimony will no doubt impact plaintiff's ability to establish meaningful damages to some extent, it does not necessarily negate the possibility that plaintiff can establish some damages.

As to plaintiff's claim for injunctive relief, the court has considerable doubt whether plaintiff can ultimately establish a basis for such relief in the circumstances existing here. [64] However, reaching that conclusion as a matter of law is premature.

The court concludes defendants' renewed motion for summary judgment [Doc. # 519] should be denied.

---

[61] Daubert Tr., pp. 74-75.

[62] Daubert **[*57]** Tr., pp. 77-78: "Q. Now, if, in fact -- there are statistical methods whereby you can look at purchase price differences, you could look at volumes and you could try to account for volume in determining the purchase prices difference after adjusting for volume, aren't there? A. Yes. Q. And you did not investigate those methods, did you? A. I felt like it was inappropriate, because like I say, there are numerous other factors that affect pricing by a mill, volume is one of them."

[63] Daubert Tr., p. 73, referencing Wilsey's 2008 deposition testimony: "Q. So it's fair to say that with the one exception of Metalwest, if we look at every single price comparison in your price damages, as far as you know it might be entirely due to volume differences? A. I don't know."

[64] While the parties appear to differ as to how quickly Champagne's fortunes changed once it received recognition from additional mills, it appears reasonably clear that plaintiff now has mill access to a degree comparable with other service centers.

Conclusion

For the reasons stated, the court concludes that, for purposes of the admission of coconspirator hearsay, plaintiff has established that an antitrust conspiracy was formed and that all defendants and mills were members of it. Defendants' motion to exclude the testimony of Roger Wilsey [Doc. # 518] is GRANTED. Plaintiff's motion to submit **[*60]** a supplemental brief [Doc. # 631] is DENIED. Defendants' motion for summary judgment [Doc. 519] is DENIED.

IT IS SO ORDERED.

Dated this 12th day of December, 2008.

Opinion

MEMORANDUM OPINION AND ORDER

Plaintiffs Commercial Street Express LLC ("Commercial"), Nicole Vander Muelen ("Muelen"), Shasta Burzynski ("Burzynski"), and Kathleen Coullard ("Coullard") (collectively, "Plaintiffs") filed a class action suit against Sara Lee Corporation ("Sara Lee"), Colgate-Palmolive Company ("Colgate"), Henkel Chemie Verwaltungsgesellschaft MBH and Henkel Corp. (collectively, "Henkel"), Unilever N.V., Unilever PLC, and Unilever United States Inc. (collectively, "Unilever") (collectively, "Defendants"). Count I of Plaintiffs' Amended Complaint alleges a violation of Section 1 of the Sherman Anti-Trust Act ("Sherman Act"), *15 U.S.C. § 1*, while the remaining three counts allege violations of various state laws. Defendants moved **[*3]** to dismiss Count I of Plaintiffs' Amended Complaint for lack of subject matter jurisdiction. [1] For the reasons stated, Defendants' Motion to Dismiss Count I of Plaintiffs' Amended Complaint is granted. Moreover, this Court finds that it lacks original jurisdiction over Plaintiffs' remaining state law claims under *28 U.S.C. § 1332(d)(2)* and declines to exercise supplemental jurisdiction over Plaintiffs' state law claims pursuant to *28 U.S.C. § 1367(c)(3)*.

STATEMENT OF FACTS

Plaintiffs allege that Defendants entered into a conspiracy to artificially raise prices of oral, personal and home care products in the U.S., and that Plaintiffs paid higher prices for oral, personal and home care products than they would have paid in the absence of Defendants' alleged illegal conduct. Am. Compl. P 32, 35. Plaintiffs allege that Defendants' are global companies that manufacture and **[*4]** sell oral, personal and home care products. Am. Compl. P P 11-16. On February 20, 2008, the German Federal Cartel Office ("FCO") issued a press release stating that it fined Defendants, for price fixing in Germany and for illegally passing on information on price talks with retailers in an attempt to influence the market behavior of competitors and remove the uncertainty of competitive conditions in Germany. Am. Compl. P P 25-26. The FCO stated that Defendants, in early 2006, agreed to hike up the price of Pril and Palmolive dish detergents, Fa, Duschdas and Palmolive shower gels and Signal, Dentagard and Colgate toothpaste brands. These products are made by Henkel, Sara Lee, Unilever and Colgate. Am. Compl. P 25. The Defendants' alleged anticompetitive behavior in Germany came to light after Colgate "spilled the beans" to the German competition authorities. Am. Compl. P 26. Plaintiffs allege that a spokesperson for Henkel stated, "We made mistakes. We accept the fine of [euro] 21.6." Am. Compl. P 27. Plaintiffs allege that "Defendants' price-fixing conspiracy in Germany dramatically increased the profitability of the Defendants which included the United States market." Am. Compl. **[*5]** P 29. Henkel, in 2006, reported record revenues and profits in its Home Care business of more then [euro] 4.1 billion and an operating profit of [euro] 449 million, a 3.7% increase compared to 2005. Am. Compl. P 29. Henkel explained the increase in profit by stating,

> Market growth was more price-driven than in previous years because-unlike in 2005-it became possible to pass on raw material cost increases by raising products prices. As a consequence, the decline of the last few years encountered in our largest market, Western Europe, was reversed to product gratifying growth. In North America, too, there was a tangible price-driven upswing in the market dynamics, with a considerable expansion in sales. In North America, the successfully implemented price increases and good performance of our air freshener business contributed to strong growth in organic sales.

Am. Compl. P 29. Plaintiffs claim that the oral, personal and home care products market is large. Am. Compl. P 30. In 2006 Unilever's global sales were [euro] 18.297 billion and U.S. sales were more then [euro] 3 billion. In 2006 Henkel's U.S. sales were more then [euro] 1 billion and Colgate's U.S. sales were [euro] 2.211 billion. **[*6]** Am. Compl. P 30. Sara Lee's global sales for the fiscal year ending in 2007 were more then $ 2 billion. Am. Compl. P 30. Plaintiffs allege that Defendants' conspiracy to fix prices in Germany has: (1) suppressed, restrained and eliminated price competition in the oral, personal and home care industry in the U.S.; (2) raised, fixed, maintained and stabilized the prices of oral, personal and home care products at artificial and non-competitive levels throughout the U.S.; and (3) deprived consumers of free and open competition in the oral, personal and home care products market. Am. Compl. P P 31, 37.

---

[1] Each Defendant filed its own motion to dismiss, except for Colgate and Henkel who submitted a joint motion. Each Defendant raised various arguments in support of its motion to dismiss; however, since this Court finds that it lacks subject matter jurisdiction, it does not address the remaining arguments made by Defendants.

STANDARD OF REVIEW

Federal Rule of Civil Procedure 12(b)(1) provides for dismissal for lack of subject matter jurisdiction. *Fed.R.Civ.P. 12(b)(1)*; *United Phosphorus, Ltd. v. Angus Chem. Co., 322 F.3d 942, 946 (7th Cir. 2003)*. "If subject matter jurisdiction is . . . not evident on the face of the complaint, the motion to dismiss . . . would be analyzed as any other motion to dismiss, by assuming for purposes of the motion that the allegations in the complaint are true. However, as here, if the complaint is formally sufficient but the contention is that there is *in fact* no subject matter jurisdiction, **[*7]** the movant may use affidavits and other material to support the motion." *United Phosphorus, 322 F.3d at 946*; *Capitol Leasing Co. v. FDIC, 999 F.2d 188, 191 (7th Cir. 1993)* *citing* *Grafon Corp. v. Hausermann, 602 F.2d 781, 783 (7th Cir. 1979)*. The party asserting jurisdiction must establish it by "competent proof." *U.S. Phosphorus, 322 F.3d at 946*; *NFIC, Inc. v. Devcom Mid-America, Inc., 45 F.3d 231, 237 (7th Cir. 1995)* *citing* *McNutt v. Gen. Motors Acceptance Corp. of Indiana, 298 U.S. 178, 189, 56 S. Ct. 780, 80 L. Ed. 1135 (1936)*. This means that jurisdiction must be established by a preponderance of the evidence or "proof to a reasonable probability." *NFIC, 45 F.3d at 237*, *citing* *Gould v. Artisoft, Inc., 1 F.3d 544, 547 (7th Cir. 1993)*.

DISCUSSION

I. Count I (The Sherman Act)

Defendants' move this Court to dismiss Count I of Plaintiffs' Complaint for lack of subject matter jurisdiction. Count I of Plaintiffs' Complaint alleges a violation of the Sherman Act. The Sherman Act provides that "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." *15 U.S.C. § 1*. In 1982, the Foreign Trade **[*8]** Antitrust Improvements Act ("FTAIA") amended the Sherman Act, stating:

> The Sherman Act shall not apply to conduct involving trade or commerce (other than import trade or import commerce) with foreign nations unless-
> (1) such conduct has a direct, substantial, and reasonably foreseeable effect-
> (A) on trade or commerce which is not trade or commerce with foreign nations, or on import trade or import commerce with foreign nations; or
> (B) on export trade or export commerce with foreign nations, of a person engaged in such trade or commerce in the United States; and
> (2) such effect gives rise to a claim under the provisions of this Act other than this section.

15 U.S.C. §§ 6a (1), *(2)*. [2] The language of the FTAIA lays down a general rule placing all activity involving foreign commerce outside the Sherman Act's reach. It then brings such conduct back within the Sherman Act's reach provided that the conduct both (1) sufficiently affects American commerce, that is, it has a "direct, substantial, and reasonably foreseeable effect" on American domestic commerce, and (2) has an effect of a kind that ***antitrust law*** considers harmful, that is, the "effect" must "giv[e] rise to a [Sherman Act] claim." **[*9]** *§ 6a(1)*, *(2)*; *F. Hoffmann-La Roche Ltd. et al. v. Empagran S.A. et al., 542 U.S. 155, 162, 124 S. Ct. 2359, 159 L. Ed. 2d 226 (2004)*.

The FTAIA intends to make clear to American firms doing business abroad (and to American exporters) that the Sherman Act does not prevent them from entering into a business arrangement, however anticompetitive, as long as those arrangements adversely affect only foreign markets. *F. Hoffmann-La Roche Ltd. et al., 542 U.S. at 161*. It does so by removing from the Sherman Act's reach commercial activities taking place abroad, unless those activities "meant to produce and did in fact produce some substantial effect in the United States." *Hartford Fire Ins. Co. v. California, 509 U.S. 764, 796, 113 S. Ct. 2891, 125 L. Ed. 2d 612 (1993)*.

---

[2] The FTAIA establishes limits on the subject matter jurisdiction of the district courts. *See* *United Phosphorus, Ltd., v. Angus Chemical Company, 322 F.3d 942 (7th Cir. 2003)* (en banc).

Here, Plaintiffs have failed to allege any facts demonstrating that the Defendants' foreign conduct "meant to produce and did in fact produce some substantial effect in the United States." *See Id.* In fact, Plaintiffs have not set forth any facts to show that the Defendants alleged antitrust violations in Germany had **[*10]** any effect on the U.S. market. There are no factual allegations in Plaintiffs' Complaint that any Defendant agreed in Germany, or anywhere else, to restrict competition in the United States. Merely stating that the Defendants' are global companies that sell products in the United States is insufficient. Further, simply alleging that there have been price increases on some of Defendants' products in the United States is inadequate. Plaintiffs have failed to allege any facts demonstrating a causal connection between Defendants' conduct in Germany and the alleged price increase in the U.S. *See Eurim-Pharm GmbH. v. Pfizer Inc., 593 F.Supp. 1102, 1104-07 (S.D.N.Y. 1984)* (finding no subject matter jurisdiction under the Sherman Act where plaintiffs alleged a worldwide conspiracy but did not allege any facts demonstrating a causal connection between defendants' conduct in Europe and a U.S. price increase).

Plaintiffs allege that Defendants entered into "a continuing agreement, understanding, and conspiracy in restraint of trade to artificially raise, fix and or stabilize prices of oral, personal and home care products in the United States"; however, Plaintiffs provide no factual allegations **[*11]** to support this conclusory assertion. Am. Compl. P 35. Plaintiffs' Complaint only mentions Defendants' alleged illegal antitrust behavior in Germany and creates no causal connection between the Defendants' German price-fixing conspiracy and the alleged increase in price of Defendants' products in the U.S. The Plaintiffs also allege that the class members affected by the conspiracy are "all persons or entities who acquired in the United States oral, personal and home care products manufactured and or distributed by one or more of the Defendants"; however, Plaintiffs do not show how Defendants' alleged price-fixing conspiracy in Germany caused Plaintiffs to be injured in the U.S. by acquiring Defendants' products in the U.S. and do not set forth any facts in their Complaint to support that Defendants engaged in an anti-competitive conspiracy to effect the price of products in the U.S. Am. Compl. P 17. *See Empagran S.A. v. Hoffmann-Laroche, Ltd., 368 U.S. App. D.C. 18, 417 F.3d 1267, 1270-71 (D.C. Cir. 2005)* (finding plaintiffs "must satisfy the FTAIA's requirement that the U.S. effects of the conduct [at issue] give rise to their claims"). Count I of Plaintiffs' Complaint does not allege sufficient facts to **[*12]** demonstrate that Defendants' foreign conduct "meant to produce and did in fact produce some substantial effect in the United States." Therefore, this Court finds that it lacks subject matter jurisdiction over Count I of Plaintiffs' Complaint.

II. Jurisdiction under 28 U.S.C. § 1332(d)(2)

Plaintiffs assert that this Court has original jurisdiction pursuant to *28 U.S.C. § 1332(d)(2)*. In relevant part, under *§ 1332(d)(2)*, a district court has original jurisdiction of any civil action in which the matter in controversy exceeds the sum or value of $ 5,000,000, exclusive of interests and costs and is a class action. *28 U.S.C. § 1332(d)(2)*. The proponent of federal jurisdiction bears the burden of describing how the controversy exceeds $ 5 million. *Spivey v. Vertrue Inc., 528 F.3d 982, 986 (7th Cir. 2008)*. This is a pleading requirement. *Id.* Only after the proponent of federal jurisdiction has explained *plausibly* how the stakes exceed $ 5 million does the case belong in federal court, unless it is legally impossible for the plaintiff to recover that much. *Id.; See also Bell Atlantic Corp. V. Twombly, 550 U.S. 544, 127 S.Ct. 1955, 167 L. Ed. 2d 929 (2007)*; *St. Paul Mercury Indemnity Co. v. Red Cab Co., 303 U.S. 283, 58 S. Ct. 586, 82 L. Ed. 845 (1938)*; *Normand v. Orkin Exterminating Co., 193 F.3d 908 (7th Cir. 1999)*; **[*13]** *Gardynski-Leschuck v. Ford Motor Co., 142 F.3d 955 (7th Cir. 1998)*.

Here, not only do Plaintiffs not explain *plausibly* how the amount in controversy exceeds $ 5 million, they provide no explanation at all. Plaintiffs do not allege any facts upon which this Court can determine that the amount in controversy exceeds $ 5 million. They simply assert jurisdiction under *28 U.S.C. § 1332(d)(2)* which provides for federal jurisdiction if the amount in controversy exceeds $ 5 million. This is insufficient to establish federal jurisdiction under *28 U.S.C. § 1332(d)(2)*. *See Spivey v. Vertrue Inc., 528 F.3d 982 (7th Cir. 2008)*; *see also Brill v. Countrywide Home Loans, Inc., 427 F.3d 446 (7th Cir. 2005)* (holding that amount in controversy was sufficiently plead where party asserting jurisdiction under *§ 1332(d)(2)* set forth that 3,800 faxes were sent and statute provides up to $ 500 recovery per fax). Therefore, this Court finds that it does not have original jurisdiction over Plaintiffs' claims under *28 U.S.C. § 1332(d)(2)*.

III. Supplemental jurisdiction 28 U.S.C. § 1367(c)(3)

Under *28 U.S.C. § 1367(a)*, district courts are granted supplemental jurisdiction over pendant state law claims; however, if **[*14]** all federal law claims drop out before trial, the district court may dismiss the state law claims. *28 U.S.C. § 1367(c)(3)*. Because this Court has dismissed all causes of action arising under federal law and does not have original jurisdiction under *28 U.S.C. § 1332(d)(2)*, it declines to exercise supplemental jurisdiction over Plaintiffs' remaining causes of action arising under state law.

CONCLUSION AND ORDER

Therefore, for the reasons stated, Plaintiffs' Complaint is dismissed for lack of subject matter jurisdiction.

So ordered.

Opinion

ORDER GRANTING IN PART AND DENYING IN PART PLAINTIFF'S MOTION TO DISSOLVE STAY AND CONTINUE JANUARY 5, 2009 HEARING ON DEFENDANTS' MOTION FOR SUMMARY JUDGMENT PURSUANT TO *RULE 56(f)*

Before the Court is Plaintiff Hawaii Children's Blood and Cancer Group ("HCBCG") Motion to Dissolve Stay and Continue January 5, 2009 Hearing on Defendants' Motion for Summary Judgment Pursuant to *Rule 56(f)* ("Motion"), filed on December 4, 2008. Pursuant to an order of this Court, HCBCG filed a supplemental brief on December 12, 2008. Defendants Hawaii Pacific Health ("HPH"), Kapiolani Medical Specialists ("KMS"), and Kapiolani Medical Center for Women and Children ("KMCWC", **[*2]** all collectively "Defendants") filed their memorandum in opposition on December 15, 2008. The Court finds this matter suitable for disposition without a hearing pursuant to Rule *LR7.2(d)* of the Local Rules of Practice of the United States District Court for the District of Hawaii ("Local Rules"). After careful consideration of the Motion, supporting and opposing memoranda, and the relevant legal authority, HCBCG's Motion is HEREBY GRANTED IN PART AND DENIED IN PART for the reasons set forth below.

BACKGROUND

On December 29, 2003, HCBCG[1] filed the instant action alleging antitrust claims under the Sherman Act and a claim under the Lanham Act ("Federal Action"). HCBCG filed its First Amended Complaint on June 21, 2004.[2] The Federal Action arises from Defendants' alleged efforts to secure a monopoly of clinical pediatric hematology-oncology ("hem-onc") physician services in Hawaii by, *inter alia*, excluding HCBCG physicians from that market.

In January 2002, Kelley Woodruff, M.D., filed an action in state court alleging, *inter alia*, state antitrust claims, defamation, retaliatory discharge, breach of contract, and tortious interference ("State Action"). Dr. Woodruff later amended her complaint in the **[*3]** State Action to add HCBCG as a plaintiff. The Second Amended Complaint in the State Action,[3] filed on February 17, 2005, purportedly consolidated the complaint in the State Action with the complaint in the Federal Action. [Defs' CSOF, Exh. I at ¶ 1.]

On October 22, 2004, the district judge in the Federal Action issued an Order Denying Defendants' Motion to Dismiss and Granting Defendants' Alternative Motion to Stay Proceedings Pending Resolution of the Concurrent State of Hawaii Circuit Court Case ("Stay Order").[4] The district judge found that the facts and issues to be determined in the Federal Action were identical to those in the State Action. The district judge therefore stayed the Federal Action pending the outcome of the State Action, but carved out an exception for any discovery that may be taken in the State Action which would also be relevant to the Federal Action.

On July 3, 2008, Defendants moved to amend this Court's December 14, 2007 *Rule 16* Scheduling Order. Defendants stated that, on March 18, 2008, the judge in the State Action, the Honorable Bert Ayabe, issued the last of a series of summary judgment orders and that all claims were resolved in Defendants' favor. The plaintiffs **[*4]** in the State Action moved to reconsider the summary judgment orders. Judge Ayabe issued an order denying the motion for reconsideration on July 1, 2008. Defendants argued that these orders collectively constituted a final judgment in the State Action. Defendants therefore sought an amendment of the dispositive motions deadline in the Federal Action. This Court granted Defendants' motion and vacated the trial date and all unexpired deadlines.

This Court's September 10, 2008 Amended *Rule 16* Scheduling Order set an August 4, 2009 trial date. The dispositive motions deadline is March 4, 2009 and the discovery deadline is June 5, 2009.

Defendants filed a Motion for Summary Judgment on October 31, 2008. Defendants argue that claim and issue preclusion bar the litigation of the issues in the Federal Action. In the alternative, Defendants argue that they are entitled to summary judgment on the merits of HCBCG's claims. HCBCG filed its memorandum in opposition to Defendants' Motion for Summary Judgment on December 5, 2008. The Motion for Summary Judgment is currently set for hearing before the district judge on January 9, 2009.

In the instant Motion, HCBCG asks the Court to dissolve the stay and to continue **[*5]** the hearing on Defendants' Motion for Summary Judgment for approximately eight weeks so that HCBCG can conduct discovery. With regard to the stay, the state court entered final judgment in the State Action on October 6, 2008. [Exh. 1 to Motion.]

---

[1] HCBCG is an unincorporated medical group consisting of Kelley Woodruff, M.D., and Robert Wilkinson, M.D., both of whom are pediatric hematology-oncology physicians.

[2] The First Amended Complaint in the Federal Action is attached to Defendants' Concise Statement of Facts, filed October 31, 2008 ("CSOF"), as Exhibit J.

[3] The Second Amended Complaint in the State Action is attached to Defendants' CSOF as Exhibit I.

[4] The district judge's Stay Order is attached to Defendants' CSOF as Exhibit H.

HCBCG argues that the State Action is now completed and there is no further reason to maintain the stay in the Federal Action.

With regard to the continuance, HCBCG emphasizes that there was no discovery in the State Action after the April 6, 2006 discovery deadline and that the state court did not have jurisdiction to hear HCBCG's Sherman Act claims. HCBCG therefore argues that it did not have the opportunity to conduct discovery that is essential to its opposition to Defendants' Motion for Summary Judgment, which addresses the merits of HCBCG's claims in the Federal Action.

HCBCG argues that, if allowed to conduct further discovery, it will be able to prove that: Defendants excluded HCBCG's physicians from the pediatric hem-onc physician market, and from hem-onc medical education and research; Defendants interfered with and diverted new patient referrals; Defendants lost their Children's Oncology Group certification for bone marrow transplants **[*6]** and are not likely to be accredited soon; and Defendants have a monopoly. HCBCG alleges that Defendants' loss of their certification was a result of their exclusion of HCBCG physicians from the provision of bone marrow transplant services. HCBCG argues that this forces Hawaii patients to seek bone marrow transplant services at mainland centers.

HCBCG also alleges that Defendants' refusal to work with HCBCG interfered with the elevation of the Cancer Research Center of Hawaii ("CRCH") to Comprehensive Cancer Center status. HCBCG claims that as a result, CRCH's director and associate director left the organization and Hawaii lost potential millions of dollars in research funds and a substantial number of new pediatric hem-onc clinicians. HCBCG therefore argues that Defendants' actions adversely affected interstate commerce.

HCBCG states that it can subpoena witnesses with first-hand knowledge that Defendants diverted referrals and that they excluded HCBCG from faculty and research appointments. HCBCG argues that there is sufficient time for the district judge to hear Defendants' Motion for Summary Judgment after HCBCG has conducted discovery because the dispositive motions deadline is **[*7]** not until March 4, 2009 and trial is not until August 4, 2009.

This Court directed HCBCG to file a supplemental brief specifying exactly what discovery was necessary for it to oppose Defendants' Motion for Summary Judgment. The Court also instructed HCBCG to provide an offer of proof as to how the evidence could be obtained.

In its supplemental brief, HCBCG primarily points to a July 14, 2008 declaration by Lawrence Wu, Ph.D., Defendants' economist, "which was attached as an unreferenced exhibit to Defendants' Concise Statement". [Pltf's Suppl. Brief at 2; see also Decl. of Rafael del Castillo at ¶ 7.] HCBCG states that a table included in Dr. Wu's July 14, 2008 declaration is materially different from the corresponding table included in his February 18, 2008 declaration, which Defendants submitted with their motion for summary judgment in the State Action.[5] HCBCG argues that it has not had a fair opportunity to conduct discovery as to why Dr. Wu reached identical conclusions based on different data. [Pltf's Suppl. Brief at 2.] HCBCG argues that this indicates that Dr. Wu's "'opinion' was ends-means based". [Id. at 9.] HCBCG also seeks "discovery of financial data, documents, witnesses, and answers **[*8]** to interrogatories that would provided [sic] direct and indirect evidence of the arguments and material issues on which Plaintiff has or can rely in opposing Defendants' Motion for Summary Judgment." [Id. at 3.] HCBCG argues that it needs to obtain Dr. Stephen Feig's report and needs to conduct discovery as to "the conduct that persuaded CRCH and Queen's to refuse to deal with Plaintiff, and ultimately led to the diminution of CRCH's role in the community[.]" [Id. at 9.] HCBCG argues that the requested discovery is relevant and that Defendants are clearly in control of this evidence.

According to Mr. del Castillo's declaration, the financial data that Defendants have already produced shows that Defendants diverted patient referrals who presented at KMCWC without a hem-onc diagnosis. HCBCG received 15 of 32 new patients in 2006, 3 of 5 in January 2007, 1 of 4 in February 2007, 0 of 5 in March 2007, 0 of 3 in April 2007, 4 of 7 in May through June 2007, 4 of 7 in August 2007, and 1 of 11 in September through December 2007. HCBCG believes that, if Defendants are required to produce the 2008 data, it will show that HCBCG's share before

[5] Dr. Wu's declarations, with the conflicting tables, are attached to HCBCG's Supplemental Brief as Exhibit 3.

the termination of its practice was less than half of its 2007 share **[*9]** and that Defendants' share is 10 to 15 times greater than Dr. Wilkinson's and Dr. Woodruff's combined cases. [Pltf's Suppl. Brief, Decl. of Rafael del Castillo at ¶¶ 8-9.] In contrast, HCBCG's expert, David Eisenstadt, surveyed the years 2003 through 2005 and found that no more than one-third of Defendant KMS's patients were from direct referrals and one-third of the new patients had no diagnosis when they presented at the hospital. HCBCG argues that the 2006 and 2007 data supports Dr. Eisenstadt's projection that an increasing percentage of patients would be referred to KMS because Defendants controlled access to physician services for these patients. [Id. at ¶¶ 10-11.]

HCBCG argues that it needs Defendants' claims data because HCBCG believes the data will show that Defendants cherry-picked the patients who had the best insurance coverage. [Id. at ¶ 13.] HCBCG also claims to have evidence that Defendants gave KMS physicians heavy subsidies in 2002 and 2003 to assist Defendants in excluding HCBCG from the market. HCBCG argues that additional discovery will show that the subsidy continued into 2007 and 2008. HCBCG argues that this will disprove Defendants' argument that they merely engaged **[*10]** in legitimate head-to-head competition with HCBCG. [Id. at ¶ 14.]

HCBCG identifies the following witnesses who it needs to depose in order to oppose Defendant's Motion for Summary Judgment: Dr. Sarah Fryberger; Dr. Stephen Feig; Dr. Robert Cooney, CRCH; and Dr. Randal Wada.

Dr. Fryberger worked for Defendants from August 2004 to December 2007. She protested Defendants' conduct toward HCBCG and warned Defendants' administrators that this conduct would threaten the quality of care. Dr. Fryberger was the founder and medical director of a pediatric hem-onc program in Portland that competed with a university faculty medical group. HCBCG therefore argues that she can testify as to Defendants' head-to-head competition argument. HCBCG also claims that Dr. Fryberger can testify regarding diverted referrals. [Id. at ¶ 18.]

According to HCBCG, Dr. Feig submitted a report to Defendants regarding problems with their bone marrow transplant program. He would like this to serve as his testimony. Defendants, however, refuse to produce the report. HCBCG believes that Dr. Feig recommended, *inter alia*, that Defendants' team include the HCBCG physicians. HCBCG believes that Dr. Feig's deposition, as well **[*11]** as the deposition of new witnesses identified during Dr. Feig's deposition, will show that Defendants did not follow his advice and that Defendants' exclusion of HCBCG has been detrimental to the bone marrow transplant program. [Id. at ¶ 19.]

HCBCG states that Dr. Cooney would testify about the recent developments at CRCH which led to the resignation of its executive director and associate director. The executive director, Dr. Carl Vogel, initiated CRCH's plan to form a joint venture with HCBCG, which would have resulted in a clinical expansion. Dr. Cooney previously testified that HPH's Executive Vice President said that HPH would consider it an unfriendly act if CRCH went forward with the joint venture. Plaintiff believes that Dr. Cooney has more information about how Defendants discouraged CRCH from entering into the joint venture. He can also testify about how Defendants' exclusion of HCBCG and its blocking of the joint venture adversely impacted the area. [Id. at ¶ 20.]

Dr. Wada is the Medical Director of KMS's Bone Marrow Transplant Program. He would testify that Defendants are no longer certified for bone marrow transplants. His testimony, and that of other bone marrow program **[*12]** directors (who HCBCG does not name) will establish that Hawaii's program has deteriorated to such a point that it is unlikely to be reaccredited without a major investment. He would also corroborate Dr. Wilkinson's testimony that bone marrow/stem cell transplants are becoming an increasing part of the Children's Oncology Group's clinical trials. Thus, Hawaii patients will have to go to the mainland for such treatment. [Id. at ¶ 21.]

HCBCG also states that other medical directors of pediatric cancer centers (who HCBCG does not name) would testify about how appropriate head-to-head competition would benefit the market. [Id. at ¶ 22.]

Finally, HCBCG states that it would seek answers to the following interrogatories:

a. Whether there existed a credible reasonable, competitive business reason for refusing to continue team care;

b. Whether there existed a credible reasonable, competitive business reason for refusing to share information about the patients on rounds or cross cover;

c. Whether there existed a credible reasonable, competitive business reason for refusing to distribute patients who were referred to the hospital without a hem-onc diagnosis equally to HCBCG and KMS; and

d. Whether there **[*13]** are any efficiency justifications for vertically integrating the hospital and the specialist physicians that acceptably offset the exclusionary effects.

[Id. at ¶ 23.]

On December 12, 2008, HCBCG also filed a declaration by Dr. Woodruff, who stated that she confirmed and agreed with the statements in the Supplemental Brief and Mr. del Castillo's declaration. She also attested to having personal knowledge of certain facts alleged therein.

In their memorandum in opposition, Defendants primarily argue is that no discovery is needed to address whether the decision in the State Action precludes litigation of the claims presented in the Federal Action. HCBCG's argument that discovery is necessary goes entirely to Defendants' alternative argument that it is entitled to summary judgment on the merits of HCBCG's claims.

Defendants note that discovery in the State Action was exhaustive. There were fifty-three depositions, thirty-two of which HCBCG noticed. Defendants argue that HCBCG has failed to prove that it is necessary to dissolve the stay or to continue the hearing on Defendants' Motion for Summary Judgment.

Defendants argue that claim preclusion bars Plaintiff from litigating its Lanham Act **[*14]** claim in the Federal Action and that issue preclusion bars Plaintiff from litigating its Sherman claims. Defendants contend that their claim and issue preclusion arguments are ripe for decision now.

With regard to the merits of HCBCG's claims, Defendants state that the arguments the Motion for Summary Judgment raises are identical to those presented in the State Action. Further, HCBCG has not proposed any discovery on the Lanham Act claim and therefore the merits of that claim are ripe for decision now. Defendants also argue that the discovery that HCBCG has proposed is not relevant to its antitrust claims. HCBCG's claims are based on the allegations that KMS physicians will not practice with Dr. Woodruff and that hospital physicians refer all new patients to KMS hem-onc physicians instead of referring some to HCBCG's physicians. Defendants argue that such conduct does not amount to an antitrust violation. Defendants assert that further discovery is not necessary because they have essentially stipulated that they do not cooperate with Dr. Woodruff and will not refer patients to her.

Defendants also argue that none of the specific discovery that HCBCG identified is material to the Motion **[*15]** for Summary Judgment. Defendants state that the difference between Dr. Wu's two tables is explained in his report. The second table is based on new data that he received after his first report. Further, the difference is not material because, although some figures for individual physicians changed, the relative market shares for KMS and HCBCG were the same for outpatient encounters and only slightly different for inpatient admissions. Defendants also emphasize that their Motion for Summary Judgment does not rely on this particular data. Defendants also point out that the parties had agreed that HCBCG could depose Dr. Wu on March 4, 2008, but HCBCG's counsel cancelled the deposition on March 3.

Defendants argue that the referral data for 2008 is irrelevant to the Motion for Summary Judgment because they contend that they have no duty to refer patients to HCBCG. Further, because Defendants presume, for purposes of the Motion for Summary Judgment, that KMS physicians refer all patients to their KMS hem-onc colleagues, any evidence concerning the alleged subsidy is irrelevant. Defendants also argue that HCBCG's position that economic head-to-head competition is inappropriate in the hem-onc **[*16]** industry is contrary to ***antitrust law***.

Defendants point out that HCBCG deposed Dr. Fryberger on December 19, 2005. It is not necessary to depose her again regarding patient referrals because this is not in dispute in the Motion for Summary Judgment. Defendants also argue that HCBCG's counsel did not contact Dr. Fryberger to learn what else she would testify to and this violated the Court's order directing HCBCG to file a supplemental brief.

Defendants argue that, even if Dr. Feig would testify that he recommended that Defendants' bone marrow transplant team include HCBCG's physicians, this is irrelevant to the Motion for Summary Judgment. Similarly, Dr. Wada's testimony regarding the alleged decline in the quality of the bone marrow transplant program since HCBCG ceased services is also irrelevant. Defendants stress that Dr. Cooney has already been deposed twice and HCBCG gives no basis for its belief that he has further information that would be relevant to the Motion for Summary Judgment.

Finally, Defendants argue that they do not need to respond to HCBCG's four interrogatories because HCBCG could have asked all of them during the State action, but never did. Moreover, Dr. Wu's declaration **[*17]** addresses these issues.

DISCUSSION

I. Stay

At the July 26, 2007 hearing on HCBCG's Motion to Dissolve Stay, the district judge instructed the parties that they had to proceed to final judgment in the State Action before coming back to her to dissolve the stay. [Trans. 7/26/07, filed 8/9/07 (dkt. no. 122), at 15.] Insofar as final judgment has been entered in the State Action, there is no further reason for the stay. HCBCG's Motion is therefore GRANTED as to its request to dissolve the stay.

II. Continuance

HCBCG seeks a continuance of the January 9, 2009 hearing on Defendants' Motion for Summary Judgment, arguing that HCBCG needs to conduct discovery to oppose Defendants' motion. *Federal Rule of Civil Procedure 56(f)* states, in pertinent part:

> If a party opposing the motion [for summary judgment] shows by affidavit that, for specified reasons, it cannot present facts essential to justify its opposition, the court may:
> . . . .
> (2) order a continuance to enable affidavits to be obtained, depositions to be taken, or other discovery to be undertaken; or
> (3) issue any other just order.

Thus, a party requesting a *Rule 56(f)* continuance must

> show[] that, without *Rule 56* assistance, it cannot present facts necessary to justify its claims. The requesting **[*18]** party must show: (1) it has set forth in affidavit form the specific facts it hopes to elicit from further discovery; (2) the facts sought exist; and (3) the sought-after facts are essential to oppose summary judgment. Failure to comply with these requirements is a proper ground for denying discovery and proceeding to summary judgment.

Family Home & Fin. Ctr., Inc. v. Fed. Home Loan Mortg. Corp., 525 F.3d 822, 827 (9th Cir. 2008) (citations and quotation marks omitted). In addition, the request must be timely and the information sought must be relevant. See *Employers Teamsters Local Nos. 175 & 505 Pension Trust Fund v. Clorox Co., 353 F.3d 1125, 1129 (9th Cir. 2004)*. Discovery is not essential to the party's opposition if it is only "generically relevant". See *Family Home, 525 F.3d at 827*. The requesting party bears the burden of showing that the additional facts would prevent summary judgment. See *Employers Teamsters, 353 F.3d at 1129-30*.

A. Claim and Issue Preclusion

Defendants' primary argument in their Motion for Summary Judgment is that HCBCG is barred from litigating the claims in the Federal Action under the principles of claim preclusion and issue preclusion. Hawaii law controls as to the preclusive effect of the judgment in the State Action. See *28 U.S.C. § 1738*. Under Hawaii law, claim preclusion applies if "(1) there was a final judgment on the merits, (2) both parties are the same or in privity with the parties in the original **[*19]** suit, and (3) the claim decided in the original suit is identical with the one presented in the action in question." *Tortorello v. Tortorello, 113 Haw. 432, 439, 153 P.3d 1117, 1124 (2007)* (citation, emphasis, and block quote format omitted). In order to establish that issue preclusion prevents HCBCG from relitigating issues in the State Action, Defendants must prove that:

> (1) there was a full and fair opportunity to litigate the issue in the previous action; (2) the issue was actually litigated in that action; (3) the issue was lost as a result of a final judgment in that action; and (4) the person against whom collateral estoppel is asserted in the present action was a party or in privity with a party in the previous action.

Kendall v. Visa U.S.A., Inc., 518 F.3d 1042, 1050 (9th Cir. 2008) (citation and quotation marks omitted). None of the factors in either analysis require consideration of events that took place after the close of discovery in the State Action. The Court therefore finds that no discovery is necessary for HCBCG to oppose Defendants' claim and issue preclusion arguments.

B. Merits

In the alternative, Defendants argue that they are entitled to summary judgment because HCBCG's claims fail on the merits. HCBCG's Lanham Act claim alleges that "Defendants provided false and misleading information and allegations **[*20]** to patients and physicians concerning the HCBCG physicians" and that HCBCG suffered injury as a result of the publication of these statements. [First Amended Complaint at ¶¶ 70-71.] None of HCBCG's proposed discovery relates to the Defendants' alleged publication of false and misleading statements. HCBCG has failed to establish that discovery is necessary to oppose Defendants' Motion for Summary Judgment as to the Lanham Act claim.

All of HCBCG's proposed discovery relates to its Sherman Act claims. The discovery deals with: 1) whether Defendants increasingly diverted referrals away from HCBCG; 2) how they accomplished the diversion; and 3) how the Defendants' refusal to work with HCBCG has affected the industry. HCBCG asserts that, when patients who have not already been referred to a specific hem-onc physician arrive at KMCWC's Emergency Department, almost of them are referred to KMS hem-onc physicians and away from HCBCG. In their Motion for Summary Judgment, Defendants state: "For purposes of this motion only, Defendants accept these allegations as true. . . . ***But as a matter of law there is nothing anticompetitive, and hence nothing unlawful, about HPH refusing to refer to HCBCG [*21]*** ." [Mem. in Supp. of Defs' Motion for Summary Judgment at 21 (emphasis in original).] Thus, insofar as Defendants essentially concede, for purposes of the Motion for Summary Judgment, that they refer the majority of new patients to KMS hem-onc physicians, the Court finds that HCBCG's proposed discovery regarding whether and how Defendants divert referrals away from HCBCG is not necessary for its opposition.

Further, the effect of Defendants' alleged exclusion of HCBCG's physicians is not relevant to Defendants' argument that, as a matter of law, their referral practice is not anticompetitive. Finally, with regard to HCBCG's proposed request for answers to interrogatories, there is no indication that these interrogatories address matters that arose after the close of discovery in the State Action. HCBCG could have presented these interrogatories in the State Action, but apparently did not. A party will not be entitled to 56(f) relief if it was not diligent in pursuing discovery before summary judgment. See *Mackey v. Pioneer Nat'l Bank, 867 F.2d 520, 524 (9th Cir. 1989)*. HCBCG therefore cannot obtain 56(f) relief in order to serve the proposed interrogatories.

This Court finds that HCBCG has failed to establish that it "cannot present facts essential **[*22]** to justify its opposition" to Defendants' Motion for Summary Judgment without further discovery. HCBCG's Motion is therefore DENIED as to the request to continue the January 9, 2009 hearing on Defendants' Motion for Summary Judgment.

CONCLUSION

On the basis of the foregoing, HCBCG's Motion to Dissolve Stay and Continue January 5, 2009 Hearing on Defendants' Motion for Summary Judgment Pursuant to *Rule 56(f)*, filed December 4, 2008, is HEREBY GRANTED IN PART AND DENIED IN PART. The Motion is GRANTED as to HCBCG's request to dissolve the stay and DENIED as to HCBCG's request to continue the hearing on Defendants' Motion for Summary Judgment.

IT IS SO ORDERED.

DATED: Honolulu, Hawaii, December 19, 2008.

/s/ Leslie E. Kobayashi

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] **Motions to Dismiss, Failure to State Claim**

When reviewing a motion to dismiss on the pleadings, courts accept all factual allegations as true, construe the complaint in the light most favorable to the plaintiff, and determine whether, under any reasonable reading of the complaint, the plaintiff may be entitled to relief. In Bell Atlantic Corporation v. Twombly, the United States Supreme Court clarified the *Fed. R. Civ. P. 12(b)(6)* standard. Specifically, the Supreme Court retired the language that a complaint should not be dismissed for failure to state a claim unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief. The Supreme Court's Twombly formulation of the pleading standard can be summed up thus: stating a claim requires a complaint with enough factual matter (taken as true) to suggest the required element. This does not impose a probability requirement at the pleading stage, but instead simply calls for enough facts to raise a reasonable expectation that discovery will reveal evidence of the necessary element.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN3[] **Racketeer Influenced & Corrupt Organizations, Claims**

To properly plead under RICO, a plaintiff must allege (1) conduct (2) of an enterprise (3) through a pattern (4) of racketeering activity as well as an injury resulting from the conduct constituting a violation. RICO provides for liability in civil suits brought by any person injured in his business or property by a RICO violation, with a compulsory award of treble damages, costs, and attorneys fees and makes it unlawful for any person who is employed by or associated with any enterprise affecting interstate commerce to participate, directly or indirectly, in the conduct of such enterprise's affairs through a pattern of racketeering activity *18 U.S.C.S. §§ 1962(c)*, *1964(c)*. The United States Court of Appeals for the Third Circuit has articulated that *18 U.S.C.S. § 1964(c)* requires a RICO plaintiff to make two related but analytically distinct threshold showings : (1) that the plaintiff suffered an injury to business or property; and (2) that the plaintiff's injury was proximately caused by the defendant's violation of *18 U.S.C.S. § 1962*.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN4[] **Racketeer Influenced & Corrupt Organizations, Claims**

A RICO plaintiff only has standing if, and can only recover to the extent that, he has been injured in his business or property by the conduct constituting the violation of RICO. The New Jersey Supreme Court believes the New Jersey RICO statute was and should be consistent with the federal RICO statute. *N.J. Stat. Ann. § 2C:41-4(c)*. While the United States Supreme Court has generally stated that RICO is to be read broadly, the United States Court of Appeals for the Third Circuit has held that *18 U.S.C.S. § 1964(c)*'s standing limitation assures that not every plaintiff has a federal cause of action arising under RICO. A showing of injury requires proof of a concrete financial loss and not mere injury to a valuable intangible property interest.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN5[] **Racketeer Influenced & Corrupt Organizations, Claims**

A plaintiff's loss causation theories of injury are not cognizable under RICO. the loss of value model is designed to award plaintiffs damages based on the benefit of their bargain. Such damages are generally unavailable in RICO suits where the statute compensates only for injury to business or property. Moreover, the defendants' misrepresentation could in no way have reduced the value of the product that plaintiffs actually purchased, but rather the defendants simply could have induced plaintiffs to buy the product over other products. This alleged injury does not satisfy the requisite pleading of concrete financial loss for RICO claims.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN7[] **Racketeer Influenced & Corrupt Organizations, Claims**

A plaintiffs' injury theory based on financial losses of overpayment that plaintiffs purportedly sustained by paying for an inferior drug is inadequate for sustaining a RICO injury, absent allegations that defendants' drug was on some level inferior and therefore "worth less" than what plaintiffs paid for it.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > General Overview

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN8[] **Racketeer Influenced & Corrupt Organizations, Claims**

Merely stating that a drug is equally effective, no more effective, or neither more effective nor safer, all of which imply that it is no less effective or safe, is not a sufficient pleading of inferiority to sustain plaintiffs' RICO injury.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > General Overview

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN9[] **Racketeer Influenced & Corrupt Organizations, Claims**

Where no additional pleading of injury is alleged, a plaintiff's allegations that there are more cost-effective alternatives do not meet the required pleading of overpayment as a concrete financial loss for a RICO claim.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > General Overview

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN10[] Racketeer Influenced & Corrupt Organizations, Claims

Where there are no allegations in a complaint to the effect a RICO plaintiff has received inadequate care, suffered medical injuries, or have been denied medically necessary care, the fair inference to be drawn from the complaint is that none of those events have occurred.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > General Overview

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN11[] Racketeer Influenced & Corrupt Organizations, Claims

Without alleging that a product failed to perform as advertised, a plaintiff has received the benefit of his bargain and has no basis to recover purchase costs under RICO.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > Fraud

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN12[] Claims, Fraud

A RICO plaintiff need not plead and prove that it relied on the defendant's alleged misrepresentations. None of this is to say that a RICO plaintiff who alleges injury "by reason of" a pattern of mail fraud can prevail without showing that someone relied on the defendant's misrepresentations. Therefore, as the United States Supreme Court said, it will be unlikely that plaintiffs will be able to establish even but-for causation if no one relied on the misrepresentation and the complete absence of reliance may prevent the plaintiff from establishing proximate cause. Accordingly, it may well be that a RICO plaintiff alleging injury by reason of a pattern of mail fraud must establish at least third-party reliance in order to prove causation.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > General Overview

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN13[] Racketeer Influenced & Corrupt Organizations, Claims

An inflated price theory of causation is not recognized in the RICO context, and thus, not a viable theory in a RICO action.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > General Overview

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN14[] Racketeer Influenced & Corrupt Organizations, Claims

An enterprise includes any individual, partnership, corporation, association, or other legal entity, and any union or group of individuals associated in fact although not a legal entity. *18 U.S.C.S. § 1961(4)*. A RICO enterprise is an entity made up of a group of persons associated together for the common purpose of engaging in a course of conduct. To establish the existence of an enterprise, a plaintiff must prove that (1) the enterprise is an ongoing organization with some sort of framework or superstructure for making or carrying out decisions; (2) the members of the enterprise function as a continuing unit with established duties; and (3) the enterprise must be separate and apart from the pattern of activity in which it engages. However, as the rules of pleading require nothing more at the motion to dismiss stage than a bare allegation, where a plaintiff identifies the entities it believed were the enterprises that had been marshalled against it, a plaintiff sufficiently alleges the existence of an enterprise.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > Fraud

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN15[] Claims, Fraud

To allege a RICO violation, a plaintiff must articulate a pattern of racketeering activity, i.e., predicate acts. The claim must include the allegation of at least two racketeering acts. When fraud is the predicate act, a plaintiff must satisfy the heightened pleading standard of *Fed. R. Civ. P. 9(b)*. Specifically, R. 9(b) states a party must state with particularity the circumstances constituting fraud or mistake. The United States Court of Appeals for the Third Circuit qualified what information must be alleged to satisfy the heightened pleading standard of R. 9(b)

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > Fraud

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN16[] Claims, Fraud

Pursuant to *Fed. R. Civ. P. 9(b)*, a plaintiff alleging fraud must state the circumstances of the alleged fraud with sufficient particularity to place the defendant on notice of the precise misconduct with which it is charged. To satisfy this standard, the plaintiff must plead or allege the date, time and place of the alleged fraud or otherwise inject precision or some measure of substantiation into a fraud allegation.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > Fraud

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN17[] Claims, Fraud

To set out a prima facie showing of a civil RICO violation under *18 U.S.C.S. § 1964(c)*, a plaintiff must have been injured by "racketeering activity," *18 U.S.C.S. § 1962(c)-(d)*. "Racketeering activity" is defined as a violation of certain enumerated statutes - commonly known as "predicate acts" - in *18 U.S.C.S. § 1961(1)*. The term "racketeering activity" is defined in *§ 1961(1)* to include a long list of state and federal crimes, among them the wire fraud. The United States Court of Appeals for the Third Circuit permits federal common law or garden variety fraud, including mail and wire fraud.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > Fraud

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN18[] **Claims, Fraud**

General allegations, such as fraud and theft, will not satisfy the pleading standard for a RICO claim as they are not included as specifically listed racketeering activities pursuant to *18 U.S.C.S. § 1961(1)*. Instead, plaintiffs, more specifically, attempt to allege that the predicate acts are mail and wire fraud. Where acts of mail and wire fraud constitute the alleged predicate racketeering acts, those acts are subject to the heightened pleading requirement of *Fed. R. Civ. P. 9(b)*.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > Fraud

Criminal Law & Procedure > ... > Fraud > Wire Fraud > Elements

Criminal Law & Procedure > ... > Fraud Against the Government > Mail Fraud > Elements

HN19[] **Claims, Fraud**

There are two elements of a mail or wire fraud charge: a scheme to defraud, and a mailing or wire in furtherance of that scheme. Wholly intrastate use of the mails for fraud violates the mail fraud statute. In contrast, the federal wire fraud statute requires interstate use of the wire. The statute requires that the wire communication cross state lines. The wire fraud statute, *18 U.S.C.S. § 1343*, criminalizes a scheme to defraud that is transmitted by wire in interstate or foreign commerce; thus, a complaint must allege interstate use of the wire for each predicate act. Moreover, when asserting mail fraud allegations, a RICO plaintiff must identify the purpose of the mailing within the defendant's fraudulent scheme and specify the fraudulent statement, the time, place, and speaker and content of the alleged misrepresentations. In other words, the plaintiff's pleading must contain the who, what, when and where details of the alleged fraud.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > Fraud

HN20[] **Claims, Fraud**

The court will only consider as predicate racketeering acts those wire frauds which have been alleged to have been transmitted by wire in interstate or foreign commerce and those mail frauds that are alleged to have made use of the United States Postal Service.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > Fraud

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN21[] **Claims, Fraud**

Where mail and wire frauds were not properly plead, the court will not consider them as "predicate acts" for a RICO claim.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > Fraud

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN22[] **Claims, Fraud**

The court will only consider as predicate racketeering acts those mail and wire frauds alleged with the specificity required by the heightened pleading standard of *Fed. R. Civ. P. 9(b)*.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > Fraud

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN23[] **Claims, Fraud**

Particularly in cases of corporate fraud, plaintiffs cannot be expected to have personal knowledge of the details of corporate internal affairs. Thus, courts have relaxed the (particularity) rule when factual information is peculiarly within the defendant's knowledge or control. At the very least plaintiffs must allege that the necessary information lies within defendant's control. Even if the complaint contains boilerplate allegations that the necessary information was within the defendant's exclusive control, *Fed. R. Civ. P. 9(b)* would still not be satisfied. Rather, under this more relaxed application of the rule, plaintiffs must accompany such an allegation with a statement of facts upon which their allegation is based. More specifically, a complaint must delineate at least the nature and the scope of plaintiffs' effort to obtain, before filing the complaint, the information needed to plead with particularity.

HN29[] Racketeer Influenced & Corrupt Organizations, Claims

An alleged intra-corporate conspiracy comprised solely of a corporation acting in concert with its officers and employees should not be considered as involving separate actors conspiring under the law.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > General Overview

Securities Law > ... > Elements of Proof > Pattern > Conspiracy

HN30[] Racketeer Influenced & Corrupt Organizations, Claims

The decision that a RICO conspiracy claim cannot stand where a corporation is alleged essentially to have done nothing more than act in concert with its officers and employees, stems from the premise that a corporation, legally conceived, is only one person under RICO. An exception to the rule against intra-corporate conspiracies exists where the employees act in pursuit of their own interests and not for the benefit of the corporation. Thus, only where the plaintiff alleges something more than a corporation acting in concert with its officers and employees, can a RICO conspiracy claim proceed.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > General Overview

Securities Law > ... > Elements of Proof > Pattern > Conspiracy

HN31[] Racketeer Influenced & Corrupt Organizations, Claims

The inquiry of whether a parent corporation is capable of conspiring with its wholly owned subsidiary for purposes of violating *§ 1962(d)* of RICO is similar to that of whether a parent can conspire with its subsidiaries under § 1 of the Sherman Act or whether a corporation can conspire with its agents and/or employees under *§ 1962(d)* of RICO. In all three scenarios, where an intra-corporate conspiracy is alleged, the two conspiring entities are but one. The parent and its wholly owned subsidiary share a complete unity of interest, with common objectives. Similarly, a corporation typically acts in concert with its officers and employees, as one legal person, with similar goals. Thus, a parent corporation cannot conspire with its wholly owned subsidiary to violate *§ 1962(d)* of RICO because the two entities always have a unity of purpose or a common design. There is a recognized exception in the case where a plaintiff alleges that the employees acted in pursuit of their own interests and not for the benefit of the corporation, or there is an allegation that entities no longer act as one and thus may be considered separate actors under the law.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > General Overview

Securities Law > ... > Elements of Proof > Pattern > Conspiracy

HN32[] **Racketeer Influenced & Corrupt Organizations, Claims**

To state a claim under *18 U.S.C.S. § 1962(d)*, where a parent corporation has allegedly conspired with its wholly owned subsidiary, there must be some additional allegation, e.g., that the subsidiary was fraudulently created to accomplish the racketeering activity. Where plaintiffs allege that defendants, a parent corporation and its wholly owned subsidiary, conspired with each other and with other (unnamed) members of the alleged enterprise in violation of *§ 1962(d)*, this is not sufficient.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > General Overview

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Securities Law > ... > Elements of Proof > Pattern > Conspiracy

HN33[] **Racketeer Influenced & Corrupt Organizations, Claims**

A claim under *§ 1962(d)* of RICO is required to include: (1) agreement to commit the predicate acts of fraud, and (2) knowledge that those acts were part of a pattern of racketeering activity conducted in such a way as to violate *§ 1962(a)*, *(b)*, or *(c)*. Allegations of conspiracy are not measured under the *Fed. R. Civ. P. 9(b)* standard, which requires greater particularity of allegation of fraud, but are measured under the more liberal (*Fed. R. Civ. P. 8(a)*) pleading standard. A conspiracy claim must also contain supportive factual allegations. The allegations must be sufficient to describe the general composition of the conspiracy, some or all of its broad objectives, and the defendant's general role in that conspiracy.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > General Overview

Securities Law > ... > Elements of Proof > Pattern > Conspiracy

HN34[] **Racketeer Influenced & Corrupt Organizations, Claims**

Only allegations of conspiracy which are particularized, such as those addressing the period of the conspiracy, the object of the conspiracy, and certain actions of the alleged conspirators taken to achieve that purpose are sufficient to state a RICO conspiracy claim.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > General Overview

Securities Law > ... > Elements of Proof > Pattern > Conspiracy

HN35[] Racketeer Influenced & Corrupt Organizations, Claims

Any claim under 18 U.S.C.S. § 1962(d) based on conspiracy to violate the other subsections of § 1962 necessarily must fail if the substantive claims are themselves deficient.

Judges: Honorable Freda L. Wolfson, United States District Judge.

Opinion by: Freda L. Wolfson

Opinion

WOLFSON, United States District Judge:

Presently before the Court is a motion by defendants, Janssen, L.P. and Johnson & Johnson (collectively, "Defendants"), to dismiss Counts I-III of the Consolidated Amended Class Action Complaint ("Complaint"), pursuant to *Fed. R. Civ. P. 12(b)(6)*. This putative class action involves Defendants' **[*4]** alleged off-label sale and marketing of the prescription drug, Risperdal(R), which is approved for the treatment of schizophrenia, bipolar mania, and autistic disorder. Plaintiffs, District 1199P Health and Welfare Plan, Ironworkers Local Union No. 399 and Participating Employers Health and Welfare Funds, International Brotherhood of Electrical Workers Local 98, and Southeastern Pennsylvania Transportation Authority (collectively, "Plaintiffs"), are third-party payors that allegedly paid for Risperdal(R) on behalf of their beneficiaries, insured, or employees. Plaintiffs, individually and on behalf of all others similarly situated, in Counts I-III, allege that Defendants by engaging in improper off-label promotion of Risperdal(R) violated: (1) the RICO Act, *18 U.S.C. § 1961, et seq.;* (2) RICO conspiracy, *18 U.S.C. § 1962(d)*, by conspiring to violate *18 U.S.C. § 1962(c)*; and (3) the New Jersey RICO Act, *N.J.S.A. 2C:41-1 et seq.,* ("NJRICO"). [1] **[*5]** Defendants deny any improper marketing, but even if true, contend that Plaintiffs have failed to adequately plead RICO violations. For the reasons that follow, the Court grants Defendants' Motion to Dismiss Counts I-III of Plaintiffs' Complaint.

I. Background and Procedural History

Since Defendants move to dismiss Plaintiffs' RICO claims pursuant to *Fed. R. Civ. P. 12(b)(6)*, the following version of events assumes Plaintiffs' allegations to be true. The Court will only recount facts that are relevant for the purposes of deciding this Motion.

In their Complaint, filed on February 29, 2008, Plaintiffs allege, *inter alia,* [2] that Defendants perpetrated a carefully orchestrated scheme to illegally market and promote, resperidone, sold under the brand name Risperdal(R) ("Risperdal"), for "off-label" uses, meaning uses not approved by the Food and Drug Administration ("FDA") and the safety and efficacy of the drug for these uses have not been established. Compl. **[*6]** PP 2, 5.

Risperdal is now sold and marketed by Ortho-McNeil-Janssen Pharmaceuticals, Inc., formerly known as Janssen Pharmaceutia Inc., the general partner of Janssen, L.P. and a wholly-owned subsidiary **[*7]** of Johnson & Johnson. *Id.* P 17; *see* Df. Mot. at 1. Johnson & Johnson is one of the world's largest manufacturers of health care products for consumer and pharmaceutical markets. Compl. P 18. Risperdal is a second generation atypical antipsychotic prescription medication that is FDA approved for: (1) long-term treatment of acute manic or mixed episodes of bipolar I disorder in adults; (2) monotherapy for the short-term treatment of acute manic or mixed episodes of bipolar I disorder in adults; (3) a combination therapy, with Lithium or Valproate, for the short-term treatment of acute manic or mixed episodes associated with bipolar I disorder in adults; (4) the treatment of irritability associated

---

[1] Plaintiffs also claim that Defendants' alleged off-label promotion of Risperdal was tortious and violated the consumer protection laws of nearly every state in the country in Counts IV-X. These claims are not at issue in this motion.

[2] In this class action lawsuit, four separate complaints were filed and then consolidated into this action, including District 1199P Health and Welfare Plan, Civil Action No. 06-3044; Ironworkers Local Union No. 399 and Participating Employers Health and Welfare Funds, Civil Action No. 07-2224; International Brotherhood of Electrical Workers Local 98, Civil Action No. 07-2608; and Southeastern Pennsylvania Transportation Authority, Civil Action No. 07-2860.

District 1199P is a jointly trusteed employee benefit trust fund and an employee welfare benefit plan providing benefits for approximately 2,600 participants. Compl. P 13. Ironworkers Local Union No. 399 is a health and welfare fund. *Id.* P 14. IBEW Local 98 is an employee welfare benefit plan and employee benefit plan that pays for medical benefits and prescription drugs for approximately 3,000 participants. *Id.* P 15. SEPTA employs a work force of approximately 9,000 people and provides medical benefits for eligible employees. *Id.* P 16.

with autistic disorder in children and adolescents (between the ages of 5 and 16); (5) the treatment of schizophrenia in adolescents ages 13-17 years; and (6) the short-term treatment of bipolar I disorder in children and adolescents ages 10-17 years. *Id.* P 4.

Plaintiffs allege that Defendants, fully aware of the federal laws that prohibit "off-label" marketing and promotion of pharmaceuticals, nonetheless illegally marketed and promoted Risperal for unapproved or "off-label" uses, including **[*8]** uses in children and adolescents as well as in the elderly population. *Id.* P 5. Congress and the FDA have promulgated laws designed to regulate two of the most prevalent indirect promotional strategies: (1) manufacturer dissemination of medical and scientific publications concerning the off-label uses of their products, and (2) manufacturer support for Continuing Medical Education ("CME") programs that advocate off-label uses of their drugs. *Id.* P 31. Plaintiffs allege that Defendants illegally conspired to aggressively market Risperdal through a nationwide, uniform marketing campaign to "misrepresent[] the comparative safety, efficacy and superiority of Risperdal over other traditional/typical or atypical antipsychotics to the health care community, consumers, third-party payors, and others, with the common goal to increase sales of Risperdal and the Defendants' profits," which has led to approximately 66% of Risperdal sales stemming from off-label uses. *Id.* PP 6, 55.

Plaintiffs claim that Defendants "overstat[ed] the drug's uses, while understating (if not outright concealing) Risperdal's side effects and even life threatening medical conditions" in a deliberate and calculated campaign **[*9]** designed to increase the sales of the drug by misleading physicians to write off-label prescriptions of Risperdal. *Id.* PP 50, 68, 71. Despite Defendants' alleged promotion of Risperdal's "superior safety and effectiveness," Plaintiffs assert that Risperdal and other atypical antipsychotics are "neither more effective nor safer than older, less expensive, typical antipyschotics." *Id.* PP 51, 67. Targets of Defendants' alleged scheme were health assistance programs; children who suffer from insomnia, attention deficit disorder or display behavior problems; elderly who experience Alzheimer's disease and dementia; and patients who experience depressive or mood disorders; and patients who experience the symptoms of generalized anxiety disorder, post traumatic stress disorder and substance abuse. *Id.* PP 74. Defendants allegedly committed numerous predicate acts of racketeering, specifically, multiple instances of bribery, in violation of state statutes; mail fraud, in violation of *18 U.S.C. § 1341*; and wire fraud, in violation of *18 U.S.C. § 1343*, including acts of sending illegal marketing, advertising, sale, and promotional material relating to Risperdal. *Id.* PP 9, 212. [3]

Defendants allegedly created and used a "Marketing Firms Enterprise" ("the enterprise"), comprised of Defendants and "seemingly-independent research organizations and marketing and public relations firms," who all shared "the common goals of illegally marketing, advertising, promoting and selling Risperdal in order to increase profits by increasing the off-label use of Risperdal," and acted as the "vehicle or tool to effectuate the Defendants' pattern of racketeering activity." *Id.* PP 10, 207-08. Defendants' alleged illegal scheme consisted of a campaign combining their own significant personnel and financial resources with a discreet and identifiable number of medical marketing firms, peer physicians, public officials, and purported independent charities and social programs to market and promote Risperdal's off-label use. *Id.* P 73. [4]

Defendants allegedly used the enterprise to organize and direct the publication of articles and statements in studies **[*11]** to promote Risperdal's off-label use. *Id.* P 97. This enterprise allegedly hosted CMEs, which are typically independently-sponsored educational programs, but it is alleged here, that at these CMEs, physicians, compensated by Defendants, relayed misleading information to encourage other physicians to prescribe Risperdal for off-label uses. *Id.* PP 84-96. According to Plaintiffs, Defendants were successful in influencing the off-label promotion because they hand-picked peer-sellers and key physicians as leaders to speak favorably about the drug [5] and induced attendee physicians to listen to their off-label marketing pitch, to prescribe Risperdal for off-label use,

---

[3] Plaintiffs allege **[*10]** in conclusory fashion that Defendants engaged in an ongoing, open-ended pattern of racketeering using interstate mail and wire communications. *Id.* PP 160, 211-218.

[4] Plaintiffs do not identify the number or the names of any of these entities.

[5] For example, Plaintiffs allege "Dr. Charles Nemeroff, the presenter for the 2007 CME presentation entitled *Add On Atypical Antipsychotics Efficacious in Short Term for Unipolar Depression,* references the ARISE-RD study, which was an attempt to

and to recommend off-label use of Risperdal to other physicians. *Id.* PP 90-93, 136-37. In exchange, Defendants allegedly provided financial incentives, including expensive dinners and vacations at "lavish" accommodations, disguised grants, and paid drug trials. *Id.* PP 136-37.

Defendants allegedly omitted or misrepresented information about Risperdal's off-label uses when they marketed it to physicians, inflating the number of prescriptions written and filled and causing Plaintiffs to overpay for the drug. *Id.* PP 12, 146, 160, 182, 187. Defendants allegedly published only favorable, and suppressed unfavorable, results about the adverse effects of the Rispersal drug, such as, *inter alia,* increased risk of death, and made false and misleading claims regarding its efficacy, including that it has a low incidence of movement disorders, sedation, and anticholinergic effects (variety of movement disorders). *Id.* PP 108, 121, 133. Plaintiffs **[*13]** acknowledge that "[p]hysicians are free to prescribe approved drugs for their patients as they see fit to adequately treat any condition or symptom." *Id.* P 56. Plaintiffs claim, however, that Defendants' alleged scheme and deceptive conduct directly and proximately caused economic loss to Plaintiffs because they unnecessarily paid for Risperdal off-label use prescriptions for their members or beneficiaries because of the misinformation disseminated by Defendants, which fraudulently increased the demand and sale of Risperdal and deprived Plaintiffs of cheaper alternatives and/or resulted in inflated prices. *Id.* PP 11-12, 36, 193.

Plaintiffs allege that they were injured by their "economic loss," which is "unaffected by whether any given patient ingested Risperdal or suffered adverse side effects." *Id.* P 11. Plaintiffs assert that they, as third-party payors, had to pay for Risperdal in situations where it was not approved as safe and effective by the FDA, after it had been placed on the formulary for on-label use by the Pharmacy Benefit Managers ("PBMs"). *Id.* PP 189, 191. For example, according to Plaintiffs, "[p]hysicians have been misled by Defendants' scheme to believe that Risperdal **[*14]** is superior in its effectiveness and safety to other lower-costing and equally effective antipsychotic drugs," and thus, Risperdal's sales increased. *Id.* P 67. Plaintiffs claim that "Dr. Rosenheck reported that Trilafon [is more cost-effective than the newer drugs in terms of their 'human benefit' because it] cost[s] between $ 300 and $ 600 less per month, compared to Risperdal. Trilafon is no less effective and substantially less expensive -- by between $ 3,600 and $ 7,000 a year." *Id.* P 62. As a result of the foregoing, Plaintiffs allege that they were fraudulently denied comparably safe and effective, cheaper alternatives to Risperdal and overpaid hundreds of millions of dollars for doses of Risperdal that were prescribed by physicians because of Defendants' off-label marketing scheme. *Id.* PP 12, 67, 71, 193.

On March 31, 2008, Defendants filed their motion to dismiss Counts I-III of Plaintiffs' Complaint with prejudice for failure to state a claim upon which relief may be granted pursuant to *Fed. R. Civ. P. 12(b)(6)*. Defendants argue that Plaintiffs' RICO and NJRICO claims are substantively flawed because (1) Plaintiffs did not suffer a cognizable RICO injury, (2) Plaintiffs' theory **[*15]** of causation is too attenuated and speculative as the physicians exercised independent medical judgment on an individual patient basis and Plaintiffs did not rely on Defendants' alleged misrepresentations, [6] and (3) Plaintiffs do not sufficiently allege predicate acts, including mail or wire fraud, necessary to adequately plead RICO. Therefore, Defendants argue, Plaintiffs' RICO conspiracy claim cannot be sustained as a matter of law. On April 30, 2008, Plaintiffs filed their opposition asserting that they adequately allege a cognizable injury, that Defendants' conduct proximately caused their injury, and that they sufficiently plead RICO predicate acts and conspiracy to violate RICO. On May 15, 2008, Defendants filed their reply. Thereafter, both parties submitted supplemental authority and briefing therewith. The Court grants Defendants' Motion for the reasons that follow.

demonstrate **[*12]** the efficacy of Risperdal for depression. . . . Dr. Nemeroff claimed that a peer-reviewed study showed Risperdal improved sexual functioning, when the effects of treatment on sexual functioning were not mentioned in the ARISE-RD study. Additionally, Dr. Nemeroff claimed that the study showed Risperdal demonstrates efficacy over placebo, which the ARISE-RD study in fact did not. . . . Dr. Nemeroff has been a long time key opinion leader for Defendants and has participated in a Janssen-financed journal supplement in 2005." *Id.* P 96.

[6] In *Bridge v. Phoenix Bond & Indemnity Co., 553 U.S. 639, 128 S.Ct. 2131, 2139, 170 L. Ed. 2d 1012 (2008)*, the Supreme Court recently determined that ***HN1***[] first-party reliance is not an element in civil RICO claims. *See* Part III.A.2., *infra.*

This Court has subject matter jurisdiction over this federal RICO action pursuant to 28 U.S.C. § 1331 and has supplemental **[*16]** jurisdiction over Plaintiffs' state law claims pursuant to 28 U.S.C. § 1367.

II. Standard of Review

HN2[] When reviewing a motion to dismiss on the pleadings, courts "accept all factual allegations as true, construe the complaint in the light most favorable to the plaintiff, and determine whether, under any reasonable reading of the complaint, the plaintiff may be entitled to relief." *Phillips v. County of Allegheny, 515 F.3d 224, 233 (3d Cir. 2008)* (citation and quotations omitted). Recently, in *Bell Atlantic Corporation v. Twombly, 550 U.S. 544, 127 S.Ct. 1955, 167 L. Ed. 2d 929 (2007)*, the Supreme Court clarified the 12(b)(6) standard. Specifically, the Court "retired" the language contained in *Conley v. Gibson, 355 U.S. 41, 45-46, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957)*, that "a complaint should not be dismissed for failure to state a claim unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief." *Id. at 1968* (quoting *Conley, 355 U.S. at 45-46*). Instead, the factual allegations set forth in a complaint "must be enough to raise a right to relief above the speculative level." *Id. at 1965*. As the Third Circuit has stated, "[t]he Supreme Court's *Twombly* formulation of the pleading **[*17]** standard can be summed up thus: 'stating . . . a claim requires a complaint with enough factual matter (taken as true) to suggest' the required element. This 'does not impose a probability requirement at the pleading stage,' but instead 'simply calls for enough facts to raise a reasonable expectation that discovery will reveal evidence of' the necessary element." *Phillips, 515 F.3d at 234* (quoting *Twombly, 127 S.Ct. at 1965*).

III. Discussion

A. Plaintiffs' RICO and NJRICO Claims

HN3[] To properly plead under RICO, a Plaintiff must allege "'(1) conduct (2) of an enterprise (3) through a pattern (4) of racketeering activity' as well as an injury resulting from the conduct constituting a violation." *Bonavitacola Elec. Contr., Inc. v. Boro Developers, Inc., 87 Fed. Appx. 227, 231 (3d Cir. 2003)* (quoting *Sedima, S.P.R.L. v. Imrex Co., 473 U.S. 479, 496, 105 S. Ct. 3275, 87 L. Ed. 2d 346 (1985))*. The Act "provides for liability in civil suits brought by any person injured 'in his business or property' by a RICO violation, with a compulsory award of treble damages, costs, and attorneys fees . . . [and] makes it unlawful for 'any person' who is employed by or associated with 'any enterprise' affecting interstate commerce to 'participate, **[*18]** directly or indirectly, in the conduct of such enterprise's affairs through a pattern of racketeering activity.'" *Genty v. Resolution Trust Corp., 937 F.2d 899, 906 (3d Cir. 1991)* (citing 18 U.S.C. §§ 1962(c), 1964(c)). The Third Circuit has articulated that Section 1964(c) requires "a RICO plaintiff to make two related but analytically distinct threshold showings . . .: (1) that the plaintiff suffered an injury to business or property; and (2) that the plaintiff's injury was proximately caused by the defendant's violation of 18 U.S.C. § 1962." *Maio v. Aetna, Inc., 221 F.3d 472, 483 (3d Cir. 2000)*. The Court will address these standing requirements below.

1. Injury

Defendants argue that Plaintiffs did not suffer a cognizable RICO injury because Plaintiffs seek recovery solely for alleged economic loss, which Defendants argue are mere allegations of "overpayment" or "diminished value" for a safe and effective drug that is plainly speculative and not a "concrete financial loss" cognizable under RICO. Plaintiffs, however, assert that they plead a cognizable injury, past and present, in the form of a financial loss from overpayment, sufficient to confer standing.

The Supreme Court has stated **[*19]** that HN4[] a plaintiff "only has standing if, and can only recover to the extent that, he has been injured in his business or property by the conduct constituting the violation [of RICO]." *Sedima, 473 U.S. at 496*; *see* 18 U.S.C. § 1964; *Genty, 937 F.2d at 906*; *see also* *Cetel v. Cmmw. Life Ins. Co.,* 460 F.3d 494, 510 (3d Cir. 2006) ("[T]he New Jersey Supreme Court believe[s] the New Jersey RICO statute was and should be consistent with the federal RICO statute."); N.J.S.A. 2C:41-4(c). [7] While the Supreme Court has generally stated that RICO is to be read broadly, the Third Circuit has held that § 1964(c)'s standing limitation assures that not every plaintiff has a federal cause of action arising under RICO. *See* Maio, 221 F.3d at 483 (internal citations and quotations omitted). "[A] showing of injury requires proof of a concrete financial loss and not mere injury to a valuable intangible property interest." *Id.* (internal citations and quotations omitted).

Plaintiffs allege that they suffered economic **[*20]** loss as third-party payors because Defendants' scheme "depriv[ed them] of cheaper alternatives and/or result[ed] in higher prices for [Risperdal] than otherwise would have existed." Compl. P 12. Plaintiffs argue that their Complaint sufficiently alleges a concrete financial loss for amounts they overpaid for Risperdal due to Defendants' illegal or deceptive marketing practice, which inflated the number of prescriptions written and filled and led to higher co-payments and out-of-pocket costs. Compl. PP 187, 192-193. To support their claim of a cognizable injury sufficient to confer standing, Plaintiffs cite to a number of cases, all of which are distinguishable from the instant action. *Cf.* Sedima, 473 U.S. at 484, 494 (finding the plaintiff properly pled an injury under RICO when he allegedly paid falsified bills that the defendant created and presented); P & P Marketing, Inc. v. Ditton, 746 F. Supp. 1354, 1358, 1361 (N.D. Ill. 1999) (finding the plaintiff sufficiently pled a RICO injury by alleging he paid overcharges where defendants caused submission of falsified invoices).

For example, Plaintiffs cite In re Warfarin Sodium Antitrust Litig., 391 F.3d 516, 531 (3d Cir. 2004), in which the **[*21]** Third Circuit held that "[third-party payors], like individual consumers, suffered direct economic harm when, as a result of [the pharmaceutical companies'] alleged misrepresentations, they paid supracompetitive prices for [the brand drug] instead of purchasing lower-priced generic [drug]," but no RICO claims were alleged. Plaintiffs also direct the Court to the Second Circuit's recognition of the right of health benefit providers to recover from drug companies amounts that were overpaid due to illegal or deceptive marketing practices. Desiano v. Warner-Lambert Co., 326 F.3d 339, 349-50 (2d Cir. 2003). In In re Warfarin and Desiano, however, the plaintiffs sought relief under federal antitrust laws and consumer fraud claims, which are distinct from the RICO allegations brought here. Similarly, Plaintiffs cite Blue Cross & Blue Shield United v. Marshfield Clinic of Wis., 65 F.3d 1406, 1414-16 (7th Cir. 1995), another antitrust case in which no RICO claims were alleged, and the plaintiffs allegedly paid supracompetitive charges directly to the monopolist. Moreover, in a subsequent Seventh Circuit case, the court limited the Marshfield Clinic reasoning and applicability in RICO cases. **[*22]** Int'l Bhd. of Teamsters, Local 734 Health & Welfare Trust Fund v. Philip Morris Inc., 196 F.3d 818, 826-27 (7th Cir. 1999).

Plaintiffs also direct the Court to In re Zyprexa Prods. Liab. Lit., 493 F. Supp. 2d 571, 576 (E.D.N.Y. 2007), where RICO claims were alleged and survived a motion to dismiss, but which relied on *Schwab v. Philip Morris USA, Inc., 449 F. Supp. 2d 992 (E.D.N.Y. 2006)*, *rev'd sub nom.* McLaughlin v. American Tobacco Co., 522 F.3d 215, 228 (2d Cir. 2008). In overturning *Schwab,* the Second Circuit found that **HN5**[] plaintiffs' theories of injury -- loss causation -- were not cognizable under RICO. *See* McLaughlin, 522 F.3d at 228. The court held that the "loss of value model is designed to award plaintiffs damages based on the benefit of their bargain. Such damages are generally unavailable in RICO suits . . . [where the statute] compensates only for injury to 'business or property.'" *Id.* (internal citations omitted). Moreover, the defendants' misrepresentation "could in no way have reduced the value of the [product] that plaintiffs actually purchased," but rather the defendants "simply could have induced plaintiffs to buy [the product over other products]." Id. at 229. The **[*23]** Second Circuit determined that this alleged injury did not satisfy the requisite pleading of concrete financial loss for RICO claims. *See* Id. at 228-29. Thus, Plaintiffs' reliance on these cases is misplaced. [8]

---

[7] As the facts alleged apply to both the RICO and NJRICO claims and the RICO and NJRICO statutes are intended to have the same reach, the Court addresses these claims together under the RICO analysis.

[8] In Plaintiffs' causation argument, they also allege that damage models will demonstrate the effect of Defendants' scheme, contending that they have pled a cognizable injury and that Defendants were the cause of the injury. Pl. Opp. at 17. In that connection, the Court notes that this is not a viable approach. Plaintiffs essentially concede that they cannot identify any ascertainable concrete injury, since they assert that Defendants' "arguments [that Plaintiffs lack a cognizable injury or that they were the cause] are especially inappropriate at this early stage of the litigation, when the damage models that Plaintiffs will use

Defendants assert that Plaintiffs' allegations of "overpayment" are insufficient to constitute a RICO injury, where Plaintiffs seek recovery solely for an alleged economic loss, on the theory that alternative medications *might have been* at least as effective and cheaper than Risperdal. Defendants argue that Plaintiffs fail to allege that their beneficiaries, insured, or employees received an ineffective medication or that Risperdal physically harmed them, but rather concede that Risperdal was safe and effective. Thus, according to Defendants, Plaintiffs' purported injury, based on paying too much for a safe and effective medication, is plainly speculative and not a "concrete financial loss" cognizable under RICO. *See* *Maio, 221 F.3d at 483-84*. Indeed, in *Maio,* a case on which Defendants rely, the Third Circuit found that the plaintiffs failed to allege the facts necessary to support their assertion that they suffered a cognizable injury to business or property due to the alleged inferiority of the product received **[*25]** as compared to the product the defendants promised to deliver because the plaintiffs did not allege that they suffered any medical injuries, received inadequate or inferior care, or sought but were denied necessary care as a consequence of the defendants' plan. *Id. at 501*.

In response, Plaintiffs assert that their injury is "strikingly *dissimilar*" to those alleged by the plaintiffs in *Maio* because the property interest at stake in that case was in the nature of a contractual right to receive a certain level (quantity or quality) of health care benefits from the defendants, rather than a tangible property right. Pl. Opp. at 7. Plaintiffs also assert that, in *Maio,* the plaintiffs' injury was predicated on the conclusion that the alleged economic value of the product purchased was reduced because of the *possibility* that the alleged inferiority of the product would manifest itself at some point in the future. [9] *Id.* at 8. Although *Maio* did deal with an health insurance "product," Plaintiffs' attempt to distinguish themselves is unconvincing, as they assert a substantially similar "overpayment" argument as that made by the unsuccessful plaintiffs in *Maio. 221 F.3d at 487-88, 492-94*.

The plaintiffs in *Maio* argued that their RICO injury was based on each member of the nationwide class paying too much in premiums for an "inferior" health care product. *Id. at 484*. [10] In *Maio,* the plaintiffs' RICO injury theory was grounded in the argument that they paid too much in premiums for a health insurance plan of lesser value, namely the product received was inferior to the product the defendants promised to deliver. *Id. at 484 n. 11, 486*. There, the plaintiffs categorized their "concrete financial loss" as the "difference in value between the health insurance promised and the [allegedly 'inferior' and less valuable] health insurance actually received." *Id. at 486*. The Circuit Court rejected the plaintiffs' injury theory based on financial losses of overpayment that the plaintiffs purportedly sustained by enrolling in this inferior plan, since the plaintiffs did not plead that the enrolled "individuals were denied medically necessary benefits, received inadequate, inferior or delayed medical treatment, or even worse, suffered personal injuries as a result of [the defendants' conduct]." *Id. at 488*.

---

to demonstrate the effect of Defendants' scheme have yet to be presented, let alone tested." Pl. Opp. at 17. ***HN6***[] Some sort of damage model, yet to be presented, does not substitute for adequately pleading an injury or causation. See *Steamfitters Local Union No. 420 Welfare Fund v. Philip Morris, Inc., 171 F.3d 912, 929 (3d Cir. 1999)* (rejecting the use of **[*24]** "aggregation and statistical modeling" to satisfy burden of pleading causation). Thus, Plaintiffs' only identified injury is their alleged economic loss from "overpayment."

[9] The *Maio* **[*26]** court, in analyzing the plaintiffs' claim that "they need not plead and prove allegations concerning the level of care that they received to establish the fact of damage," which was their RICO injury to property theory, determined that the plaintiffs did not have standing. *Maio, 221 F.3d at 494*. It was under this analysis that the court found that insofar as the plaintiffs' argument was predicated "exclusively on the possibility that future events might occur [and that the quality of care administered may suffer in some undefined way], rather than on the actual occurrence of those events and their present effect on the value of the health insurance" received, the plaintiffs' theory of present economic loss was too speculative and was insufficient to support a cause of action under RICO. *Id. at 494-95*. Thus, in this case, Plaintiffs plead past and present injury due to the alleged injury of overpaying for the "inferior" product they purchased. But similarly, here, Plaintiffs do not identify any present injury to their insured or beneficiaries. *Maio's* analysis of injury based on the economic loss of the product allegedly marketed and that an inferior product was allegedly received is **[*27]** pertinent.

[10] The Third Circuit noted that if the product "simply was *different* **[*28]** than that which was promised to appellants, then there would be no factual basis for an argument that they overpaid, inasmuch as a 'different' but equally good health insurance package would have an equivalent economic value." *Id. at 484 n. 11* (emphasis in original). The court determined that the defendants' health insurance "could not be characterized as 'worth less' in monetary value unless it was inferior in some respect" to the product that had been contracted for. *Id.*

Similar to *Maio*, in the instant case, Plaintiffs categorize their "concrete financial loss" as overpaying for Risperdal for off-label uses due to Defendants' allegedly fraudulent and deceptive marketing practices, which inflated the number of prescriptions of Risperdal written and filled and increased Plaintiffs' co-payments and out-of-pocket costs. Compl. PP 187, 192-93; Pl. Opp. at 5. Plaintiffs plead that they overpaid for Risperdal because it was "neither more effective nor safer than older typical antipyschotics." Compl. P 51. In addition, Plaintiffs plead that "the efficacy of all [second generation antipyschotics] is similar" and that none of the second generation antipyschotics are superior in efficacy to **[*29]** the cheaper older typical antipyschotics. Id. In that regard, Plaintiffs plead that they were injured by their "economic loss," which is "unaffected by whether any given patient ingested Risperdal or suffered adverse side effects." Id. P 11. This is substantially similar to the *Maio* plaintiffs' argument of overpayment; in that, the "difference in value between the [drug] promised and the [allegedly "inferior" and less valuable drug] actually received." *Maio, 221 F.3d at 486*. Yet, according to Third Circuit precedent, ***HN7***[] Plaintiffs' injury theory based on financial losses of overpayment that Plaintiffs purportedly sustained by paying for this "inferior" drug is inadequate for sustaining a RICO injury, absent allegations that Defendants' drug was on some level "inferior and therefore 'worth less' than what [Plaintiffs] paid for it." *Id. at 488*.

Plaintiffs here allege that Defendants "admitted that [they] omitted material information about Risperdal, minimized potentially fatal risks, and made misleading claims suggesting superior safety in comparison to other atypical antipsychotics without adequate substantiation." Compl. P 131. Further, Plaintiffs allege that treating behavioral disorders **[*30]** in elderly patients with dementia with atypical (second generation) antipyschotic medications, like Risperdal, is associated with increased mortality. *Id. P 132*. However, nowhere do Plaintiffs allege that any beneficiaries, insured, or employees taking Risperdal "received [an] inadequate[or] inferior [drug] or even worse, suffered personal injuries as a result of" Defendants' alleged misrepresentations. *Maio, 221 F.3d at 488*.

Furthermore, Plaintiffs do not plead that Risperdal is inferior to competitor drugs, i.e., that Risperdal is less effective and/or less safe than, or that the side effects of Risperdal are also not associated with, other comparable drugs. Plaintiffs assert that "[r]esearch and studies have illustrated that physicians can prescribe lower-cost and equally effective alternatives to treat the conditions for which Defendants have promoted the off-label use of Risperdal." Compl. P 56. For example, Plaintiffs assert that Trilafon is more cost-effective than the newer drugs, like Risperdal, in terms of their "human benefit" because it is no less effective and substantially less expensive, by between $ 3,600 and $ 7,000 a year. *Id.* P 62. Applying *Maio,* however, ***HN8***[] merely stating **[*31]** that Risperdal is "equally effective," "no . . . more effective," or "neither more effective nor safer," all of which imply that it is no less effective or safe, is not a sufficient pleading of inferiority to sustain Plaintiffs' RICO injury. *See* *221 F.3d at 488* (finding that without pleading denial of benefits, inadequate, inferior or delayed treatment, or actual injury, "there is no factual basis for appellants' conclusory allegation that they have been injured in their 'property' because the health insurance they actually received was inferior and therefore 'worth less' than what they paid for it"); Compl. PP 51, 56, 59. In addition, ***HN9***[] where no additional pleading of injury is alleged, Plaintiffs' allegations that there are more "cost-effective" alternatives do not meet the required pleading of overpayment as a concrete financial loss. *See* *Maio, 221 F.3d at 488*.

HN10[] "Inasmuch as there are no allegations in the complaint to the effect that appellants have received inadequate care, suffered medical injuries, or have been denied medically necessary care, the fair inference to be drawn from the complaint . . . is that none of those events have occurred." *Maio, 221 F.3d at 500*. Similarly, Plaintiffs **[*32]** allege that Defendants' fraud is their misrepresentation of the safety and efficacy of Risperdal for off-label uses and that it is worth less than what they paid for it, without alleging that the drug harmed the beneficiaries in any way or that the drug lacked safety or efficacy; as such, the Court must infer that the drug did not harm the beneficiaries. ***HN11***[] "Without alleging that a product failed to perform as advertised, a Plaintiff has received the benefit of his bargain and has no basis to recover purchase costs." *Williams v. Purdue Pharma Co., 297 F. Supp. 2d 171, 176 (D.D.C. 2003)* (citation omitted). Therefore, Plaintiffs do not plead a concrete financial loss in the form of overpayment, absent allegations that the drug was inferior on some level and worth less than what they paid for it. Because Plaintiffs fail to sufficiently allege a cognizable RICO injury under federal or New Jersey law, they lack standing to bring such claims.

2. Causation

Defendants argue that Plaintiffs also lack standing to bring Counts I and III of their Complaint because Plaintiffs' theory of causation is too attenuated and speculative. In their supplemental filing, dated June 11, 2008, Defendants concede **[*33]** that the Supreme Court, in *Bridge v. Phoenix Bond & Indemnity Co., 553 U.S. 639, 128 S.Ct. 2131, 170 L. Ed. 2d 1012 (2008)*, held that ***HN12***[] a plaintiff need not plead and prove that it relied on the defendant's alleged misrepresentations. While Defendants concede that first-party, or here, third-party payor, reliance is no longer an issue, [11] they press their other independent bases for dismissal on causation grounds. Plaintiffs counter that their Complaint adequately alleges that Defendants' conduct proximately caused their alleged injury. [12] However, as Plaintiffs fail to adequately plead a cognizable RICO or NJRICO injury, they fail to assert that Defendants' conduct proximately caused their injury.

Notwithstanding Plaintiffs' failure **[*35]** to properly plead an injury, the Court also has a substantial question as to whether Plaintiffs could ever properly plead proximate causation, as required by *Holmes v. Sec. Investor Prot. Corp., 503 U.S. 258, 268, 112 S. Ct. 1311, 117 L. Ed. 2d 532 (1992)*, or if the independent and individualized decision-making of physicians prescribing Risperdal breaks any chain of causation between Defendants' alleged misconduct and Plaintiffs' payment for the medication. *See, e.g., Mazur v. Merck & Co., Inc., 964 F.2d 1348, 1355 (3d Cir. 1992)*; *Heindel v. Pfizer, Inc., 381 F. Supp. 2d 364, 382 (D.N.J. 2004)*. In addition, in a recent, substantially similar action, in which the plaintiffs were represented by many of the same counsel as in this case, the court determined that the plaintiff third-party payors' claims were "too remote" to satisfy civil RICO's proximate causation requirement. *Ironworkers Local Union No. 68 & Participating Employers Health & Welfare Funds, et al. v. Astrazeneca Pharms. LP, et al., No. 07-5000, 585 F. Supp. 2d 1339, 2008 U.S. Dist. LEXIS 92687, 2008 WL 4832659, at *4 (M.D. Fla. Nov. 3, 2008)*. Nevertheless, because Plaintiffs do not sufficiently allege an injury under federal or New Jersey law, they lack standing to bring RICO and NJRICO claims, and the Court **[*36]** need not address causation more fully.

3. Enterprise

Although Defendants have not briefed the issue or disputed the adequacy of Plaintiffs' allegations regarding enterprise, the Court will briefly address whether Plaintiffs' allegations are sufficient to survive a motion to dismiss. ***HN14***[] An "enterprise" includes "any individual, partnership, corporation, association, or other legal entity, and any union or group of individuals associated in fact although not a legal entity." *18 U.S.C. § 1961(4)*. A RICO enterprise is "an entity [made up of] a group of persons associated together for the common purpose of engaging in a course of conduct." *United States v. Turkette, 452 U.S. 576, 583, 101 S. Ct. 2524, 69 L. Ed. 2d 246 (1981)*. To

---

[11] Defendants also note, and this Court agrees, that the Supreme Court, in *Bridge,* stated that "none of this is to say that a RICO plaintiff who alleges injury 'by reason of' a pattern of mail fraud can prevail without showing that *someone* relied on the defendant's misrepresentations." *128 S.Ct. at 2144* (internal citations omitted) (emphasis in original). Therefore, as the Supreme Court said, it will be unlikely that Plaintiffs will be able "to establish even but-for causation if no one relied on the misrepresentation" and "the **[*34]** complete absence of reliance may prevent the plaintiff from establishing proximate cause." *Id.* "Accordingly, it may well be that a RICO plaintiff alleging injury by reason of a pattern of mail fraud must establish at least third-party reliance in order to prove causation." *Id.*

[12] Defendants argue that Plaintiffs' "inflated price" theory of causation is "a quintessential fraud-on-the-market theory" of causation. Plaintiffs assert they do not allege such a theory. Pl. Opp. 9 n. 3. The Court notes, however, that if indeed that is what Plaintiffs are pleading, ***HN13***[] this theory is not recognized in the RICO context, and thus, not a viable theory here. See, e.g., *McLaughlin, 522 F.3d at 228*; *Sikes v. Teleline, Inc., 281 F.3d 1350, 1362-63 (11th Cir. 2002)*, abrogated on other grounds, *Bridge v. Phoenix & Indem. Co., 553 U.S. 639, 128 S.Ct. 2131, 170 L. Ed. 2d 1012 (2008)*; *Summit Props., Inc. v. Hoechst Celanese Corp., 214 F.3d 556, 561 & n. 24 (5th Cir. 2000)*; *In re Rezulin Prods. Liab. Litig., 524 F. Supp. 2d 436, 441 (S.D.N.Y. 2007)* ; *Heindel v. Pfizer, Inc., 381 F. Supp. 2d 364, 380 (D.N.J. 2004)* ; *Int'l Union of Operating Eng'rs Local No. 68 Welfare Fund v. Merck & Co., 192 N.J. 372, 392, 929 A.2d 1076 (2007)*.

establish the existence of an enterprise, a plaintiff must prove that (1) the enterprise is an ongoing organization with some sort of framework or superstructure for making or carrying out decisions; (2) the members of the enterprise function as a continuing unit with established duties; and (3) the enterprise must be separate and apart from the pattern of activity in which it engages. *Seville Indus. Mach. Corp. v. Southmost Mach. Corp., 742 F.2d 786, 789-90 (3d Cir. 1984)*. However, as the rules of pleading **[*37]** require nothing more at this early juncture than a bare allegation, where a plaintiff identifies the "entities it believed were the enterprises that had been marshalled against it," a plaintiff sufficiently alleges the existence of an enterprise. *Id. at 790*.

Plaintiffs allege that Defendants created and used a "Marketing Firms Enterprise," comprised of Defendants and "seemingly-independent research organizations and marketing and public relations firms," as the "vehicle or tool to effectuate the Defendants' pattern of racketeering activity" in its alleged "scheme to market Risperdal for off-label use." Compl. PP 10, 207-08. Plaintiffs further allege that this uniform marketing scheme devised by Defendants was designed to mislead physicians and resulted in increased sales of Risperdal, thus depriving Plaintiffs of cheaper alternatives and/or resulting in higher prices for the drug than otherwise would have existed. *Id.* P 12. Plaintiffs allege that Defendants, through the enterprise, hosted CMEs, at which physicians, compensated by Defendants, relayed misleading information to encourage other physicians to prescribe Risperdal for off-label uses. *Id.* PP 84-96, 136-38. Based on these allegations **[*38]** and Defendants' failure to contest the enterprise component, the Court finds that Plaintiffs have sufficiently alleged that an enterprise existed.

4. Racketeering Activity

HN15[] To allege a RICO violation, a plaintiff must articulate a pattern of racketeering activity, *i.e.*, predicate acts. [13] *See* *Bonavitacola Elec. Contr., Inc. v. Boro Developers, Inc., 87 Fed. Appx. 227, 231 (3d Cir. 2003)* (citations omitted). The claim "must include the allegation of at least two (2) racketeering acts." *Zellner v. Monroe County Mun. Waste Mgmt. Auth., No. 07-1976, 2008 U.S. Dist. LEXIS 57769, at *20 (M.D. Pa. July 28, 2008)*. When fraud is the predicate act, a plaintiff must satisfy the heightened pleading standard of *Federal Rule of Civil Procedure 9(b)*. *See* *Warden v. McLelland, 288 F.3d 105, 114 (3d Cir. 2002)*. Specifically, *Rule 9(b)* states "a party must state with particularity the circumstances constituting fraud or mistake." *Fed. R. Civ. P. 9(b)*. In *Frederico v. Home Depot, 507 F.3d 188 (3d Cir. 2007)*, the Third Circuit qualified what information must be alleged to satisfy the heightened pleading standard of *Rule 9(b)*:

> ***HN16***[] Pursuant to *Rule 9(b)*, a plaintiff alleging fraud must state the circumstances of **[*39]** the alleged fraud with sufficient particularity to place the defendant on notice of the "precise misconduct with which [it is] charged." *Lum v. Bank of America, 361 F.3d 217, 223-224 (3d Cir. 2004)*. To satisfy this standard, the plaintiff must plead or allege the date, time and place of the alleged fraud or otherwise inject precision or some measure of substantiation into a fraud allegation. *See* *Id. at 224*.

Frederico, 507 F.3d at 200; *see also* *Seville Indus. Mach. Corp., 742 F.2d at 791*.

HN18[] General allegations, such as fraud and theft, will not satisfy the pleading standard as they are "not included as [specifically listed] racketeering activit[ies] pursuant to *18 U.S.C. § 1961(1)*." *Zellner, 2008 U.S. Dist. LEXIS 57769 at *23*. Instead, Plaintiffs, more specifically, attempt to allege that the predicate acts are mail and wire fraud. [14] "Where acts of mail and wire fraud constitute the alleged predicate racketeering acts, those acts are

[13] ***HN17***[] "To set out a prima facie showing of a civil RICO violation under *18 U.S.C. § 1964(c)*, a plaintiff must have been injured by 'racketeering activity,' *18 U.S.C. § 1962(c)-(d)*. 'Racketeering activity' is defined as a violation of certain enumerated statutes - commonly known as 'predicate acts' - in *18 U.S.C. § 1961(1)*." *Breslin v. Brainard, 128 Fed. Appx. 237, 240 (3d Cir. 2005)*; *see also* *Anderson v. Ayling, 396 F.3d 265, 269 (3d Cir. 2005)* ("The term 'racketeering activity' is defined in *18 U.S.C. § 1961(1)* to include a long list of state and federal crimes, among them the wire fraud alleged here."); *see generally* *18 U.S.C. §§ 1341*, *1343*. The Third Circuit permits federal common law or "garden variety" **[*40]** fraud, including mail and wire fraud. *Tabas v. Tabas, 47 F.3d 1280, 1290 (3d Cir.)*, *cert. denied,* ***515 U.S. 1118, 115 S. Ct. 2269, 132 L. Ed. 2d 275 (1995)***.

subject to the heightened pleading requirement of Rule 9(b)." Warden, 288 F.3d at 105 (citing Rolo v. City Investing Co. Liquidating Trust, 155 F.3d 644, 657-58 (3d Cir.1998)). The Third Circuit in *Annulli v. Panikkar* addressed the differential pleading nature of mail and wire fraud:

> **HN19**[] There are two elements of a mail or wire fraud charge: "(a) a scheme to defraud, and (2) a mailing or wire in furtherance of that scheme." Greenberg v. Brewster, 816 F. Supp. 1039, 1049 (E.D. Pa. 1993). Wholly intrastate use of the mails for fraud violates the mail fraud statute. *See, e.g.,* In re Burzynski, 989 F.2d 733, 742 (5th Cir. 1993). **[*41]** In contrast, the federal wire fraud statute requires interstate use of the wire. *See, e.g.,* Smith v. Ayres, 845 F.2d 1360, 1366 (5th Cir. 1988) ("As several courts have recognized, the statute requires that the wire communication cross state lines.").

200 F.3d 189, 200 n. 9 (3d Cir. 1999); *see also* Zellner, 2008 U.S. Dist. LEXIS 57769 at *22-23 (citing Stanley v. Int'l Bhd. of Elec. Workers, AFL-CIO CLC, 207 Fed. Appx. 185, 189 (3d Cir. 2006)) (internal quotations omitted) ("[T]he wire fraud statute, 18 U.S.C. § 1343, 'criminalizes a scheme to defraud that is transmitted by wire 'in interstate or foreign commerce'; thus, a complaint must allege interstate use of the wire for each predicate act."). Moreover, when asserting mail fraud allegations, a plaintiff must "identify the purpose of the mailing within the defendant's fraudulent scheme and specify the fraudulent statement, the time, place, and speaker and content of the alleged misrepresentations." Annulli, 200 F.3d at 201 n. 10. In other words, the plaintiff's pleading must contain the "who, what, when and where details of the alleged fraud." Bonavitacola, 87 Fed. Appx. at 231 (quoting Allen Neurosurgical Assoc., Inc. v. Lehigh Valley Health Network, No. 99-4653, 2001 U.S. Dist. LEXIS 284, 2001 WL 41143 (E.D. Pa. Jan. 18, 2001)).

Accordingly, **HN20**[] this Court will only consider as predicate racketeering acts those wire frauds which have been alleged to have been transmitted by wire "in interstate or foreign commerce" and those mail frauds that are alleged to have made use of the United States Postal Service. *See* Zellner, 2008 U.S. Dist. LEXIS 57769 at *23 (**HN21**[] "As these . . . frauds were not properly plead, the Court will not consider them as 'predicate acts.'"). Further, **HN22**[] this Court will only consider as predicate racketeering acts those mail and wire frauds alleged with the specificity required by the heightened pleading standard of Rule 9(b). Upon a liberal construction of Plaintiffs' Complaint, this Court cannot discern a communication that arguably rises to the level of specificity needed to satisfy 9(b)'s heightened pleading requirement. *See* Bonavitacola, 87 Fed. Appx. at 231. It is impossible for this Court to discern the "date, time and place of the alleged fraud or otherwise inject precision or some measure of substantiation into a fraud allegation" of the communications between Defendants. *See* Frederico, 507 F.3d at 200. Thus, Plaintiffs have failed **[*43]** to plead the level of specificity required by the heightened pleading standard of Rule 9(b).

In the instant case, Plaintiffs respond to Defendants' assertion that Plaintiffs' Complaint lacks particularity as "simply unfounded," citing the seventy pages of their Complaint to show their "ample specificity to meet the pleading requirements." Pl. Opp. at 17. Plaintiffs argue that they "have marshaled, even at this pre-discovery phase, abundant substance and specificity." *Id.* at 18. Plaintiffs direct the Court to note, for example, their detailing of "Risperdal's global sales, volume, percentage and total revenue in off-label prescription market segments including the fact that sales of Risperdal and Risperdal Consta accounted for approximately 8% and 6%, respectively, of [Johnson & Johnson's] total revenue for the 2006 fiscal year, and Risperdal was used off-label 66% of the time." *Id.;* Compl. P 49. Yet, even upon a liberal construction of the Complaint, Plaintiffs essentially concede that they "do not indicate the date, time, or place of any misrepresentations" nor do they otherwise inject precision or some measure of substantiation into a fraud allegation to discern a communication that **[*44]** arguably rises to the level of specificity needed to satisfy 9(b)'s heightened pleading requirement. Lum, 361 F.3d at 224; *see* Bonavitacola, 87 Fed. Appx. at 231.

In their Opposition, Plaintiffs argue that the Court should apply the Third Circuit's more relaxed standard for pleadings under Rule 9(b) in the case of corporate fraud. *See* Shapiro v. UJB Fin. Corp., 964 F.2d 272, 284-85 (3d

---

[14] Plaintiffs **[*42]** also allege bribery as a predicate act. *See* Part III.A.4, *infra.*

Cir. 1992) (**HN23**[] "Particularly in cases of corporate fraud, plaintiffs cannot be expected to have personal knowledge of the details of corporate internal affairs. Thus, courts have relaxed the (particularity) rule when factual information is peculiarly within the defendant's knowledge or control.") (citing Craftmatic Sec. Lit. v. Kraftsow, 890 F.2d 628, 645 (3d Cir. 1989)). In *Shapiro,* the Third Circuit reiterated "at the very least plaintiffs must allege that the necessary information lies within defendants' control." *Id.* (internal citations and quotations omitted). In reviewing the district court's dismissal of the plaintiffs' allegations for failure to allege the defendants had exclusive control over the information required to satisfy particularity, the Circuit Court noted that the complaint did not specifically **[*45]** allege that the defendants had exclusive control of the information the plaintiffs needed, but rather "allege[d] only that defendants had access -- but not exclusive access -- to company information when the alleged misrepresentations and omissions occurred." Id. at 285 n. 13. Further, the Third Circuit found that even if the complaint contained boilerplate allegations that the necessary information was within the defendant's exclusive control, Rule 9(b) would still not be satisfied. *See* Id. at 285. Rather, under this more relaxed application of the rule, "plaintiffs must accompany such an allegation with a statement of facts upon which their allegation is based." Id. (internal citations omitted). More specifically, "a complaint must delineate at least the nature and the scope of plaintiffs' effort to obtain, before filing the complaint, the information needed to plead with particularity." *Id.*

Plaintiffs assert that they have sufficiently plead with particularity because "the internal corporate mechanisms and activities engaged in by the Defendants in furtherance of their fraudulent scheme are within the exclusive knowledge and understanding of Defendants," citing to *Craftmatic* and **[*46]** *Shapiro,* among others. Pl. Opp. at 17-18. Plaintiffs, however, do not make these allegations in their Complaint. As Plaintiffs do not even allege an insufficient boilerplate allegation that the information they require is within the Defendants' control, they certainly fail to meet even the more relaxed application of the Rule that they argue applies. This application still requires Plaintiffs' allegations to include at least the nature and the scope of Plaintiffs' effort to obtain, before filing the complaint, the information needed to plead with particularity. *See* Shapiro, 964 F.2d at 285. Thus, even if the more relaxed standard of Rule 9(b) were applicable, which it is not, Plaintiffs fail to meet the pleading of particularity required for mail and wire fraud as predicate RICO acts.

Plaintiffs also appear to allege bribery as a predicate act. Compl. PP 9, 212. Even though Defendants do not raise the sufficiency of Plaintiffs' pleading with respect to this specific predicate act, Defendants have argued an overall failure to plead the alleged predicate acts with particularity, and the Court finds that Plaintiffs have not sufficiently alleged that Defendants engaged in bribery as a predicate **[*47]** RICO act. **HN24**[] While bribery does not invoke the heightened pleading requirements of Rule 9(b), Plaintiffs must satisfy the more liberal pleading requirements of Rule 8(a) to adequately plead bribery as a predicate act, and they do not. Plaintiffs make no effort to delineate the elements of bribery nor do they cite to any statute which does so, and thus, Plaintiffs have failed to put Defendants on notice as to what laws they are alleged to have violated. *See generally* Lockheed Martin Corp. v. Boeing Co., 357 F. Supp. 2d 1350, 1374-75 (M.D. Fla. 2005).

HN25[] "A 'pattern of racketeering activity means' at least two predicate acts that 'are related and that amount to or pose a threat of continued criminal activity.'" Bonavitacola, 87 Fed. Appx. at 231 (*quoting* H. J., Inc. v. Nw. Bell Tel. Co., 492 U.S. 229, 239, 109 S. Ct. 2893, 106 L. Ed. 2d 195 (1989)). Plaintiffs fail to sufficiently allege even one predicate act as required by RICO, as discussed herein. Accordingly, Plaintiffs have not sufficiently plead their RICO claims under federal or New Jersey law, and the Court grants Defendants' motion to dismiss Counts I and III of Plaintiffs' Complaint pursuant to Rule 12(b)(6).

B. Plaintiffs' Allegation of Defendants' Conspiracy to Commit [*48] RICO

In Count II of their Complaint, Plaintiffs allege that Defendants conspired to violate RICO, 18 U.S.C. § 1962(d). As preliminary matter, Defendants argue that Plaintiffs' RICO conspiracy theory is substantively deficient because it is based on the alleged conspiracy between and among Defendants and their corporate agents. Df. Mot. at 19. More specifically, Defendants argue that Janssen and Johnson & Johnson are subsidiary and parent, respectively, and a corporation is incapable of conspiring with itself, its corporate officers, its subsidiaries or its agents. *See Id.* In response, Plaintiffs claim that the Third Circuit has recognized a claim for intra-corporate conspiracies under RICO in *Shearin v. E.F. Hutton Group, Inc., 885 F.2d 1162, 1164, 1166-67 (3d Cir. 1989)*, *abrogated on other grounds, Beck v. Prupis, 529 U.S. 494, 120 S. Ct. 1608, 146 L. Ed. 2d 561 (2000)*.

Neither the Supreme Court nor the Third Circuit has expressly decided whether *RICO, § 1964(d)*, permits claims of intra-corporate conspiracy, or whether a corporation may conspire with its wholly owned subsidiaries. Federal courts within this Circuit disagree about whether the Third Circuit, in *Shearin,* held that a corporation could conspire with its wholly **[*49]** owned subsidiaries under *§ 1962(d)* to violate *§ 1962(c) of RICO*. [15] *Compare Curley v. Cumberland Farms Dairy, Inc., 728 F. Supp. 1123, 1135 (D.N.J. 1990)* (finding that, in *Shearin,* the Third Circuit "concluded that a corporation could conspire with its wholly owned subsidiaries under *§ 1962(d)*"), [16] *with Albert Einstein Med. Ctr. v. Physicians Clinical Servs., Ltd., No. 90-3387, 1991 U.S. Dist. LEXIS 18705, 1991 WL 280274, at *5-6 (E.D. Pa. Dec. 20, 1991)* (stating that *Shearin* did not address the issue of whether a corporation and its subsidiaries may conspire to commit a violation of *§ 1962(d) of RICO*, finding that *Curley* misinterpreted the Third Circuit's holding in *Shearin,* and determining that Third Circuit precedent does not allow corporations who were innocent victims of a conspiracy among employees to be exposed to RICO liability). This Court finds that *Shearin* did not address the issue of whether a corporation and its subsidiaries may conspire to commit a violation of *§ 1962(d) of RICO and* that it remains an open issue in this Circuit.

Other federal circuit courts **[*52]** also disagree about whether RICO permits intra-corporate conspiracies. *See Fogie v. THORN Americas, Inc., 190 F.3d 889, 898 (8th Cir. 1999)*; [17] *Webster v. Omnitrition International, Inc., 79*

---

[15] Defendants argue that even if *Shearin* could be read as permitting a finding that a corporation and its subsidiaries may conspire under RICO, it would only be actionable **[*50]** if "the relationship between the parent corporation and its subsidiaries were established *solely for the purpose* of committing fraud." Def. Reply at 13 (citing *Glessner v. Kenny, 952 F.2d 702, 714 (3d Cir. 1991)*, *overruled on other grounds by Jaguar Cars, Inc. v. Royal Oaks Motor Car Co., 46 F.3d 258 (3d Cir. 1995))*. This, however, was not the finding in *Glessner* or *Shearin.* First, *Shearin* did permit a RICO conspiracy where the facts disclosed an intra-corporate relationship, nonetheless, *Shearin* did not address whether a corporation could conspire with its wholly owned subsidiaries under *§ 1962(d)* to violate *§ 1962(c) of RICO*. See *885 F.2d at 1166-67*. Second, in *Glessner,* the Third Circuit merely reiterated that RICO conspiracy claims must allege an "agreement to commit predicate acts and knowledge that the acts were part of a pattern of racketeering activity." *952 F.2d at 714*. The court then pointed out that, since the plaintiffs in *Shearin* pled that the relationship between the parent corporation and its subsidiaries was established solely for the purpose of committing fraud, the plaintiffs adequately pled the required inference that the defendant companies allegedly agreed to commit **[*51]** predicate acts and knew that they were part of a pattern of racketeering activity. *Glessner, 952 F.2d at 714*. *Glessner* did not hold that this fraudulent creation of a subsidiary is a necessary requirement for pleading RICO conspiracy, as Defendants appear to assert, but rather *Glessner* used the *Shearin* facts to distinguish *Shearin* from the case before the court and to explain why the plaintiffs in *Glessner* failed to provide a similar reasonable inference of adequately pleading RICO in their complaint. *Id.*

[16] In *Curley,* the District Court stated that Third Circuit's ruling in *Shearin* on "intra-corporate conspiracies is more faithful to the broad remedial purpose of RICO than a narrow reading which is model[ed] on ***antitrust law***." *Curley, 728 F. Supp. 1123, 1135 (D.N.J. 1990)* (citing *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984))*. The *Curley* court also stated that "while ***antitrust law*** seeks to encourage inter-corporate competition even at a cost to intra-corporate competition, RICO seeks to eliminate all racketeering activity, both intercorporate and intra-corporate." *Id.* (citing *Continental T.V. Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977))*.

[17] The Eighth Circuit determined where the plaintiffs alleged that the only participants in the conspiracy were the parent corporation and its wholly owned subsidiaries, the plaintiffs "fail[ed] to allege a conspiracy, because as a matter of law a parent corporation and its wholly owned subsidiaries are legally incapable of forming a conspiracy with one another." *Fogie v. Thorn Americas, Inc., 190 F.3d 889, 898 (8th Cir. 1999)*. Applying *Copperweld's* principle that "[i]n any conspiracy, two or more entities that previously pursued their own interests separately are combining to act as one for their common benefit," *467 U.S. at 769*, the *Fogie* court found that the identical conclusion was required when it is applied to alleged parent-subsidiary RICO civil conspiracies. *Fogie, 190 F.3d at 898*. In *Fogie,* the court stated that an alleged conspiracy between a parent and a subsidiary lacks this crucial element because these entities "have a complete unity of interest." *Id.* The Eighth Circuit criticized the Seventh and Ninth Circuits for failing "to **[*54]** explain why, when two entities are under common control and there is no distinctiveness or independence of action, an agreement or understanding between them creates any of the special dangers *§ 1962(d)* targets." *Id.*

F.3d 776, 787 (9th Cir.), *cert. denied, 519 U.S. 865, 117 S. Ct. 174, 136 L. Ed. 2d 115 (1996)*; [18] Ashland Oil, Inc. v. Arnett, 875 F.2d 1271, 1281 (7th Cir. 1989). [19] Since the law in this area of RICO is unsettled, district courts have looked to antitrust cases for guidance. *See, e.g., In re National Mortgage Equity Corp. Mortgage Pool Cert. Sec. Litig., 636 F. Supp. 1138, 1156 (C.D. Cal. 1986)*. The Supreme Court has clearly held that under the Sherman Act, 15 U.S.C. § 1, a parent company and its wholly owned subsidiary are incapable of conspiring with each other. *See* Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 776-77, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984). In *Copperweld,* the Court determined that "[a] parent and its wholly owned subsidiary have a complete unity of interest. Their objectives are common, not disparate; their general corporate actions are guided or determined not by two separate corporate consciousnesses, but one." Id. at 771. As the parent and subsidiary always have a "unity of purpose or a common design," *Id.,* the Court held that **[*53]** parent corporation and its wholly owned subsidiary are incapable of conspiring with each other for purposes of § 1 of the Sherman Act. Id. at 777.

The majority of courts within this Circuit agree that ***HN26***[] a corporation cannot conspire with its agents **[*56]** and/or employees under § 1962(d) of RICO. *See, e.g.,* Castle v. Crouse, No. 03-5252, 2004 U.S. Dist. LEXIS 2123, 2004 WL 257389, at *6 (E.D. Pa. Feb. 11, 2004) (concluding that a corporate entity cannot conspire with its employees); Hughes v. Technology Licensing Consultants, Inc., 815 F. Supp. 847, 851 (W.D. Pa. 1992) ("The majority rule is that ***HN27***[] conspiracy cannot lie against the corporate entity for the concerted action of its employees who violate RICO on its behalf."); Satellite Fin. Planning Corp. v. First Nat'l Bank of Wilmington, 633 F. Supp. 386, 405 n. 23 (D. Del. 1986) (finding ***HN28***[] parents and subsidiaries "can conspire in violation of RICO no more than they [can] for antitrust purposes"). *Contra* Brokerage Concepts, Inc. v. U.S. Healthcare, Inc., No. 95-1698, 1996 U.S. Dist. LEXIS 3427, 1996 WL 135336, *5 (E.D. Pa. Mar. 19, 1996) ("a RICO conspiracy can exist between a corporation and its agents or employees"); Curley, 728 F. Supp. at 1135 (recognizing intra-corporate conspiracies under RICO). ***HN29***[] An alleged intra-corporate conspiracy comprised solely of a corporation acting in concert with its officers and employees should not be considered as involving separate actors conspiring under the law. *See* Emcore Corp. v. PricewaterhouseCoopers LLP, 102 F. Supp. 2d 237, 266 (D.N.J. 2000). **[*57]** ***HN30***[] The decision that a RICO conspiracy claim cannot stand where a corporation is alleged essentially to have done nothing more than act in concert with its officers and employees, stems from the premise that "[a] corporation, legally conceived, is only one person" under RICO. *See Id.* These courts generally agree that an exception to the rule against intra-corporate conspiracies exists where the employees act in pursuit of their own interests and not for the benefit of the corporation. *See* Castle, 2004 U.S. Dist. LEXIS 2123, 2004 WL 257389, at *6 (internal citations omitted). Thus, only where the plaintiff alleges something more than a corporation acting in concert with its officers and employees, can a RICO conspiracy claim proceed.

---

[18] The Ninth Circuit, relying on the Seventh Circuit's decision in Ashland Oil, Inc. v. Arnett, 875 F.2d 1271 (7th Cir. 1989), extended § 1962(d) liability to a wholly intra-corporate conspiracy. *See* Webster v. Omnitrition International, Inc., 79 F.3d 776, 787 (9th Cir.), *cert. denied,* **519 U.S. 865, 117 S. Ct. 174, 136 L. Ed. 2d 115 (1996)**.

[19] The Seventh Circuit distinguished the Supreme Court's holding that a parent corporation could not conspire with its wholly-owned subsidiary for purposes of § 1 of the Sherman Act, as a barrier for relief in RICO claims "because the Sherman Act is premised, as RICO is not, on the 'basic distinction between concerted and independent action.'" Haroco, Inc. v. American Nat. Bank and Trust Co. of Chicago, 747 F.2d 384, 403 n. 22 (7th Cir. 1984) (citing Copperweld, 104 S.Ct. at 2740-44), *cert. granted,* ***469 U.S. 1157, 105 S. Ct. 902, 83 L. Ed. 2d 917 (1985)***, *aff'd on other grounds,* 473 U.S. 606, 105 S. Ct. 3291, 87 L. Ed. 2d 437 (1985). Further, in *Haroco,* the court stated that **[*55]** "[t]he policy considerations discussed in *Copperweld*[] therefore do not apply to RICO, which is targeted primarily at the profits from patterns of racketeering activity." *Id.* The Seventh Circuit determined that the Sherman Act's theoretical "community of interest" that causes a parent and subsidiary to pose "no threat to the goals of ***antitrust law***-protecting competition" differs from RICO conspiracies because "intracorporate conspiracies do threaten RICO's goals of preventing the infiltration of legitimate businesses by racketeers and separating racketeers from their profits." Ashland Oil, Inc. v. Arnett, 875 F.2d 1271, 1281 (7th Cir. 1989) (citing Russello v. United States, 464 U.S. 16, 26-28, 104 S. Ct. 296, 78 L. Ed. 2d 17 (1983)). The Eighth Circuit criticized the Seventh Circuit's findings because its "recent decisions regarding intracorporate liability under § 1962(c) . . . appear to undercut the conclusions it reached in *Ashland Oil." Fogie, 190 F.3d at 897 n. 4* (noting that "[m]ore recently . . . the Seventh Circuit has indicated that related business entities may not serve as both the person and enterprise).

HN31[] The inquiry of whether a parent corporation is capable of conspiring with its wholly owned subsidiary for purposes of violating § 1962(d) of RICO is similar to that of whether a parent can conspire with its subsidiaries under § 1 of the Sherman Act or whether a corporation can conspire with its agents and/or employees under § 1962(d) of RICO. In all three scenarios, where an intracorporate conspiracy is alleged, the two conspiring entities are but one. The parent and its wholly owned **[*58]** subsidiary share a complete unity of interest, with common objectives. *See* Copperweld, 467 U.S. at 771. Similarly, a corporation typically acts in concert with its officers and employees, as one legal person, with similar goals. *See* Emcore, 102 F. Supp. 2d at 266. Thus, a parent corporation cannot conspire with its wholly owned subsidiary to violate § 1962(d) of RICO because the two entities always have a "unity of purpose or a common design." Copperweld, 467 U.S. at 777. There is a recognized exception, as pointed out above, in the case where a plaintiff alleges that the employees acted in pursuit of their own interests and not for the benefit of the corporation, or there is an allegation that entities no longer act as one and thus may be considered separate actors under the law. *See Id.;* Castle, 2004 U.S. Dist. LEXIS 2123, 2004 WL 257389, at *6. Therefore, HN32[] to state a claim under § 1962(d), where a parent corporation has allegedly conspired with its wholly owned subsidiary, there must be some additional allegation, e.g., that the subsidiary was fraudulently created to accomplish the racketeering activity. See, e.g., Shearin, 885 F.2d at 1166-67. That has not been done here. In this case, Plaintiffs allege, albeit **[*59]** inadequately, that Defendants, a parent corporation and its wholly owned subsidiary, conspired with each other and with the other (unnamed) members of the alleged enterprise in violation of § 1962(d). Compl. P 225-226. This is not sufficient.

Furthermore, Plaintiffs fail to adequately plead a RICO conspiracy claim, according to the Third Circuit precedent with requires HN33[] a claim under § 1962(d) of RICO to include:

> "(1) agreement to commit the predicate acts of fraud, and (2) knowledge that those acts were part of a pattern of racketeering activity conducted in such a way as to violate section 1962(a), (b), or (c)." Odesser v. Continental Bank, 676 F. Supp. 1305, 1312 (E.D.Pa.1987). "(A)llegations of conspiracy are not measured under the . . . [Fed.R.Civ.P.] 9(b) standard, which requires greater particularity of allegation of fraud, but are measured under the more liberal . . . (Fed.R.Civ.P. 8(a)) pleading standard." . . . A conspiracy claim must also contain supportive factual allegations. *Black & Yates, Inc. v. Mahogany Ass'n, Inc., 129 F.2d 227, 231-32 (3d Cir.)*, *cert. denied, 317 U.S. 672, 63 S. Ct. 76, 87 L. Ed. 539 (1942)*. The allegations must be sufficient to "describe the general **[*60]** composition of the conspiracy, some or all of its broad objectives, and the defendant's general role in that conspiracy." Alfaro, 606 F. Supp. at 1117-18.

Rose v. Bartle, 871 F.2d 331, 366 (3d Cir. 1989). Plaintiffs fail to set forth the period of this supposed RICO conspiracy or the actions Defendants allegedly took in support of it. *See Id.* (HN34[] recognizing "only allegations of conspiracy which are particularized, such as those addressing the period of the conspiracy, the object of the conspiracy, and certain actions of the alleged conspirators taken to achieve that purpose" as sufficient). Plaintiffs also fail show how all of the alleged conspirators knew that their acts were part of a pattern of racketeering activity.

In any event, Plaintiffs' allegations that Defendants violated § 1962(d) by conspiring to violate § 1962(c) in this case fail as a matter of law because Plaintiffs have not sufficiently plead a federal RICO claim under § 1962(c). *See* Part III.A, *supra.* HN35[] "Any claim under section 1962(d) based on conspiracy to violate the other subsections of section 1962 necessarily must fail if the substantive claims are themselves deficient." Lum, 361 F.3d at 227 n. 5 (internal citations **[*61]** and quotations omitted). Thus, the Court grants also Defendants' motion to dismiss Count II of Plaintiffs' Complaint, the RICO conspiracy claim.

IV. Conclusion

For the foregoing reasons, the Court grants Defendants' Motion to Dismiss Count I-III of Plaintiffs' Complaint.

Dated December 23, 2008

/s/ Freda L. Wolfson

Honorable Freda L. Wolfson

United States District Judge

Animal Sci. Prods. v. China Nat'l Metals & Minerals Imp. & Exp. Corp.

United States District Court for the District of New Jersey

December 30, 2008, Decided; December 30, 2008, Filed

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

Civil Procedure > ... > Pretrial Judgments > Default & Default Judgments > General Overview

HN1[] **Judges, Discretionary Powers**

Default is governed by *Fed. R. Civ. P. 55*. Pursuant to *Rule 55(a)*, a plaintiff can request the clerk's entry of default against a party against whom a judgment for affirmative relief is sought that has failed to plead or otherwise defend and that fact is made to appear by affidavit or otherwise. Thereafter, the plaintiff may seek the court's entry of default judgment under either *Rule 55(b)*. The district court has the discretion to enter default judgment, although entry of default judgments is disfavored as decisions on the merits are preferred. In other words, district courts must remain mindful that, like dismissal with prejudice, default is a sanction of last resort, and district courts must resolve all doubt in favor of proceeding on the merits.

Civil Procedure > ... > Pretrial Judgments > Default & Default Judgments > General Overview

HN2[] **Pretrial Judgments, Default & Default Judgments**

Before imposing the extreme sanction of default, district courts must make explicit factual findings as to: (1) whether the party subject to default has a meritorious defense, (2) the prejudice suffered by the party seeking default, and

(3) the culpability of the party subject to default. Hence, a litigant's failure to state a claim upon which relief may be granted, e.g., an assertion of a claim over which the court lacks jurisdiction, prevents the presiding court from entering a default judgment, since, under *Fed. R. Civ. P. 55(b)(2)*, the litigant is not entitled to a default judgment unless (s)he establishes that the essential elements of the pleaded claims are present and states factual allegations in support of these elements.

Civil Procedure > ... > Default & Default Judgments > Default Judgments > Entry of Default Judgments

Evidence > Burdens of Proof > Allocation

Civil Procedure > ... > Pleadings > Service of Process > General Overview

HN3[] **Default Judgments, Entry of Default Judgments**

Entry of a default judgment is an inappropriate use of judicial discretion where there has been insufficient service. Thus, if there is a challenge to the adequacy of service, the party who seeks default judgment and, allegedly, served the complaint bears the burden of establishing its validity when a challenge to its effectiveness is made.

Civil Procedure > ... > Pretrial Judgments > Default & Default Judgments > General Overview

HN4[] **Pretrial Judgments, Default & Default Judgments**

If default is entered against some defendants in a multi-defendant case, the preferred practice is for the court to withhold granting default judgment until the action is resolved on its merits against non-defaulting defendants: if plaintiff loses on merits, the complaint should then be dismissed against both defaulting and non-defaulting defendants.

Civil Procedure > ... > Default & Default Judgments > Default Judgments > Entry of Default Judgments

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

HN5[] **Default Judgments, Entry of Default Judgments**

Prior to entering default judgment, the court must ensure that its has proper jurisdiction over the action, just as the court must determine that plaintiffs, at the very least, sufficiently stated their claim.

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

HN6[] **Subject Matter Jurisdiction, Jurisdiction Over Actions**

The failure of a party to address the issue of subject matter jurisdiction neither waives nor disposes of the issue.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > Limited Jurisdiction

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN7[] **Motions to Dismiss, Failure to State Claim**

Federal courts are courts of limited jurisdiction. Thus, a federal court shall presume lack of jurisdiction, and the party seeking to invoke the court's jurisdiction bears the burden of proving that subject matter jurisdiction exists. While the court is obligated to test subject matter jurisdiction sua sponte, *Fed. R. Civ. P. 12(b)(1)* also authorizes a party to move to dismiss a claim for lack of subject matter jurisdiction. *Fed. R. Civ. P. 12(b)(1)*. A party challenging the court's jurisdiction under *Rule 12(b)(1)* may do so by raising either a facial attack or a factual attack. In contrast, a motion to dismiss pursuant to *Fed. R. Civ. P. 12(b)(6)* tests only the legal sufficiency of a claim.

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

HN8[] **Subject Matter Jurisdiction, Jurisdiction Over Actions**

Deficiencies as to the subject matter jurisdiction may be either "facial" or "factual." Assessing a factual deficiency, the court: (1) must weigh the evidence relating to jurisdiction, with discretion to allow affidavits, documents, and even limited evidentiary hearings; and (2) can look beyond the pleadings to decide factual matters relating to jurisdiction.

Antitrust & Trade Law > Sherman Act > Jurisdiction

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

HN9[] **Sherman Act, Jurisdiction**

The United States Court of Appeals for the Third Circuit clarified that, in the Sherman Act context, jurisdictional facts are often closely intertwined with the merits of the claim, hence, requiring the party invoking the court's jurisdiction to produce sufficient evidential proof. Defining the sufficiency of such proof, the Court of Appeals observed that it is incumbent upon the trial judge to demand less in the way of jurisdictional proof than would be appropriate at a trial stage.

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

HN10[] **Subject Matter Jurisdiction, Jurisdiction Over Actions**

Facial attacks to subject matter jurisdiction contest the sufficiency of the pleadings, and the trial court must accept the complaint's allegations as true. However, the U.S. Supreme Court elaborated on the requirements a pleading must meet to withstand a facial attack. The pleading must provide enough factual matter to suggest that the alleged event took place. While the Supreme Court left it to the district courts to determine, on a case-by-case basis, how much factual matter is "enough," the Court unambiguously indicated that represented litigants cannot satisfy the pleading requirements by invoking the overly lenient regime of "pure notice."

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

HN11[] Motions to Dismiss, Failure to State Claim

A plaintiff's complaint will survive facial dismissal only if it contains enough factual heft establishing the plaintiff's claims rather than plaintiff's conjecture, or self-serving interpretations of actual events, or mere labels and conclusions, and a formulaic recitation of the elements of a cause of action.

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

HN12[] Pleadings, Rule Application & Interpretation

A litigant's claims cannot be based on a source containing unverifiable and, in addition, mutually exclusive data.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN13[] Sherman Act, Claims

The Sherman Act prohibits every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations. 15 U.S.C.S. § 1. To establish a violation of § 1, a plaintiff must prove: (1) concerted action by the defendants; (2) that produced anti-competitive effects within the relevant product and geographic markets; (3) that the concerted action was illegal; and (4) that the plaintiff was injured as a proximate result of the concerted action. A related statute, the Clayton Act, provides a litigant with the right of private action to vindicate violations of the Sherman Act.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN14[] Per Se Rule & Rule of Reason, Sherman Act

To determine whether a particular action unreasonably restrains trade, courts apply either the "per se" analysis or the "rule of reason." Under the per se rule, certain types of restraints are presumed to be unreasonable, hence enabling the court to avoid an elaborate economic effect inquiry. If a restraint is per se illegal, further examination of the practice's impact on the market is unnecessary for finding that it produced adverse, anticompetitive effects within relevant product and geographic markets. Per se liability is reserved for only those agreements that are so plainly anticompetitive that no elaborate study of the industry is needed to establish their illegality. Examples of agreements which implicate the per se rule include horizontal price-fixing arrangements, market allocation, group boycotts and some "tying" arrangements.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN15[] Per Se Rule & Rule of Reason, Sherman Act

The rule of reason, which is the prevailing standard, ordinarily requires the court to engage in a detailed analysis of the effect that the restraint had or is having on competition in a relevant market. Typical examples of the conduct subject to the rule of reason analysis are agreements to exchange pricing information, certain "tying" arrangements, vertical non-price restraints, customer rebates and discount programs, promotional allowances to dealers and cooperative advertising programs, exclusive distributorships, etc.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN16[ ] **Per Se Rule & Rule of Reason, Sherman Act**

The issue of whether the court should assess the allegedly illegal conduct under the per se rule or the rule of reason does not depend on the litigants' positions as to which rule should apply, nor does it depend on the labels utilized in the complaint: only the plaintiff's factual assertions allow the court to utilize the curtailed per se analysis.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN17[ ] **Sherman Act, Scope**

As a matter of substantive ***antitrust law***, it has long been established that defendants' mere parallel conduct, even if it is consciously parallel, does not violate *§ 1* of the Sherman Act. Indeed, such conduct is commonplace and often efficient. Of course, parallel conduct can result from an agreement between competitors, and such an agreement could violate *§ 1*. But an allegation of agreement under *§ 1* must rest on something more than allegations of parallel conduct, lest commonplace and efficient economic behavior provide a sufficient basis for costly litigation over largely groundless claims. Nor can a mere conclusory allegation of an agreement or conspiracy suffice to convert allegations of parallel conduct into an adequate allegation of a violation of *§ 1*.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

HN18[ ] **Sherman Act, Scope**

Mere allegations that defendants engaged in certain parallel conduct unfavorable to competition, absent some factual context suggesting an illegal agreement to that effect, are insufficient to state a claim under *§ 1* of the Sherman Act. Consequently, to duly assert a violation, allegations of parallel conduct must be placed in a factual context which raises a plausible suggestion of a preceding agreement rather than identical independent action, since a defendant's business activity could be an entirely natural, unilateral reaction of the defendant to the business activities by defendant's competitors.

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN19[ ] **International Aspects, Foreign Trade Antitrust Improvements Act**

The Foreign Trade Antitrust Improvements Act sets forth a general rule that excludes from the scope of the Sherman Act all conduct involving "non-import" foreign commerce unless two conditions are met: (1) the alleged conduct has a direct, substantial and reasonably foreseeable effect on United States domestic commerce; and (2) the domestic anti-competitive effect "gives rise to" a claim under the Sherman Act. *15 U.S.C.S. § 6a*.

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

HN20[] **International Aspects, Foreign Trade Antitrust Improvements Act**

See *15 U.S.C.S. § 6a*.

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN21[] **International Aspects, Foreign Trade Antitrust Improvements Act**

First, the Foreign Trade Antitrust Improvements Act (FTAIA) asks whether all defendants were involved in import trade or import commerce. If all that defendants were doing was actually bringing goods or services into the United States, then the FTAIA is not even triggered, i.e., the claim squarely falls within the scope of the Sherman Act. However, if defendants did not directly bring items or services into the United States, they cannot be labeled "importers," nor it could be said that defendants have they engaged in import trade or commerce. In other words, even if a certain importer purchased or otherwise obtained the defendants' product in a foreign market (be it the defendants' national market or any other market) and brought the defendants' product into the United States, the fact that the product eventually found its way into the United States does not transform the defendant into an "importer" and, hence, an antitrust claim against the defendants must pass muster under the FTAIA before the Sherman Act claim can be entertained.

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

Antitrust & Trade Law > Sherman Act > Jurisdiction

HN22[] **International Aspects, Foreign Trade Antitrust Improvements Act**

Once it is determined that the defendants are not actual importers or that they were importing goods all over the world, the Foreign Trade Antitrust Improvements Act (FTAIA) is triggered. However, the FTAIA bar does not exclude every possible conduct by the defendants which are not directly importing into the United States from the reach of the Sherman Act. Rather, the second prong of the inquiry must be conducted, namely, whether the defendants' alleged conduct involved trade or commerce with foreign nation. *15 U.S.C.S. § 6a*. Generally, where the defendants' conduct is directed at the competitiveness of a foreign market, such conduct involves foreign trade or commerce. Hence, if the foreign defendants are not involved in importation into any foreign market, i.e., if they operate only within their own domestic market, the FTAIA bars antitrust suits against such defendants by removing subject matter jurisdiction of a United States court to entertain Sherman Act claims against such defendants, even if certain ripple effects of the defendants' conduct reach the United States' market.

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

Antitrust & Trade Law > Sherman Act > Jurisdiction

HN23[] **International Aspects, Foreign Trade Antitrust Improvements Act**

In the context of the Foreign Trade Antitrust Improvements Act, if the foreign defendants are involved in importation into foreign markets (which may or may not include the United States), then the third prong of the inquiry comes into play. *15 U.S.C.S. § 6a(2)*. Specifically, the court shall determine whether the foreign defendants' export activities (i.e., the defendants' bringing of their goods or services into markets other than their own) caused direct, substantial and reasonably foreseeable effect on the United States' market, i.e., either on our nations' interstate commerce or on the importation into the United States. Once this third prong is satisfied, the court establishes its subject matter jurisdiction to examine the sufficiency of plaintiff's claim pursuant to the Sherman Act.

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

Antitrust & Trade Law > Sherman Act > Jurisdiction

HN24[] **International Aspects, Foreign Trade Antitrust Improvements Act**

The courts agree that participation by American firms in the alleged conspiracy does not, by itself, establish an anticompetitive effect in the United States. Similarly, mere intent of defendants to reduce competition in the United States is insufficient to meet the "direct effect" standard. To establish "direct effect," the plaintiff must show a causal link between the wrongful conduct and the anticompetitive effect suffered in the United States. Thus, mere spillover effects within the United States caused by a conspiracy targeting foreign markets are not sufficiently "direct" to satisfy the Foreign Trade Antitrust Improvements Act (FTAIA), just as mere ripple effects felt in the United States as a result of anticompetitive conduct abroad are not sufficiently "substantial" to meet FTAIA requirements.

International Law > Dispute Resolution > Comity Doctrine > General Overview

HN25[] **Dispute Resolution, Comity Doctrine**

The term "comity" describes a theory for accommodating conflicting legal policies of territorial sovereigns. The laws of every sovereign authority have force within the boundaries of its state, and bind all subject to it, but not beyond. Those are held to be subject to a sovereign authority who are found within its boundaries, whether they be there permanently or temporarily. Those who exercise sovereign authority so act from comity, that the laws of every nation having been applied within its own boundaries should retain their effect everywhere so far as they do not prejudice the powers or rights of another state and another state's courts. Thus, the legal doctrine of international comity is not a rule of public international law but a judicial tradition based on respect for sovereignty, a discretionary power of the court to decline jurisdiction in international cases out of respect for the actions and laws of another nation, which are weighed against United States international convenience and duties.

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

HN26[] **International Aspects, Foreign Trade Antitrust Improvements Act**

In the United States Court of Appeals for the Fourth Circuit, in determining whether the Foreign Trade Antitrust Improvements Act applies, a court should consider whether the defendants' acts, targets, and effects are primarily foreign or primarily domestic. This inquiry will best accommodate the cases with mixed fact patterns, defying ready categorization as "foreign" or "domestic" conduct, which our increasingly global economy will undoubtedly produce.

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

HN27[] **International Aspects, Foreign Trade Antitrust Improvements Act**

In the United States Court of Appeals for the Fourth Circuit, the Foreign Trade Antitrust Improvements Act bars claims failing to establish not only a clear link between the defendants' illegal conduct and the United States trade and commerce, but also that the United States trade was, at the very least, "a" focus point of the defendants' illegal conduct.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN28[] **Sherman Act, Claims**

It is axiomatic that a business entity cannot conspire with its wholly-owned subsidiary for purposes of the Sherman Act liability.

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN29[] **International Aspects, Foreign Trade Antitrust Improvements Act**

Activities of a foreign producer fall outside the reach of the Sherman Act since a "producer" is neither an "importer" into the United States nor an entity engaged in "trade or commerce" for the purposes of the Foreign Trade Antitrust Improvements Act.

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

HN30[] **International Aspects, Foreign Trade Antitrust Improvements Act**

In the context of the Foreign Trade Antitrust Improvements Act, if an entity is conducting its business in a developing country, the fact that the entity's costs might be lower than those of analogous enterprises doing business in developed nations is neither indicative of the entity's anticompetitive practices nor suggests that the entity's goal is to affect the trade in a certain consumer nation.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN31[] **Amendment of Pleadings, Leave of Court**

Ordinarily, the plaintiff may be granted leave to amend when justice so requires. That said, allowing leave to amend where there is a stark absence of any suggestion by the plaintiffs that they have developed any facts since the action was commenced, which would, if true, cure the defects in the pleadings would frustrate the court's ability to filter out lawsuits that have no factual basis.

Judges: GARRETT E. BROWN, JR., Chief Judge, United States District Judge.

Opinion by: GARRETT E. BROWN, JR.

Opinion

[*846] BROWN, Chief Judge:

This matter comes before the Court upon Plaintiffs' motion for default judgment (Docket Entry No. 28, "Plaintiffs' Motion") **[**2]** and defendant Minmetals Inc.'s ("Minmetals") motion to dismiss Plaintiffs' complaint (Docket Entry No. 27, "Defendant's Motion"). For the reasons stated below, Plaintiffs' Motion will be denied. Defendant's Motion will be granted insofar that Plaintiffs' complaint will be dismissed without prejudice, and Plaintiffs will be granted leave to amend their complaint. All residual motions will be dismissed as moot.

TABLE OF CONTENTS

[*847] I. [3] PROCEDURAL BACKGROUND**

At issue here is the extraterritorial scope of the Sherman Antitrust Act and its application to this case. The putative Plaintiffs' class comprises certain United States consumers of magnesite products who allege that a number of Chinese entities and their trade association conspired to keep prices on certain magnesite products artificially inflated worldwide, including in the United States.

On September 7, 2005, Plaintiffs Animal Science Products, Inc. and Resco Products, Inc. ("Animal Science" and "Resco," collectively, "Plaintiffs") filed a civil complaint naming the following seventeen entities as Defendants in this matter: China National Metals & Minerals Import & Export Corporation; China National Minerals Import & Export Corporation; Sinosteel Corporation; China Metallurgical Import & Export Corporation; Liaoning Jiayi Metals & Minerals Co. Ltd.; Haicheng Houying Co. Ltd.; Haicheng Huayu Group Import & Export Co. Ltd.; Minmetals; Xiyang Group; Xiyang Imoprt & Export Ltd. Co.; Xiyang Refractory Materials Ltd. Co.; Xiyang Fireproof Material Co. Ltd.; Liaoning Foreign Trade General Co.; Liaoning Jinding Magnesite Group; Dalian Golden Sun Import & Export Co.; **[**4]** Haicheng Pailou Magnesite Ore Co. Ltd.; and Yingkou Huachen Co. Ltd. See Docket Entry No. 1.

On October 17, 2005, an order extending Minmetals' time to file a responsive pleading was issued by Judge Harold A. Ackerman; that time was re-extended by Judge Ackerman on November 7, 2005, and then re-extended once again by Magistrate Judge Mark Falk on December 15, 2005. See Docket Entries Nos. 3, 5 and 6. No responsive pleading followed and, on May 4, 2007, Magistrate Judge Esther Salas (to whom the case was reassigned from Judge Falk) issued another order granting Minmetals two extensions to file such a pleading. [1] See Docket Entries Nos. 18 and 25. On December 14, 2007, Minmetals filed Defendant's Motion. See Docket Entry No. 27. Plaintiffs' filed their opposition on January 14, 2008, see Docket Entry No. 33, and Minmetals filed their reply on February 12, 2008. See Docket Entry No. 38.

Meanwhile, during 2007, Plaintiffs filed numerous motions for entries of default, see, e.g., Docket Entries Nos. 16, 19 (hence, causing the Clerk to enter corresponding defaults); **[**5]** Plaintiffs followed those applications by filing Plaintiffs' Motion on December 14, 2007. See Docket Entry No. 28. On February 5, 2008, certain Defendants filed

[1] The chain of time extensions was based on the parties' dispute as to the validity of Plaintiff's international service of process.

their opposition to Plaintiffs' Motion, see Docket Entries Nos. 36 (supplemented by Docket Entry No. 41), together with Defendants motion to **[*848]** compel arbitration. [2] See Docket Entry No. 37. On February 25, 2008, Plaintiffs filed their reply to Defendants' opposition. See Docket Entry No. 42. Defendants' sur-reply was filed on March 6, 2008. See Docket Entry No. 48 (supplemented by Docket Entry No. 50). Since then, extensive briefing of the arbitration issue has taken place.

On September 15, 2008, the matter was reassigned to the undersigned. On October 6, 2008, this Court held oral arguments as to the pending motions.

II. MOTION FOR DEFAULT JUDGMENT

HN1[] Default is governed by *Federal Rule of Civil Procedure 55*. **[**6]** See *Fed. R. Civ. P. 55*. "Pursuant to *Rule 55(a)*, a plaintiff can request the clerk's entry of default against a party 'against whom a judgment for affirmative relief is sought that has failed to plead or otherwise defend [and] that fact is made to appear by affidavit or otherwise.'" *Doug Brady, Inc. v. N.J. Bldg. Laborers Statewide Funds, 250 F.R.D. 171, 2008 U.S. Dist. LEXIS 28324, at *18-19 (D.N.J. April 7, 2008)*, (quoting *Fed. R. Civ. P. 55(a)*). "Thereafter, the plaintiff may seek the Court's entry of default judgment under either *Rule 55(b)*." *Doug Brady, 250 F.R.D. 171, 2008 U.S. Dist. LEXIS 28324 at *19* (citing *Nationwide Mutual Ins. Co. v. Starlight Ballroom Dance Club, Inc., 175 Fed. App'x 519, 521, n.1 (3d. Cir. 2006)*. "The district court has the discretion to enter default judgment, although entry of default judgments is disfavored as decisions on the merits are preferred." *Super 8 Motels, Inc. v. Kumar, No. 06-5231, 2008 U.S. Dist. LEXIS 28066, at *7 (D.N.J. April 1, 2008)* (citing *Hritz v. Woma Corp., 732 F.2d 1178, 1181 (3d Cir.1984))*. In other words, district courts must remain mindful that, like dismissal with prejudice, default is a sanction of last resort, see *Poulis v. State Farm Fire & Cas. Co., 747 F.2d 863, 867-68 (3d Cir. 1984)* **[**7]** ("We reiterate what we have said on numerous occasions: that dismissals with prejudice or defaults are drastic sanctions"), and district courts must resolve all doubt in favor of proceeding on the merits. See *Zawadski de Bueno v. Bueno Castro, 822 F.2d 416, 420 (3d Cir. 1987)*.

Moreover, ***HN2***[] "before imposing the extreme sanction of default, district courts must make explicit factual findings as to: (1) whether the party subject to default has a meritorious defense, (2) the prejudice suffered by the party seeking default, and (3) the culpability of the party subject to default." *Doug Brady, 250 F.R.D. 171, 2008 U.S. Dist. LEXIS 28324, at *19* (quoting *Emcasco Ins. Co. v. Sambrick, 834 F.2d 71, 74 (3d Cir. 1987)*, stating "[W]e have further required the district court to make explicit findings concerning the factors it must consider in rendering judgment by default or dismissal, or in declining to reopen such judgment"). Hence, a litigant's failure to state a claim upon which relief may be granted, e.g., an assertion of a claim over which the court lacks jurisdiction, prevents the presiding court from entering a default judgment, see *Comcast Cable Communs. v. Dorris, 2005 U.S. Dist. LEXIS 23156, at *5-6 (D.N.J. Feb. 8, 2005)*; **[**8]** *Abney v. Alameida, 334 F. Supp. 2d 1221 (S.D. Cal. 2004)*; see also *Quirindongo Pacheco v. Rolon Morales, 953 F.2d 15 (1st Cir. 1992)*; *Au Bon Pain Corp. v. Artect, Inc., 653 F.2d 61, 65 (2d Cir. 1981)*; *Danning v. Lavine, 572 F.2d 1386, 1388* ***[*849]*** *(9th Cir. 1978)*; *Kelley v. Carr, 567 F. Supp. 831, 840 (W.D. Mich. 1983)*; Charles Alan Wright, Arthur R. Miller & Mary Kay Kane, Federal Practice and Procedure § 2688 at 447-48 (1983), since, under *Rule 55(b)(2)*, the litigant is not entitled to a default judgment unless (s)he establishes that the essential elements of the pleaded claims are present and states factual allegations in support of these elements. [3] See Comdyne I v. Corbin, 908 F.2d 1142, 1149 (3d Cir. 1990); *Fehlhaber v. Indian Trails, Inc., 425 F.2d 715, 717 (3d Cir. 1970)*; *D.B. v. Bloom, 896 F. Supp. 166, 170 n. 3 (D.N.J. 1995)*.

---

[2] As of the date of entry of the Order accompanying this Opinion, Defendants Xiyang Group, Xiyang Import & Export Ltd. Co., Xiyang Refractory Materials Ltd. Co., Xiyang Fireproof Material Co. Ltd., Liaoning Foreign Trade General Co., Liaoning Jinding Magnesite Group, Dalian Golden Sun Import & Export Co. did not make appearances in this matter.

[3] In addition, ***HN3***[] entry of a default judgment is an inappropriate use of judicial discretion where there has been insufficient service. See *First American Bank, N.A. v. United Equity Corp., 89 F.R.D 81 (D.D.C. 1981)*; see also *Dahl v. Kanawha Inv. Holding Co., 161 F.R.D. 673, 685 (N.D. Iowa 1995)* (where it appears that plaintiffs "have never properly served the defendants, **[**9]** … neither entry of default nor entry of default judgment would be proper"). Thus, if there is a challenge to the adequacy of

Finally, ***HN4***[] if default is entered against some defendants in a multi-defendant case, the preferred practice is for the court to withhold granting default judgment until the action is resolved on its merits against non-defaulting defendants: if plaintiff loses on merits, the complaint should then be dismissed against both defaulting and non-defaulting defendants. See *Jefferson v. Briner, Inc., 461 F. Supp. 2d 430 (E.D. Va. 2006)* (relying on *Frow v. De La Vega, 82 U.S. 552, 21 L. Ed. 60 (1872))*; see also *Northland Ins. Co. v. Cailu Title Corp., 204 F.R.D. 327 (W.D. Mich. 2000)*; *Exquisite Form Industries, Inc. v. Exquisite Fabrics of London, 378 F. Supp. 403 (S.D.N.Y. 1974)*; accord *Thabault v. Chait, 541 F.3d 512, 531 (3d Cir. 2008)*.

It appears that the matter at hand presents this Court with the entire panoply of obstacles to default **[**10]** judgment, since it is a multi-defendant case where some Defendants defaulted but others did not, the validity of service of process is challenged by all Defendants, the sufficiency of Plaintiff's pleading is challenged by one of them, and the complaint is yet to pass muster for the purposes of this Court's sua sponte dismissal power. This Court, therefore, while taking due notice of Defendants' service-related challenges and the prudential considerations pertinent to the entry of default judgment against selected defendants in a multi-defendant suit, finds it prudent and in the interests of judicial economy (as well as in the interests of litigants, granted the current procedural posture of this matter) to limit this Court's review to the issues of subject matter jurisdiction and sufficiency of Plaintiffs' pleading: it is indeed axiomatic that, ***HN5***[] prior to entering default judgment, the Court must ensure that its has proper jurisdiction over the action, just as the Court must determine that Plaintiffs, at the very least, sufficiently stated their claim. See *Quirindongo Pacheco, 953 F.2d 15*; *Au Bon Pain Corp., 653 F.2d 61*; *Danning, 572 F.2d 1386*; *Atlantic Recording Corp. v. Brennan, 534 F. Supp. 2d 278 (D. Conn. 2008)*; **[**11]** *Calderon v. Burton, 457 F. Supp. 2d 480 (S.D.N.Y. 2006)*; *Comcast Cable Communs., 2005 U.S. Dist. LEXIS 23156*; *Abney, 334 F. Supp. 2d 1221*; *Patray v. Northwest Publ., 931 F. Supp. 865 (S.D. Ga. 1996)*; *Kelley, 567 F. Supp. 831*; see also 10 Charles Alan Wright, Arthur R. Miller & Mary Kay Kane, Federal Practice and Procedure § 2688 at 447-48 (1983).

[*850] III. CHALLENGES TO SUBJECT MATTER JURISDICTION

HN6[] The failure of a party to address the issue of subject matter jurisdiction neither waives nor disposes of the issue. [4] See *Three Keys Ltd. v. SR Util. Holding Co., 540 F.3d 220, 226 (3d Cir. 2008)* (citing *Bracken v. Matgouranis, 296 F.3d 160, 162 (3d Cir. 2002)* ("[The] Court has a continuing obligation to sua sponte raise the issue of subject matter jurisdiction if it is in question"); *Morel v. INS, 144 F.3d 248, 251 n.3 (3d Cir. 1998)* (quoting *Ins. Corp. of Ireland, Ltd. v. Compagnie des Bauxites de Guinee, 456 U.S. 694, 702, 102 S. Ct. 2099, 72 L. Ed. 2d 492 (1982)*, as to the observation that "[a] federal court . . . will raise lack of subject-matter jurisdiction on its own motion.")

HN8[] Deficiencies as to the "subject matter jurisdiction may be either 'facial' or 'factual.'" *Turicentro, S.A. v. Am. Airlines, Inc., 303 F.3d 293, 300, n. 4 (2002)*. Assessing a factual deficiency, the court: (1) "must weigh the evidence relating to jurisdiction, with discretion to allow affidavits, documents, and even limited evidentiary hearings," id. (citing *Garcia v. Copenhaver, Bell & Assocs., 104 F.3d 1256, 1260-61 (11th Cir. 1997)*; *Ohio Nat'l Life Ins. Co. v. United States, 922 F.2d 320, 325 (6th Cir. 1990)*; *Oaxaca v. Roscoe, 641 F.2d 386, 391 (5th Cir. 1981))*;

---

service, the party who seeks default judgment and, allegedly, served the complaint bears the burden of establishing its validity when a challenge to its effectiveness is made." *Adams v. American Bar Association, 400 F. Supp. 219, 222 (E.D. Pa. 1975)*.

[4] ***HN7***[] Federal courts are courts of limited jurisdiction. Thus, a federal court shall presume lack of jurisdiction, and the party seeking to invoke the court's **[**12]** jurisdiction bears the burden of proving that subject matter jurisdiction exists. See *Kokkonen v. Guardian Life Ins. Co., 511 U.S. 375, 377, 114 S. Ct. 1673, 128 L. Ed. 2d 391 (1994)*. While the court is obligated to test subject matter jurisdiction sua sponte, *Rule 12(b)(1)* also authorizes a party to move to dismiss a claim for lack of subject matter jurisdiction. See *Fed. R. Civ. P. 12(b)(1)*. A party challenging the court's jurisdiction under *Rule 12(b)(1)* may do so by raising either a facial attack or a factual attack. In contrast, a motion to dismiss pursuant to *Federal Rule of Civil Procedure 12(b)(6)* tests only the legal sufficiency of a claim.

and (2) "can **[**13]** look beyond the pleadings to decide factual matters relating to jurisdiction." [5] Id. (quoting *Cestonaro v. United States, 211 F.3d 749, 752 (3d Cir. 2000))*.

HN10[] In contrast, "[f]acial attacks contest the sufficiency of the pleadings, and the trial court must accept the complaint's allegations as true." Id. However, last year the Supreme Court elaborated on the requirements a pleading must meet to withstand a facial attack. See *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. In Twombly, the Court explained that the pleading must provide "enough **[**14]** factual matter" to suggest that the alleged event took place. See *id. at 1965*. While the Supreme Court left it to the district courts to determine, on a case-by-case basis, how much factual matter is "enough," the Court unambiguously indicated that represented litigants cannot satisfy the pleading requirements by invoking the overly lenient regime of "pure notice" originated in *Conley v. Gibson, 355 U.S. 41, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957)*, a case decided half a century ago. In fact, the Twombly Court explicitly disavowed **[*851]** the oft-quoted statement in Conley of "the accepted rule that a complaint should not be dismissed for failure to state a claim unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief" stating that the "no set of facts" language "has earned retirement" and "is best forgotten." *Twombly, 127 S. Ct. at 1968-69* (quoting *Conley, 355 U.S. at 45-46*).

Moreover, the Court, using a variety of phrases, indicated that more than an oblivious notice of a claim is needed to allege a violation. For example, the Court required "enough facts to raise a reasonable expectation that discovery will reveal evidence of [the alleged claim]," **[**15]** "facts that are suggestive enough to render [plaintiff's allegations] plausible," "allegations plausibly suggesting (not merely consistent with) [plaintiff's allegations]," a "plain statement" with "enough heft" to show entitlement to relief, and "enough facts to state a claim to relief that is plausible on its face." *Id. at 1969-74*. Finally, the Court refused to entertain a plaintiff's far-fetched flights of fancy by unambiguously stating that the line "between the factually neutral and the factually suggestive . . . must be crossed [by allegations made in plaintiff's pleadings] to enter the realm of plausible liability," *id. at 1966 n.5*, and stated that no "reassurances of plaintiff's' counsel" that discovery would soon flesh out plaintiff's claim, which is currently pled so that it is "just shy of a plausible entitlement," can prevent facial dismissal. *Id. at 1967* and n.6 (referring to *id. at 1975* (Stevens, J., dissenting)). Thus, the ***HN11***[] plaintiff's complaint will survive facial dismissal only if it contains "enough [factual] heft" establishing the plaintiff's claims rather than plaintiff's conjecture, or self-serving interpretations of actual events, or mere "labels and conclusions, **[**16]** and a formulaic recitation of the elements of a cause of action." *Twombly, 127 S. Ct. at 1965-69*; accord *Dura Pharms., Inc. v. Broudo, 544 U.S. 336, 125 S. Ct. 1627, 161 L. Ed. 2d 577 (2005)*; *Phillips v. County of Allegheny, 515 F.3d 224, 231-33 (3d Cir. 2008)*.

IV. PLAINTIFFS' ALLEGATIONS

A. Assertions as to Trade and Commerce

Substantively, the Complaint opens with a section titled "Trade and Commerce." See Compl. PP 37-44. The section provides no citations to Plaintiffs' sources and reads as follows:

> Magnesium is the eighth most abundant element on earth and constitutes about two percent of the earth's crust. Magnesite is the naturally occurring carbonate form of magnesium . . . . China is estimated to have 80 percent of global magnesium reserves. Magnesite is mined from magnesium deposits and delivered from the mine to a crushing plant where it is crushed in three stages. Depending on the grade of the crushed material, the crushed magnesite . . . produce[s] different forms of magnesite. There are three principal forms of

---

[5] ***HN9***[] The Court of Appeals for the Third Circuit clarified that, "in the Sherman Act context, jurisdictional facts are often closely intertwined with the merits of the claim," *Carpet Group Int'l v. Oriental Rug Importers Ass'n, 227 F.3d 62, 73 (3d Cir. 2000)* (citing *Mortensen v. First Fed. Sav. & Loan Ass'n, 549 F.2d 884, 892 (3d Cir. 1977))*, hence, requiring the party invoking the court's jurisdiction to produce sufficient evidential proof. Defining the sufficiency of such proof, the Court of Appeals observed that "it is incumbent upon the trial judge to demand less in the way of jurisdictional proof than would be appropriate at a trial stage." Id.

> magnesite sold in U.S. commerce. Dead-burned magnesite ("DBM") is produced by high temperature conversion of magnesite. DBM is used for the lining of metallurgical or refractory furnaces, used for the **[**17]** melting of steel, nonferrous metal and glass and the making of cement. Approximately 70 percent of the world's production of magnesite [results in] DBM. Caustic-calcined magnesite ("CCM") is produced by low temperature conversion. Approximately 22 percent of the world's production of magnesite [results in] CCM. [The] third type of magnesite [is] electro-fused magnesite ("EFM"), [and it] is produced by fusing CCM at high temperatures in an **[*852]** electric arc furnace. . . . Approximately 8 percent of the world's production of magnesite [results in] EFM. China accounts for 80 percent of worldwide EFM production. During the period described in this Complaint, [that is, from April 2000 to at least the date of Plaintiffs' filing of the Complaint, September 7, 2005 ("Relevant Period"),] the international market for magnesite and magnesite products was dominated by [D]efendants . . . . Defendant producers have lower costs than their western competitors and[,] as a result[,] also dominate the group of manufacturers worldwide who can produce magnesite and magnesite products at costs below other producers. Exporters from China also enjoy a competitive advantage relative to manufacturers in other nations **[**18]** because China has employed a fixed currency exchange rate which undervalues the Yuan, making Chinese exports of magnesite and magnesite products to the United States relatively less expensive compared to exports of magnesite and magnesite products from other nations. During the period of this Complaint, the conduct of defendants and their coconspirators has taken place in and affected the interstate and foreign trade and commerce of the United States. Over 650,000 metric tons of magnesite are imported into the United States each year and over sixty percent of that is imported from China. U.S. Import of magnesite and magnesite products from China [during an unspecified period of time] exceed[s or exceeded] $ 50 million per year.

Id.

B. Anticompetitive Conduct

The next section of the Complaint, titled "Factual Background," aims to state Plaintiffs' facts as to Defendants' alleged cartel-like activities. See PP 45-55. Plaintiffs' sources as to these alleged facts are similarly not provided to the Court.

According to the Complaint: (a) in April of 2000, "thirteen producers and exporters of magnesite in China [unidentified in the Complaint] established a cartel called the 'Jiayuan Magnesite **[**19]** Export Group' for the export of magnesite, and reached agreement of fixing unified export prices to avoid competitive price cutting"; (b) "[d]uring the same [time,] a second cartel [was] formed[,] called 'Huaxia Magnesia Products Export Group'"; and (c) these "two cartel[s] . . . represent more than 70 percent of the export volume of magnesite in China." Id. P 45.

According to the Complaint, "[a]s a result of these cartel agreements, despite slumping demand [in markets unidentified in the Complaint, i.e., either world-wide or in any region of the world], the price of magnesite and magnesite products increased [in geographic consumption markets also unidentified in the Complaint] during 2000 by over 45 percent compared to 1999. The president of the Jiayuan Magnesite Export Group reported by mid-2001 that [his/her] cartel's efforts had been successful and would generate an additional 50 million U.S. dollars [presumably, for his/her cartel]." Id. P 46. The Complaint further asserts that

> [the two cartels joined into] a single cartel under the name of the "Chinese Magnesite Export Association" [("CMA"), which grew to encompass] 23 exporting companies, including [those out of the seventeen **[**20]** named Defendants that were Chinese exporting companies]. Since April 2000, the [CMA] has conducted [an unspecified number of] cartel meetings of [D]efendants and other exporters. On March 22, 2003, at least 19 exporting companies, including [unspecified entities among D]efendants, met in Shenyang, China [and] agreed to **[*853]** strengthen . . . cooperation to reduce competition in exports of magnesite. The [CMA]

> agreed to establish itself under the name the "China Magnesite Forum" [6] and established goals of restraining competition and establishing limits on export supply in order to maintain and increase prices. . . . After achieving [unspecified] price increases, the cartel has successfully stabilized the prices of magnesite and magnesite products in the United States and avoided major price cutting despite [unspecified] low levels of demand [in unspecified geographic consumption markets]. During the period of the charged combination and conspiracy, [D]efendants . . . have participated in [unspecified] meetings . . . in China and elsewhere in which the prices, volume of sales, and markets for magnesite and magnesite products were . . . agreed upon. Together, [D]efendants and their co-conspirators **[**21]** dominate the production and sale of magnesite in the world and the United States. . . . Although non-cartel members represent 30 to 40 percent of the U.S. market, the cartel has been successful because [unspecified] other producers have higher costs for magnesite and magnesite products [and] currency costs [and] cannot compete [against Defendants]. Further[more, these other producers] have shown that they would follow price increases rather than undercut the [CMA's] price levels. . . . [T]he collusive arrangements [adopted among Defendants keeps resulting in] prices [that Plaintiffs believe to be] above those of a competitive market. . . . [P]rices of magnesite in the animal feed industry [have] risen an overall 25 percent.

Id. PP 47-54.

C. Additional Elaborations

Finally, Plaintiffs assert that:

> Plaintiffs did not discover and could not discover, through the exercise of reasonable diligence, the existence of the claims sued upon [until an unspecified date/event] because [D]efendants . . . actively, intentionally, and fraudulently concealed **[**22]** the existence of the combination and conspiracy from Plaintiffs . . . through at least the time four years prior to the filing [by]
> (a) Meetings which were kept secret from U.S. customers in which the prices, sales volumes, and markets for magnesite and magnesite products were discussed and agreed;
> (b) Intentionally setting prices purportedly on a competitive basis when such prices were the result of collusion;
> (c) Instructing members of the conspiracy at the above-described meetings not to divulge the existence of the conspiracy to others not in the conspiracy;
> (d) Treating cartel agreements and meetings as confidential and proprietary information [and] enforc[ing] adherence to the agreed-upon price and supply agreements.

Id. P 59. [7]

Plaintiffs' conclude their Complaint with allegations that "[t]he price of magnesite and magnesite **[*854]** products purchased by [P]laintiffs (and the [putative] classes) has been fixed [and] maintained [at] non-competitive levels," id. P 60, and seek: (a) injunctive relief preventing Defendants from continuing the alleged combination and conspiracy; (b) monetary relief in the amount of "three-fold their damages;" and (c) legal costs and attorney fees. See id. at 13-14.

---

[6] It is unclear, from the face of the Complaint, whether the CMA assumed an "underground" name "China Magnesite Forum" or it was officially so renamed.

[7] The Court is not entirely clear as to the purpose of this elaboration. While it appears plausible that Plaintiffs included these statements in their Complaint to address the issue of statute of limitations (or the common law doctrine of laches), the Complaint is silent as to *when and how* Plaintiffs discovered the alleged conspiracy. See generally, Compl. Similarly, whilst these statements might be construed as Plaintiffs' attempt to elaborate on their allegations **[**23]** that the CMA's unspecified members met during an unspecified number of meetings conducted at unspecified destinations "in China and elsewhere," the excerpt quoted above does not provide any specific information as to these alleged meetings. See Compl. P 59.

V. INDUSTRY-RELATED DATA

The Court's careful reading of the twenty-one page Complaint yielded a total of eleven allegations providing the Court with statistical or statistics-related data. Three of these statistical allegations do not bear on the subject of the Complaint since they relate to the global tendencies in magnesite production processes, i.e.: (a) "70 percent of the world's production of magnesite [results in] DBM"; (b) "22 percent of the world's production of magnesite **[**24]** [results in] CCM"; and (c) "8 percent of the world's production of magnesite [results in] EFM." Compl. at 8. The remaining eight allegations relate to China's position in -- and export of-- magnesite and to Defendants' alleged cartel activities: (a) "China is estimated to have 80 percent of global magnesite reserves"; (b) "China accounts for 80 percent of worldwide EFM production"; (c) "Over 650,000 metric tons of magnesite are imported into the United States each year and over sixty percent of that is imported from China"; (d) "U.S. import of . . . magnesite products from China exceeds $ 50 million per year"; (e) "[T]he price of . . . magnesite products increased during 2000 by over 45 percent compared to 1999"; (f) "The president of the Jiayuan Magnesite Export Group reported . . . that the cartel's efforts . . . would generate an additional 50 million U.S. dollars"; (g) "[N]on-cartel members represent 30 to 40 percent of the U.S. market"; and (h) "[P]rices of magnesite in the animal feed industry [had] risen an overall 25 percent." See id. at 8-12.

All above-quoted statistical data are presented by Plaintiffs without any reference to the sources of Plaintiffs' information. While **[**25]** the Court, on its own, is aware of certain sources that contain figures (or even allegations) quite similar to those of Plaintiffs, see, e.g., Magnesium, Magnesite and Dolomite, A Strategic Global Business Report (Global Indus. Analysists, Inc. Mar. 2008), license purchase available at <<http://www.reportlinker.com/p087368/World-Magnesium-Magnesite-and-Dolomite-M>> ("Strategic Report"), such sources cannot serve as a basis for legal claim. For instance, the Strategic Report, a 425-page compilation, cannot operate as a factual basis for litigation since: (a) just as the Complaint, it fails to state its sources, hence allowing for presumption that the statements made therein are merely the authors' reading of the mix of industry rumors and verifiable facts; [8] and (b) it contains facially self-contradicting data. [9]

---

[8] The Strategic Report merely informs the reader that "[a] combination of primary and secondary research has been used for all findings. The usage of obtained information is based on the perceived reliability of the source by the researcher. In many cases, a combination of such sources was used." Strategic Report at I-1

[9] The Strategic Report provides conclusions virtually identical **[**26]** to those made in the Complaint, PP 37, 45-48:

> Magnesium Product Producers and Marketing Enterprises established Huaxia Magnesium Products Export Group in China. . . . This Group was formed to counter the problems of intense competition and low export prices. . . . Magnesite producing companies established [another] magnesite export group, in order to reach unified selling prices. The setting up of this group with 13 companies result[ed] in additional revenues of US$ 50 million per annum. . . . The group members agreed upon unifying prices and curb underselling practices thus enhancing magnesite revenues by US$ 50 million every year. . . . The China Magnesite Export Association was formed in February 2001 from two other groups, which were set up in 2000. . . . The primary goals of [this new association was] stabilizing export prices of magnesite. . . .

Strategic Report, at 11-106; III-123. And, just as Plaintiffs, the Strategic Report asserts that China is estimated to have 80 percent of global magnesite reserves, see Strategic Report, at II-109; III-123 ("China is home to about 80% of the global magnesite reserves. . . . About 80% of world's total magnesite resources are found in China"). **[**27]** However, these observations notwithstanding, the very same Strategic Report opens with the following statement:

> China, the world's leading supplier of magnesite, *boasts around 27% of the global magnesite resources.* Other leading producers of magnesite include Russia, North Korea and Slovakia. Together, *these four countries account for nearly 83% of the overall global magnesite resources.*

Strategic Report, at II-5 (emphasis supplied). It appears self-evident that ***HN12***[] a litigant's claims cannot be based on a source containing unverifiable and, in addition, mutually exclusive data. See, e.g., *Ohio Midland, Inc. v. Proctor, 2006 U.S. Dist. LEXIS 85888, at *15 (S.D. Ohio Nov. 28, 2006)* (plaintiff's allegations cannot be based on mutually exclusive facts); accord *Twombly, 127 S. Ct. at 1965-69* (the complaint will survive only if it contains enough factual heft rather than conjecture); *Kumho*

The foregoing, however, in no way suggests that a litigant cannot **[**28]** rely, for the **[*855]** facts asserted in the litigant's pleadings, on a source containing statistical information bearing an imprimatur of reliability; and a litigant mounting a challenge related to international trade in magnesite is not in danger of facing paucity of sources. See, e.g., U.S. Geological Survey, Magnesium Compounds (U.S. Dept. of Interior), at <<*http://minerals.usgs.gov/minerals/pubs/* commodity/magnesium/index.html#mcs>> ("Government Surveys"). [10] The Government Surveys provide data relevant to Plaintiffs' statistical allegations as to China's magnesite resources and export practices. For instance, contrary to Plaintiff's assertion that "China is estimated to have 80 percent of global magnesite reserves," the Government Surveys provide statistical data indicating that, out of the total of 3,600,000,000 tons of world magnesite reserves, China holds 860,000,000 tons (i.e., 23.8%), being closely followed by North Korea (750,000,000) and Russia (730,000,000). See <<*http://minerals.usgs.gov/minerals/pubs/* commodity/magnesium/mgcommcs04.pdf>>. Furthermore, relevant to Plaintiffs' other statistical statements, the Government Surveys indicate that:

(1) with respect to the United States' **[**29]** importation of magnesite products (i.e., CCM, DBM and EFM, that is, the products subject to the Complaint, collectively, hereinafter, "Processed Magnesite"), China accounted, during the Relevant Period, for:

(a) 67% to 76% of total importation (67% in 1999; 68% in 2000; 73% in **[*856]** 2001; 69% in 2002; 76% in 2003 and 2004; and 77% in 2005);
(b) import quantity ranging from 493,000 metric tons to 637,000 metric tons (515,000 in 1999; 637,000 in 2000; 493,000 in 2001; 542,000 in 2002; 529,000 in 2003; 575,000 in 2004; and 630,000 in 2005);
(c) gross profit per annum ranging from US$ 42,550,000 to US$ 90,290,000 (42.55M in 1999; 43.35M in 2000; 45.63M in 2001; 50.42M in 2002; 59.35M in 2003; 82.3M in 2004; and 90.29M in 2005) and, thus, prices ranging from $ 68 per metric ton to $ 143 per metric ton ($ 82 in 1999; $ 68 in 2000; $ 92 in 2001; $ 93 in 2002; $ 112 in 2003; and $ 143 in 2004 and 2005); [11] and

(2) Chinese annual "total production" of magnesite ranged, during the Relevant Period, from 2,400,00 metric tons to 4,700,000 metric tons (2,400,000 in 1999; 2,450,000 in 2000; 3,580,000 in 2001; 4,560,000 in 2002; 4,600,000 in 2003; 4,650,000 in 2004; and 4,700,000 in 2005), i.e., the amount **[**30]** of Processed Magnesite exported by China to the United States varied from 11% to 26% of the total Chinese magnesite produced (21% in 1999; 26% in 2000; 13% in 2001; 11% in 2002 and 2003; and 12% in 2004 and 2005).

See <<*http://minerals.usgs.gov/minerals/pubs/commodity/magnesium/401499.pdf>>;* <<http:// minerals.usgs.gov/minerals/pubs/commodity/magnesium/401400.pdf>>; <<*http://minerals.usgs*. gov/minerals/pubs/commodity/magnesium/mgcmyb2001.pdf>>; <<*http://minerals.usgs.gov*/ minerals/pubs/commodity/magnesium/mgcomyb02r.pdf>>; <<*http://minerals.usgs.gov/minerals*/ pubs/commodity/magnesium/mgcommyb03.pdf>>; <<*http://minerals.usgs.gov/minerals/pubs/* commodity/magnesium/mgcommyb04.pdf>>; and <<*http://minerals.usgs.gov/minerals/pubs/* commodity/magnesium/mgcommyb05.pdf>> (collectively, "Government Surveys - Citations"). [12]

Tire Co. v. Carmichael, 526 U.S. 137, 147, 119 S. Ct. 1167, 143 L. Ed. 2d 238 (1999) (clarifying that judicial gatekeeping obligations apply to all technical testimony and providing a checklist of factors the courts should use in assessing the reliability of technical evidence).

[10] For the purposes of final disposition, either on merits or on procedural grounds, a federal court may take judicial notice of facts "capable of accurate and ready determination by resort to sources whose accuracy cannot reasonably be questioned." See *Fed. R. Evid. 201(b)*. However, at the instant juncture, the Court finds it premature to discuss whether judicial notice shall **[**31]** be taken of any Government Survey.

[11] The Court's discussion does not detail the shifts in production from the cheaper CCM to the more expensive DBM and EFM, although these shifts affected the average price per ton.

[12] It appears self-evident that the data contained in the Government Surveys contradicts many of Plaintiffs' allegations. For example, while China accounted for up to 77% of Processed Magnesite exportation into the United States, such importation did not reach 650,000 metric tons even by the end of the Relevant Period: rather, it ranged from 493,000 metric tons to 637,000.

The Government Surveys also provide information detailing shifts in the United States importation of Processed Magnesite during the Relevant Period, e.g.: (a) "[In 2000,] U.S. production of [DBM] dropped by about 9% from that in 1999, mostly because of the closure of National Refractories and Minerals Corp.'s Moss Landing, CA [('NRMC')]. U.S. imports of [DBM] in 2000 increased by 28% from those in 1999. . . . [T]he *reasons for the significant increase in imports was to replace . . . the domestically produced material . . . lost* **[*857]** when [NRMC] closed"; (b) "[In 2001, a] *general economic downturn led to decreasing demand* for [CCM], *and as a result, production and imports declined* by 20% . . . from the 2000 levels. U.S. imports of [DBM] in 2001 declined significantly, with the imports from China, the main source country, declining by more than 100,000 metric tons"; (c) "[In 2002,] imports of [CCM] and [DBM] rose in 2002. U.S. imports of [DBM] in 2002 were about 9% higher than those in 2001 . . . . Imports of [CCM] were **[**33]** 14% higher than those in 2001"; (d) "[In 2003,] imports of [DBM] fell by about 4% from those in 2002 . . . . Imports of [CCM] . . . were slightly higher than those in 2002"; (e) "[In 2004,] imports of [DBM] increased by about 10% from those in 2003 . . . . Imports of [CCM] were about 5% higher than those in 2003"; (f) "[In 2005,] imports of [DBM] increased by about 14% . . . . Imports of [CCM] were about 3% less than those in 2004." See id. (emphasis supplied). The Court, therefore, examines the content of Plaintiffs' Complaint in light of availability of precise statistical and factual data with respect to the United States importation and Chinese exportation of Processed Magnesite.

VI. PERTINENT LEGAL REGIME

A. The Sherman Act

Plaintiffs assert that Defendants violated *Section 1* of the Sherman Act. [13] See Compl. P 1. ***HN13***[] The Sherman Act prohibits "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations." [14] *15 U.S.C. § 1*. "To establish a violation of *Section 1*, a plaintiff must prove: (1) concerted action by the defendants; (2) that produced anti-competitive effects within the relevant **[**34]** product and geographic markets; (3) that the concerted action [was] illegal; and (4) that [the plaintiff] was injured as a proximate result of the concerted action." *Gordon v. Lewistown Hosp., 423 F.3d 184, 207 (3d Cir. 2005)* (citations omitted), cert. denied, *547 U.S. 1092, 126 S. Ct. 1777, 164 L. Ed. 2d 557 (2006)*. A related statute, the Clayton Act, provides a litigant with the right of private action to vindicate violations of the Sherman Act. Accord Compl. P 3 (asserting that Plaintiffs bring the instant action pursuant to the Clayton Act, *15 U.S.C. §§ 4* and *16*).

1. "Per Se" and "Rule of Reason" Analyses

Similarly, while Chinese annual gross profit from Processed Magnesite ranged from US$ 42,550,000 to US$ 90,290,000, the prices did not "increase during 2000 by over 45 percent compared to 1999," as Plaintiffs assert: rather, the prices *decreased* by 11%, falling from $ 82 per ton in 1999 to $ 68 per ton in 2000. Analogously, contrary to Plaintiffs' assertion that "[t]he president of [one of the alleged original, i.e., smaller cartels] reported that the cartel's efforts . . . generate[d] an additional 50 million U.S. dollars [presumably, for the cartel, per annum]" the Government Surveys indicate that the *entire* ***[**32]*** *Chinese exportation* of Processed Magnesite over *all six years of the Relevant Period* grew from US$ 42,550,000 to US$ 90,290,000, that is, less than 50 million U.S. dollars.

[13] Turning to the venue of the instant action, Plaintiffs assert that the matter is properly before this Court, because Plaintiffs, that is, Animal Science, a Texas corporation, and Resco, a Pennsylvania corporation, are suing seventeen Defendants, one of which, that is, Minmetal, is a New Jersey corporation (with the remaining sixteen Defendants being Chinese entities). See Compl. PP 5-7.>

[14] The "commerce with foreign nations" component of the statute is no more self-explanatory than its domestic counterpart. Just as the federal courts developed, over the time, a body of federal case law interpreting the Sherman Act for the purposes of domestic antitrust **[**35]** cases, see *State Oil Co. v. Khan, 522 U.S. 3, 20-21, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)*; Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** P 103 (2d ed. 2000) (federal courts have been invested "with a jurisdiction to create and develop an '***antitrust law***' in the manner of the common law courts"), the courts also developed common-law-like tests for determining when the Act applies to foreign conduct. See Part V(B) of this Opinion for discussion of the "foreign conduct" antitrust regime.

HN14[] To determine whether a particular action unreasonably restrains trade, courts apply either the "per se" analysis or the "rule of reason." Under the per se rule, certain types of restraints are presumed to be unreasonable, hence enabling the court to avoid an elaborate economic **[*858]** effect inquiry. See, e.g., *Bus. Elecs. Corp. v. Sharp Elecs. Corp., 485 U.S. 717, 723, 108 S. Ct. 1515, 99 L. Ed. 2d 808 (1988)* ("per se rules are appropriate only for 'conduct that is manifestly anticompetitive'") (quoting *Continental T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 50, 97 S. Ct. 2549, 53 L. Ed. 2d 568, (1977))*. If a restraint is per se illegal, further examination of the practice's impact on the market is unnecessary for finding that it produced adverse, anticompetitive **[**36]** effects within relevant product and geographic markets. See *Pace Elecs., Inc. v. Canon Computer Sys., Inc., 213 F.3d 118, 123 (3d Cir. 2000)* ("[the per se] standard, which is based on considerations of 'business certainty and litigation efficiency,' allows a court to presume that certain limited classes of conduct have an anticompetitive effect without engaging in the type of involved, market-specific analysis ordinarily necessary to reach such a conclusion"). Per se liability is reserved for only those agreements that are "so plainly anticompetitive that no elaborate study of the industry is needed to establish their illegality." *Texaco Inc. v. Dagher, 547 U.S. 1, 5, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006)*. Examples of agreements which implicate the per se rule include horizontal price-fixing arrangements, market allocation, group boycotts and some "tying" arrangements. See, e.g., *Socony-Vacuum Oil Co., 310 U.S. at 223* (declaring per se illegal any agreement "formed for the purpose and with the effect of raising, depressing, fixing, pegging, or stabilizing the price of a commodity in interstate or foreign commerce"); *Todd v. Exxon Corp., 275 F.3d 191, 198 (2d Cir. 2001)* (holding that "[t]raditional 'hard-core' price **[**37]** fixing remains per se unlawful"); *United States v. Andreas, 216 F.3d 645, 667 (7th Cir. 2000)* (finding per se illegal a sales volume allocation agreement, an output restriction, that necessarily furthered a practice of price fixing).

In contrast, ***HN15***[] the rule of reason, which is the "prevailing standard," ordinarily requires the court to engage in a detailed analysis of the effect that the restraint had or is having on competition in a relevant market. See *GTE Sylvania Inc., 433 U.S. at 49* (holding that the rule of reason typically requires a detailed examination "in light of the competitive situation in the product market as a whole"); *United States v. Brown Univ., 5 F.3d 658, 672 (3d Cir. 1993)* (holding that the rule of reason "ordinarily requires a detailed inquiry into the market impact of a restraint"). Typical examples of the conduct subject to the rule of reason analysis are agreements to exchange pricing information, certain "tying" arrangements, vertical non-price restraints, customer rebates and discount programs, promotional allowances to dealers and cooperative advertising programs, exclusive distributorships, etc. See *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984)*; **[**38]** *United States v. United States Gypsum Co., 438 U.S. 422, 441 n.16, 98 S. Ct. 2864, 57 L. Ed. 2d 854 (1978)*; *United States v. Citizens & Southern National Bank, 422 U.S. 86, 113, 95 S. Ct. 2099, 45 L. Ed. 2d 41 (1975)*; *United States v. Loew's Inc., 371 U.S. 38, 83 S. Ct. 97, 9 L. Ed. 2d 11 (1962)*; *Northern Pac. Ry. v. United States, 356 U.S. 1, 5-6, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958)*; see also ABA Sec. of Antitrust L., ***Antitrust Law*** Developments 50-78 (5th ed. 2002).

However, ***HN16***[] the issue of whether the court should assess the allegedly illegal conduct under the per se rule or the rule of reason does not depend on the litigants' positions as to which rule should apply, nor does it depend on the labels utilized in the complaint: only the plaintiff's factual assertions allow the court to utilize the curtailed per se analysis. See *Expert Masonry, **[*859]** Inc. v. Boone County, Kentucky, 440 F.3d 336, 344 (6th Cir. 2006)* (To determine if restraints are per se illegal, courts look to the circumstances, details, and logic of a restraint to see whether the experience of the market has been so clear, or necessarily will be, that a confident conclusion about the principal tendency of a restriction may be reached.); see also *GTE Sylvania Inc., 433 U.S. at 58-59* (observing that "departure from the rule-of-reason standard [in ***antitrust*** **[**39]** ***law***] must be based upon demonstrable economic effect rather than . . . upon formalistic line drawing"); see also *Bus. Elec. Corp. v. Sharp Elec. Corp., 485 U.S. 717, 724-726, 108 S. Ct. 1515, 99 L. Ed. 2d 808 (1988)* (reiterating twice the preference for considering substantial economic effect, rather than formalism).

2. Parallel Pricing

HN17[] As a matter of substantive ***antitrust law***, it has long been established that defendants' mere parallel conduct, even if it is consciously parallel, does not violate *Section 1* of the Sherman Act. See, e.g., *Theatre Enters., Inc. v. Paramount Film Distrib. Corp., 346 U.S. 537, 541, 74 S. Ct. 257, 98 L. Ed. 273 (1954)*.

> Indeed, such conduct is commonplace and often efficient. Of course, parallel conduct can result from an agreement between competitors, and such an agreement could violate *Section 1*. But an allegation of agreement under *Section 1* must rest on something more than allegations of parallel conduct, lest commonplace and efficient economic behavior provide a sufficient basis for costly litigation over largely groundless claims. Nor can a mere conclusory allegation of an agreement or conspiracy suffice to convert allegations of parallel conduct into an adequate allegation of a violation of *Section 1*.

Bell Atlantic **[**40]** Corp. v. Twombly, 2005 U.S. LEXIS Briefs 1126, at *9-10 (Brief for the United States, as Amicus Curiae Supporting Petitioners).

Consequently, the Supreme Court held that *HN18*[] mere allegations that defendants engaged in certain parallel conduct unfavorable to competition, absent some factual context suggesting an illegal agreement to that effect, were insufficient to state a claim under *Section 1* of the Sherman Act. See *Twombly, 127 S. Ct. at 1964*. Consequently, to duly assert a violation, allegations of parallel conduct must be placed in a factual context which raises a plausible suggestion of a preceding agreement rather than identical independent action, since a defendant's business activity could be an entirely natural, unilateral reaction of the defendant to the business activities by defendant's competitors. See *Twombly, 127 S. Ct. at 1964* ("Because *§ 1* of the Sherman Act does not prohibit all unreasonable restraints of trade . . . but only restraints effected by a contract, combination, or conspiracy, the crucial question is whether the challenged anticompetitive conduct stems from independent decision or from an agreement, tacit or express").

B. The Foreign Trade Antitrust Improvements [41] Act**

1. Legislative History

Known as "inelegantly phrased," *Carpet Group, 227 F.3d at 69*, the Foreign Trade Antitrust Improvements Act ("FTAIA") is an adjunct of antitrust jurisprudence: the statute rarely appears on the pages of case law and, even when it does so, it is often misconstrued. See *Turicentro, S.A. v. Am. Airlines, Inc., 303 F.3d 293, 299 (2002)* ("Although [the FTAIA was] passed two decades ago, few federal courts have had occasion to apply [it]"); see also Makan Delrahim, Drawing the Boundaries of the Sherman Act: Recent Developments in the **[*860]** Application of the ***Antitrust Law*** to Foreign Conduct, *61 N.Y.U. Ann. Surv. Am. L. 415 (2005)* (surveying the complexities of the statute revealed by FTAIA litigations).

The Supreme Court first addressed the applicability of the Sherman Act to conduct abroad in *American Banana Co. v. United Fruit Co., 213 U.S. 347, 29 S. Ct. 511, 53 L. Ed. 826*, in 1909, a time when the United States was less economically interconnected with much of the world than today. The American Banana Court relied on a tort principle (namely, the conflict-of-laws rule that the legality of an act "must be determined wholly by the law of the country where the act is done") to conclude that wholly foreign **[**42]** conduct in a foreign country did not state a Sherman Act claim. See *id. at 356*. Sherman Act jurisprudence matured, however, and the certainty expressed in American Banana began to dissolve when cases came to the Court involving conduct not wholly foreign and with more obvious effects on United States commerce. See e.g., *United States v. Sisal Sales Corp., 274 U.S. 268, 47 S. Ct. 592, 71 L. Ed. 1042 (1927)* (involving a conspiracy to monopolize Mexican sisal exports and American sisal sales).

By 1945, the modern view crystallized in *United States v. Aluminum Co. of America ("Alcoa"), 148 F.2d 416 (2d Cir.)*, a case that seems contemporary because it involved a foreign company as a participant in a foreign cartel that affected United States prices. The Second Circuit, sitting as court of last resort and speaking through Judge Learned Hand, held that the Sherman Act reached conduct abroad that was intended to affect -- and did in fact have a significant effect on -- United States commerce. See *id. at 444*. Hence, the situs of the effects, as opposed to the conduct, therefore determined whether the court presented with a foreign conduct-based antitrust challenge had the necessary jurisdiction to entertain the challenge **[**43]** under the Sherman Act. [15]

> Legislating on this background, Congress in 1982 enacted [the FTAIA] to clarify the application of United States antitrust laws to foreign conduct [in order to] promote [inter alia,] the "certainty in assessing the applicability of American ***antitrust law*** to international business transactions and proposed transactions."

Turicentro, 303 F.3d at 298-99 (quoting H.R. REP. NO. 97-686 (1982), reprinted in 1982 U.S.C.C.A.N. 2494.3); see also *United Phosphorus, Ltd. v. Angus Chem. Co., 322 F.3d 942, 952 (7th Cir. 2003)* ("If FTAIA sets out an issue on the merits, resolution of the issue could be delayed until late in the case, [hence, creating] an effect on foreign markets . . . while the case remained pending. . . . Treating the matter as one of subject matter jurisdiction reduces the potential for offending the economic policies of other nations. [The] FTAIA limits the power of the United States courts (and private plaintiffs) from nosing about where they do not belong. And the power of the courts is precisely what subject matter jurisdiction is about.").

2. Methodology of the FTAIA Analysis

HN19[] The FTAIA sets forth a general rule that excludes from the scope of the Sherman **[*861]** Act all conduct involving "non-import" foreign commerce unless two conditions are met: (1) the alleged conduct has a "direct, substantial and reasonably foreseeable effect" on United States domestic commerce; and (2) the domestic anti-competitive effect "gives rise to" a claim under the Sherman Act. See *15 U.S.C. § 6a*. Thus, the FTAIA poses the following three-prong inquiry. [16]

HN21[] First, the FTAIA asks whether all defendants were "involve[d in] import trade or import commerce." See *Carpet Group, 227 F.3d at 69, 72*. If all that defendants were doing was *actually* bringing goods or services *into the United States,* then the FTAIA (and the FTAIA's requirement for "direct, substantial and reasonably foreseeable effect") is not even triggered, i.e., the claim squarely falls within the scope of the Sherman Act. See *Turicentro, 303 F.3d at 302* ("[While the FTAIA] does not define the term 'import,' . . . the term generally denotes a product (or perhaps a service) has been brought into the United States from abroad") (citing Webster's Third New Int'l **[**46]** Dictionary (1986); Black's Law Dictionary (6th ed. 1990)). However, if "[d]efendants *did not directly bring items or services into the United States* . . . , they cannot be labeled 'importers,' [nor it could be said that defendants] have they engaged in 'import trade or commerce.'" See id. (emphasis supplied). In other words, even if a certain importer purchased or otherwise obtained the defendants' product in a foreign market (be it the

---

[15] The "effects test" has prevailed consistently since Alcoa, and by 1993 the Supreme Court declared that the law **[**44]** is "well established by now that the Sherman Act applies to foreign conduct that was meant to produce and did in fact produce some substantial effect in the United States." See *Hartford Fire Ins. Co. v. California, 509 U.S. 764, 796, 113 S. Ct. 2891, 125 L. Ed. 2d 612 (1993)*.

[16] *Section 6a of the FTAIA* provides, in relevant part, that:

> ***HN20***[] [The Sherman Act] shall not apply to conduct involving trade or commerce (other than import trade or import commerce) with foreign nations unless-
>
> (1) such conduct has a direct, substantial and reasonably foreseeable effect-
>
> > (A) [on domestic, i.e., interstate] trade or commerce, or on import trade or import commerce with foreign nations . . .
>
> (2) such effect gives rise to a claim under the provisions of *Sections 1 to 7* **[**45]** of [the Sherman Act].

15 U.S.C. § 6a. The Court notes, in passing, that the three-prong inquiry discussed in the instant Opinion reflects solely the aspects of FTAIA pertinent to the case at hand: in light of the complexities of FTAIA, the Court finds it prudent to omit from the discussion an alternative FTAIA scenario not implicated by the case at bar, i.e., that of effects "on export trade or . . . commerce with foreign nations" by an entity exporting goods or services from the United States. *15 U.S.C. § 6a(1)(A)* and *(1)(B)*.

defendants' national market or any other market) and brought the defendants' product into the United States, the fact that the product eventually found its way into the United States does not transform the defendant into an "importer" and, hence, an antitrust claim against the defendants must pass muster under the FTAIA before the Sherman Act claim can be entertained. See *id. at 304* (The fact "[t]hat 'some of the goods purchased in [a foreign market] may ultimately have been imported by individuals into the United States' [is] immaterial to determining if defendants [are] involved in 'import trade or import commerce' [since the defendants' own] actions did not *directly* increase or reduce imports into the United States") (quoting *Kruman v. Christie's Int'l PLC, 284 F.3d 384, 395 (2d Cir. 2002)*, **[**47]** emphasis supplied).

HN22[] Once it is determined that the defendants are not actual importers or that they were importing goods all over the world, the FTAIA is triggered. However, the FTAIA bar does not exclude every possible conduct by the defendants which are not directly importing into the United States from the reach of the Sherman Act. Rather, the second prong of the inquiry must be conducted, namely, whether the **[*862]** defendants' alleged conduct "involv[e]d trade or commerce with foreign nation." See *15 U.S.C. § 6a*. Generally, "where [the defendants'] conduct . . . is directed at the competitiveness of a foreign market, such conduct involves 'foreign trade or commerce.'" See See *Turicentro, 303 F.3d at 302* (quoting *Kruman, 284 F.3d at 395* ("When there is conduct directed at reducing the competitiveness of a foreign market . . . such conduct involves foreign trade or commerce, regardless of whether some of the conduct occurred in the United States"). Hence, if the foreign defendants are not involved in importation into any foreign market, i.e., if they operate only within their own domestic market, the FTAIA bars antitrust suits against such defendants by removing subject matter jurisdiction **[**48]** of a United States court to entertain Sherman Act claims against such defendants, even if certain ripple effects of the defendants' conduct reach the United States' market.

However, if the answer to the second prong is in affirmative, i.e., ***HN23***[] if the foreign defendants are involved in importation into foreign markets (which may or may not include the United States), then the third prong of the inquiry comes into play. See *15 U.S.C. § 6a(2)*. Specifically, the court shall determine whether the foreign defendants' export activities (i.e., the defendants' bringing of their goods or services into markets other than their own) caused "direct, substantial and reasonably foreseeable effect" on the United States' market, i.e., either on our nations' interstate commerce or on the importation into the United States. See id. Once this third prong is satisfied, the court establishes its subject matter jurisdiction to examine the sufficiency of plaintiff's claim pursuant to the Sherman Act. See *id. at 301*.

3. Direct, Substantial, and Reasonably Foreseeable Effect

HN24[] The courts agree that participation by American firms in the alleged conspiracy does not, by itself, establish an anticompetitive effect in **[**49]** the United States. See *Kruman, 284 F.3d at 395*. Similarly, mere intent of defendants to reduce competition in the United States is insufficient to meet the "direct effect" standard. See *Dee-K Enters., Inc. v. Heveafil Snd. Bhd., 299 F.3d 281, 292 (4th Cir. 2002)*, cert. denied, *539 U.S. 969, 123 S. Ct. 2638, 156 L. Ed. 2d 675 (2003)*. To establish "direct effect," the plaintiff must show a causal link between the *wrongful conduct* and the *anticompetitive effect* suffered in the United States. See *United States v. LSL Biotechnologies, 379 F.3d 672, 680 (9th Cir. 2004)* ("[A]n effect is 'direct' if it follows as an immediate consequence of defendant's activity"); *Info. Res. Inc. v. Dun & Bradstreet Corp., 127 F. Supp. 2d 411, 417 (S.D.N.Y. 2000)*; *Eurim-Pharm GmbH v. Pfizer Inc., 593 F. Supp. 1102, 1106-07 (S.D.N.Y. 1984)* (finding no jurisdiction under the FTAIA when "the link between the defendants' conduct abroad and the price . . . in the United States is far from apparent"); see also *In re Monosodium Glutamate Antitrust Litig., 2005 U.S. Dist. LEXIS 39641, 2005 WL 2810682 (D.Minn. Oct. 26, 2005)* (to avoid the FTAIA bar, the plaintiff must show "proximate" causation, not just "but for" causation, between the alleged domestic effects of defendants conduct **[**50]** and the defendants' alleged worldwide activities); *Latino Quimica-Amtex S.A. v. Akzo Nobel Chemicals B.V., 2005 U.S. Dist. LEXIS 19788, 2005 WL 2207017 (S.D.N.Y. Sept. 8, 2005)* (same); *eMag Solutions LLC v. Toda Kogyo Corp., 2005 U.S. Dist. LEXIS 44512, 2005 WL 1712084 (N.D. Cal. July 20, 2005)* (same); accord *Sniado v. Bank Austria AG, 378 F.3d 210 (2d Cir. 2004)* (declining subject matter jurisdiction where plaintiff asserted a worldwide exchange rate fixing scheme but did not characterize the **[*863]** scheme as even a but-for cause of his injury). Thus, mere spillover effects within the United States caused by a conspiracy targeting foreign markets are not sufficiently "direct" to satisfy the FTAIA, see *Eurim-Pharm GmbH, 593 F. Supp. at 1106*, just as mere ripple effects felt in the United States as a result of anticompetitive conduct abroad are not sufficiently "substantial" to meet FTAIA requirements. See *Turicentro, 303 F.3d at 304* ("[p]laintiffs' alleg[ations that] defendants' conduct . . . substantially reduced [plaintiffs'] business values, forcing at least one member of the putative class out of business [do not state] any 'effect' on United States commerce"); *Dee-K Enters. Inc., 299 F.3d at 292*.

4. Additional Considerations

a. *Comity*

In Hartford **[**51]** Fire, nineteen of the U.S. States and numerous U.S. private plaintiffs filed complaints alleging that the defendants, which consisted of four domestic primary insurers, domestic reinsurers, brokers and trade associations, as well as reinsurers based in London, United Kingdom, violated the Sherman Act by engaging in various conspiracies that forced certain other primary insurers to change the terms of their standard domestic insurance policies. After the actions were consolidated for litigation, the District Court for the Northern District of California granted the defendants' motions to dismiss, primarily on the grounds of antitrust immunity, pursuant to the McCarran-Ferguson Act, *15 U.S.C. §§ 1011-1015*. See *In re Insurance Antitrust Litigation, 723 F. Supp. 464 (N.D. Cal. 1989)*. The Court of Appeals for the Ninth Circuit reversed the district court's conclusion with respect to the McCarran-Ferguson Act and, in addition, the court rejected the district court's conclusion that the principle of international comity barred the court from exercising Sherman Act jurisdiction over the claims brought solely against the London reinsurers. [17] See *In re Insurance Antitrust Litig., 938 F.2d 919 (9th Cir. 1991)*. **[**52]** Upon grant of certiorari, the Supreme Court affirmed in part and reversed in part. See *Hartford Fire Ins. Co. v. Cal., 509 U.S. 764, 113 S. Ct. 2891, 125 L. Ed. 2d 612 (1993)*. Justice Souter, delivering the opinion of the Court, observed:

> The only substantial question in this litigation is whether "there is in fact a true conflict between domestic and foreign law." *Societe Nationale Industrielle Aerospatiale v. United States Dist.* ***[*864]*** *Court for Southern Dist. of Iowa, 482 U.S. 522, 555, 107 S. Ct. 2542, 96 L. Ed. 2d 461 (1987)*. The London reinsurers contend that applying the [Sherman] Act to their conduct would conflict significantly with British law [governing their conduct], and the British Government, appearing before [the Supreme Court] as amicus curiae, concurs. . . . But this is not to state a conflict. "The fact that conduct is lawful in the state in which it took place will not, of itself, bar application of the United States antitrust laws," even where the foreign state has a strong policy to permit or encourage such conduct. . . . No conflict exists, for these purposes, "where a person subject to regulation by two states can comply with the laws of both." *Restatement (Third) Foreign Relations Law § 403, Comment e*. 25. Since the London reinsurers **[**53]** do not argue that British law requires them to act in some fashion prohibited by the law of the United States, . . . or claim that their compliance with the laws of both countries is otherwise impossible, we see no conflict with British law. See *Restatement (Third) Foreign Relations Law § 403, Comment e*, *§ 415, Comment j*. We have no need in this litigation to address other

---

[17] ***HN25***[] The term "comity" describes a theory for accommodating conflicting legal policies of territorial sovereigns; it was developed by scholars in 17th-century by Dutch scholar Ulrich Huber to resolve conflicts between the laws of the various Dutch provinces. See Davies, The Influence of Huber's de Conflictu Legum on English Private International Law, 18 Brit. Y.B. Int'l L. 49, 52 (1937). Huber summarized his analysis into three now well-known axioms: (1) the laws of every sovereign authority have force within the boundaries of its state, and bind all subject to it, but not beyond; (2) those are held to be subject **[**54]** to a sovereign authority who are found within its boundaries, whether they be there permanently or temporarily; (3) those who exercise sovereign authority so act from comity, that the laws of every nation having been applied within its own boundaries should retain their effect everywhere so far as they do not prejudice the powers or rights of another state and another state's courts. See id. at 26. Thus, the legal doctrine of international comity is not a rule of public international law but a judicial tradition based on respect for sovereignty, a discretionary power of the court to decline jurisdiction in international cases out of respect for the actions and laws of another nation, which are weighed against United States international convenience and duties. See *Bodner v. Banque Paribas, 114 F. Supp. 2d 117, 129 (E.D.N.Y. 2000)* (citing *Societe Nationale Industrielle Aerospatiale, 482 U.S. at 555*).

> considerations that might inform a decision to refrain from the exercise of jurisdiction on grounds of international comity.

Hartford Fire, 509 U.S. at 798-99 (citations to parties' and amici briefs omitted).

Consequently, the Hartford Fire Court concluded that comity did not prevent the district court from entertaining the plaintiff's claim under the specific set of facts presented by the case, but stressed that all inquiries implicating a sovereign's actions, including inquiries examining the **[**55]** effect a sovereign's actions might have on global operations of the entities under the sovereign's domain, are necessarily fact specific. See *id. at 797* (discussing the totality of factors).

b. *"Mixed FTAIA" Scenario*

The Court of Appeals for the Fourth Circuit in *Dee-K Enters., 299 F.3d 281*, built on the Supreme Court's teaching in Hartford Fire. In Dee-K Enterprises, two United States companies that purchased rubber thread filed a putative antitrust class action alleging a price-fixing conspiracy led by Southeast Asian producers of the thread. The plaintiffs named, as defendants, nine Southeast Asian producers of rubber thread and some of their subsidiaries and distributors in the United States, [18] and alleged that the plaintiffs: (a) paid "artificially high and non-competitive prices"; (b) "were deprived of free and open competition in the market"; and (c) "the competition among defendants . . . was restrained" in the United States *and thoughout world.* See *id. at 284*.

> [The plaintiff] introduced substantial evidence at trial of horizontal price fixing among the producers. This price fixing apparently originated at least in part in reaction to 1991 threats by the United States government **[**56]** to punish Southeast Asian rubber-thread producers for violating antitrust prohibitions . . . . In December 1991, responding to the dumping **[*865]** accusations, officials of the Malaysian producers . . . met with a Malaysian government official and agreed to fix [Malasian] rubber-thread prices throughout the world. Later joined by other rubber-thread producers from Malaysia, Indonesia, and Thailand, they continued to meet for several years, at conventions and in other settings, to discuss and implement these and other efforts to fix prices. They met regularly between 1992 and 1995 -- in Kuala Lumpur, in Columbo, in Bali, and in Penang [but] never met in the United States. . . . From 1991 to 1996, United States prices for rubber thread . . . generally rose, [and the plaintiff] attributes these increases to the price-fixing conspiracy. . . . At the conclusion of [the] trial, the district court submitted a special verdict form to the jury [asking, inter alia, whether] "the conspiracy ha[d] a substantial effect in the United States" [and] the jury answered [this] question in the negative [causing the plaintiff's appeal].

Id. at 284-85. The Fourth Circuit did not disturb the jurors' finding. The **[**57]** court conducted a two-prong inquiry, first agreeing with the district court's conclusion that the plaintiffs' allegations clearly implicated the FTAIA because the alleged price-fixing conspiracy constituted a "foreign conduct" in light of the plaintiffs' assertion of "a largely foreign conspiracy with some domestic elements, aimed at a global market including, but certainly not limited to, a United States import market." *Id. at 286-93* (providing an extensive discussion of the FTAIA and refusing to read the language in *Carpet Group, 227 F.3d at 75*, and *United States v. Nippon Paper Indus., 109 F.3d 1, 9 (1st Cir. 1997)*, as contradicting the FTAIA's legislative history, the position of the Department of Justice, the Supreme Court's holding in Hartford Fire and the positions of all other circuit and district courts). The court stressed that, ***HN26***[] in determining whether the FTAIA applies,

> a court should consider whether the [defendants'] *acts, targets, and effects* . . . are *primarily* foreign or *primarily* domestic. This inquiry will best accommodate the cases with mixed fact patterns, defying ready categorization

[18] Specifically, the plaintiffs named, as defendants, five Malaysian companies, two Indonesian, two Thai, as well as three United States wholly-owned subsidiaries of the Malaysian companies and two United States independent distributors used by other producers. See *Dee-K Enters., 299 F.3d at 283-84*. In other words, the scenario examined in Dee-K presented substantially more ties to the United States market than **[**60]** the case at bar, where the sole connection is the existence of a single United States subsidiary of one of sixteen other Defendants.

> as "foreign" or "domestic" conduct, which our increasingly global economy will undoubtedly **[**58]** produce. We cannot begin to foresee the scope or complexity of future transactions. To adopt simplistic rules . . . might well yield unintended and unfortunate results. . . . We note that this approach echoes that of the Third Circuit in Carpet Group and finds support in several of the treatises.

Id. at 294 (citing *Carpet Group, 227 F.3d at 75*; Wilbur L. Fugate, Foreign Commerce and the Antitrust Laws § 2.12 at 80-82 (5th ed. 1996); *Restatement (Third) of Foreign Relations Law § 415(2)*, and *Montreal Trading Ltd. v. Amax, Inc., 661 F.2d 864, 869 (10th Cir. 1981))* (emphasis supplied). Then, the court concluded that, even in a scenario where the plaintiffs actually proved horizontal price fixing, the allegations that "the agreements . . . were all formed entirely outside the United States -- in several other countries, [the] target of the conspiracy was a global market, [and the] links to the United States are mere drops in the sea of conduct that occurred . . . around the world" fail to establish that the defendants' activities caused the "direct, substantial and reasonably foreseeable effect" on the United States trade necessary to remove the FTAIA bar. *Id. at 295-96*; accord *Eurim-Pharm GmbH, 593 F. Supp. at 1106*; **[**59]** accord *Turicentro, 303 F.3d at 304*. Thus, Dee-K Enterprises stands for the proposition that ***HN27***[] the FTAIA bars claims failing to establish not only a clear link between the **[*866]** defendants' illegal conduct and the United States trade and commerce, but also that the United States trade was, at the very least, "a" focus point of the defendants' illegal conduct. [19] Cf. *Int'l Ass'n of Machinists & Aerospace Workers v. OPEC, 649 F.2d 1354, 1359 (9th Cir. 1981)*, cert. denied, *454 U.S. 1163, 102 S. Ct. 1036, 71 L. Ed. 2d 319 (1982)* (finding no jurisdiction over claims against a world-wide combination of petroleum producers under the act-of-state doctrine); compare *Carpet Group, 227 F.3d at 73* (Congress did not intend to remove federal jurisdiction in the cases which *clearly involve conduct in the United States* rather than abroad)

VII. DISCUSSION

A. Presumption as to Lack of Sovereign Action

Plaintiffs name as Defendants in this action sixteen Chinese business entities and Minmetals, a wholly owned United States subsidiary of one of these sixteen entities. See Compl. P 9-25. ***HN28***[] It is axiomatic that a business **[**62]** entity cannot conspire with its wholly-owned subsidiary for purposes of the Sherman Act liability, see *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 777, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*, and Plaintiffs' antitrust claims against Minmetals could be plausible only if the Court is to supplement Plaintiffs' claim with an allegation (not stated in the Complaint but suggested by Plaintiffs during the October 6, 2008, oral argument) that Minmetal conspired with Defendants *other* than its parent company. Plaintiffs' failure to plead so is, however, of less concern to this Court than Plaintiffs' silence as to the comity implications raised by this matter.

---

[19] This Court finds the holding of Dee-K Enterprises both insightful and sensitive to the realities of the modern, progressively globalized world trade: any holding otherwise risks creating a judicial rule undermining the legislative rationale of the FTAIA. To illustrate, if one is to presume that there is a cartel of producers-importers of a certain merchandise which: (a) operates world-wide, without focusing on the United States market; and (b) sell its merchandise in the United States at the cheapest prices, comparing to those charged for comparable merchandise by domestic producers and other importers (as it is the case with Chinese Processed Magnesite), a blind application of United States ***antitrust law*** to such cartel could, inadvertently, create an effect diametrically opposite to the goal of the Sherman Act. Specifically, such blind application of United States ***antitrust law*** could cause the United States a self-imposed "quasi-embargo," in the sense that the cartel -- after being found in violation of the Sherman Act --might elect not to change its **[**61]** pricing practices but rather to avoid the reach of the United States law by simply selling *all* its merchandise in non-United States markets. Such self-imposed quasi-embargo would, in turn, create a dire shortage of the merchandise in the United States and, hence, an incentive for numerous intermediaries to profiteer from this shortage by re-selling the cartel's merchandise in the United States purchased in foreign markets: this scenario would result in higher prices paid by United States consumers -- even if the intermediaries diligently compete against each other within the meaning of the Sherman Act -- since the intermediaries would sell the merchandise in the United States at prices necessarily exceeding those paid by them to the cartel (simply because the intermediaries would have no business incentive to import the merchandise in order to sell it at the price below those that they themselves paid, or at cost).

The People's Republic of China ("China" or "State") was formally established on October 1, 1949 when, after a victory by the Communist Party of China, Mao Zedong proclaimed the creation of a communist state, hence triggering the State's centrally planned economic system. [20] See **[*867]** <<https://www.cia.gov/library/publications/the-world-factbook/geos/ch.html#Intro>> ("China-Intro"). However, in 1978, "China adopted **[**63]** its open-door policy and allowed its economy to be exposed to the international market, [coining] what Deng Xiaoping called 'socialism with Chinese characteristics.'" Lan Cao, Public Perspectives on Privatization: Chinese Privatization: Between Plan and Market ("Public Perspectives"), *63 Law & Contemp. Prob. 13, 13 (2000)*. The reforms started with the phasing out of collectivized agriculture and expanded, in a piecemeal fashion, to include gradual liberalization of prices, fiscal decentralization and growth of the non-state sector. See China-Intro; *Public Perspectives at 18, 28*. However, "Chinese [government] deferred state-sector privatization and focused on establishing the fundamentals of a market-oriented economy . . . in the newly created non-state sector." *Public Perspectives at 22*. Therefore, "the state sector remain[ed] remarkably large, [and, by the year 2000,] China [still had] more than 200 million people employed in its 340,000 state owned enterprises, which account[ed] for thirty-four percent of the country's total industrial output, fifty-seven percent of its total fixed asset investment, and more than one-third of its GDP." *Id. at 32* (citations omitted). "Like other **[**64]** centrally planned economies in transition, the purchase of inputs and sale of outputs [by state-owned enterprises] in China remain[ed] linked to the central planning system despite efforts to de-link portions of the economy from the central plan." *Id. at 26*.

> The issue of which commodities and industries [must be still] subjected to price regulation and economic plan is first settled on the state-wide level and then at the provincial level, where each province can designate additional commodities or industries as essential and subject them to the province's own [central] economic plan. For example, on the state level, China regulates such commodities as meat, sugar, and vegetables as well as public services, new technology sectors, industries related to state security, banking, and insurance. Conversely, such industries as coal, machine-building, electronics, and textiles are not subject to the state-wide control. However, these industries could be controlled [upon or without an express State's mandate] on a local level. For example, [certain] Provinces considered chemicals, building materials, metallurgy, and machine building essential enough to be regulated by the provinces' economic **[**65]** plans.

Id. at 33, n. 101 (citations omitted).

In the case at bar, Plaintiffs enlighten this Court as to the juridical status of Defendants only by stating that one of Defendants **[**66]** is a "Chinese state-owned trading company," while another is a "Chinese directly owned state company." See Compl. at 2-3. With respect to fourteen other Defendants, Plaintiffs merely informed the Court that these Defendants **[*868]** are either "Chinese trading companies" or "Chinese corporations," see id. at 3-5, leaving the Court to guess whether Defendants are: (a) wholly owned by the State and, thus, are nothing but the State's assets/instrumentalities; or (b) now-privatized or newly-created private entities obligated to operate in its domestic, as well as foreign, markets subject to certain State-wide and/or Province(s)-wide price and production economic plans; or (c) enterprises operating outside Chinese regulatory constraints; or (d) different combinations of the above-listed choices. See *Mannington Mills, Inc. v. Congoleum Corp., 595 F.2d 1287 (3d Cir. 1979)*; *Interamerican Refining Corp. v. Texaco Maracaibo, Inc., 307 F. Supp. 1291 (D. Del. 1970)*.

This Court's discussion of different scenarios based on a multitude of hypotheticals presuming: (a) different composition of the State's ownership and control of some of Defendants, as well as (b) different Chinese regulatory

---

[20] In a centrally planned economy, the state government controls all (or, at least, all major) sectors of the economy and formulates all decisions about their use, i.e., the government decides what should be produced, as well as the quantities and situs of production, and sets the prices at which the products are to be sold. Planned economies are in contrast to unplanned economies, such as a market economy, where production, distribution, pricing, and investment decisions are made by the private owners of the factors of production based upon their own and their customers' interests rather than upon furthering some overarching governmental macroeconomic plan. See Daniel Myers, Construction Economics 288 (2004); Bertell Ollman, Market Socialism: The Debate Among Socialists 12 (Routledge, 1997); Alec Nove, Planned Economy, in The New Palgrave: A Dictionary of Economics, vol. 3 at 879 (1987); <<http://www.enotes.com/biz-encyclopedia/centrally-planned-economy>>; <<http://dictionary.reference. com/browse/planned%20economy>>.

regimes, appears **[**67]** to be wholly unwarranted at the instant juncture: it would produce nothing but a treatise-long dictum. The Court, therefore, presumes -- *for the purposes of this discussion only* -- that all Defendants named in this matter are entities enjoying such juridical status and/or operational regime that Plaintiffs' allegations stated in the Complaint *cannot* be qualified as implicating either the act-of-state or foreign sovereign compulsion, or comity doctrines, or the Foreign Sovereign Immunities Act ("FSIA"), *Pub. L. No. 94-583, 90 Stat. 2891*, or as probing exceptions to the FSIA, or as bringing into this discussion any other provision, judicially-create doctrine or public policy related to a foreign sovereign's action. [21]

B. As Drafted, Plaintiffs' Complaint Is Barred by the FTAIA

As noted supra, Plaintiffs named seventeen Defendants, sixteen of which are described by such terms as "Chinese state-owned trading company," "Chinese directly owned state company," "Chinese trading company" and "Chinese corporation." See Compl. at 2-5. The seventeenth Defendant, Minmetals, is defined as "a New Jersey corporation [which is] a subsidiary and affiliate of [the Defendant that is a Chinese state-owned trading company]." Id. at 3.

The Complaint is void of any information as to whether any of these seventeen Defendants was *actually bringing* Processed Magnesite *into the United States.* [22] See Compl. P 26 (merely notifying the Court that "[e]ach of these [D]efendants [either] directly [or] *through affiliates* . . . is engaged in the business of manufacturing **[**69]** and selling [Processed Magnesite] in the United States and *throughout the world,"* hence allowing for a presumption that none of Defendants actually imported **[*869]** Processed Magnesite into the United States).

Moreover, the Complaint is infused with statements unambiguously indicating that Defendants' allegedly illegal combination activities: (a) took place primarily in China or at unknown destinations which appear to be locales other than the United States, see Compl. P 51 (asserting that Defendants "participated in meetings and conversations *in China and elsewhere*"); and (b) targeted and affected Defendants' entire world trade in Processed Magnesite rather than aiming primarily at the United States market. See id. PP 1, 26, 45-51, 53. Therefore, Plaintiffs' allegations must necessarily be construed as inviting the FTAIA scrutiny. See *Dee-K Enters., 299 F.3d at 294*; accord *Turicentro, 303 F.3d at 302*.

1. Trade and Commerce

At the outset of its FTAIA analysis, the Court shall **[**70]** establish whether Plaintiffs' allegations indicate that Defendants' alleged conduct "involv[ed] trade or commerce . . . with foreign nation." See *15 U.S.C. § 6a*; *Turicentro, 303 F.3d at 302*. The inquiry, while usually simple, does not present an easy task in the case at hand, since the allegations made by Plaintiffs discuss mainly Defendants' alleged "combination and conspiring" activities, see Compl. at 9-11 (enlightening the Court that "Defendants began their ongoing combination and conspiracy to suppress competition by fixing the price and controlling export sale volumes of [Processed Magnesite] offered for sale . . . in the United States and elsewhere"). These generic references to "conspiracy" and "fixing prices" do not establish that any Defendant was actually involved trade or commerce with foreign nation, since Defendants could

---

[21] The Court notes, in passing, that Plaintiffs' claims are based on Defendants' activities that started, allegedly, around April of 2000 and continued, at least, to the date of Plaintiffs' filing of the Complaint, i.e., until September 7, 2005 ("Complained Period"). See Compl. PP 45, 62. However, since Chinese privatization processes started in 1978 and, according to *Public Perspectives at 32*, kept at least one-third of Chinese industry owned by the State, it is entirely **[**68]** plausible that all (or some) of the seventeen Defendants were State-owned enterprises at the beginning of the Complained Period but changed their juridical status and became non-State-owned entities by the end of the Complained Period and -- in addition -- might have experienced intermittent regulatory and non-regulatory sub-periods since they became privately owned.

[22] Indeed, the Complaint does not assert that Minmetals, an alleged arm of its parent Defendant, operated as an importer of any Chinese goods, or as an importer of Chinese Processed Magnesite in particular. See Compl. at 3.

merely be producers of Processed Magnesium, producers of any other metals or minerals, sellers of Processed Magnesite in their own domestic market, or even equity holders, advisory entities, etc. [23]

However, **[**72]** being mindful of the Court of Appeals observation that a defendant might be presumed to be involved in import trade or commerce, if the defendant elects to refer to itself as an "importer," see *Carpet Group, 227 F.3d at 72*, the Court takes notice of the fact that the names of seven Defendants out of the seventeen named in the Complaint (i.e., China National Metals & Minerals Import & Export Co., China National Minerals Import & Export Corporation, China Metallurgical Import & Export Co., Haicheng Huayu Group Import & Export Co. Ltd., Xiyang Imoprt & Export Ltd. Co., Liaoning Foreign Trade General Co. and Dalian **[*870]** Golden Sun Import & Export Co.) include such terms as "import," "export" and "foreign trade," see Compl. at 2-3, hence inviting the conclusion that at least these seven Defendants were actually involved in exportation from China to some foreign markets. Accord Compl. P 26 (similarly suggesting such possibility by asserting that "[D]efendants [either] directly [or] through affiliates [were] engaged in the business of manufacturing and selling [Processed Magnesite] throughout the world"). The Court, therefore, deems this prong of the FTAIA satisfied for the purposes of the instant **[**73]** analysis.

2. Plaintiffs Failed to Assert Facts Showing a Link Between Defendants' Alleged Illegal Actions and the United States Commerce

To avoid the FTAIA bar, the plaintiff must show a clear link between the aim of Defendants' alleged *illegal* activities and *the United States market.* See *Dee-K Enters., 299 F.3d at 295-96*. Here, Plaintiffs' three allegations, apparently made with an express aim to assert such a link, read as follows: (1) "[Defendants'] horizontal prices were designed to, and in fact did, have a substantial and adverse impact in the United States"; (2) "the conduct of [D]efendants . . . affected the interstate and foreign trade and commerce in the United States"; and (3) "[t]he conduct of [D]efendants . . . has directly, substantially and foreseeably restrained such trade and commerce." Compl. PP 27; 43-44. These conclusive allegations, however, are facially insufficient in light of the Supreme Court's teaching that the plaintiff can meet the plaintiff's pleading burden only if the complaint contains "enough [factual] heft" rather than "labels and conclusions [or] a formulaic recitation of the elements of a cause of action." *Twombly, 127 S. Ct. at 1965-69*. The Court, thus, **[**74]** dispenses with these bold conclusions without further review. [24]

In addition to these three conclusory statements, Plaintiffs make seven other allegations which might be interpreted as Plaintiffs' attempt to assert a link between Defendants' **[**75]** allegedly illegal activities and the United States

---

[23] For the time being, the Court will not consider Plaintiffs' allegation that Defendants were "controlling export sale volumes of [Processed Magnesite] offered **[**71]** for sale . . . in the United States and elsewhere," since the export quotas of Processed Magnesite were typically established by the Chinese government through a licensing mode, where licences are purchased by Chinese entities with respect to the particular goods the entity desires to export. See, e.g., Government Surveys - Citations. Therefore, any challenge to the Chinese government's decisions as to exportation quotas clearly implicates provision, judicially-create doctrine or public policy related to a foreign sovereign's action. Moreover, the fact that China became a member of the WTO in 2001 affected Chinese licencing policies, and any allegations as to the illegality of Chinese export quotas qualify as claims of China's violations of its WTO obligations: such allegations are not properly before this Court and should be entertained pursuant to the WTO dispute resolution mode incorporated into the treaty. That said, Plaintiffs are indeed free to state in an amended complaint any allegations against Defendants based on Defendants' agreements to control the volume of Processed Magnesite exportation *on the bases other than those ensuing from the governmental licensing scheme.*

[24] The Court notes, in passing, that -- while not substituting for Plaintiffs' facts -- Plaintiffs' statements that Defendants' actions had a "substantial and adverse impact" and that Defendants "substantially and foreseeabl[y] restrain[ed]" U.S. commerce appear indicative of Plaintiffs' awareness that the case at hand is governed by the FTAIA, since: (a) the "direct, substantial and reasonably foreseeable effect" test is never implicated by the Sherman Act, see *Carpet Group, 227 F.3d at 72* (citing 54 Am. Jur. 2d § 18, at 77); and (b) even the less rigorous analysis of effects that the restraint allegedly had on the competition should be wholly inapplicable to Plaintiffs' claim based on the "violation per se" theory, see Compl. P 1, since any "effects" analysis is relevant only to the "rule of reason" claims. See *Pace Elecs., Inc., 213 F.3d at 123* (if a restraint is per se illegal, further examination of the practice's impact on the market is unnecessary).

market. These seven allegations read as follows: (1) "Defendant producers have lower costs than their western competitors"; (2) "[e]xporters from China . . . enjoy a competitive advantage . . . because China . . . undervalues the Yuan, making Chinese export [goods] relatively less expensive compared to exports . . . from other nations"; (3) "[d]uring the conspiracy, prices of [Processed Magnesite] have not followed the laws of supply and demand that exist in a competitive market. Prices have remained stable or increased during the [Relevant Period] despite low demand"; (4) "[d]ue to [D]efendants' price fixing and market allocation activity, the prices of [Processed Magnesite] have increased despite reduction in the cost of production"; [25] (5) "as the cartel **[*871]** has taken steps to restrain production and increase prices, competitors [around the world] have shown that they would follow price increases rather than undercut the new cartel price levels"; (6) "[i]n 2004, the collusive agreements of the cartel continued to maintain prices well above those of a competitive market"; and (7) "[p]rices of magnesite in the animal feed industry . . **[**76]** . have steadily grown . . . and risen an overall 25 percent during [the Relevant Period]." Compl. PP 42; 53-54; 56-57. However, none of these allegations suggests a link between Defendants' *illegal* activities and the United States market.

a. Cost-of-Production Arguments

Three of the above-quoted seven statements appear to reflect Plaintiffs' view as to how the United States market should have benefitted -- but did not benefit -- from Defendants' allegedly low costs of production. [26] The first of these statements invites the Court to deduce that Defendants illegal activities must be linked to the United States trade and commerce because "Defendant producers have lower costs than their western competitors." Compl. P 42.

However***HN30***[] if an entity is conducting its business in a developing country, the fact that the entity's costs might be lower than those of analogous enterprises doing business in developed nations is neither indicative of the entity's anticompetitive practices nor suggests that the entity's goal is to affect the trade in a certain consumer nation. To illustrate, coffee-shop "A" selling a cup of cappuccino for $ 2.00 while incurring 50 cents of total fixed and variable costs per cup cannot be accused of anticompetitive practices simply because it elects not to sell its cup of coffee at a price between $ 0.51 and $ 1.99, even if: (a) all neighboring stores, except for a certain other coffee-shop "B," incur total costs per cup of $ 0.51 or higher and sell their cappuccino for **[**78]** $ 2.10 or above; and (b) coffee-shop "B" has both costs and sale prices identical to those of the "A" coffee-shop. Had it been otherwise, any entity operating above its break-even level would necessarily be suspect of anticompetitive practices.

The fact that an entity does not elect to sell its goods or services "even cheaper" suggests neither the entity's illegal activities nor a link between these illegal activities and the United States market. [27] Since Plaintiffs' facts equally allow for a conclusion that Defendants' prices were a result of Defendants' legitimate assessment of the world's markets, Plaintiffs' allegations based on a stereotypical observation that expenses born by western producers are usually higher than those of Chinese counterparts **[*872]** cannot be qualified as a fact linking Defendants' allegedly illegal actions to the United States trade and commerce. See Twombly, 127 S. Ct. at at 1966 n.5 (the line "between the factually neutral and the factually suggestive . . . must be crossed").

---

[25] Since, short of this single reference to "market allocation activity," see Compl. P 57, the Complaint is entirely silent as to any market allocation actions, the Court will not presume that Plaintiffs' single reference to "market allocation activity" was a result of a conscious desire to assert allocation of markets.

[26] At the outset, it shall be noted that ***HN29***[] activities of a foreign *producer* fall outside the reach of the Sherman Act since a "producer" is neither an "importer" **[**77]** into the United States nor an entity engaged in "trade or commerce" for the purposes of the FTAIA (i.e., not an importer into markets other than the United States). See *Carpet Group, 227 F.3d at 72*. In light of Plaintiffs' systemic conflation of the terms "producer" and "importer," the Court presumes that Plaintiff intended to assert that every Defendant was a producer, as well as an importer, of Processed Magnesite.

[27] Here, Plaintiffs appear to concede that Chinese imports of Processed Magnesite were the cheapest (or among the cheapest) available at the market, be it the United States market or world **[**79]** market, and be it in comparison with the products of developed or developing nations. See Compl. P 53 ("Chinese producers . . . set a floor below which other producers cannot compete).

Next, Plaintiffs attempt to show a link between Defendants' allegedly illegal conduct and the United States trade and commerce by stating that "the prices of [Processed Magnesite] have increased [during the Relevant Period] despite reduction in the cost of production," presumably, in China. Compl. P 57. This statement is similarly flawed on many levels.

The Court is unaware of any economic theory -- and Plaintiffs enlighten the Court about none -- upon which an entity, whose profit margin increased due to a reduction in costs of production, would have an incentive to forfeit that profit margin by passing the saving to the consumer or to forfeit an opportunity to raise its prices (and, hence, net profit) if the market so allows. The only economic concept vaguely resembling Plaintiffs' assertion is that a business entity, whose operational costs are marginally reduced, *might* consider lowering its prices in an attempt to gain a larger market share. However, even this concept in no way produces a mandatory **[**80]** rule, since a business considering to seek a larger market share makes its decision in light of a multitude of economic considerations, such as the principle of increased opportunity cost and/or the speed and likelihood of obtaining return of and profit on its capital investment. [28]

Moreover, even if there were an economic theory supporting Plaintiffs' position, Plaintiffs' conclusions would necessarily be true only if Defendants, in fact, enjoyed a "reduction in the cost of production" during the Relevant Period. However, the Complaint is void of facts so suggesting, and the Court's own information indicates to the contrary. For instance, **[*873]** United States official data shows that: (a) the cost of energy and freight in China increased notably during the Relevant Period, see <<*http://minerals.usgs.gov/minerals/pubs/commodity/magne* sium/mgcommyb03.pdf>>; <<*http://minerals.usgs.gov/minerals/pubs/commodity/magnesium/* mgcommyb04.pdf>>; see also <<*http://www.stats.gov.cn/tjsj/ndsj/2005/html/I0913E.HTM>>* (showing 9% increase in costs of fuel and power between 1999 to 2004); and (b) the cost of labor in Chinese mining and mining-related industries more than doubled from 2000 to 2005. [29] See <<*http://www.stats.gov.cn/tjsj/ndsj/2006/html/E0520E.HTM>>;* <<*http://www.stats.gov.cn*/ english/statisticaldata/yearlydata/yb2004-e/html/E0526ae.htm>>; **[**83]** <<*http://www.stats.gov.cn*/ english/statisticaldata/yearlydata/YB2002e/html/e0526ae.htm>>; <<*http://www.stats.gov.cn*/ english/statisticaldata/yearlydata/YB2001e/html/e0526ae.htm>> (information provided by the National Bureau of Statistics of China, indicating that the wages of employees in state-owned facilities increased, between 1999 and 2005, from 8,283 yuan to 20,992 yuan per annum, that is 254%; while the wages in collectively-owned units increased from 4,857 to 11,268 (231%), and in all other units went from 9,842 to 21,207,

---

[28] The principle of increased opportunity cost (also known as the principle of diminishing marginal returns) provides that, in a production system operating with both fixed and variable factors of production, there invariably comes a point when each additional unit of variable input yields less output per each input unit. See Robert S. Pindyck, Daniel L. Rubinfeld, Microeconomics 194-97, 218-19 (6th ed. 2005). E.g., a pizza store having an oven capable of baking, at maximum 1,000 pizzas per day cannot bake 1,001st pizza even if the owner keeps hiring employees capable of preparing more that 1,000 pies per day: all that owner would incur with these new hires is less pizzas per employee, i.e., his profit would decrease because the output would remain the same but the overhead would keep increasing. A business entity might invest in fixed asset (also known as property, plant and equipment, or "PPE") to remedy **[**81]** the above scenario e.g., buy an additional pizza oven to allow the additional employees produce more pizzas. See, e.g., Charles T. Horngren, et al., Introduction to Financial Accounting 336-49 (9th ed. 2005). However, since PPE cannot easily be converted into cash (plus, equipment and plant are also subject to depreciation), a fixed asset investment might recoup itself only in the long run or, in the event of an unfavorable economic turn (e.g., a decline of pizza-consumption) or regulatory change (e.g., an ordinance prohibiting two ovens in one pizzeria as in violation of the local fire code), might even result in capital loss. Therefore, in industries where PPE investment is necessarily substantial (such as in mining and processing of minerals industries), the considerations related to long-term investment recoupment and uncertainties about the legal and economic regime often outweigh the discounted-to-their-current-value potential future profits. Here, the Complaint indicates that production of Processed Magnesite requires extensive labor and substantial investments in plant and equipment. See Compl. PP 38-41; see also <<*http://minerals.usgs.gov/minerals/pubs/commodity/magnesium/mgcmyb2001.pdf>>* **[**82]** (discussing a Chinese-Japanese joint venture launched in 2001 aiming to build a plant producing Processed Magnesite in Liaoning Province, China, at the construction cost of $ 3.65 million).

[29] The discussion of CCM, DRB and EFM production provided in the Complaint suggests production of Processed Magnesite is a labor-intensive process. See Compl. PP 38-41.

that is, 215%). Therefore, Plaintiffs' bold assertions appear to be contrary to the known economic theories and based on nothing but Plaintiffs' factless conjecture.

Plaintiffs' third statement seemingly related to Defendants' costs of production asserts that, "[i]n 2004, the collusive agreements of the cartel continued to maintain prices well above those of a competitive market." Compl. P 54. This allegation warrants little discussion, since it merely expresses Plaintiffs' belief that competitive **[**84]** market prices in the United States should necessarily have been lower during the Relevant Period, without any explanation as to Plaintiffs' bases for such a bold conclusion. See *Twombly, 127 S. Ct. at 1965-69* (the complaint cannot be based on self-serving interpretations of actual events, or mere labels and conclusions).

b. Currency- and Sale-Price-Based Arguments

Next, Plaintiffs try to show a link between Defendants' allegedly illegal activities and the United States trade and commerce by asserting that "[e]xporters from China . . . enjoy a competitive advantage . . . because China . . . undervalues the Yuan, making Chinese export[ed goods] relatively less expensive compared to exports from other nations." Compl. P 42. Plaintiffs argue against their own position.

The renminbi, Chinese mainland national currency, is issued by the People's Bank of China and measured in units referred to as "yuan." See Currency Trading, Wall St. J. C18 (Nov. 8, 1996); Larry L. Drumm, Changing Money: Foreign Exchange Reform in the People's Republic of China, 18 Hastings Int'l & Comp. L. Rev. 359, 384-386 (Winter 1995). Initially pegged to the U.S. dollar at 2.46 yuan per dollar, renminbi kept declining **[**85]** in its pegged exchange rate until 1994 and then kept rising (while still being pegged) until 2005, when the peg was lifted causing revaluation from 8.27 to 8.11 yuan per dollar. See <<*http://www.pbc.gov.cn/english//detail.asp?col=6400&IDcol=6400&ID=542*>>. Had the renminbi not been pegged to U.S. dollar, Chinese goods would cost American consumers more, i.e., they would be closer, price-wise, to comparable goods from the countries which did **[*874]** not undervalue their currencies. [30] It follows that, had Defendants been taking an illegal advantage of the undervalued renminbi, they should have fixed their prices just a tad below those of all other importers. However, the market data available suggests none of such price fixing tendencies.

The Government Surveys indicate that, during the Relevant Period, China and Canada were the largest United States importers with respect to CCM, while China, Australia and Austria were the largest United States importers with respect to DBM and EFM. [31] See Government Surveys - Citations. Detailing the prices charged by these importers, the Surveys show that: (a) in CCM market, Chinese prices were *substantially* below Canadian ones (i.e., $ 106 per metric ton versus $ 177 per metric ton in 1999; $ 112 versus $ 174 in 2000; $ 119 versus $ 188 in 2001; $ 111 versus $ 179 in 2002; $ 103 versus $ 171 in 2003; $ 117 versus $ 167 in 2004; and $ 142 versus $ 180 in 2005); just as (b) in DBM and EFM markets, Chinese prices were *substantially* below Australian **[**87]** and Austrian prices (i.e., $ 126 per metric ton versus $ 262 per metric ton in 1999; $ 129 versus $ 224 in 2000; $ 148 versus $ 197 in 2001; $ 141 versus $ 204 in 2002; $ 160 versus $ 236 in 2003; $ 208 versus $ 527 in 2004; and $ 212 versus $ 507 in 2005). See id. Granted the foregoing, it appears that Plaintiffs' currency-based argument is nothing but another expression of Plaintiffs' disappointment with the fact that the world prices on Chinese

---

[30] The peg was widely discussed in American academic and periodic literature since, when U.S. dollar was depreciating against other major currencies (which was rendering U.S. exports more competitive), the fact that the renminbi was pegged to the dollar automatically caused the value of renminbi to go down in foreign markets, hence minimizing the advantage U.S. products were gaining in world markets. See Wayne M. Morrison & Marc Labonte, CRS Report for Congress, **[**86]** China's Currency Peg: A Summary of the Economic Issues, at 4 (2005). Moreover, because of the peg, Chinese goods entered the United States market at significantly lower prices than other imports (making Chinese goods attractive to American consumers), while American goods were entering China's domestic markets at much higher costs (rendering these goods less attractive to Chinese consumers), thus increasing United States trade deficit. See id.

[31] While Australia was the second leading, that is, volume-wise, United States importer of DBM and EFC during 1999-2003, Austria surpassed Australia and became the second leading importer of DBM and EFM in 2004 and 2005. China remained the largest importer of CCM, DBM and EFC through the entire Relevant Period. See Government Surveys -- Citations.

Processed Magnesite were not lower than what they actually were. However, Plaintiffs' disappointment (or Plaintiffs' belief that Defendants should have made less profit by selling their Processed Magnesium even cheaper), can neither translate into a fact suggesting that Defendants' activities were anti-competitive nor link the United States trade and commerce to any illegal activities. See *Twombly, 127 S. Ct. at 1965-69* (the complaint cannot be based on self-serving conclusions). Plaintiffs' following allegation, i.e., that, "as the cartel has taken steps to restrain production and increase prices, competitors [around the world] have shown that they would follow price increases rather than undercut the new cartel price levels," Compl. P 53, **[**88]** appears not only factually unsubstantiated (since the Court is left to speculate about the prices and pricing rationale of all Processed Magnesite importers in the world) but also facially insufficient to either suggest Defendants' illegal activities or to link these activities to the United States market: the fact of parallel pricing does not satisfy the pleading requirements even with respect **[*875]** to the far-less-demanding standard posed by the Sherman Act. See *Twombly, 127 S. Ct. at 1964*.

c. Economic Arguments

According to the Complaint, "[d]uring the conspiracy, prices of [Processed Magnesite] have not followed the laws of supply and demand that exist in a competitive market. Prices have remained stable or increased during the [Relevant Period] despite low demand." Compl. P 56. The argument suggests Plaintiffs' misunderstanding of the economic **[**89]** concepts they invoke.

The "supply and demand" economic model describes the operations of market mechanism. It is graphically represented through two curved functions which, if read jointly, reflect the understanding that, in a competitive market, price will function to equalize supply and demand. See, e.g., Robert S. Pindyck, Daniel L. Rubinfeld, Microeconomics 20-24 (6th ed. 2005). The model neither requires all producers to sell comparable goods at the same price nor implies that a decline in demand would force *all* producers to lower their prices: the leeway available to sellers depends on price elasticity of their goods. See id. at 24-53 (discussing the concept of price elasticity, as well as related concept of supply/demand elasticity). Thus, if demand for certain goods begins to decline, the sellers offering their goods at the upper-bracket prices would be forced to lower them (or go out of business if competitive prices become so low to render their businesses unprofitable), while the sellers offering their goods at lower-bracket prices do not have to change their pricing policies -- and may even legitimately increase their prices -- until the demand drops to such a point that **[**90]** there is not enough market even for the goods they sell. [32] See id. at 32-53, 265-89 (discussing the relationship between elasticities, marginal revenue, short-run and log-run supplies). Hence, Plaintiffs' argument that the gradual increase in the prices of Processed Magnesite imported from China during the Relevant Period was in contradiction to the rules of supply and demand is based on an incorrect reading of economic theories. Moreover, Plaintiffs' assertion that the Processed Magnesite market suffered a *systemic* decline during the entire Relevant Period appears erroneous, since the decline occurred only in 2001, duly causing a substantial decline in importation from China. See <<*http://minerals.usgs.gov/minerals/pubs/commodity/magnesium/401400.pdf>>* ("[Only in 2001, a] general economic downturn led to decreasing demand . . . and as a result, production and imports declined by 20% . . . from the 2000 levels . . . , with the imports from China . . . declining by more than 100,000 metric tons"). This decline of 2001 followed the spike in importation that took place in 2000, see <<*http://minerals.usgs.gov/minerals/pubs/commodity/* magnesium/mgcmyb2001.pdf>> (explaining that "the reasons **[**91]** for the significant increase in imports was to replace . . . the domestically produced material . . . lost when [NRMC] closed"), and preceded a systemic **[*876]** rebound that took place after 2001. See Government Survey - Citations.

---

[32] To illustrate, if tomato growers who previously sold their crop for $ 1.00 to $ 2.00 per pound are faced with a market decline, the growers who were selling at $ 2.00 per pound would have to lower their prices in order to compete for the shrunk market (or to leave the business if they cannot afford reduction in price), while the growers who were selling at $ 1.00 per pound would still be in the position to keep increasing their prices until the decline in demand becomes such that even these growers cannot sell their entire crop (at which point, these growers would have to either compete with each other by lowering their sale prices or reduce their production).

In the same vein, Plaintiffs' final observation, i.e., that [p]rices of magnesite in the animal feed industry . . . have steadily grown . . . and risen an overall 25 percent during [the Relevant Period]," Compl. P 54, does not suggest a link between Defendants' alleged illegal activities and the United States **[**92]** trade and commerce, since the increase in supply prices in animal feed industry could have occurred for an infinite number of reasons, either entirely unrelated to Defendants' importation practices or related to Defendants' legitimate activities, or a combination of both. [33]

3. The Complaint Indicates Lack of Subject Matter Jurisdiction

As the foregoing discussion illustrates, Plaintiffs' allegations fail to state any facts linking Defendants' alleged illegal activities and the United States trade and commerce: all that Plaintiffs assert is that world Processed Magnesite prices (as well as Chinese Processed Magnesite prices) were rising during the Relevant Period. See generally Compl. However, **[**93]** such allegations cannot remove the FTAIA bar. Compare *Carpet Group, 227 F.3d at 73*. In Carpet Group, being presented with allegations (and extensive documentary evidence) indicating that defendants' specifically threatened to cease dealing with and expel from their trade associations those manufacturers/retailers that participated in the plaintiffs' *United States* trade shows and/or traded with *United States* plaintiffs, the Court of Appeals stressed that the FTAIA bar is inapplicable if:

> [t]he crux of [the] case involves conduct in the United States, not conduct abroad [because such] activities are not the type of conduct Congress intended to remove from our antitrust jurisdiction when it enacted the FTAIA.

Id. at 73. Here, in contrast, the case involves predominantly foreign conduct, i.e., Defendants' world-wide trade practices, which no statement made in the Complaint (short of Plaintiffs' self-serving conclusions), renders anticompetitive. Rather, the circumstances at hand are similar to those examined in Dee-K Enterprises in the sense that the alleged defendants' business activity was world-wide, without any focus on the United States (although, unlike here, the plaintiffs in Dee-K **[**94]** Enterprises actually alleged and proved specific facts showing that the defendants' business operations stemmed from an illegal conspiracy). See *Dee-K Enters., 299 F.3d 281*. The Court of Appeals for the Fourth Circuit, while acknowledging the conspiracy aspect, still found that liability was barred by the FTAIA because the target of defendants' operations "was a global market, [and the] links to the United States are mere drops in the sea of conduct that occurred . . . around the world." *Dee-K Enters., 299 F.3d at 295-96*. A fortiori, the allegations at hand, containing no facts suggesting an illegal conspiracy and asserting nothing more than Defendants' world-wide business operations, a small fraction of which implicated the United States market, [34] are barred by the **[*877]** FTAIA: stripped of all niceties, Plaintiffs' assertion is nothing but a circular argument first stating that Defendants' Processed Magnesite prices kept rising during the Relevant Period (along with the world's Processed Magnesite prices), then deducing from that fact that the price rise must be attributed to a conspiracy, and then following that conclusion with a deducement that the rising prices must have had a direct **[**95]** and substantial effect on the United States market *simply because the prices were rising all over the world,* United States included. See generally, Compl. However, the "direct, substantial and reasonably foreseeable effect" element of the FTAIA cannot be pled by a mere expression of Plaintiffs' disappointment with the world's pricing tendencies. In light of the foregoing, the Court will dismiss the Complaint for lack of subject matter jurisdiction, pursuant to *15 U.S.C. § 6a*.

C. As Drafted, Plaintiffs' Complaint Fails to State a Sherman Act Claim

---

[33] Since the prices on Chinese-produced CCM imported into the United States increased from $ 106 per metric ton in 1999 to $ 142 per metric ton in 2005 (that is, by 34%), while the prices on Chinese-produced DBM and EFM imported into the United States increased from $ 126 in 1999 to $ 212 in 2005 (that is, by 68%), the 25% increase in prices of magnesite in the United States animal feed industry does not appear to correspond to the changes in prices charged by importers of Chinese Processed Magnesite.

[34] As noted supra, the amount of Processed Magnesite exported from China to the United States ranged from 11% to 26% of Chinese production: 21% in 1999; 26% in 2000; 13% in 2001; 11% in 2002 and 2003; and 12% in 2004 and 2005. See Government Surveys.

Even if the Court were to ignore the deficiencies of the Complaint related to the FTAIA, the Complaint should be dismissed for failure to state a claim under the Sherman Act.

As noted supra, "[t]o establish a violation of *Section 1*, a plaintiff must prove, [inter alia]: (1) [a] concerted action by the defendants; [and (2)] that the concerted action [was] illegal." *Gordon, 423 F.3d at 207*. Here, Plaintiffs' **[**96]** statements related to Defendants' alleged combination and conspiracy consists of the following assertions: (a) in April of 2000, thirteen unidentified Chinese producers and exporters of magnesite reached a price-fixing agreement and established a certain cartel; (b) about the same time, the second cartel consisting of unspecified number of unidentified members reached their own price-fixing agreement; (c) shortly thereafter, the two cartels formed a unified cartel, which conducted an unspecified number of meetings in China and "elsewhere," one of which took place on March 22, 2003, in Shenyang, China, gathering nineteen cartel members that included an unspecified number of unidentified Defendants; and (d) during this meeting, the cartel renamed itself, reiterated its goal of maintaining and increasing Processed Magnesite prices, and successfully stabilized the prices from that point on. See Compl. PP 44-54. The foregoing is further detailed only by the names of the two original cartels, the name of the unified cartel, and the name the unified cartel assumed upon self-renaming. See id. Plaintiffs justify such paucity of information by noting that they did not and could not discover **[**97]** more information because Defendants "intentionally, and *fraudulently* concealed the existence of the combination and conspiracy" by having secret meetings, enforcing the secrecy through threats and "[i]ntentionally setting prices purportedly on a competitive basis." Id. P 59 (the Section titled "Fraudulent Concealment") (emphasis supplied).

Defendants argue that the Complaint, having the Section titled "Fraudulent Concealment" and the language asserting that Defendants "intentionally, and *fraudulently* concealed the existence of the combination and conspiracy," see id., should be read as alleging "that [D]efendants carried out their antitrust conspiracy through fraud" and, hence, scrutinized pursuant to *Rule 9(b)*. See Docket Entry No. 38, at 6-7 (citing *Lum v. Bank of America, 361 F.3d 217, 228 (3d Cir.)*, cert. denied, *543 U.S. 918, 125 S. Ct. 271, 160 L. Ed. 2d 203* ***[*878]*** *(2004))*. The Court agrees. [35]

In Lum, plaintiffs-borrowers alleged that defendants-banks, in setting their "prime plus" interest rates, violated the Sherman Act by agreeing to misrepresent that these "prime rates" were the lowest available. See *Lum, 361 F.3d at 220*. The Court of Appeals found that the borrowers' **[**99]** claim was insufficiently pled to meet the steep *Rule 9(b)* requirement. See *id. at 228*. The Lum court expressly pointed out that, in order to bring a pleading within the realm of *Rule 9(b)*, it is sufficient for the complaint to utilize the term "fraud" or "fraudulent" just in one paragraph. See id. (noting that the complaint was deemed to alleged that the banks "accomplished the goal of their conspiracy through fraud" because one paragraph in the complaint asserted that the banks "entered into a . . . conspiracy . . . designed to fraudulently and artificially inflate the 'prime rate' [and,] as a result of this . . . conspiracy . . . , the 'prime rate' . . . remained artificially high").

Here, Plaintiffs' allegations that Defendants "fraudulently concealed the existence of . . . conspiracy [while] intentionally setting prices purportedly on a competitive basis [and causing Processed Magnesite prices to be]

---

[35] Application of the strict requirements of *Rule 9* to cases involving allegations of fraud has been uniformly recognized and invariably administered by all courts. See *Leatherman v. Tarrant County Narcotics Intelligence and Coordination Unit, 507 U.S. 163, 168, 113 S. Ct. 1160, 122 L. Ed. 2d 517 (1993)*; *Swierkiewicz v. Sorema, N.A., 534 U.S. 506, 513, 122 S. Ct. 992, 152 L. Ed. 2d 1 (2002)*; *Karvelas v. Melrose Wakefield Hosp., 360 F.3d 220, 226 (1st Cir. 2004)*; **[**98]** *First Capital Asset Mgt, Inc. v. Satinwood, Inc., 385 F.3d 159, 178-179 (2nd Cir. 2004)*; *Lum, 361 F.3d at 223-224*; *Harrison v. Westinghouse Savannah River Co., 176 F.3d 776, 783-784 (4th Cir. 1999)*; *Tel-Phonic Services, Inc. v. TBS Intern., Inc., 975 F.2d 1134, 1138-1139 (5th Cir. 1992)*; *Advocacy Organization for Patients and Providers v. Auto Club Ins. Assn., 176 F.3d 315, 322 (6th Cir. 1999)*; *Ackerman v. Northwestern Mut. Life Ins. Co., 172 F.3d 467, 468-470 (7th Cir. 1999)*; *Parnes v. Gateway 2000, Inc., 122 F.3d 539, 549-550 (8th Cir. 1997)*; *Lancaster Comm. Hospital v. Antelope Valley Hospital Distr., 940 F.2d 397, 405 (9th Cir. 1991)*; *Cayman Exploration Corp. v. United Gas Pipe Line Co., 873 F.2d 1357, 1362 (10th Cir. 1989)*; *Brooks v. Blue Cross & Blue Shield of Florida, 116 F.3d 1364, 1380-1381 (11th Cir. 1997)*; *Danielsen v. Burnside-Ott Aviation Training Center, Inc., 291 U.S. App. D.C. 303, 941 F.2d 1220, 1229 (D.C. 1991)*.

stabilized at artificial and non-competitive levels," id. P 59-60, practically mimic those examined by the Third Circuit in Lum. The Court, therefore, finds the application of *Rule 9(b)* appropriate to Plaintiffs' pleading.

Pursuant to *Rule 9(b)*, a plaintiff averring a claim in fraud **[**100]** must specify "'the who, what, when, where, and how: the first paragraph of any newspaper story.'" *Advanta Corp. Sec. Litig., 180 F.3d 525, 534 (3d Cir. 1999)* (quoting *DiLeo v. Ernst & Young, 901 F.2d 624, 627 (7th Cir. 1990))*. "Although *Rule 9(b)* falls short of requiring every material detail of the fraud such as date, location, and time, plaintiffs must use 'alternative means of injecting *precision and some measure of substantiation* into their allegations of fraud.'" *In re Rockefeller Ctr. Props. Secs. Litig., 311 F.3d 198, 216 (3d Cir. 2002)* (quoting *In re Nice Sys., Ltd. Secs. Litig., 135 F. Supp. 2d 551, 577 (D.N.J. 2001)*, emphasis supplied). Here, in contrast, Plaintiffs' allegations are exceedingly vague: short of stating the names and renaming of alleged cartels, Plaintiffs' precision of pleading is limited to the date of a single meeting and a claim that one of the original cartels consisted of thirteen unidentified members. See Compl. PP 44-54. Defendants and the Court are left to guess whether any of the named Defendants was a member of either the original or unified-and-later-renamed **[*879]** cartel or attended any of the alleged meetings, the locations "in China and elsewhere," **[**101]** where the alleged meetings took place, and/or the terms of the agreements reached and whether any of the named Defendants actually accepted and/or adhered to these agreements. [36] See id.; see also, *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)* (a would-be member of a conspiracy comes within the Sherman Act when it *actually engages* in "anticompetitive conduct" by attaining, at the very least, dangerous probability of success in a relevant market). The vagueness of the allegations at hand is such that they fail to meet even the lenient Rule 8 pleading requirement. See *Twombly, 127 S. Ct. at 1969-74* (explaining that even a "plain statement" must contain "enough facts to state a claim to relief that is plausible on its face"); accord *Dura, 125 S. Ct. at 1633-34* ("it should not prove burdensome for a plaintiff who has suffered an economic loss to provide a defendant with some indication of [facts stating the elements of the claim] that the plaintiff has in mind").

Moreover, the Court is left unpersuaded by Plaintiffs' claim they "did not discover and could not discover" facts about the alleged anticompetitive conduct because of the alleged cartels' extreme secrecy (and severe enforcement of that the secrecy). See Compl. P 59. For instance, the Government Surveys, *documents publically available on a government website since 1996,* i.e., since the time long predating the events alleged in the Complaint, indicate that:

(a) "In February [of 2001], the China Magnesite Export Association ("CMEA") was formed, uniting the two separate export **[**103]** syndicates that were formed in 2000. . . . The stated goals of the CMEA [was] to stabilize magnesia export prices and ensure supply of quality products." (The Survey published in 2001).

(b) "In February [of 2003], a new Chinese magnesia export association was formed [to] control[] about 70% of the [China's] magnesite export license[e]s . . . . This new association represents the *fourth time* that China's major magnesite producers have attempted to form an association that would stabilize the country's magnesite supply by setting floor prices." (The Survey published in 2003).

(c) "In February [of 2004], another magnesite export syndicate was formed in China -- the China Magnesite Self-Disciplined Association. This is the *fifth version* of a group [trying] to regulate magnesite exports and prices since 2000. The new group represents five of the leading Chinese magnesite producers, and its goal was to maintain [DBM] prices." (The Survey published in 2004).

---

[36] Notably, Plaintiffs assert that the alleged meetings of conspirators were "coordinated," presumably, time- and location-wise, with legitimate "trade association meetings for associations in which [D]efendants [were] **[**102]** members." Compl. P 51. Plaintiffs' assertion suggests that even if Plaintiffs offered the Court facts indicating the presence of Defendants' representatives at locations where the alleged cartel meetings took place during the time of these alleged cartel meetings, these facts would still be insufficient to allege Defendants' participation in an illegal conspiracy, since this presence might equally be attributed to Defendants' attendance of their legitimate trade association meetings. See *Twombly, 127 S. Ct. at at 1966 n.5* (the line "between the factually neutral and the factually suggestive . . . must be crossed").

(d) "The Chinese magnesite export syndicate that was formed in February **[*880]** 2004 *fell apart* [in 2005] less than 1 year after its formation[: it] was the fifth in a series of associations [attempting] to control pricing . . . of magnesite." (2005 **[**104]** Survey).

Government Surveys - Citations (emphasis supplied). The above-quoted information: (a) suggests a very little degree of secrecy, if any; and (b) prompts a conclusion that well-publicized efforts to create a Chinese magnesite syndicate either yielded in a number of short-lived and independent -- for the purposes of ***antitrust law*** -- combinations (which may or may have not included any Defendant named in this action) or failed in toto due to the refusal of the invited members to accept/adhere to the proposed terms. Accord Industrial Minerals: And Then There Was One: China's Latest Magnesia Export Group, The Royal Society of Chemistry 7 (Chem. Bus. NewsBase: Indus. Minerals, Fin. Times Info., Apr. 24, 2001) (observing that Liaoning Jiayi Industrial Development Co., Ltd, an entity not named as a defendant in this action, was "spearheading" the 2001 efforts to form a "unified group [with] objectives [to obtain] price bargaining power as a group, [but] observers [were] skeptical as to the capability of the group's leaders to convince union members to forego potential individual profit for the sake of the union").

In light of availability of such information, as well as in light of the **[**105]** vagueness of Plaintiffs' allegations, the Court concludes that the Complaint fails to state a claim upon which relief can be granted even under the lenient *Rule 8* requirement and, a fortiori, under the steep requirement of *Rule 9(b)*. Compare *Lum, 361 F.3d at 228* (quoting the Supreme Court's pre-Twombly observation, made in *Poller v. Columbia Broad. Sys., 368 U.S. 464, 473, 82 S. Ct. 486, 7 L. Ed. 2d 458 (1962)*, that leniency of pleading requirement might be warranted in "antitrust [cases when the] proof is largely in the hands of the alleged conspirators, and hostile witnesses thicken the plot").

D. Plaintiffs' Motion for Default Judgment Will Be Denied

In light of the Court's finding that, as drafted, the Complaint fails to establish the Court's subject matter jurisdiction over this action and, in addition, fails to state a claim upon which relief can be granted, granting Plaintiffs' motion for default judgment would be wholly inappropriate. See *Comcast Cable Communs., 2005 U.S. Dist. LEXIS 23156, at *5-6*; *Abney, 334 F. Supp. 2d 1221*; see also *Comdyne I, 908 F.2d at 1149*; *Fehlhaber, 425 F.2d at 717*; *Bloom, 896 F. Supp. at 170 n. 3*. The Court, therefore, will deny Plaintiffs' Motion with prejudice.

VIII. LEAVE TO AMEND

A. [106] Grant of Leave Is in the Interests of Justice**

Having thoroughly examined Plaintiffs' Complaint, this Court now turns to the question of whether Plaintiffs shall be allowed to replead their claims.

HN31[] Ordinarily, the plaintiff may be granted "leave [to amend,] . . . when justice so requires." See *Foman v. Davis, 371 U.S. 178, 182, 83 S. Ct. 227, 9 L. Ed. 2d 222 (1962)*; *Lorenz v. CSX Corp., 1 F.3d 1406, 1414 (3d Cir. 1993)*. That said, "[a]llowing leave to amend where there is a stark absence of any suggestion by the plaintiffs that they have developed any facts since the action was commenced, which would, if true, cure the defects in the pleadings'" would frustrate the Court's ability to filter out lawsuits that have no factual basis. *Cal. Pub. Emples'. Ret. Sys. v. Chubb Corp., 394 F.3d 126, 164 (3d Cir. 2004)* (internal quotation marks and citations omitted). Here, the vagueness of Plaintiffs' **[*881]** pleadings causes the Court substantial concern. [37] However, at the instant juncture, the Court has no reason to conclude that the vague content of Plaintiffs' Complaint is necessarily indicative of

[37] The content of Plaintiffs' submissions made in opposition to various Defendants' motion or as reply to Defendants' opposition to Plaintiffs' motion causes the Court additional concern, since: (a) Defendants' submissions did raise, albeit without extensive discussion, the entire panoply of issues detailed or touched upon in the instant Opinion, such as the FTAIA, FSIA, abstention doctrines, the degree of precision required by *Rule 8* and the particularity of requirement of *Rule 9*, etc., but (b) Plaintiffs' responsive submissions failed to state either Plaintiffs' facts or Plaintiffs' legal position as to any of these issues.

Plaintiffs' lack of factual basis for their allegations. [38] The Court, therefore, finds it in the interests of justice to allow Plaintiffs **[**107]** an opportunity to re-plead their claims, and will grant them leave accordingly.

B. Future Litigation

Thus far, the Court has been presented with a multitude of motions (in addition to those addressed in this Opinion). See generally, Docket. Since these motions, as well as peripheral challenge embedded **[**108]** in the Motions resolved by this discussion, raise a panoply of issues, the Court finds it prudent to provide the parties with a roadmap to the future litigation in the event: (a) Plaintiffs' elect to take advantage of the leave to file an amended complaint; and (b) Defendants elect to renew some or all of the challenges extended in Defendants' motions and/or scattered in Defendants' oppositions to Plaintiffs' Motion.

Hence, in the event Plaintiffs file an amended complaint, Plaintiffs *must* incorporate in their submission evidentiary proof allowing the Court to conduct a *factual determination* (in contrast with the facial analysis conducted herein) and to conclusively satisfy itself as to presence or lack of subject matter jurisdiction over this action. In the event Defendants wish to extend challenges to the Court's subject matter jurisdiction and/or to assert that the Court shall abstain from resolving the instant matter on the grounds involving any provision, judicially-create doctrine or public policy related to a foreign sovereign's action or to Chinese regulatory or legal regime, Defendants should do so at their *first opportunity* to respond to the amended complaint.

If, and only **[**109]** if, the Court: (a) determines that it *has* proper subject matter jurisdiction over this action; and (b) finds that it shall *not* abstain from resolving it, Defendants may, if they so desire, renew their currently extended challenges in the following order:

(1) Defendants shall first raise their challenges based on the alleged lack of personal jurisdiction, insufficient service of process and improper venue;

(2) only in the event Defendants elect not to raise such challenges, of if the Court determines that in personam jurisdiction was duly obtained and, in addition, establishes that the instant matter is properly before the Court, Defendants may, if they wish, re-raise their argument that the Court shall compel arbitration of this action; and

(3) if, and only if, Defendants elect not to raise such challenge or the Court denies Defendants' request to compel arbitration, Defendants may, if **[*882]** they so desire, renew their challenges asserting Plaintiffs' lack of standing and failure to state a claim upon which relief can be granted. [39]

Plaintiffs, therefore, are strongly encouraged to draft their amended complaint with an eye on the challenges that had been raised and might be renewed by Defendants, while Defendants are encouraged to focus their efforts in accordance with the above-given roadmap. [40]

---

[38] While the FTAIA and Rule 9(b) pleading standards were well established at the time of Plaintiffs' filing of their Complaint, the Court is mindful of the fact that the Complaint was drafted without the benefit of the Supreme Court's clarifications provided later in Twombly.

[39] The Court will not address certification of Plaintiffs' putative class until and unless the issues of subject matter and in personam jurisdictions, abstention, **[**110]** venue, arbitration, standing to sue, sufficiency of substantive pleadings, etc. are conclusively resolved in favor of Plaintiffs.

[40] Plaintiffs and Defendants may contact other entities, such as United States or Chinese government agencies and/or trade associations interested in seeking amici status in order to present this Court with these entities' positions as to the issues involved in this action. An entity "seeking to appear as amicus must . . . make a showing that [its] participation is useful or otherwise desirable to the court." *Woodfin Suite Hotels, LLC v. City of Emeryville, 2007 U.S. Dist. LEXIS 4467, at *7-8 (N.D. Cal. Jan. 8, 2007)* (quoting *In re Roxford Foods Litigation, 790 F. Supp. 987, 997 (E.D. Cal. 1991)*, quoting, in turn, *United States v. Louisiana, 751 F. Supp. 608, 620 (E.D. La. 1990))*.

IX. CONCLUSION

For the foregoing reasons, Plaintiffs' Motion for default judgment, Docket Entry No. 28, will be denied **[**111]** with prejudice. Defendant's Motion, Docket Entry No. 27, will be granted.

Plaintiffs' Complaint will be dismissed, as against all Defendants, for lack of subject matter jurisdiction or, in alternative, for failure to state a claim upon which relief can be granted. Such dismissal will be without prejudice, and Plaintiffs will be granted leave to amend their Complaint. Plaintiffs' motion for certification of Plaintiffs' putative class will be denied as premature. This matter will be administratively terminated, subject to reopening in the event Plaintiffs elect to file their amended pleadings.

All Defendants' motions other than Defendant's Motion, Docket Entry No. 27, will be dismissed, as moot, without prejudice to renewal of Defendants' challenges in the event Plaintiffs file an amended complaint and this matter is reopened. Defendants' renewed challenges, if any, shall be presented in the sequence detailed herein.

An appropriate Order accompanies this Opinion.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Relevance > Relevant Evidence

HN1[] **Class Actions, Certification of Classes**

In deciding whether to certify a class under *Fed. R. Civ. P. 23*, a district court must make whatever factual and legal inquiries are necessary and must consider all relevant evidence and arguments presented by the parties.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Burdens of Proof > Preponderance of Evidence

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN2[] **Class Actions, Certification of Classes**

The decision to certify a class calls for findings by the court, not merely a "threshold showing" by a party, that each requirement of *Fed. R. Civ. P. 23* is met. Factual determinations supporting *Rule 23* findings must be made by a preponderance of the evidence.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN3[] **Class Actions, Certification of Classes**

A court must resolve all factual or legal disputes relevant to class certification, even if they overlap with the merits--including disputes touching on elements of the cause of action.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > ... > Testimony > Expert Witnesses > General Overview

Evidence > Relevance > Relevant Evidence

HN4[] **Class Actions, Certification of Classes**

In deciding whether to certify a class, a court's obligation to consider all relevant evidence and arguments extends to expert testimony, whether offered by a party seeking class certification or by a party opposing it.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN5[] **Class Actions, Certification of Classes**

Class certification is proper only if the trial court is satisfied, after a rigorous analysis, that the prerequisites of *Fed. R. Civ. P. 23* are met. *Rule 23(b)(3)* requirements demand a "close look."

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN6[] **Class Actions, Certification of Classes**

A class certification decision requires a thorough examination of the factual and legal allegations.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

Civil Procedure > Special Proceedings > Class Actions > General Overview

HN7[ ] Prerequisites for Class Action, Commonality

A class action is an exception to the usual rule that litigation is conducted by and on behalf of the individual named parties only. Class relief is peculiarly appropriate when the issues involved are common to the class as a whole and when they turn on questions of law applicable in the same manner to each member of the class.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN8[ ] Class Actions, Certification of Classes

Class certification under *Fed. R. Civ. P. 23* has two primary components. The party seeking class certification must first establish the four requirements of *Rule 23(a)*: (1) the class is so numerous that joinder of all members is impracticable (numerosity); (2) there are questions of law or fact common to the class (commonality); (3) the claims or defenses of the representative parties are typical of the claims or defenses of the class (typicality); and (4) the representative parties will fairly and adequately protect the interests of the class (adequacy). *Fed. R. Civ. P. 23(a)*. If all four requirements of *Rule 23(a)* are met, a class of one of three types (each with additional requirements) may be certified. *Fed. R. Civ. P. 23(b)(1)-(3)*.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN9[ ] Class Actions, Certification of Classes

A trial court, well-positioned to decide which facts and legal arguments are most important to each *Fed. R. Civ. P. 23* requirement, possesses broad discretion to control proceedings and frame issues for consideration under *Rule 23*. A decision on class certification may implicate highly fact-based, complex, and difficult matters. But proper discretion does not soften the rule: a class may not be certified without a finding that each *Rule 23* requirement is met.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Special Proceedings > Class Actions > Compromise & Settlement

HN10[ ] Regulated Practices, Private Actions

In some cases, class certification may force a defendant to settle rather than incur the costs of defending a class action and run the risk of potentially ruinous liability. *Fed. R. Civ. P. 23* advisory committee's note, 1998 Amendments. Accordingly, the potential for unwarranted settlement pressure is a factor a court weighs in its certification calculus. Certain antitrust class actions may present prime opportunities for plaintiffs to exert pressure upon defendants to settle weak claims.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN11[] Prerequisites for Class Action, Maintainability

Certification under Fed. R. Civ. P. 23(b)(3) is permissible when the court finds that the questions of law or fact common to class members predominate over any questions affecting only individual members, and that a class action is superior to other available methods for fairly and efficiently adjudicating the controversy. Fed. R. Civ. P. 23(b)(3). The twin requirements of Rule 23(b)(3) are known as predominance and superiority.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN12[] Prerequisites for Class Action, Maintainability

See Fed. R. Civ. P. 23(b)(3) advisory committee's note, 1966 Amendment.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN13[] Prerequisites for Class Action, Maintainability

Fed. R. Civ. P. 23(b)(3) identifies some matters pertinent to the findings of predominance and superiority: (A) the class members' interests in individually controlling the prosecution or defense of separate actions; (B) the extent and nature of any litigation concerning the controversy already begun by or against class members; (C) the desirability or undesirability of concentrating the litigation of the claims in the particular forum; and (D) the likely difficulties in managing a class action. Fed. R. Civ. P. 23(b)(3)(A)-(D).

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN14[] Prerequisites for Class Action, Commonality

For purposes of Fed. R. Civ. P. 23(b)(3), predominance tests whether proposed classes are sufficiently cohesive to warrant adjudication by representation, a standard far more demanding than the commonality requirement of Rule 23(a), requiring more than a common claim. Issues common to the class must predominate over individual issues.

Civil Procedure > Special Proceedings > Class Actions > Appellate Review

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN15[] Class Actions, Appellate Review

For purposes of Fed. R. Civ. P. 23(b)(3), because the nature of the evidence that will suffice to resolve a question determines whether the question is common or individual, a district court must formulate some prediction as to how specific issues will play out in order to determine whether common or individual issues predominate in a given case, If proof of the essential elements of the cause of action requires individual treatment, then class certification is unsuitable. Accordingly, a court of appeals examines the elements of the plaintiffs' claim "through the prism" of *Rule 23* to determine whether a district court properly certified a class.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN16[] **Class Actions, Certification of Classes**

Fed. R. Civ. P. 23(b)(3) requires a court to consider how a trial on the merits would be conducted if a class were certified.

Antitrust & Trade Law > Clayton Act > Claims

Civil Procedure > Special Proceedings > Class Actions > General Overview

Antitrust & Trade Law > Regulated Practices > Private Actions > Prioritizing Resources & Organization for Intellectual Property Act

Antitrust & Trade Law > Sherman Act > Claims

HN17[] **Clayton Act, Claims**

The elements of a claim under the Clayton Act are (1) a violation of the antitrust laws, such as *15 U.S.C.S. § 1* of the Sherman Act, (2) individual injury resulting from that violation, and (3) measurable damages. *15 U.S.C.S. § 15*. Importantly, individual injury (also known as antitrust impact) is an element of the cause of action; to prevail on the merits in a class action, every class member must prove at least some antitrust impact resulting from the alleged violation.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > Special Proceedings > Class Actions > General Overview

Securities Law > Civil Liability Considerations > Remedies > General Overview

HN18[] **Private Actions, Remedies**

In antitrust and securities fraud class actions, proof of injury (whether or not an injury occurred at all) must be distinguished from calculation of damages (which determines the actual value of the injury).

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN19[] **Private Actions, Remedies**

In antitrust cases, impact often is critically important for the purpose of evaluating *Fed. R. Civ. P. 23(b)(3)*'s predominance requirement because it is an element of the claim that may call for individual, as opposed to common, proof. In antitrust class actions, common issues do not predominate if the fact of antitrust violation and the fact of antitrust impact cannot be established through common proof. Proof of conspiracy is not proof of common injury.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Burdens of Proof > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN20[] **Private Actions, Remedies**

Antitrust plaintiffs' burden at the class certification stage is not to prove the element of antitrust impact, although in order to prevail on the merits each class member must do so. Instead, the task for the plaintiffs at class certification is to demonstrate that the element of antitrust impact is capable of proof at trial through evidence that is common to the class rather than individual to its members. Deciding this issue calls for the district court's rigorous assessment of the available evidence and the method or methods by which the plaintiffs propose to use the evidence to prove impact at trial. *Fed. R. Civ. P. 23* advisory committee's note, 2003 Amendments.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN21[] **Class Actions, Certification of Classes**

See *Fed. R. Civ. P. 23* advisory committee's note, 2003 Amendments.

Civil Procedure > Special Proceedings > Class Actions > Appellate Review

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Appeals > Standards of Review > General Overview

HN22[] **Class Actions, Appellate Review**

A court of appeals reviews a class certification order for abuse of discretion, which occurs if the district court's decision rests upon a clearly erroneous finding of fact, an errant conclusion of law or an improper application of law to fact. Whether an incorrect legal standard has been used is an issue of law to be reviewed de novo.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > Appeals > Standards of Review > Questions of Fact & Law

HN23[] **Standards of Review, Abuse of Discretion**

A district court by definition abuses its discretion when it makes an error of law.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN24[] **Private Actions, Remedies**

For purposes of determining whether to certify an antitrust class action, generally, when the prices for some customers are going up while the prices of other customers are not, there is reason to doubt that the different customers (class members) are experiencing a common impact.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Admissibility > Expert Witnesses

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN25[] **Class Actions, Certification of Classes**

For purposes of determining whether a class should be certified, a district court's conclusion that an expert's opinion is admissible does not necessarily dispose of the ultimate question of whether the district court is satisfied, by all the evidence and arguments including all relevant expert opinion, that the requirements of *Fed. R. Civ. P. 23* have been met.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN26[] **Class Actions, Certification of Classes**

Regarding the proper standard of "proof" for class certification, the United States Supreme Court has described the inquiry as a "rigorous analysis" and a "close look," but it has elaborated no further.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Burdens of Proof > Allocation

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN27[] **Class Actions, Certification of Classes**

A party seeking class certification bears the burden of establishing that all requirements of *Fed. R. Civ. P. 23* have been satisfied.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Pleading & Practice > Pleadings > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN28[] Class Actions, Certification of Classes

The requirements set out in Fed. R. Civ. P. 23 are not mere pleading rules. A court may delve beyond the pleadings to determine whether the requirements for class certification are satisfied.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Pleading & Practice > Pleadings > General Overview

Civil Procedure > ... > Pleadings > Complaints > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN29[] Class Actions, Certification of Classes

Pleading requirements are distinct from the requirements for certifying a case as a class action. A court may not and should not certify a class action without a rigorous examination of the facts to determine if the certification requirements of Fed. R. Civ. P. 23(a) and (b) have been met. The proposition that a district judge must accept all of a complaint's allegations when deciding whether to certify a class cannot be found in Rule 23 and has nothing to recommend it.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN30[] Class Actions, Certification of Classes

The plain text of Fed. R. Civ. P. 23 requires a court to "find," not merely assume, the facts favoring class certification.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN31[] Class Actions, Certification of Classes

An overlap between a class certification requirement and the merits of a claim is no reason to decline to resolve relevant disputes when necessary to determine whether a class certification requirement is met.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN32[] Class Actions, Certification of Classes

Some uncertainty ensued when the United States Supreme Court declared in Eisen v. Carlisle & Jacquelin that there is nothing in either the language or history of Fed. R. Civ. P. 23 that gives a court any authority to conduct a preliminary inquiry into the merits of a suit in order to determine whether it may be maintained as a class action. Only a few years later, in addressing whether a party may bring an interlocutory appeal when a district court denies class certification, the Supreme Court pointed out that the class determination generally involves considerations that are enmeshed in the factual and legal issues comprising the plaintiff's cause of action. Eisen is best understood to preclude only a merits inquiry that is not necessary to determine a *Rule 23* requirement.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

HN33[] **Class Actions, Certification of Classes**

Because a decision whether to certify a class requires a thorough examination of the factual and legal allegations, a court's rigorous analysis may include a preliminary inquiry into the merits, and the court may consider the substantive elements of the plaintiffs' case in order to envision the form that a trial on those issues would take. In reviewing a motion for class certification, a preliminary inquiry into the merits is sometimes necessary to determine whether the alleged claims can be properly resolved as a class action. A contested requirement is not forfeited in favor of the party seeking certification merely because it is similar or even identical to one normally decided by a trier of fact. Although the district court's findings for the purpose of class certification are conclusive on that topic, they do not bind the fact-finder on the merits.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Evidence > Burdens of Proof > General Overview

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

HN34[] **Class Actions, Prerequisites for Class Action**

When a district court properly considers an issue overlapping the merits in the course of determining whether a *Fed. R. Civ. P. 23* requirement is met, it does not do so in order to predict which party will prevail on the merits. Rather, the court determines whether the alleged claims can be properly resolved as a class action. A concern for merits-avoidance should not be talismanically invoked to artificially limit a trial court's examination of the factors necessary to a reasoned determination of whether a plaintiff has met her burden of establishing each of the *Rule 23* class action requirements.

Governments > Courts > Judicial Precedent

HN35[] **Courts, Judicial Precedent**

To the extent that the decision of a later panel of a federal court of appeals conflicts with existing circuit precedent, court panels are bound by the earlier, not the later, decision.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

Civil Procedure > ... > Injunctions > Grounds for Injunctions > Likelihood of Success

HN36[] Class Actions, Certification of Classes

A determination as to a Fed. R. Civ. P. 23 requirement is made only for purposes of class certification and is not binding on the trier of facts, even if that trier is the class certification judge. A trial judge's finding on a merits issue for purposes of a Rule 23 requirement no more binds the court to rule for the plaintiff on the ultimate merits of that issue than does a finding that the plaintiff has shown a probability of success for purposes of a preliminary injunction. The court's determination for class certification purposes may be revised (or wholly rejected) by the ultimate factfinder.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN37[] Class Actions, Certification of Classes

The evidence and arguments a district court considers in the class certification decision call for rigorous analysis. A party's assurance to the court that it intends or plans to meet the requirements is insufficient. Where a court finds, on the basis of substantial evidence, that there are serious problems appearing, it should not certify the class merely on the assurance of counsel that some solution will be found. The requirement that a district court include in its class certification order a clear and complete summary of those claims, issues, or defenses subject to class treatment provides for the full and clear articulation of the litigation's contours at the time of class certification.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN38[] Class Actions, Certification of Classes

Fed. R. Civ. P. 23(c)(1)(A), as amended in 2003, alters the timing requirement for the class certification decision. The amended rule calls for a decision on class certification at an early practicable time after a person sues or is sued as a class representative, while the prior version had required that decision be made as soon as practicable after commencement of an action. This change in language, though subtle, reflects the need for a thorough evaluation of the Rule 23 factors--for this reason the rule does not require or encourage premature certification determinations.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Discovery & Disclosure > General Overview

HN39[] Class Actions, Certification of Classes

Allowing time for limited discovery supporting class certification motions may be necessary for sound judicial administration. It may be necessary for the court to probe behind the pleadings before coming to rest on the certification question.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN40[] Class Actions, Certification of Classes

In introducing the concept of a "trial plan," *Fed. R. Civ. P. 23* advisory committee's note, 2003 Amendments, focuses attention on a rigorous evaluation of the likely shape of a trial on the issues.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN41[] **Class Actions, Certification of Classes**

See *Fed. R. Civ. P. 23* advisory committee's note, 2003 Amendments.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Discovery & Disclosure > General Overview

HN42[] **Class Actions, Certification of Classes**

See *Fed. R. Civ. P. 23* advisory committee's note, 2003 Amendments.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Discovery & Disclosure > General Overview

HN43[] **Class Actions, Certification of Classes**

The language of the 2003 amendments to *Fed. R. Civ. P. 23* authorizes the more flexible approach many courts take to class-action litigation, recognizing the important consequences to the parties of the court's decision on certification. A certain amount of discovery may be appropriate during this period to illuminate issues bearing on certification, including the nature of the issues that will be tried; whether the evidence on the merits is common to the members of the proposed class; whether the issues are susceptible to class-wide proof; and what trial-management problems the case will present.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN44[] **Class Actions, Certification of Classes**

See *Fed. R. Civ. P. 23* advisory committee's note, 2003 Amendments.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN45[] **Class Actions, Certification of Classes**

Courts should not grant class certification except after searching inquiry, and courts should not rely on later developments to determine whether certification is appropriate.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Relevance > Relevant Evidence

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN46[] **Class Actions, Certification of Classes**

While the 2003 amendments to *Fed. R. Civ. P. 23* do not alter the substantive standards for class certification, they guide a trial court in its proper task--to consider carefully all relevant evidence and make a definitive determination that the requirements of *Rule 23* have been met before certifying a class. The 2003 amendments arguably combine to permit a more extensive inquiry into whether the *Rule 23* requirements are met than was previously appropriate. These subtle changes reflect that a district court's certification order often bestows upon plaintiffs extraordinary leverage, and its bite should dictate the process that precedes it.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN47[] **Class Actions, Prerequisites for Class Action**

Because each requirement of *Fed. R. Civ. P. 23* must be met, a district court errs as a matter of law when it fails to resolve a genuine legal or factual dispute relevant to determining the requirements.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN48[] **Class Actions, Certification of Classes**

Class certification requires a finding that each of the requirements of *Fed. R. Civ. P. 23* has been met.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN49[] **Prerequisites for Class Action, Maintainability**

Fed. R. Civ. P. 23(b)(3) requires a court to find predominance.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Burdens of Proof > Preponderance of Evidence

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN50[] **Class Actions, Certification of Classes**

Factual determinations necessary to make *Fed. R. Civ. P. 23* findings must be made by a preponderance of the evidence. In other words, to certify a class a district court must find that the evidence more likely than not establishes each fact necessary to meet the requirements of *Rule 23*.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

HN51[] Class Actions, Certification of Classes

Use of the term "findings" in the context of class certification should not be confused with binding findings on the merits. A judge's consideration of merits issues at the class certification stage pertains only to that stage; the ultimate factfinder, whether judge or jury, must still reach its own determination on these issues.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > Special Proceedings > Class Actions > Appellate Review

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Appeals > Standards of Review > Clearly Erroneous Review

Civil Procedure > Appeals > Standards of Review > Questions of Fact & Law

HN52[] Standards of Review, Abuse of Discretion

In reviewing a district court's judgment on class certification, a court of appeals applies the abuse of discretion standard. A district court abuses its discretion in deciding whether to certify a class action if its decision rests upon a clearly erroneous finding of fact, an errant conclusion of law or an improper application of law to fact.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Evidence > Burdens of Proof > Preponderance of Evidence

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN53[] Standards of Review, Abuse of Discretion

Under the *Fed. R. Civ. P. 23* standards, a district court exercising proper discretion in deciding whether to certify a class will resolve factual disputes by a preponderance of the evidence and make findings that each *Rule 23* requirement is met or is not met, having considered all relevant evidence and arguments presented by the parties. The abuse of discretion standard requires the judge to exercise sound discretion--failing that, the judge's decision is not entitled to the deference attendant to discretionary rulings.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN54[] Class Actions, Certification of Classes

If a class is certified, the text of the order or an incorporated opinion must include (1) a readily discernible, clear, and precise statement of the parameters defining the class or classes to be certified, and (2) a readily discernible, clear, and complete list of the claims, issues or defenses to be treated on a class basis. *Fed. R. Civ. P. 23(c)(1)(B)*.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Burdens of Proof > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN55[] **Class Actions, Certification of Classes**

Proper analysis under *Fed. R. Civ. P. 23* requires rigorous consideration of all the evidence and arguments offered by the parties. It is incorrect to state that a plaintiff need only demonstrate an "intention" to try the case in a manner that satisfies the predominance requirement. Similarly, invoking the phrase "threshold showing" risks misapplying *Rule 23*. A "threshold showing" could signify, incorrectly, that the burden on the party seeking certification is a lenient one (such as a prima facie showing or a burden of production) or that the party seeking certification receives deference or a presumption in its favor. So defined, "threshold showing" is an inadequate and improper standard. The requirements of *Rule 23* must be met, not just supported by some evidence.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN56[] **Class Actions, Certification of Classes**

Although a trial court has discretion to grant or deny class certification, the court should not suppress "doubt" as to whether a *Fed. R. Civ. P. 23* requirement is met--no matter the area of substantive law. Accordingly, Eisenberg v. Gagnon should not be understood to encourage certification in the face of doubt as to whether a *Rule 23* requirement has been met.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN57[] **Class Actions, Certification of Classes**

The 2003 amendments to *Fed. R. Civ. P. 23* reject tentative decisions on certification and encourage development of a record sufficient for informed analysis. *Fed. R. Civ. P. 23* advisory committee's note, 2003 Amendments.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN58[] **Class Actions, Certification of Classes**

See *Fed. R. Civ. P. 23* advisory committee's note, 2003 Amendments.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Securities Law > ... > Securities Exchange Act of 1934 Actions > Implied Private Rights of Action > Class Actions

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN59[] **Regulated Practices, Private Actions**

For purposes of deciding whether to certify a class action, predominance is a test readily met in certain cases alleging consumer or securities fraud or violations of the antitrust laws. But it does not follow that a court should relax its certification analysis, or presume a requirement for certification is met, merely because a plaintiff's claims fall within one of those substantive categories. *Fed. R. Civ. P. 23(b)(3)* advisory committee's note, 1966 Amendment.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN60[] **Regulated Practices, Private Actions**

See *Fed. R. Civ. P. 23(b)(3)* advisory committee's note, 1966 Amendment.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN61[] **Regulated Practices, Private Actions**

There are no hard and fast rules regarding the suitability of a particular type of antitrust case for class action treatment. Rather, the unique facts of each case will generally be the determining factor governing certification. Actual, not presumed, conformance with the *Fed. R. Civ. P. 23* requirements remains necessary. Although a putative class may bring a type of claim that "typically" involves common questions of law or fact, careful attention to the requirements of *Rule 23* remains indispensable.

Civil Procedure > Special Proceedings > Class Actions > Appellate Review

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Appeals > Appellate Jurisdiction > Interlocutory Orders

HN62[] **Class Actions, Appellate Review**

One important reason for granting interlocutory appeals under *Fed. R. Civ. P. 23(f)* is to address novel or unsettled questions of law. Under *Fed. R. Civ. P. 23* advisory committee's note, 1998 Amendments, cases in which the certification decision turns on a novel or unsettled question of law are among the best candidates for interlocutory appeal.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Admissibility > Expert Witnesses > Daubert Standard

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN63[] **Class Actions, Certification of Classes**

Expert opinion with respect to class certification, like any matter relevant to a *Fed. R. Civ. P. 23* requirement, calls for rigorous analysis. It follows that opinion testimony should not be uncritically accepted as establishing a *Rule 23* requirement merely because the court holds the testimony should not be excluded, under Daubert or for any other reason.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > ... > Testimony > Expert Witnesses > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Evidence > Relevance > Relevant Evidence

HN64[] **Class Actions, Certification of Classes**

The view has been rejected that an expert's testimony may establish a component of a *Fed. R. Civ. P. 23* requirement simply by being not fatally flawed. A district judge is to assess all of the relevant evidence admitted at the class certification stage and determine whether each *Rule 23* requirement has been met, just as the judge would resolve a dispute about any other threshold prerequisite for continuing a lawsuit.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > ... > Testimony > Expert Witnesses > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN65[] **Class Actions, Certification of Classes**

Under *Fed. R. Civ. P. 23* a district court must be "satisfied" or "persuaded" that each requirement is met before certifying a class. Like any evidence, admissible expert opinion may persuade its audience, or it may not. This point is especially important to bear in mind when a party opposing certification offers expert opinion. The district court may be persuaded by the testimony of either (or neither) party's expert with respect to whether a certification requirement is met. Weighing conflicting expert testimony at the certification stage is not only permissible; it may be integral to the rigorous analysis *Rule 23* demands.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN66[] Class Actions, Certification of Classes

In ruling on class certification, a court may be required to resolve disputes concerning the factual setting of the case, including the resolution of expert disputes concerning the import of evidence concerning the factual setting--such as economic evidence as to business operations or market transactions.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > ... > Testimony > Expert Witnesses > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN67[] Class Actions, Certification of Classes

For purposes of determining whether to certify a class, critical evaluation of an expert's opinion as to what conclusions the evidence supports will frequently bring courts close upon the merits, but it is no more than *Fed. R. Civ. P. 23* demands. An expert who testifies, for example, that every plaintiff has suffered injury is in effect testifying that injury may be established by common proof. However, the decision as to whether the elements of a claim are susceptible to common proof is for the judge and may not be handed off to experts.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > ... > Testimony > Expert Witnesses > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

HN68[] Class Actions, Certification of Classes

Resolving expert disputes in order to determine whether a class certification requirement has been met is always a task for the court--no matter whether a dispute might appear to implicate the "credibility" of one or more experts, a matter resembling those usually reserved for a trier of fact. Rigorous analysis need not be hampered by a concern for avoiding credibility issues; findings with respect to class certification do not bind the ultimate fact-finder on the merits. A court's determination that an expert's opinion is persuasive or unpersuasive on a *Fed. R. Civ. P. 23* requirement does not preclude a different view at the merits stage of the case.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > ... > Testimony > Expert Witnesses > General Overview

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > Discovery & Disclosure > General Overview

HN69[] Class Actions, Certification of Classes

That weighing expert opinions is proper in determining whether to certify a class does not make it necessary in every case or unlimited in scope. To avoid the risk that a *Fed. R. Civ. P. 23* hearing will extend into a protracted mini-trial of substantial portions of the underlying litigation, a district judge must be accorded considerable discretion to limit both discovery and the extent of the hearing on *Rule 23* requirements. But even with some limits on discovery and the extent of the hearing, the district judge must receive enough evidence, by affidavits, documents, or testimony, to be satisfied that each *Rule 23* requirement has been met.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > ... > Testimony > Expert Witnesses > General Overview

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Evidence > Relevance > Relevant Evidence

HN70[] Class Actions, Certification of Classes

In its sound discretion, a district court may find it unnecessary to consider certain expert opinion with respect to a class certification requirement, but it may not decline to resolve a genuine legal or factual dispute because of concern for an overlap with the merits. Genuine disputes with respect to the *Fed. R. Civ. P. 23* requirements must be resolved, after considering all relevant evidence submitted by the parties. Tough questions must be faced and squarely decided, if necessary by holding evidentiary hearings and choosing between competing perspectives. The district court must resolve the disputes before deciding whether to certify the class.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN71[] Class Actions, Prerequisites for Class Action

Fed. R. Civ. P. 23 calls for definitive assessment of its requirements. The view has been rejected that a district judge may not weigh conflicting evidence and determine the existence of a *Rule 23* requirement just because that requirement is identical to an issue on the merits.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > ... > Testimony > Expert Witnesses > General Overview

Evidence > Relevance > Relevant Evidence

HN72[] Class Actions, Certification of Classes

Fed. R. Civ. P. 23 calls for consideration of all relevant evidence and arguments, including relevant expert testimony of the parties.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN73[] Class Actions, Certification of Classes

Actual, not presumed, conformance with the Fed. R. Civ. P. 23 class certification requirements is essential.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Civil Procedure > Discovery & Disclosure > General Overview

Evidence > Inferences & Presumptions > Presumptions

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN74[] Regulated Practices, Price Fixing & Restraints of Trade

Applying a presumption of impact in an antitrust class action based solely on an unadorned allegation of price-fixing would appear to conflict with the 2003 amendments to Fed. R. Civ. P. 23, which emphasize the need for a careful, fact-based approach, informed, if necessary, by discovery. Fed. R. Civ. P. 23 advisory committee's note, 2003 Amendments.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Discovery & Disclosure > General Overview

HN75[] Class Actions, Certification of Classes

See Fed. R. Civ. P. 23 advisory committee's note, 2003 Amendments.

Opinion by: SCIRICA

Opinion

[*307] OPINION OF THE COURT

SCIRICA, *Chief Judge*.

At issue in this antitrust action are the standards a district court applies when deciding whether to certify a class. We will vacate the order certifying the class in this case and remand for proceedings consistent with this opinion.

HN1[] In deciding whether to certify a class under *Fed. R. Civ. P. 23*, the district court must make whatever factual and legal inquiries are necessary and must consider all relevant evidence and arguments presented by the parties. *See* *Newton v. Merrill Lynch, Pierce, Fenner & Smith, Inc., 259 F.3d 154, 166, 167 (3d Cir. 2001)* **[**3]** (citing *Szabo v. Bridgeport Machs., Inc., 249 F.3d 672, 676 (7th Cir. 2001)*; *Manual for Complex Litigation (Third)* § 30.1 (1995)). In this appeal, we clarify three key aspects of class certification procedure. First, ***HN2***[] the decision to certify a class calls for findings by the court, not merely a "threshold showing" by a party, that each requirement of *Rule 23* is met. Factual determinations supporting *Rule 23* findings must be made by a preponderance of the evidence. Second, ***HN3***[] the court must resolve all factual or legal disputes relevant to class certification, even if they overlap with the merits--including disputes touching on elements of the cause of action. Third, ***HN4***[] the court's obligation to consider all relevant evidence and arguments extends to expert testimony, whether offered by a party seeking class certification or by a party opposing it.

I.

Purchasers of hydrogen peroxide and related chemical products brought this antitrust conspiracy action against chemical manufacturers. [1] An inorganic liquid, hydrogen peroxide is used most prominently as a bleach in the pulp and paper industry with smaller amounts appearing in chemicals and laundry products, environmental applications, textiles, **[**4]** and electronics. Hydrogen peroxide is available in solutions of different concentrations and grades depending on its intended use. Major concentrations are 35, 50, and 70 percent. The grades, roughly in order from least- to most-expensive, are: standard, food/cosmetic (which must meet FDA standards), electronic, and propulsion. All defendants sold the standard grade, but not all defendants sold all other grades. Defendants sold

[1] Named as defendants were Arkema, Inc., Arkema France S.A., FMC Corp., Degussa Corp., Degussa GmBH, Kemira Chemicals Canada, Inc., Kemira OYJ, Solvay America, Inc., Solvay Chemicals, Inc., Solvay S.A., EKA Chemicals, Inc., Akzo Nobel, Inc., and Akzo Nobel Chemicals International B.V. Degussa Corp. and Degussa **[**5]** GmBH are now known as Evonik Degussa Corp. and Evonik Degussa GmBH, respectively. The following defendants are no longer participating in this appeal because plaintiffs voluntarily dismissed them after settlement: Evonik Degussa Corp., Evonik Degussa GmBH, EKA Chemicals, Inc., Akzo Nobel, Inc., Akzo Nobel Chemicals International B.V., Solvay S.A., Solvay America, Inc., and Solvay Chemicals, Inc.

different amounts of each of the grades. Each grade has different supply and demand conditions because the grades are sold to end-users in a variety of industries with different economic characteristics. According to defendants, the different **[*308]** grades are not economic substitutes for each other, but plaintiffs disagree. Prices diverge dramatically among grades; electronic or propulsion grade can be as much as five times more expensive than standard grade.

The other two products at issue are sodium percarbonate and sodium perborate, together known as persalts, which are granular solids containing hydrogen peroxide used primarily as detergents. Among the defendants, only Solvay produced and sold sodium percarbonate in the United States during the class period. Solvay Chemicals, Degussa Corp., and FMC sold sodium perborate in the United States during the class period. Akzo, Arkema, and Kemira did not sell or produce sodium perborate in the United States during the class period.

After the United States Department of Justice and the European Commission began investigating possible violations of the antitrust laws in the hydrogen peroxide industry, [2] several plaintiffs filed class action complaints against producers of hydrogen peroxide and persalts **[**6]** under *§ 4* of the Clayton Act, *15 U.S.C. § 15*, alleging a conspiracy in restraint of trade violating *§ 1* of the Sherman Act, *15 U.S.C. § 1*. The Judicial Panel on Multidistrict Litigation transferred all cognate federal actions to the United States District Court for the Eastern District of Pennsylvania, which consolidated the cases. *See In re Hydrogen Peroxide Antitrust Litig., 374 F. Supp. 2d 1345 (J.P.M.L. 2005)*. The consolidated amended complaint alleged that during an eleven-year class period (January 1, 1994-January 5, 2005) defendants (1) communicated about prices they would charge, (2) agreed to charge prices at certain levels, (3) exchanged information on prices and sales volume, (4) allocated markets and customers, (5) agreed to reduce production capacity, (6) monitored each other, and (7) sold hydrogen peroxide at agreed prices.

The District Court denied defendants' motion to dismiss the complaint for failure to state a claim. Following extensive discovery, [3] plaintiffs moved to certify a class of direct purchasers of hydrogen peroxide, sodium perborate, and sodium percarbonate, over an eleven-year class period. In support of class certification, plaintiffs offered the opinion of an economist. Defendants, opposing class certification, offered the opinion of a different economist. Defendants separately moved to exclude the opinion of plaintiffs' economist as unreliable under *Daubert v. Merrell Dow Pharmaceuticals, Inc., 509 U.S. 579, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)*. Concluding plaintiffs' expert's opinion was admissible and supported plaintiffs' motion for class certification, the District Court certified a class of direct purchasers of hydrogen peroxide, sodium perborate, and sodium percarbonate under *Fed. R. Civ. P. 23(b)(3)*. *See In re Hydrogen Peroxide Antitrust Litig., 240 F.R.D. 163 (E.D. Pa. 2007)*. The District Court identified seven issues to be tried on a class-wide basis: (1) whether defendants **[**8]** and others engaged in a combination **[*309]** and conspiracy to fix, raise, maintain, or stabilize prices; allocate customers and markets; or control and restrict output of hydrogen peroxide, sodium perborate, and sodium percarbonate sold in the United States; (2) the identity of the participants in the alleged conspiracy; (3) the duration of the alleged conspiracy and the nature and character of defendants' acts performed in furtherance of it; (4) the effect of the alleged conspiracy on the prices of hydrogen peroxide and persalts during the class period; (5) whether the alleged conspiracy violated the Sherman Act; (6) whether the activities alleged in furtherance of the conspiracy or their effect on the prices of hydrogen peroxide and persalts during the class period injured named plaintiffs and the other members of the class; and (7) the proper means of calculating and distributing damages. The class was defined as:

> All persons or entities, including state, local and municipal government entities (but excluding defendants, their parents, predecessors, successors, subsidiaries, and affiliates as well as federal government entities) who purchased hydrogen peroxide, sodium perborate, or sodium **[**9]** percarbonate in the United States, its

---

[2] European Commission regulators charged eighteen hydrogen peroxide manufacturers with price-fixing on January 31, 2005. In 2006, two defendants in this action, Solvay S.A. and Akzo Nobel Chemicals International, B.V., agreed to plead guilty in the United States to price-fixing in the hydrogen peroxide market for the period July 1, 1998 to December 1, **[**7]** 2001. Solvay also agreed to plead guilty to price-fixing sodium perborate sold to one customer from June 1, 2000 to December 1, 2001.

[3] Defendants assert, and plaintiffs do not dispute, that they provided to plaintiffs all available sales transactions and other market data relevant to how hydrogen peroxide and persalts were bought and sold during the class period.

> territories, or possessions, or from a facility located in the United States, its territories, or possessions, directly from any of the defendants, or from any of their parents, predecessors, successors, subsidiaries, or affiliates, at any time during the period from September 14, 1994 to January 5, 2005.

We granted defendants' petition for an interlocutory appeal under *Fed. R. Civ. P. 23(f)*. [4]

II.

HN5[] Class certification is proper only "if the trial court is satisfied, after a rigorous analysis, that the prerequisites" of *Rule 23* are met. [5] *Gen. Tel. Co. of Sw. v. Falcon, 457 U.S. 147, 161, 102 S. Ct. 2364, 72 L. Ed. 2d 740 (1982)*; *see* *Beck v. Maximus, Inc., 457 F.3d 291, 297 (3d Cir. 2006)*; *see also* *Amchem Prods., Inc. v. Windsor, 521 U.S. 591, 615, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997)* (*Rule 23(b)(3)* requirements demand a "close look"). ***HN6***[] "A class certification **[**10]** decision requires a thorough examination of the factual and legal allegations." *Newton, 259 F.3d at 166*. [6]

[*310] ***HN9***[] The trial court, well-positioned to decide which facts and legal arguments are most important to each *Rule 23* requirement, possesses broad discretion to control proceedings and frame issues for consideration under *Rule 23*. *See* *Amchem, 521 U.S. at 630* (Breyer, J., concurring in part and dissenting in part) (recognizing that the decision on class **[**12]** certification may implicate "highly fact-based, complex, and difficult matters"). But proper discretion does not soften the rule: a class may not be certified without a finding that each *Rule 23* requirement is met. Careful application of *Rule 23* accords with the pivotal status of class certification in large-scale litigation, because

> denying or granting class certification is often the defining moment in class actions (for it may sound the "death knell" of the litigation on the part of plaintiffs, or create unwarranted pressure to settle nonmeritorious claims on the part of defendants) . . . .

---

[4] The District Court had jurisdiction under *28 U.S.C. §§ 1331*, *1337*. We have jurisdiction under *28 U.S.C. § 1292(e)* and *Fed. R. Civ. P. 23(f)*.

[5] Although the Supreme Court in the quoted statement addressed *Fed. R. Civ. P. 23(a)*, there is "no reason to doubt" that the language "applies with equal force to all *Rule 23* requirements, including those set forth in *Rule 23(b)(3)*." *In re Initial Pub. Offerings Sec. Litig., 471 F.3d 24, 33 n.3 (2d Cir. 2006)*.

[6] ***HN7***[] A class action is

> an exception to the usual rule that litigation is conducted by and on behalf of the individual named parties only. Class relief is peculiarly appropriate when the issues involved are common to the class as a whole and when they turn on questions of law applicable in the same manner to each member of the class. For in such cases, the class-action device saves the resources of both the courts and the parties by permitting an issue potentially affecting every [class member] to be litigated in an economical fashion under *Rule 23*.

Falcon, 457 U.S. at 155 (quotation marks and citations omitted) (alteration in original) (quoting *Califano v. Yamasaki, 442 U.S. 682, 700-01, 99 S. Ct. 2545, 61 L. Ed. 2d 176 (1979)*).

HN8[] Class certification under *Rule 23* has two primary components. The party seeking class **[**11]** certification must first establish the four requirements of *Rule 23(a)*: "(1) the class is so numerous that joinder of all members is impracticable [numerosity]; (2) there are questions of law or fact common to the class [commonality]; (3) the claims or defenses of the representative parties are typical of the claims or defenses of the class [typicality]; and (4) the representative parties will fairly and adequately protect the interests of the class [adequacy]." *Fed. R. Civ. P. 23(a)*. If all four requirements of *Rule 23(a)* are met, a class of one of three types (each with additional requirements) may be certified. *See* *Fed. R. Civ. P. 23(b)(1)-(3)*. (*Rule 23* received stylistic revisions effective December 1, 2007. *Fed. R. Civ. P. 23* advisory committee's note, 2007 Amendment. We quote the restyled version; its changes are immaterial to this appeal.)

Newton, 259 F.3d at 162; *see* id. at 167 ("Irrespective of the merits, certification decisions may have a decisive effect on litigation."); *see also* Coopers & Lybrand v. Livesay, 437 U.S. 463, 476, 98 S. Ct. 2454, 57 L. Ed. 2d 351 (1978). **HN10**[] In some cases, class certification "may force a defendant to settle rather than incur the costs of defending a class action and run the risk of potentially ruinous liability." Fed. R. Civ. P. 23 advisory committee's note, 1998 Amendments. Accordingly, the potential for unwarranted settlement pressure "is a factor we weigh in our certification calculus." Newton, 259 F.3d at 168 n.8. The Supreme **[**13]** Court recently cautioned that certain antitrust class actions may present prime opportunities for plaintiffs to exert pressure upon defendants to settle weak claims. *See* Bell Atl. Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 1967, 167 L. Ed. 2d 929 (2007).

III.

Here, the District Court found the Rule 23(a) requirements were met, a determination defendants do not now challenge. Plaintiffs sought **HN11**[] certification under Rule 23(b)(3), which is permissible when the court "finds that the questions of law or fact common to class members predominate over any questions affecting only individual members, and that a class action is superior to other available methods for fairly and efficiently adjudicating the controversy." [7] Fed. R. Civ. P. 23(b)(3). The twin requirements of Rule 23(b)(3) are known as predominance and superiority.

Only the predominance requirement is disputed in this appeal. **HN14**[] Predominance **[*311]** "tests whether proposed classes are sufficiently cohesive to warrant adjudication by representation," Amchem, 521 U.S. at 623, a standard "far more demanding" than the commonality requirement of Rule 23(a), id. at 623-24, "requiring more than a common claim," Newton, 259 F.3d at 187. "Issues common to the class must predominate over individual issues . . . ." In re The Prudential Ins. Co. of Am. Sales Practices Litig., 148 F.3d 283, 313-14 (3d Cir. 1998). **HN15**[] Because the "nature of the evidence that will suffice to resolve a question determines whether the question is common or individual," Blades v. Monsanto Co., 400 F.3d 562, 566 (8th Cir. 2005), **[**15]** "'a district court must formulate some prediction as to how specific issues will play out in order to determine whether common or individual issues predominate in a given case,'" In re New Motor Vehicles Can. Exp. Antitrust Litig., 522 F.3d 6, 20 (1st Cir. 2008) [hereinafter *New Motor Vehicles*] (quoting Waste Mgmt. Holdings, Inc. v. Mowbray, 208 F.3d 288, 298 (1st Cir. 2000)). [8] "If proof of the essential elements of the cause of action requires individual treatment, then class certification is unsuitable." Newton, 259 F.3d at 172. Accordingly, we examine the elements of plaintiffs' claim "through the prism" of Rule 23 to determine whether the District Court properly certified the class. Id. at 181.

A.

HN17[] The elements of plaintiffs' claim are (1) a violation of the antitrust laws--here, § 1 of the Sherman Act, (2) individual injury resulting from that violation, and (3) measurable damages. 15 U.S.C. § 15; Am. Bearing Co. v. Litton Indus., Inc., 729 F.2d 943, 948 (3d Cir. 1984); **[**16]** Blades, 400 F.3d at 566. Importantly, individual injury (also known as antitrust impact) is an element of the cause of action; to prevail on the merits, every class member must prove at least some antitrust impact resulting from the alleged violation. Bogosian v. Gulf Oil Corp., 561 F.2d 434, 454 (3d Cir. 1977); *see* Newton, 259 F.3d at 188 (**HN18**[] In antitrust and securities fraud class actions,

---

[7] *See* Fed. R. Civ. P. 23(b)(3) advisory committee's note, 1966 Amendment (**HN12**[] "The court is required to find, as a condition of holding that a class action may be maintained under this subdivision, that the questions common to the class predominate over the questions affecting individual members. It is only where this predominance exists that economies can be achieved by means of the class-action device.").

HN13[] Rule 23(b)(3) **[**14]** identifies some "matters pertinent to these findings": "(A) the class members' interests in individually controlling the prosecution or defense of separate actions; (B) the extent and nature of any litigation concerning the controversy already begun by or against class members; (C) the desirability or undesirability of concentrating the litigation of the claims in the particular forum; and (D) the likely difficulties in managing a class action." Fed. R. Civ. P. 23(b)(3)(A)-(D).

[8] *See* ***Sandwich Chef, Inc. v. Reliance Nat'l Indem. Ins. Co., 319 F.3d 205, 218 (5th Cir. 2003)*** **HN16**[] (Rule 23(b)(3) requires the court to "consider how a trial on the merits would be conducted if a class were certified").

"[p]roof of injury (whether or not an injury occurred at all) must be distinguished from calculation of damages (which determines the actual value of the injury)").

HN19[] In antitrust cases, impact often is critically important for the purpose of evaluating Rule 23(b)(3)'s predominance requirement because it is an element of the claim that may call for individual, as opposed to common, proof. *See* New Motor Vehicles, 522 F.3d at 20 ("In antitrust class actions, common issues do not predominate if the fact of antitrust violation and the fact of antitrust impact cannot be established through common proof"); Bell Atl. Corp. v. AT&T Corp., 339 F.3d 294, 302 (5th Cir. 2003) ("[W]here fact of damage cannot be established for every class member through proof common to the class, the need to establish antitrust liability **[**17]** for individual class members defeats Rule 23(b)(3) predominance."); *see also* Blades, 400 F.3d at 572 ("[P]roof of conspiracy is not proof of common injury.").

HN20[] Plaintiffs' burden at the class certification stage is not to prove the element of antitrust impact, although in order to prevail on the merits each class member must do so. Instead, the task for plaintiffs at class certification is to demonstrate that the element of antitrust impact is capable of proof at trial through evidence that is common to the class rather than individual **[*312]** to its members. Deciding this issue calls for the district court's rigorous assessment of the available evidence and the method or methods by which plaintiffs propose to use the evidence to prove impact at trial. *See* Fed. R. Civ. P. 23 advisory committee's note, 2003 Amendments (*HN21*[] "A critical need is to determine how the case will be tried."); *see, e.g.,* In re Linerboard Antitrust Litig., 305 F.3d 145, 155 (3d Cir. 2002) ("reject[ing] the contention that plaintiffs did not demonstrate that sufficient proof was available, for use at trial, to prove antitrust impact common to all the members of the class").

Here, the District Court found the predominance requirement **[**18]** was met because plaintiffs would be able to use common, as opposed to individualized, evidence to prove antitrust impact at trial. On appeal, defendants contend the District Court erred in three principal respects in finding plaintiffs satisfied the predominance requirement: (1) by applying too lenient a standard of proof for class certification, (2) by failing meaningfully to consider the views of defendants' expert while crediting plaintiffs' expert, and (3) by erroneously applying presumption of antitrust impact under Bogosian, 561 F.2d at 454-55.

HN22[] We review a class certification order for abuse of discretion, which occurs if the district court's decision "rests upon a clearly erroneous finding of fact, an errant conclusion of law or an improper application of law to fact." Newton, 259 F.3d at 165. "[W]hether an incorrect legal standard has been used is an issue of law to be reviewed *de novo*." In re Initial Pub. Offerings Sec. Litig., 471 F.3d 24, 32 (2d Cir. 2006) [hereinafter *IPO*] (citation omitted). [9]

B.

We summarize briefly the evidence and arguments offered to the District Court. As noted, both plaintiffs and defendants presented the opinions of expert economists. Importantly, the experts disagreed on the key disputed predominance issue--whether antitrust impact was capable of proof at trial through evidence common to the class, as opposed to individualized evidence.

Plaintiffs' expert, John C. Beyer, Ph.D., offered an opinion purporting to show that "there is common proof that can be used to demonstrate that the alleged conspiracy to raise prices, restrict output and allocate customers would have impacted all purchasers of hydrogen peroxide, sodium perborate, and sodium percarbonate." Beyer's "market analysis" suggested that conditions in the hydrogen **[**20]** peroxide industry favored a conspiracy that would have impacted the entire class. First, hydrogen peroxide and persalts are fungible, undifferentiated commodity products,

---

[9] *See* Koon v. United States, 518 U.S. 81, 100, 116 S. Ct. 2035, 135 L. Ed. 2d 392 (1996) (*HN23*[] "A district court by definition abuses its discretion when it makes an error of law."); Regents of Univ. of Cal. v. Credit Suisse First Boston (USA), Inc., 482 F.3d 372, 380 (5th Cir. 2007) **[**19]** ("Whether the district court applied the correct legal standard in reaching its decision on class certification . . . is a legal question that we review de novo." (quoting Allison v. Citgo Petroleum Corp., 151 F.3d 402, 408 (5th Cir. 1998)) (quotation marks omitted); Elcock v. Kmart Corp., 233 F.3d 734, 745 (3d Cir. 2000) ("Because we are evaluating the District Court's legal interpretation of a federal rule, our review is plenary.").

which means producers compete on price, not quality or other features. Second, production is heavily concentrated in a small group of manufacturers. [10] Third, **[*313]** there are high barriers to entry in the industry and no close economic substitutes, preventing any competitors from entering the market and undercutting prices. Fourth, defendants' geographic markets overlapped, so that purchasers would have benefitted from price competition if not for the alleged conspiracy.

Beyer also observed a "pricing structure" in the hydrogen peroxide industry which, he contended, showed prices across producers, grades and concentrations of hydrogen peroxide, and end uses moved similarly over time. [11] This, according to Beyer, suggested a conspiracy would have impacted all class members:

> My analysis of the similarity in price **[**21]** movements over time indicates that hydrogen peroxide prices charged by different manufacturers are affected by the same market forces of supply and demand . . . . These similarities in movement are sometimes referred to as "pricing structure" or "structure to prices." This analysis confirms that prices would have behaved similarly, in a consistent and generalized manner[,] to a conspiracy to fix prices at artificially high levels [and] to restrict output or to allocate customers.

Beyer also pointed to coordinated increases in list prices by defendants as evidence of common impact.

Beyer identified two "potential approaches" to estimating damages on a class-wide basis: (1) benchmark analysis, which would compare actual prices during the alleged conspiracy with prices that existed before the class period; and (2) regression analysis, through which it "may be possible . . . to estimate the relationship between price of hydrogen peroxide, sodium perborate, and sodium percarbonate and the various market forces that influence prices, including demand and supply variables." These methods, **[**22]** according to Beyer, could be used to estimate the prices plaintiffs would have faced but for the conspiracy. Beyer stated that "sufficient reliable data" exist to allow him to employ one or both of the potential approaches.

Defendants offered the opinion of their own expert economist, Janusz A. Ordover, Ph.D., to "provide an independent expert assessment of whether certification of the proposed class of Plaintiffs is appropriate in this matter." Specifically, Ordover set out to address "whether, assuming a conspiracy of the kind described in the Complaint, the Plaintiffs will be able to show, through common proof, that all or virtually all of the members of the proposed class suffered economic injury caused by the alleged conspiracy." Ordover also "opine[d] on whether a formulaic approach exists by which impact could be demonstrated and damages to the class could be reasonably calculated." Ordover responded to and disputed many of Beyer's opinions.

First, Ordover disputed Beyer's finding that hydrogen peroxide and persalts are fungible, contending that the "various grades of hydrogen peroxide . . . [and persalts] have different supply characteristics and face different demand conditions. **[**23]** The existence of supply and demand characteristics that are specific to the various grades and uses requires individualized assessment of the impact of the alleged conspiracy at least across these different grades and uses. Consequently, a finding of class-wide impact from the alleged conspiracy cannot be inferred from the mere fact of the conspiracy and from common **[*314]** evidence." Second, Ordover alleged that, over the eleven-year proposed class period, "the industry experienced prolonged periods of increasing capacity, increasing production, and an overall trend of declining real and nominal prices in the face of stable or increasing costs." Ordover disputed Beyer's pricing structure analysis, contending "there is no tendency for prices charged to individual customers to move together, which indicates that the alleged conspiracy cannot be shown to have had class-wide impact," necessitating individualized inquiries to determine whether a customer incurred impact.

Ordover also found some of defendants' price-increase announcements were ineffective--actual prices did not follow the purported announcements--suggesting list prices could not be used to measure antitrust impact on a basis common **[**24]** to the class. Ordover observed that a number of contracts for the sale of hydrogen peroxide were individually negotiated, with a variety of contract terms. And deposition testimony from named plaintiffs

---

[10] As defendants note, however, DuPont--not a named defendant--was a major producer of hydrogen peroxide (with about 25 percent market share) during the beginning of the class period until it left the market in 1999.

[11] Beyer also contended sodium perborate sales exhibited a pricing structure over the "long-term trend."

indicated list prices were sometimes disregarded. Ordover opined that the statistical methods by which Beyer proposed to demonstrate common impact and damages were not feasible. Given the record of prices and output in the industry and the apparent influence of individualized factors on pricing, "class-wide assessment of impact based on aggregate price information [was] impossible," and any formulaic approach to determine a set of "but-for prices" would have to incorporate a multitude of different "variables," defeating any reasonable notion of proof common to the class.

Significantly, Ordover presented empirical analysis of the data on individual sales transactions and found that different customers purchasing the two most common grades and three most common concentrations from the same hydrogen peroxide producer in a given year were as likely to experience a decline in actual prices over the year as an increase, while other similarly situated customers experienced no change in price. **[**25]** Defendants contend this disparity goes to the core of the predominance issue--plaintiffs and their expert, Beyer, failed to "explain . . . how or which common proof could be used to determine that the alleged conspiracy impacted customers whose prices declined, as well as customers whose prices increased or stayed the same, over the same time period." [12] Br. of Appellant at 5. Beyer, according to defendants, only "promised" to come up with a method to overcome this obstacle, without showing or even suggesting how it might be done. Defendants contend the market analysis is "generic" and note it would apply equally to a large number of industries. With respect to the pricing structure analysis, they contend Beyer's use of average prices, rather than those of individual transactions, to show pricing structure, was erroneous because it glossed over differences in actual prices. The theme of defendants' argument is that the data, which Ordover analyzed, rebut Beyer's "theory" that common proof was feasible. Beyer's and Ordover's analyses are irreconcilable.

In addition to presenting Ordover's testimony, defendants moved to exclude Beyer's testimony as unreliable, citing *Daubert v. Merrell Dow Pharmaceuticals, Inc., 509 U.S. 579, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)*. [13] **[*315]** The District Court denied the *Daubert* motion in its memorandum and order certifying the class.

C.

The District Court concluded the predominance requirement was met. It held that "[e]ither [Beyer's] market analysis or the pricing structure analysis would likely be independently sufficient at this stage. Plaintiffs and Dr. Beyer have provided us with both. Despite defendants' claims to the contrary, we should require no more of plaintiffs in a motion for class **[**28]** certification." Because hydrogen peroxide is fungible, the court found, "purchasing decisions [are] made primarily on the basis of price rather than quality or specific properties," and "price is by far the most significant means of competition among producers and an agreement to control prices will seriously hinder competition." The court rejected defendants' objection that different grades and concentrations of hydrogen peroxide called into question its fungibility. The prices of the grades and concentrations were related to each other, so in the view of the court, the differences would not preclude common proof of antitrust impact. Defendants' high combined market share meant that "no competitor who was not a member of the conspiracy would be able to take up the slack and keep prices stable." The high barriers to entry and lack of economic substitutes implied "a conspiracy such as the one alleged here [could] continue indefinitely with limited risk that a new competitor would enter the market and undercut the agreed-upon prices." Also, the court accepted Beyer's opinion that "prices in the hydrogen peroxide industry moved similarly over time and the industry exhibited structure **[**29]** in pricing." The

[12] *See* ABA Section of ***Antitrust Law***, *Econometrics* 210 (2005) (***HN24***[] "Generally, when the prices for some customers are going up while the prices **[**26]** of other customers are not, there is reason to doubt that the different customers (class members) are experiencing a common impact.").

[13] Before the District Court, both parties agreed *Fed. R. Evid. 702* and *Daubert* should be applied to assess whether Beyer's testimony should be admitted for consideration. On appeal, neither party argues otherwise, and defendants do not now challenge the District Court's denial of the *Daubert* motion. (The District Court stated that "because the evidence is here offered for the limited purpose of class certification, our inquiry is perhaps less exacting than it might be for evidence to be presented at trial.") As we explain, however, ***HN25***[] a district court's conclusion that an expert's opinion is admissible does not necessarily dispose of the ultimate question--whether the district court is satisfied, by all the evidence and arguments including all relevant expert opinion, that the requirements of *Rule 23* **[**27]** have been met.

court added that it believed "plaintiffs would be able to show antitrust impact on all purchasers merely by showing that defendants kept list prices that were artificially high because of their conspiracy."

The District Court held that it was sufficient that Beyer proposed reliable methods for proving impact and damages; it did not matter that Beyer had not completed any benchmark or regression analyses, and the court would not require plaintiffs to show at the certification stage that either method would work.

IV.

A.

Defendants contend the District Court applied too lenient a standard of proof with respect to the *Rule 23* requirements by (1) accepting only a "threshold showing" by plaintiffs rather than making its own determination, (2) requiring only that plaintiffs demonstrate their "intention" to prove impact on a class-wide basis, and (3) singling out antitrust actions as appropriate for class treatment even when compliance with *Rule 23* is "in doubt."

Although it is clear that the party seeking certification must convince the district **[*316]** court that the requirements of *Rule 23* are met, little guidance is available on the subject of ***HN26***[] the proper standard of "proof" for class **[**30]** certification. [14] The Supreme Court has described the inquiry as a "rigorous analysis," *Falcon, 457 U.S. at 161*, and a "close look," *Amchem, 521 U.S. at 615*, but it has elaborated no further.

1.

The following principles guide a district court's class certification analysis. First, ***HN28***[] the requirements set out in *Rule 23* are not mere pleading rules. *Szabo, 249 F.3d at 675-77*. The court may 'delve beyond the pleadings to determine whether the requirements for class certification are satisfied.'" *Newton, 259 F.3d at 167* (quoting 5 James Wm. Moore et al., *Moore's Federal Practice § 23.61 [5]*); *see Beck, 457 F.3d at 297* (same); *see also Johnston v. HBO Film Mgmt., Inc., 265 F.3d 178, 189 (3d Cir. 2001)* (district court properly "examine[d] the factual record underlying plaintiffs' allegations in making its certification decision"). [15]

---

[14] The burden of proof rests on the movant. *See Unger v. Amedisys Inc., 401 F.3d 316, 320 (5th Cir. 2005)* (***HN27***[] "The party seeking certification bears the burden of establishing that *all* requirements of *Rule 23* have been satisfied.").

[15] *See* 5 James Wm. Moore et al., *Moore's Federal Practice § 23.61[1]* (3d ed. 2008) (***HN29***[] "Pleading requirements are distinct from the requirements **[**31]** for certifying a case as a class action. A court may not and should not certify a class action without a rigorous examination of the facts to determine if the certification requirements of *Rule 23(a)* and *(b)* have been met." (citation omitted)); *Szabo, 249 F.3d at 675* ("The proposition that a district judge must accept all of the complaint's allegations when deciding whether to certify a class cannot be found in *Rule 23* and has nothing to recommend it"); *see also Unger, 401 F.3d at 321*) (***HN30***[] "The plain text of *Rule 23* requires the court to 'find,' not merely assume, the facts favoring class certification." (quoting *Fed. R. Civ. P. 23(b)(3)*)); *Gariety v. Grant Thornton, LLP, 368 F.3d 356, 365 (4th Cir. 2004)* ("If it were appropriate for a court simply to accept the allegations of a complaint at face value in making class action findings, every complaint asserting the requirements of *Rule 23(a)* and *(b)* would automatically lead to a certification order, frustrating the district court's responsibilities for taking a 'close look' at relevant matters, for conducting a 'rigorous analysis' of such matters, and for making 'findings' that the requirements of *Rule 23* have been satisfied." (citations **[**32]** omitted)); *Tardiff v. Knox County, 365 F.3d 1, 4-5 (1st Cir. 2004)* ("It is sometimes taken for granted that the complaint's allegations are necessarily controlling; but class action machinery is expensive and in our view a court has the power to test disputed premises early on if and when the class action would be proper on one premise but not another."). In *Szabo*, the Court of Appeals for the Seventh Circuit offered this persuasive explanation:

> The reason why judges accept a complaint's factual allegations when ruling on motions to dismiss under *Rule 12(b)(6)* is that a motion to dismiss tests the legal sufficiency of a pleading. Its *factual* sufficiency will be tested later--by a motion for summary judgment under *Rule 56*, and if necessary by trial. By contrast, an order certifying a class usually is the district judge's last word on the subject; there is no later test of the decision's factual premises (and, if the case is settled, there could not be such an examination even if the district judge viewed the certification as provisional).

HN31[] An overlap between a class certification requirement and the merits of a claim is no reason to decline to resolve relevant disputes **[**33]** when necessary to determine whether a class certification requirement is met. ***HN32***[] Some uncertainty ensued when the Supreme Court declared in *Eisen v. Carlisle & Jacquelin, 417 U.S. 156, 177, 94 S. Ct. 2140, 40 L. Ed. 2d 732 (1974)*, that there is "nothing in either the language or history of *Rule 23* that gives a court any authority to conduct a preliminary inquiry into the merits of a suit in **[*317]** order to determine whether it may be maintained as a class action." Only a few years later, in addressing whether a party may bring an interlocutory appeal when a district court denies class certification, [16] the Supreme Court pointed out that "the class determination generally involves considerations that are 'enmeshed in the factual and legal issues comprising the plaintiff's cause of action.'" *Livesay, 437 U.S. at 469* (quoting *Mercantile Nat'l Bank v. Langdeau, 371 U.S. 555, 558, 83 S. Ct. 520, 9 L. Ed. 2d 523 (1963))*. As we explained in *Newton, 259 F.3d at 166-69*, *Eisen* is best understood to preclude only a merits inquiry that is not necessary to determine a *Rule 23* requirement. Other courts of appeals have agreed. [17] ***HN33***[] Because the decision whether to certify a class "requires a thorough examination of the factual and legal allegations," *id. at 166*, the court's **[**34]** rigorous analysis may include a "preliminary inquiry into the merits," *id. at 168*, and the court may "consider the substantive elements of the plaintiffs' case in order to envision the form that a trial on those issues would take," *id. at 166* (quoting 5 *Moore's Federal Practice § 23.46[4]*) **[*318]** (quotation marks omitted). *See id. at 168* ("In reviewing a motion for class certification, a preliminary inquiry into the merits is sometimes necessary to determine whether the alleged claims can be properly resolved as a class action."). [18] A contested requirement is not forfeited in favor of the party seeking certification merely because it is

---

249 F.3d at 675-76.

[16] *R. Civ. P. 23(f)*, which provides for interlocutory appeals from class certification orders.

[17] *See, e.g., New Motor Vehicles, 522 F.3d at 24* ("It is a settled question that some inquiry into the merits at the class certification stage is not only permissible but appropriate to the extent that the merits overlap the *Rule 23* **[**35]** criteria."); *Oscar Private Equity Invs. v. Allegiance Telecom, Inc., 487 F.3d 261, 268 (5th Cir. 2007)* ("*Eisen* did not drain *Rule 23* of all rigor. A district court still must give full and independent weight to each *Rule 23* requirement, regardless of whether that requirement overlaps with the merits."); *Regents of Univ. of Cal., 482 F.3d at 380* ("[W]e may address arguments that implicate the merits of plaintiffs' cause of action insofar as those arguments also implicate the merits of the class certification decision."); *IPO, 471 F.3d at 41* ("With *Eisen* properly understood to preclude consideration of the merits only when a merits issue is unrelated to a *Rule 23* requirement, there is no reason to lessen a district court's obligation to make a determination that every *Rule 23* requirement is met before certifying a class just because of some or even full overlap of that requirement with a merits issue."); *Gariety, 368 F.3d at 366* ("[W]hile an evaluation of the merits to determine the strength of plaintiffs' case is not part of a *Rule 23* analysis, the factors spelled out in *Rule 23* must be addressed through findings, even if they overlap with issues on the merits."); *Szabo, 249 F.3d at 677* **[**36]** ("[N]othing in the 1966 amendments to *Rule 23*, or the opinion in *Eisen*, prevents the district court from looking beneath the surface of a complaint to conduct the inquiries identified in that rule and exercise the discretion it confers."); *see also* 7AA Charles Alan Wright, Arthur R. Miller & Mary Kay Kane, *Federal Practice and Procedure* § 1785 (3d ed. 2005), at 379; Geoffrey P. Miller, *Review of the Merits in Class Action Certification*, *33 Hofstra L. Rev. 51, 63 (2004)* ("It would be bizarre to conclude that the framers of *Rule 23* would have set forth a careful set of prerequisites for class certification only to deny trial courts the ability to apply those prerequisites in a factually-based and reasoned manner."); *New Motor Vehicles, 522 F.3d at 17* ("It would be contrary to the 'rigorous analysis of the prerequisites established by *Rule 23* before certifying a class' to put blinders on as to an issue simply because it implicates the merits of the case." (quoting *Smilow v. Sw. Bell Mobile Sys., Inc., 323 F.3d 32, 38 (1st Cir. 2003))*). ***HN34***[] When a district court properly considers an issue overlapping the merits in the course of determining whether a *Rule 23* requirement is met, it does not **[**37]** do so in order to predict which party will prevail on the merits. Rather, the court "determine[s] whether the alleged claims can be properly resolved as a class action." *Newton, 259 F.3d at 168*; *see IPO, 471 F.3d at 39 n.10*. A concern for merits-avoidance "should not be talismanically invoked to artificially limit a trial court's examination of the factors necessary to a reasoned determination of whether a plaintiff has met her burden of establishing each of the *Rule 23* class action requirements." *Castano v. Am. Tobacco Co., 84 F.3d 734, 744 n.17 (5th Cir. 1996)* (quoting *Love v. Turlington, 733 F.2d 1562, 1564 (11th Cir. 1984))* (quotation marks omitted).

[18] *Chiang v. Veneman, 385 F.3d 256, 262, 46 V.I. 679 (3d Cir. 2004)*, decided after *Newton* and *Johnston*, cited *Eisen* for the proposition that "in determining whether a class will be certified, the substantive allegations of the complaint must be taken as true." No supporting analysis of *Rule 23* jurisprudence accompanied this statement, which contradicts and conflicts with *Newton, Johnston*, and *Szabo* (which we relied upon in *Newton*). ***HN35***[] "To the extent that the decision of a later panel conflicts with

similar or even identical to one normally decided by a trier of fact. Although the district court's findings for the purpose of class certification are conclusive on that topic, they do not bind the fact-finder on the merits. [19]

HN37[] The evidence and arguments a district court considers in the class certification decision call for rigorous analysis. A party's assurance to the court that it intends or plans to meet the requirements is insufficient. *See* id. at 191 ("[W]here the court finds, on the basis of substantial evidence as here, that there are serious problems *now appearing*, it should not certify the class merely on **[**39]** the assurance of counsel that some solution will be found." (quoting *Windham v. Am. Brands, Inc., 565 F.2d 59, 70 (4th Cir. 1977))* (quotation marks omitted); *Wachtel v. Guardian Life Ins. Co., 453 F.3d 179, 184, 186 (3d Cir. 2006)* (the requirement that a district court include in its class certification order "a clear and complete summary of those claims, issues, or defenses subject to class treatment" provides for the "full and clear articulation of the litigation's contours at the time of class certification").

Support for our analysis is drawn from amendments to *Rule 23* that took effect in 2003. First, *HN38*[] amended *Rule 23(c)(1)(A)* altered the timing requirement for the class certification decision. The amended rule calls for a decision on class certification "[a]t an early practicable time after a person sues or is sued as a class representative," while the prior version had required that decision be made "as soon as practicable after commencement of an action." We recognized in *Weiss v. Regal Collections, 385 F.3d 337, 347 (3d Cir. 2004)*, that this change in language, though subtle, reflects the need for a thorough evaluation of the *Rule 23* factors--for this reason the rule does not **[**40]** "require or encourage premature certification determinations." We explained:

> *Fed. R. Civ. P. 23* directs that certification decisions be made "at an early practicable time." *Fed. R. Civ. P. 23(c)(1)(A)*. This recent amendment replaced the language of the old rule: The former "'as soon as practicable' exaction neither reflect[ed] prevailing practice nor **[*319]** capture[ed] the many valid reasons that may justify deferring the initial certification decision." *See Fed. R. Civ. P. 23(c)(1)(A)* Advisory Committee Notes. . . .
>
> *HN39*[] Allowing time for limited discovery supporting certification motions may . . . be necessary for sound judicial administration. *See* [*Newton, 259 F.3d at 166*] ("[I]t may be necessary for the Court to probe behind the pleadings before coming to rest on the certification question.") (quoting [*Falcon, 457 U.S. at 160*]) . . . .

Id. at 347-48 n.17; *see Gariety, 368 F.3d at 365* (noting the change). [20] Relatedly, *HN40*[] in introducing the concept of a "trial plan," the Advisory Committee's 2003 note focuses attention on a rigorous evaluation of the likely shape of a trial on the issues:

---

existing circuit precedent, we are bound by the **[**38]** earlier, not the later, decision." *United States v. Monaco, 23 F.3d 793, 803 (3d Cir. 1994)*.

[19] [T]he *HN36*[] determination as 19 to a *Rule 23* requirement is made only for purposes of class certification and is not binding on the trier of facts, even if that trier is the class certification judge." *IPO, 471 F.3d at 41* (citing *Gariety, 368 F.3d at 366*); *see id. at 39* ("A trial judge's finding on a merits issue *for purposes of a Rule 23 requirement* no more binds the court to rule for the plaintiff on the ultimate merits of that issue than does a finding that the plaintiff has shown a probability of success for purposes of a preliminary injunction."); *Unger, 401 F.3d at 323* ("[T]he court's determination for class certification purposes may be revised (or wholly rejected) by the ultimate factfinder . . . .").

[20] The Advisory Committee's note explains:

> *HN42*[] Time may be needed to gather information necessary to make the certification decision. Although an evaluation of the probable outcome on the merits is not properly part of the certification decision, discovery in aid of the certification decision often includes information required to identify the nature of the issues that actually will be presented at trial. In this sense it is appropriate to conduct controlled discovery into the "merits," limited to those aspects relevant to making the certification decision on an informed basis. Active judicial supervision may be required to achieve the most effective balance that expedites an informed certification determination without forcing an artificial and ultimately wasteful division between "certification discovery" and "merits discovery."

Fed. R. Civ. P. 23 advisory committee's note, 2003 Amendments.

> HN41[] A critical need is to determine how the case will be tried. An increasing number of courts require a party requesting [**41] class certification to present a "trial plan" that describes the issues likely to be presented at trial and tests whether they are susceptible of class-wide proof.

Fed. R. Civ. P. 23 advisory committee's note, 2003 Amendments.

Additionally, the 2003 amendments eliminated the language that had appeared in Rule 23(c)(1) providing that a class certification "may be conditional." [21] The Advisory Committee's note explains: [**43] HN44[] "A court that is not satisfied that the requirements of Rule 23 have been met should refuse certification until they have been met." The Standing Committee on Rules of Practice and Procedure advised:

> The provision for conditional class certification is deleted to avoid the unintended suggestion, which some courts have adopted, that class certification may be granted on a tentative basis, even if it is unclear that the rule requirements are satisfied.

[*320] *Committee Report, supra*, at 12; *see* 5 Moore's Federal Practice § 23.80[2] ("The 2003 amendment clarifies that HN45[] courts should not grant certification except after searching inquiry, and that courts should not rely on later developments to determine whether certification is appropriate.").

HN46[] While these amendments do not alter the substantive standards for class certification, they guide the trial court in its proper task--to consider carefully all relevant evidence and make a definitive determination that the requirements **[**44]** of Rule 23 have been met before certifying a class. *See* IPO, 471 F.3d at 39 (2003 amendments "arguably combine to permit a more extensive inquiry into whether Rule 23 requirements are met than was previously appropriate"); Oscar, 487 F.3d at 267 (noting that these "subtle changes" reflect that "a district court's certification order often bestows upon plaintiffs extraordinary leverage, and its bite should dictate the process that precedes it").

To summarize: HN47[] because each requirement of Rule 23 must be met, a district court errs as a matter of law when it fails to resolve a genuine legal or factual dispute relevant to determining the requirements.

2.

HN48[] Class certification requires a finding that each of the requirements of Rule 23 has been met. [22] *See* Unger, 401 F.3d at 321 ("The plain text of Rule 23 requires the court to 'find,' not merely assume, the facts favoring

---

As the Standing Committee on Rules of Practice and Procedure explained in its **[**42]** report proposing this amendment, HN43[] the new language

> authorizes the more flexible approach many courts take to class-action litigation, recognizing the important consequences to the parties of the court's decision on certification. The current rule's emphasis on dispatch in making the certification decision has, in some circumstances, led courts to believe that they are overly constrained in the period before certification. A certain amount of discovery may be appropriate during this period to illuminate issues bearing on certification, including the nature of the issues that will be tried; whether the evidence on the merits is common to the members of the proposed class; whether the issues are susceptible to class-wide proof; and what trial-management problems the case will present.

Report of the Judicial Conference Committee on Rules of Practice and Procedure to the Chief Justice of the United States and Members of the Judicial Conference of the United States 10 (2002) [hereinafter *Committee Report*].

[21] Although the language 21 allowing for "conditional" certification has been removed, Fed. R. Civ. P. 23(c)(1)(C) provides that "[a]n order that grants or denies class certification may be altered or amended before final judgment."

[22] As the Court of Appeals for the First Circuit has explained,

> [Some] circuits' HN51[] use of the term 'findings' in this context should not be confused with binding findings on the merits. The judge's consideration of merits issues at the class certification stage pertains only to that stage; the ultimate factfinder, whether judge or jury, must still reach its own determination on these issues.

class certification."); Gariety, 368 F.3d at 365 (HN49[] Rule 23(b)(3) requires the court to find predominance). HN50[] Factual determinations necessary to make Rule 23 findings must be made by a preponderance of the evidence. In other words, to certify a class the district court must find that the evidence more likely than not establishes **[**45]** each fact necessary to meet the requirements of Rule 23. *See* Teamsters Local 445 Freight Div. Pension Fund v. Bombardier Inc., 546 F.3d 196, 202 (2d Cir. 2008).

HN52[] In reviewing a district court's judgment on class certification, we apply the abuse of discretion standard. A district court abuses its discretion in deciding whether to certify a class action if its "decision rests upon a clearly erroneous finding of fact, an errant conclusion of law or an improper application of law to fact." In re Gen. Motors Corp. Pick-Up Truck Fuel Tank Prods. Liab. Litig., 55 F.3d 768, 783 (3d Cir. 1995) (citation and quotation marks omitted); *see* Newton, 259 F.3d at 165. HN53[] Under these Rule 23 standards, a district court exercising proper discretion in deciding whether to certify a class **[**46]** will resolve factual disputes by a preponderance of the evidence and make findings that each Rule 23 requirement is met or is not met, having considered all relevant evidence and arguments presented by the parties. The abuse of discretion standard requires the judge to exercise sound discretion--failing that, the judge's decision is not entitled to the deference attendant to discretionary rulings.

HN54[] If a class is certified, "the text of the order or an incorporated opinion must include (1) a readily discernible, clear, and precise statement of the parameters defining **[*321]** the class or classes to be certified, and (2) a readily discernible, clear, and complete list of the claims, issues or defenses to be treated on a class basis." Wachtel, 453 F.3d at 187; *see* Fed. R. Civ. P. 23(c)(1)(B).

B.

Although the District Court properly described the class certification decision as requiring "rigorous analysis," some statements in its opinion depart from the standards we have articulated. The District Court stated, "So long as plaintiffs demonstrate their intention to prove a significant portion of their case through factual evidence and legal arguments common to all class members, that will now suffice. **[**47]** It will not do here to make judgments about whether plaintiffs have adduced enough evidence or whether their evidence is more or less credible than defendants'." With respect to predominance, the District Court stated that "[p]laintiffs need only make a threshold showing that the element of impact will predominantly involve generalized issues of proof, rather than questions which are particular to each member of the plaintiff class." (quoting Lumco Indus., Inc. v. Jeld-Wen, Inc., 171 F.R.D. 168, 174 (E.D. Pa. 1997)). As we have explained, HN55[] proper analysis under Rule 23 requires rigorous consideration of all the evidence and arguments offered by the parties. It is incorrect to state that a plaintiff need only demonstrate an "intention" to try the case in a manner that satisfies the predominance requirement. Similarly, invoking the phrase "threshold showing" risks misapplying Rule 23. A "threshold showing" could signify, incorrectly, that the burden on the party seeking certification is a lenient one (such as a prima facie showing or a burden of production) or that the party seeking certification receives deference or a presumption in its favor. So defined, "threshold showing" is an inadequate **[**48]** and improper standard. "[T]he requirements of Rule 23 must be met, not just supported by some evidence." IPO, 471 F.3d at 33; *see e.g.*, id. at 40, 42 (rejecting the view that a party seeking certification need only make "some showing" with respect to the Rule 23 requirements).

Citing Cumberland Farms, Inc. v. Browning-Ferris Industries, 120 F.R.D. 642, 645 (E.D. Pa. 1988), the District Court reasoned, "[i]t is well recognized that private enforcement of [antitrust] laws is a necessary supplement to government action. With that in mind, in an alleged horizontal price-fixing conspiracy case when a court is in doubt as to whether or not to certify a class action, the court should err in favor of allowing the class." *See also* Eisenberg v. Gagnon, 766 F.2d 770, 785 (3d Cir. 1985) (citing Kahan v. Rosenstiel, 424 F.2d 161, 169 (3d Cir. 1970)) (advising that in a "doubtful" case when presented with a putative securities class action, court should err, if at all, in favor of certification). These statements invite error. HN56[] Although the trial court has discretion to grant or deny class certification, the court should not suppress "doubt" as to whether a Rule 23 requirement is met--no matter the **[**49]** area of substantive law. Accordingly, Eisenberg should not be understood to encourage

---

New Motor Vehicles, 522 F.3d at 24.

certification in the face of doubt as to whether a Rule 23 requirement has been met. *Eisenberg* pre-dates the **HN57**[] recent amendments to Rule 23 which, as noted, reject tentative decisions on certification and encourage development of a record sufficient for informed analysis. *See* Fed. R. Civ. P. 23 advisory committee's note, 2003 Amendments (**HN58**[] "A court that is not satisfied that the requirements of Rule 23 have been met should refuse certification until they have been met."). We recognize the Supreme Court has observed that **HN59**[] "[p]redominance is a **[*322]** test readily met in certain cases alleging consumer or securities fraud or violations of the antitrust laws." Amchem, 521 U.S. at 625. But it does not follow that a court should relax its certification analysis, or presume a requirement for certification is met, merely because a plaintiff's claims fall within one of those substantive categories. *See* Fed. R. Civ. P. 23(b)(3) advisory committee's note, 1966 Amendment (**HN60**[] "Private damage claims by numerous individuals arising out of concerted antitrust violations may or may not involve predominating common questions."); Robinson v. Tex. Auto. Dealers Ass'n, 387 F.3d 416, 420-21 (5th Cir. 2004) **[**50]** (**HN61**[] "There are no hard and fast rules . . . regarding the suitability of a particular type of antitrust case for class action treatment. Rather, the unique facts of each case will generally be the determining factor governing certification." (citations and quotation marks omitted)). "[A]ctual, not presumed, conformance" with the Rule 23 requirements remains necessary. Newton, 259 F.3d at 167 (quoting Falcon, 457 U.S. at 160); *see, e.g.,* E. Tex. Motor Freight Sys., Inc. v. Rodriguez, 431 U.S. 395, 405, 97 S. Ct. 1891, 52 L. Ed. 2d 453 (1977) (although a putative class may bring a type of claim that "typically" involves common questions of law or fact, "careful attention to the requirements of [Rule 23] remains . . . indispensable").

To the extent that the District Court's analysis reflects application of incorrect standards, remand is appropriate. We recognize that the able District Court did not have the benefit of the standards we have articulated. Faced with complex, fact-intensive disputes, trial courts have expended considerable effort to interpret and apply faithfully the requirements of Rule 23. **HN62**[] One important reason for granting interlocutory appeals under Fed. R. Civ. P. 23(f) is to address "novel or unsettled questions **[**51]** of law" like those presented here. Newton, 259 F.3d at 164; *see* Fed. R. Civ. P. 23 advisory committee's note, 1998 Amendments (cases in which "the certification decision turns on a novel or unsettled question of law" are among the best candidates for interlocutory appeal).

C.

Defendants contend the District Court erred as a matter of law in failing to consider the expert testimony of defendants' expert, Ordover, instead deferring to the opinion of plaintiffs' expert, Beyer. Plaintiffs do not dispute that a district court may properly consider expert opinion with respect to Rule 23 requirements at the class certification stage, but maintain that in this case the District Court considered and rejected Ordover's opinion and defendants' arguments based on it.

In addressing defendants' *Daubert* motion to exclude Beyer's opinion, the court discussed whether it should consider Ordover's opinion in deciding whether Beyer's opinion was admissible. The court stated it would be improper to "weigh the relative credibility of the parties' experts"--in other words, to weigh Ordover's opinion against Beyer's--for the purpose of deciding whether to admit or exclude Beyer's opinion. Concluding Beyer's **[**52]** opinion was admissible, the court denied the *Daubert* motion. But in addressing the Rule 23 requirements, the court did not confront Ordover's analysis or his substantive rebuttal of Beyer's points. Nor did the court address Ordover's finding of substantial price disparities among similarly situated purchasers of hydrogen peroxide. The court appears to have assumed it was barred from weighing Ordover's opinion against Beyer's for the purpose of deciding whether the requirements of Rule 23 had been met. This was erroneous.

[*323] 1.

HN63[] Expert opinion with respect to class certification, like any matter relevant to a Rule 23 requirement, calls for rigorous analysis. *See* West, 282 F.3d at 938. [23] It follows that opinion testimony should not be uncritically

---

[23] *See* Kermit Roosevelt III, *Defeating Class Certification in Securities Fraud Actions*, 22 Rev. Litig. 405, 425 (2003) (**HN67**[] "Critical evaluation of an expert's opinion **[**55]** as to what conclusions the evidence supports will frequently bring courts close upon the merits, but it is no more than Rule 23 demands. An expert who testifies, for example, that every plaintiff has suffered

accepted as establishing a *Rule 23* requirement merely because the court holds the testimony should not be excluded, under *Daubert* or for any other reason. *See* *IPO, 471 F.3d at 42* (***HN64***[] rejecting the view that "an expert's testimony may establish a component of a *Rule 23* requirement simply by being not fatally flawed" and instructing that "[a] district judge is to assess all of the relevant evidence admitted at the class certification stage and determine **[**53]** whether each *Rule 23* requirement has been met, just as the judge would resolve a dispute about any other threshold prerequisite for continuing a lawsuit"); [24] *Blades, 400 F.3d at 569-70, 575* (affirming denial of class certification where the district court denied defendants' *Daubert* motion and "considered all expert testimony offered by both sides in support of or in opposition to class certification" and "afforded that testimony such weight as [it] deemed appropriate"). ***HN65***[] Under *Rule 23* the district court must be "satisfied," *Falcon, 457 U.S. at 161*, or "persuaded," *IPO, 471 F.3d at 41*, that each requirement is met before certifying a class. Like any evidence, admissible expert opinion may persuade its audience, or it may not. This point is especially important to bear in mind when a party opposing certification offers expert opinion. The district court may be persuaded by the testimony of either (or neither) party's expert with respect to whether a certification requirement is met. Weighing conflicting expert testimony at the certification stage is not only permissible; it may be integral to the rigorous analysis *Rule 23* demands. *See* *Blades, 400 F.3d at 575* (***HN66***[] "[I]n ruling on class certification, **[**54]** a court may be required to resolve disputes concerning the factual setting of the case," including "the resolution of expert disputes concerning the import of evidence concerning the factual setting--such as economic evidence as to business operations or market transactions"); *West, 282 F.3d at 938* (cautioning that neglecting to resolve disputes between experts "amounts to a delegation of judicial power to the plaintiffs, who can obtain class certification just by hiring a competent expert"); *see also* *Cordes & Co. Fin. Servs. v. A.G. Edwards & Sons, Inc., 502 F.3d 91, 106-07 (2d Cir. 2007)* (analyzing the opinions of plaintiffs' and defendants' experts); *In re Polymedica Corp. Sec. Litig., 432 F.3d 1, 5-6, 19 (1st Cir. 2005)* (vacating class certification order but finding no error in the "level of inquiry" the district court applied under *Rule 23* when it "went well beyond the four corners of the pleadings, considering both parties' expert reports and literally hundreds of pages of exhibits focused on market efficiency"). [25]

[*324] ***HN68***[] Resolving expert disputes in **[**56]** order to determine whether a class certification requirement has been met is always a task for the court--no matter whether a dispute might appear to implicate the "credibility" of one or more experts, a matter resembling those usually reserved for a trier of fact. Rigorous analysis need not be hampered by a concern for avoiding credibility issues; as noted, findings with respect to class certification do not bind the ultimate fact-finder on the merits. A court's determination that an expert's opinion is persuasive or unpersuasive on a *Rule 23* requirement does not preclude a different view at the merits stage of the case.

HN69[] That weighing expert opinions is proper does not make it necessary in every case or unlimited in scope. As the Court of Appeals for the Second Circuit instructed,

> To avoid the risk that a *Rule 23* hearing will extend into a protracted mini-trial of substantial portions of the underlying litigation, a district judge must be accorded considerable discretion to limit both discovery and the extent of the hearing on Rule 23 requirements. But even with some limits on discovery and the extent of the hearing, the district judge must receive enough evidence, by affidavits, documents, **[**57]** or testimony, to be satisfied that each *Rule 23* requirement has been met.

IPO, 471 F.3d at 41. ***HN70***[] In its sound discretion, a district court may find it unnecessary to consider certain expert opinion with respect to a certification requirement, but it may not decline to resolve a genuine legal or factual

---

injury is in effect testifying that injury may be established by common proof. However, the decision as to whether the elements of a claim are susceptible to common proof is for the judge and may not be handed off to experts." (footnote omitted)).

[24] The District Court found the Court of Appeals for the Second Circuit's opinion in *IPO* arguably imposes a higher burden on a party seeking certification than our circuit's case law. We find *IPO* consistent with a proper application of our circuit's standards.

[25] In *New Motor Vehicles*, the Court of Appeals for the First Circuit analyzed the opinions of both plaintiffs' and defendants' experts. *522 F.3d at 20-21*. It also observed that in *Polymedica* and *In re Xcelera.com Securities Litigation, 430 F.3d 503 (1st Cir. 2005)*, the district court and the court of appeals had "rigorously tested the evidence submitted by both sides" with respect to the fraud-on-the-market presumption. *New Motor Vehicles, 522 F.3d at 25*.

dispute because of concern for an overlap with the merits. Genuine disputes with respect to the *Rule 23* requirements must be resolved, after considering all relevant evidence submitted by the parties. *See West, 282 F.3d at 938* ("Tough questions must be faced and squarely decided, if necessary by holding evidentiary hearings and choosing between competing perspectives."); *Szabo, 249 F.3d at 676* (district court must "resolve the disputes before deciding whether to certify the class"); *IPO, 471 F.3d at 41* (***HN71***[] *Rule 23* calls for "definitive assessment" of its requirements); *id. at 42* (rejecting the view that "a district judge may not weigh conflicting evidence and determine the existence of a *Rule 23* requirement just because that requirement is identical to an issue on the merits").

2.

Plaintiffs contend the District Court's acceptance of their expert's opinion was consistent with *In re Linerboard Antitrust Litigation, 305 F.3d 145 (3d Cir. 2002)*, **[**58]** an antitrust conspiracy action in which we affirmed class certification. There are a number of surface similarities between this case and *Linerboard*. Plaintiffs' expert, Beyer, also appeared as an expert for the plaintiffs in *Linerboard*, and in both cases he presented an analysis of the industry and a "structure in pricing" analysis. *Id. at 153*. As in *Linerboard*, Beyer here proposed to demonstrate antitrust impact through the use of "benchmarks" and "multiple regression analysis." *Id. at 153-54*. In affirming the district court's grant of class certification in *Linerboard*, we concluded that Beyer, along with another **[*325]** expert for the plaintiffs, "effectively utilized supporting data, including charts and exhibits, to authenticate their professional opinions that all class members would incur" antitrust impact. *Id. at 155*.

In *Linerboard* we did not address whether such expert opinion offered by the party opposing class certification would have been properly considered by the district court in the exercise of its discretion. But defendants here presented expert opinion disputing much of the evidence and argument plaintiffs offered for certification--specifically, Ordover disputed Beyer's characterizations **[**59]** of the market and the alleged pricing structure. Defendants contend Ordover raised substantial doubts, not considered by the District Court, about whether common proof would be available for plaintiffs to demonstrate antitrust impact at trial.

We do not question plaintiffs' general proposition, which the District Court accepted, that a conspiracy to maintain prices could, in theory, impact the entire class despite a decrease in prices for some customers in parts of the class period, and despite some divergence in the prices different plaintiffs paid. But the question at class certification stage is whether, if such impact is plausible in theory, it is also susceptible to proof at trial through available evidence common to the class. When the latter issue is genuinely disputed, the district court must resolve it after considering all relevant evidence. Here, the District Court apparently believed it was barred from resolving disputes between the plaintiffs' and defendants' experts. ***HN72***[] *Rule 23* calls for consideration of all relevant evidence and arguments, including relevant expert testimony of the parties. Accordingly, we will vacate the order certifying the class and remand for proceedings **[**60]** consistent with this opinion. [26]

D.

Defendants contend the District Court, by relying on *Bogosian v. Gulf Oil Corp., 561 F.2d 434 (3d Cir. 1977)*, erroneously presumed the predominance requirement was met. In *Bogosian*, also a Clayton Act *§ 4* case in which plaintiffs sought class certification, the district court had denied class certification on the assumption that the issue of antitrust impact would have to be proven on an individual, as opposed to common, basis. *561 F.2d at 454*. Finding that assumption erroneous, we reasoned that "when an antitrust violation impacts upon a class of persons who do have standing, there is no reason in doctrine why proof of the impact cannot be made on a common basis so long as the common proof adequately demonstrates some damage to each individual. Whether or not fact of damage can be proven on a common basis therefore depends upon the circumstances of each case." *Id*. Applying the concept, we continued:

[26] The current record suggests it may be possible to overcome some obstacles to class certification by shortening the class period or by fashioning sub-classes. *See Fed. R. Civ. P. 23(c)(5)*.

> If, in this case, a nationwide conspiracy is proven, the result **[**61]** of which was to increase prices to a class of plaintiffs beyond the prices which would obtain in a competitive regime, an individual plaintiff could prove fact of damage simply by proving that the free market prices would be lower than the prices paid and that he made some purchases at the higher price. If the price structure in the industry is such that nationwide the conspiratorially affected prices at the wholesale level fluctuated within a range which, though different in different regions, was higher in all regions **[*326]** than the range which would have existed in all regions under competitive conditions, it would be clear that all members of the class suffered some damage, notwithstanding that there would be variations among all dealers as to the extent of their damage.

Id. at 455; *see* *Newton, 259 F.3d at 179 n.21* ("In antitrust class actions, injury may be presumed when it is clear the violation results in harm to the entire class."); *Linerboard, 305 F.3d at 151-53*.

In *Linerboard*, we found a "strong argument [could] be made that the *Bogosian* concept of presumed impact was properly applied" on the facts of that case. *Id. at 152*. Plaintiffs had alleged a horizontal conspiracy by manufacturers **[**62]** to restrict supply and raise prices of linerboard, the paper lining used in corrugated cardboard boxes and sheets. *Id*. Over a two-year period, defendants allegedly had agreed to idle their plants to reduce inventories to a twenty-year low and boost prices. *Id. at 150-51*. During the two-year class period, prices had risen by ninety percent. *See* *id. at 152* ("Coincident with [defendants'] interference with the normal market forces, linerboard prices in the eastern United States rose in six consecutive price increases, from a low of around $ 270 to $ 290 per ton in third quarter 1993 to $ 530 per ton by April 1995."). The record in this case is different. Although the price of hydrogen peroxide rose at some points during the lengthy class period, the price was lower, not higher, at the end of the class period than at the beginning. And the evidence, as interpreted by defendants' expert, shows that through much of the class period the production of hydrogen peroxide was increasing rather than decreasing. Moreover, there was an active dispute between the experts as to the "price structure in the industry" to which *Bogosian* refers. Defendants cited, for example, Ordover's empirical analysis **[**63]** showing substantial price disparities among similarly situated customers. Accordingly, defendants contended, it was far from "clear the violation result[ed] in harm to the entire class," *Newton, 259 F.3d at 179 n.21*. It is not apparent that the District Court considered, or believed it had the authority to consider, all the evidence in the record with respect to this dispute.

While the District Court found the *Bogosian* presumption applied, it also relied on Beyer's analysis. *Cf.* *Linerboard, 305 F.3d at 155* ("[T]his was not a case where plaintiffs relied solely on presumed impact and damages."). As in *Linerboard*, plaintiffs here stress that they do not rely merely on *Bogosian's* presumption to support class certification, but also on their expert's analysis. Plaintiffs do not contend a bare allegation of a price-fixing conspiracy, in the absence of supporting evidence and analysis, suffices to support class certification consistent with a proper "rigorous analysis" under *Rule 23*. We emphasize that ***HN73***[] "[a]ctual, not presumed, conformance" with the *Rule 23* requirements is essential. *Newton, 259 F.3d at 167* (quoting *Falcon, 457 U.S. at 160*). **[**64]** ***HN74***[] Applying a presumption of impact based solely on an unadorned allegation of price-fixing would appear to conflict with the 2003 amendments to *Rule 23*, which emphasize the need for a careful, fact-based approach, informed, if necessary, by discovery. *See* *Fed. R. Civ. P. 23* advisory committee's note, 2003 Amendments (***HN75***[] "[D]iscovery in aid of the certification decision often includes information required to identify the nature of the issues that actually will be presented at trial.").

The District Court, upon review of all the evidence consistent with this opinion, may again consider whether the reasoning in *Bogosian* is compatible with the record of this case. *See* *In re Salomon Analyst* ***[*327]*** *Metromedia Litig., 544 F.3d 474, 485-86 (2d Cir. 2008)* (remanding for opportunity for party opposing class certification to present evidence rebutting the fraud-on-the-market presumption, because *Rule 23* requires a "definitive assessment" as to the predominance requirement).

V.

For the foregoing reasons, we will vacate the class certification order and remand for proceedings consistent with this opinion.

In re Rail Freight Fuel Surcharge Antitrust Litig.

United States District Court for the District of Columbia

December 31, 2008, Decided; December 31, 2008, Filed

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Motions to Dismiss, Failure to State Claim**

Fed. R. Civ. P. 12(b)(6) allows dismissal of a complaint if a plaintiff fails to state a claim upon which relief can be granted. *Fed. R. Civ. P. 12(b)(6)*. The United States Supreme Court has clarified the standard of pleading that a plaintiff must meet in order to survive a motion to dismiss under *Rule 12(b)(6)*. *Fed. R. Civ. P. 8(a)(2)* requires only a short and plain statement of the claim showing that the pleader is entitled to relief, in order to give the defendant fair notice of what the claim is and the grounds upon which it rests. Although detailed factual allegations are not necessary to withstand a *Rule 12(b)(6)* motion, a plaintiff must furnish more than labels and conclusions or a formulaic recitation of the elements of a cause of action to provide the grounds of entitlement to relief. While there is no probability requirement at the pleading stage, something beyond mere possibility must be alleged. The facts alleged in the complaint must be enough to raise a right to relief above the speculative level, or must be sufficient to state a claim for relief that is plausible on its face. The Court refers to this newly clarified standard as "the plausibility standard."

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN2[] Motions to Dismiss, Failure to State Claim

On a motion to dismiss under *Fed. R. Civ. P. 12(b)(6)*, the court must accept as true all of the factual allegations contained in the complaint. It must construe the complaint liberally in the plaintiffs' favor, and grant plaintiffs the benefit of all inferences that can be derived from the facts alleged. The court, however, need not accept inferences drawn by plaintiffs if those inferences are unsupported by facts alleged in the complaint; nor must it accept plaintiffs' legal conclusions.

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > Limited Jurisdiction

HN3[] Subject Matter Jurisdiction, Jurisdiction Over Actions

Federal courts are courts of limited jurisdiction. They therefore may hear only cases entrusted to them by a grant of power contained in either the Constitution or in an act of Congress.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN4[] Motions to Dismiss, Failure to State Claim

Under *Fed. R. Civ. P. 12(b)(1)*, the plaintiffs bear the burden of establishing subject matter jurisdiction.

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN5[] Jurisdiction, Subject Matter Jurisdiction

In determining whether to grant a motion to dismiss for lack of subject matter jurisdiction, the court must accept all of the factual allegations in the complaint as true. The court, however, need not accept factual inferences drawn by plaintiffs if those inferences are not supported by facts alleged in the complaint, nor must it accept plaintiffs' legal conclusions.

Antitrust & Trade Law > Consumer Protection > General Overview

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > General Overview

HN6[] Antitrust & Trade Law, Consumer Protection

Only direct purchasers may obtain damage awards under federal ***antitrust law***.

Antitrust & Trade Law > Regulated Industries > Transportation > Common Carriers

HN7[] Transportation, Common Carriers

See *49 U.S.C.S. § 10501(b)*.

Constitutional Law > Supremacy Clause > Federal Preemption

HN8[] Supremacy Clause, Federal Preemption

Preemption doctrine is rooted in the *Supremacy Clause of the United States Constitution*. *U.S. Const. art. VI, cl. 2*. A federal statute preempts state law when (1) the preemptive intent is explicitly stated in the statute's language or implicitly contained in its structure and purpose; or (2) the state law actually conflicts with federal law; or (3) federal law so thoroughly occupies a legislative field as to make reasonable the inference that Congress left no room for the States to supplement it. The purpose of Congress is the ultimate touchstone' of pre-emption analysis.

Antitrust & Trade Law > Regulated Industries > Transportation > Common Carriers

Constitutional Law > Supremacy Clause > Federal Preemption

Antitrust & Trade Law > Regulated Industries > Transportation > Railroads

HN9[] Transportation, Common Carriers

The preemption language in Interstate Commerce Commission Termination Act of 1995 (ICCTA), *49 U.S.C.S. § 10101 et seq.* is plain and explicit: The remedies provided with respect to regulation of rail transportation are exclusive and preempt the remedies provided under Federal or State law. *49 U.S.C.S. § 10501(b)*. The language of the statute could not be more precise. The most natural reading of *§ 10501(b)(2)* is that the federal remedies provided by the ICCTA are the only remedies available as to the regulation of rail transportation, and that the federal remedies are exclusive of state remedies except where the ICCTA has expressly provided otherwise. Indeed, it is difficult to imagine a broader statement of Congress's intent to preempt state regulatory authority over railroad operations.

Antitrust & Trade Law > Regulated Industries > Transportation > Common Carriers

Constitutional Law > Supremacy Clause > Federal Preemption

Antitrust & Trade Law > Regulated Industries > Transportation > Railroads

HN10[] Transportation, Common Carriers

While the enactment of Interstate Commerce Commission Termination Act of 1995 (ICCTA), *49 U.S.C.S. § 10101 et seq.* was the culmination of a movement toward deregulation of the railroads that began in the late 1970's, Congress did not intend that the state fill the regulatory void. The regulation of railroad operations had always been a traditionally federal endeavor, to better establish uniformity in such operations and expediency in commerce, and it appears manifest that Congress intended the ICCTA to further that exclusively federal effort, at least in the economic realm. Thus, as numerous courts have held, ICCTA preempts the economic regulation of railroads by the states, as well as state laws whose application would unreasonably interfere with a railroad's operations. As the United States Court of Appeals for the Third Circuit has put it, the ICCTA does not preempt only explicit economic regulation. Rather, it preempts all state laws that may reasonably be said to have the effect of managing or governing rail transportation, while permitting the continued application of laws having a more remote or incidental effect on rail transportation. The question is always whether the action would have the effect of preventing or unreasonably interfering with railroad transportation.

Antitrust & Trade Law > Regulated Industries > Transportation > Common Carriers

Constitutional Law > Supremacy Clause > Federal Preemption

Antitrust & Trade Law > Regulated Industries > Transportation > Railroads

HN11[] **Transportation, Common Carriers**

There is always a presumption against finding preemption when Congress has legislated in a field the states have traditionally occupied. Conversely, the case for preemption is particularly strong where, as in rail transportation, the state regulates in an area where there has been a history of significant federal presence.

Antitrust & Trade Law > Regulated Industries > Transportation > Common Carriers

Constitutional Law > Supremacy Clause > Federal Preemption

Antitrust & Trade Law > Regulated Industries > Transportation > Railroads

HN12[] **Transportation, Common Carriers**

The states retain their traditional police powers to protect health and safety, which is reserved to them by the Constitution, but only so long as the application of these powers is not unreasonably burdensome on railroad operations.

Antitrust & Trade Law > Regulated Industries > Transportation > Common Carriers

Antitrust & Trade Law > Regulated Industries > Transportation > Railroads

HN13[] **Transportation, Common Carriers**

The most natural reading of *49 U.S.C.S. § 10501(b)(2)* is that the federal remedies provided by the Interstate Commerce Commission Termination Act of 1995 (ICCTA), *49 U.S.C.S. § 10101 et seq.* are the only remedies available as to the regulation of rail transportation, and that the federal remedies are exclusive of state remedies except where the ICCTA has expressly provided otherwise.

Antitrust & Trade Law > Regulated Industries > Transportation > Common Carriers

Antitrust & Trade Law > Regulated Industries > Transportation > Railroads

HN14[] **Transportation, Common Carriers**

With similarly broad language, Interstate Commerce Commission Termination Act of 1995 (ICCTA), *49 U.S.C.S. § 10101 et seq.* preempts state laws with respect to regulation of rail transportation. *49 U.S.C.S. § 10501(b)*. A core concern of the ICCTA is the regulation of economics and finances of the rail carriage industry, and, just as with the airline industry, such regulation by the states is preempted.

Antitrust & Trade Law > Regulated Industries > Transportation > Common Carriers

HN15[] Transportation, Common Carriers

49 U.S.C.S. 10709(c)(1) states that a contract that is authorized by this section, and transportation under such contract, shall not be subject to this part *49 U.S.C.S. § 10101 et seq.*, and may not be subsequently challenged before the Surface Transportation Board (STB) or in any court on the grounds that such contract violates a provision of *49 U.S.C.S. § 10101 et seq. 49 U.S.C.S. § 10709(c)(1)*. Read in its entirety, the sentence makes clear that Congress intended it to mean only that the STB has no regulatory authority over contract claims, not to create an opportunity for state regulation.

Antitrust & Trade Law > Regulated Industries > Transportation > Common Carriers

Antitrust & Trade Law > Regulated Industries > Transportation > Railroads

HN16[] Transportation, Common Carriers

Through its enactment of Interstate Commerce Commission Termination Act of 1995, *49 U.S.C.S. § 10101 et seq.*, Congress intended that the Federal scheme of economic regulation and deregulation of the railroads address and encompass all such regulation and to be completely exclusive. Any other construction would undermine the uniformity of Federal standards and risk the balkanization and subversion of the Federal scheme of minimal regulation for this intrinsically interstate form of transportation.

Antitrust & Trade Law > Regulated Industries > Transportation > Common Carriers

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

Contracts Law > Breach > Breach of Contract Actions > General Overview

Antitrust & Trade Law > Regulated Industries > Transportation > Railroads

HN17[] Transportation, Common Carriers

49 U.S.C.S. § 10709(c)(2)'s references to lawsuits in court, and not before the Surface Transportation Board (STB), as the exclusive remedy for alleged breaches of contract by railroads does not mean that all claims against railroads arising from shipments governed by contract may be brought in federal courts. Under *§ 10709(c)(2)*, courts may rule on breach of contract claims against railroads, a grant of jurisdiction that is necessary for any industry to function.

Antitrust & Trade Law > Regulated Industries > Transportation > Railroads

Constitutional Law > Supremacy Clause > Federal Preemption

HN18[] Transportation, Railroads

The evidentiary savings clause, *49 U.S.C.S. § 10706(a)(3)(B)(ii)*, of the Interstate Commerce Commission Termination Act of 1995 (ICCTA), *49 U.S.C.S. § 10101 et seq.*, includes the phrase, "in any proceeding in which it is alleged that a carrier was a party to an agreement, conspiracy, or combination in violation of a Federal law cited in *§ 10706(a)(2)(A)* of this section or of any similar State law, proof of an agreement, conspiracy, or combination may not be inferred from certain kinds of evidence". *49 U.S.C.S. § 10706(a)(3)(B)(ii)*. By this section, Congress provided railroads with certain evidentiary protections, but these protections cannot be transformed into a grant of authority for the enforcement of state antitrust laws that are preempted by ICCTA's express preemption clause. Had Congress intended that the entire body of state ***antitrust law*** not be preempted by *49 U.S.C.S. § 10501(b)*, it would not have created the exception so tangentially.

Antitrust & Trade Law > Consumer Protection > General Overview

HN19[] **Antitrust & Trade Law, Consumer Protection**

The Supreme Court's decision in Illinois Brick prohibits claims for damages, but not those for injunctive relief, by indirect purchasers under federal ***antitrust law***.

Antitrust & Trade Law > General Overview

Civil Procedure > ... > Justiciability > Standing > Injury in Fact

Constitutional Law > ... > Case or Controversy > Standing > General Overview

Antitrust & Trade Law > Consumer Protection > General Overview

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > General Overview

HN20[] **Antitrust & Trade Law**

The essential standing question for antitrust claims for injunctive relief is whether the plaintiffs have alleged an antitrust injury -- namely a threatened loss or damage of the type the antitrust laws were designed to prevent and that flows from that which makes defendant's acts unlawful.

Antitrust & Trade Law > General Overview

Civil Procedure > ... > Justiciability > Standing > Injury in Fact

Constitutional Law > ... > Case or Controversy > Standing > General Overview

HN21[] **Antitrust & Trade Law**

Associated General Contractors v. Cal. State Council of Carpenters (AGC) established a multi-factor test to determine whether federal antitrust plaintiffs met prudential standing requirements. However, the "efficient enforcement factors" identified in AGC do not apply to claims for injunctive relief. In Cargill, in Associated General Contractors the Court considered other factors in addition to antitrust injury to determine whether the petitioner was a proper plaintiff under § 4 of the Clayton Act for damages. However, many of these other factors are not relevant to the standing inquiry under § 16 of the Clayton Act for an injunction. The relevant inquiry under § 16 is whether plaintiffs have alleged an antitrust injury because the only remedy available is equitable in nature. Standing under § 16 raises no threat of multiple lawsuits or duplicative recoveries once an injunction is imposed.

Antitrust & Trade Law > Consumer Protection > General Overview

HN22[] Antitrust & Trade Law, Consumer Protection

Where it is alleged that consumers paid a price higher than the price that would have been offered had the dealers been competing, the purpose of the antitrust laws is obviously thwarted.

Antitrust & Trade Law > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

Constitutional Law > ... > Case or Controversy > Standing > Elements

Civil Procedure > ... > Justiciability > Standing > Injury in Fact

HN23[] Antitrust & Trade Law

Once plaintiffs have alleged an antitrust injury, they must also allege a causal connection between the prohibited behavior and their injury, a requirement common to standing for all plaintiffs.

Civil Procedure > ... > Justiciability > Standing > Burdens of Proof

Constitutional Law > ... > Case or Controversy > Standing > Elements

Civil Procedure > ... > Justiciability > Standing > General Overview

HN24[] Standing, Burdens of Proof

Standing is an Article III requirement under which the plaintiffs must show, at an irreducible constitutional minimum: (1) that they have suffered an injury in fact -- the invasion of a legally protected interest; (2) that the injury is fairly traceable to the defendant's conduct (a causal connection); and (3) that a favorable decision on the merits likely will redress the injury.

Opinion

[*32] This matter is before the Court on defendants' motion to dismiss for failure to state a claim upon which relief can be granted and for lack of subject matter jurisdiction under *Rules 12(b)(6)* and *12(b)(1) of the Federal Rules of Civil Procedure*. [1] The Court has carefully considered the arguments made by the parties in their papers and the oral arguments presented by counsel in open court on October 10, 2008. The Court has concluded that the indirect purchaser plaintiffs' state law claims are preempted by federal law and must be dismissed. The Court has also concluded that the indirect purchaser plaintiffs have stated a federal antitrust claim for injunctive relief and that this claim may proceed.

I. BACKGROUND

The Multidistrict Litigation Panel consolidated eighteen separate class actions, pending in six districts, involving common antitrust allegations against the four major United States railroads and transferred them to this Court on November 6, 2007. The plaintiffs were divided into two putative classes -- those who allegedly purchased rail freight transportation **[**10]** services directly from defendants from July 1, 2003 until at least June 30, 2007 and who were assessed a rail fuel surcharge for the transportation services, and those who allegedly purchased rail freight transportation services indirectly from the defendants and were subject to a similar surcharge. Plaintiffs in both putative classes allege that the defendant railroads violated *Section 1 of the Sherman Act* by conspiring to fix prices through their use of fuel surcharges. The indirect purchaser plaintiffs also allege various claims arising from state antitrust, consumer protection and unjust enrichment law for the same alleged behavior by defendants.

Defendants BNSF Railway Company ("BNSF"), CSX Transportation, Inc. ("CSX"), Norfolk Southern Railway Company ("NS"), and Union Pacific Railway Company ("UP") moved to dismiss the claims of both putative classes. The Court denied defendants' motion to dismiss the direct purchasers' complaint on November 7, 2008. See *In re Rail Freight Fuel Surcharge Antitrust Litig., Misc. No. 07-489, 587 F. Supp. 2d 27, 2008 U.S. Dist. LEXIS 95456 (D.D.C. Nov. 7, 2008)*. The indirect purchaser plaintiffs' (hereafter "plaintiffs") complaint, and defendants' challenge to it, **[**11]** are discussed in this Opinion. [2]

II. STANDARD OF REVIEW

Defendants move to dismiss all of plaintiffs' claims for failure to state a claim upon which relief can be granted under *Rule 12(b)(6) of the Federal Rules of Civil Procedure*. **[*33]** They also move to dismiss for lack of jurisdiction under *Rule 12(b)(1) of the Federal Rules of Civil Procedure* on the grounds that plaintiffs lack standing.

---

[1] The papers **[**9]** submitted in connection with this motion include: Indirect Purchaser Plaintiffs' Consolidated Amended Class Action Complaint ("Compl."); Defendants' Joint Motion to Dismiss Indirect Purchaser Plaintiffs' Consolidated Amended Complaint; Indirect Purchaser Plaintiffs' Opposition in Response to Defendants' Joint Motion to Dismiss; Defendants' Joint Reply to Indirect Purchaser Plaintiffs' Opposition in Response to Defendants' Joint Motion to Dismiss; Indirect Purchaser Plaintiffs' Supplement to their Opposition to Defendants' Joint Motion to Dismiss; Defendants' Supplemental Memorandum of Points and Authorities in Support of Defendants' Joint Motion to Dismiss Indirect Purchaser Plaintiffs' Consolidated Amended Complaint; and Indirect Purchaser Plaintiffs' Supplemental Memorandum Regarding Federal Injunctive Relief Standing.

[2] The putative indirect purchaser plaintiff class is represented by Agway Liquidating Trust; Fayus Enterprises; and Maroon Incorporated.

A. Rule 12(6)(6)

HN1[] *Rule 12(b)(6) of the Federal Rules of Civil Procedure* allows dismissal of a complaint if a plaintiff fails "to state a claim upon which relief can be granted." *FED. R. CIV. P. 12(b)(6)*. In *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*, the Supreme Court clarified the standard of pleading that a plaintiff must meet in order to survive a motion to dismiss under *Rule 12(b)(6)*. The Court noted that "*Federal Rule of Civil Procedure 8(a)(2)* **[**12]** requires only 'a short and plain statement of the claim showing that the pleader is entitled to relief,' in order to 'give the defendant fair notice of what the . . . claim is and the grounds upon which it rests[.]'" *Bell Atlantic Corp. v. Twombly, 127 S. Ct. at 1965* (quoting *Conley v. Gibson, 355 U.S. 41, 47, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957))*; see also *Erickson v. Pardus, 551 U.S. 89, 127 S. Ct. 2197, 2200, 167 L. Ed. 2d 1081 (2007)*; *Aktieselskabet AF 21 v. Fame Jeans Inc., 381 U.S. App. D.C. 76, 525 F.3d 8, 15 (D.C. Cir. 2008)*. Although "detailed factual allegations" are not necessary to withstand a *Rule 12(b)(6)* motion, a plaintiff must furnish "more than labels and conclusions" or "a formulaic recitation of the elements of a cause of action" to provide the "grounds" of "entitle[ment] to relief." *Bell Atlantic Corp. v. Twombly, 127 S. Ct. at 1964-65*; see also *Papasan v. Allain, 478 U.S. 265, 286, 106 S. Ct. 2932, 92 L. Ed. 2d 209 (1986)*. While there is no "probability requirement at the pleading stage," *Bell Atlantic Corp. v. Twombly, 127 S. Ct. at 1965*, "something beyond . . . mere possibility . . . must be alleged[.]" *Id. at 1966*. The facts alleged in the complaint "must be enough to raise a right to relief above the speculative level," *id. at 1965*, or must be sufficient "to state a claim for **[**13]** relief that is plausible on its face." *Id. at 1974*. The Court referred to this newly clarified standard as "the plausibility standard." *Id. at 1968* (abandoning the "no set of facts" language from *Conley v. Gibson*).

HN2[] On a motion to dismiss under *Rule 12(b)(6)*, the Court "must accept as true all of the factual allegations contained in the complaint." *Erickson v. Pardus, 127 S. Ct. at 2200*; see also *Bell Atlantic Corp. v. Twombly, 127 S. Ct. at 1965*; *Summit Health, Ltd. v. Pinhas, 500 U.S. 322, 325, 111 S. Ct. 1842, 114 L. Ed. 2d 366 (1991)*; *Aktieselskabet AF 21 v. Fame Jeans Inc., 525 F.3d at 15*. It must construe the complaint "liberally in the plaintiffs' favor, and grant plaintiffs the benefit of all inferences that can be derived from the facts alleged." *Kowal v. MCI Communications Corp., 305 U.S. App. D.C. 60, 16 F.3d 1271, 1276 (D.C. Cir. 1994)*; see also *Aktieselskabet AF 21 v. Fame Jeans Inc., 525 F.3d at 15*. The Court, however, need not accept inferences drawn by plaintiffs if those inferences are unsupported by facts alleged in the complaint; nor must it accept plaintiffs' legal conclusions. See *Kowal v. MCI Communications Corp., 16 F.3d at 1276*; *Browning v. Clinton, 352 U.S. App. D.C. 4, 292 F.3d 235, 242 (D.C. Cir. 2002)*.

B. Rule 12(b)(1)

HN3[] Federal courts are **[**14]** courts of limited jurisdiction. They therefore may hear only cases entrusted to them by a grant of power contained in either the Constitution or in an act of Congress. See, e.g., *Beethoven.com L.L.C. v. Librarian of Congress, 364 U.S. App. D.C. 295, 394 F.3d 939, 945 (D.C. Cir. 2005)*; *Best v. United States, 522 F. Supp. 2d 252, 254 (D.D.C. 2007)*; *Srour v. Barnes, 670 F. Supp. 18, 20 (D.D.C.1987)* (citing *City of Kenosha v. Bruno, 412 U.S. 507, 511, 93 S. Ct. 2222, 37 L. Ed. 2d 109 (1973))*. *HN4*[] Under *Rule 12(b)(1)*, the plaintiffs bear the burden **[*34]** of establishing subject matter jurisdiction. See *Kokkonen v. Guardian Life Insurance Co., 511 U.S. 375, 377, 114 S. Ct. 1673, 128 L. Ed. 2d 391 (1994)*; *Moms Against Mercury v. FDA, 376 U.S. App. D.C. 18, 483 F.3d 824, 828 (D.C. Cir. 2007)* (citing *Georgiades v. Martin-Trigona,234 U.S. App. D.C. 345, 729 F.2d 831, 833 n.4 (D.C. Cir. 1984))*.*HN5*[] In determining whether to grant a motion to dismiss for lack of subject matter jurisdiction, the Court must accept all of the factual allegations in the complaint as true. The Court, however, need not accept factual inferences drawn by plaintiffs if those inferences are not supported by facts alleged in the complaint, nor must it accept plaintiffs' legal conclusions. See *Best v. United States, 522 F. Supp. 2d at 255*; *Primax Recoveries, Inc. v. Lee, 260 F. Supp. 2d 43, 47 (D.D.C. 2003)*.

III. **[**15]** PLAINTIFFS' ALLEGATIONS

Plaintiffs allege that in 2003, the four defendants, who control approximately ninety percent of all rail freight traffic in the United States, sought to increase their revenues through the use of fuel surcharges. Compl. PP 2-3, 43. Before

Congress passed the Staggers Rail Act in 1980, defendants would have had to apply to the Interstate Commerce Commission for approval of an across-the-board rate increase. Compl. PP 4, 55. Following deregulation of the railroad industry, however, at least eighty percent of all rail shipments move under private transportation contracts, which are not rate regulated, or are otherwise exempt from rate regulation. Compl. P 56. Plaintiffs allege that defendants determined that the most efficient means to increase their profits was through the imposition of an across-the-board artificially high and uniform fuel surcharge. Compl. P 60.

The barrier to this plan, according to plaintiffs, was that many rail freight transportation contracts already included rate escalation provisions that weighted a variety of cost factors, including fuel, based on an index called the All Inclusive Index (the "AII"). Compl. PP 11, 61. The railroad trade **[**16]** organization known as the Association of American Railroads ("AAR"), which is dominated by the four defendants, publishes this index. Compl. PP 12, 61. Plaintiffs allege that the AII (as well as a related cost index called the Rail Cost Adjustment Factor ("RCAF")) already accounted accurately for the impact of fuel cost increases. Compl. PP 5, 61. Any actual increase in fuel costs, no matter how large, would be reflected in the All and the RCAF. Compl. P 61. Plaintiffs allege that the defendants conspired to remove fuel from the All so that they could apply a separate "fuel surcharge" as a percentage of the total cost of freight transportation. Compl. P 62. Doing so permitted plaintiffs to raise total freight prices widely by a given percentage. Id.

According to plaintiffs, top executives from each of the defendants met regularly at various industry conferences and events in the spring of 2003 and thereafter to discuss their industry. Compl. P 64. Shortly after one such industry meeting, in July 2003, the western railroads (BNSF and UP) began charging identical fuel surcharges based on the U.S. Department of Energy On-Highway Diesel Fuel Price Index. Compl. PP 16, 65. Plaintiffs allege **[**17]** that this parallel and complex pricing decision was based on an agreement among the defendants. Compl. PP 66-69.

The next step in the alleged conspiracy, according to plaintiffs, was the defendants' agreement and collective action to cause the AAR to create a new cost escalation index, the All Inclusive Index Less Fuel ("AIILF"), which removed fuel costs from the prior cost escalation index (the AII). Compl. P 72. According to plaintiffs, defendants **[*35]** reached this agreement during the October and December 2003 meetings of the AAR. Compl. P 71. The index was published in December 2003. Compl. P 72. Subsequently, and in furtherance of the conspiracy, according to plaintiffs, the eastern railroads (CSX and NS) announced that they would apply identical fuel surcharges based on the West Texas Intermediate Index. Compl. PP 75-77.

Plaintiffs allege that at that point, and as a result of these collective actions, defendants each applied their fuel surcharges in the same way -- as a percentage multiplier of the total base rate for rail freight transportation. Compl. P 84. They were able to do so because, under the AIILF, fuel was no longer included in the general cost escalation index. Plaintiffs **[**18]** allege that this approach yielded defendants billions of dollars of additional profits because the surcharge raised rates far beyond the real increased cost of fuel. Compl. PP 81-83, 91. Plaintiffs allege that defendants, in the east and west, coordinated their computation of the surcharges. Compl. P 89. As a result of this alleged collusion, the eastern and western railroads, respectively, imposed identical fuel surcharges for more than three years. Compl. P 89.

In sum, relying on the uniformity of fuel surcharges, the creation and use of the AIILF, and various other allegations, plaintiffs contend that defendants conspired to fix prices in violation of *Section 1 of the Sherman Act* as well as the antitrust, consumer protection and unjust enrichment laws of various states. Plaintiffs further allege that as a result, the members of the plaintiff class have all paid higher prices for unregulated rail freight transportation than they would have absent this asserted unlawful activity. Compl. PP 26, 112. Defendants have moved to dismiss on the grounds that plaintiffs have not met the Twombly pleading standard; that plaintiffs' state law claims are all preempted by the Interstate Commerce **[**19]** Commission Termination Act of 1995 ("ICCTA"); that plaintiffs lack standing under Article III to claim violations of the laws of states in which they do not reside or do business; that plaintiffs have failed to demonstrate that they have "antitrust standing;" and that plaintiffs' unjust enrichment and consumer protection claims fail on a number of grounds.

IV. ANALYSIS

The complaint alleges both federal and state antitrust claims as well as state consumer protection and unjust enrichment claims. Plaintiffs must pursue the state claims in order to recover damages, because following *Illinois Brick v. Illinois, 431 U.S. 720, 746-47, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*, ***HN6***[] only direct purchasers may obtain damage awards under federal ***antitrust law***. As explained in further detail below, the Court finds that the plaintiffs' state law claims are preempted by ICCTA and must be dismissed. Plaintiffs' federal antitrust claim survives, however, because they have met the pleading standard enunciated by the Supreme Court in *Twombly* and have standing to pursue their claim for injunctive relief.

A. The Twombly Standard

Defendants argue that the complaint does not meet the pleading standard for federal or state antitrust claims as articulated **[**20]** by the Supreme Court in *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. The Court previously found that the direct purchaser plaintiffs' allegations, which are substantially similar to the indirect purchasers' allegations, met the Twombly standard. It therefore denied defendants' motion to dismiss the direct purchasers' claims on November 7, 2008. See *In re* ***[*36]*** *Rail Freight Fuel Surcharge Antitrust Litig., Misc. No. 07-489, 587 F. Supp. 2d 27, 2008 U.S. Dist. LEXIS 95456 at * 18-19, 23-26 (D.D.C. Nov. 7, 2008)*. The defendants do not raise any additional or different arguments as to why the indirect purchaser plaintiffs' complaint should not be allowed to proceed under Twombly. For the same reasons explained in the Court's earlier Opinion, the Court finds that the indirect purchasers' complaint states claims under *Twombly*, and it therefore will not dismiss their complaint on those grounds. Id.

B. Federal Preemption of State Law Claims

Defendants argue that plaintiffs' state antitrust, consumer protection and unjust enrichment claims are preempted by the Interstate Commerce Commission Termination Act of 1995 ("ICCTA"), *49 U.S.C. § 10101 et seq.* The preemption clause in ICCTA provides:

> ***HN7***[] The jurisdiction **[**21]** of the [Surface Transportation] Board over -- (1) transportation by rail carriers, and the remedies provided in this part [*49 USC §§ 10101 et seq.*] *with respect to rates, classifications, rules (including car service, interchange, and other operating rules), practices, routes, services, and facilities of such carriers*; and (2) the construction, acquisition, operation, abandonment, or discontinuance of spur, industrial, team, switching, or side tracks, or facilities, even if the tracks are located, or intended to be located, entirely in one State, is exclusive. Except as otherwise provided in this part [*49 USC §§ 10101 et seq.*], the remedies provided under this part [*49 USC §§ 10101 et seq.*] *with respect to regulation of rail transportation are exclusive and preempt the remedies provided under Federal or State law*.

49 U.S.C. § 10501(b) (emphasis added).

HN8[] Preemption doctrine is rooted in the *Supremacy Clause of the United States Constitution*. *U.S. CONST. art. VI, cl. 2*. A federal statute preempts state law when (1) the preemptive intent is "'explicitly stated in the statute's language or implicitly contained in its structure and purpose'"; or (2) the state law "actually conflicts with federal **[**22]** law"; or (3) "federal law so thoroughly occupies a legislative field 'as to make reasonable the inference that Congress left no room for the States to supplement it.'" *Cipollone v. Liggett Group, Inc., 505 U.S. 504, 516, 112 S. Ct. 2608, 120 L. Ed. 2d 407 (1992)* (internal quotations and citations omitted). "'[T]he purpose of Congress is the ultimate touchstone' of pre-emption analysis." *Id. at 516* (quoting *Malone v. White Motor Corp., 435 U.S. 497, 504, 98 S. Ct. 1185, 55 L. Ed. 2d 443 (1978)*); see also *Altria Group, Inc. v. Good, No. 9127, 555 U.S. 70, 129 S. Ct. 538, 172 L. Ed. 2d 398, 2008 U.S. LEXIS 9127 at *10 (U.S. Dec. 15, 2008)*.

HN9[] The preemption language in ICCTA is plain and explicit: The remedies provided "with respect to regulation of rail transportation are exclusive and preempt the remedies provided under Federal or State law." *49 U.S.C. § 10501(b)*. "The language of the statute could not be more precise." *Friberg v. Kansas City S. Ry., 267 F.3d 439, 443 (5th Cir. 2001)*. See also *Emerson v. Kansas City S. Ry., 503 F.3d 1126, 1128-29 (10th Cir. 2007)*; *Green Mt. R.R. Corp. v. Vermont, 404 F.3d 638, 641 (2d Cir. 2005)*; *City of Auburn v. United States, 154 F.3d 1025, 1030 (9th*

Cir. 1998). "The most natural reading of section 10501(b)(2) is that the federal remedies provided by the ICC Termination **[**23]** Act are the only remedies available as to the regulation of rail transportation, and that the **[*37]** federal remedies are exclusive of state remedies except where the ICC Act has expressly provided otherwise." CSX Transp. v. Georgia PSC, 944 F. Supp. 1573, 1581 (N.D. Ga. 1996). Indeed, "[i]t is difficult to imagine a broader statement of Congress's intent to preempt state regulatory authority over railroad operations." Id.

HN10[] While the enactment of ICCTA was the culmination of a movement toward deregulation of the railroads that began in the late 1970's, Congress did not intend that the state fill the regulatory void. [3] The regulation of railroad operations had always been "a traditionally federal endeavor, to better establish uniformity in such operations and expediency in commerce, and it appears manifest that Congress intended the ICCTA to further that exclusively federal effort, at least in the economic realm." Friberg v. Kan. City S. Ry., 267 F.3d at 443; see also City of Auburn v. United States, 154 F.3d at 1029. [4] Thus, as numerous courts have held, ICCTA preempts the economic regulation of railroads by the states, as well as state laws whose application would unreasonably interfere with **[**24]** a railroad's operations. See PCS Phosphate Co. v. Norfolk Southern Corp., 520 F. Supp. 2d 705, 715 (E.D.N.C. 2007) (collecting cases). As the Third Circuit put it, "the Termination Act does not preempt only explicit economic regulation. Rather, it preempts all state laws that may reasonably be said to have the effect of managing or governing rail transportation, while permitting the continued application of laws having a more remote or incidental effect on rail transportation.'" New York Susquehanna & W. Ry. Corp. v. Jackson, 500 F.3d 238, 252 (3d Cir. 2007) (quoting Fla. E. Coast Ry. Co. v. City of W. Palm Beach, 266 F.3d 1324, 1331 (11th Cir. 2001)). The question is always whether the action "would have the effect of preventing or unreasonably interfering with railroad transportation." PCS Phosphate Co. v. Norfolk Southern Corp., 520 F. Supp. 2d at 715.

HN12[] The states retain their traditional police powers to protect health and safety, which is reserved to them by the Constitution, but only so long as the application of these powers is not unreasonably burdensome **[**26]** on railroad operations. See, e.g., Green Mt. R.R. Corp. v. Vermont, 404 F.3d at 642 ("Electrical, plumbing and fire codes, direct environmental regulations enacted for the protection of the public health and safety, and other generally applicable, non-discriminatory regulations and permit requirements would seem to **[*38]** withstand preemption."); Fla. E. Coast Ry. Co. v. City of W. Palm Beach, 266 F.3d at 1339 (application of local zoning laws to a company leasing railroad property was not preempted by ICCTA because "the zoning ordinances with which [the lessee] must comply, do not burden [the railroad] with the patchwork of regulation that motivated the passage of the ICCTA."); Maumee & W. R.R. Corp. and RMW Ventures, LLC Petition for Declaratory Order, S.T.B. Dkt. No. 34354, 2004 WL 395835, at *I (S.T.B. Mar. 2, 2004) (localities retain certain police powers to protect health and safety so long as they do not interfere with interstate rail operations).

To permit plaintiffs to pursue their state antitrust, consumer protection, and unjust enrichment claims against defendant railroads in this case, however, is not the least bit similar to the exercise by states of these non-burdensome police **[**27]** powers through state laws whose application are remote from railroad operations. Rather, for this Court to resolve plaintiffs' claims would require the application of different state antitrust and consumer protection laws to decide what defendants' fuel surcharges should have been -- creating just the

---

[3] Congress began deregulating the industry in the late 1970's, first with the enactment of the Railroad Revitalization and Regulatory Reform Act of 1980, followed shortly thereafter by the Staggers Rail Act of 1980. See City of Auburn v. United States, 154 F.3d at 1029 & n.6. Congress enacted ICCTA in order to complete the railroad **[**25]** deregulation that the earlier statutes had begun. See S. REP. No. 104-176, at 5 (1995) ("the bill continues the deregulation theme of the past 15 years by providing further regulatory reductions in the surface transportation industries.").

[4] Plaintiffs argue that **HN11**[] there is always a presumption against finding preemption. Certainly this is true when Congress has legislated in a field the states have traditionally occupied. See Medtronic, Inc. v. Lohr, 518 U.S. 470, 485, 116 S. Ct. 2240, 135 L. Ed. 2d 700 (1996). Conversely, the federal government's historic regulation of the railroad system counsels against such a presumption in this case. See CSX Transp. v. Williams, 365 U.S. App. D.C. 331, 406 F.3d 667, 673 (D.C. Cir. 2005) ("the case for preemption is particularly strong where, as here [rail transportation], 'the State regulates in an area where there has been a history of significant federal presence'") (quoting United States v. Locke, 529 U.S. 89, 108, 120 S. Ct. 1135, 146 L. Ed. 2d 69 (2000)); see also Fla. E. Coast Ry. Co. v. City of W. Palm Beach, 266 F.3d at 1327-28.

patchwork of railroad regulation that ICCTA sought to preempt. As the Senate noted when it enacted ICCTA in 1995:

> The hundreds of rail carriers that comprise the railroad industry rely on a nationally uniform system of economic regulation. Subjecting rail carriers to regulatory requirements that vary among the States would greatly undermine the industry's ability to provide the 'seamless' service that is essential to its shippers and would weaken the industry's efficiency and competitive viability.

See S. REP. No. 104-176, at 6 (1995).

Plaintiffs also argue that because *Section 10501(b)* establishes both the STB's jurisdiction as well as the preemptive effect of its decisions and remedies, any claims arising out of private railroad contracts (such as the claims at issue here) are not within the STB's statutory authority and therefore could not be preempted. This argument confuses the STB's **[**28]** jurisdiction with the scope of federal preemption and assumes that Congress would not have allowed ICCTA to leave a regulatory void. The argument is not supported by either the statute's language or its legislative history. The Senate Report expressly stated that "nothing in this bill should be construed to authorize States to regulate railroads in areas where Federal regulation has been repealed by this bill." S. REP. No. 104-176, at 6 (1995). Similarly, the Conference Committee noted that "integrated into the statement of general jurisdiction is the delineation of the exclusivity of federal remedies with respect to the regulation of rail transportation." H.R. CONF. REP. No. 104-422, at 168 (1995). And the courts that have considered the matter have recognized that through its deregulation of the railroads, Congress purposely left potential plaintiffs without a federal remedy. As one of the first courts to consider ICCTA explained:

> Defendants, however, read the ICC Termination Act's preemption clause to preempt state remedies only when federal remedies are provided under the Act.... Defendants' argument reflects a misunderstanding not only of the plain language of *section 10501(b)(2)*, **[**29]** but also of the ICC Termination Act generally. ***HN13***[] The most natural reading of *section 10501(b)(2)* is that the federal remedies provided by the ICC Termination Act **[*39]** are the only remedies available as to the regulation of rail transportation, and that the federal remedies are exclusive of state remedies except where the ICC Act has expressly provided otherwise.

CSX Transp. v. Georgia PSC, 944 F. Supp. at 1581.

Congress has created similarly broad preemption in other industries. Airlines are a prime example -- like railroads, the operation of airlines is necessarily between states, indeed, nationwide. Congress recognized in the Airline Deregulation Act ("ADA") that any regulation of the airlines by individual states would create significant problems, and so it prohibited the enactment or enforcement of state laws or regulations "related to a price, route, or service of an air carrier that may provide air transportation under this subpart." *49 U.S.C. § 41713(b)(1)* (previously *49 U.S.C. § 1305(a)(1)*), which the Supreme Court concluded preempted even state laws of general applicability because they "relate to" the airline industry:

> [P]etitioner advances the notion that only state laws specifically **[**30]** addressed to the airline industry are pre-empted, whereas the ADA imposes no constraints on laws of general applicability. Besides creating an utterly irrational loophole (there is little reason why state impairment of the federal scheme should be deemed acceptable so long as it is effected by the particularized application of a general statute), this notion similarly ignores the sweep of the "relating to" language.

Morales v. Transworld Airlines, 504 U.S. 374, 386, 112 S. Ct. 2031, 119 L. Ed. 2d 157 (1992). See also *Altria Group, Inc. v. Good, 555 U.S. 70, 129 S. Ct. 538, 172 L. Ed. 2d 398, 2008 U.S. LEXIS 9127 at *26* ("the phrase 'relating to' indicates Congress' intent to pre-empt a large area of state law to further its purpose of deregulating the airline industry"). One court expressly held that the ADA preempted the application of state antitrust and consumer protection laws to airlines setting of fares because they "relate to … a price of an air carrier." *In re Korean Air Lines Co., LTD, Antitrust Litig., 567 F. Supp. 2d 1213, 1220 (C.D. Cal. 2008)*. ***HN14***[] With similarly broad language, ICCTA preempts state laws with "respect to regulation of rail transportation." *49 U.S.C. § 10501(b)*. Plaintiffs' challenges to defendants' rates and rate practices under state antitrust, **[**31]** consumer protection and unjust enrichment laws implicate a core concern of the ICCTA -- the regulation of "economics and finances of the rail carriage industry," and, just as with the airline industry, such regulation by the states is preempted. *New York Susquehanna & W. Ry. Corp. v. Jackson, 500 F.3d at 252*.

Plaintiffs nevertheless argue that ICCTA does not preempt state regulation of contract traffic exempted by Congress from STB regulation under another section of the statute, *49 U.S.C. § 10709*. ***HN15***[] *Section 10709(c)(1)* states that "[a] contract that is authorized by this section, and transportation under such contract, shall not be subject to this part [*49 USC §§ 10101 et seq.*], and may not be subsequently challenged before the Board or in any court on the grounds that such contract violates a provision of this part [*49 USC §§ 10101 et seq.*]." *49 U.S.C. § 10709(c)(1)*. Plaintiffs rely on the "shall not be subject to this part" language for their argument that ICCTA's preemption clause does not apply to any contract traffic, and thus does not apply to any of plaintiffs' claims, all of which involve contract traffic. But plaintiffs have not cited, nor has the Court discovered, any case **[**32]** that interprets the interplay between *Sections 10501* and *10709* in the manner plaintiffs suggest, and the Court is not persuaded by plaintiffs' arguments. Read in its **[*40]** entirety, the sentence makes clear that Congress intended it to mean only that the STB has no regulatory authority over contract claims, not to create an opportunity for state regulation.

To read the "shall not be subject to this part" language as eliminating ICCTA preemption for all contract traffic would be inconsistent with congressional intent. Contract traffic, or otherwise unregulated traffic, accounts for eighty percent of all rail freight traffic. Compl. P 56. ***HN16***[] Through its enactment of ICCTA, Congress intended that "the Federal scheme of economic regulation and deregulation [of the railroads] … address and encompass all such regulation and to be completely exclusive. Any other construction would undermine the uniformity of Federal standards and risk the balkanization and subversion of the Federal scheme of minimal regulation for this intrinsically interstate form of transportation." H.R. REP. No. 104-311, at 95-96 (1995). Interpreting *Section 10709(c)* as exempting eighty percent of rail traffic from federal preemption **[**33]** opens that traffic up to the risk of pervasive state regulation of "rates" and "practices," and would make it impossible for uniform federal standards to govern railroad operations.

HN17[] Nor does *Section 10709(c)(2)*'s references to lawsuits in court, and not before the STB, as the exclusive remedy for alleged breaches of contract by railroads mean that all claims against railroads arising from shipments governed by contract may be brought in federal courts. Under *Section 10709(c)(2)*, courts may rule on breach of contract claims against railroads, a grant of jurisdiction that is necessary for any industry to function. Ensured enforcement of contracts is a basic premise of our economic system. But plaintiffs are not seeking contractual remedies here. Plaintiffs' desired remedies, through their state antitrust, consumer protection and unjust enrichment claims, are extra-contractual. To allow shippers access to extra-contractual state law remedies against a railroad, simply because they have a contract with the railroad, would gut the purposes of ICCTA.

Plaintiffs' argument concerning ICCTA's evidentiary savings clause, *49 U.S.C. § 10706(a)(3)(B)(ii)*, is similarly unavailing. ***HN18***[] The savings clause **[**34]** includes the phrase, "[i]n any proceeding in which it is alleged that a carrier was a party to an agreement, conspiracy, or combination in violation of a Federal law cited in subsection (a)(2)(A) of this section or of any similar State law, proof of an agreement, conspiracy, or combination may not be inferred from [certain kinds of evidence]." *49 U.S.C. § 10706(a)(3)(B)(ii)*. By this section, Congress provided railroads with certain evidentiary protections, but these protections cannot be transformed into a grant of authority for the enforcement of state antitrust laws that are preempted by ICCTA's express preemption clause. Had Congress intended that the entire body of state ***antitrust law*** not be preempted by *Section 10501(b)*, it would not have created the exception so tangentially. The Court will not rely on plaintiffs' interpretation of this one clause as adequate counterweight to the plain language in *Section 10501(b)*, as well as the run of legislative history and of judicial decisions on ICCTA preemption.

For these reasons, the Court concludes that all of plaintiffs' state law claims are preempted by ICCTA and must be dismissed. Because the Court finds the state claims are preempted **[**35]** as a matter of law, it need not reach the issue of whether the named plaintiffs would have standing to bring state laws claims for states in which they do not reside. [5]

[*41] *C. Standing*

The indirect purchaser plaintiffs' remaining claim is a federal antitrust claim for injunctive relief. ***HN19***[] The Supreme Court's decision in Illinois Brick prohibits claims for damages, but not those for injunctive relief, by indirect purchasers under federal ***antitrust law***. See *Illinois Brick v. Illinois, 431 U.S. 720, 746-47, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*. See also *Mid-West Paper Products Co. v. Continental Group, Inc., 596 F.2d 573, 592-94 (3d Cir. 1979)*. Defendants contend that although Illinois Brick does not bar plaintiffs' claim for injunctive relief, the claim is barred on other standing grounds and must be dismissed for lack of jurisdiction under *Rule 12(b)(1) of the Federal Rules of Civil Procedure*. Defendants specifically allege that (1) the indirect purchaser plaintiffs fail to allege injury **[**36]** resulting from the conspiracy described in the complaint, and (2) any resulting injunction would be duplicative of the results that may be achieved by the direct purchaser plaintiffs.

HN20[] The essential standing question for antitrust claims for injunctive relief is whether the plaintiffs have alleged an antitrust injury -- namely a "threatened loss or damage 'of the type the antitrust laws were designed to prevent and that flows from that which makes defendants' acts unlawful.'" *Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104, 113, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)* (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 486, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977))*. Defendants argue that ***HN21***[] Associated General Contractors v. Cal. State Council of Carpenters ("AGC"), which established a multi-factor test to determine whether federal antitrust plaintiffs met prudential standing requirements, governs plaintiffs' standing. See *Associated General Contractors v. Cal. State Council of Carpenters, 459 U.S. 519, 542, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*. [6] The indirect purchaser plaintiffs are correct, however, that the "efficient enforcement factors" identified in *AGC* do not apply to claims for injunctive relief. As the Supreme Court stated in Cargill:

> [I]n Associated General **[**37]** Contractors we considered other factors in addition to antitrust injury to determine whether the petitioner was a proper plaintiff under *§ 4* [of the Clayton Act for damages].... [H]owever, many of these other factors are not relevant to the standing inquiry under *§ 16* [of the Clayton Act for an injunction].").... [The relevant inquiry under *Section 16* is whether plaintiffs have alleged an antitrust injury because] the only remedy available is equitable in nature .... [S]tanding under *§ 16* raises no threat of multiple lawsuits or duplicative recoveries [once an injunction is imposed].

Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104 at 110-11, 107 S. Ct. 484, 93 L. Ed. 2d 427 & nn. 5-6.

The complaint alleges that "[p]laintiffs and the Class have suffered injury, and will continue to suffer injury in their business or property, proximately caused by Defendants' unlawful conduct, in that they have paid supra-competitive prices **[**38]** for Rail Fuel Surcharges applied to unregulated rail freight transportation services during **[*42]** the Class Period." Compl. P 120. Unlike in the cases cited by defendants, where the alleged injuries harmed a single competitor, through their allegations identifying defendants' supra-competitive prices, plaintiffs here have alleged an injury to competition itself. See, e.g., *Dial A Car v. Transportation, Inc., 884 F. Supp. 584, 588 (D.D.C. 1995)*, *aff'd in part, rev'd in part* *317 U.S. App. D.C. 240, 82 F.3d 484 (D.C. Cir. 1996)*. This is precisely the sort of injury that the antitrust laws are intended to protect against. See *Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. at 115* ("The antitrust laws ... were enacted for 'the protection of *competition*, not *competitors*'") (citations omitted) (emphasis in original); *In re Mercedes-Benz Antitrust Litig., 157 F. Supp. 2d 355, 364 (D.N.J. 2001)* (***HN22***[] "Where ... it is

---

[5] Nor need the Court decide whether a dismissal on preemption grounds is a dismissal for want of subject matter jurisdiction under *Rule 12(b)(1) of the Federal Rules of Civil Procedure* or for failure to state a claim under *Rule 12(b)(6)*.

[6] The AGC factors include: (1) the nature of the plaintiff's alleged injury; (2) the directness of the injury; (3) the risk of duplicative recovery; and (4) the complexity of the apportionment of damages. *Associated General Contractors v. Cal. State Council of Carpenters ("AGC"), 459 U.S. at 542-44*.

alleged that consumers paid a price higher than the price that would have been offered had the dealers been competing, the purpose of the antitrust laws is obviously thwarted.").

HN23[] Once plaintiffs have alleged an antitrust injury, they must also allege a causal connection between the prohibited behavior and their **[**39]** injury, a requirement common to standing for all plaintiffs. See *Arden Wood, Inc. v. United States Citizenship & Immigration Servs., 480 F. Supp. 2d 141, 147 (D.D.C. 2007)* (***HN24***[] "[s]tanding is an Article III requirement under which the plaintiffs must show, at an 'irreducible constitutional minimum': (1) that they have suffered an injury in fact -- the invasion of a legally protected interest; (2) that the injury is fairly traceable to the defendant's conduct (a causal connection); and (3) that a favorable decision on the merits likely will redress the injury.") (citing *Lujan v. Defenders of Wildlife, 504 U.S. 555, 560-61, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992))*. See also *Weaver's Cove Energy, LLC v. State of Rhode Island Dep't of Envtl. Mgmt., 381 U.S. App. D.C. 17, 524 F.3d 1330, 1332-33 (D.C. Cir. 2008)*.

Defendants argue that the indirect purchasers fail to allege the necessary causal connection between the charged conspiracy and their injury. In fact, however, the indirect purchasers allege:

> Agway has been in the business of shipping farm products to various customs clearance yards in Chicago, Illinois and Detroit, Michigan, transferring those products to storage facilities, and re-shipping product from these storage facilities to customers **[**40]** of Agway. Agway purchased unregulated freight transport services indirectly from one or more of the Defendants during the Class Period, and paid Rail Fuel surcharges indirectly to Defendants.
>
> * * *
>
> … During the Class Period, Fayus was a California-based wholesale and retail outlet for African and Caribbean food products servicing a diverse clientele ranging from small independent restaurants, institutional foodservice establishments as well as supermarkets and grocery stores.
>
> * * *
>
> … At all relevant times during the Class Period, Maroon has been in the business of shipping chemical products to various customs clearance yards … transferring those products to storage facilities, and re-shipping said products from said storage facilities to customers of Maroon…. Maroon purchased unregulated rail freight transport services indirectly from **[*43]** one or more of the Defendants during the Class Period, and paid Rail Fuel Surcharges indirectly to Defendants.
>
> * * *
>
> … [Plaintiffs] purchased unregulated rail freight transportation indirectly from one or more of the Defendants during the Class Period, and during the Class Period one or more of the Defendants assessed Rail Fuel Surcharges on Plaintiffs in connection **[**41]** with that unregulated rail freight transportation. The prices Plaintiffs paid to Defendants for unregulated rail freight transportation services on which Rail Fuel Surcharges were imposed were greater than the prices Plaintiffs would have paid absent the conspiracy alleged herein.

Compl. PP 28-31. Defendants' challenges to these allegations are essentially that plaintiffs purchased the rail freight services *indirectly*, a fact which, as discussed above, does not, on its own, invalidate their claims for injunctive relief. [7] Plaintiffs have alleged an antitrust injury caused by these asserted antitrust violations which their desired injunction may ameliorate; and they have alleged adequate factual detail to trace the injury to defendants' allegedly collusive activities. The Court finds that they have adequately alleged both antitrust injury and standing.

Defendants further argue that regardless of whether plaintiffs would otherwise have standing, the Court should dismiss their federal claims on equitable grounds. Doing so, according to defendants, would eliminate the possibility

---

[7] Defendants' reliance on O.K. Sand & Gravel v. Martin Marietta Technologies for the required amount of factual detail that must be pled for antitrust standing is misplaced. The court there considered whether the plaintiff had produced enough evidence *at trial* to support the verdict, not what a plaintiff must plead to make the initial showing **[**42]** of standing. See *O.K. Sand & Gravel v. Martin Marietta Technologies, 36 F.3d 565, 573 (7th Cir. 1994)*.

that the indirect purchaser plaintiffs' desired injunction would be duplicative of the injunction that the direct purchaser plaintiffs seek, would protect defendants against the payment of attorneys' fees to two sets of lawyers and would promote judicial economy. The Court recognizes the possibility that allowing both the direct and indirect purchasers to proceed with their cases may result in some inefficiency. Because the outcome of the direct purchasers' case is not yet determined, however, it is not yet known whether allowing the indirect purchasers to proceed will actually be inefficient. There is no assurance at this point that the direct purchasers will obtain an injunction against defendants. And none of the cases cited by defendants supports dismissing plaintiffs' claims before the potentially duplicative injunction is in place. Furthermore, it is **[**43]** possible that a settlement agreement could be reached between defendants and the putative direct purchaser class, a realistic possibility given that the direct purchasers' claims for money damages are viable. Even if they do not settle before trial, the two putative classes have different attorneys and may pursue different strategies during discovery or at trial, all of which may result in different outcomes. In short, the Court finds that it would be premature to dismiss the indirect purchasers' federal claim on equitable grounds at this point.

V. CONCLUSION

For these reasons, the Court will grant defendant's motion to dismiss in part and will deny in part. Plaintiff's state law claims will be dismissed. Their federal antitrust claim for injunctive relief will not be dismissed. A separate Order consistent with this Opinion shall issue this same day.

SO ORDERED.

Opinion

REPORT AND RECOMMENDATION OF SPECIAL MASTER

In 2002, Gulf States Reorganization Group, Inc. ("GSRG") filed suit against Nucor Corporation ("Nucor"), Casey Equipment Corporation ("Casey"), and Gadsen Industrial Park, LLC ("Park") alleging that they conspired to restrain trade and assist Nucor to monopolize the hot rolled coil steel industry.[1] This Court first dismissed GSRG's case upon the defendants' motion to dismiss; however, on appeal, the Eleventh Circuit found that GSRG had pled a cognizable antitrust injury **[*2]** and had standing to bring suit.[2] The parties have now completed discovery on

---

[1] Compl. (D.I. 1).

[2] *Gulf States Reorganization Group, Inc. v. Nucor Corp., 466 F.3d 961, 966-68 (11th Cir. 2006)*.

GSRG's allegation that Casey/Park[3] unlawfully contracted, combined, and conspired with Nucor[4] in violation of *Sections 1* and *2* of the Sherman Act.[5] This matter is before the Court on Casey/Park's motion for summary judgment, seeking a ruling that by virtue of the undisputed relevant market at issue, and the undisputed facts regarding the alleged conduct and the nature of Casey/Park's business, Casey/Park cannot be held to be a co-conspirator with Nucor under *Sections 1* and *2* of the Sherman Act.[6] Casey/Park's motion has now been fully briefed.[7]

On October 22, 2008, James F. Rill was appointed as Special Master pursuant to the Order of the Honorable R. David Proctor.[8] The Court ordered the Special Master to consider Casey/Park's motion for summary judgment on a priority basis, and submit a Report and Recommendation on that Motion forthwith.[9] The Special Master afforded the parties an opportunity to present any additional evidence or arguments that the parties wanted the Special Master to consider in issuing his Report and Recommendation. The parties also presented their arguments to the Special Master at an in-person meeting on November 19, 2008.

Special Master **[*3]** James F. Rill respectfully submits this report and recommendation to U.S. District Judge the Honorable R. David Proctor.

I. STATEMENT OF CONTROLLING LEGAL PRINCIPLES

A. Standard for Summary Judgment

Rule 56(c) of the Federal Rules of Civil Procedure empowers the Court to grant summary judgment when "the pleadings, the discovery and disclosure materials on file, and any affidavits show that there is no genuine issue as to any material fact and that the movant is entitled to judgment as a matter of law."[10] To survive Casey/Park's motion for summary judgment, GSRG must show "that there is a genuine issue of material fact as to whether [Casey/Park] entered into an illegal conspiracy that caused [GSRG] to suffer a cognizable injury."[11] GSRG may not rely "merely on the allegations or denials in its own pleadings; rather its response must — by affidavits or as

[3] Casey Equipment Corporation ("Casey") and Gadsen Industrial Park, LLC ("Park") filed a unified Motion on behalf of both Casey and Park. Gulf States Reorganization Group, Inc. ("GSRG") does not argue that Casey and Park require individual analysis to determine their respective liability, and no evidence within the record suggests that separate analysis for Casey and Park is required. Therefore, for the purposes of this Report and Recommendation, Casey and Park will be referred to as one entity ("Casey/Park").

[4] Casey/Park's Br. (D.I. 119) at 4-5.

[5] *15 U.S.C. §§ 1-2*.

[6] Casey/Park's Br. (D.I. 119).

[7] GSRG had requested additional discovery relating to its *Section 2* claim pursuant to *Rule 56(f)*; however, Counsel for GSRG informed the Special Master that that motion has since been resolved.

otherwise provided in [*Rule 56*] — set out specific facts showing a genuine issue for trial."[12] "Where the record taken as a whole could not lead a rational trier of fact to find for [GSRG], there is no 'genuine issue for trial.'"[13]

B. Standard for Section 1 Conspiracy Claims

Every contract or agreement within commerce restrains trade to some extent.[14] *Section 1* does not make every combination between two companies **[*4]** illegal;[15] the Supreme Court has construed *Section 1* to prohibit only *unreasonable* restraints of trade.[16] Thus, the elements of a *Section 1* claim are widely recognized to be (i) the existence of a contract, combination, or conspiracy among two or more separate entities that (ii) unreasonably restrains trade and (iii) affects interstate or foreign commerce.[17] In this case, GSRG has alleged that Nucor and Casey/Park conspired with one another to restrain trade in the hot rolled coil steel market.[18]

In *Seagood Trading Corp. v. Jerrico, Inc.*, the Eleventh Circuit announced the standard for analyzing *Section 1* conspiracy claims:

> The threshold requirement of every conspiracy claim, under both *Section 1* and *Section 2*, *is an agreement to restrain trade*. To prove that such an agreement exists between two or more persons, a plaintiff must demonstrate "a unity of purpose or a common design and understanding, or a meeting of minds in an unlawful arrangement."[19]

Plaintiff incorrectly adumbrates that somehow "contract, combination, and conspiracy" and "restraint of trade" are independent elements such that once an agreement regarding the economic event is shown, all that is needed for liability is evidence of one party's illegal act affecting the economic **[*5]** event. The correct interpretation is that the joint meeting of the minds must incorporate the illegal restraint and, thus, those elements are inextricably intertwined.

Eleventh Circuit precedent does not require GSRG to prove "an intent on the part of the co-conspirators to restrain trade or to build a monopoly" for a *Section 1* conspiracy claim.[20] To survive summary judgment, however, GSRG

[17] *Jack Russell Terrier Network v. Am. Kennel Club, Inc., 407 F.3d 1027, 1033 (9th Cir. 2005)*.

[18] *See* *Northern Securities Co. v. United States, 193 U.S. 197, 403 (1904)*. In his dissent, Justice Holmes draws a distinction between two types of *Section 1* claims: (i) contracts that restrain trade, and (ii) combinations or conspiracies that restrain trade.

[19] *Seagood Trading Corp. v. Jerr•ico, Inc., 924 F.2d 1555, 1573 (11th Cir. 1991)* (quoting *American Tobacco Co. v. United States, 328 U.S. 781, 810 (1946)*) (emphasis added). *See also* *Todorov v. DCH Healthcare Authority, 921 F.2d 1438, 1455 (11th Cir. 1991)* ("Liability will only attach to agreements designed unreasonably to restrain trade in, or affecting, interstate commerce; thus, before analyzing the reasonableness of any alleged restraint on trade, courts must first ensure that an agreement to restrain trade exists.").

[20] *Bolt v. Halifax Hosp. Medical Ctr., 891 F.2d 810, 819-820 (11th Cir. 1990)* (internal citation omitted). Plaintiffs must, however, show "'actual unlawful effects [or] facts which radiate a potential for future harm' to competition." *U.S. Anchor Mfg. v. Rule Indus., 7 F.3d 986, 1001 (11th Cir. 1993)* (quoting *Times-Picayune Publishing Co. v. United States, 345 U.S. 594, 622 (1953)*).

must present "evidence that reasonably tends to prove" that Casey/Park and Nucor "had a conscious commitment to a common scheme designed to achieve an unlawful objective."[21]

The Eleventh Circuit has recognized that "it is only in rare cases that a plaintiff can establish the existence of a conspiracy by showing an explicit agreement; most conspiracies are inferred from the behavior of the alleged conspirators."[22] Thus, GSRG is permitted to rely on circumstantial evidence to support its *Section 1* claim. However, there are limitations to "the range of inferences that may be drawn from circumstantial evidence to prove an unlawful conspiracy."[23]

"Conduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy."[24] Indeed, "the mere **[*6]** opportunity to conspire among antitrust defendants does not, standing alone, permit the inference of conspiracy."[25] The Eleventh Circuit has also cautioned that, "when the defendant puts forth a plausible, procompetitive explanation for his actions, we will not be quick to infer, from circumstantial evidence, that a violation of the antitrust laws has occurred."[26] Thus, to survive summary judgment, GSRG must present evidence 'that tends to exclude the possibility' that the alleged conspirators acted independently."[27]

C. Requirements for Subordinate Actor Liability Under Section 1

The facts of this case present the infrequent, but not unprecedented, question of whether a company's agent should be held liable for *Section 1* conspiracy where the agent had some role in facilitating the restraint. The Areeda and Hovenkamp leading antitrust treatise[28] distinguishes "pawns" from "principal actors" because of the pawn's "subordinate role in performing a discrete, designated task at the direction of his principal."[29] Areeda teaches that "pawns" are generally not held liable as co-conspirators:

> In our economy sales through brokers or other intermediaries are ubiquitous, and they are not complicit in vertical **[*7]** restraints simply because they were employed in a transaction later challenged as anticompetitive.[30]

Thus, Areeda identifies three "prerequisites to finding a conspiracy" between a pawn and his principal:

(i) The pawn must have knowledge of the principal's objective to restrain trade;

[29] *Id.* at ¶ 1474(a).

[30] *Id.* at ¶ 1474(c) (2007 Supp.).

> (ii) The pawn must not only facilitate the restraint, but must have a stake in the restraint, as distinct from merely selling its own services for their usual market price;
> (iii) The pawn must contribute materially to the restraint.[31]

Under these principles, to survive summary judgment, GSRG must not only prove that Casey/Park had knowledge of Nucor's objective to restrain trade in the hot rolled coil market, but also that Casey/Park had a stake in the illegal outcome.[32] GSRG must also show that the alleged agreement to restrain trade between Casey/Park and Nucor "reflects a merging of the parties' resources, rights, or economic power" and that the agreement contributed materially to Nucor's alleged objective to restrain trade.[33]

1. Courts' Decisions Are Consistent with Areeda's Limitations on Pawn Liability

The purpose of *Section 1* of the **[*8]** Sherman Act is to prevent conduct by separate entities that "deprives the marketplace of the independent centers of decision-making that competition assumes and demands."[34] It follows, then, that cases in which courts have resisted finding pawns liable for transactions with their principals cite *Copperweld* for this very proposition. In *Virginia Vermiculite, Ltd. v. Historic Green Springs, Inc.*,[35] cited by both Casey/Park and GSRG, the Fourth Circuit began its analysis with this principle:

> We reaffirm what was made clear by *Copperweld*, that concerted activity susceptible to sanction by *Section 1* is activity in which multiple parties join their resources, rights, or economic power together in order to achieve an outcome that, but for the concert, would naturally be frustrated by their competing interests (by way of profit-maximizing choices).[36]

In that case, W.R. Grace & Co. ("Grace"), one of Virginia Vermiculite's competitors in the vermiculite mining industry, donated a large tract of land to Historic Green Springs, Inc. ("HGSI").[37] The deed of gift contained various restrictive covenants that prohibited HGSI from conducting any mining activities on the property. These covenants had "the purpose of preventing [Virginia Vermiculite] **[*9]** from mining the properties and from using the properties to transport its vermiculite ore, in the event that [Virginia Vermiculite] ever found itself in a position to do so."[38] Virginia Vermiculite sued Grace and HGSI, alleging that Grace and HGSI conspired to restrain trade in the

---

[31] *Id.* at ¶ 1474(a). Note that Areeda's second prerequisite demands that the pawn "must not only facilitate the principal's restraint, but must also intend to restrain trade." This requirement is in direct contravention to prevailing Eleventh Circuit law, and therefore the Court should not consider Casey/Park's intent in determining the fate of GSRG's *Section 1* claim. However, no Eleventh Circuit precedent prohibits the Court from looking at other factors, such as whether Casey/Park bad a stake in the alleged restraint or whether Casey/Park was operating in its usual business capacity when it facilitated the purchase and resale of the steel mill assets.

vermiculite mining business.[39] The court granted summary judgment in favor of Grace and HGSI on Virginia Vermiculite's *Section 1* claims.[40]

On appeal, the Fourth Circuit held that the mere receipt of a gift cannot give rise to concerted conduct under *Section 1*.[41] The court found that Virginia Vermiculite had not proffered any proof that HGSI had surrendered its "resources, rights, or economic power" to Grace when it accepted the deed of gift:

> In the instant case, [Virginia Vermiculite] proffered no evidence that the donation by Grace to HGSI was not a genuine (i.e., unilaterally given) gift. It often can be difficult to determine whether a purported gift is a gift in fact, or whether it merely disguises bilateral action by which two parties join their resources, rights, or economic power together. But here, [Virginia Vermiculite] simply did not proffer evidence sufficient to raise that difficult question. [Virginia Vermiculite] did **[*10]** not proffer evidence that HGSI joined any resource to Grace's in order to establish the covenants, or to affect the land transfer.[42]

The Fourth Circuit warned, however, that with sufficient evidence a court could have found that HGSI, as Grace's pawn, had engaged in concerted conduct under *Section 1*:

> All this is not to say that in the instant case, HGSI did not in fact join some right, resource, or economic power to Grace's, in order to achieve an outcome otherwise unachievable due to the naturally competing interests of the two. It is only to say that [Virginia Vermiculite] did not proffer evidence of such. Had HGSI been in a position to impose a covenant and offered that covenant in exchange for the parcel, a court could find that Grace and HGSI had combined economic power to establish the covenants and that consequently there had been concerted action. But [Virginia Vermiculite] proffered no evidence of an exercise of right, resource, or economic power by HGSI that diminished market forces created by the naturally competing interests of the two entities.[43]

The opinion reads broadly in its requirement that a subordinate actor must surrender some right, resource, or economic power before liability **[*11]** will attach. Thus, any attempt to limit the principle expressed in *Virginia Vermiculite* to a gift situation should be rejected.

The Eleventh Circuit has also refused to inculpate pawns for lawful transactions with their principals. For instance, in *Seagood*, two wholesale food distributors - Seagood Trading Corporation and Falcon Food Service Company - sued Long John Silver's, Inc. ("LJS"), LJS's cod suppliers, and LJS's wholesale food distributor for a host of alleged anticompetitive conduct.[44] Plaintiffs complained in count VI of their complaint that LJS conspired with Martin-Brower Company ("M-B"), LJS's wholesale distributor "to have M-B refuse to deal with all of LJS's" competitors in violation of *Section 1* of the Sherman Act."[45] M-B moved the trial court for summary judgment, arguing that plaintiffs' claims were without merit.[46] The court agreed and entered summary judgment in favor of M-B.[47] In doing so, the trial court

47 *Id.*

specifically found that M-B's refusal to provide its distribution services to the plaintiffs was not anticompetitive, and that M-B's purpose for doing so was to maintain the efficiency of its operation.[48]

On appeal, the Eleventh Circuit upheld summary judgment in favor of M-B.[49] The court found that **[*12]** there was no direct or circumstantial evidence showing that M-B had conspired with LJS and its cod suppliers to restrain trade.[50] Analyzing the facts under a rubric similar to that posited by Areeda, the court found that there was (i) no evidence that M-B had knowledge of LJS's alleged objective to restrain trade, and (ii) no evidence that M-B played any role in the alleged conspiracy.[51]

Two years later, the Eleventh Circuit applied a similar analysis in *U.S. Anchor Mfg. v. Rule Industries, Inc*.[52] In that case, the Eleventh Circuit overturned a jury verdict against Rule Industries, Inc. ("Rule") and Tie Down Engineering, Inc. ("Tie Down"), both of whom had been charged with conspiring against the plaintiff in violation of *Sections 1* and *2*.[53] The court held that the plaintiff had presented insufficient evidence for the jury to find that Tie Down, Rule's supplier, had participated in Rule's alleged scheme to restrain trade within the fluke anchor market.[54] Accordingly, the Eleventh Circuit found that the district court erred in denying Tie Down and Rule's motions for judgment as a matter of law.[55]

In its opposition brief, GSRG argues that Areeda's discussion of pawn liability only cautions against finding **[*13]** antitrust conspiracies where none exist in the context of vertical distribution agreements.[56] GSRG cites Areeda's discussion of *International Travel Arrangers*, *Inc. v. Western Airlines, Inc.*[57] in support of this limitation.[58] However, Areeda does not restrict the application of the pawn liability analysis to any single class of anticompetitive conduct.[59] In fact, Areeda summarizes the chapter on pawn liability with an example analogous to the facts presented in this case:

> Suppose that a firm uses borrowed funds to monopolize the silver market in violation of *Sherman Act § 2* or to take over another firm in violation of *Sherman Act § 1* or Clayton Act *§ 7*. If these statutes are not independently violated, nothing improper has occurred even if the loan is characterized as a conspiracy. [...] Just as we do not regard shareholder investors in a newly formed company as illegal conspirators with each other or the company, we should not make lender-investors conspirators with their borrowers.[60]

59 *See generally*, Areeda, at ¶ 1474.

60 Areeda, at ¶ 1474(d).

Moreover, GSRG's reliance on *International Travel Arrangers* is inapposite, and the case is readily distinguishable from the case before this Court.

In *International Travel Arrangers*, Western Airlines, Inc. ("Western") hired an advertising company, Batten, Barton, Durstine **[*14]** and Osborn ("BBD&O"), to run a false, misleading, and deceptive advertising campaign against International Travel Arrangers ("ITA").[61] The advertising campaign was designed to block ITA's development of travel group charters, which posed a competitive threat to Western's business.[62] ITA sued Western, alleging *Section 1* and *Section 2* conspiracy claims.[63]

The Eighth Circuit upheld the lower court's ruling, which found against Western on the *Section 1* and *Section 2* claims.[64] In its decision, the Eighth Circuit used the fact pattern in *Albrecht v. Herald Co*.[65] and the Court's brief analysis of the facts in that case as the benchmark for its own analysis.[66]

An important distinction between the case at bar and *International Travel Arrangers* is that ITA only named Western, the principal, as the defendant. BBD&O, Western's pawn, was not a defendant in the case. Thus, the Eighth Circuit was not confronted with the question of pawn liability faced by this Court.

Nonetheless, the Eighth Circuit did apply elements of the pawn liability analysis to ITA's claims, finding that BBD&O had actual knowledge of Western's illegal objective, and that BBD&O materially contributed to Western's scheme to restrain trade.[67] However, the court's finding that Western's ad **[*15]** campaign was false, misleading, and deceptive was central to the court's ruling on ITA's *Section 1* claim; it identified the ad campaign as the sole evidence of Western's unreasonable restraint of trade.[68] As such, any company that retained BBD&O to run the same ad campaign targeted against ITA would have been subject to liability for *Section 1* conspiracy. Thus, unlike Casey/Park's role in this case, BBD&O was viewed by the Eighth Circuit as not merely performing a ministerial role, but deliberately fashioning the conduct that was itself an illegal act, and which would have been suspect regardless of which competitor of ITA had conspired with BBD&O to fashion the advertisements at issue. In this case, the claim of Casey/Park's liability is dependent on the fact that it was Nucor which funded the purchase of the steel mill assets at auction. GSRG has not argued, nor alleged in its Amended Complaint, that Casey/Park's purchase and resale of the steel mill assets was by itself anticompetitive.[69] Unlike the situation relating to BBD&O, if any company other than Nucor had retained Casey/Park's services to buy the steel mill assets, it is doubtful that GSRG would have brought an antitrust suit.

[66] *Id at 1265-66*.

[67] *Id.* The Eighth Circuit seemingly glossed over the "stake in the outcome of the alleged restraint" requirement; however, as BBD&O was not a defendant to the action, satisfaction of this element was unnecessary.

[68] *Id. at 1268*.

[69] *See* GSRG Br. in Opp. (D.I. 129); Amended Compl. (D.I. 1).

The foregoing **[*16]** analysis does not contemplate a threshold requirement that co-conspirators must participate in the same "line of commerce" as required by the Clayton Act[70] or "part of the trade or commerce" of the United States under *Section 2* of the Sherman Act[71] to establish a *Section 1* conspiracy claim. Indeed, long-standing precedent supports liability for *Section 1* violations against participants not in the "relevant market" as so defined. The unifying factor in all of these cases, however, is that the co-conspirators, although not market participants, had a direct stake in the principal defendants' area of commerce; that is, they dealt, at some level of manufacture, distribution, or service, with the product or service that was the subject of the plaintiffs' claims.[72] Thus, courts focus on whether a co-conspirator had a tangible interest - a direct stake - in the outcome in an overall economic context, dealing in the same economic zone as the principal defendant.

For example, in *Albrecht*, the Supreme Court found that The Herald Company ("Herald"), as well as two of its agents - Milne Circulation Services ("Milne") and George Kroner ("Kroner") - should have been held liable for *Section 1* conspiracy.[73] Herald published the Globe-Democrat, "a morning newspaper **[*17]** distributed in the St. Louis metropolitan area by independent carriers."[74] Albrecht, one of Herald's independent distributors, raised its retail price above Herald's advertised price.[75] In response, Herald hired Milne to solicit Albrecht's customers and offer to sell them the Globe-Democrat directly at the advertised price.[76] Herald hired Kroner to deliver the newspapers to those customers that Milne had successfully pulled from Albrecht's route.[77]

Under the Clayton Act's "line of commerce" requirement,[78] all three defendants would have been found to have engaged in three distinct relevant product markets: Herald produced newspapers (the news media market), Milne solicited customers for its clients (the direct marketing services market), and Kroner delivered newspapers (the newspaper sales market).[79] However, the Court found that all three defendants had an individual stake in restraining trade in a larger area of commerce: the sale and distribution of the Globe-Democrat.[80]

In *Fineman v. Armstrong World Industries, Inc.*, the Third Circuit followed and built upon the Court's rationale in *Albrecht*, drawing an important distinction for conspirator liability under *Section 1*: co-conspirators need not share the same *motive* ***[*18]*** for the restraint of trade so long as they both share the *objective* to restrain trade.[81] Plaintiffs

[73] *Albrecht, 390 U.S. 145*. As both GSRG and Casey/Park have noted, the Court's opinion in Albrecht has been widely criticized, and its principal holding, that maximum resale price maintenance was a per se violation of *Section 1*, was later overturned in *Standard Oil v. Kahn, 522 U.S. 3 (1997)*. Indeed, Areeda notes that the Court found that the three defendants conspired to maintain maximum resale prices without finding that there was actually any agreement among the three to do so.

[80] *Id.* at 149-50.

[81] ***Fineman v. Armstrong World Indus., Inc., 980 F.2d at 212***.

in *Fineman* alleged that Armstrong World Industries, Inc. ("Armstrong"), a manufacturer of floor coverings, leveraged its market power in the floor covering market to foreclose plaintiffs' competition in the retail floor covering video magazine market.[82] Plaintiffs Fineman and The Industry Network System, Inc. produced a monthly video magazine aimed at floor covering retailers, which plaintiffs attempted to market through Armstrong's network of distributors.[83] However, unbeknownst to plaintiffs, Armstrong had planned to release its own video magazine, and viewed plaintiffs' video magazine as direct competition to its forthcoming product.[84] Plaintiffs sued Armstrong when one of Armstrong's distributors, Stern & Company ("Stem"), backed out of its agreement to sell plaintiffs' video magazine.[85]

Fineman demonstrates a further extension of the "area of commerce" concept. Armstrong was first and foremost a producer of floor coverings, competing at various times in the sale of resilient tile, ceramic tile, and carpet to floor covering distributors.[86] Stem was a floor covering distributor, selling its products to retailers **[*19]** downstream.[87] However, the Third Circuit held that there was sufficient evidence to find that both Armstrong and Stem had a stake in restraining competition in advertising retail floor covering through video magazines.[88] Thus, even though the primary "line of commerce" for Armstrong and Stern was floor coverings, Armstrong could be found to have conspired to restrain trade in the market for video magazines promoting floor coverings.

Courts have a similar track record of finding antitrust conspiracy in "alter ego" cases, where associations, which do not themselves participate in the relevant market, conspire with their members to restrain trade within the market. For example, in *Sugar Institute, Inc. v. United States*, the Court upheld a decree of the Southern District of New York that dissolved a trade association that coordinated prices for its member companies within the "domestic refined" sugar industry.[89] The Sugar Institute, comprised of fifteen member companies, did not itself grow, refine, buy, or sell sugar. Instead, the trade association operated solely as a price signal to its member companies.[90] Even though the Institute did not compete in the sugar industry, the Court upheld the **[*20]** lower court's decree enjoining future operations of the trade association.[91]

More recently, in *United States v. Airline Tari Publishing Co.*, the government charged an airline fare publishing company and eight domestic airlines with *Section 1* violations.[92] Similar to The Sugar Institute's role, the Airline Tariff Publishing Co. ("ATP") operated a fare dissemination service.[93] The government alleged that ATP's system allowed participating airlines to "to reach price-fixing agreements or unnecessarily [. . .] facilitate fare

coordination."[94] Finding that the government had met all of the requirements of the Tunney Act,[95] the court granted the government's proposed final judgment, which enjoined the airlines' use of ATP's service.[96]

In sum, while the defendant need not be in the same line of commerce as embraced in the Sherman and Clayton Acts as its co-conspirator, it must be sufficiently involved in the product or service that is subject of the allegation of illegality, have a stake in the outcome of the illegal venture, and make a material contribution to the outcome of the illegal venture.

II. SUMMARY JUDGMENT SHOULD BE GRANTED IN FAVOR OF CASEY/PARK FOR GSRG'S SECTION 1 CONSPIRACY CLAIM

A. The Record, Taken as [*21] a Whole, Could Not Lead a Rational Trier of Fact to Find for GSRG on Its *Section 1* Claims

GSRG has failed to identify any evidence that Casey/Park joined with or surrendered its "resources, rights, or economic power" to Nucor as required for *Section 1* claims.[97] Nor has GSRG presented any evidence that demonstrates that Casey/Park and Nucor had formed "a conscious commitment to a common scheme designed to achieve an unlawful objective."[98] Indeed, the evidence presented by GSRG is more consistent with legitimate business operations than with an illegal conspiracy. Finally, there is no evidence to support the conclusion that Casey/Park had a stake in whether Nucor would be successful in achieving or maintaining monopoly power in the hot rolled coil market.[99]

Casey/Park is in the business of buying and reselling used steelmaking assets.[100] Casey/Park has also on occasion purchased parcels of land formerly occupied by manufacturers and converted them into industrial parks.[101] However, Casey/Park does not make, sell, or buy hot rolled coil stee1.[102]

Don Casey, Chairman of Casey Equipment Corporation, testified that he was evaluating an opportunity to purchase the used steel mill assets even before Nucor approached Casey/Park **[*22]** to discuss Nucor's purchase of the assets.[103] Casey estimated the scrap value of the steel mill assets to be at least $7-8 million.[104] There is also

101 Casey/Park's Statement of Facts (D.I. 120), ¶¶ 72-74; undisputed in GSRG's Counterstatement of Facts (D.I. 130), ¶¶ 72-74.

102 Casey/Park's Statement of Facts (D.I. 120), ¶¶ 7-9; undisputed in GSRG's Counterstatement of Facts (D.I. 130), ¶¶ 7-9.

103 *See* Ex. 3 to Casey/Park's Statement of Facts (D.I. 121) at ¶ 14. *See also* Casey/Park's Statement of Facts (D.I. 120), ¶¶ 23, 41; undisputed in GSRG's Counterstatement of Facts (D.I. 130), ¶¶ 23, 41. There is a dispute as to whether GSRG approached Nucor about the steelmaking assets or *vice versa*. However, a finding of fact in favor of either party would not affect the outcome of this Report and Recommendation.

evidence within the record that there existed at least some opportunity to resell the assets in the international market for a profit.[105]

However, there is no evidence, direct or circumstantial, that shows that Casey/Park knew that Nucor's alleged objective was to restrain trade in the hot rolled coil industry.[106] Although Don Casey was aware that GSRG had discussed reopening the shuttered steel mill if it won the bankruptcy auction, there is no evidence that Casey/Park had discussed GSRG's plans for the steel mill with Nucor.[107] The written agreement between Casey/Park and Nucor, perhaps the single most important piece of evidence in the case, appears neutral on its face.[108] The agreement does not even reference the hot rolled coil industry.[109]

Confidentiality provisions are the rule, rather than the exception, for business transactions. Thus, it is no surprise that the agreement between Casey/Park and Nucor contained a confidentiality provision.[110] It is also doubtful that Nucor's agreement to advance no more than $8 million **[*23]** for Casey/Park to bid on the steel mill assets was merely coincidental; Don Casey had estimated that the scrap value for the assets was at least $7-8 million and told Nucor that there was a significant upside potential for the resale of the assets.[111] Don Casey testified that there was a "hot" market for the sale of steel mill assets in Asia, and that the parties' agreement was drafted to incentivize Casey/Park to focus on reselling the assets to an international purchaser.[112]

Similarly, there is no evidence to show that GSRG had a stake in the alleged restraint of trade other than earning its typical commission from brokering the purchase and resale of the steel mill assets.[113] Nucor and Casey/Park agreed to split the proceeds of any sale of the steel mill assets: seventy-five percent to Nucor and the remainder to Casey/Park.[114] Don Casey testified that Casey/Park's twenty-five percent commission did not reflect an extraordinary and unexplained departure from other commission rates.[115] Casey/Park took on greater risk in the Nucor transaction than it had in deals with other companies.[116] For example, the agreement gave Casey/Park three

---

104 Casey/Park's Statement of Facts (D.I. 120), ¶ 38; undisputed in GSRG's Counterstatement of Facts (D.I. 130), ¶ 38. Nucor, operating several hot rolled coil mills, is able to use scrapped steel to manufacture its product. GSRG's Counterstatement of Facts (D.I. 130), ¶¶ 6-7; undisputed in Casey/Park's Reply Statement of Facts (D.I. 142),¶¶6-7.

105 Casey/Park's Statement of Facts (D.I. 120), ¶¶ 37, 40-41; undisputed in GSRG's Counterstatement of Facts (D.I. 130), ¶¶ 37, 40-41. GSRG disputes whether there was, in fact, a "hot" market in Asia at the time at which Casey/Park bid on the steel mill assets. Whether or not the Asian market was "hot" at the time is immaterial; Casey/Park was able to sell the steel mill assets to a customer in Asia for three times the purchase price at bankruptcy. Casey/Park's Statement of Facts (D.I. 120), ¶ 82; undisputed in GSRG's Counterstatement of Facts (D.I. 130), ¶ 82.

111 Casey/Park's Statement of Facts (D.I. 120), ¶¶ 37-38, 40-41; undisputed in GSRG's Counterstatement of Facts (D.I. 130), ¶¶ 37-38, 40-41.

112 Ex. 3 to Casey/Park's Statement of Facts (D.I. 121) at ¶¶ 16, 18.

113 *Id.*

114 Ex. 6 to Casey/Park's Statement of Facts (D.I. 122) at ¶ 4.

115 Ex. 3 to Casey/Park's Statement of Facts (D.I. 121) at ¶ 19.

116 *Id.*

years to find a suitable purchaser for the steel mill assets.[117] **[*24]** Casey/Park bore the risk of finding an acceptable purchaser for the steel mill assets in that three-year window.[118] If Casey/Park could not find an acceptable purchaser, the assets automatically transferred to Nucor and Casey/Park received no commission.[119]

In short, none of the facts marshaled by GSRG "tend to exclude the possibility" that the transaction between Casey/Park and Nucor was a legitimate business deal. While GSRG attributes ulterior motives for the purchase and resale of the steel mill assets and infers a conspiracy to restrain trade therefrom, the record simply reflects that Casey/Park was engaged its ordinary course of purchasing and selling steel mill assets and developing industrial parks.

Under these circumstances, and consistent with the legal principles and precedents hereinabove discussed, Casey/Park should not be held to be a co-conspirator with Nucor by reason of its purchase of the assets in question.

B. Summary Judgment Should Also Be Granted in Favor of Nucor for GSRG's *Section 1* Conspiracy Claim

Finding that summary judgment in favor of Casey/Park is appropriate on GSRG's *Section 1* claim, the Court should also dismiss GSRG's *Section 1* claim against Nucor. *Section 1* conspiracies require proof that at least two parties share "a conscious commitment to a common scheme designed to achieve an unlawful objective."[120] Because GSRG cannot **[*25]** establish its *Section 1* claim against Casey/Park, it is also foreclosed from asserting a *Section 1* claim against Nucor, the only alleged conspirator that remains.[121] Therefore, the Court should also enter summary judgment in favor of Nucor on GSRG's *Section 1* claim.[122]

III. SUMMARY JUDGMENT SHOULD BE GRANTED IN FAVOR OF CASEY/PARK AND NUCOR FOR GSRG'S SECTION 2 CONSPIRACY CLAIM

Conspiracy claims under *Section 2* of the Sherman Act require more proof than do *Section 1* conspiracy claims:

> Conspiracy under Eleventh Circuit law requires (1) an agreement in restraint of trade (2) deliberately entered into with the specific intent of achieving a monopoly (3) which could have had an anticompetitive effect and (4) at least one overt act in furtherance of the conspiracy.[123]

However, both *Section 1* and *Section 2* conspiracy claims "require the same threshold showing-the existence of an agreement to restrain trade."[124]

GSRG simply has not adduced sufficient evidence to enable a rational fact-finder to find in favor of GSRG on its *Section 2* conspiracy claims. As discussed above, GSRG has not marshaled any evidence to satisfy the threshold

---

117 Ex. 6 to Casey/Park's Statement of Facts (D.I. 122) at ¶ 6.

118 *Id.*

119 *Id.*

showing of the existence of an agreement to restrain trade. Moreover, even if GSRG could meet this threshold requirement, there is no evidence of Casey/Park's **[*26]** specific intent to assist Nucor in achieving monopoly power. Without sufficient evidence of an agreement to restrain trade or Casey/Park's specific intent to help Nucor monopolize the hot rolled coil industry, GSRG's *Section 2* conspiracy claim must also be dismissed.

Finally, as discussed above in reference to GSRG's *Section 1* claim, if GSRG cannot maintain its *Section 2* conspiracy claim against Casey/Park, the *Section 2* conspiracy claim against Nucor must also be dismissed.

IV. CONCLUSION

WHEREFORE, THE PREMISES CONSIDERED, the Special Master hereby recommends that this Honorable Court grant summary judgment in favor of Casey/Park and Nucor on Counts I and III of GSRG's Amended Complaint.[125]

Date: January 5, 2009

For Action DVD, Alex Doe, Counter-Claimants: Alek H. El-Kamhawy, Law Office of Alek El-Kamhawy, Lakewood, OH.

Judges: SOLOMON OLIVER, JR., UNITED STATES DISTRICT JUDGE.

Opinion by: SOLOMON OLIVER, JR.

Opinion

ORDER

Now pending before the court in the above-captioned case are the following motions: (1) Defendants Action Software, Inc. ("Action Software") and Alexander Belfer's ("Belfer") (collectively, "Defendants" or "Action") Motion to Dismiss or, in the Alternative Motion for Summary Judgment (ECF No. 156); and (2) Plaintiff Studio A Entertainment, Inc.'s ("Plaintiff" or "Studio A") Motion for Summary Judgment (ECF No. 157). For the following reasons, this court denies Defendants' Motion to Dismiss or, in the Alternative Motion for Summary Judgment and grants Plaintiff's Motion for Summary Judgment.

I. FACTS AND PROCEDURAL HISTORY [*2]

Plaintiff Studio A, a California corporation, is in the business of creating adult videos, which it sells primarily in DVD format throughout the country. Studio A, which is owned by Paul and Carol Nevitt, has obtained copyright registrations for many of these videos, and all of its DVD packages bear Plaintiff's registered trademark, "ANDREW BLAKE." Defendant Action, which is owned and operated by Alexander Belfer, is an Ohio corporation that is also in the business of selling adult videos. Action maintains a website entitled, "Action DVD" that has been selling adult videos for approximately eight years. Action frequently purchases Studio A's films to sell at its stores and online.

Although Action generally purchases films directly from Studio A, in June 2004, Action purchased Studio A DVDs from Active Distributors, Inc. ("Active"), a Canadian company operated by Billy Kyriazoglou ("Kyriazoglou"), for a cheaper price. It again purchased more Studio A DVDs from Active in October and December 2004, buying various quantities of 21 Studio A titles for a total of 1,145 DVDs. Action alleges that prior to purchasing them, they informed Studio A that its DVDs were being sold at a cheaper price **[*3]** from a Canadian store. Carol Nevitt, co-owner of Studio A, allegedly advised Defendants to "go and get" the cheaper DVDs. After purchasing the DVDs from Active, Action appears to have sold 912 DVDs out of the 1,145 that it purchased from Active.[1]

Studio A claims that all of the DVDs sold by Action were unauthorized or "bootleg" DVDs that were copied by another company without the consent of Studio A, then sold to Active who later sold them to Action. On May 11, 2005, Studio A filed the instant suit against Action DVD, Alex Doe, and John Does 1-10, asserting claims for copyright infringement and trademark infringement. This Complaint was subsequently amended, adding as defendants Action Software, Inc. and Alex Belfer. The First Amended Complaint also asserts two counts of copyright infringement. The first count is asserted pursuant to *17 U.S.C. § 106(3)*, which provides relief to a copyright owner when an infringer disrupts its right to distribute copies to the public, and the second claim falls under *17 U.S.C. § 602*, which provides relief to a copyright owner when a person imports into the United States copies of the owner's work.

In response, Defendants filed an answer and counterclaim, asserting a unfair competition **[*4]** counterclaim under *California Business and Professional Code §§ 17200, et seq.* Defendants argue that Studio A, as a competitor in the adult film industry, engaged in unfair competition by failing to comply with an alleged industry practice that requires a film producer dealing with piracy issues to notify distributors and customers of this problem.[2] Defendants allege that this practice is done in order to protect innocent customers, such as themselves, from purchasing unauthorized DVDs and opening themselves up to liability.

On June 12, 2007, Defendants filed a Motion to Dismiss or, in the Alternative Motion for Summary Judgment, contending that Plaintiff's suit should be dismissed because of insufficiency of process and a failure to properly serve Defendants. Defendants also claim that, in the alternative, summary judgment should be granted in their favor because Plaintiff failed to take any action to secure its works or alert distributors of any problems with the unauthorized copying of its DVDs, and because Plaintiff failed to demonstrate that Defendants sold unauthorized DVDs. Plaintiff, on that same day, filed a Motion for Summary Judgment, claiming that the evidence demonstrates that Defendants infringed Plaintiff's copyright and trademark. **[*5]** Plaintiff also argues that Defendants' counterclaim should be dismissed as a matter of law.

II. SUMMARY JUDGMENT STANDARD

---

[1] This court issued an *Ex Parte* Order granting Plaintiff a Temporary Restraining Order and Order of Seizure (ECF No. 10). Pursuant to that Order, on May 12, 2005, counsel for the Plaintiff carried out a seizure at Action's place of business, recovering 233 Studio A DVDs that were not yet sold.

[2] To support its claim that this industry practice exists, Defendants cite to the expert report of John Ban. This court, in a previous Order (ECF No. 170), struck John Ban's expert report in its entirety. The court again reaffirmed this decision in (ECF No. 175), in which the court denied Defendants' Motion for Reconsideration of the Order striking this report. The court, therefore, will not consider his report for the purpose of this Order, and an issue remains as to whether this industry practice indeed exists.

Federal Rule of Civil Procedure 56(c) governs summary judgment motions and provides:

> The judgment sought shall be rendered forthwith if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law . . . .

In reviewing summary judgment motions, this court must view the evidence in a light most favorable to the non-moving party to determine whether a genuine issue of material fact exists. *Adickes v. S.H. Kress & Co., 398 U.S. 144, 153 (1970)*; *White v. Turfway Park Racing Ass'n, Inc., 909 F.2d 941, 943-44 (6th Cir. 1990)*. A fact is "material" only if its resolution will affect the outcome of the lawsuit. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248 (1986)*. Determination of whether a factual issue is "genuine" requires consideration of the applicable evidentiary standards. Thus, in most civil cases the Court must decide "whether reasonable jurors could find by a preponderance of the evidence that the [non-moving party] is entitled to a verdict." *Id. at 252*. However, "[c]redibility judgments and weighing of the evidence are prohibited during the consideration of a motion for summary judgment." *Ahlers v. Scheibil, 188 F.3d 365, 369 (6th Cir. 1999)*.

Summary judgment **[*6]** is appropriate whenever the non-moving party fails to make a showing sufficient to establish the existence of an element essential to that party's case and on which that party will bear the burden of proof at trial. *Celotex Corp. v. Catrett, 477 U.S. 317, 322 (1986)*. Moreover, "the trial court no longer has a duty to search the entire record to establish that it is bereft of a genuine issue of material fact." *Street v. J.C. Bradford & Co., 886 F.2d 1472, 1479-80 (6th Cir. 1989)* (citing *Frito-Lay, Inc. v. Willoughby, 863 F.2d 1029, 1034 (D.C. Cir. 1988))*. The nonmoving party is under an affirmative duty to point out specific facts in the record as it has been established that create a genuine issue of material fact. *Fulson v. City of Columbus, 801 F. Supp. 1, 4 (S.D. Ohio 1992)*. The non-movant must show "more than a scintilla of evidence to overcome summary judgment"; it is not enough to show that there is slight doubt as to material facts. *Id.*

> When a motion for summary judgment is made and supported as provided in this rule, an adverse party may not rest upon the mere allegations or denials of the adverse party's pleading, but the adverse party's response, by affidavits or as otherwise provided in this rule, must set forth specific facts showing that there is a genuine issue for trial.

Fed. R. Civ. P. 56(e).

III. LAW AND ANALYSIS

A. Defendants' Motion to Dismiss, or Motion for Summary Judgment

Defendants first argue that Plaintiff's First Amended Complaint **[*7]** should be dismissed because of insufficiency of process and improper service by Plaintiff. Defendants, in the alternative, argue that summary judgment should be granted in their favor with regard to Plaintiff's copyright and trademark infringement claims. Lastly, they contend that even if Action Software is liable for these claims, Belfer, Action's owner, cannot be held personally liable.

1. Insufficiency of Process and Improper Service of Process

Defendants argue that this court should dismiss the instant action pursuant to *Federal Rule of Civil Procedure 12(b)(4)* for insufficiency of process because the Complaint named Action DVD, Inc. and Alex Doe as defendants instead of Action Software, Inc. and Alexander Belfer, which are the correct names for the corporation and its owner. Defendants further argue that Plaintiff has failed to process and serve Action Software, Inc. and Alexander Belfer pursuant to *Federal Rule of Civil Procedure 12(b)(5)*. Defendants' arguments in favor of dismissal, however, are not well-taken. First, while process may be technically deficient under *Rule 12(b)(4)* if the forms use the wrong name, courts generally overlook minor technical defects, particularly when there is no actual prejudice to the complaining party. *Libertad v. Welch, 53 F.3d 428, 440 (1st Cir. 1995)*; *see also* *Louisiana Acorn Fair Hous. v.*

Quarter House, 952 F. Supp. 352, 355 (E.D. La. 1997) (holding that process **[*8]** was sufficient even where plaintiff incorrectly named the party but defendant received notice and failed to suffer any prejudice as a result of the mistake.) In the instant case, Plaintiff mistakenly named Action DVD, the name of Action Software's website, instead of Action Software, and Alex Doe instead of Alexander Belfer in the Complaint. However, Plaintiff, in the First Amended Complaint, named Action Software, Inc. and Alex Belfer; therefore, Plaintiff corrected any technical error. Furthermore, even though the names were technically incorrect in the original Complaint, Defendant Belfer and Action Software had notice of the suit as evidenced by the fact that they retained counsel who appeared on their behalf on May 25, 2005 (ECF No. 16), two weeks after the original Complaint was filed. Defendants also failed to point to any prejudice that they suffered as a result of the mistake.

Second, under Rule 12(b)(5), service of process is insufficient if delivery is never accomplished or not accomplished within 120 days after commencement, or plaintiff otherwise failed to comply with Rule 4. *See* Fed. R. Civ. P. 4(m); Nafziger v. McDermott Int'l, Inc., 467 F.3d 514, 521 (6th Cir. 2006); Crane v. Battelle, 127 F.R.D. 174, 177 (S.D. Cal. 1989). Defendants fail to argue and the court finds no evidence that delivery was not accomplished on Action Software **[*9]** and Alexander Belfer within 120 days after Plaintiff commenced this suit.

Third, any challenges to service and process are waived unless properly raised by pre-answer motion or in the responsive pleading. *See* Fed. R. Civ. P. 12(h)(1)(B); Rauch v. Day & Night Mfg. Corp., 576 F.2d 697, 701 (6th Cir. 1978). In the instant case, Defendants did not file a pre-answer motion raising either of the two defenses. Furthermore, in Defendants' Answer and Counterclaim, they again failed to raise both Rule 12(b)(4) or 12(b)(5) as a defense. Therefore, even if Defendants had a proper basis for these defenses, they are procedurally waived.[3]

2. Copyright Infringement Claims

Plaintiff asserts two counts of copyright infringement against Defendants. The first count falls under 17 U.S.C. § 106, which allows copyright owners to institute an action for any infringement of the owner's interest. To establish a copyright infringement cause of action under this provision, the plaintiff must prove the following elements: (1) ownership of a valid copyright, and (2) "copying" of constituent elements of the work that are original. Feist Publ'ns v. Rural Tel. Serv. Co., 499 U.S. 340 (1991); Coles v. Wonder, 283 F.3d 798, 801 (6th Cir. 2002). The parties do not dispute Studio A's ownership interest in all 21 DVD titles at issue in this case.[4] Therefore, the remaining issue is whether Defendants "copied" Plaintiff's work. Copying means any action that **[*10]** conflicts with one of the exclusive rights conferred by the Copyright Act. Sony Corp. v. Universal City Studios, Inc., 464 U.S. 417, 434 (1984). The Copyright Act "confers on owners the exclusive rights to reproduce the work, prepare derivative works, distribute copies to the public, to perform the work publicly, and to display the work publicly." Michaels v. Internet Enter. Group, 5 F. Supp. 2d 823, 830 (C.D. Cal. 1998) (citing 17 U.S.C. §§ 106 (1) - (5)). In the instant case, Plaintiff alleges that Defendants disrupted its exclusive right to distribute copies to the public by purchasing and selling unauthorized or bootleg DVDs to the public.

Defendants contend that summary judgment should be granted in their favor with regard to this claim. They argue that there is no evidence that the DVDs sold by Defendants are bootleg. However, Plaintiff has demonstrated that the DVDs found at Action differ in various respects to legitimate Studio A DVDs, which helps prove their claim that Defendants sold unauthorized copies of its registered works. First, Studio A assigns a unique production code to each of its titles when it makes its copies. (Carol Nevit's June 12, 2007 Decl. ¶ 10, ECF No. 157-5.) All of the 21

---

[3] Defendants also argue that Plaintiff failed to state any specific cause of action against either Action Software or Belfer. However, the First Amended Complaint clearly names them as Defendants and asserts each claim against "Defendants," which would therefore include Action Software and Belfer. (First Amended Compl. ¶¶ 9, 14, 21, ECF No. 158.) The court, therefore, finds this argument unpersuasive.

[4] Plaintiff attached the copyright registrations (ECF No. 157-5.) for 20 of the 21 DVD titles that demonstrate Studio A's ownership. For the remaining title, Plaintiff demonstrated that it was owned by another company, which was controlled by Studio A's president, Paul Nevitt. The registration was transferred to Studio A by oral agreement in 1996, and was confirmed in writing by the parties in March 2007.

Studio A titles that were seized from Defendants' place of business contained 4-digit production codes that did not match any code authorized by Studio **[*11]** A. (*Id.* at ¶ 12.) Second, Jerry Borreson ("Borreson"), the manager of Marina Beach Video who subcontracts out the replication of Studio A DVDs, states that each DVD contains a particular set of barcodes that corresponds with the title of the DVD. (Borreson Decl. ¶19.) He further states that the codes found on the Action DVDs were different from any code they ever used on any Studio A DVD. (*Id.* at ¶ 22.) Third, Borreson states that he embeds the title of the film onto the inner ring of the bottom side of the DVD for all of its titles except one in issue in this case. (*Id.* at ¶ 24.) However, none of the DVDs found with Defendants had the name of the film embedded on the disk; instead, they had only the unauthorized codes on the disks. (*Id.*) Fourth, all Studio A DVD titles except one at issue in this case are manufactured on semi-transparent disks. (*Id.* at ¶ 25.) This type of disk allows a person to view the front-cover artwork through the disk when held up to a strong light. (*Id.*) Ten of the alleged bootleg DVDs contain a white liner underneath the artwork, which prevents the disk from being semi-transparent. (*Id.*) Fifth, all Studio A DVDs, except two titles at issue in the instant case, **[*12]** have color printed inserts. (*Id.* at ¶ 29.) None of the DVDs found in Defendants possession had any inserts. (Carol Nevitt March 27, 2007 Decl. ¶ 18, ECF No. 132-3.) Lastly, Plaintiff attached the statement of Richard Breene ("Breene") (ECF No. 132-5), who is the president of the graphics company that prints the covers for Studio A DVDs.[5] Breene noticed several differences between the covers of the allegedly unauthorized DVDs and legitimate Studio A DVDs, including that the size of the covers were different and the barcodes on the covers appeared different. Breene states the barcodes on the allegedly bootleg DVDs were fuzzy and contained "tiny rosettes" or dots. In producing the covers for legitimate Studio A DVDs, however, Breene stated that they copy the cover in such a way as to avoid the appearance of these dots. (Breene Decl. ¶ 6-9.) To further illustrate this point, Plaintiff submitted to the court a Studio A DVD original along with a DVD seized from Defendants' place of business. (ECF No. 108.) The court could see the variation between the size of the cover as well as the dots in the barcode of the Action DVD, which were not present on the authentic Studio A DVD. Plaintiffs have **[*13]** therefore raised a genuine issue of material fact with regard to the legitimacy of the DVDs purchased by Action.

Defendants, on the other hand, argue that summary judgment should be granted in their favor because Studio A, who filed eight additional copyright infringement actions against various defendants in different jurisdictions, admitted that the DVDs recovered at those stores were identical to those found at Action's store. Defendants further contend that "[i]n each of the aforementioned matters, the Courts failed to find that DVDs seized by Studio A and by its counsel are illegitimate." However, Plaintiff states that all but one of those cases settled, and in the one case that did not settle, the defendants defaulted on discovery and abandoned their defense. While Plaintiff failed to provide evidence to support this contention, the court, in looking at the dockets of those cases, did not find any order issued in those cases that made a finding with regard to the legitimacy of any of those DVDs. Instead, the court discovered that Plaintiff, by stipulation, voluntarily dismissed most of the cases, which could indicate that the parties resolved the dispute before the court **[*14]** issued any dispositive ruling. Thus, the court is unpersuaded by Defendants' argument.

In addition to providing evidence that the DVDs were unauthorized copies, Plaintiff has also provided evidence, which Defendants do not dispute, that they resold these DVDs to the public. Action, who is in the business of selling adult films, ordered 1,145 Studio A copies from Active. (Defs. Response to Pl.'s Interrogatory # 26, ECF No. 157-3; Purchase Orders from Active Distributors, Inc., ECF No. 157-3.) These purchases occurred in June, October, and December of 2004. (*Id.*) On May 12, 2005, pursuant to this court's Order, Studio A seized only 233 DVDs on Action's premises that were placed in a bin for sale, indicating that Action had sold the other 912 DVDs.

[5] Plaintiff submitted the statement of Richard Breene as a lay witness and not an expert witness. However, many of the statements made by Breene in his declaration are based on his scientific knowledge within the graphics and printing field. Pursuant to *Federal Rule of Evidence 701*, the court is prohibited from considering this testimony without Plaintiff first establishing him as an expert witness. The court, however, is permitted to consider those statements that are based on Breene's personal knowledge as the owner of the printing company used by Studio A. *See e.g.* *Lightning Lube, Inc. v. Witco Corp., 4 F.3d 1153 (3d Cir. 1993)* (finding that the district court did not err in permitting the plaintiff's owner to give lay opinion testimony as to damages as it was based on his knowledge and participation in the business.) The court will therefore consider only those statements made by Breene with personal knowledge and not those that are opinions derived from his potential expertise in the printing field.

Furthermore, Action impliedly admitted selling the DVDs, stating that all of its Studio A titles, which would include those purchased from Active and those purchased directly from Studio A, were placed in a bin and sold. (Defs. Response to Pl.'s Interrogatory #27, ECF No. 157-8.) Accordingly, Plaintiff presented sufficient evidence to rebut Defendants' argument that there is no evidence to support its claim. The court, therefore, denies summary **[*15]** judgment in favor of Defendants on Plaintiff's *Section 106(3)* claim for copyright infringement.

Plaintiff's second count for copyright infringement under *17 U.S.C. § 602* provides relief for a copyright owner when its work is imported into the United States without its authorization. *Section 602* provides in pertinent part that:

> [The] importation into the United States, without the authority of the owner of the copyright under this title, of copies or phonorecords of a work that have been acquired outside the United States is infringement of the exclusive right to distribute copies or phonorecords under *Section 106*, actionable under *Section 501*.

This section deals with two separate situations: (1) importation of bootleg works; and (2) unauthorized importation of copies or phonorecords that were lawfully made. *Parfums Givency v. C & C Beauty Sales, 832 F. Supp. 1378, 1383* (citing H.R. Rep. No. 1476, 94th Cong., 2d Sess. 169 (1976)). There are three requirements for a copyright claim under this section: (1) plaintiff must be the owner of the copyright at issue; (2) copies of the work must have been imported into the United States "without the authority of the owner of the copyright"; and (3) the imported copies must have been "acquired outside the United States." *Parfums, 832 F. Supp. at 1383*. Plaintiff has met the first requirement as Studio **[*16]** A is the copyright owner of all titles in issue. Under the second requirement, Defendants have repeatedly argued that Studio A authorized the importation of these copies. They have provided the testimony of Belfer who alleges that he spoke to Carol Nevitt of Studio A and advised her that they could purchase Studio A DVDs from Canada for a cheaper price. Belfer further contends that Nevitt told him to "go and get it." (Belfer Dep. 114-17, ECF No. 155.) While this evidence, which Plaintiff disputes ever occurred, arguably demonstrates that Studio A authorized Belfer to import legitimate copies of Studio A DVDs from Canada, it does not, however, demonstrate that Nevitt authorized Belfer to import bootleg works, and Defendants have failed to provide any such evidence. Lastly, under the third element, it is clear that the DVDs arrived from Canada, as Action admits to purchasing the DVDs from Active Distributors, a Canadian company. (Defs. Response to Pl.'s Interrogatory # 26; Purchase Orders from Active Distributors, Inc.) Because Plaintiff has provided evidence to support its claim under *Section 602*, the court denies summary judgment in favor of Defendants. The court will later discuss whether summary **[*17]** judgment in favor of Plaintiff is warranted on its two counts of copyright infringement.

3. Trademark Infringement Claim

Defendants argue that if Plaintiff's copyright claim fails, its trademark infringement claim would fail as well because the claim is entirely encompassed by its copyright claim. Because the court has found that Plaintiff's copyright claim has not failed based on the evidence, Defendants' argument is without merit.

4. Personal Liability for Alexander Belfer

Defendants, without citing any law, argue that Belfer, individually, is not a proper defendant in the case at bar because "Plaintiff never alleged and/or otherwise maintained that Alex Belfer performed any acts outside the scope of his employment and duties as President of Action Software, Inc." (Pg 19, ECF No. 156.) Plaintiff, however, argues that regardless of whether Belfer acted within the scope of his employment, he is jointly liable either under a theory of "acting in concert" or vicarious liability. It is well-settled that both copyright and trademark infringement are tort claims, in which common law concepts, such as joint liability, apply. *See e.g. Demetriades v. Kaufmann, 690 F. Supp. 289, 292 (S.D.N.Y. 1988)*; *Screen Gems-Columbia Music, Inc. v. Mark-Fi Records, Inc. 256 F. Supp. 399, 403 (S.D.N.Y. 1966)* ("[B]ecause copyright is analogous to a species of tort, **[*18]** 'common law concepts of tort liability are relevant in fixing the scope of the statutory copyright remedy . . . ."); *David Berg and Co. v. Gatto Int'l Trading Co., 884 F.2d 306, 311 (7th Cir. 1989)* ("Because . . .trademark infringement [is] tortious, the doctrine of joint tortfeasors does apply.") Joint liability arises when the defendant knowingly participates in or furthers a tortious act. *Demetriades, 690 F. Supp. at 293*.

In the instant case, Belfer, as the president and sole owner of Action Software, makes all major business decisions, including what videos to purchase and who to purchase from. (Belfer Dep. 3-4, 25, ECF No. 155.) Belfer admits to purchasing these allegedly bootleg DVDs. (Belfer Dep. 121, 131.) Even though Belfer may have been acting within the scope of his employment by purchasing them, by doing so, he furthered a potentially tortious act of copyright and trademark infringement. Therefore, Belfer is jointly liable by furthering Action Software's alleged involvement in these claims.

Even if Belfer did not knowingly further this act, liability for copyright infringement is not limited to those who directly engage in infringing activity; instead, the doctrine of vicarious liability also applies. *See* *Jobete Music Co. v. Johnson Communs,. Inc., 285 F Supp. 2d 1077, 1083 (S.D. Ohio 2003)*. In *Sony Corp. of America v. Universal City Studios, Inc., 464 U.S. 417, 434-35 (1984)*, the Court stated that:

> [T]he Copyright Act does not expressly render anyone **[*19]** liable for infringement committed by another. . . The absence of such express language in the copyright statute does not preclude the imposition of liability for copyright infringement on certain parties who have not themselves engaged in infringing activity. . . [V]icarious liability is imposed in virtually all areas of the law.

The elements of vicarious liability are: (1) the officer has the right and ability to supervise the activity, and (2) the officer has a direct financial interest in such activities. *Metro-Goldwyn-Mayer Studios, Inc. v. Grokster, Ltd., 545 U.S. 913, 930 (2005)*; *Jobete, 285 F. Supp. 2d at 1083*.

Here, Belfer again has the right and ability to supervise all video purchases as he stated in his deposition. (Belfer Dep 25.) Furthermore, he admitted that he receives the "lion's share" of Action's profits. (Belfer Dep. 105.) Thus, he had a direct financial interest in purchasing these allegedly bootleg DVDs. Plaintiff also has a basis under vicarious liability to assert its claims against Belfer.

Based on the foregoing analysis, the court denies, in full, Defendants' Motion to Dismiss or, in the Alternative Motion for Summary Judgment.

B. Plaintiff's Motion for Summary Judgment

Plaintiff argues that summary judgment should be granted in its favor with regard to its copyright **[*20]** and trademark infringement claims as well as Defendants' unfair business dealing counterclaim. Plaintiff also seeks monetary damages upon a finding of summary judgment in its favor.

1. Copyright Infringement Claims

As discussed above, with regard to Plaintiff's copyright infringement claim under *17 U.S.C. § 106(3)*, Plaintiff has presented evidence that Defendants distributed unauthorized copies of its work to the public. First, Defendants purchased copies of 21 Studio A titles from Active. (Active Distributors Invoice, ECF No. 157-3.) Second, Plaintiff has demonstrated that the DVDs purchased from Active differed in many respects from legitimate Studio A DVDs, including as follows:

(1) The production codes on the Action DVDs did not match any authorized Studio A code (Carol Nevitt's June 12, 2007 Decl. ¶ 10.);

(2) The barcodes found on the Action DVDs did not match any code ever used on a Studio A DVD (Borreson Dec. ¶ 19);

(3) None of the Action DVDs, as opposed to nearly all of the Studio A DVDs, contained the title of the film on the inner ring of the bottom side of the disk (Borreson Decl. ¶ 24);

(4) All of Studio A's DVDs are manufactured on semi-transparent disks, while only half of the Action DVDs were **[*21]** on this type of disk (Borreson Decl. ¶ 25);

(5) None of the Action DVDs contained a color printed insert, which nearly all of the Studio A DVDs contain (Carol Nevitt March 27, 2007 Decl. ¶ 18); and

(6) The barcodes on the cover of a sample of Action DVDs contained tiny dots, which is absent in all Studio A DVDs (Breene Decl. ¶ 6-9).

This evidence demonstrates that the DVDs found on Action's premises were not legitimate copies of Studio A DVDs.[6] Third, Plaintiff has shown that Defendants resold and were attempting to resell each of these unauthorized copies purchased from Active. (Defs. Response to Pl.'s Interrogatory # 26, ECF No. 157-3; Purchase Orders from Active Distributors, Inc., ECF No. 157-3.)

Defendants present two main arguments in opposition to Plaintiff's Motion for Summary Judgment on its copyright infringement claim under *Section 106(3)*. First, they argue that Plaintiff "unequivocally" abandoned its theory that the imbedded production codes on the Action DVDs differed from Studio A's DVDs and used other theories such as the printed inserts, barcodes, transparency of the disks, and other differences to support its claim. This argument is not well-taken as Plaintiff has continued to assert **[*22]** this theory in its Motion. Furthermore, Plaintiff is not precluded from providing additional differences between the DVDs to support its claim that the DVDs found with Action were unauthorized.

Second, Defendants argue that the statements submitted by Plaintiff, which includes the statements of Carol Nevitt, Jerry Borreson, and Richard Breene, are hearsay. Defendants, however, fail to specify whether particular statements are hearsay or whether the statements in their entirety are hearsay. It is well-settled that the court may consider affidavits submitted in support or opposition to a Motion for Summary Judgment as long as they are made on personal knowledge and set out facts that would be admissible in evidence. *See* *Fed. R. Civ. P. 56(e)(1)*. Carol Nevitt offered her statement based on her personal knowledge as a co-owner of Studio A. The same is also true of Jerry Borreson and Richard Breene, who both offered statements based on their work with Studio A and its DVD production. Without further basis from Defendants, the court finds nothing inadmissible with regard to these statements.

Plaintiff also presents evidence to support its importation copyright infringement claim under *17 U.S.C. § 602*. The invoices submitted by **[*23]** Plaintiff show that Active, located in Toronto, shipped various Studio A DVDs to Action Software, located in Ohio. (Purchase Orders from Active Distributors, Inc.) Furthermore, Action concedes purchasing the DVDs from a Canadian company. (Defs. Response to Pl.'s Interrogatory #27.) Defendants argue that the place of origin of the DVDs was the United States because each of the DVDs read "Printed in the U.S.A." on the back. They further argue that although Active is a Canadian company, it merely acted as a broker and did not actually ship the DVDs from Canada. Defendants, however, fail to support these arguments with evidence and instead merely speculate about the origin of the DVDs. The fact that all of the DVDs state that they were "Printed in the U.S.A." is inconsequential because all of Actions' DVDs appear to be mere photocopies of legitimate Studio A DVDs. The legitimate Studio A DVD covers also contain the language "Printed in the U.S.A." on the back. Therefore, this evidence does not demonstrate either way where the DVDs were in fact printed. Furthermore, Defendants provide no evidence that Active was merely a broker in the transaction, and the court finds no such evidence. Defendants **[*24]** have, therefore, failed to refute the undisputed evidence that Active, a Canadian company, shipped the Studio A DVDs in question, to Action Software, in the United States.

---

[6] Plaintiff also provides evidence of the origin of these unauthorized copies. This evidence, however, is based in part on the testimony of Kyriazoglou, the owner of Active Distributors, who sold these DVDs to Action. Kyriazoglou, however, was not deposed in the instant case and was instead deposed in another case, in which Defendants were not a party. Plaintiff argues that the court should consider this deposition and claims that it could not compel his testimony as Kyriazoglou is a Canadian citizen. Because he was not deposed in the instant suit, his testimony from another case is hearsay. Furthermore, Plaintiff has not demonstrated that the deposition testimony falls within the unavailability hearsay exception for former testimony under *Fed. R. Evid. 804(b)(1)*, as it has not shown that Defendants or "a predecessor in interest had an opportunity and similar motive to develop the testimony" of Kryriazoglou. Therefore, the court will not rely on this testimony.

Defendants have failed to present any evidence, affidavit, or depositions to oppose Plaintiff's Motion for Summary Judgment on its claims for copyright infringement. It is well-settled under *Federal Rule of Civil Procedure 56(e)(2)* that when a motion for summary judgment is properly made and supported, an opposing party must, by affidavit or other evidence, demonstrate that there is a genuine issue of material fact to be determined at trial. *E.g. Clemmer v. Key Bank N.A., 539 F.3d 349, 353 (6th Cir. 2008)* ("To survive summary judgment, the non-movant must provide evidence beyond the pleadings setting out specific facts showing a genuine issue for trial") (internal quotations omitted). If the opposing party fails to respond in accordance with this rule, the court should enter summary judgment in favor of the moving party, if appropriate. *Fed. R. Civ. P. 56(e)(2)*. In the instant case, Plaintiff has demonstrated, through affidavits and other evidence, that Defendants imported and distributed unauthorized copies of 21 Studio A titles, each of which Studio A possessed a valid copyright ownership. Defendants, on the other hand, have failed **[*25]** to provide any affidavits or other evidence to counter that provided by Plaintiff and has therefore failed to raise a genuine issue of material fact. Accordingly, the court grants summary judgment in favor of Plaintiff on its copyright infringement claims.

2. Trademark Infringement

Plaintiff Studio A also asserted a federal trademark infringement claim against Defendants. Each unauthorized DVD purchased by Defendants bore Plaintiff's trademark, "ANDREW BLAKE." (Carol Nevitt Aff. ¶ 14, ECF No. 157-5). Pursuant to the Lanham Act, *15. U.S.C. § 1114*, a defendant is liable for trademark infringement if:

> [The defendant], without the consent of the registrant use[s] in commerce any reproduction, counterfeit, copy, or colorable imitation of a registered mark in connection with the sale, offering for sale, distribution, or advertising of any goods or services on or in connection with which such use is likely to cause confusion, or to cause mistake, or to deceive.

In the instant case, Defendants do not dispute that Studio A owns the "ANDREW BLAKE" trademark. Furthermore, Defendants do not dispute that this trademark was visible on all copies of the DVDs that they purchased from Active. Studio A did not authorize **[*26]** the use of this trademark on any of the bootleg copies that were purchased and offered for sale by Defendants. By using this trademark on the replicated DVDs that appear to be exact copies to the naked eye, purchasers of these DVDs were likely to believe that they were legitimate Studio A DVDs. Therefore, the court finds that there is no genuine issue of material fact with regard to this claim, and summary judgment in favor of Plaintiff is warranted.

3. Unfair Business Dealing Counterclaim

Defendants assert a counterclaim against Plaintiff for unfair competition under *California Business and Professional Code § 17200, et seq.* Defendants argue that Plaintiff engaged in unfair competition by failing to follow the common business practice of notifying innocent distributors about piracy problems. Defendants further contend that Plaintiff's actions were undertaken "in an attempt to misuse the copyright by engaging in conduct violative of the antitrust laws by attempting to extend its copyright beyond the limits established by the copyright laws and beyond legislative intent." (Defs.' Answer to Pl.'s First Am. Compl, Aff. Defenses, and Counterclaim "Answer and Counterclaim" ¶ 69, ECF No. 56.) Even if the court presumes that this industry practice **[*27]** exists, Defendants' counterclaim still fails as a matter of law.

Under *California Business and Professional Code § 17200*, unfair competition is defined as including, in pertinent part, "any unlawful, unfair or fraudulent business act." The California Supreme Court has defined "unlawful" as follows:

> The UCL covers a wide range of conduct. It embraces anything that can properly be called a business practice and that at the same time is forbidden by law. . . . *Section 17200* "borrows" violations from other laws by making them independently actionable as unfair competitive practices.

CRST Van Expedited, Inc. v. Werner Enters., 479 F.3d 1099, 1107 (9th Cir. 2007) (quoting *Korea Supply Co. v. Lockheed Martine Corp., 63 P.3d 937, 943 (Cal. 2003)*. The California Supreme Court has also adopted the following test when a plaintiff claims to have suffered injury from a direct competitors' "unfair" practice under *Section 17200*:

> The word "unfair" in that section means conduct that threatens an incipient violation of ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition.

Cel-Tech Commc'ns v. L.A. Cellular Tel. Co., 973 P.2d 527, 544 (Cal. 1999). Lastly, fraudulent acts are ones where members of the public are likely to be deceived. *Nat'l Rural Telecomm. Coop. v. DIRECTV, Inc., 319 F. Supp. 2d 1059, 1077-78 (C.D. Cal. 2003)*.

In the instant case, based on the foregoing definitions, Defendants have asserted a claim under *Section 17200* on the basis that Plaintiff **[*28]** engaged in an "unfair" practice, which requires proof that Plaintiff's actions harmed competition or violated the policy or spirit of ***antitrust law***. *See* *Cel-Tech, 973 P.2d at 544*. The Supreme Court has stressed that the purpose of antitrust laws are to protect competition, not competitors. *Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104, 115 (1986)*. Thus, injury to a competitor is not equivalent to injury to competition. *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 344 (1990)*. Here, by failing to notify others of potential issues of piracy, Plaintiff has not harmed competition, only arguably harmed a competitor. Defendants fail to provide any evidence that the adult film industry's competition has been harmed by Plaintiff's actions, and the court finds no such evidence. Plaintiff, by failing to notify others in the industry, did not prohibit Defendants and others in the industry from selling lawfully obtained, authorized Studio A DVDs. Additionally, Plaintiff did not prohibit others in the industry from creating adult films. Instead, Plaintiff, in instituting this action, was merely attempting to protect its ownership interest in its adult films and protect against the sale of unauthorized DVDs that were copied without its consent, excluding it from profits that rightfully belong to Studio A. Therefore, upon the court's **[*29]** finding that there is no genuine issue of material fact with regard to Defendants' counterclaim, the court grants summary judgment in favor of Plaintiff on this claim.

4. Remedies

Because the court has granted summary judgment in favor of Plaintiff on its claims, it is entitled to damages under the Copyright Act and the Lanham Act. The court discusses remedies under each statute in turn.

a. Copyright Infringement Remedies

Under *17 U.S.C. § 504*, a registered copyright owner is entitled to recover either actual damages and profits from the infringer or statutory damages. In this case, Plaintiff requests statutory damages against Action. *Section 504* provides that the court, in its discretion, may award damages under this statute "for all infringements involved in the action, with respect to any one work . . . a sum of not less than $750 or more than $30,000." Thus, where multiple registered works are infringed, a court must award damages for each of the separate works. *Pearson Educ., Inc. v. Jun Liao*, No. 07-*Civ-2423, 2008 U.S. Dist. LEXIS 38222, at *12 (S.D.N.Y. May 13, 2008)* (citing *Arclightz and Films Pvt. Ltd. v. Video Palace Inc., 303 F. Supp. 2d 356, 361 (S.D.N.Y. 2003))*. While a court may issue damages for the number of original works infringed, an infringer is not liable for the number or type of copies made. *Arclightz, 303 F. Supp. 2d. at 361*.

A court has discretion in determining the sum for which **[*30]** the infringer is liable; however, courts generally take into account the defendant's intent as relief under this provision is equitable in nature. *See e.g.* *Costello Publ'g Co. v. Rotelle, 670 F.2d 1035, 1044 n. 13 (D.C. Cir. 1981)*; *Columbia Pictures Indus., Inc. v. Pacheco, No. 87-1543, 1990 U.S. Dist. LEXIS 2825, at *8 (D.P.R. Feb. 27, 1990)*. Where an innocent infringement occurs, in which the defendant was not aware and had no reason to believe that his acts constituted infringement of the plaintiff's copyright, courts are more willing to limit the plaintiff's award to the minimum amount for each incident of infringement. *Columbia, 1990 U.S. Dist. LEXIS 2825, at *8*.

Here, Defendants imply that they purchased the DVDs from Active without knowing that they were unauthorized. Plaintiff does not argue that Defendants intentionally or willfully purchased unauthorized DVDs; however, Plaintiff does argue that the statutory minimum should be increased based on Defendants' counsel's conduct during this litigation. This conduct, however, is not equitably related to Action's conduct when it purchased and sold the bootleg Studio A DVDs. Plaintiff does not set forth additional evidence to support its claim that as an equitable matter, the court should increase the statutory award against Defendants. Accordingly, the court awards Plaintiff a total of $15,750.00 in statutory damages, which is the minimum $750 award for **[*31]** each of the 21 Studio A titles at issue.

In its First Amended Complaint, Plaintiff also requested a permanent injunction to prevent Defendants from continuing its infringement. Under Section 502(a) of the Copyright Act, a plaintiff, having established its claim for copyright infringement against the defendant, is entitled to a permanent injunction in addition to any monetary recovery. 4-14 *NIMMER ON COPYRIGHT § 14.06*. However, injunctive relief "ordinarily will not be granted, when there is no probability or threat of continuing of additional infringements." *Id.* (citing *Harolds Stores v. Dillard Dep't Stores, 82 F.3d 1533, 1555 (10th Cir. 1996)*; *Dolori Fabrics, Inc. v. Limited, Inc., 662 F. Supp. 1347, 1358 (S.D.N.Y. 1987))*.

In the instant case, there is no indication that Defendants will continue infringing Plaintiff's copyrighted DVDs. The court issued an Order of Seizure of all the counterfeit DVDs on Action's premises, which was carried out by Plaintiff on May 12, 2005. Defendants are no longer in possession of these unauthorized DVDs from Active and therefore cannot continue selling them. Furthermore, Plaintiff indicated, within its Memorandum in Support of this Motion, that Defendants have ceased infringing on its copyrights and that permanent injunctive relief was no longer necessary. Accordingly, the court will not issue a permanent injunction as doing so would be moot. **[*32]**

17 U.S.C. § 505 provides that courts have discretion to award full costs and "a reasonable attorney's fee to the prevailing party as part of the costs." If Plaintiff wishes to file a motion for fees, it must do so by January 28, 2009. Said motion shall include a fee bill and any other supporting documents. Defendants shall file a response within fourteen days of Plaintiff's motion, indicating whether they agree with Plaintiff's assessment of fees or whether they have any objections to Plaintiff's request.

b. Trademark Infringement Remedies

Plaintiff alleges that damages for trademark infringement are unnecessary because "the principal remedy - cessation of infringement - has already been obtained; moreover, any monetary recovery would only be duplicative, given the much stronger monetary remedies built into the Copyright Act." Plaintiff is therefore no longer pursuing damages under this claim, and the court will issue no such remedy in its favor.

IV. CONCLUSION

For the foregoing reasons, the court denies Defendants' Motion to Dismiss or, in the Alternative Motion Summary Judgment (ECF No. 156) and grants Plaintiff's Motion for Summary Judgment (ECF No. 157). The court issues an award in favor of Plaintiff **[*33]** and against Defendants in the amount of $15,750.00. The court will issue a ruling on attorneys' fees in a subsequent order. The parties shall follow the motion deadline for attorneys' fees as described above.

IT IS SO ORDERED.

/s/ *SOLOMON OLIVER, JR.*

UNITED STATES DISTRICT JUDGE

January 5, 2009

JUDGMENT ENTRY

The court, having granted Plaintiff's Motion for Summary Judgment (ECF No. 157) in a separate Order on this same date, hereby enters judgment for the Plaintiff in the amount of $15,750 and against the Defendants. The court shall issue a ruling on a later date regarding attorney fees if Plaintiff requests such fees.

IT IS SO ORDERED.

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Motions to Dismiss, Failure to State Claim**

When ruling on a defendant's motion to dismiss, a judge must accept as true all of the factual allegations contained in the complaint.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] **Motions to Dismiss, Failure to State Claim**

Fed. R. Civ. P. 8(a)(2) requires a short and plain statement of the claim showing that the pleader is entitled to relief in order to give the defendant fair notice of what the claim is and the grounds upon which it rests. In order to avoid a dismissal under *Fed. R. Civ. P. 12(b)(6)*, a plaintiff has an obligation to provide the grounds of his entitlement to relief, which requires more than labels and conclusions; a formulaic recitation of the elements of a cause of action will not do. This does not require a heightened fact pleading of specifics, but only enough facts to state a claim to relief that is plausible on its face. When ruling on a defendant's motion to dismiss, the court must accept as true all of the factual allegations contained in the complaint. The court's inquiry is limited to the content of the complaint. A well-pleaded complaint may proceed even if it strikes a savvy judge that actual proof of those facts is improbable.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Right to Petition Immunity

HN3[] **Noerr-Pennington Doctrine, Right to Petition Immunity**

The Noerr-Pennington doctrine protects private actors from liability under the Sherman Act for petitioning the government for action. The doctrine rests on an individual's constitutional right to petition the government for action and the necessity, in a representative democracy, for citizens to communicate their needs and wants to the government.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

HN4[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

The motives of the parties are irrelevant to their protection by Noerr-Pennington; the parties remain immune even if they had a deliberately anticompetitive purpose under the Sherman Act in seeking government action. Immunity exists regardless of any conspiracy between the private parties and government actors that may be motivated by selfish interests. The immunity provided private actors by the doctrine extends to the effects of a successful petition: where a restraint upon trade or monopolization is the result of valid governmental action, as opposed to private action, those urging governmental action enjoy absolute immunity from antitrust liability for the anticompetitive restraint. Furthermore, the Noerr-Pennington doctrine applies to all of an individual's interactions with government, including its interactions with the executive branch and negotiations associated with the reaching of a settlement of litigation. A tobacco manufacturers' negotiating a settlement is akin to petitioning the government.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

HN5[] **Exemptions & Immunities, Parker State Action Doctrine**

The Parker immunity doctrine and Noerr-Pennington doctrine are complementary expressions of the principle that the antitrust laws regulate business, not politics; the former decision protects the States' acts of governing, and the latter the citizens' participation in government.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

HN6[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

No commercial agreement exception exists to the Noerr-Pennington doctrine.

Antitrust & Trade Law > Sherman Act > Defenses

Civil Procedure > ... > Federal & State Interrelationships > State Sovereign Immunity > State Immunity

Antitrust & Trade Law > Exemptions & Immunities > General Overview

HN7[] **Sherman Act, Defenses**

When acting in its capacity as a sovereign entity, a state cannot violate antitrust laws. The Sherman Act was not enacted to curtail the sovereign activities of states. When a state imposes a trade restraint, it has imposed the restraint as an act of government and has not in so governing entered into a conspiracy in restraint of trade or established a monopoly. Under the so-called state action doctrine, it is well established that ***antitrust law*** does not apply to states acting as sovereigns. Principles of federalism and state sovereignty provide blanket protection for states.

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Civil Procedure > ... > Federal & State Interrelationships > State Sovereign Immunity > State Immunity

Antitrust & Trade Law > Exemptions & Immunities > General Overview

HN8[] **Scope, Exemptions**

In certain situations, a state's restraint of trade actions must be scrutinized to determine if state-action immunity applies. If the state, through a statute, has created some law or regulatory scheme that authorizes private actors to engage in antitrust violations, that statute may be preempted by the Sherman Act, pursuant to the *Supremacy Clause of the U.S. Constitution*. When such a statute is preempted, the state may nevertheless retain immunity if the state, acting in its sovereign capacity, remains sufficiently involved such that the regulatory scheme and its antitrust effects retain the character of direct state action. A court must resolve this question using the two-prong test crafted by the court in California Retail Liquor Dealers Ass'n v. Midcal Aluminum, Inc. According to Midcal, first, the challenged restraint must be one articulated and affirmatively expressed as state policy; second, the policy must be actively supervised by the State itself. Similarly, when a plaintiff directly challenges the actions of private actors or a state agency that claim they are acting according to some state authorization, the court also uses the Midcal test to determine whether the challenged actions are so closely connected to the sovereign state that they are acts of the state warranting state-action immunity.

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Civil Procedure > ... > Federal & State Interrelationships > State Sovereign Immunity > State Immunity

Antitrust & Trade Law > Exemptions & Immunities > General Overview

HN9[] **Scope, Exemptions**

The Midcal test does not apply to sovereign state acts, which are immune from antitrust liability so long as they are not preempted due to their having authorized per se illegal activities.

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

HN10[] **Scope, Exemptions**

When a state authorizes an antitrust violation by private actors in all situations, that law is preempted by the Sherman Act.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN11[] Scope, Monopolization Offenses

The basic elements of an essential facilities antitrust violation under the Sherman Act are that a competitor has denied the plaintiff reasonable access to some facility the competitor controls and that is necessary to compete in their shared market.

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Civil Procedure > ... > Federal & State Interrelationships > State Sovereign Immunity > State Immunity

HN12[] Scope, Exemptions

A state is incapable of entering an agreement that violates the Sherman Act. The state-action doctrine traditionally is applied to acts of the legislature or regulatory schemes constructed by states. However, it also applies to actions by officials in the state's executive branch.

Constitutional Law > ... > Immunities > Qualified Immunity > Executive Branch Officials

Governments > State & Territorial Governments > Claims By & Against

Governments > State & Territorial Governments > Employees & Officials

HN13[] Qualified Immunity, Executive Branch Officials

A state attorney general, as a member of the executive branch of government, is entitled to immunity for his or her executive actions.

Civil Rights Law > ... > Elements > Color of State Law > State-Authorized Actions

Governments > State & Territorial Governments > Claims By & Against

HN14[] Color of State Law, State-Authorized Actions

The acts of the Attorneys General in negotiating and entering into a Master Settlement Agreement with tobacco companies are direct state action.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Settlement Agreements

HN15[] Types of Contracts, Settlement Agreements

A settlement agreement is a contract.

Contracts Law > Contract Interpretation > General Overview

HN16[] Contracts Law, Contract Interpretation

In interpreting a contract, the court is guided by well-established principles of contract interpretation.

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > Significant Relationships

HN17[] Choice of Law, Significant Relationships

Federal choice-of-law rules dictate that a court must apply the law of the jurisdiction having the most significant relationship with the action.

Contracts Law > Contract Interpretation > Ambiguities & Contra Proferentem > General Overview

Contracts Law > Contract Interpretation > General Overview

HN18[] Contract Interpretation, Ambiguities & Contra Proferentem

Under Kentucky law, contract interpretation is a question of law for a court to determine. To interpret a contract, the court looks to its language to determine the parties' intentions. Where no ambiguity exists in the contract, a court looks only as far as the four corners of the document to determine that intent. Whether the contract is ambiguous is a question of law for the court to determine. A contract is ambiguous if a reasonable person would find it susceptible to different or inconsistent interpretations.

Constitutional Law > Equal Protection > Judicial Review > Standards of Review

HN19[] Judicial Review, Standards of Review

Any equal protection claim under the U.S. Constitution calls for rational-basis review.

Constitutional Law > Bill of Rights > General Overview

Evidence > Inferences & Presumptions > Presumptions

HN20[] Constitutional Law, Bill of Rights

To be valid, a waiver of constitutional rights must be made voluntarily, intelligently, and knowingly. The law presumes against the waiver of constitutional rights, a presumption which only clear evidence to the contrary can overcome. In assessing the validity of a waiver of constitutional rights, the court should consider the circumstances in which the waiver was made.

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Waiver & Preservation of Defenses

HN21[] Defenses, Demurrers & Objections, Waiver & Preservation of Defenses

A valid waiver can be defined as the intentional relinquishment or abandonment of a known right.

Civil Procedure > Settlements > General Overview

HN22[] Civil Procedure, Settlements

It is a well established principle that the law, and public policy, favor the settlement of disputes without litigation.

Constitutional Law > Supremacy Clause > Supreme Law of the Land

HN23[] Supremacy Clause, Supreme Law of the Land

The Compact Clause forbids any state from entering into any agreement or compact with another State without congressional consent. *U.S. Const. art. I, § 10, cl. 3*. Congressional consent is not required for interstate agreements that fall outside the scope of the Compact Clause. This clause applies only to any combination tending to the increase of political power in the states, which may encroach upon or interfere with the just supremacy of the United States. Therefore, the court's central concern in any Compact Clause inquiry is whether the agreement at issue enhances state power to the detriment of the federal government's power. The Compact Clause does not circumscribe modes of interstate cooperation.

Constitutional Law > Supremacy Clause > Supreme Law of the Land

HN24[] Supremacy Clause, Supreme Law of the Land

In the context of the Compact Clause, *U.S. Const. art. I, § 10, cl. 3*, an increase in the states' collective bargaining power to settle a multistate lawsuit does not result in an accompanying decrease of federal power.

Civil Procedure > ... > Federal & State Interrelationships > State Sovereign Immunity > State Immunity

Constitutional Law > State Sovereign Immunity > General Overview

HN25[] State Sovereign Immunity, State Immunity

The *Eleventh Amendment* bars a suit against state officials when the state is the real substantial party in interest. It follows, therefore, that a suit against a state official in his official capacity is a suit against the state, for it is not a suit against the official but rather is a suit against the official's office. An important exception to this general rule, the Ex Parte Young exception, is that a suit challenging the constitutionality of a state official's action is not one against the State. Importantly, the exception provided for by Ex parte Young rests on the need to promote the vindication of federal rights.

Civil Procedure > ... > Federal & State Interrelationships > State Sovereign Immunity > State Immunity

Constitutional Law > State Sovereign Immunity > General Overview

Governments > State & Territorial Governments > Claims By & Against

HN26[] State Sovereign Immunity, State Immunity

A state and, accordingly, an official sued in his official capacity, retains immunity from claims that an official has violated state law. A federal court's grant of relief against state officials on the basis of state law does not vindicate the supreme authority of federal law. On the contrary, it is difficult to think of a greater intrusion on state sovereignty than when a federal court instructs state officials on how to conform their conduct to state law. Such a result conflicts directly with the principles of federalism that underlie the *Eleventh Amendment*.

Constitutional Law > State Sovereign Immunity > Abrogation of Immunity

Constitutional Law > State Sovereign Immunity > General Overview

Constitutional Law > State Sovereign Immunity > Waiver > Consent

HN27[] State Sovereign Immunity, Abrogation of Immunity

There are three exceptions to a State's sovereign immunity: (a) when the State has consented to suit; (b) when the exception first set forth in Ex parte Young applies; and (c) when Congress has properly abrogated a State's immunity.

Civil Procedure > ... > Federal & State Interrelationships > State Sovereign Immunity > Waiver of Immunity

Constitutional Law > State Sovereign Immunity > Waiver > General Overview

HN28[] State Sovereign Immunity, Waiver of Immunity

Just as the federal government's waiver of sovereign immunity cannot be implied but must be unequivocally expressed, so must a state's waiver of its sovereign immunity be clear and unequivocal.

Civil Procedure > ... > Subject Matter Jurisdiction > Federal Questions > General Overview

Civil Procedure > ... > Federal & State Interrelationships > State Sovereign Immunity > Waiver of Immunity

HN29[] Subject Matter Jurisdiction, Federal Questions

No waiver of sovereign immunity by a state is required for a federal court to have jurisdiction over federal-law claims. *28 U.S.C.S. § 1331*.

Constitutional Law > State Sovereign Immunity > Waiver > General Overview

Governments > State & Territorial Governments > Claims By & Against

HN30[] State Sovereign Immunity, Waiver

A state cannot constructively waive its sovereign immunity under the *Eleventh Amendment*.

Opinion

[*767] **MEMORANDUM OPINION AND ORDER**

This matter is before the court upon motions to dismiss filed by the various defendants and one motion to quash service. [1] These motions are: (1) motion to dismiss complaint filed by defendants Lorillard Tobacco Co., Philip Morris, Inc., and R.J. Reynolds Tobacco Co. (DE 154); (2) motion to dismiss filed by defendants Commonwealth Brands, Inc., Imperial Tobacco Limited/ITL, Japan Tobacco International USA, Inc., King Maker Marketing, Lane Limited, Liggett Group, LLC, Lignum-2, Inc., P.T. Djarum, Premier Manufacturing Inc., Santa Fe Natural Tobacco Co., Sherman's 1400 Broadway N.Y.C., Inc., Top Tobacco, LP, and Vector Tobacco, Inc. (DE 156); (3) motion to dismiss for lack of subject-matter jurisdiction and failure to state a claim by defendant Jack Conway, Attorney General of Kentucky (DE 149); (4) motion to **[**10]** dismiss for lack of personal jurisdiction and improper venue and contingent joinder in defendant Conway's motion to dismiss by the Attorneys General of the remaining forty-five states, five territories, and the District of Columbia (DE 208); (5) motion to dismiss for improper service of process by defendant Peter Nickles (DE 210); and (6) motion to quash purported service on defendant Jeremiah W. Nixon (DE 215).

I. Background [2]

In the mid-1990s a number of states sued the four largest tobacco manufacturers in the United States. **[**11]** [3] The states' claims "centered on allegations that the manufacturers targeted youth in their advertising; knew of, controlled, and failed to disclose research into harmful effects of cigarette smoke; and knew nicotine in cigarettes was addictive and marketed their cigarettes with those addictive properties in mind." Am. Compl.P105. In 1998, the parties resolved the litigation and signed the Master Settlement Agreement ("MSA").

The MSA originally was negotiated by eight states' Attorneys General and then was released to other states so that they might decide whether they wished to join **[*768]** it. *Id.* PP 109, 110. Additional states took action to enjoy the benefits of the MSA, and a total of fifty-two states and territories, through their Attorneys General, eventually signed on to the MSA. These states are collectively known as the "Settling States." [4] Kentucky, like other Settling States without a case already pending against the tobacco manufacturers, instigated **[**12]** litigation and then settled it by asking a state court to enter an agreed order approving the MSA and dismissing with prejudice the state's claims. *Id.* P 119. According to the terms of the MSA, in return for a tobacco manufacturer's agreement to the terms of the MSA, which included making substantial payments to the Settling States, a state agreed to release the company from all claims arising out of certain past and future conduct relating to its tobacco manufacturing business. *See* MSA § II(nn) (defining "released claims" and listing all types of conduct for which a manufacturer was released from liability). [5] Those manufacturers agreeing to the MSA are known as "Participating Manufacturers" ("PMs"). The four tobacco companies that were sued in the initial lawsuits and with which the states reached the initial settlement are known as the Original Participating Manufacturers ("OPMs"). Those that joined the MSA later are known as Subsequent Participating Manufacturers ("SPMs").

---

[1] After these motions were filed, but before the plaintiff filed its responses, the plaintiff filed an Amended Complaint ("Am. Compl."). The parties concede that the motions to dismiss apply equally to the Complaint (DE 1) and the Amended Complaint (DE 234). The court therefore addresses its attention to the Amended Complaint.

[2] The court will take the plaintiff's factual allegations as true for purposes of this motion to dismiss. *See* *Erickson v. Pardus, 551 U.S. 89, 94, 127 S.Ct. 2197, 2200, 167 L. Ed. 2d 1081 (2007)* (noting, ***HN1***[] "when ruling on a defendant's motion to dismiss, a judge must accept as true all of the factual allegations contained in the complaint" (citations omitted)).

[3] These companies were Philip Morris, Inc. ("Philip Morris"), R.J. Reynolds Tobacco Co. ("Reynolds"), Brown & Williamson Tobacco Corp. ("B&W"), and Lorillard Tobacco Co. ("Lorillard."). Reynolds subsequently acquired B&W. Am. Compl. P 3 n.3.

[4] The Settling States include 46 states (all except Florida, Minnesota, Mississippi, and Texas), five territories (American Samoa, Guam, Northern Mariana Islands, Puerto Rico, and the Virgin Islands), and **[**13]** the District of Columbia.

[5] The Master Settlement Agreement was attached as Exhibit A to the plaintiff's amended complaint. It is also available on the website of the National Association of Attorneys General (NAAG) at *http://www.naag.org/backpages/naag/tobacco/msa/msa-pdf/1109185724_103246* 8605_cigmsa.pdf.

The OPMs feared that by signing the MSA, and thus incurring significant costs that would require an accompanying price increase of their products, they would be creating a significant market opportunity for tobacco manufacturers that did not sign the MSA. Am. Compl. P 127. That is, the OPMs anticipated that those companies who did not sign (known as Non-Participating Manufacturers, or "NPMs") and thus had no payment obligations would be able to price their products below the OPMs' market price, thereby taking sales away from the OPMs. *Id.* In order to address these concerns and encourage participation in the MSA by tobacco companies other than the OPMs, the Settling States agreed to several provisions of the MSA. *Id.* It is these aspects of the MSA that give rise to the instant plaintiff's claims.

First, the Settling States agreed to release claims not only against the PMs but also against **[**14]** tobacco retailers, suppliers, and distributors to the extent of their dealings in the PMs' products. *See* MSA § II(oo) (defining "released parties" to include suppliers, retailers, and distributors of the PMs' products). This provision encouraged sellers of tobacco products to carry only products made by PMs. *See* Am. Compl. P 128.

Second, to ensure that those companies not participating in the MSA have financial obligations to the states similar to those of the companies that are participating, the MSA includes a mechanism designed to equalize the potential profits of PMs and NPMs. The MSA provides that the states may enact "Escrow Statutes" or "Qualifying Statutes." *See* MSA § IX(d)(2). In general terms, the Escrow Statute of a state obligates the tobacco companies that do not sign the MSA (NPMs) to make **[*769]** annual deposits into an escrow account, based on their sales volume in the state. *See id.* The principal amounts are held in escrow for twenty-five succeeding years and, if there is no judgment against or settlement with a particular NPM on certain kinds of claims, the amounts remaining in escrow are to be returned to that NPM. *See* Am. Compl. P 143; *see also* Am. Compl., Exhibit A, MSA, **[**15]** Exhibit T, Model Statute. However, as originally enacted, the Escrow Statutes allowed an NPM to obtain a refund of the amount paid into escrow, to the extent that the amount paid to a state by the NPM exceeded the amount it would have paid that state under the MSA. [6] Am. Compl. P 146. This characteristic of the statutory scheme made it possible for an NPM to operate profitably by concentrating its business in only a few states. *Id.* States, including Kentucky, have enacted amendments to their Escrow Statutes in order to address this situation. *Id.* P 147; *see, e.g.,* *KRS § 131.604 et seq.*

Another such provision is the "back-payment" requirement. Pursuant to the terms of the MSA, every participating manufacturer upon signing the MSA must make any payment "that it would have been obligated to make in the intervening period had it been a signatory as of the MSA Execution Date." MSA § II(jj). The PMs signing the MSA as of its execution date were obligated to make annual settlement payments based on their nationwide sales beginning in 1999, with payments coming due each year. *Id.* § IX(I). The back-payment provision creates a disincentive for a tobacco manufacturer to delay **[**17]** signing the MSA while building a market share, as it will, upon signing, become liable under the MSA for any sales made since 1999.

As a part of the goal of encouraging smaller tobacco companies not sued in the original lawsuit to join the agreement, the MSA was structured to give NPMs the opportunity to join the MSA with a reduced payment

---

[6] The defendant Attorney General of Kentucky has provided the following explanation for how the mechanism worked:

> Every Participating Manufacturer makes a single annual settlement payment based on its total shipments or sales of cigarettes in the United States during the previous year. That payment is allocated among Settling States according to percentages for each State ("Allocable Share"), which Allocable Share bears no relationship to the PM's actual sales in the State. The original Escrow Statutes, however, allowed each NPM to obtain an immediate release of any excess (a) of its annual escrow deposit **[**16]** for sales in a State over (b) what would have been the State's Allocable Share of the hypothetical MSA payment the NPM would have made for those sales had it been an SPM. This could effectively eliminate an NPM's escrow obligation. For example, an NPM that made 50 percent of its cigarette sales in Kentucky could obtain a release of the difference between (a) an escrow deposit based on 50 percent of its sales and (b) Kentucky's Allocable Share of 1.7611586% of the NPM's total sales, which difference would result in a release of about 96.5 percent of the NPM's escrow deposit in Kentucky.

DE 149, p. 7 n.9.

obligation. Per the terms of the MSA, any SPM that joined the MSA within ninety days of its initial execution was not obligated to make payments to the extent that its market share in a particular year is less than its 1998 market share (or 125% of its 1997 market share, if that is higher). *See* MSA § IX(I). If the SPM's sales exceed this "grandfathered share," then it incurs payment obligations that are the same as other PMs, calculated on a per-unit basis for all cigarettes sold above the floor amount of its grandfathered share. *Id.* The plaintiff terms those SPMs that joined within ninety days the "grandfathered SPMs."

[*770] The plaintiff, Vibo Corporation, doing business as "General Tobacco," did not operate as a tobacco manufacturer at the time of the settlement. It began selling tobacco products in 2000, and until 2004, it operated as an NPM; that is, **[**18]** it sold cigarettes without signing on to the MSA. Am. Compl. PP 151-54. Despite the circumstances created by the MSA, because the plaintiff concentrated its sales in Kentucky and a few other states, the plaintiff was able to operate profitably until 2004, when the states began to implement amended escrow statutes. *Id.* PP 155, 157. As of 2004, the plaintiff had a market share of two percent. *Id.* P 156. In 2004, the plaintiff decided to apply for membership in the MSA. *Id.* P 160.

The plaintiff became a party to the MSA effective July 1, 2004. *Id.* P 167. It did so pursuant to the terms set forth in the "Adherence Agreement." *See* DE 234, Exhibit B. The Adherence Agreement specified the terms under which the plaintiff would meet its back-payment obligations and how it would make payments going forward. *Id.* Specifically, the Agreement provided that the plaintiff would make quarterly escrow payments toward its payment obligations. *See id.* P 10.

The present case arises from the failed attempt by General Tobacco to execute with the Settling States an Amended Adherence Agreement, granting it more favorable terms than those originally agreed to in the Adherence Agreement. General Tobacco and the **[**19]** Settling States had negotiated the new agreement successfully, Am. Compl. P 180, but the Settling States refused to execute the agreement without the OPMs' and a number of the SPMs' having waived any rights they might have under the MSA that would be triggered by the proposed amended terms of the plaintiff's membership in the MSA. Am. Compl. P 181. The rights at issue were those provided by the MSA's "Limited Most-Favored Nation" ("LMFN") clause. *Id.; see* MSA § XVIII(b). [7] When **[*771]** the manufacturers

---

[7] In pertinent part, the LMFN clause provides:

(b) <u>Limited Most-Favored Nation Provision.</u>

(2) If any Settling State resolves by settlement Claims against any Non-Participating Manufacturer after the **[**20]** MSA Execution Date comparable to any Released Claim, and such resolution includes overall terms that are more favorable to such Non-Participating Manufacturer than the terms of this Agreement (including, without limitation, any terms that relate to the marketing or distribution of Tobacco Products and any term that provides for a lower settlement cost on a per pack sold basis), then the overall terms of this Agreement will be revised so that the Original Participating Manufacturers will obtain, with respect to that Settling State, overall terms at least as relatively favorable (taking into account, among other things, all payments previously made by the Original Participating Manufacturers and the timing of any payments) as those obtained by such Non-Participating Manufacturer pursuant to such resolution of Claims. The foregoing shall include but not be limited: (a) to the treatment by any Settling State of a Future Affiliate, as that term is defined in agreements between any of the Settling States and Brooke Group Ltd., Liggett & Myers Inc. and/or Liggett Group, Inc.("Liggett"), whether or not such Future Affiliate is merged with, or its operations combined with, Liggett or any Affiliate **[**21]** thereof; and (b) to any application of the terms of any such agreement (including any terms subsequently negotiated pursuant to any such agreement) to a brand of Cigarettes (or tobacco-related assets)as a result of the purchase by or sale to Liggett of such brand or assets or as a result of any combination of ownership among Liggett and any entity that manufactures Tobacco Products. Provided, however, that revision of this Agreement pursuant to this subsection (2) shall not be required by virtue of the subsequent entry into this Agreement by a Tobacco Product Manufacturer that has not become a Participating Manufacturer as of the MSA Execution Date. Notwithstanding the provisions of subsection XVIII(j), the provisions of this subsection XVIII(b)(2) may be waived by (and only by) unanimous agreement of the Original Participating Manufacturers.

[. . . .]

made known that they intended to invoke LMFN privileges -- that is, that they would not agree to waive any of their rights that might be triggered by the Amended Adherence Agreement - the Settling States refused to execute the new Agreement. Am. Compl. P 184. In addition to alleging disparate treatment of SPMs such as itself and the "grandfathered" SPMs, the plaintiff contends that the PMs' "misuse" and "exploitation" of the LMFN provision was anti-competitive behavior in violation of the Sherman Act.

The plaintiff brings this action against a total of seventy defendants. These defendants are: (1) the three OPMs; [8] (2) fifteen "grandfathered" SPMs; [9] and (3) the fifty-two Attorneys General of the Settling States.

The plaintiff asserts that it does not challenge the MSA itself, only the preferential treatment given to the "grandfathered" SPMs and the allegedly wrongful utilization by the PMs of the LMFN clause of the MSA. The plaintiff challenges these aspects of the MSA and the failure of the Settling States to execute the Amended Adherence Agreement, making claims based on both antitrust and constitutional grounds. The plaintiff requests relief, under *42 U.S.C. § 1983*, for violations of its civil rights by the Attorneys General.

II. Legal Standard

HN2[] *Federal Rule of Civil Procedure 8(a)(2)* requires a short and plain statement of the claim showing that the pleader is entitled to relief in order to give the defendant fair notice of what the claim is and the grounds upon which it rests. *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929*, --, *550 U.S. 544, 127 S.Ct. 1955, 1964, 167 L. Ed. 2d 929 (2007)* (citing *Conley v. Gibson, 355 U.S. 41, 47, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957))*. In order to avoid a dismissal under *Rule 12(b)(6) of the Federal Rules of Civil Procedure*, a plaintiff has an obligation to provide the grounds of his entitlement to relief, which requires more than labels and conclusions; a formulaic recitation of the elements of a **[**24]** cause of action will not do. *Id. at 1964-65*. This does "not require a heightened fact pleading of specifics, but only enough facts to state a claim to relief that is plausible on its face." *Id. at 1974*. "[W]hen ruling on a defendant's motion to dismiss, the court must accept as true all of the factual allegations contained in the complaint." *Erickson v. Pardus, 551 U.S. 89, 94, 127 S.Ct. 2197, 2200, 167 L. Ed. 2d 1081 (2007)* (citations omitted). The court's "inquiry is limited to the content of the complaint." *Ohio Bell Telephone Co. v. CoreComm Newco., Inc., 214 F.Supp. 2d 810, 812 (N.D. Ohio 2002)*. "[A] well-pleaded complaint **[*772]** may proceed even if it strikes a savvy judge that actual proof of those facts is improbable . . . ." *Bell Atlantic, 127 S.Ct. at 1965*.

III. Analysis

A. Antitrust Claims (counts one and eight of plaintiff's Amended Complaint).

The plaintiff alleges that the defendants have violated sections 1 and 3(a) of the Sherman Act, *15 U.S.C. §§ 1*, *3(a)*. Count one concerns the formation and provisions of the MSA itself and alleges wrongdoing by both the defendant

---

(4) **[**22]** If at any time any Settling State agrees to relieve, in any respect, any Participating Manufacturer's obligation to make the payments as provided in this Agreement, then, with respect to that Settling State, the terms of this Agreement shall be revised so that the other Participating Manufacturers receive terms as relatively favorable.

MSA §XVIII(b).

[8] The OPMs include: Philip Morris USA, Inc., R.J. Reynolds Tobacco Co., and Lorillard Tobacco Co.

[9] The "grandfathered" SPMs include: Commonwealth Brands, Inc., Liggett Group LLC, Vector Tobacco Inc., Imperial Tobacco Limited/ITL (USA), Japan Tobacco International USA, Inc., King Maker Manufacturing, Inc., Lane Limited, Lignum-2, Inc., M/S Dhanraj, P.T. Djarum, Premier Manufacturing, Inc., Santa Fe Natural Tobacco Co., Societe National D'Exploitation Industrielles des Tobacs et Allumettes (SEITA) Sherman's 1400 Broadway N.Y.C., Inc., and Top Tobacco, L.P. Defendant SPMs M/S Dhanraj and SEITA did not join the other SPMs in their motion **[**23]** to dismiss. *See* DE 156.

Attorneys General and the defendant manufacturers. The allegations of count eight concern actions taken only by the defendant manufacturers, **[**25]** not by any of the Settling States.

1. Antitrust Claims Against the Participating Manufacturers

The plaintiff asserts claims against the defendant manufacturers for violation of the Sherman Act in two counts of its complaint. The claims are interconnected but require separate analysis. First, the plaintiff challenges the PMs' involvement in the creation of the MSA and the inclusion in it of allegedly discriminatory provisions. Am. Compl. PP 195, 203. Second, the plaintiff seeks to hold the PMs liable for the more recent actions they took to influence the states not to execute the Amended Adherence Agreement. Am. Compl.PP 198, 199, 251-57.

The defendant PMs contend that the *Noerr-Pennington* doctrine grants them immunity from both claims. [10] In plainest terms, ***HN3***[] the *Noerr-Pennington* doctrine, named for the two Supreme Court cases from which it developed, protects private actors from liability under the Sherman Act for petitioning the government for action. *See United Mine Workers v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*; *Eastern R. Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*. The doctrine rests on the individual's constitutional right to petition the government for **[**26]** action and the necessity, in a representative democracy, for citizens to communicate their needs and wants to the government. *See Huron Valley Hosp., Inc. v. City of Pontiac, 650 F.Supp. 1325, 1340 (E.D. Mich. 1986)*; *see also Prof. Real Estate Investors, Inc. v. Columbia Pictures Indus., 508 U.S. 49, 56, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993)* (explaining the reasoning used by the *Noerr* court); *City of Columbia v. Omni Outdoor Advertising, Inc., 499 U.S. 365, 383, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991)* (describing *Noerr* immunity as protecting "citizens' participation in government").

HN4[] The motives of the parties are irrelevant to their protection by *Noerr-Pennington;* the parties remain immune even if they had a deliberately anti-competitive purpose in seeking government action. *See Campbell v. PMI Food Equip. Group, Inc., 509 F.3d 776, 790 (6th Cir. 2007)* (describing the "essence of the doctrine" as "parties who petition the government for governmental action favorable to them cannot be prosecuted under the antitrust laws even though their petitions are motivated by anticompetitive intent" (citations **[**27]** omitted)); *Westmac, Inc. v. Smith, 797 F.2d 313, 315 (6th Cir. 1986)* ("[G]enuine attempts to influence passage or enforcement of laws are immune from antitrust scrutiny, regardless of the anticompetitive purpose behind such attempts." (citations omitted)). Immunity **[*773]** exists regardless of any conspiracy between the private parties and government actors that may be motivated by selfish interests. *City of Columbia, 499 U.S. at 383*. And, importantly to the present case, the immunity provided private actors by the doctrine extends to the effects of a successful petition: "'[W]here a restraint upon trade or monopolization is the result of valid governmental action, as opposed to private action,' those urging governmental action enjoy absolute immunity from antitrust liability for the anticompetitive restraint." *Allied Tube & Conduit Corp. v. Indian Head, Inc., 486 U.S. 492, 499, 108 S. Ct. 1931, 100 L. Ed. 2d 497 (1988)* (citing *Noerr, 365 U.S. at 143*; *Pennington, 381 U.S. at 671*). Furthermore, the *Noerr-Pennington* doctrine applies to all of an individual's interactions with government, including its interactions with the executive branch and negotiations associated with the reaching of a settlement of litigation. *See Noerr, 365 U.S. at 136* **[**28]** ("[T]he Sherman Act does not prohibit two or more persons associating together in an attempt to persuade the legislature or the executive to take particular action with respect to a law that would produce a restraint or a monopoly."); *A.D. Bedell Wholesale Co., Inc. v. Philip Morris, Inc., 263 F.3d 239, 252 (3d Cir. 2001)* (affirming district court's finding that defendant tobacco manufacturers' "negotiating the settlement was akin to petitioning the government"); *Campbell v. City of Chicago, 823 F.2d 1182 (7th Cir. 1987)* (ordinance implemented as result of settlement negotiations of case involving damages claim; settlement and accompanying lobbying efforts were "protected efforts to petition the government").

---

[10] Defendant manufacturers filed two separate motions, one by the three OPMs and one by thirteen of the SPMs. Their motions are almost identical substantively.

The defendant manufacturers enjoy immunity for their role in the creation of the Master Settlement Agreement and the provisions challenged by the plaintiff as discriminatory. The MSA resulted from a lawsuit initiated by the state governments against the OPMs. As a product of the settlement of that lawsuit, it, and all of its provisions, represent the result of the OPMs' active negotiations with state government officials. The actions of the defendant OPMs in negotiating and executing **[**29]** the MSA were a "concerted effort by defendants to influence public officials, i.e., the states' Attorneys General, to accept a settlement in exchange for dismissing the numerous lawsuits pending against [them]," and, as such, these actions cannot be a source of antitrust liability. *Hise v. Philip Morris Inc., 46 F. Supp. 2d 1201, 1207 (N.D. Okla. 1999)*, *aff'd 208 F.3d 226 (10th Cir. 2000)*. To the extent that the plaintiff alleges that the grandfathered SPMs also were involved in petitioning for the inclusion of provisions favorable to them, those provisions are the product of those SPMs' interactions with state government officials. "[T]he doctrine would surely ring hollow if it failed to encompass private entities who, after having been sued by one or more states for similar conduct, jointly petition the states in order to achieve a mutually acceptable settlement . . . ." *Hise, 46 F.Supp. 2d at 1207*.

In so finding, this court agrees with others which have already considered the issue of whether the defendants are shielded by the *Noerr-Pennington* doctrine from any antitrust liability connected with their role in the creation of the MSA. *See* *Sanders v. Brown, 504 F.3d 903 (9th Cir. 2007)*; **[**30]** *PTI, Inc. v. Philip Morris, Inc., 100 F. Supp. 2d 1179 (C.D. Cal. 2000)* (finding that "activities involved with the negotiation, execution, and attempts to implement the MSA" comprise "precisely the type of activity the doctrine was intended to protect"); *A.D. Bedell Wholesale Co., Inc. v. Philip Morris, Inc., 104 F. Supp. 2d 501* ***[*774]*** *(W.D. Pa 2000)* (concluding that "to the extent Plaintiff's claims are based upon the Defendants' actions in negotiating and executing the MSA, said actions fall within the category of conduct protected by the *Noerr-Pennington* immunity doctrine"), *aff'd,* *263 F.3d 239 (3rd Cir. 2001)*; *Hise, 46 F. Supp at 1206-07*. [11]

The *Noerr-Pennington* doctrine likewise shields the defendants from liability for their more recent actions taken in order to influence the decision of the state **[**31]** Attorneys General to refuse to execute the plaintiff's Amended Adherence Agreement. The plaintiff alleges that the defendant manufacturers have "misused and exploited the LMFN provision." Am. Compl. P 256. Clarifying the factual contours of this claim at the motions hearing, plaintiff's counsel argued that although the defendants believe they are entitled to object to the agreement because they adjudge it gives the plaintiff more favorable terms under the MFA than they themselves enjoy, as a factual matter, the Amended Adherence Agreement actually does *not* grant the plaintiff more favorable terms under the MSA. Therefore, the plaintiff's argument proceeds, under the plaintiff's interpretation of the LMFN clause, the defendant manufacturers actually have no rights to exercise. *See* TR 121-22, 126-28.

Such details are irrelevant, however, to the court's resolution of the instant question. Regardless of what rights are granted by the LMFN provision, regardless of whether the exact terms of the Amended Adherence Agreement result in the plaintiff's receiving "more favorable terms" than the other PMs, the defendant manufacturers are immune under the *Noerr-Pennington* doctrine for any anti-competitive **[**32]** effects of the pressure that the plaintiff alleges they have asserted over the state Attorneys General.

Accepting all of the plaintiff's allegations as true, the plaintiff has merely alleged a classic example of a claim for which the *Noerr-Pennington* doctrine grants immunity. The PMs -- private actors -- have exerted influence on the government actors; and, as a result of that influence, the government actors have declined to sign and execute the Amended Adherence Agreement. This refusal, and the accompanying refusal to grant the plaintiff the terms of that agreement, have anti-competitive effects: the court accepts as true the plaintiff's allegations that it has been denied reasonable access to the MSA and that the MSA is an essential facility. [12] However, simply put, the PMs have

---

[11] The plaintiff has attempted to distinguish its claims from those made in the cited cases based on differences between itself and the other plaintiffs. As the relevant conduct at issue in this case, that is, the conduct of the defendant PMs in negotiating and executing the settlement, is identical, the differences in the situations of the plaintiffs is of no relevance to the court's reasoning.

[12] Given the court's reliance on *Noerr-Pennington,* the court need not determine whether the plaintiff **[**33]** has stated a claim under the "essential facilities" doctrine, although the court briefly addresses the elements of that doctrine in n.18, *infra.*

petitioned for, and received, certain government action that creates anti-competitive effects upon the plaintiff. Under the *Noerr-Pennington* doctrine, the defendant manufacturers are entitled to immunity for the anti-competitive effects of their successful petition for government action. *See* Noerr, 365 U.S. at 136.

The plaintiff alleges nothing beyond the PMs' agreement to persuade the defendant state actors to withhold access from the plaintiff, in restraint of trade. Importantly, any anti-competitive effects experienced by the plaintiff were caused by the **[*775]** government's *independent* action, not by the private action. *See* PTI, Inc., 100 F.Supp.2d at 1194 (distinguishing *Allied Tube* because the trade restraint imposed against the plaintiff in that case had been imposed by private persons, not by public officials). *Cf.* FTC v. Superior Ct. Trial Lawyers Ass'n, 493 U.S. 411, 110 S. Ct. 768, 107 L. Ed. 2d 851 (1990) (finding no immunity under *Noerr-Pennington* where the anti-competitive effects of the competitors' boycott were caused directly by the respondents, not by an independent government action). [13]

The plaintiff emphasizes that its claims against the defendant manufacturers could constitute *per se* antitrust violations. TR 124-25. The *Noerr-Pennington* doctrine affords no exception, however, for the PMs' petitioning for the state's permission to commit *per se* antitrust violations. *See* S&M Brands, Inc. v. Summers, 393 F. Supp. 2d 604, 629 (M.D. Tenn. 2005)("Even if the MSA could be challenged as a *per se* Sherman Act violation, however, such a challenge would be barred by the *Noerr-Pennington* doctrine."); A. D. Bedell, 263 F.3d at 250-66 (holding action by the defendant tobacco company protected by the *Noerr-Pennington* doctrine even where it may not have been protected by the state-action doctrine due to state's failure to actively supervise the authorization **[**35]** it granted the manufacturers to commit *per se* violations).

The plaintiff has also argued that the *Noerr-Pennington* doctrine should not apply because the defendants' actions in influencing the government action fit the "sham" exception to the doctrine. DE 239, p. 11. Despite the applicability of the *Noerr-Pennington* doctrine, courts nevertheless hold defendants liable for the anti-competitive effects of their actions when the defendants have "use[d] the governmental *process* -- as opposed to the *outcome* of that process -- as an anticompetitive weapon." City of Columbia v. Omni Outdoor Advertising, Inc., 499 U.S. 365, 380, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991). "A "sham" situation involves a defendant whose activities are not genuinely aimed at procuring favorable government action, not one who genuinely seeks to achieve his governmental result, but does so *through improper means."* Id. at 380 (internal quotations omitted)(citation omitted). The plaintiff does not allege that the creation of the MSA itself was a sham; nor could it do so successfully. *See* PTI, Inc., 100 F.Supp.2d at 1193 ("Far from an objectively baseless attempt to harm its competitors through the abuse of governmental process, the M.S.A. reflects a genuine, **[**36]** ultimately successful attempt to settle extensive current and potential litigation with the states."). Beyond its claim of the PMs' allegedly wrongful assertion of LMFN rights, already addressed by the court, the plaintiff fails to allege any facts that would support the application of the "sham" exception; rather, it fully acknowledges throughout all pleadings and at the hearing on the motions that the defendants truly sought the anti-competitive effects of the states' **[*776]** denial. The "sham" exception, therefore, does not apply to the instant case. [14]

Given this resolution of the defendants' motions as to the antitrust claims against the defendant manufacturers, the court finds it unnecessary to consider their other **[**37]** arguments for dismissal of these claims.

---

[13] As a result, it is not actually clear that the wrong alleged even falls within the scope of the Sherman Act. *See* section II(A)(1), *infra,* for a discussion of the state action doctrine, also known as *Parker* immunity, and its applicability to the instant case. However, to whatever extent the **[**34]** wrong alleged does fall within the scope of the *Noerr-Pennington* doctrine, the defendant manufacturers are immune from liability. *See* City of Columbia, 111 S. Ct. at 1355 ("As we have described, ***HN5***[] *Parker* and *Noerr* are complementary expressions of the principle that the antitrust laws regulate business, not politics; the former decision protects the States' acts of governing, and the latter the citizens' participation in government.").

[14] At the hearing on the motions, the plaintiff also argued that the defendants were not immune because the MSA is a commercial agreement between the defendant PMs and the states. ***HN6***[] "[N]o such 'commercial exception' exists to the Noerr-Pennington doctrine." *PTI, Inc., 100 F.Supp.2d at 1193 n.12* (citing In re Airport Car Rental Antitrust Litigation, 693 F.2d 84, 88 (9th Cir. 1982)); *see also* Greenwood Utilities Comm'n v. Mississippi Power Co., 751 F.2d 1484, 1505 (5th Cir. 1985).

2. Antitrust Claims Against the States

The court next will consider the antitrust claims made against the states. [15] The plaintiff challenges the involvement of the defendant Attorneys General in creating the MSA, with its resulting discriminatory impact on the plaintiff, as well as their enforcement of the MSA. The plaintiff also challenges the states' refusal to execute the Amended Adherence Agreement. Although the plaintiff generally characterizes that decision as a result of an antitrust violation by the defendant manufacturers, the rejection of the Amended Adherence Agreement by the state Attorneys General was an action taken by the states, and the states' decision to deny access is somewhat implicated in the plaintiff's complaint. *See* Am. Compl. PP 199, 200.

The defendant Attorneys General plead immunity under the doctrine of state-action immunity, as articulated in *Parker v. Brown, 317 U.S. 341, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*. To the extent the plaintiff has responded to that argument, it maintains that the states have wrongfully allowed the defendant manufacturers to influence the states' decision to refuse to implement **[**39]** the Amended Adherence Agreement.

a. The state-action doctrine: the basics

HN7[] When acting in its capacity as a sovereign entity, a state cannot violate antitrust laws. *Parker v. Brown, 317 U.S. at 352 (1943)*. The Sherman Act was not enacted to curtail the sovereign activities of states. *Id. at 351* ("The Sherman Act makes no mention of the state as such, and gives no hint that it was intended to restrain state action or official action directed by a state."). When a state imposes a trade restraint, it has "imposed the restraint as an act of government" and has not in so governing "entered into [a] conspiracy in restraint of trade or . . . establish[ed] [a] monopoly." *Id. at 352* (citing **[*777]** *Olsen v. Smith, 195 U.S. 332, 25 S. Ct. 52, 49 L. Ed. 224 (1904))*. "Under the so-called 'state action doctrine,' it is well established that ***antitrust law*** does not apply to states acting as sovereigns . . . . The Supreme Court has determined that principles of federalism and state sovereignty provide blanket protection for states." *Jackson, Tenn. Hosp. Co., LLC v. West Tenn. Healthcare, Inc., 414 F.3d 608, 611 (6th Cir. 2004)* (citing *Parker, 317 U.S. at 341*).

However, ***HN8***[] in certain situations, the challenged actions must be further scrutinized. **[**40]** If the state, through a statute, has created some law or regulatory scheme that authorizes private actors to engage in antitrust violations, that statute may be pre-empted by the Sherman Act, pursuant to the *Supremacy Clause of the U.S. Constitution*. *See* *Tritent Intern. Corp. v. Kentucky, 467 F.3d 547, 554 (2006)* (determining that where the state had passed a statute challenged as being a violation of the Sherman Act, the court must first engage in traditional pre-emption analysis in order to ascertain "whether there exists an irreconcilable conflict between federal and state regulatory schemes" (quoting *Rice v. Norman Williams Co., 458 U.S. 654, 659, 102 S. Ct. 3294, 73 L. Ed. 2d 1042 (1982)))*. When such a statute is pre-empted, the state may nevertheless retain immunity if the state, acting in its sovereign capacity, remains sufficiently involved such that the regulatory scheme and its antitrust effects retain the character of direct state action. *Id.* The court must resolve this question using the two-prong test crafted by the court in *California Retail Liquor Dealers Ass'n v. Midcal Aluminum, Inc., 445 U.S. 97, 105, 100 S. Ct. 937, 63 L. Ed. 2d 233 (1980)*. [16] Similarly, when a plaintiff directly challenges the actions of private actors or a state **[**41]** agency

[15] The court will attempt to address thoroughly such claims, although it is not entirely clear that the plaintiff intended to make them. At the hearing on the motions, plaintiff's counsel apparently disavowed such claims, stating that "[t]he antitrust conspiracy here is not state action." TR 55, ln 14-15. He added, "So we're not challenging state action here. We're challenging the inability **[**38]** of the states to act as they want to act with us, because the Defendant manufacturers have banded together and they're preventing the states from acting." TR 58, ln 2-5. Furthermore, in the plaintiff's response to the defendants' motions to dismiss, the plaintiff did not specifically address the argument of the defendant Attorneys General that state-action immunity applies to any antitrust claim against the states. At the hearing, however, the court asked the plaintiff whether counts one and eight were alleged against the states, to which counsel for the plaintiff replied: "Count 1 is against the states. Count 8 is not." TR 51, 18-19. The only antitrust claim that at all implicates the states is count one of the plaintiff's complaint. Am. Compl. PP 195, 196, 199, 200, 203. What follows is the court's attempt to reconcile these inconsistencies.

that claim they are acting according to some state authorization, the court also uses the *Midcal* test to determine whether the challenged actions are so closely connected to the sovereign state that they are acts of the state warranting state-action immunity. *See, e.g.,* First Amer. Title Co. v. Devaugh, 480 F.3d 438 (6th Cir. 2007).

b. Midcal is not applicable to the present case.

Where the plaintiff challenges acts taken directly by a state, however, the court does not apply the *Midcal* two-part test. *See* Hoover v. Ronwin, 466 U.S. 558, 568-69, 104 S. Ct. 1989, 80 L. Ed. 2d 590 (1984); *see also* Sanders v. Brown, 504 F.3d 903, 917 (9th Cir. 2007) (concluding that in *Hoover,* the Supreme Court established that **HN9**[] "the *Midcal* test does not apply to sovereign state acts, which are immune from antitrust liability so long as they [are not pre-empted due to their having] authoriz[ed] *per se* illegal activities"); *see also* Phillip E. Areeda and Herbert Hovenkamp, ***Antitrust Law*** **[**42]** P217b (3d ed. 2006) (explaining the relationship among *Midcal, Rice,* and *Parker* and describing the inquiries required by those cases as "fundamentally consistent but sequential"). [17]

[*778] Here, as far as the antitrust claims against the states go, neither of the two scenarios calling for the Midcal analysis is present. The plaintiff has neither challenged a statute nor alleged that the MSA itself is pre-empted by the Sherman Act because it authorizes the PMs to **[**43]** violate antitrust laws. [18]

---

[16] According to *Midcal,* "First, the challenged restraint must be one articulated and affirmatively expressed as state policy; second, the policy must be actively supervised by the State itself." Tritent, 467 F.3d at 555 (quoting Midcal, 445 U.S. at 105).

[17] The cited material also discusses Fisher v. City of Berkeley, California, 475 U.S. 260, 106 S. Ct. 1045, 89 L. Ed. 2d 206 (1986), which established the concept of a "hybrid restraint." A "hybrid restraint" "exists when the state passes laws that enforce companies' decisions to collude on prices, to dictate prices by which other companies must abide, or to otherwise violate the Sherman Act." Sanders, 504 F.3d at 918. Plaintiff's counsel vaguely alluded to the ideas of *Fisher* at the hearing on the motions, in the context of the plaintiff's claims against the PMs. *See* TR 146, ln 18-19. Because the court does not understand the plaintiff to have alleged that the MSA is a hybrid restraint, it will not address *Fisher* or any relevance it may have to the present dispute.

[18] The court here attempts to address any confusion on this point.

At the hearing on the motions, in response to the court's question as to whether the plaintiff was alleging that the MSA or any portion of it constituted an antitrust violation, plaintiff's counsel stated, "We are alleging that the disparate payment terms for Subsequent Participating Manufacturers under the Master Settlement Agreement constitutes an antitrust violation." TR 54, ln 10-12. Counsel then elaborated, "The case law says that . . . an essential facilities claim . . . is a per se violation of the antitrust laws." TR 54, ln 14-16.

HN10[] When a state authorizes an antitrust violation by private actors in all situations, that law is pre-empted by the Sherman Act. *See* Tritent, 467 F.3d at 554-56. In *Tritent,* the plaintiff alleged that Kentucky's complementary legislation violated the Sherman Act. 467 F.3d at 548-49. Finding that the case was a "typical preemption case," the Sixth Circuit sought to determine "whether there exist[ed] an irreconcilable conflict between the federal and state regulatory schemes." Id. at 554 (quoting Rice, 458 U.S. at 659). Guided by *Rice,* the *Tritent* court concluded **[**44]** that the state legislation was not pre-empted by the Sherman Act. Id. at 556-58. The court emphasized that for such pre-emption to exist, a statute must mandate illegal activity "in all cases," and ultimately held that Kentucky's statute was not pre-empted because it did not do so. Id. 554-56.

Count one is the only count that the plaintiff asserts is against the states, and so any claim that the states have acted wrongfully because the MSA authorizes antitrust violations would have to come from this count. Count one concerns the plaintiff's "essential facilities" allegations. **HN11**[] The basic elements of an "essential facilities" antitrust violation are that a competitor has denied the plaintiff reasonable access to some facility the competitor controls and that is necessary to compete in their shared market. *See, e.g.,* Ohio Bell Telephone Co. v. CoreComm Newco, Inc. 214 F.Supp.2d 810, 818 (N.D.Ohio, 2002) (citing Ideal Dairy Farms, Inc. v. John Labatt, Ltd., 90 F.3d 737, 748 (3d Cir.1996)) (describing the "elements necessary to establish an essential facilities claim").

The court will assume for the sake of argument that the MSA and its provisions are a "regulatory scheme" created by a state **[**45]** and capable of being pre-empted by federal law. The plaintiff has not alleged that the MSA authorizes its competitors to deny it access to the MSA. Rather, the plaintiff has argued that the state Attorneys General have allowed themselves, *unnecessarily,* and in violation of the rights actually created by the LMFN clause, to be influenced by the PMs' threats to invoke

[*779] c. The states are immune from liability for anti-competitive effects of all acts the plaintiff alleges were wrongful.

The states' negotiation, execution, and enforcement of the MSA and their decision not to enter into the Amended Adherence Agreement are all direct state action, and the states are immune from liability for those actions.

HN12[] A state simply is *incapable* of entering an agreement that violates the Sherman Act. [19] The state-action doctrine traditionally is applied to acts of the legislature or regulatory schemes constructed by states. However, it also applies to actions by officials in the state's executive branch. *See Neo Gen Screening, Inc. v. New England Newborn Screening Program, 187 F.3d 24, 28-29 (1st Cir. 1999)*; *Charley's Taxi Radio Dispatch Corp. v. SIDA of Hawaii, Inc., 810 F.2d 869 (9th Cir. 1987)*; *see also Berger v. Cuyahoga County Bar Ass'n, 983 F.2d 718 (6th Cir. 1993)* **[**47]** (finding state-action immunity for actions taken by state supreme court because it was regulating the practice of law pursuant to constitutional grant of power).

HN13[] A state attorney general, as a member of the executive branch of government, is entitled to immunity for his or her executive actions. Any decision made by the defendant Attorneys General, therefore, either in negotiating and executing the MSA or in deciding not to execute the Amended Adherence Agreement, is direct state action falling completely outside the scope of the Sherman Act. This conclusion is supported by the plaintiff's choice to sue the defendant Attorneys General in their official capacity. *See Will v. Mich. Dept. of State Police, 491 U.S. 58, 71, 109 S. Ct. 2304, 105 L. Ed. 2d 45, (1989)* (finding that a suit against a state official in his or her official capacity is a suit against the state). Other courts have held that ***HN14***[] the acts of the Attorneys General in negotiating **[**48]** and entering into the MSA are direct state action. *See Sanders, 504 F.3d 903*; *Sanders v. Lockyer, 365 F. Supp. 2d 1093, 1099 (N.D. Cal. 2005)*.

The plaintiff also alleges that the state's enforcement of the MSA's discriminatory terms, including refusing to list the plaintiff on a list of approved manufacturers and attempts to take possession of the plaintiff's escrowed funds "violate[] Plaintiff's legal rights." Am. Compl. P 196. This claim, to the extent it suggests a potential violation of the Sherman Act, likewise targets direct state action, outside the scope of the Sherman Act.

The plaintiff's allegations that the MSA was created as part of a conspiracy entered by the Settling States with the PMs or that these actors conspired to prevent enactment of the Amended Adherence Agreement have no effect on the state's entitlement to immunity. *See City of Columbia v. Omni Outdoor Advertising, Inc., 499 U.S. 365, 379, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991)* ("[W]e affirm our rejection of any interpretation of the Sherman Act that would allow Plaintiffs to look behind the actions of state sovereigns to base their claims on 'perceived conspiracies to restrain trade.'" (quoting *Hoover, 466 U.S. at 580*)). The motives of the state **[**49]** in taking the action it took are simply irrelevant to the court's inquiry. *See Hoover, 466 U.S. at 579-80* ("[W]here the action complained of . . . was that of the state itself, **[*780]** the action is exempt from antitrust liability regardless of the State's motives in taking the action.").

---

their LMFN rights. Even when the court construes all facts in favor of the plaintiff, the plaintiff has not argued that the MSA itself authorizes what the PMs have done. *See* Am. Compl. P 197, 198, 199, 203. And it certainly has presented no facts to show that the MSA authorizes a violation "in all cases."

On the contrary, the plaintiff admits that the MSA does not give the plaintiff's competitors the ability to decide whether or on what terms a company will have access to the MSA. Counsel for the plaintiff analogized the MSA to a bridge to the market, with the "Attorneys General . . . sitting in the tollbooth controlling the gate. But standing over their shoulders . . . [are] the manufacturers" influencing the decision-making of the Attorneys General. TR 130, ln 17-24. The facts of the present case, as presented by the plaintiff, **[**46]** are simply that the states have allowed the PMs to influence their decision. And that decision, as indicated above, is direct state action for which the state remains immune. Thus, the plaintiff's "essential facilities" claim cannot constitute an allegation that the MSA should be pre-empted by the Sherman Act, nor would it succeed.

[19] The state is not incapable of entering into an agreement, or passing a law, that presents constitutional problems. The alleged constitutional defects of the agreement, however, do not implicate the Sherman Act and will be addressed by the court in a subsequent section of this opinion.

In summary, the negotiation, execution, and enforcement of the MSA and the associated decisions of the Attorneys General, as challenged by the plaintiff, are acts of the sovereign state. While such acts are not immune from *every* kind of challenge, they are immune from challenge as violations of the antitrust laws.

Given the court's conclusion that the states are entitled to *Parker v. Brown* state-action immunity for any antitrust claims made by the plaintiff, the court will not reach the additional arguments for dismissal made by the defendant Attorneys General. The court now turns to one challenge to which the states' acts remain vulnerable: the plaintiff's claims that the MSA violates the U.S. Constitution.

B. Constitutional Claims (counts two, three, four, and five of the plaintiff's amended complaint).

The plaintiff seeks relief on the following constitutional grounds: (1) *Equal Protection Clause*; (2) *Due Process Clause*; **[**50]** (3) *Commerce Clause*; and (4) Compact Clause. The plaintiff brings these claims against all of the defendant Attorneys General. [20]

1. Plaintiff Waived Constitutional Challenges to Provisions of the MSA.

The defendant Attorneys General argue that through the operation of section XV of the MSA, the plaintiff has waived any constitutional challenges to the MSA. In order to resolve this issue, the court must first determine whether the language of the provision encompasses the types of constitutional claims currently before the court. If so, the court then must determine whether the plaintiff made a valid waiver of those claims.

a. The waiver encompasses the plaintiff's *Equal Protection*, *Due Process*, and *Commerce Clause* claims.

The plaintiff is bound to the MSA through the Adherence Agreement entered into by the plaintiff and the Settling States in 2004. *See* Am. Compl., Exhibit B. The Adherence Agreement is a contract. The MSA, likewise, is a contract. *See, e.g., Bamerilease Capital Corp. v. Nearburg, 958 F.2d 150, 152 (6th Cir. 1992)* **[**51]** (finding that ***HN15***[] a settlement agreement is a contract)(citations omitted). ***HN16***[] In interpreting a contract, the court is guided by well-established principles of contract interpretation. The court will apply Kentucky law on contract interpretation. [21]

Kentucky law on contract interpretation recently has been summarized succinctly as follows:

> ***HN18***[] Under Kentucky law, contract interpretation is a question of law for the Court to determine. *Davis v. Siemens Med. Solutions USA, Inc., 399 F.Supp.2d 785, 792 (W.D. Ky. 2005)*. To interpret a contract, the Court looks to its language to **[*781]** determine the parties' intentions. *See Abney v. Nationwide Mut. Ins. Co., 215 S.W.3d 699, 703 (Ky. 2006)*. **[**52]** "Where no ambiguity exists in the contract" the Court looks "only as far as the four corner [sic] of the document to determine that intent." *Id.* Whether the contract is ambiguous is a question of law for the Court to determine. *Id.* "A contract is ambiguous if a reasonable person would find it susceptible to different or inconsistent interpretations." *Cantrell Supply, Inc. v. Liberty Mut. Ins. Co., 94 S.W.3d 381, 385 (Ky. Ct. App. 2002)*.

*Dodd v. Dyke Industries, Inc., 2008 U.S. Dist. LEXIS 34786, 2008 WL 1884081, at *5 (W.D. Ky. April 28, 2008)*.

[20] The plaintiff does not argue that the Settling States' refusal to enact the Amended Adherence Agreement violated its constitutional rights. All of the plaintiff's constitutional claims pertain to the MSA itself.

[21] The court does not sit in diversity jurisdiction for this action and therefore applies federal choice-of-law rules. ***HN17***[] Federal choice-of-law rules dictate that the court must apply the law of the jurisdiction having the most significant relationship with the action. *See, e.g., In re Gaston & Snow, 243 F.3d 599, 605 (2d Cir. 2001)*. Neither party has suggested that it matters for the resolution of this issue which state's law of contract interpretation the court uses. The court therefore will be guided by Kentucky law on contracts.

Section XV of the MSA is entitled "Voluntary Act of the Parties" and provides as follows:

> The Settling States and the Participating Manufacturers acknowledge and agree that this Agreement is voluntarily entered by each Settling State and each Participating Manufacturer as the result of arm's-length negotiations, and each Settling State and each Participating Manufacturer was represented by counsel in deciding to enter into this Agreement. Each Participating Manufacturer further acknowledges that it understands that certain provisions of this Agreement may require it to act or refrain from acting in a manner that could otherwise give rise to state or federal constitutional **[**53]** challenges and that, by voluntarily consenting to this Agreement, it (and the Tobacco-Related organizations (or any trade associations formed or controlled by any Participating Manufacturer)) waives for the purposes of performance of this Agreement any and all claims that the provisions of this Agreement violate the state or federal constitutions. Provided, however, that nothing in the foregoing shall constitute a waiver as to the entry of any court order (or any interpretation thereof) that would operate to limit the exercise of any constitutional right except to the extent of the restrictions, limitations or obligations expressly agreed to in this Agreement or the Consent Decree.

The plaintiff asserts that this provision does not operate as a waiver of its present constitutional claims because it is only "a waiver of a PM's constitutional rights with respect to requirements or restrictions explicitly imposed by the MSA with respect to the PM's own actions." DE 239, p. 18. Noting that the first clause of the second sentence of section XV references actions of the PM itself, the plaintiff further elaborates that "MSA [section] XV does not waive the PM's rights to challenge the actions **[**54]** of others relating to the grandfathered SPMs' unjustified favoritism under the agreement." *Id.* The plaintiff contends that this waiver is primarily aimed at obtaining from the PMs a waiver of any *First Amendment* challenges to the MSA. *Id.*

The plaintiff's arguments fail. As a matter of law, this provision is unambiguous and operates as a broad waiver of the PMs' constitutional rights. The provision explicitly states that a Participating Manufacturer "waives for the purposes of performance of this Agreement any and all claims that the provisions of this Agreement violate the state or federal constitutions." MSA § XV. The phrase "any and all claims" could not be broader. Had the parties intended the provision to extend only to the PMs' obligations under the contract that could implicate the PMs' rights under the *First Amendment*, the provision could have provided expressly that the PMs waived any and all claims that the provisions of the agreement violated the *First Amendment* and its counterparts in state constitutions. The provision does not limit its scope in this **[*782]** manner, and the court must take the meaning of the provision as it is presented by the words used in the document.

As pointed **[**55]** out by the plaintiff, the waiver extends only so far as the MSA makes requirements upon a participating manufacturer, as expressed by provisions of the agreement that a participating manufacturer must abide by in order to perform the agreement. However, the plaintiff's *Equal Protection*, *Due Process*, and *Commerce Clause* claims all implicate "provisions of [the] Agreement" that affect the plaintiff's performance under the contract. The court will consider each in turn, pointing to the provision of the MSA that requires the actions challenged by the plaintiff's claims.

I. Equal Protection claim

First, according to count two of the plaintiff's complaint, "[t]he MSA's unequal application of its purported back-payment requirements, grandfather exemptions and escrow requirements violates the rights of General Tobacco under the *Equal Protection Clause of the Fourteenth Amendment*." Am. Compl. P 209. The "grandfathered exemptions" are provided for by section IX(I) of the MSA, wherein the agreement specifically explains that a Subsequent Participating Manufacturer has payment obligations under the agreement "only in the event that its Market Share in any calendar year exceeds the greater of (1) **[**56]** its 1998 Market Share or (2) 125 percent of its 1997 Market Share . . . . " MSA § IX(I). Because the plaintiff's market share in 1998 was zero, and those SPMs the plaintiff terms "grandfathered SPMs" had a market share in those years, its payment obligation accordingly is higher than those other, older, SPMs. The plaintiff's claim of an *Equal Protection Clause* violation therefore involves the plaintiff's obligations under this provision of the agreement. To be more explicit, this provision of the agreement requires the plaintiff to act (that is, make payments) in a way that the plaintiff now wants to argue is a violation of its right to equal protection of the laws under the federal constitution. This claim is waived by section fifteen of the MSA. Similarly, the plaintiff's claim regarding its back-payment requirements results from the requirement of a provision of the MSA that it act in a certain manner. *See* MSA § II(jj). In its provisions, the MSA also provides directions as to the PMs' obligation to make payments to an escrow account. [22] *See* MSA § IX(a). The language of the plaintiff's complaint makes clear that its claim for violation of the *Equal Protection Clause* arises from **[**57]** provisions of the MSA, as it attributes the allegedly disparate treatment it suffers directly to the "MSA's unequal application" of certain requirements. Am. Compl. P 209. Because all of those provisions require certain action of or restraint by PMs, the plaintiff has waived constitutional challenges to them.

[*783] *ii. Due Process claim*

Second, the plaintiff's Due Process claim implicates the same provisions as its Equal Protection claim. The plaintiff first takes issue with the "MSA's payment structure," arguing that the MSA has deprived the plaintiff of its substantive due process rights. Am. Compl. P 214. This payment structure is created by provisions of the MSA, as discussed in the previous paragraph. Therefore, this claim is waived by section fifteen, as such provisions are provisions that require the plaintiff to "act or refrain from acting in a manner that could otherwise give rise to . . . constitutional challenges." MSA § XV. The plaintiff's procedural due process claim also is waived. *See* Am. Compl. P 216. The plaintiff's argument that it has not received appropriate process regarding the MSA's requirements that it make certain payments implicates the MSA provisions that require it to make payments.

iii. Commerce Clause claim

Third, the plaintiff's claim for relief under the *Commerce Clause* is also waived because it involves provisions of the MSA that require it to act or refrain from acting for the purpose of performing the agreement. **[**59]** The plaintiff alleges that the MSA violates the *Commerce Clause* due to its requirement that payments be "collected nationally and then apportioned among the Settling States" and therefore "each Settling State imposes a fee on each PM based upon sales not just in that State, but also in all the Settling States." Am. Compl. P 221. As indicated by the language of the plaintiff's complaint, this claim involves a requirement made on the plaintiff by the provisions of the MSA. *See* MSA § IX(a) (specifying the procedure by which all participating manufacturers are to make payments to a single designated escrow agent); *Id.* § IX(c)(2)(A) (directing that funds paid by OPMs will then be allocated among the Settling States according to certain formula); *Id.* § IX(i)(1) (C)) (directing that payments made by SPMs will be allocated and distributed in the same manner as those made by the OPMs). This claim, then, also concerns requirements made of the plaintiff by provisions of the MSA. The plaintiff's second claim under the *Commerce Clause*, that the terms provide "preferential treatment to SPMs that were conducting business in the Settling States in 1998 to the detriment of later market entrants," involves **[**60]** the provisions of the MSA regarding the calculation of SPMs' market share for the purposes of performance of the agreement as discussed above in regards to the plaintiff's *Equal Protection Clause* claim. The plaintiff has also waived this claim.

Other courts have touched upon this provision of the MSA. *See* *People ex rel. Lockyer v. R.J. Reynolds Tobacco Co., 116 Cal. App. 4th 1253, 11 Cal. Rptr. 3d 317, 329 (Cal. Ct. App. 2004)* (finding that injunction imposed on tobacco company consistent with the advertising restrictions company had agreed to in the MSA and therefore finding the company had waived its constitutional challenged to the injunction); *People ex rel. Lockyer v. R.J. Reynolds Tobacco Co., 107 Cal. App. 4th 516, 132 Cal. Rptr. 2d 151, 164 (Cal. Ct. App. 2003)* (finding tobacco company had waived constitutional claim challenging interpretation of provisions of the MSA restricting commercial

---

[22] The plaintiff's Equal Protection challenge to the requirement that it make payments into the escrow account on a quarterly basis does not challenge a provision of the MSA; rather, it attacks a requirement that is specific to the plaintiff and is detailed in the Adherence Agreement, which makes the MSA run against the plaintiff. *See* Am. Compl., Exhibit B, P 10. Even if the plaintiff had not waived such a constitutional challenge, it would fail on its merits. The parties agree that ***HN19***[] any Equal Protection claim calls for rational-basis review. The defendant Attorneys General have stated a rational basis for requiring quarterly, rather than annual, payments into escrow: "[T]he States have learned since the signing of the MSA that quarterly deposits of both escrow and MSA payments encourage compliance." DE 149, p.25. The plaintiff's factual allegations do not contradict the soundness **[**58]** of this rationale. The claim is therefore without merit.

speech because "those express contract terms remained express provisions subject to Reynolds's knowing and intentional waiver of the right to contest their constitutionality"). While the present case has called for a more expansive interpretation of the waiver provision, this court's findings are consistent with the findings of these **[**61]** courts.

[*784] Because the court finds that the waiver of section fifteen extends only so far as a participating manufacturer's obligations created by the MSA, the plaintiff's claim that the existence of the MSA, that is, the MSA in its entirety and not the specific requirements any of its provisions make upon a participating manufacturer, is a violation of the Compact Clause is not waived. This claim will be discussed below.

b. The plaintiff's waiver was knowing, intelligent, and voluntary.

The court now considers whether the plaintiff's waiver of these three constitutional claims is a valid waiver. ***HN20***[] To be valid, a waiver of constitutional rights must be made "voluntarily, intelligently, and knowingly." *Hollins v. Methodist Healthcare, Inc., 474 F.3d 223, 226 (6th Cir. 2007)* (quoting *Fuentes v. Shevin, 407 U.S. 67, 94-95, 92 S. Ct. 1983, 32 L. Ed. 2d 556 (1972))*; *see also* *D.H. Overmyer v. Frick Co., 405 U.S. 174, 92 S. Ct. 775, 31 L. Ed. 2d 124 (1972)* (holding that in order for a waiver of constitutional rights to be valid, it must be made with an awareness of the consequences of the waiver). The law presumes against the waiver of constitutional rights, a presumption which only clear evidence to the contrary can overcome. *See* *Brookhart v. Janis, 384 U.S. 1, 86 S. Ct. 1245, 16 L. Ed. 2d 314 (1966)* **[**62]** (citations omitted). In assessing the validity of a waiver of constitutional rights, the court should consider the circumstances in which the waiver was made. *See* *Fuentes, 407 U.S. at 95*; *see also* *Overmyer, 405 U.S. at 186* (finding significant to determination of validity of waiver that the waiving corporation was represented by counsel).

The terms of section fifteen recite that the waiver was made voluntarily, with representation by counsel. In agreeing to the provision, then, the plaintiff agreed that it was entering the agreement voluntarily. The provision also states that the signing PM was represented by counsel. The plaintiff does not contest either that it entered the agreement voluntarily or that it was represented by counsel. The plaintiff argues that due to the facts alleged in connection with its claim, it was fraudulently induced to enter into the agreement, so that it could not have effected a knowing waiver.

In its allegations of fraudulent inducement, the plaintiff alleges that "the Settling States made material misrepresentations or omissions in order to induce General Tobacco to join the MSA, all the while knowing that the Settling States would hold General Tobacco to **[**63]** the MSA's purported discriminatory and onerous terms and requirements not required of the grandfathered SPMs." Am. Compl. P 247. In its response to the defendants' motion to dismiss, the plaintiff alleges three misrepresentations: (1) that the plaintiff requested specific information about the extent of the exemptions granted to the grandfathered SPMs but was denied access to the information on grounds that it was confidential; *see* Am. Compl. P 164; (2) that the plaintiff sought assurance that the Settling States were enforcing their Escrow Statutes and was so assured; *see* Am. Compl.P 165; and (3) that the Settling States represented to the plaintiff that the LMFN provision of the MSA would not affect the states' ability to grant the plaintiff entry into the MSA; *see* Am. Compl. P 166. *See* DE 239, p. 37.

HN21[] A valid waiver can also be defined as the "intentional relinquishment or abandonment of a known right." *See* *Johnson v. Zerbst, 304 U.S. 458, 464, 58 S. Ct. 1019, 82 L. Ed. 1461 (1938)*. Accepting as true all of the plaintiff's allegations, no fact **[*785]** emerges that changes the voluntary, intelligent, and knowing nature of the plaintiff's waiver. Any misrepresentations by the states as to how diligently states were enforcing **[**64]** their Escrow Statutes or the impact of the LMFN clause have no relevance to the plaintiff's understanding of what rights it was giving up by signing on to the MSA. By alleging it did not know the extent of the exemptions granted to the SPMs, the plaintiff apparently asserts that it did not know the 1997 and 1998 market shares of the other SPMs. This figure affects the exact amount that SPMs owe under the MSA, but it does not affect the knowledge the plaintiff had at the time it entered into the agreement: that the SPMs paid according to a formula dependent on their 1997 or 1998 market share. The treatment of the SPMs is delineated fully in the terms of the MSA. The fact of the disparate treatment is apparent on the face of the document. The plaintiff knew that the MSA calculated the SPMs' payment obligations based upon this figure. It also knew that, per the terms of its agreement, it was deemed to have a 1997 and 1998 market share of zero. *See* Am. Compl., Exhibit B, p. 3. Upon learning the exact market share claimed by each SPM, the plaintiff did not acquire a new constitutional challenge of which the plaintiff had been unaware without knowing the exact figures. Its not having known **[**65]** each SPM's claimed market share does not affect the validity of the plaintiff's waiver.

Furthermore, the waiver at issue was initially executed by the original PMs, as part of a settlement of ongoing litigation between the states and the OPMs. The waiver at issue was originally granted by the OPMs in exchange for the release of claims. In exchange for entering into the MSA and agreeing to the waiver, the plaintiff was similarly released from future claims of misconduct. ***HN22***[] "It is a well established principle that the law, and public policy, favor the settlement of disputes without litigation." *Echols v. Nimmo, 586 F.Supp. 467, 468 (D.C. Mich. 1984)* (citations omitted). What the parties have agreed to as a fair resolution of the relevant claims should not be disturbed lightly. The plaintiff has presented no persuasive argument that this waiver in the settlement agreement should be disturbed by the court.

2. Plaintiff's Compact Clause Claim.

In count five of its amended complaint, the plaintiff alleges that the MSA is an interstate compact in violation of the Compact Clause. ***HN23***[] The Compact Clause forbids any state from "enter[ing] into any Agreement or Compact with another State" without congressional **[**66]** consent. *U.S. Const. art. I, § 10, cl. 3*. "Congressional consent is not required for interstate agreements that fall outside the scope of the Compact Clause." *Cuyler v. Adams, 449 U.S. 433, 440, 101 S. Ct. 703, 66 L. Ed. 2d 641 (1981)*. This clause applies only to "any combination tending to the increase of political power in the states, which may encroach upon or interfere with the just supremacy of the United States." *United States Steel, 434 U.S. at 468* (quoting *Virginia, 148 U.S.503, 519, 13 S. Ct. 728, 37 L. Ed. 537 (1893))*. Therefore, the court's central concern in any Compact Clause inquiry is whether the agreement at issue enhances state power to the detriment of the federal government's power. *See* *United States Steel, 434 U.S. at 473*. The Compact Clause does not "circumscribe modes of interstate cooperation." *U.S. Steel Corp. v. Multistate Tax Comm'n, 434 U.S. 452, 460, 98 S. Ct. 799, 54 L. Ed. 2d 682 (1978)*.

The plaintiff argues that the MSA encroaches on federal power by regulating interstate commerce through the establishment **[*786]** of a complex national tax and regulatory scheme; regulating access to the national cigarette market; and encroaching on federal supremacy with respect to antitrust laws. The plaintiff asserts that as a result of the MSA, the Settling States have **[**67]** enlarged their collective power and influence at the expense of the federal government.

The "encroachments" upon federal power alleged by the plaintiff are only the results of the enhanced bargaining power the Settling States enjoy as a result of the proliferation of the MSA. ***HN24***[] An increase in the states' collective bargaining power does not result in an accompanying decrease of federal power. See *Star Scientific v. Beales, 278 F.3d 339, 360 (4th Cir. 2002)* (discussing *Multistate Tax Comm'n, 434 U.S. at 473 (1978))*. Importantly, "[e]ach participating state could have independently settled its litigation with the participating manufacturers and enacted both the Qualifying Statute and the Model Act." *PTI, Inc. v. Philip Morris, Inc., 100 F.Supp. 2d 1179, 1198 (C.D. Cal. 2000)*. **[**68]** That the effectiveness of each state's individual agreement is increased because fifty-one other states or territories made an identical agreement does not mean that the federal government's power has suffered a concomitant decrease. Such a conclusion implies that the amount of power and influence in the United States is fixed and that the increase of a state's power must necessarily imply a decrease in federal power.

Nothing in the MSA steals power from the federal government. Importantly, "the Master Settlement Agreement does not derogate from the power of the federal government to regulate tobacco. Sections X and XVIII(a) of the agreement specifically anticipate that Congress may, in the future, pass laws regulating tobacco and provides for adjustments of the [MSA's] terms if that occurs." *Star Scientific, Inc., 278 F.3d at 360* (dismissing claim that the MSA violates the Compact Clause); *see also* *PTI, Inc., 100 F.Supp. 2d 1179* (same). This claim therefore will be dismissed.

Based on the above reasoning, all constitutional claims brought against the defendant Attorneys General will be dismissed. [23] As conceded by the plaintiff, the dismissal of these claims means that the plaintiff's **[**69]** claim for relief under *42 U.S.C. § 1983* (count six of the Amended Complaint) must also be dismissed.

C. Fraudulent Inducement (count seven of the plaintiff's Amended Complaint).

In count seven of its complaint, the plaintiff alleges that the Settling States fraudulently induced its agreement to join the MSA by making material representations or omissions. The defendant Attorneys General claim entitlement to sovereign **[*787]** immunity from this claim, pursuant to the *Eleventh Amendment*. The plaintiff counters that the defendants waived their immunity due to entering into the MSA.

HN25[] "The *Eleventh Amendment* bars a suit against state officials when 'the state is the real substantial party in interest.'" *Pennhurst State School & Hosp. v. Halderman, 465 U.S. 89, 101, 104 S. Ct. 900, 79 L. Ed. 2d 67 (1984)* (citations omitted). It follows, therefore, that a suit against a state official in his official capacity is a suit against the state, for it "is not a suit against the official but rather is a suit against the official's office." *S&M Brands, 527 F.3d at 507* (quoting *Will v. Mich. Dept. of State Police, 491 U.S. 58, 71, 109 S. Ct. 2304, 105 L. Ed. 2d 45 (1989))*.

"The [Supreme] Court has recognized an important exception to this general rule: a suit challenging the constitutionality of a state official's action **[**71]** is not one against the State." *Pennhurst, 465 U.S. at 102*; *see* *Ex parte Young, 209 U.S. 123, 28 S. Ct. 441, 52 L. Ed. 714 (1908)*. The plaintiff's constitutional claims fall within this exception. [24] The plaintiff's claim for fraudulent inducement, however, is a claim for relief under state law. Importantly, the exception provided for by *Ex parte Young* "rests on the need to promote the vindication of federal rights." *Pennhurst, 465 U.S. at 102* (citations omitted).

HN26[] A state, and accordingly an official sued in his official capacity, therefore retains immunity from claims that an official has violated *state* law.

> A federal court's grant of relief against state officials on the basis of state law . . . does not vindicate the supreme authority of federal law. On the contrary, it is difficult to think of a greater intrusion on state sovereignty than when a federal court instructs state officials on how to conform their conduct to state law. Such a result conflicts directly with the principles **[**72]** of federalism that underlie the *Eleventh Amendment*.

Id. at 105.

HN27[] "There are three exceptions to a State's sovereign immunity: (a) when the State has consented to suit; (b) when the exception first set forth in *Ex parte Young . . .* applies; and (C)) when Congress has properly abrogated a State's immunity." *S & M Brands, Inc., 527 F.3d at 507* (citing *Kovacevich v. Kent State Univ., 224 F.3d 806, 817 (6th Cir. 2000))*. The plaintiff contends that the first exception applies to the present case.

---

[23] The nonresident Attorneys General requested this court to dismiss the claims against them pursuant to *Fed. R. Civ. Pro. 12(b)(2)* and *12(b)(3)* and contingently joined the Attorney General of Kentucky's motion to dismiss pursuant to lack of subject-matter jurisdiction and *Rule 12(b)(6)*. DE 208. Given the court's conclusion as to the plaintiff's constitutional claims, the court finds it unnecessary to reach the issues of whether venue in this district is appropriate and whether it has personal jurisdiction over the nonresident Attorneys General. Regardless of how the court chose to rule on that motion, the claims against the nonresident Attorneys General would be dismissed because the plaintiff has failed to state any claim under the U.S. Constitution for which the court can grant relief, and so all of its constitutional claims against all defendant Attorneys General will be dismissed. Defendant attorney general Peter Nickles (District of Columbia) has represented to the court through plaintiff's counsel that he received process, so his motion to dismiss for improper service, as well **[**70]** as the remaining motion to quash, will be denied as moot.

[24] And, indeed, no party has claimed that they do not. The court makes this point merely to distinguish between the applicability of the sovereign-immunity doctrine to this claim by the plaintiff and not to its other claims against the states.

HN28[] Just as the federal government's waiver of sovereign immunity "cannot be implied but must be unequivocally expressed," *U.S. v. King, 395 U.S. 1, 4, 89 S. Ct. 1501, 23 L. Ed. 2d 52 (1969)*, so must a state's waiver of its sovereign immunity be clear and unequivocal. *College Sav. Bank v. Florida Prepaid Postsecondary Educ. Expense Bd., 527 U.S. 666, 692, 119 S. Ct. 2219, 144 L. Ed. 2d 605 (1999)*.

Pursuant to the terms of the MSA, by entering into the agreement, the parties agreed that certain disputes with the state may be heard in the court in which the consent decree was entered. The MSA, in its definitions, defines "Court" as the court where the consent decree entered. MSA § II(p). In Kentucky, the consent decree was entered in Fayette Circuit Court. The plaintiff argues **[**73]** that because at other places in the document "court" with a lower-case "c" is used, and because the state **[*788]** could be subject to suit in the federal courts for challenges to the MSA related to federal law, the state has waived sovereign immunity and has consented to this court's jurisdiction over this pendent state-law claim.

HN29[] No waiver is required for the federal court to have jurisdiction over federal-law claims. *See 28 U.S.C. § 1331*. Any realization that state actions connected with the MSA could be challenged in federal court as violating federal law implies no accompanying consent for the federal court to hear state-law claims. Furthermore, the court does not find that the use of "court" rather than "Court" at places in the document operates as an express waiver of the state's sovereign immunity.

In addition, to the extent that the plaintiff has argued that the state has entered into a commercial arrangement, this allegation, even if true, would not abrogate the state's *Eleventh Amendment* immunity. *See College Sav. Bank, 527 U.S. at 692* (*HN30*[] state cannot constructively waive its sovereign immunity). The plaintiff also argues that the defendant consented to federal-court jurisdiction because **[**74]** the MSA is a contract between States and that federal court is the only court with jurisdiction to hear disputes between states. This point is irrelevant, as the present dispute is not a dispute between states. Similarly, it is not relevant that the MSA provides for the arbitration of certain disputes and that resulting awards would be subject to enforcement by federal courts pursuant to the Federal Arbitration Act, *9 U.S.C. § 9*. That the state may be subject to federal-court jurisdiction for those limited types of cases does not affect whether the state is subject to the court's jurisdiction over the present state-law claim. Because the court finds no waiver of sovereign immunity sufficiently explicit to create subject-matter jurisdiction over this claim, the claim will be dismissed.

IV. Conclusion

Accordingly,

IT IS ORDERED:

(1) The motion to dismiss complaint filed by defendants Lorillard Tobacco Co., Philip Morris, Inc., and R.J. Reynolds Tobacco Co. (DE 154) is **GRANTED.**

(2) The motion to dismiss filed by defendants Commonwealth Brands, Inc., Imperial Tobacco Limited/ITL, Japan Tobacco International USA, Inc., King Maker Marketing, Lane Limited, Liggett Group, LLC, Lignum-2, Inc., P.T. **[**75]** Djarum, Premier Manufacturing Inc., Santa Fe Natural Tobacco Co., Sherman's 1400 Broadway N.Y.C., Inc., Top Tobacco, LP, and Vector Tobacco, Inc. (DE 156) is **GRANTED.**

(3) The motion to dismiss for lack of subject-matter jurisdiction and failure to state a claim by defendant Jack Conway, Attorney General of Kentucky (DE 149) is **GRANTED.**

(4) The motion to dismiss for lack of personal jurisdiction and improper venue and contingent joinder in defendant Conway's motion to dismiss by the Attorneys General of the remaining forty-five states, five territories, and the District of Columbia (DE 208) is **DENIED as moot.**

(5) The motion to dismiss for improper service of process by defendant Peter Nickles (DE 210) and the motion to quash purported service on defendant Jeremiah W. Nixon(DE 215) are **DENIED as moot.**

(6) The court has not entered final judgment in this matter, as two defendants who have been served have failed to appear. If the plaintiff moves to dismiss its action against those defendants, the court will grant the motion and enter final judgment. If no action is taken within a year, **[*789]** the court will, absent cause, dismiss the action against those defendants for failure to prosecute this **[**76]** case against them and will enter final judgment at that time.

(7)The plaintiff's motion for preliminary injunctive relief (DE 2) is **DENIED as moot.**

Constitutional Law > ... > Case or Controversy > Standing > General Overview

HN1[] **Subject Matter Jurisdiction, Jurisdiction Over Actions**

The jurisdiction of the federal courts is limited to cases and controversies. *U.S. Const. art. III, § 2*. Whenever it appears by suggestion of the parties or otherwise that the court lacks jurisdiction of the subject matter, the court shall dismiss the action. *Fed. R. Civ. P. 12(h)(3)*. An objection that a federal court lacks subject matter jurisdiction may be raised at any time, even after trial and the entry of judgment. The objection, made under *Fed. R. Civ. P. 12(b)(1)*, may be raised by a party or by the court on its own initiative.

Constitutional Law > ... > Case or Controversy > Standing > General Overview

HN2[] **Case or Controversy, Standing**

A plaintiff must demonstrate standing for each claim he seeks to press and for each form of relief sought. The standing inquiry requires careful judicial examination of a complaint's allegations to ascertain whether the particular plaintiff is entitled to an adjudication of the particular claims asserted. The plaintiff bears the burden of proof to establish standing with the manner and degree of evidence required at the successive stages of the litigation. When the plaintiff defends against a motion to dismiss at the pleading stage, general factual allegations of injury resulting from the defendant's conduct may suffice, because courts presume that general allegations embrace those specific facts that are necessary to support the claim.

Constitutional Law > ... > Case or Controversy > Standing > Elements

HN3[] **Standing, Elements**

The irreducible constitutional minimum requirements for standing were described in Lujan as follows: (1) the plaintiff must have suffered an injury in fact, an invasion of a legally protected interest which is: (a) concrete and particularized; and (b) actual or imminent, not conjectural or hypothetical; (2) there must be a causal connection between the injury and the conduct complained of -- the injury has to be fairly traceable to the challenged action of the defendant, and not. the result of the independent action of some third party not before the court; (3) it must be likely, as opposed to merely speculative, that the injury will be "redressed by a favorable decision.

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

Constitutional Law > ... > Case or Controversy > Standing > Third Party Standing

HN4[] **Public Enforcement, State Civil Actions**

The United States Supreme Court has recognized that states are not normal litigants for the purposes of invoking federal jurisdiction, and have interests and capabilities beyond those of an individual by virtue of their sovereignty. The Court focused principally on the state's sovereign interest in its territory and its ability to preserve clean air for its citizens. The Court has elsewhere characterized a state's unique prerogatives as a parens patriae action stemming from a quasi-sovereign interest defined rather vaguely as a set of interests that the state has in the wellbeing of its populace. However, the Supreme Court has also recognized that the concept of special state standing due to the quasi-sovereign interest risks being too vague to survive the standing requirements. Therefore, a quasi-sovereign interest must be sufficiently concrete to create an actual controversy between the state and the defendant. Furthermore, interests of private parties are obviously not in themselves sovereign interests, and they do not become such simply by virtue of the state's aiding in their achievement. In such situations, the state is no more than a nominal party. If a state is only a nominal party without a real interest of its own, then it will not have standing under the parens patriae doctrine.

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

Governments > State & Territorial Governments > Claims By & Against

HN5[] **Standing, Particular Parties**

Generally, a state has been granted standing under the parens patriae doctrine in situations involving the abatement of public nuisances, such as global warming, flooding, or noxious gases. In other cases, states have been granted standing to represent the economic interests of their residents. As the United States Supreme Court noted, the common thread among these cases is each state's quasi-sovereign interest in the health and well-being of its residents and a quasi-sovereign interest in not being discriminatorily denied its rightful status within the federal system. In contrast, the Court has expressly found that a state does not have standing to protect her citizens from the operation of federal statutes.

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

Governments > State & Territorial Governments > Claims By & Against

HN6[] **Standing, Particular Parties**

In recognizing that a state may have standing by virtue of its quasi-sovereign interest in its citizens, the United States Supreme Court has noted that a state's interest must be in some way distinguishable from that of its citizens: In order to maintain such an action, the state must articulate an interest apart from the interests of particular private parties. The doctrine that a plaintiff must have an independent means of standing is one of a set of prudential principles adopted by the Supreme Court to augment the requirements of Article III. Those judicially self-imposed limits on the exercise of federal jurisdiction function to further limit the role of the courts, but they can be modified or abrogated by Congress. Without the prudential requirements, the courts would be called upon to decide abstract questions of wide public significance even though other governmental institutions may be more competent to address the questions, and Congress may grant an express right of action to persons who otherwise would be barred by prudential standing rules. In addition to the requirement that the plaintiff generally must assert his own legal rights and interests, and cannot rest his claim to relief on the legal rights or interests of third parties, the Supreme Court has disapproved of considering abstract questions of wide public significance amounting to generalized grievances.

Constitutional Law > ... > Case or Controversy > Standing > Elements

HN7[] **Standing, Elements**

Although the courts do not address the merits of a plaintiff's claim for the purpose of determining standing, the courts do analyze the characterization of the injury itself to determine whether or not it is concrete and particularized, actual or imminent, and fairly traceable to the challenged action of the defendant.

Constitutional Law > Congressional Duties & Powers > Reserved Powers

Governments > State & Territorial Governments > Claims By & Against

HN8[] **Congressional Duties & Powers, Reserved Powers**

The *Tenth Amendment* reserves any power not expressly delegated to the federal government to the states. Only states have standing to pursue claims alleging violations of the *Tenth Amendment* by the federal government. However, to bring a claim under the *Tenth Amendment*, a state must first allege facts relating to a relevant injury.

Constitutional Law > Congressional Duties & Powers > Reserved Powers

HN9[] **Congressional Duties & Powers, Reserved Powers**

The United States Supreme Court's language in Dole allows for the possibility of a *Tenth Amendment* claim in cases where the financial inducement offered by Congress might be so coercive as to pass the point at which pressure turns into compulsion. In that case, as in all other cases where the doctrine of coercion has been addressed, the state was the direct subject of both federal grants and federal restrictions.

Constitutional Law > ... > Case or Controversy > Standing > General Overview

Governments > State & Territorial Governments > Claims By & Against

HN10[] **Case or Controversy, Standing**

There is no effective way federal courts could ever limit parens patriae standing were a state allowed to bring suit on behalf of its citizens solely by virtue of its interest that its citizens benefit from voluntary federal grants. Allowing such cases would make the parens patriae doctrine too vague to survive the standing requirements of *U.S. Const. art. III, § 2, cl. 1*.

Counsel: Hardy Myers, Mary H. Williams, Stephen K. Bushong, and Jacqueline Sadker, Oregon Department of Justice, Salem, Oregon, for the plaintiff-appellant.

William S. Freeman, Cooley Godward Kronish LLP, Palo Alto, California; Alan Levine, Rachel B. Kane, and Allison Hersh, Cooley Godward Kronish LLP, New York, New York, for the defendant-appellee.

Peter D. Keisler, Karin J. Immergut, Barbara L. Herwig, and Matthew M. Collette, United States Department of Justice, Civil Division, Washington, D.C., for the intervenor-appellee.

Judges: Before: A. Wallace Tashima and Milan D. Smith, Jr., Circuit Judges, and George Wu, * District Judge. Opinion by Judge Milan D. Smith, Jr.

Opinion by: Milan D. Smith, Jr.

Opinion

MILAN D. SMITH, JR., Circuit Judge:

[*966] Plaintiff-Appellant the State of Oregon (Oregon) appeals the district court's dismissal **[*967]** of its claims under *Federal Rule of Civil Procedure 12(b)(6)*. Oregon brought suit against the Legal **[**2]** Services Corporation (LSC) for an alleged violation of its rights under the *Tenth Amendment to the United States Constitution*. LSC has required the recipients of its funding to maintain legal, physical, and financial separation from organizations that engage in certain prohibited activities. Oregon alleges that this restriction has effectively thwarted its ability to regulate the practice of law in the State of Oregon and to provide legal services to its citizens. The district court dismissed the suit on the basis that Oregon's allegations of injury were not recoverable, and Oregon appealed. Because we conclude that Oregon lacks standing, we vacate the district court's dismissal of this action on the merits and remand with instructions that the action be dismissed for lack of subject matter jurisdiction.

FACTUAL AND PROCEDURAL BACKGROUND

I. Statutory Background: The Program Integrity Regulation

* The Honorable George Wu, United States District Judge for the Central District of California, sitting by designation.

LSC is a private nonprofit corporation established by the United States for the purpose of providing financial support to individuals who would otherwise be unable to afford legal assistance. 42 U.S.C. § 2996b(a). To accomplish this purpose, LSC provides federal funds to local legal assistance **[**3]** programs throughout the United States. *Id*. § 2996e(a). *See generally* Legal Services Corporation Act of 1974 (LSC Act), Pub. L. No. 93-355, 88 Stat. 378 (1974) (codified as amended at 42 U.S.C. §§ 2996-2996l).

By regulation, LSC places certain restrictions on the use of its funds. *Id*. § 2996e(b)(1). These restrictions include, for example, a prohibition on the use of LSC funding for such activities as lobbying, participating in class action lawsuits, and advocating for the redistricting of political districts. 45 C.F.R. §§ 1612.3, 1617.3, 1632.3. Additionally, LSC requires its recipients to maintain "objective integrity and independence from any organization that engages in restricted activities." *Id*. § 1610.8(a). [1] Requirements for this "objective integrity" are codified in what is now denominated the "program integrity" rule or regulation. The requirements include: (1) legal separation of the recipient from the unrestricted organizations; (2) no transfer of LSC funds between the recipient and the unrestricted organization; and (3) the recipient's physical and financial separation from the unrestricted organization. [2] *Id*.

[*968] Whether an LSC fund recipient is sufficiently physically and financially separated from non-compliant legal services providers is determined on a case-by-case basis, based upon the totality of the circumstances. *Id*. § 1610.8(a)(3). The program integrity regulation specifies that "mere bookkeeping separation of LSC funds from other funds is not sufficient." *Id*. Other factors, such as having separate personnel, separate accounting and timekeeping records, separate facilities, and distinguishing forms of identification are relevant but not all-encompassing. *Id*. Fund recipients must annually certify to the LSC that they comply with the program integrity regulation. *Id*. § 1610.8(b).

In this appeal, Oregon contends that the program integrity regulation violates its Tenth Amendment rights.

II. Factual and Procedural History: Conflict with Oregon's Guidelines

In April 2005, the Oregon State Bar amended its **[**6]** guidelines for Oregon's legal services program, directing service providers to integrate their operations and staff in places where separate organizations provide services to the same geographic area. While some of Oregon's service providers are LSC fund recipients, others are not and engage in restricted activities. Legal Aid Services of Oregon (LASO), a legal services provider, is a recipient of LSC funds, which account for approximately 45% of its $ 6.5 million annual budget. Oregon Law Center (OLC), another large legal services provider, is not an LSC fund recipient and engages in LSC-restricted activities.

In response to the State Bar's amended guidelines, LASO submitted a configuration proposal to LSC that would combine the LASO and OLC corporations into one non-profit corporation. Under the proposal, the newly constituted

---

[1] This regulation was promulgated in response to a constitutional **[**4]** challenge to LSC restrictions on recipients using non-LSC funds for otherwise constitutional activities. Shortly after the restrictions were amended in 1996 to prohibit certain legal activities, a district court in Hawaii enjoined the LSC from enforcing them "to the extent that they relate to the use of Non-LSC Funds." *Legal Aid Soc'y of Haw. v. Legal Servs. Corp. (LASH), 961 F. Supp. 1402, 1422 (D. Haw. 1997)*. The district court found that the plaintiffs had a significant likelihood of success in arguing that the restrictions constituted unconstitutional conditions on the receipt of a federal subsidy. *Id. at 1416-17*.

The new rule, codified at § 1610.8, allows recipients to affiliate with organizations that use non-federal funds to engage in restricted activities, subject to preserving "objective integrity" between the two organizations. In so doing, it overcame the constitutional concerns raised in *LASH. See* ***Legal Aid Soc'y of Haw. v. Legal Servs. Corp. (LASH II), 145 F.3d 1017, 1021-23 (9th Cir.)***, *cert. denied*, ***525 U.S. 1015, 119 S. Ct. 539, 142 L. Ed. 2d 448 (1998)***.

[2] These regulations were designed to mirror the program integrity rule promulgated pursuant to Title X of the Public Health Service Act, which withstood **[**5]** constitutional attack in *Rust v. Sullivan, 500 U.S. 173, 111 S. Ct. 1759, 114 L. Ed. 2d 233 (1991)*. *See* *62 Fed. Reg. 27,695-97 (May 21, 1997)*. LSC's current regulations have also withstood constitutional challenges. *See* ***LASH II, 145 F.3d at 1031***; *Velazquez v. Legal Servs. Corp. (Velazquez II), 164 F.3d 757, 773 (2d Cir. 1999)*.

corporation would have two divisions, one of which would be subject to the LSC restrictions and the other of which would not. The two divisions would also maintain separate financial books and records, and would notify the public of their distinct functions in letterheads, business cards, and signage. However, the two divisions of the proposed new entity would **[**7]** share personnel and equipment, and would operate in the same physical premises. LSC's Office of Legal Affairs reviewed the proposal and concluded that it would not comply with LSC's requirements for program integrity.

In September 2005, LASO and OLC filed a complaint against LSC in district court, alleging that the LSC restrictions violated their *First Amendment* rights. On the same day and in the same court, Oregon filed this action against LSC alleging that the program integrity regulation effectively thwarted Oregon's policies governing its legal services program, in violation of the *Tenth Amendment*. Oregon sought to enjoin LSC from enforcing the program integrity regulation in Oregon. The two suits were consolidated and assigned to a magistrate judge.

The magistrate judge recommended that the district court grant LSC's motion to dismiss as to all of LASO's claims except its as-applied challenge to the program integrity rule. The magistrate judge also recommended granting LSC's motion to dismiss Oregon's complaint, because the state itself was not regulated by the LSC and because Oregon's claims of coercion did not meet the high standard required under Ninth Circuit precedents. *See* ***[**8]*** *California v. United States, 104 F.3d 1086 (9th* ***[*969]*** *Cir. 1997)*; *Nevada v. Skinner, 884 F.2d 445 (9th Cir. 1989)*.

The district court adopted the magistrate judge's recommendations and re-severed the lawsuits. Oregon appealed its claims to this court.

JURISDICTION

HN1[] The jurisdiction of the federal courts is limited to "cases" and "controversies." *U.S. CONST., Art. III, sec. 2*. "Whenever it appears by suggestion of the parties or otherwise that the court lacks jurisdiction of the subject matter, the court shall dismiss the action." *FED. R. CIV. P. 12(h)(3)*. An objection that a federal court lacks subject matter jurisdiction may be raised at any time, even after trial and the entry of judgment. *Arbaugh v. Y & H Corp., 546 U.S. 500, 506, 126 S. Ct. 1235, 163 L. Ed. 2d 1097 (2006)*. The objection, made under *Federal Rule of Civil Procedure 12(b)(1)*, may be raised by a party or by the court on its own initiative. [3] *Id*. While we have jurisdiction over this appeal under *28 U.S.C. § 1291*, we found reason to question whether the district court had subject matter jurisdiction over this case. As analyzed in this opinion, we conclude that Oregon lacks standing to bring a claim under the *Tenth Amendment* or the Spending Clause because it has not **[**9]** alleged a sufficiently concrete and particularized injury. We therefore vacate the district court's judgment and remand for an entry of dismissal for lack of subject matter jurisdiction.

DISCUSSION

I. Standing Requirements

HN2[] A plaintiff must demonstrate standing "for each claim he seeks to press" and for "'each form of relief sought.'" *DaimlerChrysler Corp. v. Cuno, 547 U.S. 332, 352, 126 S. Ct. 1854, 164 L. Ed. 2d 589 (2006)* (quoting *Friends of the Earth, Inc. v. Laidlaw Envtl. Servs. (TOC), 528 U.S. 167, 185, 120 S. Ct. 693, 145 L. Ed. 2d 610 (2000))*; *see also* *Allen v. Wright, 468 U.S. 737, 752, 104 S. Ct. 3315, 82 L. Ed. 2d 556 (1984)* ("the standing inquiry requires careful judicial examination of a complaint's allegations to ascertain whether the particular plaintiff is entitled to an adjudication of the particular claims asserted"). The plaintiff bears the burden of proof to establish

---

[3] Neither the district court nor the parties alluded to any possible jurisdictional problem with Oregon's prosecution of this action. We therefore asked, at oral argument, for supplemental briefing on Oregon's standing to pursue this action.

standing "with the manner and degree of evidence required at the successive stages of the litigation." Lujan v. Defenders of Wildlife, 504 U.S. 555, 561, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992). When, as **[**10]** here, the plaintiff defends against a motion to dismiss at the pleading stage, "general factual allegations of injury resulting from the defendant's conduct may suffice," because we "'presume that general allegations embrace those specific facts that are necessary to support the claim.'" *Id*. (quoting Lujan v. Nat'l Wildlife Fed'n, 497 U.S. 871, 889, 110 S. Ct. 3177, 111 L. Ed. 2d 695 (1990)).

HN3[] The "irreducible constitutional minimum" requirements for standing were described in Lujan as follows:

> First, the plaintiff must have suffered an "injury in fact" -- an invasion of a legally protected interest which is (a) concrete and particularized, and (b) "actual or imminent, not 'conjectural' or 'hypothetical,'" Whitmore [v. Arkansas, 495 U.S. 149, 155, 110 S. Ct. 1717, 109 L. Ed. 2d 135 (1990)] (quoting Los Angeles v. Lyons, 461 U.S. 95, 101-02, 103 S. Ct. 1660, 75 L. Ed. 2d 675 (1983)). Second, there must be a causal connection between the injury and the conduct complained of -- the injury has to be "fairly . . . **[*970]** trace[able] to the challenged action of the defendant, and not . . . the result [of] the independent action of some third party not before the court." Simon v. Eastern Ky. Welfare Rights Organization, 426 U.S. 26, 41-42, 96 S. Ct. 1917, 48 L. Ed. 2d 450 (1976). Third, it must be "likely," as opposed to merely "speculative," **[**11]** that the injury will be "redressed by a favorable decision." Id. at 38, 43.

504 U.S. at 560-61 (footnote and some internal citations omitted). Before applying these requirements to the facts of this case, however, we must first consider what impact, if any, Oregon's status as a state as opposed to a private party has on the standing inquiry.

A. State Standing: Quasi-Sovereign Interests

HN4[] The Supreme Court has recognized that "States are not normal litigants for the purposes of invoking federal jurisdiction," and have interests and capabilities beyond those of an individual by virtue of their sovereignty. Massachusetts v. EPA, 549 U.S. 497, 127 S. Ct. 1438, 1454, 167 L. Ed. 2d 248 (2007). The Court in *Massachusetts* focused principally on the state's sovereign interest in its territory and its ability to preserve clean air for its citizens. *Id*. The Court has elsewhere characterized a state's unique prerogatives as a *parens patriae* action stemming from "a 'quasi-sovereign' interest" defined rather vaguely as "a set of interests that the State has in the wellbeing of its populace." Alfred L. Snapp & Son, Inc. v. Puerto Rico, 458 U.S. 592, 601-02, 102 S. Ct. 3260, 73 L. Ed. 2d 995 (1982).

However, the Supreme Court has also recognized that "the **[**12]** concept [of special State standing due to the quasi-sovereign interest] risks being too vague to survive the standing requirements . . . . [Therefore, a] quasi-sovereign interest must be sufficiently concrete to create an actual controversy between the State and the defendant." Id. at 602. Furthermore, "[i]nterests of private parties are obviously not in themselves sovereign interests, and they do not become such simply by virtue of the State's aiding in their achievement. In such situations, the State is no more than a nominal party." *Id*. If a State is only a nominal party "without a real interest of its own -- then it will not have standing under the *parens patriae* doctrine." Id. at 600.

HN5[] Generally, a state has been granted standing under the *parens patriae* doctrine in situations involving the abatement of public nuisances, such as global warming, flooding, or noxious gases. *See* Massachusetts, 549 U.S. 497, 127 S. Ct. 1438, 167 L. Ed. 2d 248 (Massachusetts had standing to sue the EPA for failing to issue rules regarding the emission of greenhouse gases); North Dakota v. Minnesota, 263 U.S. 365, 44 S. Ct. 138, 68 L. Ed. 342 (1923) (North Dakota had standing to sue Minnesota for allegedly creating conditions leading to flooding of farmland); Georgia v. Tenn. Copper Co., 206 U.S. 230, 27 S. Ct. 618, 51 L. Ed. 1038 (1907) **[**13]** (Georgia had standing to sue for an injunction to prevent the defendant copper companies from discharging noxious gases over Georgia's territory). In other cases, states have been granted standing to represent the economic interests of their residents. *See* Snapp, 458 U.S. 592, 102 S. Ct. 3260, 73 L. Ed. 2d 995 (Puerto Rico had standing to sue defendant apple farmers for subjecting its workers to conditions more burdensome than those established for temporary foreign workers in violation of the Wagner-Peyser Act); *Georgia v. Pa. R. Co., 324 U.S. 439, 65 S. Ct. 716, 89 L. Ed. 1051 (1945)* (Georgia had standing to bring suit against railroads for conspiracy to fix freight rates in a manner that discriminated against Georgia shippers in violation of federal ***antitrust law***); *Pennsylvania **[*971]** v. West Virginia, 262 U.S. 553, 43 S. Ct. 658, 67 L. Ed. 1117, 1 Ohio Law Abs. 627 (1923)* (Pennsylvania had standing to sue for an injunction preventing West Virginia from giving other states a preferential right of purchase and curtailing the supply of gas carried to Pennsylvania).

As the Supreme Court noted in *Snapp*, the common thread among these cases is each state's quasi-sovereign interest in the health and well-being of its residents and a quasi-sovereign interest in "not being discriminatorily denied its rightful status **[**14]** within the federal system." *458 U.S. at 607*. In contrast, the Court has expressly found that a state does not have standing "to protect her citizens from the operation of federal statutes." *Massachusetts, 127 S. Ct. at 1455 n.17* (referencing *Massachusetts v. Mellon, 262 U.S. 447, 43 S. Ct. 597, 67 L. Ed. 1078 (1923)* (Massachusetts lacked standing to enjoin a Congressional act authorizing appropriations on a voluntary basis)).

B. Prudential Principles: No Reliance on the Claims of Third Parties

HN6[] In recognizing that a state may have standing by virtue of its quasi-sovereign interest in its citizens, the Supreme Court has been careful to note that a state's interest must be in some way distinguishable from that of its citizens: "In order to maintain such an action, the State must articulate an interest apart from the interests of particular private parties." *Snapp, 458 U.S. at 607*. The doctrine that a plaintiff must have an independent means of standing is one of a set of "prudential principles" adopted by the Supreme Court to augment the requirements of Article III. These "judicially self-imposed limits on the exercise of federal jurisdiction" function to further limit the role of the courts, but they can be modified **[**15]** or abrogated by Congress. *Allen, 468 U.S. at 751*; *see also* *Warth v. Seldin, 422 U.S. 490, 500-01, 95 S. Ct. 2197, 45 L. Ed. 2d 343 (1975)* (noting that without the prudential requirements, "the courts would be called upon to decide abstract questions of wide public significance even though other governmental institutions may be more competent to address the questions," and that "Congress may grant an express right of action to persons who otherwise would be barred by prudential standing rules").

In addition to the requirement that "the plaintiff generally must assert his own legal rights and interests, and cannot rest his claim to relief on the legal rights or interests of third parties," the Supreme Court has disapproved of considering "'abstract questions of wide public significance'" amounting to "'generalized grievances.'" *Valley Forge Christian Coll. v. Ams. United for Separation of Church & State, Inc., 454 U.S. 464, 475, 102 S. Ct. 752, 70 L. Ed. 2d 700 (1982)* (quoting *Warth, 422 U.S. at 499-500*).

II. Oregon's Alleged Injury

Oregon alleges that LSC's restrictions "effectively infringe on Oregon's sovereignty in violation of the *Tenth Amendment* and principles of federalism established in the structure of the United States Constitution, and exceed **[**16]** federal authority under the Spending Clause." ***HN7***[] Although we do not address the merits of Oregon's claim for the purpose of determining standing, *Lujan, 504 U.S. at 561*, we do analyze the characterization of the injury itself to determine whether or not it is "concrete and particularized," "actual or imminent," and "fairly traceable to the challenged action of the defendant." *Id. at 560* (citations omitted). Oregon need only allege general factual allegations of injury resulting from LSC's conduct to resist a motion to dismiss for lack of standing. *Id. **[*972]** at 561*. Because Oregon's factual allegations do not rise to the level of a concrete, particularized, actual or imminent injury against the state itself, that is independent from alleged harm to private parties, we hold that the action must be dismissed for lack of subject matter jurisdiction.

Oregon alleges that LSC's restrictions fall outside Congress's spending authority. In addition, Oregon alleges that LSC uses its restrictions to coerce LASO into complying with federal regulations over state regulations because LASO cannot survive as an organization without federal funding.

Oregon further alleges that LSC's restrictions limit Oregon's **[**17]** ability to regulate LASO and its other legal services providers. Oregon cannot require LASO to combine its facilities with OLS because that would make LASO ineligible for federal funding, and would lead to LASO's dissolution. Oregon paints this situation as a restriction on its ability to make policy, and alleges that such a restriction violates the *Tenth Amendment*.

However, Oregon acknowledges that it is not regulated by LSC, and that it is completely free to make or change its policy in the face of LSC regulations. Oregon does not receive LSC funding, and so is unaffected by its existence or non-existence aside from the fact that parties within Oregon are recipients. Oregon would be in the same position it now occupies if the federal government, for whatever reason, decided to cease further LSC funding. Therefore, Oregon's only alleged injury is on behalf of its legal services providers. As pleaded, Oregon's injury is indistinguishable from LASO's.

A. Oregon Has No Independent Injury

1. *Tenth Amendment* *Coercion Claim*

Although Oregon claims an injury under the *Tenth Amendment* separate from LASO's, it has not alleged general facts sufficient to establish such a claim. ***HN8***[] The *Tenth Amendment* **[**18]** reserves any power not expressly delegated to the federal government to the States. Only states have standing to pursue claims alleging violations of the *Tenth Amendment* by the federal government. *Tenn. Elec. Power Co. v. Tenn. Valley Auth., 306 U.S. 118, 144, 59 S. Ct. 366, 83 L. Ed. 543 (1939)*; *see also* *Brooklyn Legal Servs. Corp. B v. Legal Servs. Corp., 462 F.3d 219, 234 (2d Cir. 2006)*. However, to bring a claim under the *Tenth Amendment*, a state must first allege facts relating to a relevant injury. In this case, we hold there is no such injury.

The Supreme Court made a similar ruling in *Mellon*, a case in which Massachusetts sought to enjoin Congress from enacting the Maternity Act, *Cong. Ch. 135, 67th Cong., 42 Stat. 224 (1921)*. The Maternity Act provided for an initial appropriation, followed by annual appropriations for a period of five years, to be apportioned among the states that elected to accept the funds and comply with the attached provisions. *Id*. § 2. The purpose of the act was "promoting the welfare and hygiene of maternity and infancy." *Id*. § 1. Massachusetts alleged that "the act is a usurpation of power not granted to Congress by the Constitution -- an attempted exercise of the power of local **[**19]** self-government reserved to the States by the *Tenth Amendment*." *Mellon, 262 U.S. at 479*.

The Court found that Massachusetts, which had not accepted the funds or the conditions, had no standing to allege an injury under the *Tenth Amendment*. The Court reasoned:

> What, then, is the nature of the right of the State here asserted and how is it affected by this statute? Reduced to its simplest terms, it is alleged that the **[*973]** statute constitutes an attempt to legislate outside the powers granted to Congress by the Constitution and within the field of local powers exclusively reserved to the States. . . . But what burden is imposed upon the States, unequally or otherwise? Certainly there is none, unless it be the burden of taxation, and that falls upon their inhabitants, who are within the taxing power of Congress as well as that of the States where they reside. Nor does the statute require the States to do or to yield anything. If Congress enacted it with the ulterior purpose of tempting them to yield, that purpose may be effectively frustrated by the simple expedient of not yielding.

Id. at 482.

Similarly, in this case there is no burden or injury placed on Oregon. Like Massachusetts in *Mellon*, **[**20]** Oregon has not accepted federal funds, nor is it bound by the accompanying restrictions. Oregon is not injured by the federal government's decision to subsidize certain private activities, even if the government attaches impermissible conditions, as is alleged, to the recipients of those funds. Oregon is only affected by virtue of its interest in the effect of the grant and the conditions on its citizens; it has no independent claim of injury.

Oregon cannot claim injury simply on the basis that federal subsidies to private parties do not compliment Oregon's policies. The state has no standing to sue the federal government to provide voluntary federal subsidies to private parties, and certainly has no standing to sue the federal government to change its conditions for those federal subsidies. This is true even assuming, as we must, at the pleading stage of the litigation, that the federal government has gone beyond its authority under the Spending Clause to regulate private parties who accept its funds.

Such a ruling does not conflict with ***HN9***[] the Supreme Court's language in *Dole*, which allows for the possibility of a *Tenth Amendment* claim in cases where "the financial inducement offered **[**21]** by Congress might be so coercive as to pass the point at which 'pressure turns into compulsion.'" *483 U.S. 203 at 211, 107 S. Ct. 2793, 97 L. Ed. 2d 171* (quoting *Steward Machine Co. v. Davis, 301 U.S. 548 at 590, 57 S. Ct. 883, 81 L. Ed. 2d 1279*). In that case, as in all other cases where the doctrine of coercion has been addressed, the state was the direct subject of both federal grants and federal restrictions. *See, e.g., Printz v. United States, 521 U.S. 898, 117 S. Ct. 2365, 138 L. Ed. 2d 914 (1997)*; *New York v. United States, 505 U.S. 144, 112 S. Ct. 2408, 120 L. Ed. 2d 120 (1992)*; *Gregory v. Ashcroft, 501 U.S. 452, 111 S. Ct. 2395, 115 L. Ed. 2d 410 (1991)*; *California, 104 F.3d 1086*; *Nevada, 884 F.2d 445*. In this case, Oregon is not a recipient of funds, nor does it have authority to accept or refuse funds on behalf of its legal services providers, which are all private parties. Consequently, it cannot claim to be the subject of coercion in violation of the *Tenth Amendment*.

2. *"Interference" Claim*

Oregon argues in the alternative that it has been injured by LSC's regulations, which thwart Oregon's efforts at policy making with regards to Oregon's Legal Service Program. Oregon attempts to analogize its situation to cases recognizing a state's standing to defend its statutes when they are alleged to be unconstitutional or pre-empted by federal regulation. *See, e.g., Maine v. Taylor, 477 U.S. 131, 137, 106 S. Ct. 2440, 91 L. Ed. 2d 110 (1986)*; **[**22]** *Wyoming ex rel. Crank v. United States, 539 F.3d 1236, 1242 (10th Cir. 2008)*. However, those cases are distinguishable, because in this case there is no dispute over Oregon's ability to regulate its legal services program, and no claim that Oregon's laws have been invalidated as a result of the LSC restrictions.

[*974] The core of the dispute is whether Oregon should have the ability to control the conditions surrounding a voluntary grant of federal funds to specifically delineated private institutions. Because Oregon has no right, express or reserved, to do so, there is no judicially cognizable injury. Oregon may continue to regulate its legal service programs as it desires, but it cannot depend on voluntary financial support from LSC to LASO or any other legal services provider within the state if it makes choices that conflict with the LSC program integrity regulations.

B. Oregon Lacks Standing Under The Parens Patriae Doctrine

As detailed above, Oregon's only allegations of injury are generalized grievances about the probable consequences to legal services providers within Oregon as a result of conflicting state and federal policy goals. Oregon does not have standing to bring suit on behalf **[**23]** of these private parties, nor has Oregon proven it has standing under the *parens patriae* doctrine, because it has shown no independent quasi-sovereign interest.

Oregon claims a quasi-sovereign interest in regulating access to its civil justice system, alleging that this interest has been threatened by the LSC regulations. Looking beyond the fact that such an interest has never before been recognized, this court cannot accept such a claim as "an interest apart from the interests of particular private parties." *Snapp, 458 U.S. at 607*. The state's interest in the "health and well-being -- both physical and economic -- of its residents in general" is not at issue here, nor does Oregon allege that it is being "discriminatorily denied its rightful status within the federal system." *Id*. Moreover, we can see ***HN10***[] no effective way federal courts could ever limit *parens patriae* standing were a state allowed to bring suit on behalf of its citizens solely by virtue of its interest that its citizens benefit from voluntary federal grants. Allowing such cases would make the *parens patriae* doctrine "too vague to survive the standing requirements of Art. III." *Id. at 602*.

We likewise reject Oregon's attempt **[**24]** to link itself to *Bowen v. Public Agencies Opposed to Social Security Entrapment* by using the argument that, like the State in *Bowen*, Oregon's sovereignty has been diminished as a result of federal action. In *Bowen*, unlike here, the State was a party to a contract with Congress and Congress acted to breach the contract, resulting in actual injury. *477 U.S. 41, 50, 106 S. Ct. 2390, 91 L. Ed. 2d 35 (1986)*. There was therefore no question of standing, as is raised here.

CONCLUSION

Oregon has failed to allege generalized facts sufficient to show an actual injury for the purposes of establishing its standing in this case. Oregon is not directly affected by the allegedly unconstitutional LSC regulations, and is free to avoid any or all indirect effects of those regulations by simply increasing its own taxes to fund its desired policies. Oregon has also failed to show a sufficient basis for bringing suit on behalf of its citizens. Oregon has not shown a cognizable interest apart from the interests of LSC recipients who are also citizens of Oregon, and is, therefore, without standing to pursue its claims in this action. Accordingly, we VACATE the district court's dismissal of this action on the merits and REMAND with instructions **[**25]** that the action be dismissed for lack of subject matter jurisdiction. Each party shall bear its own costs.

VACATED and REMANDED, with instructions.

Freedom Holdings, Inc. v. Cuomo

United States District Court for the Southern District of New York

January 12, 2009, Decided; January 12, 2009, Filed

The Contraband Statute requires every cigarette manufacturer selling cigarettes in New York to certify annually that it is either making payments under the Master Settlement Agreement as a Participating Manufacturers or complying with the Escrow Statute as a Non-Participating Manufacturers. A manufacturer that fails to certify under the Contraband Statute is denied state tax stamps, which allow a manufacturer to sell cigarettes without incurring regulatory and monetary penalties.

Constitutional Law > ... > Case or Controversy > Standing > General Overview

HN3[] **Case or Controversy, Standing**

To establish standing to sue under Article III of the United States Constitution, a plaintiff must show that it has suffered a concrete and particularized injury that is either actual or imminent, that the injury is fairly traceable to the defendant, and that it is likely that a favorable decision will redress that injury. The gist of the question of standing is whether the plaintiffs have a sufficient stake in the outcome of the controversy to assure genuine adverseness and clear presentation of the issues at stake. In a lawsuit challenging the legality of government action, it is typically easier for a direct object of the challenged action to establish standing than it is for one alleging the unlawful regulation. of someone else. However, such a plaintiff may nonetheless establish standing by demonstrating that the response of third parties to the challenged regulation threatens or causes an injury to the plaintiff, and that judgment for the plaintiff will redress the injury caused by third parties responding to the regulation.

Antitrust & Trade Law > Clayton Act > Claims

Constitutional Law > ... > Case or Controversy > Standing > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > Injunctions

HN4[] **Clayton Act, Claims**

In addition to establishing Article III of the United States Constitution standing, a plaintiff seeking an injunction pursuant to § 16 of the Clayton Act, *15 U.S.C.S. § 26*, must allege threatened loss or damage of the type the antitrust laws were designed to prevent and that flows from that which makes defendants' acts unlawful. The antitrust standing analysis is more flexible and less demanding for claims for injunctive relief than it is for those seeking money damages, because one injunction is as effective as 100, and. 100 injunctions are no more effective than one.

Antitrust & Trade Law > Sherman Act > Jurisdiction

HN5[] **Sherman Act, Jurisdiction**

A two-step analysis determines whether a state statute is preempted: First, a plaintiff must show that the statute creates a scheme that would be a per se violation of the Sherman Act if arranged privately, and second, a plaintiff must show that the state action doctrine of Parker v. Brown does not immunize the statute from preemption.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN6[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

To establish a per se antitrust violation arising from a state statute, a plaintiff must show that the statute mandates or authorizes conduct that necessarily constitutes a violation of the antitrust laws in all cases, or places irresistible pressure on a private party to violate the antitrust laws in order to comply with the statute. Federal antitrust laws preempt state laws authorizing or compelling private parties to engage in anticompetitive behavior. Only authorized or compelled practices that have a pernicious effect on competition and lack. any redeeming virtue" are deemed per se antitrust violations.

Antitrust & Trade Law > Sherman Act > Jurisdiction

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN7[] **Sherman Act, Jurisdiction**

A court must find that a state is guilty of a per se antitrust violation before evaluating whether redemptive purpose exempts it from application of federal ***antitrust law***.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN8[] **Public Enforcement, State Civil Actions**

The Midcal-Parker test provides that a state statute is exempt from antitrust preemption if (i) the restraint in question is clearly articulated and affirmatively expressed as state policy, and (ii) the policy is actively supervised by the state itself.

Constitutional Law > ... > Commerce Clause > Interstate Commerce > General Overview

HN9[] **Commerce Clause, Interstate Commerce**

The *Commerce Clause* empowers Congress to regulate Commerce. among the several States. *U.S. Const. art. I, § 8, cl. 3*. In its dormant application, it limits a state's power to take actions impacting interstate commerce. The *Commerce Clause* limits state regulatory power in three ways. First, a state law is per se invalid if it clearly discriminates against interstate commerce in favor of intrastate commerce. Second, under the Pike balancing test, a state law is invalid if it is nondiscriminatory but imposes a burden on interstate commerce incommensurate with the local benefits secured. Third, a state law is invalid if it has the practical effect of controlling commerce occurring entirely outside the state's borders. However, a state law is not invalid under the *Commerce Clause* if its only out-of-state impact is to elevate the price of goods in interstate commerce.

Constitutional Law > ... > Commerce Clause > Interstate Commerce > General Overview

HN10[] **Commerce Clause, Interstate Commerce**

A state law that has the practical effect of regulating commerce occurring wholly outside that State's borders is invalid under the *Commerce Clause*.

Opinion by: ALVIN K. HELLERSTEIN

Opinion

[*686] **OPINION AND ORDER GRANTING JUDGMENT DISMISSING COMPLAINT**

ALVIN K. HELLERSTEIN, U.S.D.J.:

In 1998, after many years of frustrating federal, state, and private litigation, the attorneys general of forty-six States entered **[*687]** into a Master Settlement Agreement with the major cigarette companies. The New York Supreme Court, reviewing the settlement, found that it went "well beyond what could have been achieved in plaintiffs' fondest dreams for the result after a protracted and risky trial," and that it "painstakingly accommodates the public interest" by compensating the State for past and future public health expenditures caused by cigarette smoking, while discouraging future cigarette consumption. *New York v. Philip Morris, Inc., 179 Misc. 2d 435, 686 N.Y.S.2d 564, 569 (N.Y. Sup. Ct. 1998)*, aff'd, *263 A.D.2d 400, 693 N.Y.S.2d 36 (N.Y. App. Div., 1st Dep't 1999)*.

Ten years have passed since the Master Settlement Agreement became effective. In that time, New York has reaped substantial benefits from it, consistent with the public purposes that animated the settlement. Most prominently, **[**3]** the State has received nearly $ 7.7 billion in compensation for health care costs, while the number of cigarettes sold each year in the United States has declined by 24%, from 484.5 cigarettes sold in 1997 to 365.8 billion cigarettes sold in 2007.

This lawsuit began in 2002, almost seven years ago. It has been to the Court of Appeals twice, resulting in three opinions. I expressed my views of the probable merits in largely denying Plaintiffs' motion for a preliminary injunction. Since then, and after remand from the Court of Appeals, the parties presented a full record to me and moved for judgment pursuant to *Fed. R. Civ. P. 52*. At my request, the parties supplemented the record at a three-day evidentiary hearing. I have now heard all relevant arguments, and issue this decision as a final determination of the issues.

Based on the supplemented record, the three opinions issued in this case by the Court of Appeals, and my own findings and conclusions issued in an opinion and order dated September 14, 2004, I hold as follows:

1. Plaintiffs have failed to show that the Master Settlement Agreement and its implementing legislation restrain the ability of non-participating cigarette manufacturers **[**4]** to compete.

2. Plaintiffs have failed to show that the Master Settlement Agreement and its implementing legislation violate the *Commerce Clause of the United States Constitution*.

3. Plaintiffs have failed to show that New York's Allocable Share Release amendment restrains competition or violates the *Commerce Clause*.
4. Plaintiffs have suffered no injury to their business or property, actual or threatened.
5. Plaintiffs are entitled to no legal or equitable relief.

Accordingly, for the reasons discussed in this opinion, I grant judgment to Defendants, dismissing the case against them, and dissolve the preliminary injunction that I previously granted.

I. The Prior Proceedings

At the outset of this case, I dismissed the Complaint, ruling that it failed to allege a legally sufficient claim for relief under either the federal antitrust laws or the *Commerce Clause of the United States Constitution*. Order of May 15, 2002. The Court of Appeals affirmed my ruling as to the *Commerce Clause* claim, but reversed my ruling as to the antitrust claim and ordered that portion of the Complaint reinstated on remand. *357 F.3d 205 (2d Cir. 2004)* (Freedom Holdings I), reh'g denied & opinion revised, *363 F.3d 149 (2d Cir. 2004)* **[**5]** (Freedom Holdings II). After remand and discovery, Plaintiffs moved for a preliminary injunction against enforcement of the Master Settlement Agreement and **[*688]** its implementing legislation in New York. I denied most of the motion, but enjoined the effectiveness of the recent Allocable Share Release amendment to the New York Public Health Law. *447 F. Supp. 2d 230 (S.D.N.Y. 2004)* (Freedom Holdings III). The Court of Appeals affirmed, holding that Plaintiffs had failed to show irreparable injury, except as regards the Allocable Share Release amendment. *408 F.3d 112 (2d Cir. 2005)*.

After the second remand, Plaintiffs moved to amend the Complaint to add a count alleging a *Commerce Clause* violation. I allowed the amendment because the Court of Appeals had recently reversed the dismissal of a similar *Commerce Clause* claim in *Grand River Enters. Six Nations, Ltd. v. Pryor, 425 F.3d 158, 169-73 (2d Cir. 2005)*.

At the close of discovery, both Plaintiffs and Defendants moved for summary judgment pursuant to *Fed. R. Civ. P. 56* or judgment pursuant to *Fed. R. Civ. P. 52*. I agreed to decide the case as if after a bench trial pursuant to *Rule 52*. After arguments, presentation of evidence, and submissions **[**6]** of updated economic data, I now deliver my findings and conclusions on a complete record.

In addition, I have reviewed, de novo, the extensive factual record before me in Freedom Holdings III, as reintroduced and supplemented to support the present motions. Except as specifically indicated below, I adhere to and incorporate here the findings and conclusions of Freedom Holdings III.

II. Summary of the MSA

In Freedom Holdings III, I presented an extensive summary of the MSA, its interconnecting provisions, and its purposes and applications. *447 F. Supp. 2d at 233-42*. As the parties have pointed out no error, I need not repeat that analysis in fresh detail. I incorporate it by reference, as the basis of this decision as well, and offer an abridged description here.

The Master Settlement Agreement ("MSA") resolved massive litigation brought by the Attorneys General of forty-six states (including New York), the District of Columbia, and several territories, against the four largest cigarette manufacturing and marketing companies, Philip Morris, Inc., R.J. Reynolds Tobacco Co., Brown & Williamson Tobacco Co., and Lorillard Tobacco Co. [1] The States alleged that cigarette smoking had caused them **[**7]** to incur billions of dollars in Medicaid and other public health costs, and sought recovery of those costs and injunctive relief to reduce future damage. They reached an agreement with the companies and entered into the MSA on November 23, 1998. The MSA required the four major cigarette companies, designated "Original Participating Manufacturers," or OPMs, to make substantial payments to the States pursuant to several formulas, immediately and over time. Collectively, they were to pay about $ 2.4 billion in the first year and about $ 225 billion over the next twenty-five years. In exchange, the States surrendered past, present, and future tobacco-related claims against the OPMs. The MSA contemplated that the OPMs would meet their payment obligations by increasing the prices of their cigarettes, thereby reducing future public cigarette consumption. The amount owed by each OPM would be adjusted annually to account for inflation and changes in the OPMs' relative **[*689]** market shares. See *Freedom Holdings III, 447 F. Supp. 2d at 234-35*.

In approving the settlement, the New York Supreme Court found that the MSA achieved New York's most important goals when it first filed suit. *New York v. Philip Morris, 686 N.Y.S.2d at 568*. Most plainly, the MSA compensated New York for past public health expenditures while promising a revenue stream to pay for future care. In addition, by charging more for cigarettes, the OPMs promoted the public health by discouraging present smokers from continuing and potential smokers from beginning. The MSA's other provisions also advanced the same public health goal by banning advertising and sales of cigarettes to minors, requiring greater disclosure of the health effects of tobacco and nicotine, and requiring the OPMs to fund educational and clinical programs that publicize and treat the health consequences of smoking. [2] The MSA "goes well beyond what could have been achieved in plaintiffs' fondest dreams for the result after a protracted and risky trial," the New York Supreme Court concluded, "and . . . painstakingly accommodates the public interest." *Id. at 569*; see *N.Y. Pub. Health Law § 1399-nn(5)*.

The MSA encouraged other cigarette companies to participate in the settlement as "Subsequent Participating Manufacturers," or SPMs. It provided a "grandfathered" benefit to companies that joined the MSA within sixty days of November 23, 1998, its execution date. These grandfathered SPMs incur payment obligations only if their share of the total cigarette market exceeds the greater of their 1998 share or 125% of their 1997 share. Those payment obligations, like those of SPMs that joined the MSA after the sixty day period, are determined according to an arithmetical formula that results in payments similar to those required of OPMs. [3] Together, the OPMs and SPMs are designated "Participating Manufacturers," or PMs.

---

[1] Philip Morris is now a wholly-owned subsidiary of Altria Group, Inc. Brown & Williamson and R.J. Reynolds have since merged, forming a new parent, Reynolds American, **[**8]** Inc.

[2] Indeed, the New York Supreme Court noted that litigation, or even legislation, could **[**9]** not have achieved some aspects of the MSA, like the OPMs' waiver of their *First Amendment* advertising and lobbying rights. *New York v. Philip Morris, 686 N.Y.S.2d at 568 & 569 n.6*; see *Freedom Holdings III, 447 F. Supp. 2d at 250*.

[3] The annual payment obligations of grandfathered SPMs and non-grandfathered SPMs are calculated differently. See MSA Art. IX(i). If a grandfathered SPM's sales increase, it pays a portion of the total SPM adjusted base payment (which is a volume-adjusted **[**10]** version of the total OPM base payment). This portion is determined by dividing the increase in the grandfathered SPM's market share by the current aggregate market share of OPMs. Thus:

The States and the OPMs anticipated that the design of the MSA was vulnerable to the actions of companies that chose not to join it, designated "Non-Participating Manufacturers," or NPMs. If NPMs could sell cigarettes at prices that did not reflect the settlement burden assumed by PMs, the entire structure of the MSA would be defeated, and the fundamental goal of reducing cigarette consumption would be frustrated. To solve this problem, the MSA provided for States to adopt legislation known as "Escrow Statutes," which **[*690]** require NPMs to make payments into state-specific **[**11]** escrow accounts that are somewhat less than, but roughly equivalent to, the payments required by PMs. These payments prevent NPMs from taking advantage of the MSA by significantly undercutting PMs on price, and assure the States that funds will be available to pay damages if the States prevail in lawsuits against NPMs. ***HN1***[] See *N.Y. Pub. Health Law § 1399-nn(6)* ("It is thus in the interest of the state to require that [NPMs] establish a reserve fund to guarantee a source of compensation and to prevent such manufacturers from deriving large, short-term profits and then becoming judgment-proof before liability may arise."). Thus, the Escrow Statutes preserve the MSA and the public health benefits that it sought to foster.

If a State fails to enact or "diligently enforce" an Escrow Statute, it exposes itself to the MSA's "NPM Adjustment" provision, which can reduce OPMs' MSA payments. MSA Art. IX(d). If the OPMs prove that they collectively lost market share to the NPMs, that the MSA was a "significant factor" in that loss, and that the State in issue failed to enact or diligently enforce an Escrow Statute, the OPMs can reduce their payments by three times the amount of market share loss over **[**12]** 2%. MSA Art. IX(d)(1). To date, no NPM adjustment has been granted, although The Brattle Group, the firm tasked with making the "significant factor" determination, concluded in 2003, 2004, and 2005 that the MSA had been a "significant factor" in the OPMs' loss of market share. See Pl. Exh. 362, P 228. The Brattle Group's determination, however, must be paired with an arbitrator's finding that a State failed to "diligently enforce" its Escrow Statute, which has yet to occur.

In 2001, to aid enforcement of its Escrow Statute, New York passed its Contraband Statute. *N.Y. Tax Law §§ 480-b*, *481(1)(c)*, *1846*. ***HN2***[] The Contraband Statute requires every cigarette manufacturer selling cigarettes in New York to certify annually that it is either making payments under the MSA as a PM or complying with the Escrow Statute as an NPM. A manufacturer that fails to certify under the Contraband Statute is denied state tax stamps, which allow a manufacturer to sell cigarettes without incurring regulatory and monetary penalties.

The PMs deposit their annual payments into a national escrow account, from which each State receives its "allocable share." This share, fixed in the MSA, generally represents the State's **[**13]** proportional burden of past and future damages. *Freedom Holdings III, 447 F. Supp. 2d at 236*; see MSA Exh. A. Initially, Escrow Statutes provided that NPMs could claim a refund of their annual escrow payment to the extent that the amount they paid exceeded the State's allocable share of total national payments. This Allocable Share Release provision allowed NPMs to reduce their overall obligations by concentrating their sales within a single State or a few States, thereby becoming entitled to refunds from the States and lowering their marginal escrow payments significantly below the costs incurred by OPMs. For example, if an NPM sold cigarettes only in New York, which has an allocable share of 12.76%, it could receive a credit for all per-cigarette payments under New York's Escrow Statute that exceed 12.76% of its total sales, despite selling 100% of its cigarettes in the State.

The States, including New York, began to repeal the Allocable Share Release provisions of their Escrow Statutes, thereby eliminating the yearly refunds. In Freedom Holdings III, I enjoined New York from repealing its Allocable Share Release provision. See *N.Y. Pub. Health Law § 1399-pp*, **[*691]** as amended, 2003 N.Y. **[**14]** Laws 666, eff. Oct. 15, 2003. I was concerned, given the paucity of market data, that the repeal could "jeopardize the ability of the NPMs to compete with the SPMs and OPMs," and I considered that more experience was needed. *447 F. Supp. 2d at 246*. Since then, every MSA State but one has likewise amended its Escrow Statute to preclude any yearly recovery of escrowed funds, to prevent market leveraging by regional NPMs at the expense of PMs.

(current market share) -- (greater of 1998 market share or 125% of 1997 market share) current aggregate market share of OPMs

A non-grandfathered SPM also pays a portion of the total SPM adjusted base payment, but regardless of whether its market share increased, remained flat, or decreased. This portion is determined by dividing its actual market share (not just the increase) by the current aggregate market share of OPMs. See MSA Art. IX(i)(4).

III. Developments Since *Freedom Holdings III*

In this section, I present new developments and updated data from the four years since my decision in Freedom Holdings III. PricewaterhouseCoopers, the independent auditor appointed under the MSA, charts the annual tax costs of cigarettes from reports of federal excise taxes paid by manufacturers and sellers of cigarettes, as well as U.S. Customs data. Freedom Holdings III presented the relevant data, comparative statistics among OPMs, SPMs, and NPMs, which the parties have extended through 2007. See *447 F. Supp. 2d at 238*.

The updated reports reveal that the payment structure of the MSA does not favor the major cigarette companies over those companies that either did not join the MSA, or joined the MSA **[**15]** at some later date. See Table 1. The OPMs continue to pay more per carton ($ 5.31 in 2007), including payments to the four previously settled states, than do the non-grandfathered SPMs ($ 5.07), and both pay more than NPMs pay under the Escrow Statutes ($ 5.02). Grandfathered SPMs, viewed in isolation, have the lowest average payment obligation ($ 2.63), since they pay nothing for cigarettes sold up to their grandfathered threshold (the greater of their 1998 market share or 125% of their 1997 market share). However, for sales beyond this threshold, grandfathered SPMs pay about what non-grandfathered SPMs pay ($ 5.07), which is more than NPMs pay. Tr. 257-58, 276-77; [4] see Def. Exh. E, tbl. 3; Def. Exh. H, tbl. 3.

The reports also reveal that the MSA, as intended by the States, has produced a secular decrease in cigarette consumption. See Table 2. Both the total volume of annual cigarette sales and the volume of cigarettes sold annually by the OPMs have decreased steadily since the MSA's inception. The total number of cigarettes sold fell from 484.5 billion cigarettes in 1997 to 365.8 billion cigarettes **[**16]** in 2007, a decline of about 24%. Def. Exh. E, tbl. 1.

Finally, the reports reveal that the competitive dominance of the major cigarette companies has slipped significantly over the life of the MSA. See Table 2. In 1997, the OPMs controlled 97.1 % of the market, but their share fell to 85.9% in 2002 and has remained steady since then. Sales by SPMs represented 8.8% of the market in 2007, a drastic increase from their 2.5% share of the market in 1997. NPMs' share of the market rose from 0.4% in 1997 to a peak of 8.1 % in 2003, but declined somewhat to 5.4% in 2007. [5]

In 2007, New York was due about $ 905 million under the MSA. From all PMs, from 1999 through 2008, New York has received nearly $ 7.7 billion under the MSA. Tr. 261-65; see Def. Exh. F, tbl. 6.

[*692] In sum, the updated data offer no evidence that the MSA has either favored the OPMs or prejudiced the NPMs competitively. SPMs and NPMs continue to compete vigorously with **[**17]** OPMs for market share. Together, they have accumulated market share at the expense of the OPMs, which controlled 97.1 % of the market in 1997, but only 85.9% in 2007. NPMs controlled 0.4% of the cigarette market in 1997 and now control 5.4% of the market. Moreover, these market statistics understate NPM sales because many NPMs sell cigarettes through the Internet or Indian reservations to avoid federal excise tax collection, and such sales exist outside PricewaterhouseCoopers's data. Tr. 239-40, 317-18, 364-65.

10 For 1997, 1998, and 1999, the figures for grandfathered SPMs include all such companies, regardless of when they joined the MSA.

---

[6] Def. Exh. E, tbl. 3.

[7] This column represents the average payment for all cigarettes sold by grandfathered SPMs--that is, sales both below and above the grandfathered threshold.

[8] For cartons sold above the SPMs' grandfathered thresholds, the marginal per-carton payment was $ 5.07 in 2007, matching **[**18]** the average per-carton payment of non-grandfathered SPMs. <u>See</u> Def. Exh. H, tbl. 3.

[9] Def. Exh. W, tbl. 1 a; Def. Exh. E, tbl. 1.

11 Theodore Martens of PricewaterhouseCoopers testified that his firm derives the data in this column by subtracting OPM and SPM volume totals from the total market volume as determined from federal excise tax data, ince PricewaterhouseCoopers is not authorized to access tax data for NPMs. Tr. 270-71.

IV. Discussion

A. Standard for Judgment

Both sides move on the complete record for judgment pursuant to *Rules 52* and *56 of the Federal Rules of Civil Procedure*, **[**19]** asking me to resolve such factual issues as I may find, treating the record as equivalent to that produced by a bench trial. Because both sides represent that they have presented all relevant evidence, because no questions of credibility require live testimony, and because expert witnesses testified at my request to clarify ambiguous points, I gave my consent. Therefore, this opinion presents my findings of fact and conclusions of law as if after a full trial.

B. Standing

HN3[] To establish standing to sue under Article III of the United States Constitution, a plaintiff must show "that it has suffered a concrete and particularized injury that is either actual or imminent, that the injury is fairly traceable to the defendant, and that it is likely that a favorable decision will redress that injury." *Massachusetts v. EPA, 549 U.S. 497, 127 S. Ct. 1438, 1453, 167 L. Ed. 2d 248 (2007)* (citing *Lujan v. Defenders of Wildlife, 504 U.S. 555, 560-61, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992))*. The "gist of the question of standing" is whether the plaintiffs have a sufficient stake in the outcome of the controversy to assure genuine adverseness and clear presentation of the issues at stake. Id.; see also *Baker v. Carr, 369 U.S. 186, 204, 82 S. Ct. 691, 7 L. Ed. 2d 663 (1962)*. In a lawsuit challenging **[**20]** the legality of government action, it is typically easier for a direct object of the challenged action to establish standing than it is for one alleging the "unlawful regulation . . . of *someone else*." *Lujan, 504 U.S. at 561-62*. However, such a plaintiff may nonetheless establish standing by demonstrating that the response of third parties to the challenged regulation threatens or causes an injury to the plaintiff, and that judgment for the plaintiff will redress the injury caused by third parties responding to the regulation. Id.; see *Allen v. Wright, 468 U.S. 737, 757-66, 104 S. Ct. 3315, 82 L. Ed. 2d 556 (1984)*.

HN4[] In addition to establishing Article III standing, a plaintiff seeking an injunction pursuant to *§ 16* of the Clayton Act, *15 U.S.C. § 26*, must "allege threatened loss or damage 'of the type the antitrust laws were designed to prevent and that flows from that which makes defendants' acts unlawful.'" *Cargill, Inc. v. Monfort of Colo., Inc., 479 U.S. 104, 109-13, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)* (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977))*. The antitrust standing analysis is more flexible and less demanding for claims for injunctive relief than it is for those seeking money damages, because "one injunction **[**21]** is as effective as 100, and . . . 100 injunctions are no more effective than one." *Id. at 111 n.6* (quoting *Hawaii v. Standard Oil Co., 405 U.S. 251, 261, 92 S. Ct. 885, 31 L. Ed. 2d 184 (1972))*; see also *Daniel v. Am. Bd. of Emergency Med., 428 F.3d 408, 443-44 (2d Cir. 2005)*; *Consol. Gold Fields PLC v. Minorco, S.A., 871 F.2d 252, 257-60 (2d Cir. 1989)*.

Plaintiff Freedom Holdings, Inc. ("Freedom Holdings") imports cigarettes manufactured abroad for resale to a Native American distributor in Salamanca, New York that does not affix tax stamps pursuant **[*694]** to New York's Contraband Statute. Accordingly, Freedom Holdings has never sold cigarettes tax-stamped pursuant to that law or made escrow payments pursuant to New York's Escrow Statute. See *N.Y. Tax Law §§ 480-b*, *481(1)(c)*, *1846*; *N.Y. Pub. Health Law § 1399-nn-pp*. Freedom Holdings claims that it wants to market and sell its Image brand cigarettes through other distributors in New York, and that it will do so if it prevails in this case.

Plaintiff International Tobacco Partners, Ltd. ("ITP") imports Cobra brand cigarettes from International Masis Tabac, an Armenian manufacturer, for resale to direct buying wholesalers in New York. ITP has opened an escrow account in New **[**22]** York on behalf of International Masis Tabac, and deposits the statutory escrow payments into that account. International Masis Tabac has declared that ITP bears responsibility for such payments, and thus is entitled to any funds released pursuant to New York's Allocable Share Release provision, although ITP sells only a fraction of its total sales volume in New York and has not sought any release of funds.

Plaintiffs seek a declaratory judgment that the MSA and its implementing legislation, the Escrow and Contraband Statutes, violate the *Commerce Clause of the U.S. Constitution*, § 1 of the Sherman Act, and § 16 of the Clayton Act. *U.S. Const. art. I, § 8*; *15 U.S.C. §§ 1*, *26*. Plaintiffs also seek a permanent injunction against enforcement of New York's Escrow and Contraband Statutes, along with fees and costs. See *N.Y. Pub. Health Law § 1399-nn-pp*; *N.Y. Tax Law §§ 480-b*, *481(1)(c)*, *1846*. Plaintiffs do not seek money damages. Second Suppl. & Am. Compl. PP 93-102 & Prayer for Relief.

The MSA and Escrow and Contraband Statutes impose obligations on manufacturers and licensed, tax-stamping wholesalers, but they do not directly obligate Plaintiffs, who are distributors and importers. See *N.Y. Pub. Health Law §§ 1399-nn-pp*; **[**23]** *N.Y. Tax Law §§ 480-b*, *481(1)(c)*, *1846*. Defendants argue that Plaintiffs therefore lack Article III standing to assert their claims. However, Plaintiffs' inability to sell cigarettes without making statutory escrow payments, directly or indirectly, satisfies the constitutional requirement of an injury in fact. This injury is redressible because an injunction against operation of the challenged statutes would allow Plaintiffs to sell cigarettes without making the allegedly anticompetitive and illegal escrow payments. See, e.g., *Lujan, 504 U.S. at 561-62*. The causal connection between the challenged state action and Plaintiffs' injury is sufficiently direct and non-speculative. Therefore, Plaintiffs have satisfied their burden to demonstrate standing under Article III.

Plaintiffs also have standing to sue for an injunction pursuant to § 16 of the Clayton Act. *15 U.S.C. § 26*. If Plaintiffs were seeking damages under *§ 4 of the Clayton Act*, arguing that the MSA creates an anticompetitive cartel that reduces output to charge higher prices, they would lack antitrust standing. Though such conduct would violate the law, Plaintiffs would benefit, not suffer, from both higher market prices and **[**24]** the chance to undersell members of the cartel to capture new market share. See *Matsushita Elec. Indus. Corp. v. Zenith Radio Corp., 475 U.S. 574, 583, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*. However, Plaintiffs seek injunctive relief, for which the standing inquiry is more flexible, reflecting greater concern for the public interest and reduced risk of duplicative recovery. See *Minorco, 871 F.2d at 260 n.6*. Plaintiffs allege that New York passed the Escrow and Contraband Statutes to further its agreement with the four **[*695]** major manufacturers to punish NPMs for competing with members of the MSA cartel. Because allegations of "[l]osses inflicted by a cartel in retaliation for an attempt . . . to compete" constitute a valid antitrust claim, Plaintiffs have established standing to sue under the Sherman and Clayton Acts. *Hammes v. AAMCO Transmissions, Inc., 33 F.3d 774, 783 (7th Cir. 1994)*; see also *Volvo N. Am. Corp. v. Men's Int'l Prof 'l Tennis Council, 857 F.2d 55, 67-68 (2d Cir. 1988)*.

C. Sherman Act Preemption

In Freedom Holdings I, the Court of Appeals held that Plaintiffs had stated a legally sufficient claim for relief that the Sherman Act, *15 U.S.C. § 1*, preempts New York's Escrow and Contraband Statutes. It explained **[**25]** that ***HN5***[] a "two-step analysis" determines whether a state statute is preempted: First, a plaintiff must show that the statute creates a scheme that would be a "per se violation" of the Sherman Act if arranged privately, and second, a plaintiff must show that the state action doctrine of *Parker v. Brown, 317 U.S. 341, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*, does not immunize the statute from preemption. *Freedom Holdings I, 357 F.3d at 222-23*. Accepting the allegations of the Complaint as proved, the Court of Appeals held that the MSA reflects an agreement among private parties, aided and abetted by the States, to create a scheme for market control, that the scheme "mandates or authorizes conduct" or "places irresistible pressure" on parties to violate the antitrust laws, and that such conduct "in all cases" constitutes a "per se violation" of the Sherman Act. [12] It further held that Parker immunity was

---

[12] Accepting as proved the Complaint's allegation that the challenged statutes grant regulatory power to private actors, the Court of Appeals ruled that the Escrow and Contraband Statutes were not merely unilateral acts of state government, but "hybrid restraint[s]" vulnerable to preemption by the federal antitrust laws. *Id. at 223*; see *324 Liquor Corp. v. Duffy, 479 U.S. 335, 345-46 n.8, 107 S. Ct. 720, 93 L. Ed. 2d 667 (1987)*.

unavailable because New York had neither "clearly articulated" the "legitimate state policy goals" behind the MSA nor "actively supervised" the mechanisms that advance those goals to minimize "unnecessary anticompetitive effects." Id.; see *Cal. Retail Liquor Dealers Ass'n v. Midcal Aluminum, Inc., 445 U.S. 97, 105, 100 S. Ct. 937, 63 L. Ed. 2d 233 (1980)*. **[**26]** Accordingly, the Court of Appeals concluded that Plaintiffs had stated a legally sufficient claim for relief that the Sherman Act preempts the Escrow and Contraband Statutes.

I hold, based on my findings of fact and conclusions of law in Freedom Holdings III, and informed by renewed consideration of my legal analysis and updated data presented by the parties at an evidentiary hearing to clarify ambiguities, that Plaintiffs have failed to prove that the MSA and its implementing legislation in New York constitute a per se violation of the Sherman Act. I also hold that the *Parker* state action doctrine immunizes the Escrow and Contraband Statutes from Sherman Act preemption.

1. Per Se Violation

In Freedom Holdings III, I noted that the caselaw has developed two different understandings of what constitutes **[**27]** a per se violation of the antitrust laws. *447 F. Supp. 2d at 248-52*. The first understanding examines the restraint and its effects in the context of any redeeming social benefits, while the second looks only to the abstract character of the restraint. I concluded that Plaintiffs had not shown a likelihood of success on their antitrust preemption claim under either understanding. At a minimum, Plaintiffs must show that the MSA and its implementing legislation **[*696]** frustrate competition in the cigarette market. The Supreme Court has held that, ***HN6***[] to establish a per se antitrust violation arising from a state statute, a plaintiff must show that the statute "mandates or authorizes conduct that necessarily constitutes a violation of the antitrust laws in all cases, or . . . places irresistible pressure on a private party to violate the antitrust laws in order to comply with the statute." *Rice v. Norman Williams Co., 458 U.S. 654, 661, 102 S. Ct. 3294, 73 L. Ed. 2d 1042 (1982)*; see *324 Liquor Corp. v. Duffy, 479 U.S. 335, 345 n.8, 107 S. Ct. 720, 93 L. Ed. 2d 667 (1987)* ("[F]ederal antitrust laws pre-empt state laws authorizing or compelling private parties to engage in anticompetitive behavior."). Only authorized or compelled practices that have a "pernicious effect **[**28]** on competition and lack . . . any redeeming virtue" are deemed per se antitrust violations. *Rice, 458 U.S. at 659 n.5*.

In their Second Supplemental and Amended Complaint, Plaintiffs allege that the MSA creates, and the Escrow and Contraband Statues enforce, an illegal output cartel engaged in market division and price-fixing. They argue that the MSA discourages the OPMs comprising the cartel from gaining market share relative to each other by increasing their payment obligations if they do so. Allegedly, the MSA thereby encourages OPMs to raise prices beyond the level necessary to accommodate their payment burdens, because they know that the other OPMs will follow their price increases rather than gain market share. Thus, Plaintiffs conclude that the OPMs can amass a fund for advertising and marketing that overwhelms the NPMs' ability to compete. The States, Plaintiffs allege, sponsor this scheme and protect the OPMs' market dominance because they reap enormous sums from annual payments under the MSA. Accordingly, Plaintiffs claim that the Escrow and Contraband Statutes bind the NPMs into a market in which they cannot compete. [13] Accepting the allegations as proved, the Court of Appeals **[**29]** found that Plaintiffs had "sufficiently alleged a per se violation of the Sherman Act" because the MSA, as described in the Complaint, is a "naked restraint on competition, albeit one subject to erosion by NPMs." *Freedom Holdings I, 357 F.3d at 226*.

The proofs do not sustain Plaintiffs' allegations. The MSA and the Escrow and Contraband Statutes neither inhibit competition nor lack redeeming virtue. See *Rice, 458 U.S. at 659 n.5*. The proofs reveal that the NPMs have retained pricing autonomy and gained substantial market share at the expense of the OPMs, and that ample evidence of the MSA's redeeming public health virtues belies any anticompetitive design.

---

[13] The Court of Appeals summarized Plaintiffs' allegations: "[T]he combination of the MSA, the Escrow Statutes, and the Contraband Statutes, allows OPMs to set supracompetitive prices that effectively cause other manufacturers either to charge similar prices or to cease selling. . . . NPMs are forced to charge these prices to cover the costs imposed by the Escrow and Contraband Statutes or go out of business in New York." *Freedom Holdings I, 357 F.3d at 226*.

The proofs do not show a "pernicious effect on competition" caused by the MSA **[**30]** and the Escrow and Contraband Statutes. See id. To the contrary, they show plainly that NPMs like Plaintiffs have not suffered any competitive injury as a result of the MSA. Since 1999, the NPMs have competed vigorously to increase their share of the domestic cigarette market from 0.4% in 1997 to 5.4% in 2007. Over the same term, the market share of the OPMs has declined from 97.1 % to 85.9%. These trends have occurred in a market whose total **[*697]** volume has contracted from 484.5 billion to 365.8 billion cigarettes sold annually, a contraction in sales and consumption that has advanced the public heath aims of the States considerably. [14] In Freedom Holdings I, the Court of Appeals considered that, by measuring PMs' payment obligations by their relative market shares, the MSA discourages growth and natural competition. The data, however, reveal that neither NPMs nor SPMs have acted as if discouraged.

The fact that NPMs have not suffered competitively, but rather prospered, over the life of **[**31]** the MSA is unsurprising because nothing in the MSA or its implementing legislation hinders NPMs in relation to PMs. The payment structure compelled by the MSA and the Escrow Statutes has not disadvantaged NPMs. Indeed, the proofs show that NPMs have actually paid less per carton ($ 5.02 in 2007) than have their competitors ($ 5.31 for OPMs, $ 2.63 with a marginal rate of $ 5.06 for grandfathered SPMs, and $ 5.07 for non-grandfathered SPMs). See *N.Y. Pub. Health Law § 1399-pp(2)* (fixing flat rate of $ 0.0188482 per cigarette). These figures undermine the argument that "NPMs are deterred from seeking increased market share because the high costs of compliance with the Escrow Statute preclude their competing through lower prices." *Freedom Holdings II, 363 F.3d at 152*; see *KT&G Corp. v. Att'y Gen. of Okla., 535 F.3d 1114, 1133 (10th Cir. 2008)* ("In light of the fact that [OPMs, SPMs, and NPMs] all face roughly the same per-cigarette cost under either the MSA or the allocable share amendment, there is no indication that they will avoid increasing their own market share, nor is there any suggestion that they will not unilaterally make their own pricing and output decisions."). Nonetheless, **[**32]** Plaintiffs argue that the MSA disfavors NPMs because OPMs and SPMs may deduct their MSA payments from their income taxes, but NPMs may not similarly deduct their payments to state escrow funds. Those PMs, however, may not recover their payments once made, while NPMs receive annual interest earnings on escrowed funds and will recover, after twenty-five years, any funds not applied to judgments or settlements with the States. Alternatively, NPMs may become eligible to deduct their payments by disclaiming their rights to interest income and reversion of principal. *Freedom Holdings III, 447 F. Supp. 2d at 259*; see *Int'l Tobacco Partners, Ltd. v. Kline, 475 F. Supp. 2d 1078, 1083 n.8 (D. Kan. 2007)*. Thus, I found in Freedom Holdings III that nothing in the MSA or the Escrow and Contraband Statutes imposes a relative tax hardship on NPMs. Plaintiffs have offered no evidence to cause me to change my mind.

Many NPMs have joined the MSA, even as non-grandfathered SPMs. But Plaintiffs have presented no reason to infer from this trend that the MSA particularly burdens NPMs. No evident economic force drives NPMs to the MSA. NPMs that become SPMs pay no less to the States than what they paid under **[**33]** the Escrow and Contraband Statutes, and by joining the MSA they subject themselves to upward payment adjustments tied to any gain in market share. It is true that grandfathered SPMs pay the least per carton of all manufacturers, but, as I explained in Freedom Holdings III, they pay more than NPMs pay for each successive cigarette they produce, and it is that marginal **[*698]** cost, not the average cost, that drives manufacturers' pricing decisions. See *447 F. Supp. 2d at 257-58*. In his testimony, Professor Jonathan Gruber explained the basic microeconomics principle of marginal cost pricing to maximize a firm's profits, and stated that, in the competitive cigarette industry, a manufacturer will price its products at or above its marginal cost, not its average cost, for each unit produced. Tr. 325-31. Gruber further testified that there is no reason why a cigarette manufacturer, whether OPM or grandfathered SPM, would price its product below its marginal cost of production, even if that manufacturer is a member of a cartel. Tr. 337-38. The "increased marginal costs to the SPMs above the grandfathered levels can be viewed as a means of recouping those funds which were lost to the states through **[**34]** the grandfather provision." *Freedom Holdings III, 447 F. Supp. 2d at 258*. Thus, whatever benefit an SPM such as Liggett Group or Commonwealth Brands enjoys due to the grandfathering provision is not reflected in its pricing decisions, and so has no bearing on marketplace

---

[14] Plaintiffs also contend that the decline in cigarette consumption began before the MSA, but no one can say that the MSA did not provide a major impetus to cause the decline to continue and accelerate.

competition. Grandfathered SPMs make the same per-carton payment on marginal sales above their grandfathered thresholds as non-grandfathered SPMs make on every carton they sell, and that payment exceeds the escrow payment required of NPMs. [15] The MSA attracts NPMs by offering certainty, not shelter from market forces, as SPMs gain immunity from potentially devastating future litigation with the States. By contrast, NPMs have chosen to accept uncertainty and the benefit of lower payment obligations under the Escrow and Contraband Statutes, including the potential recovery of some or all of their escrow payments.

The MSA has not caused Plaintiffs or other NPMs to surrender pricing autonomy. Through the testimony of Christopher Nelson, Chief Financial Officer of Freedom Holdings, and Jeffrey Avo Uvezian, President of ITP, Plaintiffs concede that their pricing decisions are made independently and that they are not compelled to follow price leadership by their larger competitors. Tr. 109-10; Nelson Dep. 180-81. Likewise, Kevin Altman, who set prices for two NPMs, CigTec and JJA Distributors **[**36]** LLC, testified that both companies made independent pricing decisions that were not dictated by OPMs or SPMs. Tr. 87-88. The aggregate historical data of SPM and NPM market shares, reproduced above, support this testimony. Under the MSA and the Escrow and Contraband Statutes, the OPMs exercise no power, direct or indirect, over the cigarette prices charged by NPMs. Indeed, independent NPMs have taken competitive advantage of higher prices charged by the large cigarette manufacturers. Only the Escrow Statutes impact NPMs' cost structure. See *KT&G Corp., 535 F.3d at 1129, 1133*; *Sanders v. Brown, 504 F.3d 903, 911 (9th Cir. 2007)* ("Nothing . . . **[*699]** forces the NPMs to either peg their prices to those of participating manufacturers, or to refrain altogether from entering the market.") In essence, Plaintiffs allege that New York violates the antitrust laws by compelling NPMs to make payments to escrow funds that they would prefer not to make. This unhappiness, however, does not amount to an antitrust injury. Plaintiffs' grievance parallels that of any manufacturer against a flat tax, which entails the same compulsion, and New York has unquestioned authority to impose such a tax on all cigarette **[**37]** manufacturers. *Freedom Holdings I, 357 F.3d at 229*; see *Freedom Holdings II, 363 F.3d at 152*.

Further, Plaintiffs offer no evidence to support their theory that the MSA has stifled the OPMs' motivation to compete with each other on price. As Plaintiffs recognize, the OPMs, by raising prices beyond the level dictated by their MSA payments, expose themselves, even on their premium product lines, to market erosion by NPMs that sell nearer to their marginal cost, after accounting for escrow payment obligations. Second Suppl. & Am. Compl. PP 25-26. The parties disagree on the extent of price elasticity and brand salience in the cigarette market, but the data show, and Plaintiffs concede, that cigarette consumers respond to differences in price. As Plaintiffs assert, "the differential in wholesale prices between the fourth-tier cigarettes sold by NPMs . . . and the premium brands is now $ 17/carton." Id. P 46 n.4. NPMs may wield fewer resources for marketing and advertising than PMs and lack the economies of scale of the larger PMs. But NPMs can exploit any disproportionate price increase by PMs by selling cigarettes at lower prices, and have done so vigorously to the NPMs' market advantage. **[**38]** See Tr. 96, 125; see also *Sanders, 504 F.3d at 911* ("If the OPMs really are charging artificially high prices, and thus making artificially high profits, an NPM conceivably could compete on price by charging a 'normal' price and still make a 'normal' profit, even taking the escrow payment into account."). Thus, "apportionment [of market share] among OPMs is an internal matter which does not affect the ability of NPMs to compete in any material way." *Freedom Holdings III, 447 F. Supp. 2d at 257*.

I found in Freedom Holdings III, and I find again, that the States did not intend to create a scheme for market control in favor of the four major cigarette companies that became the OPMs, or in favor of any other cigarette companies.

[15] The Court of Appeals credited Plaintiffs' argument that the MSA's SPM payment formula penalizes SPMs that gain market share from OPMs, which allegedly compels SPMs to follow OPM price increases to avoid gaining market share at their expense. *Freedom Holdings II, 363 F.3d at 153*. It is true that the denominator **[**35]** of the ratio used in the formula causes the collective market position of the OPMs to affect what an individual SPM must pay, and that, as a result, if an SPM's share of the total market increases, the increase in the amount that it must pay is not directly proportional to its increase in market share, especially if the aggregate total market share of OPMs decreases in the same year. See *Freedom Holdings III, 447 F. Supp. 2d at 235-36*. However, the proofs show that SPMs target the "deep discount" market, and so would be unlikely to follow OPM price increases. See Tr. 94. Moreover, even if SPMs did follow OPM price increases, doing so would create a market opportunity for NPMs, not a competitive disadvantage.

Plaintiffs have presented no proof of such a purpose. The MSA contemplated that PMs would increase their prices, but such increases are consistent with the redeeming social purpose of deterring consumption and sales of cigarettes. The Escrow and Contraband Statutes, and, more recently, the Allocable Share Release amendments, have forced NPMs also to raise their prices for the same redeeming social purpose, to prevent the MSA from being destroyed, and to assure that **[**39]** future lawsuits by the States against the NPMs will not be frustrated by those companies' financial irresponsibility.

As I found in Freedom Holdings III, the States intended that their settlement with the four major tobacco companies have important social benefits, namely, reduction of tobacco consumption, restriction of tobacco advertising and marketing, and transfer of cigarette-induced health care costs from the States to the tobacco companies themselves. The New York Supreme Court, in approving the settlement between New York and the OPMs, found that the MSA achieved the State's critical objectives, more fully than if the lawsuit had gone to judgment. *New York v. Philip Morris, 686 N.Y.S.2d at 568-69*. The **[*700]** Court articulated these objectives in its findings: an injunction against cigarette sales to minors and advertisements targeting minors, greater disclosure of the health effects of tobacco and nicotine, and funding of educational and clinical programs that publicize and treat the health consequences of cigarette smoking. Id. It concluded:

> [T]he MSA adequately protect[s] the public interest . . . . [T]he economic and noneconomic benefits for New York State are substantial [and] are **[**40]** consistent with and advance the objectives of New York public policy as set forth in the amended complaint."

Id. at 568. Indeed, the massive flow of funds from the PMs has substantially contributed to the financial welfare of the settling States; between 1999 and 2008, New York alone received nearly $ 7.7 billion. As for the Escrow Statute, the New York Legislature elaborated on the state policy behind the MSA in its findings and explained how the Escrow Statute furthers that policy:

> It is the policy of the state that financial burdens imposed on the state by cigarette smoking be borne by tobacco product manufacturers rather than by the state to the extent that such manufacturers either determine to enter into a settlement with the state or are found culpable by the courts. . . . It would be contrary to the policy of the state if [NPMs] could use a resulting cost advantage to derive large, short-term profits in the years before liability may arise without ensuring that the state will have an eventual source of recovery from them if they are proven to have acted culpably.

N.Y. Pub. Health Law § 1399-nn(4), *(6)*.

I found at the preliminary injunction stage, *Freedom Holdings III, 447 F. Supp. 2d at 250*, **[**41]** and I find again on the basis of a full and complete record, that the States intended the MSA and the Escrow and Contraband Statutes not as "naked restraints on trade," but as means of achieving important public health goals and substantial fiscal benefits. In Freedom Holdings I, the Court of Appeals accepted Plaintiffs' allegations as if proved, for it was reviewing a motion to dismiss pursuant to *Fed. R. Civ. P. 12(b)*. However, Plaintiffs have failed to prove the allegations of their Complaint, and thus the foundation for the Court of Appeals' rulings does not exist. Plaintiffs have presented no credible proof that the MSA has created a cartel favoring participating cigarette manufacturers. Nor have they presented proof that the NPMs have suffered, or are likely to suffer, any antitrust injury.

I found in Freedom Holdings III, and I find again, that the MSA does not "mandate[] or authorize[] conduct that necessarily constitutes a violation of the antitrust laws in all cases, or . . . place[] irresistible pressure on a party to violate the antitrust laws in order to comply with the statute." *447 F. Supp. 2d at 251* (quoting *Rice, 458 U.S. at 661*). The continued strength of NPMs proves **[**42]** as much, and the absence of financial pressure on NPMs to join the MSA confirms it. Nothing in the Escrow or Contraband Statutes mandates or authorizes "illegal conduct in all cases," an essential ingredient of a per se antitrust violation. Id.; see *KT&G Corp., 535 F.3d at 1132-33*; *Tritent Int'l Corp. v. Kentucky, 467 F.3d 547, 557 (6th Cir. 2006)* (analyzing Freedom Holdings I and finding Kentucky statutes implementing the MSA not preempted by Sherman Act). The analogy to per se violations of the antitrust laws does not fit, as the proofs show neither anticompetitive effect nor lack of redeeming social purpose. See *Rice, 458 U.S. at 659 n.5*. Therefore, **[*701]** adhering to my findings and conclusions of law in Freedom Holdings III respecting Plaintiffs' antitrust claims, I hold that Plaintiffs have failed to establish that the MSA's terms, along with those of the Escrow and Contraband Statutes, constitute a per se violation of § 1 of the Sherman Act.

2. *Parker* State Action Immunity

Because I find no per se antitrust violation, I need not address whether New York's legislation is preempted by federal ***antitrust law***. See *Parker, 317 U.S. at 341* (holding that ***HN7***[] a court must find that a state is guilty **[**43]** of a per se antitrust violation before evaluating whether redemptive purpose exempts it from application of federal ***antitrust law***); see also *Rice, 458 U.S. at 662 n.9*. However, I assume for purposes of Parker analysis that Plaintiffs have proved a per se violation, see *Freedom Holdings I, 357 F.3d at 226*, and I will proceed on that assumption to analyze each prong of the Midcal-Parker test. See *Cal. Regional Liquor Dealers Ass'n v. Midcal Aluminum, Inc., 445 U.S. 97, 100 S. Ct. 937, 63 L. Ed. 2d 233 (1980)*. ***HN8***[] This test provides that a state statute is exempt from antitrust preemption if "(i) the restraint in question is 'clearly articulated and affirmatively expressed as state policy,' and (ii) the policy is 'actively supervised' by the state itself." *Freedom Holdings I, 357 F.3d at 205* (quoting *Midcal, 445 U.S. at 105*). The Court of Appeals, assuming Plaintiffs' allegations as proved, held that the Escrow and Contraband Statutes do not qualify for Parker immunity because New York fails to satisfy both the "articulation" and "supervision" prongs. *Id. at 226-32*. It suggested, however, that failure to satisfy the first prong would not by itself preclude immunity, thus focusing the inquiry on whether New York actively supervises **[**44]** the workings of the MSA. *Freedom Holdings II, 363 F.3d at 156*.

The proofs make clear that New York satisfies both prongs. As I found in Freedom Holdings III, and as I find again, New York has clearly articulated its reasons for entering into the MSA and how the MSA's features advance its goals, and New York, through the yearly reporting mechanisms required by the MSA and the neutral analysis and reporting functions performed by PricewaterhouseCoopers, has actively supervised the MSA to assure that it continues to achieve its purposes without anticompetitive consequences.

Midcal requires, as its first prong, that New York "act in furtherance of legitimate state policy goals and [that] its acts must have a plausible nexus to those goals." *Freedom Holdings II, 363 F.3d at 156*. On the basis of the pleadings, the Court of Appeals held that New York had not explained how the provisions of the MSA, such as those linking OPM payment obligations to their market shares, actually further the public health. *Freedom Holdings I, 357 F.3d at 229-30*. The proofs make clear, however, that which the Court of Appeals failed to find. Because of higher cigarette prices, provoked by the substantial payments **[**45]** made by the cigarette companies to the States, cigarette sales have fallen by 24%, from 484.5 billion cigarettes in 1997 to 365.8 billion cigarettes in 2007. The 97.1% oligopoly enjoyed by the four major cigarette companies that were the OPMs in 1997 has been reduced to 85.9% in 2007, and smaller cigarette companies have entered and thrived in the market. New York alone, of the forty-six states that settled with the cigarette companies, has received nearly $ 7.7 billion from the PMs, and the potential for more from the many escrow accounts created for NPMs. In short, the purposes endorsed by the New York Supreme Court have come **[*702]** to pass. See *New York v. Philip Morris, 686 N.Y.S.2d at 568*. The MSA has brought about a substantial reduction in cigarette consumption and substantial reimbursements to the States for the public costs of cigarette consumption, all without adversely impacting non-participating manufacturers. New York has ensured, by implementing legislation pursuant to the MSA, that these beneficial achievements are not corrupted by allowing NPMs to sell cigarettes at prices unburdened by any payment obligation, and potentially to dodge liability by closing up shop and selling **[**46]** elsewhere. As I held in *Freedom Holdings III, 447 F. Supp. 2d at 260-61*, New York has articulated reasonable goals, linked to its public health needs, and its redeeming public purpose is inconsistent with a finding of a per se antitrust violation.

Likewise, the proofs show "active supervision" by New York sufficient to meet the second *Midcal* prong. The MSA provides for an auditing mechanism that requires PricewaterhouseCoopers to collect statistical information about cigarette manufacturer sales, costs, and market share and to report that information to the States and the public. Through this data, New York has closely tracked the actual workings of the MSA, including the competitive effects of the MSA regime. New York has also conducted detailed oversight through capturing the data produced by the Contraband Statute of all NPM sales in New York. See *N.Y. Tax Law §§ 480-b*, *481(1)(c)*, *1846*.

By this statistical oversight, New York has satisfied the requirements for *Parker* immunity. Since the statistics make clear that the MSA has not proven to be anticompetitive, there has been no requirement that New York intervene to prevent a cartelization of the market. Nor has there been any indication **[**47]** of price collusion, for, as all the NPM witnesses testified, cigarette pricing is autonomously and independently made, with higher than necessary pricing by the majors creating opportunities for smaller, independent cigarette sellers. Unlike the statute challenged in Midcal, which involved explicit price-fixing, see *Midcal, 445 U.S. at 100-01*, the statutes challenged here have not interfered with competition. The MSA has served legitimate health and welfare objectives without handicapping NPMs or creating any anticompetitive effects. Accordingly, I find that New York has satisfied both prongs of the Midcal-Parker state action immunity test.

D. The Injunction Against the Allocable Share Release Amendment

In Freedom Holdings III, I preliminarily enjoined New York from enforcing an amendment to the Allocable Share Release provision of its Escrow Statute. *447 F. Supp. 2d at 264-65*; see *N.Y. Pub. Health Law § 1399-pp*, as amended, 2003 N.Y. Laws 666, eff. Oct. 15, 2003. Informed by further briefing and evidence, I now deny Plaintiffs' request for a permanent injunction and dissolve the preliminary injunction.

Under the MSA, New York's allocable share, in relation to all other States that settled **[**48]** with the OPMs, is about 12.76%. New York receives that proportion of funds paid by all PMs annually. In contrast, New York receives a fixed amount from NPMs making escrow payments under its Escrow Statute, $ 0.0188482 (in 2007 and subsequent years) for each cigarette actually sold, or imported into, the State. *N.Y. Pub. Health Law § 1399-pp(2)(a)(v)*. However, because of the Allocable Share Release provision ("ASR"), *§ 1399-pp(2)(b)(ii)*, NPMs are entitled to a credit to the extent that the funds paid into escrow exceed New York's allocable share **[*703]** of all escrow payments made by the NPM into the escrows of all States. The ASR thus allows an NPM that concentrates its sales in one or a few states to offset by credit most of its escrow obligations, gaining a major competitive advantage over the OPMs and other PMs that market nationally. [16]

The OPMs complained of this undue competitive advantage, and sought refund or credit against their payments, invoking the NPM Adjustment provisions of the MSA. As described above, those provisions reduce the payments **[**49]** due by PMs by three times the amount of market share loss over 2%, if the PMs prove a collective loss of market share to NPMs, that the MSA was a "significant factor" in that loss, and that the State in issue failed to enact or diligently enforce an Escrow Statute. MSA Art. IX(d). An independent study conducted by The Brattle Group found in favor of the OPMs, concluding that "MSA disadvantages were a significant factor contributing to the Market Share Loss in 2005," as well as in prior years. Pl. Exh. 362, P 228. The States nonetheless maintained that no NPM Adjustment was appropriate because the States had effectively legislated to prevent the NPMs from undercutting the MSA. One such preventative measure was an amendment to the Escrow Statutes intended to prevent NPMs from abusing ASRs. This Allocable Share Release amendment, also known as an ASR repealer, allowed release of escrowed funds only at the close of the twenty-five year term or when necessary to pay judgments or settlements: NPMs could no longer obtain a yearly credit of funds paid into escrow to the extent that they exceed the State's allocable share.

In Freedom Holdings III, reacting to New York's just-passed ASR amendment, **[**50]** and without the benefit of the proofs discussed above and at the evidentiary hearing that I conducted, I enjoined implementation of the amendment. Without a record, I was concerned about possible effects on competition and the potential for evidence that the State or the public would suffer injury.

I am persuaded, however, by the evidence and further consideration, that my injunction should be dissolved. First, though Plaintiffs have presented evidence of the financial troubles of some regional NPMs after ASR repeals, they offer no proofs to show that, in the absence of the ASR, the MSA and Escrow and Contraband Statutes constitute a per se antitrust violation. The ASR encouraged NPMs to concentrate their sales within particular States, and

---

[16] Kevin Altman, who worked for two NPMs, testified that NPMs receive their credit very soon after they make their payment into escrow. Tr. 24.

thereby to defeat the Escrow and Contraband provisions of those States' laws. The ASR repeal has canceled that encouragement, leading NPMs in some instances to engage in "state-shifting" by refocusing their sales to States yet to repeal their ASRs, and then to the Internet and Indian reservations, where sales are not subject to escrow payments. See Tr. 97-102, 364-65. The ASR repeals have reduced the degree of competitive advantage enjoyed by NPMs **[**51]** due to the MSA. See Pl. Exh. 362, PP 83-87. But Plaintiffs have not shown that the MSA without the ASR disables them from competing in the cigarette market. With or without the ASR, NPMs enjoy pricing autonomy and need not follow price hikes by OPMs, particularly price hikes that overcompensate for the MSA payment burdens. See Xcaliber Int'l Ltd. v. Edmondson, No. 04-CV-0922-CVE-PJC, 2005 U.S. Dist. LEXIS 40448, 2005 WL 3766933, at *2 (N.D. Okla. Aug. 31, 2005) ("[A]ll cigarette manufacturers, even under the cost constraints imposed by the MSA and the Allocable **[*704]** Share Amendment, have choices as to price and output, and . . . make their decisions as to these issues unilaterally."); see also *Int'l Tobacco Partners, Ltd. v. Beebe, 420 F. Supp. 2d 989, 997 (W.D. Ark. 2006)*. With or without the ASR, NPMs have ample incentive to compete for market share and ample opportunity to do so, as their escrow payments, even if unrecoverable in the short term, are no more debilitating than the corresponding payments required of PMs. With or without the ASR, NPMs pay less per carton under the Escrow Statutes than the OPMs and non-grandfathered SPMs pay, and less per carton than the grandfathered SPMs pay for each marginal carton **[**52]** produced above their grandfathered thresholds. Just as Plaintiffs fail to show that NPMs suffer a special hardship compared to other manufacturers under the MSA as originally conceived, they fail to show that NPMs will suffer a special hardship under an MSA that denies them the ASR's yearly recovery of funds. See *KT&G Corp., 535 F.3d at 1128-29*.

Second, the ASR amendment furthers New York's aims in signing the MSA by protecting the State against the impact on public health costs of a disproportionate inundation of cigarette sales within the State. The public welfare purpose of the MSA is enhanced by repealing the ASR, which discourages NPMs from concentrating sales in particular States at the expense of the public health and welfare of such States, and ensures that such States, including New York, are compensated for every cigarette sold in the State. With my preliminary injunction in place, New York retains in escrow only 12.76% of any individual NPM's per-cigarette payments, regardless of whether that NPM sells 12.76%, 50%, or 100% of its cigarettes in New York. Likewise, with the injunction in place, New York is assured compensation for 12.76% of the total damage to the public health **[**53]** caused by that NPM, regardless of whether that NPM caused 12.76%, 50%, or 100% of its total damage in New York. The injunction creates an incentive for cigarette manufacturers to disseminate their product and its ruinous consequences within the State while recompensing the State's citizens only incompletely for the injury they sustain. By dissolving the preliminary injunction, I allow New York to join the vast majority of other States that have removed the ASR from their Escrow Statutes so as better to fulfill the purposes of the litigation that the MSA resolved.

The Centers for Disease Control and Prevention estimates that, in 2002, New York incurred $ 149.70 per carton in productivity costs related to smoking, as well as $ 57.00 per carton in cigarette-related Medicaid costs. [17] The ASR amendment requires all NPMs to pay their fair share of these costs without hindering them competitively against the PMs. Accordingly, I find by a preponderance of the credible evidence that, even after repeal of New York's Allocable Share Release provision, the MSA and Escrow and Contraband Statutes do not constitute a per se violation of the Sherman Act. No permanent injunction is justified, and the **[**54]** preliminary injunction is dissolved.

F. *Commerce Clause* Claim

HN9[] The *Commerce Clause* empowers Congress to "regulate Commerce . . . among the several States." *U.S. Const. art. I, § 8, cl. 3*. In its "dormant application," it limits "a state's power to take **[*705]** actions impacting interstate commerce." *Freedom Holdings I, 357 F.3d at 216*. The *Commerce Clause* limits state regulatory power in three ways. First, a state law is per se invalid if it clearly discriminates against interstate commerce in favor of intrastate commerce. Id. Second, under the "Pike balancing test," a state law is invalid if it is nondiscriminatory but

[17] Polishook Decl., Exh. G, at 11. Because these figures suggest that cigarettes represent a per-stick net drain on the public fisc, they undercut the notion that New York's "goals of serving public health and enhancing revenue conflict." Contra *Freedom Holdings I, 357 F.3d at 230*.

"imposes a burden on interstate commerce incommensurate with the local benefits secured." Id. (quoting Nat'l Elec. Mfrs. Ass'n v. Sorrell, 272 F.3d 104, 108 (2d Cir. 2001)); see Pike v. Bruce Church, Inc., 397 U.S. 137, 142, 90 S. Ct. 844, 25 L. Ed. 2d 174 (1970). Third, a state law is invalid if it has the "practical effect" of controlling **[**55]** commerce occurring entirely outside the state's borders. Freedom Holdings I, 357 F.3d at 216 (citing Healy v. The Beer Inst., 491 U.S. 324, 336, 109 S. Ct. 2491, 105 L. Ed. 2d 275 (1989)). However, a state law is not invalid under the Commerce Clause if its only out-of-state impact is to elevate the price of goods in interstate commerce. Id. at 220 (noting that "upstream pricing impact" alone does not violate Commerce Clause).

In Freedom Holdings I, the Court of Appeals rejected all of Plaintiffs' arguments that the Contraband Statutes implementing the MSA violate the dormant Commerce Clause. It held that Plaintiffs had failed to show that the Contraband Statutes have a "disparate impact on interstate commerce," as required by both the discrimination and Pike balancing test theories. Id. at 218. Likewise, under the extraterritoriality analysis, the Court held that Plaintiffs had failed to show that the Contraband Statutes "regulat[e] commerce occurring wholly outside the borders of New York" or have the "practical effect of control[ing] conduct beyond the boundaries of the State." Id. at 219. The Court found that the Commerce Clause, which "protects against inconsistent legislation arising from the projection of one state **[**56]** regulatory regime into the jurisdiction of another State," id. at 220 (quoting Healy, 491 U.S. at 337), had no reason to protect against the MSA, "a universal and practically uniform national system of payments by tobacco companies to states." Id. at 220 n.13. Plaintiffs argued that the Contraband Statutes regulate out-of-state commerce by fostering "artificially high prices" in the chain of distribution of cigarettes destined for New York, but the Court of Appeals found that effect to be "no more than the upstream pricing impact of a state regulation," noting that "out-of-state actors . . . remain free to conduct commerce on their own terms, without either scrutiny or control by New York State." Id. at 220-21. The Court of Appeals observed, from the relevant Supreme Court precedents, that the Dormant Commerce Clause was offended by state statutes that purported specifically to regulate out-of-state pricing decisions, or in-state pricing decisions that were required to relate to out-of-state prices. Id. at 221; see Healy, 491 U.S. at 326 (statute requiring seller to certify that in-state prices are no higher than any out-of-state prices); Brown-Forman Distillers Corp. v. N.Y. State Liquor Auth., 476 U.S. 573, 575-76, 106 S. Ct. 2080, 90 L. Ed. 2d 552 (1986) **[**57]** (statute forbidding distiller to change out-of-state prices after posting in-state price); Baldwin v. G.A.F. Seelig, Inc., 294 U.S. 511, 55 S. Ct. 497, 79 L. Ed. 1032 (1935) (statute banning resale of out-of-state milk purchased at price below in-state minimum price). By contrast, the Escrow and Contraband Statutes set no particular price for in-state sales and mandate no relationship whatever between in-state and out-of-state cigarette prices.

I allowed Plaintiffs to amend the Complaint to reassert a Commerce Clause **[*706]** claim in light of Grand River Enters. Six Nations, Ltd. v . Pryor, 425 F.3d 158 (2d Cir. 2005), which the Court of Appeals decided one year after Freedom Holdings I. In Grand River, the Court, ruling on the allegations of the complaint and not on the proofs, reversed the District Court and ordered that the plaintiffs could lawfully claim that the Escrow Statutes "limit, burden and regulate directly interstate commerce wholly outside the respective states." Id. at 170 (citations omitted). The Court noted that, while the Freedom Holdings I complaint had identified as an extraterritorial effect price increases in the distribution chain of cigarettes sold to New York retailers, the Grand River complaint **[**58]** more broadly alleged a "uniform system of regulation that results in higher prices nationwide." Id. at 171. The Court of Appeals ruled that the plaintiffs had "successfully stated a possible claim that the practical effect of the challenged statutes and the MSA is to control prices outside of the enacting States by tying both the SPM settlement and NPM escrow payments to national market share, which in turn affects interstate pricing decisions." Id. at 173. In so holding, the Court stressed that it "[took] no position as to the ultimate viability of the dormant commerce clause claim," having accepted as true the facts alleged in the complaint and drawn all reasonable inferences in favor of the plaintiffs. Id.

On remand, the District Court denied the plaintiffs' request for a preliminary injunction, finding that they were not likely to succeed on any of their claims, including the dormant Commerce Clause claim. Grand River Enters. Six Nations, Ltd. v. Pryor, No. 02 Civ. 5068 (JFK), 2006 U.S. Dist. LEXIS 35614, 2006 WL 1517603, at *8-*10 (S.D.N.Y. May 31, 2006) ("Even if . . . the amount of an escrow refund 'is, in part, keyed to the amount an NPM would have paid if it had joined the MSA as an SPM[,]'. . . Grand **[**59]** River has not shown that this scheme may result in interstate price control.") (quoting Grand River, 425 F.3d at 172). Distinguishing the MSA and its implementing statutes from those defeated in price-parity cases like Healy and Brown-Forman, Judge Keenan emphasized that the New York legislation "neither makes cigarette prices or escrow payments in a particular State dependent on prices or escrow payments in other States, nor does it have any effect on price or escrow payments by NPMs in other states." 2006 U.S. Dist. LEXIS 35614, [WL] at *9; see also Int'l Tobacco Partners v. Kline, 475 F. Supp. 2d at 1089-92.

In the instant case, Plaintiffs, having copied the Grand River complaint, allege that the statutes implementing the MSA were intended to create, and have created, a uniform system of regulation that has resulted in higher prices nationwide for domestic cigarettes. Second Suppl. & Am. Compl. PP 97-102. They argue that New York's Escrow Statute controls out-of-state cigarette prices because the escrow payment that an NPM makes to New York depends, in part, on what the NPM would owe New York as an SPM, which depends in turn on the national market shares of the SPMs, which derive in part from the pricing of cigarettes **[**60]** sold outside New York. Plaintiffs reason that the MSA and New York Escrow and Contraband Statutes therefore violate the principle of Healy and are invalid under the dormant Commerce Clause.

In Healy, the Supreme Court reaffirmed its "established view that **HN10**[] a state law that has the 'practical effect' of regulating commerce occurring wholly outside that State's borders is invalid under the Commerce Clause." 491 U.S. at 332 (quotations omitted); see Freedom Holdings I, 357 F.3d at 219. The price affirmation statute in Healy required retailers **[*707]** to affirm that their in-state prices were no higher than prices charged in any other state, thereby imposing in-state consequences for out-of-state commercial decisions. The statute's practical effect was to project one state's regulatory regime into other states:

> The short-circuiting of normal pricing decisions based on local conditions would be carried to a national scale if a significant group of States enacted contemporaneous affirmation statutes that linked in-state prices to the lowest price in any State in the country. This kind of potential regional and even national regulation of the pricing mechanism for goods is reserved by the Commerce Clause **[**61]** to the Federal Government and may not be accomplished piecemeal through the extraterritorial reach of individual state statutes.

Healy, 491 U.S. at 340. Discussing Healy in Freedom Holdings I, the Court of Appeals warned that it invalidates only "regulation" or "control" of out-of-state commerce. Mere "upstream pricing impact" is not a violation of the dormant Commerce Clause, even if the impact is felt out-of-state where the stream originates. Freedom Holdings I, 357 F.3d at 220.

Plaintiffs in this case show no more than upstream pricing impact, if that. There has been no showing that mandated escrow payments by NPMs in New York affect the retail price of cigarettes elsewhere in the nation. NPMs make escrow payments in New York as security to satisfy judgments or settlements in litigation with New York. The Allocable Share Release provision does nothing to regulate, restrict, or control out-of-state behavior of NPMs or SPMs. "Each NPM or SPM must make its own unilateral decision with respect to price and output, and no state agent has the power to dictate the prices or outputs of any cigarette manufacturer." Grand River, 2006 U.S. Dist. LEXIS 35614, 2006 WL 1517603 at *9. [18] The phenomenon of a nationwide increase **[**62]** in cigarette prices following the advent of the MSA resulted, not from the "extraterritorial reach" of any one State's statute, but because many States enacted similar statues. [19] See Healy, 491 U.S. at 332. New York exerts no control, actual or "practical," over the price of cigarettes in any other State. See id.

As the Court of Appeals held in Freedom Holdings I, Plaintiffs must show more than the fact that New York's legislation indirectly affects out-of-state cigarette prices. They must show that commercial actors outside New York

---

[18] NPM witnesses in this case testified to the same effect, that their prices were set internally and not dictated by OPM or SPM prices. Tr. 87-88, 109-10.

[19] One commentator suggests that the coordinated, nationally-oriented character of state action resulting from the MSA might raise constitutional concerns under the Interstate Compact Clause, U.S. Const. art. I § 10, cl. 3; see generally Michael S. Greve, Compacts, Cartels, and Congressional Consent, 68 Mo. L. Rev. 285 (2003). The claim is not before me, and at least one court of appeals has rejected it. See Star Scientific, Inc. v. Beales, 278 F.3d 339, 360 (4th Cir. 2002).

are bound in some way by the **[**63]** dictates of New York statutes. *Freedom Holdings I, 357 F.3d at 221*. Because they have not made such a showing, I hold that Plaintiffs have failed to prove that the MSA and Escrow and Contraband Statutes are invalid under the dormant *Commerce Clause*.

V. Conclusion

Plaintiffs have shown no injury to their business or property, actual or threatened. They have failed to show that the Master Settlement Agreement and the Escrow and Contraband Statutes of New York are **[*708]** anticompetitive under the Sherman Act or invalid under the *Commerce Clause of the U.S. Constitution*, either before or after the Allocable Share Release amendment. The preliminary injunction against enforcement of New York's Allocable Share Release amendment is dissolved.

The Clerk shall terminate the motions (Docs. # 144 & # 160) and enter judgment for Defendants.

SO ORDERED.

Dated: January 12, 2009

New York, New York

/s/ Alvin K. Hellerstein

ALVIN K. HELLERSTEIN

United States District Judge

Omnicare, Inc. v. UnitedHealth Group, Inc.

United States District Court for the Northern District of Illinois, Eastern Division

January 16, 2009, Decided; January 16, 2009, Filed

No. 06 C 6235

Reporter

594 F. Supp. 2d 945 *; 2009 U.S. Dist. LEXIS 3170 **; 2009-1 Trade Cas. (CCH) P76,612

OMNICARE, INC., Plaintiff, v. UNITEDHEALTH GROUP, INC., PACIFICARE HEALTH SYSTEMS, INC., and RxSOLUTIONS, INC. d/b/a PRESCRIPTION SOLUTIONS, Defendants.

Subsequent History: Affirmed by *Omnicare, Inc. v. Unitedhealth Group, Inc., 2011 U.S. App. LEXIS 495 (7th Cir. Ill., Jan. 10, 2011)*

Prior History: *Omnicare, Inc. v. UnitedHealth Group, Inc., 524 F. Supp. 2d 1031, 2007 U.S. Dist. LEXIS 74983 (N.D. Ill., 2007)*

Core Terms

negotiations, contracts, e-mail, conspiracy, pharmacy, merger agreement, merger, network, due diligence, parties, Provider, Patient, entities, genuine issue of material fact, enrollees, merging, plans, terms, coordinated, stalking, argues, horse, sponsors, unjust enrichment, summary judgment, reimbursement rate, contends, prescription drug, form contract, Disclosure

LexisNexis® Headnotes

Civil Procedure > ... > Summary Judgment > Supporting Materials > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN1[] **Summary Judgment, Supporting Materials**

Summary judgment is appropriate when the pleadings, the discovery and disclosure materials on file, and any affidavits show that there is no genuine issue as to any material fact and that the movant is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(c)*.

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

HN2[] **Summary Judgment, Evidentiary Considerations**

Unlike a motion to dismiss, a motion for summary judgment requires the opposing party to present evidence showing a genuine issue for trial. *Fed. R. Civ. P. 56(e)*. A genuine issue of material fact exists where the evidence is such that a reasonable jury could return a verdict for the nonmoving party.

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

Evidence > Inferences & Presumptions > Inferences

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

HN3[] **Summary Judgment, Evidentiary Considerations**

Upon a summary judgment motion, a court will draw all reasonable inferences from the evidence in favor of the nonmoving party, but the nonmoving party still bears the burden of establishing the existence of a genuine issue of material fact.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN4[] **Regulated Practices, Price Fixing & Restraints of Trade**

15 U.S.C.S. § 1 of the Sherman Act is designed to prevent business entities from entering into collusive agreements. By its terms, *§ 1* prohibits every contract, combination, or conspiracy, in restraint of trade. *15 U.S.C.S. § 1*.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

HN5[] **Sherman Act, Claims**

In the usual case, a price-fixing conspiracy exists between sellers who agree to artificially set their prices above or below market prices. Illegal agreements may also be made between buyers who conspire to establish a price below market levels, a situation often referred to as a "buyers' cartel." To establish a successful *15 U.S.C.S. § 1* claim against a buyers' cartel, a plaintiff must prove: (1) the existence of a contract, combination, or conspiracy between buyers; (2) an unreasonable restraint of trade in the relevant market; and (3) an injury caused by the cartel.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Evidence > Types of Evidence > Circumstantial Evidence

HN6[] **Regulated Practices, Private Actions**

An antitrust plaintiff can prove the existence of an agreement through direct or circumstantial evidence.

Evidence > Types of Evidence > Circumstantial Evidence

HN7[] **Types of Evidence, Circumstantial Evidence**

Direct evidence is evidence tantamount to an acknowledgment of guilt, while circumstantial evidence is everything else including ambiguous statements.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

Evidence > Types of Evidence > Circumstantial Evidence

Evidence > Inferences & Presumptions > Inferences

HN8[] **Sherman Act, Claims**

When relying on circumstantial evidence to establish the existence of a conspiracy, at least some of the evidence must tend to exclude the possibility that the alleged conspirators acted independently rather than in concert. This standard does not, however, require the plaintiff to exclude any possibility that the defendants acted independently. Rather, the standard merely establishes that conduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy. Therefore, while the plaintiff in an antitrust case faces no higher burden to defeat summary judgment than a plaintiff in another case, ***antitrust law*** does limit the range of permissible inferences from ambiguous evidence in a *15 U.S.C.S. § 1* case.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

HN9[] **Burdens of Proof, Nonmovant Persuasion & Proof**

At the summary judgment stage, merely pleading sufficient facts will not suffice to withstand a motion for summary judgment; rather, a plaintiff must make an affirmative showing of proof that a genuine issue of material fact exists that requires a trial.

Evidence > Authentication > General Overview

HN10[] **Evidence, Authentication**

Authentication of a document can be made by a witness with knowledge who testifies that a matter is what it is claimed to be. *Fed. R. Evid. 901(b)(1)*.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

Evidence > Types of Evidence > Circumstantial Evidence

HN11[] **Sherman Act, Claims**

Generally, courts will not second-guess business judgments made by a private actor. Some courts have, however, recognized that evidence that a defendant's action, if taken independently, would be contrary to its economic self-interest tends to exclude the likelihood of independent conduct and may therefore constitute circumstantial evidence in support of a Sherman Act claim sufficient to survive summary judgment.

Antitrust & Trade Law > Sherman Act > Defenses

Business & Corporate Law > ... > Management Duties & Liabilities > Fiduciary Duties > Business Judgment Rule

HN12[] **Sherman Act, Defenses**

If business judgments generally deserve judicial deference, then successful business judgments deserve even greater deference.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Evidence > Relevance > Relevant Evidence

HN13[] **Regulated Practices, Price Fixing & Restraints of Trade**

In an antitrust case, information about uncompetitive prices may be probative evidence suggesting the existence of a conspiracy.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Evidence > Types of Evidence > Circumstantial Evidence

HN14[] **Regulated Practices, Private Actions**

Where evidence requires the drawing of inferences to find the existence of a conspiracy, that evidence is actually circumstantial and must be considered under the Monsanto/Matsushita framework. Accordingly, an antitrust plaintiff must offer at least some evidence that tends to exclude the possibility of independent action.

Antitrust & Trade Law > Sherman Act > Claims

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > General Overview

HN15[] **Sherman Act, Claims**

The balance a court seeks to strike in determining when premerger discussions are anticompetitive is a sensitive one. On the one hand, courts should not allow plaintiffs to pursue Sherman Act claims merely because conversations concerning business took place between competitors during merger talks; such a standard could chill business activity by companies that would merge but for a concern over potential litigation. On the other hand, the mere possibility of a merger cannot permit business rivals to freely exchange competitively sensitive information. This standard could lead to "sham" merger negotiations, or at least allow for periods of cartel behavior when there is a substantial period of time between the signing of the merger agreement and the closing of the deal.

Evidence > Inferences & Presumptions > Inferences

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > General Overview

HN16[] **Inferences & Presumptions, Inferences**

The inference of an antitrust conspiracy is significantly weakened where it is a target who is providing information to an acquirer.

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > General Overview

HN17[] **Antitrust, Antitrust Statutes**

Once price is agreed upon and an agreement to merge is reached, further information exchanges are more difficult to justify.

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

HN18[] **Summary Judgment, Evidentiary Considerations**

A court should not take the place of the jury in weighing evidence at the summary judgment stage.

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

HN19[] **Judges, Discretionary Powers**

A district court has discretion to determine whether to exercise its supplemental jurisdiction when the original basis for federal jurisdiction has been dismissed. *28 U.S.C.S. § 1367(c)(3)*. The court's decision should be guided by the values of judicial economy, convenience, fairness, and comity.

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

Evidence > Inferences & Presumptions > Presumptions

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Pendent Claims

HN20[] **Subject Matter Jurisdiction, Supplemental Jurisdiction**

The presumption recognized by the United States Court of Appeals for the Seventh Circuit is that district courts should usually relinquish jurisdiction over state claims when the federal claims are dismissed before trial. The usual practice is to dismiss without prejudice state supplemental claims whenever all federal claims have been dismissed prior to trial. This presumption, however, does not determine every case. Relinquishment of the state claims is not mandatory. Especially when difficult and unsettled state law issues are not implicated by the pendent claims, it is entirely acceptable for a federal court to decide those claims.

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

Evidence > Inferences & Presumptions > Presumptions

HN21[] **Subject Matter Jurisdiction, Supplemental Jurisdiction**

The presumption in favor of denial of supplemental jurisdiction when all federal claims are dismissed applies most strongly when the state law is "unsettled."

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

Evidence > Inferences & Presumptions > Presumptions > Rebuttal of Presumptions

HN22[] **Subject Matter Jurisdiction, Supplemental Jurisdiction**

The United States Court of Appeals for the Seventh Circuit has identified two common scenarios where the presumption in favor of dismissal of supplemental state law claims when all federal claims are dismissed may be refuted, first, where substantial federal judicial resources have already been expended on the resolution of the supplemental claims, and second, where it is obvious how the claims should be decided.

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > General Overview

Governments > Legislation > Interpretation

HN23[] **Antitrust & Trade Law, Sherman Act**

The ***antitrust law*** of the Commonwealth of Kentucky is so similar to its federal counterpart, the Sherman Antitrust Act, and may be interpreted where appropriate with regard to federal law.

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Forum Selection Clauses

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > Forum & Place

Civil Procedure > ... > Venue > Federal Venue Transfers > General Overview

HN24[] **Contract Conditions & Provisions, Forum Selection Clauses**

Generally, when a court obtains jurisdiction over an action as the result of a transfer of venue, the choice-of-law rules of the transferring court apply. However, the Van Dusen rule is intended to prevent defendants from seeking a transfer merely to obtain more favorable choice-of-law rules. Where a forum selection clause states that a particular state's courts shall have exclusive jurisdiction over the parties, applying the Van Dusen rule would more likely allow the plaintiff to manipulate the choice-of-law rules to be applied by filing the action in a different court. Applying the usual Van Dusen rule in the face of a forum selection clause encourages forum shopping by a party seeking to avoid the application of the contractually chosen forum. Thus, when a case has been transferred by means of a forum selection clause, the choice-of-law rules of the transferee forum should govern rather than those of the transferring forum.

Contracts Law > Contract Conditions & Provisions > General Overview

Torts > Procedural Matters > Conflict of Law > General Overview

HN25[] **Contracts Law, Contract Conditions & Provisions**

Even when a choice-of-law clause in a contract lacks the breadth to encompass a related tort claim, tort claims that are dependent upon the contract are subject to a contract's choice-of-law clause. One important factor in determining whether the tort claim "depends upon" the contract is whether the claim could exist without the contract.

Torts > ... > Fraud & Misrepresentation > Actual Fraud > Elements

HN26[] **Actual Fraud, Elements**

The elements of a fraud claim in Illinois are: (1) that the defendant made a false statement of material fact, (2) the defendant knew or believed it was false, (3) the defendant intended to induce plaintiff to act, (4) the plaintiff justifiably relied on the statement, and (5) the plaintiff was injured as a result.

Torts > ... > Fraud & Misrepresentation > Actual Fraud > Elements

HN27[] **Actual Fraud, Elements**

A representation is fraudulent when, to the knowledge or belief of its utterer, it is false in the sense in which it is intended to be understood by the recipient.

Torts > ... > Concerted Action > Civil Conspiracy > Elements

Torts > Business Torts > Fraud & Misrepresentation > General Overview

HN28[] **Civil Conspiracy, Elements**

To sustain a claim for conspiracy to defraud in Illinois, a plaintiff must show: (1) a conspiracy; (2) an overt act of fraud in furtherance of the conspiracy; and (3) damages to the plaintiff as a result of the fraud.

Torts > ... > Fraud & Misrepresentation > Actual Fraud > Elements

Torts > ... > Concerted Action > Civil Conspiracy > Elements

HN29[] Actual Fraud, Elements

To state a valid conspiracy to defraud claim, plaintiffs must allege facts establishing the elements of fraud under Illinois law.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN30[] Types of Contracts, Quasi Contracts

A cause of action for unjust enrichment requires a showing that the defendant has unjustly retained a benefit to the plaintiff's detriment, and the defendant's retention of that benefit violates basic principles of justice.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN31[] Types of Contracts, Quasi Contracts

The Illinois Supreme Court has identified three situations where a defendant's retention of a benefit will be considered unjust: (1) the benefit should have been given to the plaintiff, but a third party mistakenly gave it to the defendant instead, (2) the defendant procured the benefit from a third party through some type of wrongful conduct, or (3) the plaintiff for some other reason had a better claim to the benefit than the defendant. Illinois courts do not appear to have uniformly followed this guidance, however; some courts have required a more specific showing. In short, the law of unjust enrichment in Illinois is unclear.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN32[] Types of Contracts, Quasi Contracts

Where there is a specific contract that governs the relationship of the parties, a plaintiff cannot assert a claim for unjust enrichment.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

Torts > Business Torts > Fraud & Misrepresentation > General Overview

HN33[] Types of Contracts, Quasi Contracts

When a plaintiff's particular theory of unjust enrichment is based on alleged fraudulent dealings and a court rejects the plaintiff's claims that those dealings, indeed, were fraudulent, the theory of unjust enrichment that the plaintiff has pursued is no longer viable.

Judges: REBECCA R. PALLMEYER, United States District Judge.

Opinion by: REBECCA R. PALLMEYER

Opinion

[*948] **MEMORANDUM OPINION AND ORDER**

Plaintiff Omnicare, Inc., is the nation's largest institutional pharmacy--that is, a provider of pharmacy services to persons in health care institutions. UnitedHealth Group ("UnitedHealth") and PacifiCare Health Systems, Inc. ("PacifiCare") are health insurers who provide prescription drug coverage to senior citizens under the Medicare "Part D" program. To qualify under that program, a health insurer must demonstrate to federal regulators that it can provide pharmacy services to individuals in long-term care facilities; a contract with an institutional pharmacy such as Omnicare is one way of doing so. Both UnitedHealth and PacifiCare entered into negotiations with Omnicare, and UnitedHealth signed an agreement with Omnicare before UnitedHealth was certified under the Medicare Part D program. During the same time period, UnitedHealth and PacifiCare were engaged in merger talks that culminated in a Merger Agreement between the two parties. PacifiCare **[**4]** broke off its negotiations with Omnicare a week after signing the Merger Agreement and then proceeded to obtain federal certification without Omnicare in its contract "network." PacifiCare later resumed contract talks with Omnicare, ultimately striking a deal far more favorable to it than the one UnitedHealth had achieved. Then, once the UnitedHealth-PacifiCare merger was complete, UnitedHealth abandoned its own deal with Omnicare and took advantage of the more favorable terms in PacifiCare's contract with Omnicare.

In this lawsuit, Omnicare contends that the merger violated antitrust laws and that Defendants are liable for fraud. The court denied Defendants' motion to dismiss, *see* *Omnicare, Inc. v. UnitedHealth Group, Inc., 524 F. Supp.2d 1031 (N.D. Ill. 2007)*, and the parties proceeded with discovery. Defendants now move for summary judgment on these claims and, for the reasons that follow, the motion is granted.

FACTUAL BACKGROUND

I. Medicare Part D

Medicare is a health insurance program administered by the federal government in order to provide coverage to elderly and disabled Americans. *See* *42 U.S.C. § 1395 et seq.* In 2003, Congress enacted the Medicare Prescription Drug, Improvement, **[**5]** and Modernization Act of 2003, which created a voluntary prescription drug benefit for seniors called Medicare Part D. *Pub. L. No. 108-173, 117 Stat. 2066 (2003)*. Under Part D, the Centers for Medicare & Medicaid Services ("CMS") make payments to Prescription Drug Plan ("PDP") sponsors--typically insurance providers. PDPs, in turn, pay prescription drug providers--retail and institutional **[*949]** pharmacies--for providing pharmacy services to the individuals enrolled in the PDP. *See* *42 U.S.C. § 1395w-115*. The PDP sponsors are compensated in two ways: through payments from CMS and through premiums paid by enrollees. *Id.* The prescription drug providers receive their payments pursuant to contracts with the PDP sponsors.

To participate in Part D, which went into effect on January 1, 2006, PDP sponsors were required to be approved by, and enter into a contract with, CMS. (Bagley Report P 17, App. 155 to Mem. in Supp.) CMS divided the United States into thirty-four "PDP regions," and a PDP sponsor had to be approved for each region in which it wished to operate. As part of its bid for CMS approval, a Part D sponsor needed to demonstrate that it had sufficient pharmacy providers in its network in **[**6]** the PDP region to service both retail customers and patients in long-term care facilities ("LTCs"). (3/16/05 Long-Term Care Guidance, App. 57 to Mem. in Supp.) PDPs were required to provide a list of contracts with pharmacies that serve LTCs in order to "ensure that all of [the sponsor's] future Part D enrollees who are institutionalized can routinely receive their Part D benefits through the plans' network of pharmacies" rather than through "out of network" pharmacies. (*Id.* at 4.) CMS referred to this requirement of nearby, in-network pharmacies providing services to LTC enrollees as the "convenient access" standard. (*Id.*) In addition, CMS required PDP sponsors to offer a contract to any pharmacy willing and able to participate in the sponsor's LTC network. [1] (*Id.*)

In **[**7]** 2006, 23 million out of 42 million eligible seniors participated in Medicare Part D. (Ex. A to Rubinfeld Decl. P 31, Attach. to Mem. in Opp'n.) Seniors can become enrolled in a PDP in one of two ways. First, seniors eligible for Medicare can simply choose to participate in Part D. Second, individuals who also qualify for Medicaid--another federal insurance program, one designed to provide coverage for individuals and families with low incomes--are automatically enrolled by the government. These low-income seniors, called "dual eligibles" because they are eligible for both Medicare and Medicaid, are enrolled in PDPs whose premiums are lower than an established cap set by CMS. (*Id.* P 34.) These enrollees are technically free to switch to any other plan that falls below the cost threshold established by CMS, but a number of factors--such as the physical impairment of these enrollees and bureaucratic obstacles--make this a rarely-used option. (Rubinfeld Decl. P 6(c), Attach. to Mem. in Opp'n.) Dual eligibles are fully subsidized by the federal government, which pays for both premiums and co-payments for the

[1] In addition to being certified as a PDP, insurers could also obtain certification as a Medicare Advantage Prescription Drug Plan ("MAPD"), which functions as an HMO in addition to providing prescription drugs. For 2006, 72% of Part D enrollees were enrolled in standalone PDPs, while 28% were enrolled in MAPDs. (Ex. A to Rubinfeld Decl. P 33, Attach. to Mem. in Opp'n.) Among LTC enrollees, MAPDs were even less common. (*Id.*)

drugs, and constitute up to 65% of LTC residents. (Ex. A to *id.* PP 34-35.) Overall, **[**8]** though, Omnicare concedes that all individuals living in LTCs, including both dual-eligibles and voluntary enrollees, comprise only about 3-5% of total PDP enrollees. (Mem. in Opp'n at 6 n.7.) Defendants' negotiations and resulting contracts with Omnicare, the largest LTC pharmacy in the nation, covered only LTC patients. (Omnicare's Supplemental Statement of Undisputed Material Facts PP 23, 31.)

II. Merger

UnitedHealth and PacifiCare, insurance providers who sought CMS certification as **[*950]** PDP sponsors in 2005, initiated merger discussions in January 2005. (Defs.' 56.1 P 16.) As talks between the two entities intensified in the weeks leading up to signing the Merger Agreement on July 6, they entered into two separate confidentiality agreements dictating how information deemed "confidential" or "highly confidential" was to be exchanged during the "due diligence" period. [2] (Defs.' 56.1 P 17.) Although there were some failures to comply with terms of the confidentiality agreements (Omnicare's Resp. to Defs.' 56.1 PP 17-19), the purpose for the agreements was apparent. The first confidentiality agreement, designed to protect confidential information, made that information available only to **[**9]** members of UnitedHealth's due diligence team and prevented them from sharing it with others outside that team. (Defs.' 56.1 P 17.) The second confidentiality agreement created a "clean room" for highly confidential material and permitted only members of UnitedHealth's "clean team," a subgroup of the due diligence team, to have access to the materials. (*Id.* P 18.) In addition, prior to the sharing of any information between the two parties, PacifiCare's outside antitrust counsel, Skadden, Arps, Slate, Meagher & Flom LLP ("Skadden"), developed a "data room" where Skadden attorneys reviewed all PacifiCare's documents to determine the propriety of sharing them with UnitedHealth. (*Id.* P 19.)

Although much of the due diligence process had no relationship to the companies' plans for Part D, several meetings and other exchanges of information concerning **[**10]** Part D did take place. On June 9, 2005, UnitedHealth and PacifiCare met specifically to discuss PacifiCare's Part D program. [3] (*Id.* P 22.) At the meeting, Jacqueline Kosecoff, an Executive Vice President at PacifiCare, made a presentation entitled "Part D Prescription Drug Program," which included general information regarding administrative expense estimates and information about RxSolutions, a wholly-owned subsidiary of PacifiCare responsible for negotiating contracts with pharmacies on PacifiCare's behalf. (Part D Prescription Drug Program, App. 31 to Mem. in Supp.) From Kosecoff's presentation itself and notes prepared after the meeting, it appears that no pricing information was provided in the presentation outside of an assertion that PacifiCare would follow "an aggressive pricing strategy." (*Id.;* 6/17/05 Memo, App. 26 to Mem. in Supp.) Tom Paul, a UnitedHealth official, noted in a summary prepared after the meeting that PacifiCare provided only "little information" that was "very general," and stated that, based on the meeting, "[t]here is insufficient information to draw any due diligence conclusions about this important program." (*Id.*) To that end, UnitedHealth sent PacifiCare **[**11]** a list of questions concerning Part D on June 22. (Defs.' 56.1 P 24.) In PacifiCare's response to the document, PacifiCare disclosed its "expected average **[*951]** brand discount off of AWP," [4] which was in fact the same rate that Omnicare ultimately agreed to in its contract with PacifiCare's agent, RxSolutions, in December 2005. (Part D Questions, Ex. 50 to Mem. in Opp'n, at UN008817.)

---

[2] Companies considering a merger frequently share "significant quantities of competitively sensitive information regarding their respective businesses in the course of investigatory 'due diligence'" in order for each party to determine whether the business deal makes sense. *See* ANTITRUST ADVISER § 3:74, at 3-270 (Irving Scher ed., 4th ed. 2007).

[3] The June 9 meeting included, from PacifiCare, Jacqueline Kosecoff (Executive Vice President), Greg Scott (CFO), and Chris Karkenny (official in Corporate Development); from UnitedHealth, officials included Ed Lagerstrom (head of Corporate Development), Jerry Knutson (CFO of Ovations, UnitedHealth's senior business component), Rick Jelinek (President of Ovations' Senior and Retiree Services), and Tom Paul (CEO of a UnitedHealth subsidiary). (Due Diligence Summary--Point Part D, Ex. 38 to Mem. in Opp'n; Omnicare's Resp. to Defs.' 56.1 P 23.)

[4] In the parties' submissions, the acronym "AWP" is alternatively used to refer to both an "Any Willing Provider" contract and a recognized industry rate known as "Average Wholesale Price." To avoid confusion, the court uses "AWP" only to refer to "Average Wholesale Price," **[**12]** and will write out the phrase "Any Willing Provider."

At a meeting between the parties on June 28, 2005, [5] approximately one week prior to the signing of the Merger Agreement, PacifiCare provided UnitedHealth with Part D information regarding "(1) product and distribution strategies, (2) benefit plan designs, and (3) financial assumptions," including PacifiCare's average low and average high plan pricing information from a sampling of regions. (Defs.' 56.1 P 23.) On July 2, Peter Frank, an outside actuary retained by UnitedHealth who does not appear to have formally been a member of UnitedHealth's due diligence team, met with PacifiCare officials to exchange information about the Part D program. (*Id.* P 25.) At this meeting, PacifiCare disclosed national average bid information for its Part D plans, and Frank provided corresponding information concerning UnitedHealth's Part D business. (*Id.*) The following day, Frank prepared a written summary of the meeting for UnitedHealth officials, in which he disclosed the profit margin PacifiCare expected in its Part D bids. (7/5/05 e-mail from Frank to Jelinek, App. 41 to Defs.' 56.1.) Frank also emphasized that his report was lacking in many specifics, **[**13]** including the names of the PacifiCare officials with whom Frank met "in case [the UnitedHealth officials receiving the report] may know any of them." (*Id.*) Frank further emphasized that "no information on regional bids or on distribution of expected enrollment by region is available. What you see [in the report] is most of what we have." (*Id.*) Frank also noted that he "prepared the report quickly under some time pressure to get a copy to the lawyers so that any potential competitively sensitive info could be removed from the report." [6] (*Id.*) Edward Lagerstrom, the head of UnitedHealth's Corporate Development at the time of the merger, agreed that UnitedHealth received limited information, stating in his deposition that UnitedHealth "wanted to be absolutely clear that [PacifiCare's PDP was not] going to lose a lot of money, but I did not need to see the long-term care contracts, particularly given that our antitrust attorney said that we could not see them. So we did not see them." (Lagerstrom Dep. at 218:8-14, App. 22 to Mem. in Supp.)

On July 6, 2005, the two parties signed the Agreement and Plan of Merger ("Merger Agreement"), which announced UnitedHealth's planned purchase of PacifiCare for approximately $ 8.8 billion. (Defs.' 56.1 P 6.) Section 5.01 of the Merger Agreement prohibits PacifiCare from entering into any contracts before the consummation of the merger, other than those entered into in the ordinary course of business, "without [UnitedHealth's] prior written consent . . . that involves [PacifiCare] **[*952]** or any of its Subsidiaries incurring a liability in excess of three million dollars." (Merger Agreement § 5.01(a)(x), Ex. 72 to Mem. in Opp'n.) The December 2005 contract between RxSolutions and Omnicare generated about $ 130 million in revenue for Omnicare, which would appear to trigger the requirement of the Merger Agreement that PacifiCare secure **[**15]** UnitedHealth's approval for the Omnicare contract. (Capell Decl. P 6, Attach. to Mem. in Opp'n.) However, Defendants have also provided a Company Disclosure Letter ("Letter"), referred to in § 5.01 of the Merger Agreement, [7] which appears by its terms to carve out an exception to the approval requirement. Specifically, the Letter provides that PacifiCare "and its Subsidiaries may enter into or amend any Contracts relating to their Part D standalone business" without seeking approval from UnitedHealth. (Company Disclosure Letter § 5.01(a)(1), Attach. to Phanstiel Decl., App. 47 to Mem. in Supp.)

The United States Department of Justice ("DOJ") reviewed the terms of the Merger Agreement to determine its potential effects on competition. (Defs.' 56.1 PP 7-8.) Subject **[**16]** to certain divestitures, none of which directly concerned Part D, DOJ approved the merger, and the transaction closed on December 20, 2005. (*Id.*)

III. PDP Approval & Negotiations with Omnicare

---

[5] The June 28 meeting consisted mostly of the same personnel involved in the June 9 meeting. A few additional individuals participated on June 28, however, **[**14]** including Lois Quam (CEO of Ovations), Peter Frank (outside counsel for UnitedHealth), and Howard Phanstiel (CEO of PacifiCare). (Due Diligence Summary--Point Part D, Ex. 38 to Mem. in Opp'n; Omnicare's Resp. to Defs.' 56.1 P 23.)

[6] The record does not reflect whether UnitedHealth's attorneys did in fact see the report or whether the attorneys made any changes to it.

[7] Specifically, the Merger Agreement states that PacifiCare may not enter into contracts (other than those required in the ordinary course of business) in excess of $ 3 million prior to the completion of the merger, "except as required by applicable Law . . . or provided in Section 5.01(a) of the Company Disclosure Letter and except as expressly contemplated by this Agreement." (Merger Agreement § 5.01(a), Ex. 72 to Mem. in Opp'n.)

In addition to working on the merger, both UnitedHealth and PacifiCare spent much of the 2005 calendar year developing their PDPs to obtain approval from CMS for 2006. As explained above, a critical component to achieving CMS approval was entering into contracts with prescription drug providers, both for retail and LTC customers. To assist in the negotiations with these pharmacies, potential PDP sponsors contracted with pharmacy benefit managers ("PBMs"), who would act as brokers, negotiating contracts with institutional pharmacies on behalf of potential PDPs. Walgreens Health Initiatives, Inc. ("WHI") served as the PBM for UnitedHealth (and other PDP sponsors) in negotiating contracts with certain pharmacies on behalf of UnitedHealth. (Defs.' 56.1 P 10.) PacifiCare utilized RxSolutions, an internal PBM that is a wholly-owned subsidiary of PacifiCare, to conduct its negotiations. (*Id.* P 3.)

Omnicare is the largest pharmacy servicing LTC facilities in the country. (Ex. A to Rubinfeld Decl. P 21, **[**17]** Attach. to Mem. in Opp'n.) In June 2005, Omnicare distributed its template pharmacy-network contract, which included a section called the "18 Patient Protections" (the "Patient Protections" or "Protections"). (Defs.' 56.1 P 37.) According to Omnicare, the provisions grew out of an awareness of Omnicare's importance in the LTC marketplace and were designed primarily "to address the specific health and safety needs of nursing home residents, who require a higher standard of care." (Mem. in Opp'n at 8.) The Protections did provide certain benefits to plan enrollees; for example, one provision provision granted residents up to 180 days to transition from drugs not included in the plan to drugs that are, and another provision required the PDP sponsor to waive certain requirements that could delay the provision of drugs to LTC residents. (Mem. in Opp'n at 8.) Omnicare further contends that the Patient Protections **[*953]** represent best clinical practices. Indeed, some potential defense witnesses acknowledged this in their depositions. (Bagley Dep 260:1-13, Ex. 96 to Mem. in Opp'n; Infante Dep. 158:17-19, Ex. 164 to Mem. in Opp'n.)

The parties differ greatly in their characterizations of the Patient **[**18]** Protections, however. Defendants argue that many of the Patient Protections in fact violate Medicare regulations and would render a PDP ineligible to receive reimbursement from CMS. (Infante Memo at 1, App. 133 to Mem. in Supp.) In the opinion of outside counsel Marie Infante, who was retained by UnitedHealth, the violations would render UnitedHealth ineligible to receive reimbursement from CMS under Part D for its provision of drugs to LTC patients. [8] (*Id.*) Among other objections concerning the scope of the coverage afforded by the Patient Protections, Infante wrote that the Protections also impermissibly shifted the obligation of the PDP to respond to inquiries from enrollees to Omnicare. (*Id.* at 1-3.) Defendants also argue that PDP sponsors "had a rational economic incentive" not to agree to the Patient Protection provisions because those provisions would increase the costs of providing prescription drugs to the LTC patients. (Defs.' 56.1 P 41.) Omnicare argues that the Protections were in fact in the economic interest of the sponsors because the sponsors had an interest in contracting with Omnicare (based on its large size). (Omnicare's Resp. to Defs.' 56.1 P 41.) Further, Omnicare **[**19]** contends, because the Protections were favorable to potential enrollees, their adoption would enhance the PDPs' efforts to market themselves to potential enrollees. (*Id.*)

A. WHI-Omnicare Agreement

On July 29, 2005, after two months of negotiations, WHI, acting as the PBM for UnitedHealth as well as four smaller PDPs, entered into a pharmacy-network agreement with Omnicare (the "WHI-Omnicare Agreement"). (Defs.' 56.1

---

[8] Omnicare suggests that Ms. Infante's conclusions were actually written as an advocacy piece prepared in response to UnitedHealth's request for the "strongest legal arguments" in favor of a finding that the Protections are unlawful. (Omnicare's Resp. to Defs.' 56.1 P 41; Ex. 163 to Mem. in Opp'n.) An e-mail from Infante to Tobin does state that Infante "decided to use the statutory framework because it provided the simplest way to outline *your strongest legal arguments.*" (Ex. 163 to Mem. in Opp'n (emphasis added).) The memorandum itself nowhere suggests that it was written with a predetermined result, however ("As requested, I have reviewed the Pharmacy Network Agreement . . . and conclude, for the reasons outlined below, that the prescription drugs provided under this agreement would not qualify for reimbursement under Medicare Part D." [Infante Memo at 1, App. 133 to Mem. in Supp.]), and both Infante and Tobin maintain that Infante's conclusions were not dictated by UnitedHealth. (Tobin Dep. 333:14-17, Ex. 159 to **[**20]** Mem. in Opp'n; Infante Dep. 96:2-17, Ex. 164 to Mem. in Opp'n.)

PP 11, 49.) In these pharmacy network contracts, the pharmacy is reimbursed for prescription drugs at a rate calculated as a percentage discount from the average wholesale price ("AWP"), plus a dispensing fee. (*Id.* P 39.) The PDP's economic interest is to obtain a large discount from AWP, and a small dispensing fee. (*Id.* P 40.) The Agreement also contained Omnicare's 18 Patient Protections, as did all the pharmacy-network agreements that Omnicare entered into prior to the August 1, 2005 deadline for PDPs to submit their LTC networks to CMS. (*Id.* P 42.) In addition, the WHI-Omnicare Agreement provided that it would apply to any pharmacy acquired by Omnicare, but did not contain a parallel provision extending its reach to any PDP acquired by UnitedHealth. (*Id.* P 52.) Omnicare contends **[*954]** that as a matter of interpretation, a PDP acquired by UnitedHealth would "automatically [be] covered **[**21]** under the WHI Agreement," but the Agreement contains no explicit provision providing for such a contingency. (Omnicare's Resp. to Defs.' 56.1 P 52.) Finally, Omnicare acknowledges that the Agreement did not contain any provision "that would have prevented [UnitedHealth] from withdrawing the [UnitedHealth] Part D plans from the WHI-Omnicare Agreement and switching them to another Part D pharmacy network." (*Id;* Omnicare's Resp. to Request to Admit No. 21, App. 56 to Mem. in Supp.)

B. RxSolutions-Omnicare Agreement

The negotiations between Omnicare and RxSolutions, PacifiCare's internal PBM, were considerably more complicated and drawn out. According to Defendants, PacifiCare's strategy was to set up its pharmacy networks using the RxSolutions template contract--called an "Any Willing Provider" contract--rather than using contracts prepared by pharmacies. Consistent with that strategy, in 2005, RxSolutions did not sign any contract that was prepared by a retail or LTC pharmacy. (Defs.' 56.1 P 56, 59.) The standard reimbursement rate provided in the RxSolutions "Any Willing Provider" contract was substantially more favorable for the PDP than the one established by the WHI-Omnicare Agreement, **[**22]** providing both a lower dispensing fee and a greater discount from AWP. (*Id.* P 57.)

On June 6, 2005, in the course of its negotiations on behalf of PacifiCare, RxSolutions sent a copy of its "Any Willing Provider" contract to Omnicare. (*Id.* P 59.) Later that day, Tim Bien, Omnicare's Senior Vice-President of Professional Services who was responsible for negotiating pharmacy-network contracts with PBMs, participated in a conference call with RxSolutions and PacifiCare in which Bien stated that he would send a copy of Omnicare's form contract to RxSolutions. (*Id.* PP 36, 60.) Bien did so on June 21. (*Id.* P 61; 6/21/05 e-mail from Smith to Anchondo, App. 73 to Mem. in Supp.) Both Omnicare and RxSolutions pushed for use of its own form contract as the basis for further negotiations; Robert Hill at Omnicare suggested that RxSolutions make revisions to Omnicare's form contract, but expressed a willingness for some flexibility by noting that the mark-up "will not commit Prescription Solutions to necessarily using Omnicare's form of agreement." (Defs.' 56.1 P 63; 6/24/05 e-mail from Hill to Cortes, Ex. 91 to Mem. in Opp'n.) By the time of their next conference call on July 6, Bien noted that **[**23]** the parties were still "way off on price," but PacifiCare agreed to suggest changes to the Omnicare form contract rather than continue to insist upon its own. (Defs.' 56.1 P 65; Bien Dep. 204:6-205:7, App. 18 to Mem. in Supp.) Rochele Cortes, a Pharmacy Contracting Manager at RxSolutions, did mark up the Omnicare form contract, noting in several places RxSolutions's position that various provisions, especially the Patient Protections, were either untenable from a business standpoint or violated CMS regulations; as of July 2005, Omnicare refused to agree to a contract that did not contain the Patient Protections. (Defs.' 56.1 PP 66-67; App. 75 to Mem. in Supp.)

According to Defendants, this impasse caused PacifiCare to conclude it would be unable to reach an agreement with Omnicare prior to the August 1 deadline and therefore broke off the negotiations. (Defs.' 56.1 P 68.) Omnicare contends in this lawsuit that PacifiCare's termination of negotiations was actually the result of a conspiracy with UnitedHealth, designed to obtain more favorable rates from Omnicare for both PacifiCare and UnitedHealth. **[*955]** (Omnicare's Resp. to Defs.' 56.1 P 68.) On July 14, about one week after PacifiCare and **[**24]** UnitedHealth signed the Merger Agreement, the negotiations between PacifiCare and Omnicare broke down. Rochele Cortes at RxSolutions sent Bien an e-mail stating, "We regret to inform you that based on the Omnicare agreement and the counteroffer rate . . . we will not be engaging in a contract at this time with your company for Medicare Part D. Please feel free to contact me with any comments or questions." (7/14/05 e-mail from Cortes to Bien, App. 78 to Mem. in Supp.) Bien responded by saying, "Thanks for letting me know. We stand ready to negotiate should you decide to do so." (7/15/05 e-mail from Bien to Cortes, App. 78 to Mem. in Supp.) The next day, RxSolutions Director of Network Relations David Chaney e-mailed Cortes, "This time next year, after we merge with United, they [i.e. Omnicare] will be begging to come in." (7/15/05 e-mail from Chaney to Cortes, App. 80 to Mem. in Supp.) Cortes responded, "Let them beg!" (7/15/05 e-mail from Cortes to Chaney, App. 80 to Mem. in Supp.)

After breaking off negotiations with Omnicare, PacifiCare determined that its LTC network was 80-90% complete (i.e. PacifiCare had contracted with pharmacies within 75 miles of 80-90% of the LTC facilities **[**25]** where it had enrollees). (Defs.' 56.1 P 72.) Defendants claim that PacifiCare intended to fill in the remaining gaps in its network with smaller, independent pharmacies; according to Omnicare, given how small these independent pharmacies were, that was not a realistic goal. (Omnicare's Resp. to Defs.' 56.1 P 72.) In August 2005, CMS declared that PacifiCare's existing LTC network was deficient and informed PacifiCare that it needed to contract with additional pharmacies. (Defs.' 56.1 P 77.) According to Cortes, PacifiCare considered approaching Omnicare to make up the gaps in its network; Omnicare disputes this, noting that after negotiations broke down in July, PacifiCare officials commented that Omnicare "shouldn't hold [its] breath" in waiting to hear back from PacifiCare. (Omnicare's Resp. to Defs.' 56.1 P 78; 7/15/05 e-mail from Chaney to Cortes, Ex. 100 to Mem. in Opp'n.) In any event, PacifiCare decided that, given the short time frame (three days) that CMS provided to PacifiCare to cure the gaps, PacifiCare could satisfactorily plug the gaps by contracting with Managed Health Care Associates, Inc. ("MHA"), an organization that represented a number of smaller LTC pharmacies **[**26]** and with whom PacifiCare had fewer outstanding disagreements than it had with Omnicare. (Defs.' 56.1 P 78.) Even with MHA in its network, CMS initially concluded that PacifiCare's LTC network was still deficient in one region, but after learning that PacifiCare in fact had seven LTC pharmacies in the region at issue (the District of Columbia), CMS approved PacifiCare as a national PDP on September 30, 2005. (*Id.* PP 80-81.) CMS also certified at least one other national PDP, Humana, without Omnicare in its network. (*Id.*)

Omnicare changed its strategy in late 2005 and early 2006 to accept contracts with PDPs that did not contain the Patient Protections. (Omnicare's Resp. to Defs.' 56.1 P 107.) The reasons for the change, according to Omnicare, were to enable Omnicare to provide coverage for as many of its LTC patients as possible, and to respond to increasing pressure from CMS to do so. (Bien Dep. 127:12-128:4, Ex. 79 to Mem. in Opp'n.) PacifiCare, on the other hand, argues the change in strategy was caused by a weaker negotiating position and a concern that Omnicare might lose clients if it did not contract with more PDPs. Defendants point to an e-mail Bien received from other Omnicare **[**27]** officials that **[*956]** stated, "Two [LTC] facility Executive Directors indicated it would be easier to change pharmacies than to change that many patients . . . [which] underlines the need that exists . . . to have a contract with [PacifiCare]." (11/30/05 e-mail from Evans to Bien, App. 104 to Mem. in Supp.) Omnicare denies that any threatened loss of business was significant and insists that no such concern had any bearing on its strategy shift in late 2005. (Omnicare's Resp. to Defs.' 56.1 P 99.) In any event, it is undisputed that the majority (fifteen out of twenty-one) of the contracts that Omnicare entered into between August 1, 2005 and April 1, 2006 were PDP-written contracts that did not contain the Patient Protections. (*Id.* P 43.) As of February 2006, the PDP-written contracts without the Protections governed over one-third of Omnicare's Part D business (including the RxSolutions contract, described below). (*Id.* P 83.)

Presumably in order to determine whether Omnicare should resume its efforts to contract with PacifiCare, on October 17, 2005, Bien at Omnicare e-mailed Craig Stephens, the Vice President in charge of UnitedHealth's Part D contracting, asking, "Is there a sense of when **[**28]** United will close the acquisition of PacifiCare? When the deal closes, will PacifiCare be contracted with Omnicare as a result of the acquisition? Thanks for your help on this." [9] (Defs.' 56.1 PP 48, 84.) Stephens did not reply to this e-mail before conferring with other UnitedHealth officials, including Ann Tobin, counsel at UnitedHealth. Forwarding Bien's e-mail, Stephens wrote to Tobin,

---

[9] The record does not reflect when or how Bien and Omnicare learned of the merger. Even if neither of the merging parties informed Omnicare of the merger prior to the signing of the Merger Agreement, Omnicare surely learned of **[**29]** the merger shortly thereafter, as news of the merger was widely reported, including on the front page of the *Wall Street Journal.* Vanessa Fuhrmans et al., *Two Health Plans Agree on a Deal for $ 8.1 Billion--UnitedHealth Adds Heft in California and Medicare with Move on PacifiCare,* WALL ST. J., July 7, 2005, at A1.

"Interesting--should we assume PacifiCare has not agreed with Omnicare?" (*Id.* P 85.) After another e-mail from Bien pressed him for a reply, Stephens finally wrote back on October 31, explaining that "PacifiCare's Part D offering for 2006 is a unique contract with CMS. If and when the deal closes, PacifiCare will follow their own Part D product strategy throughout the 2006 calendar year." (*Id.* P 87.) The next day, Bien forwarded this response to Omnicare CEO Joel Gemunder, noting his conclusion that "PacifiCare will not be included with the United Part D offering." (*Id.* P 93.)

Shortly thereafter, Omnicare did contact PacifiCare to resume negotiations. (*Id.* P 95.) PacifiCare asserts that, even though CMS had approved its LTC pharmacy-network without Omnicare, PacifiCare remained interested in negotiating with Omnicare in order to expand its network. (*Id.* P 96.) Omnicare argues that PacifiCare actually still *needed* Omnicare, because it was concerned that CMS might heighten the "convenient access" standard by requiring that a PDP's LTC enrollees reside even closer to the pharmacies that provided their drugs. (Omnicare's Resp. to Defs.' 56.1 P 96.) Specifically, Omnicare points to testimony from Angelo Giambrone, the RxSolutions Vice President of Industry and Network Relations, suggesting PacifiCare was concerned that CMS might be "raising the bar" regarding convenient access standards. (Giambrone Dep. 183:12-19, Ex. 86 to Mem. in Opp'n.) At Bien's **[**30]** request, in mid-November, Cortes again sent him the RxSolutions form contract, which PacifiCare claims it **[*957]** still wanted to use as the starting point for any negotiations. (Defs.' 56.1 PP 95, 97.) Together with the RxSolutions "Any Willing Provider" contract, Cortes sent an-email saying, "We will need to work with this document in order to proceed." (11/18/05 e-mail from Cortes to Bien, App. 102 to Mem. in Supp.) Omnicare claims that it understood that the form contract proposal was a "take it or leave it" proposition and not an invitation to commence negotiations; in particular, Bien testified that because of time restrictions--Omnicare wanted to finalize its Part D network before January 1, 2006--he asked PacifiCare and RxSolutions "for their best contract that they would give us, and I believe [the "Any Willing Provider" contract] was purported to be that." (Omnicare's Resp. to Defs.' 56.1 PP 97-98; Bien Dep. 434:13-435:7, App. 18 to Mem. in Supp.)

In any event, after receiving the RxSolutions form contract, Omnicare made no attempt to negotiate any of its terms--not even the reimbursement rate--and simply signed the contract on December 6, 2005. (Defs.' 56.1 PP 100-101.) Chaney at **[**31]** RxSolutions testified that he was surprised that Omnicare made no attempt to negotiate any terms. (Chaney Dep. 124:18-22, App. 67 to Mem. in Supp.) The reimbursement rate in the RxSolutions contract was substantially lower than the rates Omnicare negotiated with other national PDPs, including UnitedHealth--in fact, UnitedHealth's discount off of AWP in the WHI contract was only 75% of the discount provided in the RxSolutions contract, and UnitedHealth also paid a larger dispensing fee. (Rubinfeld Decl. PP 11-12, Attach. to Mem. in Opp'n.) Still, at least three small local PDPs, representing less than 1% of Omnicare's January 2006 revenues, did negotiate lower rates than the RxSolutions contract contained. (*Id.*) As described above, Bien had directly asked Stephens whether PacifiCare would become a party to UnitedHealth's contract as a result of the merger. Yet Omnicare negotiators apparently did not consider the flip side of that question, and the contract contained no provision that precluded UnitedHealth from participating, after the merger, in the agreement that RxSolutions negotiated on behalf of PacifiCare.

C. UnitedHealth Joins RxSolutions-Omnicare Agreement

Omnicare contends in **[**32]** this lawsuit that UnitedHealth's decision in February 2006 to withdraw from the WHI-Omnicare Agreement and join the RxSolutions contract had been planned by UnitedHealth and PacifiCare for a long period of time before the merger was finalized. Omnicare claims that UnitedHealth's basic strategy is summed up in a document referred to as the "stalking horse memorandum," first circulated between UnitedHealth and PacifiCare officials on September 6, 2005. [10] **[*958]** The two-page memo is titled "UnitedHealth Group's Pharmacy

---

[10] Several separate e-mails attached to Omnicare's brief contain copies of this memorandum. (*E.g.* Ex. 25; Ex. 44; Ex. 45; Ex. 211; Ex. 215; Ex. 216.) The basic document is the same in each exhibit, although some differences, including the precise placement of the "stalking horse" language, do appear. However, neither party appears to consider those differences material, and the court agrees that no substantive **[**34]** changes altered the meaning of this memorandum in any of the exhibits

Management Options." (Ex. 215 to Mem. in Opp'n, at UN034675.) Page 1 discusses UnitedHealth's past experiences with PBMs and presents some basic information about RxSolutions, including the fact that it operates solely as an "in-house" PBM for PacifiCare and a description of the services RxSolutions provides. (*Id.*) The top of page 2 reads, in bold, "Several strategic options need to be considered to capitalize on the value proposition Prescription Solutions can bring to United." (*Id.* at UN034676.) The memo then lists three strategic options: "1. Continue to outsource all of United's PBM services . . . . 2. Adopt a mixed strategy of outsourcing selected PBM services/functions **[**33]** to external vendors and in source [sic] selected services/functions to Prescription Solutions . . . . 3. Eventually consolidate all PBM services internally under Prescription Solutions." (*Id.*) Under the second option, the memorandum asked, "Is there a role for a central group to manage all PBM services for United whether they are in-sourced or out-sourced to obtain the best financial terms, contracts and service?", and suggested as a solution, "Use Prescription Solutions as a stalking horse to obtain the best service and contracts." (*Id.*) Omnicare contends that this reference to using RxSolutions as a stalking horse demonstrates UnitedHealth's intention to "surreptitiously obtain more favorable contracts for [UnitedHealth] from vendors such as Omnicare." (Mem. in Opp'n at 21.)

UnitedHealth has a different explanation for its eventual withdrawal from the WHI-Omnicare Agreement. According to Defendants, UnitedHealth began harboring legal concerns about the WHI-Omnicare Agreement in general, and the 18 Patient Protections in particular, as early as August 2005. (Defs.' 56.1 PP 117-18.) Indeed, on September 12, two months before negotiations between Omnicare and PacifiCare resumed, Tobin sent Stephens an e-mail saying that UnitedHealth "may be requiring WHI to renegotiate our Omnicare agreement." (*Id.* P 119). On November 9, Attorney Infante warned that **[**35]** there were legal problems with the WHI Agreement (as noted, Omnicare questions whether this decision was reached independently). (*Id.* P 121.) Around this same time, WHI's own senior attorney, Kelly Simenson, also concluded that the WHI-Omnicare Agreement, at least as it concerns UnitedHealth, conflicted with Medicare Part D regulations. [11] (*Id.* P 124.) On December 8, two days after Omnicare signed the RxSolutions contract, UnitedHealth expressed its concerns about the WHI Agreement to Omnicare, apparently for the first time. (*Id.* P 125.) Later that month, WHI forwarded a copy **[*959]** of the WHI-Omnicare Agreement to Omnicare, with proposed changes that WHI contended were necessary to bring the agreement into compliance with federal law and regulations. (*Id.* P 126.) Omnicare concedes that "one or two" other unnamed PDPs raised legal concerns about the Patient Protections, and that several PDPs--including MedImpact, Caremark, RxAmerica, Coventry, FirstHealth, and Independent Health--signed contracts with Omnicare that did not contain the Protections. (Omnicare's Resp. to Defs.' 56.1 P 131.) Bien believed that these objections regarding the Protections, including the claim that the Protections **[**36]** violated CMS regulations, were simply a negotiating tactic. (*Id.*) In early January 2006, UnitedHealth's outside counsel proposed an agreement, without many of the Protections, to replace the agreement negotiated on UnitedHealth's behalf by WHI. (Defs.' 56.1 P 130.)

---

provided by Omnicare. (*See* Quam Dep. 207:16-21, Ex. 8 to Mem. in Opp'n (witness had same understanding of "stalking horse" language when it was repositioned in the memorandum).)

None of these copies clearly state who originally authored the memorandum, but it circulated among several officials responsible for pharmacy network management at the two entities, including Lois Quam and Peggy Olson at UnitedHealth; Howard Phanstiel, CEO of PacifiCare; and Jacqueline Kosecoff, an Executive Vice President at PacifiCare. (Exs. 44, 45 to Mem. in Opp'n.)

[11] It is not altogether clear whether other PDP sponsors covered by the terms of the WHI-Omnicare Agreement also had concerns that the Agreement was inconsistent with federal regulations. At her deposition, Simenson expressed no opinion as to whether the WHI-Omnicare Agreement was noncompliant with Medicare regulations as to other PDP sponsors covered by the Agreement, but stated that part of the problem as it specifically related to UnitedHealth was that the Agreement allowed for more expansive benefit design than UnitedHealth's own policies did. (Simenson Dep. 44:3-16, App.135 to Mem. in Supp.) Even after UnitedHealth was dropped from the WHI-Omnicare Agreement, WHI continued to seek to make changes to that Agreement (presumably on behalf of other PDPs), although these changes appear to have been motivated by business reasons rather than concerns about illegality. (Defs.' 56.1 P 141.) The WHI-Omnicare Agreement continued **[**37]** in effect with respect to the other PDPs covered by it until December 31, 2008, the end of the initial term originally contemplated in the Agreement. (Ex. 19 to Mem. in Opp'n; Omnicare's Supplemental Statement of Undisputed Material Facts P 39.)

Defendants claim that UnitedHealth learned of the RxSolutions-Omnicare Agreement in January 2006. (*Id.* P 132.) Omnicare contends that the evidence recited above--especially the stalking horse memorandum--demonstrates that UnitedHealth both knew of and devised strategy around the RxSolutions contract months before this time. (Omnicare's Resp. to Defs.' 56.1 P 132.) Yet on January 11, 2006, Stephens at UnitedHealth e-mailed Giambrone, his counterpart at RxSolutions, asking, "Quick question--do you have a Part D network agreement with Omnicare for LTC pharmacy?" (Defs.' 56.1 P 132.) Later that day, Giambrone affirmed that RxSolutions/PacifiCare did have such an agreement: "Yes--Do you?" (*Id.*) Stephens responded twenty minutes later, "Yes--we do through WHI. Let's discuss on Friday." (*Id.*) According to Defendants, this correspondence marked the first time that UnitedHealth became aware of the RxSolutions contract with Omnicare. (*Id.*)

Following a **[**38]** meeting between Giambrone and Stephens on January 20, Stephens wrote an e-mail to Tobin exploring the possibility that UnitedHealth might benefit from PacifiCare's advantageous deal with Omnicare:

> I learned from Angelo [Giambrone of RxSolutions] yesterday that PHS has a favorable agreement in place with Omnicare. We need to understand if we can utilize the [RxSolutions] agreement for our business--this may offer a different approach we can take with Omnicare. Will you discuss/get copy from [PacifiCare's in-house counsel]?

(*Id.* PP 133-34.) In response, Tobin e-mailed PacifiCare's in-house counsel a couple of days later, requesting a copy of the RxSolutions-Omnicare Agreement. "Angelo suggested to Craig that it could be useful to us in finalizing our agreement with Omnicare or that we might even be able to use it," she wrote. (*Id.* P 135.) On February 22, 2006, Stephens verbally informed Bien that UnitedHealth would be utilizing the RxSolutions contract, effective April 1, 2006; he confirmed this in writing on February 28. (*Id.* P 137.)

IV. Omnicare files suit

Omnicare filed this action against Defendants on May 18, 2006 in the U.S. District Court for the Eastern District of Kentucky, the **[**39]** site of Omnicare's corporate headquarters and many potential witnesses. (Mem. Op. and Order [45] at 6.) The Kentucky district court transferred the matter to this court, relying on a forum selection provision of the WHI-Omnicare Agreement that provided for Illinois courts to have exclusive jurisdiction over disputes "arising under or in connection with" the Agreement. (*Id.* at 3.) Omnicare claims that, prior to the merger, UnitedHealth **[*960]** and PacifiCare conspired to have PacifiCare obtain the lowest possible price from Omnicare and then switch UnitedHealth's plan over to the more favorable PacifiCare-Omnicare contract. In its First Supplemental and Amended Complaint ("Complaint"), Omnicare alleges that Defendants violated the Sherman Act, as well as a parallel Kentucky antitrust statute, by "conspir[ing] to coordinate their negotiations with Omnicare in order to . . . fix and depress the prices paid by defendants to Omnicare for providing those services." (Am. Compl. P 6.) Omnicare further alleges that Defendants conspired to defraud Omnicare, fraudulently misrepresented their intentions to Omnicare, and were unjustly enriched by their fraud.

Defendants moved to dismiss the antitrust claims **[**40]** in the Complaint for failure to state a claim on which relief can be granted. This court denied the motion on September 28, 2007, holding that Omnicare had "pleaded facts which plausibly suggest that the merger agreement constituted a contract, combination, or conspiracy between UnitedHealth and PacifiCare under *section 1 of the Sherman Act.*" *Omnicare, Inc. v. UnitedHealth Group, Inc., 524 F. Supp. 2d 1031, 1039 (N.D. Ill. 2007)*. The court further held that Omnicare had pleaded sufficient facts to satisfy the other elements of the antitrust claims, namely, that Defendants' conduct resulted in an unreasonable restraint of trade, that Omnicare was a proper plaintiff to bring the suit, and that Omnicare had suffered an injury recognized by antitrust laws. *Id. at 1039-44*.

On June 20, 2008, Defendants moved for summary judgment on all claims. On the same date, Omnicare filed a Motion for Partial Summary Judgment Pursuant to *Rule 56* Or in the Alternative Motion to Strike, arguing that five affirmative defenses advanced by Defendants fail as a matter of law. The court addresses both summary judgment motions in this opinion.

DISCUSSION

HN1[] Summary judgment is appropriate when "the pleadings, the **[**41]** discovery and disclosure materials on file, and any affidavits show that there is no genuine issue as to any material fact and that the movant is entitled to judgment as a matter of law." *FED. R. CIV. P. 56(c)*. *HN2*[] Unlike a motion to dismiss, a motion for summary judgment requires the opposing party to present evidence "showing a genuine issue for trial." *FED. R. CIV. P. 56(e)*. A genuine issue of material fact exists where "the evidence is such that a reasonable jury could return a verdict for the nonmoving party." *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. *HN3*[] The court will draw all reasonable inferences from the evidence in favor of the nonmoving party, *id. at 255*, but the nonmoving party still bears the burden of establishing the existence of a genuine issue of material fact. *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 586-87, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*.

I. Federal Antitrust Claim

HN4[] Section 1 of the Sherman Act is designed to prevent business entities from entering into collusive agreements. By its terms, section 1 prohibits "[e]very contract, combination . . . , or conspiracy, in restraint of trade." *15 U.S.C. § 1*. *HN5*[] In the usual case, a price-fixing conspiracy exists between **[**42]** sellers who agree to artificially set their prices above or below market prices. *See* *Int'l Outsourcing Servs., LLC v. Blistex, Inc., 420 F. Supp. 2d 860, 864 (N.D. Ill. 2006)* (citing *Arizona v. Maricopa County Med. Soc., 457 U.S. 332, 348, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982))*. Illegal **[*961]** agreements may also be made between buyers who conspire to establish a price below market levels, a situation often referred to as a "buyers' cartel." *Int'l Outsourcing Servs., 420 F. Supp. 2d at 864*. To establish a successful section 1 claim against a buyers' cartel, a plaintiff must prove: (1) the existence of a contract, combination, or conspiracy between buyers; (2) an unreasonable restraint of trade in the relevant market; and (3) an injury caused by the cartel. *See* *Denny's Marina v. Renfro Prods., 8 F.3d 1217, 1220 (7th Cir. 1993)*.

Defendants argue that Omnicare cannot establish the existence of a genuine issue of material fact supporting its claim that Defendants violated section 1 of the Sherman Act. *See* *15 U.S.C. § 1*. Specifically, Defendants argue that Omnicare has not presented sufficient evidence to avoid summary judgment on each of the three elements of the claim outlined above. The court agrees with Defendants that Omnicare **[**43]** has not established a genuine issue of material fact that the Defendants engaged in a contract, combination, or conspiracy in restraint of trade. Although the parties also devoted substantial briefing to the other two elements, the failure to establish a genuine issue on the first element is dispositive of the entire claim, and the court therefore does not consider whether a genuine issue of material fact exists concerning an unreasonable restraint of trade or whether Omnicare was injured as a result of anticompetitive behavior.

HN6[] Omnicare can prove the existence of an agreement through direct or circumstantial evidence. *Miles Distribs., Inc. v. Specialty Constr. Brands, Inc., 476 F.3d 442, 449 (7th Cir. 2007)*. *HN7*[] Direct evidence is "evidence tantamount to an acknowledgment of guilt," while circumstantial evidence is "everything else including ambiguous statements." *In re High Fructose Corn Syrup Antitrust Litig., 295 F.3d 651, 662 (7th Cir. 2002)*. *HN8*[] When relying on circumstantial evidence to establish the existence of a conspiracy, at least some of the evidence "must tend to exclude the possibility that the alleged conspirators acted independently rather than in concert." *Miles Distribs., 476 F.3d at 449* **[**44]** (citing *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 764, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984))*. This standard does not, however, require the plaintiff to exclude any possibility that the defendants acted independently. *See* *In re Brand Name Prescription Drugs Antitrust Litig., 186 F.3d 781, 787 (7th Cir. 1999)*. Rather, the standard merely establishes that "conduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy." *Matsushita, 475 U.S. at 588* (citing *Monsanto, 465 U.S. at 764*). Therefore, while the plaintiff in an antitrust case faces no higher burden to defeat summary judgment than a plaintiff in another case, *Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 468, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)*, ***antitrust law*** does "limit[] the range of permissible inferences from ambiguous evidence in a [section] 1 case." *Valley Liquors, Inc. v. Renfield Importers, Ltd., 822 F.2d 656, 660 (7th Cir. Ill. 1987)* (quoting *Matsushita, 475 U.S. at 588*).

Omnicare argues that the voluminous evidence presented with this motion creates a genuine issue of material fact as to the existence of an illegal agreement between UnitedHealth and PacifiCare. First, **[**45]** Omnicare argues that the Merger Agreement between UnitedHealth and PacifiCare by its own terms establishes the existence of a conspiracy in restraint of trade. Second, Omnicare claims that PacifiCare's actions in its contract negotiations **[*962]** with Omnicare were economically irrational unless understood as the product of concerted action with UnitedHealth. Omnicare's final argument is that the information exchanged by the merging entities in the period leading up to the merger was competitively sensitive and creates substantial evidence from which a jury could find the existence of a conspiracy.

For the reasons explained here, the court concludes that the evidence on which Omnicare relies is at least as consistent with independent action by the Defendants as it is with an unlawful agreement. Accordingly, Defendants are entitled to summary judgment on Count I.

A. Merger Agreement

The main pillar of Omnicare's proof of a contract, combination, or conspiracy is the Merger Agreement signed by PacifiCare and UnitedHealth. In denying Defendants' motion to dismiss, this court held that "Omnicare has pleaded facts which plausibly suggest that the merger agreement constituted a contract, combination, **[**46]** or conspiracy between UnitedHealth and PacifiCare under section 1 of the Sherman Act." *Omnicare, Inc., 524 F. Supp. 2d at 1039*. ***HN9***[] At the summary judgment stage, however, merely pleading sufficient facts will not suffice to withstand a motion for summary judgment; rather, the plaintiff must make an affirmative showing of proof that a genuine issue of material fact exists that requires a trial. *See* *Ruffin-Thompkins v. Experian Info. Solutions, Inc., 422 F.3d 603, 607 (7th Cir. 2005)* (citing *Beard v. Whitley County REMC, 840 F.2d 405, 410 (7th Cir. 1988)*). An examination of the Merger Agreement itself--including the materials incorporated by reference into the agreement--shows that Omnicare has not made such a showing here.

Omnicare emphasizes a provision of the Merger Agreement (the "approval provision") that requires PacifiCare to obtain UnitedHealth's approval for any transaction, other than those entered into in the ordinary course of business, in excess of $ 3 million. Specifically, section 5.01 of the Merger Agreement prohibits PacifiCare from "enter[ing] into . . . any Contract . . . that involves [PacifiCare] or any of its Subsidiaries incurring a liability in excess of three million **[**47]** dollars." (Merger Agreement § 5.01(a)(x), Ex. 72 to Mem. in Opp'n.) In Omnicare's view, the approval provision sets such a low threshold that it essentially grants UnitedHealth control over all of PacifiCare's Part D contracts. In response, Defendants point to exceptions in the Merger Agreement that carve out the Part D contract entered into by RxSolutions from the approval requirement. Most notably, Defendants point to the Company Disclosure Letter ("Letter") referred to in section 5.01 of the Merger Agreement. Section 5.01 establishes the $ 3 million ceiling for PacifiCare transactions that do not require UnitedHealth approval, except as "provided in Section 5.01(a) of the Company Disclosure Letter." (*Id.*) That Letter specifically authorizes PacifiCare "and its Subsidiaries [to] enter into or amend any Contracts relating to their Part D standalone business . . . ." (Company Disclosure Letter § 5.01(a)(1), Ex. 73 to Mem. in Opp'n.) Omnicare has not challenged Defendants' interpretation of the provision: that it exempts PacifiCare from securing UnitedHealth's approval before entering into a Part D contract. Instead, Omnicare casts doubt on the Letter's authenticity, arguing that it **[**48]** is only a draft, and characterizes Defendants' tardy disclosure of the Letter as an "affront to this court." (Mem. in Opp'n at 37.) None of these reasons provide a basis on which the court is free disregard the letter.

[*963] ***HN10***[] Authentication of a document can be made by a "witness with knowledge" who testifies "that a matter is what it is claimed to be." *FED. R. EVID. 901(b)(1)*. PacifiCare's Chief Executive Officer and President at the time of the merger, Howard Phanstiel, confirmed the parties' interpretation of the Letter, testifying that he "understood that Part D contracts with providers, like institutional pharmacy provider Omnicare, Inc., were exempted" from the approval provision by the Company Disclosure Letter. (Phanstiel Decl. PP 4-5, App. 47 to Mem. in Supp.) Phanstiel further asserted that the Letter attached to his Declaration was a "true and correct copy" of the Letter, which sufficiently authenticates the Letter under *Rule 901(b)(1)*. (*Id.* P 5.) Contrary to Omnicare's suggestion, the copy of the Letter attached to Phanstiel's Declaration is not labeled as a "draft," and Omnicare has presented no other basis for the conclusion that it was not a binding part of the PacifiCare/UnitedHealth **[**49]** Merger Agreement. Omnicare's suggestion that the court should disregard the Letter because it is unexecuted is insufficient in this regard: the Letter is not a separate agreement that required separate execution by the parties, but rather is incorporated by reference into the Merger Agreement based on the explicit reference in § 5.01 of the Agreement. Finally, Omnicare argues that the Defendants' production of the Letter at this late stage in the proceedings, two years after the action was initially filed, is an "affront to the court." (Mem. in Opp'n at 37.) The court is also puzzled by Defendants' regrettable decision to withhold materially beneficial evidence until the summary judgment stage. Nonetheless, nothing in the record casts serious doubt upon the authenticity of the Letter, and the court will not exclude relevant evidence solely on the basis of effrontery.

Finding no basis on which to exclude the Company Disclosure Letter, the court must consider it in determining whether a genuine issue exists as to the existence of a conspiracy based on the Merger Agreement. In ruling on the motion to dismiss, the court concluded that the allegation that Defendants "coordinated their decisions **[**50]** regarding PacifiCare's entry into new agreements" was sufficient to state a claim. *Omnicare, 524 F. Supp. 2d at 1037*. Now at the summary judgment stage, Omnicare bears the burden of showing that a genuine issue exists as to whether such coordination actually took place. The Company Disclosure Letter explicitly excludes PacifiCare's Part D negotiations from requiring UnitedHealth's approval, and Phanstiel stated that, to the best of his knowledge, "PacifiCare did not ask for United's prior consent to enter into any pharmacy-network contract with Omnicare or any other pharmacy provider." (Phanstiel Decl. P 7, App. 47 to Mem. in Supp.) All that Omnicare offers in rebuttal is the text of § 5.01 of the Merger Agreement, but as noted above, the relevance of that text is undermined by the Company Disclosure Letter.

Omnicare also relies on two consent decrees that the United States entered into with companies accused of violating the Sherman Act to argue that the UnitedHealth-PacifiCare Merger Agreement is anticompetitive. According to Omnicare, the merger agreements in both cases contain similarly restrictive provisions, which DOJ relied upon in determining the existence of a conspiracy in **[**51]** restraint of trade. As an initial matter, the court notes that these decrees have no precedential value. More importantly, the provisions of the merger agreements involved in those other cases are clearly distinct from the approval provision of the UnitedHealth/PacifiCare agreement. The provision in the Merger Agreement between UnitedHealth and PacifiCare **[*964]** is a relatively common feature in merger agreements intended to insure that the acquired company (PacifiCare) does not assume any major liabilities for which the acquiring company (UnitedHealth) would be responsible after the merger. *See* ANTITRUST ADVISER, *supra* § 3:74, at 3-270. By contrast, the merger agreement in *United States v. Computer Assocs. Int'l, Inc., No. 01-02062, 2002 U.S. Dist. LEXIS 23039, 2002 WL 31961456 (D.D.C. Nov. 20, 2002)*, contained a provision preventing the acquired company from setting prices below a certain level. *2002 U.S. Dist. LEXIS 23039, [WL] at *9*. This provision could not be explained in terms of its possible effect on the proposed merger and appeared to be motivated almost entirely by anticompetitive interests. *Id.* (provision is "extraordinary and not reasonably ancillary to any legitimate goal of the transaction").

Nor does *United States v. Gemstar-TV Guide Int'l, Inc., No. 03-0198, 2003 U.S. Dist. LEXIS 12494, 2003 WL 21799949 (D.D.C. July 11, 2003)* **[**52]** establish that the UnitedHealth/PacifiCare agreement violates the Sherman Act. In fact, in the *Gemstar* case, DOJ explicitly sanctioned the use of terms that limit the acquirer's liability. *2003 U.S. Dist. LEXIS 12494, [WL] at *3* (permitting merging parties to agree to "forego conduct that would cause a material adverse change in the value of to-be-acquired assets during the Pre-consummation Period"). As numerous commentators, including Omnicare's expert and the general counsel of the Federal Trade Commission, have noted, these approval provisions are common practice in mergers, and the presence of one here does not constitute evidence of conspiracy. (Coates Report P 68, Attach. to Mem. in Opp'n; William Blumenthal, *The Scope of Permissible Coordination Between Merging Entities Prior to Consummation,* 63 Antitrust L.J. 1, 55-56 (Fall 1994).) In the absence of other evidence of a conspiracy, the threshold value of $ 3 million is not so low as to give rise to an inference of conspiracy.

In sum, the Merger Agreement by its own terms did not require UnitedHealth to approve PacifiCare's Part D contracts. [12] The commonly-adopted provision requiring the acquirer's approval of certain transactions therefore cannot provide **[**53]** the basis to conclude that a conspiracy in restraint of trade existed.

B. Economic Evidence

Omnicare next contends that economic evidence demonstrates that Defendants must have entered into an illegal agreement in restraint of trade. ***HN11***[] Generally, courts will not second-guess business judgments made by a private actor. *See* *Lamb's Patio Theatre, Inc. v. Universal Film Exchanges, Inc., 582 F.2d 1068, 1070 (7th Cir. 1978)*. Some courts have, however, recognized that evidence that a defendant's action, if taken independently, would be contrary to its economic self-interest "tend[s] to exclude the likelihood of independent conduct" and may therefore constitute circumstantial evidence in support of a Sherman Act claim sufficient to survive summary judgment. *Re/Max Int'l, Inc. v. Realty One, Inc., 173 F.3d 995, 1009 (6th Cir. 1999)*. Omnicare argues that PacifiCare's bargaining strategy makes no sense in the absence of a conspiracy **[**54]** because a contract with Omnicare was the only practical way for PacifiCare to provide drugs to many of its enrollees in LTC facilities serviced by Omnicare. If PacifiCare had not reached a secret agreement with UnitedHealth, Omnicare concludes, **[*965]** its bargaining behavior was so reckless that it endangered PacifiCare's reputation, its Part D certification by CMS, and even the merger itself. Omnicare also claims that the reimbursement rate it received in the PacifiCare contract is itself evidence of a conspiracy because it was significantly lower than prevailing market rates and could only have been extracted from Omnicare by anticompetitive behavior. The court addresses these arguments in turn.

1. PacifiCare's Bargaining Strategy

In mid-July 2005, PacifiCare had not yet been approved by CMS as a national PDP. Given Omnicare's widely-felt presence in the market, Omnicare argues that PacifiCare's decision to break off negotiations at that point in the CMS-approval process was reckless and made no economic sense. First, Omnicare argues that the decision risked PacifiCare's ability to get drugs to its enrollees living in nursing homes serviced by Omnicare, which would seriously harm PacifiCare's **[**55]** brand name with senior citizens. Second, the decision to break off negotiations also put PacifiCare's certification with CMS at risk. On March 16, 2005, CMS had explicitly told PacifiCare, "We would expect that the plan would seek to enter into a network contract with a pharmacy serving the LTC facility as soon as practicable." (3/16/05 Long-Term Care Guidance, Ex. 20 to Mem in Opp'n at 4.) According to Omnicare, by breaking off negotiations with the institutional pharmacy that was likely to service many of PacifiCare's dual eligibles and that possessed exclusive contracts with many of the LTC facilities, PacifiCare jeopardized its CMS certification and risked the loss of $ 64 million in Part D profits PacifiCare was expecting in 2006. Finally, Omnicare suggests that PacifiCare's economically-irrational decision to break off negotiations with Omnicare may even have put PacifiCare's planned merger with UnitedHealth at risk, if UnitedHealth thought the loss of the expected PDP profits made the merger no longer desirable. [13] Based on information available in PacifiCare's public financial statements, Omnicare argues that PacifiCare's strategy put at risk $ 64 million in Part D profits, **[**56]** a gain in its market capitalization of $ 1.2 billion, $ 243 million in merger-related costs that PacifiCare would have to realize as losses (for tax purposes) had the merger failed, and $ 60 million in executive bonuses to be paid upon completion of the merger; in exchange, PacifiCare stood to gain only $ 11 million based on better reimbursement rates in the Omnicare contract over three years. (Coates Decl. P5, Rubinfeld Decl. P 9, Attachs. to Mem. in Opp'n.) And, if UnitedHealth were to become a party to the RxSolutions contract, the newly-merged entity stood to gain

---

[12] The clear and unequivocal language of the Company Disclosure Letter makes it unnecessary to consider Defendants' arguments that two other provisions of the Merger Agreement demonstrate that the approval provision does not apply to PacifiCare's Part D contract with Omnicare.

[13] Omnicare has not provided any evidence that UnitedHealth in fact would have backed out of the merger if CMS did not certify PacifiCare's PDP.

somewhere between $ 130 and $ 300 million. These circumstances, according to Omnicare, create a genuine issue of material fact as the economic reasonableness of PacifiCare's decisions.

In defense of its business judgment, PacifiCare relies principally on the fact that its strategy succeeded--PacifiCare's PDP was certified by CMS without Omnicare and it eventually received a lower rate in its contract with Omnicare. This fact by itself, according to PacifiCare, undermines any challenge **[**57]** to its decision and defeats the contention that PacifiCare's decision to call Omnicare's bluff is inconsistent with independent action on the part of PacifiCare. The court agrees that the success of PacifiCare's strategy entitles it to very strong judicial deference, for ***HN12***[] if business judgments generally deserve deference, **[*966]** *see Brach v. Amoco Oil Co., 677 F.2d 1213, 1223 (7th Cir. 1982)*, then successful business judgments deserve even greater deference.

In fact, the record shows that PacifiCare's business strategy made sense even without the benefit of hindsight. At the time PacifiCare refused to sign the Omnicare contract and insisted on working from the RxSolutions standard contract, there were several other PDPs--including at least one other national PDP--that also refused to sign Omnicare's contract before the CMS bid deadline of August 1. In August 2005, CMS informed PacifiCare that its LTC pharmacy network was deficient and that PacifiCare needed to expand its network by contracting with additional pharmacies. Rather than returning to Omnicare, with whom PacifiCare believed there were a number of outstanding issues, PacifiCare thought it could sufficiently patch its pharmacy network **[**58]** by contracting with MHA. CMS ultimately approved PacifiCare's PDP with MHA, and not Omnicare, in its network. Similarly, Humana, another national PDP, contracted with enough other pharmacies to meet the CMS requirements without Omnicare in its network.

Omnicare believes its own centrality to a national PDP's LTC strategy make PacifiCare's insistence upon using its own form contract, initially at the expense of any agreement with Omnicare, irrational and thereby creates a genuine issue of material fact concerning the reasonableness of the strategy. The record undermines this assertion, as well. Omnicare's bargaining power with other PDPs in addition to PacifiCare was apparently greatly reduced as 2005 wore on; the reasonableness of PacifiCare's decision to use the RxSolutions contract is demonstrated by the fact that so many other PDPs insisted upon their own contracts that Tim Bien of Omnicare conceded that it "was the standard practice for PBMs" to insist on the PBM's own form contract. Fully 15 out of Omnicare's 21 contracts entered into between August 1, 2005 and April 1, 2006 used the PDP's form contracts, rather than the version proposed by Omnicare. [14] (Defs.' 56.1 PP 43, 45.) **[**59]** The record indicates that Omnicare simply was not as essential to CMS approval as it argues it should have been.

It appears from the record that CMS's approval of PacifiCare's PDP without Omnicare so strengthened PacifiCare's bargaining position that it was justified in again demanding that Omnicare sign PacifiCare's own "Any Willing Provider" contract. In early November, CMS distributed a document intended for PDPs that had already been certified, cautioning that "in order to facilitate plan compliance with the LTC convenient access standard, we strongly encourage plans to contract with LTC pharmacies serving all the LTC facilities in which their enrollees might reside as soon as practicable." (LTC Convenient Access Standard Statement at 1, Ex. 89 to Mem. in Opp'n.) One would expect this directive to entice PacifiCare **[**60]** to resume negotiations with Omnicare, but to suggest, as Omnicare does, that it substantially increased Omnicare's bargaining position is unjustified--if it had, one would expect that PacifiCare would have been eager to sign Omnicare's form contract rather than the other way around. Within one month of the CMS directive, PacifiCare did enter into a contract with Omnicare, **[*967]** and it did so from a superior bargaining position as a large CMS-certified PDP. Perhaps as a result, the reimbursement rates in that contract were substantially more favorable to PacifiCare than the rates PacifiCare and Omnicare had discussed earlier. In short, the contract that Omnicare signed--without making a counteroffer--was undisputedly favorable to PacifiCare and undermines Omnicare's assertion that Omnicare was in the stronger bargaining position.

---

[14] According to Bien, Omnicare's "shift in thinking" in agreeing to PDP form contracts after August 1 was caused by Omnicare's desire to protect its patients' interests by ensuring they would be covered under Part D, and not the result of a reduction in Omnicare's bargaining power. (Omnicare's Resp. to Defs.' 56.1 P 82; Bien Dep. 127:12-128:4, Ex. 79 to Mem. in Opp'n.)

At its core, Omnicare's theory would require the court to hold that a bargaining strategy that was ultimately successful and saved PacifiCare money was nevertheless illogical and contrary to its economic interest. It may not be impossible for a plaintiff to argue that a successful business strategy was economically irrational, but such an argument requires, at a minimum, **[**61]** a stronger showing than was made here, where PacifiCare demonstrated a rational basis for its actions and showed that other PDPs acted similarly. Granting due deference to the business decisions of PacifiCare, the court cannot conclude that its successful bargaining strategy was so irrational that it was inconsistent with independent action.

2. Reimbursement Rate

Omnicare next contends that the reimbursement rate provided in the Omnicare-RxSolutions contract was so low as to be proof of a conspiracy. ***HN13***[] Information about uncompetitive prices may be probative evidence suggesting the existence of a conspiracy. *See JTC Petroleum Co. v. Piasa Motor Fuels, Inc., 190 F.3d 775, 778-79 (7th Cir. 1999)*. Omnicare has provided an expert's report concluding that the reimbursement rate paid by PacifiCare under the RxSolutions contract was significantly lower than other national PDP's rates paid to Omnicare. According to Omnicare, PacifiCare's ability "to extract a lower reimbursement rate from Omnicare than other PDPs that were more than five times [PacifiCare's] size simply makes no economic sense." (Mem. in Opp'n at 56-57.)

If PacifiCare was indeed successful in negotiating an unusually favorable rate, **[**62]** Omnicare has failed to produce any evidence that suggests this was a result of anything other than unsuccessful bargaining on Omnicare's part. When negotiations between PacifiCare and Omnicare resumed in November 2005, PacifiCare demanded that further negotiations take place on the basis of the RxSolutions contract, and sent Omnicare a copy. Rather than suggest any changes to the contract or the reimbursement rate, Omnicare signed the copy without negotiation. If PacifiCare's proposed lower rate had been problematic or unconscionable, one would expect Omnicare to protest or at least make a counterproposal. The record contains no indication that the rate was non-negotiable or that Omnicare otherwise felt some economic coercion to enter into the contract. Omnicare's characterization of the lower reimbursement rate as being "extracted" from Omnicare is inconsistent with evidence that the contract was willingly entered into by two sophisticated parties. Moreover, the rate at issue, while lower than the rates offered by other national PDPs, was higher than the rates Omnicare had agreed to with three local PDPs. These local PDPs admittedly made up a small portion of Omnicare's business, **[**63]** but the existence of these contracts--as well as Omnicare's silence regarding the rate--defeats the inference that PacifiCare's rate was so low as to be suspect on its face. If the contract really made no economic sense, as Omnicare now contends, one would not have expected Omnicare to enter into that contract so readily; even given Bien's stated concern that he **[*968]** was worried about Omnicare's ability to provide coverage to PacifiCare enrollees, some bargaining on price and other terms would still be expected. Far from being inconsistent with independent action, this evidence is entirely consistent with one company's finding itself in a superior bargaining position *vis a vis* a supplier and offering a contract to the supplier on terms favorable to itself. Therefore, nothing in the reimbursement rate paid by PacifiCare constitutes evidence of a conspiracy.

C. Premerger Communications and Information Exchange

Finally, Omnicare argues that communications that took place between UnitedHealth and PacifiCare prior to the completion of the merger on December 20, 2005 create a genuine issue as to the existence of a conspiracy. Omnicare asserts that this evidence is all direct evidence; in fact, **[**64]** the court sees none of it as "tantamount to an acknowledgment of guilt." ***HN14***[] Because the evidence requires the drawing of inferences to find the existence of a conspiracy, that evidence is actually circumstantial and must be considered under the *Monsanto/Matsushita* framework. *High Fructose Corn Syrup, 295 F.3d at 662*. Accordingly, Omnicare must again offer at least some evidence that "tends to exclude the possibility of independent action." *Monsanto, 465 U.S. at 768*.

At the outset, the court notes that virtually no case law establishes standards for determining when premerger discussions are anticompetitive. Some federal agencies have, however, expressed concern about the potential anticompetitive effects of premerger communications and coordination. *Accord* ANTITRUST ADVISER, *supra* § 3:74, at 3-271. DOJ and the Federal Trade Commission ("FTC") have entered into a handful of consent decrees with companies who illegally coordinated premerger activities; but these cases are not very instructive because they did not all concern alleged Sherman Act violations, and furthermore, were all "easy cases that involved egregious conduct." William Blumenthal, General Counsel, FTC, The Rhetoric of Gun-Jumping, **[**65]** Remarks Before the Association of Corporate Counsel, Annual Antitrust Seminar of the Greater New York Chapter (Nov. 10, 2005), at 2-3, available at *http://www.ftc.gov/speeches/05speech.shtm*. ***HN15***[] The balance the court seeks to strike here is a sensitive one. On the one hand, courts should not allow plaintiffs to pursue Sherman Act claims merely because conversations concerning business took place between competitors during merger talks; such a standard could chill business activity by companies that would merge but for a concern over potential litigation. On the other hand, the mere possibility of a merger cannot permit business rivals to freely exchange competitively sensitive information. This standard could lead to "sham" merger negotiations, or at least allow for periods of cartel behavior when, as here, there is a substantial period of time between the signing of the merger agreement and the closing of the deal. With this delicate balance, as well as the *Monsanto/Matsushita* framework, in mind, the court considers the evidence offered by Omnicare of premerger information exchange.

1. Late June/Early July 2005

As detailed above, UnitedHealth and PacifiCare first began discussions of a **[**66]** possible merger in January 2005, but talks between the two entities intensified in the weeks leading up to the signing of the Merger Agreement on July 6. In a series of meetings in June and July, the two parties exchanged strategic information, including Part D average pricing. Defendants emphasize that the information exchange **[*969]** took place between senior members of the merging entities, referred only to averages and ranges, did not mention the prices offered to Omnicare, and virtually never discussed long-term care networks or the contract terms offered to LTC pharmacies.

Omnicare disputes these characterizations of the talks. First, Omnicare disputes that these talks were exclusively among high-level officials of PacifiCare and UnitedHealth. This factor is relevant because high-level executives are less likely to be directly involved in developing the Part D proposals and less directly able to use any of the competitively sensitive information, to the extent such information was disclosed. Omnicare claims that "business operations employees" were involved in the June due diligence meetings. (Omnicare's Resp. to Defs.' 56.1 P 23.) Omnicare fails to define what exactly it means by "business **[**67]** operations employees," however, and a review of the attendees at the June due diligence meetings, listed above in the Statement of Facts, shows that it was attended primarily by CEOs, CFOs, and other senior executives of various UnitedHealth and PacifiCare business segments. (Due Diligence Summary--Point Part D, Ex. 38 to Mem. in Opp'n.) That these officials may have overseen aspects of Part D can hardly be surprising; indeed, it would be stranger if the executives at the Part D due diligence meetings had little or no connection to the Part D business. In addition, the UnitedHealth, PacifiCare, and RxSolutions officials who appeared to have the most direct contact with Omnicare--such as Rochele Cortes at RxSolutions or Craig Stephens at UnitedHealth--do not appear to have been present at these meetings. The blanket usage of the term "business operations employees" therefore has no bearing on whether UnitedHealth and PacifiCare officials improperly exchanged information during due diligence.

Even if those directly involved with negotiations with Omnicare and other pharmacies were not those directly involved in the due diligence meetings, Omnicare has demonstrated the existence of a genuine **[**68]** issue of material fact as to whether such personnel were provided with information in excess of what was permitted by the confidentiality agreements. A UnitedHealth official on the due diligence team, Jerry Knutson, testified that other UnitedHealth personnel not on the team were consulted about matters learned in due diligence. (Knutson Dep. 85:21-86:11, Ex. 32 to Mem. in Opp'n.) Knutson explained that these consultations were essential for the due diligence team to assess the relevance of the information the team was receiving. (*Id.* at 86:15-22.) The consultations nevertheless do create concerns that competitively sensitive information was leaked outside of the parameters set by the confidentiality agreement covering such information. Defendants deny having employed the information for any improper purposes, but, though Knutson's reasons for sharing the information may be benign, the risk remains that these officials could have used the information they obtained in anticompetitive ways to benefit their own businesses. Omnicare has thus established a genuine issue of material fact as to whether Plan D decision makers were involved in these discussions. Coupled with other evidence **[**69]** of improprieties during merger negotiations, this evidence might well be inconsistent with independent action. By itself, however, this issue does not support an inference of conspiracy because it is not inconsistent with the belief that the two entities were still acting independently.

Omnicare's other suggestions of impropriety are less convincing. Omnicare **[*970]** observes that during the course of due diligence, UnitedHealth was shown a PacifiCare document entitled "Form of Prescription Drug Services Agreement," which was also the title of the "Any Willing Provider" contract that RxSolutions ultimately signed with Omnicare. This contract template is not specific to Part D contracts, however, and, by itself, does not create a binding contract to provide LTC care under Part D. (Lagerstrom Decl. P 3, App. 206 to Defs.' Reply.) Nor does the PacifiCare form contain any Part D pricing information or make any reference to Omnicare or any other specific institutional pharmacy. (*Id.*) The fact that it is substantially the same form as the contract that Omnicare later signed is thus of little significance, because nothing in this document communicates anything about prices that PacifiCare was offering **[**70]** to LTC providers or other pharmacies under Part D. All that it shows is that RxSolutions possessed in June, and in fact used in December, a generic template to enter into an agreement with an institutional pharmacy. This fact is simply immaterial to this summary judgment motion.

Omnicare also points to the price information that was exchanged during the due diligence process as further evidence of anticompetitive behavior. Specifically, the Part D questionnaire that UnitedHealth sent PacifiCare asked for PacifiCare's expected average brand discount off of AWP. PacifiCare replied that the rate was AWP - [x]% for its Preferred Network, which was in fact the same rate that PacifiCare ultimately paid in the Omnicare contract. Omnicare does not argue that this price information was irrelevant to UnitedHealth's determination of an appropriate offer price for the merger, and the court agrees that the information had some importance to consummating the Merger Agreement. UnitedHealth's method of obtaining the admittedly relevant information appears to the court to be appropriately circumspect--rather than requesting all information about all relevant markets, UnitedHealth asked only for averages **[**71]** and ranges. Nor can Omnicare properly dispute the assertion of Ken Lagerstrom, head of UnitedHealth's Corporate Development, that "no Part D information that was available to us . . . relate[d] to specific contracts." (Lagerstrom Dep. 393:24-394:2, App. 22 to Mem. in Supp.) Omnicare claims that UnitedHealth's access to PacifiCare's "Any Willing Provider" contract undercuts this claim, but as noted above, that form is a contract template that does not provide specifics and Omnicare has not established any genuine issue as to the materiality of that form.

The natural question arising from this information exchange is, was this information exchange necessary for the due diligence process? *See* Michael C. Naughton, *Gun-Jumping and Premerger Information Exchange: Counseling the Harder Questions,* 20-SUM ANTITRUST 66, 68 (Summer 2006). Certainly, one could not expect that the two merging entities would not discuss Part D plans at all, so the exchange of some information relating to Part D does not automatically create a genuine issue as to the existence of a conspiracy. And, as discussed above, the pricing information that was exchanged--arguably the most competitively sensitive of any of the **[**72]** exchanged information--was provided late in the process (less than one month before the signing of the Merger Agreement) and was conveyed in the form of averages and ranges rather than specific bargained-for rates. In early June 2005, UnitedHealth officials were even complaining about the difficulty of assessing PacifiCare's "level of readiness to implement the Part D business and the level of business **[*971]** risk they are assuming." (Paul Memo at 2, App. 29 to Mem. in Supp.) Omnicare has failed to establish that the price and strategy information that was subsequently exchanged creates a genuine issue as to the existence of a conspiracy. Rather, the evidence suggests that the information exchange was as general as possible to enable UnitedHealth to evaluate PacifiCare's Part D readiness and its level of business risk. Even though it appears that UnitedHealth did not scrupulously enforce the segregation of its due diligence team from other members, that fact alone cannot alter the generally benign nature of the information exchanged. From the record, it appears that this exchange of information was necessary to due diligence and was performed in a reasonably sensitive manner.

Three additional **[**73]** pieces of evidence warrant further discussion. First, UnitedHealth's sharing of its own average price information with PacifiCare could be seen as unnecessary and circumstantial evidence of a conspiracy. Some commentators argue that ***HN16***[] the inference of a conspiracy is significantly weakened where it is the target (here, PacifiCare) who is providing information to the acquirer. *See* Blumenthal, *The Scope of Permissible Coordination Between Merging Entities Prior to Consummation, supra* at 5 (quoting a past general counsel of the FTC). Although the vast majority of the UnitedHealth-PacifiCare information exchange falls into this category, UnitedHealth did provide PacifiCare with UnitedHealth's own average bid information on July 2. (Defs.' 56.1 P 25.) The rationale for the acquiring corporation's providing price information--even average price information--to the acquired firm is weaker than for providing the target's information to the acquirer, but there is still a rational basis for it: just as the acquirer wants to know that it is not making a dangerous investment in acquiring the target, the target wants to have some assurance that the entity that is acquiring it is well-run and has **[**74]** a strong strategic vision for the future. *See generally* ANTITRUST ADVISER, *supra* 3:74, at 3-270. The other circumstances surrounding this information exchange also demonstrate its harmless nature. Peter Frank, an independent actuary hired by UnitedHealth, delivered the information to PacifiCare in a sealed envelope because the PacifiCare personnel with whom he was meeting had not disqualified themselves from PacifiCare's negotiations with CMS. As a precautionary measure, Frank had disqualified himself from participating in UnitedHealth's negotiations with CMS due to his receipt of PacifiCare's average bid information. [15] (Frank Dep. 127:3-9, App. 21 to Mem. in Supp.) Frank's intent was that the sealed envelope be passed along to individuals who had disqualified themselves from CMS negotiations but could analyze UnitedHealth's Part D data in a manner that would aid them in their decisions concerning the merger. For unexplained reasons, the record does not disclose who at PacifiCare did view this information, but under *Matsushita,* this is not evidence inconsistent with competitive behavior and thus cannot be the basis for finding a genuine issue of material fact as to the existence of **[**75]** a conspiracy.

Significantly, in all this evidence of meetings concerning Part D plans, the record contains only one reference to any discussion specifically concerning Omnicare: PacifiCare's CEO testified to having **[*972]** a conversation with Jacqueline Kosecoff, Executive Vice President of PacifiCare's Specialty Companies, about PacifiCare's difficulty in negotiating a contract with Omnicare, and Kosecoff mentioned that UnitedHealth was also having difficulties. (Phanstiel Dep. 93:18-94:2, Ex. 29 to Mem. in Opp'n.) Even assuming Kosecoff learned this information from a conversation with a UnitedHealth official, her statement does not support an inference that UnitedHealth and PacifiCare were engaged in a price-fixing conspiracy. Nothing in the statement suggests that pricing or strategy regarding negotiations with Omnicare were discussed between PacifiCare and UnitedHealth. For this reason, Omnicare's reliance on *Heartland Surgical Specialty Hosp., LLC v. Midwest Div., Inc., 527 F. Supp. 2d 1257 (D. Kan. 2007)* is **[**76]** misplaced. Summary judgment was denied in that case because the defendants "communicated to each other (i.e., to their competitors) about their strategies." *Id. at 1304*. Neither Kosecoff's statement about UnitedHealth nor any of the preceding evidence about conversations between UnitedHealth and PacifiCare suggests that any such strategic discussions took place in the pre-Merger Agreement discussions.

Finally, Omnicare argues that the Company Disclosure Letter actually supports the conclusion that section 5.01 of the Merger Agreement constitutes evidence of a conspiracy. According to Omnicare, UnitedHealth would only have agreed to this exception to the approval provision if PacifiCare had already disclosed its Part D contracting strategy to UnitedHealth. In support, Omnicare points to a statement made by Lagerstrom that UnitedHealth "got a confidence level that [PacifiCare] would not lose money in their Part D program" based on "pricing information" PacifiCare delivered to UnitedHealth during due diligence in the weeks leading up to the signing of the Merger Agreement. (Lagerstrom Dep. 442:22-443:13, Ex. 34 to Mem. in Opp'n.) For the reasons given above, however, the pricing information **[**77]** PacifiCare disclosed was not so competitively sensitive that it was inappropriate to disclose during the days leading up to the signing of the Merger Agreement. The exception for Part D plans written into the letter simply cannot be understood as consistent only with a finding of a conspiracy between UnitedHealth and PacifiCare.

---

[15] At his deposition, Frank said that disqualification would have been unnecessary if he knew what PacifiCare was going to tell him. (Frank Dep. 127:15-23, App. 21 to Mem. in Supp.)

2. Communications Subsequent to Execution of Merger Agreement

Following the signing of the Merger Agreement, the record contains virtually no reference to communications between UnitedHealth and PacifiCare relating to Part D pricing or strategy in general, or LTC contracts and Omnicare in particular. This silence is consistent with Defendants' denials of any concerted activity, particularly since both parties' contracts with Omnicare were entered into after the signing of the Merger Agreement. *See* Blumenthal, *The Scope of Permissible Coordination Between Merging Entities Prior to Consummation, supra* at 5 (***HN17***[] "Once price is agreed upon . . . and an agreement to merge is reached, further information exchanges are more difficult to justify.") Omnicare makes much of the memorandum shared between high-level PacifiCare and UnitedHealth officials, suggesting that the combined **[**78]** postmerger entity use RxSolutions "as a stalking horse to obtain the best service and contracts." (UnitedHealth Group's Pharmacy Management Options, Ex. 215 to Mem. in Opp'n, at UN034676.) According to Omnicare, the "'stalking horse' memorandum" is an important exception to this lack of post-Merger Agreement communications and **[*973]** provides direct evidence of a conspiracy. [16]

Again, the stalking horse language is not an admission of guilt and is therefore not direct evidence of a conspiracy. The court must instead determine what value it has as circumstantial evidence of a conspiracy. The entire document is clearly written prospectively, with an eye towards integration of services after the merger is completed. The top of page 2, for instance, says that "several strategic options *need to be considered,*" not that one strategic option is currently being pursued. In fact, three separate strategic possibilities are listed: outsource all PBM services, outsource some PBM services, and outsource no PBM services. Only one of those options contains any reference to the stalking horse (and that reference is in a sub-sub-point), so it is difficult to conclude that one phrase in the middle of the document constitutes evidence of a conspiracy.

Omnicare notes with suspicion the underhanded tone implicit in the phrase "stalking horse," suggesting the phrase has a somewhat conspiratorial connotation. At his deposition, Phanstiel of PacifiCare was asked to provide a definition of the term, and responded as follows: **[**80]** "A stalking horse is a shield to conceal the hunter from the prey. Sometimes the phrase is used in the context of [a] decoy; sometimes the phrase is used in the context of creating confusion between the parties." (Phanstiel Dep. 65:19-23, Ex. 29 to Mem. in Opp'n.) Omnicare argues that UnitedHealth used RxSolutions as a stalking horse by figuratively hiding behind it, allowing RxSolutions to obtain a better rate and then taking advantage of that rate obtained by RxSolutions. According to Omnicare, this document makes no sense as a post-merger document because RxSolutions could not be used deceptively to benefit UnitedHealth once it was known that PacifiCare and RxSolutions were subsidiaries of UnitedHealth. But this is true only if Omnicare is correct about how a stalking horse strategy would operate: that is, using deceptive practices to enable the larger company to benefit from the more favorable terms offered to the smaller company. Given the context of the memo, however, particularly its focus on long-term strategic planning, this reading is not the most natural. Lois Quam, a UnitedHealth official involved in the discussions concerning the stalking horse memo, offered a less strained **[**81]** reading of the memorandum. Quam suggested that the stalking horse reference meant that UnitedHealth would keep RxSolutions as a subsidiary but not use it as its own PBM; rather, RxSolutions could be used to develop innovations "that could set a standard" that would make bargaining easier for UnitedHealth. (Quam Dep. 163:2-13, App. 207 to Reply Mem.) Omnicare's reading of the memorandum, while not completely implausible, is more difficult to square with the actual text that makes the document read as though it is a post-merger planning document. Indeed, the stalking **[*974]** horse memorandum was attached to an e-mail discussing PBM strategy that was sent out in January 2006, after the merger had been completed. (1/20/06 e-mail, App. 168 to

[16] Omnicare also suggests that this strategy to impermissibly use RxSolutions was discussed at the June 28, 2005 due diligence meeting between UnitedHealth and PacifiCare. A memorandum prepared after the meeting shows that the parties discussed ways to combine resources, and UnitedHealth concluded that "[t]he combined entities would be advantaged through the . . . [c]onsolidation and leverage of resources in regard to Pharmacy benefit administration (PBMs) [and] Pharmacy Network contracting . . . ." (Due Diligence Summary-Point Part D, Ex. 38 to Mem. in Opp'n, at UN282570.) The court sees no impropriety in this comment. UnitedHealth was considering ways to achieve better economies of scale after the merger and suggested that the PBM area was one area where this was possible. Omnicare's argument that this memorandum provides **[**79]** direct or indirect evidence of a conspiracy is unpersuasive.

Mem. in Supp.) This fact is inconsistent with Omnicare's theory that the merging parties planned for RxSolutions to function as a stalking horse only before the two companies merged.

HN18[] The court is sensitive to the concern that it should not take the place of the jury in weighing evidence at the summary judgment stage. *See High Fructose Corn Syrup, 295 F.3d at 655*. Nonetheless, guided by the standards established in *Monsanto* and *Matsushita,* the court concludes **[**82]** that Omnicare has failed to produce evidence of action by UnitedHealth and PacifiCare that is inconsistent with lawful conduct on the part of two competing entities engaged in legitimate merger discussions and planning. Notably, Omnicare was mindful of the UnitedHealth/PacifiCare merger plans at the time it entered into its agreement with RxSolutions, yet Omnicare apparently made no effort to include in that agreement a term that would have prohibited UnitedHealth from taking advantage of the lower rates for which RxSolutions had bargained. Not only is there no evidence that Omnicare attempted to negotiate such a provision, there is also nothing in the record that indicates that PacifiCare would have refused to accept it.

The court grants summary judgment in favor of Defendants on Count I of the Complaint.

II. State Law Claims

Omnicare's remaining claims against Defendants all arise under state law. The court has no independent jurisdiction for deciding these claims; diversity jurisdiction is lacking because Omnicare and PacifiCare are both incorporated in Delaware. (Defs.' 56.1 P 4; *28 U.S.C. § 1332(a)*, *(c)*). Omnicare asserts that the state claims are within the court's supplemental **[**83]** jurisdiction. (Am. Compl. P 18; *28 U.S.C. § 1367(a)*.) ***HN19***[] This court has discretion, however, to determine whether to exercise its supplemental jurisdiction when, as in this case, the original basis for federal jurisdiction has been dismissed. *28 U.S.C. § 1367(c)(3)*. The court's decision should be guided by "the values of judicial economy, convenience, fairness, and comity." *Groce v. Eli Lilly & Co., 193 F.3d 496, 501 (7th Cir. 1999)* (quoting *City of Chicago v. Int'l College of Surgeons, 522 U.S. 156, 173, 118 S. Ct. 523, 139 L. Ed. 2d 525 (1997))*.

Three of these four factors favor the court's retention of jurisdiction. First, the interest in judicial economy overwhelmingly favors this court deciding the state law issues. The parties have filed tens of thousands of pages in exhibits and numerous briefs--including substantial briefing on the state law claims--and this court has devoted a considerable amount of resources to understanding the factual and legal arguments presented by the parties. Having a state court review many of the same documents to achieve an understanding of the factual and legal issues would be grossly inefficient. Second, it would be more convenient to the parties to have this court, which already has **[**84]** all the relevant discovery materials and legal briefs before it, to issue an opinion on this matter rather than to await a refiling in state court, particularly given the amount of time it would take a new court to become acquainted with the facts. Third, this resolution would also be more fair to the parties, who have devoted over three and one-half years to this matter; tellingly, neither party has argued that this court should surrender jurisdiction on the state claims if it granted summary judgment on the federal anti-trust claim.

[*975] The remaining interest identified by the Seventh Circuit, and the only one that favors dismissal of the state causes of action, is that of comity. This interest is reflected in ***HN20***[] the presumption recognized by the Seventh Circuit that district courts should usually relinquish jurisdiction over state claims when the federal claims are dismissed before trial. *Groce, 193 F.3d at 501* ("[I]t is the well-established law of this circuit that the usual practice is to dismiss without prejudice state supplemental claims whenever all federal claims have been dismissed prior to trial."). This presumption, however, does not determine every case. *See, e.g., CropLife America, Inc. v. City of Madison, 432 F.3d 732, 734 (7th Cir. 2005)* **[**85]** ("relinquishment [of the state claims] is not mandatory . . . [and] both sides want us to decide the state-law claim rather than protract the litigation"); *Timm v. Mead Corp., 32 F.3d 273, 277 (7th Cir. 1994)* ("especially when difficult and unsettled state law issues are not implicated by the pendent claims, it is entirely acceptable . . . for a federal court to decide those claims"); *Brazinski v. Amoco Petroleum Additives Co., 6 F.3d 1176, 1182 (7th Cir. 1993)*. The presumption should not apply in this case. For one thing, the state law claims are not "novel or complex," *28 U.S.C. § 1367(c)(1)*; indeed, federal courts in this district routinely hear cases applying these state causes of action. *E.g., Gas Tech. Inst. v. Rehmat, 524 F. Supp. 2d 1058, 1070,* 1073-74 (N.D. Ill. 2007) (fraud and conspiracy to commit fraud); Munch v. Sears, Roebuck & Co., 2008 U.S. Dist. LEXIS 76822, 2008 WL 4450307, at *6 (N.D. Ill. Sept. 30, 2008) (unjust enrichment). While Omnicare's state law claims are rather complex, their complexity derives more from factual nuance than from legal nuance, and this court is in a superior position to apply the complex facts to settled Illinois law. *See* Brazinski, 6 F.3d at 1182 (**HN21**[] presumption applies **[**86]** most strongly when the state law is "unsettled").

HN22[] The Seventh Circuit has identified two common scenarios where this presumption in favor of dismissal may be refuted: first, "where substantial federal judicial resources have already been expended on the resolution of the supplemental claims," and second, "where it is obvious how the claims should be decided." *Williams Electronics Games, Inc. v. Garrity, 479 F.3d 904, 907 (7th Cir. 2007)*. The court first notes that Omnicare essentially concedes that its claim under the Kentucky ***antitrust law*** does not survive summary judgment if its federal antitrust claim fails, and the court concludes that the state claim should be construed the same as the federal antitrust claim. *See* Fieldturf, Inc. v. Sw. Recreational Indus., Inc., 235 F. Supp. 2d 708, 721 n.10 (E.D. Ky. 2002), *vacated in part on other grounds,* 357 F.3d 1266 (Fed. Cir. 2004) (granting summary judgment on federal and state antitrust claims because **HN23**[] "the ***antitrust law*** of the Commonwealth is so similar to its federal counterpart, the Sherman Antitrust Act, and may be interpreted where appropriate with regard to federal law, the Court shall dispatch [sic] with the claim under KY. REV. STAT. 367.175 **[**87]** upon its analysis of the federal antitrust claim"). The court therefore grants summary judgment on Count II of the Complaint, as resolution of the state antitrust claim is "obvious" given the court's disposition of the federal antitrust claim. As for the other state law claims--for fraud, conspiracy to commit fraud, and unjust enrichment--the court has clearly, as discussed above, expanded substantial judicial resources on their resolution.

In sum, the interests of judicial economy, convenience, and fairness all favor having this court determine the state law issues. The sole countervailing factor, comity, is not substantially implicated here **[*976]** because the state law claims are not novel, but are rather claims that courts in this district regularly encounter. The court therefore proceeds to consider these remaining counts.

A. Fraud

Omnicare alleges that UnitedHealth fraudulently misrepresented the post-merger intentions of UnitedHealth and PacifiCare. On October 17, 2005, Tim Bien of Omnicare sent UnitedHealth representative Craig Stephens an e-mail concerning the merger, inquiring, "When the deal closes, will PacifiCare be contracted with Omnicare as a result of the acquisition?" (10/17/05 **[**88]** e-mail from Bien to Stephens, Ex. 83 to Mem. in Opp'n.) Two weeks later, on October 31, Stephens replied in a two-sentence e-mail: "PacifiCare's Part D offering for 2006 is a unique contract with CMS. If and when the deal closes, PacifiCare will follow their own Part D product strategy throughout the 2006 calendar year." (10/31/05 e-mail from Stephens to Bien, Ex. 83 to Mem. in Opp'n.) Omnicare contends that this e-mail was materially false or misleading and that Omnicare relied upon the e-mail to its detriment by entering into negotiations with PacifiCare and ultimately agreeing to the "Any Willing Provider" contract that UnitedHealth later joined. Defendants move for summary judgment, arguing that no genuine issue of material fact exists that would allow Omnicare to establish the elements of the claim.

1. Choice of Law

Before analyzing the fraud claim itself, the court must determine whether Kentucky or Illinois law applies. **HN24**[] Generally, when a court obtains jurisdiction over an action as the result of a transfer of venue, the choice-of-law rules of the transferring court apply. *See* Van Dusen v. Barrack, 376 U.S. 612, 639, 84 S. Ct. 805, 11 L. Ed. 2d 945 (1964). Applying the rule to the present case, this court would **[**89]** apply Kentucky choice-of-law rules in determining which state's tort law should govern the fraud claim because the action was transferred to this court from a Kentucky district court. However, the *Van Dusen* rule is intended to prevent defendants from seeking a transfer merely to obtain more favorable choice-of-law rules. *See id.* In this case, where a forum selection clause in the WHI-Omnicare agreement states that Illinois courts "shall have exclusive jurisdiction over the parties," applying the *Van Dusen* rule would more likely allow the plaintiff to manipulate the choice-of-law rules to be applied by filing the action in a different court. *See* *Freedman v. Am. Online, Inc., 325 F. Supp. 2d 638, 652 (E.D. Va. 2004)* ("[A]pplying the usual *Van Dusen* rule in the face of a forum selection clause encourages forum shopping by a party seeking to avoid the application of the contractually-chosen forum.") Thus, because this case was transferred to this court by means of a forum selection clause, the choice-of-law rules of Illinois should govern rather than those of Kentucky.

The court accordingly applies Illinois law to determine whether the WHI-Omnicare Agreement's choice-of-law clause, which **[**90]** would apply the common law of Illinois to the fraud claims, governs this claim. In addition to its forum selection clause, the Agreement also states that the contract "will be construed and governed according to the laws of the State of Illinois." (WHI-Omnicare Agreement at 20, App. 58 to Mem. in Supp.) By its terms, this clause does not directly apply to Omnicare's fraud claim because the claim does not require the court to construe the Agreement. ***HN25***[] Even when a choice-of-law clause lacks the breadth to encompass a related tort claim, however, "tort claims **[*977]** that are dependent upon the contract are subject to a contract's choice-of-law clause." *Medline Indus. Inc. v. Maersk Med. Ltd., 230 F. Supp. 2d 857, 862 (N.D. Ill. 2002)*. One important factor in determining whether the tort claim "depends upon" the contract is whether the claim could exist without the contract. *M. Block & Sons, Inc. v. IBM Corp., No. 04 C 340, 2004 U.S. Dist. LEXIS 12743, 2004 WL 1557631, at *4 (N.D. Ill. July 8, 2004)*; *Birnberg v. Milk St. Res. Assocs. Ltd. P'ship, No. 02 C 978, 2003 U.S. Dist. LEXIS 806, 2003 WL 151929, at *14 (N.D. Ill. Jan. 21, 2003)*. Here, the entire purpose behind Bien's initial e-mail--and presumably Stephens's response to it--was to determine whether **[**91]** PacifiCare would be swept into the WHI-Omnicare Agreement. The claim for fraud could not have existed without the Agreement, then, and so the claim is dependent upon the contract. Therefore, Illinois fraud law applies.

HN26[] The elements of a fraud claim in Illinois are: (1) that the defendant made a false statement of material fact, (2) the defendant knew or believed it was false, (3) the defendant intended to induce plaintiff to act, (4) the plaintiff justifiably relied on the statement, and (5) the plaintiff was injured as a result. *Ass'n. Benefit Servs., Inc. v. Caremark RX, Inc., 493 F.3d 841, 852 (7th Cir. 2007)* (quoting *Williams v. Chi. Osteopathic Health Sys., 274 Ill. App. 3d 1039, 1048, 654 N.E.2d 613, 619, 211 Ill. Dec. 151 (1st Dist. 1995))*. As explained below, Omnicare's claim falters on the first element: Omnicare cannot show that a genuine issue of material fact exists that UnitedHealth made a false statement of material fact.

2. False Statement of Material Fact

Defendants contend that summary judgment should be granted because nothing in Stephens's e-mail was false. [17] Omnicare does not seriously contest the literal truth of the statements in the e-mail, but nevertheless argues that the representations **[**92]** made by Stephens are actionable because they were materially misleading. ***HN27***[] "A representation is fraudulent when, to the knowledge or belief of its utterer, it is false in the sense in which it is intended to be understood by the recipient." *Miller v. Lockport Realty Group, Inc., 377 Ill. App. 3d 369, 377, 878 N.E.2d 171, 179, 315 Ill. Dec. 945 (1st Dist. 2007)* (quoting *Soderlund Bros., Inc. v. Carrier Corp., 278 Ill. App. 3d 606, 619, 663 N.E.2d 1, 10, 215 Ill. Dec. 251 (1st Dist. 1995))*. Essentially, Omnicare asserts that UnitedHealth attempted to convey to Omnicare that UnitedHealth and PacifiCare were pursuing their Part D strategies separately, when in fact they were coordinating them. Omnicare's interpretation of the statement is more sinister than the court's, in two ways. First, the e-mail does not say that UnitedHealth and PacifiCare would remain entirely independent throughout 2006 in their Part D approaches, only that PacifiCare "will follow [its] own Part D product strategy." Stephens was responding to the question of whether PacifiCare would be a party to the WHI-Omnicare Agreement and stated that PacifiCare would follow its own strategy. As a reply to Bien's question, this statement is truthful, as PacifiCare **[**93]** eventually did reach its own agreement with Omnicare. Omnicare did not ask whether UnitedHealth would try to join a contract into which Omnicare and PacifiCare might enter; so Omnicare's suggestion that UnitedHealth meant to convey a message that UnitedHealth would not try to join a contract made between Omnicare and PacifiCare (who were not even negotiating with one another at this time) is unlikely and unsupported

[17] Defendants do not appear to dispute the materiality of the e-mail.

[*978] by the record. Stephens's reply clearly indicated that PacifiCare would not be a party to the WHI Agreement, and was therefore true both literally and in its intended message.

Second, Omnicare has not established the existence of a genuine issue of material fact that the merging parties were in fact coordinating their Part D strategies at this point in time. Omnicare's best evidence consists of general statements made by high-level officials of UnitedHealth and PacifiCare stressing their interest in combining networks and contracts to achieve economies of scale. (Erlandson Dep. 66:11-19, Ex. 63 to Mem. in Opp'n ("if contractually [UnitedHealth is] able to get access to PacifiCare networks, to the extent **[**94]** that they have better contracts . . . that would create value"). For the reasons already explained in Part I, there is nothing invidious about this, as presumably the entities decided to merge for the purpose of becoming more efficient. These statements are also so general that they do not directly implicate Part D coordination generally or Omnicare specifically. The closest Omnicare comes is pointing to an e-mail from UnitedHealth's Pfotenhauer on December 3, 2005. Discussing the upcoming merger, Pfotenhauer wrote,

> For Part D[,] I see one of our major foci next year to further examine the end to end production process and re-calibrate whether we still need as many outsourced vendors. Someone looking beyond Part D might see some additional synergies that would not be immediately discerned in Part D.

(12/3/05 e-mail from Pfotenhauer to Jelinek, Ex. 177 to Mem. in Opp'n.) Again, all this shows is that the merging entities hoped to increase efficiency after the merger, even with respect to Part D. This e-mail does not support a finding that the companies had already engaged in a coordinated plan vis a vis Omnicare. Indeed, it actually suggests the opposite, as all the references are to **[**95]** what people in the next year could accomplish, not what has already been done. If Omnicare cannot show that Defendants were coordinating their Part D strategies, then the e-mail quite simply cannot be fraudulent.

Omnicare also attempts to create a genuine issue of material fact concerning whether the merging entities had developed a coordinated Part D plan through circumstantial evidence of communications Stephens had with other UnitedHealth officials prior to replying to Bien's e-mail. Although Stephens generally replied promptly to Bien's e-mails, he did not quickly respond to this one, prompting Bien to send a second e-mail one week later, asking, "Craig, Can you give me anything on this? Tim." (10/25/05 e-mail from Bien to Stephens, Ex. 217 to Mem. in Opp'n.) Stephens still did not reply until October 31. In the interim, Stephens conferred with other UnitedHealth officials concerning the appropriate response to provide to Bien. According to Stephens, he delayed responding to Bien "because what he was asking for . . . would have required me to, you know, go down a path that I could not go down." (Stephens Dep. 291:14-18, Ex. 108 to Mem. in Opp'n.) Omnicare deems this vague statement **[**96]** conspiratorial and argues that it suggests that a secret agreement existed between UnitedHealth and PacifiCare that Stephens was afraid of exposing. Stephens clarified what he meant, however, stating that he did not want to give Bien "guidance as to what's going to happen post-acquisition with contracts when I have had no interaction with PacifiCare. And on top of that, I've been instructed to have no interaction with PacifiCare." (*Id.* at 291:20-25.) Furthermore, Stephens stated that no one he **[*979]** contacted suggested possible ways for him to respond to the e-mail. Nor did any of the other individuals to whom he spoke have any memory of giving substantive input to the response. [18] (*Id.* at 292:7-13; Pfotenhauer Dep. 117:19-118:24, Ex. 115 to Mem. in Opp'n.) Once pieced together, this evidence is insufficient to support a finding that UnitedHealth and PacifiCare had developed a coordinated strategy that Stephens was very carefully trying to avoid divulging.

Fundamentally, the fraud count is based upon UnitedHealth's failure to answer a question that Omnicare did not ask. In Bien's e-mail, Omnicare asked whether PacifiCare would become contracted with Omnicare as a result of the merger. If Omnicare wanted to know the degree to which the merged entities might coordinate their Part D planning and sharing of contracts, it could have asked a broader question concerning general post-merger plans for the combined entity. [19] Omnicare asked only whether PacifiCare would enter into the WHI Agreement (not whether

---

[18] In the case of Ann Tobin, UnitedHealth claimed attorney-client privilege to prevent her from answering. (Tobin Dep. 220:11-15, Ex. 109 to Mem. in Opp'n.) Omnicare does not appear to have challenged the assertion that communications with **[**97]** Tobin were privileged.

UnitedHealth might enter into any agreement Omnicare might reach with PacifiCare); Stephens replied that PacifiCare was following its own Part D strategy--a truthful statement, as PacifiCare ultimately entered its own contract with Omnicare and never used the WHI Agreement. Contrary to Omnicare's contention in the Complaint, the Stephens e-mail does not give "the impression that UHG would not attempt to transfer its Part D plans to PHS after the merger" because Bien's e-mail to Stephens clearly asked about the opposite situation: whether PacifiCare would enter into UnitedHealth's existing contract. (Am. Compl. P 11.) **[**98]** In fact, after receiving the Stephens e-mail, Bien forwarded the e-mail to Joel Gemunder, President and CEO of Omnicare, and wrote, "PacifiCare will not be included with the United Part D offering." (11/1/05 e-mail from Bien to Gemunder, Ex. 308 to Mem. in Opp'n.) Bien's understanding of the message was therefore in accord with what actually happened, namely, that PacifiCare and Omnicare would need to reach their own LTC agreement if they were to be contracted with one another. Nor was the intended meaning misleading. The clear import of the Stephens e-mail was that Omnicare would not automatically be contracted with PacifiCare as a result of the merger; if Omnicare and PacifiCare did not reach their own contract, then they would not do business together. Omnicare has made no showing to suggest that this was not true. Thus, even if Omnicare is unhappy with the results of its contracting with PacifiCare, it cannot protest the contract on the grounds of fraud. Neither the literal terms of the e-mail nor its intended meaning were false.

B. Conspiracy to Commit Fraud

Omnicare also contends that UnitedHealth and PacifiCare conspired to defraud Omnicare. ***HN28***[] To sustain a claim for conspiracy to defraud in Illinois, a plaintiff must show: "(1) a conspiracy; (2) an overt act of fraud in furtherance of the conspiracy; and (3) damages to the plaintiff as a result of the fraud." *Bosak v. McDonough, **[*980]** 192 Ill. App. 3d 799, 803, 549 N.E.2d 643, 646, 139 Ill. Dec. 917 (1st Dist. 1989)*. None of these elements are met. As stated above, Omnicare has failed to establish the existence of a genuine issue as to an agreement between UnitedHealth and PacifiCare regarding either Omnicare or LTC strategies generally. Furthermore, the second element of conspiracy requires an act of fraud which, as noted above in granting summary judgment on the fraud claim, Omnicare has also failed to establish. *See* *Damato v. Merrill Lynch, Pierce, Fenner & Smith, Inc., 878 F. Supp. 1156, 1162 (N.D. Ill. 1995)* (***HN29***[] "[T]o state a valid conspiracy to defraud claim[,] plaintiffs must allege facts establishing the elements of fraud under Illinois law."). And **[**100]** in the absence of fraud, Omnicare can show no injury caused by the fraud. The court thus grants summary judgment in favor of defendants on Omnicare's conspiracy claim.

C. Unjust Enrichment

In a separate count, Omnicare claims that it is entitled to recovery because Defendants were unjustly enriched by "the improper utilization by UHG and PHS of the noncompetitive reimbursement rate schedule contained within the PHS Any Willing Provider Contract." (Compl. P 96.) ***HN30***[] A cause of action for unjust enrichment requires a showing that "the defendant has unjustly retained a benefit to the plaintiff's detriment, and the defendant's retention of that benefit violates" basic principles of justice. *HPI Health Care Servs., Inc. v. Mt. Vernon Hosp., Inc., 131 Ill. 2d 145, 160, 545 N.E.2d 672, 679, 137 Ill. Dec. 19 (1989)*. ***HN31***[] The Illinois Supreme Court has identified three situations where the defendant's retention of a benefit will be considered unjust:

> (1) the benefit should have been given to the plaintiff, but [a] third party mistakenly gave it to the defendant instead . . . , (2) the defendant procured the benefit from [a] third party through some type of wrongful conduct . . . , or (3) the plaintiff for some other reason **[**101]** had a better claim to the benefit than the defendant . . . .

Id. at 161-62, 545 N.E.2d at 679 (internal citations omitted); *see also* *Assoc. Ben. Servs., 493 F.3d at 854* (citing *HPI*). Illinois courts do not appear to have uniformly followed this guidance, however; some courts have required a

---

[19] Of course, UnitedHealth may have declined to answer such a detailed question, to the extent that it had an answer at this point prior to the closing **[**99]** of the deal. Whether UnitedHealth would or could have answered such a question is, of course, a question the record does not answer.

more specific showing than suggested by the court in *HPI. See, e.g.,* *McKay v. Kusper, 252 Ill. App. 3d 450, 463, 624 N.E.2d 1140, 1150, 191 Ill. Dec. 762 (1st Dist. 1993)* (requiring "unlawful or improper conduct as defined by law" for unjust enrichment claim to succeed); *Lewis v. Lead Indus. Ass'n, Inc., 342 Ill. App. 3d 95, 105, 793 N.E.2d 869, 877, 276 Ill. Dec. 110 (1st Dist. 2003)* ("In order for a cause of action for unjust enrichment to exist, there must be some independent basis which establishes a duty on the part of the defendant to act and the defendant must have failed to abide by that duty").

In short, the "law of unjust enrichment in Illinois is unclear." *Cohabaco Cigar Co. v. U.S. Tobacco Co., No. 98 C 1580, 1999 U.S. Dist. LEXIS 17210, 1999 WL 988805, at *15 (N.D. Ill. Oct. 22, 1999)*; *see also* *C.B. Mills v. Hawranik, No. 91 C 5797, 1994 U.S. Dist. LEXIS 3839, 1994 WL 113088, at *15 (N.D. Ill. Mar. 30, 1994)*. A lack of clarity in the state law would normally suggest that the court **[**102]** should decline to resolve the issue, *see* *28 U.S.C. § 1367(c)(1)*, but in this case the lack of clarity is immaterial for two reasons. First, the courts have clearly held that ***HN32***[] "where there is a specific contract that governs the relationship of the parties," a plaintiff cannot assert a claim for unjust enrichment. *Stathis v. Geldermann, Inc., 295 Ill. App. 3d 844, 864, 692 N.E.2d 798, 812, 229 Ill. Dec. 809 (1st Dist. 1998)* (citing *People ex rel. Hartigan **[*981]** v. E & E Hauling, Inc., 153 Ill. 2d 473, 497, 607 N.E.2d 165, 177, 180 Ill. Dec. 271 (1992))*. Omnicare had contracts with all of the defendants in this case and therefore cannot proceed under an unjust enrichment theory.

Second, and more fundamentally, there are simply no grounds to support recovery regardless of what standard of conduct applies. Omnicare claims that Defendants were unjustly enriched "[a]s a result of the illegal conspiracy between UHG and PHS, including, in particular, UHG's fraudulent misrepresentation in its October 31st e-mail, and the scheme to devise a fraudulent strategy for PHS to refuse to negotiate with Omnicare." (Am. Compl. P 96.) For the reasons already discussed in this opinion, however, none of these alleged misdeeds took place--there was **[**103]** no illegal conspiracy between UnitedHealth and PacifiCare; UnitedHealth made no fraudulent misrepresentation in the October 31st e-mail; and there was no fraudulent scheme that resulted in PacifiCare refusing to negotiate with Omnicare. Omnicare has failed to demonstrate the existence of a genuine issue of material fact regarding any of the factual predicates which would allow recovery under a theory of unjust enrichment. *Cf.* *Ass'n Ben. Servs., 493 F.3d at 855* (***HN33***[] "[W]hen the plaintiff's particular theory of unjust enrichment is based on alleged fraudulent dealings and we reject the plaintiff's claims that those dealings, indeed, were fraudulent, the theory of unjust enrichment that the plaintiff has pursued is no longer viable."). Therefore, under any theory of unjust enrichment, Defendants are entitled to summary judgment.

CONCLUSION

For the reasons stated above, Defendants' motion for summary judgment on all claims in Omnicare's First Supplemental and Amended Complaint [556] is granted. Plaintiff's Motion for Partial Summary Judgment Pursuant to *Rule 56* Or in the Alternative Motion to Strike [571] is denied. Defendants' Motion to Strike Certain of Omnicare's Responses [641] is stricken **[**104]** as moot.

Opinion

ORDER GRANTING MOTION TO DISMISS WITH LEAVE TO AMEND

Now before the Court is defendant Stryker Orthopaedics and its related corporations (collectively "Stryker")'s motion to dismiss. Having carefully reviewed the parties' papers, considered their arguments and the relevant legal authority, the Court hereby GRANTS Stryker's motion to dismiss.

BACKGROUND

According to the complaint, this action arises out of an allegedly pervasive kickback scheme orchestrated **[*2]** by defendant Stryker, one of the largest manufacturers of artificial hip and knee replacement devices. (Complaint at P

1.) The alleged scheme involved Stryker's use of phony consulting agreements with orthopedic surgeons to disguise kickbacks paid to doctors and/or hospitals in return for their use of Stryker products in patients undergoing hip and/or knee replacement surgery.

Plaintiff, Goldene Sommerville, underwent hip replacement surgery for her right hip in June 2003 and the left hip in May 2005. One or more of the Stryker products were implanted or otherwise used during the surgeries. (*Id*. at P 32.) [1] Plaintiff alleges that, as a result of the alleged kickback scheme, she incurred higher out-of-pocket costs, including an increase in co-payments and health care premiums, for hip and/or knee surgery. (*Id*. at P 49.) This purported class action seeks damages based upon theories of violation of the Cartwright Act and California's Unfair Practices Act. (*Id*. at P 3.)

The Court shall refer to additional facts as necessary in the remainder of this Order.

ANALYSIS

A. Legal Standard for Motion to Dismiss.

A motion to dismiss is proper under *Federal Rule of Civil Procedure 12(b)(6)* where the pleadings fail to state a claim upon which relief can be granted. The complaint is construed in the light most favorable to the non-moving party and all material allegations in the complaint are taken to be true. *Sanders v. Kennedy, 794 F.2d 478, 481 (9th Cir. 1986)*. The court, however, is not required to accept legal conclusions cast in the form of factual allegations, if those conclusions cannot reasonably be drawn from the facts alleged. *Clegg v. Cult Awareness Network, 18 F.3d 752, 754-55 (9th Cir. 1994)* (citing *Papasan v. Allain, 478 U.S. 265, 286, 106 S. Ct. 2932, 92 L. Ed. 2d 209 (1986))*. Conclusory allegations without more are insufficient to defeat a motion to dismiss for failure to state a claim upon which relief may be granted. *McGlinchy v. Shell Chemical Co., 845 F.2d 802, 810 (9th Cir. 1988)*. Even under the liberal pleading standard of *Federal Rule of Civil Procedure 8(a)(2)*, a plaintiff must do more than recite the elements of the claim and **[*4]** must "provide the grounds of [its] entitlement to relief." *Bell Atlantic Corporation v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 1959, 167 L. Ed. 2d 929 (2007)* (citations omitted). In addition, the pleading must not merely allege conduct that is conceivable, but it must also be plausible. *Id. at 1974*.

B. Claim Under the Cartwright Act.

In order to set out a claim for violation of the Cartwright Act, *California Business and Professions Code § 16700, et seq*., a plaintiff must allege: (1) the formation and operation of a conspiracy; (2) illegal acts done pursuant to the conspiracy; (3) a purpose to restrain trade; and (4) damages caused by these acts. *See Chicago Title Ins. Co. v. Great Western Financial Corp., 69 Cal. 2d 305, 318, 70 Cal. Rptr. 849, 444 P.2d 481 (1968)* ("General allegations of the existence and purpose of the conspiracy are insufficient and appellants must allege specific overt acts in furtherance thereof.") Without sufficient allegations of the existence of an unlawful trust, combination or agreement, there cannot be a violation of the Cartwright Act. *Id*. Furthermore, there can be no conspiracy between related entities, parents and their subsidiaries, because the agreement must be between separate, independent entities capable of combining **[*5]** their efforts to restrain trade. *See, e.g., Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 769-771, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)* (dismissing antitrust conspiracy claim because a wholly owned subsidiary could not conspire with its parents because they have a "complete unity of interest" and "share a common purpose whether or not the parent keeps a tight rein over the subsidiary…")

Here, both parties agree that the named defendants, related parties and subsidiaries, cannot conspire amongst themselves. However, the complaint alleges that the Stryker defendants conspired with unnamed co-conspirators, surgeons performing orthopedic surgeries, in order to reap the rewards of the allegedly pervasive kickback scheme.

---

[1] Plaintiff Claire C. Haggarty in the related, and practically identically-pled suit, *Haggarty v. Stryker*, C08-160 JSW, underwent hip replacement surgery as well and her case is adjudicated by this Order. To the extent the **[*3]** facts differ, the Court will so note throughout.

Plaintiff alleges that the "scheme involves Stryker's use of phony consulting agreements with orthopedic surgeons to disguise kickbacks paid to doctors and/or hospitals in return for their use of Stryker products in patients undergoing hip and/or knee replacement surgery. It was through this scheme that Stryker was able to reduce competition and artificially inflate the price and cost of it [sic] hip and knee surgery products. Thus, Stryker not only created an environment where the choice **[*6]** of medical devices was not drive by safety, effectiveness or the needs of patients, but also one where patients actually had to pay more for the device than they otherwise should have paid." (Complaint at P 1.) The claim under the Cartwright Act alleges that "Stryker and its unnamed co-conspirators have violated California's Cartwright Act …, by forging one or more combinations to accomplish purposes prohibited by and contrary to the Cartwright Act. They engaged in one or more agreements, contracts, combinations, trusts, and or [*sic*] conspiracies to create and maintain market dominance, resulting in artificially high prices for Stryker hip and knee surgery products, including without limitation implant devices and related products, such as bone cement." (*Id*. at P 47.)

It is clear, therefore, from the allegations of the complaint, that Plaintiff alleges the conspiracy or agreement is between the various Stryker defendants and the various unnamed orthopedic surgeons (and, perhaps, hospitals) who engaged in the alleged scheme of promoting the manufacturer's orthopedic products, thereby increasing the costs. There can be, and there is no allegation that there exists a conspiracy among the **[*7]** various named defendants. Therefore, the sole issue is whether Plaintiff has pled sufficient allegations of the existence of an unlawful trust, combination or agreement between the various named Stryker entities and unnamed co-conspirators. *See* *Copperweld, 467 U.S. at 769-771*; *see also* *Chicago Title, 69 Cal. 2d at 318*.

In order to maintain a cause of action under the Cartwright Act, Plaintiff must "not only allege and prove the existence of an unlawful trust or combination, but also has to allege and prove that his business or property has been injured by the very fact of the existence and prosecution of such unlawful trust or combination." *Chicago Title, 69 Cal. 2d at 318* (citation omitted). "General allegations of the existence and purpose of the conspiracy are insufficient and appellants must allege specific overt acts in furtherance thereof." *Id*. Even conceding "the formation of a conspiracy is charged, having for its object a common design and purpose, still we find no statement … as to any specific overt acts done by defendants in pursuance of that design and purpose." *Id*. (citation omitted).

The complaint fails to allege the time, place or the co-conspirators actually involved **[*8]** in the alleged conspiracy. There are no factual allegations regarding the contents or terms of the alleged agreements or outlining any concerted action among any unnamed co-conspirators and defendant Stryker and its related companies. There is some allusion to hospitals in the complaint and institutions in the briefing on this motion, but no factual allegations suggesting the existence of an agreement or concerted action among any hospitals or institutions and the various Stryker defendants. There are no facts indicating the identities of any of the surgeons or institutions either involved in Plaintiff's case or any other instance. There are no factual allegations indicating when or where Stryker entered any of the alleged illegal agreements with the unnamed co-conspirators. There are no factual allegations indicating the terms of any such agreements. Without any specific allegations of an agreement, the complaint fails to comply with *Federal Rule of Civil Procedure 8*. *See* *Twombly, 127 S. Ct. at 1971 n.10* (stating that a complaint that "mention[s] no specific time, place, or person involved in the alleged conspiracies" and "furnish[es] no clue as to … [who] supposedly agreed, or when **[*9]** and where the illicit agreement took place" does not comply with *Federal Rule of Civil Procedure 8*.) [2]

Plaintiff's claim under the Cartwright Act fails to allege any particular wrongdoing and therefore fails to state a cause of action. However, it is conceivable that Plaintiff could amend the complaint to add facts to support an antitrust conspiracy claim. Therefore, the Court GRANTS Stryker's motion to dismiss the Cartwright Act claim with leave to amend.

C. Claim Under *California Business and Professions Code Section 17200*.

[2] To the extent Plaintiff relies on the Congressional testimony, it is not clear that such testimony actually referenced Stryker, as opposed to the other four hip and knee replacement products manufacturers. (*See* Supplemental Declaration of William M. Goodman, testimony of Gregory E. Demske, at 4.)

California's Unfair Competition Law, *California Business & Professions Code § 17200* ("*17200*"), establishes three varieties of unfair competition - acts or practices that are unlawful or unfair or fraudulent. Because the law is stated in the disjunctive, it contemplates three distinct categories of unfair competition and a plaintiff must plead the specific rubric under which **[*10]** the proscribed conduct falls. *Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co., 20 Cal. 4th 163, 180, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (Cal. 1999)*.

When "a plaintiff who claims to have suffered injury from a direct competitor's 'unfair' act or practice invokes *section 17200*, the word 'unfair' in that section means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co., 20 Cal. 4th 163, 180, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (Cal. 1999)*.

Because the Court has found that Plaintiff's antitrust claim fails, the state unfair competition claim fails as well on the same basis. The complaint, as currently drafted, does not specify conduct that threatens an incipient violation of an ***antitrust law***.

In addition, Plaintiff alleges that the alleged conspiracy caused her to suffer financial injury by incurring out-of-pocket costs, including an increase in co-payments and health care premiums, for hip and/or knee surgery. (Complaint at P 49.) The only specific amount Plaintiff asserts **[*11]** she incurred during her two hip replacement surgeries in June 2003 and May 2005 was the payment of "approximately $ 1,500 or more in out-of-pocket expenses for the surgeries." (*Id*. at P 32.) [3] It is unclear from the complaint as drafted whether or what portion of those out-of-pocket expenses are attributable to increased costs of the replacement products and whether or if any of that increased cost is passed along to Stryker.

As currently drafted, the complaint does not establish either an antitrust violation or injury. Accordingly, the Court GRANTS Stryker's motion to dismiss the cause of action for violation of California's unfair competition law. [4]

D. Class Action Claims.

Lastly, Plaintiff must establish that she is actually a member of the class she purports to **[*12]** represent. According to the complaint, the class consists of "[a]ll individuals who are, or at the relevant time were, residents of California who either were uninsured *or had a private health care insurance policy pursuant to which they paid a percentage of the total costs of surgical procedures*, and who had hip or knee implant surgery during the Class Period that involved the use of Stryker products." (Complaint at P 33 (emphasis added).) The complaint does not explicitly set out that Plaintiff has a private health care insurance policy. Even more troubling, however, is that the complaint fails to set out whether the out-of-pocket expenses incurred by Plaintiff represent a fixed co-payment or a percentage of the surgeries. Should Plaintiff seek to amend her complaint, such facts must be alleged in order to qualify as a member of the class she purports to represent.

CONCLUSION

For the foregoing reasons, the Court GRANTS Stryker's motion to dismiss with leave to amend. Plaintiff shall file an amended complaint in compliance with this Order by no later than February 6, 2009. Stryker shall have twenty days thereafter to file their responsive pleading. If Plaintiff fails to file an amended **[*13]** complaint by February 6, 2009, the Court will dismiss this action with prejudice.

IT IS SO ORDERED.

---

[3] Plaintiff Haggarty, in the related suit, alleges that she incurred $ 3,600 in out-of- pocket expenses for her surgeries. (Haggarty Complaint at P 30.)

[4] The Court is not persuaded by Stryker's argument that the Court should abstain from adjudicating whether an injunction would be appropriate relief for a well-drafted claim under California's unfair competition law. The Court does not find the issue mooted as a matter of law.

Dated: January 16, 2009

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Justiciability > Standing > General Overview

HN1[] **Motions to Dismiss, Failure to State Claim**

The purpose of a motion to dismiss pursuant to *N.C. Gen. Stat. § 1A-1, N.C. R. Civ. P. 12(b)(6)* is to test the legal sufficiency of the pleading against which the motion is directed. *Rule 12(b)(6)* generally precludes dismissal except in those instances where the face of the complaint discloses some insurmountable bar to recovery. One such bar to recovery is a lack of standing, which may be challenged by a motion to dismiss for failure to state a claim upon which relief may be granted.

Constitutional Law > ... > Case or Controversy > Standing > General Overview

HN2[] **Case or Controversy, Standing**

The North Carolina Constitution confers standing on those who suffer harm: All courts shall be open, and every person for an injury done him in his lands, goods, person, or reputation shall have remedy by due course of law. *N.C. Const. art. I, § 18*.

Constitutional Law > ... > Case or Controversy > Standing > General Overview

HN3[] **Case or Controversy, Standing**

Although North Carolina courts are not bound by the "case or controversy" requirement of the United States Constitution with respect to the jurisdiction of federal courts, similar "standing" requirements apply to refer generally to a party's right to have a court decide the merits of a dispute.

Civil Procedure > ... > Justiciability > Standing > Injury in Fact

HN4[] **Standing, Injury in Fact**

The irreducible constitutional minimum of standing is defined as as: (1) "injury in fact" - an invasion of a legally protected interest that is (a) concrete and particularized and (b) actual or imminent, not conjectural or hypothetical, (2) the injury is fairly traceable to the challenged action of the defendant, and (3) it is likely, as opposed to merely speculative, that the injury will be redressed by a favorable decision. Parties without standing to bring a claim, cannot invoke the subject matter jurisdiction of the North Carolina courts to hear their claims.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Justiciability > Standing > General Overview

HN5[] **Motions to Dismiss, Failure to State Claim**

A motion to dismiss a party's claim for lack of standing is tantamount to a motion to dismiss for failure to state a claim upon which relief can be granted according to *N.C. Gen. Stat. § 1A-1, N.C. R. Civ. P. 12(b)(6)*. The courts in North Carolina use the term "standing" to refer generally to a party's right to have a court decide the merits of a dispute. A court may not properly exercise subject matter jurisdiction over the parties to an action unless the standing requirements are satisfied.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

HN6[] **Private Actions, Standing**

Standing is often an issue in an indirect purchaser case, where there are contentions that injury is conjectural and damage awards are speculative. An indirect purchaser is one who purchases a product from some intermediary party rather than directly from the manufacturer.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

HN7[] **Purchasers, Indirect Purchasers**

Although indirect purchaser suits are barred in federal antitrust cases, states can permit indirect purchaser suits under state antitrust laws. A state may allow an indirect purchaser to sue under the State's own ***antitrust law***.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

HN8[] **Private Actions, Standing**

Indirect purchasers have standing under *N.C. Gen. Stat. § 75-16* to sue under the antitrust laws of North Carolina.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN9[] **Private Actions, Standing**

Antitrust laws are intended to protect competition and, thus, standing is generally limited to consumers or competitors.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN10[] **Motions to Dismiss, Failure to State Claim**

A motion to dismiss under *N.C. Gen. Stat. § 1A-1, N.C. R. Civ. P. 12(b)(6)* requires a court to determine whether, as a matter of law, the allegations of the complaint, treated as true, are sufficient to state a claim upon which relief may be granted. The complaint is to be liberally construed in ruling upon a *Rule 12(b)(6)* motion, and it should not be dismissed unless it appears to a certainty that the plaintiff is entitled to no relief under any set of facts which could be proved in support of the claim.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN11[] **Private Actions, State Regulation**

Complex antitrust cases invariably involve complicated questions of causation and damages.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

HN12[] **Purchasers, Indirect Purchasers**

Fear of complexity is not a sufficient reason to disallow a suit by an indirect purchaser, given the intent of the General Assembly to establish an effective private cause of action for aggrieved consumers in North Carolina. Allowing indirect purchasers to sue for N.C. Gen. Stat. ch. 75 violations will best advance the legislative intent that such violations be deterred, and that aggrieved consumers have a private cause of action to redress Chapter 75 violations.

Constitutional Law > Relations Among Governments > Full Faith & Credit

HN13[] **Relations Among Governments, Full Faith & Credit**

See *U.S. Const. art. IV, § 1*.

Civil Procedure > ... > Preclusion of Judgments > Full Faith & Credit > Full Faith & Credit Statutes

HN14[] **Full Faith & Credit, Full Faith & Credit Statutes**

A judgment entered in a class action, like any other judgment entered in a state judicial proceeding, is presumptively entitled to full faith and credit under the express terms of *28 U.S.C.S. § 1738*.

Civil Procedure > ... > Preclusion of Judgments > Full Faith & Credit > Full Faith & Credit Statutes

HN15[] **Full Faith & Credit, Full Faith & Credit Statutes**

See *28 U.S.C.S. § 1738*.

Opinion

[552]** Appeal by Plaintiff from order entered 11 May 2007 by Judge Ben F. Tennille in Special Superior Court for Complex Business Cases. Heard in the Court of Appeals 26 August 2008.

[*19] McGEE, Judge.

Plaintiff filed suit under *N.C. Gen. Stat. §§ 75-1* and *75-1.1* on 2 April 2004 alleging Defendants engaged in price fixing of ethylene propylene diene monomor elastomers (EPDM). Plaintiff filed his complaint as a putative class action on behalf of similarly situated North Carolina consumers. Plaintiff filed an amended complaint on 23 December 2004 that removed Defendants DSM N.V., DSM Elastomers Holding Company, Inc., and DSM

Elastomers, Inc. from **[***2]** the complaint and added claims that Defendants concealed the alleged conspiracy and illegal conduct from consumers. The case was designated as a complex business case on 15 March 2005 and Special Superior Court Judge Ben F. Tennille was assigned to preside over the case.

[*20] **[**553]** Pursuant to *N.C. Gen. Stat. § 1A-1, Rule 12(b)(6)*, Defendants Bayer Corporation, Bayer MaterialScience LLC (f/k/a Bayer Polymers LLC), Crompton Corporation, Crompton Manufacturing Company, Inc., The Dow Chemical Company, E.I. du Pont de Nemours and Company, DuPont Dow Elastomers L.L.C., and DSM Copolymer, Inc. filed a motion on 24 January 2005 to dismiss Plaintiff's first amended complaint for failure to state a claim for relief. Defendants Dow Chemical Company, E.I. DuPont de Nemours & Company, and DuPont Dow Elastomers, L.L.C. (collectively, DDE Defendants) entered into a multistate settlement of the indirect purchaser claims filed against them by consumers in the District of Columbia and twenty-eight states, including North Carolina. Circuit Court Judge John McAfee in Claiborne County, Tennessee approved this settlement on 21 June 2005. Plaintiff filed a motion to dismiss the claims against the DDE Defendants on **[***3]** 26 September 2005.

The trial court heard the remaining Defendants' motion to dismiss Plaintiff's first amended complaint on 21 November 2005 and entered an order allowing Plaintiff to again amend his complaint. Plaintiff filed a second amended complaint on 12 December 2005.

In his second amended complaint, Plaintiff alleged he purchased EPDM roofing materials and a pond liner, as well as at least one vehicle with EPDM components, between 1994 and 2002. Plaintiff's second amended complaint also stated that EPDM was not a consumer product but a component found in many consumer products and that the amount of EPDM in a given product will vary depending on the nature of that product. For example, Plaintiff alleged "[t]he EPDM roofing [material] purchased by Plaintiff and other Class Members is believed to contain at least 90% EPDM" and "[t]he tires, window molding, hoses, and other rubber products purchased by Plaintiff and the other Class Members [are] believed to include 1% or more EPDM."

Plaintiff alleged that between 1994 and 2002, Defendants manufactured, marketed, sold, and/or distributed throughout the United States virtually all EPDM produced in the United States during that time. **[***4]** Plaintiff further alleged in his second amended complaint that Defendants engaged in price fixing of EPDM by agreeing to restrict output and raise prices for the sale of EPDM sold in the United States and elsewhere. Plaintiff claimed that this agreement forced Plaintiff and other consumers to pay higher prices for EPDM while Defendants earned profits exceeding a normal rate of return. **[*21]** Plaintiff alleged that he and other North Carolina class members absorbed all of the portion of the price affected by the price fixing agreement because middlemen passed on 100% or more of the overcharge from Defendants.

Defendants Bayer Corporation, Bayer MaterialScience LLC, and Bayer AG (collectively Bayer Defendants) agreed to a multistate settlement of indirect purchaser claims on or about 27 October 2005, including the claims of indirect purchasers in North Carolina. Plaintiff filed a motion on 5 April 2006 for leave to dismiss with prejudice the claims against the Bayer Defendants.

Defendants DSM Copolymer, Inc., Chemtura (f/k/a Crompton) Corporation, Uniroyal Chemical Company, Inc., and Exxon Mobile Chemical renewed their motion to dismiss Plaintiff's second amended complaint on 9 January 2006.

In **[***5]** an order entered 11 May 2007, the trial court granted Plaintiff's motion to dismiss claims against the DDE Defendants and the Bayer Defendants, and ordered that notice of the settlement with the DDE Defendants and the Bayer Defendants be published in the Asheville *Citizen-Times* and the Raleigh *News & Observer.* The trial court also granted the moving Defendants' *Rule 12(b)(6)* motion to dismiss for lack of standing. Plaintiff appeals from the 11 May 2007 order of the trial court.

Following Plaintiff's appeal to our Court, Plaintiff filed a motion with our Court on 18 November 2008 to dismiss his claims with prejudice against Defendant Exxon Mobil Chemical after settlement with this Defendant. We grant Plaintiff's motion to dismiss the claims with prejudice against Defendant Exxon Mobil Chemical, a division or subsidiary of Exxon Mobil Corp.

[554]** On appeal, Plaintiff argues that the trial court erred by dismissing Plaintiff's claims pursuant to *N.C. Gen. Stat. § 1A-1, Rule 12(b)(6)* when Plaintiff had standing to sue under *N.C. Gen. Stat. §§ 75-1* and *75-1.1*, and also erred in requiring publication of additional class notice.

I.

In his first assignment of error, Plaintiff argues the trial court **[***6]** erred in dismissing his complaint pursuant to *N.C.G.S. § 1A-1, Rule 12(b)(6)* for failure to state a claim for relief because Plaintiff lacked standing.

[*22] ***HN1***[] The "purpose of a motion [to dismiss] pursuant to *N.C.G.S. § 1A-1, Rule 12(b)(6)* is 'to test the legal sufficiency of the pleading against which [the motion] is directed.'" *Eastway Wrecker Serv., Inc. v. City of Charlotte, 165 N.C. App. 639, 647, 599 S.E.2d 410, 415 (2004)* (internal citations omitted). "*Rule 12(b)(6)* '"generally precludes dismissal except in those instances where the face of the complaint discloses some insurmountable bar to recovery."'" *Meadows v. Iredell County, 187 N.C. App. 785, ___, 653 S.E.2d 925, 927 (2007)* (internal citations omitted). "One such bar to recovery is a lack of standing, which may be challenged by a motion to dismiss for failure to state a claim upon which relief may be granted." *Id. at ___, 653 S.E.2d at 927* (citing *Krauss v. Wayne County DSS, 347 N.C. 371, 373, 493 S.E.2d 428, 430 (1997)* ("The 12(b)(6) motion was made on the basis that [the] plaintiff did not have standing[.]")).

As our Supreme Court recently stated, "[a]s a general matter, ***HN2***[] the North Carolina Constitution confers standing on those **[***7]** who suffer harm: 'All courts shall be open; [and] every person for an injury done him in his lands, goods, person, or reputation shall have remedy by due course of law . . . '" *Mangum v. Raleigh Bd. of Adjust., ___ N.C. ___, ___, 669 S.E.2d 279, 281-82 (2008)* (quoting *N.C. Const. art. I, § 18*).

HN3[] "Although North Carolina courts are not bound by the 'case or controversy' requirement of the United States Constitution with respect to the jurisdiction of federal courts, similar 'standing' requirements apply 'to refer generally to a party's right to have a court decide the merits of a dispute.'" *Meadows, 187 N.C. App. at 787, 653 S.E.2d at 927-28* (quoting *Neuse River Found., Inc. v. Smithfield Foods, Inc., 155 N.C. App. 110, 114, 574 S.E.2d 48, 52 (2002)*, *disc. review denied, 356 N.C. 675, 577 S.E.2d 628 (2003))*.

> In *Neuse River,* this Court defined ***HN4***[] "[t]he 'irreducible constitutional minimum' of standing" as: (1) "injury in fact" - an invasion of a legally protected interest that is (a) concrete and particularized and (b) actual or imminent, not conjectural or hypothetical; (2) the injury is fairly traceable to the challenged action of the defendant; and (3) it is likely, as opposed to merely speculative, **[***8]** that the injury will be redressed by a favorable decision.

Meadows, 187 N.C. App. at 787, 653 S.E.2d at 928 (quoting *Neuse River, 155 N.C. App. at 114, 574 S.E.2d at 52*). "Parties without standing to bring a claim, cannot invoke the subject matter jurisdiction of the North Carolina courts to hear their claims." *Id. at 787, 653 S.E.2d at 928*.

[*23] In the case before us, the trial court quoted *Slaughter v. Swicegood, 162 N.C. App. 457, 464, 591 S.E.2d 577, 582 (2004)* in its order, stating that ***HN5***[] "[a] motion to dismiss a party's claim for lack of standing is tantamount to a motion to dismiss for failure to state a claim upon which relief can be granted according to *Rule 12(b)(6)*." The Courts in our state use the term "standing" to "refer generally to a party's right to have a court decide the merits of a dispute." *Neuse River, 155 N.C. App. at 114, 574 S.E.2d at 52*. A court may not properly exercise subject matter jurisdiction over the parties to an action unless the standing requirements are satisfied. *Aubin v. Susi, 149 N.C. App. 320, 324, 560 S.E.2d 875, 878 (2002)*. The trial court in the present case correctly noted that ***HN6***[] standing is often an issue in an indirect purchaser case, such as the **[***9]** case before us, where there are contentions that injury is conjectural and damage awards are speculative. An indirect purchaser is one who purchases a product from some intermediary party rather than directly from the manufacturer. *See Hyde v. Abbott Laboratories,* ***[**555]*** *123 N.C. App. 572, 574, 473 S.E.2d 680, 681-82 (1996)*.

The United States Supreme Court addressed the issue of standing for indirect purchasers under federal ***antitrust law*** in *Hanover Shoe Co. v. United Shoe Mach. Corp., 392 U.S. 481, 88 S. Ct. 2224, 20 L. Ed. 2d 1231 (1968)*, and in *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*. In *Hanover Shoe,* the plaintiff shoe manufacturer sued the defendant, a manufacturer of shoe machinery, for treble damages alleging the defendant created a monopoly over its more complicated and important shoe machinery by leasing, but refusing to sell, the machinery. *Hanover Shoe, 392 U.S. at 483, 20 L. Ed. 2d at 1236*. The defendant argued that the plaintiff shoe manufacturer suffered no injury because it simply passed the illegal overcharges on to its customers. *Id. at 487-88, 20 L. Ed. 2d at 1238*. The Supreme Court rejected the so-called "passing-on" defense and held that a direct purchaser **[***10]** was entitled to damages even if it did pass on the higher prices to its customers. *Id. at 488-89, 20 L. Ed. 2d at 1238-39*.

In *Illinois Brick,* the State of Illinois brought suit as an indirect purchaser against manufacturers and distributors of concrete block. *Illinois Brick, 431 U.S. at 726-27, 52 L. Ed. 2d at 713*. At issue was whether an indirect purchaser plaintiff could use the "passing on" theory offensively to show injury inflicted by the defendant's violations of federal antitrust laws. *Id.* The Supreme Court held that indirect purchasers did not have standing to sue under the federal antitrust laws. *Id.*

[*24] ***HN7***[] Although indirect purchaser suits were barred in federal antitrust cases by *Illinois Brick,* the U.S. Supreme Court later held that states could permit indirect purchaser suits under state antitrust laws in *Associated Gen. Contractors v. Carpenters, 459 U.S. 519, 103 S. Ct. 897, 74 L. Ed. 2d. 723 (1983)* (*AGC*). *See also* *California v. ARC America Corp., 490 U.S. 93, 109 S. Ct. 1661, 104 L. Ed. 2d 86 (1989)*(A state may allow an indirect purchaser to sue under the state's own ***antitrust law***.). In *AGC,* the plaintiff labor union sued the contractor's association under *§ 4 of the Clayton Act* alleging the contractor's association **[***11]** had conspired with nonunion contractors and subcontractors to adversely affect the trade of the unionized firms and the unions themselves. *Id.; 15 U.S.C. § 15 (2004)*. In holding that the union was not a proper plaintiff under *§ 4 of the Clayton Act*, the Supreme Court identified several factors to be considered in determining standing under federal ***antitrust law***. *Id.* These factors include: (1) whether the plaintiff is a consumer or a competitor in the market in which trade was restrained; (2) whether the injury alleged is a direct or indirect impact of the restraint alleged; (3) whether there exists an identifiable class of persons whose self-interest would normally motivate them to vindicate the public interest in antitrust enforcement; (4) whether the damages claim is highly speculative; and (5) whether the plaintiff's claims risk duplicative recoveries and would require a complex apportionment of damages. *AGC, 459 U.S. at 539-44, 74 L. Ed. 2d at 738-42*.

The issue of whether suit by an indirect purchaser is allowed in North Carolina was decided by our Court in *Hyde v. Abbott Laboratories* when we held that ***HN8***[] indirect purchasers have standing under *N.C. Gen. Stat. § 75-16* to sue under **[***12]** the antitrust laws of North Carolina. *Hyde, 123 N.C. App. at 584, 473 S.E.2d at 688*. In *Hyde,* the plaintiffs were consumers of infant formula manufactured by the defendants. *Id. at 573-74, 473 S.E.2d at 681-82*. In the plaintiffs' class action suit, they alleged that the defendants violated several of North Carolina's antitrust laws by "'engaging in a continuing conspiracy to fix the wholesale price of infant formula sold within the United States, including North Carolina.'" *Id. at 573, 473 S.E.2d at 681*. The plaintiffs also alleged that this "illegal conspiracy caused an increase in wholesale prices paid by the parties who purchased the infant formula directly from the manufacturer ([]direct purchasers) above that which the direct purchasers would have paid absent any conspiracy." *Id.* Our Court stated that the plaintiffs in *Hyde* were "indirect purchasers from the defendant manufacturers **[**556]** because they purchased infant formula through parties other than the [defendant] manufacturer." *Id. at 574, 473 S.E.2d at 681-82*. In *Hyde,* the trial **[*25]** court granted the defendants' motion to dismiss for lack of standing, but on appeal our Court reversed, holding indirect purchasers have standing to sue **[***13]** under the antitrust laws of North Carolina. *Id. at 584, 473 S.E.2d at 688*.

In the present case, Plaintiff argues that *Hyde* established standing for all indirect purchasers, and that the trial court ignored this Court's holding in *Hyde* by imposing limits on the rights of indirect purchasers to sue under the North Carolina antitrust statutes. In contrast, Defendants contend that while *Hyde* established that indirect purchasers have standing, *Hyde* did not delineate the scope or limits of that standing and the well-established doctrine of proximate cause requires that there be limits to this standing. They argue that to adopt Plaintiff's interpretation of *Hyde* would mean that every indirect purchaser claiming to be injured under the antitrust statutes would have a cause of action no matter how attenuated the causal connection between the antitrust violation and the alleged injury. Defendants contend this outcome would be inconsistent with the principles of proximate cause and could result in an unmanageable surge in antitrust litigation.

Defendants point out that in a prior order entered by Judge Tennille in *Crouch v. Crompton Corp., 2004 NCBC 7, P 47, 2004 WL 2414027 (N.C. Super. Ct. Oct. 26, 2004)*, **[***14]** Judge Tennille had stated that *Hyde* did not set forth the scope and breadth of standing under the North Carolina antitrust statutes. In *Crouch,* the trial court stated there was a need for certain boundaries for indirect purchaser standing and it applied a slightly modified five factor *AGC* test. *Crouch, 2004 NCBC 7 PP 66-74*. In the case before us, the trial court applied these same five factors to determine whether Plaintiff had standing.

Plaintiff argues that the *AGC* factors are not applicable to the issue of standing for indirect purchasers in antitrust cases and that *AGC* is distinguishable from the present case. Plaintiff correctly distinguishes *AGC* from the case before us in several relevant ways, including that the plaintiff in *AGC* was not an indirect purchaser. The U.S. Supreme Court held in *AGC* that the plaintiff union was not a person injured by reason of an antitrust violation. *AGC* involved competitors rather than consumers. Also, the plaintiffs in *AGC* alleged breach of a collective-bargaining agreement and not antitrust violations. *See AGC, 459 U.S. 519, 103 S. Ct. 897, 74 L. Ed. 2d 723*.

Defendants contend the modified *AGC* five factor test applied by the trial court in this case is a logical **[***15]** and appropriate standard by **[*26]** which to distinguish actual injuries resulting from violations of North Carolina antitrust statutes from those complaints that are too remote and attenuated. Defendants argue that trial courts in several other states have considered this issue and have applied the *AGC* factors in determining which indirect purchasers have standing to sue under their state antitrust laws. Defendants cite the following cases where trial courts in other states applied the *AGC* factors to dismiss indirect purchaser claims brought by retail customers against Visa and MasterCard. The retail customers alleged that the credit card companies' tying arrangements with retail stores caused prices to increase. *See Fucile v. Visa U.S.A., Inc., No. S1560-03 CNC, 2004 WL 3030037 (Vt. Super. Ct. Dec. 27, 2004)*; *Southard v. Visa U.S.A., Inc.,* No. LACV 031729, 2004 WL 3030028 (Iowa Dist. Ct. Nov. 17, 2004), *aff'd, 734 N.W.2d 192 (Iowa 2007)*; *Knowles v. Visa U.S.A., Inc., No. CV-03-707, 2004 Me. Super. LEXIS 227, 2004 WL 2475284 (Me. Super. Ct. Oct. 20, 2004)*; *Tackitt v. Visa U.S.A., Inc.,* No. CI03-740, 2004 WL 2475281 (Neb. Dist. Ct. Oct. 19, 2004). However, in these actions, damages alleged by the plaintiffs were through **[***16]** an alleged inflated cost of goods sold by merchants who were injured by Visa's and MasterCard's inflated cost of financial services. The plaintiffs were not consumers or competitors in the allegedly restrained market, nor were the plaintiffs indirect purchasers in that the plaintiffs did not end up with a product supplied by the defendants. ***HN9***[] Antitrust laws were intended to protect competition and, thus, standing is **[**557]** generally limited to consumers or competitors. There was no connection between the plaintiffs' purchases of consumer goods and the defendants' alleged unlawful tying of debit services in the Visa and MasterCard suits. Therefore, the courts denied indirect purchaser standing to the plaintiffs in several of these actions. *See Anderson Contracting, Inc. v. Bayer AG,* CL 95959, 18 (Iowa Dist. Ct. 31 May 2005) ("Neither *Associated General Contractors* nor *Southard* involved a product, and thus price-fixing was not at issue, as it is in the present case.").

Plaintiff cites a recent Iowa District Court decision in which the court rejected the *AGC* factors in determining an indirect purchaser's standing, because *AGC* did not involve price fixing and because the plaintiffs in *AGC* were competitors **[***17]** rather than purchasers. *Id.* As stated above, *AGC* is distinguishable from the present case and we hold the *AGC* factors do not apply in determining which indirect purchasers have standing to sue under the North Carolina antitrust statutes.

[*27] Plaintiff has alleged in his complaint that he is a consumer who purchased EPDM roofing material and a pond liner manufactured, marketed, distributed, or sold by one or more of Defendants, as well as at least one vehicle with EPDM components. Plaintiff's allegations of standing show he is a consumer and a purchaser of EPDM. According to the complaint, Plaintiff alleges EPDM comprises 80 to 85 percent of ethylene-propylene elastomers. Plaintiff therefore has alleged that EPDM is a significant component of at least one of the products that he purchased. Plaintiff contends there exists a causal connection between the Defendants' alleged price fixing and the Plaintiff's injury. Plaintiff has alleged in his complaint, that because EPDM is a significant component part of the products at issue in this case, an increase in the price of EPDM could have a ripple effect, thereby increasing the price of the product for Plaintiff, the ultimate consumer.

Defendants **[***18]** contend there are multiple inputs at multiple steps in the EPDM distribution chain, and the allegedly price-fixed product is transformed into a new product in at least one such step. These multiple variables, Defendants argue, render injury and damages impossibly speculative, and therefore the causal chain cannot be established. Defendants cite *Crouch v. Crompton Corp., 2004 NCBC 7, P 30, 2004 WL 2414027, *18-25 (N.C. Super. Ct. Oct. 26, 2004)*, a case in which the trial court expressed strong concerns about stretching ***antitrust law*** to cover damages in cases like these. In *Crouch,* the trial court analyzed the complexity and costliness of adjudicating an antitrust case based on rubber compounds and chemicals that form a component of tire products at issue. The trial court in *Crouch* was concerned in part about the lack of express statutory language granting indirect purchaser standing or any definitive ruling by our Supreme Court on indirect purchaser standing. However, our Court and the courts in our state are clearly bound by the prior opinion of our Court in *Hyde* dealing with indirect purchaser cases, unless and until it is overturned by our Supreme Court or by enactments of the General **[***19]** Assembly, which has not occurred in the more than twelve years since *Hyde* was decided by our Court. See *In the Matter of Appeal from Civil Penalty, 324 N.C. 373, 384, 379 S.E.2d 30, 37 (1989).*

The issue now before our Court is a *Rule 12(b)(6)* motion analysis. ***HN10***[] A motion to dismiss under *Rule 12(b)(6)* requires us to determine "whether, as a matter of law, the allegations of the complaint, treated as true, are sufficient to state a claim upon which relief may be **[*28]** granted[.]" *Harris v. NCNB, 85 N.C. App. 669, 670, 355 S.E.2d 838, 840 (1987)* (citation omitted). The complaint is to be liberally construed in ruling upon a *Rule 12(b)(6)* motion, and it should not be dismissed unless it appears to a certainty that the plaintiff is entitled to no relief under any set of facts which could be proved in support of the claim. *Jenkins v. Wheeler, 69 N.C. App. 140, 142, 316 S.E.2d 354, 356*, *disc. review denied, 311 N.C. 758, 321 S.E.2d 136 (1984)*. In a *Rule 12(b)(6)* determination we must decide whether Plaintiff, as an indirect purchaser of products containing EPDM, has antitrust standing to recover damages under Chapter 75. What is at issue is Plaintiff's right of access to the courts, not the merits **[***20]** of his allegations. A trial court will be better **[**558]** suited to assess whether Plaintiff will be able to prove causation based on the alleged antitrust violation at the class certification and summary judgment stages. *See Investors Corp. v. Bayer AG,* S1011-04 CaC. (Vt. Super. Ct. 1 June 2005). At a *Rule 12(b)(6)* stage in this action, Plaintiff has alleged sufficient facts in his complaint to show a right of recovery. *See Davis v. Messer, 119 N.C. App. 44, 51, 457 S.E.2d 902, 906 (1995)*.

The injury that Plaintiff alleges appears to be within the type of injury that the General Assembly intended to address through our state's antitrust and consumer fraud law. If Plaintiff can demonstrate that the increased EPDM prices affected the price of the goods he purchased, then he will have established the type of injury to indirect purchasers that the General Assembly intended to remedy by allowing indirect purchaser suits.

Defendants challenge the speculative nature of Plaintiff's damages claim. *See AGC, 459 U.S. at 542, 74 L. Ed. 2d at 741*. Plaintiff argues he "will prove his damages through expert testimony using accepted economic analysis[.]" Defendants contend this simple statement of what Plaintiff **[***21]** states he will do at trial is not convincing enough to refute the specific and well-supported concerns of the trial court as to the speculative nature of Plaintiff's damages.

We agree with the trial court's statement that calculation of Plaintiff's damages would be a "daunting task." In *Hanover Shoe,* the Supreme Court observed how tracing a cost increase through several levels of a chain of distribution "would often require additional long and complicated proceedings involving massive evidence and complicated theories." *Hanover Shoe, 392 U.S. at 493, 20 L. Ed. 2d at 1241*. It is correct that the fact that EPDM is a component part and not an end product is not a complete bar to recovery; however, this consideration **[*29]** does make calculating Plaintiff's damages more difficult. *See Illinois Brick, 431 U.S. at 759, 52 L. Ed. 2d at 733*.

Defendants contend that courts would have to isolate the effect of the alleged conspiracy on the price of EPDM and rule out the numerous other factors that could cause a price increase in these products such as inflation, prices of other inputs, transport costs, product demand, and market conditions. Thus, a rigorous economic analysis would be required to determine **[***22]** whether increased prices were the result of the alleged price fixing or the result of some other factor.

The U.S. Court of Appeals for the Ninth Circuit has recognized, ***HN11***[] "Complex antitrust cases . . . invariably involve complicated questions of causation and damages." *Forsyth v. Humana, Inc., 114 F.3d 1467, 1478 (9th Cir. 1997)*. Even if the present case proves to be no exception, that is not sufficient reason to dismiss for lack of standing. As the trial court found, considering several products containing EPDM adds to the complexity of apportioning damages in this case. The analysis described above would have to be conducted for every product at issue in order to accurately calculate Plaintiff's damages. Our Court recognized in *Hyde* that a suit by indirect purchasers under our antitrust laws would be complex. However, ***HN12***[] "fear of complexity is not a sufficient reason to disallow a suit by an indirect purchaser, given the intent of the General Assembly to 'establish an effective private cause of action for aggrieved consumers in this State.'" *Hyde, 123 N.C. App. at 584, 473 S.E.2d at 687-88* (quoting *Marshall, 302 N.C. at 543, 276 S.E.2d at 400*).

As our Court concluded in *Hyde,* "allowing **[***23]** indirect purchasers to sue for Chapter 75 violations will best advance the legislative intent that such violations be deterred, and that aggrieved consumers have a private cause of action to redress Chapter 75 violations." *Id. at 584, 473 S.E.2d at 688*. We therefore hold that Plaintiff has standing to bring this antitrust and consumer fraud action. We reverse the order of the trial court dismissing Plaintiff's claims.

II.

In his second assignment of error, Plaintiff argues the trial court erred in requiring publication of additional class notice of the settlement with the DDE Defendants and the Bayer Defendants in the Asheville *Citizen-Times* and the *The News & Observer* of Raleigh. Plaintiff specifically contends the **[**559]** trial court failed to give **[*30]** full faith and credit to the order of Judge John McAfee of the Circuit Court of Tennessee, finding the notice of settlement given to the Bayer settlement class members "complied fully with the laws of the State of Tennessee, due process, and any other applicable rules of the Court."

Plaintiff cites *Freeman v. Pacific Life Ins. Co., 156 N.C. App. 583, 577 S.E.2d 184 (2003)*, in support of his argument. In *Freeman,* the plaintiffs argued that notice **[***24]** given to them pursuant to a final settlement order of a class action lawsuit pending in Kentucky was inadequate and that the notice did not meet due process standards. *Freeman, 156 N.C. App. at 585, 577 S.E.2d at 186*. The plaintiffs argued that the Kentucky settlement was not entitled to full faith and credit in North Carolina. This Court's review was limited to whether the Kentucky court had already litigated the due process and jurisdictional issues. We determined that the Kentucky judgment was entitled to full faith and credit. *Id. at 586-90, 577 S.E.2d at 186-89*. Therefore, the notice given pursuant to the Kentucky order was adequate and binding on the North Carolina Courts. *Id.*

Judge McAfee in the case before us determined that "[n]otice given to the Bayer Settlement Class members was reasonably calculated under the circumstances to inform the Bayer Settlement Class" and that such notice "complied fully with the laws of the State of Tennessee [and] due process[.]" The record in this case thus shows that the Tennessee court addressed the notice and due process issues in its order. The United States Constitution directs that ***HN13***[] "[f]ull faith and credit shall be given in each state to **[***25]** the public acts, records, and judicial proceedings of every other state." *U.S. Const. art. IV, § 1*. The United States Supreme Court has also held that ***HN14***[] "a judgment entered in a class action, like any other judgment entered in a state judicial proceeding, is presumptively entitled to full faith and credit under the express terms of [*28 U.S.C. § 1738*]." *Matsushita Elec. Indus. v. Epstein, 516 U.S. 367, 374, 116 S. Ct. 873, 134 L. Ed. 2d 6, 17 (1996)*. *28 U.S.C. § 1738 (2007)* provides that ***HN15***[] "[t]he records and judicial proceedings of any court of any . . . State . . . shall have the same full faith and credit in every court within the United States . . . from which they are taken."

We hold the trial court erred in failing to give full faith and credit to the order of the Tennessee court. The decretal section of the trial court's order requiring additional publication in North Carolina newspapers of the class settlement is reversed. Reversed and remanded.

[*31] Judges McCULLOUGH and STROUD concur.

Judge McCullough concurred in this opinion prior to 31 December 2008.

Lambert v. Bd. of Comm'rs

United States District Court for the Eastern District of Louisiana

January 22, 2009, Decided; January 22, 2009, Filed

CIVIL ACTION NO: 05-5931 SECTION: R(4)

Reporter

2009 U.S. Dist. LEXIS 124097 *

JAMES KELLY LAMBERT, INDIVIDUALLY AND ON BEHALF OF OTHERS SIMILARLY SITUATED VERSUS BOARD OF COMMISSIONERS OF THE ORLEANS LEVEE DISTRICT, ET AL.

Prior History: *Lambert v. Bd. of Comm'rs of the Orleans Levee Dist., 2009 U.S. Dist. LEXIS 124047 (E.D. La., Jan. 22, 2009)*

Core Terms

Counsel: **[*1]** For James Kelly Lambert, individually and on behalfof all others similarly situated, Donald J Scott, W Robin Lovelock, individually and on behalf of all others similarly situated, Plaintiffs: Adam Stewart Lambert, LEAD ATTORNEY, Andre P. Guichard, Adam S. Lambert, Attorney at Law, New Orleans, LA; Louis Roy Koerner, Jr., Koerner Law, Houma, LA.

For Board of Commissioners of the Orleans Levee District, Defendant: Thomas P. Anzelmo, LEAD ATTORNEY, McCranie, Sistrunk (Metairie), Metairie, LA; Andre Jude Lagarde, U.S. Attorney's Office (New Orleans), New Orleans, LA; Kyle P. Kirsch, McCranie Sistrunk (New Orleans), New Orleans, LA.

For Marine Recovery and Salvage, LLC, Douglas Scott Carmouche, Michael George Mayer, Defendants: Glenn B. Adams, LEAD ATTORNEY, Chauntis T. Jenkins, Denia Sylve Aiyegbusi, Porteous, Hainkel & Johnson (New Orleans), New Orleans, LA.

For James P Huey, Defendant: Bradley Joseph Schlotterer, LEAD ATTORNEY, Brett P. Fenasci, Charles Rowand Talley, Karen Waters Shipman, Kean Miller (New Orleans), New Orleans, LA.

For George L Carmouche, Defendant: Brennan Cody Ardoin, LEAD ATTORNEY, Brennan C. Ardoin, Attorney at Law, Baton Rouge, LA.

For Resolve Marine Group, Defendant: **[*2]** Russell Keith Jarrett, LEAD ATTORNEY, Joseph I. Giarrusso, III, Liskow & Lewis (New Orleans), New Orleans, LA.

Judges: SARAH S. VANCE, UNITED STATES DISTRICT JUDGE.

Opinion by: SARAH S. VANCE

Opinion

ORDER AND REASONS

A number of summary judgment motions are before the Court. Defendants Marine Recovery and Salvage, LLC, Scott Carmouche, and Michael Mayer have filed four motions for partial summary judgment on plaintiffs' claims. (R. Docs. 207, 211, 214, & 217). Defendant Resolve Marine Group has separately moved for summary judgment on all of plaintiffs' claims. (R. Doc. 195). The Court rules as follows.

I. Background

Plaintiffs James Kelly Lambert, Donald Scott, and Robin Lovelock brought this case as a purported class action on behalf of similarly-situated persons who own vessels located in two Orleans Parish marinas operated by the Board of Commissioners for the Orleans Levee District. Plaintiffs name as defendants the Board of Commissioners for the Levee District; James P. Huey, the former President of the Levee District; Marine Recovery and Salvage, LLC ("Marine Recovery"); George Carmouche, a former attorney for the Levee District; Scott Carmouche; Michael Mayer; Resolve Marine Group ("Resolve"); and St. Tammany **[*3]** Pearl River Salvage. [1]

Plaintiffs allege generally that Hurricane Katrina damaged and/or destroyed many vessels located in the two marinas, but that many other vessels suffered little or no damage from the storm itself. After the storm, both the vessels that were damaged by the storm and the ones that did not suffer significant damage needed immediate attention to prevent further damage from sitting incorrectly in the water or sitting out of the water entirely. Plaintiffs allege that the Levee District imposed unnecessarily strict requirements on their ability to access their vessels in order to salvage them. Plaintiffs allege that defendants imposed these limitations, at least initially, to prevent vessel owners from salvaging their vessels on their own or through a marine salvage contractor of their choosing and to force vessel owners to pay exorbitant prices to certain of the defendants in order to have their vessels salvaged.

Plaintiffs assert a number of claims against the various defendants, including breach of contract, violation of Louisiana ***antitrust law***, violation of the Louisiana **[*4]** Unfair Trade Practices Act, a civil rights claim under *42 U.S.C. § 1983*, breach of a compensated depository contract, and negligence on the part of a negotiorum gestor.

B. Factual Background

The Levee District operates two marinas, the Orleans Marina and the South Shore Harbor Marina, on the south shore of Lake Pontchartrain. A large number of vessels docked at both of these marinas were damaged, tossed ashore, or sunk as a result of Hurricane Katrina, which swept through southeast Louisiana on August 29, 2005. On or about September 12, 2005, the Levee District allegedly gave Marine Recovery exclusive authority to oversee all salvage operations in the two marinas. Defendants Scott Carmouche (the son of defendant George Carmouche, a Levee Board attorney) and Michael Mayer allegedly formed Marine Recovery on September 8, 2005. Marine Recovery then entered into an allegedly exclusive contract with Resolve on September 29, 2005, to carry out the salvage operations. Plaintiffs allege that defendants designed this arrangement to provide Resolve with the exclusive right to conduct salvage operations in the two marinas, thus permitting it to charge inflated rates for its services. Resolve then **[*5]** paid Marine Recovery a percentage of the revenue from these overpriced salvage services and allegedly passed on kickbacks to certain other defendants and unidentified third parties.

Plaintiffs assert that throughout September and October 2005, Levee District personnel prevented vessel owners from accessing their vessels in order to move and/or salvage them. Levee District personnel allegedly told plaintiffs that only Marine Recovery and its designated agents were permitted to access the marinas in order to move vessels. Plaintiffs also assert that they were told that anyone who attempted to enter the marinas without the Levee District's permission would be arrested by the Levee Board Police.

[1] St. Tammany Pearl River Salvage was terminated from the case on October 30, 2006. (R. Doc. 86).

Plaintiffs allege that, during this period, Resolve salvaged and/or moved many vessels without permission from either the vessel owner or the vessel's insurer, that Resolve sent the owners of these vessels inflated bills for their services, and that these unauthorized salvage attempts often caused additional damage to the vessels.

On October 3, 2005, several insurance companies filed suit in civil district court in Baton Rouge, challenging both the exclusivity arrangement among the Levee District, **[*6]** Marine Recovery and Salvage, and Resolve, and the excessive salvage fees being charged by Resolve and St. Tammany Pearl River. The state court issued a temporary restraining order on October 4, 2005. The parties resolved the suit on or about October 13, 2005, when the Levee District agreed that it would no longer give Marine Recovery and Resolve exclusive access to the marina. Plaintiffs allege, however, that the Levee District nevertheless continued to give these entities exclusive access to the marinas until at least October 25, 2005.

On or about October 26, 2005, the Levee District posted on its website a new policy that allowed other salvage companies into the marinas in order to recover vessels. Under this policy, the Levee District would permit any salvage company to enter the marina and access vessels after the company complied with the following conditions: (1) that it provide the Levee District with proof of insurance showing the Levee District as an additional insured on the policy; (2) that it provide a list of vessels that were to be moved, including the name of each vessel's owner; and (3) that it provide written authorization from the insurance company insuring each vessel **[*7]** that it intended to move. Under the policy, once a company furnished this information, the Levee District would review the documentation and provide the contractor with written permission to enter the marinas. The policy required authorized contractors to schedule all salvage operations with the Baton Rouge office of the Levee District. A statement accompanying the revised marina access policy noted that the Levee District had already authorized two companies, Resolve and St. Tammany Pearl River, to conduct salvage operations in the marinas.

Plaintiffs allege that Marine Recovery, Resolve and St. Tammany Pearl River continued to have *de facto* exclusive access to the marinas, despite the revised policy. Plaintiffs allege that the Levee District did not require Resolve and St. Tammany Pearl River to comply with the new procedures, but it instead treated them as "favored" contractors because they had agreed to pay Marine Recovery a "commission" of 10 percent of their income from salvage operations in the marinas. Plaintiffs further allege that the "Byzantine" procedures mandated by the Levee District's revised policy on marina access were overly strict and time-consuming, which hindered **[*8]** other contractors in complying with them and gaining access to salvage vessels in the marinas.

On or about December 23, 2005, the Levee District again revised its policy on marina access. Under the current policy, a salvage contractor can operate in the marina if it provides proof of at least $ 1 million in liability insurance covering salvage operations, names the Levee District as an additional insured on the policy, and executes a hold harmless agreement in favor of the Levee District. In addition, the contractor must obtain the permission of the owner and/or insurer of each vessel that it intends to salvage and inform the Levee District of the identities of the vessels to be salvaged. Authorized contractors may then conduct salvage operations at the marina without the need to schedule operations with the marina managers.

C. Plaintiffs' injuries

1. J. Kelly Lambert

On September 27, 2005, Lambert first tried to enter Orleans Marina to retrieve some personal items from his houseboat, the M/V PHOENIX. He walked through the floodgate, but claims he was told by Beth Augustin, the assistant marina manager for the Orleans marina, that he could not enter through the floodgate, but had to use **[*9]** the walk gate in the future. Augustin also allegedly told him that Huey had to approve any salvor and that Marine Recovery was the only salvor currently approved. Lambert talked to a third-party salvor, FEMA contracor G.W. Gordy, who told him that his boat could be salvaged for $ 3,000. (Lambert Depo., p. 93, 66:16-67:9). Lambert testified that his chosen salvor could not salvage his boat since he was not pre-approved by the Levee Board. Lambert eventually contracted with Resolve, on October 22, 2005, to salvage the PHOENIX for the price of $ 6,795.

(R. Doc. 195-11, Exhibit AA). Lambert asserts that he sustained actual damages from the delay in salvaging his boat in the amount of $ 42,795.00. (R. Doc. 226-9).

2. Donald Scott

Donald Scott was the co-owner of a vessel, the ALOHA, that was moored in Orleans Marina when Hurricane Katrina hit. (Scott Depo., p. 30, 17:23-18:20). Scott was able to access his vessel on September 4, 2005, by using a ladder to climb over the wall around the marina. (Scott Depo., p. 31, 23:25-25:7). Scott claims he was not able to access the marina again until November 16, 2005. (Scott Depo., p. 32, 29:6-10). On that day, he spoke with Augustin about salvaging **[*10]** his boat. (Scott Depo., p. 32, 29:21-30:2). Scott proposed that he and his sons, who were certified scuba divers, could lift the boat, since it was only half-sunk. (Scott Depo., p. 32, 30:8-12). Augustin told him that the Levee District required salvors to carry $ 1 million in insurance and that the only companies allowed to salvage boats were Resolve and St. Tammany Pearl River. (Scott Depo., p. 32, 30:13-18, p. 34, 39:7-19). Scott could not get in touch with St. Tammany, so he contacted Resolve about salvaging his boat. Either Tim Erickson or Tim McGinnis initially quoted Scott a price between $ 5,600 and $ 6,000. (Scott Depo., p. 35, 41:2-7). After Scott complained that the price was too high since his boat was only partially sunk, Tim informed Scott that the price would be $ 1,500 if his insurance company found the boat to be a navigational hazard. Resolve talked to Scott's insurance company, and they refused to cover the salvage. (Scott Depo., p. 35, 44:6-22). The price then went back up to $ 5,600 to $ 6,000. Scott decided that he could not afford to salvage his boat at this price. On June 6, 2006, he ran an ad in a newspaper to sell his boat for $ 1.00. The purchaser encountered **[*11]** no problems when he salvaged the boat the next weekend with his two sons and two divers. (Scott Depo. p. 38, 55:21-56:19). Scott claims that he sustained damage in the amount of $ 25,000 since his vessel was worth $ 25,000 before the hurricane. (R. Doc. 226-9).

3. Robin Lovelock

Lovelock's sailboat, the HEATHEN, was docked at South Shore Harbor when Hurricane Katrina hit. Lovelock did not contact anyone about his boat, other than friends with boats in the marinas, until he returned to New Orleans near the end of October. (Lovelock Depo., p. 3, 19:21-20:7). When he returned, he found that his boat had been salvaged from the water and placed on the bulkhead of the parking lot in the marina. (Lovelock Depo., p. 3, 19:4-17). Resolve had mistakenly salvaged his boat (Lovelock Depo., p. 9, 45:11-14, 47:4-9) and never charged Lovelock for the salvage. (Lovelock Depo., p. 9, 46:1-4). Lovelock claims that because of the salvage job, he lost the autopilot, a stainless steel wheel, and an anchor, for a total property loss of $ 2,400.00. (Lovelock Depo., p. 10, 51:20-54:9). A surveying company provided by Lovelock's insurance company estimated that the wreckage of his boat was worth a total of $ **[*12]** 1,000. (Lovelock Depo., p. 6, 33:6-14). Lovelock's insurance company then paid him $ 35,000 under the hull policy, and after paying off $ 25,000 for the mortgage on the vessel, he was left with $ 10,000. (Lovelock Depo., p. 6, 34:7-17).

D. Procedural Background

Plaintiff Lambert originally brought the case as a purported class action in Civil District Court for the Parish of Orleans. (R. Doc. 1 at 11). Plaintiff filed a First Supplemental and Amending Class Action Complaint in state court and added Donald Scott as a named plaintiff. (R. Doc. 1 at 5). Defendants removed the case to federal court on November 22, 2005. On January 23, 2006, plaintiffs amended their class action complaint again, adding Robin Lovelock as a named plaintiff. (R. Doc. 18).

Plaintiffs first moved for class certification on February 21, 2006, and the Court denied the motion without prejudice until the motions to dismiss pending at the time were resolved. (R. Doc. 44). After the Court denied defendants' motions to dismiss, (R. Doc. 61), plaintiffs again moved for class certification on June 25, 2007. (R. Doc. 109). Judge Porteous heard oral argument on the motion on November 16, 2007. The case was transferred to **[*13]** Section R, and this Court denied the motion to certify on September 10, 2008. (R. Doc. 191).

The case is scheduled for bench trial on February 9, 2009. (R. Doc. 186). Before the Court are a number of motions for summary judgment. Defendant Resolve moves for summary judgment on all of plaintiffs' claims. (R. Docs. 195). Marine Recovery, Scott Carmouche, and Michael Mayer have filed four separate motions for partial summary judgment on the following claims: (1) plaintiffs' claims under the Louisiana Unfair Trade Practices Act (LUTPA), (2) plaintiffs' claims under *42 U.S.C. § 1983* and allegations of price gouging, (3) plaintiffs' claims under the Louisiana antitrust laws, and (4) plaintiff Lovelock's breach of deposit and negligence claim. (R. Docs. 207, 211, 214, 217).

II. Legal Standard

Summary judgment is appropriate when there are no genuine issues as to any material facts, and the moving party is entitled to judgment as a matter of law. *See* *FED. R. CIV. P. 56(c)*; *Celotex Corp. v. Catrett, 477 U.S. 317, 322-323, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*. A court must be satisfied that no reasonable trier of fact could find for the nonmoving party or, in other words, "that the evidence favoring the nonmoving party is insufficient **[*14]** to enable a reasonable jury to return a verdict in her favor." *Lavespere v. Niagara Mach. & Tool Works, Inc., 910 F.2d 167, 178 (5th Cir. 1990)*; (citing *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 249, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986))*. The moving party bears the burden of establishing that there are no genuine issues of material fact.

If the dispositive issue is one on which the nonmoving party will bear the burden of proof at trial, the moving party may satisfy its burden by merely pointing out that the evidence in the record contains insufficient proof concerning an essential element of the nonmoving party's claim. *See* *Celotex, 477 U.S. at 325*; *see also* *Lavespere, 910 F.2d at 178*. The burden then shifts to the nonmoving party, who must, by submitting or referring to evidence, set out specific facts showing that a genuine issue exists. *See* *Celotex, 477 U.S. at 324*. The nonmovant may not rest upon the pleadings, but must identify specific facts that establish a genuine issue exists for trial. *See* *id. at 325*; *Little v. Liquid Air Corp., 37 F.3d 1069, 1075 (5th Cir. 1996)*.

III. Discussion

The Court has motions for summary judgment before it from four defendants. [2] The Court's reasoning will be applicable to plaintiffs' **[*15]** claims against all seven defendants.

A. Louisiana antitrust laws

Defendants move for summary judgment on plaintiffs' claims under Louisiana antitrust laws codified in *Louisiana Revised Statutes §§ 51:122* and *51:123*. [3] These statutes are virtually identical to Sections 1 and 2 of the Sherman Antitrust Act, *15 U.S.C. § 1, et seq.*;, and federal analysis of the Sherman Antitrust Act is persuasive, though not controlling. *Louisiana Power & Light Co. v. United Gas Pipe Line Co., 493 So.2d 1149, 1154, 1158 (La. 1986)*.

Defendants assert that the record reflects that they did not attempt to restrain trade in violation of *section 51:122* since (1) other salvage companies were authorized to operate in the marinas when plaintiffs' vessels were salvaged, and (2) **[*16]** there is no evidence to support the allegations that Marine Recovery prohibited certain salvage companies to enter the marinas and perform salvage operations. They also aver that plaintiffs have not provided sufficient proof of a conspiracy to monopolize in violation of *section 51:123* since plaintiffs have not provided proof that the agreement between the Levee District and Marine Recovery was an attempt to create a monopoly of the salvage industry within the marinas.

---

[2] The other defendants, George Carmouche, James Huey, and the Levee District, have also filed motions for summary judgment. Because plaintiffs have yet to oppose those motions, the Court will consider them in a separate motion.

[3] Plaintiffs' memoranda suggest that they made claims under the Sherman Act as well as state antitrust statutes. Plaintiffs did not make these claims in any of their complaints, and thus the Court will not consider them.

The Court finds that not all of the plaintiffs have alleged an injury in fact sufficient to establish an antitrust claim. Louisiana ***antitrust law*** permits any person: "who is injured in his business or property by any person by reason of any act or thing forbidden by this Part, [to] sue . . . and . . . recover threefold the damages sustained by him, the cost of suit, and a reasonable attorney's fee." *La. Rev. Stat. Ann. § 51:137*; *see also* *Free v. Abbott Laboratories, Inc., 176 F.3d 298, 299 (5th Cir. 1999)*. This provision is also nearly identical to the federal antitrust enforcement provision, § 4 of the Clayton Act. [4]

Antitrust standing involves more than the "case or controversy" requirements of constitutional standing. *Todorov v. DCH Healthcare Auth., 921 F.2d 1438, 1448 (11th Cir. 1991)*; (citing *Flast v. Cohen, 392 U.S. 83, 94-101, 88 S. Ct. 1942, 20 L. Ed. 2d 947) (1968))*. Plaintiffs must show "antitrust injury, which is . . . injury of the type the antitrust laws were intended to prevent." *Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104, 109, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)*; (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977))*; *see also* *Norris v. Hearst Trust, 500 F.3d 454, 465 (5th Cir. 2007)* ("plaintiff must prove more than injury causally linked to an antitrust violation"); *Doctor's Hosp. of Jefferson, Inc. v. Southeast Med. Alliance, Inc., 123 F.3d 301, 306 (5th Cir. 1997)* (the standing inquiry "ensures that the plaintiff's demand for relief ultimately serves the purposes of ***antitrust law*** to increase consumer choice, lower prices and assist competition, **[*18]** not competitors"). The Fifth Circuit narrowly construes the meaning of antitrust injury. *See* *Anago, Inc. v. Tecnol Medical Products, Inc., 976 F.2d 248, 251 (5th Cir. 1992)*; (citing *Phototron Corp. v. Eastman Kodak Co., 842 F.2d 95, 100 (5th Cir. 1988))*.

Plaintiffs have brought antitrust claims for price fixing under *section 51:122* and attempt to monopolize or conspiracy to monopolize under *section 51:123*. To establish injury in a price fixing case, plaintiffs may simply show proof of purchase at a price higher than the competitive rate. *Robinson v. Texas Auto. Dealers Ass'n, 387 F.3d 416, 422 (5th Cir. 2004)*; (citing *Nichols v. Mobile Bd. of Realtors, Inc., 675 F.2d 671, 676 (5th Cir. 1982))*. An illegal price-fixing scheme is presumed to damage all purchasers of a price-fixed product. *In re NASDAQ Market-Makers Antitrust Litigation, 169 F.R.D. 493, 526 (S.D.N.Y. 1996)*. Similarly, for monopoly claims, a consumer can obtain damages only if he shows that he actually paid more than the competitive level. *See* *In re Air Passenger Computer Reservation Systs., 727 F. Supp. 564, 569 (C.D. Cal. 1989)*; (citing P. Areeda & H. Hovenkamp, ***Antitrust Law*** P 340.2b (1988 Supplement); *Wojcieszek v. New England Tel. and Tel. Co., 977 F. Supp. 527, 535 (D. Mass. 1997)*; **[*19]** *Simpson v. US West Comm., Inc. 957 F. Supp. 201, 206 (D. Or. 1997)*. Here, however, only Lambert paid the allegedly higher prices charged by Resolve. The Court will now consider whether Lovelock and Scott have sustained antitrust injury sufficient to establish standing.

Lovelock was not seeking salvage services when his boat was salvaged by Resolve without his consent. Neither party disputes that Lovelock never negotiated with Resolve for salvage work and was never charged for the salvage. Lovelock was simply not injured by any violation of the antitrust laws; the only damage he claims he sustained resulted from Resolve's allegedly negligent salvage job. This is not the type of injury the antitrust laws were intended to protect. Because Lovelock has not sustained a cognizable antitrust injury, he does not have standing to bring an antitrust claim.

Scott, however, was in the market for salvage services. Scott negotiated with Resolve, but opted not to have his boat salvaged after Resolve quoted him its prices. Although Scott never paid the higher prices, Scott contends that he was damaged because as a result of the inflated prices, he could not afford to salvage his boat and was forced **[*20]** to sell it for $ 1. The Court must consider whether a nonpurchaser who would have purchased goods or services but for the allegedly inflated prices has standing to bring an antitrust claim.

---

[4] Section 4 of the Clayton Act, *15 U.S.C. § 15 (1997)* states in part:

> [A]ny person who shall be injured **[*17]** in his business or property by reason of anything forbidden in the antitrust laws may sue therefor in any district court of the United States . . . and shall recover threefold the damages by him sustained, and the cost of suit, including a reasonable attorney's fee.

The Court concludes that Scott lacks standing to bring such a claim. Although the Court has found no Fifth Circuit or Louisiana cases involving the standing of nonpurchasers, the Tenth Circuit considered the issue in *Montreal Trading Ltd. v. Amax Inc., 661 F.2d 864 (10th Cir. 1981)*;. There, a Canadian corporation sued several United States potash producers because of its inability to purchase potash. *Id. at 865*. The court held that the corporation had no standing to bring a price fixing claim. The court explained that "[a] price fixing conspiracy is certainly 'aimed' at those who purchase the product at the inflated price; their injury is more direct and more proximately caused than those who are unable to purchase due to product scarcity." *Id. at 867*. The court further noted that granting standing to nonpurchasers could result in large recoveries for those only minimally hurt by antitrust violations. *Id*. The court reasoned:

> If nonpurchasers who have never dealt with a defendant could recover, a seemingly **[*21]** unlimited number of plaintiffs could assert a virtually unlimited quantity of lost purchases, perhaps exceeding the potential output of the entire industry. With a treble damages entitlement, the result could be multiple recoveries and total damage awards wholly out of proportion with the 'fruits of the illegality,' easily bankrupting the named defendants.

Id. at 868. This Court finds this reasoning persuasive and consistent with the views of the Fifth Circuit in a related context, as discussed, *infra*. Allowing nonpurchasers to recover would unduly broaden the spectrum of potential plaintiffs with price fixing and monopolization claims. Anyone who considered, or claimed to consider, purchasing a product or service would have standing to bring such claims. Damages would vary widely depending on the consequences of a potential consumer's inability to purchase. Courts would also be faced with complex causation issues. For instance, here the Court would have to determine whether Scott's inability to purchase salvage services for a period of less than two months caused damage to his boat above and beyond the damage it sustained from Hurricane Katrina and Rita.

The Fifth Circuit discussed **[*22]** similar prudential considerations in its determination that indirect purchasers did not have standing to bring price fixing claims under Louisiana ***antitrust law***. *See Free v. Abbott Laboratories, Inc., 176 F.3d 298, 300-01 (5th Cir. 1999)*. The Court explained that allowing only direct purchasers to sue would "reduce the dimensions of complexity" of the litigation. *Id. at 300*. The Court expressed concern that if indirect purchasers were allowed to sue:

> The focus of suits would shift from the amount of increased prices caused by defendants' anticompetitive conduct (a relatively straightforward inquiry) to the allocation of damages among parties in the line of distribution to ultimate consumers. Litigation would be prolonged, would become far more complex factually and strategically, and would benefit lawyers and determined defendants while reducing recoveries for plaintiffs.

Id. at 301. Here, the Court finds that similar concerns weigh against granting nonpurchasers standing in price fixing and monopolization suits. While Scott's injury may be related to an antitrust violation, it is not the type of injury the antitrust laws were intended to protect. Thus Scott does not have standing to **[*23]** bring an antitrust claim. Because neither Scott nor Lovelock have standing to bring a claim under the antitrust laws, the Court GRANTS defendants' motions with regard to these two plaintiffs.

As for the merits of Lambert's antitrust claims, the Court is unable to determine if summary judgment is appropriate because the parties have failed to brief certain issues pertinent to the claims. The Court will issue an order outlining the supplemental briefing it will require of the parties and defer its ruling on these claims until trial.

B. LUTPA

Defendants contend that plaintiffs have failed to show that defendants engaged in fraudulent and deceptive acts in violation of LUTPA. They further contend that plaintiff Lovelock cannot recover since he was not a consumer or business competitor of Marine Recovery or Resolve.

Under LUTPA, private parties who suffer an "ascertainable loss" because of another party's unfair or deceptive trade practices may bring suit to recover actual damages. *La. Rev. Stat. § 51:1409*. Although the text of *section*

1409 states that "*any person* who suffers any ascertainable loss may bring suit, the Fifth Circuit has given this statute a narrower reading, limiting relief **[*24]** to individual consumers or business competitors. *See* Orthopedic & Sports Injury Clinic v. Wang Labs, Inc., 922 F.2d 220, 226 (5th Cir. 1991); Delta Truck & Tractor v. J.I. Case Co., 975 F.2d 1192 (5th Cir. 1992); *cf.* Indest-Guidry, Ltd. V. Key Office Equipment, Inc., 997 So. 2d 796, 2008 WL 4792422 at *12-*13 (La. Ct. App. 2008); (finding that business entities as well as individual consumers can recover as "consumers" under the statute). The statute defines "consumer" as "any person who uses, purchases, or leases goods or services." La. Rev. Stat. § 51:1402(1). But the Fifth Circuit has restricted the definition of "consumer" under LUTPA to individuals who are participants in a "consumer transaction." Wang Labs, 922 F. 2d at 226. A "consumer transaction" requires trade or commerce with a natural person and the subject of the transaction must be intended for personal, family, or household use. *Id*.;. (quoting La. Rev. Stat. § 51:1402(3)). "Trade" or "commerce" means "the advertising, offering for sale, sale, or distribution of any services and any property." La. Rev. Stat. § 51:1402(9).

The Court finds that only Lambert qualifies as a consumer under the statute. Lambert indisputably purchased **[*25]** salvaging services from Resolve, and since he uses his boat for personal, rather than business purposes, he fits the definition of consumer under the statute. But Scott and Lovelock do not qualify as consumers. Neither Scott nor Lovelock "used," "purchased," or "leased" goods or services. Neither contracted with Resolve for salvaging services. Scott, in fact, did not contract with anyone for salvaging services and never received such services. Lovelock also did not contract with anyone - his boat was mistakenly salvaged by Resolve, and he was never charged for the service. Lovelock did not "use," "purchase," or "lease" salvaging services; he received the services without his consent. *See* Montegut v. Williams Comm., Inc., 109 F. Supp. 2d 496, 499 (E.D. La. 2000) (finding that plaintiffs did not have a LUTPA claim when defendants installed fiber optic cables on their land without their consent). Because Lovelock and Scott are not consumers under the statute, the Court finds that Lambert alone has standing to bring a LUTPA claim and GRANTS summary judgment with regard to Scott and Lovelock's LUTPA claims against defendants. The Court will defer ruling on the merits of Lambert's LUTPA **[*26]** claims until trial.

C. *Section 1983*

Defendants move for summary judgment on plaintiffs' claim under 42 U.S.C. § 1983 that defendants violated plaintiffs' civil rights by engaging in price fixing in violation of 15 § U.S.C. 2. Defendants first assert that plaintiffs do not have an action under section 1983 since they did not act under color of state law. They also contend that plaintiffs have not presented any evidence that defendants engaged in price fixing.

Section 1983 provides a private right of action to any person who is deprived of a federal constitutional or statutory right by a person acting under color of state law. *See* 42 U.S.C. § 1983. To state a claim under section 1983, a plaintiff must allege: (1) that the defendant deprived him of a right secured by the Constitution or federal law; and (2) that the deprivation occurred under color of state law. *See* Cornish v. Corr. Servs. Corp.., 402 F.3d 545, 549 (5th Cir. 2005); Brown v. Miller, 631 F.2d 408, 410 (5th Cir. 1980).

Plaintiffs' claims under section 1983 are not easily ascertainable. Plaintiffs' complaint, under the heading "Intentional delicts, denial of civil rights, and criminal acts," alleges:

> The actions set forth hereinabove **[*27]** were done intentionally and without privilege under color of law, and were done in order to keep petitioner and other persons similarly situated from salvaging, lifting, moving, or even accessing their personal property and were done with an intention to defraud the plaintiff and other persons similarly situated and to illegally profit the defendants and their political cronies.

(R. Doc. 1-1 at P42). Under that heading, the complaint further states:

> The plaintiff is further informed and alleges that the defendants conspired to charge the plaintiff and other vessel owners in the Orleans Marina and South Shore Harbor Marina exorbitant prices to move their vessels and further conspired to charge exorbitant prices for the services of MRS . . . The plaintiff alleges that these actions of the defendants also amount to illegal Price Fixing and illegal Price Gouging, as defined by law and

> that said acts and conspiracies were done intentionally by the defendants under color of law and that they also amount to a denial of civil rights under color of law.

(R. Doc. 1-1 at P43). Plaintiffs' motions for partial summary judgment are also far from helpful. In the motions, plaintiffs repeatedly refer **[*28]** to plaintiffs' right to acquire, use and dispose of private property under the Louisiana Constitution. *See* *La. Const. art. I, § 4(A)*. Violations of state law, however, whether constitutional or statutory, do not give rise to a *§ 1983* action. The Court surmises that plaintiffs have alleged a procedural due process claim for denial of their property rights.

The *Due Process Clause* prevents the state from depriving a person of life, liberty, or property without due process of law. *U.S. CONST. amend. XIV*. In deciding whether state action has violated an individual's right to due process, the court must address two questions: "whether the state action has deprived the individual of a protected interest - life, liberty or property," and if so, "whether the state procedures available for challenging the deprivation satisfy the requirements of due process." *Augustine v. Doe, 740 F.2d 322, 327 (5th Cir. 1984)*; *accord* *Neuwirth v. Louisiana State Bd. of Dentistry, 845 F.2d 553, 556 (5th Cir. 1988)*; *Cuellar v. Texas Employment Comm'n, 825 F.2d 930, 934 (5th Cir. 1987)*.

Even assuming, *arguendo*, that plaintiffs' right to access their property is a protected property interest and that defendants acted **[*29]** under color of state law, the record reflects that plaintiffs were never denied access to their property. Lambert testified that when he first visited the marina after the hurricane, "the gate was open, I went in." (Lambert Depo., p. 51, 13:21-15:18). Lambert said that he went to the marina "quite often." He further testified:

> I can't say for sure that I went there every day, but I went there pretty often. It was still kind of a hassle to get in. I had to climb over the walk-through gate down at the end of the wall. they have the main gates closed. but I went over there pretty often. I had to over there and retrieve some personal things off my boat. And I went over there to do what I could to stabilize my boat.

(Lambert Depo., p. 53, 27:14-28:1). Thus Lambert's main complaint was that he was unable to access the marina through the main gates, which, while inconvenient, does not qualify as a deprivation of property that merits constitutional protection. Scott testified that he was able to access his vessel as soon as he returned to town on September 4, 2005. (Scott Depo., p. 31, 23:25-24:15). He explained that he entered by climbing over the wall with a ladder. (Scott Depo., p. 31, 25:5-7). **[*30]** Scott testified that he was subsequently unable to access the marina until November 16, 2005, but he said that the National Guard - not the Levee Board police or any other defendant - denied him access. Thus he also did not suffer a deprivation of property at the hands of the defendants. As for Lovelock, he never alleged that he was denied access to his vessel and testified that he was able to walk right up to his vessel in South Shore Marina when he returned to town. (Lovelock Depo., p. 5, 25:25-26:9). Because none of the plaintiffs were ever denied access to their vessels, but merely inconvenienced in their ability to access them, the Court finds that plaintiffs have not suffered the requisite deprivation of property to establish a due process claim.

D. Breach of a depository contract and negligence

Defendants move for partial summary judgment on plaintiffs' claims for breach of a compensated depository contract and negligence on the part of a negotiorum gestor. The defendants aver that no compensated depository contract existed between plaintiffs and them and that they were never negotiorum gestors for the plaintiffs. Plaintiffs have not opposed this motion.

1. Compensated depository [*31] contract

The Louisiana Civil Code provides: "[a] deposit is a contract by which a person, the depositor, delivers a movable things to another person, the depository, for safekeeping under the obligation of returning it to the depositor upon demand." *La. Civ. Code. art. 2926*. A contract of deposit is essentially a bailment, and takes place by the mutual consent of the person making the deposit and the person receiving it. *La. Civ. code. art. 2932*. The principal requirements of such a contract are delivery of the property and mutual consent. *Northern Assurance Co. of*

America v. Cotton, 658 So.2d 246, 248 (La. Ct. App. 1995);. A depository contractual relationship is different in nature from a lessor/lessee relationship. *See* *Guillot v. Kaplan Farmers Coop, Inc., 352 So.2d 402, 404 (La. Ct. App. 1977)* (finding that the nature of the contractual relationship in the case was that of a contractual deposit, not a lease).

The Court finds that no compensated depository contract existed between plaintiffs and any defendants. Plaintiffs' leases with the Levee District do not qualify as depository contracts, as the lessees expressly agreed to indemnify the Levee District for any damage to the vessels. **[*32]** (R. Doc. 254-8 at P4). Thus the Levee District was not obligated to keep plaintiffs' vessels safe. Other than the leases, neither Lovelock nor Scott contracted with any defendant and thus have no claim in this regard. Lambert's contract with Resolve does not qualify as a compensated depository contract, since Lambert never delivered his vessel to Resolve, a necessary requirement for a depository contract. Accordingly, the Court finds that the defendants are entitled to summary judgment on this claim.

2. Negligence on the part of the negotiurum gestors

Under Louisiana law, a quasi-contract is created when a person, the gestor, voluntarily undertakes to manage another's affairs, whether the person is aware of the benefit or not. *Coastal Envtl. Specialists, Inc. v. Chem-Lig Intern., Inc., 818 So.2d 12, 20 (La. Ct. App. 2001)*. Such a "management of affairs" (negotiorum gestio) exists when "a person, the manager, acts without authority to protect the interests of another, the owner, in the reasonable belief that the owner would approve of the action if made aware of the circumstances." *La. Civ. Code art. 2292*. The manager is obligated to "exercise the care of a prudent administrator and is **[*33]** answerable for any loss that results from his failure to do so." *La. Civ. Code art. 2295*. A negotiorum gestio exists only when a manager is doing another's business, not his own business. *Coastal Envtl. Specialists, 818 So.2d at 21*.; (citing *Burns v. Sabine River Auth., 614 So.2d 1337, 1340 (La. Ct. App. 1993))*.

Here, plaintiff Lovelock alleges that defendants acted as negotiorum gestors when they moved his boat without his permission. Lovelock, however, has offered no evidence that defendants undertook to manage his affairs in the reasonable belief that he would approve of the actions. Only Resolve was involved in the salvage of Lovelock's boat, but in salvaging the boat, Resolve was not acting as a manager on behalf of Lovelock. Resolve was "doing its own business," salvaging boats, and merely salvaged Lovelock's boat in error. (*See* Lovelock Depo., p. 9, 47:4-9). Defendants are thus entitled to summary judgment on this claim.

IV. Conclusion

For the foregoing reasons, the Court GRANTS defendants' motions for summary judgment on plaintiffs' claims under *section 1983* and for breach of a compensated depository contract and negligence on the part of a negotiorum gestor. The Court also GRANTS **[*34]** defendants' motions for summary judgment on Scott and Lovelock's antitrust and LUTPA claims.

New Orleans, Louisiana, this 22nd day of January, 2009.

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[ ] **Motions to Dismiss, Failure to State Claim**

A court must accept all well-pleaded facts as true. A court must view the allegations in the light most favorable to plaintiffs. Dismissal of a claim is proper only if plaintiffs have not, at minimum, made enough factual allegations to raise a right to relief above the speculative level. Nevertheless, a well-pleaded complaint may proceed even if it appears that a recovery is very remote and unlikely.

Antitrust & Trade Law > Sherman Act > Claims

HN2[ ] **Sherman Act, Claims**

A successful claim under § 1 of the Sherman Act requires proof of three elements: (1) a contract, combination, or conspiracy; (2) a resultant unreasonable restraint of trade in the relevant market; and (3) an accompanying injury.

Antitrust & Trade Law > Sherman Act > Claims

HN3[] **Sherman Act, Claims**

To state a claim under § 1 of the Sherman Act, a complaint must set forth enough factual matter (taken as true) to suggest that an agreement has been made.

Antitrust & Trade Law > Sherman Act > Claims

HN4[] **Sherman Act, Claims**

Plaintiffs are not required, at the pleading stage, to exclude every plausible interpretation of the facts that does not support their theory of liability. On the contrary, they need only assert plausible grounds to infer that an illegal agreement is made to state a claim based on § 1 of the Sherman Act.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN5[] **Scope, Monopolization Offenses**

Section 2 of the Sherman Act provides that it is unlawful to monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize interstate trade. *15 U.S.C.S. § 2*.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN6[] **Scope, Monopolization Offenses**

To prove that there exists a conspiracy to monopolize, plaintiffs must show: 1) the existence of a combination or conspiracy, 2) overt acts in furtherance of the conspiracy, 3) an effect upon a substantial amount of interstate commerce and 4) the existence of specific intent to monopolize.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN7[] **Scope, Monopolization Offenses**

The Illinois Antitrust Act provides, when the wording of the Act is identical or similar to that of a federal ***antitrust law***, the courts of Illinois shall use the construction of the federal law by the federal courts as a guide in construing this act. *740 ILCS § 10/11*. *740 ILCS § 10/3(2)* is clearly similar to § 1 of the Sherman Act, while *740 ILCS § 10/3(3)* is similar to *§ 2* of the Sherman Act.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN8[] **Sherman Act, Scope**

See *740 ILCS § 10/3*.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN9[] Sherman Act, Scope

740 ILCS § 10/3(1)(a) does not clearly parallel either § 1 or *§ 2* of the Sherman Act. On its face, this subsection prohibits agreements between competitors (neither provision of the Sherman Act contains this language).

Civil Procedure > Judgments > Declaratory Judgments > General Overview

HN10[] Judgments, Declaratory Judgments

A declaratory judgment is not appropriate as a means of avoiding anticipated future difficulties.

Opinion

[*877] **MEMORANDUM OPINION AND ORDER**

Plaintiffs Gregory Hackman d/b/a Gregory Hackman Realtors and Gregory Hackman Realtors, Inc. (collectively, "Hackman"), have filed a second amended complaint **[**3]** seeking to cure the pleading deficiencies I found in previous versions of the complaint. *See Hackman v. Dickerson Realtors, Inc., 520 F.Supp.2d 954 (N.D. Ill. 2007)* ("*Hackman I*") and *Hackman v. Dickerson Realtors, Inc., 557 F.Supp.2d 938 (N.D. Ill. 2008)* ("*Hackman II*"). Several defendants have filed motions to dismiss the newest version of the complaint. I resolve these motions as discussed below.

I.

This opinion assumes general familiarity with the facts set forth in my earlier opinions. Plaintiffs are real estate concerns doing business in the Rockford, Illinois area. Defendants are other local real estate agents and agencies and two professional associations: the Rockford Area Association of Realtors ("RAAR") and the Illinois Association of Realtors ("IAR"). Plaintiffs allege an anticompetitive scheme by defendants to drive plaintiffs out of the local real estate market in retaliation for plaintiffs' offering their clients a lower commission rate than the "going" rate offered by the agent and agency defendants. [1]

Like the previous two complaints, the second amended complaint sets forth six counts: Counts I and II allege, respectively, federal and state antitrust violations against numerous defendants. Count III seeks a temporary injunction against RAAR and IAR to stop an ethics hearing against Hackman. Count IV seeks a permanent injunction against RAAR and IAR concerning the same ethics proceedings, as well as a declaration that RAAR and IAR violated their internal procedures in handling these proceedings. Count V alleges defamation by several defendants and is not at issue in the pending motions. Count VI alleges tortious interference with business expectancy and contract.

Now before me are the following motions: defendant Hall's motion to dismiss Counts I, II, and VI; a joint motion by defendants RAAR and IAR to dismiss Counts I-IV and VI [2]; defendant Sheley's **[*878]** motion to dismiss Counts I, II, and VI; defendant Young's motion to dismiss Counts I and II; and defendant Westin's **[**5]** motion to dismiss Counts I, II, and VI.

The standards by which I must judge the sufficiency of the second amended complaint against the challenges raised by these motions is by now familiar: First, ***HN1***[] I must accept all well-pleaded facts as true. *Thompson v. Illinois Dep't of Prof'l Regulation, 300 F.3d 750, 753 (7th Cir. 2002)*. Second, I must view the allegations in the light most favorable to plaintiffs. *Gomez v. Illinois State Bd. of Educ., 811 F.2d 1030, 1039 (7th Cir. 1987)*. Dismissal of a claim is proper only if plaintiffs have not, at minimum, made enough factual allegations to "raise a right to relief above the speculative level." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 127 S.Ct. 1955, 1965, 167 L. Ed. 2d 929 (2007)* (citations omitted). Nevertheless, "a well-pleaded complaint may proceed even if it appears 'that a recovery is very remote and unlikely.'" *Id., quoting Scheuer v. Rhodes, 416 U.S. 232, 236, 94 S.Ct. 1683, 40 L. Ed. 2d 90 (1974))*.

II. Hall's motion and RAAR/IAR's joint motion

---

[1] Plaintiffs assert that the "going" rate is six or seven percent on pre-existing properties, while plaintiffs offer five percent on such properties. As discussed in my previous **[**4]** opinions, other realtors are affected by Hackman's rate because under the Multiple Listings Service ("MLS") rules, the buyer's and seller's agents typically split equally the commission earned on a sale. *See Hackman I, at 957*.

[2] Only Counts III and IV are asserted against IAR.

Terrie Hall was President of RAAR at times relevant to this action, and the parties do not dispute that she acted as an agent of RAAR with respect to all conduct attributed to her **[**6]** in the second amended complaint. Accordingly, my discussion below of Counts I, II, and VI, which are asserted against Hall and RAAR, applies to both motions to the extent they seek dismissal of those counts.

A. Count I

Count I asserts violation of the Sherman Act, *15 U.S.C. §§ 1* & *2*. As I held in *Hackman I*, ***HN2***[] "'A successful claim under *Section 1* of the Sherman Act requires proof of three elements: (1) a contract, combination, or conspiracy; (2) a resultant unreasonable restraint of trade in the relevant market; and (3) an accompanying injury.'" *Hackman I, at 963*, *quoting* *Denny's Marina, Inc. v. Renfro Prods., Inc., 8 F.3d 1217, 1220 (7th Cir. 1993))*. Hall and RAAR contend that the plaintiffs fail to allege the first of these elements, since the second amended complaint does not assert enough factual material to suggest plausibly that Hall knowingly participated in any illegal agreement. I disagree.

In *Twombly,* the Supreme Court held that ***HN3***[] to state a claim under *§ 1* of the Sherman Act, a complaint must set forth "enough factual matter (taken as true) to suggest that an agreement was made." *Twombly, 127 S.Ct. at 1966*. In *Hackman II,* I dismissed plaintiffs' claim under *§ 1* of the Sherman Act **[**7]** because the allegations in the first amended complaint:

> fail to allege facts from which it could be inferred that RAAR reached an anticompetitive agreement with the other defendants. That is, I do not find, based on the allegations, that any agent acting on behalf or RAAR is alleged to have 'had a conscious commitment to a common scheme designed to achieve an unlawful objective' as required under *Monsanto v. Spray-Rite Service Corp., 465 U.S. 752, 764, 104 S.Ct. 1464, 79 L.Ed.2d 775 (1984)*.

Hackman II, at 946. The second amended complaint, however, has overcome this defect. In particular, plaintiffs' allegations in PP 43 and 45 of their newest complaint assert that Hall had knowledge of the boycott pursued by the agency defendants, and that she engaged conduct that reasonably can be interpreted as furthering the alleged anticompetitive agreement. In P 43, plaintiffs allege that Hall was present for, and participated in, a late-2004 conversation at a broker's meeting hosted by RAAR, in which the agency defendants allegedly agreed not to do business with **[*879]** Hackman because of his lower commission rate. [3] In P 45, plaintiffs refer to a November 18, 2005 conversation between Hall and a Vice **[**8]** President of IAR, in which Hall and the IAR Vice President allegedly conspired to influence negatively the outcome of actions pending against plaintiffs. [4]

These allegations belie Hall's argument that the second amended complaint does not allege sufficient facts from which to infer that Hall was aware of, or agreed to, an illegal agreement. Hall's characterization of these allegations as "conclusory" and "contradictory" are unpersuasive. The allegations identify specific conversations that took place on specific (or reasonably specific) dates between Hall and one or more co-defendants. They also allege the general substance of these conversations, which, if presumed true, plausibly supports an inference of Hall's agreement with an anticompetitive scheme.

The fundamental defect of plaintiffs' earlier allegations against Hall and RAAR was that they did not allege, or **[**9]** even suggest, that Hall was aware of the agency boycott, so her conduct could not reasonably be construed as being in furtherance of that boycott. *See* *Hackman II, at 946*. The present complaint overcomes this defect, and it casts the remaining allegations against Hall in a new light.

Hall's argument that plaintiffs' allegations "do not plausibly exclude the possibility of independent action" is unavailing because turns the applicable standard on its head.***HN4***[] Plaintiffs are not required, at the pleading

---

[3] Plaintiffs allege in P 26 that Hall was also present for a similar conversation in late 1999, but these allegations are less specific.

[4] I understand from the allegations as a whole that these actions are related to the alleged illegal boycott, and that RAAR exercised some adjudicatory function with respect to these actions.

stage, to exclude every plausible interpretation of the facts that does not support their theory of liability. On the contrary, they need only assert "plausible grounds to infer" that an illegal agreement was made to state a claim based on *§ 1* of the Sherman Act. *Twombly, at 1965*. The second amended complaint achieves this. Plaintiffs have now sufficiently pleaded that Hall "had a conscious commitment to a common scheme" to coerce plaintiffs, using anticompetitive tactics, into raising their commission rates.

Plaintiffs' claim under *§ 2* of the Sherman Act is another story. ***HN5***[] *Section 2* of the Sherman Act provides that it is unlawful to "monopolize, or attempt to monopolize, or combine or conspire **[**10]** with any other person or persons, to monopolize" interstate trade. *15 U.S.C.A. § 2*. In *Hackman II,* I observed that "nowhere do plaintiffs allege that Dickerson (or any other defendant) exercised, attempted to exercise, or conspired to exercise monopoly power. The interpretation that the amended complaint asserts a Sherman *Section 2* claim is based on a particularly generous reading of plaintiffs' allegations." *Hackman II, at 947, n. 8*. Nevertheless, I analyzed plaintiffs' claim against Hall and RAAR as alleging their participation in a conspiracy to monopolize, and I will do so again here.

HN6[] To prove that Hall and RAAR conspired to monopolize, plaintiffs must show: "1) the existence of a combination or conspiracy, 2) overt acts in furtherance of the conspiracy, 3) an effect upon a substantial amount of interstate commerce and 4) the existence of specific intent to monopolize." *Hackman I, at 964* (*quoting* *Great Escape, Inc. v. Union City Body Co., Inc., 791 F.2d 532, 540-41 (7th Cir. 1986))*. In *Hackman II,* I dismissed plaintiffs' Sherman *§ 2* claim against Hall and RAAR because the first amended complaint did not allege "sufficient facts from which to infer that…Hall, or RAAR had an 'intent **[**11]** and **[*880]** purpose' to exercise monopoly power." [5] *Hackman II, 557 F.Supp.2d, at 947* (*quoting* *American Tobacco Co. v. United States, 328 U.S. 781, 809, 66 S.Ct. 1125, 90 L. Ed. 1575 (1946))*. The same can be said of the second amended complaint.

The second amended complaint alleges--as did the previous complaints--that Dickerson (one of the agency defendants) "controls nearly 50% of the listings in the relevant area," and that Hall advised a Dickerson agent to send Hackman an allegedly anticompetitive letter. Even construing these allegations as asserting that Hall formed an anticompetitive agreement with a dominant market player, they fall short of alleging that any of the defendants had a specific intent to monopolize as required by *§ 2*. *See* *U.S. v. Socony-Vacuum Oil Co., 310 U.S. 150, 60 S. Ct. 811, 846, 84 L. Ed 1129 at n. 59 (1940)* (price-fixing agreements that violate *§ 1* may or may **[**12]** not amount to unlawful monopolies under *§ 2*, since a *§ 2* violation requires proof of "an intent and a power" to monopolize, in addition to the existence of a "contract, combination or conspiracy" in violation of *§ 1*).

In any event, plaintiffs' *§ 2* claim against Hall and RAAR suffers from an additional flaw: neither Hall nor RAAR was a competitor in the Rockford area real estate market. Hall argues that a defendant cannot be found liable for conspiracy to monopolize a market in which it does not compete, citing several cases for this proposition: [6] *Aquatherm Industries, Inc., v. Florida Power & Light Co., 145 F.3d 1258, 1262 n. 4 (11th Cir. 1992)* ("no authority exists holding a defendant can conspire to monopolize a market in which it does not compete"); *Goodloe v. Nat'l Wholesale Co., Inc., No. 03 C 7176, 2004 U.S. Dist. LEXIS 13630, 2004 WL 1631728, at *6 (N.D. Ill., July 19, 2004)*(*citing Aquatherm*); and *Spanish Broadcasting Systems, Inc., v. Clear Channel Communications, Inc., 242 F.Supp.2d 1350, 1364 (S.D. Fla. 2003)*(same). Plaintiffs do not respond to this argument. Indeed, the entirety of their opposition to Hall's and RAAR's motions as to Count I focuses on their Sherman § 1 claim.

For the foregoing reasons, I grant Hall's and RAAR's motions to dismiss Count I to the extent that count asserts a violation of *§ 2* of the Sherman Act and otherwise deny the motions as to that count. Plaintiffs' claim under *§ 2* of the Sherman Act is dismissed with prejudice.

B. Count II

---

[5] In *Hackman I,* I dismissed this claim against RAAR (it was not then asserted against Hall) on the ground that the original complaint failed to allege that RAAR "agreed or conspired with other defendants to monopolize the market, only that other defendants used their position in RAAR to obtain a monopoly." *Hackman I, 520 F.Supp.2d, at 965*.

[6] Oddly, RAAR does not raise **[**13]** this argument, but I find it applicable to RAAR nevertheless.

My analysis of Count II against Hall and RAAR largely parallels my analysis of Count I. Count II of the amended complaint asserts violations of the Illinois Antitrust Act (the "Illinois Act") *740 ILCS § 10/3*, by Hall, RAAR, and other defendants. ***HN7***[] The Illinois Act provides, "when the wording of this Act is identical or similar to that of a federal ***antitrust law***, the courts of this State shall use the construction of the federal law by the federal courts as a guide in construing this act." *740 ILCS § 10/11*. Plaintiffs allege that Hall and RAAR (among others) violated *Sections 3(1)(a)*, *3(2)*, and *3(3)* of the Illinois Act. *Section 3(2)* is clearly similar to *§ 1* of the Sherman Act, while *Section 3(3)* is similar to *§ 2* of the federal statute. [7] **[*881]** Accordingly, I find that plaintiffs have stated a claim against Hall and RAAR under *§ 3(2)* of the Illinois Act, **[**14]** [8] but not under *§ 3(3)*.

HN9[] *Section 3(1)(a)* does not clearly parallel either *§ 1* or *§ 2* of the Sherman Act. On its face, **[**15]** this subsection prohibits agreements *between competitors* (neither provision of the Sherman Act contains this language). *See* *People ex rel. Scott v. Convenient Food Mart, Inc., 21 Ill.App.3d 97, 315 N.E.2d 124 (Ill.App.Ct. 1974)* ("The purpose of *[Section 3(1)(a)*] is to prevent Competitors from joining forces to fix prices.") Plaintiffs do not allege, however, that either Hall or RAAR is a competitor of Hackman.

For the foregoing reasons, Hall's and RAAR's motions are granted to the extent they seek dismissal of plaintiffs' claims under *Sections 3(1)(a)* and *3(3)* of the Illinois Act. Those claims are dismissed with prejudice. Count II survives against Hall and RAAR only to the extent it asserts a violation of *Section 3(2)* of the Illinois Act.

C. Counts III and IV (against RAAR and IAR)

In these counts, plaintiffs seek temporary and permanent injunctive relief against RAAR and IAR to prevent them from adjudicating one or more (it is not clear) ethics complaints allegedly pending against Hackman. Plaintiffs also seek a declaratory judgment that the manner in which RAAR and IAR have handled ethics complaints against Hackman violates these organizations' internal standards set forth in the Code **[**16]** of Ethics and Arbitration Manual of the National Association of Realtors (the "Manual").

I have twice dismissed these claims for lack of subject matter jurisdiction on the ground that plaintiffs did not sufficiently plead any connection between the alleged anticompetitive agreement and RAAR's or IAR's alleged mishandling of ethics complaints against Hackman. The second amended complaint, even read in the light most favorable to plaintiffs, does not overcome this defect as to IAR.

Plaintiffs allege that IAR improperly assumed jurisdiction of an ethics complaint filed against Hackman, and that IAR "is planning to schedule an ethics hearing at an unknown future date." Plaintiffs do not allege, however, that IAR was aware of, agreed with, supported, or encouraged any of the conduct giving rise to plaintiffs' federal claims. Notably, IAR is absent from plaintiffs' antitrust claims. Although the second amended complaint asserts that *Hall* was aware of the anticompetitive agreement when she allegedly discussed "fixing" the outcome of actions against

---

[7] The Illinois Act provides:

> ***HN8***[] *§ 3*. Every person shall be deemed to have committed a violation of this Act who shall:
>
> (1) Make any contract with, or engage in any combination or conspiracy with, any other person who is, or but for a prior agreement would be, a competitor of such person:
>
> a. for the purpose or with the effect of fixing, controlling, or maintaining the price or rate charged for any commodity sold or bought by the parties thereto, or the fee charged or paid for any service performed or received by the parties thereto;
>
> . . .
>
> (2) By contract, combination, or conspiracy with one or more other persons unreasonably restrain trade or commerce; or
>
> (3) Establish, maintain, use, or attempt to acquire monopoly power over any substantial part of trade or commerce of this State for the purpose of excluding competition or of controlling, fixing, or maintaining prices in such trade or commerce.

[8] I previously rejected RAAR's argument that it is not subject to liability under *Section 3(2)* of the Illinois Act based on its non-profit status, *Hackman I, at 966*, and I reject it again here.

plaintiffs with an IAR vice president, there are no factual allegations to suggest that *IAR* was a knowing participant in the alleged scheme. It **[**17]** is true that P 45 of the amended complaint states that Hall "conspired" with IAR's vice president; but that term is without any substantive content as to IAR. For these reasons, I **[*882]** conclude for a third time that I lack jurisdiction to hear plaintiffs' claims against IAR.

Counts III and IV against RAAR fail for other reasons. To begin with, plaintiffs plead themselves out of injunctive relief against RAAR with the allegation that IAR, not RAAR, now has (and has had since August 1, 2006) jurisdiction over the ethics proceedings allegedly pending against Hackman. Any action to prevent *RAAR* from adjudicating those proceedings is moot.

Plaintiffs' claim for declaratory relief also fails because plaintiffs have not alleged any actual controversy with RAAR. *See* *SBL Associates v. Village of Elk Grove, 247 Ill.App.3d 25, 617 N.E.2d 178, 186 Ill. Dec. 939 (Ill.App.Ct. 1993)*("actual controversy" required for claim under state Declaratory Judgment Act) [9]. Plaintiffs' objection to RAAR's transfer of the ethics proceedings to IAR is that an adverse finding by IAR could "potentially" subject Hackman to statewide, rather than merely local, censure. But ***HN10***[] a declaratory judgment is not appropriate as a means of avoiding "anticipated **[**18]** future difficulties." *Weber v. St. Paul Fire & Marine Ins. Co., 251 Ill.App.3d 371, 374 622 N.E.2d 66, 190 Ill. Dec. 656 (Ill.App.Ct. 1993)*; *see also* *Wisconsin Central, Ltd. v. Shannon, 539 F.3d 751, 759 (7th Cir. 2008)* (claim for declaratory relief requires "sufficient immediacy and reality").

Although plaintiffs dispute the propriety, under the Manual, of RAAR's transfer of the ethics proceedings, they allege no present violation of any legally cognizable interest based on the transfer. [10] Moreover, the only injury plaintiffs allege is entirely speculative: that they could "potentially" be subject to an adverse ruling by IAR at some point in the future. Furthermore, as noted above, there is no factual basis in the second amended complaint to suggest that an adverse ruling by IAR would be **[**19]** unfair to plaintiffs, since they do not assert that IAR participated in, or even knew about, the alleged anticompetitive scheme against Hackman. Finally, even assuming that a hypothetical adverse ruling by IAR would be unfair to Hackman in a way that violates some legally cognizable interest, any injury to plaintiffs would be attributable to IAR, not to RAAR.

For the foregoing reasons, I grant RAAR and IAR's motions to dismiss Counts III and IV.

D. Count VI

In Count VI, plaintiffs allege tortious interference with business expectancy and tortious interference with contract. In *Hackman II,* I dismissed Count VI against Hall and RAAR on the ground that the misconduct attributed to them lacked "a sufficient causal link with the **[**20]** injury claimed." *Hackman II, 557 F.Supp.2d., at 951*. Plaintiffs have overcome this defect.

Plaintiffs assert that Hall advised certain Hackman clients to file a complaint with the Office of Banks and Real Estate **[*883]** ("OBRE") in order to force Hackman to release them from their contract. According to the second amended complaint, Hall knew that Hackman had not engaged in wrongful conduct but advised Hackman's clients that because the cost of defending a complaint would exceed the commission he would earn on the sale of their property, Hackman would release them from their contract if they filed a complaint. Plaintiffs further allege that a complaint was filed, and that Hackman released the clients as a result.

---

[9] Plaintiffs cite only state authority in support of their claim for declaratory judgment. Regardless of whether state or federal law governs this claim, "a case of actual controversy" is required by the Constitution. *See* *Wisconsin Central, Ltd. V. Shannon 539 F.3d 751, 759 (7th Cir. 2008)* (ability to seek preemptive relief under Declaratory Judgment Act, *28 U.S.C. § 2201*, does not vitiate constitutional requirement).

[10] I note in passing that plaintiffs do not allege that the Manual creates any individual rights at all, or that it provides an individual right of judicial action to enforce its provisions. In fact, there appears to be merit to RAAR and IAR's claim that plaintiffs waived their right to judicial recourse for alleged non-compliance with the Manual, absent a claim that wilful or wanton conduct by RAAR or IAR resulted in a violation of some legally cognizable interest.

The foregoing allegations are sufficient to state a claim for tortious interference with contract. While it is true that plaintiffs do not expressly allege that Hackman's clients breached their contract, a reasonable interpretation of the claim is that the clients breached their duty of good faith and fair dealing by filing an OBRE complaint they knew to be groundless as a means of strong-arming Hackman into releasing them from their contractual obligations. [11]

Hall asserts that professional privilege immunizes her from liability for this claim. She argues that privilege exists if the defendant acted in good faith to protect an interest or uphold a duty. Because the clear implication of plaintiffs' allegations is that Hall was not acting in good faith, I reject this argument.

For the foregoing reasons, Hall's and RAAR's motions to dismiss Count VI are denied.

III. Sheley's Motion

At times relevant to this action, Frank Sheley was a real estate agent employed by defendant Dickerson. In *Hackman II, I* granted Sheley's motion to dismiss Counts I, II, and VI. Plaintiffs reassert these counts in their second amended complaint, and Sheley again moves to dismiss. His motion is granted.

A. Counts I and II

Plaintiffs claims against Sheley revolve around one particular transaction. Plaintiffs claim that after Sheley's clients declined an offer by Hackman's clients, Hackman had to insist before Sheley would present a counteroffer. Plaintiffs also allege that Sheley advised his own clients not **[**22]** to accept Hackman's offer because "Hackman's deals never close." The transaction was nevertheless consummated.

In *Hackman II,* I held that the factual matter set forth in the first amended complaint did not establish a reasonable likelihood that Sheley reached an anticompetitive agreement with any other defendant. *Hackman II, 557 F.Supp.2d at 953*. The second amended complaint still fails in this respect. The only novelty of the latest complaint, insofar as concerns plaintiffs' antitrust claims against Sheley, is that plaintiffs now state that Sheley "presumably received" a directive from defendant Dickerson not to do business with plaintiffs. This new allegation does not alter my earlier analysis.

Even assuming that the new allegation of Sheley's presumed receipt of this "directive" is sufficient to plead that Sheley knew about the anticompetitive agreement, the absence of such allegations in the first amended complaint was only part of the problem I identified in *Hackman II.* Equally important was the fact that "the very facts pled--that a transaction was completed between Hackman's and Sheley's clients--suggest that Sheley had not agreed to refuse to deal with Hackman." **[*884]** *Id.* Plaintiffs **[**23]** have not overcome this defect.

Plaintiffs argue that the allegations against Sheley are substantially identical to the allegations against defendant Licary, which I held sufficient in *Hackman II.* As I noted in that opinion, the sufficiency of plaintiffs' antitrust claims against Licary was "a closer call" than similar claims against Licary's employer. Nevertheless, I found that plaintiffs had pled sufficient factual material from which to infer Licary's agreement with and participation in the agency boycott. In particular, plaintiffs alleged that Licary was aware of the "vendetta" against Hackman, and that she had "caused" another real estate agent to cancel a deal with Hackman by telling the other agent that Hackman was dishonest and maligning his business integrity. Although both Sheley and Licary are alleged to have defamed Hackman, only Licary is alleged to have defamed Hackman to *another realtor,* who then declined to do business with Hackman. This allegation supports a claim of concerted action in a way that the allegations against Sheley do not.

For the foregoing reasons, Sheley's motion to dismiss Counts I and II is granted. These counts against him are dismissed with prejudice.

B. **[**24]** Count VI

---

[11] Because I find these **[**21]** allegations sufficient to state plaintiffs' claim against Hall and RAAR, I need not address whether any of the other allegations against them also supports their claim.

In *Hackman II,* I held that Count VI against Sheley was "patently untenable" in several respects. *Hackman II, at 953*. The only argument plaintiffs now raise in opposition to Sheley's motion is that because their latest allegations suffice to support antitrust claims against Sheley, they also support plaintiffs' tortious interference claim. Having rejected, above, the premise of plaintiffs' argument, I need not linger on its merits. Sheley's motion to dismiss Count VI is granted. Count VI against Sheley is dismissed with prejudice.

IV. Young's Motion

At times relevant to this action, Ray Young was a real estate agent employed by defendant Dickerson. Young moves to dismiss Counts I and II.

Plaintiffs' allegations against Young are similar to those against Sheley. In particular, plaintiffs allege that Young defamed Hackman to one of Hackman's clients, who then left Hackman and became Young's client. Plaintiffs further allege that Young, like Sheley, "presumably received" the directive from defendant Dickerson not to do business with Hackman. Plaintiffs do not allege that Young declined to do business with Hackman. Instead, plaintiffs again rely on a comparison to their allegations **[**25]** against Licary. This comparison fails for the same reasons discussed above in relation to Sheley's motion. Young's motion is granted, and Counts I and II against him are dismissed with prejudice.

V. Westin's Motion

At all relevant times, Mary Westin was a real estate agent and manager of defendant Dickerson. Plaintiffs allege that she said to a Hackman agent, "you seem to be a smart guy, why are you working for Hackman?" and made other unspecified derogatory remarks about Hackman. Plaintiffs further allege that the Hackman agent in question later quit Hackman's employ. Westin moves to dismiss Counts I, II and VI against her.

The only new element of plaintiffs' allegations against Westin is that she, like Sheley and Young, "presumably received" the directive not to do business with Hackman. The second amended complaint does not allege that Westin declined to do business with Hackman. Counts I and II against Westin fail for the same reasons they fail against Sheley and Young.

[*885] Count VI also fails for the very reasons I articulated in *Hackman II:*

> The allegations of the amended complaint directed to Westin are also insufficient to state a claim for tortious interference with contract. As defendant **[**26]** Westin correctly argues, to state a claim adequately, plaintiffs must allege not only that Westin interfered with an existing contract, but that she committed some impropriety in doing so. *Dowd & Dowd, Ltd. v. Gleason, 181 Ill.2d 460, 485, 230 Ill.Dec. 229, 693 N.E.2d 358 (1998)*. I find that plaintiffs' allegations fail to meet this requirement.
> Plaintiffs' allegations can reasonably read to allege two types of wrongful conduct on Westin's part. The first relates to the antitrust allegations directed to Westin. Because those claims fail to plead that Westin participated in an anticompetitive scheme, they also do not support an inference of impropriety. Plaintiffs also allege that Westin made "false and derogatory statements" about Hackman. Although a reasonable interpretation of these allegations is that they support a defamation claim, plaintiffs notably do not include Westin in Count V for defamation. The remainder of plaintiffs' allegations of wrongful conduct by Westin, such as the attribution of an improper motive for her statements to Hackman's agent, are simply too speculative and conclusory to support their claim.

Hackman II, at 954.

For the foregoing reasons, Westin's motion **[**27]** is granted. Counts I, II, and VI against her are dismissed with prejudice.

VI.

To summarize the disposition of the motions discussed above:

Hall's motion is granted in part and denied in part. Count I is now limited to plaintiffs' claim under *§ 1* of the Sherman Act, while their claim under *§ 2* of the Sherman Act is dismissed with prejudice. Count II is limited to plaintiffs' claim under *Section 3(2)* of the Illinois Antitrust Act, while their claims under *Sections 3(1)(a)* and *3(3)* are dismissed with prejudice. Count VI survives.

RAAR and IAR's joint motion is granted in part and denied in part. Count I against RAAR is now limited to plaintiffs' claim under *§ 1* of the Sherman Act, while their claim under *§ 2* of the Sherman Act is dismissed with prejudice. Count II against RAAR is limited to plaintiffs' claim under *Section 3(2)* of the Illinois Antitrust Act, while their claims under *Sections 3(1)(a)* and *3(3)* are dismissed with prejudice. Counts III and IV are dismissed.

Sheley's motion is granted. Counts I, II and VI are dismissed with prejudice.

Young's motion is granted. Counts I and II are dismissed with prejudice.

Westin's motion is granted. Counts I, II and VI are dismissed with prejudice.

Opinion by: JOAN HUMPHREY LEFKOW

Opinion

MEMORANDUM OPINION AND ORDER

This case arises out of an eight-count complaint filed by plaintiff, DSM Desotech, Inc. ("Desotech"), against defendants, 3D Systems Corporation and 3D Systems, Inc. (collectively, "3DS"), for violations of federal ***antitrust law***, state ***antitrust law***, state tort law, and federal patent law. Before the court is 3DS's motion to dismiss Counts I through VII of Desotech's complaint, the antitrust and state law claims, pursuant to *Rule 12(b)(6) of the Federal Rules of Civil Procedure*. For the reasons set forth below, 3DS's motion to dismiss [# 29] will be granted in part and denied in part.

BACKGROUND

3DS is a manufacturer of large-frame stereolithography ("SL") machines. SL is a process by which a physical object, such as a model, is created layer by layer from liquid resin that is solidified into shape with a laser. Because the end product created by the SL process is dependent in large part on the quality and specifications of the resins used to create it, a substantial amount of research and development is devoted to the creation of new types of resins. Desotech is a leader in the SL resin market and the holder **[*3]** of two equipment patents allegedly covering the resin recoating technology used in eight of the SL machines produced and sold by 3DS. 3DS likewise produces resins that can be used in the machines it sells.

Desotech alleges that since 2007, 3DS has engaged in unlawful tying, in violation of section 1 of the Sherman Act, *15 U.S.C. § 1*, and section 3 of the Clayton Act, *15 U.S.C. § 14*, (Counts I and II) by conditioning the sale and maintenance of its large-frame SL machines on the purchase of 3DS's resins. According to the complaint, 3DS "has expressly refused to sell and service its most recent large-frame SL machine--the Viper Pro SLA System--unless customers exclusively purchase resin from 3DS." Am. Comp. P 5.

According to Desotech, 3DS has begun informing customers that only "licensed" or "approved" resins can be used in the Viper Pro, though 3DS neither told customers about the resin limitation at the time of sale nor informed competing resin suppliers about the requisite approval process. To enforce this mandate, 3DS has included in the Viper Pro a radio frequency identification, or "RFID," feature which, if activated by 3DS, will prevent the machine from working should customers **[*4]** attempt to use competing brands of resin. Although customers were aware that the RFID component existed, they allegedly did not know this feature could be used to preclude the use of competing resins that they may want to use. Furthermore, 3DS did not attempt to activate the RFID feature until recent software updates were made to machines already purchased. Regarding those Viper Pro machines in which 3DS has not already activated the RFID feature, 3DS has told its customers that it soon intends to do so. 3DS has warned customers that if they refuse to allow the RFID feature to be activated or if they continue to use unapproved resin, the warranty supplied by 3DS at the time of purchase will be voided.

Desotech further alleges that although 3DS used to make several other large-frame SL machines that do not have an RFID component, 3DS has stopped manufacturing those models and, moreover, is attempting to systematically eliminate them from the market. For example, 3DS has allegedly reached an agreement with a leading SL machinery maintenance contractor, National RP Support, Inc. ("National RP"), to stop servicing those older large-frame machines for which no contractual servicing obligation **[*5]** exists. Desotech also asserts that 3DS is removing existing large-frame SL machines from the market by offering substantial incentives to customers to trade-in old machines and purchase a Viper Pro.

Desotech alleges that in addition to unlawful tying, 3DS's contracting and licensing practices amount to an unlawful restraint of trade and attempted monopolization of the SL resin market in violation of sections 1 and *2* of the Sherman Act, *15 U.S.C. §§ 1* and *2* (Counts III and IV, respectively), and the Illinois Antitrust Act, *740 Ill. Comp. Stat. 10/3* (Count V).

Desotech's complaint further alleges that 3DS has made false, misleading, and disparaging statements to Desotech customers about the quality and fitness for use of Desotech's resins, in violation of the Illinois Uniform Deceptive Trade Practices Act, *815 Ill. Comp. Stat. 510/2(a)(7)-(8)*, and that 3DS has tortiously interfered with prospective economic advantages reasonably anticipated by Desotech, in violation of Illinois state law.

3DS moves to dismiss all of the antitrust and state law claims set forth in the complaint.

STANDARD OF REVIEW

Defendants bring their motion under *Rule 12(b)(6)* for failure to state a claim upon which relief **[*6]** may be granted. The Supreme Court recently addressed the proper application of the federal notice pleading standards, particularly in regard to antitrust actions, in *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. In *Twombly,* the Court "retire[d]" the frequently quoted language of *Conley v. Gibson, 355 U.S. 41, 45-46, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957)*, "that a complaint should not be dismissed for failure to state a claim unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief." *Twombly, 127 S. Ct. at 1968-69* ("The phrase is best forgotten as an incomplete, negative gloss on an accepted pleading standard: once a claim has been stated adequately, it may be supported by showing any set of facts consistent with the allegations in the complaint."). Instead, at the pleading stage, there must be "allegations plausibly suggesting" an antitrust violation; the mere possibility of later "unearthing direct evidence" through discovery is not enough to preclude dismissal. *Twombly, 127 S. Ct. at 1966, 1968*.

The Seventh Circuit has explained that despite "some language that could **[*7]** be read to suggest otherwise, the Court in *Twombly* made clear that it did not, in fact, supplant the basic notice-pleading standard." *Tamayo v. Blagojevich, 526 F.3d 1074, 1083 (2008)*; *see also* *Twombly, 127 S. Ct. at 1973, n.14* (expressly disclaiming the establishment of "any 'heightened' pleading standard" or broadening of the scope of *Fed. R. Civ. P. 9*); *Lang v. TCF Nat'l Bank, 249 Fed. Appx. 464, 466-67 (7th Cir. 2007)* (noting that notice pleading remains the pleading standard). A plaintiff still must provide only "enough detail to give the defendant fair notice of what the claim is and the grounds upon which it rests, and, through his allegations, show that it is plausible, rather than merely speculative, that he is entitled to relief." *Lang, 249 Fed. Appx. at 466* (internal quotation marks and ellipses omitted) (citing *EEOC v. Concentra Health Care Servs., Inc., 496 F.3d 773, 776-77 (7th Cir. 2007)* (citing *Twombly, 127 S. Ct. at 1964*)).

For complaints involving complex litigation--for example, antitrust or RICO claims--a fuller set of factual allegations may be necessary to show that plaintiff's claims are plausible. *Limestone Dev. Corp. v. Village of Lemont, Ill., 520 F.3d 797, 803 (7th Cir. 2008)*. **[*8]** Nevertheless, a plaintiff's complaint need only provide a "short and plain statement of the claim showing that the pleader is entitled to relief," *Fed. R. Civ. P. 8(a)(2)*, sufficient to provide the defendant with "fair notice" of the claim and its basis. *Twombly, 127 S. Ct. at 1964*. In addressing a *rule 12(b)(6)* motion, the court construes the complaint in the light most favorable to the plaintiff, accepting as true all well-pleaded factual allegations and drawing all reasonable inferences in her favor. *Tamayo, 526 F.3d at 1081*.

DISCUSSION

I. Tying Claims (Counts I and II)

Desotech has filed two counts against 3DS for unlawful tying, the first under § 1 of the Sherman Act (Count I) and the second under § 3 of the Clayton Act (Count II). Although some older cases state otherwise, the standards for adjudicating tying claims under the two statutes are now recognized to be the same. *Sheridan v. Marathon Petroleum Co., 530 F.3d 590, 592 (7th Cir. 2008)*. In a tying agreement, a seller conditions the sale of a product or service on the buyer's purchase of another product or service from, or by direction of, the seller. *Id. at 592*. Of course, every refusal to sell two products separately cannot **[*9]** be said to restrain competition. *Reifert v. S. Cent. Wis. MLS Corp., 450 F.3d 312, 322 (7th Cir. 2006)*. If each of the products may be purchased separately in a competitive market, one seller's decision to sell the two in a single package imposes no unreasonable restraint on either market. *D.O. McComb & Sons, Inc. v. Memory Gardens Mgmt. Corp., Inc., 736 F. Supp. 952, 957 (N.D. Ind. 1990)*.

The Supreme Court has established that "the essential characteristic of an invalid tying arrangement lies in the seller's exploitation of its control over the tying product to force the buyer into the purchase of a tied product that the buyer either did not want at all, or would have preferred to purchase elsewhere on different terms." *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 12, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984)*, *abrogated on other grounds by* *Ill. Tool Works, Inc. v. Indep. Ink, Inc., 547 U.S. 28, 126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006)*. Where such "forcing" is present, "competition on the merits in the market for the tied item is restrained and the Sherman Act is violated." *Id.* In order to establish the per se illegality of a tying arrangement, a plaintiff must demonstrate that **[*10]** (1) the tying arrangement is between two distinct products or services, (2) the defendant has sufficient economic power in the tying market to appreciably restrain free competition in the market for the tied product, and (3) a not insubstantial amount of interstate commerce is affected. *Reifert, 450 F.3d at 316 (7th Cir. 2006)*. In addition, the Seventh Circuit has held that "an illegal tying arrangement will not be found where the alleged tying company has absolutely no economic interest in the sales of the tied seller, whose products are favored by the tie-in." *Carl Sandburg Vill. Condo. Ass'n No. 1 v. First Condo. Dev. Co., 758 F.2d 203, 207-08 (7th Cir. 1985)*; *accord* *Reifert, 450 F.3d at 316*.

Defendants contend that Desotech's complaint fails to adequately allege the first three elements of an unlawful tying arrangement. Because the court agrees that Desotech did not adequately plead the third element--that the tying arrangement forecloses a substantial volume of commerce--the other elements need not be addressed at this time.

The ultimate flaw in Desotech's tying claim is its failure to allege the existence of a coerced tying arrangement on the part of 3DS. As the Supreme Court has **[*11]** explained, "the essential characteristic of an invalid tying arrangement lies in the seller's exploitation of its control over the tying product to *force* the buyer into the purchase of a tied product" he does not want. *Jefferson Parish, 466 U.S. at 12* (emphasis added). If the consumer remains free to buy the tying product without also buying the product to which it is ostensibly tied, then no coercion has occurred. *See* *id. at 12 n.6* (citing *N. Pac. Ry. Co. v. United States, 356 U.S. 1, 6 n. 4, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958))*. Even if the defendant attempts to induce consumers into purchasing both products he sells by offering the bundle at discount prices, he has not engaged in illegal tying so long as the consumer remains free to purchase each item separately. *See* *Schor v. Abbott Labs., 457 F.3d 608, 610 (7th Cir. 2006)* (drug manufacturer did not effect a tying arrangement when selling a patented drug in combination with another drug at a discount because patented drug was also available for sale separately). This is because ***antitrust law*** is only concerned with behavior that has "a substantial potential for impact on competition." *Jefferson Parish, 466 U.S. at 16*. Furthermore, **[*12]** "[i]f only a single purchaser were 'forced' with respect to the purchase of a tied item, the resultant impact on competition would not be sufficient to warrant the concern of ***antitrust law***." *Id.*

Many circuits thus require plaintiffs alleging tying claims to show not only that a defendant has market power but also that the defendant has wielded such market power to force consumers to alter their purchasing choices. *See, e.g.,* *United States v. Microsoft Corp., 346 U.S. App. D.C. 330, 253 F.3d 34, 85 (D.C. Cir. 2001)*; *Thompson v. Metro. Multi-List, Inc., 934 F.2d 1566, 1577 (11th Cir. 1991)*. Although the Seventh Circuit does not explicitly require evidence of coercion as an independent element of tying claims, Judge Wood has recognized that demonstrating foreclosure of competition in the tied product market--the third element of the Seventh Circuit's test--is essentially equivalent to the "coercion element" required by other circuits. *Reifert, 450 F.3d at 323* (Wood, J., concurring). After all, if the defendant has not forced consumers into the tying arrangement alleged, it can hardly be said that such arrangements have substantially affected interstate commerce to the detriment of those consumers.

Here, Desotech's **[*13]** complaint fails to adequately allege coercion on the part of 3DS. Although Desotech states that 3DS "expressly refuses to sell and service" its newest line of SL machines unless customers purchase their resin exclusively from 3DS, Am. Compl. P 5, Desotech's allegations regarding particular customers fail to support such a conclusion.

Desotech alleges that 3DS told two Desotech customers, Express Pattern and Dynacept, that they could not use newer Desotech resins in their Viper Pro machines. Desotech further alleges that 3DS told Dynacept that if it continued to use "non-approved" Desotech resins in its Viper Pro machines, 3DS would withhold maintenance service and void existing warranties. Am. Compl. P 63.

Although such actions on the part of 3DS might be considered a breach of warranty (or otherwise anticompetitive, as discussed in further detail below), such allegations do not amount to a tie-in. *See, e.g., Va. Panel Corp. v. MAC Panel Co., 133 F.3d 860, 870-71 (D.C. Cir. 1998)* ("[V]oiding a warranty on a product already sold, while possibly a breach of warranty, cannot be a tying arrangement because the purchaser is not deciding whether to buy a product."). To the extent Desotech **[*14]** complains that 3DS is tying the sale of its machine to its resins, such assertions cannot be supported by 3DS's actions towards Express Pattern and Dynacept, both of which had already purchased their Viper Pros at the time the alleged tie-in was executed. *See N. Pac. Ry., 356 U.S. at 5-6* ("For our purposes a tying arrangement may be defined as an agreement by a party to *sell one product but only on the condition* that the buyer also purchases a different (or tied) product, or at least agrees that he will not purchase that product from any other supplier.") (emphasis added).

Furthermore, to the extent that 3DS alleges that service or maintenance of the machines is the tying market at issue for these consumers, [1] Desotech has failed to identify, much less adequately allege, a market for such service, as would be required in order to allege that 3DS has market power in the tying market. [2] *Cf.* Am. Compl. P 82 ("*Large-frame SL machines (i.e., the tying product)* and resins for those machines (i.e., the tied product) constitute separate and distinct products.") (emphasis added).

Nor are Desotech's tying allegations saved by its pleadings with respect to Tangible Express or AP Pronto ("APP"), two other Desotech customers. Desotech alleges that as part of a transaction in which Tangible Express purchased six Viper Pro machines from 3DS, those companies executed a memorandum of understanding that "expressly required Tangible Express to purchase all of its resin for the six Viper Pro machines directly from 3DS." [3] Am. Compl. P 68. While this allegation clearly alleges a contract of exclusive dealing between 3DS and Tangible Express, Desotech does not allege that 3DS required such exclusive **[*16]** dealing as a condition on the sale of its Viper Pro machines. Similarly, Desotech alleges that in a recent deal between 3DS and APP, "3DS required APP to trade-in an older SL machine for a Viper Pro and to purchase its resins exclusively from 3DS rather than Desotech." Am. Compl. P 70. Desotech once again failed, however, to allege that such exclusive dealing was a precondition to the availability of 3DS's new Viper Pro. [4] It could be consistent with lawful behavior on the part of 3DS if it won those exclusive contracts through aggressive selling techniques or discounts on its products. *See Waldo v. N. Am. Van Lines, Inc., 669 F. Supp. 722, 731 (W.D. Pa. 1987)* ("[S]imply characterizing an exclusive dealing arrangement as a tying arrangement does not necessarily make it one.") (citations omitted). Indeed, nowhere does Desotech allege that either of these customers is unhappy with its current resin sourcing arrangements.

The closest Desotech comes to an adequate allegation of coercion is in its assertions regarding the interaction between 3DS and Lockheed Martin ("Lockheed"), another Desotech customer. Desotech alleges that in mid-2007, Lockheed Martin informed 3DS that one of its SLA 500 machines, a predecessor to the new Viper Pro, stopped

---

[1] Although the complaint never explicitly identifies maintenance of large-frame SL machines as a relevant "tying market," **[*15]** it repeatedly alleges that 3DS "*condition[ed] the* sale and/or *maintenance* of its large-frame SL machines on the purchase of its own SL resins." Am. Compl. PP 80, 90, 94.

[2] The complaint suggests that there are at least a few third-party maintenance contractors who could provide service to Viper Pro owners independent of 3DS. While one such contractor has allegedly agreed with 3DS not to provide service to Viper Pro owners who use Desotech resins, the court is unable to assess a maintenance/resin tying claim absent further factual detail about the market for SL machine service.

[3] Although 3DS submitted along with its motion to dismiss a copy of the memorandum of understanding, the court finds Desotech's allegations inadequate even without consideration of the submitted exhibit and, therefore, will not consider it at this time.

[4] In its response **[*17]** brief, Desotech asserts that the complaint alleges that "AP Proto, Lockheed and Tangible Express were *required* to purchase their resins exclusively from 3DS as a condition to buying their Viper Pro machines." Pl.'s Resp. at 14 (emphasis in original). Desotech did not, however, include such an assertion in its amended complaint. Furthermore, even if that language had been included in the amended complaint, it is not clear that such a "conclusory allegation," without more factual specificity as to each of the three customers, would be sufficient under *Twombly, 127 S. Ct. at 1966*.

working. [5] Desotech further alleges that "[a]fter a significant amount of pressure from 3DS, including 3DS's refusal to sell the Viper Pro machine to Lockheed unless Lockheed agreed to purchase resins exclusively from 3DS and to stop purchasing resins from Desotech, Lockheed agreed to purchase **[*18]** a Viper Pro to replace its SLA 500 machine." Am. Compl. P 66. Desotech also alleges that Lockheed is unhappy about this arrangement and has expressed to Desotech its desire to use Desotech's resins rather than 3DS's.

With these allegations concerning Lockheed, Desotech has given 3DS notice of its claim and identified a particular set of events from which 3DS could begin to prepare a defense. Most importantly, Desotech alleges that Lockheed did not want to purchase 3DS's resins, but that Lockheed was nevertheless required to if it wanted to continue to purchase and use 3DS's SL machines. Such allegations form the cornerstone of a successful tying claim. Still, these particular allegations alone cannot carry Desotech's burden on this motion to dismiss. As the Supreme Court made clear in *Jefferson Parish,* "[i]f only a single purchaser were 'forced' with respect to the purchase of a tied item, the resultant impact on competition would not be sufficient to warrant the concern of ***antitrust law***," *466 U.S. at 16*, and, furthermore, Desotech alleges that Lockheed purchased only a single **[*19]** Viper Pro machine.

Because Desotech has failed to sufficiently allege the existence of an illegal tying arrangement, Counts I and II of its complaint will be dismissed without prejudice.

II. Attempted Monopolization (Count IV)

Section 2 of the Sherman Act provides that "[e]very person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a felony . . . ." *15 U.S.C. § 2*. Desotech alleges that 3DS has attempted to monopolize the SL resin market. To prove attempted monopolization, a plaintiff must show "(1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power." *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)*; *accord* *Indiana Grocery, Inc. v. Super Valu Stores, Inc., 864 F.2d 1409, 1412 (7th Cir. 1989)*; *Nat'l Black Expo v. Clear Channel Broad., Inc., 2007 U.S. Dist. LEXIS 9783, 2007 WL 495307, at *8 (N.D. Ill. Feb. 8, 2007)*.

A. Dangerous Probability of Success

The "dangerous probability" **[*20]** element requires allegations that 3DS had sufficient market power to threaten actual monopolization within the relevant market. *Indiana Grocery, 864 F.2d at 1413*. As discussed below, Desotech's complaint sufficiently alleges that 3DS poses a dangerous probability of acquiring monopoly power in the SL resin market.

1. Market Power

Desotech alleges that 3DS has the market power to threaten actual monopolization. Specifically, Desotech alleges that 3DS has a "present and growing market share of over 50%" of the SL resin market, making it the single largest supplier. Am. Compl. P 9. Although 3DS cites *Blue Cross & Blue Shield United of Wisconsin v. Marshfield Clinic, 65 F.3d 1406, 1411 (7th Cir. 1995)*, for the proposition that "[f]ifty percent is below any accepted benchmark for inferring monopoly power from market share," 3DS has conflated the terms *monopoly* power and *market* power. Although the terms are synonymous in most respects and are sometimes used interchangeably, *see, e.g., Cost Management Services, Inc. v. Washington Natural Gas Co., 99 F.3d 937, 950 n.15 (9th Cir. 1996)*, "monopoly power" generally denotes some higher threshold of market power than does the term "market power" **[*21]** alone. [6]

---

[5] According to the complaint, 3DS has stopped manufacturing its older lines of SL machines, including the SLA 500.

See, e.g., Eastman Kodak Co. v. Image Technical Services, Inc., 504 U.S. 451, 481, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992) ("Monopoly power under *§ 2* requires, of course, something greater than market power under *§ 1*."); *Bacchus Indus., Inc. v. Arvin Indus., Inc., 939 F.2d 887, 894 (10th Cir. 1991)* ("Monopoly power is also commonly thought of as substantial market power.").

With respect to a claim for attempted monopolization, a plaintiff need only show that 3DS currently has *market* power and that such *market* power will tend to approach monopoly power if the alleged unlawful conduct remains unchecked. *See Star Fuel Marts, LLC v. Sam's East, Inc., 362 F.3d 639, 648 n.3 (10th Cir. 2004)* ("[A]n attempted monopolization claim requires . . . that the defendant have sufficient market **[*22]** power such that there is a 'dangerous probability' that an attempt to achieve monopoly power will succeed.") (internal quotation marks omitted) (citing *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 251, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993))*. In *Lektro-Vend,* the court held that the defendant's alleged practices "raise[d] a dangerous propensity for creation of an actual monopoly." *Lektro-Vend Corp. v. Vendo Co., 403 F. Supp. 527, 534 (C.D. Ill. 1975)*, *aff'd 545 F.2d 1050 (7th Cir. 1976)*, *rev'd on other grounds, 433 U.S. 623, 97 S. Ct. 2881, 53 L. Ed. 2d 1009 (1977)*. In reaching this determination, the court emphasized that the defendant maintained a "significant market share," "most probably over 20%." *Id.* The court also observed that "the number of competitors [had] been steadily declining" within the relevant market. *Id.; see also Hardy v. City Optical Inc., 39 F.3d 765, 767 (7th Cir. 1994)* (noting in a related context that 30% is "the minimum market share from which the market power required to be shown at the threshold of a tying case can be inferred").

Here, Desotech similarly alleges that since 3DS began the alleged unlawful behavior in mid-2007, 3DS's **[*23]** market share has been increasing and, consequently, the shares of Desotech and other resin dealers steadily decreasing. At this stage of the litigation, absent the aid of discovery, Desotech need not allege in exact numbers the percentage increase of 3DS's market share. Furthermore, "the Sherman Act's prohibition against attempted monopolization does not require that the attempt in fact ripen into an actual monopoly. It is the attempt which is the offense." *Lektro-Vend Corp. v. Vendo Co., 660 F.2d 255, 270 (7th Cir. 1981)*. As alleged by Desotech, the market for SL resin is highly concentrated, with 95% of the market represented by three suppliers--3DS (50%), Desotech (35%), and Huntsman (10%). If Desotech were forced out of the market, 3DS's market power would likely increase substantially.

3DS maintains that Desotech's allegations of market power are nevertheless inadequate because market share alone is insufficient to indicate market power. Even if 3DS's market share alone is an insufficient indicator of its capacity to control prices and exclude competitors, however, consideration of other factors relevant to the dangerous probability analysis--"the alleged offender's ability to **[*24]** achieve the forbidden result, his intent, and the nature of his overt actions," *Lektro-Vend, 660 F.2d at 271* (internal citations omitted)--indicate that Desotech has adequately alleged the dangerous probability element of its attempted monopolization claim.

For example, 3DS has allegedly leveraged its monopoly power in the market for large-frame SL machines to exclude competitors from the resin market by outfitting its machines with an RFID feature that will render the machine inoperable should the operator attempt to use unapproved resins. Further allegations indicate that 3DS has attempted to systematically remove from the market (or prevent from being serviced) older SL machines that lack the RFID feature. Such actions would undoubtedly increase 3DS's ability to control prices and exclude competitors in the SL resin market. Although 3DS asserts that it has instituted a licensing and qualification process by which competing resin producers might remain active, Desotech has plausibly alleged that the asserted licensing process is in fact a sham.

---

[6] Whereas the Seventh Circuit has long been comfortable defining monopoly power in simple terms--e.g., "power over price" or "the ability to cut back the market's total output and so raise prices," *Indiana Grocery, 864 F.2d at 1414*--it commented in a recent opinion that "'market power' is key, but its meaning requires elucidation." *Sheridan v. Marathon Petroleum Co. LLC, 530 F.3d 590, 594 (7th Cir. 2008)*.

2. Relevant Market

The relevant market is defined as "the market area in which the seller operates, and to which the purchasers can practicably **[*25]** turn for supplies." *Nat'l Black Expo, 2007 U.S. Dist. LEXIS 9783, 2007 WL 495307, at *8* (quoting *Tampa Elec. Co. v. Nashville Co., 365 U.S. 320, 327, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961))*. The relevant market contains both product and geographical components. *Spectrum Sports, 506 U.S. at 459*. The definition of the relevant market is determined based on "the nature of the commercial entities involved and by the nature of the competition that they face." *United States v. Phillipsburg Nat'l Bank & Trust Co., 399 U.S. 350, 359, 90 S. Ct. 2035, 26 L. Ed. 2d 658 (1970)*.

Desotech defines the relevant product market as "resins used in [large-frame SL] machines" and the relevant geographic market as "the United States." Am. Compl. PP 26, 27. As market definitions are questions of fact ordinarily determined at trial, *L&W/Lindco Prods. v. Pure Asphalt Co., 979 F. Supp. 632, 638 (N.D. Ill. 1997)*, Desotech has pled a relevant market sufficient to survive a motion to dismiss. *See Todd v. Exxon Corp., 275 F.3d 191, 203 (2d Cir. 2001)* ("At [the pleading] stage, it is sufficient that plaintiff has alleged specific facts that support a narrow product market in a way that is plausible and bears a rational relation to the methodology **[*26]** courts prescribe to define a market for antitrust purposes.").

B. Predatory or Anticompetitive Conduct

The Supreme Court has characterized this element of the attempted monopolization offense as "the use of monopoly power 'to foreclose competition, to gain a competitive advantage, or to destroy a competitor.'" *Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 482-83, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)* (quoting *United States v. Griffith, 334 U.S. 100, 107, 68 S. Ct. 941, 92 L. Ed. 1236 (1948))*. Predatory conduct has been broadly defined as conduct "that has no legitimate business justification other than to destroy or damage competition." *Great Escape, 791 F.2d at 541*. The Seventh Circuit has stated more generally, however, that when it comes to liability under *§ 2* of the Sherman Act, "if conduct is not objectively anticompetitive the fact that it was motivated by hostility to competitors . . . is irrelevant." *Olympia Equip. Leasing Co. v. W. Union Tel. Co., 797 F.2d 370, 379 (7th Cir. 1986)* (citing *Ball Mem'l Hosp. v. Mut. Hosp. Ins., Inc., 784 F.2d 1325, 1338-39 (7th Cir. 1986))*.

The conduct alleged by Desotech is plainly anticompetitive and intended to foreclose **[*27]** competition. 3DS cites Judge Posner's antitrust textbook for the proposition that "promoting customer satisfaction by restricting the supplies that can be used in a seller's equipment to those that meet the seller's qualification is procompetitive." Defs.' Memo. at 24 (citing RICHARD A. POSNER, ***ANTITRUST LAW*** 201 (2d ed. 2001)). But the allegations set forth in the complaint do not suggest that 3DS's restrictions on resins used in Viper Pro machines promote customer satisfaction. On the contrary, Desotech alleges that several of its customers have identified mechanical problems when using 3DS resins in their Viper Pros. For example, Lockheed is allegedly unable to use the Desotech resin that it has identified as ideal for its particular purpose; instead, it has been required to use 3DS resins which it has found to be disappointing and "insufficiently accura[te], with particularly bad 'differential shrink,' which is different dimensional changes based on the thickness of the part." Am. Compl. P 67.

Even if the court were to assume, however, that there are some 3DS consumers who are happier with the RFID-laden Viper Pro than they were with machines absent such a feature, 3DS's other alleged **[*28]** actions also foreclose competition. Desotech has alleged that the RFID licensing and qualification procedure is non-existent, which places 3DS in complete control of competition in the resin market for Viper Pros. Desotech has further alleged that because of this licensing inadequacy, 3DS has reduced the number of resins available to Viper Pro owners from over 40 to just a few.

Additionally, Desotech has alleged that 3DS is systematically preventing older SL machines from remaining on the market and that it is actively preventing current Viper Pro owners from disabling the RFID feature. According to Desotech, 3DS has stopped producing non-RFID machines altogether. While a company has no obligation to continue producing older lines of products it no longer deems profitable, Desotech alleges that 3DS is attempting to eliminate the secondary market for SL machines by removing its older products from commerce. *Cf.* United States v. United Shoe Mach. Corp., 110 F. Supp. 295, 334, 343-44 (1922) (finding that defendant had monopolized the shoe machinery market by, in part, purchasing "second-hand machinery mostly of its own manufacture" for the purpose of "curtail[ing] competition from second-hand **[*29]** shoe machinery"), *aff'd* 347 U.S. 521, 74 S. Ct. 699, 98 L. Ed. 910 (1954) (per curiam). If successful, such a scheme could further strengthen 3DS's control over competition in the SL resin market by eliminating from the market any older SL machines, which lack the RFID feature and thus allow for use of competing resins.

For example, Desotech alleges that maintenance contractor National RP has entered into a contract with 3DS that requires National RP "to cease servicing and refurbishing all SLA 500 machines not currently covered by an existing maintenance contract." Am. Compl. P 71. Such a contract has no obvious business justification other than increasing 3DS's market power in the SL machine and resin markets. National RP has also allegedly agreed with 3DS to stop servicing Viper Pro machines used with "non-approved" Desotech resins. Am. Compl. PP 63, 72. The procompetitive justifications for such a restriction are not readily apparent. For example, if a 3DS customer would rather void the warranty on its Viper Pro than be subject to restrictions on its choice of resin, what legitimate interest would 3DS have in preventing that customer from independently hiring a third-party maintenance **[*30]** provider such as National RP? Ultimately, Desotech will have the burden of proving that the anticompetitive harm from 3DS's conduct outweighs the procompetitive benefits. For purposes of this motion to dismiss, however, Desotech has sufficiently alleged predatory or anticompetitive conduct.

C. Specific Intent

Because "[a]ll lawful competition aims to defeat and drive out competitors," the "mere intention to exclude competition and to expand one's own business is not sufficient to show a specific intent to monopolize." Great Escape Inc. v. Union City Body Co., 791 F.2d 532, 541 (7th Cir. 1986) (internal citations omitted). Rather, the acts from which the court can infer specific intent must be essentially predatory in nature. *Id.* Although the specific intent requirement is consistently listed in the Seventh Circuit as a separate inquiry from the predatory conduct element, the same evidence that is used to prove predatory conduct often establishes specific intent as well. *See, e.g., L&W/Lindco, 979 F. Supp. at 638-39*. As discussed above, Desotech has sufficiently alleged predatory conduct, and specific intent--"an intent to control prices and destroy competition," *id. at 639*--can be inferred **[*31]** from the same allegations. *See* Great Escape, 791 F.2d at 541 ("Specific intent may be inferred from predatory conduct . . . .").

D. Antitrust Injury

3DS's last argument for dismissal of Desotech's attempted monopolization claim is based on its contention that Desotech has failed to allege antitrust injury. To have a right of action under the antitrust laws of the United States, a "plaintiff must prove the existence of '*antitrust* injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful.'" Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 334, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990) (emphasis in original) (quoting Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)). In other words, it is not enough for a plaintiff to show injury in fact that is causally linked to the illegal conduct; the plaintiff must further show injury that "reflect[s] the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation." Brunswick Corp., 429 U.S. at 489.

The Seventh Circuit has interpreted this standard as requiring **[*32]** that a plaintiff "show that its loss comes from acts that reduce output or raise prices to consumers" in order to sufficiently plead antitrust injury. *See* Stamatakis Indus., Inc. v. King, 965 F.2d 469, 471 (7th Cir. 1992) (quoting Chi. Prof'l Sports Ltd. Partnership v. Nat'l Basketball Ass'n, 961 F.2d 667, 670 (7th Cir. 1992)); *accord* U.S. Gypsum Co. v. Ind. Gas Co., 350 F.3d 623, 626-27 (7th Cir. 2003). If "a victory for the competitor can confer no benefit, certain or probable, present or future, on consumers . . .

a court is entitled to question whether a violation of ***antitrust law*** is being charged." *Brunswick Corp. v. Riegel Textile Corp., 752 F.2d 261, 266 (7th Cir. 1984)*.

Desotech has plainly alleged antitrust injury. Desotech's complaint states that 3DS's anticompetitive behavior forecloses existing competition, discourages innovation, and "dissuades potential new entrants from entering the large-frame SL resin market." Am. Compl. P 77. It alleges further that as a result of 3DS's actions, resin purchasers "will have a substantially smaller selection of resins from which to make their end products." Am. Compl. P 78. Should Desotech ultimately prove these allegations and prevail **[*33]** in this litigation, Desotech's victory would also be a win for consumers.

For these reasons, the court denies 3DS's motion to dismiss Desotech's claim for attempted monopolization, Count IV of the amended complaint.

III. Unreasonable Restraint of Trade (Count III)

In Count III, its claim for unreasonable restraint of trade under section 1 of the Sherman Act, Desotech alleges that in addition to the tying allegations,

> 3DS's conduct in contracting and licensing with its customers constitutes an unreasonable restraint of trade and commerce, in violation of § 1 of the Sherman Act, *15 U.S.C. § 1*. In particular, 3DS's unilateral declaration that all machine warranties are void if a customer does not purchase its resins from 3DS and its failure to service a large frame SL machine until a customer switches resin orders to 3DS constitute an unreasonable restraint of trade.

Am. Compl. P 94.

In its memorandum in support of its motion to dismiss, 3DS does not specifically address the sufficiency of Count III. Although 3DS does argue that the complaint fails to make certain allegations that are "necessary for *all* of Desotech's antitrust claims," Defs.' Mem. at 15 (emphasis added), the court, in its analysis **[*34]** of the attempted monopolization claim, has already considered and rejected those general arguments.

"The rule of reason is the accepted standard for testing whether a practice restrains trade in violation of *§ 1*." *Leegin Creative Leather Prods., Inc. v. PSKS, Inc., 551 U.S. 877, 127 S. Ct. 2705, 2712, 168 L. Ed. 2d 623 (2007)*. Rule of reason analysis of claims arising under section 1 of the Sherman Act is similar to analysis of monopolization claims under *section 2*. *United States v. Microsoft Corp., 346 U.S. App. D.C. 330, 253 F.3d 34, 59 (D.C. Cir. 2001)*. Under either analysis, courts apply a balancing approach, weighing the anticompetitive harm of the conduct against the procompetitive benefit. *Id.* The essence of the rule of reason analysis under *section 1* is the requirement that the plaintiff "show that the challenged restraint has an adverse impact on competition in a relevant market." *Dos Santos v. Columbus-Cuneo-Cabrini Med. Ctr., 684 F.2d 1346, 1352 (7th Cir. 1982)*. Having found (as discussed above) that Desotech sufficiently alleged a claim for attempted monopolization under *section 2*, the court finds that the same allegations also support, in large part, its claim under *section 1*.

Of course, in contrast **[*35]** to *section 2*, section 1 of the Sherman Act reaches only "unreasonable restraints of trade effected by a 'contract, combination . . . or conspiracy' between separate entities" and "does not reach conduct that is 'wholly unilateral.'" *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)* (quoting *15 U.S.C. § 1*). Although Desotech's section 1 allegations are, by their own terms, premised largely on 3DS's "unilateral declaration," *id.* P 94, Desotech further alleges that "[t]he contracts and licenses between 3DS and its customers constitute concerted action." *Id.* P 95. Thus, Desotech's section 1 allegations are not based entirely on unilateral conduct and do not fail on that count. 3DS's motion to dismiss Count III is therefore denied.

IV. Illinois Antitrust Act (Count V)

Both parties agree that courts "shall use the construction of the federal law by the federal courts as a guide in construing [the Illinois Antitrust Act]" when "the wording [of the Act] is identical or similar to that of federal ***antitrust law***." *740 Ill. Comp. Stat. 10/11*. The language of *740 Ill. Comp. Stat. 10/3*, the provision of the Illinois Antitrust Act cited in Desotech's **[*36]** state antitrust count, is similar, in relevant parts, to the Sherman Act and the Clayton Act. The court will thus look to federal law interpreting the relevant language of those federal antitrust statutes for guidance in analyzing Desotech's claims under the Illinois Antitrust Act. *A & A Disposal & Recycling, Inc. v. Browning-Ferris Indus. of Ill., Inc., 664 N.E.2d 351, 352-53, 279 Ill. App. 3d 337, 215 Ill. Dec. 954 (Ill. App. Ct. 2d Dist. 1996)*. Because Desotech has stated valid claims for attempted monopolization under *section 2* of the Sherman Act and for unreasonable restraint of trade under section 1 of the Sherman Act, Desotech has likewise stated a valid claim under *740 Ill. Comp. Stat. 10/3*. 3DS's motion to dismiss Count V is therefore denied.

V. Illinois Uniform Deceptive Trade Practices Act (Count VI)

In Count VI, Desotech brings claims for commercial disparagement under *sections 2(a)(7)* and *2(a)(8) of the Illinois Uniform Deceptive Trade Practices Act (IUDTPA), 815 Ill. Comp. Stat. 510/2*. To state a claim for commercial disparagement under *section 2(a)(8)*, a plaintiff must allege that the defendant made specific statements "disparag[ing] the goods, services, or business of **[*37]** another by false or misleading representation of fact." *815 Ill. Comp. Stat. 510/2(a)(8)*; *accord* *Stenograph Corp. v. Microcat Corp., No. 86 C 10231, 1989 U.S. Dist. LEXIS 10105, 1989 WL 99543, at *4 (N.D. Ill. Aug. 21, 1989)*. Similarly, under *section 2(a)(7)*, a plaintiff must allege that the defendant "represent[ed] that goods or services are of a particular standard, quality, or grade or that goods are a particular style or model, if they are of another." *815 Ill. Comp. Stat. 510/2(a)(7)*.

The complaint alleges that 3DS made various disparaging statements and misrepresentations to Desotech customers, including (1) that Desotech "had not done its 'due diligence'" with respect to certain of its resins, Am. Compl. P 54; (2) that those resins "were of insufficient quality to run on 3DS's large-frame SL machines" (though, Desotech further alleges, "3DS itself had previously distributed some of the exact same resins under its distribution agreement with Desotech"), *id.;* (3) that certain Desotech resins were not "licensed" or "qualified" for use in the Viper Pro, though such a licensing or qualification process apparently did not exist, *id.* PP 55, 56; and (4) that using Desotech resins in the Viper Pro would "cause the **[*38]** machine's software to 'time bomb out' and make the machine inoperable," *id.* P 61.

3DS contends that Desotech's allegation are "conclusory generalizations" that fail to specify any particular statements made by 3DS and, furthermore, are insufficient as a matter of law to show disparagement. 3DS argues, for example, that (1) the alleged statements by 3DS "neither '*criticize the quality* of one's goods or services,' nor describe the attacked service or product as 'substandard, negligent, or harmful,'" but "merely describe performance characteristics (and limitations) of the Viper Pro"; (2) Desotech "fails to show any '*false or misleading* representation of fact' regarding the Viper Pro or the use of newer [Desotech] resins"; and (3) Desotech "fails to allege that [3DS] incorrectly represented that the newer [Desotech] resins 'are of a particular standard, quality, or grade,' as it must to state a claim under [*815 Ill. Comp. Stat. 510/2(a)(7)*]." Defs.' Mem. at 29-30 (internal citations omitted) (emphasis in original). Construing the allegations in the light most favorable to the plaintiff, as the court must on a motion to dismiss, the court is not persuaded by any of these arguments; at best, **[*39]** they raise issues of fact that are more appropriately addressed at later stages of litigation. The court finds that Desotech's allegations under *sections 2(a)(7)* and *2(a)(8)* of the IUDTPA are sufficient and, accordingly, denies 3DS's motion to dismiss Count VI.

VI. Tortious Interference with Prospective Economic Advantage (Count VII)

In Count VII, Desotech asserts a claim for tortious interference with prospective economic advantage. To bring such a claim under Illinois law, a plaintiff must allege that "(1) he had a reasonable expectancy of a valid business relationship; (2) defendant knew about the expectancy; (3) defendant intentionally interfered with the expectancy and prevented it from ripening into a valid business relationship; and (4) the intentional interference injured the plaintiff." *Associated Underwriters of Am. Agency, Inc. v. McCarthy, 826 N.E.2d 1160, 1169, 356 Ill. App. 3d 1010,* 292 Ill. Dec. 724 (Ill. App. Ct. 1st Dist. 2005). Illinois law also requires that the plaintiff's business expectancy be with a third party. Ali v. Shaw, 481 F.3d 942, 944 (7th Cir. 2007) (citing Schuler v. Abbott Labs, 639 N.E.2d 144, 147, 265 Ill. App. 3d 991, 203 Ill. Dec. 105 (Ill. App. Ct. 1st Dist. 1993)).

3DS **[*40]** contends that Desotech has not sufficiently alleged the first element of the cause of action, a reasonable expectancy of a valid business relationship. 3DS cites MJ & Partners Restaurant Ltd. Partnership v. Zadikoff, 126 F. Supp. 2d 1130 (N.D. Ill. 1999), for the proposition that to establish the existence of a reasonable expectancy, Desotech must show that it had more than the "mere hope" of continuing its relationship, id. at 1138, and asserts that "[f]or three of the customers, Lockheed, Tangible Express and AP Proto, Desotech has merely alleged facts showing that it hoped to sell resins to those customers but the customers chose . . . to buy resins from [3DS] instead." Defs.' Mem. at 33. 3DS's arguments, however, rely on an unduly narrow reading of the complaint. For example, Lockheed allegedly expressed its desire to continue using Desotech resins but was coerced into an agreement to purchase resins exclusively from 3DS. Viewing those allegations in the light most favorable to the plaintiff, the court finds that Desotech has alleged facts sufficient to show that it had much more than a mere hope of continuing its relationship with Lockheed.

3DS also argues that "for the two remaining **[*41]** customers, Express Pattern and Dynacept, Desotech does not even allege that they stopped buying [resins] from Desotech" and that Desotech has thus failed to establish the third required element, a showing that defendants interfered with the expectancy. Defs.' Mem. at 33-34. Here, again, however, 3DS has taken an overly literal view of the allegations. For example, Desotech has alleged that as a result of 3DS's conduct, "Express Pattern can no longer use [Desotech's] new resin." Am. Compl. P 59. The logical bridge between (a) Express Pattern's no longer being able to use Desotech resin and (b) its ceasing to buy such resin is exceedingly short and one that the court is compelled to cross on this motion to dismiss. Furthermore, Desotech's allegations regarding other customers, such as Lockheed, who allegedly "agreed [with 3DS] . . . to stop purchasing resins from Desotech," *id.* P 66, also satisfy the third element.

3DS further argues that Desotech fails to "show the required element of malice because Illinois recognizes a competitive privilege that protects competitors from claims of tortious interference with prospective business advantage." Defs.' Mem. at 31. In an action for interference **[*42]** with prospective business advantage, a defendant may raise the competitor's privilege as an affirmative defense. Soderlund Bros., Inc. v. Carrier Corp., 663 N.E.2d 1, 8, 278 Ill. App. 3d 606, 215 Ill. Dec. 251 (1995). That privilege "allows one to divert business from one's competitors generally as well as from one's particular competitors provided one's intent is, at least in part, to further one's business and is not solely motivated by spite or ill will." Id. at 8 (citing Candalaus Chi., Inc. v. Evans Mill Supply Co., 366 N.E.2d 319, 51 Ill. App. 3d 38, 9 Ill. Dec. 62 (1977); Restatement (Second) of Torts § 768(1)(d) & cmt. b, at 40 (1979)). But as the court notes in *Candalaus,* a decision on which 3DS relies, the privilege does not apply to a defendant whose conduct "create[s] or continue[s] an illegal restraint of competition." 366 N.E.2d at 326-27 (quoting Restatement (Second) of Torts § 768, at 39)). The Seventh Circuit has similarly explained that the competitor's privilege does not apply where "circumstances indicate unfair competition, that is, an unprivileged interference with prospective advantage." A-Abart Elec. Supply, Inc. v. Emerson Elec. Co., 956 F.2d 1399, 1404-05 (7th Cir. 1992) **[*43]** (citing Fishman v. Estate of Wirtz, 807 F.2d 520, 546 (7th Cir.1987)).

As discussed above, Desotech has sufficiently alleged claims against 3DS for attempted monopolization and unreasonable restraint of trade under the Sherman Act. Because the same factual allegations form the basis for Desotech's tortious interference with prospective economic advantage claim, there is, at a minimum, an issue of fact as to whether 3DS's conduct was protected by the competitor's privilege. 3DS's motion to dismiss Count VII is therefore denied.

CONCLUSION AND ORDER

Defendants' motion to dismiss [# 29] is granted in part and denied in part. The motion is granted with respect to Counts I and II and denied as to Counts III through VII.

Plaintiff's tying claims, Counts I and II of the amended complaint, are hereby dismissed without prejudice. Desotech is granted leave to replead its tying claims by March 2, 2009.

The discovery stay previously entered pending resolution of defendants' motion to dismiss is hereby lifted. Discovery may proceed on all of the outstanding antitrust and patent claims, including the patent damages issues.

A status hearing and scheduling conference is set for March 31, 2009 at 9:30 a.m. **[*44]** In the meantime, the parties are directed to confer about--and, if possible, submit--an agreed proposed case management schedule for the antitrust claims (a scheduling order for the patent claims having already been entered on December 2, 2008). They are also directed to consider whether a settlement conference at this time would facilitate resolution of the case.

Judges: Honorable William F. Downes, United States District Judge.

Opinion by: William F. Downes

Opinion

ORDER GRANTING IN PART AND DENYING IN PART DEFENDANTS' MOTIONS FOR JUDGMENT ON THE PLEADINGS

This matter comes before the Court on Defendants' respective Motions for Judgment on the Pleadings. The Court, having considered the parties motions and supporting memoranda, as well as having conducted a hearing on the matter, FINDS and ORDERS:

I. Background

The instant controversy arises out of an investment by Plaintiffs in an existing but undercapitalized commercial real estate development in Boise, Idaho (the underlying property will be referred to as the "Property" and the development itself as the "Project" for the purposes of this order). The Project **[*2]** was to be administered and developed by Defendant Tricia Callies, a real estate agent, through a limited liability company, Defendant Auroresky

Investments ("Auroresky"), which was to be newly formed for the Project. Auroresky was to hire Tricia Callies' husband and general contractor, Defendant Randall Callies, to construct six office buildings on the Property. The land and buildings were to be marketed by Defendant Boise Realty, Inc., an Idaho corporation wholly owned by Tricia Callies.

The Patels' and Murphys' investment originally took the form of a joint venture or investment contract under which each couple contributed $125,000 to Auroresky to become members of the L.L.C. In exchange, each couple was also "guaranteed" the return of their initial investment, as well as the distribution of an additional flat $125,000 from the profits of the Project. Plaintiffs assert that under the terms of the contract each couple was to receive its guaranteed $250,000 payment before any profits were distributed to any other recipient. Plaintiffs were also to receive a security interest in the Property to back their investment in Auroresky.

According to Plaintiffs' First Amended Complaint, each **[*3]** couple did receive a Deed of Trust from Auroresky purporting to convey a security interest in the Property. However, Plaintiffs allege that at the time of the conveyance, Auroresky did not hold title to the Property. Rather, Defendants Tricia and Randall Callies held title to the Property throughout the relevant time period. Thus the Plaintiffs' Deeds of Trust did not create any security interest whatsoever. Subsequent to Plaintiffs' investment, the Callies allegedly conveyed additional Deeds of Trust to various creditors in exchange for loans totaling several million dollars.

Separate and apart from their participation in the Auroresky investment, each couple also entered into contracts to purchase one of the six office buildings to be constructed on the property. Again, however, Plaintiffs allege that at the time they entered into their respective purchase contracts, Auroresky did not own fee simple title to the Property; it was still owned by the Callies. Further, Plaintiffs assert that Auroresky was not newly formed for the Project as the parties had agreed.

The Callies, through Auroresky, allegedly promised to provide weekly construction progress reports to Plaintiffs and three **[*4]** other purchasers who had contracted to buy office buildings on the project. However, Plaintiffs state that no progress reports were provided, and eventually it became clear that construction would not be completed by the forecast completion dates.

Finally, Ms. Callies allegedly informed Plaintiffs that Auroresky would be unable to complete the Project on budget and pay the Patels and Murphys their "guaranteed' returns. Plaintiffs assert that the Callies used or intended to use proceeds from the project to pay off personal debts and liabilities, including various financial encumbrances on the Property which predated Plaintiffs' investment, as well as encumbrances which post-dated their investment but which were secured by valid Deeds of Trust on the Property.

II. Legal Issues

In their First Amended Complaint, Plaintiffs claim they were fraudulently induced to invest in Auroresky and its development project through various intentionally false representations regarding the project, the return they were to receive on their investment, and the security interest in the property that they were to possess. The complaint states numerous causes of action, including state and federal racketeering **[*5]** violations, civil conspiracies, and derivative actions initiated by Plaintiffs as members of Auroresky.

At issue here, by virtue of Defendants' multiple Motions for Judgment on the Pleadings seeking dismissal of certain elements of the First Amended Complaint under *Fed. R. Civ. P. 12(c)*, are the following of Plaintiffs' causes of action:

(1) Fifth Cause of Action for Dissolution and Winding up of Auroresky.

(2) Sixth Cause of Action alleging violations of the Racketeer influenced and Corrupt Organizations Act ("RICO"), *18 U.S.C. §§ 1961, et seq.*

(2) Seventh Cause of Action alleging violations of the Idaho Racketeering Act ("IRA"), *Idaho Code §§ 18-701, et seq.*

(3) Eighth Cause of Action alleging a conspiracy under RICO, *18 U.S.C. § 1962(d)*.
(4) Ninth Cause of Action alleging a conspiracy under the IRA.
(5) Tenth Cause of Action alleging a common law civil conspiracy.
(6) Eleventh Cause of Action alleging "reckless and willful misconduct."
(7) Twelfth Cause of Action, a member derivative action by Auroresky, seeking a declarative judgment against Boise Realty declaring the listing agreement between the two null and void.

(8) Thirteenth Cause of Action, a member derivative action by Auroresky against Defendant Boise Realty seeking the return of a sales commission paid by Kaleidoscope Investments, **[*6]** LLC, upon the purchase of one of the project's buildings (Kaleidoscope is wholly owned by the Callies).
(9) Fourteenth Cause of Action, a member derivative action by Auroresky against Tricia and Randall Callies, doing business as Callies Construction, for breach of contract, breach of the covenant of good faith and fair dealing, and breach of statutory duties.

Defendant Auroresky also asserts, generally and without support, that Plaintiff's First Amended Complaint fails to plead fraud with sufficient particularity to satisfy the requirements of *Fed. R. Civ. P. 9(b)*.

Finally, Defendant Boise Realty asserts that it should be dismissed entirely from the suit since only the Twelfth and Thirteenth Causes of Action state claims against it, and since it believes these claims must be dismissed for failure to comply with a pertinent Idaho statute discussing limited liability companies and derivative lawsuits, and because Auroresky's proper inclusion in the lawsuit as a plaintiff would defeat diversity jurisdiction.

This order will address first those elements common to all defendants' motions for judgment on the pleadings, after which it will address those elements specific to individual defendants.

III. Standard of [*7] Review

Unlike motions made under *Fed. R. Civ. P. 12(b)(6)*, which must be made before a responsive pleading has been filed, *Rule 12(c)* allows parties to move for judgment on the pleadings *after* all pleadings have been filed, but before such time as a delay in trial might result. "A judgment on the pleadings is proper when, taking all the allegations in the pleadings as true, the moving party is entitled to judgment as a matter of law." *Torbet v. United Airlines, 298 F.3d 1087, 1089 (9th Cir. 2002)*.

When a *Rule 12(c)* motion asserts matters that could properly have been brought under *Rule 12(b)*, such as that the plaintiff has failed to state a claim for which relief can be granted, it is reviewed under the same standard as would ordinarily be applied to a *Rule 12(b)* motion. *See Dworkin v. Hustler Magazine, Inc., 867 F.2d 1188, 1192 (9th Cir. Cal. 1989)*. A complaint attacked under *Fed. R. Civ. P. 12(b)(6)* may be dismissed if it does not contain a cognizable legal claim, or for failure to state sufficient facts to support a cognizable legal claim. *Robertson v. Dean Witter Reynolds, Inc., 749 F.2d 530, 533-534 (9th Cir. 1984)*. A complaint need not contain detailed factual allegations, but the allegations must be sufficient to create more than a speculative right to relief. *See Bell Atl. Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. Although a court must take all factual allegations to be true, it need not accept as true a legal conclusion couched as a factual allegation. *Papasan v. Allain, 478 U.S. 265, 286, 106 S. Ct. 2932, 92 L. Ed. 2d 209 (1986)*; *Prometheus Dev'pt Co. v. Everest Props., 289 Fed. Appx. 211, 213 (9th Cir. 2008)*.

IV. Legal Analysis

A. Plaintiff's RICO claims

1. RICO's Basic Requirements [*8]

RICO allows civil claims for treble damages where a plaintiff can prove a defendant participated in an associated-in-fact enterprise, which engaged in a pattern of racketeering activity. *See* *18 U.S.C. §§ 1961(1)* and *1962(c)*. A RICO plaintiff must plead at least two "predicate acts" of racketeering activity to establish a pattern. *18 U.S.C. §1961(5)* (listing, *inter alia*, mail and wire fraud as valid RICO precursors). The predicate acts must further be "related" and "continuous." *N.J., Inc. v. Northwestern Bell Telephone Co., 492 U.S. 229, 239 (1989)*; *Allwaste, Inc. v. Hinson, 65 F.3d 1523, 1527 (9th Cir. 1995)*. The Supreme Court has observed that "continuity" is a flexible concept, encompassing both open-ended continuity, in which the pattern of racketeering activity "projects into the future with a threat of repetition," as well as closed-ended continuity, in which there is no threat of future racketeering conduct, but the predicate acts extend over a "substantial period of time." *H.J., Inc., 492 U.S. at 241*.

While the "substantial period of time" required for closed-ended continuity is itself a flexible concept, the Court in *H.J., Inc.* made clear that "a few weeks or months" was insufficient where no future criminal conduct was threatened. *Id. at 241*. The Ninth Circuit has observed that in no case has the closed-ended continuity requirement been satisfied by a pattern of activity lasting less **[*9]** than a year. *Allwaste, 65 F.3d at 1528* (finding the closed-ended requirement met where the predicate acts occurred over as much as thirteen months, but explicitly refusing to create a bright line, one-year requirement).

Predicate acts that "specifically threaten repetition or that become a 'regular way of doing business' satisfy the open-ended continuity requirement." *Id.* (citations omitted). In *Sun Savings & Loan Association v. Dierdorff*, the Ninth Circuit found the open-ended continuity requirement fulfilled where a loan officer received kickbacks in exchange for approving loans on four occasions over a two month time span. *Sun S & L, 825 F.2d 187, 194 (9th Cir. 1987)* Crucial to the *Sun S & L* court's analysis was the fact that the alleged predicate acts posed a "threat of continuing activity because they covered up a whole series of alleged kickbacks and receipts of favors, occurred over several months, and in no way completed the criminal scheme." *Id*; *see also* *California Architectural Bldg. Prods., Inc. V. Franciscan Ceramics, 818 F.2d 1466, 1469 (9th Cir. 1987)* (multiple acts of mail fraud over a five months span demonstrated a threat of ongoing criminal activity). Similarly, in *Ikuno v. Yip, 912 F.3d 306, 308 (9th Cir. 1990)*, the Ninth Circuit found open-ended continuity based on just two filings of false annual reports for a phantom commodity trading company because there was no indication that **[*10]** the filing of false reports would have ceased absent intervening circumstances. *Id. at 309* (racketeering activity ceased because defendant company went out of business). However, it is also clear that "isolated or sporadic predicate acts [ ] fail to satisfy the continuity requirement." *Sun S & L, 825 F.2d at 194*.

In this case, Plaintiffs allege various acts of mail and wire fraud, which they claim induced them to invest in Auroresky and its Project. Defendants' allegedly fraudulent acts included the sending of false materials—via both U.S. mail and email—relating to the ownership of the Property, Auroresky, invalid deeds of trust for the Property executed and delivered to Plaintiff, and invalid real estate purchase contracts for property not owned by Auroresky. (Pl.'s RICO Case Statement at 15-16.) Plaintiffs allege that the fraudulent communications commenced during the first quarter of 2006 and continued through at least November 1, 2007, a period of approximately twenty months. (*Id.*) It is not clear from the First Amended Complaint, nor from Plaintiff's RICO Case Statement, how many allegedly fraudulent communications occurred during that time.

Plaintiffs assert that their First Amended Complaint satisfies both the **[*11]** closed-ended and open-ended continuity requirements established in RICO case law. Insofar as Plaintiff has alleged various acts of mail and wire fraud extending over a period well in excess of one year, a "substantial time period" under any court's analysis, it would appear the closed-ended continuity requirement is in fact satisfied. However, it is less clear whether the open-ended continuity requirement has been satisfied, despite Plaintiffs conclusory assertion that Defendants' allegedly illegal activity has become a "regular way of conducting their ongoing business activities, even after the filing of the initial Complaint in this case." (Pl.'s RICO Case Statement at 17.) The First Amended Complaint and accompanying RICO Case Statement do seem to indicate that Defendants conducted the operations of Auroresky, at least for the purposes of developing the instant Property, in a fraudulent manner. However, the Court is left without any indication that this manner of conducting business infected any of the Defendants' other business ventures.

Consequently, the Court is hard-pressed to determine, given the record before it, whether open-ended continuity is actually present in this case. **[*12]** Mindful of the relatively low burden on Plaintiffs at this stage of the proceeding to simply raise their right to relief above the level of mere speculation, as well as the Court's parallel obligation to construe all factual allegations as true, the Court cannot, as a matter of law, conclude that Plaintiffs have or have not established open-ended continuity. Defendants' motion for judgment must accordingly be denied.

2. RICO Predicates Otherwise Actionable as Securities Fraud

While the list of criminal acts constituting RICO predicates under *18 U.S.C. § 1961* is extensive, the Private Securities Litigation Reform Act of 1995, *Pub. L. 104-67, § 107, 109 Stat. 737, 758 (Dec. 22, 1995)*, amended RICO, eliminating from its purview "any conduct that would have been actionable as fraud in the purchase or sale of securities." *18 U.S.C. § 1964(c)*; *Howard v. Greenberg, 208 F.3d 741, 750 (9th Cir. 2000)* ("We hold that Plaintiffs' securities fraud claims cannot be used to establish a RICO violation."). Securities and Exchange Commission Rule 10-b5 prohibits "the use of any means or instrumentality of interstate commerce, or of the mails . . . [to transmit] an untrue statement of a material fact . . . in connection with the purchase or sale of any security." The relevant section of the United States Code defines "security" to include "a certificate of **[*13]** interest or participation in any profit-sharing agreement" or an "investment contract." 15 U.S.C. § 78(c)(10).

The term "investment contract" has been interpreted to reach "novel, uncommon, or irregular devices, whatever they may appear to be . . ." *SEC v. C.M. Joiner Leasing Corp., 320 U.S. 344, 351, 64 S. Ct. 120, 88 L. Ed. 88 (1943)*. The classic definition of "investment contract," as set forth by the Supreme Court in *SEC v. W.J. Howey Co., 328 U.S. 293, 298-99, 66 S. Ct. 1100, 90 L. Ed. 1244 (1946)* is "a contract, transaction or scheme whereby a person invests his money in a common enterprise and is led to expect profits solely from the efforts of the promoter or a third party . . . ." Subsequent cases have honed *Howeys* definition considerably. Most simply put, to constitute an investment contract for the purposes of the Securities Exchange Act, three elements must be satisfied: there must be (1) an investment of money, (2) in a common enterprise, (3) with an expectation of profits produced by the efforts of others.[1] *Hocking v. Dubois, 885 F.2d 1449, 1455 (9th Cir. 1989)* (applying a test originally set forth by the Fifth Circuit in *Williamson v. Tucker, 645 F.2d 404 (5th Cir.)*, *cert. denied*, *454 U.S. 897 (1981))*.

The heart of the *Hocking/Williamson* three-prong test, where an investor is a partner or joint venturer, is whether:

> (1) an agreement among the parties leaves so little power in the hands of the partner or venturer that the arrangement in fact distributes power as would a limited **[*14]** partnership; or (2) the partner or venturer is so inexperienced and unknowledgeable in business affairs that he is incapable of intelligently exercising his partnership or venture powers; or (3) the partner or venturer is so dependent on some unique entrepreneurial or managerial ability of the promoter or manager that he cannot replace the manager of the enterprise or otherwise exercise meaningful partnership or venture powers.

Holden v. Hagopian, 978 F.2d 1115, 1119 (9th Cir. 1992) (stating, however, that the three factors stated above are not exclusive, and that under "different facts or legal arrangements other factors could give rise to such a dependence on the promoter or manager."). The application of the foregoing test is a necessarily fact intensive inquiry, requiring an examination of the underlying investment agreement, the abilities and understand of the parties at the time of contract formation, etc. *See Koch v. Hankins, 928 F.2d 1471, 1477 (9th Cir. 1991)*; *Williamson, 645 F.2d at 424, n.14*. "The question of an investor's control over his investment is decided in terms of practical as well as legal ability to control.'" *Koch, 928 F.2d at 1478* (quoting *Hocking, 885 F.2d. at 1457*).

---

[1] Profits need not be actually "solely" expected from the efforts of a third party in the literal sense, but the "efforts made by those other than the investor [must be] the undeniably significant ones, those essential managerial efforts which affect the failure or success of the enterprise." *Hocking, 885 F.2d at 1455*.

In the instant case, Plaintiffs invested in an Idaho limited liability company, Defendant Auroresky Investments. It is not clear from the pleadings or from the memoranda before the **[*15]** Court what the terms of the investment agreement were; what the experience level of the Plaintiffs was; to what extent they were capable of or intent upon participating in the Project, or to what extent Plaintiffs relied upon the "unique entrepreneurial or managerial abilit[ies]" of the Callies for the success of the Project. Plaintiffs assert in their memoranda, however, that they were "experienced and knowledgeable in business affairs" and the terms of the underlying agreement granted them "management power and authority with regard to the Joint Venture's business." (Pl.'s Resp. to Callies' Mot. for Jdgmt on the Pldgs at 8.) Plaintiffs further claim that they expected profits on their investments solely from the rising Boise real estate market, rather than from any entrepreneurial efforts of the Defendants. (*Id.* at 9.) Additionally, Defendant Auroresky's counterclaim states that "Counterdefendants are all sophisticated investors and/or business persons. On information and belief, each has significant experience investing with real estate. Counterdefendants Murphys are licensed real estate agents and brokers in the State of California." (Def. Auroresky's Counterclaim at ¶ 10, 11, and 12.) **[*16]**

The Court is troubled, however, by various assertions contained in Plaintiffs' First Amended Complaint and RICO case statement, which indicate that at the time the instant suit was brought, Plaintiffs themselves believed their investment constituted a security regulated by the Securities Act of 1933 and the Idaho Uniform Securities Act. (*See* First Amended Complaint at 8; RICO Case Statement at 2.) In their memoranda and during this Court's November 19, 2008 hearing on the matter, Defendants asserted that the Court should find Plaintiff's references to securities regulations and fraud dispositive. Even to the extent that the Court must, for the purposes of a motion for judgment on the pleadings, take all factual allegations in a pleading to be true, it need not accept legal the legal conclusions of the parties, including whether or not various communications by Defendants were subject to regulation under state or federal securities law. Despite Plaintiffs' troubling references, the Court must adhere to binding Ninth Circuit law regarding what is and what is not a security rather than to potentially improvident or unsupported assertions made by Plaintiffs' previous counsel.

The Court cannot **[*17]** say with certainty, given the limited record before it at this early stage of litigation, whether or not Plaintiffs' investment in Auroresky constituted an "investment contract" subject to regulation as a security under current Ninth Circuit precedent. However, it would seem that Plaintiffs' allegations are sufficiently supported to raise their right to relief above the level of mere speculation. Consequently, the Court cannot grant judgment on the pleadings for the Defendant on Plaintiff's RICO-related causes of action.

3. Plaintiffs' "Theory of Enterprise" Under RICO

a. Auroresky as Defendant and Enterprise

As stated above, claims under RICO require individual persons to participate in an "associated-in-fact" enterprise to perpetrate a pattern of racketeering activity. *Cedric Kushner Promotions v. Don King, 533 U.S. 158, 161, 121 S. Ct. 2087, 150 L. Ed. 2d 198 (2001)*. The *Cedric Kushner* Court stated that the "enterprise" cannot be the same person as the defendant simply referenced by a different name. *Id.* Rather, there must be "'some distinctness between RICO defendants and the RICO enterprise.'" *Id.* (quoting and agreeing with the Acting Solicitor General's *Amicus Curiae* brief); *see also* *Rae v. Union Bank, 725 F.2d 478, 480-81 (9th Cir. 1984)* ("If Union Bank is the enterprise, it cannot also be the RICO defendant" in the context of a **[*18]** *§ 1962(c)* claim). However, multiple individuals can associate to form a RICO enterprise, and still themselves be named as defendants. *River City Markets, Inc. v. Fleming Foods West, Inc., 960 F.2d 1458, 1461 (9th Cir. 1991)*.

The foregoing courts' analysis is clearly supported by the statutory language of *18 U.S.C. § 1962*. For instance, *§ 1962(c)* proscribes "any person" from conducting or participating in an "enterprise's affairs through a pattern of racketeering activity." The plain language in this subsection[2] prohibits actions by an individual defendant under the umbrella of the enterprise; in each case, the person rather than the enterprise is contemplated as the defendant.

Defendant Auroresky argues that it cannot be named as a Defendant in the instant RICO action because it is in fact the enterprise overarching the alleged pattern of racketeering activity. However it is readily apparent that the Plaintiffs actually allege that the "associated-in-fact" enterprise, as required by RICO, consists of the Callies, Auroresky, Boise Realty, and other business entities owned by the Callies. At no point in the First Amended Complaint, nor in the RICO Case Statement, do Plaintiffs limit their discussion of the RICO enterprise to Auroresky. (*See, e.g.*, RICO Case Statement at 14, n.3. (Discussing the breadth of the **[*19]** "associated-in-fact" enterprise at issue in this case).) Consequently, the concerns expressed in *Cedric Kushner* and *Rae* regarding the conflict between an entity being named as both an enterprise and a defendant are not actually at issue here and Defendant Auroresky's Motion for Judgment on the Pleadings must accordingly be denied on this limited issue.

b. Auroresky as Victim and Defendant

Defendant Auroresky also notes that it is listed at various points in the pleadings as both the victim of the pattern of racketeering and as a defendant, titles which it claims are mutually exclusive. This issue is potentially dispositive on Plaintiffs' twelfth through fourteenth causes of action, which state derivative claims alleging damages to Auroresky as a result of various contracts with other business entities owned by the Callies, Because Section IV(E) of this order disposes of Plaintiffs' derivative actions on other grounds, this Court need not address whether it is possible for Auroresky to be both a victim and a defendant of racketeering activity.

B. Plaintiff's Claims Under the Idaho Racketeering Act ("IRA")

While the Idaho Racketeering Act does not contain any prohibition on the pleading **[*20]** of predicate acts otherwise actionable as securities fraud, it does require plaintiffs to show, in cases involving a single racketeering scheme, that the alleged predicate acts "themselves amount to, or constitute a threat of, continuing racketeering activity." *Mannos v. Moss, 143 Idaho 927, 935-36, 155 P.3d 1166 (Idaho 2007)*; *see also* *Spence v. Howell, 126 Idaho 763, 774-75, 890 P.2d 714 (Idaho 1995)* (citing *Eliopulos*). However, the Idaho Supreme Court has stated that the IRA generally mirrors its federal counterpart in content and structure, *State v. Nunez, 133 Idaho 13, 17, 981 P.2d 738 (1999)*, and has even specifically labeled IRA's pattern of racketeering requirement similar to that contained in RICO, *Eliopulos v. Knox, 123 Idaho 400, 408, 848 P.2d 984 (Idaho Ct. App. 1992)* (the first Idaho case to discuss the pattern of racketeering continuity requirement).

The Court notes that in *Eliopulos* the Idaho Court of Appeals discussed, in the context of federal RICO, *H.J., Inc. v. Northwestern Bell Telephone* Co., the U.S. Supreme Court opinion which first allowed single scheme RICO claims where either open-ended *or* closed-ended continuity was established. However, the *Eliopulos* Court did not actually address either type of continuity specifically, instead merely concluding that plaintiffs in that case had failed to establish it. In succeeding cases discussing IRA, all of which quote *Eliopulos*' reference to *H.J., Inc.* for the proposition **[*21]** that a threat of continuing racketeering activity is required, the Idaho Supreme Court still has not discussed closed-ended continuity for the purposes of establishing a pattern of racketeering. *See e.g., Mannos, 143 Idaho at 935-36*.

---

[2] References to "enterprise" in *§§ 1962(a)* and *(b)* are aimed not at the overarching "associated-in-fact" enterprise through which the pattern of racketeering is perpetrated, but a different enterprise which can be said to be the victim of the racketeering. *Nat'l Org. For Women v. Scheidler, 510 U.S. 249, 257-59, 114 S. Ct. 798, 127 L. Ed. 2d 99 (1994)*. For instance, *§1962(a)* makes it illegal for "any person" to "invest . . . any part of such income [derived from racketeering activities] . . . in acquisition of any interest in, or the establishment or operation of, any enterprise [engaged in interstate commerce." Similarly, *§ 1962(b)* reads "It shall be unlawful for any person [engaged in racketeering activity] to acquire or maintain [] any interest [] or control of any enterprise [engaged in interstate commerce."

This Court finds the Idaho Supreme Court's lack of discussion—in the context of either federal or state racketeering law—of closed-ended continuity telling. Were the Idaho Supreme Court to consider the matter, this Court finds it highly likely that it would follow *H.J., Inc.* and its progeny and allow actions on single scheme patterns of racketeering where closed-ended *or* open-ended continuity had been established. Consequently, Plaintiffs' claims under the Idaho Racketeering Act cannot be dismissed for an alleged failure to show a threat of continued racketeering activity for the same reasons stated in Section A(1) of this order regarding federal RICO continuity. The Court notes, however, that it need not rest solely on its prediction of the behavior of the Idaho Supreme Court on this matter because it cannot say, as a matter of law based on the pleadings, that Plaintiffs have failed to state sufficient facts to indicate that the Callies' continued method of conducting business includes **[*22]** IRA predicate acts.

C. Plaintiff's *18 U.S.C § 1962(d)* RICO and Common Law Conspiracy Claims

All Defendants assert that Plaintiff's *18 U.S.C. § 1962(d)* conspiracy and common law conspiracy claims should be dismissed because they allege that Defendants Tricia and Randall Callies cannot conspire with their wholly owned entities These include Defendant Boise Realty (wholly owned by Tricia Callies), Kaleidoscope Investments, LLC (apparently jointly owned by Tricia and Randall Callies); Randi's Pants, LLC (apparently jointly owned by the Callies); Complete Property Management and Investment Realty, Inc. (apparently wholly owned by Tricia Callies), etc.[3]

To the extent this issue is raised by Defendant Boise Realty, it is clearly moot. In its simplest form, a conspiracy is simply an "agreement by two or more persons to commit an unlawful act." *Black's Law Dictionary* 305 (7th ed. 1999). The First Amended Complaint alleges not simply that Tricia Callies conspired with her wholly owned corporation, Boise Realty, or that the couple conspired as a unit with one of their companies. Rather the complaint alleges that Tricia Callies *and* Randall Callies, each as independent individuals, conspired with Boise Realty, Auroresky Investments, etc. **[*23]** Clearly the Callies are capable of conspiring with one another. Randall Callies is of course capable of conspiring with Boise Realty. Other combinations and permutations may also be read from the First Amended Complaint, many of which, like the examples listed previously, would constitute a conspiracy as defined in the law. That at least some conspiracy is possible in the case of each of the Callies and Boise Realty is sufficient to allow this case to go forward. Consequently, Boise Realty's Motion for Judgment on the Pleadings is denied to the extent it seeks dismissal of the conspiracy claims against it on the basis of impossibility.

Defendants' claims that Auroresky could not, as a matter of fact and law, conspire with its managing member, Tricia Callies, and her husband Randall Callies (also a member) is also easily disposed of. Defendants' reading of the complaint is that Auroresky is alleged to have conspired with its controlling owners, the Callies. This, Auroresky claims, is impossible since "Auroresky has no separate identity from the Callies nor can it be said to constitute a system of making decisions in furtherance of 'alleged criminal activities.'" (Auroresky Mot. to Dismiss **[*24]** at 5 (quoting *Wagh v. Metirs Direct, inc.*, *363 F.2d 821, 831 (9th Cir. 2003)*.) However, it is a basic tenet of corporate law that a corporation (or L.L.C.) possesses a separate legal identity from its owners, even where the entity is wholly owned by an individual. *See* *Cedric Kushner Promotions v. Don King, 533 U.S. 158, 121 S. Ct. 2087, 150 L. Ed. 2d 198 (2001)* ("[I]ncorporation's basic purpose is to create a distinct legal entity, with legal rights, obligations, powers, and privileges different from those of the natural individuals who created it, who own it, or whom it employs.")

The Ninth Circuit has clearly stated that a corporation can conspire with its wholly owned subsidiaries, or with its managing officers in the RICO context.[4] *Webster v. Omnitron Int'l, Inc., 79 F.3d 776, 787 (9th Cir. 1996)*, *cert.*

---

[3] Plaintiffs' First Amended Complaint references as many as nine Idaho corporations or limited liability companies wholly owned by one or both of the Callies, which they allege constituted an "enterprise" for the purposes of RICO. (First Amended Complaint at 24-27.)

[4] In another context—federal ***antitrust law***—the Supreme Court has stated exactly the opposite: a wholly owned entity cannot conspire with its owner. *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 776, 104 S. Ct. 2731, 81 L. Ed. 2d 628*

denied, *519 U.S. 865 (1996)*, citing *Ashland Oil, Inc. v. Arnett, 875 F.2d 1271, 1281 (7th Cir. 1989)*. Plaintiffs in *Webster* brought a § 1962(d) RICO action against a corporation and its officers alleging they were conspiring to operate the corporation as a pyramid scheme. The defendants in the case argued that "a corporation cannot engage in a RICO conspiracy with its own officers and representatives," and indeed the *Webster* Court noted that numerous district courts agreed with that principle. *Webster, 79 F.3d at 787, n.9*. However, the Ninth Circuit ultimately disagreed, quoting the Seventh Circuit for the proposition that "'intracorporate conspiracies do threaten RICO's goals of preventing **[*25]** infiltration of legitimate businesses by racketeers and separating racketeers from their profits'" and that *§ 1962(d)* intracorporate conspiracy claims were permissible. *Id.*

The Ninth Circuit's ruling in *Webster* and the Seventh Circuit's in *Ashland Oil* were limited to whether an intracorporate conspiracy is actionable under RICO; they do not apply specifically to charges of intracorporate conspiracy in the common law context. However, the Ninth Circuit did address the matter in the context of simple criminal conspiracies in *Hughes Aircraft*, stating: "If we applied the intracorporate doctrine to this case, no corporation acting on its own behalf by and through its employees could be found guilty of conspiracy. This result is illogical." *20 F.3d at 979*.

This Court finds that the result would be illogical if applied in the context of civil conspiracies, as well. To the extent Defendants' motions for judgment seek dismissal of Plaintiffs' *18 U.S.C. § 1962(d)* RICO conspiracy or common law conspiracy claims—found in the Eighth, Ninth, and Tenth Causes of Action in the First Amended Complaint—between Auroresky and the Callies, or between the Callies and Boise Realty, Defendants motion must be and is denied.

D. Plaintiffs' [*26] Claims Against Defendants Auroresky and the Callies for "Reckless and Willful Misconduct"

Plaintiffs' Eleventh Cause of Action accuses the Callies and Auroresky of "reckless and willful misconduct" in violation of the laws of the United States and the State of Idaho. Defendants assert that there is no such cause of action, and that it must be dismissed. Plaintiffs reply that "reckless and willful" is simply synonymous with gross negligence, a common law tort cause of action. In support of this proposition, Plaintiffs cite *Caffety v. State of Idaho, Dept. of Transportation, 144 Idaho 324 (Idaho 2007)*, a case involving the Idaho Tort Claims Act for claims against governmental entities, *Idaho Code § 6-904*. The Idaho Tort Claims Act indeed utilizes the terms "gross negligence" and "reckless, willful and wanton conduct" in parallel, however, it does so in the context of establishing an exception to governmental immunity, and does not create a cause of action. *Idaho Code § 6-904(B)*.

Similar usages of the terms elsewhere in Idaho law, but again, do not create causes of action relevant here. *See e.g., State v. Taylor, 59 Idaho 724, 735, 87 P.2d 454 (Idaho 1939)* ("Criminal negligence is gross negligence, such negligence amounts to wanton, flagrant, or reckless disregard . . . ."); *but c.f. Peterson v. Parry, 92 Idaho 647, 657 (1968)* (defining "gross negligence" within the context of a now superseded version **[*27]** of the Idaho guest statute, *Idaho Code § 49-1401*, as "knowing or having reason to know" one's actions created "an unreasonable risk of physical harm to another."). The Idaho Uniform Limited Liability Company Act mentions neither "gross negligence" nor "wilful and wanton misconduct" in discussing member liability for actions taken in the course of business operations. Instead, the statute holds L.L.C. member-directors to a standard of ordinary care in most cases,

---

(1984). However, the *Copperweld* Court was careful to limit the decision to the peculiar context of the Sherman Act, clarifying that it was not addressing "whether the term 'conspiracy' will bear a literal construction that includes parent corporations and their wholly owned subsidiaries." *Id.*

Additionally, many circuit courts have stated that neither a corporation nor its officers or employees can conspire in the context of a *42 U.S.C. § 1985* civil rights conspiracy cases unless the employees act in their individual capacities or outside the scope of their employment. *See Portman v. County of Santa Clara, 995 F.2d 898, 910 (9th Cir. 1993)* (collecting cases from eight circuits applying the so-called "intracorporate conspiracy doctrine"). However, the Ninth Circuit has never so ruled, instead reserving the issue. *Id.*; *United States v. Hughes Aircraft Co., 20 F.3d 974, 979 (9th Cir. 1994)*.

applying the more liberal, court-made "business judgment rule" to the extent "circumstances warrant." Idaho Code § 30-6-409, cmt. to subsec. 3.

Ultimately, the Court has found no portion of the Idaho Code, nor any reference in Idaho case law, recognizing either "reckless and willful misconduct" or even "gross negligence" as a civil cause of action in any context relevant here. *Fed. R. Civ. P. 8* requires plaintiffs to set forth in their complaint "a short and plain statement of the claim showing that the pleader is entitled to relief." Insofar as it is wholly unclear what legal basis exists for Plaintiff's Eleventh Cause of Action, Plaintiffs have failed to meet *Rule 8*'s requirements. The Court, however, construes Plaintiffs opposition to Defendants' motion for judgment on Cause of Action **[*28]** Eleven as a motion to amend, and "leave [to amend] shall be freely given when justice so requires." *Fed. R. Civ. P. 15(a)*. Plaintiffs may submit a second amended complaint curing the deficiencies found in the Eleventh Cause of Action within ten (10) days of the date of this order; failure to do so will result in dismissal of said cause of action.

E. Plaintiffs' (Purportedly In the Shoes of Auroresky) Derivative Claims Against Boise Realty and the Callies

Plaintiffs' Twelfth through Fourteenth Causes of Action assert derivative claims purportedly in the name of Auroresky against Boise Realty, Callies Construction, and the Callies. Defendant finds two faults with these causes of action: first that Plaintiffs did not adhere to the requirements of Idaho Code § 53-659 pertaining to derivative actions by members of Limited Liability Companies; and second, because Auroresky, an Idaho L.L.C., should actually stand as a plaintiff in the derivative action asserted on its behalf against the Callies, Boise Realty and Callies Construction, all of whom are Idaho citizens, this Court's diversity jurisdiction is defeated.

Idaho Code § 53-659 clarifies the authority of LLC members to sue on behalf of the business entity. It states "a suit on behalf of the limited **[*29]** liability company may be brought *only in the name of the limited liability company*. . . ." Idaho Code § 53-659 (emphasis added). Defendants assert that the quoted portion of the code is dispositive since Plaintiffs brought suit in their own name, rather than naming Auroresky as plaintiff.[5] Plaintiffs counter that Defendants cite no "legal authority in support of its position that Auroresky Investments, LLC must be named as a party plaintiff," and that Defendants' *Rule 12(c)* motion must be denied because "[b]are contentions, unsupported by explanation or authority are deemed waived." (Pl.'s Resp. to Auroresky's Mot. for Jdgmt on the Pldgs 10-11.) The Court notes at the outset that neither party's briefing on this issue is helpful. Defendants cite but a single element of the Idaho Code and provide no examples of the code's application. In contrast, Plaintiffs fail to address the merit of the issue raised by Defendants' citation, instead arguing that Defendants waived the applicability of Idaho Code § 53-659 by not supporting their position. In making this argument, Plaintiffs commit the same sin, setting forth only an unpublished California district court case, *McNearney v. U.S. Bankcorp, Inc, 2006 U.S. Dist. LEXIS 36479, 2006 WL 1582250 (E.D. Cal 2006)*, and a single paraphrased reference to a distinguishable Idaho Supreme **[*30]** Court case, *Balser v. Kootenai County Bd. of Comm'rs., 110 Idaho 37, 40, 714 P.2d 6 (1986)*, for the generalized assertion that citations to "unhelpful" or "general" legal authority are insufficient and constitute waiver.

It is true that a party waives arguments it fails to support. *FDIC v. Garner, 126 F.2d 1138, 1145 (9th Cir. 1997)*. To say, however, that Defendants fail to cite any legal authority or made only "bare contentions" is an exaggeration. It is true that they did not elaborate significantly, on Idaho Code § 53-659's application in the case law,[6] yet the statute appears plain on its face. Indeed, there is no ambiguity present in the clause requiring that L.L.C. derivative actions be brought *only* in the name of the company. The Court accordingly dismisses Plaintiffs' Twelfth through

[5] Plaintiffs attempt to apply Idaho Code § 30-6-902, which revises § 53-659. § 30-6-902 states that "A member [of an L.L.C.] may maintain a derivative action to enforce a right of a limited liability company if: (1) The member first makes a demand on the other members . . . and the other members do not bring the action within a reasonable time; or (2) A demand under subsection (1) would be futile." However, a subsequent section of the same chapter, § 30-6-1104 states that § 30-6-902 "governs only . . . [a] limited liability company formed on or after July 1, 2008," and thus does not apply to Auroresky.

[6] The Court notes that its research did not yield any published Idaho trial, appellate, or Supreme Court opinion applying the statute either.

Fourteenth Causes of Action without prejudice; Plaintiffs are free to bring the same actions a second time in state court pursuant to § 53-659.[7]

G. Does Plaintiffs' First Amended Complaint Satisfy the Particularity Requirements of *Fed. R. Civ. P. 9(b)*

Defendant Auroresky asserts that Plaintiffs' First Cause of Action, which alleges in its title "Fraud and Deceit against the Callies" but which at times states claims against Auroresky, and ultimately seeks relief from Auroresky, does not plead the elements of fraud with sufficient particularity to satisfy *Fed. R. Civ. P. 9(b)*.

Rule 9(b) requires plaintiffs **[*31]** alleging fraud to "state with particularity the circumstances constituting fraud." The Ninth Circuit has stated that *Rule 9(b)*'s requirement amounts to "requr[ing] the identification of the circumstances constituting fraud so that the defendant can prepare an adequate answer from the allegations." *Schreiber Distrib Co. V. Serv-Well Furniture Co., 806 F.2d 1393, 1400 (9th Cir. 1986)*. To satisfy this requirement, a plaintiff must state with particularity the time, place, and specific content of the false representations as well as the identities of the parties to the misrepresentation. *Odom v. Microsoft, 486 F.3d 541, 554 (9th Cir. 2007)*. Scienter, however, may be generally averred from the circumstances surrounding the alleged fraud. *Id.*

In this case, Plaintiffs allege throughout the First Amended Complaint that their investment in Auroresky was induced in part because it was to be secured by an interest in the underlying Property, but that the Deeds of Trust actually issued by Auroresky to that end were knowingly invalid because Auroresky did not possess fee simple title to the Property. (First Amended Complaint at 15, 20, 33, 34.) Although it may be that the First Cause of Action is misleadingly titled, the Court cannot comprehend how Defendant Auroresky can claim to have insufficient notice of the claims against it, nor that **[*32]** it is unable given the information in the pleadings to prepare a response.

The Court finds the requirements of *Rule 9(b)* met in this case, and denies Defendant Auroresky's motion for judgment to the extent it seeks dismissal of Plaintiffs' First Cause of Action.

H. This Court's Role in the Requested Dissolution and Winding Up of Auroresky

Plaintiff's Fifth Cause of Action seeks the dissolution and winding up under Idaho law of Defendant Auroresky. Defendant asserts that this Court should abstain from exercising its jurisdiction in this matter because state law provides a comprehensive procedure to accomplish such an endeavor. *See Pennsylvania v. Williams, 294 U.S. 176, 185-86, 55 S. Ct. 380, 79 L. Ed. 841 (1935)*. The Court notes first that *Williams* is factually distinguishable from the instant case. In *Williams*, state law provided for not just a procedure to accomplish the winding up of the banking institution in that case, but also directed specific state officers from the Pennsylvania Department of Banking to play a role. *Id. at 178*. Also, the only basis for jurisdiction in that case was diversity of citizenship of the parties.

In this case, at the present time, the Court possesses original jurisdiction not only due to Plaintiffs' RICO claims, but also due to diversity of citizenship. **[*33]** Further, Idaho law does indeed provide well-established procedures for the winding up of business entities; Idaho Code § 53-643 provides for *judicial supervision* of dissolution and winding up. Consequently, the same concerns which militated in favor of the district court in *Williams* exercising its discretion via abstention are not present here. Further, the Court is wary of preemptively abstaining from what might ultimately prove the only avenue for actual relief if the Plaintiffs are successful on any of their claims.

Consequently, Defendant Auroresky's motion for judgment is denied on this limited issue.

I. Boise Realty's Motion to be Dismissed Entirely

---

[7] Because Idaho Code § 53-659 is dispositive, the Court need not address Defendants' diversity jurisdiction arguments.

Finally, Boise Realty, which was added as a defendant to this action in the First Amended Complaint, seeks dismissal of the suit against it in its entirety. Boise Realty points out that only the Twelfth and Thirteenth Causes of Action state claims for relief against it (for a declarative judgment that the brokerage agreement between Boise Realty and Auroresky is invalid under Idaho law, and for the return of a brokerage commission paid to Boise Realty pursuant to the sale of a portion of the Property to Kaleidoscope Investments, L.L.C.). Indeed, while **[*34]** Boise Realty is mentioned in numerous places throughout the complaint as a co-conspirator with other defendants, and as a part of the associated-in-fact RICO enterprise, no other cause of action seeks relief against it. Boise Realty further asserts that its actions cannot be held to violate RICO or constitute a RICO conspiracy. What's more, Plaintiffs *admit* that they "are not presently seeking to recover damages from Boise Realty for its violations of *18 U.S.C. § 1962(d)*," but that the defendant is "the civil equivalent of an unindicted co-conspirator." (Pl.'s Resp. to Boise Realty, Inc.'s Mot. for Jdgmt on the Pldgs at 1.)

With the dismissal of Plaintiffs' twelfth and thirteenth causes of action pursuant to Section IV(E) of this order, the First Amended Complaint no longer states any claim for relief against Defendant Boise Realty. Consequently, this Court must grant the Defendant's motion for judgment on the pleadings and dismiss Boise Realty from the suit entirely.

V. Conclusion

For the foregoing reasons, Defendants' motions for judgment on the pleadings are DENIED in part and GRANTED in part. Specifically, the Court orders that:

(1) Defendant Auroresky's motion that this Court abstain from exercising **[*35]** jurisdiction on Plaintiffs' Fifth Cause of Action for Dissolution and Winding up of Auroresky is DENIED.

(2) Defendants' common motions for judgment on the pleadings on Plaintiffs' Sixth Cause of Action alleging violations of the Racketeer Influenced and Corrupt Organizations Act ("RICO"), *18 U.S.C. §§ 1961, et seq.*, is DENIED.

(2) Defendants' common motion for judgment on the pleadings on Plaintiffs' Seventh Cause of Action alleging violations of the Idaho Racketeering Act ("IRA"), *Idaho Code §§ 18-701, et seq.*, is DENIED.

(3) Defendants' common motions for judgment on the pleadings on Plaintiffs' Eighth Cause of Action alleging a conspiracy under RICO, *18 U.S.C. § 1962(d)* is DENIED.
(4) Defendants' common motions for judgment on the pleadings on Plaintiffs' Ninth Cause of Action alleging a conspiracy under the IRA is DENIED.
(5) Defendants' common motions for judgment on the pleadings on Plaintiffs' Tenth Cause of Action alleging a common law civil conspiracy is DENIED.

(6) Auroresky's and the Callies' motions for judgment on the pleadings on Plaintiffs' Eleventh Cause of Action alleging "reckless and willful misconduct" is DENIED. Plaintiffs' opposition thereto is hereby construed as a motion to amend, which is GRANTED. Plaintiffs may file an amended complaint **[*36]** curing the deficiencies with the First Amended Complaint's Eleventh Cause of Action within ten (10) days of the filing of this order; if Plaintiffs fail to cure the deficiencies the cause of action will be dismissed.
(7) Defendants' common motions for judgment on the pleadings on Plaintiffs' Twelfth, Thirteenth and Fourteenth Causes of Action, member derivative actions by Auroresky, seeking a various relief from Boise Realty, and Tricia and Randall Callies, doing business as Callies Construction is GRANTED.

(8) Defendant Auroresky's motion for judgment on the pleadings alleging that Plaintiffs' First Amended Complaint does not plead fraud with sufficient particularity to satisfy the requirements of *Fed. R. Civ. P. 9(b)* is DENIED.
(9) Defendant Boise Realty's motion for judgment on the pleadings and dismissal as a party from the instant suit is GRANTED.

The Court is mindful, however, that the instant motions were considered under the comparatively lenient standards appropriate to *Fed. R. Civ. P. 12(b)(6)*, in which Plaintiffs need only state sufficiently detailed allegations to raise their right to relief above mere speculation. As such, the Court notes without commenting further on the merits that Defendants may well be justified **[*37]** in raising some of the same or similar arguments at later stages in this case.

DATED this 26th day of January, 2009.

/s/ William F. Downes

Honorable William F. Downes

United States District Judge

Sitting by Special Designation

Applera Corp. v. Mich. Diagnostics, LLC

United States District Court for the District of Massachusetts

Civil Procedure > ... > Pleadings > Amendment of Pleadings > General Overview

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN1[] **Pleadings, Amendment of Pleadings**

Leave to amend a complaint should be given freely when justice so requires. Fed. R. Civ. P. 15(a)(2). This standard reflects the liberal amendment policy underlying Rule 15. Grounds for denial generally involve undue delay, bad faith, dilatory motive of the requesting party, repeated failure to cure deficiencies, and futility of amendment.

Civil Procedure > ... > Justiciability > Case & Controversy Requirements > General Overview

Constitutional Law > The Judiciary > Case or Controversy > General Overview

Civil Procedure > ... > Declaratory Judgments > Federal Declaratory Judgments > Scope of Declaratory Judgments

HN2[] **Justiciability, Case & Controversy Requirements**

The Declaratory Judgment Act provides that in a case of actual controversy within its jurisdiction any court of the United States, upon the filing of an appropriate pleading, may declare the rights and other legal relations of any interested party seeking such declaration, whether or not further relief is or could be sought. 28 U.S.C.S. § 2201(a). The requirement that there be a case of actual controversy has been interpreted to refer to the type of "cases" and "controversies" that are justiciable under U.S. Const. art. III.

Civil Procedure > ... > Declaratory Judgments > Federal Declaratory Judgments > Scope of Declaratory Judgments

Constitutional Law > The Judiciary > Case or Controversy > General Overview

HN3[] **Federal Declaratory Judgments, Scope of Declaratory Judgments**

There is no bright-line test, but the decisions of the U.S. Supreme Court have required that a dispute be definite and concrete, touching the legal relations of parties having adverse legal interests; and that it be real and substantial and admit of specific relief through a decree of a conclusive character, as distinguished from an opinion advising what the law would be under a hypothetical state of facts. Under all the circumstances there must be a substantial controversy between parties having adverse legal interests, of sufficient immediacy and reality to warrant the issuance of a declaratory judgment.

Civil Procedure > ... > Declaratory Judgments > Federal Declaratory Judgments > Scope of Declaratory Judgments

Constitutional Law > The Judiciary > Case or Controversy > General Overview

Patent Law > Remedies > Declaratory Judgments

HN4[] **Federal Declaratory Judgments, Scope of Declaratory Judgments**

In the context of conduct prior to the existence of a license, declaratory judgment jurisdiction generally will not arise merely on the basis that a party learns of the existence of a patent owned by another or even perceives such a patent to pose a risk of infringement, without some affirmative act by the patentee. But U.S. Const. art. III jurisdiction may be met where the patentee takes a position that puts the declaratory judgment plaintiff in the position of either pursuing arguably illegal behavior or abandoning that which he claims a right to do. Where a patentee asserts rights under a patent based on certain identified ongoing or planned activity of another party, and where that party contends that it has the right to engage in the accused activity without license, an Article III case or controversy will arise.

Civil Procedure > Judgments > Declaratory Judgments > General Overview

Evidence > Burdens of Proof > Allocation

Patent Law > Remedies > Declaratory Judgments

HN5[] **Judgments, Declaratory Judgments**

A party claiming declaratory judgment jurisdiction must show that it existed at the time its counterclaims were filed.

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Lanham Act > Scope

HN6[] **Federal Unfair Competition Law, Lanham Act**

See *15 U.S.C.S. § 1125(a)(1)*.

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Lanham Act > Scope

Patent Law > Infringement Actions > Defenses > General Overview

HN7[] **Federal Unfair Competition Law, Lanham Act**

The protection otherwise afforded by the patent laws to a patentee's conduct in enforcing its patent may be lost if the patentee acts in bad faith. However, a claim for patent infringement, without more, cannot be the basis for an unfair competition claim under § 43(a) of the Lanham Act, *15 U.S.C.S. § 1125(a)*. There is no legal basis for a holding that inequitable conduct, or the assertion of a patent procured through inequitable conduct, constitutes unfair competition.

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Lanham Act > Scope

Patent Law > Infringement Actions > General Overview

HN8[] **Federal Unfair Competition Law, Lanham Act**

The initiation of a patent infringement suit is clearly not covered by the text of § 43(a) of the Lanham Act, *15 U.S.C.S. § 1125(a)*, while a communication to the customers of the accused infringer, in certain instances, may be. While a patentee's statements as to its patent rights are conditionally privileged, they may be actionable if made in bad faith. To harmonize this tension between patent law and the Lanham Act, the Federal Circuit held that before a patentee may be held liable under *15 U.S.C.S. § 1125(a)* for marketplace activity in support of its patent, and thus be deprived of the right to make statements about potential infringement of its patent, the marketplace activity must have been undertaken in bad faith.

Patent Law > Nonobviousness > General Overview

HN9[] **Patent Law, Nonobviousness**

A patented invention can be "based on" prior work and yet still include novel, non-obvious advances or refinements.

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Lanham Act > Scope

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN10[] **Federal Unfair Competition Law, Lanham Act**

In addition to alleging facts supporting bad faith, a plaintiff bringing a claim under § 43(a) of the Lanham Act, *15 U.S.C.S. § 1125(a)(1)*, must allege (1) that the defendant made a false or misleading statement of fact in commercial advertising or promotion about the plaintiff's goods or services; (2) that the statement actually deceives or is likely to deceive a substantial segment of the intended audience; (3) that the deception is material in that it is likely to influence purchasing decisions; (4) that the defendant caused the statement to enter interstate commerce; and (5) that the statement results in actual or probable injury to the plaintiffs.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN11[] Scope, Monopolization Offenses

A patent is an exception to the general rule against monopolies, but one who obtains a patent by knowingly and willfully misrepresenting facts to the U.S. Patent and Trademark Office can be stripped of the exemption from antitrust regulation. The enforcement of a patent procured by fraud on the Patent Office may be violative of *§ 2* of the Sherman Act provided the other elements necessary to a *§ 2* case are present.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN12[] Inequitable Conduct, Anticompetitive Conduct

A fraud allegation pursuant to Walker Process Equip., Inc. v. Food Mach. & Chem. Corp is subject to the heightened pleading requirements of *Fed. R. Civ. P. 9(b)*. In alleging fraud a party must state with particularity the circumstances constituting fraud. *Fed. R. Civ. P. 9(b)*.

Opinion

[*153] OPINION AND ORDER

O'TOOLE, D.J.

I. Background

The plaintiff, Applera Corporation, acting through its division Applied Biosystems Group ("Applied Biosystems"), alleges in its amended complaint that the defendant, Michigan Diagnostics, LLC ("Michigan Diagnostics") has infringed three of its patents: U.S. Patent No. 6,514,717B2 (the '717 Patent), U.S. Patent No. 6,322,727B1 (the '727 Patent), and U.S. Patent No. 6,107,024 (the '024 Patent). These patents relate to kits used for detecting a substance in a sample through the generation of light (chemiluminescence) by activating and decomposing stabilized 1,2-dioxetanes. Applied Biosystems alleges that Michigan Diagnostics has directly and indirectly infringed these patents in violation of **[**2]** *35 U.S.C. § 271(a)-(c)*.

All three of these patents have apparently expired for various reasons. In its original complaint, Applied Biosystems acknowledged that the '717 Patent had expired, but alleged past infringement of that patent and ongoing infringement of the '727 Patent. After being informed by Michigan Diagnostics that the '727 Patent had expired, Applied Biosystems amended its complaint to allege only past infringement of that patent. It also added a claim for infringement of the '024 Patent, which has similarly turned out to have expired.

Applied Biosystems now seeks leave to file a second amended complaint which would modify its allegations as to the '024 Patent in light of its expiration, allege infringement by Michigan Diagnostics of five additional patents, and add a new defendant, Dr. Benjamin Giri, the co-founder and co-owner of Michigan Diagnostics. Michigan Diagnostics opposes the motion to amend.

[*154] In response to the existing complaint, Michigan Diagnostics has asserted counterclaims against Applied Biosystems. Invoking the Declaratory Judgment Act, *28 U.S.C. § 2201* ("DJA"), it seeks a declaration of non-infringement as to sixty-two Applied Biosystems patents. It also **[**3]** counterclaims for patent misuse, unfair competition under *Section 43(a)* of the Lanham Act, *15 U.S.C. § 1125(a)*, and Walker Process fraud in violation of the Sherman Act, *15 U.S.C. § 2*. See *Walker Process Equip., Inc. v. Food Mach. & Chem. Corp., 382 U.S. 172, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965)*. Applied Biosystems has moved to dismiss these counterclaims.

Because it will aid the analysis of the counterclaims to know whether additional infringement claims are part of the case, I turn first to whether Applied Biosystems should be granted leave to amend its complaint.

II. Motion for Leave to File a Second Amended Complaint

As noted, Applied Biosystems proposes to amend its complaint to add infringement claims as to five new patents and to add Dr. Giri as a defendant. Its proposed second amended complaint alleges that Dr. Giri is personally liable for direct and indirect patent infringement, having been personally and actively involved in the infringing activities and in activities that he knew would induce others to infringe. It also contains veil-piercing allegations that Dr. Giri is liable for Michigan Diagnostics' infringement because it is a sham company and alter ego of Dr. Giri.

HN1[] Leave to amend a complaint should **[**4]** be given freely "when justice so requires." *Fed. R. Civ. P. 15(a)(2)*. This standard reflects the liberal amendment policy underlying *Rule 15*. *O'Connell v. Hyatt Hotels of P.R., 357 F.3d 152, 154 (1st Cir. 2004)*. "Grounds for denial generally involve undue delay, bad faith, dilatory motive of the requesting party, repeated failure to cure deficiencies, and futility of amendment." *U.S. ex. rel. Rost. v. Pfizer, 507 F.3d 720, 733-34 (1st Cir. 2007)* (citing *Foman v. Davis, 371 U.S. 178, 182, 83 S. Ct. 227, 9 L. Ed. 2d 222 (1962)*).

Michigan Diagnostics argues that Applied Biosystems has not provided a sufficient reason why it should be allowed to amend its complaint a second time. It particularly argues that Applied Biosystems has not proffered any exhibits that provide a basis in fact for its new infringement allegations or for its allegations against Dr. Giri. It faults Applied Biosystems for having "made no effort to determine the veracity of its accusations in the Second Amended Complaint" by, for example, deposing Dr. Giri. (Def. Michigan Diagnostics' Resp. to Applera Corp.'s Mot. for Leave to File Second Am. Compl. 9.) This argument puts the cart before the horse. Applied Biosystems need not prove its claims before **[**5]** making them, and to the extent this argument is directed at the futility of amendment it falls far short of the mark.

Michigan Diagnostics also contests Applied Biosystems' allegation that Dr. Giri "has been responsible for all of Michigan Diagnostics' research and development activities since its founding," (Pl. Applera Corp.'s Mem. in Supp. of its Mot. for Leave to File Second Amended Compl., Ex. A, pt. 1, P 4), and suggests that this is false because "Dr. Giri has been listed as a co-inventor on at least one of Michigan Diagnostics' published patent applications." (Def. Michigan Diagnostics' Resp. to Applera Corp.'s Mot. for Leave to File Second Am. Compl. 9.) This modest non-sequitur would be relevant, if at all, to the merits of Applied Biosystems' allegations, but such a dispute of fact does not counsel **[*155]** against granting Applied Biosystems leave to amend.

Michigan Diagnostics further states that Applied Biosystems' request for leave to amend is made in bad faith. Its argument in this respect is based principally on Applied Biosystems having twice alleged the ongoing infringement of patents that were actually expired. This latter observation point is fair enough, but there is no **[**6]** suggestion -- or better yet, information -- that any of the new infringement allegations repeat the problem.

The argument that the new claims are made in bad faith is that Applied Biosystems is asserting successive claims on new patents in order to draw out litigation. This same assertion is employed in support of the contention that Applied Biosystems has a dilatory motive and that amending the complaint will cause undue delay. However, the motion to amend is within the Court-approved schedule established on the basis of the parties' joint proposal and prior to the close of discovery and any summary judgment motions. Michigan Diagnostics has already counterclaimed seeking a declaration of non-infringement as to sixty-two Applied Biosystems patents, including four of the five new patents sued on in Applied Biosystems' proposed second amended complaint. Any "delay" occasioned by the need to address the new claims is not undue.

Accordingly, Applied Biosystems' motion is granted and it may file its second amended complaint as proposed.

III. Motion to Dismiss Counterclaims

Applied Biosystems has moved to dismiss Michigan Diagnostics' counterclaims. It argues that Michigan Diagnostics' counterclaim **[**7]** seeking a declaration of non-infringement fails to present a case or controversy and therefore must be dismissed pursuant to *Rule 12(b)(1) of the Federal Rules of Civil Procedure* for lack of subject matter jurisdiction. It further contends that Michigan Diagnostics' counterclaims for patent misuse, unfair competition, and Walker Process fraud each fail to state a claim upon which relief can be granted and must be dismissed pursuant to *Rule 12(b)(6)*.

A. Counterclaims for Non-Infringement of Additional Patents

In the first of its counterclaims, Michigan Diagnostics seeks a declaration of non-infringement as to sixty-two Applied Biosystems patents. With the filing of the second amended complaint, Applied Biosystems alleges the infringement of seven of these sixty-two patents. The other fifty-five are simply other patents held by Applied Biosystems. Applied Biosystems argues that this Court lacks subject matter jurisdiction over Michigan Diagnostics' counterclaims for a declaration of non-infringement of these additional patents because no justiciable case or controversy exists as to those fifty-five patents. I agree.

HN2[] The DJA provides that "[i]n a case of actual controversy within its jurisdiction **[**8]** ... any court of the United States, upon the filing of an appropriate pleading, may declare the rights and other legal relations of any interested party seeking such declaration, whether or not further relief is or could be sought." *28 U.S.C. § 2201(a)*. The requirement that there be a "case of actual controversy" has been interpreted to refer "to the type of 'Cases' and 'Controversies' that are justiciable under Article III." See *MedImmune, Inc. v. Genentech, Inc., 549 U.S. 118, 127, 127 S. Ct. 764, 166 L. Ed. 2d 604 (2007)* (citing *Aetna Life Ins. of Hartford, Ct. v. Haworth, 300 U.S. 227, 240, 57 S. Ct. 461, 81 L. Ed. 617 (1937))*.

[*156] Until recently, the Federal Circuit [1] employed a two-part test to determine the existence of a sufficient "case or controversy": (1) whether conduct by the patentee creates a reasonable apprehension on the part of the declaratory judgment plaintiff that it will face an infringement suit; and (2) whether conduct by the declaratory judgment plaintiff potentially constitutes infringing activity or demonstrates concrete steps taken with the intent to conduct such activity. *SanDisk Corp. v. STMicroelectronics, Inc., 480 F.3d 1372, 1379 (Fed. Cir. 2007)*; see e.g., *Arrowhead Indus. Water, Inc. v. Ecolochem, Inc., 846 F.2d 731, 736 (1988)*.

In 2007, the Supreme Court rejected the Federal Circuit's "reasonable apprehension of suit" test in *MedImmune, 549 U.S. at 126-32*. The specific question the Court considered was whether Article III and the DJA require "a patent licensee to terminate or breach its license agreement before it can seek a declaratory judgment that the underlying patent is invalid, unenforceable, or not infringed." *Id. at 120-21*. MedImmune was a drug manufacturer that agreed to a licensing agreement with a patentee, Genentech, allowing it to sell products the sale of which would otherwise infringe on one or more claims of Genentech's patents. *Id. at 121*. The Court held that subject matter jurisdiction existed despite the fact that "the continuation of royalty payments [by the licensee] makes what would otherwise be an imminent threat at least remote, if not nonexistent." See *id. at 128*.

In rejecting the "reasonable apprehension of suit" test, the Court stated that "[t]he rule that a plaintiff must destroy a large **[**10]** building, bet the farm, or (as here) risk treble damages and the loss of 80 percent of its business, before seeking a declaration of its actively contested legal rights finds no support in Article III." *Id. at 134*. The Court noted that ***HN3***[] there is no bright-line test, but that:

> Our decisions have required that the dispute be "definite and concrete, touching the legal relations of parties having adverse legal interests"; and that it be "real and substantial" and "admi[t] of specific relief through a decree of a conclusive character, as distinguished from an opinion advising what the law would be under a hypothetical state of facts."

Id. at 127 (quoting *Aetna, 300 U.S. at 240-41*). Under "all the circumstance…" there must be "a substantial controversy between parties having adverse legal interests, of sufficient immediacy and reality to warrant the issuance of a declaratory judgment." Id. (quoting *Md. Cas. Co. v. Pac. Coal & Oil Co., 312 U.S. 270, 273, 61 S. Ct. 510, 85 L. Ed. 826 (1941))*.

Following MedImmune, the Federal Circuit held in SanDisk that an Article III case or controversy giving rise to declaratory judgment jurisdiction existed based upon substantial and detailed pre-litigation discussions between the parties **[**11]** about infringement and licensing. See *480 F.3d at 1382*. The declaratory judgment plaintiff - Sandisk Corp. ("Sandisk") - and STMicroelectronics ("ST") were competitors in the flash memory storage business. *Id. at 1374*. The relevant interactions began when ST sent a letter to SanDisk requesting a meeting to discuss a possible cross-license agreement, listing eight patents owned by ST that it suggested "may be of interest." Id. A second letter from **[*157]** ST reiterated the request and listed four additional patents to be considered. Id. The parties had a number of business meetings at which possible infringement and possible cross-licensing were explored in some depth. *Id. at 1374-75*. At one meeting to discuss possible licensing, ST requested that the discussion be considered a settlement discussion under *Federal Rule of Evidence 408*. *Id. at 1375*. It then presented a slide show that referred to SanDisk's "unlicensed activities" and made a four-to-five hour technical presentation identifying the specific claims of each ST patent and how they might be infringed by SanDisk. Id. ST gave SanDisk a packet of materials that included a copy of fourteen ST patents, reverse engineering reports for SanDisk **[**12]** products, and diagrams showing how elements of ST's patent claims covered SanDisk's products. Id. For its part, SanDisk also made a presentation describing its own patents and explaining how ST's product infringed. Id. At the end of the meeting, ST's vice president of intellectual property and engineering told SanDisk's chief intellectual property counsel that "ST has absolutely no plan whatsoever to sue SanDisk." *Id. at 1376*. After further correspondence that involved SanDisk making a confidential cross-licensing offer and attempts to set up another meeting, SanDisk filed

[1] Federal **[**9]** Circuit law governs this inquiry because the underlying merits of the action involve patent infringement. See *Microchip Tech. Inc. v. The Chamberlain Group, Inc., 441 F.3d 936, 940 (Fed. Cir. 2006)*.

suit alleging infringement of one of its patents and seeking a declaratory judgment of non-infringement and invalidity of ST's patents. Id.

Considering MedImmune, the Federal Circuit said:

> HN4[] In the context of conduct prior to the existence of a license, declaratory judgment jurisdiction generally will not arise merely on the basis that a party learns of the existence of a patent owned by another or even perceives such a patent to pose a risk of infringement, without some affirmative act by the patentee. But Article III jurisdiction may be met where the patentee takes a position that puts the declaratory judgment plaintiff **[**13]** in the position of either pursuing arguably illegal behavior or abandoning that which he claims a right to do .... We hold that where a patentee asserts rights under a patent based on certain identified ongoing or planned activity of another party, and where that party contends that it has the right to engage in the accused activity without license, an Article III case or controversy will arise....

Id. at 1380-81. The court held that the interaction between SanDisk and ST sufficed to present a case or controversy. Id. at 1382. ST sought royalty payments "under its patents based on specific, identified activity." Id. It communicated a detailed infringement analysis, "which identified, on an element-by-element basis, the manner in which ST believed each of SanDisk's products infringed the specific claims of ST's patents." Id.

The court also held that the express statement that ST had no plan to sue SanDisk did not prevent the existence of a sufficient controversy, because ST had "engaged in a course of conduct that shows a preparedness and willingness to enforce its patent rights...." Id. at 1383. The fact that ST stated thereafter that it did not intend to sue constituted "the kind [] of 'extra-judicial **[**14]** patent enforcement with scare-the-customer-and-run tactics' that the Declaratory Judgment Act was intended to obviate." Id. at 1383 (quoting Arrowhead, 846 F.2d at 735).

In Sony Electronics, Inc. v. Guardian Media Technologies, LTD., 497 F.3d 1271, 1273 (Fed. Cir. 2007), declaratory judgment actions were brought by Sony Electronics, Inc. ("Sony") and other electronics companies against Guardian Media Technologies, **[*158]** Ltd. ("Guardian") seeking a declaration that two Guardian patents relating to the "V-Chip" parental television blocking device were not infringed and were invalid and unenforceable. As in Sandisk, there was a substantial and detailed correspondence between the parties prior to litigation. See id. at 1274-1281. Guardian sent the plaintiffs letters entitled "Notice of Patent Infringement," which identified both specific infringing products and specific claims of the patents said to be infringed. Id. at 1274, 1276, 1279. It provided claim charts for its two patents that described each claim it believed to be infringed and stated the basis for that belief, limitation-by-limitation. Id. at 1274, 1277. Guardian requested meetings, mentioned royalties and compensation for products **[**15]** previously sold, offered a license, and exchanged correspondence regarding invalidity and prior art. Id. at 1275-81. Each of the plaintiffs separately filed complaints under the DJA, which were consolidated by the district court. Id. at 1281. The district court granted Guardian's motion to dismiss for lack of subject matter jurisdiction on the ground that there was no actual controversy because Guardian had not expressly threatened to sue any of the plaintiffs for infringement, nor did its actions amount to an implicit threat. Id. at 1281.

The Federal Circuit vacated the district court's dismissal. Id. at 1289. It explained that "the Declaratory Judgment Act was intended to fix the problem that arises when the other side does not sue." Id. at 1284. The "parties had taken adverse positions" on the issues of infringement and validity. Id. at 1285. Guardian had "explicitly identified" the patents and the specific claims of those patents which it asserted were infringed, as well as the specific products it believed were infringing. See id. at 1285. The plaintiffs, in turn, had identified "specific prior art references" that they believed rendered the claims invalid. See id. at 1285-87. **[**16]** As to Sony, the court summarized that "[i]n short, because Guardian asserts that it is owed royalties based on specific past and ongoing activities by Sony, and because Sony contends that it has a right to engage in those activities without a license, there is an actual controversy between the parties within the meaning of the Declaratory Judgment Act." Id. at 1286. The court came to similar conclusions as to the other plaintiffs. Id. at 1286, 1287.

Here, Michigan Diagnostics acknowledges that it bears the burden as HN5[] the party claiming declaratory judgment jurisdiction to show that it existed at the time its counterclaims were filed. See Benitec Austl., Ltd. v. Nucleonics, Inc., 495 F.3d 1340, 1344 (Fed. Cir. 2007), cert. denied, *128 S. Ct. 2055, 170 L. Ed. 2d 811 (2008)*. It argues that an actual controversy exists because the parties have established adverse legal interests. Michigan Diagnostics alleges that Applied Biosystems "sent a letter to Michigan Diagnostics advising Michigan Diagnostics of its extensive patent portfolio and notifying Michigan Diagnostics that it may be infringing patents owned by [Applied Biosystems]." (Michigan Diagnostics LLC's Answer, Affirmative Defs., and Countercls. 8 P 10 **[**17]** [hereinafter Ans. and Countercls.].) It further notes that "[m]inor dialogue occurred between the parties and a meeting was tentatively scheduled in January, 2007, but it never occurred." (Id. P 11.)

Michigan Diagnostics has attached to its brief copies of letters between the parties which preceded this litigation. On July 13, 2006, Counsel to Applied Biosystems sent a letter to Dr. Giri of Michigan Diagnostics that stated:

> In view of certain activities of your company, including your commercially available **[*159]** enzyme triggerable dioxetanes, we believe you should review our U.S. patents listed on the enclosure to this letter. We have included the independent claims in the enclosure as well. These patents were originally assigned to Tropix Inc. and are now part of the Applied Biosystems patent portfolio.
> We propose a meeting to discuss your relevant products in light of our patents with a view toward entering into licensing discussions. We would appreciate receiving your response to this proposal by July 24, 2006.

(Pl. Michigan Diagnostics' Resp. to Def.'s Mot. to Dismiss Countercls. Ex. A. [hereinafter Def.'s Opp.].) This enclosure listed sixty-two patents: seven of the eight patents for which **[**18]** Applied Biosystems now brings infringement claims, and the fifty-five additional patents that are referred to in the counterclaim. Counsel for Michigan Diagnostics responded on August 16, 2006:

> We have now completed a review of approximately one-half of the patent portfolio which you were kind enough to send to us. As I had suggested during our initial telephone conversation, there does not appear to be an issue of infringement.
> The composition which Michigan Diagnostic sells and distributes is outside the claims of any of the patents reviewed to date.
> It appears that each of the Applied Biosystems reviewed patents are limited to a dioxetane where spiro-fused ring, where present, is "passive" or inactive. The Michigan Diagnostic dioxetane is not such a product. However, because of the proprietary nature of the composition, Michigan Diagnostic would only be willing to disclose this compound, to you, to corroborate what is set forth herein, on a confidential basis.
> If you are so inclined, then we will provide the structure to you.
>
> Further, as you indicated to me, you had not, as of the time we discussed the situation, determined or had any knowledge of the actual Michigan Diagnostic composition, **[**19]** only that it was a competitive product in the marketplace.
> Michigan Diagnostic is not seeking litigation nor does it want to engage in the same but, based upon our analysis, there simply does not appear to be any question of infringement at this time, with respect to the patents that have been reviewed to date.

(Id. Ex. B.) Applied Biosystems' counsel replied on August 31, 2006:

> We are currently reviewing your comments with respect to the composition of the products that Michigan Diagnostics sells and we are considering your offer to provide us with details of the structure of these compounds. In the meantime, please advise when you will have completed your review of the remainder of the patents.
> Finally, I would like to clarify the statements in the penultimate paragraph of the first page of your letter. While it is true that I personally have not conducted a determination of the actual Michigan Diagnostics composition, this should not be construed to infer or imply that Applied Biosystems has not conducted an evaluation. In fact, Applied Biosystems has conducted an evaluation of the Michigan Diagnostics products.

(Id. Ex. C.) Counsel for Michigan Diagnostics responded on September 15, **[**20]** 2006:

> .... As I have previously indicated, as soon as the balance of the patents are analyzed, we will supplement our position. However, the next to last sentence of your letter seems to indicate the Applied Biosystems has conducted an evaluation of the compositions of Michigan **[*160]** Diagnostics. Obviously, you may have a

> different view from that of my client and myself and it would certainly be most beneficial if you could provide us with your evaluation to see where, if any, there is disagreement between us. This would quite clearly facilitate the resolution of any potential problem.

(Id. Ex. D.) Counsel for Michigan Diagnostics wrote to the Senior Director of Licensing at Applied Biosystems on December 5, 2006:

> I had previously asked [Applied Biosystems' counsel] to identify which claims of which of your patents you believe the products of Michigan Diagnostic infringe. Once we know this, we can certainly be in a better position to evaluate your position. To suggest that Michigan Diagnostic products infringe all the claims of each patent seems untenable.

(Id. Ex. E.) On March 26, 2007, Applied Biosystems filed its first complaint in the present action.

The communications between the parties have **[**21]** not created a case or controversy as to whether the fifty-five additional Applied Biosystems patents not sued upon are infringed by Michigan Diagnostics. Michigan Diagnostics' previously quoted characterization of its interactions with Applied Biosystems as "[m]inor dialogue" is a fair one. (See Ans. and Countercls. 8 P 11) There is no "definite and concrete" dispute as to particular patents, except the seven patents as to which Applied Biosystems alleges infringement in its second amended complaint. See *MedImmune, Id. at 127* (quoting *Aetna, 300 U.S. at 240*). The correspondence between the parties itself bespeaks the lack of any specific dispute: "it would certainly be most beneficial if you could provide us with your evaluation to see where, if any, there is disagreement between us. This would quite clearly facilitate the resolution of any potential problem," (see Def.'s Opp. Ex. C.); "Once we know [which claims of which patents Applied Biosystems believes are infringed], we can certainly be in a better position to evaluate your position." (see id. Ex. D.)

Precisely. The "problem that arises when the other side does not sue," see *Sony, 497 F.3d at 1284*, is not a problem, or at least **[**22]** not the same problem, when the other side has not made any particularized suggestion of infringement and may *never* sue. Applied Biosystems broadly, and with some palpable bravura, suggested a review of its entire patent portfolio, but it did not make any specific allegations of infringement except within its pleading in this lawsuit. Nor has Michigan Diagnostics, after apparently conducting a review of Applied Biosystems' patents, argued that it might be infringing on any of these patents but for their invalidity. In short, it is far from clear that any dispute actually exists as to the fifty-five patents. As to them it may be fairly said that Michigan Diagnostics is essentially seeking an advisory opinion. There is no jurisdiction for that essay.

Accordingly, Michigan Diagnostics' counterclaim for a declaration of non-infringement must be dismissed for lack of subject matter jurisdiction as to the fifty-five patents not the subject of the infringement claims set forth in the second amended complaint because no case or controversy as to those fifty-five patents presently exists under Article III and the DJA.

B. Counterclaim for Unfair Competition Under the Lanham Act

Michigan Diagnostics **[**23]** alleges that Applied Biosystems, "knowing that its patents are either invalid … or that Michigan Diagnostics' compositions do not infringe … has undertaken the predatory practice of driving Michigan Diagnostics **[*161]** out of business by causing Michigan Diagnostics to defend against baseless patent infringement claims," (Ans. and Countercls. 11 P 29), that it "has undertaken this predatory practice of suing in order to maintain its monopoly position in the chemiluminescent chemical market by means other than competition on the merits," (Id. P 30), and that "[u]pon information and belief, [Applied Biosystems] has undertaken this course of conduct deliberately to impede Michigan Diagnostics' efforts to sell its chemical by using the internet to advise potential customers that Michigan Diagnostics is infringing [Applied Biosystems'] patents." (Id. at 12 P 31.) It avers that the alleged actions by Applied Biosystems constitute unfair competition in violation of Section 43(a) of the Lanham Act, *15 U.S.C. § 1125(a)*. Applied Biosystems moves to dismiss this counterclaim because it fails to state a claim upon which relief can be granted and dismissal is appropriate under *Rule 12(b)(6)*.

Section 43(a) **[**24]** of the Lanham Act provides, in relevant part:

> HN6[] (1) Any person who, on or in connection with any goods or services … uses in commerce any … false or misleading description of fact, or false or misleading representation of fact, which--
>
> (B) in commercial advertising or promotion, misrepresents the nature, characteristics, qualities, or geographic origin of his or her or another person's goods, services, or commercial activities,
>
> shall be liable in a civil action by any person who believes that he or she is or is likely to be damaged by such act.

15 U.S.C. § 1125(a)(1).

HN7[] "[T]he protection otherwise afforded by the patent laws to a patentee's conduct in enforcing its patent may be lost if the patentee acts in bad faith." Zenith Elecs. Corp. v. Exzec, Inc., 182 F.3d 1340, 1343 (Fed. Cir. 1999) However, a claim for patent infringement, without more, cannot be the basis for an unfair competition claim under Section 43(a) of the Lanham Act. See id. at 1344, 1349. "[T]here is no legal basis for a holding that inequitable conduct, or the assertion of a patent procured through inequitable conduct, constitutes unfair competition." Pro-Mold & Tool Co., Inc. v. Great Lakes Plastics, Inc., 75 F.3d 1568, 1575 (Fed. Cir. 1996). **[**25]** Accordingly, to the extent the counterclaim is based on nothing more that Applied Biosystems' assertion of infringement claims, it fails to state a claim upon which relief under Section 43(a) can be granted.

Michigan Diagnostics argues, however, that the "gravamen" of its claim is marketplace activity, not the abuse of the administrative or judicial process. (Def.'s Opp. 10.); see Zenith, 182 F.3d at 1349. HN8[] "[T]he initiation of an infringement suit is clearly not covered by the text of § 43(a), while a communication to the customers of the accused infringer, in certain instances, may be." Zenith, 182 F.3d at 1349. While a patentee's statements as to its patent rights are conditionally privileged, they may be actionable if made in bad faith. Zenith, 182 F.3d at 1353. To harmonize this tension between patent law and the Lanham Act, the Federal Circuit held in Zenith that "before a patentee may be held liable under § 43(a) for marketplace activity in support of its patent, and thus be deprived of the right to make statements about potential infringement of its patent, the marketplace activity must have been undertaken in bad faith." Id.

The unfair competition counterclaim does not adequately **[**26]** allege bad faith. It broadly asserts that when it brought its infringement suit and announced it to the market, Applied Biosystems knew its patents were invalid or that Michigan Diagnostics' **[*162]** products did not infringe the patents. Such a conclusory allegation of guilty knowledge is not sufficient as a matter of pleading. See Bell Atl. Corp. v. Twombly, 550 U.S. 544, 127 S.Ct. 1955, 1964-65, 167 L. Ed. 2d 929 (2007) ("[A] plaintiff's obligation to provide the 'grounds' of his 'entitle[ment] to relief' requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do."). Moreover, it would disturb the balance the Zenith court attempted to strike between the cause of action authorized under Section 43(a) of the Lanham Act and the enforcement of rights granted under patent law if a party were to be permitted to plead an unfair competition counterclaim merely by means of a broad allegation that the patentee "knew" it had no right to enforce its patent. See Zenith, 182 F.3d at 1352 ("[A] conflict seemingly arises when an accused infringer attempts to use 'the long reach of ***antitrust law***' to frustrate an honest patentee's right to enforce a patent.") (quoting **[**27]** Handgards, Inc. v. Ethicon, Inc., 601 F.2d 986, 996 (9th Cir. 1979)). Pleading knowledge of non-infringement or invalidity in broad conclusory terms without specifics would enable an accused infringer to add a Lanham Act claim to almost every case. To forestall that eventuality, Zenith requires an allegation of bad faith. Id. at 1353. Twombly requires this allegation to include "enough facts to state a claim to relief that is plausible on its face," such that the claim crosses "the line from conceivable to plausible." See Twombly, 127 S.Ct. at 1974.

In Zenith, the unfair competition claim asserted facts which, taken as true, would support a conclusion of bad faith. It was alleged that the purportedly infringing products used a specific touch-screen technology that was different from the specific touch-screen technology disclosed in the patents. Zenith, 182 F.3d at 1343. The impossibility of infringement thus had to have been obvious to the patentee, and any representation to the contrary had to have been knowingly false and thus made in bad faith. See id. There are no similar specifics in Michigan Diagnostics' allegations. Although one of the letters attached to Michigan Diagnostics' **[**28]** brief in opposition to the motion to dismiss provides this type of information at a very general level, (see Def.'s Opp. Ex. B ("It appears that each of the

Applied Biosystems reviewed patents are limited to a dioxetane where spiro-fused ring, where present, is "passive" or inactive. The Michigan Diagnostic dioxetane is not such a product.")), similar allegations are not made in the counterclaim.

What the counterclaim alleges is that, as a result of both prior collaboration and prior litigation between the present parties and their respective predecessors, "the technology and patents involved herein are based in whole or in part on Dr. Giri's invention(s), the knowledge of which [Applied Biosystems] had possessed." (Ans. and Countercls. 8 P 9.) No details. No reference to any claims in any patent. No description of any particular product. The fact that Applied Biosystems' patents are "based on" earlier work is as consistent with their validity as with their invalidity. ***HN9***[] A patented invention can be "based on" prior work and yet still include novel, non-obvious advances or refinements. The vague allegations in this case are a far cry from the specific allegations found sufficient in Zenith. **[**29]** They are insufficient to plausibly plead that Applied Biosystems acted in bad faith in communicating to the market its assertions about infringement by Michigan Diagnostics.

More fundamentally, the unfair competition counterclaim does not allege the necessary elements of a claim under *§ 43(a)* of the Lanham Act. See *15 U.S.C. § 1125(a)(1)*. ***HN10***[] **[*163]** In addition to alleging facts supporting bad faith, a plaintiff must allege "(1) that the defendant ... made a false or misleading statement of fact in commercial advertising or promotion about the plaintiff's goods or services; (2) that the statement actually deceives or is likely to deceive a substantial segment of the intended audience; (3) that the deception is material in that it is likely to influence purchasing decisions; (4) that the defendant caused the statement to enter interstate commerce; and (5) that the statement results in actual or probable injury to the plaintiffs." *Zenith, 182 F.3d at 1348, 1353*. Review of the counterclaim reveals that at least the second, third, and fifth necessary elements are omitted.

Michigan Diagnostics' counterclaim for unfair competition therefore must be dismissed pursuant to *Rule 12(b)(6)* for failing to state **[**30]** a claim upon which relief can be granted.

C. Counterclaim for *Walker Process* Fraud

HN11[] A patent is an exception to the general rule against monopolies, but one who obtains a patent by knowingly and willfully misrepresenting facts to the PTO can be stripped of the exemption from antitrust regulation. *Walker Process Equip., Inc. v. Food Mach. & Chem. Corp., 382 U.S. 172, 177, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965)*. "[T]he enforcement of a patent procured by fraud on the Patent Office may be violative of *§ 2* of the Sherman Act provided the other elements necessary to a *§ 2* case are present." *Id. at 174*.

HN12[] A Walker Process fraud allegation is subject to the heightened pleading requirements of *Rule 9(b)*. *Medimmune, Inc. v. Genentech, Inc., 427 F.3d 958, 967 (Fed. Cir. 2005)*, rev'd on other grounds, *546 U.S. 1169, 126 S. Ct. 1329, 164 L. Ed. 2d 46 (2007)*. "In alleging fraud ... a party must state with particularity the circumstances constituting fraud...." *Fed. R. Civ. P. 9(b)*. Michigan Diagnostics fails to plead its Walker Process fraud counterclaim with adequate factual particularity. It alleges that Applied Biosystems intentionally deceived the Patent and Trademark Office ("PTO"), and thus obtained its patents, by not informing the PTO "of its knowledge of Dr. Giri's **[**31]** inventions which were substantially incorporated into many of the [Applied Biosystems] patents." (Ans. and Countercls. 12 P 33.) But it does not identify which of the many Applied Biosystems patents were obtained in this manner, which inventions by Dr. Giri were incorporated, nor what disclosures should have been made.

Michigan Diagnostics offers only the circular explanation that the counterclaims pertain to "those patents which 'were invented by Dr. Giri while employed at Wayne State University" and 'inventions that the named inventor derived from Dr. Giri's work.'" (Def.'s Opp. 15 (citing Ans. PP 19-20).) This is plainly insufficient; there is a total absence of particularity.

The counterclaim for Walker Process fraud is therefore dismissed pursuant to *Rules 12(b)(6)* and *9(b)*.

D. Patent Misuse

Michigan Diagnostics also counterclaims for "patent misuse." Similar to its Walker Process fraud counterclaim, in this counterclaim it alleges that many of Applied Biosystems' patents are invalid and unenforceable by reason of their being obtained through fraud and/or inequitable conduct before the PTO. ***HN13***[] Inequitable conduct, like fraud, has to be pled with particularity. See *Fed. R. Civ. P. 9(b)*; **[**32]** *Cent. Admixture Pharm. Servs., Inc. v. Advanced Cardiac Solutions, P.C., 482 F.3d 1347, 1356 (Fed. Cir. 2007)*. Michigan Diagnostics **[*164]** specifies neither the particular patents that it believes were obtained through fraud or inequitable conduct, nor the prior art invented by Dr. Giri that should have been disclosed to the PTO. It therefore has failed to state a claim upon which relief can be granted, and the counterclaim for patent misuse must be dismissed pursuant to *Rules 12(b)(6)* and *9(b)*.

IV. Conclusion

For all the foregoing reasons, the plaintiff's Motion for Leave to File Second Amended Complaint (dkt. no. 66) and its Motion to Dismiss Defendant's Counterclaims (dkt. no. 28) are both GRANTED. The defendant's counterclaims are dismissed with the exception of Count I (the counterclaim for non-infringement) insofar as it seeks a declaratory judgment regarding the patents in suit under the second amended complaint.

It is SO ORDERED.

Opinion by: DONALD L. GRAHAM **[*10]**

Opinion

OMNIBUS ORDER ON MOTIONS TO DISMISS

THIS CAUSE comes before the Court upon several Motions to Dismiss. The Court has considered each motion, the pertinent portions of the record, and is otherwise fully advised in the premises. As set forth below, the motion posing jursidictional challenges is granted, in part, and denied, in part. The motions under *Rule 12(b)(6)* are also granted with Plaintiffs having leave to amend the complaint. Overall, the Court concludes the FTAIA bars Expro's claims. Therefore, it follows that this Court lacks subject matter jurisdiction on those claims. As to the remaining claims, the Court finds the First Amended Complaint [D. E. 180] generally satisfies the pleading standard set forth in *Bell Atlantic Corporation v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*, but fails to sufficiently plead as to the Defendants' individual conduct.

I. BACKGROUND

This a consolidation of seven antitrust actions transferred to this District by the Multidistrict Litigation Panel. Plaintiffs, Bayside Rubber & Products, Inc. ("Bayside") and Expro Gulf Limited ("Expro"),[1] allegedly purchased Marine Hose[2] from the Defendants. Defendants are domestic and foreign manufacturers and corporate executives alleged to be part of a conspiracy in restraint of trade to artificially **[*11]** raise the prices for Marine Hose in the United States, in violation of *Section 1* of the *Sherman Act*, *15 U.S.C. § 1*.[3] [See First Amended Consolidated Class Action Complaint, D.E. 180, hereinafter the "First Amended Complaint," at ¶ 56.] Filed as a proposed class action, the First Amended Complaint alleges that since 1985, Defendants engaged in anticompetitive activities that included, inter alia, attending meetings in the United States to discuss the sale of Marine Hose and to fix Marine Hose prices through extensive arrangements among various international corporations and their respective corporate officers. Plaintiffs further allege that as a result of the global conspiracy, they (and the proposed class) paid artificially inflated prices for Marine Hose and, consequently, suffered antitrust injury to their business or property.[4] [See First Amended Complaint ¶ 2.] While some Defendants answered the First Amended Complaint,[5] others filed motions to dismiss that, as discussed below, are ripe for disposition.[6]

---

[1] Bayside and Expro are the remaining Plaintiffs. Two other initial plaintiffs (Weeks Marine, Inc. and Shipyard Supply, LLC) have voluntary dismissed their claims. [See D.E. 172.]

[2] Marine Hose is a flexible rubber hose used primarily to transport oil between ships, terminals, buoys and tanks.

[3] *Section 1* of the *Sherman Act* provides, in pertinent part, that "every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several states, or with foreign nations, is declared to be illegal." *15 U.S.C. § 1*.

[4] The allegations at issue in the First Amended Complaint were also the subject of separately filed criminal complaints against numerous corporations and individuals as further discussed herein.

[5] The following Defendants answered the First Amended Complaint: Yokohama Rubber Co. Ltd. [D.E. 197], Misao Hioki [D.E. 212], Bridgestone Corporation [D.E. 214] and Jacques Cognard [D.E. 207]. The record also reveals that the Manuli Defendants

II. LAW & DISCUSSION

Because of the primary concern relating to jurisdiction, see e.g., *Johansen v. Combustion Eng'g, Inc., 170 F.3d 1320, 1328 n.4 (11th Cir. 1999)* ("A federal court not only has the power but also the obligation to inquire into jurisdiction whenever the possibility **[*12]** that jurisdiction does not exist arises."), the Court will first address the motions presenting jurisdictional challenges and then discuss the motions to dismiss for failure to state a claim.[7]

A. Motion to Dismiss under *Federal Rule of Civil Procedure 12(b)(1)* for Lack of Subject Matter Jurisdiction

Manuli Rubber Industries, S. P.A and Manuli Oil & Marine (U.S.A) Inc. (hereinafter, the "Manuli Defendants")[8] seek dismissal of the First Amended Complaint asserting, inter alia, that Plaintiffs lack standing to bring these antitrust claims and further contending the Court lacks subject matter jurisdiction over Expro's claims.

A motion to dismiss for lack of standing and an attack on the court's subject matter jurisdiction is brought under *Federal Rule of Civil Procedure 12(b)(1)*. *Region 8 Forest Serv. Timber Purchasers Council v. Alcock, 993 F.2d 800, 807 n.8 (11th Cir. 1993)*; see also *In re Intel Corp. Microprocessor Antitrust Litig., 452 F. Supp. 2d 555, 559 (D. Del. 2006)* (granting 12(b)(1) motion because FTAIA precluded foreign antitrust claims and plaintiff lacked standing). Because a jurisdictional challenge goes to the court's very power to hear a case, the court has "the obligation at any time to inquire into jurisdiction whenever the possibility that jurisdiction does not exist arises." Pop's Pancakes, Inc. v. NuCO2, Inc., 2008 WL 2901748, at *11 (S.D. Fla. 2008).

In this case, the Manuli Defendants pose a factual challenge to the Court's subject matter jurisdiction. [See D.E. 242 at 4.] Factual attacks challenge the **[*13]** existence of subject matter jurisdiction, in fact, irrespective of the pleadings and matters outside of the pleadings, such as testimony and affidavits are considered. *Lawrence v. Dunbar, 919 F.2d 1525, 1529 (11th Cir. 1990)*; *United States v. LSL Biotechnologies, 379 F.3d 672, 683 (9th Cir. 2004)* (finding that while federal complaints are generally construed liberally, it was proper for the district court to scrutinize the complaint more closely in order to determine whether it had subject matter jurisdiction even when the scrutiny involved taking preliminary evidence, weighing that evidence and deciding, as a matter of law, whether the facts alleged support jurisdiction); *Turicentro, S.A. v. American Airlines, Inc., 303 F.3d 293, 300 n.4 (3rd Cir. 2002)* (noting that on a factual challenge to jurisdiction, the court is not confined to the allegations in the complaint); *Den Norske Stats Oljeselskap AS v. Heeremac VOF, 241 F.3d 420, 424 (5th Cir. 2001)* (finding that, on a motion to

---

also filed answers to the First Amended Complaint [see D.E. 200 and 201], but later joined in the instant motion to dismiss on jurisdictional grounds [D.E. 242].

[6] Because certain entities were served later in the litigation and have only recently filed their pleadings, the motions to dismiss by certain Defendants are not yet ripe. The record also reveals that Defendants Peter Whittle and PW Consulting have failed to answer or otherwise respond while Defendant Uwe Bangert has yet to be served. [See D.E. 340.]

[7] Defendants have largely joined in each others motions and many raise substantially the same issues, which the Court will address in turn.

[8] In addition to the Manuli Defendants, the Motion to Dismiss [D.E. 242] initially included Defendants Parker Hannifin Corporation, Parker S.r.l and Giovanni Scodeggio (collectively, the "Parker Defendants"). Significantly, however, the Parker Defendants executed a settlement agreement with Plaintiffs and withdrew from the motion to dismiss. [See D.E. 296.] Consequently, the Court's ruling herein is inapplicable to the Parker Defendants.

The record also reflects that other Defendants filed notices of adopting the motion to dismiss for lack of subject matter jurisdiction, including Defendants Scaglia, Northcutt and Furness (the "Adopting Defendants"). Consequently, for ease of reference, the discussion refers to the Manuli Defendants, but also includes the Adopting Defendants as noted herein.

dismiss for lack of subject matter jurisdiction, the court may evaluate the complaint, the complaint supplemented by undisputed facts plus the court's resolution of disputed facts).[9]

1. The FTAIA and Expro's Claims

The Court will first address the issue of subject matter jurisdiction over Expro's claims. The Manuli Defendants argue that Expro's claims are barred by the Federal Trade Antitrust Improvements Act ("FTAIA"), which amended the *Sherman Act*.[10]See *Pub. L. 97-290, title IV, § 402, 96 Stat 1246 (1982)*. Significantly, the Sherman Act reaches conduct outside **[*14]** the borders of the United States, *but only when* the conduct is intended and does in fact produce a substantial effect on commerce in the United States. *United States v. Anderson, 326 F.3d 1319, 1329 (11th Cir. 2003)* (emphasis added). In 1982, Congress enacted the FTAIA to limit American court's jurisdiction over international commerce to transactions that affect the American economy. *Anderson, 326 F.3d at 1329*; *F. Hoffman-La Roche, Ltd. v. Empagran, S.A., 124 S. Ct. 2359 (2004)* ("*Empagran I*") ("The [FTAIA] excludes from the *Sherman Act*'s reach much anticompetitive conduct that causes only foreign injury."); *Den Norske, 241 F.3d at 421* ("The FTAIA, [was enacted to] clarify the application of United States antitrust laws to foreign conduct, limits the application of such laws when non-import foreign commerce is involved."). The Supreme Court in *Empagran I* explained the FTAIA exclusions as limiting anticompetitive conduct that causes only foreign injury "by setting forth a general rule that the *Sherman Act* shall not apply to conduct involving trade or commerce with foreign nations" and then creating "exceptions to the general rule, applicable where (roughly speaking) that conduct significantly harms imports, domestic commerce or American exporters. *Empagran I, 124 S. Ct. at 2363* (internal quotations and citations omitted).

Courts have repeatedly recognized the complexities of the FTAIA. See, e.g. *CSR Limited v. CIGNA Corp., 405 F. Supp. 2d 526, 537 (D.N.J. 2005)* ("[T]he FTAIA restrictions are complex and [its] application requires careful scrutiny.); *Turicentro, 303 F.3d at 300-01* (describing the FTAIA as inelegantly phrased and using rather convoluted language); *Den Norske, 241 F. 3d at 423* ("The history of this body of case law is confusing and unsettled."). And, although passed more than two decades ago, it appears the FTAIA body of law is still developing. *LSL Biotechnologies, 379 F. 3d at 678* ("Federal courts did not shower the FTAIA with attention for the first decade after its enactment, but have more recently begun to interpret the previously obscure statute); *Accord Den Norske, 241 F. 3d at 423*. Indeed, research reveals that the 2004 *Empagran I* Supreme Court opinion has become the seminal case on FTAIA jurisdiction. *Empagran I, 124 S. Ct. at 2363* (focusing on the FTAIA's application where price fixing

---

[9] At this juncture of the litigation, the Court stresses that it does not purport to make conclusive factual findings on the merits. Rather, the factual discussion herein is made to the extent necessary for purposes of the Court's jurisdictional analysis and to evaluate the motions to dismiss.

[10] The FTAIA expressly states:

Section 1 to 7 of this title shall not apply to conduct involving trade or commerce (other than import trade or import commerce) with foreign nations unless -

(1) such conduct has a direct, substantial, and reasonably foreseeable effect -

> (A) on trade or commerce which is not trade or commerce with foreign nations, or on import trade or import commerce **[*15]** with foreign nations; or
>
> (B) on export trade or expert commerce with foreign nations, of a person engaged in such trade or commerce in the United States; and

(2) such effect gives rise to a claim under the provision of *sections 1 to 7* of this title, other than this section.

If *sections 1 to 7* of this title apply to such conduct only because of the operation of paragraph (1)(b), then *sections 1 to 7* of this title shall apply to such conduct only for injury to export business in the United States.

15 U.S.C. § 6a.

that is significantly foreign causes some domestic antitrust injury and independent foreign injury). Moreover, the Eleventh Circuit Court of Appeals has had only one occasion to discuss the FTAIA's jurisdictional requirements. See *Anderson, 326 F.3d at 1329* (finding the FTAIA inapplicable to government **[*16]** programs in appeal from criminal conviction for antitrust violations). Against this backdrop, this Court is tasked with reviewing the First Amended Complaint, the relevant case law and the underlying facts to determine whether it has subject matter jurisdiction over Expro's antitrust claims.[11]

As the first step in the analysis, the Court must determine whether the FTAIA applies to the facts of this case. The Manuli Defendants maintain that Expro's claims are subject to the FTAIA because they involve foreign commerce that was not import or export trade. [See D. E. 242 at 6.] In support of their argument, the Manuli Defendants emphasize that Expro is a foreign corporation, organized under the laws of Cyprus, with its principal place of business in South Africa. [See D.E. 242 at 6-7; D.E. 180 ¶ 10.] According to the First Amended Complaint, Expro purchased Marine Hose from Defendant Parker ITR, an Italian corporation, with its principal place of business in Veniano, Italy. [D. E. 180 ¶ 18.] The First Amended Complaint is without further detail as to the purchase of Marine Hose between Expro and Parker. That said, in seeking dismissal, the Manuli Defendants submitted documents demonstrating **[*17]** that Expro sent purchase orders from Cyprus to Italy, where the Marine Hose was manufactured. [See D.E. 242-3; 242-7.] The Marine Hose was ultimately shipped from Italy to Nigeria for use in Nigeria. [See D.E. 248-8.]

Plaintiffs do not dispute these facts. Rather, Plaintiffs submit that the FTAIA is inapplicable-irrespective of the foreign nationality of the parties and the international route that the Marine Hose traveled until its final destination in Nigeria. In support thereof, Plaintiffs emphasize that the focus of the FTAIA is on the transaction and not on the identity or nationality of the parties. [See D. E. 257 at 12.][12] Plaintiffs also rely on Defendant Parker's own records, which listed Expro as a U.S. customer [See D.E. 257, Exh. G.] Plaintiffs lastly argue that the contract between Expro and Parker was governed by U.S. law, which evidences the domestic nature of the transaction. [See D.E. 257 at 11, 13.]

In considering the First Amended Complaint, the undisputed facts and the evidence surrounding the purchase of Marine Hose, the Court concludes that the FTAIA applies. Here, the transaction involved foreign entities (*i.e.*, a Cyprus plaintiff against an Italian defendant) **[*18]** who contracted for the manufacture, delivery and payment of Marine Hose-all stages of a transaction taking place wholly outside of the domestic United States. While, for purposes of the FTAIA, the citizenship of the parties is irrelevant, see, e.g., *Turicentro, 303 F. 3d at 301 n.5* (noting that foreigners should also enjoy the protection of the antitrust laws in the domestic marketplace, just as citizens), the nature of the transaction is not. Indeed, were it not for the participation of Expro's Houston office, wherein discussions concerning the purchase and sale of Marine Hose occurred, the transaction here at issue would be more akin to the international transaction underlying *Den Norske Stats Oljeselskap AS v. Heeremac VOF, 241 F.3d 420 (5th Cir. 2001)*.

Specifically, *Den Norske* involved the claim of a Norwegian plaintiff against English and Dutch defendants for an alleged antitrust conspiracy to raise prices of oil in the United States. *Den Norske, 241 F.3d at 421*. Plaintiff in *Den Norske* argued that the injury suffered in the North Sea (the exclusive location of plaintiffs' oil and gas drilling platforms) was a prerequisite for the injury suffered in the United States. *Id. at 425*. In concluding that the FTAIA applied, the Fifth Court in *Den Norske* found that the commerce for heavy lift barge services in the North Sea was not United States commerce *with* ***[*19]*** foreign nations, but commerce *between* or *among* foreign nations and, therefore, it was doubtful "that foreign commercial transactions between foreign entities in foreign waters is conduct cognizable by federal courts under the Sherman Act." *Id. at 426* (emphasis in original).

---

[11] Bayside's claims are not challenged under the FTAIA. Notably, Bayside is an Alabama corporation with its principal place of business in Mobile, Alabama. [See D.E. 180 ¶ 9.]

[12] Plaintiff filed their response under seal although the Manuli Defendants maintain that the motion need not remain under seal. [See D.E. 242 at 1 n1.] Consequently, the references herein are to docket entry 257 which will be unsealed within ten (10) days of this Order unless the parties otherwise advise.

Here, the Expro transaction for Marine Hose is between Expro (a Cyprus corporation) and Parker (an Italian corporation) for Marine Hose that was undisputedly intended for a project in Nigeria. The fact that negotiations may have transpired and/or matters were approved in Expro's Houston, Texas office is transform this international transaction into one that is domestic in nature. *CSR Ltd., 405 F. Supp. 2d at 539* (finding the FTAIA applicable even where some of the alleged actions have some connection to activities in the United States). Ultimately, the evidence overwhelmingly demonstrates that the transaction involves trade or commerce with foreign nations and, therefore, Plaintiffs cannot escape the application of the FTAIA to Expro's antitrust claims.

Since the FTAIA applies, the Court must next turn to whether Expro's claims fall under one of the statutory exceptions. Under the exceptions to the FTAIA, the statute allows a court to hear Sherman Act claims involving non-import **[*20]** trade or non-import commerce with foreign nations only if the challenged conduct *both* (i) sufficiently affects American commerce, *i.e.*, it has a direct, substantial and reasonably foreseeable effect on American domestic, import or certain expert commerce *and* (2) has an effect of a kind that ***antitrust law*** considers harmful, *i.e.*, the effect must give rise to a *Sherman Act* claim. *Empagran I, 124 S. Ct. at 2365* (emphasis added).

In this case, in analyzing the first element of the statutory exceptions, the relevant provision of the FTAIA is *section 6a(1)(B)*.[13] *Section 6a(1)(B)* requires a direct, substantial and reasonably foreseeable effect on *export* trade or commerce with foreign nations, of a person engaged in such trade or commerce in the United States. *15 U.S.C. § 6a(1)(B)* (emphasis added). The body of law concerning the "direct, substantial and reasonably foreseeable" statutory requirement under the FTAIA largely focuses on *import* trade or *import* commerce. See, e.g., *Turicentro, 303 F.3d at 302*. Nevertheless, to the extent the case law addresses how courts interpret the FTAIA, the Court finds it applicable to this purportedly "exporter" case.

For instance, courts have noted that the "direct, substantial and reasonably foreseeable" test was intended to serve as a simple, straightforward clarification of **[*21]** existing American law. *Turicentro, 303 F. 3d at 304* (internal quotations and citations omitted). It is the situs of the effects, as opposed to the conduct, that determines whether United States antitrust laws applies. Id. (internal citations omitted); *Den Norske, 241 F.3d at 428* (holding that the FTAIA precludes subject matter jurisdiction over claims of foreign plaintiffs against defendants where situs of the injury was overseas and the injury arises from effects in a non-domestic market); see also *CSR Ltd., 405 F. Supp. 2d at 526* (rejecting the notion that the direct, substantial and reasonably foreseeable requirement is met were defendant's actions were taken or overseen in the United States). In this case, although Plaintiffs argue that the "export trade exception to the FTAIA [applies] because the transaction was part of the U.S. export market for offshore oil and gas production" [see D.E. 257 at 14], the Court finds that Plaintiffs are hard pressed to prove this contention.

First, this Court finds significant that the allegations in the First Amended Complaint are wholly focused on the "purchase of Marine Hose in the United States." [See D.E. 180 ¶¶ 1, 2, 6, 47, 49.] However, in arguing that an FTAIA exporter exception applies, Plaintiffs interestingly stray away **[*22]** from the market for Marine Hose and argue the transaction at issue between Expro and Defendant Parker was part of the "U.S. export market for *offshore oil and gas production*." [See D.E. 257 at 14.] Plaintiffs then proceed to discuss the importance of Houston, Texas as the center for the export market for offshore oil and gas production services. Id. at 15-16. Unfortunately for Plaintiffs, the market for oil and gas services is not the product at issue in this case. Rather, according to the First Amended Complaint "this lawsuit is a class action on behalf of direct purchasers . . of *Marine Hose* . . who purchased *Marine Hose* in the United States" from Defendants. [D.E. 180 ¶ 1.][14] Having defined the case as one

---

[13] Plaintiffs do not argue the exception under *section 6a(1)(A)* (concerning domestic import trade or import commerce) and the Court finds no basis to consider *section 6a(1)(A)* applicable to the facts of this case.

[14] While it is possible for an exporter of services to meet the export trade exception, see e.g., *Access Telecom, Inc. v. MCI Telecomms. Corp., 197 F.3d 694, 712 (5th Cir. 1999)* (concluding that claims of exporter of telecommunications were not barred by FTAIA), this case is not about exporting services. See also *Emag Sols., LLC v. Toda Kogyo Corp., 2005 U.S. Dist. LEXIS 44512, 2005 WL 1712084, *11 (N.D. Cal. 2005)* (granting a motion to dismiss antitrust claims where plaintiffs failed to allege that foreign plaintiffs were American export competitors).

about the purchase of Marine Hose, Plaintiffs cannot now substitute the relevant market in an attempt to satisfy the FTAIA's requirements. Ultimately, Plaintiffs are unable to meet the statutory exception under *section 6a(1) (B)* and, therefore, Expro's claims are barred by the FTAIA.

Because the Court finds that Plaintiffs have failed to satisfy the first requirement for an FTAIA exception (*i.e.*, demonstrating a direct, substantial and reasonably foreseeable effect on export trade **[*23]** or commerce with foreign nations), the Court need not address the second requirement of the FTAIA contained in *section 6a(2)*. Suffice it to mention, however, that under *section 6a(2)*, Plaintiffs would also have to prove that the effect on domestic commerce gives rise to an antitrust claim. *15 U.S.C. § 6a(2)*. Notably, courts addressing this second element have set forth a stringent test. See *Empagran I, 124 S. Ct. at 2372* (interpreting *section 6a(2)* as referring specifically to plaintiff's claim or the claim at issue and not someone else's claim); *Dynamic Random Access Memory (DRAM) Antitrust Lit., 546 F.3d 981, 988 (9th Cir. 2008)* (holding that the "give rise" language of *section 6a(2)* requires direct or proximate causal relationship); *Den Norske, 241 F.3d 427* (recognizing that notwithstanding a connection between high domestic prices and high prices overseas, the FTAIA requires more than a "close relationship" between domestic injury and the plaintiff's claim; it demands that the domestic effect "give rise" to the claim); Empagran, S.A. v. F. Hoffman-Laroche, 417 F.32d 1267 (D.C. Cir. 2005) (on remand from Supreme Court, finding antitrust claims of foreign purchasers did not "give rise" to injury under FTAIA).

In sum, the Court finds Expro's claims are barred by the FTAIA and, consequently, this Court does not have subject matter jurisdiction over those claims. It follows that, having found no subject matter jurisdiction over Expro's claims, the Court also **[*24]** finds that Expro is unable to satisfy the requisite antitrust standing. See, e.g., *Den Norske, 421 F.3d at 431 n.32*. With Expro's claims barred, Bayside is the remaining plaintiff. The discussion as to Bayside follows.

2. Bayside's Claims and Standing

The Manuli Defendants challenge Bayside's claims for lack of standing. In order to determine whether a plaintiff has standing to bring an antitrust action, a court must examine the allegations in the complaint. *Todorov v. DCH Healthcare Auth., 921 F.2d 1438, 1448 (11th Cir. 1991)* (citing *Austin v. Blue Cross & Blue Shield, 903 F.2d 1385, 1387 (11th Cir. 1990)*). Standing in an antitrust case involves more than the "case or controversy" requirement that drives constitutional standing. Id. Rather, antitrust standing is best understood in a general sense as a search for the proper plaintiff to enforce the antitrust laws. Id. (internal citations omitted) .

The Eleventh Circuit has developed a two-prong test for examining whether a plaintiff is the proper party for antitrust standing. *Todorov, 921 F.2d at 1449*. Specifically, a court should first determine whether the plaintiff suffered "antitrust injury" and, second, assess whether the plaintiff is an efficient enforcer of the antitrust laws, which requires some analysis of the directness or remoteness of the plaintiff's injury. *Id*. The party invoking federal jurisdiction bears the burden **[*25]** of proving standing. Each element must be supported in the same as any other matter, *i.e.*, with the same manner and degree of evidence required at the successive stages of the litigation. When standing becomes an issue on a motion to dismiss, general factual allegations of injury resulting from defendant's conduct may be sufficient to show standing. *Bischoff v. Osceola Cty., 222 F.3d. 874, 878 (11th Cir. 2000)* (internal citations omitted).

In this case, the Manuli Defendants contend that Bayside has provided no documentary evidence to prove that it purchased Marine Hose as alleged in the First Amended Complaint. [See D. E. 242 at 17-19.] The Manuli Defendants further contend that the affidavits submitted by Bayside's executive and Bayside's responses to discovery stating that "[Bayside] made multiple purchases during the Class Period of Marine Hose" [see D.E. 242-15] are insufficient to meet Plaintiffs' burden. Id. In opposition, Bayside maintains that the sworn statements and pleadings demonstrate it is a direct purchaser of Marine Hose in the United States. Bayside specifically points to two sworn statements of Steve R. Gatlin, Bayside's Vice President, wherein Mr. Gatlin expressly states that "Bayside purchased marine hose up to 10 inches **[*26]** and greater in diameter from one or more of the named

Defendants" and further states that "[e] very one of these purchases of marine hose was invoiced and paid for in the United States."[15] [See D.E. 257, Exhs. B and C.]

While the Manuli Defendants attempt to undermine the evidence submitted concerning the alleged purchases by Bayside of Marine Hose, the Court finds that Bayside has met its burden on standing. First, the Court considers the First Amended Complaint, which expressly alleges that Plaintiffs are "all persons . . . who purchased Marine Hose in the United States from Defendants." [See D.E. 180 ¶ 47.] Taking the allegations of the First Amended Complaint as true, Bayside has alleged antitrust standing. The Court also considers persuasive the sworn statements as Mr. Gatlin who unequivocally states that, despite the inability to locate invoices for the purchases, Bayside purchased Marine Hose during the relevant period.[16] [See D.E. 257 at Exhs. Band C.] There is no basis for this Court to disbelieve such evidence. Lastly, and more importantly, as an allegedly direct purchaser of Marine Hose, the Court finds that Bayside's antitrust injury cannot be more direct. Consequently, at **[*27]** this juncture of the litigation, the Court must deny the motion to dismiss challenging Bayside's standing in this antitrust litigation.[17]

In sum, the Court finds that Bayside has met its burden to establish antitrust standing. Therefore, the motion to dismiss for lack of subject matter jurisdiction as to Bayside is denied and this litigation may proceed on Bayside's claims.[18]

B. Defendant Scaglia's Motion to Dismiss [D.E. 98, 184]

Defendant Francesco Scaglia, an Italian citizen, seeks dismissal of the First Amended Complaint on several grounds, including, inter alia, lack of personal jurisdiction, insufficient service of process, failure to state a claim and lack of subject matter jurisdiction. [See D.E. 98 at 1 and 184 at 2.] Plaintiffs filed opposition [D.E. 114] and Defendant Scaglia filed a reply [D.E. 12l].[19]

Of primary concern is Defendant Scaglia's request that this Court quash service of the summons and complaint pursuant to *Rule 12(b)(4)* and *(5)*. Defendant Scaglia maintains that, when served with the First Amended Complaint, he was exempt from the service of civil process because he was attending court in this District in connection with the antitrust criminal charges against him.[20] [See D.E. 98 at **[*28]** 12.] As an initial matter, the Court notes that because Scaglia was personally served in Florida with the summons and complaint, Florida statute *section 48.031* creates personal jurisdiction. See *Fla. Stat. § 48.031(1) (a)* ("Service of original process is made by delivering a copy of [the complaint, petition, or other initial pleading] to the person to be served."); see also *Campo*

---

[15] Mr. Gatlin also states that although he has attempted to locate invoices for the purchases, he has been unable to do so and that in the normal course of business, invoices from the mid-to-late 1980's were not retained by Bayside. [See D.E. 257 at Exh. B.]

[16] While a trier of fact may later conclude otherwise with respect to Mr. Gatlin's statements, at this stage of the litigation, this Court has no reason to doubt Mr. Gatlin's submissions and declines to do so solely because Bayside has been unable to locate invoices for transactions going back more than twenty years.

[17] The Manuli Defendants alternatively move for summary judgment on Bayside's claims. [See D.E. 242 at 17 n.6.] Because the Court finds that Bayside has satisfied standing for purposes of the motion to dismiss, the Court declines to reach the summary judgment arguments.

[18] Bayside is the sole remaining Plaintiff. Notably, however, Plaintiffs have separately filed a motion for class certification under *Federal Rule of Civil Procedure 23* that may impact the ultimate number of plaintiffs in this action. The Court will separately dispose of that motion in due course.

[19] Defendant Scaglia also joined in the Manuli Defendants' motion to dismiss for lack of subject matter jurisdiction [D.E. 243], which was disposed of in Section A of this Order.

[20] According to Defendant Scaglia, although initially arrested in Houston, Texas, he was ordered to appear in this District for proceedings in the antitrust criminal prosecution. [See D.E. 7.]

v. Tafur, 704 So.2d 730, 732 (Fla. Dist. Ct. App. 1998) (finding service was perfected when defendant personally served while visiting jurisdiction).

Nevertheless, the Court must consider Defendant Scaglia's argument on immunity from service of process because it is undisputed that he was served while in this District for the separate criminal prosecution. In this regard, Stewart v. Ramsay, 242 U.S. 128, 37 S. Ct. 44, 61 L. Ed. 192 (1916), holds that "suitors as well as witnesses, coming from another state or jurisdiction, are exempt from the service of civil process while in attendance upon court, and during a reasonable time in coming and going." Stewart, 242 U.S. at 129. Significantly, however, Plaintiffs correctly contend that Defendant Scaglia is not entitled to immunity from service of process when this case arises out of the same misconduct at issue in the criminal proceedings that brought him to this district. See, e.g., ARW Exploration Corp. v. Aguirre, 45 F.3d 1455, 1460 (10th Cir. 1995) (finding that defendant was not immune from service of process **[*29]** when the court action wherein he was served related to the same arbitration matter that he was attending); see also 4A Charles A. Wright & Arthur R. Miller, Federal Practice and Procedure § 1080 (2008) (noting that "[there is generally no immunity from service of process when the suit in which the immunity is sought is part of, or a continuation of, the suit for which the person claiming immunity is in the jurisdiction.") Ultimately, the Court must deny Defendant Scaglia's request to quash service of the civil summons and complaint.[21]

Lastly, the Court considers Defendant Scaglia's request for dismissal pursuant to the Supreme Court's precedent in Bell Atlantic Corporation v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007). In connection therewith, Defendant Scaglia emphasizes that, according to the First Amended Complaint, he attended only one May 2007 meeting during which federal agents arrested several corporate executives. [See D.E. 180 ¶ 68.] With the exception of that one specific allegation, Defendant Scaglia argues that the remaining general allegations of a conspiracy are insufficient to state a claim.

As discussed in section C below, Plaintiffs have alleged sufficient facts of an overall antitrust conspiracy, but fail to allege how Defendant Scaglia **[*30]** (and others) joined the conspiracy. While a complaint attacked by Rule 12(b)(6) does not need detailed factual allegations, see Twombly, 127 S. Ct. at 1964, general allegations as to all of the Defendants are insufficient. See, e.g., In re TFT-LCD (Flat Panel) Antitrust Litig., 586 F. Supp. 2d 1109, 2008 WL 3916309, *4 (N.D. Cal. 2008); In re Parcel Tanker Shipping Servs. Antitrust Litig., 541 F. Supp 2d 487, 491-92 (D. Conn. 2008). Here, Defendant Scaglia is alleged to have attended a May 1, 2007 meeting in Houston, Texas, for the purpose of carrying out the conspiracy [D. E. 180 ¶ 68].[22] Mere attendance at one meeting within a twenty-plus year conspiracy, without more, is insufficient. Consequently, the Court must grant Defendant Scaglia's motion to dismiss. However, the Court will grant leave to amend (within ten days) the First Amended Complaint to allow Plaintiffs an opportunity to specifically allege the violative conduct undertaken by Defendant Scaglia.

Lastly, Defendant Scaglia joined in the motion to dismiss based on subject matter jurisdiction. [See D.E. 98 at 19-20 and D.E. 243] As set forth in section A above, the claims against all Defendants (including Scaglia) are dismissed to the extent that the FTAIA bars Expro's antitrust claims. In sum, Defendant Scaglia's motion to dismiss is granted as set forth herein.

C. Defendant Val M. Northcutt's Motion to Dismiss [D.E. 95, 193]

---

[21] Having found Defendant Scaglia was properly served via personal service under Florida statute section 48.031, the Court concludes that it has obtained personal jurisdiction over him. Campo, 704 So.2d at 732. Consequently, the Court need reach the alternative arguments concerning jurisdiction pursuant to Florida's long arm statute, section 48.193. [See D.E. 98 at 10-12 and D.E. 114 at 7-12.]

[22] Plaintiffs also allege that Defendant Scaglia was criminally charged with conspiring to suppress and eliminate competition for Marine Hose in the United States. [See D.E. 77]. The Court finds that a general allegation of a criminal indictment without underlying details as to the specific acts purported taken by the Defendant is of no consequence to the sufficiency of the complaint.

Defendant Val M. Northcutt seeks **[*31]** dismissal of the First Amended Complaint arguing, inter alia, that Plaintiffs have failed to sufficiently allege an antitrust violation against him individually.[23] [See D. E. 9, 193.] Plaintiffs filed opposition [D.E. 110, 228] Defendant Northcutt filed a reply [D.E. 119] and a notice of supplemental authority [D.E. 267][24]

Defendant Northcutt's motion to dismiss under *Rule 12(b)(6)* is largely premised on *Bell Atlantic Corporation v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*, the Supreme Court decision discussing the pleading standard in motions to dismiss generally and, more specifically, in price-fixing conspiracy class actions. *Twombly, 127 C. St. 1955*. *Twombly* provides, in relevant part, that "while a complaint attacked by a *Rule 12 (b) (6)* motion to dismiss does not need detailed factual allegations, a plaintiff's obligation to provide the grounds of his entitlement to relief requires more than mere labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." 127 S. Ct. 1964-65 (internal quotations and citations omitted). Factual allegations must be enough to raise a right to relief above the speculative level on the assumption that all of the allegations in the complaint are true (even if doubtful in fact). Id. Moreover, Sherman antitrust claims require a complaint with enough factual **[*32]** matter (taken as true) to suggest that an agreement was made. *Id. at 1966*. Indeed, "[t]he need at the pleading stage for allegations plausibly suggesting (not merely consistent with) agreements reflects the threshold requirement of *Rule 8(a) (2)* that the plain statement possess enough heft to show that the pleader is entitled to relief." *Id. at 1966*.

In this case, Defendant Northcutt stresses that, although Plaintiffs have filed an 80-paragraph amended complaint, he is only mentioned three times throughout the pleadings.[25] In opposition, Plaintiffs maintain that, given the totality of allegations in the First Amended Complaint, the Court can infer that Defendant Northcutt participated in the conspiracy and Plaintiffs need not present particularized allegations. [See D.E. 110 at 8-9.]

After a careful review of the First Amended Complaint, the Court finds that Plaintiffs have sufficiently plead the alleged antitrust conspiracy so as to satisfy the "plausible inference of an agreement" for purposes of *Twombly*.[26] 127 S. Ct. at 1965-66; see, e.g., *In re OSB Antitrust Lit., 2007 U.S. Dist. LEXIS 56573, *9 (E.D. Pa. 2007)* (denying motion to dismiss where plaintiffs allegations plausibly raised the suggestion of an agreement, in violation of the antitrust laws). Nevertheless, while a complaint need not be detailed defendant by defendant, **[*33]** see, e.g., *In re TFT-LCD (Flat Panel) Antitrust Litig., 586 F. Supp. 2d 1109, 2008 WL 3916309, *4 (N.D. Cal. 2008)*, Plaintiffs have failed to allege that each individual Defendant joined the conspiracy and played some role. Id. Given the allegations of an international conspiracy, spanning more than twenty years, including more than ten corporations and numerous executives, the Court is concerned that general allegations as to all defendants are insufficient to provide notice of the claims.

Plaintiffs may have realized the deficiencies when, as an argument of last resort against dismissal as to Defendant Northcutt, they requested leave to amend the complaint to cure any deficiencies. [See D.E. 110 at 15 n.16.]

[23] Defendant Northcutt also joined in the Manuli Defendants' motion to dismiss for lack of subject matter jurisdiction [D.E. 297], which was disposed of in Section A of this Order. The record also indicates that Defendant Northcutt incorporated by reference the arguments of other Defendants seeking dismissal on various grounds. [See D.E. 106-109, 297.] To the extent not addressed in this section, the relevant issues are disposed of as discussed in connection with other Defendants in this action.

[24] According to the notice of supplemental authority [D.E. 267], Defendant Northcutt was found not guilty in the antitrust criminal proceedings, Case No. 07-60220-CR-HURLEY (S.D.Fla. Nov. 10, 2008).

[25] Defendant Northcutt is alleged to be an "executive at Defendant Manuli Rubber Industries," [D.E. 180 ¶ 38] who was indicted by the government and charged with conspiring to suppress and eliminate competition for Marine Hose in the United States [D.E. 180 ¶ 77].

[26] Plaintiffs specifically allege, inter alia, that the Defendants did the following: (i) in 1999, authorized and directed PW Consulting and Whittle to coordinate the Defendants' conspiratorial activities, paying them approximately $300,000 [D.E. 180 ¶ 58]; (ii) devised code names to conceal their involvement in the conspiracy . . .referring to the cartel as "the club or the "Technical Committee-Marine Hose" and (iii) held meetings in June 2000 (Key Largo), December 2000 (Bangkok), July 2002 (London) and May 2007 (Houston, Tx).

Pursuant to *Federal Rule of Civil Procedure 15(a)*, the Court may give leave to amend when justice so requires. *Fed. R. Civ. P. 15(a)*. Given the Court's concerns and lack of individualized allegations, the Court will grant Plaintiffs leave to amend (within ten days) the First Amended Complaint to more specifically plead how Defendant Northcutt (and others) joined the alleged price-fixing conspiracy. See e.g., *Flat Panel Antitrust Litig., 586 F. Supp. 2d 1109, 2008 WL 3916309, at *4* (finding that although purchasers satisfied pleading requirements for conspiracy claims under the *Sherman Act*, the court would grant leave to amend the complaint to more specifically plead as to the individual defendant).[27] In sum, **[*34]** Defendant Northcutt's motion to dismiss is granted, but Plaintiff is allowed leave to amend (within ten days) the First Amended Complaint to cure any deficiencies.

E. Defendant Robert Lewis Furness's Motion to Dismiss [D.E. 219]

Similar to the arguments made by Defendant Northcutt and others, Defendant Robert Lewis Furness seeks dismissal of the First Amended Complaint arguing, inter alia, that Plaintiffs have failed to sufficiently allege an antitrust violation by him individually.[28] [See D.E. 219.] Plaintiffs filed opposition [D.E. 251]. Similar to the other individual Defendants, the Court believes that Defendant Furness is entitled to relief.

As noted above, the Court finds that the First Amended Complaint meets the *Twombly* pleading requirements in so far as the allegations lead to the plausible inference of the existence of antitrust conspiracy. *Twombly, 127 S. Ct. at 1965-66*. Additionally, with respect to Defendant Furness, Plaintiffs have also alleged that Defendant Furness plead guilty to criminal charges for his role in the conspiracy. [See D. E. 180 ¶ 83.][29] Specifically, the First Amended Complaint alleges that "[o]n July 28, 2008 . . . Defendants Manuli Rubber Industries SpA and its former **[*35]** President, Furness had agreed to plead guilty to the criminal charges" . . . and Furness agreed to serve 14 months in prison and pay a $75,000 criminal fine. [See D.E. 180 ¶ 83.] Some courts have found that guilty pleas by defendants support an inference of participation in the conspiracy. See, e.g., *In re Static Random Access Memory (SRAM) Antitrust Litig., 580 F. Supp. 2d 896, 903 (N.D. Cal. 2008)* (denying a motion to dismiss claims of an antitrust conspiracy where certain defendants plead guilty to criminal conduct). Here, however, the Court finds that the general allegation that Defendant Furness has agreed to plead guilty and serve jail time does not allege the particular conduct that he was admitting. In other words, the allegation stops short of providing the underlying details of Defendant Furness's conduct. Based on the foregoing, the Court grants Defendant Furness's motion to dismiss and allows Plaintiff leave to amend the complaint to cure the deficiencies noted herein.

F. Defendant Gillespie's Motion to Dismiss [D.E. 262]

Defendant Charles J. Gillespie seeks to dismiss the First Amended Complaint under *Rule 12(b)(1)* for lack of subject matter jurisdiction and pursuant to *Rule 12(b)(6)* for failure to state a claim upon which relief may be granted. [See D.E. 262.] Plaintiff filed opposition [D.E. **[*36]** 277] and Defendant Gillespie filed a reply [D.E. 295].[30]

---

[27] In opposing the Comital Defendants motion to dismiss, discussed *infra* in section G, Plaintiffs attempt to distinguish the ruling in *In re TFT-LCD (Flat Panel) Antitrust Litig., 586 F. Supp. 2d 1109, 2008 WL 3916309, *4 (N.D. Cal. 2008)* as against the weight of authority [see D.E. 322 at 7-8]. Because the standard for antitrust pleadings at the motion to dismiss stage is still developing, the Court does not find the In re TFT-LCD decision entirely off the mark and, on the facts of this case, finds it persuasive.

[28] Defendant Furness also joined in the Manuli Defendants' motion to dismiss for lack of subject matter jurisdiction [D.E. 298], which was disposed of in Section A of this Order. Defendant Furness also incorporates by reference the arguments raised by other defendants. [See D.E. 219 at 3 and D.E. 298.] To the extent not addressed in this section, the relevant issues are disposed of as discussed in connection with the motions of other Defendants.

[29] Although the First Amended Complaint is misnumbered, paragraph 83 refers to that appearing on page 17 of docket entry 180.

[30] Defendant Gillespie also joined in the Manuli Defendants' motion to dismiss for lack of subject matter jurisdiction [D.E. 262 at 2], which was disposed of in Section A of this Order.

To the extent Defendant Gillespie challenges the First Amended Complaint on the basis of the FTAIA, his motion is granted as discussed in section A, *supra*. To the extent that Defendant Gillespie seeks dismissal of the antitrust claims based on *Twombly* and the requisite pleading standards, the Court finds that he is also entitled to relief.

As discussed above, the First Amended Complaint has sufficiently plead a plausible antitrust conspiracy overall. With regard to specific allegations as to Defendant Gillespie, however, he is alleged to have plead guilty to criminal charges. [See D.E. 180 ¶ 82.] Without more, a guilty plea is insufficient since Plaintiffs have failed to allege what specific conduct Defendant Gillespie has purportedly admitted in his plea, which would subject him to civil liability in this case. In sum, the Court must grant Defendant Gillespie's motion to dismiss, but allows Plaintiffs leave to amend the complaint in order to cure the deficiencies discussed herein.

G. Defendants I.T.R., SAIGA S.p.A. and Comital Saiga S.p.A.'s Motion to Dismiss [D.E. 301]

Defendants ITR, S.p.A., SAIGA, S.p.A. and Comital SAIGA, S.p.A. (collectively, **[*37]** the "Comital Defendants") filed a motion to dismiss the First Amended Complaint contending, inter alia, that (i) Plaintiffs fail to allege a connection between the Comital Defendants and the alleged conspiracy and (ii) the First Amended Complaint fails to satisfy the pleading standard set forth in *Twombly*. [See D.E. 301]. Plaintiffs filed opposition [D.E. 322] and the Comital Defendants filed a reply [D.E. 334].

Similar to other Defendants, the Comital Defendants argue that, despite numerous al legations against "Entity Defendants" concerning a conspiracy spanning over two decades, Plaintiffs in this case have failed to sufficiently allege an antitrust conspiracy specifically as against the Comital Defendants. The Comital Defendants note that, other than being listed as one of the "Entity Defendants," the First Amended Complaint contains no other mention of the Comital Defendants or their employees. [See D.E. 301 at 3.]

After a careful review of the First Amended Complaint, the Court finds that it is insufficient as to the individual actions of the Comital Defendants. While Plaintiffs correctly contend that the complaint need not contain defendant by defendant allegations, at a minimum, Plaintiffs **[*38]** must allege that each individual defendant joined the conspiracy and played some role in it. See, e.g., USB Antitrust Litig., 2007 U.S. Dist. LEXIS 565573, *13 (E.D. Pa. 2007). Plaintiffs here have made not such allegations against the Comital Defendants. Furthermore, unlike instances concerning other Defendants where Plaintiffs have identified employees and attendance at specific meetings and their conduct, there are no such allegations as to the Comital Defendants. Consequently, the Court must grant the Comital Defendants' motion to dismiss to the extent Plaintiffs have failed to allege any particular conduct as to the Comital Defendants. Based thereon, the Court will allow Plaintiffs leave to amend (within ten days) the First Amended Complaint to cure any deficiencies.

H. Settling Defendants' Motions to Dismiss

In addition to the motions discussed above, there are pending motions to dismiss of Defendants who have entered into proposed settlements with Plaintiffs (collectively, the "Settling Defendants").[31] Because Plaintiffs have filed an Amended Motion for Preliminary Approval of Proposed Settlements with the Settling Defendants [D.E. 301], at this time, the Court will refrain from determining on the merits the motions to dismiss of the Settling Defendants. **[*39]** Instead, the Court denies without prejudice the Settling Defendants' respective motions to dismiss. In the event that the proposed settlement is not approved, the Settling Defendants may renew their motions to dismiss and the Court will reconsider the matter as necessary and appropriate.

[31] The Settling Defendants include the following: (i) Dunlop Oil & Marine, Ltd., Bryan Allison and David Brammar; (ii) Trelleborg Industries S.A. and Jacques Cognard; (iii) The Yokohama Rubber Co, Ltd.; (iv) Parker ITR S.R.L., Parker Hannifin and Giovanni Scodeggio; and (v) Bridgestone Corporation, Bridgestone Industrial Products America and Misao Hioki. [See D.E. 319.]

III. CONCLUSION

Based on the foregoing, it is hereby

ORDERED AND ADJUDGED that Defendant Manuli's Motion to Dismiss for Lack of Subject Matter Jurisdiction [D.E. 242] is **GRANTED IN PART AND DENIED IN PART** as set forth herein. The claims of Expro are barred by the FTAIA. Consequently, this Court lacks subject matter jurisdiction over Expro's claims and they are hereby dismissed. To the extent that other Defendants have joined in this motion [D.E. 243, 297, 298], the joining Defendants are afforded the same relief. It is further

ORDERED AND ADJUDGED that Defendant Francesco Scaglia's Motion to Dismiss [D.E. 98, 184] is **GRANTED** as set forth herein. It is further

ORDERED AND ADJUDGED that Defendant Val M. Northcutt's Motion to Dismiss [D.E. 95, 193] is **GRANTED** as set forth herein. It is further

ORDERED AND ADJUDGED that Defendant Robert Furness's Motion to Dismiss Consolidated Complaint [D.E. 219] is **GRANTED [*40]** as set forth herein. It is further

ORDERED AND ADJUDGED that Defendant Charles J. Gillespie's Motion to Dismiss [D.E. 262] is **GRANTED** as set forth herein. It is further

ORDERED AND ADJUDGED that Defendants I.T.R., SAIGA S.p.A. and Comital Saiga S.p.A.'s Motion to Dismiss [D.E. 301] is **GRANTED** as further set forth herein. It is further

ORDERED AND ADJUDGED that within ten (10) days from the date of the entry of this Order, Plaintiffs shall file an amended consolidated complaint in accordance with this Order. It is further

ORDERED AND ADJUDGED that the following motions are **DENIED WITHOUT PREJUDICE:** (i) Bridgestone Corporation's Motion to Dismiss [D.E. 191] and (ii) Trelleborg Industries S.A. and Jacques Cognard Motion to Dismiss [D.E. 207].

DONE AND ORDERED in Chambers at Miami, Florida, this 28th day of January, 2009.

/s/ Donald L. Graham

DONALD L. GRAHAM

UNITED STATES DISTRICT JUDGE

[Delta Turner, Ltd. v. Grand Rapids - Kent County Convention/Arena Auth.]

United States District Court for the Western District of Michigan, Southern Division

January 30, 2009, Decided; January 30, 2009, Filed

Case No. 1:08-cv-544

Antitrust & Trade Law > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Antitrust & Trade Law**

As a procedural device, *Fed. R. Civ. P. 12(b)(6)* establishes the trial court as the sentinel standing guard at the border between viable and deficient causes of action. This is a particularly important charge in antitrust litigation given the often obscure or weak antitrust premise and sometimes immense expense of mounting even a preliminary defense of the merits.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN2[] **Motions to Dismiss, Failure to State Claim**

In deciding a motion to dismiss for failure to state a claim under *Fed. R. Civ. P. 12(b)(6)*, a court must treat all well-pleaded allegations in the complaint as true and draw all reasonable inferences from those allegations in favor of the nonmoving party. A claim survives this motion where its factual allegations are enough to raise a right to relief above the speculative level on the assumption that all of the complaint's allegations are true. Stated differently, the complaint must present enough facts to state a claim to relief that is plausible on its face.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN3[] **Motions to Dismiss, Failure to State Claim**

A motion to dismiss for failure to state a claim is a test of the plaintiff's cause of action as stated in the complaint, not a challenge to the plaintiff's factual allegations. The factual allegations in a complaint need not be detailed, but they must go beyond mere speculation of a legally cognizable cause of action. The complaint should give the defendant fair notice of what the plaintiff's claim is and the grounds upon which it rests. Accordingly, the complaint must contain either direct or inferential allegations respecting all the material elements to sustain recovery under a viable legal theory.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

HN4[] **Exemptions & Immunities, Parker State Action Doctrine**

Under the state action doctrine, antitrust laws generally do not apply to a state operating in its sovereign capacity, or to private conduct approved and supervised by the state as a matter of state policy. The test for determining whether the state action doctrine applies depends on the nature of the defendant (state legislature, state agency, local government body, private party) and the challenged conduct (legislative directive, agency ruling, private activity). At one extreme, if the challenged action is by the state legislature or state supreme court, then the exemption is classified as "complete," with no further inquiry. However, at the other end of the spectrum, when the defendant is a private party, a more stringent standard applies.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN5[] **Parker State Action Doctrine, Local Governments & Private Parties**

In the context of federal antitrust claims and the state action doctrine, a private party defendant must demonstrate that the particular conduct challenged as anticompetitive was both authorized by the state as a matter of clearly articulated and affirmatively expressed state policy, and was subjected to active state supervision to protect against possible abuse. If the defendant is a municipality or other local government entity, an intermediate standard applies. Active supervision by a higher state body is not required since once it is clear that state authorization exists, there is no need to require the State to supervise actively the municipality's execution of what is a properly delegated function. It is sufficient if the municipality is acting pursuant to a clearly articulated state policy reflected in actual legislation or high state court decisions, where the challenged conduct is a foreseeable consequence of what the state law authorizes.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN6[] Exemptions & Immunities, Parker State Action Doctrine

Regarding whether state action immunity applies to a municipality--the municipality must demonstrate that its anticompetitive activities were authorized by the State pursuant to state policy to displace competition with regulation or monopoly public service. A municipality need not point to a specific, detailed legislative authorization to assert state action immunity.

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN7[] Scope, Exemptions

In light of the national commitment to federalism, the general language of the Sherman Act should not be interpreted to prohibit anticompetitive actions by the States in their governmental capacities as sovereign regulators. This immunity does not necessarily obtain where the State acts not in a regulatory capacity but as a commercial participant in a given market.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

HN8[] Parker State Action Doctrine, Local Governments & Private Parties

In the context of federal antitrust claims and the state action doctrine, the general test (Midcal test), for whether state action immunity applies to a private party is two prong: (1) the party must show that it is acting pursuant to clearly articulated state policy reflected in actual legislation or high state court decisions, where the challenged conduct is a foreseeable consequence of what the state law authorizes, and (2) the party must show active state supervision. The U.S. Supreme Court has further explained the applicability of the state action doctrine to private parties. A state policy that expressly permits, but does not compel, anticompetitive conduct may be clearly articulated within the meaning of Midcal. Nonetheless, a state may not merely give immunity to those who violate the Sherman Act by authorizing them to violate it. The second prong of the Midcal test prevents States from casting a gauzy cloak of state involvement over what is essentially a private price-fixing arrangement. This active supervision requirement ensures that a State's actions will immunize the anticompetitive conduct of private parties only when the state has demonstrated its commitment to a program through its exercise of regulatory oversight. Under subsequent decisions, the active supervision requirement can only be met by state supervision; municipal oversight is insufficient.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

HN9[] Parker State Action Doctrine, Local Governments & Private Parties

Antitrust immunity does not apply to a private actor to whom authority is delegated such that the private actor becomes the effective decision maker. Private defendants who are regulated by a municipality are entitled to protection under the state action exemption as long as the municipality is the effective decision maker.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN10[] **Parker State Action Doctrine, Local Governments & Private Parties**

The Riverview line of cases informs that the basic question in antitrust cases that involve municipal and private actors is whether the municipality or the regulated party made the effective decision that resulted in the challenged anticompetitive conduct. If the municipality or a municipal agent was the effective decision maker, then the private actor is entitled to state action immunity, regardless of state supervision. If the private actor was the effective decision maker, due to corruption of the decision-making process or delegation of decision-making authority, then it is not immune, unless it can show that it was actively supervised by the state. When a private actor (such as a non-profit corporation) acts on behalf of the local government but makes independent decisions without the input, advice, involvement, or oversight of any governmental body, the antitrust immunity accorded to the governmental entity does not apply.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

HN11[] **Parker State Action Doctrine, Local Governments & Private Parties**

Under the second prong of the Midcal test, the state must exercise ultimate control over the challenged private anticompetitive conduct; the private entity must demonstrate both that the state has the power to exercise control over the private anticompetitive conduct and that the state in fact exercised its control. Another consideration may be whether the anticompetitive conduct at issue is regulatory-related or part of the commercial market.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN12[] **Exemptions & Immunities, Parker State Action Doctrine**

While it is true that for state action immunity the conduct need not be expressly authorized by the state/legislation, the suppression of competition must be the foreseeable or logical result of what the state authorizes.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Governments > Local Governments > Claims By & Against

Antitrust & Trade Law > Sherman Act > Remedies > Injunctions

HN13[] **Remedies, Damages**

Under the Local Government Antitrust Act of 1984, a governmental entity may be entitled to immunity with respect to liability for damages, attorneys' fees and costs, but not injunctive relief when the claim is based on any official action directed by a local government, or official or employee thereof acting in an official capacity. *15 U.S.C.S. § 36(a)*. The Act leaves intact the availability of injunctive relief (including attorney's fees) in suits against municipalities, and does not affect a plaintiff's ability to sue private party defendants for damages as well as equitable relief.

Antitrust & Trade Law > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN14[] **Antitrust & Trade Law**

In Twombly, the U.S. Supreme Court has tightened pleading requirements to discourage federal antitrust cases of questionable merit: a plaintiff must allege enough facts to nudge the claims across the line from conceivable to plausible. Factual allegations must be enough to raise a right to relief above the speculative level. However, a well-pleaded complaint may proceed even if it strikes a savvy judge that actual proof of those facts is improbable, and that a recovery is very remote and unlikely.

Antitrust & Trade Law > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN15[] **Antitrust & Trade Law**

As Twombly makes clear, the pleading standard required for antitrust actions does not rest on the heightened pleading requirements under *Fed. R. Civ. P. 9*. Instead, it remains premised on the more liberal *Fed. R. Civ. P. 8(a)(2)*, which requires only a short and plain statement of the claim showing that the pleader is entitled to relief, in order to give the defendant fair notice of what the claim is and the grounds upon which it rests. The complaint allegations must simply render the plaintiff's entitlement to relief plausible.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN16[] **Sherman Act, Scope**

The Sherman Antitrust Act declares illegal every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations. *15 U.S.C.S. § 1*. The Act also makes it a felony to monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations. *15 U.S.C.S. § 2*.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN17[] **Sherman Act, Claims**

To establish a *15 U.S.C.S. § 1* claim, a plaintiff must allege that defendants entered into an agreement, and (1) defendants' conduct occurred in a relevant market, (2) that defendants possessed market power in the relevant market, and (3) that there were anticompetitve effects. To establish a *15 U.S.C.S. § 2* monopolization claim, a plaintiff must allege (1) the possession of monopoly power in the relevant market; and (2) the willful acquisition, maintenance, or use of that power either by anticompetitive or exclusionary means.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN18[] **Antitrust & Trade Law, Sherman Act**

In the context of the Sherman Act, definition of the relevant market involves consideration of the product substitutability.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN19[] **Antitrust & Trade Law, Sherman Act**

A claim under *15 U.S.C.S. § 1* is subject to the "rule of reason." The rule of reason is a flexible standard that requires a general inquiry into whether, under all the circumstances, the challenged practice imposes an unreasonable restraint on trade: Relevant circumstances can include such diverse factors as the defendants' intent and purpose in adopting the restriction; the structure of and competitive conditions within the affected market; the relative competitive positions and market power of the defendants; the presence of economic barriers inhibiting the ability of competitors to respond and offset the challenged practice; and apparent justifications for the restriction such as enhanced efficiencies, protection of product or service goodwill, and inducing dealer loyalty. No single such factor is decisive. Rather, the factfinder weighs all of the circumstances in deciding whether the challenged practice is, on balance, competitively unreasonable, with courts commonly phrasing the inquiry in terms of shifting burdens of proof.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN20[] **Antitrust & Trade Law, Sherman Act**

In the context of *15 U.S.C.S. § 1* and the "rule of reason", while a necessary first step for the rule of reason inquiry is generally the identification of the relevant market, this threshold requirement is not always essential. Rather, direct evidence of anticompetitive effects, such as reduced output or supracompetitive prices, can obviate the need for a more rigorous market analysis, provided that the rough contours of the market are sufficiently known and obvious for the trier to assess the plausibility of the claimed anticompetitive effects without going through a full-blown market inquiry.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN21[] **Sherman Act, Claims**

15 U.S.C.S. § 2 monopolization claims generally require proof of the relevant market as a first element. The inquiry has two dimensions: (1) identification of the cluster of products or services with which the defendant's product or service effectively competes, the "relevant product market," and (2) identification of the geographic area within which the defendant practicably competes in marketing its product or service, the "relevant geographic market." Further, the relevant product market traditionally emphasizes two factors, the extent of substitutability and the degree of cross-elasticity of demand. However, as with *15 U.S.C.S. § 1*, the relevant market inquiry ultimately requires consideration of various factors depending on the nature of the antitrust claim and the case-specific context.

Antitrust & Trade Law > Sherman Act > Claims

HN22[] **Sherman Act, Claims**

The case-specific context is critical to any reasoned analysis of an antitrust claim.

Civil Rights Law > ... > Section 1983 Actions > Elements > Causal Relationship

Civil Rights Law > ... > Elements > Color of State Law > General Overview

HN23[] **Elements, Causal Relationship**

A prima facie case under *42 U.S.C.S. § 1983* has two elements: (1) the defendant must be acting under the color of state law, and (2) the offending conduct must deprive the plaintiff of rights secured by federal law.

Opinion by: JANET T. NEFF

Opinion

[*925] This case presents an unusual application of federal antitrust principles to the entertainment industry. At issue is whether a "Preferred Promoter Agreement" (PPA) negotiated on behalf of defendants Grand Rapids - Kent County Convention/Arena Authority (CAA) and its manager, SMG, that includes a reciprocal agreement with the promoter Live Nation for sharing arena and promoter revenue from competitor **[**2]** events, violates antitrust laws. Pending before the Court are CAA's and SMG's separate Motions to Dismiss. For the reasons that follow, the Court grants in part, and denies in part, defendants' motions.

I. Summary of Analysis

Defendants have filed Motions to Dismiss pursuant to *FED. R. CIV. P. 12(b)(6)*. ***HN1***[] As a procedural device, *Rule 12(b)(6)* establishes the trial court as the sentinel standing guard at the border between viable and deficient causes of action. As emphasized in *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929*; *550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*, this is a particularly important charge in antitrust litigation given the often obscure or weak antitrust premise and sometimes immense expense of mounting even a preliminary defense of the merits.

[*926] The essential role of the Court in this case falls squarely within the fundamental *Rule 12(b)(6)* charge: the foremost question to be decided is whether plaintiff's allegations of antitrust violations meet the threshold for causes of action under *§ 1* or *§ 2* of the Sherman Act such that this case may proceed to the discovery stage. Defendants contend that plaintiff's claims must be dismissed since they fail outright in numerous respects. While plaintiff's **[**3]** antitrust case is by no means clear-cut, the Court is convinced after careful consideration of the pleadings, arguments and legal principles, that plaintiff's antitrust claims are not properly dismissed at this juncture. The Court recognizes that plaintiff faces the burden of proving the anticompetitve effects of the PPA to secure relief on its claims of antitrust violations. Nonetheless, the Court is convinced that plaintiff's burden can legitimately fail or succeed only with further development of the factual record and the proper application of the correct legal principles. This is particularly so given the lack of any factual record as to the genesis, purpose, and effect of the PPA.

In short, the Court finds, based on the parties' arguments, that plaintiff's antitrust claims are not merely speculative, but instead plausible, and thus, not subject to dismissal pursuant to *Rule 12(b)(6)*. To the contrary, the Court concludes that plaintiff's claim under *42 U.S.C. § 1983* does not "possess enough heft" to survive dismissal. *Twombly, 127 S. Ct. at 1966*. The Court also declines to exercise its discretion to grant plaintiff's request for a declaratory judgment declaring that the PPA is *ultra **[**4]** vires,* illegal, and unenforceable under state law. Plaintiff has failed to show that such relief is warranted. Finally, given that the parties have only briefly addressed the remaining state law claims, dismissal at this stage of the proceedings is unjustified.

II. Background and Facts

This case involves a dispute over contracts for event bookings at the DeltaPlex and Van Andel Arena in Grand Rapids, Michigan. Plaintiff Delta Turner owns and operates the Delta Plex. Defendant CAA owns, and defendant SMG manages, Van Andel Arena. At issue is a PPA that SMG entered into with Cellar Door Productions of Michigan, Inc. (Live Nation), which (1) gives SMG/CAA two-thirds of the net revenue from events at Van Andel Arena that are promoted or produced by a promoter other than Live Nation, and gives Live Nation the remaining one-third; and (2) requires that Live Nation pay SMG/CAA one-third of the net revenue from Live Nation events at competitor venues in the surrounding west Michigan area (DeltaPlex, Kellogg Arena in Battle Creek, Wings Stadium in Kalamazoo, and the LC Walker Arena in Muskegon). Plaintiff alleges that this latter feature of the PPA, referred to by plaintiff as "Competitor Arena **[**5]** Revenue Siphoning," is intended to monopolize arena events and revenues and thereby inhibit interstate commerce by (1) limiting the number of concerts and directing most or all of the concerts to Van Andel Arena, and (2) raising the costs of concerts, thereby generating more revenue for defendants. Plaintiff further alleges that the net effect of this contractual arrangement is that fewer concerts come to West Michigan or they come at a higher cost to Van Andel Arena competitors and the general public because Live Nation must increase ticket prices and/or reduce the rent paid to competitors to cover the "cut" to SMG/CAA.

Plaintiff initially filed a five-count complaint alleging federal and state antitrust violations, a violation of *42 U.S.C. § 1983*, and three state law claims. The Court stayed discovery in light of defendants' pending Motions to Dismiss. On October **[*927]** 3, 2008, plaintiff filed a First Amended Complaint, alleging seven counts: **Count 1**--Violation of Federal Antitrust Act (the Sherman Antitrust Act, *15 U.S.C. §§ 1* and *2*, and the Clayton Act *15 U.S.C. §§ 4*, *15*, and *22*) [against CAA and SMG]; **Count 2**--Violation of State Antitrust Act [against CAA and SMG]; **Count 3**--Violation **[**6]** of *42 U.S.C. § 1983* [against CAA and SMG]; **Count 4**--Declaratory Judgment--PPA's Competitor Arena Revenue Siphoning is Ultra Vires [presumably against CAA and SMG]; **Count 5**--Tortious Interference with Prospective Business Advantage [against CAA and SMG]; **Count 6**--Violation of Open Meetings Act and CFAA (Michigan Convention Facility Authority Act, *MICH. COMP. LAWS § 141.1401 et seq.*) [against CAA]; and **Count 7**-

-Violation of the Freedom of Information Act and CFAA [against CAA)]. Defendants have moved to dismiss all claims.

III. Issue

Whether defendants are entitled to dismissal of the alleged federal claims on the basis (1) of immunity under the *Parker* state action doctrine, *Parker v. Brown, 317 U.S. 341, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*; (2) of immunity under the Local Government Antitrust Act of 1984 (LGAA), *15 U.S.C. § 34 to § 36*; (3) of failure to meet the pleading standard of *Twombly;* (4) of failure to plead a claim under *42 U.S.C. § 1983* and qualified immunity; and (5) that the Court should decline to exercise its discretion to provide declaratory relief?

IV. Legal Standard

HN2[] In deciding a motion to dismiss for failure to state a claim under *FED. R. CIV. P. 12(b)(6)*, the court must treat all well-pleaded allegations **[**7]** in the complaint as true and draw all reasonable inferences from those allegations in favor of the nonmoving party. *Lambert v. Hartman, 517 F.3d 433, 439 (6th Cir. 2008)*; *Moon v. Harrison Piping Supply, 465 F.3d 719, 723 (6th Cir. 2006)*. "A claim survives this motion where its '[f]actual allegations [are] enough to raise a right to relief above the speculative level on the assumption that all of the complaint's allegations are true.'" *Zaluski v. United Am. Healthcare Corp., 527 F.3d 564, 570 (6th Cir. 2008)* (quoting *Twombly, 127 S. Ct. at 1959*). Stated differently, the complaint must present "enough facts to state a claim to relief that is plausible on its face." *Twombly, 127 S. Ct. at 1974*. [1]

HN3[] "'A motion to dismiss for failure to state a claim is a test of the plaintiff's cause of action as stated in the complaint, not a challenge to the plaintiff's factual allegations.'" *Lambert, 517 F.3d at 439* (quoting *Golden v. City of Columbus, 404 F.3d 950, 958-59 (6th Cir. 2005))*. The factual allegations in a complaint need not be detailed, but they must go beyond mere speculation of a legally cognizable cause of action. *Lambert, 517 F.3d at 439*. "The complaint should give the defendant fair notice of what the plaintiff's claim is and the grounds upon which it rests." *German Free State of Bavaria v. Toyobo Co, Ltd., 480 F. Supp. 2d 958, 963 (W.D. Mich. 2007)*. Accordingly, the complaint must contain either direct or inferential allegations respecting all the material elements to sustain recovery under a viable legal theory. *Id.; see also Lillard v. Shelby* ***[*928]*** *County Bd. of Educ., 76 F.3d 716, 726 (6th Cir. 1996)*.

V. Analysis

A. Federal Antitrust Claim (Count 1)

Defendants argue that they are entitled to dismissal of plaintiff's federal antitrust claim, Count **[**9]** 1, on the grounds that (1) they have immunity from suit under either the state action doctrine or the LGAA, and (2) plaintiff has failed to plead an antitrust claim under the Sherman Act, based on the pleading standard in *Twombly.* At this juncture in this case, the Court is not persuaded that dismissal is mandated on the grounds asserted.

1. State Action Doctrine Immunity

HN4[] Under the state action doctrine, antitrust laws generally do not apply to a state operating in its sovereign capacity, or to private conduct approved and supervised by the state as a matter of state policy. WILLIAM C. HOLMES, ***ANTITRUST LAW*** HANDBOOK (Thompson-West, 2007-2008 ed.) § 8.7, pp. 789-90. The test for determining whether the state action doctrine applies depends on the nature of the defendant (state legislature, state agency, local government body, private party) and the challenged conduct (legislative directive, agency ruling,

---

[1] The *Rule 12(b)(6)* "plausibility standard" established in *Twombly* unquestionably applies to plaintiff's antitrust claims, since that was the legal context from which the standard arose. However, the courts are not universal in accepting the *Twombly* standard for cases that do not involve antitrust claims. *See Total Benefits Planning Agency, Inc. v. Anthem BCBS, No. 07-4115, December 22, 2008, 552 F.3d 430, 2008 U.S. App. LEXIS 25810, * 8-9 n.2* (also citing Note, *Much Ado About Twombly, 83 NOTRE DAME L. REV. 1811 (2008)*). **[**8]** Regardless, the Court does not find that any distinction would alter the disposition with respect to any particular claim in this case.

private activity). *Id.* at 790 (citation omitted). At one extreme, if the challenged action is by the state legislature or state supreme court, then the exemption is classified as "complete," with no further inquiry. *Id.* at 790-91. However, at the other end of the spectrum, when the defendant **[**10]** is a private party, a more stringent standard applies. *Id.* at 793. The Supreme Court explained its rationale for this differing standard:

> Where a private party is engaging in the anticompetitive activity, there is a real danger that he is acting to further his own interests, rather than the governmental interests of the State. Where the actor is a municipality, there is little or no danger that it is involved in a *private* price-fixing arrangement. The only real danger is that it will seek to further purely parochial public interests at the expense of more overriding state goals. This danger is minimal, however, because of the requirement that the municipality act pursuant to a clearly articulated state policy. Once it is clear that state authorization exists, there is no need to require the State to supervise actively the municipality's execution of what is a properly delegated function.

Town of Hallie v. City of Eau Claire, 471 U.S. 34, 47, 105 S. Ct. 1713, 85 L. Ed. 2d 24 (1985); *see also* HOLMES, *supra,* § 8:7, p. 793. ***HN5***[] A private party defendant must demonstrate that the particular conduct challenged as anticompetitive was both authorized by the state as a matter of "clearly articulated and affirmatively expressed state **[**11]** policy," and was subjected to "active state supervision" to protect against possible abuse. HOLMES, *supra,* § 8:7, p. 793.

If the defendant is a municipality or other local government entity, an intermediate standard applies. *Id.* at 793-94. Active supervision by a higher state body is not required since "[o]nce it is clear that state authorization exists, there is no need to require the State to supervise actively the municipality's execution of what is a properly delegated function." *Hallie, 471 U.S. at 47*; *see also* HOLMES, *supra,* § 8:7, p. 794. It is sufficient if the municipality is acting pursuant to a "clearly articulated state policy" reflected in actual legislation or high state court decisions, where the challenged conduct is a foreseeable consequence of what the state law authorizes. HOLMES, *supra,* § 8:7, p. 795 (citing *Hallie, 471 U.S. at 41-43*).

Ultimately, whether CAA and/or SMG is entitled to immunity under the state action doctrine depends on application of the distinct tests for municipalities as opposed to **[*929]** private actors. It also depends on consideration of additional nuances of the doctrine or exceptions, which may apply under the circumstances of this case, given the **[**12]** relationship between CAA and SMG and the role carried out with respect to the PPA.

a. CAA--Municipality Immunity

As established in *Parker, 317 U.S. 341, 63 S. Ct. 307, 87 L. Ed. 315*, the general test for whether state action immunity applies to CAA as a municipality is: [2]

> whether the municipality is acting pursuant to "clearly articulated state policy" reflected in actual legislation or high state court decisions, where the challenged conduct is a foreseeable consequence of what the state law authorizes.

HOLMES, *supra,* § 8:7, p. 795 (citing *Hallie, 471 U.S. at 41-43*). Stated differently, ***HN6***[] the municipality "must demonstrate that [its] anticompetitive activities were authorized by the State 'pursuant to state policy to displace competition with regulation or monopoly public service.'" *Hallie, 471 U.S. at 39* (quoting *Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 413, 98 S. Ct. 1123, 55 L. Ed. 2d 364 (1978)* (opinion of BRENNAN, J.)). A municipality need not point to a specific, detailed legislative authorization to assert state action immunity. *Hallie, 471 U.S. at 39*.

CAA argues that it meets the requirement for state action immunity because it is authorized **[**13]** by a clearly articulated state policy, the CFAA, to engage in conduct that logically could result in the suppression of competition. The Court does not view the mandates of the CFAA as so clearly encompassing the conduct at issue to warrant a *Rule 12(b)(6)* dismissal of the claim, particularly given the aspect of the PPA that shares revenue from competitor

[2] There appears to be no dispute that CAA is classified as a municipality/local government entity.

arenas under the so-called "Competitor Arena Revenue Siphoning" provisions. It is not clear that the challenged conduct is a "foreseeable consequence of what the state law authorizes."

Moreover, immunity is less justified in this case because the anticompetitive conduct is not regulatory activity, but instead is commercial market activity. In *City of Columbia v. Omni Outdoor Advertising, Inc., 499 U.S. 365, 374-75, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991)*, the Court distinguished situations in which the government body acts not in a purely regulatory capacity, but as a market participant. HOLMES, *supra,* § 8:7, p. 808. The Court stated:

> The rationale of *Parker* was that, ***HN7***[] in light of our national commitment to federalism, the general language of the Sherman Act should not be interpreted to prohibit anticompetitive actions by the States in their governmental capacities as **[**14]** sovereign regulators. The sentences from the opinion quoted above simply clarify that this immunity does not necessarily obtain where the State acts not in a regulatory capacity but as a commercial participant in a given market.

Omni Outdoor, 499 U.S. at 374-75. Here, the entertainment contracts fall into the category of commercial market activity, and thus, CAA would be less entitled to immunity under the rationale of *Parker.*

b. SMG--Private Party Immunity

> ***HN8***[] The general test for whether state action immunity applies to SMG as a private party is two prong:

> **[*930]** (1) the party must show that it is acting pursuant to clearly articulated state policy reflected in actual legislation or high state court decisions, where the challenged conduct is a foreseeable consequence of what the state law authorizes, and

> (2) the party must show active state supervision.

California Retail Liquor Dealers Ass'n v. Midcal Aluminum, Inc., 445 U.S. 97, 105, 100 S. Ct. 937, 63 L. Ed. 2d 233 (1980); HOLMES, *supra,* § 8:7, pp. 798-99. This two-prong standard, known as the *Midcal* test, was reiterated in *S. Motor Carriers Rate Conference, Inc. v. United States, 471 U.S. 48, 105 S. Ct. 1721, 85 L. Ed. 2d 36 (1985)*, in which the Court further explained the applicability of the **[**15]** state action doctrine to private parties. A state policy that expressly permits, but does not compel, anticompetitive conduct may be clearly articulated within the meaning of Midcal. *S. Motor Carriers Rate Conference, 105 S. Ct. at 1729*. Nonetheless, a state may not merely give immunity to those who violate the Sherman Act by authorizing them to violate it. *Id. at 1729 n.23*. The second prong of the *Midcal* test "prevents States from 'casting … a gauzy cloak of state involvement over what is essentially a private price-fixing arrangement.'" *Id.* (quoting *Midcal, 445 U.S. at 106*). "This active supervision requirement ensures that a State's actions will immunize the anticompetitive conduct of private parties only when the 'state has demonstrated its commitment to a program through its exercise of regulatory oversight.'" *Id.* (citing 1 P. Areeda & D. Turner, ***Antitrust Law*** P§ 213a, p. 73 (1978)).

Subsequent decisions have further defined the limits of state action immunity for private parties. The active supervision requirement can only be met by state supervision; municipal oversight is insufficient. HOLMES, *supra,* § 8:7, p. 799 n.16 (citing *Brentwood Acad. v. Tennessee Secondary Sch. Athletic Ass'n, 442 F.3d 410, 441 (6th Cir. 2006)*, **[**16]** rev'd and remanded *551 U.S. 291, 127 S. Ct. 2489, 168 L. Ed. 2d 166 (2007))*; *see also* *Riverview Invs., Inc. v. Ottawa Cmty. Improvement Corp., 774 F.2d 162, 163 (6th Cir. 1985)*.

HN9[] Antitrust immunity does not apply to a private actor to whom authority is delegated such that the private actor becomes the "effective decision maker." "[P]rivate defendants who are regulated by a municipality are entitled to protection under the state action exemption as long as the municipality is the "effective decision maker." *Mich. Paytel Joint Venture v. City of Detroit, 287 F.3d 527, 536-37 (6th Cir. 2002)*. The Sixth Circuit explained:

> HN10[] The *Riverview* [3] line of cases thus informs us that the basic question in antitrust cases that involve municipal and private actors is whether the municipality or the regulated party made the effective decision that resulted in the challenged anticompetitive conduct. If the municipality or a municipal agent was the effective decision maker, then the private actor is entitled to state action immunity, regardless of state supervision. If the private actor was the effective decision maker, due to corruption of the decision-making process or delegation of decision-making authority, then it is not immune, unless **[**17]** it can show that it was actively supervised by the state.

[*931] Mich. Paytel, 287 F.3d at 537-38. When a private actor (such as a non-profit corporation) acts on behalf of the local government but makes "'independent decisions without the input, advice, involvement, or oversight of … any … governmental body,'" the antitrust immunity accorded to the governmental entity does not apply. Id. at 537-38 (quoting Riverview III, 899 F.2d at 481-82).

HN11[] Under the second prong of the Midcal test, the state must exercise ultimate control over the challenged private anticompetitive conduct; the private entity must demonstrate both that the state has the power to exercise control over the private anticompetitive conduct and that the state in fact exercised its control. HOLMES, *supra,* § 8:7, p. 800 n.16 (citing Snake River Valley Elec. Ass'n v. PacifiCorp, 357 F.3d 1042, 1049 (9th Cir. 2004)). Also, **[**18]** as noted above with regard to municipal immunity, another consideration may be whether the anticompetitive conduct at issue is regulatory-related or part of the commercial market. HOLMES, *supra,* § 8:7, p. 808; Omni Outdoor, 499 U.S. at 374-75.

SMG argues that it is entitled to immunity from suit under the state action doctrine. The Court finds SMG's claim of state action immunity extremely weak under the above principles. Contrary to SMG's argument, the PPA was not formed pursuant to a "clearly articulated state policy" that "authorize[d] anticompetitive conduct," Michigan Paytel, 287 F.3d at 536. HN12[] While it is true that for state action immunity the conduct need not be *expressly* authorized by the state/legislation (in this case the CFAA), the suppression of competition must be the foreseeable or logical result of what the state authorizes. Id. at 535. At this early stage of the proceedings, with no development of the record, the Court finds that any relationship between the CFAA authorization and the "Competitor Arena Revenue Siphoning" provision of the PPA is tenuous at best.

SMG contends that this case presents circumstances analogous to those in *Michigan Paytel,* in which the Court **[**19]** found that state action immunity applied with respect to an exclusive contract for prisoner telephones by the City of Detroit. The Court disagrees. Clearly, to operate a prison, the City of Detroit would have to solicit bids and award contracts for necessary services, which would include exclusive contracts such as that for prisoner telephones. Similarly, the operation of Van Andel Arena would involve exclusive contracts for products and services necessary or convenient to carry out the purposes, objectives, and provisions of the CFAA (SMG Br. 7-8). However, as plaintiff argues, that would not logically or foreseeably include the PPA and its "Competitor Arena Revenue Siphoning" contract provisions.

The Court agrees instead with plaintiff that the circumstances of this case are more analogous to those in First American Title Co. v. Devaugh, 480 F.3d 438 (6th Cir. 2007). In *First American Title,* the Sixth Circuit concluded that the challenged anticompetitive activity by county registers, of restricting the distribution and resale of copies of recorded documents obtained by title companies, was not encompassed within the legislative authority granted to registers. Id. at 440, 447. Rather, **[**20]** the legislative authority extended only to acquiring, recording, and possessing, "the *original official* title documents." Id. The court held that it was not foreseeable that the powers granted to the county registers would logically result in the challenged practices. Id. at 448.

Likewise, in this case, the CFAA undoubtedly authorizes the CAA to undertake certain activities related to the operation **[*932]** of Van Andel Arena, including contracting for essential or even beneficial services incidental to its

---

[3] Riverview Invs., Inc. v. Ottawa Cmty. Improvement Corp., 769 F.2d 324 (6th Cir. 1985) ("*Riverview I*"); Riverview Invs., Inc. v. Ottawa Cmty. Improvement Corp., 774 F.2d 162 (6th Cir. 1985) ("*Riverview II*"); Riverview Invs., Inc. v. Ottawa Cmty. Improvement Corp., 899 F.2d 474 (6th Cir. 1990) ("*Riverview III*").

operations. However, there is nothing before the Court in the pleadings or otherwise that persuades the Court that the CFAA would foreseeably or logically result in "marketplace contracts" to induce, reduce or otherwise regulate the activities of competitor arenas.

Further, the Court concludes that SMG has not met the second prong of the *Midcal* test, under which the private entity must demonstrate both that the state has the power to exercise control over the private anticompetitive conduct and that the state in fact exercised its control. HOLMES, *supra,* § 8:7, p. 800 n.16 (citing *Snake River Valley Elec. Ass'n, 357 F.3d at 1049*). There is no indication of such supervision. Although SMG argues **[**21]** that this prong is essentially met because CAA was plainly the effective decision maker, that is not evident based on plaintiff's allegations, as SMG asserts (SMG Br. 9-10).

Given the above considerations, the Court concludes based on the pleadings and the arguments that defendants are not entitled to state action immunity under the circumstances of this case. The record is devoid of any specifics concerning either defendant's role in developing, executing and overseeing the PPA, making any reasoned consideration of the immunity defenses merely superficial, and thus, unreliable for purposes of legal analysis.

2. LGAA Immunity

HN13[] Under the LGAA, a governmental entity may be entitled to immunity with respect to liability for damages, attorneys' fees and costs, but not injunctive relief when the claim is "based on any official action directed by a local government, or official or employee thereof acting in an official capacity." *15 U.S.C. § 36(a)*. "The Act leaves intact the availability of injunctive relief (including attorney's fees) in suits against municipalities, and does not affect a plaintiff's ability to sue private party defendants for damages as well as equitable relief." HOLMES, *supra,* ***[**22]*** § 8:7, p. 813.

> The Local Government Antitrust Act of 1984 provides that federal antitrust claimants can no longer recover compensatory damages, treble damages, costs or attorney's fees from any local government, or from any local government official or employee acting in an official capacity found guilty of an antitrust violation. The Act effectively restricts municipal antitrust liability to declaratory and injunctive relief. . . . Nevertheless, under the Clayton Act, a plaintiff who substantially prevails in an action of injunctive relief is entitled to an award of costs, including a reasonable attorney's fee.

17 MCQUILLIN MUN. CORP. § 49:97 (3rd ed.) (footnotes omitted).

Defendants contend that they are entitled to the limited immunity available under the LGAA; CAA because it "qualifies as a local government" and the conduct at issue involves "official action," and SMG because its conduct was based on official action directed by a local government, or official or employee acting in an official capacity. Plaintiff argues that the LGAA does not shield defendants at this stage because the Act only provides immunity where the municipality has actually exercised its authority without expressly **[**23]** violating that authority, and where it has actively supervised the private party acting on its behalf. *See GF Gaming Corp. v. City of Black Hawk, Colo., 405 F.3d 876, 886-87 (10th Cir. 2005)*. Plaintiff contends that the LGAA does not shield defendants because the conduct at issue was not lawful, that is, the "Competitor Arena Revenue Siphoning" is not "remotely, much less **[*933]** reasonably," included within the CAA's authority under the CFAA.

The factual record in this case is extremely limited; the genesis of the PPA and the role of CAA versus SMG is not yet known. Accordingly, the resolution of immunity under the LGAA cannot be definitively resolved at this stage of the proceedings. Plaintiff's claim remains generally plausible, and whether the relief sought may be limited on the basis of immunity under the LGAA is an open question. Accordingly, dismissal is unwarranted on this basis.

3. Dismissal under *Twombly*

Defendants argue that plaintiff has failed to plead Sherman Act violations (Count I) under the standard announced in *Twombly.* Defendants correctly state that ***HN14***[] in *Twombly,* the Supreme Court tightened pleading requirements to discourage federal antitrust cases of questionable merit: a **[**24]** plaintiff must allege enough facts to nudge the "claims across the line from conceivable to plausible . . . ." *Twombly, 127 S. Ct. at 1974*. "Factual allegations must be enough to raise a right to relief above the speculative level . . . ." *Id. at 1965*. However, "a well-pleaded complaint may proceed even if it strikes a savvy judge that actual proof of those facts is improbable, and 'that a recovery is very remote and unlikely.'" *Id.* (citation omitted). The Court concludes that plaintiff has met the standard in *Twombly.*

In *Twombly,* the court was concerned that there was at least plausible grounds to infer an agreement on which to base the alleged conspiracy. *Id. at 1965-66*. Here, there is no such concern. The existence of an agreement, or at least a draft of the agreement, is undisputed. Further, there is an initial showing that the agreement encompasses activities of competitors. The question is whether the agreement has an anticompetitive effect contrary to federal law. Plaintiff's complaint is well-beyond a mere fishing expedition, and while recovery may be improbable, the complaint passes muster under the plausibility standard. Moreover, this case does not involve a large-scale antitrust **[**25]** claim as in *Twombly:* "a putative class of at least 90 percent of all subscribers to local telephone or high-speed Internet service in the continental United States, in an action against America's largest telecommunications firms (with many thousands of employees generating reams and gigabytes of business records) for unspecified (if any) instances of antitrust violations that allegedly occurred over a period of seven years." *Id. at 1967*. Accordingly, there is not the same concern regarding extensive and expensive discovery.

HN15[] As *Twombly* makes clear, the pleading standard required for antitrust actions does not rest on the heightened pleading requirements under *FED. R. CIV. P. 9*. Instead, it remains premised on the more liberal *Rule 8(a)(2)*, which "requires only 'a short and plain statement of the claim showing that the pleader is entitled to relief,' in order to 'give the defendant fair notice of what the ... claim is and the grounds upon which it rests.'" *Id. at 1964, 1973 n.14, 1974* (citation omitted). The complaint allegations must simply render the plaintiff's entitlement to relief plausible. *Twombly, 127 S. Ct. at 1973 n.14*.

a. Plausibility

Nonetheless, at the outset, defendants contend **[**26]** that plaintiff's antitrust theory fails under *Twombly* because it is "fundamentally implausible in multiple respects." The Court disagrees.

Defendants advance various arguments in this regard. First, defendants observe that "standing alone, there is nothing anticompetitive about an exclusive dealing agreement and certainly nothing anticompetive **[*934]** about a non-exclusive one." While defendants' statement may be true, it is not necessarily relevant since such factors do not stand alone in this case, and thus, defendants' observation does not defeat plaintiff's claim.

Another argument defendants advance for dismissal is the implausibility of plaintiff's theory that the operator of a single arena in a single city enlisted Live Nation, an alleged nationwide monopolist, to help establish a local monopoly against its interest, i.e., to enter an agreement that forces it to raise its ticket price. Defendants assert that CAA is not the party with monopoly power over Arena Musical Products--Live Nation is. Although defendants' logic is not entirely clear to the Court, defendants contend that because Live Nation is free to take the acts that it promotes, which allegedly constitute 90 percent of the "Arena **[**27]** Products Musical Market," to other venues, plaintiff cannot plead that defendants have any market power, and defendants therefore cannot dictate prices that Live Nation sets for tickets, and defendants therefore cannot harm competition. This logic, however, does not acknowledge plaintiff's allegation that it is the combined or joint activity of defendants and Live Nation that is at issue (First Am. Compl. P 44). *See, e.g.,* Sherman Act, *§ 2*. Plaintiff's complaint alleges that Live Nation controls as much as 90 percent of the Arena Musical Products in the Market in a given year and that through the PPA, CAA has been able to achieve actual monopoly power since Van Andel Arena hosts 75-80 percent of the total Arena Musical Products in the Market (First Am. Compl. P 32). Whether that concerted action is ultimately procompetitive, as defendants contend, or anticompetitive, as plaintiff contends, is yet to be determined.

In any event, the Court finds no argument or scenario advanced by defendants that is fatal to plaintiff's antitrust claim as a whole. Despite the Court's inquiries, the parties have provided the Court with no precedent on point for adequately evaluating the competitive effects **[**28]** of the revenue sharing provisions of the PPA, which according to the parties is unique in the entertainment market. Defendant SMG asserts that plaintiff has alleged a vertical agreement subject to the "rule of reason." As discussed below, the rule of reason requires the application of the

Court's best sense. Until the record is further developed, and the details of plaintiff's antitrust theory are fleshed out, dismissal would be based on far greater speculation than would permitting this action to proceed to the next stage.

b. Factual Allegations and the Rule of Reason

Defendants also argue that plaintiff has failed to plead sufficient facts to support all the substantive elements of its antitrust claim. Plaintiff has alleged violations of the Sherman Act [4] under *Section 1*, which targets agreements that unreasonably restrain trade, and under *Section 2*, which targets monopoly conduct:

> ***HN16***[] The Sherman Antitrust Act declares illegal "every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations." *15 U.S.C. § 1*. The Act also makes it a felony to "monopolize, or attempt to monopolize, or combine **[**29]** **[*935]** or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations." *Id.* *§ 2*.

Mich Paytel, 287 F.3d at 534.

HN17[] To establish a § 1 claim, plaintiff must allege that defendants entered into an agreement, and (1) defendants' conduct occurred in a "relevant market," (2) that defendants possessed market power in the relevant market, and (3) that there were anticompetitve effects. *Expert Masonry, Inc., v. Boone County, Ky., 440 F.3d 336, 343, 348 (6th Cir. 2006)*; *Worldwide Basketball & Sport Tours, Inc. v. NCAA, 388 F.3d 955, 959 (6th Cir. 2004)*. To establish a *§ 2* monopolization claim, plaintiff must allege "(1) the possession of monopoly power in the relevant market; and (2) the willful acquisition, **[**30]** maintenance, or use of that power either by anticompetitive or exclusionary means." *Directory Sales Mgmt. Corp. v. Ohio Bell Tel. Co., 833 F.2d 606, 612 (6th Cir. 1987)*. [5]

Defendants argue that under either *§ 1* or *§ 2* of the Sherman Act, plaintiff must allege (1) the "market" at issue, (2) that defendants have market power or monopoly power, and (3) whether defendants' conduct has anticompetitive effects (and has caused plaintiff to suffer an antitrust injury). Defendants argue that plaintiff has failed to allege facts to establish these requisite elements. Applying the pleading **[**31]** standard from *Twombly,* the Court disagrees.

With regard to the "market," defendants argue that plaintiff fails to define the relevant product market with reference to the rule of reasonable interchangeability, which is fatal to plaintiff's prima facie case. While the Court agrees that ***HN18***[] definition of the relevant market involves consideration of the product substitutability, the Court does not find plaintiff's pleadings so deficient in this regard that dismissal is warranted, on the circumstances of this case, for plaintiff's failure to properly analyze the parameters of the relevant market.

Defendants assert that "[t]he essential test for ascertaining the relevant product market involves the identification of those products or services that are either (1) identical to or (2) available substitutes for the defendant's product or service." *White & White, Inc. v. Am. Hosp. Supply Corp., 723 F.2d 495, 500 (6th Cir. 1983)*. Defendants argue that plaintiff's incorrectly allege the relevant market as the "Arena Musical Product," market, i.e., "large musical concerts, with over 3,000 fans performed by nationally touring musicians." Defendants contend that the relevant market is in fact all events **[**32]** that could come to area arenas, including *non-Arena Musical Product* events, since defendants and the other West Michigan arenas are in the business of renting arenas. Defendants thus contend

---

[4] Plaintiff also alleges violations of the Clayton Act. "The Clayton Act proscribes certain specific activities in commerce and also provides for private enforcement of the federal antitrust laws." 17 MCQUILLIN MUN. CORP. § 49:97 (3rd ed.) (footnote omitted). Because plaintiff's substantive claims fall under the prohibitions of the Sherman Act, the parties' arguments and the Court's analysis are directed to the Sherman Act.

[5] For purposes of the Motions to Dismiss, the Court accepts defendant SMG's statement of the general elements of claims under *§ 1* and *§ 2* of the Sherman Act. However, the Court recognizes that the precise showing required to prove a claim under these sections may ultimately depend on the specific nature and category of the antitrust claim. *See, e.g., J.B.D.L. Corp. v. Wyeth-Ayerst Labs., Inc., 485 F.3d 880, 887 (6th Cir. 2007)* (referring to ***antitrust law*** specific to the Sixth Circuit); *see also* HOLMES, *supra,* § 2:2, pp. 104-05 and § 3:2, pp. 402-03 (identifying and differentiating categories of antitrust claims).

that plaintiff's complaint is deficient because it contains no factual allegations as to why *non-Arena Musical Product* events, such as sporting events, expos, and other entertainment events, are not reasonable substitutes for earning arena revenues.

Defendants also assert that plaintiff confuses the *rental of space to promoters,* which is the business of plaintiff and Van **[*936]** Andel Arena, with the *sale of tickets to consumers,* which is Live Nation's alleged business. Defendants argue that because "it is axiomatic that a firm cannot monopolize a market in which it does not compete," *Discon, Inc. v. NYNEX Corp., 93 F.3d 1055, 1062 (2d Cir. 1996)*, vacated on other grds, *525 U.S. 128, 119 S. Ct. 493, 142 L. Ed. 2d 510 (1998)*, defendants are entitled to dismissal. The Court is unpersuaded by defendants' arguments as a basis for dismissal. Given the nature of plaintiff's antitrust claims, the allegations of concerted action between defendants and Live Nation, and the allegation that Live Nation dominates the Arena Musical Product Market, it **[**33]** is not evident that the relevant market must be defined to include non-Arena Musical Product events. Likewise, given the circumstances of this case and the context of the allegations, defendants' characterization of the arena business as distinct from that of Live Nation does not generally defeat plaintiff's claims.

Plaintiff alleges claims under both *§ 1* and *§ 2* of the Sherman Act. These claims are clearly distinct and require independent analysis based on the relevant facts and applicable legal principles.

It is undisputed that plaintiff's ***HN19***[] claim under *§ 1* is subject to the "rule of reason." The rule of reason is a flexible standard that requires a general inquiry into whether, under "all the circumstances," the challenged practice imposes an unreasonable restraint on trade:

> Relevant circumstances can include such diverse factors as the defendants' intent and purpose in adopting the restriction; the structure of and competitive conditions within the affected market; the relative competitive positions and market power of the defendants; the presence of economic barriers inhibiting the ability of competitors to respond and offset the challenged practice; and apparent justifications for **[**34]** the restriction such as enhanced efficiencies, protection of product or service goodwill, and inducing dealer loyalty. No single such factor is decisive. Rather, the factfinder "weighs all of the circumstances" in deciding whether the challenged practice is, on balance, competitively unreasonable, with courts commonly phrasing the inquiry in terms of shifting burdens of proof.

HOLMES, *supra,* § 2:10, pp. 172-74 (citations omitted).

HN20[] While a necessary first step for the rule of reason inquiry is generally the identification of the relevant market, this threshold requirement is not always essential. *Id.* at 178. "Rather, direct evidence of anticompetitive effects, such as reduced output or supracompetitive prices, can obviate the need for a more rigorous market analysis, provided that the rough contours of the market are sufficiently known and obvious for the trier to assess the plausibility of the claimed anticompetitive effects without going through a full-blown market inquiry." *Id.* (citing *F.T.C. v. Indiana Fed'n of Dentists, 476 U.S. 447, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986))*.

Likewise, ***HN21***[] *§ 2* monopolization claims generally require proof of the relevant market as a first element. HOLMES, *supra,* § 3:4, p. 406. The inquiry **[**35]** has two dimensions: (1) identification of the cluster of products or services with which the defendant's product or service effectively competes, the "relevant product market," and (2) identification of the geographic area within which the defendant practicably competes in marketing its product or service, the "relevant geographic market." *Id.* at 407. Further, the relevant product market traditionally emphasizes two factors, the extent of substitutability and the degree of cross-elasticity of demand. *Id.* However, as with *§ 1*, the relevant market inquiry ultimately requires consideration **[*937]** of various factors depending on the nature of the antitrust claim and the case-specific context. *Id.* at 406-33.

In this case, plaintiff has defined the service product as "the hosting of large musical concerts, with over 3,000 fans, performed by nationally touring musicians (the 'Arena Musical Product'), within the West Michigan Market (the "Market"), which consists of the residents of the greater metropolitan areas of the cities of Grand Rapids, Muskegon, Kalamazoo and Battle Creek" (First Am. Compl. P 8). The Court is persuaded that plaintiff has pleaded a sufficient "relevant market" in light of the **[**36]** allegations, particularly given the early stage of these proceedings.

Similar considerations apply to defendants' arguments that plaintiff has failed to allege "market power," and anticompetitive effects and antitrust injury. Until the claims in this case are further elucidated and the record further developed, dismissal is unwarranted on the basis that plaintiff has failed to plead these elements.

Plaintiff's specific allegations include that Live Nation controls as much as 90 percent of the Arena Musical Products in the Market in a given year and that through the PPA, CAA has been able to achieve actual monopoly power since Van Andel Arena hosts 75-80 percent of the total Arena Musical Products in the Market (First Am. Compl. P 32). It is undisputed that defendants' agreement with Live Nation has revenue sharing provisions directly involving not only their own contracts, but also their contracts with competitors. Plaintiff essentially alleges that the PPA incentivizes their (defendants' and Live Nation's) mutual gain in the entertainment marketplace at the expense of competitors and the competitive market. Specifically, plaintiff alleges that the "Competitor Arena Revenue Siphoning" **[**37]** provision in the PPA has resulted in tens of thousands of dollars or more in revenue generated at the DeltaPlex being effectively siphoned from plaintiff to CAA (First Am. Compl. P 22). Plaintiff further alleges:

1. that defendants' intended effect and purpose of entering into the PPA is to increase the cost of events at competitor arenas to their detriment and at the expense of the public by discouraging Live Nation from placing events at competitor arenas (First Am. Compl. P 29);
2. that the PPA has had the effect of some events that would otherwise come to West Michigan do not come at all or come at a higher cost to competitor arenas and/or the general public through increased ticket prices and/or a reduction in rent paid to competitors to cover the "cut" to CAA, which has denied access to Arena Musical Product and/or increased the Product's ticket costs (First Am. Compl. P 30);
3. that the PPA has a substantial, negative impact on the flow of interstate commerce (First Am. Compl. P 31);
4. that with the assignment of revenues from non-Live Nation events in the Van Andel Arena to Live Nation and the assignment of revenues to CAA from Live Nation events held at West Michigan Competitor **[**38]** Arenas, the PPA and the Competitor Arena Revenue Siphoning is a contract that unreasonably restrains trade or commerce in the Market and attempts to monopolize the placement of events in the Market and/or the revenues from events in the Market (First Am. Compl. P 41); and
5. that defendants possess actual monopoly power over the Market, they intend to obtain monopoly power **[*938]** over the Market, or there is a dangerous probability that they will succeed in achieving monopoly power over the Market and a substantial part of interstate concert commerce through the PPA (First Am. Compl. P 42).

Plaintiff's allegations, taken in total, sufficiently plead a plausible antitrust claim.

c. Going Forward

Defendant SMG provides the Court with a litany of citations to cases in which courts have dismissed antitrust claims on *Twombly* grounds. While the list is impressive and may add bulk to defendants' argument, it does not add brawn. Merely because antitrust claims falter statistically does not mandate that the claim in this particular case must fail. But, moreover, because ***HN22***[] the case-specific context is critical to any reasoned analysis of an antitrust claim, such broad-based argument lends little support **[**39]** to defendants' motions for dismissal without a comparative analysis of each case.

Of equal concern to the Court, however, is plaintiff's melding of its antitrust allegations and theories. While this is understandable to a certain extent given the circumstances of this case, the paucity of record facts, and the unique nature of the agreement at issue, the Court is mindful of the difficulties posed in responding logically and succinctly to such allegations, let alone the Court's difficulty in a detailed resolution of the issues in dispute. Fundamentally, it appears to the Court that plaintiff's antitrust claims will succeed or fail on the basis of the parties' efforts to clarify their positions vis-a-vis the fundamental purpose of the ***antitrust law***, as well as the elements of the specific theories advanced.

> The Sherman Act was designed to be a comprehensive charter of economic liberty aimed at preserving free and unfettered competition as the rule of trade. It rests on the premise that the unrestrained interaction of competitive forces will yield the best allocation of our economic resources, the lowest prices, the highest quality and the greatest material progress, while at the same time **[**40]** providing an environment conducive to the preservation of democratic, political and social institutions. Cases reviewing the legislative history of the Sherman Act have concluded that Congress, exercising the full extent of its constitutional power, sought to establish a regime of competition as the fundamental principle governing commerce in the United States.

17 MCQUILLIN MUN. CORP. § 49:97 (3rd ed.) (footnotes omitted).

With regard to the substantive antitrust claims, and whether plaintiff has established a prima facie antitrust case, it is far too early to dismiss the claims on this basis because the record is not sufficiently developed to properly decide issues such as the relevant market and monopolization. Federal ***antitrust law*** is a complex area of law, often encumbered by complicated facts and economic market analyses. While this case is relatively narrow in its focus and allegations, it is factually unique, and thus does not fall neatly within established antitrust precedent. Whether plaintiff can establish a violation of federal ***antitrust law*** on the basis of the PPA remains to be seen. However, based on the pleadings and the parties' arguments, it is the Court's view that plaintiff **[**41]** has sufficiently pled the elements of its antitrust claims to survive the motions to dismiss.

Accordingly, the Court concludes that defendants are not entitled to dismissal of the antitrust claims on the basis of the pleading standard in *Twombly*. Plaintiff has pled a plausible antitrust claim.

[*939] B. *42 U.S.C. § 1983* Claim (Count 3)

Defendants argue that plaintiff has failed to adequately plead a *§ 1983* claim. The Court agrees.

HN23[] "A prima facie case under *§ 1983* has two elements: '(1) the defendant must be acting under the color of state law, and (2) the offending conduct must deprive the plaintiff of rights secured by federal law.'" *Lambert, 517 F.3d at 439* (citations omitted). Defendants contend that plaintiff has failed to establish the second element.

Although plaintiff asserts its *§ 1983* claim based on procedural due process, substantive due process and equal protection (First Am. Compl. PP 67-69), plaintiff's claim is essentially based on a "taking" theory because of the alleged diminished value/use of its property. Plaintiff argues that it has a property interest in the contractual revenues that CAA has siphoned without due process or equal protection. Plaintiff's claim is novel, if not **[**42]** imaginative. Plaintiff provides no authority that recognizes a "taking" under the circumstances of this case. Contrary to plaintiff's argument, the Court does not find the authority based on a regulatory taking applicable under the facts alleged here. This case, at the core, reasonably sounds in ***antitrust law***, and should proceed, if at all, on that basis. The Court therefore rejects plaintiff's novel *§ 1983* claim.

C. Declaratory Judgment (Count 4)

Plaintiff seeks a declaratory judgment that the PPA's Competitor Arena Revenue Siphoning is illegal and unenforceable as an *ultra vires* act under state law. Plaintiff argues that the CFAA does not confer authority in CAA or any of its authorized agents, such as SMG, to "co-promote" Arena Musical Products in private facilities such as DeltaPlex. Defendants argue that the Court should decline to exercise its discretion to provide the requested declaratory relief, i.e., that the PPA is not enforceable because it is *ultra vires,* since this is a question of state law and policy.

Similar to the *§ 1983* claim, plaintiff's request for a declaratory judgment appears to be tangential to plaintiff's case overall and depends on a somewhat imaginative characterization **[**43]** of the facts--that defendants are illegally co-promoting events at private facilities, placing tax dollars at risk and harvesting income from a private venture that is not subject to federal, state, or local tax. This characterization does not comport with the actual facts or circumstances of this case. For instance, the PPA guarantees CAA a minimum of 1.4 million dollars in revenue from Live Nation; thus, it can hardly be said to be a risk of tax dollars. In any event, the declaratory judgment count seeks relief duplicative in part to that sought in plaintiff's antitrust claim. As defendants observe, the declaratory relief requested implicates matters exclusively involving state law. Given these circumstances, the Court concludes that this claim is properly dismissed.

D. State Law Claims (Counts 2, 5-7)

Finally, with regard to the remaining counts involving state law claims, the parties have not fully argued the merits of these claims. Since certain of plaintiff's federal claims have survived dismissal, the Court need not address the issue of supplemental jurisdiction or whether these claims will ultimately survive on the merits.

VI. Conclusion

Accordingly, the Court denies defendants' **[**44]** motions to dismiss with respect to Count 1 (Violation of Federal Antitrust Act), Count 2 (Violation of State Antitrust Act), Count 5 (Tortious Interference with Prospective Business Advantage), Count 6 (Violation of Open Meetings Act and CFAA), and Count 7 (Violation of the Freedom of Information Act and CFAA) of **[*940]** plaintiff's First Amended Complaint. The Court grants the motions to dismiss with respect to Count 3 (Violation of *42 U.S.C. § 1983*) and Count 4 (Declaratory Judgment--PPA's Competitor Arena Revenue Siphoning is Ultra Vires) of plaintiff's First Amended Complaint.

DATED: January 30, 2009

/s/ Janet T. Neff

JANET T. NEFF

United States District Judge

ORDER

In accordance with the Opinion entered this date:

IT IS HEREBY ORDERED that the Court **DENIES IN PART** and **GRANTS IN PART** defendants' motions to dismiss (Dkts 40, 43) as follows:

The Court DENIES defendants' motions to dismiss with respect to Count 1 (Violation of Federal Antitrust Act), Count 2 (Violation of State Antitrust Act), Count 5 (Tortious Interference with Prospective Business Advantage), Count 6 (Violation of Open Meetings Act and CFAA), and Count 7 (Violation of the Freedom of Information Act and CFAA) of plaintiff's First **[**45]** Amended Complaint.

The Court GRANTS the motions to dismiss with respect to Count 3 (Violation of *42 U.S.C. § 1983*) and Count 4 (Declaratory Judgment--PPA's Competitor Arena Revenue Siphoning is Ultra Vires) of plaintiff's First Amended Complaint.

Civil Procedure > Appeals > Appellate Jurisdiction > Final Judgment Rule

Civil Procedure > ... > Arbitration > Federal Arbitration Act > General Overview

HN1[] Appellate Jurisdiction, Final Judgment Rule

Section 16(a)(3) of the Federal Arbitration Act, 9 U.S.C.S. § 16(a)(3), provides that an appeal may be taken from a final decision with respect to an arbitration that is subject to the title. An order compelling arbitration and dismissing a party's underlying claims is a final decision with respect to an arbitration.

Business & Corporate Compliance > ... > Alternative Dispute Resolution > Arbitration > Arbitrability

Business & Corporate Compliance > ... > Arbitration > Federal Arbitration Act > Arbitration Agreements

HN2[] Arbitration, Arbitrability

Challenges to the validity of arbitration agreements can be divided into two types. One type challenges specifically the validity of an agreement to arbitrate. The other challenges the contract as a whole, either on a ground that directly affects the entire agreement, for example, the agreement was fraudulently induced, or on the ground that the illegality of one of the contract's provisions renders the whole contract invalid. If there is a challenge to an arbitration clause itself--an issue which goes to the making of the agreement to arbitrate--a federal court may proceed to adjudicate it. But the Federal Arbitration Act, 9 U.S.C.S. § 1 et seq., does not permit a federal court to consider claims which challenge the contract generally.

Civil Procedure > ... > Arbitration > Federal Arbitration Act > General Overview

Civil Procedure > ... > Alternative Dispute Resolution > Arbitration > General Overview

HN3[] Arbitration, Federal Arbitration Act

The favoring of arbitration is somewhat tempered by the fact that arbitration is strictly a matter of contract. Enhancing the federal policy favoring arbitration is therefore largely a matter of making arbitration agreements as enforceable as other contracts, but not more so.

Business & Corporate Compliance > ... > Arbitration > Federal Arbitration Act > Arbitration Agreements

HN4[] Federal Arbitration Act, Arbitration Agreements

Section 2 of the Federal Arbitration Act (FAA), 9 U.S.C.S. § 2, which provides that an agreement to arbitrate shall be valid, irrevocable, and enforceable, save upon such grounds as exist at law or in equity for the revocation of any contract. Section 2 is the primary substantive provision of the FAA which creates a body of federal substantive law of arbitrability, applicable to any arbitration agreement within the coverage of the FAA.

Civil Procedure > Special Proceedings > Class Actions > General Overview

HN5[] Special Proceedings, Class Actions

Insofar as a plaintiff may be said to possess a "right" to litigate an action in federal court as a class action under Fed. R. Civ. P. 23, the right is a procedural right only, ancillary to the litigation of substantive claims. Nevertheless, courts recognize the utility of a class action as a vehicle for vindicating statutory rights. This is especially true with respect to the recognition that a class action device is the only economically rational alternative when a large group of individuals or entities has suffered an alleged wrong, but the damages due to any single individual or entity are too small to justify bringing an individual action.

Business & Corporate Compliance > ... > Alternative Dispute Resolution > Arbitration > Arbitrability

Evidence > Burdens of Proof > Allocation

Business & Corporate Compliance > ... > Arbitration > Federal Arbitration Act > Arbitration Agreements

HN6[] **Arbitration, Arbitrability**

When a party seeks to invalidate an arbitration agreement on the ground that arbitration would be prohibitively expensive, that party bears the burden of showing the likelihood of incurring such costs.

Antitrust & Trade Law > Clayton Act > General Overview

Civil Procedure > Appeals > Standards of Review > Clearly Erroneous Review

Civil Procedure > Appeals > Standards of Review > De Novo Review

HN7[] **Antitrust & Trade Law, Clayton Act**

An appellate court reviews mixed questions of law and fact either de novo or under the clearly erroneous standard depending on whether the question is predominantly legal or factual. An appellate court reviews de novo a district court's application of the Clayton Act to undisputed facts.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > ... > Costs > Costs Recoverable > Witnesses

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

HN8[] **Private Actions, Remedies**

With respect to fee-shifting for expert witnesses under *Fed. R. Civ. P. 54(d)* in an antitrust case, when a prevailing party seeks reimbursement for fees paid to its own expert witnesses, a federal court is bound by the limit of *28 U.S.C.S. § 1821(b)*.

Antitrust & Trade Law > General Overview

Contracts Law > Defenses > Public Policy Violations

HN9[] **Antitrust & Trade Law**

An agreement which in practice acts as a waiver of future liability under the federal antitrust statutes is void as a matter of public policy.

Business & Corporate Compliance > ... > Alternative Dispute Resolution > Arbitration > Waiver

Civil Procedure > Special Proceedings > Class Actions > General Overview

HN10[] **Arbitration, Waiver**

The U.S. Court of Appeals for the Second Circuit holds that each case which presents a question of the enforceability of a class action waiver in an arbitration agreement must be considered on its own merits, governed with a healthy regard for the fact that the Federal Arbitration Act, *9 U.S.C.S. § 1 et seq.*, is a congressional declaration of a liberal federal policy favoring arbitration agreements. The enforceability of a particular class action waiver in an arbitration agreement must be determined on a case-by-case basis, considering the totality of the facts and circumstances. Relevant circumstances may include, but are not limited to, the fairness of the provisions, the cost to an individual plaintiff of vindicating the claim when compared to the plaintiff's potential recovery, the ability to recover attorneys' fees and other costs and thus obtain legal representation to prosecute the underlying claim, the practical affect the waiver will have on a company's ability to engage in unchecked market behavior, and related public policy concerns.

Opinion by: POOLER

Opinion

[*302] POOLER, Circuit Judge:

This Court frequently enforces mandatory arbitration clauses contained in commercial contracts. We do so on the principle that "it is difficult to overstate the strong federal policy in favor of arbitration, and it is a policy we have often and emphatically applied." *Arciniaga v. General Motors Corp., 460 F.3d 231, 234 (2d Cir. 2006)* (quotation marks omitted). On this appeal, however, we are asked to consider the enforcement of a mandatory arbitration clause in a commercial contract that also contains a "class action waiver," also referred to as a "collective action waiver," that is, a provision which forbids the parties to the contract from pursuing anything other than individual claims in the arbitral forum. This is a matter of first **[**4]** impression in our Court. [1]

[*303] One commentator has recently contended that "[t]he outright banning of class action in mandatory arbitration clauses has become a standard policy for many corporations that transact with consumers." Bryan Allen Rice, "Comment: Enforceable or Not?: Class Action Waivers in Mandatory Arbitration Clauses and the Need for a Judicial Standard," *45 Hous. L. Rev. 215, 224 (2008)*. [2] We acknowledge at the outset, as have other courts that have considered questions arising from the enforcement of class action waivers, in both consumer and commercial contracts, that the wisdom and utility of these provisions have become the subject of intense debate. See *Skirchak v. Dynamics Research Corp., 508 F.3d 49, 63 (1st Cir. 2007)* ("We recognize that there is a policy debate about whether class action waivers essentially act as exculpatory clauses, allowing for violations of laws where individual cases involve low dollar amounts and so will not adequately address or prevent illegality."). The opposing positions in this frequently impassioned debate have been dispassionately described as follows:

> Companies' use of class action **[**7]** waivers is motivated by the view that plaintiffs exploit the class action procedure in order to wrest large and unfair settlements from defendants. . . . Class action waivers are viewed by these companies as a way to defend themselves from consumers who are ganging up on companies through the leverage inherent in the aggregation of large numbers of claims. In further support of these waivers, corporations argue that the many (perceived) advantages of arbitration to a plaintiff make up for any disadvantages or inconveniences that the plaintiff may incur by sacrificing the ability to be part of a class action.

---

[1] We note that two district courts in our Circuit have found class action waivers in mandatory arbitration clauses to be enforceable. In *Sherr v. Dell, Inc, No. 05cv10097, 2006 U.S. Dist. LEXIS 51864, 2006 WL 2109436 (S.D.N.Y. July 27, 2006)*, a consumer brought a putative class action suit against Dell alleging that certain of the latter's products had a dangerous tendency to overheat. The plaintiff asserted claims under the statutory and common law of New York. *2006 U.S. Dist. LEXIS 51864, [WL] at *1*. Dell moved to compel arbitration and for the enforcement of a class action waiver contained in its sales contract, the terms of which were not even available to the consumer before purchase short of his calling a special telephone number or visiting a Dell internet site. Id. The district court granted the motion to compel, holding that the "plaintiff is not entitled to a class action suit or class-wide arbitration to vindicate the rights of everyone else with a similar problem. The [Federal Arbitration Act's] primary purpose is not to create a right to sue as a class. Its main purpose is to ensure that private agreements to arbitrate are enforced according to their terms." *2006 U.S. Dist. LEXIS 51864, [WL] at *7* (quotation marks omitted). The case **[**5]** was decided according to the law of Texas, which, the district court found, had incorporated the Federal Arbitration Act as part of its substantive law. Id.

Dumanis v. Citibank (South Dakota), N.A., No. 07cv6070, 2007 U.S. Dist. LEXIS 81586, 2007 WL 3253975 (W.D.N.Y. Nov. 2, 2007), was an action involving credit card interest rates brought under the federal Truth in Lending Act, *15 U.S.C. § 1601 et seq.*, and the New York General Business Law. The contract at issue had a South Dakota choice of law clause, and the decision was based upon the law of that state, not the federal law of arbitration. *2007 U.S. Dist. LEXIS 81586, [WL] at *2-*3*. The district court enforced the class action waiver contained in the contract's mandatory arbitration clause, both because the plaintiff could have "opt[ed] out" of the arbitration clause by not renewing his credit card and because the plaintiff had not been stripped of any substantive remedies; he merely could not pursue them "in the arguably more-favorable context of a class action." Id.

We note that in neither Sherr nor Dumanis does it appear that the plaintiff made a substantial demonstration -- which we hold that the plaintiffs have made here -- to the effect that an inability to pursue arbitration on a **[**6]** class basis would be tantamount to an inability to assert their claims at all.

[2] Two commentators have suggested that this is particularly so in the credit card industry: "Credit card companies have shown themselves to be even less enthusiastic about classwide arbitration than about class action litigation. The 'devil you know' phenomenon is compounded by the uncertainty of judicial review of class certification in arbitration and the concomitant fear of a 'renegade arbitrator' certifying a class and exposing a company to massive liability." Samuel Issacharoff & Erin F. Delaney, "Credit Card Accountability," *73 U. Chi. L. Rev. 157, 179 (2006)*.

> . . . Opponents of class action waivers contend that the ability to aggregate claims is crucial to protect the rights of those individuals . . . who do not have the resources to litigate individual claims. Further, many individual claims are only viable if brought on a class-wide basis. Indeed, by prohibiting class actions in . . . lawsuits[] where the expected recovery is dwarfed by the cost of litigating or arbitrating the claim, individuals are effectively prevented from pursuing their claims. As a result, businesses are able to engage in unchecked market misbehavior . . . .

J. **[**8]** Maria Glover, "Beyond Unconscionability: Class Action Waivers and Mandatory Arbitration Agreements," *59 Vand. L. Rev. 1735, 1746-47 (2006)* (footnotes and internal quotation marks omitted).

[*304] Both of these positions have been proffered to the Court by amici. Compare Brief of Atlantic Legal Foundation at 4 ("For several decades, providers of products and services in the United States have been beset with a litigious environment that has evoked criticism of many observers and applauded only by those professionals who have harvested the substantial financial rewards the civil justice system has produced by way of attorneys' fees. **[**9]** . . . Recognizing the risks of defending against class action litigation, many businesses have elected to have disputes resolved by individual arbitrations and to adopt collective action waivers as part of their arbitration clauses with their business customers to insure that result.") with Brief of Trial Lawyers for Public Justice at 27 ("It is . . . crucial to understand that any ban on class arbitration is essentially a ban on class treatment altogether, as arbitration clauses in standardized corporate contracts are made broader and broader, to encompass all conceivable types of disputes . . . . Under a regime where such prohibitions are enforced, such clauses are tantamount to a clause banning all claims against a corporation, unless they are so large that they justify the outlay of the extraordinary expense involved."). [3]

We note that two standard treatises on the conduct of class action litigation appear to take opposing positions as well. Compare 1 Joseph M. McLaughlin, McLaughlin on Class Actions: Law and Practice, § 2:14 (3d ed. 2006) ("As the potential availability of class-wide arbitration threatens to multiply exponentially the exposure on what is facially a single-consumer issue, companies should strongly consider including in their standard arbitration agreements an express provision barring class action litigation or arbitration.") with 3 Alba Conte & Herbert B. Newberg, Newberg on Class Actions, § 9:67 n.2 (4th ed. 2008) ("The bar on class arbitration threatens the premise that arbitration can be a fair and adequate mechanism for enforcing statutory rights.").

While we are conscious of this debate, we are thankful that we **[**11]** need not resolve it on this appeal. That is, we do not decide whether class action waiver provisions are either void or enforceable per se. Rather, we are concerned solely with the class action waiver contained in the contract between the parties before us on this appeal. We conclude that, on the record before us, the plaintiffs have adequately demonstrated that the class action waiver provision at issue should not be enforced because enforcement of the clause would effectively preclude any action seeking to vindicate the statutory rights asserted by the plaintiffs.

FACTS

A. Procedural Posture. The plaintiffs appeal from the judgment, dated March 20, 2006, memorializing the memorandum opinion and order, dated March 15, 2006, of the United States District Court of the Southern District of New York, which granted defendants American Express **[*305]** Company and American Express Travel Related Services Company, Inc.'s (collectively "Amex") motion to compel arbitration. See *In re American Express Merchants Litig., No. 03cv9592, 2006 U.S. Dist. LEXIS 11742, 2006 WL 662341 (S.D.N.Y. March 16, 2006)* (Daniels, J.). The

---

[3] Interestingly, when it enacted the Class Action Fairness Act of 2005, Congress itself found both utility and danger in the use of the class action device. Compare ***Pub. L. No. 109-2, § 2(a)(1), 119 Stat. 4 (2005)*** ("Class action lawsuits are an important and valuable part of the legal system when they permit the fair and efficient resolution of legitimate claims **[**10]** of numerous parties by allowing the claims to be aggregated . . . .") with id. at ***§ 2(a)(2)*** ("Over the past decade, there have been abuses of the class action device that have -- (A) harmed class members with legitimate claims and defendants that have acted responsibly; (B) adversely affected interstate commerce; and (C) undermined public respect for our judicial system.").

earliest iteration of the plaintiffs' claims was made in August 2003, with the filing of a class action complaint **[**12]** in the United States District Court for the Northern District of California ("the Italian Colors action"). This action, and another subsequently filed class action, were transferred, on Amex's motion, brought pursuant to *28 U.S.C. § 1404(a)*, to the United States District Court for the Southern District of New York. (JA 14, 85) By an order, dated December 10, 2004, that court consolidated these two actions, pursuant to *Rule 42(a) of the Federal Rules of Civil Procedure*, with several class actions that had been filed in the Southern District of New York. Any subsequently filed related actions were also made subject to this consolidation order.

Because we consider here only the narrow question of whether the class action waiver provision contained in the contract between the parties should be enforced, a prolix description of the plaintiffs' claims is unnecessary. (And, needless to say, we take no position on the merits of these claims.) In their briefs on this appeal, the parties describe the plaintiffs' claims largely by reference to the amended complaint, filed December 24, 2003, in the Italian Colors action. We will do so as well.

B. The Parties. The plaintiffs allege that Amex "is **[**13]** the leading issuer of general purpose and corporate charge cards to consumers and businesses in the United States and throughout the world. It is also the leading provider of charge card services to merchants." The named plaintiffs are: (1) California and New York corporations which operate businesses which have contracted with Amex and (2) the National Supermarkets Association, Inc. ("NSA"), "a voluntary membership-based trade association that represents the interests of independently owned supermarkets." The named plaintiffs seek to represent the following class, pursuant to *Rule 23 of the Federal Rules of Civil Procedure*:

> The class is comprised of all merchants that have accepted American Express charge cards (including the American Express corporate card), and have thus been forced to agree to accept American Express credit and debit cards, during the longest period of time permitted by the applicable statute of limitations . . . throughout the United States . . . .

C. The Card Acceptance Agreement. The basic contractual relationship between Amex and the plaintiffs is set forth in an affidavit of an Amex executive:

> American Express issues card products to its card members, which cardmembers **[**14]** then use in making purchases from participating merchants. Participating merchants with annual charge volume expected to be less than $ 10 million agree that, by submitting charges for payment by American Express, their relationship will be governed by the "Terms and Conditions for American Express(c) Card Acceptance" ("the Card Acceptance Agreement"). [4]

The Card Acceptance Agreement is a standard form contract issued by Amex. It may be terminated by either party "at any time by sending written notice to the other party." Further, Amex reserves the right

> **[*306]** to change this Agreement at any time. We will notify you of any change in writing at least ten (10) calendar days in advance. If the changes are unacceptable to you, you may terminate this Agreement as described in the section entitled "TERMINATING THIS AGREEMENT."

According to Amex, the Card Acceptance Agreement has "expressly permitted amendments upon notice" for more than twenty-five years. The Card Acceptance Agreement also contains a choice of law provision designating New York **[**15]** law as governing and, as Amex states, there is no dispute that the agreement "has always" contained this provision.

By contrast, it is only since 1999 that the Card Acceptance Agreement has contained a mandatory arbitration clause. That clause is nothing if not capaciously worded:

---

[4] Amex confirmed at oral argument that this $ 10 million figure relates to purchases made with Amex products, not to purchases made by credit cards generally.

For the purpose of this Agreement, Claim means any assertion of a right, dispute or controversy between you and us arising from or relating to this Agreement and/or the relationship resulting from this Agreement. Claim includes claims of every kind and nature including, but not limited to, initial claims, counterclaims, cross-claims and third-party claims and claims based upon contract, tort, intentional tort, statutes, regulations, common law and equity. We shall not elect to use arbitration under this arbitration provision for any individual Claim that you properly file and pursue in a small claims court of your state or municipality so long as the Claim is pending only in that court.

* * *

Any Claim shall be resolved upon the election by you or us, by arbitration pursuant to this arbitration provision and the code of procedure of the national arbitration organization to which the Claim is referred in effect **[**16]** at the time the Claim is filed. Claims shall be referred to the National Arbitration Forum (NAF), JAMS/Endispute (JAMS), or the American Arbitration Association (AAA), as selected by the party electing to use arbitration. If a selection by us of one of these organizations is unacceptable to you, you shall have the right within thirty (30) days after you receive notice of our election to select one of the other organizations listed to serve as arbitrator administrator.

At the heart of the instant appeal is the fact that the Agreement also contains the following provision:

IF ARBITRATION IS CHOSEN BY ANY PARTY WITH RESPECT TO A CLAIM, NEITHER YOU NOR WE WILL HAVE THE RIGHT TO LITIGATE THAT CLAIM IN COURT OR HAVE A JURY TRIAL ON THAT CLAIM . . . . FURTHER, YOU WILL NOT HAVE THE RIGHT TO PARTICIPATE IN A REPRESENTATIVE CAPACITY OR AS A MEMBER OF ANY CLASS OF CLAIMANTS PERTAINING TO ANY CLAIM SUBJECT TO ARBITRATION. THE ARBITRATOR'S DECISION WILL BE FINAL AND BINDING. NOTE THAT OTHER RIGHTS THAT YOU WOULD HAVE IF YOU WENT TO COURT MAY ALSO NOT BE AVAILABLE IN ARBITRATION.

There shall be no right or authority for any Claims to be arbitrated on a class action basis or on any basis involving **[**17]** Claims brought in a purported representative capacity on behalf of the general public, other establishments which accept the Card (Service Establishments), or other persons or entities similarly situated. Furthermore, Claims brought by or against a Service Establishment may not be joined or consolidated in the **[*307]** arbitration with Claims brought by or against any other Service Establishment(s), unless otherwise agreed to in writing by all parties.

Thus, the Card Acceptance Agreement not only precludes a merchant from bringing a class action lawsuit, it also precludes the signatory from having any claim arbitrated on anything other than an individual basis. The Card Acceptance Agreement further provides as follows:

This arbitration provision is made pursuant to a transaction involving interstate commerce, and shall be governed by the Federal Arbitration Act, *9 U.S.C. Sections 1-16*, as it may be amended (the FAA). The arbitrator shall apply applicable substantive law consistent with the FAA . . . . In conducting the arbitration proceeding, the arbitrator shall not apply the Federal or any state rules of civil procedure or rules of evidence. The arbitrator shall apply the applicable provisions **[**18]** of the Code of Procedure of the NAF, JAMS or AAA, as applicable to matters relating to evidence and discovery. [5]

D. The Plaintiffs' Substantive Claims. The plaintiffs' dispute with Amex rests upon the distinction between "charge cards" and "credit cards." The district court explained the distinction as follows:

---

[5] The plaintiffs make no challenge to this preemption of the Federal Rules of Civil Procedure by the rules of the various arbitration firms listed in the Card Acceptance Agreement. We note, however, that some commentators have argued that plaintiffs are placed at a distinct disadvantage by class arbitration rules of these firms. See Daniel R. Higginbotham, "Buyer Beware: Why the Class Arbitration Waiver Clause Presents a Gloomy Future for Consumers," *58 Duke L.J. 103, 123 (2008)* ("Regarding many important issues . . . the rules [of arbitration firms] are either silent or diverge significantly from the Federal Rules of Civil Procedure, raising serious questions as to the ability of class arbitration to adequately resolve disputes.").

> A charge card requires its holder to pay the full outstanding balance at the end of a standard billing cycle. A credit card, by contrast, allows the **[**19]** cardholder to pay a portion of the amount owing at the close of a billing cycle, subject to interest charges. In plain terms, the credit card is a means of financing purchases, the charge card is a method of payment.

*In re American Express Merchants Litig., 2006 U.S. Dist. LEXIS 11742, 2006 WL 662341, at *1 n.6*.

According to the plaintiffs, Amex had until recent years centered its business on the issuance of corporate and personal charge cards to corporate clients and affluent consumers. Amex is alleged to be the undisputed leader in this market, to the extent that it "issues Corporate Cards to at least 70% of the companies included in the Fortune 500, and is likewise the leading issuer of Corporate Cards to middle-market companies . . . and small businesses." The plaintiffs further assert that "[h]olders of charge cards are more affluent than credit cardholders, and a vastly higher percentage of charge cards than credit cards are held by businesses and used for business travel and other corporate purposes." In fact, the plaintiffs allege that Amex itself contends that "the average purchase on an American Express card is 17% higher than the average purchase made on a credit card."

Thus, the holder of a charge card **[**20]** is likely to be "a higher class of customer" and, as such, is particularly attractive to merchants such as the plaintiffs. Amex is certainly not unaware of this attraction, and as a result of it, Amex has traditionally been able to charge high "merchant discount fees," which are the fees a card issuer withholds as a percentage of each **[*308]** purchase made with its card at the merchant's establishment. These fees, the plaintiffs aver, "are at least 35% higher than competitive rates" applicable to mass-market credit cards such as Visa, Mastercard, and Discover.

Over the last decade, however, the plaintiffs contend that Amex's "business in the markets for credit card issuance and credit card services has grown dramatically." Specifically, Amex has in recent years created new credit card products "marketed to college students, young adults and others who would certainly not produce the high per-transaction spending that Amex uses to justify [the] high [merchant] discount fees. By leveraging its market power in corporate and personal charge cards, however, American Express was able to compel merchants to accept its new revolving credit card product[s] at the same elevated discount rate, which vastly **[**21]** exceeded the rate for comparable Visa, MasterCard or Discover products."

According to the plaintiffs, the vehicle of this compulsion is the "Honor All Cards" provision contained in the Card Acceptance Agreement. Under the Agreement, a merchant does not contract to accept any one Amex product as a form of payment. Rather, the Agreement applies

> to your acceptance of American Express(c) Cards. . . . American Express Card(s) . . . shall mean any card or other account access device issued by American Express Travel Related Services Company, Inc., or its subsidiaries or affiliates or its or their licensees bearing the American Express name or an American Express trademark, service mark or logo.

The plaintiffs assert that, by means of the "Honor All Cards" provision, merchants are faced with the choice of paying supracompetitive merchant discount fees (i.e., fees above competitive levels) on Amex's new mass-market products or "inevitably los[ing] a significant portion of the sales they receive from businesses, travelers, affluent consumers, and others" who are the traditional users of Amex charge cards. This, the plaintiffs claim, amounts to an illegal "tying arrangement," in violation of Section 1 **[**22]** of the Sherman Act, *15 U.S.C. § 1*. [6]

---

[6] In a definition that has become classic, the Supreme Court has defined a tying arrangement as "an agreement by a party to sell one product but only on the condition that the buyer also purchases a different (or tied) product, or at least agrees that he will not purchase that product from any other supplier." *Northern Pacific Ry. Co. v. United States, 356 U.S. 1, 5-6, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958)*. A tying arrangement will violate *Section 1* of the Sherman Act if "the seller has appreciable economic power in the tying product market and if the arrangement affects a substantial volume of commerce in the tied market." *Eastman Kodak Co. v. Image Technical Servs., 504 U.S. 451, 462, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)* (internal quotation marks omitted).

E. The District Court's Decision. Amex moved to compel arbitration pursuant to the terms of the Card Acceptance Agreement. In its March 15, 2006 opinion, the district court granted Amex's motion, first holding that the arbitration clause in the Agreement was "a paradigmatically broad clause" which was certainly applicable to the dispute between the parties. *In re American Express Merchants Litig., 2006 U.S. Dist. LEXIS 11742, 2006 WL 662341, at *4*. The district court proceeded to consider **[**23]** the plaintiffs' contention that enforcement of the class action waiver would effectively strip them of the ability to assert their claims because "each individual plaintiff would have to incur discovery costs amounting to hundreds of thousands of dollars, despite seeking average damages of only $ 5000." Id. The district court expressed skepticism that this argument amounted to much:

> **[*309]** Plaintiffs' contention . . . that the costs of individual arbitration would eclipse the value of any potential recovery, ignores the statutory protections provided by the Clayton Act. *Section 4* of the Clayton Act provides that "any person who shall be injured in his business or property by reason of anything forbidden in the anti-trust laws . . . shall recover threefold the damages by him sustained, and the cost of suit, including a reasonable attorney's fee." *15 U.S.C. 15(a)* . . . .

*2006 U.S. Dist. LEXIS 11742, [WL] at *5* (footnote omitted).

This observation was quickly reduced to dicta, however. This is because the district court proceeded to hold that "[t]he enforceability of the collective action waivers is a claim for the arbitrator to resolve. Issues relating to the enforceability of the contract and its specific provisions are for **[**24]** the arbitrator, once arbitrability is established." *2006 U.S. Dist. LEXIS 11742, [WL] at *6*. Thus, the district court concluded that all of the plaintiffs' substantive antitrust claims, as well the question of whether or not the class action waivers were enforceable, were subject to arbitration.

The plaintiffs also made two additional arguments before the district court. First, they contended that the class action waiver could not be enforced against those named plaintiffs who had contracted with Amex before the 1999 inclusion of the mandatory arbitration clause in the Card Acceptance Agreement. Amex purportedly informed these plaintiffs of the inclusion of the clause by means of an amendment to the Agreement. The plaintiffs contended, however, that (1) Amex had not produced sufficient evidence of the fact that the "pre-1999 plaintiffs" had ever received this amendment and (2) even if the plaintiffs had received the amendment, their original merchant contract with Amex did not allow the subsequent introduction of an arbitration clause. The district court rejected these arguments, concluding that the plaintiffs had not successfully rebutted the presumption of mailing to which Amex is entitled and that the arbitration **[**25]** amendment constituted a reasonable addition to the original merchant contract. *2006 U.S. Dist. LEXIS 11742, [WL] at *7-*9*.

Second, the plaintiffs contended that the class action waiver was not enforceable against named plaintiffs and class members who were citizens of California because the waivers were unconscionable under that State's law. The district court concluded that this was "a substantive matter[] to be raised before the arbitrator." *2006 U.S. Dist. LEXIS 11742, [WL] at *9*.

The district court concluded as follows: "[Amex's] motion to compel arbitration of all claims against it is granted. Since this Court finds that all of plaintiffs' claims against [Amex] are subject to arbitration, it further orders that plaintiffs' cases against [Amex] be dismissed." *2006 U.S. Dist. LEXIS 11742, [WL] at *10*. The plaintiffs filed a timely appeal.

ANALYSIS

Before we proceed to the weighing of the parties' arguments, we think it would be helpful to set forth some of the issues which are not raised on this appeal. Specifically, these are issues which are commonly raised in the general run of arbitration cases with which this Court is faced.

First, the plaintiffs are not contending that the mandatory arbitration clause contained in the Card Acceptance Agreement is not broad enough to **[**26]** cover their antitrust claims. See *JLM Indus., Inc. v. Stolt-Nielsen SA, 387 F.3d 163, 175 (2d Cir. 2004)* (holding that antitrust claims were arbitrable under a broad arbitration clause even though the claims concerned "matters beyond the making of a particular contract between the parties and the **[*310]** performance of its terms"). Further, while they certainly do not deny that this case is one of considerable legal and evidentiary complexity, the plaintiffs do not argue that their claims are too complex to be properly handled in arbitration. See *id. at 181* (rejecting argument that claims involving a "horizontal price-fixing conspiracy" were beyond the capabilities of an arbitral panel). Nor do the plaintiffs take issue with the dicta in JLM to the effect that this Court would view "skeptically" any argument positing that the "assertion of class claims should serve as a bar or deterrent to sending" a case to arbitration. *Id. at 180 n.9*. On the contrary, the plaintiffs expressly aver that they "are not averse to proceeding in a class-wide arbitration." [7] (Blue 29) The plaintiffs are therefore not seeking to revive "the ancient judicial hostility to arbitration" as a form of dispute resolution. **[**27]** *Halligan v. Piper Jaffray, Inc., 148 F.3d 197, 200 (2d Cir. 1998)*. In asking us to hold that the class action waiver in the Card Acceptance Agreement is unenforceable, however, the plaintiffs are implicitly asking us to limit the principle that "many features of arbitration by contract, including . . . procedure and choice of substantive law," *Hall Street Assocs., LLC v. Mattel, Inc., ___ U.S. ___, 128 S. Ct. 1396, 1404, 170 L. Ed. 2d 254 (2008)*, are to be left to the discretion of the contracting parties, unsupervised by judicial review. [8] Although we believe that it is a close question, we believe that the plaintiffs are correct.

A. Jurisdiction. ***HN1***[] Section 16(a)(3) of the FAA, *9 U.S.C. § 16(a)(3)*, provides that an appeal may be taken from "a **[**29]** final decision with respect to an arbitration that is subject to this title." Because "an order compelling arbitration and dismissing a party's underlying claims is a 'final decision with respect to an arbitration,'" *Green Tree Fin. Corp.-Alabama v. Randolph, 531 U.S. 79, 82, 121 S. Ct. 513, 148 L. Ed. 2d 373 (2000)*, there is no dispute that this Court has jurisdiction to hear the instant appeal.

B. Who Should Decide Whether the Class Action Waiver is Enforceable? The plaintiffs argue -- and we do not see that Amex posits any argument to the contrary -- that the district court erred in holding that the question of the class action waiver's enforceability is a matter for **[*311]** the arbitrator, not the court. This is plainly correct.

In Buckeye Check Cashing, Inc. v. Cardegna, the Supreme Court stated that

> ***HN2***[] [c]hallenges to the validity of arbitration agreements . . . can be divided into two types. One type challenges specifically the validity of the agreement to arbitrate. The other challenges the contract as a whole, either on a ground that directly affects the entire agreement (e.g. **[**30]** the agreement was fraudulently induced), or on the ground that the illegality of one of the contract's provisions renders the whole contract invalid.

---

[7] It is apparent that "[c]lass arbitration is a swiftly growing phenomenon. In late 2003, the American Arbitration Association ("AAA") introduced procedures for class arbitrations . . . . As of September 27, 2007, the AAA was administering more than 190 class arbitrations, and from July 10, 2006 until September 27, 2007 alone, the number of AAA-administered class arbitrations increased by more than 50%." David S. Clancy & Matthew M.K. Stein, "An Uninvited Guest: Class Arbitration and the Federal Arbitration Act's Legislative History," 63 Bus. Law. 55, 56 (2007). Clancy and Stein **[**28]** go on to argue that when Congress passed the Federal Arbitration Act, in 1925, it specifically envisioned arbitration as "something inherently prompt, inexpensive, and streamlined," and "did not expect that arbitrators would adjudicate anything like the modern class action . . . ." Id. at 61, 67. Although the argument that class proceedings in arbitration are incompatible with the Federal Arbitration Act is an intriguing one, we are presented with no such argument on this appeal.

[8] The principle was limited by the Court itself in Hall Street which held that parties are not free to compose arbitration agreements which provide for a greater scope of federal court review of arbitral awards than that set forth in the Federal Arbitration Act ("FAA"), *9 U.S.C. § 1 et seq*, because this would be at odds with the FAA's "substantiat[ion of] a national policy favoring arbitration with just the limited review needed to maintain arbitration's essential virtue of resolving disputes straightaway." *128 S. Ct. at 1405*.

546 U.S. 440, 444, 126 S. Ct. 1204, 163 L. Ed. 2d 1038 (2006) (citation omitted). The Court then held that if there is a challenge to "'the arbitration clause itself -- an issue which goes to the making of the agreement to arbitrate -- the federal court may proceed to adjudicate it. But [the FAA] does not permit the federal court to consider claims [which challenge] the contract generally.'" Id. at 445 (quoting Prima Paint Corp. v. Flood & Conklin Mfg. Co., 388 U.S. 395, 403-404, 87 S. Ct. 1801, 18 L. Ed. 2d 1270 (1967)).

The plaintiffs are plainly challenging the Card Acceptance Agreement's arbitration clause insofar as they dispute the enforceability of its class action waiver and, by extension, the validity of the parties' agreement to arbitrate. Their "challenge is to the arbitration clause itself," id., rather than to the entirety of the Card Acceptance Agreement. [9] This appeal therefore involves "a gateway dispute about whether the parties are bound by a given arbitration clause," a dispute which "raises a question of arbitrability for a court to decide." Howsam v. Dean Witter Reynolds, Inc., 537 U.S. 79, 84, 123 S. Ct. 588, 154 L. Ed. 2d 491 (2002) **[**31]** (internal quotation marks omitted); *accord* Kristian v. Comcast Corp., 446 F.3d 25, 55 (1 Cir. 2006); Jenkins v. First Am. Cash Advance of Georgia, LLC, 400 F.3d 868, 877 (11 Cir. 2005). [10] We will therefore proceed to consider whether the class action waiver contained in the Card Acceptance Agreement is enforceable.

C. [32] The Enforceability of Class Action Waiver Provisions: General Considerations**. The FAA was "enacted . . . to replace judicial indisposition to arbitration," Hall Street, 128 S. Ct. at 1402, and is, as we acknowledged at the outset of this opinion, an expression of "a strong federal policy favoring arbitration as an alternative means of dispute resolution." Hartford Accident & Indem. Co. v. Swiss Reinsurance Am. Corp., 246 F.3d 219, 226 (2d Cir. 2001). ***HN3***[] The favoring of arbitration is, however, somewhat tempered by the fact that "[a]rbitration is strictly a matter of contract." Thomson-CSF, S.A. v. Am. Arbitration Ass'n, 64 F.3d 773, 779 (2d Cir. 1995). Enhancing the federal policy favoring arbitration is therefore largely a matter of "mak[ing] arbitration agreements as **[*312]** enforceable as other contracts, but not more so." Opals on Ice Lingerie v. Body Lines, Inc., 320 F.3d 362, 369 (2d Cir. 2003) (internal quotation marks omitted).

This principle is set forth in ***HN4***[] Section 2 of the FAA, 9 U.S.C. § 2, which provides that an agreement to arbitrate "shall be valid, irrevocable, and enforceable, save upon such grounds as exist at law or in equity for the revocation of any contract." Section 2 is "the **[**33]** primary substantive provision" of the FAA which "create[s] a body of federal substantive law of arbitrability, applicable to any arbitration agreement within the coverage of the" FAA. Moses H. Cone Memorial Hosp. v. Mercury Constr. Corp., 460 U.S. 1, 24, 103 S. Ct. 927, 74 L. Ed. 2d 765 (1983). We join other Circuits that have evaluated arbitration clauses containing class action waivers under the federal substantive law of arbitrability. See Gay v. Credit Inform, 511 F.3d 369, 394-95 (3d Cir. 2007) (holding class action waiver to be enforceable under Section 2 of the FAA notwithstanding claim that waiver was unconscionable under state law); Kristian, 446 F.3d at 63 ("Although Plaintiffs' challenges to the enforceability of the arbitration agreements could be evaluated through the prism of state unconscionability law, we have chosen to apply a vindication of statutory rights analysis, which is also part of the body of federal substantive law of arbitration . . . ."). We conclude that the plaintiffs here have demonstrated that enforcement of the class action waiver in the Card Acceptance Agreement to cover their claims against Amex under federal antitrust statutes would be incompatible with the federal substantive law **[**34]** of arbitration.

We begin by recognizing that ***HN5***[] insofar as a plaintiff may be said to possess a "right" to litigate an action in federal court as a class action under Rule 23 of the Federal Rules of Civil Procedure, the right "is a procedural right

[9] The plaintiffs' challenge to the enforceability of the class action waiver is distinct from any contention to the effect that Amex's alleged tying arrangement renders the entire Card Acceptance Agreement invalid. See Amex Brief at 49. The latter issue is not before us.

[10] In Green Tree Financial Corp. v. Bazzle, 539 U.S. 444, 123 S. Ct. 2402, 156 L. Ed. 2d 414 (2003), the Supreme Court was faced with an arbitration agreement which was ambiguous as to whether it permitted arbitration proceedings to be conducted on a class basis. The Court concluded that this was a matter of contract interpretation which "should be for the arbitrator, not the courts, to decide." Id. at 453. Here, we do not face an issue of contract interpretation; the Card Acceptance Agreement is unambiguous in forbidding arbitration to proceed on a class basis.

only, ancillary to the litigation of substantive claims." Deposit Guar. Nat'l Bank v. Roper, 445 U.S. 326, 332, 100 S. Ct. 1166, 63 L. Ed. 2d 427 (1980). Nevertheless, the Supreme Court has repeatedly recognized the utility of the class action as a vehicle for vindicating statutory rights. This is especially true with respect to the Court's recognition that the class action device is the only economically rational alternative when a large group of individuals or entities has suffered an alleged wrong, but the damages due to any single individual or entity are too small to justify bringing an individual action. The Court made the point forcefully more than thirty years ago in the context of an antitrust action:

> A critical fact in this litigation is that petitioner's individual stake in the damages award he seeks is only $ 70. No competent attorney would undertake this complex antitrust action to recover so inconsequential an amount. Economic reality dictates that petitioner's suit **[**35]** proceed as a class action or not at all.

Eisen v. Carlisle & Jacquelin, 417 U.S. 156, 161, 94 S. Ct. 2140, 40 L. Ed. 2d 732 (1974). Thus, as the Court later opined, "'[t]he policy at the very core of the class action mechanism is to overcome the problem that small recoveries do not provide the incentive for any individual to bring a solo action prosecuting his or her rights.'" Amchem Prods., Inc. v. Windsor, 521 U.S. 591, 617, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997) (quoting Mace v. Van Ru Credit Corp., 109 F.3d 338, 344 (7th Cir. 1997)); see also Roper, 445 U.S. at 338 ("[A class action] may motivate [plaintiffs] to bring cases that for economic reasons might not be brought otherwise[, thereby] vindicating the rights of individuals who otherwise might not consider it worth the candle to embark on litigation in which the optimum result might be more than consumed by the cost."); Shady **[*313]** Grove Orthopedic Assocs., P.A. v. Allstate Ins. Co., 549 F.3d 137, 144 (2d Cir. 2008) ("[C]lass actions are designed in large part to incentivize plaintiffs to sue when the economic benefit would otherwise be too small, particularly when taking into account the court costs and attorneys' th fees typically incurred."); Carnegie v. Household Int'l, Inc., 376 F.3d 656, 661 (7 Cir. 2004) **[**36]** ("[T]he realistic alternative to a class action is not 17 million individual suits, but zero individual suits, as only a lunatic or a fanatic sues for $ 30.00.").

The Supreme Court has at least implicitly held that a provision in an arbitration agreement barring class procedures is not per se unenforceable because, as noted above, it held in Bazzle that the question of whether or not an ambiguous arbitration clause contained a class action ban was a matter for the arbitrator, not the court, to decide. 539 U.S. at 453. Beyond this oblique ruling, however, the Supreme Court has yet to squarely face the question of whether or not there are conditions under which a class action ban would be incompatible with the FAA. But, as both parties here acknowledge, the Court has decided cases which involved matters which, if ancillary, are certainly pertinent to this question.

Gilmer v. Interstate/Johnson Lane Corp., 500 U.S. 20, 111 S. Ct. 1647, 114 L. Ed. 2d 26 (1991), involved a claim under the Age Discrimination in Employment Act ("ADEA"), 29 U.S.C. § 621 et seq. Specifically, the plaintiff, a manager at a brokerage firm, asserted that he had been terminated by the firm in violation of the ADEA. Id. at 23. After the **[**37]** plaintiff had filed suit in federal district court, the defendant firm moved to compel arbitration pursuant to a mandatory arbitration provision contained in the rules of the New York Stock Exchange ("NYSE"), to which the plaintiff had agreed to be bound when he became a registered securities representative. Id. at 23-24.

The Court held that because "[i]t is by now clear that statutory claims may be the subject of an arbitration agreement," the arbitration clause was enforceable "'unless Congress itself has evinced an intention to preclude a waiver of judicial remedies for the statutory rights at issue.'" Id. at 26 (quoting Mitsubishi Motors Corp. v. Soler Chrysler-Plymouth, Inc., 473 U.S. 614, 628, 105 S. Ct. 3346, 87 L. Ed. 2d 444 (1985)). Even though the Court acknowledged that "the ADEA is designed not only to address individual grievances, but also to further important social policies," id. at 27, the Court could discern no Congressional intent to preclude ADEA claims from being subject to arbitration. The Court also considered the plaintiff's argument to the effect "that **[**38]** arbitration procedures cannot adequately further the purposes of the ADEA because they do not provide for broad equitable relief and class actions." Id. at 32. The Court rejected this contention:

> As the court below noted, however, arbitrators do have the power to fashion equitable relief. Indeed, the NYSE rules applicable here do not restrict the types of relief an arbitrator may award, but merely refer to "damages and/or other relief." The NYSE rules also provide for collective proceedings. But even if the arbitration could not

> go forward as a class action or class relief could not be granted by the arbitrator, the fact that the ADEA provides for the possibility of bringing a collective action does not mean that individual attempts at conciliation were intended to be barred.

Id. (citations, internal quotation marks, and brackets omitted).

[*314] Amex directs our attention to the final sentence of this passage, and other courts have relied upon it in upholding mandatory arbitration clauses. Amex Brief at 19. In particular, the Third Circuit, in *Johnson v. West Suburban Bank, 225 F.3d 366 (3 Cir. 2000)*, dealt with a claim under the Truth in Lending Act ("TILA"), *15 U.S.C. § 1601 et seq.* The plaintiffs **[**39]** argued that their class action claim in federal court was not subject to mandatory arbitration because TILA

> effectively create[s] an unwaivable right to bring a class action. . . . [In TILA,] Congress enacted a scheme in which the court hearing a class action could set a damage figure up to a certain amount for certain patterns of conduct. This judicial flexibility in imposing damages up to $ 500,000 only exists if a class action is allowed, as individual plaintiff claims are generally capped at $ 1,000. Therefore, a right of classes to a judicially crafted punitive remedy is lost if this court orders arbitration of Johnson's claims.

Id. at 377.

The Third Circuit held that "[t]his argument is unavailing in light of" Gilmer. Id. The court noted that Gilmer involved a claim under the ADEA, a statute which explicitly provides in its text for the bringing of class actions. Id. (citing *29 U.S.C. § 626(b)*). In spite of this, the court concluded, "the Supreme Court still ruled that the ADEA did not preclude arbitration notwithstanding the unavailability of the class action remedy there." *Id.*; see also *Carter v. Countrywide Credit Indus., Inc., 362 F.3d 294, 298 (5 Cir. 2004)* ("[W]e reject the **[**40]** [plaintiffs'] claim that their inability to proceed collectively [in arbitration] deprives them of substantive rights available under the [Fair Labor Standards Act.] The Supreme Court rejected similar arguments concerning the ADEA in Gilmer . . . .").

We cannot agree with this view of Gilmer because a collective, and perhaps a class action remedy, in fact was available in that case. As set forth above, the Supreme Court explicitly noted that the arbitration rules of the NYSE provided for the conduct of collective arbitration. *500 U.S. at 32*. At the time Gilmer was decided, the NYSE's rules may also have permitted arbitration claims submitted as class actions. Compare NYSE Rule 600(d) (2008) ("A claim submitted as a class action shall not be eligible for arbitration under the Rules of the Exchange.") with NYSE Rule 600 (1991) (containing no prohibition on class actions). The statement in Gilmer that the arbitration clause would be enforceable "even if" class remedies were available evidences that the Court itself was uncertain, but acknowledged the probability, that class action were feasible under the NYSE's rules. Moreover, it is dicta that does not apply here. The plaintiffs do not **[**41]** proffer the argument rejected in Gilmer, namely that the class action waiver is unenforceable merely because the relevant statute allows class actions. Rather, the conundrum presented by the instant appeal is more nuanced: whether the mandatory class action waiver in the Card Acceptance Agreement is enforceable even if the plaintiffs are able to demonstrate that the practical effect of enforcement of the waiver would be to preclude their bringing Sherman Act claims against Amex in either an individual or collective capacity.

After the Third Circuit's decision in Johnson, the Supreme Court came somewhat closer to this issue in Green Tree Financial Corp.-Alabama v. Randolph. That case also involved a claim under TILA and a consideration of the enforcement of a mandatory arbitration clause. **[*315]** The specific issue to be decided was "whether an arbitration agreement that does not mention arbitration costs and fees is unenforceable because it fails to affirmatively protect a party from potentially steep arbitration costs." *Green Tree, 531 U.S. at 82*. Specifically, the plaintiff argued "that the arbitration agreement's silence with respect to costs and fees creates a 'risk' that she will be required **[**42]** to bear prohibitive arbitration costs if she pursues her claims in an arbitral forum, and thereby forces her to forgo any claims she may have had against [the defendants]." *Id. at 90*. The Court rejected this argument because the plaintiff had proved no more than that the asserted "risk" was hypothetical:

> It may well be that the existence of large arbitration costs could preclude a litigant such as Randolph from effectively vindicating her federal statutory rights in the arbitral forum. But the record does not show that Randolph will bear such costs if she goes to arbitration. Indeed, it contains hardly any information on the

> matter. . . . The record reveals only the arbitration agreement's silence on the subject, and that fact alone is plainly insufficient to render it unenforceable. The "risk" that Randolph will be saddled with prohibitive costs is too speculative to justify the invalidation of an arbitration agreement.

Id. at 90-91 (footnote omitted); see also In re Cotton Yarn Antitrust Litigation, 505 F.3d 274, 285 (4th Cir. 2007) ("[I]f a party could demonstrate that the prohibition on class actions likely would make arbitration prohibitively expensive, such a showing could invalidate **[**43]** an agreement.").

Although the Court in Randolph declined to consider whether the arbitration agreement was unenforceable because it may have precluded the plaintiff from bringing her claims under TILA as a class action, 531 F.3d at 92 n.7, courts have relied upon its holding to uphold such bans. See In re Cotton Yarn Antitrust Litigation, 505 F.3d at 285 ("This kind of uninformed speculation about cost falls far short of satisfying the plaintiffs' burden of proving that the costs of proceeding individually against the defendants would be prohibitive and thus would prevent them from effectively vindicating their statutory rights."); Livingston v. Assocs. Fin., Inc., 339 F.3d 553, 557 (7th Cir. 2003) ("In the present case, the Livingstons have not offered any specific evidence of arbitration costs that they may face in this litigation, prohibitive or otherwise, and have failed to provide any evidence of their inability to pay such costs . . . ."); Adkins v. Labor Ready, Inc ., 303 F.3d 496, 503 (4th Cir. 2002) ("Adkins makes no showing of the specific financial status of any of the plaintiffs at the time this action was brought. He provides no basis for a serious estimation of how much **[**44]** money is at stake for each individual plaintiff.").

D. Is the Class Action Waiver in the Card Acceptance Agreement Enforceable? Randolph is controlling here to the extent that it holds that ***HN6***[] when "a party seeks to invalidate an arbitration agreement on the ground that arbitration would be prohibitively expensive, that party bears the burden of showing the likelihood of incurring such costs." 531 U.S. at 92. We find that the district court erred in ruling that the plaintiffs had failed to bear this burden because they had "ignore[d] the statutory protections provided by the Clayton Act." In re American Express Merchants Litigation, 2006 U.S. Dist. LEXIS 11742, 2006 WL, at *5. On the contrary, the record abundantly supports the plaintiffs' argument that they would incur prohibitive costs if compelled to arbitrate under the **[*316]** class action waiver. [11] The Card Acceptance Agreement therefore entails more than a speculative risk that enforcement of the ban will deprive them of substantive rights under the federal antitrust statutes.

This argument is compellingly set forth in an affidavit filed in the district court by Gary L. French, Ph.D., an economist associated with Nathan Associates Inc., a financial consulting firm retained by the plaintiffs. Dr. French states that the purpose of his affidavit is "to provide an expert opinion concerning the likely costs and complexity of an expert economic study concerning the liability and damages" relating to this action, and to compare this with "the potential recovery of damages by an American Express Card merchant with annual sales volume of $ 10 million or less, such as most if not all of the named plaintiffs in this litigation, and to provide my opinion **[**46]** as to whether it would be economically rational for such a merchant to pursue recovery of damages given the likely out-of-pocket costs of the arbitration or litigation proceeding." Dr. French continues:

> Due to the complexity and analytical intensity of an antitrust study, total expert fees and expenses usually are substantial, even in a non-class action involving an individual plaintiff. In my experience, even a relatively small economic antitrust study will cost at least several hundred thousand dollars, while a larger study can easily exceed $ 1 million. . . . In summary, the cost of [Nathan Associates'] expert assistance in individual plaintiff antitrust cases has ranged from about $ 300 thousand to more than $ 2 million. However, after reviewing the complaint and doing some preliminary research in this case, it is my opinion that . . . the cost for this case will fall in the middle of the range of [Nathan Associates'] experience.

---

[11] ***HN7***[] "We review . . . mixed questions of law and fact either de novo or under the clearly erroneous standard depending on whether the question is predominantly legal or factual." United States v. Selioutsky, 409 F.3d 114, 119 (2d Cir. 2005) **[**45]** (internal citations omitted). The plaintiffs' estimated expert witness fees were essentially undisputed. We review de novo the district court's application of the Clayton Act to undisputed facts. See Village of Grand View v. Skinner, 947 F.2d 651, 656 (2d Cir. 1991) ("Because the issues presented on this appeal involve the application of a statutory standard to undisputed facts, the appropriate standard of review is de novo."). We note, however, that our ruling would not be different under a clearly erroneous standard.

> An economic antitrust study . . . is necessarily complex and costly because it involves investigating several antitrust liability and damages issues and, potentially involves numerous tasks and services. The antitrust liability and damages issues that an **[**47]** expert economist will study in this matter will likely include:
> . defining the relevant tying and tied product markets and determining whether they are distinct;
> . determining whether the defendant has market (monopoly) power in the tying product market, . . .;
> . determining whether the defendant has exercised its market (monopoly) power to enforce the tying arrangement;
> . determining whether the tying arrangement has an anticompetitive effect in the tied product market;
> . determining what the merchant fees would have been but for the alleged anticompetitive tying; and
> . quantifying the dollar amount of damages to the plaintiffs as a consequence of the tying arrangement.

Dr. French then proceeds to consider the economic rationality of bringing an **[*317]** individual action against Amex in light of these substantial expert witness costs:

> Based upon publicly available information . . . I have estimated that a small merchant with $ 10 million of annual sales, on average, might calculate and expect $ 754 of economic damages for the year 2001, which is roughly the midpoint of the damage period covered by this litigation. . . . Multiplying the $ 754 damage figure by four, gives a rough estimate of $ 3,015 **[**48]** total damages for the whole four-year damage period, or $ 9,046 when trebled, assuming that the merchant's sales remain constant at $ 10 million for the four-year period.
> . . . The median volume merchant, with half of the named plaintiffs having more and half having less American Express charge volume, and having reported $ 230,343 American Express Card volume in 2003, might expect four-year damages of $ 1,751, or $ 5,252 when trebled. . . . The largest volume named plaintiff merchant, with reported American Express Card volume of $ 1,690,749 in 2003, might expect four-year damages of $ 12,850, or $ 38,549 when trebled.
> In my opinion as a professional economist . . . it would not be worthwhile for an individual plaintiff . . . to pursue individual arbitration or litigation where the out-of-pocket costs, just for the expert economic study and services, would be at least several hundred thousand dollars, and might exceed $ 1 million.

In Kristian, the First Circuit found that expert affidavits similar to Dr. French's "demonstrat[ed] that without some form of class mechanism -- be it class action or class arbitration -- a consumer antitrust plaintiff will not sue at all." *446 F.3d at 58*. **[**49]** We hold that the plaintiffs here have also demonstrated that their antitrust claims against Amex can, for all intents and purposes, only be pursued through the aggregation of individual claims, either in class action litigation or in class arbitration.

The district court, which held that the enforceability of the class action waiver in the Card Acceptance Agreement was a matter to be determined in arbitration, did not deal head on with Dr. French's affidavit. Dr. French's conclusion that "in a non-class action involving an individual plaintiff . . . even a relatively small economic antitrust study will cost at least several hundred thousand dollars" was essentially uncontested. Instead of addressing this figure, the district court misinterpreted and misapplied the statutory protections available to the plaintiffs. Citing Section 4 of the Clayton Act, *15 U.S.C. § 15(a)*, the district court noted that a plaintiff who had established a Sherman Act claim against a defendant "shall recover threefold the damages by him sustained, and the cost of suit, including a reasonable attorney's fee." *In re American Express Merchants Litig ., 2006 U.S. Dist. LEXIS 11742, 2006 WL 662341, at *5*; see also *Dambrosio v. Comcast Corp., No. Civ.A.03-6604, 2005 U.S. Dist. LEXIS 35871, 2005 WL 3543794, at *16 (E.D. Pa. Dec. 27, 2005)* **[**50]** (asserting that Section 4 of the Clayton Act "expressly provides for the recovery of attorneys' fees and expenses, [thereby] making the arbitral forum accessible to individual plaintiffs and allowing them to vindicate the full range of substantive rights granted to them" under the federal antitrust laws), vacated on other grounds, *2006 U.S. Dist. LEXIS 48163, 2006 WL 2058643 (E.D. Pa. Apr. 12, 2006)*.

This is true, but, as the plaintiffs correctly point out, the Clayton Act simply does not solve their problem. Besides the fact that the trebling of a small individual damages award is not going to pay for the expert fees Dr. French has estimated will be necessary to make an individual plaintiff's case here, there is an even more **[*318]** important legal consideration that the district court did not consider. In Crawford Fitting Co. v. J.T. Gibbons, Inc., the Supreme Court addressed ***HN8***[] fee-shifting for expert witnesses under *Rule 54(d) of the Federal Rules of Civil Procedure* in an antitrust case, holding that "when a prevailing party seeks reimbursement for fees paid to its own expert witnesses, a federal court is bound by the limit of [*28 U.S.C.] § 1821(b)* . . . ." *482 U.S. 437, 439, 107 S. Ct. 2494, 96 L. Ed. 2d 385 (1987)*. [12] We note that that figure is now **[**51]** set at a $ 40 per diem. Further, as the plaintiffs assert, there are no provisions "in the rules of any of the arbitral bodies designated [in the Card Acceptance Agreement] that would allow such costs to be awarded where they are not authorized by the applicable fee shifting statute." Even with respect to reasonable attorney's fees, which are shifted under Section 4 of the Clayton Act, the plaintiffs must include the risk of losing, and thereby not recovering any fees, in their evaluation of their suit's potential costs. [13] Thus, Amex's reply to the effect that "[a]n arbitrator can award the same reasonable costs that are recoverable by statute," plainly does not solve the problem.

Amex also informs us that a putative antitrust class action challenging the "Honor All Cards" provision in the Card Acceptance Agreement has been brought in the U.S. District Court for the Southern District of New York by a merchant plaintiff who is apparently not subject to the class action waiver provision in the Agreement. See *The Marcus Corp. v. American Express Co., No. 04cv5432, 2005 U.S. Dist. LEXIS 13170, 2005 WL 1560484 (S.D.N.Y. July 5, 2005)*. Further pointing out that the plaintiffs in that action are represented by the same counsel who represent the plaintiffs here, Amex speculates that "[p]resumably" the plaintiffs here, "the Marcus plaintiff, and their common attorneys and experts could reach an agreement as to how the experts' cost of preparation could be shared." This is an intriguing proposition, but we do not believe it can survive the application of the following **[**53]** provision of the arbitration clause in the Card Acceptance Agreement: "The arbitration proceeding and all testimony, filings, documents and any information relating to or presented during the arbitration proceedings shall be deemed to be confidential information not to be disclosed to any other party." Thus, any proposal that the plaintiffs share the services of expert witnesses employed in the Marcus action runs aground on the fact that the individual plaintiffs have contracted with Amex not to share such information with anyone. [14]

[*319] Concluding that Amex has brought no serious challenge to the plaintiffs' demonstration that their claims cannot reasonably be pursued as individual actions, whether in federal court or in arbitration, we find ourselves in agreement with the plaintiffs' contention that enforcement of the class action waiver in the Card Acceptance Agreement "flatly ensures that no small merchant may challenge American Express's tying arrangements under the federal antitrust laws." The effective negation of a private suit under the antitrust laws is troubling because such "private suits provide a significant supplement to the limited resources available to the Department of Justice for enforcing the antitrust laws and deterring violations." *Reiter v. Sonotone Corp., 442 U.S. 330, 344, 99 S. Ct. 2326, 60 L. Ed. 2d 931 (1979)*. This may be especially true with respect to private antitrust suits brought as class actions. See Dando B. Cellini, "An Overview of Antitrust Class Actions," 49 Antitrust L.J. 1501, 1506 (1980) ("I think it is obvious from the experience over the last fifteen years since the 1966 amendments **[**55]** to *Rule 23* were adopted that linking an antitrust claim with a class action allegation can be devastatingly effective.").

---

[12] Quoting *Paschall v. Kansas City Star Co., 695 F.2d 322, 338-39 (8 Cir. 1982)*, Amex suggests that if an expert's findings prove "to be so 'crucial' and 'indispensable' that an arbitrator determines that the case absolutely could not have been pursued without them, the arbitrator might award such costs." Amex Brief at 28 We are skeptical, however, that an arbitrator might follow Paschall because it appears unlikely that its holding survives Crawford Fitting Co. See *Gilbert v. City of Little Rock, Ark., 709 F. Supp. 856, 862 (E.D. Ark. 1987)* **[**52]** (holding that Paschall is inconsistent with the holding of Crawford Fitting to the effect that expert witness fees are to be determined solely in accordance with *28 U.S.C. § 1821(b)*).

[13] The plaintiffs' counsel has submitted a detailed affidavit which estimates that the cost of depositions and document management would exceed $ 300,000.

[14] One of the amici makes the following suggestion: "Whatever costs the Merchant Plaintiffs might ultimately bear in procuring expert testimony in this case, those costs may be offset by the cost savings of conducting an arbitration proceeding, rather than an all-out federal trial." Brief of Business Roundtable at 16. But this misses the point. While it may be true that an individual arbitration brought by a plaintiff will likely cost less than a trial in federal district court, the fact remains that the plaintiffs have demonstrated to our satisfaction that neither an individual arbitration, nor an individual litigation would make any economic sense in **[**54]** light of the likelihood that expert fees far in excess of any likely individual recovery would need to be expended in either action.

In Mitsubishi, the Supreme Court held that there is by no means any necessary reason to prevent sending a Sherman Act claim to arbitration because "so long as the prospective litigant effectively may vindicate its statutory cause of action in the arbitral forum, the statute will continue to serve both its remedial and deterrent function." *473 U.S. at 637*. The Mitsubishi Court recognized, however, that there might be instances in which an arbitration agreement contained provisions that would be unenforceable because they would prevent a prospective litigant from vindicating its rights under the Sherman Act in an arbitral forum. Specifically, the plaintiff in Mitsubishi speculated that the choice-of-forum and choice-of-law clauses in the arbitration agreement at issue would effectively preclude the arbitrator from determining the plaintiff's substantive claims in accordance with the terms of the Sherman Act. The Court responded that it would not prevent the case from going to arbitration based upon mere conjecture as to what body of law the arbitrator would apply, **[**56]** but also continued as follows:

> We merely note that in the event the choice-of-forum and choice-of-law clauses operated in tandem as a prospective waiver of a party's right to pursue statutory remedies for antitrust violations, we would have little hesitation in condemning the agreement as against public policy.

Id. at 637 n.19.

We readily acknowledge that this statement is dicta, but it is nevertheless dicta grounded upon a firm principle of ***antitrust law*** to the effect that ***HN9***[] an agreement which in practice acts as a waiver of future liability under the federal antitrust statutes is void as a matter of public policy. More than a half-century ago, the Supreme Court stated that "in view of the public interest in vigilant enforcement of the antitrust laws through the instrumentality of the private treble-damage action," an agreement which confers even "a partial immunity from civil liability for future violations" of the antitrust laws is inconsistent with the public interest. *Lawlor v. Nat'l Screen Serv. Corp., 349 U.S. 322, 329, 75 S. Ct. 865, 99 L. Ed. 1122 (1955)*; see also *Minnesota Mining and Mfg. Co. v. Graham-Field, **[*320]** Inc., No. 96cv3839, 1997 U.S. Dist. LEXIS 4457, 1997 WL 166497, at *3 (S.D.N.Y. Apr. 9, 1997)* ("GFI could not have waived [its **[**57]** antitrust] claim in the releases because a prospective waiver of an antitrust claim violates public policy.").

We believe that one of the amici has correctly applied the principle just set forth to the facts of the instant case:

> Plaintiff[s]-appellants' antitrust claims are complex and plaintiffs established for the record below that if they are precluded from participating in a collective action, the cost to each individual consumer to prosecute his or her claim is prohibitive relative to the consumer's potential recovery. If the collective action waiver is enforced, American Express will be shielded from liability, even where it may have violated the antitrust laws. Eradicating the private enforcement component from our ***antitrust law*** scheme cannot be what Congress intended when it included strong private enforcement mechanisms and incentives in the antitrust statutes. Because the class action waiver precluded the plaintiff[s]-appellants from enforcing their statutory rights, the arbitration provision is unenforceable.

Brief of American Antitrust Institute at 15; see also *Dale v. Comcast Corp., 498 F.3d 1216, 1224 (11th Cir. 2007)* ("Corporations should not be permitted to use class action **[**58]** waivers as a means to exculpate themselves from liability for small value claims.").

We therefore hold that the class action waiver in the Card Acceptance Agreement cannot be enforced in this case because to do so would grant Amex de facto immunity from antitrust liability by removing the plaintiffs' only reasonably feasible means of recovery. As already set forth, Section 2 of the FAA, *9 U.S.C. § 2*, provides that an agreement to arbitrate "shall be valid, irrevocable, and enforceable, save upon such grounds as exist at law or in equity for the revocation of any contract." Given that we believe that a valid ground exists for the revocation of the class action waiver, it cannot be enforced under the FAA.

E. Two Caveats. We emphasize two important limitations upon our holding. First, our decision in no way rests upon the status of the plaintiffs as "small" merchants. The plaintiffs repeatedly refer to themselves as "small merchants" and as "small businesses." But Amex is correct when it counters that the plaintiffs "undoubtedly hope that, by labeling themselves as 'small,' they can benefit from one line of case law where individual consumers have alleged that arbitration agreements were **[**59]** imposed as a result of unequal bargaining power." See, e.g., *Lowden v. T-*

Mobile USA, Inc., 512 F.3d 1213, 1219 (9th Cir. 2008) (holding class action waiver contained in cellular telephone unconscionable under Washington law); Skirchak, 508 F.3d at 60 (holding class action waiver in employment agreement unconscionable under Massachusetts law); Shroyer v. New Cingular Wireless Servs., Inc., 498 F.3d 976, 984 (9th Cir. 2007) (holding class action waiver in cellular phone contract unconscionable under California law). We do not follow these cases because they all rely on findings of unconscionability under state law, while we have relied here on a vindication of statutory rights analysis, which is part of the federal substantive law of arbitrability. Applying the latter, we have found that plaintiffs have demonstrated the necessity of some class mechanism in order to bring their claims against Amex. This demonstration is in no way dependant on the "size" of any or all of the merchant plaintiffs; it depends upon a showing that the size of the recovery received by any individual plaintiff will be too small to justify the expenditure of bringing an individual action.

[*321] Second, we stress that **[**60]** we do not hold here that class action waivers in arbitration agreements are per se unenforceable. We also do not hold that they are per se unenforceable in the context of antitrust actions. [15] Rather, ***HN10***[] we hold that each case which presents a question of the enforceability of a class action waiver in an arbitration agreement must be considered on its own merits, governed with a healthy regard for the fact that the FAA "is a congressional declaration of a liberal federal policy favoring arbitration agreements." Moses H. Cone Memorial Hosp., 460 U.S. at 24. We believe that the Eleventh Circuit has posited something like the correct approach:

> [T]he enforceability of a particular class action waiver in an arbitration agreement must be determined on a case-by-case basis, considering the totality of the facts and circumstances. Relevant circumstances may include, but are not limited to, the fairness of the provisions, the cost to an individual plaintiff of vindicating the claim when compared to the plaintiff's potential recovery, the ability to recover attorneys' fees and other costs and thus obtain legal representation to prosecute the underlying claim, the practical affect the waiver will **[**61]** have on a company's ability to engage in unchecked market behavior, and related public policy concerns.

Dale, 498 F.3d at 1224.

E. The Plaintiffs' Other Claims. Because we hold that the class action waiver in the Card Acceptance Agreement is unenforceable as to all plaintiffs under the federal substantive law of arbitration, the plaintiffs' **[**62]** contention that the waiver is not enforceable against named plaintiffs and class members who were citizens of California because the waivers are unconscionable under that State's law is moot. Similarly, the plaintiffs' appeal of the district court's holding that the class action waiver could be enforced against those named plaintiffs who had contracted with Amex before the 1999 inclusion of the mandatory arbitration clause in the Card Acceptance Agreement is also moot.

F. Relief. Because the plaintiffs have declared themselves amenable to proceeding to arbitration, we need not consider whether the class action waiver in the Card Acceptance Agreement is severable from the remainder of the arbitration provision contained therein. Further, in light of the fact that Amex declared at oral argument that it would reconsider its intention to proceed to arbitration should this Court not enforce the class action waiver, we remand to the district court to allow Amex the opportunity to withdraw its motion to compel arbitration.

CONCLUSION

---

[15] We note that the Fourth Circuit, in In re Cotton Yarn Antitrust Litigation, has upheld the enforcement in an antitrust action of a collective action ban contained in a contract between commercial parties. The case presented a claim of antitrust conspiracy, and the court pointed out that a bar upon joining the two defendants, who were jointly and severally liable, did not preclude the arbitrability of the claim because "co-conspirators are not necessary parties; a plaintiff can prove the existence of a conspiracy in an action against just one of the members of the conspiracy." 505 F.3d at 284. The court also noted "[t]he absence of an evidentiary record on . . . the actual cost of individual proceedings and . . . about the ability of the corporate plaintiffs to bear those speculative costs." Id. at 285. Again, such a record exists in the instant case.

The decision of the district court is REVERSED. We REMAND to the district court for further proceedings consistent with this opinion.

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

HN1[] **Defenses, Demurrers & Objections, Motions to Dismiss**

A court accepts the truthfulness of facts properly alleged by a plaintiff when considering a defendant's motion to dismiss.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

HN2[] **Motions to Dismiss, Failure to State Claim**

The standard for dismissal pursuant to Del. Ch. Ct. R. 12(b)(6) for failure to state a claim upon which relief can be granted is that the motion may be granted only if it appears with reasonable certainty that a plaintiff could not prevail on any set of facts that can be inferred from the pleading. In considering a motion to dismiss, a court is required to assume the truthfulness of all well-pleaded allegations of fact in the complaint. All facts of the pleadings and inferences that can reasonably be drawn therefrom are accepted as true. However, neither inferences nor conclusions of fact unsupported by allegations of specific facts are accepted. That is, the court need not blindly accept as true all allegations, nor must it draw all inferences from them in plaintiffs' favor unless they are reasonable inferences.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Contracts Law > Contract Formation > General Overview

Evidence > Burdens of Proof > Allocation

HN3[] **Motions to Dismiss, Failure to State Claim**

To survive a motion to dismiss with respect to a contract claim, a plaintiff must plead facts demonstrating: (1) the intent of the parties to be bound to (2) sufficiently definite terms supported by (3) consideration.

Business & Corporate Compliance > ... > Contract Formation > Offers > Definite Terms

HN4[] **Offers, Definite Terms**

Under Delaware law, an agreement to agree will be enforced if the agreement specifies all of the material and essential terms including those to be incorporated in the future contract.

Business & Corporate Compliance > ... > Contract Formation > Acceptance > Meeting of Minds

Contracts Law > Contract Interpretation > General Overview

HN5[] **Contract Formation, Meeting of Minds**

Delaware adheres to the "objective" theory of contracts: a contract's construction should be that which would be understood by an objective, reasonable third party. When measuring whether parties to an agreement intend to be bound to it, their overt manifestations of assent, rather than their subjective desires, control.

Business & Corporate Compliance > ... > Contract Formation > Acceptance > Meeting of Minds

Contracts Law > Standards of Performance > General Overview

Evidence > Burdens of Proof > Allocation

HN6[] **Contract Formation, Meeting of Minds**

For purposes of contract law, an intention to be bound by an agreement may be evidenced by continued performance in accordance with an agreement's terms.

Business & Corporate Compliance > ... > Contract Formation > Offers > Definite Terms

HN7[] Offers, Definite Terms

Delaware courts will not enforce an agreement that is indefinite as to any material or essential term.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

HN8[] Motions to Dismiss, Failure to State Claim

A motion to dismiss tests the sufficiency of the allegations made in a plaintiff's complaint. For the purposes of the motion, a court accepts the allegations made in a complaint, and determines whether those allegations are insufficient as a matter of law to sustain a requested cause of action. The standard has been called "plaintiff friendly" because it is. The court need not determine what a given cause of action will ultimately bear. Rather, the court passes judgment on whether the facts alleged in a complaint state a claim.

Business & Corporate Compliance > ... > Contract Formation > Offers > Definite Terms

HN9[] Offers, Definite Terms

A contract does not fail simply because the price is not specified. However, there must be some practicable method to determine necessary pricing.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN10[] Motions to Dismiss, Failure to State Claim

Allegations of fact found in a party's briefing, but absent from a party's complaint, cannot properly be considered by a court in determining a motion to dismiss for failure to state a claim.

Business & Corporate Compliance > ... > Contract Formation > Offers > Definite Terms

HN11[] Offers, Definite Terms

Industry norms occasionally may supply needed precision in a contract.

Contracts Law > Contract Interpretation > Good Faith & Fair Dealing

HN12[] Contract Interpretation, Good Faith & Fair Dealing

The covenant of good faith and fair dealing is implied in all contracts governed by Delaware law. The covenant is designed to protect the spirit of an agreement when, without violating an express term of an agreement, one side uses oppressive or underhanded tactics to deny the other side the fruits of the parties' bargain. The covenant functions by requiring a court to discover additional terms from an agreement; terms in line with the spirit of the agreement but absent from those expressed by the parties.

Contracts Law > Remedies > Specific Performance

Evidence > Burdens of Proof > Clear & Convincing Proof

HN13[] **Remedies, Specific Performance**

Under Delaware law, a party seeking specific performance must establish, by clear and convincing evidence, that: (1) a valid, enforceable, agreement exists between the parties; (2) the party seeking specific performance was ready, willing, and able to perform under the terms of the agreement; and (3) a balancing of the equities favors an order of specific performance. The decision as to the availability of specific performance rests within the sound discretion of a court.

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

Evidence > Burdens of Proof > Allocation

HN14[] **Equitable Relief, Quantum Meruit**

Unjust enrichment is the unjust retention of a benefit to the loss of another, or the retention of money or property of another against the fundamental principles of justice or equity or good conscience. In order to recover on a claim of unjust enrichment, a plaintiff must prove: (1) an enrichment, (2) an impoverishment, (3) a relation between the enrichment and impoverishment, (4) the absence of justification, and (5) the absence of a remedy provided by law. The threshold inquiry a court must first engage in is inquiring as to whether a contract already governs the relevant relationship between the parties. If a contract comprehensively governs the parties' relationship, then it alone must provide the measure of the plaintiff's rights and any claim of unjust enrichment will be denied.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Contracts Law > Breach > Breach of Contract Actions > General Overview

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN15[] **Motions to Dismiss, Failure to State Claim**

In some instances, both a breach of contract and an unjust enrichment claim may survive a motion to dismiss when pled as alternative theories for recovery. Such occurrences are factually distinguishable, however, and, more importantly, do not stand for the proposition that an unjust enrichment claim must survive a motion to dismiss when pled alternatively with a contract claim that will move beyond the motion to dismiss stage. A right to plead alternative theories does not obviate the obligation to provide factual support for each theory.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN16[] **Sherman Act, Scope**

Section 1 of the Sherman Act prohibits contracts, combinations, and conspiracies in restraint of trade. 15 U.S.C.S. § 1.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN17[] **Per Se Rule & Rule of Reason, Per Se Violations**

Per se antitrust analysis is generally reserved for agreements whose nature and necessary effect are so plainly anticompetitive that no elaborate study of the industry is needed to establish their illegality--they are "illegal per se."

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN18[] **Motions to Dismiss, Failure to State Claim**

At the motion to dismiss stage, the facts before a court are limited in nature and based solely upon the allegations made in a plaintiff's complaint.

Civil Procedure > ... > Declaratory Judgments > State Declaratory Judgments > Scope of Declaratory Judgments

HN19[] **State Declaratory Judgments, Scope of Declaratory Judgments**

Parties to a contract may seek a declaratory judgment to determine any question of construction or validity and may seek a declaration of rights, status or other legal relations thereunder. Del. Code Ann. tit. 10, § 6502. Declaratory relief is in the discretion of a court and not available as a matter of right. Del. Code Ann. tit. 10, § 6506.

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > General Overview

HN20[] **Defenses, Demurrers & Objections, Affirmative Defenses**

The essential elements of laches are: (1) a plaintiff with knowledge of the claim, and (2) prejudice to the defendant arising from an unreasonable delay in bringing the claim.

Opinion

MEMORANDUM OPINION

NOBLE, Vice Chancellor

The world's largest defense contractor sold a major business unit to the world's third largest defense contractor. The acquirer expected that business unit to continue to do business with its former owner and believed that it had obtained sufficient and binding contractual commitments for those opportunities to persist. Although this arrangement worked well for a while, the acquirer concluded that it had not been receiving the business opportunities for which it contracted and, thus, brought this action in an effort to secure the benefit of its bargain.

Although there are several ancillary disputes, the critical question is how to contract for unknown work in the future while recognizing that price and scope will necessarily depend upon the specific work. Did the parties **[*2]** devise a process that would bring sufficient "definiteness" to their understanding to make an enforceable contractual obligation regarding future work? Or, did they merely execute a normative "agreement to agree" that leaves the Court with a vague understanding of what the parties may have intended generally but simply cannot be enforced?

Before the Court is the Defendant's motion to dismiss the Amended Complaint.

I. BACKGROUND[1]

A. *The Parties*

Plaintiff BAE Systems Information and Electronic Systems Integration Inc. ("BAE") is a wholly-owned subsidiary of the world's third largest global defense company. BAE, a Delaware corporation, specializes in aircraft self-protection systems and tactical surveillance and intelligence systems, as well as automated test equipment, support systems, and other related services.

Defendant Lockheed Martin Corporation ("Lockheed"), a Maryland corporation, is the largest defense contractor in the world. Lockheed **[*3]** operates through numerous unincorporated business units; the three of primary importance in this action are: Lockheed Martin STS-Orlando ("LMSTS"), [2] Lockheed Martin Aerospace ("LM Aero"), [3] and Sanders.

B. *Sanders, The Sale, and The Memorandum of Agreement*

Lockheed's Sanders business unit was the centerpiece of Lockheed's Aerospace and Electronics Systems ("AES") business segment before 2000. Consistent with the company's practice, Sanders and LMSTS executed a Memorandum of Agreement on June 14, 1996, (the "Internal MOA") [4] which outlined the manner by which the two Lockheed business units would approach opportunities for Automated Test Systems ("ATS") business. These opportunities were primarily generated by a third Lockheed business unit, LM Aero, and are the subject of the parties' **[*4]** current dispute. [5] The Internal MOA outlined which business unit would undertake different types of

---

1 ***HN1***[] The Court accepts the truthfulness of facts properly alleged by a plaintiff when considering a defendant's motion to dismiss. *Gantler v. Stephens, 965 A.2d 695, 2009 Del. LEXIS 33, 2009 WL 188828, at *5 (Del. Jan. 27, 2009)*. These facts are as alleged in the Plaintiff's Amended Complaint.

2 BAE brings this action against Lockheed doing business as LMSTS. LMSTS was formerly known as Lockheed Martin Information Systems Company ("LMISC"). For convenience, "LMSTS" will frequently be used to refer to both LMSTS and LMISC.

3 LM Aero was formerly known as Lockheed Martin Tactical Aircraft Systems Company ("LMTAS"). For convenience, "LM Aero" will frequently be used to refer to both LM Aero and LMTAS.

4 Lockheed refers to these agreements between its unincorporated business units as Intra-Lockheed Martin Work Transfer Agreements.

ATS work, freeing each to focus its energies and resources on its own allocated segments. It also addressed both then-current F-16 support equipment opportunities and future support equipment opportunities. In addition, the two business units executed a letter agreement on February 24, 1997, regarding the relationship between them as to the F-16 support equipment work specifically. [6]

Four years later, on July 13, 2000, Lockheed entered into the Transaction Agreement for the sale of its AES business, including the Sanders business unit, to BAE. [7] That transaction closed on November 27, 2000; BAE paid $ 1.67 billion for Lockheed's AES business.

The Transaction Agreement provided that the then-current arrangements regarding ATS work would continue after BAE acquired ownership of the AES business. In other words, LMSTS **[*5]** [8] and Sanders would continue to operate under the terms of the Internal MOA even though BAE, a defense industry competitor of Lockheed, would become the new owner of the Sanders business unit. In addition, Lockheed and BAE agreed to execute a new memorandum of agreement memorializing this arrangement reflecting their post-closing rights and obligations regarding AES business opportunities and the Sanders business unit.

That new Memorandum of Agreement (the "MOA") [9] was executed between Lockheed and BAE on the same day the AES transaction closed. The MOA is virtually identical to the Internal MOA executed in 1996 between Sanders and LMSTS, then both Lockheed business units. The only difference between the two versions is the substitution of "BAE/Sanders" wherever "Sanders" appeared in the Internal MOA and the incorporation by reference of the 1997 F-16 letter agreement between Sanders and LMSTS. [10] The MOA purports to define "the strategic relationship between LMSTS and Sanders to pursue LM Aero F-16 **[*6]** support equipment outsourcing and [to] establish the general agreement as to how the partners will approach future [LM Aero]-support equipment outsourcing opportunities and future [Lockheed] corporate-wide internal and non-[Lockheed] external opportunities. [11] The parties expected that the MOA would allow LMSTS and BAE/Sanders to "cooperatively align their respective business strategies to maximize the focus and effectiveness of resources, increase corporate business, and jointly broaden the market aperture for ATS." [12] The parties agreed that they would "seek to utilize each other's technology, market, and production strengths to achieve and exploit the advantages of joint cooperation." [13] In order to allocate the work between them effectively, each party agreed to "focus its business pursuits in its allocated areas and meet together as necessary (as least semi-annually) to review and coordinate pursuit efforts." [14] The parties identified three specific opportunities for joint work: "(a) [LM Aero] F-16 outsourcing (In process/future); (b) [LM Aero] future SE outsourcing (other than F-16); and (c) Internal [Lockheed] corporate (beyond [LM Aero]) and external opportunities." [15] Significantly, **[*7]** the parties agreed "to capitalize on the relationship formed by [the

MOA] . . . [by] establish[ing] an ATS Coordination Team (ACT). The ACT [was to] consist of an equal number of BAE/Sanders and [LMSTS] members. The ACT [was required to] meet as necessary (at least four times a year) to decide matters of joint ATS business strategy, bid position, and investment plans." [16]

BAE and Lockheed functioned under the MOA until at least 2004. During this period BAE performed contracts valued at over $ 2 million in coordination with LMSTS and LM Aero under the MOA. [17]

C. *The Dispute*

As of late-2004, or early-2005, BAE suspected that LMSTS might not intend to behave as expected under the MOA. BAE believed new ATS work was being generated by LM Aero's F-35 fighter-jet project, [18] work that BAE understood as allocated to it under **[*8]** the MOA. While a small engineering services subcontract was allocated to BAE immediately after LM Aero began the F-35 project, [19] the remaining ATS work for the project, $ 1.3 billion of which BAE claims it should be awarded under the MOA, was not progressing as anticipated.

BAE approached Lockheed to address these concerns, and to ensure proper allocation of ATS work arising from the LM-Areo F-35 project. These efforts were unsuccessful. Because BAE is not a part of the Lockheed family, unlike LMSTS and LM Aero, and thus not privy to intra-Lockheed work agreements, BAE claims an inability to identify precisely what work, if any, has improperly not been allocated to it. In addition, BAE has learned that, contrary to its reading of the terms of the MOA, LMSTS has developed F-35 support equipment that should have been allocated to BAE under the MOA. As a result, BAE filed this action.

BAE claims that the MOA constitutes an enforceable agreement that Lockheed has now breached. Lockheed argues that the MOA is wholly unenforceable and merely outlines a general approach the two defense industry competitors should follow **[*9]** only when it makes "good business sense" to do so.

D. *Procedural History*

BAE filed suit seeking specific performance, or, in the alternative, damages for breach of contract and breach of the implied covenant of good faith and fair dealing. Lockheed moved to dismiss the complaint under *Court of Chancery Rule 12(b)(6)* for failure to state a claim upon which relief may be granted, or, in the alternative, for a more definite statement. BAE amended its Complaint and added claims for unjust enrichment and declaratory judgment. Lockheed renewed its motion to dismiss. This is the Court's decision on that motion.

II. ANALYSIS

A. *Standard for Dismissal under Rule 12(b)(6)*

HN2[] The standard for dismissal pursuant to *Court of Chancery Rule 12(b)(6)* for failure to state a claim upon which relief can be granted is well-established. The motion may be granted only if it appears with reasonable certainty that the plaintiff could not prevail on any set of facts that can be inferred from the pleading. [20] In considering a motion to dismiss, the court is required to assume the truthfulness of all well-pleaded allegations of fact in the complaint. [21] All facts of the pleadings and inferences that can reasonably be **[*10]** drawn therefrom are

---

[16] *Id.*

[17] Lockheed disputes BAE's contention that contracts in this period were entered pursuant to the MOA. Instead, Lockheed argues they were entered into free from contractual compulsion and based on their independent business value. At this stage, BAE's factual assertions must be accepted.

[18] It is expected that the F-35 will replace the F-16.

[19] Am. Compl. P 37.

[20] *Kohls v. Kenetech Corp., 791 A.2d 763, 767 (Del. Ch. 2000)*.

accepted as true. [22] However, neither inferences nor conclusions of fact unsupported by allegations of specific facts are accepted. [23] That is, the Court need not blindly accept as true all allegations, nor must it draw all inferences from them in plaintiffs' favor unless they are reasonable inferences. [24]

B. *BAE's Direct Contract Claims*

The parties dispute whether the MOA is a binding, enforceable agreement. ***HN3***[] To survive a motion to dismiss, BAE must plead facts demonstrating: (1) the intent of the parties to be bound to (2) sufficiently definite terms supported by (3) consideration. [25] Lockheed does not assert a failure of consideration, and BAE has pled facts sufficiently demonstrating consideration. The Court, therefore, focuses its attention on (1) whether there is any reasonable possibility that BAE could prevail in its attempt to prove intent to be bound on the part of Lockheed and (2) whether it is reasonable to believe, given the facts pled, that the terms of the MOA might be proven sufficiently **[*11]** definite for enforcement.

1. Intent to be Bound

HN5[] Delaware adheres to the "objective" theory of contracts: a contract's construction should be that which would be understood by an objective, reasonable third party. [26] When measuring whether parties to an agreement intend to be bound to it, their overt manifestations of assent, rather than their subjective desires, control. [27] The Court looks for allegations suggesting an objective manifestation of intent to be bound by the MOA.

Such ***HN6***[] an intention to be bound by an agreement may be evidenced by continued performance **[*12]** in accordance with an agreement's terms. [28] BAE pleads facts suggesting Lockheed preformed under the terms of the MOA for at least four years following its execution. During this period BAE alleges at least fifteen contracts were performed pursuant to the MOA. This alone might not constitute a sufficient pleading to survive a motion to dismiss--it might not be reasonable to infer that these contracts, in light of the size and scope of both businesses, were entered under the compulsion of the MOA. However, that allegation combined with the execution of the MOA at the same time the Transaction Agreement was executed, and the references to the MOA found within the Transaction Agreement, presents a sufficient pleading of objective facts demonstrating Lockheed's intent to be bound to the MOA to survive Lockheed's motion to dismiss. [29]

[29] Moreover, Lockheed, at closing, represented that "[e]ach of the Transaction Documents [including the MOA] to which any Seller Company is a party constitutes or will constitute at Closing a legal, valid and binding **[*13]** agreement of the applicable Seller Company, enforceable against it in accordance with its terms . . . ." Trans. Agr., at § 3.01; Trans. Agr. Ex. B, at § B.02. This fairly shows that Lockheed intended to be bound by the MOA. Thus, if the substance of the agreement can be ascertained,

2. Indefiniteness as to Pricing, Work Division, and Party Responsibility

HN7[] Delaware courts will not enforce an agreement that is indefinite as to any material or essential term. [30] Lockheed argues that the absence of pricing terms or a pricing structure, and insufficiently definite terms governing how future ATS work and responsibility would be allocated renders the MOA unenforceable, and, thus, BAE's breach of contract claim should be dismissed. [31]

HN8[] A motion to dismiss tests the sufficiency of the allegations made in the plaintiff's complaint. For the purposes of the motion the Court accepts the allegations made in a complaint, and determines whether those allegations are insufficient as a matter of law to sustain a requested cause of action. The standard has been called "plaintiff friendly" [32] because it is. The Court need not determine what a given cause of action will ultimately bear. Rather, the Court passes judgment on whether the facts alleged in the Amended Complaint state a claim. BAE's Amended Complaint narrowly survives this scrutiny and, therefore, cannot be dismissed. [33]

The Amended Complaint contains two distinct allegations that preclude dismissal. The first is the allegation that the MOA requires Lockheed to offer BAE an opportunity to participate in the pursuit of ATS business opportunities as they arrive. [34] This allegation sufficiently implicates a situation **[*16]** where the indefiniteness Lockheed complains of might be excused, and as a result renders BAE's Amended Complaint sufficient to survive Lockheed's motion to dismiss.

First, the right BAE claims is something in the nature of a "right to bid" on certain ATS opportunities. Throughout its complaint BAE alleges a scenario where, as ATS opportunities arise, LMSTS and BAE would work together in the hopes of winning pending ATS work opportunities from LM Aero. This scenario would necessarily leave negotiations over pricing, work allocations, conditions, and other responsibilities for later determination on a project-by-project basis. [35] Whether or not BAE would ultimately win a particular ATS opportunity would depend on that price and scope negotiation. Indeed, the Amended Complaint suggests that ultimate allocation of ATS work to BAE

---

the Amended Complaint fairly alleges that Lockheed intended to perform those substantive obligations. The obverse--if the substance of the agreement cannot be ascertained, then Lockheed did not intend to be subject to some duty that no one can define--may be a trivial observation, but it does reinforce the fundamental aspect of this case, which is whether the MOA is vague and indefinite and, thus, not susceptible of enforcement.

[30] *Hindes v. Wilmington Poetry Soc'y, 37 Del. Ch. 80, 138 A.2d 501, 503 (Del. Ch. 1958)*; **[*14]** *Most Worshipful Prince Hall Grand Lodge of Free and Accepted Masons of Del., 32 Del. Ch. 85, 80 A.2d 294, 295 (Del. Ch. 1951)*.

[31] Lockheed's Opening Br. at 11-14.

[32] *Alliance Data Sys. Corp. v. Blackstone Capital Partners V L.P., 963 A.2d 746, 2009 Del. Ch. LEXIS 4, 2009 WL 117563, at *3 (Del. Ch. Jan. 15, 2009)*.

[33] Lockheed represented that the transaction documents, including the MOA, would constitute a "legal, and binding agreement . . . enforceable . . . in accordance with its terms . . . except as [to circumstances not applicable here]." Trans. Agmt., Ex. B, § B.02. BAE understandably has not taken kindly **[*15]** to Lockheed's advancing a position that is directly at odds with a representation that induced BAE to enter into the Transaction. *See* BAE's Answering Br. at 23, 47. BAE, although not bringing a claim based on that representation, has suggested that Lockheed has waived, or is estopped from, arguing that the MOA is too vague to be enforced. *Id.* at 23-24. Waiver and estoppel are truly not responsive to Lockheed's indefiniteness argument. Even if Lockheed may fully and fairly be charged with the consequences of both waiver and estoppel, that would not resolve BAE's dilemma if the MOA is indefinite. If the MOA is indefinite and, thus, no one can figure out the contractual duty that it imposed on Lockheed, then there is nothing for the Court to enforce. Waiver and estoppel, wonderful doctrines that they may be, cannot fill the void resulting from the absence of a definitive contractual undertaking.

[34] Am. Compl. P 22, 36; Tr. at 40, 52.

[35] *See Seidensticker v. Gasparilla, 2007 Del. Ch. LEXIS 89, 2007 WL 1930428, at *5 (Del. Ch. June 19, 2007)* **[*17]** (*HN9*[] "A contract does not fail simply because the price is not specified."). However, there must be some practicable method to determine necessary pricing. *Id.*

would depend entirely upon its agreement to pricing and other work terms set by LM Aero. [36] Nevertheless, BAE would be given a "sporting chance" to participate in the work by virtue of the MOA. Given this allegation, the Court cannot dismiss the Amended Complaint for a lack of definiteness. [37]

In addition, the Court cannot, in this context, find the MOA too indefinite for enforcement as to which projects BAE would enjoy such a "right to bid." The structures determining work allocation **[*18]** found in the MOA at Section 4.0, vague as they may seem, might reasonably prove sufficiently definite when viewed in light of industry norms. [38] Indeed, BAE alleges that at least 15 contracts have been preformed with Lockheed since the execution of the MOA, a fact suggesting a workable protocol exists in the MOA. Further, the Court cannot limit that protocol to F-16 work alone. Although Lockheed concedes a separate, binding, agreement governs F-16 related work, the Amended Complaint contains the allegation of at least one F-35 related contract between the parties. [39] The Court cannot simply read the MOA and conclude that F-35 contracts are not subject to the MOA. These contracts support BAE's position that despite the absence of pricing and work allocation terms in the MOA, some structure exists between the parties for determination of those issues, and the Court cannot conclude on a motion to dismiss that the MOA is unenforceable. [40]

Second, BAE alleges obligations that are sufficiently definite for enforcement. Most directly, BAE alleges that the MOA requires the parties to "meet together as necessary to coordinate their pursuit activities." [41] This obligation is allegedly created in Section 6.1 of the MOA, requiring the "ACT" to meet "at least four times a year" for the purposes of discussing ATS opportunities. [42] Although Lockheed suggests that the absence of disclosure obligations from the MOA would render such a "meet and confer" obligation illusory, or valueless, the Court cannot dismiss BAE's position that value exists in this right to meet regularly with a fellow member of the defense industry, even without contractual disclosure obligations. More importantly for the purposes of this motion, BAE has pled facts sufficient to find that this binding obligation exists, in a form definite enough for enforcement, and has been breached. [43] In sum, a rough skeleton of definite obligations exists in the MOA upon which prior course of dealings and industry custom could, **[*20]** by reasonable inference, add sufficient flesh to justify enforcement of the resulting form. At this stage, such reasonable inferences drawn from the facts pled in the Amended Complaint, and accepted as true, escort this claim past Lockheed's motion.

Finally, BAE seeks an excuse for the lack of definiteness by pointing out that other courts have enforced similar agreements in the government contracting industry, often called "teaming agreements," in the face of similar objections that the agreements were too indefinite to enforce. [44] Simply because other government contracting

---

[36] Am. Compl. P 26, 37. BAE's Answering Brief supplies a clearer discussion of how future pricing issues would be resolved, including a more direct allegation that an existing bid process is already in place from which pricing is objectively determined. ***HN10***[] Allegations of fact found in a party's briefing, but absent from a party's complaint, however, cannot properly be considered by the Court. *Fagnani v. Integrity Finance Corp., 53 Del. 193, 167 A.2d 67, 74, 3 Storey 193 (Del. Super. 1960)*.

[37] BAE may be contending that its rights under the MOA extend indefinitely. Two of the three opportunities for termination of the MOA relate exclusively to F-16 work, leaving only "mutual written consent" as a means of termination. MOA § 5.4. One wonders if Lockheed intended to subject itself to such an open-ended obligation, but that is a question beyond the scope of the Court's current task.

[38] ***HN11***[] Industry norms occasionally may supply needed precision. *See* ***RESTATEMENT (SECOND) OF CONTRACTS § 33 cmt. e*** (1981); 12 WILLISTON ON CONTRACTS § 34:12 (4th ed. 2007) (incorporation of usage and custom).

[39] Am. Compl. P 37 ("BAE was awarded purchase order **[*19]** number 99M017234 for JSF [the F-35] Technical Services.").

[40] BAE has not identified any particular work upon any certain terms to which it was entitled.

[41] *Id.* P 51.

[42] MOA §§ 5.0, 6.1; Tr. at 45, 58.

[43] Tr. at 58.

industry agreements have survived similar challenges in other courts does not mean every agreement should survive those same challenges. A brief survey of cases involving teaming agreements proves the point. [45] Maybe more importantly, comparisons to teaming agreements would not necessarily change the standards by which the MOA is evaluated. [46] In light of the Court's earlier conclusion, resolution of this contention is not now necessary. [47]

C. *BAE's Good Faith and Fair Dealing Claim*

BAE, perhaps recognizing that the MOA does not expressly require Lockheed to share news of various work opportunities with it, invokes the covenant of good faith and fair dealing to impose a duty on Lockheed to provide such information, lest the undertaking and agreement be illusory.

HN12[] The covenant of good faith and fair dealing is implied in all contracts governed by Delaware law. [48] The covenant is designed to protect the "spirit of an agreement when, without violating an express term of the agreement, one side uses oppressive or underhanded tactics to deny the other side the fruits of the parties' bargain." [49] The covenant functions by requiring the Court to discover additional terms from an agreement; terms in line with the spirit of the agreement but absent from those expressed by the parties.

This claim must also survive Lockheed's motion to dismiss. BAE claims that Lockheed's failure to disclose ATS work opportunities allocated to BAE under the **[*23]** MOA constitutes a breach of the covenant. BAE alleges that LMSTS, by virtue of its position as a Lockheed subsidiary, is denying BAE the benefit of their agreement by refusing to implement the MOA. This is accomplished by simply refusing to provide BAE with notice of LM Aero opportunities. LMSTS is capable of this because it will have knowledge of ATS opportunities within the Lockheed family. If true, this behavior could violate the implied covenant. [50]

Although Lockheed accurately notes that the MOA imposes no notification requirements, [51] the covenant might imply a notice provision were BAE successful in proving its reading of the agreement to be correct. If the parties agreed to a "right to bid" arrangement it seems elementary that an obligation to notice bid opportunities would be included where only one party has information regarding those opportunities. BAE accuses Lockheed of a failure to notify it of allocated ATS opportunities as they came available. The covenant could be found to require the addition

Schafer Assocs., Inc. v. Cordant, Inc., 254 Va. 514, 493 S.E.2d 512 (1997)* (refusing enforcement of teaming agreement entered to fulfill U.S. Air Force contract on grounds that parties had not reached mutual agreement on, *inter alia,* product pricing).

[46] There is reason to doubt the validity of such comparisons. Teaming agreements generally cover a single, specific acquisition, project or bid, instead of the indefinite relationship alleged by BAE. *See generally* *48 C.F.R. § 9.6 et seq (2004)*.

[47] BAE, nonetheless, must confront some difficult obstacles as it moves beyond the motion to dismiss stage. If LMSTS and BAE had tried, but failed, to come to an understanding about F-35 work, what would be its claim? How would it be valued? How would it be enforced? Or, is this litigation about the allocation of real work or is simply about the "value of a chance"? **[*22]** This case amply demonstrates the perils and shortcomings of any arrangement that sounds like an agreement to agree.

[51] Lockheed's Opening Br. at 17-18.

of a notification term and BAE has pled facts sufficient to sustain **[*24]** a cause of action for its breach. The Court may not dismiss this claim under *Court of Chancery Rule 12(b)(6)*. [52]

D. *Equitable Claims*

1. BAE's Specific Performance Claim

HN13[] Under Delaware law, a party seeking specific performance must establish, by clear and convincing evidence, that (1) a valid, enforceable, agreement exists between the parties; (2) the party seeking specific performance was ready, willing, and able to perform under the terms of the agreement; and (3) a balancing of the equities favors an order of specific performance. [53] The decision as to the availability of specific performance rests within the sound discretion of this Court. [54]

As **[*25]** discussed above, it is reasonably conceivable that BAE could demonstrate the existence of an enforceable agreement on the facts alleged. Therefore, the Court cannot conclude, on the facts presented here, that BAE would fail the higher clear and convincing standard required for specific performance. BAE has pled facts supporting an enforceable agreement, of some scope, and claims to be willing and able to perform. The Court, at this stage, is unable to balance the respective equitable justifications for or against the remedy. Thus, BAE's claim for this form of relief survives.

Further, because the scope and obligations of the MOA remains unclear the Court cannot yet find as a matter of law that the enforcement of a specific performance remedy would be unduly burdensome on the Court. Were BAE to prove the MOA to be a binding agreement, but succeeded in establishing only the most rudimentary obligations, specific performance might prove a manageable remedy. Given this possibility the Court cannot dismiss BAE's specific performance claim at this stage.

2. BAE's Unjust Enrichment Claim

HN14[] Unjust enrichment is the "unjust retention of a benefit to the loss of another, or the retention of money **[*26]** or property of another against the fundamental principles of justice or equity or good conscience." [55] In order to recover on a claim of unjust enrichment, a plaintiff must prove: "(1) an enrichment, (2) an impoverishment, (3) a relation between the enrichment and impoverishment, (4) the absence of justification, and (5) the absence of a remedy provided by law." [56] Of primary importance to BAE's claim for unjust enrichment, however, is not consideration of the elements necessary to prove the claim, but instead the threshold inquiry a court must first engage in: inquiring whether a contract already governs the relevant relationship between the parties. [57] If a contract comprehensively governs the parties' relationship, then it alone must provide the measure of the plaintiff's rights and any claim of unjust enrichment will be denied. [58]

---

[52] The viability, however limited it may be, of the implied covenant is tied to the underlying viability of the MOA. The implied covenant seems not to have any independent application in the absence of a duty imposed by the MOA on Lockheed to allow BAE a "right to bid" on relevant opportunities.

[58] *See id.*; *ID Biomedical Corp. v. TM Tech., Inc., 1995 Del. Ch. LEXIS 34, 1995 WL 130743, at *15 (Del. Ch. Mar. 16, 1995)*.

BAE **[*27]** claims that it has conferred a benefit upon Lockheed, and is directly impoverished thereby, in two respects. First, BAE paid $ 1.67 billion under the Transaction Agreement "based (in part) upon Lockheed Martin's agreement to enter into the MOA and the Transaction Agreement's representation that the MOA is a valid, legal and binding obligation." [59] Second, BAE claims that Lockheed is unjustly "enriched at the expense of BAE by keeping ATS work opportunities that should have been allocated to BAE and reaping the profit therefrom." [60] BAE claims to have suffered a direct and related impoverishment "because it has not received the revenue it would have earned from the ATS work opportunities that should have been allocated to [BAE]." [61] In both instances a contract governs the relevant rights between the parties and an unjust enrichment claim cannot lie.

First, the Lockheed sale of the Sanders business unit to BAE is governed by the Transaction Agreement and BAE does not argue otherwise. Indeed, it is undisputed that a contract governs that aspect of the parties' relationship. Because that relationship is governed by a complex **[*28]** contract negotiated by sophisticated parties, the Court cannot accept BAE's claim for unjust enrichment recovery. [62] If BAE is unhappy with Lockheed's conduct, it must rely upon the contract governing its rights, not an unjust enrichment claim.

BAE's second basis for its unjust enrichment claim, that Lockheed kept ATS work for itself, instead of allocating it to BAE, must fail for the same reason. The entirety of BAE's position that **[*29]** ATS should be allocated to it depends on the MOA. Because the MOA is the sole basis from which BAE can claim access to ATS opportunities that agreement must govern BAE's rights surrounding ATS opportunities. The claim that BAE has been injured by a Lockheed refusal to allocate new ATS opportunities must succeed or fail entirely on BAE's breach of contract claim. Again, unjust enrichment recovery is unavailable when a contract governs the parties' relationship.

BAE's argument that its unjust enrichment claim must survive because it is pled as an alternative to its contract claim, and such a pleading is allowed, does not change this result. ***HN15***[] In some instances, both a breach of contract and an unjust enrichment claim *may* survive a motion to dismiss when pled as alternative theories for recovery. Such occurrences are factually distinguishable, [63] however, and, more importantly, do not stand for the proposition that an unjust enrichment claim *must* survive a motion to dismiss when pled alternatively with a contract claim that will move beyond the motion to dismiss stage. A right to plead alternative theories does not obviate the obligation to provide factual support for each theory. Here, **[*30]** there is no independent basis for an unjust enrichment claim because the Amended Complaint contains no facts challenging Lockheed conduct on a basis not comprehensively governed by the MOA. Because BAE pleads no right to recovery not controlled by contract there can be no claim for unjust enrichment. [64] BAE cannot, on these facts, use an unjust enrichment theory to rewrite a

[61] *Id.*

[62] *Chrysler Corp. v. Airtemp Corp., 426 A.2d 845, 854 (Del. Super. 1980)*. BAE may have chosen not to pursue a breach of the Transaction Agreement and its representations concerning the MOA because such claims may be time-barred. BAE has not argued that a claim for unjust enrichment is a proper method of evading such a bar to a cause of action. How BAE selected its claims and whether a breach of the Transaction Agreement claim is barred are questions that do not affect the Court's analysis of this unjust enrichment claim. It is abundantly clear from the allegations in the Amended Complaint that the relationship arising out of the sale of the Sanders business unit and the execution of the MOA is expressly and pervasively governed by the Transaction Agreement.

[63] *See, e.g.*, *Breakaway Solutions, Inc., 2004 Del. Ch. LEXIS 125, 2004 WL 1949300, at *14* (both claims surviving a motion to dismiss where plaintiff sought, in the alternative, the disgorgement on an unjust enrichment theory of benefits defendants received *from third parties* by virtue of their improper behavior *vis-a-vis* the plaintiffs, with whom defendants had entered contracts).

[64] *See, e.g.*, *MetCap Secs. LLC v. Pearl Senior Care, Inc., 2007 Del. Ch. LEXIS 65, 2007 WL 1498989, at *5-6 (Del. Ch. May 16, 2007)* **[*31]** (dismissing unjust enrichment claim for the period when obligations were comprehensively governed by the parties' contract).

comprehensive contract governing the entirety of the parties' relevant relationship after finding disappointment in the resulting agreement. [65] The parties here attempted to memorialize their agreement as to ATS opportunities, and whether or not BAE may enforce its interpretation of the arrangement will depend on the MOA. BAE's unjust enrichment claim will be dismissed.

E. *Lockheed's Antitrust Defense*

Lockheed next argues that the Amended Complaint must be dismissed because BAE's reading of the MOA would render the agreement in violation of Section 1 of the Sherman Act. [66] The Court cannot dismiss the complaint on this ground on the present record.

Lockheed claims that the MOA would violate Section 1 of the Sherman Act, but does so in the most cursory of terms, by labeling the MOA, if binding, a *per se* antitrust violation. ***HN17***[] *Per se* antitrust analysis is generally reserved for "agreements whose nature and necessary effect are so plainly anticompetitive that no elaborate study of the industry is needed to establish their illegality--they are 'illegal *per se.*'" [67]

HN18[] At the **[*32]** motion to dismiss stage the facts before the Court are limited in nature, and based solely upon the allegations made in a plaintiff's complaint. As a result, the Court is unable to undertake the proper factual examination required to address fairly the antitrust contention. Thus, Lockheed's motion to dismiss based upon federal ***antitrust law*** is denied. [68]

F. *Declaratory Relief*

HN19[] Parties to a contract may seek a declaratory judgment to determine "any question of construction or validity" and may seek a declaration of "rights, status or other legal relations thereunder." [69] Declaratory relief is in the discretion of the Court and not available as a matter of right. [70]

As previously discussed, whether the MOA is so indefinite that it cannot be enforced is a question that remains for another day. In that context, declaratory relief is simply another forum by which the Court might resolve this matter or, more precisely, implement **[*33]** its ruling. With the contract dispute ongoing, dismissal of the declaratory judgment aspect of the relief sought by BAE is unwarranted.

G. *Lockheed's Laches Defense*

Lockheed asks the Court to dismiss the specific performance claims of the Amended Complaint because of its timing: filed almost seven years after the transaction in question and almost three years after the date BAE suspected that Lockheed held the position it now challenges. [71] ***HN20***[] The essential elements of laches are: (1)

---

[65] In a sense, any breach of contract compensable by damages "unjustly enriches" the party in breach. That truism is not the foundation for an independent cause of action.

[66] ***HN16***[] Section 1 of the Sherman Act prohibits contracts, combinations, and conspiracies in restraint of trade. *15 U.S.C. § 1 (2006)*.

[67] *Nat'l Soc'y of Prof'l Eng'rs v. United States, 435 U.S. 679, 692, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)*.

[68] This, of course, does not foreclose Lockheed's ability to raise this affirmative defense in its answer. Indeed, this is yet another example of why it is frequently difficult to resolve affirmative defenses on a motion to dismiss.

[69] *10 Del. C. § 6502*.

[70] *10 Del. C. § 6506*.

[71] Am. Compl. P 30.

a plaintiff with knowledge of the claim and (2) prejudice to the defendant arising from an unreasonable delay in bringing the claim. [72]

This case is one in which application of the doctrine of laches on a motion to dismiss is inappropriate. First, the reasons for delay are often more important than its length. [73] BAE pleads facts that suggest delay was the result of an inability to discover breach because of improper behavior on the part of Lockheed. BAE claims to have "repeatedly" requested information regarding ATS work covered by **[*34]** the MOA; starting upon learning of possible work allocation problems. [74] In response, BAE claims that Lockheed "delayed and/or otherwise failed" to disclose the information necessary to discover breach. [75] Accepting these facts as true, the Court cannot find that dismissal for unreasonable delay is appropriate; BAE pleads that any delay in discovering breach and bringing suit was the fault of Lockheed. Second, Lockheed points to prejudice resulting from the alleged delay; it asserts that, with the passage of time, it is no longer practicable for BAE to participate with it in these time-sensitive and ongoing technical efforts. Lockheed may well be correct in this contention. The facts necessary to support such an argument, however, cannot be gleaned from the Amended Complaint.

III. CONCLUSION

Accordingly, for the foregoing reasons, Defendant Lockheed's motion to dismiss is granted as to Plaintiff BAE's claim for unjust enrichment; otherwise, it is denied.

An implementing order will be entered.
