HN1 [down arrow] Collectives & Cooperatives, Clayton Act

Section 4 of the Clayton Act, 15 U.S.C.S. § 15, authorizes an action for treble damages by any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws. The statute does not confine its protections to consumers, or to purchasers, or to competitors, or to sellers. An exception to the broad standing authorization of § 4 exists in those instances in which persons have sustained injuries "too remote" from the alleged violation of the antitrust laws. The determination as to whether an injury is too remote involves an examination of first, the physical and economic nexus between the alleged violation and the harm to the plaintiff, and second, the relationship of the injury alleged with those forms of injury which were of concern to Congress in enacting the antitrust laws.

HN2 [down] Practices Governed by Per Se Rule, Boycotts

Section 1 of the Sherman Act bars only those agreements that impose an unreasonable restraint upon interstate commerce. Certain types of agreements are recognized as per se unreasonable because of their necessary harm to competition and the absence of countervailing benefits. Among the agreements labelled per se violations of § 1 are horizontal territorial restrictionals, group boycotts, and horizontal price-fixing schemes. An agreement that does not fit into the categories of per se violations must be scrutinized under the rule of reason. Under the rule of reason standard, an agreement will be found to violate § 1 only if it appears unreasonable when analyzed in light of the nature of the business where the alleged restraint of trade is applicable, the nature of the restraint and its effects, and the history of the restraint and effects, and the reasons for its adoption.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN3 [down] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Under the rule of reason, the inquiry as to the legality of an agreement is confined to a consideration of its impact on competitive conditions. Allegations of injury to the plaintiff alone are not sufficient since the essence of a violation of the rule of reason is injury to competition not competitors. Although antitrust claims need not be pleaded with greater specificity than other claims, an antitrust plaintiff as part of its claim of injury to competition must allege the market in which competition was injured, and must provide some indication of supporting facts such as the size of the relevant product and geographic markets, the amount of competition foreclosed, and how the acts of the defendants affected that competition.

Criminal Law & Procedure > ... > Acts & Mental States > Mens Rea > Willfulness

HN4 Scope, Monopolization Offenses

Section 2 of the Sherman Act, [15 U.S.C.S. § 2](#), renders it unlawful for an individual or entity to monopolize, or attempt to monopolize, or attempt to monopolize, or combine or conspire to monopolize. The offense of monopolization under this provision has two elements: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power. The elements of the offense of attempted monopolization are (1) a dangerous likelihood of success in monopolizing a particular product market and (2) a specific intent to eliminate competition or create monopoly.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Class Members > Named Members

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN5 Class Actions, Certification of Classes

Fed. R. Civ. P. 23(a) requires that an individual seeking to represent a class be a member of that class. An organization may serve as a class representative of its members and others similarly situated, even though that organization itself is not a member of the putative class. However, an organization seeking certification as a [Rule 23](#) class representative must also demonstrate that it has standing to maintain the action in an individual capacity. In certain instances when damage claims are not common to the entire membership, nor shared by all in equal degree, but are peculiar to the individual member concerned, the organization lacks standing to claim damages on behalf of each member.

Counsel: [*1] For plaintiffs: Auerbach, Labes & Woicik, New York, N.Y., (Henry C. Woicik, of counsel). For defendants: Winthrop, Stimson, Putnam & Roberts, New York, N.Y. Opinion by: GAGLIARDI

Opinion

Opinion

GALGIARDI, D.J.: Plaintiffs Level I sportswear, Inc. and Hartfree Group, Ltd. "(Level I)" commenced this action against defendant unions, union officials and retail stores for alleged violations of the Labor Management Reporting and Disclosure [*2] Act, [29 U.S.C. §§ 401-531](#) ("LMRDA"); the Sherman Act, [15 U.S.C. §§ 1-7](#); and the Clayton Act, 15 U.C.S. §§ 12-27.¹ Defendants Samuel Byer and the Joint Board have filed four counterclaims, charging Level I with intentional torts and with breach of its collective bargaining agreement with its workers, some of whom belong to the Joint Board. Presently before the court are two motions. Retailer defendants have moved to dismiss the complaint pursuant to [Rule 8, Fed. R. Civ. P.](#), for failure to plead with sufficient specificity, and pursuant to [Rule 12\(b\)\(6\), Fed. R. Civ. P.](#), for failure to state a claim upon which relief may be granted. Defendants Byer and the Joint Board have moved pursuant to [Rule 23, Fed. R. Civ. P.](#), to certify their fourth counterclaim as a class action.

[*3] Background

In considering the retailer defendants' motion to dismiss the complaint, the court has accepted as true all material allegations in the complaint. See [Gardner v. Toilet Goods Association, Inc., 387 U.S. 167, 172 \(1967\)](#). Level I is a manufacturer of women's sportswear whose workers were represented by the Amalgamated Workers Union, Local 88, Retail, Wholesale and Department Store Union, AFL-CIO ("RWDSU"). In April 1980, the Joint Board filed a demand with level I that it be recognized as the exclusive representative of the Level I employees and picketed Level I's factory as a means of effecting such recognition. The Joint Board also filed with the National Labor Relations Board ("NLRB") a petition for certification as such representative. The NLRB dismissed the petition. At the same time, the Joint Board together with its parent organization, the ILGWU and another ILGWU affiliate, Local 99, commenced a boycott against Level I. In furtherance of this boycott, Local 99 employees working at the New Jersey warehouses of retailer defendants refused to handle Level I products. The retailer defendants agreed with the ILGWU, the Joint Board and Local 99 that their stores [*4] would not accept Level I merchandise and that they would cancel any pending orders for such products. Within several months, these activities had forced Level I out of business. This litigation ensued.

Discussion

I. Motion to Dismiss

The retailer defendants have moved to dismiss all three counts of the complaint. Count I of Level I's complaint alleges violations of the antitrust laws solely by union defendants and therefore states no claim against the retailer defendants. Count III, similarly, does not allege illegal conduct by the retailer defendants. Counts I and III therefore are dismissed with respect to the retailer defendants.

Count II, which alleges **antitrust law** violations by the retailer defendants, is based upon [sections 1, 2, and 3](#) of the Sherman Act, [15 U.S.C. §§ 1, 2 and 3](#), and [sections 4 and 12](#) of the Clayton Act, [15 U.S.C. §§ 15 and 22](#).² The retailer defendants allege that Level I lacks standing to assert these claims and that, even if Level I is found to have standing, it has failed to state an antitrust claim against the retailer defendants. The court first will consider Level I's standing and then will discuss the merits of Level I's antitrust [*5] claims against the retailer defendants.

¹ Among those named as defendants are: Sol C. Chaikin, President International Ladies Garment Workers Union, AFL-CIO ("ILGWU"); Samuel Byer, Secretary-Treasurer of New York Coat, Suit, Dress, Rainwear and Allied Workers Union, a Joint Board affiliated with ILGWU; New York Coat, Suit, Dress, Rainwear and Allied Workers Union, a Joint Board affiliated with ILGWU ("Joint Board"); Arthur Touretz, President of Office and Distribution Employees Union, Local 99, a local union affiliated with ILGWU; and Office and Distribution Employees Union, Local 99, a local union affiliated with ILGWU ("Local 99"). These defendants will be referred to as the "union defendants." The other defendants named in this action are K Mart Apparel Corp.; S.S. Kresge Co.; Woolco Department Stores, a Division of F.W Woolworth Co.; and Russel Burdsall and Ward Corp. d/b/a Mangel Stores. These defendants will be referred to as the "retailer defendants."

² [Section 3](#) of the Sherman Act applies to antitrust violations involving the District of Columbia and United States territories. The complaint contains no reference to these localities. The claim under [section 3](#) therefore is dismissed. [Section 12](#) of the Clayton Act, [15 U.S.C. § 22](#), is a venue provision.

A. Standing.

HN1[] [Section 4](#) of the Clayton Act, [15 U.S.C. § 15](#), authorizes an action for treble damages by "[a]ny person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws." As the Supreme Court stated recently in [Blue Shield v. McCready \[1982-2 TRADE CASES P64,791\], 102 S. Ct. 2540, 2545 \(1982\)](#):

[T]he lack of restrictive language reflects Congress' "expensive remedial purpose" in enacting [§ 4 . . . Pfizer, Inc. v. India, 434 U.S. 308, 314-14 \(1978\)](#) (further citations omitted). As we have recognized "[t]he statute does not confine its protections to consumers, or to purchasers, or to competitors, or to sellers." [Mandeville Farms v. Sugar Co., 334 U.S. 219, 236 \(1948\)](#).

The Supreme Court in Blue Shield noted an exception to the broad standing authorization of [section \[*61\] 4](#) in those instances in which persons have sustained injuries "to remote" from the alleged violation of the antitrust laws. The determination as to whether an injury is too remote involves an examination of first, the physical and economic nexus between the alleged violation and the harm to the plaintiff, and second, the relationship of the injury alleged with those forms of injury which were of concern to Congress in enacting the antitrust laws. [Id. at 2548](#).

In the instant case, Level I claims that it was forced out of business by the retailer defendants' unlawful agreement that they would not purchase Level I merchandise. Level I claims that retailer defendants, who previously had purchased 50% of Level I's production, had agreed to this boycott in order to ingratiate themselves with Local 99 and with the ILGWU generally and thereby to gain competitive advantages over other retail stores. Level I thus meets the first part of the Blue Shield standing test by alleging a direct economic nexus between an unlawful agreement and harm to itself as plaintiff. Such harm was a "necessary step in effecting the ends of the illegal conspiracy" alleged. Blue Cross, *supra*, 102 U.S. at 2549. [[*7](#)]

The court also finds the required connection between the alleged harm and the forms of injury contemplated by Congress when it promulgated the antitrust laws. Level I alleges that it was forced out of business as a result of an unlawful boycott and the unlawful use of monopoly power. While there is a serious question as to whether the boycott or use of monopoly power Level I alleges fits within the specific prohibitions of the antitrust laws, see pp. 8-14, *infra*, it is clear that the elimination of a supplier of product through such practices is generally the type of injury those laws were designed to prevent. See [Radiant Burners, Inc. v. Peoples Gas Light and Coke Co., 364 U.S. 656 \(1961\)](#); [Taxi Weekly, Inc. v. Metropolitan Taxicab Board of Trade, Inc., 539 F.2d 907 \(2d Cir. 1976\)](#); see also [Blue Shield, supra, 102 S. Ct. at 2551 n. 21](#) (antitrust action could be maintained by distributor boycotted by retailers for refusal to cooperate with their conspiracy to harm disfavored retailer). Level I thus has established that it has standing to maintain this action.³

[*8] B. Section One Claims

(1) Alleged Per Se Violations

Level I alleges that the retailer defendants at the behest of the union defendants refused to accept Level I merchandise and thereby conspired in restraint of trade in violation of [section 1](#) of the Sherman Act, [15 U.S.C. § 1](#). The Supreme Court has interpreted **HN2**[] [section 1](#) as barring only those agreements that impose an unreasonable restraint upon interstate commerce. [Standard Oil Co. of New Jersey v. United States, 221 U.S. 1 \(1911\)](#). Certain types of agreements have been recognized as per se unreasonable because of their necessary

³ In [Blue Shield, supra, 102 S. Ct. at 2547 n. 12](#), the Supreme Court declined to comment on the "relative utility" of the "target area" test of antitrust standing which has been articulated by the Second Circuit. Even if the target area test is still valid, however, Level I has alleged facts sufficient to allow it to maintain an action because Level I claims that it was the "person against whom the conspiracy was aimed." [Calderone Enterprises Corp. v. United Artists Theatre Circuit, Inc. \[1971 TRADE CASES P73,788\], 454 F. 2d 1292, 1295 \(2d Cir. 1971\)](#).

harm to competition and the absence of countervailing benefits. Among the agreements labelled per se violations of [section 1](#) are horizontal territorial restrictions, [U.S. v. Topco Associates, Inc., 405 U.S. 596 \(1972\)](#); group boycotts, [Klor's Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207 \(1959\)](#); and horizontal price-fixing schemes, [Kiefer-Stewart Co. v. Joseph E. Seagram & Sons, Inc., 340 U.S. 211 \(1951\)](#). An agreement that does not fit into the categories of per se violations must be scrutinized under the rule of reason. Under the rule of reason standard, an agreement will be found to violate [*9] [section 1](#) only if it appears unreasonable when analyzed in light of the nature of the business where the alleged restraint of trade is applicable, the nature of the restraint and its effects, and the history of the restraint and effects, and the reasons for its adoption. See [National Society of Professional Engineers v. United States, 435 U.S. 679, 692 \(1978\)](#).

The only category of per se violation that arguably is applicable to plaintiff's allegations is the group boycott. See [United States v. General Motors Corp., 384 U.S. 127 \(1966\)](#); [Klor's v. Broadway-Hale Stores, supra](#); [Fashion Originators' Guide of America, Inc. v. Federal Trade Commission, 312 U.S. 457 \(1941\)](#). A horizontal agreement to refuse to deal with a third party, that is, an agreement among competitors, was at issue in [United States v. General Motors, supra](#); [Klor's v. Broadway-Hale Stores, supra](#); and [Fashion Originators' Guide v. FTC, supra](#). As the Second Circuit has stated in holding a per se Standard inapplicable to boycotts that do not entail such agreements among competitors:

It is important to distinguish between "horizontal" restraints, i.e., agreements between competitors at the same level of market structure [*10] and "vertical" restraints, i.e. combinations of persons at different levels of the market. . . . Horizontal restraints alone have been characterized as "naked restraints of trade with no purpose except stifling competition."

[Oreck Corp. v. Whirlpool, 579 F. 2d 122, 131 \(2d Cir.\), cert. denied, 439 U.S. 946 \(1978\)](#), quoting [White Motor Co. v. United States \[1963 TRADE CASES P70,679\], 372 U.S. 253, 263 \(1963\)](#).⁴

Level I fails to allege, as part of its section one claim, any agreement between competitors. Paragraph [*11] 45 of the complaint states:

In April 1980, after the labor union defendants undertook a course of action to force Level I out of business, and as part of such course, and at the urging of and in conspiracy with the defendant labor organizations, the defendants [retailers] refused to accept orders placed by them with Level I, cancelled other purchases from Level I, and thereafter refused to deal with Level I.

Level I thus has alleged only a series of agreements between each of the retailer defendants and the union defendants. Such parallel behavior by the retailer defendants does not indicate a conspiracy among them. See [Modern Home Institute, Inc. v. Hartford Accident & Indemnity Co., 513 F. 2d 102, 110 \(2d Cir. 1974\)](#).

Level I argues that any agreement involving a union and a non-union entity and which is not subject to the labor exemptions, is per se violative of [section 1](#) regardless of whether it entails horizontal elements.⁵ Contrary to level I's contentions, however, the rule of reason standard has been applied to agreements which are not protected by

⁴ Both the Third Circuit and the Ninth Circuit have indicated, in the context of discussing union agreements with non-labor groups, that "vertical combinations designed to exclude from the market direct competitors of members of the combinations" may constitute per se violations of section one. [Consolidated Express, Inc. v. New York Shipping Association, 602 F. 2d 494, 522 \(3rd Cir. 1979\)](#), vacated and remanded on other grounds, [448 U.S. 902 \(1980\)](#); Ackerman Chillingworth, Inc. v. Pacific Electrical Contractors Association, *supra*, 579 F. 2d at 490 n. 7. The Second Circuit, however, in [Oreck Corp. v. Whirlpool Corp., supra, 579 F. 2d at 131](#) rejected this position.

⁵ Certain provisions enacted by Congress which remove unions from the full reach of the antitrust laws, see [United States v. Hutcheson, 312 U.S. 219 \(1941\)](#) have been described as the "statutory exemption." See [United Mine Workers v. Pennington, 381 U.S. 657 \(1965\)](#). The non-statutory exemption is a judicially created doctrine that also serves to protect certain agreements between unions and non-labor groups from antitrust liability. Id. Retailer defendants do not contend that either type of exemption is applicable to them here.

the labor exemptions between unions and non-union entities. See *Larry v. Muko, Inc. v. Southwestern Pennsylvania Building [*12] & Construction Trades Council*, 670 F. 2d 421 (3rd Cir.), cert. denied, 103 S. Ct. 229 (1982); *Ackerman-Chillingworth, Division of Marsh & McLennan, Inc. v. Pacific Electrical Contractors Association*, 579 F. 2d 484 (9th Cir. 1978), cert. denied, 439 U.S. 1089 (1979); but see *South-East Coal Co. v. Consolidation Coal Co.*, 434 F. 2d 767, 775 (6th Cir. 1970), cert. denied, 402 U.S. 983 (1971). The Second Circuit, moreover, has stated that there is a "substantial question" as to whether a per se standard would ever be appropriate in evaluating alleged restraints of trade involving unions and non-labor entities. See *Commerce Tankers Corp v. National Maritime Union of America*, 553 F. 2d 793, 802 & n. 8 (2d Cir.), cert. denied, 434 U.S. 923 (1977); see also *Berman Enterprises Inc. v. Local 333, United Marine Division, International Longshoremen's Association*, 644 F. 2d 930, 936 (2d Cir.), cert. denied, 454 U.S. 965 (1981) (assuming without discussion that the rule of reason was applicable to a union's alleged conspiracy with an employers' association). Given the absence of an allegation of a horizontal conspiracy and the Second Circuit's reluctance to apply the per se test to agreements [*13] involving unions, the court finds that Level I has failed to allege a per se violation of section one.

(2) Rule of Reason Analysis

Because Level I has not alleged a per se violation, the court must determine whether it has alleged a violation under the rule of reason. [HN3](#) Under that rule, "the inquiry [as to the legality of an agreement] is confined to a consideration of its impact on competitive conditions." *National Society of Professional Engineers v. United States, supra*, 435 U.S. at 690. Allegations of injury to the plaintiff alone are not sufficient since the essence of a violation of the rule of reason is injury to "competition not competitors." [*14] *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc.*, 429 U.S. 477, 488 (1977), quoting *Brown Shoe Co. v. United States*, 370 U.S. 294, 320 (1962) (emphasis in original); see also *Oreck Corp. v. Whirlpool Corp., supra*, 579 F. 2d at 133-34. Although antitrust claims need not be pleaded with greater specificity than other claims, see *George C. Frey Ready Mixed Concrete, Inc. v. Pine Hill Concrete Mix Corp.*, 544 F. 2d 551, 553-54, (2d Cir. 1977), an antitrust plaintiff as part of its claim of injury to competition must allege the market in which competition was injured, and must provide some indication of "supporting facts such as the size of the relevant product and geographic markets, the amount of competition foreclosed, and how the acts of the defendants affected that competition." *Bus Top Shelters, Inc. v. Convenience & Safety Corp.*, 521 F. Supp. 989, 997-98 (S.D.N.Y. 1981); see also *Petroleum for Contractors, Inc. v. Mobil Oil Corp.*, 493 F. Supp. 320 (S.D.N.Y. 1980); Prestige Manufacturing Corp. v. Martin Beverage Co., 1977-2 TRADE CASES (CCH) P61,413 (S.D.N.Y. 1977).

Level I contends that the anti-competitive nature of the agreement between the retailer defendants and the union defendants [*15] is demonstrated by (1) the retailer defendants' intent to use the boycott as a way to curry favor with the union defendants and thereby to obtain competitive advantage over other retailers, and (2) the fact that the boycott and the consequent destruction of Level I's business helped to maintain the cartel created by other manufacturers and the union defendants in the market for the production of women's sportswear. Level I's allegations with respect to competition in the retail market for women's sportswear fail to state a violation of the Sherman Act under the rule of reason. Level I makes no allegations as to the nature of that market. Neither does it allege that the union defendants actually accorded the retailer defendants competitive advantages or that the boycott otherwise served to reduce competition at the retail level.

With regard to the alleged boycott's effect on the market for the manufacture of women's sportswear, however, the complaint does describe at some length the nature of that New York market and of the cartel in that market allegedly created by industrywide agreements between union defendants and clothing producers other than Level I. Level I alleges that [*16] the retailer defendant's boycott of its products contributed to the strength of this cartel by eliminating both Level I and injuring the union representing its workers, the RWDSU. Although it is a close question, the court finds that these averments are sufficiently specific with regard to injury to competition in the New

York market for the manufacture of women's sportswear.⁶ The retailer defendants' motion to dismiss Level I's section one claim therefore is denied.

C. Section 2 Claim

Level I also claims that the retailer defendants violated [HN4](#)[↑] section 2 of the Sherman Act, [15 U.S.C. § 2](#) which renders it unlawful for an individual or entity to "monopolize, or attempt to monopolize, or attempt to monopolize, or combine or conspire . . . to monopolize." The Supreme Court has held that the offense of monopolization under this provision [*17] has two elements: "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power." [United States v. Grinnell Corp., 384 U.S. 563, 570-71 \(1966\)](#). The elements of the offense of attempted monopolization are (1) a dangerous likelihood of success in monopolizing a particular product market and (2) a specific intent to eliminate competition or create monopoly. See [Nifty Foods Corp. v. The Great Atlantic & Pacific Tea Co., 614 F.2d 832, 841 \(2d Cir. 1980\)](#). As Level I has failed to allege facts establishing either of these offenses with regard to the retailer defendants and the market in which they operate, Level I's section 2 claim against the retailer defendants is dismissed.

D. Class Certification Motion

Defendants Samuel Byer and the Joint Board have alleged as a fourth counterclaim on behalf of former Level I employees that Level I repeatedly violated its September 1979 collective bargaining agreement with those employees. Byer and Joint Board have moved for certification of that counterclaim as a class action.

[HN5](#)[↑] Rule 23(a), Feb. R. Civ. P., consistently has been held to require that an individual seeking to represent [*18] a class be a member of that class. See [Sosna v. Iowa, 419 U.S. 393, 403 \(1975\)](#); [Bailey v. Patterson, 369 U.S. 31 \(1962\)](#); [Norman v. Connecticut State Board of Parole, 458 F.2d 497 \(2d Cir. 1977\)](#). Defendant Byer concedes that he does not belong to the putative class of former Level I employees. Defendant Joint Board, however, while conceding that it is not a member of the putative class, contends that numbers of former employees of Level I are also members of the Joint Board, and that the Joint Board consequently may be certified as a representative of the class of former Level I workers. The Second Circuit has held that an organization may serve as a class representative of its members and others similarly situated, even though that organization itself is not a member of the putative class. [Norwalk CORE v. Norwalk Redevelopment Agency, 395 F.2d 920 \(2d Cir. 1968\)](#). In Norwalk CORE, however, the court recognized that an organization seeking certification as a Rule 23 class representative must also demonstrate that it has standing to maintain the action in an individual capacity. *Id. at 937*.

Under [Warth v. Seldin, 422 U.S. 490 \(1975\)](#), the defendant Joint Board lacks standing [*19] to pursue this counterclaim and consequently may not serve as a class representative. In Warth, the Supreme Court held that in certain instances when "damage claims are not common to the entire membership, nor shared by all in equal degree," but are "peculiar to the individual member concerned," the organization lacks standing to claim damages on behalf of each member. [422 U.S. at 515](#); see also [Local 194, Retail, Wholesale and Department Store Union v. Standard Brands, Inc., 540 F.2d 864, 865 \(7th Cir. 1976\)](#). Here, the Joint Board seeks damages on behalf of each former Level I employee. The Joint Board cannot claim that each member of the putative class incurred the same degree of damages as a result of Level I's alleged breaches of the September 1979 collective bargaining agreement. Rather, the amount of damages would vary according to the situation of each employee with regard to the particular breach at issue. Joint Board consequently lacks standing to maintain this counterclaim.⁷ The class certification motion of defendants. Byer and the Joint Board therefore is denied.

⁶The allegations described above also demonstrate that the complaint in this action contained more than a "bare bones statement of conspiracy," [Heart Disease Research Foundation v. General Motors Corp. \[1972 TRADE CASES P74,076\], 463 F.2d 98, 100 \(2d Cir. 1972\)](#) and therefore meet the pleading requirements of [Rule 8\(a\), Fed. R. Civ. P.](#)

⁷Congress may accord standing to a party who, in the absence of legislation, would lack the ability to maintain an action. See [Trafficante v. Metropolitan Life Insurance Co., 409 U.S. 205 \(1972\)](#). Section 301 of the LMRDA, for example, authorizes a labor

[*20] Conclusion

For the foregoing reasons, Counts I and III of the complaint against retailer defendants are dismissed. The court further finds that Count II fails to allege a per se violation of section one of the Sherman Act and fails to allege any violation of section two. The retailer defendants' motion to dismiss Count II is denied in all other respects. The motion of defendants Byer and Joint Board for class certification of the fourth counterclaim is denied. Plaintiffs are directed to file an amended complaint incorporating the rulings set forth in this opinion.

So Ordered.

End of Document

organization that is a party to a collective bargaining agreement to sue to enforce that agreement on behalf of its members. See *Textile Workers Union v. Lincoln Mills*, 353 U.S. 448 (1957). Defendant Joint Board, however, was not a party to the collective bargaining agreement it seeks to enforce on behalf of former Level I employees and therefore can not derive standing from the LMRDA.

Barry Wright Corp. v. Pacific Scientific Corp.

United States District Court for the District of Massachusetts

January 28, 1983

Civil Action No. 78-485-S

Reporter

555 F. Supp. 1264 *; 1983 U.S. Dist. LEXIS 19678 **; 1982-83 Trade Cas. (CCH) P65,189

BARRY WRIGHT CORPORATION, Plaintiff, v. PACIFIC SCIENTIFIC CORPORATION, Defendant

Core Terms

snubbers, mechanical, discounts, sizes, contracts, hydraulic, pipe, market power, hanger, plant, cancellation, manufactured, schedules, smaller, orders, prices, negotiation, purchases, customer, phase, shock, minimum amount, purchase order, Sherman Act, patent, exclusionary, projected, delivery, obliged, costs

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN1 [] **Market Definition, Relevant Market**

In order to determine whether the defendant has "market power" in an antitrust case it is necessary to determine the relevant market.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN2 [] **Private Actions, Remedies**

Market power is defined as the power to raise the price of a product by limiting its supply.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN3 [] **Actual Monopolization, Anticompetitive & Predatory Practices**

A manufacturer with market power may not indulge in exclusionary conduct, even if such conduct is not the classic monopolistic exercise of market power. Exclusionary conduct has been very broadly defined as encompassing any practices by a monopolist which are not the inevitable consequences of ability, natural forces or law. Market control is inherently evil and constitutes a violation of [§ 2](#) of the Sherman Act unless economically inevitable, or specifically authorized and regulated by law.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > Regulated Practices > Price Discrimination > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

[HN4](#) [Actual Monopolization, Anticompetitive & Predatory Practices]

Nonpredatory and nondiscriminatory price reductions do not violate [§ 2](#) of the Sherman Act. Reasonable reduction of price in response to competition is not a violation of the Sherman Act; it is in fact the result which the antitrust laws were designed to accomplish.

Opinion

[*1265] FINDINGS, RULINGS AND ORDER

SKINNER, D.J.

Plaintiff Barry Wright Corporation ("Barry") brought this action pursuant to [15 U.S.C. § 15](#) to recover damages for alleged violations of the antitrust laws. Plaintiff claims that defendant Pacific Scientific Corporation ("Pacific") has violated [Sections 1](#) and [2](#) of the Sherman Act ([15 U.S.C. §§ 1](#) and [2](#)) and [Section 3](#) of the Clayton Act ([15 U.S.C. § 14](#)). Plaintiff also alleges an action in tort, claiming that Pacific tortiously interfered with its contractual relations.

Originally ITT Grinnell Corporation ("Grinnell") was joined as a defendant. Before trial, however, the plaintiff and Grinnell effected a settlement and Grinnell is no longer in the case as a party. The case turns on the relationships between Grinnell and Barry on the one [\[**2\]](#) hand, and Grinnell and Pacific on the other. Analysis of the conduct of Grinnell and its officers is pivotal to the resolution of this case.

Findings of Fact.

Grinnell is the country's largest producer of pipe hanger systems for nuclear power plants. The selection of such systems for a proposed plant is typically done by the firm of architects and engineers ("A&E's") who have contracted to design the plant and supervise its construction. Critical components of a pipe hanger system are the shock arresters or snubbers. These must be designed to permit the normal gradual movement of the pipes as they expand and contract in response to the superheated material which passes through them. They must, however,

resist sudden movement from earthquake or explosion. Snubbers are rated by the amount of force which they can resist. The sizes of snubbers involved in this case ranged from 250 lbs. (1/4 kip) to 100,000 lbs. (100 kip) sizes.

Until 1975 most snubbers were hydraulic. Grinnell made its own, which it sold at a favorable mark-up as components of its pipe hanger systems. In 1974 and 1975, hydraulic snubbers distributed by another manufacturer developed leaks. A&E's in [**3] the industry started to specify mechanical snubbers in response to anxiety over the potential danger of leaky hydraulic snubbers.

By 1975 Pacific had designed and produced an effective mechanical shock arrester which operated by a patented rotating inertial device. Pacific was only partially successful [*1266] in making independent sales to the A&E's, because the latter did not wish to carry inventories of snubbers; they wanted the pipe hanger companies to carry the inventory and release snubbers as needed during the installation of the pipe hanger system. Pacific was successful, however, in persuading the A&E's to specify mechanical snubbers to the exclusion of hydraulic snubbers. From 1975 on and during all the period material to this case, Pacific was for all practical purposes the only domestic source of mechanic snubbers. Mechanical snubbers manufactured in other countries did not meet the requirements of the Nuclear Regulatory Commission.

Pacific's share of the domestic pipe snubber market, including hydraulic snubbers, was 47% in 1976, 83% in 1977, 84% in 1978 and 94% in 1979. Pacific also makes sales of mechanical snubbers in foreign countries, but some of these [**4] sales were negotiated in the United States through local A&E's who were constructing nuclear plants abroad.

Grinnell continued to produce its hydraulic snubber (which had not leaked) to satisfy its backlog of orders. Most of Grinnell's new contracts, however, required mechanical snubbers. It attempted to design and manufacture its own mechanical snubber but was unsuccessful. It was therefore forced to buy from Pacific.

At the same time Pacific was trying to sell its snubbers directly to the A&E's as separate components, in competition with Grinnell. The quantity discount which Pacific allowed Grinnell permitted a small mark-up which was considerably less than the mark-up Grinnell had enjoyed on its own hydraulic snubbers. Grinnell set out to find another, more profitable source.

Barry had a division in California (not far from Pacific's plant) which was engaged in aerospace engineering, and had in fact produced mechanical shock absorbers for aerospace application. In 1973 it had produced a prototype snubber for use in nuclear power plants, but had decided not to enter the market and did not develop its product at that time.

Grinnell learned of Barry's prototype snubber and [**5] in late 1975 entered into negotiations with Barry to attempt to generate another source of mechanical snubbers. On January 30, 1976, Grinnell entered into a contract with Barry for the development of a mechanical snubber. The Grinnell-Barry contract consisted of two phases.

The first phase was a development phase which did not bind either party to purchase or sell snubbers. During phase one, Grinnell agreed to pay Barry \$180,000 for development costs, an additional \$54,000 for production tooling, and up to \$60,000 for special test equipment.

On August 31, 1976, Grinnell and Barry agreed to enter into phase two of the contract. During this phase, Barry was to develop production capability for six sizes of snubbers by January 28, 1977. Grinnell was obliged to purchase its requirements of mechanical snubbers from Barry for the next three years, subject to an obligation to purchase at least \$9 million but not more than \$15 million over the three year period. Grinnell retained the option to purchase Barry's snubber production facilities at any time during phase two. Barry agreed not to compete with Grinnell for five years after such purchase. In addition, while Barry was manufacturing [**6] snubbers for Grinnell, it could not sell mechanical snubbers to anyone else.

The contract contained schedules for the completion and qualification (i.e., passing Grinnell's tests of conformity to specifications) of the various sizes of snubbers. Barry claims that these schedules merely reflected goals or expectations. Grinnell apparently claimed that the schedules were contract performance dates. In any case, over

the next eighteen months Barry fell progressively further behind those schedules. As of January, 1977, it had not qualified any of its snubbers.

Meanwhile, Grinnell was buying snubbers from Pacific. Paul Milman, who was in charge of Grinnell's pipe hanger business, was stalling as much as possible on snubber delivery, and purchasing only the required [*1267] minimum amounts, in the hope that the Barry snubbers would soon be in production and available to Grinnell at a more favorable price. Delay became increasingly difficult, however, because of mounting pressure from Grinnell's customers for delivery of snubbers.

In the summer of 1976, Stephen Toth became president of Pacific. He observed that the number of orders that Pacific was receiving from Grinnell was [*7] considerably less than the number of mechanical snubbers that had been specified in outstanding pipe hanger contracts. He determined to have a meeting with Milman in order to create "a more healthy relationship" between the companies, i.e., get more orders from Grinnell for snubbers. Milman, Toth and Pope, the head of Pacific's Kintech Division, which manufactured snubbers, met at Pacific's plant on August 23, 1976. Toth asked Milman for an order. A further meeting was set up for August 31 at the Grinnell office in Providence, Rhode Island. Milman continued to stall on placing a large order, in the hope that Barry's snubber would soon be on line. Toth and Pope then agreed to increase the discount from the standard 20% to 30% on the four smaller sizes of snubber and 25% on the larger sizes.

With this incentive, Milman, on behalf of Grinnell, agreed to order \$5.7 million worth of snubbers to cover Grinnell's expected needs for 1977. Pacific granted the additional discounts.

Milman informed Barry of this development. Barry requested that Grinnell hold off any long term orders to Pacific to give it a chance to qualify its snubbers, which it represented it could do by early 1977.

[**8] Milman then presented the issue to Coyle, the president of Grinnell. Coyle took the position that it was unnecessary to place such a large order. He preferred to rely on Barry to produce its snubber in time to meet customer demand and directed Milman to cancel the September order. Milman cancelled the \$5.7 million order and placed an order for \$1 million of Pacific snubbers on October 20, 1976. Pacific accordingly retracted the additional discounts and accepted the smaller order at the standard discount.

The schedules attached to the Grinnell-Barry contract called for Barry to develop production capacity for six sizes of snubbers by January 28, 1977. As of December, 1976, it had not even produced a prototype of any size snubber which qualified under Grinnell's specification. Barry officials notified Grinnell that they could not deliver a production project before May of 1977. On January 6, 1977, Barry postponed its projected delivery date to June, 1977.

Milman became increasingly anxious about Grinnell's ability to supply its customers. He met with Pope and Toth in California in mid-December, but without significant results, partly because Pope and Toth now distrusted Milman. [*9] Toth in particular thought that he could secure more favorable orders if he could go over Milman's head to Coyle. Milman arranged a meeting in Miami on January 10, 1977 at which he, Coyle, Toth and Pope were present. No business was transacted, but they agreed to continue negotiation in California on January 27.

On January 18, Barry set back its projected delivery dates an additional two months for the smaller units and until February, 1978 for the two larger units.

On January 27, Milman and Coyle met with Toth and Pope at the Pacific plant in California. Milman went to the meeting with the expectation that Pacific would not repeat its offer of extra discounts. He was so concerned about supply, however, that he was prepared to make a substantial order at the standard discount. Nevertheless, he left the negotiations to Coyle. Coyle was initially given a tour of the Pacific plant during which he observed that a substantial portion of the facility was not being fully utilized. He was thereby encouraged to strike a hard bargain. He was right. Toth was concerned that part of his plant capacity was not productive and was particularly anxious to get the Grinnell order. Toth and [*10] Pope were also aware of the existence, though not of the terms of, the Grinnell-Barry contract, and had been since at least [*1268] September, 1976. (Their testimony that they were not in the least concerned with potential competition from Barry is not credible.)

The upshot of the negotiation was that Coyle was successful in retrieving the 25% and 30% discounts which had been offered in the aborted 1976 contract on a minimum purchase of \$4.3 million during the balance of 1977 and January, 1978. The minimum purchase amount was based on Grinnell's projections of its requirements for that period. It was not in form a requirement contract, however, in that Grinnell was not barred from purchasing additional snubbers from any other source. Grinnell had the option to purchase an additional 25% of the minimum order at the same price and to purchase the same quantities at the same discounts for 1978 and 1979.

Most significantly for purposes of this case, the contract provided for a 100% penalty for cancellation of any part of the minimum order. Pope testified that this clause was included because he distrusted Milman and wanted to prevent a repeat of his experience with the aborted [**11] agreement of the previous September. In any case, the clause was readily accepted by Milman and Coyle and was not the subject of extended negotiation.

Milman returned to Providence, and on January 31, sent Barry the following letter, which he had drafted on January 25, before the meeting with Toth and Pope:

In response to your further slippage in schedules, we request an amendment of our agreement of January 30, 1976 to delete all minimum purchase requirements on ITT Grinnell from the agreement. As you know, we have issued two purchase orders to you for the first half of 1977. Since your estimated date for an initial shipment now is at least as late as September, 1977, it does not make sense for us to continue to issue purchase orders which we both now know you can't meet. An amendment deleting all minimum purchase requirements would, I believe, relieve some of the pressure on our relationship. In the alternative, we are not willing to extend the present agreed-to schedules which, in view of the market projection and our delivery commitments, we consider to be a material provision of the Agreement.

Although it is our intention to meet and discuss with you possible revisions [**12] to the Agreement between our companies, our attorneys have asked me to make it clear that these efforts looking toward amendments of that Agreement cannot change the fact that the Agreement as it now stands have been breached by your company.

We do not want our present pleasant relationship to be in any way jeopardized, but, on the other hand, we do not want to mislead you. Our willingness to work with you toward a formal Agreement amendment should not be interpreted as our acquiescence in Barry's failure to comply with existing agreement provisions.

At a meeting on February 25, 1977 with Barry officials, Milman stated that due to the development delays he might have to commit the next two years' purchases to Pacific. Milman proposed to reduce the minimum purchase requirement to \$3.6 million. As an alternative, Barry proposed to "stretch-out" the \$9 million minimum purchase requirement over a longer term. The issue was not resolved. Milman encouraged Barry to continue its development efforts and set May 15, 1977 as a deadline by which Barry had to qualify the four smaller snubbers and complete the design of the two larger sizes, if they were to get any purchases from Grinnell. [**13] Another meeting was held on March 14, 1977, but again no resolution was reached. I find that Milman hoped to keep Barry in the picture as an alternative source rather than become wholly dependent upon Pacific.

On April 25, 1977, David McKenny, vice-president and general counsel of Grinnell, wrote Barry a letter containing the following paragraph:

I would like to make it clear that the May 15th date was only important in that the amendment we offered would not [*1269] take effect unless the qualifications we have been discussing were accomplished by that date. We would not want you to believe that, if Barry Wright accomplishes the qualifications referred to by May 15, ITT Grinnell would be obligated to continue under the original Agreement. While we are always willing to discuss with you agreements under which our two companies could proceed, our present position is that the original Agreement is breached and terminated.

By May 15, Barry had qualified the four smaller sized snubbers.

On May 16, several Grinnell representatives met with John Quinn, president of Barry, and Milt Gilbert, Barry's legal counsel. They discussed their future relationship but reached no [**14] agreement. They agreed to meet again on May 27.

On May 23, Milman called Quinn to postpone the scheduled meeting. Milman informed Quinn that he planned to meet with Toth and Pope in Chicago. Milman also told him that the price difference between Pacific and Barry was still over 10% but that if the differential fell below 10%, it would not be attractive to stay with Barry.

On May 31, 1977, Milman met with Pope and Toth in Chicago and agreed to purchase orders of \$6.9 million for 1978 and, subject to further negotiation on escalation, the same amount for 1979. Both of these contracts provided for the extended discounts of 25% and 30% and for a 100% penalty for cancellation. In the 1979 Agreement, the cancellation penalty applied only to \$5 million of the order.

On June 2, 1977, Grinnell cancelled the two purchase orders it had placed with Barry in September, 1976, upon which Barry had failed to deliver. On July 5 and July 14, 1977, Grinnell placed with Pacific the orders for 1978 and 1979, respectively, which Milman had agreed to on May 31.

I find that as of July, 1977, Barry had qualified one each of its sample snubbers in the four smaller sizes, but that their performance [**15] was still unreliable. The problems of putting even the four smaller sizes into production had not been solved. A critical element of the snubber was a ball screw. Ball screws which were commercially available had to be individually machined to be adapted to the Barry snubbers. No supplier of a ball screw suitable for production runs had been located. Engineering for the 35,000 lb. and 100,000 lb. snubbers, which presented different and more serious problems than the smaller sizes, had not been addressed at all. I am not persuaded by a preponderance of the evidence that Barry had the capacity to produce and deliver a full line of mechanical snubbers before the end of 1979.

The minimum amounts under the agreements for 1978 and 1979 were less than Grinnell's 1977 projections of its requirements for those years, and for 1979 substantially less. In fact, however, Grinnell's purchases were only slightly in excess of the minimum amounts.

All of Pacific's discounted prices were above both marginal and average cost, and Pacific made a substantial profit on the Grinnell sales. It enjoyed some savings in mass production and reduction of selling costs. With a few exceptions, its prices [**16] in all sizes of snubbers were higher than Barry's contract prices (including escalation). (It is likely, however, that if Barry had even gotten into production on the larger sizes, its increased development costs would have precluded them from selling at the contract price, and increases would have been required to make such production profitable).

At the conference on May 31, 1977, Pope and Toth agreed that 1977 prices would increase only 5% over the 1976 price list, that 1978 prices would be the same as 1977 and that 1979 prices would increase at the rate of inflation. The evidence does not support the proposition that this price structure was arrived at for the purpose of securing the contract with Grinnell; it is likely that it had been decided upon across the board, possibly as early as January, 1977.

The evidence does not support a finding that as part of the agreement, Pacific agreed not to solicit Grinnell's "backlog", i.e., existing unfilled orders for pipe hanger [*1270] systems with hydraulic snubbers in order to get the customer to substitute its mechanical snubbers. The evidence is rather persuasive, in fact, that Pacific actually made such solicitations.

At [**17] a meeting of the Society of Security Analysts in New York in the fall of 1977, Mr. Toth, president of Pacific, made the following answer to a question concerning Pacific's competitors in the snubber business:

TOTH: Shock arrestor. Well, our major competitors are our major customers. We traditionally sell the shock arrestors to the pipe hanger people and for instance, there's a division of ITT, Grinnell up in Providence, called the Pipe Hanger Division, that probably has a major share of the market and they make hydraulic shock arrestors. So we have had to sell our product to them when at the same time they were trying to beat us out

with the sale of their hydraulic units. And that's the reason for our selling directly to the utilities. We went right to the end user who just edicted [sic] to the selling engineers that they wanted a mechanical shock arrestor versus a hydraulic. So Grinnell has had to buy our unit. We really were heading on a collision course with this major customer up until last fall when we got together with them and they decided not to offer their unit nor to get into the design of a mechanical unit. So we now have all of their business. We have **[**18]** a contract with them for the next two years. That amounted to a \$16 million order that we got this past summer and it is a major part of our backlog now and they are our friends now.

In October, 1977, a Grinnell internal memorandum seeking approval from corporate headquarters for the cancellation of the Grinnell-Barry contract contained the following paragraph:

During the course of developing the product, Barry Wright Corp. (our partners in the joint venture) exercised their option to increase production costs due to escalation. At the same time our competitors, who have a similar device qualified and in production, have heard of our intent to develop our own device, offered us more favorable terms for both cost and schedules. With these new terms, the cost of developing our own product became marginal, and the project was cancelled.

This memo was endorsed by Milman and other Grinnell officials principally concerned with the snubber contract.

Pacific sent Barry a letter warning Barry against infringing Pacific's patent. No other action was taken. I find that this letter was sent in good faith and did not constitute an abuse of the patent.

*Rulings **[**19]** of Law.*

1. Relevant Market.

HN1 In order to determine whether the defendant has "market power" it is necessary to determine the relevant market. The parties have stipulated that the relevant product market consists of both hydraulic and mechanical snubbers. This is theoretically justifiable even though customer preference was strongly in favor of mechanical snubbers on the ground that there is a point at which a price differential would negate the preference. As a practical matter, however, given the relationship of engineering performances to budgetary limits in this particular industry, it is probable that it would take a very broad price differential to achieve this theoretical result.

Defendant urges that the relevant geographic market is the entire world because Pacific makes some sales in foreign countries in competition with foreign manufacturers. The market in which Grinnell is obliged to buy and in which Barry was obliged to compete for Grinnell's business was the United States. In the United States market, Pacific was not subject to competition from foreign manufacturers. The world market is thus irrelevant to this case. The relevant market is the United States. **[**20]** See generally, Areeda & Turner, Antitrust Law, Little, Brown and Company, 1978, §§ 522-524 and 534.

2. Market Power.

HN2 Market power is defined as the power to raise the price of a product by limiting its **[*1271]** supply. There was evidence of various arcane indicia of market power which in the circumstances of this case I need not review. Pacific's dominance of the market generally and total control of mechanical snubbers in the United States clearly gave it market power. In addition, there were significant barriers to entry into the market because of the patent covering Pacific's product and the cost and difficulty of designing and producing a workable snubber which did not infringe the patent.

The possession of market power is not the equivalent of its exercise, however. It appears in this case that Pacific considered it in its best interests (i.e., presumably the maximization of profits) to reduce prices and increase production in order to utilize its total investment in its productive capacity. This is the reverse of the exercise of market power.

3. Exclusionary Conduct.

HN3 A manufacturer with market power may not indulge in exclusionary conduct, even **[**21]** if such conduct is not the classic monopolistic exercise of market power. Exclusionary conduct has been very broadly defined, most

notably by Judge Wyzanski in [United States v. United Shoe Machinery Corp., 110 F. Supp. 295, 343-345 \(D. Mass. 1953\)](#), aff'd *per curiam*, [347 U.S. 521, 74 S. Ct. 699, 98 L. Ed. 910 \(1954\)](#), as encompassing any practices by a monopolist which were not the "inevitable consequences of ability, natural forces or law". "Market control is inherently evil and constitutes a violation of [§ 2](#) [of the Sherman Act] unless economically inevitable, or specifically authorized and regulated by law."

Barry has asserted that Pacific's conduct was violative of the Sherman Act in several particulars; only two of its arguments merit serious consideration.

The first argument is that the price concessions granted to Grinnell, while not predatory in the sense of violating the Robinson-Patman Act, were nevertheless exclusionary in that they were designed to eliminate Barry as a potential competitor. They were not below any measure of cost, however, and produced a comfortable profit for Pacific. Assuming that the price concessions were in part an answer to the potential [**22](#) threat from Barry, I rule that such [HN4](#)[↑] nonpredatory and nondiscriminatory price reductions do not violate [Section 2](#) of the Sherman Act. Reasonable reduction of price in response to competition is not a violation of the Sherman Act; it is in fact the result which the antitrust laws were designed to accomplish. [Cal. Computer Products v. Intern. Business Machines, 613 F.2d 727, 742 \(9th Cir. 1979\)](#).

The second argument is that, in exchange for price cuts, Pacific imposed on Grinnell a three-year noncancelable requirements contract which was intended to foreclose Barry's entry into the market. The first answer to that argument is that it misread the facts. There was no three-year contract. Pacific offered three separate contracts at favorable discounts. The favorable discounts for 1977 were not conditioned on agreements for 1978 and 1979, nor were 1978 discounts conditioned on an agreement for 1979. Accepting all three contracts was Grinnell's choice, apparently for two reasons: relatively favorable pricing and established availability of a reliable product.

Even if the contracts were requirements contracts, separate one-year contracts in these circumstances are probably not unreasonable. [**23](#) It is not necessary to decide that issue, however, because it seems clear that the agreements were not for requirements but for specific dollar amounts. In 1978 and 1979, the minimum amounts were less than Grinnell's anticipated needs. Barry argues that in fact the minimum amounts were in excess of Grinnell's requirements and that Grinnell ended up with an excessive inventory of snubbers for which there was no economic justification. There was little if any evidence on the justification for Grinnell's inventory, and I am unable to make a finding on the point. A characteristic of a requirements contract is that the purchaser is precluded from buying any of the product from any other supplier. This [*1272](#) was not the case, and indeed Barry might have supplied the excess amount if it had taken up the \$3.6 million option offered to it by Grinnell in the spring of 1977.

The aspect of the contracts which most strongly supports Barry's charges against Pacific is the 100% cancellation penalty, in effect rendering the purchase order noncancelable. It is difficult to say that this provision was "economically inevitable". It was in fact a change in practice. Pacific argues that [**24](#) it simply made specifically enforceable Grinnell's contractual obligation to purchase the minimum amount specified. This argument is a trifle disingenuous. It is clear that blanket purchase orders of the type executed by Pacific and Grinnell in January and July, 1977 were agreements governing price only. No firm obligations of the seller to deliver and the buyer to pay for the goods arose until specific purchase orders were submitted. If the agreed upon minimums were not ordered, the agreed upon discounts would be withdrawn, and the purchaser would be obliged to pay at standard rates for products actually ordered and delivered.

Strict application of the notion of "economic inevitability", however, would render a whole range of business choices illegal to the extent that a particular choice enhanced the chooser's control of the market in any respect. It seems to me to be an extraordinary extension on antitrust theory to hold a noncancelable clause in a one-year purchase contract illegal because not economically inevitable. I have found no case so holding, and I rule that the imposition of this clause, given the history of the relations between Grinnell and Pacific, and Pacific's [**25](#) legitimate desire to plan its production for at least a year, is not illegal exclusionary conduct in violation of [§ 2](#) of the Sherman Act.

Tortious Interference with Contractual Relations.

Barry had added a count against Pacific for tortiously interfering with its contract with Grinnell. With respect to this count, I find and rule as follows:

1. From January, 1977 onward Barry was in default on its contract with Grinnell and there was no likelihood that Barry could produce a line of snubbers within any future period reasonably within the terms of the contract.
2. Pacific did not commit any tortious act.

Conclusion.

I conclude that Pacific had achieved market power in the snubber market generally and a complete monopoly of mechanical snubbers in the United States as of January, 1977. I find that the United States is the relevant geographical market. I further find that Pacific's monopoly was achieved because of its superior skill in devising the only workable and reliable mechanical snubber on the market and because of the protection offered to it by its patent. Its monopoly was thus perfectly legal. I conclude that in 1977 it captured an even [**26] larger share of the market by means of three successive one-year contracts with Grinnell for substantial numbers of snubbers. I do not find that the provisions of these contracts were illegal. I further conclude that it is likely that Pacific would have captured most of this market in any event because Barry was not shown to have the ability to produce a full line of snubbers within the relevant period and no other producer was in the field.

I conclude that Barry's elimination from the market was primarily the result of its inability to furnish the product within the relevant time period, and that Pacific's domination of the market was the result of its filling the void thus created. In that sense, its eventual monopoly position was economically inevitable.

Order for Judgment.

On the basis of the foregoing, judgment shall enter for the defendant, with costs.

So ordered.

HN1 **Summary Judgment, Evidentiary Considerations**

Summary judgment should be granted only when, in light of the evidence and pleadings, a court is convinced that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law. *Fed. R. Civ. P. 56(c)*. Summary judgment is disfavored in complex antitrust cases involving elusive issues of intent or motive. Nevertheless, this general reluctance does not preclude the use of summary judgment in antitrust litigation. A party opposing summary judgment must present some significant probative evidence tending to support the complaint. Such evidence must be relevant to disputed factual issues that are truly material to the litigation. A lawfully displaced competitor cannot construct a justiciable controversy from artful pleading alone. The courts should not serve as a refuge from the give and take of a properly functioning marketplace.

HN2 **Monopolies & Monopolization, Actual Monopolization**

The offense of monopolization rests upon the willful acquisition or maintenance of monopoly power in the relevant market and the existence of actual injury to competition in that market. The threshold consideration in establishing market power is the relevant market. A firm cannot impose monopoly prices if buyers are free to purchase a competitor's goods. Thus, all products that are reasonably interchangeable, and so can be said to compete with each other for the same buyers' dollars, are included in the market definition. The relevant market may also be a submarket delineated by industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors. Nonetheless, the designation of the relevant market requires considerable judgment. Its dimensions include the product involved, the geographical limits within which it functions, and the appropriate time frame.

Criminal Law & Procedure > ... > Acts & Mental States > Mens Rea > Specific Intent

HN3 **Monopolies & Monopolization, Attempts to Monopolize**

Three elements are necessary to prove an attempted monopolization claim in the Ninth Circuit: (1) specific intent to control prices or destroy competition in some part of commerce; (2) predatory or anticompetitive conduct directed to accomplishing the unlawful purpose; and (3) a dangerous probability of success. In establishing the presence of these elements the court permits a dangerous probability of success to be inferred from proof of specific intent which, in turn, can be inferred from conduct that forms the basis of a substantial claim of restraint of trade, or conduct that is exclusionary or threatening to competition.

699 F.2d 965, *965LÁ1983 U.S. App. LEXIS 30980, **1

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

[HN4](#) [down] Regulated Practices, Price Fixing & Restraints of Trade

Price parallelism alone generally will not establish price fixing. Other circumstantial evidence is required.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

[HN5](#) [down] Price Fixing & Restraints of Trade, Tying Arrangements

The elements necessary to establish a tying claim are: (1) Two distinct products or services are in fact tied such that the products are offered as a single package; (2) The defendant has sufficient economic power in the tying market to impose restrictions in the tied product market; (3) The amount of commerce in the tied product is not insubstantial. To possess substantial power in the tying market, a firm must be able to raise prices or to require purchasers to accept burdensome terms that could not be enacted in a completely competitive market.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

[HN6](#) [down] Sherman Act, Claims

To establish a per se violation of [section 1](#) of the Sherman Act, [15 U.S.C.S. § 1](#), a plaintiff generally must show that the defendant engaged in concerted anticompetitive activity with others at the same level of market organization. Exclusive dealerships usually escape the proscriptions of [§ 1](#) because they establish a vertical relationship among firms that do not compete with each other. Restraints solicited by a distributor but implemented by a manufacturer are not automatically per se violations. Restraints of this type come within the per se rule only if they clearly had, or were likely to have, a pernicious effect on competition and lacked any redeeming virtue.

Antitrust & Trade Law > Sherman Act > General Overview

Torts > Vicarious Liability > Corporations > General Overview

[HN7](#) [down] Antitrust & Trade Law, Sherman Act

A violation of section 1 of the Sherman Act, [15 U.S.C.S. § 1](#), requires, at the outset, concerted activity. This requirement precludes liability for coordinated activity among multiple corporations operated as a single entity. The single entity test is easily satisfied when corporate policies are set by one individual or by a parent corporation. At

the other extreme, jointly owned corporations that compete in the marketplace, hold themselves out to the public as competing organizations, and set policy independently are as capable of conspiring to restrain trade as unrelated corporations.

Opinion by: SNEED

Opinion

[*969] SNEED, Circuit Judge:

In 1977, General Business Systems (GBS) initiated a federal antitrust suit against N.V. Philips Gloeilampenfabrieken (NVP), a Netherlands corporation, and its American subsidiaries, North American Philips Corporation (NAP) and Philips Business Systems, Inc. (PBSI). The defendants cross-claimed against GBS and its sister corporation, Shasta General Systems (Shasta), alleging both federal antitrust and state law causes of action. GBS later sought sanctions against the Philips companies for alleged abuse of discovery. The district court refused to impose such sanctions and granted summary judgment against all parties. Both sides now appeal the denial of their respective [**2] complaints. We affirm the district court.

I.

FACTS

This case arises out of the Philips companies' attempt to penetrate the small business computer market in the United States. Between 1969 and 1978 NVP marketed its computers in this country through PBSI, its marketing agent, MLC, Inc., or independent distributors. During this period, Philips' share of the small business computer market never exceeded five percent. GBS became the Philips distributor for Northern California in 1972. In return, GBS agreed that it would concentrate its "primary marketing efforts" on Philips computers and would not market "directly competitive hardware." In 1974 PBSI added St. Louis, Missouri, to GBS's market area. The agreement was renewed in 1977 to extend through August 1, 1980. In 1978, however, Philips exercised a buy-out option, terminating the agency relationship.

Philips' initial computer lines, the P300 and P350 series, stored memory on magnetic ledger cards (mlcs). Although a number of small business computers used mlcs at the time, mlcs generally were compatible with only one manufacturer's brand of computers. The mlcs for Philips computers were produced primarily by two German [**3] companies, Jollenbeck-Kasten (JK) and Magnetdruck (MD). Philips provided design specifications and production assistance to JK and MD in order to assure maximum card-machine reliability. In return, JK and MD signed supply contracts restricting their sales of Philips mlcs to distributors "recognized as [members of Philips distribution network] pursuant to a written communication given by Philips to the Vendor." Although it is disputed [*970] whether a binding exclusive dealing relationship was created by this language, JK and MD generally sold mlcs exclusively to Philips affiliates or designees. PBSI was the designated Philips distributor for the United States at all times relevant to this suit.¹ PBSI, in turn, would sell the mlcs to GBS and other Philips computer distributors.

¹ The Philips designee until mid-1975 was MLC, Inc., which operated as a subsidiary corporation. PBSI took over as designated distributor in 1975 after complaints about MLC's effectiveness in handling mlc distribution. MLC is not involved in this litigation.

[**4] In 1974 GBS contacted JK and MD in an attempt to purchase mlcs directly. MD refused because of its exclusive dealing relationship with Philips. JK, however, had experienced negotiating difficulties with PBSI, and in 1975 inquired whether GBS would become an exclusive dealer of the JK-produced Philips mlcs. Although no exclusive dealing agreement was established, GBS did order and receive mlcs from JK during the latter half of 1976.

Philips did not ignore this interference with its distribution network. It repaired its relationship with JK by agreeing to split its orders for mlcs between JK and MD. JK reciprocated by ceasing to deal directly with GBS.

In the mid-1970's the P300 and P350 faced increasing competition from more sophisticated computers using disk memories and cathode ray tube (CRT) displays. These computers threatened the Philips computers with obsolescence. Both Philips and GBS were concerned with the problem. Philips' solution was to develop the P330, a disk/CRT unit. GBS, however, feared that the P330 represented too little, too late. GBS's interest focused on a more viable product, the Diablo disk/CRT computer. In 1976 Diablo's manufacturers inquired [**5] whether GBS would be interested in marketing the Diablo computer. GBS referred the opportunity to PBSI, which was uninterested. On September 3, 1976, GBS agreed to become Diablo's exclusive U.S. distributor. Pursuant to this agreement, GBS's two top management officials incorporated a sister corporation, Shasta, which shared office space and staff with GBS. A separate president, however, was designated to run Shasta. GBS assigned its exclusive Diablo dealership to Shasta, remaining liable should Shasta fail to perform.

Meanwhile, Philips continued to develop the P330. However, it was never able to market the new disk/CRT model successfully. GBS argues that Philips never made a production model available to U.S. distributors. Philips claims that GBS's devotion of time and resources to the Diablo doomed the P330 from the start. In any event, Philips became dissatisfied with its import sales and, in November, 1978, withdrew from the computer import market. Philips sold its residual supply and service functions to Pertec Computer Corporation, which marketed its own small business computers.

II.

PROCEEDINGS BELOW

GBS alleged the following antitrust violations by the Philips [**6] companies:

- (1) monopolization or attempted monopolization of a market or submarket for Philips-compatible mlcs in violation of [section 2](#) of the Sherman Act, [15 U.S.C. § 2](#);
- (2) conspiracy to fix prices and allocate markets and concerted refusal to deal, in violation of [section 1](#) of the Sherman Act, [15 U.S.C. § 1](#);
- (3) product tying in violation of section 3 of the Clayton Act, [15 U.S.C. § 14](#).

GBS also sought to suppress the deposition testimony of certain witnesses because opposing counsel's misconduct allegedly prevented it from adequately cross-examining those witnesses.

In their counter-claim against GBS and Shasta, the Philips companies alleged the following:

- (1) conspiracy to eliminate Philips computers from the domestic computer market, in violation of [section 1](#) of the Sherman Act;
- [*971] (2) attempt to monopolize, in violation of [section 2](#) of the Sherman Act;
- (3) breach of GBS's distributorship contract with PBSI;
- (4) tortious interference by Shasta with GBS's obligations under the distributorship contract;
- (5) tortious interference with the Philips companies' business relationships with JK, MD, and others;

(6) abuse of process.

The district court, **[**7]** following the recommendation of a magistrate, denied GBS's abuse of discovery motion. The court rejected GBS's monopolization claim, primarily for failure to substantiate GBS's market definition. From this it followed that evidence supporting the charges of attempted monopoly, conspiracy, and product tying was lacking, and the district court so held.

As to the Philips companies' counter-claims, the district court concluded that GBS and Shasta were a single entity, and were thus incapable of conspiring together in violation of the antitrust laws. The court dismissed the attempted monopolization claim because the Philips companies had failed to establish the requisite intent to monopolize, or facts from which such intent could be inferred. The breach of contract claim fell in the absence of credible evidence of "direct competition" between the Philips and Diablo computers. Since GBS had not breached its contract with PBSI, the contractual interference claim against Shasta was rejected. The court also found no substantial evidence of improper interference with Philips' business relationships. Finally, it rejected the abuse of process claim because no causal connection between **[**8]** the alleged antitrust conspiracy and GBS's filing of this suit was shown, nor was any evidence introduced of improper use of trade secrets acquired through discovery. Summary judgment was accordingly granted against all claims.

III.

STANDARD OF REVIEW

HN1**[↑]** Summary judgment should be granted only when, in light of the evidence and pleadings, a court is convinced that "there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law." *Fed. R. Civ. P. 56(c)*. Summary judgment is disfavored in complex antitrust cases involving elusive issues of intent or motive. *Poller v. Columbia Broadcasting System, Inc.*, 368 U.S. 464, 473, 7 L. Ed. 2d 458, 82 S. Ct. 486 (1962). Nevertheless, this general reluctance does not preclude the use of summary judgment in antitrust litigation. *Continental T.V., Inc. v. GTE Sylvania Inc.*, 694 F.2d 1132, 1136, & n.5, (9th Cir. 1982). A party opposing summary judgment must present some "significant probative evidence tending to support the complaint." *First National Bank v. Cities Service Co.*, 391 U.S. 253, 290, 88 S. Ct. 1575, 20 L. Ed. 2d 569 (1968); see, e.g., *Betaseed, Inc. v. U & I* **[**9]** *Inc.*, 681 F.2d 1203, 1207 (9th Cir. 1982); *Thomsen v. Western Electric Co.*, 680 F.2d 1263, 1265 (9th Cir.), cert. denied, 459 U.S. 991, 103 S. Ct. 348, 74 L. Ed. 2d 387 (1982); *Ron Tonkin Gran Turismo, Inc. v. Fiat Distributors, Inc.*, 637 F.2d 1376, 1381 (9th Cir.), cert. denied, 454 U.S. 831, 70 L. Ed. 2d 109, 102 S. Ct. 128 (1981). Such evidence must be relevant to disputed factual issues that are truly material to the litigation. *Id.* A lawfully displaced competitor cannot construct a justiciable controversy from artful pleading alone. The courts should not serve as a refuge from the give and take of a properly functioning marketplace. With these principles in mind, we turn first to the district court's disposal of GBS's claims.

IV.

GBS's ANTITRUST COMPLAINT

A. Monopolization

HN2**[↑]** The offense of monopolization rests upon the willful acquisition or maintenance of monopoly power in the relevant market, *United States v. Grinnell Corp.*, 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966); *Greyhound Computer* **[*972]** *Corp. v. IBM*, 559 F.2d 488, 492 (9th Cir. 1977), cert. denied, 434 U.S. 1040, 54 L. Ed. 2d 790, 98 S. Ct. 782 **[**10]** (1978), and the existence of actual injury to competition in that market. See *Betaseed* **[Inc. v. U & I Inc.**, 681 F.2d 1203, 1231-32 (9th Cir. 1982); *California Computer Products v. IBM*, 613 F.2d 727, 735 (9th Cir. 1979)]. The threshold consideration in establishing market power is the relevant market. See *Grinnell*, 384 U.S. at 571. A firm cannot impose monopoly prices if buyers are free to purchase a competitor's goods. Thus, all products that are "reasonably interchangeable," and so can be said to compete with each other for the same buyers' dollars, are included in the market definition. *United States v. E.I. du Pont & Co.*, 351 U.S. 377, 100 L. Ed. 1264, 76 S. Ct. 994 (1956). For purposes of antitrust analysis, the relevant market may also be a submarket delineated by:

industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors.

Brown Shoe Co. v. United States, 370 U.S. 294, 325, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962); see, e.g., M.A.P. Oil Co. v. [**11] Texaco Inc., 691 F.2d 1303, slip op. at 5240-41 (9th Cir. 1982).

Nonetheless, the designation of the relevant market requires considerable judgment. Its dimensions include the product involved, the geographical limits within which it functions, and the appropriate time frame. The latter two pose no difficulty in this case. We can assume that the United States fixes the geographical limits and the years 1969 to 1978 the appropriate time frame.

The choice of the appropriate product is another matter. According to GBS, the appropriate product in this case is the Philips-compatible mlc when sold at wholesale. Its entire case is dependent on this choice of appropriate product. Only in this narrowly defined market did Philips possess a significant share. GBS relies on several factors to establish its market definition. It asserts that owners of Philips computers were "locked-in" to Philips-compatible mlcs. These owners could find few, if any, adequate substitutes for the JK and MD cards. As a result, GBS argues, Philips was able to raise its prices without facing competition from other mlc manufacturers. GBS also claims that the industry recognized a distinct Philips-compatible [**12] mlc market. The cards produced by JK and MD met Philips' stringent specifications and were not sold for use in other manufacturers' computers. The majority of these cards were handled by dealers who dealt only in Philips products. The foregoing allegedly gave Philips the ability to maintain "premium" prices in this distinct market.

The district court rejected as a matter of law GBS's market definition. It is this interpretation of the law that we must review. If the district court erred, we must reverse its judgment with respect to GBS's claims and remand for further proceedings. The primary source of the failure of GBS to establish its position is the district court's conclusion that the market for Philips-compatible mlcs was *not* insulated from the competitive struggle between computer systems. That is, in its view Philips had little or no power to raise the price of its mlcs without reducing its profits because any such increase would diminish sales of its computer system and very likely adversely affect aggregate profits. Were mlc prices significantly increased, computer system buyers quickly could shift to other sellers who, in turn, could profitably expand their output [**13] to meet the new demand. We agree with the district court that the undisputed facts permit only one conclusion, *viz.*, that the market for mlcs cannot be separated from the general market for small business computer systems.

1. *The Undisputed Facts*

The performance of mlcs was a major concern for businesses contemplating purchase of a P300 or P350. At first this worked to Philips' advantage. The reliability of its mlcs, which reputedly worked better than those of its competitors, played an important role in the campaign to sell Philips [*973] computers. Businesses unwilling to risk processing delays or loss of information would find the Philips computers and their mlcs an attractive package. As other companies developed more modern disk computers, however, Philips' early advantage became a serious disadvantage. Its failure in the American market is attributable to its attempt to cling to mlc computers even after the newer disk computers had proven their greater productivity. Philips' sales of computers dropped as purchasers turned away from systems based on the outmoded mlc technology.

In spite of contrary allegations in GBS's brief, the facts before the district [**14] court demonstrate that prospective purchasers also viewed the cost of mlcs as a major barrier to purchase of a Philips computer. While Philips sold fewer than 3000 computers in the American market between 1974 and 1978, it sold more than 19 million mlcs in the same market in the shorter period from 1975 to October 1978. At between twenty and twenty-eight cents a card, the mlcs' cost was a substantial part of total cost for many users. It is hardly surprising, then, that Shasta included the high cost of mlcs among the factors it used to convince customers to buy the more modern, disk-based Diablo. Even Philip Parise, GBS's vice-president, who maintained that he didn't know of any particular computer sale lost

because of the cost of Philips mlcs, conceded that it could have been easier to sell Philips computers had mlc prices been lower. As we view the record, there is no genuine dispute concerning the fact that the high price of these mlcs, which cost as much as two or three times those of other manufacturers, reduced the competitiveness of the Philips computers.

GBS asserts that the viability of a separate market for mlcs is placed at issue by the price insensitivity of the [**15] market for Philips mlcs after Philips withdrew from the computer market. This is not the case. Philips adhered to high prices after its withdrawal because, as GBS's president, Lawrence Finch, stated in his Declaration in Opposition to Defendant's Summary Judgment Motion, it had higher overhead costs than its competitors. The period during which GBS alleges that these prices were successfully foisted on the market is the same period during which competitors forced Philips, laden with its expensive mlcs, out of the American small business computer market. In due course Philips abandoned its mlc operation as well. It would not have done so had that market been the separate, profitable market alleged by GBS. Philips was the victim, not the beneficiary, of its high prices in the mlc market.

The other factors cited in support of GBS's market definition merit little discussion. Mlcs were sold separately from computers because of the dynamics of use, not market differentiation. Users could hardly be expected to buy a supply of mlcs good for the product life of the computer when they made their initial purchase of a P300 or P350. The physical division of consumer behavior does not [**16] alone establish that it is directed at separate markets. Industry recognition is, of course, a valid indicator of relevant market. See, e.g., [Greyhound Computer, 559 F.2d at 495](#). GBS, however, has failed to direct us to any significant probative evidence of such recognition. The only evidence to which it alludes is the unsupported statement of one witness that Philips-compatible mlcs constituted a market. This does not amount to substantial evidence of industry recognition, particularly when contrasted with the persuasive evidence already discussed of the interdependence of Philips computers and mlcs.

2. The Cases

GBS relies on two cases, [Heattransfer Corp. v. Volkswagenwerk, A.G., 553 F.2d 964 \(5th Cir. 1977\)](#), cert. denied, 434 U.S. 1087, 55 L. Ed. 2d 792, 98 S. Ct. 1282 (1978), and [Greyhound Computer Corp. v. IBM, 559 F.2d 488 \(9th Cir. 1977\)](#), cert. denied, 434 U.S. 1040, 54 L. Ed. 2d 790, 98 S. Ct. 782 (1978), to refute the district court's determination of the relevant market. The confidence of GBS is misplaced. In *Heattransfer* the jury recognized a separate market in air-conditioning units for Volkswagen automobiles. [**74] These units, [**17] designed to accommodate Volkswagens' air-cooled, rear-mounted engines, were not suitable for other types of engines. Several manufacturers competed in this special market, which was not quickly responsive to price changes in air conditioners suitable for other engine types. Thus, a jury could easily find a market limited to Volkswagen air conditioners. See [553 F.2d at 980-81](#).

The market for mlcs is quite different. Unlike an air conditioner, which is not an integral part of an automobile "system," mlcs are an essential component of the Philips computer system. Not only is an mlc computer useless without cards, but also the quality of the mlcs determines the overall performance of the system. As already pointed out, the rational purchaser of a computer system must consider the cost, availability, and reliability of mlcs when deciding which system to purchase. Conversely, changes in the price, whether direct or indirect, of competing computer systems will quickly affect demand for the Philips computer systems and their mlcs.

GBS's reliance on *Greyhound Computer* is similarly misplaced. In that case the evidence sustained, "though by no great margin," the jury's finding [**18] of a market consisting of leased computers. [559 F.2d at 494-95](#). Contrary to GBS's contention, we expressly declined to rule on the lock-in theory asserted by Greyhound. [Id. at 495-96](#). Rather, we placed heavy reliance on industry recognition of the distinction between leases and sales. See [id. at 495](#).

Standing against GBS's "lock-in" theory is a line of cases rejecting attempts to establish a relevant market with respect to a "locked-in" component. [Telex Corp. v. IBM, 510 F.2d 894](#) (10th Cir.), cert. dismissed, 423 U.S. 802, 96 S. Ct. 8, 46 L. Ed. 2d 244 (1975), and [ILC Peripherals Leasing Corp. v. IBM, 458 F. Supp. 423 \(N.D. Cal. 1978\)](#), aff'd sub nom. [Memorex Corp. v. IBM, 636 F.2d 1188 \(9th Cir. 1980\)](#), cert. denied, 452 U.S. 972, 69 L. Ed. 2d 983,

101 S. Ct. 3126 (1981), both rejected claims that the relevant market was IBM-compatible peripheral equipment. In *Telex*, the Tenth Circuit reversed a district court's definition of the relevant market for peripherals as being that for devices compatible with IBM central processing units. The circuit court expanded the market definition to include non-IBM plug-compatible peripherals. The ease with which [**19] the incompatible could be made compatible established the reasonable substitutability of these peripheral products. [510 F.2d at 919](#).

We adopted a similar approach in *ILC Peripherals*, in which the district court's directed verdict rested in part on the plaintiff's failure to establish a submarket for IBM peripherals. The district court emphasized the "potential competition" from non-IBM plug-compatible manufacturers who could have converted to production of IBM-compatible equipment.² IBM had demonstrated that the costs and engineering barriers to conversion were not excessive. [458 F. Supp. at 429](#). It also relied heavily on [*975] competition between computer systems. Because peripherals formed a large part of total system cost, an increase in peripheral prices would increase the demand for competitive systems. Systems competition was therefore an important restraint on peripheral pricing. *Id.*

[**20] It is true that in *Telex* and *ILC Peripherals* the peripheral equipment represented a more substantial portion of the total system cost than do the mlcs. The same, however, cannot be said about *Advance Business Systems & Supply Co. v. SCM*, 287 F. Supp. 143 (D. Md. 1968), modified on other grounds, [415 F.2d 55 \(4th Cir. 1969\)](#), cert. denied, 397 U.S. 920, 90 S. Ct. 928, 25 L. Ed. 2d 101 (1970). In *Advance Business Systems* the plaintiff, a distributor of copying machine supplies, contended that the relevant market was paper that could be used in SCM copiers. SCM controlled this market, although a number of manufacturers produced paper that could be used with SCM's direct electrostatic process. Copying paper constituted a small portion of overall system cost. The court found the plaintiff's market definition to be unrealistically narrow after citing the competition among both paper suppliers and copier manufacturers. *Id.* at 153-54. It opted instead for a definition that included paper compatible with any copier operating on the direct electrostatic process used by SCM.

Advance Business Systems is consistent with the relevant market cases decided in this [**21] circuit. In [Kaplan v. Burroughs Corp.](#), 611 F.2d 286 (9th Cir. 1979), cert. denied, 447 U.S. 924, 65 L. Ed. 2d 1116, 100 S. Ct. 3016 (1980), the plaintiff alleged that the initial cost of programming equipment locked-in customers to bulk processing centers using Burroughs equipment and, thus, that such centers composed the relevant market. Similarly, in [In re Data General Corp. Antitrust Litigation](#), 529 F. Supp. 801 (N.D. Cal. 1981), commitment to certain software programs had allegedly locked-in customers to the central processing units that executed the programs. In both cases, definitions of the relevant market that were limited to a single company's systems were rejected. Such definitions did not describe "economically significant" markets. In *Kaplan* we stressed the high cross-elasticity of demand as between data processing systems. [611 F.2d at 295](#). *Data General* also turned on the widespread competition in the market for computer services. See [529 F. Supp. at 813-14](#).

GBS's lock-in theory must also be rejected. Philips has amply established that intense systems competition drove it from the market for small business computers and for mlcs. Had there [**22] been a demand for substitute mlcs,

² *Fontana Aviation, Inc. v. Cessna Aircraft Co.*, 460 F. Supp. 1151 (N.D. Ill. 1978), rev'd on other grounds, [617 F.2d 478 \(7th Cir. 1980\)](#), although cited heavily by GBS, is not good law in this circuit to the extent that it disregards the role of supply substitutability in the product market definition, see *id. at 1156*. Whether real or only potential, reasonable interchangeability of supply is significant because the existence of possible competitors constrains prices even where there is no direct competition. See [ILC Peripherals](#), [458 F. Supp. at 427-29](#). *Fontana*'s identification of a market for Cessna avionics seems internally inconsistent as well. The court noted that customers bought airplanes without paying any attention to avionics. Had the court adhered to its own admonition that real-world consumer conduct should dictate the product market definition, [460 F. Supp. at 1157 n.20](#), it would have been forced to conclude that the relevant market was for aircraft. *Fontana*'s strategy in approaching the avionic market by buying unequipped planes and then selling packaged planes with avionics in competition with Cessna acknowledged the inseparability of the two markets.

GBS also criticizes the district court's reliance on [Bushie v. Stenocord Corp.](#), 460 F.2d 116 (9th Cir. 1972), and [Spectrofuge Corp. v. Beckman Instruments, Inc.](#), 575 F.2d 256 (5th Cir. 1978), cert. denied, 440 U.S. 939, 59 L. Ed. 2d 499, 99 S. Ct. 1289 (1979). We find its criticism marred by its failure to distinguish existing and potential competition, and its unwillingness to follow the court in *ILC Peripherals* and impute proper significance to the latter.

other manufacturers would have experienced no technological or financial barriers in responding to it. Taken to its logical conclusion, GBS's approach would dictate that a manufacturer, facing competition against which it cannot prevail in the sale of its end product, could be found to monopolize the market for each unique component that goes into the product. This is surely to lose sight of the forest because of fascination with the trees.

We conclude, therefore, that the district court did not err in rejecting a market definition limited to Philips-compatible mlcs.

B. Attempted Monopolization

HN3 Three elements are necessary to prove an attempted monopolization claim in this circuit: "(1) specific intent to control prices or destroy competition in some part of commerce; (2) predatory or anticompetitive conduct directed to accomplishing the unlawful purpose; and (3) a dangerous probability of success." *William Inglis & Sons Baking Co. v. ITT Continental Baking Co.*, 668 F.2d 1014, 1027 (9th Cir. 1981), cert. denied, 459 U.S. 825, 103 S. Ct. 57, 74 L. Ed. 2d 61 (1982). In establishing the presence of these elements we permit a **[**23]** dangerous probability of success to be inferred from proof of specific intent which, in turn, can be inferred from conduct that forms the basis of a substantial claim of restraint of trade, or conduct that is exclusionary or threatening to competition. *Id.* at 1029 & n.11.

[*976] GBS's attempt at direct proof of probability of success is unavailing because of its failure to establish a relevant market limited to Philips-compatible mlcs. See generally *M.A.P. Oil Co. v. Texaco Inc.*, 691 F.2d 1303, slip op. at 5242-44 (9th Cir. 1982) (explaining role of relevant market in attempt to monopolize claims). Philips' diminishing share of the market for small business computers cannot support a finding of probable success in that market. Nor can we infer specific intent because, as the district court found, GBS has failed to show anticompetitive conduct sufficient to survive the grant of summary judgment. It is true, as GBS argues, that direct evidence of specific intent may lessen the burden of the conduct requirement if it clarifies the purpose of otherwise ambiguous conduct. See *Inglis*, 668 F.2d at 1030. However, here GBS has made no showing of predatory conduct whatsoever. **[**24]** Philips competed ineffectually in the market for small business computers and their accessory products. To hold that such conduct supports a charge of attempted monopolization is to suggest that the **antitrust law** punishes losers in the competitive struggle rather than protecting them from the avarice of winners. The district court properly rejected this claim.

C. Price Fixing

GBS's price fixing claim rests on the complex arrangement Philips created to market its products in the United States. JK and MD manufactured mlcs for the American market under contract with NVP. American suppliers could not deal directly with either manufacturer; NVP designated distributors for the mlcs and renegotiated prices annually with JK and MD. NVP set up a two-tier distribution system for its American market. MLCS were first funneled through PBSI, its wholly owned subsidiary. In some areas PBSI then sold these mlcs directly to retail customers; in other markets designated agents like GBS distributed the mlcs.

GBS, in support of its price fixing claim, points out that between 1975 and 1978 the prices charged for JK and MD mlcs were nearly identical. Although GBS is ambiguous on **[**25]** this point, it apparently is complaining about the prices JK and MD negotiated with NVP, not the prices charged by PBSI. GBS relies on the rather vague testimony of a GBS officer who fails to differentiate between sales by PBSI and sales by JK and MD. In addition, it relies on a series of letters from NVP to PBSI which detail NVP's price agreements with JK and MD. GBS argues that negotiations with NVP provided the opportunity for JK and MD to set prices.

We hold that GBS, as an indirect purchaser, lacks standing to complain about prices JK and MD charged PBSI. See *Illinois Brick Co. v. Illinois*, 431 U.S. 720, 52 L. Ed. 2d 707, 97 S. Ct. 2061 (1977). The cases cited by GBS, *United States v. Socony-Vacuum Oil Co.*, 310 U.S. 150, 84 L. Ed. 1129, 60 S. Ct. 811 (1940), and *Ambook Enterprises v. Time Inc.*, 612 F.2d 604 (2d Cir. 1979), cert. dismissed, 448 U.S. 914, 101 S. Ct. 35, 65 L. Ed. 2d 1179 (1980), do not involve similar indirect purchasing arrangements. Even were GBS to have standing our result very likely would not be different because we find no evidence of any illicit agreement between JK and MD.

HN4 [↑] Price parallelism alone generally will not establish price [**26] fixing. Other circumstantial evidence is required. *Id. at 615*; see, e.g., *Zoslaw v. MCA Distributing Corp.*, 693 F.2d 870, slip op. at 5603-04 (9th Cir. 1982). No such evidence has been shown to exist here. Thus, summary judgment on the price fixing claim was proper.

D. Market Allocation

GBS's per se attack on Philips' agreement to divide purchases evenly between JK and MD is also without merit. GBS asserts that this constitutes an illegal horizontal restraint. Numerous cases have condemned such restraints. In *United States v. Topco Association*, 405 U.S. 596, 31 L. Ed. 2d 515, 92 S. Ct. 1126 (1972), for instance, potential competitors in the grocery industry combined to allocate markets and compete with larger retailers. *Timken Roller Bearing Co. v. United States*, 341 U.S. 593, 95 L. Ed. 1199, 71 S. Ct. 971 (1951), [*977] involved a horizontal restraint among manufacturers of antifriction bearings. Here JK and MD did not combine or agree to allocate markets. The Third Circuit in *American Motor Inns, Inc. v. Holiday Inns, Inc.*, 521 F.2d 1230 (3d Cir. 1975), it is true, did treat a vertical allocative scheme as a horizontal agreement where Holiday [**27] Inns, in response to pressure from its franchisees, distributed new franchises in a manner that achieved the same ends as would have a horizontal agreement between the franchisees. *Pitchford v. PEPI, Inc.*, 531 F.2d 92 (3d Cir. 1975), cert. denied, 426 U.S. 935, 49 L. Ed. 2d 387, 96 S. Ct. 2649 (1976), also cited by GBS, presented an analogous arrangement between an electronics manufacturer and its dealers. No such joint pressure was exerted here and Philips was responding to none such in dividing purchases between JK and MD. In fact, it was responding to the unilateral pressure of JK which GBS was assisting to some extent.

A direct challenge to PBSI's contract as an illegal vertical restraint would be no more successful. In *Continental T.V., Inc. v. GTE Sylvania Inc.*, 433 U.S. 36, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977), the Supreme Court perhaps left open the possibility that per se standards would apply to vertical restraints where a plaintiff could show "pernicious economic effect or lack of any redeeming virtue." *First Beverages, Inc. v. Royal Crown Cola Co.*, 612 F.2d 1164, 1170 (9th Cir.), cert. denied, 447 U.S. 924, 65 L. Ed. 2d 1116, 100 S. Ct. 3016 [**28] (1980). GBS, however, has not attempted to provide the factual evidence necessary to meet its burden under this rule of reason. See *Continental T.V., Inc. v. G.T.E. Sylvania Inc.*, 694 F.2d 1132, slip op. at 4601 (9th Cir. 1982); see also *Chicago Board of Trade v. United States*, 246 U.S. 231, 238, 62 L. Ed. 683, 38 S. Ct. 242 (1918); cf. *First Beverages*, 612 F.2d at 1168 n.3 (reproducing district court's jury instruction, drawn from *Chicago Board of Trade*, on reasonableness of territorial restraint). Accordingly, its market allocation claim must fail.

E. Tying

GBS rests its tying claim on an alleged attempt by Philips to expand sales of JK and MD mlcs, the tied product, by denying service and warranty protection, the tying service, to computer owners who did not use these mlcs. **HN5** [↑] The elements necessary to establish such a claim are: "(1) Two distinct products or services are in fact tied such that the products are offered as a single package; (2) The defendant has sufficient economic power in the tying market to impose restrictions in the tied product market; (3) The amount of commerce in the tied product is not insubstantial." *Portland Retail Druggists Association* [**29] v. *Kaiser Foundation Health Plan*, 662 F.2d 641, 648 (9th Cir. 1981); *Moore v. Jas. H. Matthews & Co.*, 550 F.2d 1207, 1212 (9th Cir. 1977). GBS has not presented facts from which the second element could be inferred. To possess substantial power in the tying market, a firm must be able to "raise prices or to require purchasers to accept burdensome terms that could not be enacted in a completely competitive market." *U.S. Steel Corp. v. Fortner Enterprises*, 429 U.S. 610, 620, 51 L. Ed. 2d 80, 97 S. Ct. 861 (1977) (*Fortner II*). Under the facts before the district court, Philips possessed no such power with respect to the tying service. To have attempted to impose significant pressure to buy JK and MD mlcs by use of the tying service only would have hastened the date on which Philips surrendered to its competitors in the small business computer market.

It is true that Philips mlcs had a higher price than other similar cards. This could be under proper circumstances the result of being tied. See *Fortner Enterprises v. U.S. Steel Corp.*, 394 U.S. 495, 504-05, 22 L. Ed. 2d 495, 89 S. Ct. 1252 (1969) (*Fortner I*); *Moore*, 550 F.2d at 1216 & n.8. That, however, is not [**30] the case here. The higher prices of Philips mlcs were incident to their greater reliability. Their prices did not depend on Philips' involvement in the tying service. The cost of Philips-compatible mlcs did not drop after Philips withdrew from the market for small

business computers in 1978 and sold its interest in the tied product to a third party. GBS itself sought [*978] to sell more expensive mlcs from another manufacturer in this period. The Philips mlc was hardly a product whose prices were inflated by the vigor of its producer's strength in a tying market. The tying claim also fails.

F. Refusal to Deal

GBS, in pressing its section 1 claims, argues that the Philips companies' exclusive dealing arrangements with JK and MD constituted violations under either a per se or rule of reason analysis.

HN6 [↑] To establish a per se violation of section 1, a plaintiff generally must show that the defendant engaged in concerted anticompetitive activity with others at the same level of market organization. Exclusive dealerships usually escape the proscriptions of section 1 because, as already indicated, they establish a vertical relationship among firms that do not compete [**31] with each other. See A.H. Cox & Co. v. Star Machinery Co., 653 F.2d 1302, 1306 (9th Cir. 1981); Gough v. Rossmoor Corp., 585 F.2d 381, 387 (9th Cir. 1978), cert. denied, 440 U.S. 936, 59 L. Ed. 2d 494, 99 S. Ct. 1280 (1979).

Restraints solicited by a distributor but implemented by a manufacturer are not automatically per se violations. A.H. Cox, 653 F.2d at 1306. Restraints of this type come within the per se rule only if they "clearly had, or [were] likely to have, a pernicious effect on competition and lacked any redeeming virtue." Ron Tonkin Gran Turismo, Inc. v. Fiat Distributors, 637 F.2d 1376, 1386-87 (9th Cir.), cert. denied, 454 U.S. 831, 70 L. Ed. 2d 109, 102 S. Ct. 128 (1981); see, e.g., Betaseed, Inc. v. U & I Inc., 681 F.2d 1203, 1235 (9th Cir. 1982).

GBS invokes *Ron Tonkin*'s per se standard as applied in Cernuto, Inc. v. United Cabinet Corp., 595 F.2d 164 (3d Cir. 1979). In *Cernuto*, the Third Circuit implied an anticompetitive effect to reverse a grant of summary judgment where a distributor allegedly had convinced its supplier, a cabinet manufacturer, to cease dealing with a competing distributor. *Id. at 170*. GBS appears [**32] to read *Cernuto* to hold that all a plaintiff need show to establish a per se violation is that a purchaser requested a common supplier to cut off a price-cutting competitor and that the request was honored. The Third Circuit, however, placed equal reliance on evidence of the defendants' concerted activity to restrain price movement. See *id. at 168-70*; Edward J. Sweeney & Sons, Inc. v. Texaco, Inc., 637 F.2d 105, 115 (3d Cir. 1980), cert. denied, 451 U.S. 911, 68 L. Ed. 2d 300, 101 S. Ct. 1981 (1981). This GBS has not shown.

GBS would use Philips' allegedly premium prices to prove its price maintenance motivation. We have already rejected GBS's claim that it demonstrated an artificial price premium. According to GBS's own testimony, the Philips companies had high overhead costs which explain, at least partially, their high prices. Moreover, Philips mlcs were more reliable than the competition's; this explains the market's acceptance of higher prices. GBS's only direct evidence of price motivation is the testimony of a Philips employee that Philips "was aware" of GBS's lower prices during the period it bought mlcs directly from JK. The employee denied any concern [**33] about those prices apart from his general concern about GBS's interference with the Philips companies' exclusive relations with JK and MD. Equally damaging to GBS's *Cernuto* theory is the absence of evidence that Philips communicated its price concerns to JK or MD. *Ron Tonkin* and *Cernuto* each revealed much stronger evidence of complicity between manufacturer and distributor than exists in this case.

GBS claims that even if the Philips companies' exclusive dealerships were not invalid under *Cernuto*, the use of pressure against JK and MD to maintain the exclusive distributorship constituted an unreasonable restraint of trade. For support GBS cites a PBSI employee's testimony that JK was threatening its business relations with Philips by dealing with GBS. The "threat" here, however, is little different than the one in Determined Productions, Inc. v. R. Dakin & Co., 514 F. Supp. 645 (N.D. Cal. 1979), aff'd mem., 649 F.2d 866 [*979] (9th Cir. 1981). In *Determined Productions*, the defendant contracted with a third party to produce stuffed toy animals, which the defendant, in turn, supplied to the plaintiff. The third party was the largest but by no means [**34] the only such manufacturer in Korea. As in this case, the plaintiff tried to sidestep the middle man and deal directly with the Korean toy producer. The defendant responded with a threat to break relations with the Korean toy producer unless it returned to an exclusive dealing relationship. The Korean acquiesced. The district court, having first rejected the plaintiff's per se claim, discarded the rule of reason challenge because of the plaintiff's failure to give evidence of a relevant market and because of the ready availability of alternative sources of supply. *Id. at 648*.

GBS attempts to distinguish *Determined Productions* on the ground that GBS did not have alternative sources of mlcs. This is not so. Alternatives did exist. It is true that substitute mlcs might not have been available on the same terms from other suppliers; this, however, does not indicate economic injustice. As the court noted in *Determined Productions*, a defendant, having succeeded in legitimately controlling "the best, most efficient and cheapest source of supply in Korea," does not have to share "the fruits of its superior acumen and industry," *id.* In trying to secure direct access [**35] to mlcs jointly developed by Philips and JK, GBS was attempting to accomplish just that.

Finally, GBS condemns the refusal to deal as a [section 2](#) violation. Our rejection of GBS's notions of the relevant market foreshadows our response. The relevant market was small business computers. The Philips mlcs were not such unique resources as the railroad terminals in [United States v. Terminal Railroad Association, 224 U.S. 383, 56 L. Ed. 810, 32 S. Ct. 507 \(1912\)](#), and the power grid in [Otter Tail Power Co. v. United States, 410 U.S. 366, 35 L. Ed. 2d 359, 93 S. Ct. 1022 \(1973\)](#). Nor does the evidence support allegations that Philips used its worldwide market position to coerce JK to refuse to deal with GBS. The only passage GBS cites when referring to Philips' pressure on JK deals explicitly with the United States market. In sum, GBS's [section 2](#) claim is no more supported than its various claims under [section 1](#). We affirm the district court's decision.

V.

GBS's ABUSE OF DISCOVERY CLAIM

GBS moved to have the deposition testimony of two witnesses, Mr. Weniger and Mr. Ockenfels, suppressed unless they were produced for cross-examination along with a third witness, Mr. [**36] Sievers, who was never deposed. The district court refused. Our inquiry on appeal is limited to examining the district court's ruling for an abuse of discretion. See generally [Wells Fargo & Co. v. Wells Fargo Express Co., 556 F.2d 406, 430 n.24 \(9th Cir. 1977\)](#) (dictum) (decision to grant discovery to determine jurisdiction lies in trial court's discretion), e.g., [Data Disc, Inc. v. Systems Technology Association, 557 F.2d 1280, 1285 n.1 \(9th Cir. 1977\)](#); cf. [Liew v. Breen, 640 F.2d 1046, 1049 \(9th Cir. 1981\)](#) (same standard to determine relevancy in discovery).

As to Mr. Weniger, the court found that GBS terminated discovery and therefore could not complain. This finding is clearly supported by the record and did not amount to an abuse of discretion.

GBS's claim with respect to the Ockenfels' deposition is stronger. Again, however, the district court's refusal to suppress did not amount to an abuse of discretion. The magistrate recommended denial of the plaintiff's suppression request based upon the following facts: (1) GBS had an equal opportunity to cross-examine the witness and filled more transcript space with its deposition than did Philips' counsel; (2) GBS [**37] went beyond the scope of direct examination on cross-examination; and (3) GBS improperly delved into areas that may have involved trade secrets and were certain to cause objections. The district court's acceptance of his recommendation was not an abuse of discretion.

[*980] VI.

THE COUNTER-CLAIMS

A. *Exclusionary Conspiracy*

Philips asserts that GBS and Shasta joined co-conspirators Paradata (a trade organization of Philips distributors) and its lawyer, and Xerox Corporation, its subsidiary Diablo Systems, and their officers, to eliminate Philips from the domestic market. Our review of the record reveals no significant probative evidence to support Philips' charge of conspiracy.

Xerox and Diablo Systems are guilty only of anticipating a shift in demand toward more efficient computers. These companies did not solicit GBS to drop the Philips line or otherwise restrict its existing relationship with Philips. Nor do we find them guilty of any other conspiratorial acts that would violate [section 1](#). The crux of the claim against Paradata and its lawyer is that they sought to prevent Philips from marketing the P330 in Northern California without using GBS, its exclusive [**38] distributor in that area. This attempt by Philips dealers to maintain their distributing

network indicates a desire to keep Philips in the American market, not to drive it out. They sought to exclude other distributors, not Philips.

The claim against GBS and Shasta is not as easily resolved. The district court's finding that they operated as a single business entity, and thus could not conspire in violation of the anti-trust laws, concerns a frequently litigated issue. [HNT](#) A section 1 violation requires, at the outset, concerted activity. [Harvey v. Fearless Farris Wholesale, Inc., 589 F.2d 451 \(9th Cir. 1979\)](#). This requirement precludes liability for coordinated activity among multiple corporations operated as a single entity. [Thomsen v. Western Electric Co., 680 F.2d 1263, 1266](#) (9th Cir.), cert. denied, 459 U.S. 991, 103 S. Ct. 348, 74 L. Ed. 2d 387 (1982); [William Inglis & Sons Baking Co. v. ITT Continental Baking Co., 668 F.2d 1014, 1055](#) (9th Cir. 1981), cert. denied, 459 U.S. 825, 103 S. Ct. 57, 74 L. Ed. 2d 61 (1982); [Murray v. Toyota Motor Distributors, Inc., 664 F.2d 1377, 1378-79](#) (9th Cir.), cert. denied, 457 U.S. 1106, 102 S. Ct. 2905, 73 L. [Ed. 2d 1314](#) (1982); [Las Vegas Sun, Inc. v. Summa Corp., 610 F.2d 614, 617](#) (9th Cir. 1979), cert. denied, 447 U.S. 906, 64 L. Ed. 2d 855, 100 S. Ct. 2988 (1980); [Harvey, 589 F.2d at 455](#). The single entity test is easily satisfied when corporate policies are set by one individual or by a parent corporation. See, e.g., [Las Vegas Sun, 610 F.2d at 618](#); [Harvey, 589 F.2d at 454, 457](#). At the other extreme, jointly owned corporations that compete in the marketplace, hold themselves out to the public as competing organizations, and set policy independently are as capable of conspiring to restrain trade as unrelated corporations. See [Murphy Tugboat Co. v. Shipowners & Merchants Towboat Co., 467 F. Supp. 841, 859](#) (N.D. Cal. 1979), aff'd, 658 F.2d 1256 (9th Cir. 1981), cert. denied, 455 U.S. 1018, 102 S. Ct. 1713, 72 L. Ed. 2d 135 (1982).

The relationship between GBS and Shasta does not fall clearly at either of these extremes. Finch and Parise, GBS's principal officers and its sole directors, held 90% of Shasta's stock and two out of three positions on its board of directors. Shasta and GBS shared offices and personnel. Finch and Parise participated, as directors, [\[**40\]](#) in general policy formulation for Shasta. On the other hand, they left much of the day-to-day operation to Shasta's president, Joseph Walsh. Philips claims that Finch and Parise "swore they had little awareness of Walsh's management decisions." The cited portions of the record indicate that neither was much involved with policy decisions during the period in which the alleged conspiracy was to have been formed. Walsh was apparently given general control over Shasta's sales policies. In sum, the degree of control exercised by GBS is unclear.

On this record, the district court should not have decided the legal status of GBS's relationship with Shasta. We have found the single entity issue unsuited for resolution as a matter of law when faced with similar factual uncertainty. See [Murray, I*981 664 F.2d at 1379](#); [Inglis, 668 F.2d at 1055](#); [Hunt-Wesson Foods, Inc. v. Ragu Foods, Inc., 627 F.2d 919, 927 n.5](#) (9th Cir. 1980), cert. denied, 450 U.S. 921, 67 L. Ed. 2d 348, 101 S. Ct. 1369 (1981); compare [Thomsen, 680 F.2d at 1266-67](#). GBS has raised a genuine issue of material fact that cannot be resolved conclusively on the basis of the evidence before us.

[\[**41\]](#) We need not reverse the district court's disposal of Philips' section 1 claim, however. On so clear a record, we are free to affirm the district court on any ground supported by the evidence before us. [Turf Paradise, Inc. v. Arizona Downs, 670 F.2d 813, 821](#) (9th Cir.), cert. denied, 456 U.S. 1011, 102 S. Ct. 2308, 73 L. Ed. 2d 1308 (1982); [United States v. County of Humboldt, 628 F.2d 549, 551](#) (9th Cir. 1980). Even if GBS and Shasta operated independently and could be guilty of conspiring, Philips has not pointed us to any probative evidence of either specific intent or conduct to eliminate it from the small business computer market.

Philips claims that GBS and Shasta "formulated and undertook a plan to take Philips' marketing position in the United States and eliminate Philips as a competitor in the small business competitor [sic] market." The evidence, even when interpreted most favorably to Philips, does not support this claim. Philips lost the American market; it was not taken from it. GBS, far from seeking to eliminate Philips, urged Philips early on to add the Diablo to its product line. Only after Philips declined did GBS set up its marketing arrangement [\[**42\]](#) with Shasta. Philips points to GBS's plan to form "NUCO systems" to market Diablo's Ranger computer. This plan, however, which GBS claims was never pursued, did not itself drive Philips from the American market. Although the Diablo was clearly more attractive than the old Philips computers, GBS continued to maintain the infrastructure of its Philips distributorship. There is no evidence that either GBS or Shasta ever sabotaged Philips' sales. GBS sold 67 Philips computers in 1976, the year it began marketing the Diablo, up from 49 the year before. GBS's later declining sales

of Philips computers was part of a nationwide decline from 832 computers in 1976 to 250 in 1978. In this same period the total annual sales of small business computers jumped from 27,000 to 38,000. GBS's poor sales were the result of an impersonal shift in demand that Philips did not anticipate, or at least did not respond to effectively. Philips cannot retrieve its lost market share by blaming GBS, which was merely the messenger with the bad news.

In view of these conclusions, the district court could properly have granted summary judgment against Philips had it reached beyond the intracorporate defense. **[**43]** We therefore affirm the district court's disposition of Philips' section 1 claim.

B. Attempted Monopoly

The Philips companies allege that GBS and Shasta attempted to monopolize Philips' American trade.³ We find that this claim easily fails, for we agree with the district court that Philips provides no credible evidence of either specific intent to monopolize or predatory conduct.

[44] C. Breach of Contract and Tortious Interference**

The district court rejected the breach of contract claim for want of evidence that GBS, contrary to the terms of the contract, marketed "directly competitive" **[*982]** equipment.⁴ Philips claims that disk/CRT and mlc computers were "directly competitive" from statements by GBS officers that these computers, although vastly different in performance and cost, fulfilled the "same basic tasks" and competed for the same "profile" of customers. Philips attempts to buttress this claim by citing testimony that some of its customers did turn to disk/CRT computers such as the Diablo.

[45]** This evidence, while showing that disk/CRT computers replaced some mlc computers, does not show "direct competition" within the meaning of the contract. As Louis Fuchs, Philips' manager for new products when the Diablo came out, testified, mlc computers were no longer competitive with newer CRT models. The computer industry has experienced the rapid obsolescence characteristic of high technology markets. In such technologically sensitive markets, where every advance brings a major increase in productivity or decrease in price, old products do not remain in "fierce, direct competition" with the new, as Philips claims. The group of customers may remain the same, but their demand shifts from one product group to another as technology redefines their needs and expectations. "Direct competition," within the meaning of the contract, appropriately should embrace only computers of approximately the same technological generation.

Philips mentions competition between old and new products in the markets for flexible wrappings, *United States v. E.I. du Pont & Co.*, 351 U.S. 377, 100 L. Ed. 1264, 76 S. Ct. 994 (1956); energy, *United States v. General Dynamics Corp.*, 415 U.S. 486, **[**46]** 39 L. Ed. 2d 530, 94 S. Ct. 1186 (1974); fire protection, *United States v.*

³ Although the counterclaim also appears to state a claim of monopolization, Philips concedes in its reply brief that it raised only an attempt claim. Were Philips to raise a straight monopolization claim, it could be disposed of quickly. Our rejection of GBS's market definition would be equally fatal to any counterclaim predicated on Philips mlcs as a relevant market. GBS had no significant power in other markets. It played no significant role in the general mlc market. Charges of monopoly in the small business computer market would be equally insupportable, given GBS's de minimis portion of the growing and increasingly competitive market already shared, as Philips admits, by nearly seventy firms. There is no evidence of its power in this market, as required by *United States v. Grinnell Corp.*, 384 U.S. 563, 570, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966).

⁴ The court also noted that the withdrawal of the Philips computer from the domestic market motivated GBS's defection. Philips correctly urges that the district court erred if it believed Philips withdrew before GBS agreed to market the Diablo. GBS incorporated Shasta in 1976, two years before Philips pulled out of its American computer operations. The district court may have been referring to Philips' effective withdrawal from the market by its failure to provide an operational CRT computer in time to compete with the Diablo, not to its final departure in 1978. In any event, Philips' failure to provide substantial evidence that its computers were "directly competitive" with the Diablo makes the district court's additional reliance on the timing of Philips' retreat harmless error at worst. Thus, although we agree that the court's second finding may well be either misleading or incorrect, we need only address the first finding, as it is dispositive.

Grinnell Corp., 384 U.S. 563, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966); and automobiles, *Sherman v. British Leyland Motors, Ltd., 601 F.2d 429 (9th Cir. 1979)*, but in none of these markets have new products vanquished the old as completely as in the functionally sensitive market for small business computers. In this market yesterday's technology is simply not competitive. Philips' departure from the American market demonstrates this even with respect to only marginally obsolescent computer products.

Philips relies on certain portions of the record to prove that GBS breached its contractual duty to focus its "primary marketing effort" on the P330 when it became available. Philips claims that its computer was "operational and ready for market" in mid-1977. The cited portions of the record do not support the claim, however. These portions refer only to dates in 1978 and give no detailed information about what "operational" means. Philips does not answer GBS's claim that workable software and peripheral equipment, which are crucial to successful marketing efforts, were unavailable in 1978. Indeed [**47] its evidence boils down to an assertion that a P330 computer demonstrated at a computer show in March, 1978, the same year it abandoned the American market, was a production rather than prototype model.

Be that as it may, GBS did not shirk its duty to Philips. To the contrary, GBS rejected PBSI's offer to release it from its agency agreement and expressed continued interest in the P330. Philips, on the other hand, withdrew from the American market rather than pressing forward to develop a fully operational P330. Thus, we need not decide whether such a P330 would have been in direct competition with the Diablo.

[*983] Philips' claims of tortious interference with its contracts with GBS and other dealers have no substance. Shasta did not tortiously interfere with Philips' contracts with GBS; nor did GBS and Shasta interfere with other dealers' contracts. Philips refers us to no breached contracts, no direct evidence of intent on the part of GBS or Shasta to induce a breach, and no damages connected to any contracts they had with Philips' dealers.

Similarly, inasmuch as customers were offered a new and better computer, no claim of tortious interference with Philips' customer [**48] relations is made out. Shasta sold the Diablo to a wide range of customers to whom Philips no longer offered competitive equipment. Neither the deposition of Shasta salesperson Shirley nor the "NUCO" document shows that the Diablo computer was particularly targeted at Philips' customers, as Philips asserts. Shasta sought to sell the Diablo to whomever it could.

Finally, with respect to Philips' relationship with JK and MD, we find no evidence that GBS, whose direct dealing with JK in 1976 was immediately terminated by PBSI, sought improperly to tie up the mlc market or to use its distribution of mlcs to identify Philips' customers. In short, Philips has adduced no evidence to support its many claims of tortious interference.

D. Abuse of Process

Philips claims that GBS brought its suit hoping to procure trade secrets and then to manufacture mlcs itself. There is no evidence that GBS was interested in manufacturing mlcs after 1976, when it was able to obtain them from JK. The cited portions of the record, contrary to Philips' assertions, reveal that GBS lost interest in manufacturing mlcs when it established a relationship with JK. No evidence supports the charge [**49] that GBS improperly misused trade secrets, or had an improper motive at the time this suit was filed. Philips' allegations rest on pure speculation.

VII.

CONCLUSION

There is no support for any of the claims asserted in this case. The judgment of the district court is affirmed.

AFFIRMED.

Judge Norris may file a separate statement at a later date.

Energy & Utilities Law > Utility Companies > Rates > General Overview

HN4 **Regulated Industries, Energy & Utilities**

A tariff filed by an electric utility can not evade scrutiny under the antitrust laws simply because it is filed in accordance with state law and approved by a state agency.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > General Overview

HN5 **Exemptions & Immunities, Noerr-Pennington Doctrine**

Where the administrative and judicial processes are abused in an attempt to stifle competition, the Noerr-Pennington doctrine is inapplicable. Although the "abuse" standard is a difficult line to discern and draw, this line is crossed when the defendant's activity is intended to injure the plaintiff directly rather than through a governmental decision. When the antitrust defendant has not truly sought to influence the governmental decision, his invocation of governmental machinery is a sham. Where he has no reasonable expectation of obtaining the favorable ruling, his effort to do so is a sham.

[HN8](#) Monopolies & Monopolization, Attempts to Monopolize

Petitioning an administrative agency such as the Federal Communications Commission or seeking review in courts may result in delays because administrative or judicial procedures are often time consuming. Creating such delays does not constitute willful exercise of monopoly power as long as petition or application to courts is based on good faith interest in influencing agency or obtaining court ruling. However, there is exception to general rule that efforts to influence public officials do not violate antitrust laws, and that is the so-called sham or bad faith exception. If a campaign, ostensibly directed toward influencing government action, is mere sham or artifice to cover what is essentially nothing more than an attempt to smother competition by pattern of knowingly filing baseless claims or making misrepresentations to administrative agencies in a way designed to deprive competitors of meaningful access to those agencies, [First Amendment](#) protections are lost and Sherman Act applies.

[HN13](#) [blue document icon] Monopolies & Monopolization, Attempts to Monopolize

A plaintiff must allege a causative link to his injury which is "direct" rather than "incidental" or which indicates that his business or property was in the "target area" of the defendant's illegal act. These terms do not provide talismanic guides to decision but they do indicate the need to examine the form of violation alleged and the nature of its effect on a plaintiff's own business activities. Customers are not per se outside the target area. The test is ultimately one of directness. The court looks to whether the conspiracy was "aimed" at a particular entity in the area of the economy threatened by anticompetitive conduct and to whether the injury in question was central to the attainment of the anticompetitive objective rather than a mere incident thereto.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

[HN14](#) [blue document icon] Private Actions, Remedies

Damages in antitrust cases are rarely susceptible of the kind of concrete, detailed proof of injury which is available in other contexts. Accordingly, where there is a basis on which a jury can reasonably infer significant antitrust injury, the court should be very hesitant before determining that damages cannot be awarded.

700 F.2d 785, *785L^A 1983 U.S. App. LEXIS 30791, **1

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN15[] **Private Actions, Remedies**

Damage studies are inadequate when only some of the conduct complained of is found to be wrongful and the damage study cannot be disaggregated.

Antitrust & Trade Law > ... > Private Actions > Costs & Attorney Fees > General Overview

Governments > Courts > Court Personnel

HN16[] **Private Actions, Costs & Attorney Fees**

The payment of attorneys' fees is a part of the penalty for violating the antitrust laws. There is no doubt that attorneys as officers of the court must operate on an honor system, and must be appropriately disciplined to provide both specific and general deterrence.

Torts > ... > Liability > Claim Presentation > General Overview

HN19[] **Dismissal, Involuntary Dismissals**

Because dismissal denies the party access to justice, if the party has a valid claim, dismissal would, in the case of attorney misconduct such as gross negligence, amount to a windfall to an adversary to be resorted to only when necessary to preserve the integrity of the judicial system, or in similar extreme circumstances.

Opinion by: OAKES

Opinion

[*789] OAKES, Circuit Judge:

This appeal is taken from jury awards exceeding ninety million dollars before trebling entered by the United States District Court for the Southern District of New York, William C. Conner, Judge, in an antitrust action brought by Litton Systems, Inc. and some of its subsidiaries (Litton) against the American Telephone and Telegraph Company and some of its subsidiaries (AT&T). The awards were based on special jury findings that AT&T used its telephone monopoly illegally to monopolize the telephone terminal equipment market, thereby excluding Litton as a competitor, and imposing costs on Litton as a customer, of the AT&T system. The jury found that this was accomplished principally through opposing the adoption of certification standards and the imposition of tariffs filed with but not approved by the Federal Communications Commission (FCC). The tariffs required telephone customers to connect equipment purchased from AT&T's competitors to the telephone system only through the use of a device designed by AT&T.

This device -- called an "interface device" by Litton and a "protective connecting arrangement" (PCA) by **[**3]** AT&T -- was used in lieu of a system of "certification standards." These standards would have regulated, as they indeed now do regulate, the kind of equipment that can be connected with the AT&T system to ensure interconnection compatibility. Under the AT&T tariff, however, Litton had to pay for the privilege, so to speak, of connecting to the system with a "black-box" of AT&T's devising. The tariff was eventually rejected by the FCC in favor of certification standards, and Litton's principal argument before the jury and to the district court was that AT&T's bad faith opposition to certification standards drove Litton out of the telephone terminal equipment market in the interim period between the filing and the ultimate rejection of the tariff. While our recounting of the facts will disclose many other complexities, pro and con, of Litton's case, certainly a crucial factor is **[*790]** the FCC's ultimate finding that the interface device was not needed to protect the AT&T network from harm. Various network users had long purchased equipment from AT&T's competitors, using it without an interface with "no demonstration of harm" to the AT&T network. *Proposals for New* **[**4]** or *Revised Classes of Interstate and Foreign Message Toll Telephone Service (MTS) and Wide Area Telephone Service (WATS)*, 56 F.C.C.2d 593, 598 (1975). The gist of Litton's case and the jury's findings is that the interface device was unnecessary and uneconomical and that AT&T at all times knew this was so, and that despite clear prior indications from the FCC that the tariff would be set aside as unreasonable and destructive of competition, AT&T nevertheless proposed and fought to maintain the tariff -- all in bad faith in order to exclude competition in the terminal equipment market.

AT&T raises a score of issues on appeal. In addition to disputing the evidence underlying the jury's verdict, AT&T argues that its opposition to certification standards was privileged under the *First Amendment* by virtue of the *Noerr-Pennington* doctrine because it merely advocated a position before a government agency. AT&T also claims that the district court erred in its evidentiary rulings, instructions to the jury, and handling of special interrogatories, and that the jury's damage award was not supported by substantial evidence and was inconsistent with certain jury findings in AT&T's favor. **[**5]** The jury verdict for Litton as an AT&T customer is attacked as both unsupported by the evidence and improper under the "filed tariff" doctrine of *Keogh v. Chicago & Northwestern Railway Co.*, 260 U.S. 156, 67 L. Ed. 183, 43 S. Ct. 47 (1922) and the "target area" standing doctrine, see *Calderone Enterprises Corp. v. United Artists Theatre Circuit, Inc.*, 454 F.2d 1292, 1295 (2d Cir. 1971), cert. denied, 406 U.S. 930, 32 L.

Ed. 2d 132, 92 S. Ct. 1776 (1972). Finally, AT&T argues that Litton's misconduct during discovery, which resulted in the denial of attorneys' fees to Litton, warranted outright dismissal of the case. Litton appeals the denial of attorneys' fees and conditionally cross-appeals on the basis that the district court's instructions to the jury prevented it from recovering its full measure of damages.

Bearing in mind that [HN1](#) in reviewing the jury's verdict the evidence must be viewed in the light most favorable to Litton, we affirm, holding the *Noerr-Pennington* doctrine inapplicable to Litton's suit as a competitor. We have considered all the parties' contentions and have found none requiring reversal. We find that the evidence was sufficient, both in terms [**6] of its weight and from the standpoint of causation, to support the damage award and that the district court's instructions to the jury and evidentiary rulings were free from prejudicial error. We also uphold the verdict for Litton *qua* customer -- no small sum, albeit almost wholly insignificant relative to the principal verdict. Although we are not without doubt, perhaps because the amounts involved are so large, we uphold the district court's imposition of discovery sanctions under [Federal Rule of Civil Procedure 37](#) and therefore deny Litton's unconditional cross-appeal. Our disposition of the case renders consideration of Litton's conditional cross-appeal unnecessary. In affirming, we take due note that this case was a model of judicial technique for handling a serious, complex, and difficult jury trial. Irrespective of what we might say regarding certain of the rulings below that we think were questionable or debatable, if not reversible error, we commend the district court's handling of the case.

I. BACKGROUND

A. Early Restrictions on Interconnection

Prior to 1956, AT&T had an absolute monopoly over long distance telephone service and local telephone service [**7] in areas accounting for over eighty percent of this country's telephones. Independent telephone companies, familiar to many rural users, interconnected with AT&T's long distance network and provided local telephone service in those areas not serviced by AT&T. The AT&T "telephone network" comprised local central office switching systems [*791] as well as the wires and cables linking them with the businesses and homes of customers. This monopoly, administered under the aegis of the FCC, was recognized as perfectly lawful and proper.

But AT&T had another monopoly -- not similarly sanctioned -- over the sale and lease of individual telephone sets and business telephone systems. Broadly speaking, a business telephone system can be classified into one of two general categories. The first, a Key System, allows a single telephone set to connect several others through the use of buttons on the telephone. Key Systems are used primarily by small offices. The second category, a PBX System, employs a central console or switching mechanism to allow interconnection of up to several thousand telephones. Key Systems and PBXs -- stipulated as the relevant product market in this case -- [**8] are referred to in the industry as "telephone terminal equipment." AT&T's monopoly over such equipment (including residential telephones) was preserved after the expiration of Alexander Graham Bell's original patents by the simple expedient of prohibiting the attachment of non-AT&T equipment to the AT&T system. AT&T enforced this policy by cutting off service to customers who attached non-AT&T equipment.¹ This practice was approved first by state regulatory agencies and later by the FCC after it assumed regulatory responsibility for telecommunications under the Communications Act of 1934, [47 U.S.C. § 151 et seq.](#) Because telephone terminal equipment sends electrical signals into the network, this policy was at that time considered necessary to ensure the safe and effective operation of the nationwide telephone network.²

¹ Western Electric, and AT&T subsidiary, manufactures telephone terminal equipment sold by AT&T.

² The AT&T brief describes the potential harms to the telephone network from "unbridled terminal equipment" as follows:

Improper voltages generated or transmitted by customer-provided terminal equipment can cause potentially hazardous electric shock to telephone company customers and employees. Longitudinal imbalance usually results from improper grounding of the telephone lines and can cause a user to hear increased noise or another voice (*i.e.*, crosstalk) on the telephone line. Excessive signal power also causes noise and crosstalk. Faulty network control signaling can cause

[**9] After World War II, however, various users sought to connect devices that AT&T had always considered "foreign attachments" to the telephone network. Efforts to challenge AT&T's absolute prohibition against interconnection of non-AT&T equipment met with some limited success as early as 1947 when, in *Use of Recording Devices*, 11 F.C.C. 1033 (1947), the FCC approved the use of machines to record telephone conversations because such use was not "detrimental to the quality of telephone service." *Id.* at 1048. At the same time, the Commission ruled that interconnection must be made through "adequate connecting arrangements," *id.* at 1048-49, but the responsibility for installing and maintaining connecting arrangements was vested in AT&T. The FCC's concern for the network's integrity was manifested in perhaps its most extreme form in *Hush-A-Phone Corp.*, 20 F.C.C. 391 (1955), where it prohibited the use of a mouthpiece shield designed to enhance user privacy because, although the shield did not harm the network,³ [*792] it could cause garbling of conversation. The Commission's ruling was set aside and remanded by the unanimous decision in *Hush-A-Phone Corp. v. United States*, 99 U.S. App. D.C. 190, 238 F.2d 266, 269 (D.C. Cir. 1956),⁴ which found the ruling "neither just nor reasonable." In characterizing the ruling as an "unwarranted interference with the telephone subscriber's right reasonably to use his telephone in ways which are privately beneficial without being publicly detrimental," *id.*, the *Hush-A-Phone* court suggested that actual harm to the telephone network was to be the principle governing the validity of interconnection prohibitions.

[**11] On remand, the FCC adhered to this principle by ordering AT&T to modify its tariffs to eliminate restrictions against the use of the Hush-A-Phone device and "any other device which does not injure [AT&T's] employees, facilities, the public in its use of [AT&T's] services, or impair the operation of the telephone system." *Hush-A-Phone Corp. v. American Telephone & Telegraph Co.*, 22 F.C.C. 112, 114 (1957). The ruling thus implicitly acknowledged that the AT&T network could be harmed by some forms of interconnection. See notes 2 & 3, *supra*. At the same time, the Commission's reference to "any other device" made it clear that the scope of the ruling extended beyond use of the Hush-A-Phone device. Nevertheless, AT&T cast its revised tariff so as to prohibit interconnection of customer-provided telephone systems.⁵

numerous problems, including wrong numbers, false busy signals, and incorrect billing Although a minor problem might be acceptable to a particular customer, the combined effect of many such problems could impair telephone service for other customers. Brief at 11 n.9.

It is to be noted, however, that no proof of *actual* harm to the telephone network from interconnection with competitors' terminal equipment was ever adduced before the FCC, see *Proposals for New or Revised Classes of Interstate and Foreign Message Toll Telephone Service (MTS) and Wide Area Telephone Service (WATS)*, 56 F.C.C. 2d 593, 596, 598 (1975) (First Report & Order), or in this case. The FCC certification standards as set forth in the order cited above, and as subsequently amended, are nevertheless designed to prevent the occurrence of the four basic potential harms -- hazardous voltages, excessive signal power levels, excessive longitudinal imbalance, and improper network control signalling. *Id.* at 601-11.

³This depends on how "harm" is defined; AT&T has always advanced the idea that anything causing a user to hear increased noise or another voice (crosstalk) is harmful and that longitudinal imbalance and excessive signal power do just that. See note 2 *supra*.

⁴The court stated:

To say that a telephone subscriber may produce the result in question by cupping his hand and speaking into it, but may not do so by using a device which leaves his hand free to write or do whatever else he wishes, is neither just nor reasonable.

238 F.2d at 269.

⁵Tariff FCC No. 132 provided in part:

B. GENERAL REGULATIONS

7. Unauthorized Attachments or Connections. -- No equipment, apparatus, circuit or device not furnished by the telephone company shall be attached to or connected with the facilities furnished by the telephone company, whether physically, by induction or otherwise [except as provided in this tariff.] In case any such unauthorized attachment or connection is made,

[**12] At about the same time the *Hush-A-Phone* controversy was wending its way through the Commission and the courts, a Texas inventor by the name of Thomas F. Carter was inventing a mobile radio device that allowed its users to conduct two-way conversations with persons using ordinary, stationary telephones. The "Carterfone" used inductive and acoustic principles to connect the mobile user with a telephone "base station" that completed the link to the telephone network.⁶ Carter began marketing [*793] his device in 1959, and within a few years he had sold several thousand units in the United States and throughout the world. The AT&T tariff filed in response to the *Hush-A-Phone* decision was consistently interpreted as prohibiting the use of the Carterfone. See *Use of the Carterphone Device in Message Toll Telephone Service*, 13 F.C.C.2d 430, 438 (1967). Carter challenged the tariff in 1967, and the FCC hearing examiner found that with the exception of a single trivial incident, *id.* at 436, the Carterfone performed "satisfactorily without causing technical problems detectable by the user." *Id.* at 433. Because the Carterfone had no adverse effect on the telephone [**13] network, the examiner ruled that its use fell within the rationale of *Hush-A-Phone Corp. v. United States*, 99 U.S. App. D.C. 190, 238 F.2d 266 (D.C. Cir. 1956), and that it was "unjust and unreasonable to continue to prohibit use of the Carterphone for the purpose of interconnection after its beneficial and harmless nature has been demonstrated." 13 F.C.C.2d at 439.

The Commission decision following the hearing held that the tariff was "unreasonable and unduly discriminatory." *Use of the Carterfone Device in Message Toll Telephone Service*, 13 F.C.C.2d [*14] 420, 423 (1968). In contrast to the hearing examiner's conclusion that "a general prohibition against the use of interconnection devices is [not] unjust or unwise," *Carterphone*, 13 F.C.C.2d at 440, the Commission found the fact

that the telephone companies may not have known prior to the proceedings herein that the Carterfone was in fact harmless is irrelevant, since they barred its use without regard to its effect upon the telephone system. Furthermore, the tariff was the carrier's own. It was not prescribed by the Commission.

13 F.C.C.2d at 425. The Commission further underscored its rejection of a blanket prohibition against interconnection when it noted that "no one entity need provide all interconnection equipment for our telephone system any more than a single source is needed to supply the parts for a space probe." *Id.* at 424. It then invited the submission of "new tariffs which will protect the telephone system against harmful devices" and specifically stated that "the carriers . . . may specify technical standards if they wish." *Id.* at 426.

AT&T immediately sought reconsideration of the Commission's decision. In its order denying reconsideration, [*15] the Commission in a very real sense cemented its previous decision as follows:

We held that the Carterfone filled a need, that its use did not adversely affect the telephone system, that its use was nevertheless precluded by the tariff, and that the tariff was unlawful, and had been in the past, because it prohibited the use of the Carterfone and other interconnecting devices without regard to actual harm caused to the telephone system. We did not prescribe the terms of a new tariff, but left that to the initiative of the

the telephone company shall have the right to remove or disconnect the same; or to suspend the service during the continuance of said attachment or connection; or to terminate the service.

24. Miscellaneous Devices Provided by the Customer. -- The provisions of paragraph 7 preceding shall not be construed or applied to bar a customer from using devices which serve his convenience in his use of the facilities of the telephone company in the service for which they are furnished under this tariff, provided any such device so used would not endanger the safety of telephone company employees or the public; damage, require change in or alteration of, or involve direct electrical connection to, the equipment or other facilities of the telephone company; or interfere with the proper functioning of such equipment or facilities, or impair the operation of the telephone system or otherwise injure the public in its use of the telephone company's services. [Except as otherwise provided in this tariff,] nothing herein shall be construed to permit the use of [a recording device] or of a device to interconnect any line or channel of the telephone company with any other communications line or channel of the company or of any other person.

Quoted in Use of the Carterphone Device, 13 F.C.C.2d at 437 (brackets in original; footnotes omitted).

⁶The Carterfone transmitted to a two-way radio at the base station serving the mobile radio system. To connect a telephone user to the mobile radio user, the base station's telephone handset was placed on a cradle in the Carterfone which automatically switched the radio to the transmitting mode when the mobile user spoke, and returned it to the receiving mode when he stopped -- all this without any direct electrical connection to the telephone network.

telephone companies, pointing out that they were in no wise precluded from adopting reasonable standards to prevent harmful interconnection. Basic to our holding was a rejection of AT&T's position that because AT&T cannot control the interconnected private system, interconnection is by definition a degradation of the message toll telephone system without regard to the quality of the interconnecting device or of the interconnected mobile radio system, i.e., without regard to actual harmful effects. We viewed this position [n2] and the rule embodying it as unreasonable

The primary contention upon reconsideration is that our decision permits the use of [**16] a myriad of customer-provided devices for interconnection without adequate exploration of the technical and economic problems. This record convinces us that there can be inter-connection without harmful technical effects

Use of the Carterfone Device in [Message Toll Telephone Service v. American Telephone & Telegraph Co., 14 F.C.C.2d 571, 572 \(1968\)](#).

We found no substantial factors outweighing the necessity of eliminating the arbitrary tariff. Standards to prevent [*794] the introduction of harmful inputs can be devised, and enforcing them would be no more difficult than enforcing the present absolute prohibition. Furthermore, notification to the carrier of the installation of a connecting device, which would be a reasonable requirement, would greatly relieve any problems of discovering the source of any harmful interconnection. The record also showed that terminal devices may be used under a standard making actual harm a factor, and the distinction between terminal devices and interconnection appears to be solely one of function unrelated to inherent propensity for injurious effects.

Id. at n.2 (citations omitted).

Significantly, the [**17] Commission also noted the broad sweep of its decision:

We also reject the related claim that the decision goes beyond the issues. To say, as some of the parties do, that the hearing related solely to the Carterfone and not to the validity of the tariff's broad prohibition would make the hearing essentially meaningless. The issues plainly included consideration of the basic validity of the tariff if it was the total prohibitory effect of the tariff which rendered its application to the Carterfone unreasonable. As we pointed out in our June decision, such a fault in a tariff can only be remedied by its revision. It should be noted in this connection that it was well understood that this was an "interconnection" case, and AT&T and General both argued on a broad base the need for a general prohibition against all interconnection not arranged by them.

Id. at 573. (footnotes and citations omitted)

We quote from the Memorandum Opinion and Order denying the petition for reconsideration at length for two reasons. First, a redacted version was submitted to the jury, a matter disputed by AT&T and considered by us, *infra*. Second, we believe that the clarity of the Commission's [**18] language was such that from AT&T's perspective it had to be clear as a bell, so to speak, that at least as of the 1968 *Carterfone* decision, if not before, it was unreasonable, unjust, and discriminatory to prohibit interconnection of terminal equipment without respect to any harm such devices might cause. The ruling by its very terms "require[d] tariffs reasonably addressed to the asserted problems." 14 F.C.C.2d at 573. It was therefore incumbent upon AT&T to devise tariffs that would permit attachment of non-harmful devices.

B. *The Interface Tariffs*

We suspect that the parties would disagree little with what we have said about the state of affairs up until the time of the *Carterfone* decision; at least they would agree on the facts, if not our interpretation of them. But what happened after *Carterfone* is hotly debated. Two quite different cases were presented to the jury and argued to us. The telephone company's scenario runs somewhat as follows.

1. *The AT&T Version*

The *Carterfone* decision was to become effective on November 1, 1968, whereupon -- intolerably to AT&T -- there would be no tariff provisions at all to limit equipment interconnection [^{**19}] or specify interconnection standards. AT&T thus faced the prospect of proposing interconnection standards on very short notice with no FCC guidance and novel problems of "real" risks. See note 2 *supra*. In 1967, AT&T had formed a Tariff Review Group -- perhaps in anticipation of the *Carterfone* ruling -- to review possible tariff modifications. Although the Review Group thought performance or certification standards were feasible, this approach was viewed as posing weighty problems of a non-technical nature. Specifically, we are told, the Review Group feared that promulgation and enforcement of such standards by AT&T itself would raise serious antitrust questions. At the same time, the Review Group thought that improperly installed or maintained "good" equipment threatened the system's integrity as much as "bad" equipment, and therefore concluded that a substantial degree of protection could be effected by requiring interface hardware -- the "protective connecting" [^{*795}] arrangement" or PCA.⁷ AT&T ultimately followed the Review Group's recommendation and adopted the PCA rather than the certification standards approach. Thus, in late October of 1968, AT&T filed [^{**20}] a tariff requiring the use of a PCA to interconnect terminal equipment. AT&T was to provide, install, and maintain the PCA at the customer's expense as fixed by the filed tariff.

The filing of the tariff sparked a spirited response, with twenty-nine parties filing responsive pleadings and comments. Opponents of the tariff argued that the PCA approach was a flawed response to *Carterfone* because it failed to specify interconnection standards, barred the use of customer-provided telephones for network control signalling, and discriminated generally in AT&T's favor. In late December of 1968, the Commission permitted the proposed tariffs to take effect, stating in *American Telephone & Telegraph Co. "Foreign Attachment"* [^{**21}] [Tariff Revisions, 15 F.C.C.2d 605, 609-10 \(1968\)](#), that the decision in "*Carterfone* does not hold that a customer may substitute his own equipment or facilities (whether it be telephone instruments, loops, poles, or central office equipments) for that furnished by the telephone company." Although the Commission allowed what we will call the "interface tariffs" to take effect, it explicitly stated that its action was not to be construed as "giving any specific approval to the revised tariffs," *id.* at 610, leaving entirely open the possibility of further action. In the interim, the Commission directed all segments of the telecommunications industry to engage in "informal engineering and technical conferences," to ascertain what "further changes are necessary, desirable, and technically feasible" in AT&T's tariff offerings. *Id.* at 610.

AT&T tells us that terminal equipment interconnection was the subject of much thought and engineering and economic consideration after the Commission decided to allow the interface tariffs to take effect. Throughout this period, however, AT&T concedes that it had no "statistically meaningful" data regarding actual harm to the network due [^{**22}] to interconnection. AT&T Brief at 17-18 & n.21. But, AT&T points out, a National Academy of Sciences (NAS) report commissioned by the FCC ultimately found -- the report took some ten months to prepare -- that network harm could be caused by a variety of factors. The report concluded that, on balance, the PCA requirement was appropriate because, although a properly enforced certification system could also protect the network from harm, the responsibility for creating and administering such a system should be shouldered by a regulatory agency rather than a private concern. In apparent response to the NAS report, the FCC formed a PBX Advisory Committee in May of 1971. The committee, composed of representatives of various interested parties including, of course, AT&T, studied the feasibility of interconnection without the PCA requirement. AT&T continued to maintain that unlimited interconnection could harm the network.⁸

⁷ The PCA mechanism generally combined in a single housing a "network control signalling unit," which AT&T had always claimed was necessary to protect against wrong numbers, false busy signals and incorrect billing, and a "connecting arrangement"; hence the term "protective connecting arrangement."

⁸ The only data AT&T produced, however, addressed effects on the network, such as crosstalk, rather than causes. Thus, in response to a request by the FCC Common Carrier Bureau for comments on certification standards proposals in October of 1973, AT&T in part submitted the following:

It is often argued that the impact on the quality of service of the interconnection of customer-provided equipment is merely potential and not real or actual. This is simply not true. In fact, our experience is clearly to the contrary. For example, current studies [the "Hunt Studies"] indicate that intercity private line serving links equipped with at least one customer-provided terminal generated trouble reports at a rate at least 50 percent higher than did serving links equipped with

[**23] [*796] In June of 1972, while the PBX Advisory Committee was preparing its final report, the FCC instituted rulemaking proceedings addressing the interconnection issues. The FCC took the "extraordinary" step of convening a Federal-State Joint Board (Joint Board) pursuant to [47 U.S.C. § 410\(c\) \(1976\)](#), to determine "whether, and to what extent, there is public need . . . to go beyond what we ordered in *Carterfone* and permit customers to provide, in whole or in part" network control signalling units and connecting arrangements. [*Proposals for New or Revised Classes of Interstate and Foreign Message Toll Telephone Service \(MTS\) and Wide Area Telephone Service \(WATS\), 35 F.C.C.2d 539, 542 \(1972\)*](#). AT&T points to these developments to buttress its claim that the need for and propriety of the PCA requirement was very much an open question, emphasizing the fact that it took the FCC almost four years after *Carterfone* to address the interconnection issue.

The PBX Committee submitted its final report shortly after the Joint Board convened in 1972. The report included a model certification program based on a "barrier PBX system" that would incorporate protective circuitry [**24] obviating the need for a PCA.⁹ [**25] But by this time, after "lengthy internal debate," AT&T Brief at 21, AT&T decided to oppose certification standards as an unnecessary substitute for the PCA requirement. Mr. John deButts, then AT&T Chairman, announced this position in a speech before the National Association of Regulatory Utility Commissioners (NARUC) in late September of 1973. DeButts stated in his speech that the nationwide switching network was "too valuable a resource to risk a perhaps irreversible threat to its performance that would ensue from fragmentation of responsibility for that performance." Shortly thereafter, AT&T formally opposed the certification standard approach by filing comments in the FCC rulemaking proceedings.¹⁰ That this opposition [*797] to

telephone company-provided terminals only. The studies now in progress on message telephone lines are showing like results -- the trouble report rate for lines equipped with customer-provided terminals is more than 25 percent higher than lines connected solely to telephone company-provided terminals. As we have previously reported to this Commission with respect to interstate voice grade private line data services, where the same minimum protection criteria apply as on the public switched telecommunications network, a sizable percentage (8.5 percent) of the customers utilizing their own data transmitting equipment were applying signal power in excess of the established network protective criteria, thereby degrading the service of other customers. The same survey showed, in the case of a particular type of connection or interface which is comparable to that encountered on public switched network services, that 18 percent of the customer-provided terminals violated the minimum network protection criteria by a substantial degree.

The comments did state, however, that:

Complete and exhaustive statistics demonstrating all the harms from uncontrolled interconnection or the total impact on the quality of service might not be obtainable, given the nature of the problem studied. Certain effects simply are not measurable. How many wrong numbers or how much crosstalk occurs from the use of customer-provided terminals can only be observed at the time of or during their occurrence. The difficulties in making such measurements are apparent. However, the data cited above are sufficiently consequential to suggest that interconnection has an adverse impact on the quality of service. Certainly, for the reasons set forth in these comments, further loosening of interconnection policies, such as customer options embodied in the certification proposal before the Commission in this proceeding, is not in the public interest and should not be adopted.

(Footnote omitted).

⁹ AT&T claims that no equipment available at that time met the standards of the "barrier PBX" posited by the Advisory Committee and suggests that the concept was approved over its objection by non-AT&T chairpersons of Advisory Committee subcommittees. See AT&T Brief at 19-20 n.24.

¹⁰ Elaborating some of the concerns expressed by deButts in his earlier speech, the comments stated:

The public interest . . . will inevitably be impaired by the duplication of facilities and the division of responsibility that will ensue from further interconnection in an industry where compatibility of components and precise coordination of process are crucial. Interconnection has had an adverse impact on the innovative process in the telephone industry and the impact of certification would be even more detrimental.

. . . Any program of certification would, in our view, inevitably lead to the uncontrolled connection of customer-provided equipment to the telecommunications network. The ability to allocate responsibility for network performance would be destroyed.

certification standards was undertaken in bad faith was a principal special finding of the jury on which the verdict against AT&T turned.¹¹

[**26] AT&T's decision to stand behind the PCA requirement greatly upped the odds against adoption of a certification standards system. AT&T seems to agree with Litton that the deButts speech was a coda marking Litton's demise as a competitor, but denies that it opposed certification standards in bad faith and argues that Litton's failure in the terminal equipment market was inevitable by late 1973, if not earlier. According to AT&T, Litton's efforts to establish itself in this market were short-lived, poorly executed, and plagued with internal difficulties ranging from inadequate staffing to high-level corporate bribery. Litton entered the market in 1971, selling equipment made by other companies, with the hope that it could quickly develop its own products to feed the distribution and service network it created immediately after *Carterfone*. But by 1973, AT&T claims, Litton had failed to develop the caliber of product needed to compete with AT&T's evolving line of terminal equipment. This fact, coupled with the revelation that certain Litton officials had bribed their way into contracts with terminal equipment users, prompted Litton to exit the market in early 1974. AT&T's rendering [**27] of Litton's short, unhappy run in the terminal equipment race suggests that Litton lost because it sprinted early and winded quickly, and not because AT&T squeezed Litton into the rail with the PCA requirement.

In any event, Litton decided to withdraw from the terminal equipment market in early 1974. It was not until November of 1975, AT&T points out, that the FCC adopted regulations establishing certification standards.

Proposals for New or Revised Classes of Interstate and Foreign Message Toll Telephone Service (MTS) and Wide Area Telephone Service (WATS), 56 F.C.C.2d 593, 599-613 (1975) (First Report & Order).¹² [**29] Although the FCC declined to include PBX and Key Systems in the certification program at that time, it expressed doubt regarding the Joint Board's recommendation that this equipment presented technical problems warranting general exclusion. AT&T perforce concedes that this ruling included statutory findings that the interface tariffs were "unnecessarily restrictive" and amounted to "unjust and unreasonable discrimination." *Id.* at 598. A few months later, the FCC amended its [*798] regulations to cover PBX and Key Systems that employed protective circuitry, [**28] Interstate and Foreign Message Toll Telephone Service, 58 F.C.C.2d 736 (1976) (Second Report & Order). The FCC's order was affirmed on appeal. North Carolina Utilities Commission v. FCC, 552 F.2d 1036 (4th Cir.), cert. denied, 434 U.S. 874, 54 L. Ed. 2d 154, 98 S. Ct. 222 (1977).¹³ Thus, as of October 1977, after certiorari was denied by the Supreme Court, interconnection of non-AT&T equipment employing protective circuitry became a possibility. Finally, in April of 1978, the FCC issued a third order eliminating the protective circuitry requirement for

¹¹ The finding of predatory or anticompetitive conduct was based in part on "opposing certification in bad faith." Other such conduct initially found was "bad faith refusal to sell inside wiring at all or on a reasonable basis."

After returning its initial verdict, at which time the jury could not agree on whether the interface device tariff had been *filed* in bad faith and whether there had been "bad faith delay in making cutovers," the jury further deliberated at the court's request and found for Litton on these issues as well: hence our use of the term "a principal special finding."

¹² AT&T claims that certain FCC proceedings occurring prior to the adoption of certification standard regulations had the effect of placing the FCC's imprimatur upon the PCA requirement. See Telerent Leasing Corp., 45 F.C.C.2d 204 (1974), aff'd sub nom. North Carolina Utilities Comm'n v. FCC, 537 F.2d 787 (4th Cir.), cert. denied, 429 U.S. 1027, 50 L. Ed. 2d 631, 97 S. Ct. 651 (1976); AT&T-Mebane Home Telephone Co., 53 F.C.C.2d 473 (1975). It is difficult to see how either of these decisions can be read to qualify the FCC's earlier, explicit statement that it was not approving the proposed tariffs, however. *Telerent* was a declaratory judgment order expressing the Commission's disapproval of a state utility commission's proposed rule that would absolutely prohibit the interconnection of customer-provided equipment on any intrastate portion of the telephone network. The Commission held that the proposed rule was contrary to the thrust of *Carterfone* and recently instituted proceedings considering the possibility of liberalizing the post-*Carterfone* tariffs. In *Mebane* a local telephone company sought exemption from so much of the post-*Carterfone* tariffs as allowed interconnection of customer-provided equipment. Although the Commission upon its own motion granted the local carrier an opportunity to demonstrate the need for a waiver from the tariffs on the basis of economic injury, it specifically ruled that, under *Carterfone*, customers must generally be allowed to provide their own equipment.

¹³ The appeal covered both the First and Second Report and Order in Docket No. 19528. 56 F.C.C.2d 593 (1975); 58 F.C.C.2d 736 (1976). The latter related to key systems and PBXs. See 552 F.2d at 1044.

properly registered and installed PBX and Key Systems. *Interstate and Foreign Message Toll Telephone Service, 67 F.C.2d 1255 (1978)* (Third Report & Order).

To summarize, the AT&T scenario sketches a hard-fought battle before the FCC with good faith efforts being made to protect the network. AT&T points out that it was not alone in opposing certification standards; several other interested parties -- e.g., NARUC, the Joint Board, and several state utility commissions -- supported the PCA approach. AT&T relies on this support, and on the fact that it took over four years from the time Litton exited the terminal equipment market for the FCC to establish certification standards, to back up its claim that it was not AT&T's "bad faith" opposition to certification standards that drove Litton from business. As might be expected, Litton's scenario plays out quite differently.

2. The Litton Case

In Litton's scenario, AT&T is cast as a Dorian Gray. To paraphrase Commissioner Johnson's dissent from the order staying the effect of *Carterfone* pending **[**30]** AT&T response, to Litton, the PCA requirement was much as if an electric utility prohibited customers from using a toaster unless it was designed, manufactured, and installed by the utility itself. Litton's case against AT&T relies heavily on the fact that AT&T has never been able to make a case for the PCA requirement. Litton reminds us that AT&T has not demonstrated -- before the FCC or at the trial of this case -- a single instance in which the network had been harmed by a competitor's terminal equipment. Litton Brief at 8. Nevertheless, AT&T imposed the PCA requirement on all equipment sold by its competitors. Strikingly, in one case involving two Atlanta hotels using the very same brand of PBX equipment, no interface was required for the equipment that AT&T purchased from a third-party manufacturer and leased to one hotel, while an interface was required when the other hotel purchased its equipment directly from the third-party manufacturer. Litton suggests, as did the Fourth Circuit in *North Carolina Utilities Commission*, that the PCA requirement was a naked attempt to maintain "private lawmaking authority over independent manufacturers." *552 F.2d at 1051* (emphasis **[**31]** omitted). The PCA requirement stood for almost ten years, giving AT&T a chance to interfere with the normal course of every sale of terminal equipment by Litton and all of AT&T's other competitors.

Litton's argument that AT&T opposed the development of certification standards in bad faith is based on evidence that Litton believes clearly demonstrates, first, that AT&T was aware that it could not substantiate its claims of harm to the network; second, that AT&T knew that without the PCA requirement it was vulnerable to competition; and, finally, that AT&T could have developed certification standards itself immediately after *Carterfone* but opted not to in order to buy the time necessary to meet competition in the terminal equipment market.

Litton put into evidence a number of AT&T documents to support the contention that AT&T simply could not demonstrate that the PCA requirement was necessary to protect the network from harm. Specifically, Litton points to an in-house report apparently **[*799]** prepared in 1971 by one of two AT&T representatives to the PBX Advisory Committee ¹⁴ which stated:

A Credibility Gap Exists

Limited interconnection on the message network **[**32]** and greater interconnection on private line facilities has been in existence for a long period of time and the carriers still find it virtually impossible to cite cases of harm . . . result[ing] from . . . interconnect[ion] . . . This inability to demonstrate cases of harm . . . is causing the manufacturers . . . users and regulatory bodies to . . . challenge the expansive efforts which [AT&T] insists must be taken to avoid the network pollution.

Litton Brief at 29-30 (emphasis omitted). To like effect is a 1972 report submitted to AT&T management by the Director of AT&T's Management Sciences Division stating that AT&T was in its "weakest position now, because even though everyone concedes that serious breaches of our tariffs by illegal or unauthorized equipment has grown

¹⁴ Litton claims in its brief that this report was prepared by a Mr. Byers. This appears to be the case; although the copy of the report in the appendix is unsigned, Byers' initials are typed in at the top. In any event AT&T does not dispute Litton's attribution of the report.

over the years, we have not been able to produce evidence of harm to anyone." *Id.* at 30. The report recommended that the interface requirement be rescinded. Litton points out that AT&T's sole evidence of potential harm to the system was derived from the Hunt Studies referred to in note 8 *supra* and which were cited by AT&T to the FCC as support for the interface requirement. Various [**33] AT&T officials conceded that the studies did not "prove anything." Nevertheless, we know that deButts maintained in his 1973 speech and in the formal filings submitted to the FCC that there were data supporting AT&T's position on network harm from interconnection.

Litton argues that a portion of the PCA device championed by AT&T was really no more than the dial or pushbutton mechanism of a telephone -- the network control signalling unit -- that only duplicated the function of the same mechanism in AT&T's competitors' equipment. Moreover, AT&T knew at the outset that the PCA requirement was useless; a Task Force of the Tariff Review Group charged by AT&T management with developing "the strongest possible case to resist customer ownership [**34] of telephone equipment" had concluded in early 1968 that a PCA requirement would only "shift[] . . . [existing] restrictions on customer-owned devices to similar restrictions through the provision of an arbitrary and redundant Telephone Company device that duplicates the customer's equipment."¹⁵ Litton highlights the fact that the internal AT&T Task Force characterized the PCA requirement as "a redundant, artificial and economic barrier to those wishing to purchase their own [*800] equipment." Thus, according to Litton, AT&T's own documents reveal its awareness as stated in a presentation by an AT&T executive at a Traffic Service Advisors' meeting in 1972 that "only the 'black box' . . . stands as the last hardware barrier between us and the final challenge of unbridled, unlimited, no-holds-barred competition."

[**35] In Litton's account, AT&T's support for the PCA requirement was based more on a concern for its share of the terminal equipment market than it was on concern for the safety of the telephone network. Thus, AT&T kept the interface device not only to exclude competition but also to palliate its own competitive inadequacies because, despite the vaunted reputation of Bell Laboratories, AT&T had done little in the years prior to *Carterfone* to update its terminal equipment. Accordingly, notwithstanding the opinion expressed by several members of the AT&T Tariff Review Group that the PCA requirement was not responsive to *Carterfone*,¹⁶ AT&T imposed the requirement in order to give it time to develop competitive terminal equipment. At trial, Litton put in evidence another AT&T document, the McKinsey Report, indicating that AT&T had produced development and marketing problems that prevented it from meeting competition in the post-Carterfone era. Litton also claims that when AT&T finally did update its terminal equipment line, it did so with "Chinese copies" of successful Japanese products.

¹⁵ The task force report said, *inter alia*:

An attempt to design an interface, or a family of interfaces, sufficient to minimize all adverse effects of customer-provided equipment poses an economic and administrative problem . . . Such an interface device would be priced at a level of at least what our existing equipment offering is now. This would, of course, result in what effectively might be considered to be an unjustified economic restriction in allowing a customer to provide his own device. And the provision of an interface does not, in itself, necessarily provide the full protection we desire . . .

The report also stated: "In general, the arguments against the provision of an interface remain the same, *i.e.*, redundancy, artificial economic barrier to the customer, impracticalities of administration, doubtful acceptance of customers, etc." The task force, in making its report to the Tariff Review Group explicitly rejected the interface device requirement and specifically endorsed technical standards:

The entire concept of customer-owned equipment must be based on tariff type-approval of all terminal equipment, wiring, and apparatus, rather than on interfaces that would attempt to provide the degree of safety, quality of service, and flexibility for future services that we may wish to provide. The provision, by the Bell System, of families of interfaces for specific devices or of one interface, sophisticated enough to work with all services, would erect a redundant, artificial and economic barrier to those wishing to purchase their own equipment.

¹⁶ See the minutes of Tariff Review Group meeting of July 11, 1968 noting that members Cohen, North, and Miller "feel and expressed themselves that current tariff efforts, particularly with respect to interconnection, is [sic] not at all responsive to FCC Carterfone decision."

[**36] Finally, Litton maintains that AT&T could have adopted certification standards no more than a year after *Carterfone*. In support of this claim Litton again points to internal AT&T documents and memoranda suggesting that AT&T management believed the development of certification standards was inevitable by 1972, or 1973 at the latest. Litton Brief at 31-32. Litton suggests that AT&T's participation in the PBX Advisory Committee was a ruse or delaying tactic, and that the decision to oppose certification was concealed from the FCC while AT&T appeared to cooperate with the Advisory Committee so as to avoid the appearance of bad faith.

If there is an individual villain in Litton's piece it is Mr. John deButts. DeButts took over as Chairman and CEO of AT&T about four years after *Carterfone* and stressed the fact to his management that AT&T would have only one policy with respect to certification standards: opposition. In the face of recommendations from subordinates that a certification standards approach was preferable to the PCA requirement, deButts nevertheless opposed the standards. Moreover, Litton argues that the AT&T position on certification, as dictated by deButts, [**37] was taken with full knowledge that the FCC would ultimately reject this position. Litton claims that AT&T understood that its opposition to certification exposed it to antitrust liability, citing an AT&T film simulating an antitrust trial of a suit similar to the one eventually filed by Litton and urging employees to destroy incriminating company documents. DeButts apparently remarked to AT&T lawyers shortly after his speech that he had created more opportunities for lawyers than anything "since Sherman wrote his famous law."

We thus arrive again at what both parties agree was a pivotal point for Litton in the interface tariff chronology: the deButts speech of 1973. In contrast to AT&T's claim that the PCA requirement amounted to only a little protection for the system that also served to avoid the antitrust difficulties that might flow from an AT&T enforced certification program, Litton argues that AT&T's opposition to certification -- its insistence upon the PCA requirement -- posed psychological and economic market barriers that drove Litton from the terminal equipment market. On the psychological side, Litton claims that the very imposition of the PCA requirement, without [**38] [*801] regard to its cost or inconvenience, caused customers to doubt the quality of Litton's product. Litton analogizes its burden under the interface tariffs to that which would face a foreign car manufacturer if its ability to sell in the American market were conditioned upon including a giant fire extinguisher in the car's trunk. Litton also presented evidence tending to show that AT&T engaged in slash and burn tactics calculated to make cutover from AT&T to Litton equipment as bothersome as possible for Litton and its customers alike. AT&T installers from time to time would chop off existing AT&T wiring flush with office walls in preparation for the installation of Litton equipment. AT&T made the PCA requirement onerous for customers in other ways as well: refusing to acknowledge receipt of letters arranging cutover dates, changing cutover dates, or failing to provide the necessary PCA equipment. Finally, Litton argues that AT&T's PCA devices themselves occasionally malfunctioned, thus adding actual injury to technological insult.

The PCA requirement also effected a direct economic barrier to Litton's market entry insofar as it increased the cost of installing and using [**39] Litton equipment. Although this case did not involve single line telephone sets, i.e., residential telephones, Litton is quick to point out that the PCA requirement precluded all of AT&T's competitors from entering this market because the PCA cost alone exceeded the cost of renting a telephone from AT&T.¹⁷ Litton argues that these costs also effectively foreclosed sales of Key Systems involving five lines or less, estimated to be over 90% of the Key System market. In the market for larger Key Systems and PBX Systems, the PCA requirement was, in effect, a surcharge imposed by AT&T on customers using non-AT&T equipment sold by Litton and other competitors. When it became clear in late 1973 that AT&T would fight for the PCA requirement, Litton believed its only recourse was to cut its losses and leave the terminal equipment market because by that time AT&T had copied the successful products Litton was offering, narrowing whatever competitive advantage Litton would have had even in the absence of the PCA surcharge.

¹⁷ The monthly charge for the AT&T interface device was about \$6.00, as compared to a residential phone rental rate of about \$1.25 a month. Litton claims that the PCA requirement increased its Key Systems customers' costs by some 18 to 35 percent, depending on the size and type of installation, over what they would have been in the absence of the requirement. In the PBX Systems market, Litton claims the PCA requirement increased its customers' costs by 8 to 20 percent. Litton Brief at 48-49.

[**40] Thus, in Litton's scenario, AT&T's support for the PCA requirement -- its opposition to certification standards -- was no more than a rear guard effort to delay the effect of *Carterfone*, undertaken in bad faith in order to handicap competitors. The deButts speech slammed shut what was, from Litton's perspective, the "window of opportunity" created by *Carterfone*. Litton had intended to take advantage of this opportunity by following the same three-step market development program it had used successfully in other product markets.¹⁸ First it engaged in the sale of reliable products manufactured by other concerns -- this to allow Litton the opportunity to establish an immediate market presence while it readied its own products. Litton compares its 1980 gross sales of close to five billion dollars with its start in 1953 as a small electronics company and emphasizes its highly successful progress and depth of skill in the telecommunications industry. In [*802] fact, Litton had extensive engineering and installation expertise in terminal equipment -- highly sophisticated terminal equipment for special customers like airports and the Department of Defense. Litton's statistics [**41] indicate that, if anything, its performance exceeded its own expectations. Within a year and a half of its decision to enter the terminal equipment market, it was making close to one quarter of all interconnect sales. To counter AT&T's claim that Litton had no marketable products of its own in the early 1970's, Litton argues that AT&T itself was responsible for this: it refused to interconnect the innovative Litton "plexcom" switch, which was "years ahead" of anything AT&T had to offer. By this time, according to Litton, AT&T's anticompetitive efforts had taken their toll in increased prices and decreased sales. When the deButts speech made it clear that AT&T would continue to resist the implementation of *Carterfone*, Litton claims that, like many other manufacturers during that period, it simply could not remain in the market.

[**42] Ultimately, the jury agreed in the main with Litton, finding that AT&T opposed certification standards in bad faith and that other AT&T conduct involving the supply of PCAs and the sale of inside wiring was unreasonable and injurious to Litton as a competitor. The jury also, after rendering the main verdict with respect to liability and damages, found that AT&T *filed* the interface tariffs in the first instance in bad faith. Despite arguments made here that the damage award was based on a study relying on unsupported assumptions that made it impossible for the jury to estimate the damages attributable only to conduct found illegal, liability was found in a specific amount, namely, in the case of Litton *qua* competitor, \$91,990,000, and in the case of Litton *qua* customer, \$268,243. The sum of these figures, \$92,258,243, was trebled as provided by [15 U.S.C. § 15](#).

II. DISCUSSION

A. *Introduction*

As the factual summary above suggests, there is little in this case that the parties agree upon. AT&T contends that a portion of the jury's verdict and two of its factual findings must be set aside because they were made "belatedly" and as a result of coercion. Second, [**43] AT&T argues that under the *Noerr-Pennington* doctrine the jury was precluded from finding that certain practices relied on to support both the initial and the "belated" verdict were anticompetitive or predatory. Third, AT&T maintains that there was insufficient evidence to support any of the jury's factual findings and the entire verdict must therefore be set aside. Fourth, again in an evidentiary vein, AT&T claims that various rulings by the trial court judge on the admissibility of evidence so prejudiced its defense that it is entitled to a new trial. AT&T's fifth argument flanks the merits, so to speak, and attacks the jury's damage awards. Finally, AT&T argues that the entire case should have been dismissed as a sanction for Litton's discovery misconduct. Litton argues that this misconduct was an excusable oversight and that the district court's sanction -- denial of any attorneys' fees -- was impermissibly severe.

B. *The "Belated" Jury Findings*

¹⁸ Litton's market strategy as outlined in its 1971 Business Telephone Systems Interconnect Opportunity Plan comprised three essential steps. The first step involved the creation of an extensive distribution and service network covering major metropolitan areas. In this first stage Litton planned to sell reliable terminal equipment manufactured by established firms while it continued its own research and development efforts. In the second stage, Litton planned to introduce its own equipment to customers. In the third and final stage, the sales and distribution network would be expanded to cover the entire country, at which time Litton would sell and distribute its own products nationwide.

After eight days of deliberation, the jury found AT&T guilty of monopolization and an attempt to monopolize the relevant product market. In response to special interrogatories the jury specifically found three AT&T practices [**44] -- opposition to certification, delay in providing interface devices, and conduct in connection with the sale of inside wiring -- anticompetitive and predatory. Because the jury found that AT&T's monopolization was the proximate cause of Litton's injury, it entered an award for Litton as both a competitor and customer of AT&T. The jury initially failed, however, to reach unanimity on three matters: (1) whether the attempted monopolization proximately caused Litton's injury, and whether either (2) the original filing of the interface tariff or (3) delay in affected cutover from AT&T to Litton equipment was anticompetitive or predatory. The trial judge asked the jury to attempt [*803] to reach a unanimous result one way or the other on the remaining issues and the jury indicated its willingness to do so. After deliberating a short while, the jury returned with affirmative answers favorable to Litton on all three questions. AT&T makes an extensive argument that these "belated" findings were coerced and therefore should be set aside. Although the verdict on the monopoly charge can be sustained, and the damage award affirmed, if there is support for each of the initial three findings [**45] made pursuant to [Federal Rule of Civil Procedure 49](#), see [Northeastern Telephone Co. v. AT&T](#), 651 F.2d 76, 94-95 (2d Cir. 1981), cert. denied, 455 U.S. 943, 102 S. Ct. 1438, 71 L. Ed. 2d 654 (1982), disposition of the threshold claim that these later findings must be set aside will enable us to consolidate our discussion of the more difficult *Noerr-Pennington* issues AT&T raises.

HN2[¹⁹] It was, of course, completely appropriate to submit special interrogatories to the jury, particularly in a case as complex and protracted as this one.¹⁹ In asking the jury to specify whether it found each of the alleged predatory practices to have been proved, the trial court was merely following [Berkey Photo, Inc. v. Eastman Kodak Co.](#), 603 F.2d 263, 299 (2d Cir. 1979), cert. denied, 444 U.S. 1093, 62 L. Ed. 2d 783, 100 S. Ct. 1061 (1980). For whatever reason, the jury did not agree unanimously on two interrogatories and the proximate cause component of the attempted monopolization charge. There was nothing unusual, much less erroneous, in the trial court's resubmission of these questions. See, e.g., [Turchio v. D/S A/S DEN NORSKE AFRICA](#), 509 F.2d 101, 105 (2d Cir. 1974) **HN3**[²⁰] (if the jury [**46] fails to answer interrogatory it is appropriate to resubmit the interrogatory "a second and third time to obtain answers to the unanswered questions").²⁰

[**47] AT&T's contention that the jury was somehow "coerced" into rendering answers favorable to Litton upon resubmission cannot be squared with the facts. The jury did not indicate that it was deadlocked on these questions; it indicated that it was divided. That the jury took its task seriously and deliberated conscientiously is manifest; before rendering its initial verdict the jury requested guidance from the court as to whether it could continue if it was divided on a question. AT&T can hardly argue that the jury was predisposed to find in Litton's favor given the fact that it found *against* Litton on two out of four theories of liability and divided on a third.²¹ AT&T's argument that the jury had no incentive to find against Litton on the unresolved proximate cause question because the initial verdict would stand in any event is pure speculation. Even if we were to concede AT&T's premise that the jury was likely to shirk its duty conscientiously to reconsider these questions -- a premise we find highly questionable given that

¹⁹ The practice has been described as "usually preferable to the opaque general verdict." [Skidmore v. Baltimore & Ohio RR. Co.](#), 167 F.2d 54, 67 (2d Cir.), cert. denied, 335 U.S. 816, 93 L. Ed. 371, 69 S. Ct. 34 (1948). See also Wright, *The Use of Special Verdicts in Federal Court*, 38 F.R.D. 199, 206 (1966) (submission of special verdicts can serve to clarify confusing or complicated litigation).

²⁰ Indeed, if the jury had found against Litton on the proximate cause question relating to the attempted monopolization charge, the trial court judge might reasonably have inferred that this was inconsistent with the jury's general verdict and damage award. The record indicates that this possibility was of some concern to both the trial court judge and the attorneys for both parties. In light of the express provision in [Fed. R. Civ. P. 49\(b\)](#) that a trial court may "return the jury for further consideration of its answers and verdict" in order to eliminate any inconsistencies between a general verdict and special findings, we do not see how it can be error to "return the jury for further consideration" of an interrogatory it did not answer.

²¹ Specifically, the jury found against Litton on its claim that AT&T engaged in a conspiracy to monopolize (claim three) and in a conspiracy to restrain trade (claim four).

the jury served over five months without a single absence and deliberated for eight days²² -- the conclusion [***804**] that it was likely to resolve [****48**] these questions in Litton's favor simply does not follow.²³

Nor do we find anything [***49**] coercive in the trial judge's instructions. The jurors were informed that their answers to the questions were "important" and that they should listen to the views of their fellow jurors without abandoning their own conscientiously held views. Far from being coercive, this instruction was completely in keeping with the recognition that:

A system which requires the unanimous verdict of a jury . . . can function satisfactorily in most cases only because most jurors are reasonable . . . and after a certain amount of discussion has produced a large majority in favor of one view, those in the minority may be willing to join the majority in the belief that if so many other reasonable people have a contrary view, the views of the minority may well be mistaken. Instructions . . . in both state and federal courts stress the importance of jurors listening to the views of one another and making allowance for the fact that there can be a reasonable difference of opinion.

Grace Lines, Inc. v. Motley, 439 F.2d 1028, 1033 (2d Cir. 1971) (Lumbard, C.J., concurring). The instructions here fall far short of those sustained in e.g., *United States v. Corcione*, 592 F.2d **[**50]** 111, 117 n. 5 (2d Cir. 1979), cert. denied, 440 U.S. 975, 99 S. Ct. 1545, 59 L. Ed. 2d 794 (1979) (after jury deadlocked on criminal charge, trial judge instructed jury that it should "consult with one another and . . . deliberate with a view to reaching agreement if you can possibly do so"); *United States v. Robinson*, 560 F.2d 507, 511 n.6 (2d Cir. 1977), cert. denied, 435 U.S. 905, 55 L. Ed. 2d 496, 98 S. Ct. 1451 (1978) (jury instructed that "it is important that a decision . . . be reached here, and I really see no good reasons why a decision cannot be reached").²⁴ [***51**] Litton was entitled to a jury determination on all of its claims and we do not believe the trial court judge erred either in resubmitting the claims or in instructing the jury as he did. There is no factual or logical basis for AT&T's arguments that resubmission of these questions tipped the balance in Litton's favor.²⁵

C. AT&T's Noerr-Pennington Claims

²² The trial court judge praised the jury at the close of the trial as follows:

Not a single juror has missed a single day because of illness or any other personal matter . . . That is absolutely amazing . . . You have also been the most punctual jury I have ever had . . . You have been a vindication of the jury system and all that it means.

²³ AT&T's argument that the jury had no incentive to find against Litton on one claim because it had found for Litton on another is a criticism that can be made whenever a plaintiff's case involves multiple claims, any one of which would be sufficient to support a damage award. Thus viewed, AT&T's position is more an indictment of the jury system than an argument against resubmission.

²⁴ AT&T's contention that the trial court judge "pressured" the jury into resolving the undecided questions in Litton's favor is based on the following instruction:

Any question that is left unanswered creates a possible problem for the parties and the Court. I don't need to give you specific examples of that. It is a fact that we would like positive answers of either 'yes' or 'no' to the questions, *if you can possibly agree after discussing the matter again . . . to see whether or not you can't in good conscience adopt [the views of other jurors] as your own*. It will clear up a lot of problems for us if you can.

(Emphasis added.)

This instruction correctly emphasized both the importance of reaching a verdict and the necessity of doing so only in accordance with the conscientiously held views of each juror. If the trial court judge had elaborated upon the "possible problem" -- i.e., inconsistency between a general verdict in Litton's favor and negative finding on the attempted monopolization proximate cause question -- we might be inclined to agree with AT&T that the effect could be to bias the jury. But this is precisely the effect that the trial court judge avoided by phrasing the instruction as he did.

²⁵ We note that under the trial court judge's instructions the jury could have, but did not, increase the damages it previously awarded Litton. Empirically, this undercuts AT&T's contention that the jury was predisposed to find against it.

According to AT&T, the "fundamental error that pervaded the trial of this case was the failure of the trial court to recognize that the principal . . . conduct upon which the judgment is based . . . was protected" under the doctrine developed in *Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc.*, 365 U.S. 127, 5 L. Ed. 2d 464, 81 *805 S. Ct. 523 (1961) and *United Mine Workers v. Pennington*, 381 U.S. 657, 14 L. Ed. 2d 626, 85 S. Ct. 1585 (1965). AT&T Brief at 43. AT&T argues that both its opposition to certification standards and its original filing of the interface tariffs should not have been submitted to the jury because this conduct did not, as a matter of law under the evidence adduced by Litton, fall within the only exception -- the so-called "sham" exception -- to [**52] *Noerr-Pennington*.

Noerr, it will be recalled, involved a deceptive political campaign waged as part of the bitter economic feud between the railroad and trucking industries for control of the interstate, heavy freight hauling market. Trucking industry representatives sued a railroad trade association, alleging that a publicity campaign advocating legislation favorable to the railroads violated the Sherman Act because the campaign's sole purpose was to hamper the trucking industry's ability to compete with the railroads. The Court held that "the Sherman Act . . . does not apply to . . . activities comprising mere solicitation of governmental action with respect to the passage and enforcement of laws," *365 U.S. at 138*, irrespective of whether the activities might be considered fraudulent or deceptive. The *Noerr* holding was, strictly speaking, a matter of statutory construction,²⁶ [**54] but *First Amendment* concerns clearly informed the decision. The Court feared that an expansive construction of the Sherman Act would impinge upon the right to petition and impair the government's ability "to take actions through its legislature and executive that operate to restrain trade." [**53] *365 U.S. at 137, 81 S. Ct. at 529, 5 L. Ed. 2d 464*.²⁷ These factors, as well as the "essential dissimilarity" between joint efforts to seek legislation and "agreements traditionally condemned" under the Act, *id. at 136*, led the Court to conclude that Congress could not have intended the Act to reach such behavior. In reaching this result, the Court found the question of intent irrelevant, stating that "insofar as the railroads' campaign was directed toward obtaining governmental action, its legality was not at all affected by any anticompetitive purpose it may have had." *365 U.S. at 139-40*. In dictum, however, the Court indicated that "there may be situations in which a publicity campaign, ostensibly directed toward influencing governmental action, is a mere sham to cover what is actually nothing more than an attempt to interfere directly with the business relationships of a competitor and the application of the Sherman Act would be justified." *Id. at 144*.

The *Pennington* decision restated, and to some extent arguably amplified, *Noerr*. In *Pennington* an industry union and large firms urged the Secretary of Labor to establish minimum wage levels that would have the effect of squeezing out smaller firms.²⁸ The Court held that "*Noerr* shields [*806] from the Sherman Act a concerted effort to influence public officials regardless of intent or purpose . . . Joint efforts to influence public officials do not violate the antitrust laws even though intended to eliminate competition." *381 U.S. at 670*. *Pennington* made it clear that efforts directed at executive officials or agencies -- as distinguished from the legislative [**55] and publicity efforts involved in *Noerr* -- were protected. *Pennington* also emphatically reaffirmed *Noerr*'s holding that

²⁶ See *365 U.S. at 132 n.6*. See generally, Fischel, *Antitrust Liability for Attempts to Influence Governmental Action: The Basis and Limits of the Noerr-Pennington Doctrine*, 45 U. Chi. L. Rev. 80, 82-84 (1977).

²⁷ The Court was concerned that construing the Sherman Act to reach essentially political activity would hamper the "ability of the people to make their wishes known to their representatives," *365 U.S. at 137*, thus invoking a traditional *First Amendment* theme. See also *id. at 138*; A. Meiklejohn, *Political Freedom* 26-28 (1948); Bork, *Neutral Principles and Some First Amendment Problems*, 47 Ind. L.J. 1 (1971).

²⁸ The conduct challenged in *Pennington* included efforts to induce the TVA, a government corporation, to curtail its purchases of coal at reduced prices on the spot market. The Supreme Court did not address the issue, but some lower courts have concluded *Noerr-Pennington* does not immunize anticompetitive efforts directed at government agencies acting in a proprietary capacity -- i.e., as buyers or sellers. See, e.g., *Sacramento Coca-Cola Bottling Co. v. Chauffeurs, Teamsters & Helpers Local No. 150*, 440 F.2d 1096, 1099 (9th Cir.), cert. denied, 404 U.S. 826, 30 L. Ed. 2d 54, 92 S. Ct. 57 (1971); *George R. Whitten Jr., Inc. v. Paddock Pool Builders, Inc.*, 424 F.2d 25, 33 (1st Cir.), cert. denied, 400 U.S. 850, 27 L. Ed. 2d 88, 91 S. Ct. 54 (1970). A Fifth Circuit case, and a district court decision in the Third Circuit, are contra. See *Household Goods Carriers' Bureau v. Terrell*, 452 F.2d 152 (5th Cir. 1971) (reh. en banc); *United States v. Johns-Manville Corp.*, 259 F. Supp. 440 (E.D. Pa. 1966).

anticompetitive intent did not make an otherwise legitimate attempt to secure governmental action or express a political position illegal; the Court stated that "such conduct is not illegal, either standing alone or as part of a broader scheme itself violative of the Sherman Act." *Id.*

[**56] The last case generally cited in any exegesis of the *Noerr-Pennington* doctrine is [*California Motor Transport Co. v. Trucking Unlimited*, 404 U.S. 508, 30 L. Ed. 2d 642, 92 S. Ct. 609 \(1972\)](#). This case involved a group of trucking companies that opposed "with or without probable cause, and regardless of the merits of the cases, " each and every license application made by the group's competitors to a state regulatory agency. [*Id. at 512*](#). *California Motor Transport* both expanded and limited the *Noerr-Pennington* doctrine. Although the Court ultimately held against the defendants, it broadened and strengthened the base of the doctrine by holding, first, that it applied to administrative and adjudicative proceedings and, second, that it was constitutionally based.²⁹ At the same time, the Court imposed limits upon the doctrine by holding that the plaintiff's allegations triggered the application of the *Noerr* sham dictum.

[**57] AT&T points primarily to the *Noerr* and *Pennington* decisions and argues that even if its conduct was undertaken for anticompetitive reasons, it was nevertheless protected. To this Litton replies that *Noerr-Pennington* is inapplicable because AT&T injured Litton not by requesting or as a result of governmental action, but by virtue of what AT&T itself did in filing and maintaining the interface tariffs while opposing the only feasible alternative -- certification standards -- in bad faith. In the alternative, Litton maintains that this case presents a "paradigm of the 'sham' exception to the *Noerr* doctrine." Thus, there are two strings to the Litton bow: inapplicability of the *Noerr-Pennington* doctrine because the injury flowed from actions not within the scope of the doctrine, and applicability of the "sham" exception. Judge Meskill and I agree with Litton on both counts for reasons we set forth below; Judge Kearse concurs only on the second ground and does not join in the immediately following portion of the opinion.

1. *Applicability of the Noerr-Pennington Doctrine*

AT&T characterizes its filing of the interface tariffs after *Carterfone* as an [**58] "application" to the FCC, and contends that "*Noerr-Pennington* does not permit antitrust liability to be based on such applications to a regulatory agency." AT&T Brief at 82. In essence, AT&T's argument is that its conduct in devising and filing the tariffs is immunized because the tariffs were contested and AT&T defended them before the FCC. If this argument were accepted, a common regulatory practice³⁰ [*807] designed to protect consumers would instead shield from antitrust liability the very entities the practice seeks to restrain and regulate. In an earlier case involving this same defendant we concluded that pervasive regulation of the telecommunications industry does not, without more, confer antitrust immunity. See, [*Northeastern Telephone Co.*, 651 F.2d at 83](#); see also [*International Telephone & Telegraph Corp. v. General Telephone & Electronics Corp.*, 518 F.2d 913, 935-36 \(9th Cir. 1975\)](#); cf., [*United States v. American Telephone & Telegraph Co.*, 524 F. Supp. 1336, 1357-60 \(D.D.C. 1981\)](#) (declining to decide whether compliance with regulatory mandates insulates a defendant from antitrust liability.) If extensive substantive regulation does not [**59] warrant an antitrust exemption, then surely an essentially procedural aspect of regulation -- tariff filing -- cannot.

²⁹ [*404 U.S. at 510-11*](#). The *California Motor Transport* Court squarely held that [*First Amendment*](#) rights of petition and association underlay the *Noerr-Pennington* doctrine. The *Noerr* Court only went so far as to suggest that an interpretation of the Sherman Act contrary to the one it adopted "would raise important constitutional questions." [*365 U.S. at 138*](#).

³⁰ See, e.g., [*14 C.F.R. § 221.3 \(1982\)*](#) (Civil Aeronautics Board) (requiring all domestic and foreign air carriers to file "tariffs showing all rates, fares, and charges" for air transportation); [*18 C.F.R. § 35.1\(a\) \(1982\)*](#) (Federal Energy Regulatory Commission) (requiring "every public utility [to] file . . . full and complete rate schedules . . . setting forth all rates and charges for any transmission or sale of electric energy"); [*46 C.F.R. § 531.3 \(1981\)*](#) (Federal Maritime Commission) (requiring "every domestic offshore carrier [to] file . . . tariffs showing its actual rates, fares and charges"). Filing requirements like those cited above and those imposed by the FCC under 47 C.F.R. § 61 et seq. (1981) hearken back to the original justification for administrative regulation of industries affected with a public interest: preventing discrimination on the basis of price or terms of service. See generally *Jaffe, The Effective Limits of the Administrative Process: A Reevaluation*, 67 Harv. L. Rev. 1105, 1106-07 (1954).

[**60] Apart from the obvious difficulty of reconciling the effect of AT&T's *Noerr-Pennington* argument with the Supreme Court's repeated admonition that antitrust exemptions are to be countenanced only where "there is a 'plain repugnancy between the antitrust and regulatory provisions,'" *Gordon v. New York Stock Exchange, Inc.*, 422 U.S. 659, 682, 45 L. Ed. 2d 463, 95 S. Ct. 2598 (1975), quoting *United States v. Philadelphia National Bank*, 374 U.S. 321, 350, 10 L. Ed. 2d 915, 83 S. Ct. 1715 (1963); see also *Silver v. New York Stock Exchange*, 373 U.S. 341, 357, 10 L. Ed. 2d 389, 83 S. Ct. 1246 (1963), we believe that AT&T's position must be rejected for a more fundamental reason. AT&T erroneously assumes that a mere *incident* of regulation -- the tariff filing requirement -- is tantamount to a request for governmental action akin to the conduct held protected in *Noerr* and *Pennington*. But in this case, as in *Continental Ore Co. v. Union Carbide & Carbon Corp.*, 370 U.S. 690, 707, 8 L. Ed. 2d 777, 82 S. Ct. 1404 (1962), the *Noerr-Pennington* doctrine is "plainly inapposite" because AT&T was "engaged in private commercial activity, no element of which involved" [**61] seeking to procure the passage or enforcement of laws." The decision to impose and maintain the interface tariff was made in the AT&T boardroom, not at the FCC; AT&T's power to exclude Litton and other competitors from the telephone terminal equipment market resulted not from the FCC's regulatory authority but from AT&T's exclusive control of the telephone network.³¹ [**62] AT&T cannot cloak its actions in *Noerr-Pennington* immunity simply because it is required, as a regulated monopoly, to disclose publicly its rates and operating procedures. The fact that the FCC might ultimately set aside a tariff filing does not transform AT&T's independent decisions as to how it will conduct its business into a "request" for governmental action or an "expression" of political opinion.³² Similarly, [*808] the FCC's failure to strike down a tariff at the time of its filing does not make the conduct lawful, particularly where, as in this case, the agency specifically declines to rule on a tariff's legality.

[**63] We therefore follow the plurality in *Cantor v. Detroit Edison Co.*, 428 U.S. 579, 601-02, 49 L. Ed. 2d 1141, 96 S. Ct. 3110 (1976), where four Justices rejected AT&T's *amicus curiae* argument that a tariff filing was protected as a request for governmental action under *Noerr-Pennington*. In *Cantor*, the plurality held that *HN4* a tariff filed by an electric utility could not evade scrutiny under the antitrust laws simply because it was filed in accordance with state law and approved by a state agency. The *Cantor* plurality stated that

nothing in the *Noerr* opinion implies that the mere fact that a state regulatory agency may approve a proposal included in a tariff, and thereby require that the proposal be implemented until a revised tariff is filed and approved, is a sufficient reason for conferring antitrust immunity on the proposed conduct.

³¹ See also *United States v. American Telephone & Telegraph Co.*, 524 F. Supp. 1336, 1352-53 (D.D.C. 1981) (analyzing AT&T's monopoly over local telephone service in terms of the "essential facility" or "strategic bottleneck" doctrine).

³² Under applicable federal regulations, AT&T could have at any time revoked the interface tariff on its own initiative by filing another tariff. 47 C.F.R. § 61.57(a) (1981). We concluded almost ten years ago in *American Telephone & Telegraph Co. v. FCC*, 487 F.2d 865, 871-76 (2d Cir. 1973) that sections 203 and 205 of the Communications Act of 1934 contemplated "carrier initiated rate changes" that the FCC could set aside only in the manner prescribed by the statute itself. The obverse of this, of course, is that a tariff is an independent exercise of the carrier's business judgment that receives no government imprimatur until and unless the FCC reviews the tariff in response to a complaint or upon its own initiative. A number of other courts have reached the same conclusion. See *Phonetel, Inc. v. American Telephone & Telegraph Co.*, 664 F.2d 716, 733, 735 (9th Cir. 1981) (FCC does not adopt or approve tariff filings it permits to become effective; tariff filings are "the product of the regulated entity's independent initiative and judgment"); *Sound, Inc. v. American Telephone & Telegraph Co.*, 631 F.2d 1324, 1330 (8th Cir. 1980) ("Bell, not the FCC, proposes its rates, regulations and restrictions In filing each tariff, Bell implements its own business judgment"); *MCI Telecommunications Corp. v. FCC*, 182 U.S. App. D.C. 367, 561 F.2d 365, 374 (D.C. Cir. 1977), cert. denied, 434 U.S. 1040, 54 L. Ed. 2d 790, 98 S. Ct. 780, 98 S. Ct. 781 (1978) ("The tariff provisions of the Communications Act embody a considered legislative judgment that carriers should in general be free to initiate new rates or services . . . unless and until the Commission, after hearing, determines that such rates or practices are unlawful").

We note that AT&T's argument does not rely on the "filed tariff" doctrine of *Keogh v. Chicago & Northwestern Ry.*, 260 U.S. 156, 162, 67 L. Ed. 183, 43 S. Ct. 47 (1922). See *City of Groton v. Connecticut Light & Power Co.*, 662 F.2d 921, 929 (2d Cir. 1981) ("filed tariff" doctrine inapplicable where regulatory agency expressly refuses to commit itself and tariff is ultimately disapproved).

Id. Chief Justice Burger did not concur in that portion of the plurality's opinion discussing *Noerr-Pennington*, but his objection went to the plurality's construction of the "state action" exemption doctrine under [*Parker v. Brown, 317 U.S. 341, 87 L. Ed. 315, 63 S. Ct. 307 \(1943\)*](#), and he said nothing [**64] in disagreement with the plurality's interpretation of *Noerr*. Justice Blackmun's concurrence also did not address *Noerr*, but rather would rely on "a rule of reason, taking it as a general proposition that state-sanctioned anticompetitive activity must fall like any other if its potential harms outweigh its benefits." [*428 U.S. at 610*](#). Although we are aware that plurality opinions can provide only limited guidance on an issue a majority of the Court did not address,³³ [**65] we believe that to the extent that both Justice Blackmun and Chief Justice Burger were unwilling to equate "state action" with a utility's adherence to a tariff filing required by state law, they would reject a *fortiori* the argument [*809] that the tariff filing amounted to a request for governmental action.³⁴

Much of our analysis relating to the filing of the interface tariffs applies to AT&T's opposition to certification. Opposition to certification is simply the other side of the interface tariff coin; AT&T's filing and maintenance of the PCA requirement was the very embodiment of opposition to the only feasible alternative -- certification standards. To be sure, AT&T argues that its "opposition" to the development of certification standards was by [**66] definition protected under *Noerr-Pennington* because it amounted to no more than espousing a position before an administrative body. But our review of the evidence presented by Litton suggests that AT&T's *post hoc* characterization of the opposition-to-certification issue is distorted. Litton's evidence indicated that AT&T made unsupportable claims to the FCC regarding network harm, feigned cooperation with the PBX Advisory Committee's efforts to develop certification standards, and generally attempted to buy as much time as possible to improve its own competitive position at the expense of Litton and other competitors.³⁵ The effect of this was to maintain the

³³ The Court has indicated that in interpreting plurality holdings lower courts should look to the "narrowest ground" relied upon in a concurring Justice's opinion. See [*Marks v. United States, 430 U.S. 188, 193, 51 L. Ed. 2d 260, 97 S. Ct. 990 \(1977\)*](#); [*Gregg v. Georgia, 428 U.S. 153, 169 n. 15, 49 L. Ed. 2d 859, 96 S. Ct. 2909 \(1976\)*](#) (plurality opinion). Although this rule seems of limited utility where, as here, the concurring Justices do not address the issue in question, it seems plausible to assume that if either Chief Justice Burger or Justice Blackmun felt there was merit to the *Noerr-Pennington* argument made by the defendant or AT&T as *amicus*, they would not have concurred in the judgment. Nor is it entirely clear that the dissenting opinion written by Justice Stewart and joined by Justices Powell and Rehnquist would hold AT&T's conduct in this case protected under *Noerr-Pennington*. Although the dissenting opinion stated that

Parker, Noerr, and Goldfarb [v. [*Virginia State Bar, 421 U.S. 773, 95 S. Ct. 2004, 44 L. Ed. 2d 572 \(1975\)*](#)] point unerringly to the proper disposition of this case The utility company engages in two distinct activities: It proposes a tariff and, if the tariff is approved, it obeys its terms. The first action cannot give rise to antitrust liability under *Noerr* and the second -- compliance with the terms of the tariff under the command of state law -- is immune from antitrust liability under *Parker* and *Goldfarb*.

[*428 U.S. at 624*](#), the tariff in question in *Cantor* was apparently specifically approved by the state regulatory agency. [*Id. at 583*](#). In this case, of course, the FCC took pains to state that permitting the tariff to take effect was not to be construed as approval of the tariff.

³⁴ We note that Chief Justice Burger stated in his concurring opinion that the plurality "correctly concludes: 'The Commission's approval of respondent's decision to maintain such a program does not, therefore, implement any statewide policy.'" [*428 U.S. at 604*](#). The Eighth Circuit has recently read *Cantor* as not providing *Noerr-Pennington* protection for tariff filings. See [*City of Kirkwood v. Union Electric Co., 671 F.2d 1173, 1181*](#) (8th Cir.), cert. denied, [*459 U.S. 1170, 103 S. Ct. 814, 74 L. Ed. 2d 1013 \(1983\)*](#). See also [*United States v. Title Insurance Rating Bureau of Arizona, Inc., 517 F. Supp. 1053, 1059-60 \(D. Ariz. 1981\)*](#).

³⁵ We review this evidence in greater depth in our discussion of the sham exception, *infra*, but we believe that this evidence tends to show that the conduct fairly considered under the rubric of "opposition to certification" amounted to more than simply an expression of AT&T's opinion. Cf. [*City of Kirkwood v. Union Electric Co., 671 F.2d at 1181*](#) ("The *Noerr-Pennington* doctrine will not protect a utility which manipulates the federal and state regulatory processes to achieve anti-competitive results. It is not for expression of opinion that [the plaintiff] seeks to compel [the defendant] to respond in damages, but rather for [the defendant's] conduct in the market place.").

interface tariffs and whatever anticompetitive or exclusionary effect that flowed therefrom. AT&T's opposition to certification accordingly embraced much more than merely advocating a position before the FCC.

[**67] 2. The "Sham Exception"

Even if our conclusions regarding the applicability of *Noerr-Pennington* are incorrect, the doctrine is subject to the sham exception suggested by way of dictum in *Noerr* and relied on in *California Motor Transport*. In *California Motor Transport* the defendant instituted proceedings challenging the regulatory approval sought by the plaintiff not with the expectation of prevailing but for purposes of harassment and delay. The Court held that [HNS[↑]](#) where "the administrative and judicial processes [are] abused," [404 U.S. at 513](#), in an attempt to stifle competition, *Noerr-Pennington* is inapplicable. The focus of the Court's concern in *California Motor Transport* was the "illegal result" of the abuse, specifically, "effectively barring respondents from access to the agencies and the courts." *Id.*³⁶ Although the Court conceded that an "abuse" standard involved "a difficult line to discern and draw," a leading [\[*810\]](#) antitrust commentator has suggested that this line is crossed when

the defendant's activity was intended to injure the plaintiff directly rather than through a governmental decision. When the antitrust defendant [\[**68\]](#) had not truly sought to influence the governmental decision, his invocation of governmental machinery is a sham Where he had no reasonable expectation of obtaining the favorable ruling, his effort to do so was a sham.

P. Areeda, *Antitrust Law* para. 203.1a (Supp. 1982).

[**69] Professor Areeda's view of the heart of the sham exception -- invoking the process of administrative or adjudicatory decisionmaking for the injury that the process alone will work upon competitors -- possesses the virtue of accommodating the Supreme Court's concern in *California Motor Transport* that these processes not be abused with impunity behind claims of *Noerr-Pennington* immunity. To be sure, there are difficulties involved in determining whether a defendant "truly sought to influence the governmental decision" and whether there was a "reasonable expectation" of doing so. One indicium of whether a defendant could have reasonably expected its position to prevail, and therefore whether the invocation of process was actually an attempt to influence a decision rather than an attempt to interpose delay, is a "pattern of baseless, repetitive claims." [404 U.S. at 513](#). Thus, we held in *Landmarks Holding Corp. v. Berman*, [664 F.2d 891, 896 \(2d Cir. 1981\)](#) that an attempt by a defendant to delay the construction of a competitor's shopping mall by carefully orchestrating a series of court and administrative actions designed to defeat a zoning variance was not protected under [\[**70\]](#) *Noerr-Pennington*.

But [HNG[↑]](#) repetition is but one indicium of a sham claim; under *California Motor Transport*'s abuse standard "many other forms of illegal and reprehensible practice may corrupt the administrative or judicial processes and result in antitrust violations." [404 U.S. at 513](#). In *Landmarks Holding*, for example, our conclusion that the judicial and administrative processes had been abused was based in part upon "unethical lawyer conduct" which included, *inter alia*, requests for delays that the defendant's own documents proved were "purely bull." [664 F.2d at 894](#).³⁷

³⁶ We reject the suggestion made in AT&T's brief that the applicability of the sham exception turns on whether a competitor is barred from access to administrative agencies or the courts. The Supreme Court's opinion in *California Motor Transport* cited access barring as one example of the illegal results that might flow from abuse of the administrative process. One of the allegations in *California Motor Transport* that the Court found sufficient to trigger the sham exception is similar to the one Litton made in this case, namely that the defendants "became 'the regulators of the grants of rights, transfers and registrations.' " [404 U.S. at 511](#). More recent Supreme Court opinions have referred to the sham exception's availability without regard to the necessity of "access barring," see, e.g., *City of Lafayette v. Louisiana Power & Light Co.*, [435 U.S. 389, 405, 55 L. Ed. 2d 364, 98 S. Ct. 1123 \(1978\)](#); *Vendo Co. v. Lektro-Vend Corp.*, [433 U.S. 623, 635 n. 6, 97 S. Ct. 2881, 53 L. Ed. 2d 1009 \(1977\)](#) (Rehnquist, J., concurring).

³⁷ Cf. Note, *Limiting the Antitrust Immunity for Concerted Attempts to Influence Courts and Adjudicatory Agencies: Analogies to Malicious Prosecution and Abuse of Process*, 86 Harv. L. Rev. 715, 726-35 (1973).

In deciding whether Litton adduced sufficient evidence to demonstrate that AT&T's conduct in connection with the interface tariff and opposition to certification was a sham, we are of course required [**71] to view the evidence in the light most favorable to Litton, giving it the benefit of all inferences that the evidence fairly supports regardless of whether contrary inferences might be drawn. *Continental Ore Co., 370 U.S. at 696; Taxi Weekly, Inc. v. Metropolitan Taxicab Board of Trade, Inc., 539 F.2d 907, 911 (2d Cir. 1976)*. With this in mind, and with reference to the Litton case set out above in I(B) (2) which we think is fairly supported by the evidence, we believe that the sham exception is applicable to AT&T's conduct. As early as the ultimate decision in *Hush-A-Phone*, AT&T knew that the FCC's basic position was that AT&T could not exclude "any device" -- a category clearly including telephone terminal equipment -- absent a showing of actual harm. The lengthy litigation in *Carterfone* was a matter of industry-wide knowledge and interest; the decision was viewed at the time as a smashing blow to AT&T and as a "window of opportunity" for AT&T's competitors. Anyone reading the language of the *Carterfone* rehearing decision and the Tariff Review Group Task Force Report we have quoted above could conclude that neither filing of the interface tariff nor opposition [**72] of certification squared with the FCC's mandate in *Carterfone*.

AT&T nevertheless consistently maintained that the PCA requirement was necessary to protect the telephone network. [*811] This was not so much a "pattern of . . . repetitive claims" as it was a unitary, ongoing claim.³⁸ There was sufficient evidence to allow the jury to conclude that this claim was "baseless"; AT&T's own reports pointed out that the interface device was redundant, uneconomic, and unnecessary. Time and again AT&T inveighed against the harm that would flow from certification standards without once demonstrating a single instance of harm from what its own reports indicated was a trend in the direction of "illegal" or "unauthorized" interconnection. AT&T asserts that evidence of harm was difficult to produce because of its transitory nature and because the PCA requirement was effective, but the jury could have reasonably concluded -- on the basis of evidence indicating that governmental agencies and some 1600 non-AT&T telephone companies were interconnected without a PCA -- that AT&T's ongoing claim of harm to the system was baseless.

[**73] There was also evidence tending to indicate that AT&T affirmatively misled the FCC with respect to the need for the PCA requirement and the difficulty of developing certification standards. For example, while it opposed certification standards pursuant to the policy announced before NARUC in the deButts speech, AT&T provided the FCC with a study that its own author believed did not prove anything. Similarly, AT&T's own documents indicate that many of its senior executives thought that certification standards could be developed within a matter of months. Indeed, some AT&T documents demonstrated that many AT&T executives believed the standards were inevitable regardless of the position AT&T adopted.

Not surprisingly, AT&T argues that intra-corporate division of opinion on an issue of this nature is inevitable and therefore not indicative of an attempt to subvert the regulatory process. But again, a review of the evidence in the light most favorable to Litton compels us to conclude that the jury could reasonably have inferred that AT&T opposed the development of certification standards in a manner calculated to delay the day when *Carterfone*'s pro-competitive mandate would become [**74] fully effective. Litton introduced evidence, and AT&T concedes in its brief, that AT&T "did not complete some of its 'homework assignments' on time" in connection with the PBX Advisory Committee's efforts to develop certification standards. AT&T Brief at 20. And, although AT&T had decided in March of 1973 that it would oppose certification standards, it continued to work with the Advisory Committee in accordance with an internal "Tactics Memorandum" which concluded that withdrawing from the committee would accelerate "decisions in favor of certification." This evidence is sufficient to support an inference that AT&T did what it could to delay and obfuscate the efforts undertaken by the FCC and other interested parties to develop certification standards. As a textbook example of a monopolist in control of an essential facility, see *United States v. Terminal Railroad Association, 224 U.S. 383, 56 L. Ed. 810, 32 S. Ct. 507 (1912)*, it is difficult to conclude that these efforts could not have amounted to an abuse of the administrative process. The result, to draw an obvious

³⁸ The Circuits are split on whether a single claim is sufficient to support application of the sham exception. See *Clipper Express v. Rocky Mountain Motor Tariff Bureau, Inc., 674 F.2d 1252, 1266-67 & n.24 (9th Cir. 1982)* (concluding that a single claim can be a sham and citing cases on both sides of the proposition).

analogy to *California Motor Transport*, was that Litton and other terminal equipment competitors were [**75] barred from access to the telephone network system.

AT&T had no realistic hope that the FCC would approve the interface device; its own people thought that the device was a redundant "artificial barrier" to competition. It nevertheless consciously pursued a policy of delaying the time when the FCC would strike down the PCA requirement. It implemented this policy by making baseless claims relative to potential harms to the network while opposing certification standards in every way possible. AT&T argues that it actually wanted the FCC to [*812] approve the interface device and reject certification standards, but as Professor Areeda points out

to be sure, [a competitor] would always be pleased to obtain a governmental decision against his rival. But where he had no reasonable expectation of obtaining the favorable ruling, his effort to do so [is] a sham.

P. Areeda, *supra*, at 5. AT&T's conduct was not undertaken in the hope of influencing governmental action, but in the hope of delaying it.³⁹ See *Landmarks Holding Corp. v. Berman, supra*. As such, it amounted to the sort of abuse of the administrative process that falls within the *Noerr-Pennington* [**76] sham exception. The jury's determination to that effect is sustainable if the instructions were correct.

3. The Trial Court's Noerr-Pennington Instructions

AT&T challenges the *Noerr-Pennington* instructions on two grounds. [**77] First, AT&T claims that the instructions entitled "Opposition to Registration" and "[First Amendment](#) Protection and the Bad Faith Exception" had the effect when taken together of denying it any *Noerr-Pennington* defense because the jury could have premised its verdict merely on anticompetitive intent. Second, AT&T argues that the [First Amendment](#) values that *Noerr-Pennington* reflects require the use of a "clear and convincing" rather than a "preponderance" evidentiary standard.

AT&T's first point can be answered by reviewing the jury instructions, as we must, in their totality. See, e.g., *Norfleet v. Isthmian Lines, Inc.*, 355 F.2d 359, 362-63 (2d Cir. 1966). AT&T maintains that the instructions were flawed because they established a "good faith/bad faith" dichotomy that conditioned the availability of the *Noerr-Pennington* defense on good faith, and equated bad faith with anticompetitive intent. The instructions that AT&T objects to are set forth in the margin.⁴⁰ [HN7](#)[↑] Because we must assume that the jury discharged its obligation to

³⁹ Professor, now Circuit Judge, Bork has suggested that the [antitrust law](#) must develop standards to address the anticompetitive effects of litigation and administrative actions instituted solely to harass and injure a competitor's rivals. See R. Bork, *The Antitrust Paradox* 357 (1978). The need to ensure that the regulatory processes not be used to thwart competition seems all the more pressing where, as here, there is serious doubt regarding whether the process can function at all without the regulated entity's full cooperation. See *United States v. American Telephone & Telegraph Co.*, 524 F. Supp. at 1359 (former Chief of FCC's Common Carrier Bureau testified at trial that FCC may be "incapable of effectively regulating a company of AT&T's size, complexity, and power").

⁴⁰ The court's charge on the issue of "Opposition to Registration" -- before the *Noerr-Pennington* defense was mentioned -- was as follows:

You have also heard about Bell's opposition to proposals made before the FCC that the PCA tariffs be replaced by various programs of certifying or registering equipment with the FCC. The question for your decision is whether Bell's opposition was interposed in bad faith for the purpose of excluding competition or whether Bell took this position because it believed that the registration proposals being made were not in the public interest and would not provide sufficient protection to Bell System employees, customers and the telephone network.

AT&T Brief at 63. AT&T correctly argues that a "purpose of excluding competition" does not suffice to create antitrust liability. The charge went on to say:

Many of these actions, if successful, might be harmful to a competitor. Nevertheless, the [First Amendment](#) guarantees that persons or corporations may participate in good faith efforts to influence the passage or enforcement of laws or government regulations or to influence public officials regardless of whether the results of the government action they seek would be harmful to competition.

apply the law in accordance with the trial judge's instructions, our review is limited to whether the instructions misled the jury as to [**78] the applicable law. AT&T's brief fails to consider, as we must on review, that portion of the charge where the court explicated what it meant by good faith and bad faith. That portion follows:

You are also instructed that [HN8](#)[↑] petitioning an administrative agency such as the [*813] FCC or seeking review in the courts may result in delays because administrative or judicial procedures are often time consuming. Creating such delays does not constitute willful exercise of monopoly power as long as the petition or application to the courts is based on a good faith interest in influencing the agency or obtaining a court ruling.

However, there is an exception to the general rule that efforts to influence public officials do not violate the antitrust laws, and that is the so-called sham or bad faith exception. If a campaign, ostensibly directed toward influencing government action, is a mere sham or artifice to cover what is essentially nothing more than an attempt to smother competition by a pattern of knowingly filing baseless claims or making misrepresentations to administrative agencies in a way designed to deprive competitors of meaningful access to those agencies, the [First Amendment](#) [**79] protections are lost and the Sherman Act applies.

To be sure, the contours of the sham exception are far from clear; the courts have themselves had difficulty defining the doctrine. See Fischel, *Antitrust Liability for Attempts to Influence Government Action: The Basis and Limits of the Noerr-Pennington Doctrine*, 45 U. Chi. L. Rev. 80, 104 (1977). The instruction here apprised the jury that "creating delays" did not constitute an antitrust offense regardless of anticompetitive intent. While the instruction might have been more explicit as to the nature of bad faith, it accurately, if in general terms, tracked the Supreme Court's explication of the sham exception in *California Motor Transport*, and comported in its essentials with our discussion of the sham exception, *supra*. We cannot agree that the instructions were erroneous when viewed as a whole.

[**80] The trial court judge did not charge the jury that the sham exception had to be demonstrated by "clear and convincing" evidence. While AT&T cites libel, patent, and fraud cases in support of its argument, it points to no authority holding that the sham exception should be subject to the higher standard of clear and convincing evidence.⁴¹ AT&T argues that the standard should be required in cases such as this to avoid a chilling effect on speech. We recognize that the standard of proof may well be a substantive element of a claim or defense, see, e.g., [Palmer v. Hoffman](#), 318 U.S. 109, 117, 87 L. Ed. 645, 63 S. Ct. 477 (1943), but by requiring a plaintiff to prove

Id. at 64. AT&T argues that the jury was not given a definition of "good faith," but "bad faith" had just been defined as meaning "for the purpose of excluding competition."

⁴¹ The libel cases include [New York Times Co. v. Sullivan](#), 376 U.S. 254, 285-86, 11 L. Ed. 2d 686, 84 S. Ct. 710 (1964) and [Yiamouyiannis v. Consumers Union of United States, Inc.](#), 619 F.2d 932, 940 (2d Cir.), cert. denied, 449 U.S. 839, 66 L. Ed. 2d 46, 101 S. Ct. 117 (1980).

The fraud and civil perjury cases include: [Clark v. John Lamula Investors, Inc.](#), 583 F.2d 594, 597 n.2, 600 (2d Cir. 1978) (securities fraud); [Geller v. Commissioner of Internal Revenue](#), 556 F.2d 687, 690 (2d Cir. 1977) (income tax fraud); [McDonnell v. American Leduc Petroleums, Ltd.](#), 456 F.2d 1170, 1176 (2d Cir. 1972) (fraud under New York and California law); [Barr Rubber Products Co. v. Sun Rubber Co.](#), 425 F.2d 1114, 1120-21 (2d Cir.), cert. denied, 400 U.S. 878, 27 L. Ed. 2d 115, 91 S. Ct. 118 (1970) (civil perjury). See also 86 Harv. L. Rev., *supra* note 37, at 724-25 (recommending clear and convincing evidence standard for sham exception claims).

The patent case is [Cataphote Corp. v. DeSoto Chemical Coatings, Inc.](#), 450 F.2d 769, 772 (9th Cir. 1971), cert. denied, 408 U.S. 929, 92 S. Ct. 2497, 33 L. Ed. 2d 341 (1972); see also [Handgards, Inc. v. Ethicon, Inc.](#), 601 F.2d 986, 996 (9th Cir. 1979), cert. denied, 444 U.S. 1025, 62 L. Ed. 2d 659, 100 S. Ct. 688, 100 S. Ct. 689 (1980) (allegation in antitrust case that patentee's infringement suit prosecuted with knowledge of patent invalidity).

We take due note that the charge in [MCI Communications Corp. v. American Tel. & Tel. Co.](#), 708 F.2d 1081 (7th Cir. 1983), was put in terms of "clear and convincing" proof.

that a defendant's conduct was a sham, the Supreme Court had already struck a rough balance between the competing First Amendment and antitrust interests. And as the Court pointed out in *United States v. Topco Associates, Inc., 405 U.S. 596, 610, 31 L. Ed. 2d 515, 92 S. Ct. 1126 (1972)*, the antitrust laws are as important to the preservation of economic freedom and the free enterprise system as the Bill of Rights is to the protection of our fundamental personal freedoms. We see Hng[¹] no reason to impose any [*814] [**81] higher burden of proof on the antitrust plaintiff asserting sham than would ordinarily be applicable in any civil issue. See *Herman & MacLean v. Huddleston, 459 U.S. 375, 390, 103 S. Ct. 683, 74 L. Ed. 2d 548, 51 U.S.L.W. 4099, 4103 (1983)* (preponderance of the evidence standard applicable in securities fraud action under Section 10(b), noting that the interests of defendants in such cases do not differ from the interests of defendants "sued for violations of . . . antitrust . . . laws, for which proof by a preponderance of the evidence suffices").

[**82] D. Sufficiency of Proof

Our discussion above indicates that we believe there was ample evidence to justify the jury's findings regarding the filing of the interface tariff and opposition to certification. We also conclude, after reviewing the evidence in the light most favorable to Litton, that the jury could reasonably have found that AT&T's conduct in connection with the supply and installation of PCAs, the sale of inside wiring, and "cut-over" from AT&T to Litton equipment was predatory.

AT&T argues that Litton's evidence as to delays in the supply and installation of PCAs consisted of no more than "some vendor and customer complaints." But Litton's evidence, some of which we summarize here, tended to show that PCA shortages were chronic, that they were intentionally maintained or "contrived," and that AT&T misled the FCC with respect to the magnitude of this problem. For example, Litton introduced a 1970 memorandum written by an AT&T vice president stating that AT&T had

repeatedly been contacted by the FCC staff and outside attorneys with respect to connecting arrangements not being available. So far we have been able to placate the situations with explanations [**83] of "a possible misunderstanding or only a temporary delay" and assurances that no serious supply problems exist -- followed of course by a four alarm fire approach to meet the particular demand. It is doubtful that this approach will continue to avoid formal action of some sort by the FCC.

The shortages nevertheless continued, as evidenced by complaints received by AT&T from its own local affiliates.

In June of 1972, for example, Illinois Bell, in a telex to AT&T headquarters in New York, explained that because "so many defective units [KS 20721 couplers] have been received we have difficulty in providing this interface unit and meeting customer due dates." And, in October of 1972, an Ohio Bell executive stated in a letter to Ohio Bell's Assistant Vice President that "An increasing number of vendors have complained bitterly because of our failure to supply this equipment. In many recent cases we have been unable to even quote any kind of a realistic delivery date." This same letter posed a question that no doubt puzzled the jury:

How can we continue to insist on the use of an interconnect device when we are unable to provide such a device? It seems to me that these problems [**84] must be given the highest level of attention at Ohio Bell, Western Electric and A.T. & T. before we end up with a large-scale customer revolt and potential legal action for restraint of trade.

AT&T's response to this letter confirmed the existence of a "critical supply situation . . . throughout the system," which resulted in 76% of customers' PCA requests in New England being "missed" by an average of 10 days, although AT&T had an average lead-time of 24 days to fill the requests. The shortages were discussed at a June 14, 1973 meeting of the Bell Interconnecting Equipment Coordinating Committee and the minutes of the meeting disclose recognition of "some very serious service complaints" and "extreme service problems" with certain PCA hardware.

We believe that the evidence thus revealed more than isolated "customer and vendor" complaints; Litton's evidence tended to show that AT&T was aware of PCA supply problems and failed to take the steps necessary to correct them. In view of AT&T's own policy of requiring interconnection [*815] only through a PCA, we do not think it was

unreasonable for the jury to conclude that these shortages were orchestrated to frustrate [**85] Litton and other terminal equipment competitors.

The jury could also reasonably have inferred from the evidence introduced by Litton that some of AT&T's practices in connection with "inside wiring" -- i.e., wiring owned by AT&T but located on or in a customer's premises -- were anticompetitive. AT&T professed its willingness to sell the wiring if a customer wanted to "cut over" from AT&T to a competitor's equipment, but Litton's evidence tended to show, first, that AT&T would often negotiate in bad faith by quoting unreasonably high prices for the wiring and, second, that in "many, many instances" AT&T chopped this wiring off flush with a customer's walls. Indeed, a South Central Bell general manager noted at one point that the practice of destroying inside wiring was "unreasonable and could very well be interpreted as . . . vindictive." That is the conclusion the jury reached and we see no reason to overturn it.⁴²

[**86] Finally, AT&T argues that Litton failed to introduce sufficient evidence to justify the jury's conclusion that AT&T's delay in making "cutovers" -- the final step involved in switching from AT&T to non-AT&T equipment -- was anticompetitive. The record indicates, however, that Litton introduced, *inter alia*, testimony from representatives of various terminal equipment competitors to the effect that cutover delays frustrated their attempts to install equipment on schedule. The jury could have concluded from this and other evidence of intransigent cutover practices that AT&T's conduct injured Litton and other terminal equipment competitors.⁴³

⁴² AT&T argues that the only evidence was that on three isolated occasions one operating company, Southwestern Bell, chose not to sell its cable to Litton but that even as to these instances there was no showing of bad faith on Southwestern Bell's part; again the evidence is argued to be insufficient under *Berkey*. But the former Litton BTS Vice President of Operations said:

In installations, we would find that when a customer was having the Bell system removed, the Bell folks would just come in like with an axe and just chop up the multipin connector wiring at walls. Gosh, darndest thing I ever saw. Just couldn't believe people would do that. That particular thing we tended to get over over a period of time and we ended up up [sic] some coordination meetings to try get the Bell folks to leave the premises on a reasonable basis as opposed to one of appearing to be mad.

He added that:

A. It wasn't one customer. It was many many installations where that would occur and I just do not remember.

Q. Did you ever observe that situation?

A. Yes. Because I couldn't believe it, so I went and looked myself.

Q. How often did you do that?

A. Twice.

Q. When you referred to damage, is it the same damage at each customer's premises?

A. The two that I observed was the same damage and that was just going along and cutting the wires at the walls.

Q. When you say cutting the wires at the walls, can you be a bit more specific about the nature of the damage?

A. Yes. There are pairs of wires that are grouped together in cables and are wrapped in some plastic covering that come to a key phone or single phone or whatever, different size connectors. They would be chopped right off at the wall so you had no capability of coming to those wires with your connectors and so forth, even though you might be purchasing a cable from them.

⁴³ AT&T points to [*Northeastern Telephone Co. v. American Telephone & Telegraph Co.*, 651 F.2d 76, 94 \(2d Cir. 1981\)](#), cert. denied, 455 U.S. 943, 102 S. Ct. 1438, 71 L. Ed. 2d 654 (1982), where we set aside a jury verdict because the plaintiff "introduce[d] [no] evidence whatsoever" that an AT&T affiliate provided poor service to the plaintiff's customers *after* the purchase and installation of the plaintiff's terminal equipment. But Litton's claim is that shortages, missed cutover dates, etc., prevented it both from satisfying existing customers and luring prospective customers because it could not "cutover" on schedule. Unlike *Northeastern*, there is evidence in this case to support Litton's claim that the problems associated with delay were real.

[**87] AT&T takes the position that these practices amounted to no more than *de minimis* injury under *Berkey Photo Inc., 603 F.2d at 288-89*; see also *Federal Prescription Service Inc. v. American Pharmaceutical Ass'n, 214 U.S. App. D.C. 76, 663 F.2d 253, 268-71 (D.C. Cir. 1981)*, cert. denied, 455 U.S. 928, 102 S. Ct. 1293, 71 L. Ed. 2d 472, 50 U.S.L.W. 3587 (1982). We disagree. AT&T's *seriatim* attacks upon the jury's findings invite us to approach Litton's proof as if this case involved "completely separate and unrelated lawsuits tightly compartmentalizing the various factual components and wiping the slate clean after scrutiny of each." *Continental Ore Co., 370 U.S. at 698-99*. But on the basis of any one of these practices -- all of which were supported by sufficient evidence -- the jury could have reasonably concluded that Litton suffered competitive injury.⁴⁴ The jury's finding that this conduct was predatory, i.e., undertaken with an anticompetitive intent in an attempt to injure Litton, is all the more reasonable given the synergistic nature of these practices in relation to Litton's primary claim that it was excluded from the terminal equipment [**88] market. AT&T argues at length that Litton failed to prove that the shortages, delays, and inside wiring episodes were deliberate, but this ignores the fact that "circumstances in which intent can be inferred other than from conduct which is itself exclusionary will no doubt be rare The relationship between intent and conduct is intimate: thought enlivens the deed; it can also be inferred from the deed." L. Sullivan, Antitrust § 39, at 105 (1977).

E. Evidentiary Rulings

AT&T challenges several of the trial court's rulings on the admissibility of evidence, arguing that the exclusion or limited admission of some evidence prevented it from proving that Litton chose [**89] to leave or was driven from the terminal equipment market because of adverse publicity resulting from a bribery scandal and other corrupt practices. AT&T also maintains that the trial court judge erred in admitting some evidence that was unduly prejudicial to AT&T while excluding similar evidence favorable to AT&T on the issue of the reasonableness of the PCA requirement. The cumulative effect of these errors, AT&T argues, requires reversal. We deal with these arguments in the order advanced by AT&T.

1. Exclusion of the Roberts Notes

In 1973 Litton conducted an internal investigation of possible employee misconduct related to the sale of Litton terminal equipment. A Litton attorney, Norman Roberts, made notes of his interviews with various Litton employees during the course of this investigation. AT&T argues that these notes constitute a "devastating admission" against Litton insofar as they reveal that Litton employees gave potential customers "calculators, girls and anything else" to make a sale, that "sales morale and performance [were] . . . way down," and that "skimming" and "funny deals" were commonplace. AT&T claims that the notes were admissible under *Federal Rule [**901 of Evidence 801(d)(2) (D)]*, which *HN10* excludes from hearsay "admission[s] by [a] party-opponent" in the form of statements made by a party's "agent or servant concerning a matter within the scope of his agency or employment, made during the existence of the relationship."

AT&T's claim that Roberts' notes -- which summarized what various Litton employees recounted to him about wrongdoing on the part of other Litton employees -- were admissible because the multiple levels of hearsay were all made in the course and scope of employment, is not persuasive. See *Northern Oil Co. v. Socony Mobil Oil Co., 347 F.2d 81, 85 (2d Cir. 1965)*. The fact that Roberts summarized what some Litton employees said about other employees in the course of his investigation does not bring the events he summarized within the "scope of his agency or employment" under 801(d) (2) (D). See J. Weinstein, 4 Evidence 801-164 (1981) ("Gossip does not become reliable merely because it is heard in an office rather than a home.") The hearsay which he summarized may well have been [*817] inadmissible even if testified to by the employees interviewed. See *Oreck Corp. v. Whirlpool Corp., 639 F.2d 75, [**91 80 n.3 (2d Cir. 1980)]*, cert. denied, 454 U.S. 1083, 70 L. Ed. 2d 618, 102 S. Ct. 639 (1981). In any event, AT&T made no attempt at trial to lay the necessary foundation for the admission of the notes under 801(d) (2) (D) or any other rule, and simply argues here that the terms of 801(d) (2) (D) were satisfied.

⁴⁴ See *Northeastern Telephone Co., 651 F.2d at 95 n.28*, citing *California Computer Products, Inc. v. International Business Machines Corp., 613 F.2d 727 (9th Cir. 1979)* (holding that no synergistic effect arises from individual allegedly anticompetitive practices where proof in numerous critical aspects is utterly lacking).

We decline to hold that the trial court committed reversible error by failing to admit the notes, either for their truth or otherwise, particularly in view of the fact that AT&T could have overcome the trial court's objections by examining Roberts himself or those Litton employees he interviewed. See *Litton Systems, Inc. v. AT&T Co.*, 91 F.R.D. 574, 578 (S.D.N.Y. 1981). We note that while Judge Kearse disagrees with our hearsay analysis, she agrees that there was no reversible error.

2. *The San Mateo Bribery Incident*

In November of 1973 four of Litton's executives in its terminal equipment division were indicted for paying bribes to an employee of the state college system in San Mateo, California. The trial court permitted AT&T to prove that the officials were indicted and subsequently discharged, but excluded evidence of the bribery under *Federal Rule of Evidence* [**921 403](#) because of its emotional and prejudicial content. We note that the trial court at one point indicated that it would consider admitting the bribery evidence if AT&T would allow Litton to offer proof that AT&T had bribed public officials; AT&T declined the offer. Plainly the trial court did not abuse its discretion in excluding this evidence.

3. *The Mellor Memorandum*

AT&T argues that the trial court erred in not admitting for its truth a memorandum taken by James Mellor, a Litton senior vice-president, that summarized Mellor's conversation with Leonard Mende, one of the Litton BTS (Business Telephone Systems) executives who had been discharged as a result of the San Mateo incident. Mellor's notes of this conversation indicate that he told the discharged executive that the San Mateo scandal had "screwed up a very promising business activity." The trial court admitted the memorandum for the purpose of showing what Mellor had said to Mende, but refused to admit the memorandum for its truth -- i.e., as proof that the San Mateo scandal caused Litton to leave the terminal equipment market. AT&T makes the same argument under 801(d) (2) (D) with respect to this evidence that it [**93](#) makes with respect to the Roberts notes, and the reservations we expressed earlier are applicable here. In any event, Mellor himself testified that the contents of the memorandum accurately summarized what he said, and the memorandum was examined by the jury and quoted in AT&T's opening and closing arguments. We therefore cannot see how AT&T was prejudiced by the trial court's decision not to admit the memorandum for its truth.

4. *The Selph Deposition*

The trial court granted AT&T special leave to take the deposition of a Litton employee who had been discharged in connection with the San Mateo incident. In granting AT&T's request to take this deposition, the trial court limited discovery to those matters made relevant as a result of Litton's eleventh-hour disclosure of the Roberts notes. AT&T argues that some of Selph's deposition testimony that the PCA device had no effect on Litton's sales should have been admitted, particularly in view of the fact that the trial court allowed Litton to introduce deposition testimony outside the scope of a similar special leave. We attribute this difference in treatment to a difference in the content of the testimony. In granting special [**94](#) leave to take the Selph deposition the trial court imposed certain limitations that AT&T ignored; the discretion involved in reopening discovery could be cast aside if parties could ignore such limitations with impunity. In any event, the cumulative nature of the evidence excluded belies any claim that AT&T was prejudiced.

5. *Admission of Hoxie's Testimony*

AT&T contrasts the trial court's exclusion or limited admission of all of the [*818](#) above evidence with the admission of testimony by Lowell Hoxie, a former Litton vice president in charge of the terminal equipment division's marketing and administration group. Hoxie testified that problems associated with defective PCAs, short supply, and missed delivery dates imposed "incredible cost[s]" on Litton, the effects of which were "devastating" to Litton's efforts to establish itself in the terminal equipment market. The trial court rejected the argument that this testimony was inadmissible as hearsay because, although Hoxie testified in part from recollection of oral reports made by subordinates, much of his testimony was based on first hand knowledge and observation or reports made in the ordinary course of business. [**95](#) The testimony was therefore admitted under *Federal Rule of Evidence* [803\(24\)](#), which [HN11](#) provides for the admission of hearsay statements not specifically enumerated in *Rule 803*.

The trial court found that the testimony had sufficient "circumstantial guarantees of trustworthiness," [Fed. R. Evid. 803\(24\)](#), to justify its admission because the reports, even if oral, were made in the ordinary course of business. The court also explained that it was doing so to avoid the "expensive and very inefficient" alternative of "call[ing] enough witnesses to furnish non-hearsay substantiation of [the] summary" offered by Hoxie. Thus, although the trustworthiness of recollections of the sort Hoxie's testimony contained is open to question, see [Bowman v. Kaufman, 387 F.2d 582, 586-87 \(2d Cir. 1967\)](#), the potential hearsay taint of Hoxie's testimony is not sufficient to justify reversal.

6. Evidence Relating to the Reasonableness of the Interface Tariffs and AT&T's Opposition to Certification

AT&T objects to the trial court's treatment of three other items of evidence, all of which were offered by either AT&T or Litton as bearing on the reasonableness of the interface tariffs or AT&T's opposition [\[**96\]](#) to certification standards. The first ruling to which AT&T takes exception is the admission of various FCC decisions that described AT&T's tariffs as "unreasonable," "illegal," "discriminatory," or "unlawful." Although the trial court excised the words "unlawful" and "illegal" at AT&T's request, it refused to remove portions stating, for example, that the interface tariff was "unnecessarily restrictive" and an "unjust and unreasonable discrimination." According to AT&T, the different meanings of "reasonableness" under the Sherman Act and the Communications Act justified its request to have these words removed and the jury was unavoidably prejudiced by the trial court's failure to do so.

We agree with Litton that these decisions were central both to Litton's claim that the PCA device was unnecessary and Litton's rebuttal of AT&T's defense that the interface tariff was an attempt to comply with previous FCC rulings. The order excluding all portions of the FCC rulings stating that the tariffs were "unlawful" or "illegal" gave AT&T all to which it was entitled because the FCC continually held after *Hush-A-Phone* that AT&T's practices were not necessary to protect the telephone system. [\[**97\]](#) The findings thus directly undercut the predicate of AT&T's argument that the PCA requirement was "reasonable" under the antitrust laws because it was an attempt to follow regulatory policy. The findings were properly admitted under [Federal Rule of Evidence 803\(8\) \(C\)](#) as factual findings resulting from an investigation made pursuant to authority granted by law.⁴⁵ Moreover, the court's charge made it clear to the jury that the term "reasonable" as used in the rulings did not necessarily [\[*819\]](#) signify the same thing as "reasonableness" under the antitrust laws and were therefore not binding.

[\[**98\]](#) AT&T's second objection contrasts the admission of the above FCC decisions with the trial court's exclusion of a 1969 New York State Public Service Commission decision upholding the interface as a reasonable means of protecting the network against harm. The trial court excluded the 1969 decision upon its own motion on the grounds that the monthly charge for the interface considered there was fifty cents, as opposed to the average monthly charge of over six dollars for the interface device challenged in this case. AT&T argues that it was deprived of an opportunity to prove to the jury that AT&T was not alone in its belief that the interface device was absolutely necessary to protect the telephone system from harm. Cf. [Mid-Texas Communications Systems, Inc. v. American Telephone & Telegraph Co., 615 F.2d 1372, 1390](#) (5th Cir.), cert. denied, 449 U.S. 912, 101 S. Ct. 286, 66 L. Ed. 2d 140 (1980).

We view this evidence as arguably probative of AT&T's position, and find it difficult to justify the exclusion of this decision in light of the admission of the various FCC rulings. Although there is a considerable difference in cost between the two interface devices, this goes more [\[**99\]](#) to the weight to be accorded the evidence than its admissibility; any confusion or prejudice probably could have been avoided by appropriate instructions. But we are also mindful of the fact that this was a complicated and extensive trial, involving four and one-half years of pretrial proceedings, five months of trial, more than 18,000 pages of testimony and 945 exhibits. If a jury trial of this size

⁴⁵ AT&T cites to our decision in [City of New York v. Pullman Inc., 662 F.2d 910 \(2d Cir. 1981\)](#) as support for the proposition that a finding made by a government agency for one purpose should be excluded from other proceedings considering the same or similar facts because of the undue weight a jury might accord such findings. In *City of New York*, however, we affirmed the trial court's exclusion of an interim staff report of a government agency because the report was "by its own terms, . . . not the final report or finding of a government agency within the meaning of [Fed. R. Evid. 803(8) (C)]." *Id. at 914*. In the alternative, we noted that the trial court judge had not abused his discretion in deciding that admission of the report was inadvisable under [Fed. R. Evid. 403](#). *Id. at 915*. Here, of course, there is no question that the FCC decisions are within the scope of 803(8) (C).

and complexity is to be had at all, the trial court must have the discretion to limit the evidence at some point. We cannot find that this exclusion amounted to prejudicial error.

AT&T's final objection to the trial court's evidentiary rulings involves a 1976 report prepared by a former member of the PBX Advisory Committee. The report indicated, *inter alia*, that AT&T's competitors viewed some of its practices in connection with the PCA requirement and general pricing scheme as anticompetitive. The trial court recognized that the report was hearsay, and therefore refused to admit it for its truth, but admitted the evidence for the limited purpose of showing what was reported to AT&T. But by 1976 Litton had left the terminal equipment market and the PBX Advisory Committee had **[**100]** completed its work. We therefore cannot see how the report bears on the only issue for which it could have been relevant, viz., whether AT&T knew that the Committee felt that AT&T's opposition to certification was in bad faith. Thus the ruling was erroneous, and the possible prejudicial effect -- the report stated that AT&T's competitors felt that "Bell pricing has virtually killed the Interconnect market" -- is troubling. We view the trial court's ruling as unfortunate, but do not believe that this ruling, or any of the other rulings, denied AT&T a fair trial even when considered collectively. [Fed. R. Evid. 103\(a\)](#); [Fed. R. Civ. P. 61](#). See, e.g., [McKinnon v. Skil Corp.](#), *638 F.2d 270, 276 (1st Cir. 1981)* (ruling, if erroneous, harmless as not affecting "substantial rights").

F. The Verdict for Litton as Customer

In addition to the injuries it sustained as AT&T's competitor, Litton alleged that it was entitled to recover \$491,778.57 spent for the installation and rental of AT&T interfaces on its own internal telephone equipment for the eleven year period running from January 1, 1969 to the end of 1979. The jury awarded Litton exactly six-elevenths of this amount, **[**101]** \$268,243, possibly reflected in the jury's initial determination that AT&T opposed certification in bad faith from and after 1973 until the end of 1978. We do not, for reasons stated in our discussion of Litton's claims as a competitor, believe that this verdict should be overturned **[*820]** on *Noerr-Pennington* grounds. But AT&T offers us three other reasons -- one factual and two legal -- to overturn the verdict. We reject each of them in turn.

AT&T's first argument goes to the sufficiency of the evidence supporting the jury's verdict.⁴⁶ Specifically, AT&T complains that the evidence was insufficient because Litton failed to itemize its expenses for the charges on an annual basis. AT&T waived this objection by failing to challenge the figures or request that the witness presenting them break them down. [Fed. R. Civ. P. 46](#). Taking another tack, AT&T argues that Litton should have mitigated its damages by removing the interface devices as soon as the tariff requiring them was invalidated.⁴⁷ Aside from being inconsistent with its earlier argument that the jury apportioned the damages without evidentiary support, this argument cannot succeed because Litton's failure to **[**102]** remove the devices is readily explicable on the grounds that the expense of removal -- some of the devices were permanently wired into the equipment -- might have exceeded the savings resulting from removal.

[103]** AT&T's second argument against the verdict for Litton as customer relies on the "filed tariff" doctrine announced in [Keogh v. Chicago & Northwestern Railway Co.](#), *260 U.S. 156, 67 L. Ed. 183, 43 S. Ct. 47 (1922)*. There the Supreme Court held that a shipper could not recover under the antitrust laws for injuries sustained as a result of allegedly unreasonable rates that had been filed with and approved by the Interstate Commerce

⁴⁶ AT&T argues that the jury had no rational basis for apportioning damages as it did because "the vast majority" of PCA charges could have occurred in years the jury thought it had excluded from consideration. Brief at 125 & n.117. This could be correct but in the absence of a breakdown we or the jury might just as easily have assumed that the vast majority of charges could have occurred in the six years 1973-78 which AT&T says were the years utilized by the jury. In any event in light of the jury's later finding that the PCA tariffs were filed in bad faith the ultimate award seems to err on the low side, if any. We assume that AT&T does not want a retrial limited to this issue.

⁴⁷ An antitrust plaintiff has a duty to mitigate damages. See [Borger v. Yamaha Int'l Corp.](#), *625 F.2d 390, 398-99 (2d Cir. 1980)*; [Triebwasser & Katz v. American Telephone & Telegraph Co.](#), *535 F.2d 1356, 1360 (2d Cir. 1976)*. But if AT&T is correct that the jury's award reflects a six-year period running only from the beginning of 1973 until the end of 1978, when the FCC order setting aside the last protective circuitry requirement became final, the damage award was fair. Moreover, failing to mitigate was an affirmative defense which AT&T omitted either to plead or prove.

Commission. We have recently held, however, that [HN12](#)[¹²] the *Keogh* doctrine is inapplicable to ultimately "disapproved tariffs . . . when . . . the regulatory agency expressly refuses to commit itself pending investigation." *City of Groton v. Connecticut Light & Power Co.*, 662 F.2d 921, 929 (2d Cir. 1981). In reaching this conclusion we relied, in part, upon our decision in *Northeastern Telephone Co. v. American Telephone & Telegraph Co.*, 651 F.2d at 83-84, which held that a tariff filing does not immunize a regulated entity from antitrust scrutiny, and in part on the lower court's opinion in this case, *Litton Systems, Inc. v. American Telephone & Telegraph Co.*, 487 F. Supp. 942, 951 (S.D.N.Y. 1980). See *City of Groton, supra*, at 931. Unless [**104] otherwise advised by higher authority, we do not intend to disavow *City of Groton* or the import of our discussion on the interplay between regulation and antitrust immunity in *Northeastern Telephone Co.*

This case can be distinguished from *Keogh* and decisions holding the filed rate doctrine applicable, see *McLeran v. El Paso Natural Gas Co.*, 357 F. Supp. 329, 331-32 (S.D. Tex. 1972), aff'd without opinion, 491 F.2d 1405 (5th Cir. 1974); *City of Newark v. Delmarva Power & Light Co.*, 467 F. Supp. 763, 769-771 (D. Del. 1979), because the issue here is not the reasonableness of the interface tariff rate as compared to some other rate that might have been charged, but instead whether the PCA requirement itself was reasonable, i.e., whether there should have been any charge at all. We thus [⁸²¹] believe that the concerns expressed in *Keogh* involving the possible inconsistency between the operation of the antitrust laws and an independent regulatory scheme designed to fix reasonable rates under a statute are not implicated here. We therefore affirm the lower court's holding with respect to the inapplicability of the *Keogh* doctrine.

AT&T's third and [**105] final argument goes to Litton's standing to seek damages as a customer. Essentially, AT&T argues that when Litton donned a customer's hat it placed itself outside the "target area" that delineates one plaintiff from another in terms of standing to sue. The "target area" doctrine was first enunciated in *Billy Baxter, Inc. v. Coca Cola Co.*, 431 F.2d 183, 187 (2d Cir. 1970), cert. denied, 401 U.S. 923, 91 S. Ct. 877, 27 L. Ed. 2d 826 (1971), where we stated that

[A] [HN13](#)[¹³] plaintiff must allege a causative link to his injury which is "direct" rather than "incidental" or which indicates that his business or property was in the "target area" of the defendant's illegal act . . . These terms do not provide talismanic guides to decision but they do indicate the need to examine the form of violation alleged and the nature of its effect on a plaintiff's own business activities.

Customers are not *per se* outside the target area. See, e.g., *Reiter v. Sonotone Corp.*, 442 U.S. 330, 341, 60 L. Ed. 2d 931, 99 S. Ct. 2326 (1979); *Pfizer, Inc. v. Government of India*, 434 U.S. 308, 313-15, 54 L. Ed. 2d 563, 98 S. Ct. 584 (1978); *Brunswick Corp. v. Pueblo Bowl-O-Mat*, [\[**106\]](#) Inc., 429 U.S. 477, 486 n. 10, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977); *Hanover Shoe, Inc. v. United Shoe Machinery Corp.*, 392 U.S. 481, 494, 20 L. Ed. 2d 1231, 88 S. Ct. 2224 (1968); *Mandeville Island Farms, Inc. v. American Crystal Sugar Co.*, 334 U.S. 219, 236, 92 L. Ed. 1328, 68 S. Ct. 996 (1948). The test is ultimately one of directness. We have thus looked to whether the conspiracy was "aimed" at a particular entity in the area of the economy threatened by anticompetitive conduct, see *Calderone Enterprises Corp. v. United Artists Theatre Circuit, Inc.*, 454 F.2d 1292, 1295 (2d Cir. 1971), cert. denied, 406 U.S. 930, 32 L. Ed. 2d 132, 92 S. Ct. 1776 (1972), and to whether the injury in question was central to the attainment of the anticompetitive objective rather than a mere incident thereto, see *Schwimmer v. Sony Corp.*, 637 F.2d 41, 48-49 (2d Cir. 1980).

The Supreme Court has recently rejected an argument similar to the one AT&T makes here in connection with Section 4 of the Clayton Act. In *Blue Shield of Virginia v. McCready*, 457 U.S. 465, 102 S. Ct. 2540, 73 L. Ed. 2d 149, 50 U.S.L.W. 4723, 4726-27 (1982) the Court recognized standing of a health insurance [**107] subscriber who was denied reimbursement for psychological therapy under a policy term providing reimbursement for such services only if they were rendered by psychotherapists. The petitioners in *McCready* adverted to the "target area" doctrine, citing our decision in *Calderone Enterprises, supra*. In holding that the petitioner's injury was not too remote the Court pointed out that the "target area" test does not "imply that it must have been the purpose of the [defendants] to injure the particular individual claiming damages," [50 U.S.L.W. at 4726 n.15](#) (citing *Schwimmer, supra*).

In this case, as in *McCready*, it avails AT&T little to argue that customers are outside the target area because the anticompetitive effect, if any, of the interface tariff was aimed at terminal equipment manufacturers rather than customers. While an intent to injure a specific entity may well be sufficient to satisfy the target area test, our emphasis in *Schwimmer* on whether the injury was central to the attainment of the anticompetitive objective suggests that this is not always necessary. In this case, the jury found that AT&T imposed the interface tariff in order to maintain its monopoly **[**108]** position in the terminal equipment market. The tariff was "aimed" in the first instance at AT&T's customers in the sense that it applied to every user that chose to interconnect non-AT&T equipment. The tariff was perhaps the only way, and it was **[*822]** certainly the most efficient way, that AT&T could burden competitors seeking to establish themselves in the terminal equipment market. Thus, the injury to Litton as a customer was not remote even if injury to customers was not AT&T's first objective.

G. The Damage Study

AT&T argues that the damage award for Litton as a competitor must be overturned because it was based on a study that incorporated assumptions that were both unsubstantiated in the record and contrary to some of the jury's findings regarding the legality of certain AT&T practices. Litton's damage study, the so-called "Lost Profits Study," was prepared by Richard Hexter, whose substantial qualifications we set forth in the margin.⁴⁸ The two year study used a variety of sources to generate sales, profit, and market share data for Litton's position in the interconnection market from 1972 until 1990.

[109]** We note at the outset that the study was conservative in that it assumed that Litton would forego short term profits to achieve larger market shares and profits from 1979 on. The jury awarded Litton estimated profits up to and including 1978, in keeping with the trial court's instruction that Litton had an obligation to reenter the market when the interface tariff was finally set aside in 1978. We also note preliminarily, in order to provide some perspective on the magnitude of the telephone terminal equipment market and the jury's award, that Litton sustained an out of pocket loss of some \$53 million before it left the market. Although we do not know AT&T's profits, its revenues from the sale of terminal equipment during this period was at one point in excess of \$1.2 billion. By AT&T's own admission, Litton was the "number one formidable adversary" in this market and Hexter testified that if Litton had obtained a market share of even 6.9%, its 1982 profits alone would have been \$37 million. Hexter's Lost Profits Study was typical of its genre in that it was based on an estimate of what Litton's experience would have been in the absence of the interface tariff (the "but for" **[**110]** world) as opposed to Litton's actual experience (the "real world").

As the only evidence introduced in support of Litton's damage claim as a competitor, the Hexter study conveniently provides a single target for the two salvos AT&T fires. The first is that the record fails to support certain assumptions upon which the study is based. The second is that the study incorporated assumptions regarding the absence of pricing and other practices that the jury either did not consider or determined not violative of the antitrust laws. We reject AT&T's argument that Litton's damage study was based on unsupported assumptions or practices held lawful by the jury and affirm the jury's award.

1. Support for the Hexter Study in the Record.

AT&T argues that Hexter's projections -- the heart of the Lost Profits Study -- were based on a host of mutually independent assumptions which find no support in the record. The argument is that the Lost Profits Study should therefore not have been admitted and that the verdict must be set aside. See *Yentsch v. Texaco, Inc.*, 630 F.2d 46, 59 n.19 (2d Cir. 1980); *Herman Schwabe, Inc. v. United Shoe Machinery Corp.*, 297 F.2d 906, 912-13 (2d Cir.),

⁴⁸ Hexter received his MBA from Harvard University and has taught graduate courses in finance and management at Columbia and Yale Universities. Prior to forming his own firm in 1975, Hexter worked for 15 years with Donaldson, Lufkin & Jenrette, an investment banking firm, where he served first as an industry analyst and later as the head of that firm's corporate financing, investment banking and venture capital division. Hexter was also familiar with the telecommunications industry as a result of his service as a board member of Arcata National Corporation and his study of Litton while he was with Donaldson, Lufkin & Jenrette.

[**111] cert. denied, 369 U.S. 865, 8 L. Ed. 2d 85, 82 S. Ct. 1031 (1962). AT&T specifically attacks six "assumptions" of the Hexter study.

The first of these relates to Hexter's assumption that certification standards would have been adopted by early 1973 "but for" AT&T's opposition. AT&T argues that because various other groups also were opposed [*823] to certification, there is no evidence that AT&T's conduct was responsible for the FCC's failure to implement a certification program any earlier than it did. But Litton demonstrated that various AT&T executives admitted that they could have filed standards within a year of the *Carterfone* decision. This supports the premise, as not unreasonable or contrary to common sense, see *Auto West, Inc. v. Peugeot, Inc.*, 434 F.2d 556, 566-67 (2d Cir. 1970), that if AT&T had behaved legally there would have been no interface device after early 1973.⁴⁹ The validity of this premise is the very heart of the jury's verdict that AT&T filed the interface tariff and opposed certification in bad faith.

[**112] The second assumption AT&T challenges concerns the amount of money Litton would have invested in research and development in Hexter's "but for" world. As support, AT&T points to the Business Opportunity Plan Litton prepared before it entered the market. The plan called for an investment of \$1,452,000 in research and development from 1972 to 1976, but Hexter assumed that Litton would have invested \$14,828,000 in the same period. But of course R & D does not immediately bear fruit; by making a higher estimate of Litton's investment than was contemplated in the Business Opportunity Plan the effect was to decrease profits for Litton's early years in the terminal equipment market.⁵⁰ Because the jury only awarded damages for lost profits in the years from 1972 to 1978, to the extent that Hexter's study might have overestimated R & D investment, Litton rather than AT&T was disadvantaged. In any event, AT&T's reference to the Business Opportunity Plan only substitutes one set of assumptions for another. In fact, there was evidence in the record from the author of the Business Opportunity Plan that Litton had intended from the beginning to spend more on R & D than the plan projected. [**113] There was also testimony to the effect that Litton was ready to invest whatever was needed to make the business succeed. The AT&T argument is thus both irrelevant and mistaken.

AT&T's third argument is that Hexter's assumptions about the size of the total terminal equipment market and Litton's share of that market were not supported by the record. But we note that *HN14*[↑] damages in antitrust cases "are rarely susceptible of the kind of concrete, detailed proof of injury which is available in other contexts," *Zenith Radio Corp. v. Hazeltine Research, Inc.*, 395 U.S. 100, 123, 23 L. Ed. 2d 129, 89 S. Ct. 1562 (1969), thus bringing the elasticity of *Story Parchment Co. v. Paterson* [**114] *Parchment Paper Co.*, 282 U.S. 555, 563, 75 L. Ed. 544, 51 S. Ct. 248 (1931), into play. See also *Bigelow v. RKO Radio Pictures, Inc.*, 327 U.S. 251, 264-65, 90 L. Ed. 652, 66 S. Ct. 574 (1946). Accordingly, "where there is a basis on which a jury can reasonably infer significant antitrust injury, [the court] should be very hesitant before determining that damages cannot be awarded." *Berkey Photo, Inc.*, 603 F.2d at 304. Hexter's estimates were based upon a two year analysis of industry data available from Litton, AT&T, and public sources, and a review of more than thirty terminal equipment studies. His study projected that by 1978 AT&T would still have 79 percent of the terminal equipment market with the remaining 21 percent shared by all non-AT&T competitors. [*824] This estimate was conservative as compared to a study done by General Electric, which estimated that by as early as 1975 competitors would divide 30 percent of the market. Hexter's estimate of Litton's share of the total non-AT&T terminal market was also conservative; his estimates never

⁴⁹ AT&T suggests that because other groups also opposed certification standards, Litton must prove a negative -- i.e., that this opposition had nothing to do with Litton's injury -- in order to recover. Although Litton was required to prove a "causal connection" between its injury and AT&T's illegal conduct, it was sufficient to demonstrate that AT&T's conduct was a substantial or materially contributing factor. See, e.g., *Zenith Radio Corp. v. Hazeltine Research, Inc.*, 395 U.S. 100, 114 n. 9, 23 L. Ed. 2d 129, 89 S. Ct. 1562 (1969); *Continental Ore Co. v. Union Carbide & Carbon Corp.*, 370 U.S. 690, 702, 8 L. Ed. 2d 777, 82 S. Ct. 1404 (1962).

⁵⁰ Indeed, under the profit scheme in Hexter's model, Litton sustained losses in 1972 and 1973. We also note that Litton introduced evidence showing that its early performance in the terminal equipment market exceeded the projections contained in the Business Opportunity Plan and that R & D expenditures were increased accordingly.

exceeded 14.5 percent when in fact Litton's actual share before it left the terminal equipment market was at one point [**115] between 23 and 25 percent.

AT&T also complains about Hexter's treatment of Litton's bad debt costs. The argument is that Hexter ignored Litton's actual experience and postulated these costs on the basis of a composite profile based on six well-run, thriving companies in high technology industries. For the limited time Litton sold and leased equipment, its bad debts amounted to almost 12 percent of its sales, while Hexter's model assumed that they would amount to less than 2 percent. According to Hexter's testimony, however, these companies were the six most comparable; three of them were actually in the terminal equipment business. We believe that Hexter's decision to use these estimated bad debt figures was based on the plausible assumption that Litton's actual experience in the start-up phase of its business was not representative of what those costs would be in later years.⁵¹ We note in any event that Hexter's estimates of Litton's profits for the 1972 to 1976 period averaged less than 1 percent of sales, and the estimated profits of only 6.7 percent of sales for 1977 and 1978, was about half of AT&T's profits on its overall sales. We think that AT&T's argument as to Hexter's [**116] treatment of this single cost factor goes only to the weight of the evidence and does not compel rejection of the damage study or overturning the verdict. *Greene v. General Foods Corp.*, 517 F.2d 635, 665 (5th Cir. 1975), cert. denied, 424 U.S. 942, 47 L. Ed. 2d 348, 96 S. Ct. 1409 (1976).

The fifth Hexter assumption that AT&T challenges is that there would be "tough but equal" price competition and that Litton and other terminal equipment companies "would be able to compete profitably against whatever Bell tariffs were filed." AT&T argues that it had an [**117] inherent pricing advantage and that therefore neither Litton nor any other competitor could compete equally. This court has, of course, emphasized that a monopolist may lawfully take advantage of benefits deriving from its size or integration, see *Berkey Photo, Inc.*, 603 F.2d at 276, but AT&T has completely mischaracterized Hexter's assumption. Hexter's assumption concerning "tough but equal competition between the products and the people in the field" related not only to pricing, but included "price and features." His assumption was that "the companies would compete on their ability to sell, properly install and service the equipment."

The assumption that Litton would have been able to compete successfully was borne out by Litton's initial success in the terminal equipment market and evidence tending to indicate that AT&T itself thought that some of Litton's products possessed desirable features and AT&T's equipment did not. Moreover, Hexter testified at trial that his assumptions as to Litton's ability to meet AT&T's competition in the non-price category of product capabilities were in fact conservative insofar as he assumed only that Litton would stay abreast of the competition [**118] after it had established a position in the market.

The sixth and final assumption AT&T challenges is Hexter's inclusion of lost profits attributable to Litton's leasing operation, Litton Industries Credit Corporation (LICC). AT&T argues that the only commodity essential to an equipment leasing business is money and that Litton's leasing [*825] subsidiary was therefore free to lease any other equipment -- telephone terminal equipment or otherwise -- that it could purchase. But in the real world -- for the limited time that Litton was in it -- Litton did lease as well as sell its equipment and the money that LICC used to purchase the equipment from Litton BTS was obtained by financing. Litton introduced evidence to support the proposition that the leasing operation was essential to its market efforts because many customers preferred a leasing arrangement to outright purchase. AT&T's argument that Litton could have leased any other commodity puts the cart before the horse; Litton operated the leasing subsidiary to sell telephone equipment, and not *vice versa*. AT&T's contention that Litton should have leased another product is equivalent to saying that an antitrust plaintiff's [**119] recovery of lost profits is limited by the highest alternative return that a plaintiff could have secured in another line of business entirely. The leasing operation was part of Litton's terminal equipment business and whatever profits Litton's leasing operation lost as a result of AT&T's conduct are therefore properly included in the measure of damages.

⁵¹ That AT&T's objections go to the weight and not the validity of the evidence used in the study seems plain. From the more than one hundred cost, expense, and other factors Hexter used in his study, AT&T attacks one figure -- bad debts as a percentage of sales -- to challenge Hexter's treatment of costs. AT&T's argument that Hexter's model should have somehow reflected the fact that 80 per cent of all new businesses are unsuccessful is frivolous.

In short, the Hexter study is supported by the record and not based on assumptions as to evidence not in the record. The Hexter study is not rendered inadmissible because AT&T would have calculated the damages in a different manner or used other figures. See, e.g., *Eastman Kodak Co. v. Southern Photo Materials Co.*, 273 U.S. 359, 379, 71 L. Ed. 684, 47 S. Ct. 400 (1927); *Ohio-Sealy Mattress Mfg. Co. v. Sealy, Inc.*, 585 F.2d 821, 843 (7th Cir. 1978); *Pacific Coast Agricultural Export Ass'n v. Sunkist Growers, Inc.*, 526 F.2d 1196, 1207 (9th Cir. 1975), cert. denied, 425 U.S. 959, 48 L. Ed. 2d 204, 96 S. Ct. 1741 (1976). Under *Story Parchment, Bigelow v. RKO Radio Pictures*, and *Zenith Radio Corp.*, the verdict must be sustained. Cf. *Shapiro, Bernstein & Co. v. Remington Records, Inc.*, 265 F.2d 263, 272 (2d Cir. 1959).

2. Litton's Damage Study and AT&T Conduct Found Lawful: Causation.

AT&T argues that the Hexter Lost Profits Study assumed the absence of AT&T practices that the jury either did not consider or did not find unlawful, e.g., pricing practices, disparaging advertising, and copying competitors' products. The argument, stated more simply, is that Hexter could not separate the lost profits related to lawful activity from the lost profits related to the unlawful interface and practices associated therewith. AT&T correctly points out that courts have held that [HN15](#)¹⁵ damage studies are inadequate when only some of the conduct complained of is found to be wrongful and the damage study cannot be disaggregated. E.g., *Momand v. Universal Film Exchanges, Inc.*, 172 F.2d 37 (1st Cir. 1948), cert. denied, 336 U.S. 967, 93 L. Ed. 1118, 69 S. Ct. 939 (1949); *ILC Peripherals Leasing Corp. v. IBM Corp.*, 458 F. Supp. 423, 434, 436 (N.D. Cal. 1978), aff'd sub nom. *Memorex Corp. v. IBM Corp.*, 636 F.2d 1188 (9th Cir. 1980) (per curiam), cert. denied, 452 U.S. 972, 69 L. Ed. 2d 983, 101 S. Ct. 3126 (1981).

But the record does not sustain the AT&T position. What Hexter assumed [\[**121\]](#) was that "to the extent that there were any marketing practices either related directly or indirectly to the interface device that may have been harassing or uncooperative," that these practices would not be present in the "but for" world. He made an effort to segregate how much in lost profits related to the interface and to pricing or marketing practices, but rejected it because he did not believe that the results were fruitful. He assumed that Bell would know its own costs and would price toughly but competitively and that companies challenging Bell would, everything else being equal, be able to compete and make a profit. He did not assume that any particular AT&T pricing practices would be eliminated. In short, there is no evidence that Hexter assumed AT&T's prices were illegal or that he made specific assumptions about how individual AT&T pricing practices would have changed. AT&T did not submit contrary evidence. How else lost profits can be proved in an antitrust case, we are not told. In short, there was an evidentiary basis for the jury [\[*826\]](#) award which -- all things considered -- was modest in light of the fact that Litton's lost profits were limited to years [\[**122\]](#) prior to 1978. See generally *Lavender v. Kurn*, 327 U.S. 645, 652-53, 90 L. Ed. 916, 66 S. Ct. 740 (1946), *Eastman Kodak Co. v. Southern Photo Material Co.*, *supra*, at 378-79.

H. Sanctions on Litton for Failure to Provide Discovery

The trial court upheld the magistrate's finding ⁵² that Litton's attorneys had engaged in a "pattern of intentional concealment of evidence" relating to the finder's fee investigation in connection with Litton's San Mateo office; the evidence specifically consisted of certain notes that were in the bottom of the drawer of in-house counsel Roberts until the late summer of 1979. See *Litton Systems, Inc. v. American Telephone & Telegraph Co.*, 90 F.R.D. 410

⁵² Litton argues that Magistrate Sinclair should have been disqualified from presiding over pretrial discovery because some four to seven years prior to this litigation he worked as an associate on a case that eventually resulted in Litton threatening to sue his law firm for malpractice. Our review of the record leads us to agree with Judge Conner that it "is not reasonably conceivable" that Sinclair was likely to be prejudiced against Litton as a result of this earlier involvement. Litton also argues that it was error to assign Magistrate Sinclair the task of conducting an evidentiary hearing on discovery order violations. While we may agree that it would have been better practice to assign this task to another magistrate, Magistrate Sinclair was clearly in the best position to review compliance with the 122 discovery orders issued in this case. The district court reserved to itself the question of what sanctions would be imposed for any discovery violations; Sinclair's review of the record did not exceed the scope of authority granted to magistrates under *28 U.S.C. § 636(e) (5) (Supp. IV 1980)* (magistrate may certify to the district court facts relating to "act or conduct which if committed before a judge . . . would constitute contempt").

(*S.D.N.Y. 1981*). The court concluded that the Roberts notes were material to preparation for AT&T's defense that Litton BTS went out of business as a result of mismanagement, incompetency and dishonesty, rather than as a result of AT&T's antitrust violations. It found other Litton in-house counsel grossly negligent for stating in connection with the taking of Roberts' deposition that there were no other relevant documents, without having reviewed all of Roberts' files; in representing [**123] in an April 24, 1978 brief that the Bruder investigation (after the then new President of Litton BTS, Robert Bruder) in 1973 was directed only at the San Mateo matter when in fact San Mateo was only one of seven instances of suspected misconduct Bruder wanted investigated; in representing in the same brief that all of Roberts' interview notes had been turned over to the San Mateo County District Attorney when in fact the notes of Roberts' interviews with five Litton BTS employees had not been turned over; in representing in another brief filed December 6, 1978 that Litton had produced all "notes and memorandums of interviews of persons not connected with the San Mateo matter;" in failing to turn over to AT&T Roberts' notes following the court's opinion and order of March 26, 1979, which specifically rejected the argument that work product immunity attached to the interview reports; in representing in a letter of July 6, 1979 that Roberts had taken no notes of his interview with Litton BTS employee Hoxie when in fact Hoxie had testified that he had been interviewed. The court also found "willful misconduct" on the part of Litton's general counsel in this litigation; after receipt of [**124] the complete set of Roberts' interview notes in the late summer of 1979, counsel failed to apprise the magistrate, the district court and the defendants of the existence of the additional notes to correct the earlier erroneous assertions that had been made. Even after production of handwritten copies of Roberts' notes of interviews with certain Litton BTS employees, the entire notes were not produced and it was claimed that the notes withheld involved matters "wholly extraneous" to the case, when in fact they also involved notes on the use of fake finders, finders' fees and other matters. But the court refused Bell's requested sanction of dismissal and instead denied Litton recovery of all costs and attorneys' fees to which [**827] it would otherwise be entitled as a matter of law, including those under Section 4 of the Clayton Act, *15 U.S.C. § 15. Litton Systems, Inc. v. American Telephone & Telegraph Co., 91 F.R.D. 574 (S.D.N.Y. 1981)*.

[**125] Needless to say, the parties disagree entirely on the sanctions imposed. AT&T would have the action dismissed and Litton disentitled to recover one dime, a sanction which is within the court's discretion to impose. See *National Hockey League v. Metropolitan Hockey Club, Inc., 427 U.S. 639, 49 L. Ed. 2d 747, 96 S. Ct. 2778 (1976)* (per curiam); *Penthouse International, Ltd. v. Playboy Enterprises Inc., 663 F.2d 371, 386-92 (2d Cir. 1981)*; *Cine Forty-Second Street Theatre Corp. v. Allied Artists Pictures Corp., 602 F.2d 1062 (2d Cir. 1979)*. Litton argues that a penalty of over \$10 million is excessive, especially where counsel supervised the disclosure of three and one half million documents in a professional manner and where the notes were ultimately turned over without any prejudice to AT&T by virtue of their late production because the notes (a) were inadmissible hearsay, (b) contained no specific information, and (c) were unimportant because the whole subject of finders' fees was mentioned only once in the course of an entire five hour summation by AT&T counsel before the jury. Litton also argues that under *Upjohn Co. v. United States, 449 U.S. 383, 66 L. Ed. 2d 584, 101 S. Ct. 677 (1981)*, decided since the district court's sanctions orders were made, the miscellaneous notes were, in fact, privileged and should never have been turned over to AT&T at all, as Litton had consistently urged the magistrate and district court with the agreement of the magistrate in the first instance.⁵³

[**127] We affirm the district court in this regard. *HN16*⁵⁴ The payment of attorneys' fees is a part of the penalty for violating the antitrust laws. *Illinois v. Sangamo Construction Co., 657 F.2d 855, 859-60 (7th Cir. 1981)*; *Farmington Dowel Products Co. v. Forster Manufacturing Co., 421 F.2d 61, 90 (1st Cir. 1969)*. At the same time there is no doubt that attorneys as officers of the court must operate on an honor system, *Litton Systems, Inc. v.*

⁵³ Litton contends that the Roberts notes should have been protected as attorney work product under *Upjohn Co. v. United States, 449 U.S. 383, 66 L. Ed. 2d 584, 101 S. Ct. 677 (1981)* (when house counsel and general counsel interviewed middle-echelon corporate employees regarding possible foreign government bribes, notes of the interviews held privileged as made between attorney and client). But as Litton concedes, Litton Brief at 121, the internal investigation focused on the employees' own possible misconduct; they were not speaking on behalf of the corporation or in furtherance of its business. The "remote possibility" of criminal litigation involving Litton itself was not sufficient to create a work-product immunity, *Garfinkle v. Arcata Nat'l Corp., 64 F.R.D. 688, 690 (S.D.N.Y. 1974)*.

AT&T Co., 90 F.R.D. at 417 (S.D.N.Y. 1981), and must be appropriately disciplined to provide both specific and general deterrence. Roadway Express, Inc. v. Piper, 447 U.S. 752, 763-64, 65 L. Ed. 2d 488, 100 S. Ct. 2455 (1980); National Hockey League v. Metropolitan Hockey Club, Inc., supra 427 U.S. at 643. Federal Rule of Civil Procedure 37(b) HN17 [↑] expressly empowers the court to impose a wide range of specified sanctions for failure to obey court orders. See Roadway Express, Inc., supra, at 763-64; Stanziale v. First National City Bank, 74 F.R.D. 557 (S.D.N.Y. 1977). Given the court's express findings of bad faith, it could also have imposed sanctions on Litton as an exercise of its inherent powers. See Roadway Express, Inc., I**1281 supra, at 764-67. It is immaterial that the notes themselves were ultimately ruled inadmissible on the ground that they were hearsay since they were "reasonably calculated to lead to the discovery of admissible evidence." *Fed. R. Civ. P. 26(b) (1)*. Thus HN18 [↑] where there is repeated defiance of express court orders dismissal may be an appropriate remedy. National Hockey League, supra, 427 U.S. at 640 (refusal for 17 months to answer "crucial" interrogatories); Chira v. Lockheed Aircraft Corp., 634 F.2d 664, 666 (2d Cir. 1980) (doing "absolutely nothing at all" to comply with discovery orders or move the case to trial); Cine Forty-Second Street, supra (refusal for three years, without moving for protective order, to comply with specific orders to answer interrogatories on damages).

[*828] At the same time, HN19 [↑] because dismissal denies the party access to justice, if the party has a valid claim, dismissal would, in the case of attorney misconduct such as gross negligence, amount to a windfall to an adversary to be resorted to only when necessary to preserve the integrity of the judicial system, or in similar "extreme circumstances." Interconex, Inc. v. Federal Maritime I**1291 Commission, 572 F.2d 27, 30 (2d Cir. 1978); Israel Aircraft Industries, Ltd. v. Standard Precision, 559 F.2d 203, 208 (2d Cir. 1977); Independent Productions Corp. v. Loew's Inc., 283 F.2d 730, 733 (2d Cir. 1960). See also Cine Forty-Second Street, 602 F.2d at 1064 (dismissal should "be deployed only in rare situations"). Thus the trial court in imposing sanctions expressed its agreement with the concurring opinion in *Cine Forty-Second Street* that it is difficult to "visit upon the client the sins of counsel, absent client's knowledge, condonation, compliance, or causation." Id. at 1069.

We believe that the trial court, thoroughly familiar with the record, the parties, as well as the efforts, conduct and omissions of counsel, quite correctly struck a wise balance between the conflicting interests in imposing antitrust penalties under the Clayton Act on the one hand and preserving the integrity of the discovery process on the other. Dismissal of the case would be inappropriate in the light of the limited ultimate role that the Roberts notes played. The imposition of the sanction of no award of attorneys' fees and costs is expensive for Litton, to be sure, but [**130] the failures and obstructions of house counsel Roberts, house counsel's conduct at the taking of Roberts' deposition, and the conduct of general counsel, found by the district court in its familiarity with the record and these parties to constitute gross negligence and willful misconduct, led to the sanction. Thus while the damages and hence statutory attorneys' fees in this case are so substantial that in effect Litton (or perhaps to some extent counsel) is being penalized in a sum that on its face is larger than 99 percent of the judgments awarded in any court, it is still only a small fraction of the ultimate recovery here involved. Indeed, where the stakes are as high as they are in this case, the penalties for obstruction of the truth must be impressive if they are to be effective, yet they must not be so drastic or unfair as the penalty of dismissal. Indeed, in such a case, dismissal is so unlikely to be imposed that, absent steep penalties, Rule 37 would be at most a "paper tiger." Rosenberg, *New Philosophy of Sanctions*, in *New Federal Civil Discovery Rules Sourcebook* 140, 141 (W. Treadwell ed. 1972). We believe that the trial court acted soundly and correctly, as well [**131] as wisely, in imposing the sanction. We decline to set it aside on behalf of either party.

In view of our disposition of the case we need not reach the issues on Litton's cross appeal.

Judgment affirmed.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN2 [down] **Price Fixing & Restraints of Trade, Vertical Restraints**

Per se condemnation of apparently vertical restraints may be appropriate where the purpose and effect of those restraints is to limit horizontal competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN3 [down] **Price Fixing & Restraints of Trade, Vertical Restraints**

A manufacturer deliberately withdrawing its product from a distributor that resold it for a price less than its competitor at the request of the competitor, would constitute a per se violation.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Civil Procedure > Appeals > Standards of Review > Clearly Erroneous Review

Civil Procedure > Trials > Separate Trials

Civil Procedure > Appeals > Standards of Review > General Overview

HN4 [down] **Regulated Practices, Market Definition**

Antitrust market findings are findings of fact and, thus, subject to a clearly erroneous standard of review.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN5 [down] **Regulated Practices, Market Definition**

Analysis of whether a particular action restrains competition involves a consideration of its impact within the field of commerce in which the plaintiff was engaged and upon those commercially engaged in competition within it. In determining what the field of competition is, courts are not free to accept whatever market is suggested by the plaintiff, but must examine the commercial realities within the industry in question.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN6 [down] **Regulated Practices, Market Definition**

Defining the market in an antitrust case is actually a two-step process. First, the field in which the plaintiff is engaged must be defined in geographic and distributional terms. Then the product, or product line, that competes in that field must be determined.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN7 **Regulated Practices, Market Definition**

The standard test of the product market in an antitrust case is that it comprises those commodities reasonably interchangeable by consumers for the same purpose. This principle must be applied with reference to the specific market involved.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN8 **Regulated Practices, Market Definition**

In an antitrust case, the cluster approach is appropriate where the product package is significantly different from, and appeals to buyers on a different basis from, the individual products considered separately.

Business & Corporate Law > Distributorships & Franchises > Remedies > General Overview

Contracts Law > Breach > General Overview

Torts > ... > Commercial Interference > Contracts > General Overview

HN9 **Distributorships & Franchises, Remedies**

The elements of a claim of tortious interference are: (1) a valid contract; (2) knowledge of the contract and intent to induce its breach; (3) breach; (4) causation; and (5) damage.

Judges: Merrill, Duniway and Ferguson, Circuit Judges.

Opinion by: FERGUSON

Opinion

[*1013] FERGUSON, Circuit Judge:

These appeals arose out of a common scenario. The plaintiffs in both actions are former distributors of defendant Jhirmack Enterprises, Inc. ("Jhirmack"). When their contractual relationships broke down, the disappointed parties sought solace (and treble damages) from the court, alleging various antitrust violations and related contract and tort claims. Following summary judgment in favor of the defendants, the plaintiffs appeal. We affirm.

FACTS:

Jhirmack manufactures hair care and cosmetic [**2] products which are distributed throughout the United States by licensed distributors. The company was founded in 1968 by Jheri and Irene Redding. From 1972 to 1979 Jhirmack followed a marketing strategy of making its products available through beauty salons, barber shops, beauty schools, barber schools and hair styling establishments (the "professional salon trade" or "PST") rather than through other types of outlets, such as drugstores, department stores and the like ("over-the-counter" or "OTC" outlets). Such a limited outlet strategy is often adopted by new firms who wish to avoid the large advertising costs necessary to break into the heavily competitive OTC market in hair care and beauty products. To this end Jhirmack contracted with several independent distributors, including the three *JBL* plaintiffs and the *Booth* plaintiffs, giving each an exclusive geographic territory and requiring each to "exclusively devote its entire time and use its best efforts to promote and sell" Jhirmack's products to PST outlets in their respective territories. The contracts also provide that Jhirmack "will not appoint another distributor within the territory," and set minimum purchase quotas [**3] for each distributor, based on Jhirmack's estimate of potential PST accounts within the assigned territory.

In 1976-77, Jhirmack received complaints from salon owners and distributors that its products were appearing in OTC outlets. Salons charge premium prices for products sold to their customers and prefer the prestige that flows from carrying products not generally available. It is difficult for PST outlets to maintain either prices or prestige if the product can be found in the local supermarket at a substantially lower price. Many PST outlets will therefore refuse to carry products that are generally available OTC. On receiving complaints Jhirmack took steps to determine which distributors [*1014] were "diverting" its products to OTC outlets and to discourage them from doing so.

In 1978, Jhirmack terminated the *JBL* distributors for refusing to follow Jhirmack's marketing plan and for failing to meet its order quotas for their respective territories. *JBL* filed suit, alleging that the terminations were the result of illegal territorial and customer restrictions, resale price maintenance and illegal tying arrangements in violation of federal antitrust law, and fraud or negligent [**4] misrepresentation in setting minimum purchase quotas.

By 1979, Jhirmack had developed sufficient name recognition to move into the OTC market. After negotiations with several companies, it entered an agreement with International Playtex, Inc. ("Playtex") in October, 1979. In exchange for the exclusive right to distribute Jhirmack shampoos and conditioners to OTC outlets, Playtex agreed to conduct a nationwide marketing campaign, pledging to spend seven million dollars the first year and fifteen percent of annual net sales in succeeding years promoting the products. The contract specifically excluded the professional salon trade, and Jhirmack continued to use independent distributors for its PST distribution.

In November 1979, Jhirmack sent new distributor agreements to its PST distributors, requiring them to recognize Playtex as the exclusive OTC distributor of Jhirmack shampoos and conditioners. *Booth* refused to sign the new agreement and so was terminated by Jhirmack in December 1979. *Booth* then filed suit alleging that the contract between Jhirmack and Playtex violated the Sherman and Clayton Acts and breached its own contract with Jhirmack.

The *JBL* and *Booth* actions [**5] were consolidated for a limited trial on the relevant market and tying issues. [JBL Enterprises v. Jhirmack Enterprises, Inc., 509 F. Supp. 357 \(N.D. Cal. 1981\)](#). The definition of the relevant market was crucial to a determination of whether Jhirmack possessed sufficient market power that its vertical nonprice restrictions could amount to an unreasonable restraint of trade. At the time no claims of *per se* antitrust violation had been made except for the tying claim. The district court concluded that the relevant market was the market for the sale of beauty products (including but not limited to shampoos and conditioners) to PST outlets. Under this definition Jhirmack's market share in 1976-78 was found to be 2.3%, 3.2% and 4.2%, respectively.

Jhirmack then moved for summary judgment against the *JBL* plaintiffs on the ground that in light of Jhirmack's insignificant market share the alleged restraints could not as a matter of law have had the requisite adverse effect on competition. *JBL* sought to avoid dismissal on two theories: (1) that Jhirmack's small market share did not establish lack of market power because it faced no interbrand competition; and (2) that Jhirmack engaged [**6] in price-fixing, a *per se* violation. The court rejected both theories. On the fraud claim the court found that *JBL* had

presented no facts on two essential elements. Summary judgment was therefore entered on all counts. [JBL Enterprises v. Jhirmack Enterprises, Inc., 519 F. Supp. 1084 \(N.D. Cal. 1981\)](#).

In the Booth action, in opposition to defendants' motion for summary judgment, the plaintiffs raised a *per se* claim of price-fixing, alleging that Jhirmack and Playtex conspired to foreclose price competition between Playtex and Booth in the OTC market in violation of Sherman Act § 1. The court granted summary judgment for the defendants on this issue, as well as on a claim against Playtex for inducing breach of contract, and a claim that Booth's termination breached an implied covenant of good faith and fair dealing. Summary judgment was denied on the claim that Playtex's appointment breached the exclusive territory clause of the Booth-Jhirmack contracts, but this claim was later dismissed and that dismissal has not been appealed.

Both sets of plaintiffs appeal the respective grants of summary judgment; the JBL plaintiffs also attack the district court's determination of [**7] the relevant market.

ANALYSIS:

I. The JBL Action

A. Per Se Price-Fixing

In [Continental T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 97 S. Ct. 2549, 53 L. Ed. 2d 568 \(1977\)](#), the Supreme Court, [HN1](#) while it did "not foreclose the possibility that particular applications of vertical restrictions might justify *per se* prohibition," [id. at 58](#), held that in general such nonprice restrictions imposed by a manufacturer on distributors or retailers must be tested under the Rule of Reason. The Court found that, while vertical restrictions reduced intrabrand competition, they had redeeming virtues in that they tended to promote interbrand competition. Dealers would be more likely to expend the effort necessary to promote or service a product if they did not have to worry about other dealers of the same product taking a "free ride" on their efforts. Thus the manufacturer who imposed customer or territorial restrictions would be better able to enter the market as a new competitor or maintain its presence as an existing competitor with other manufacturers.

JBL attempts to place itself outside the reach of *GTE Sylvania* by allegations of a conspiracy among [**8] Jhirmack, other distributors, and salons to eliminate JBL as a competitor so as to reduce price competition. Its attempt fails.

First, the district court found "no evidence . . . that Jhirmack fixed the resale prices for its products or enforced compliance with a particular price schedule." [519 F. Supp. at 1088](#). Nor was there any indication that suggested prices were in fact adhered to. Thus JBL cannot rely on [United States v. Bausch & Lomb Optical Co., 321 U.S. 707, 88 L. Ed. 1024, 64 S. Ct. 805 \(1944\)](#), where nonprice restraints were imposed to facilitate a vertical price-fixing scheme.

Second, JBL was not a competitor of the complaining salons. Rather, the salons were customers of distributors like JBL. Although the salons may have been concerned with maintaining the prices they charged consumers, the price competition they faced was not from JBL but from other retailers, especially OTC outlets that carried competing brands.

Third, the other distributors, who would have been in competition with JBL but for the territorial restrictions, were not concerned with eliminating price competition from JBL. There is no indication that the complaining distributors wished (or thought [**9] they were permitted) to make sales to the OTC outlets at all, much less at a higher price than that charged by JBL. Rather, the clear indication is that the complaining distributors were concerned that their customers (the salons) would stop carrying Jhirmack products if the diversion continued.

[HN2](#) *Per se* condemnation of apparently vertical restraints may be appropriate where the purpose and effect of those restraints is to limit horizontal competition. In [Cernuto, Inc. v. United Cabinet Corp., 595 F.2d 164 \(3d Cir. 1979\)](#), plaintiff claimed it had been terminated as a dealer in United's line of kitchen cabinets because a competing dealer complained to the manufacturer that the plaintiff was discounting the cabinets. The Third Circuit found that

HN3[] "a manufacturer deliberately withdrawing its product from a distributor that resold it for a price less than its competitor at the request of the competitor," [595 F.2d at 166](#), would constitute a *per se* violation. It based its decision on the pernicious effect of the practice -- elimination of possible price competition from the foreclosed dealer -- and the lack of any redeeming virtue. The court noted that generally manufacturers are [**10] free to impose vertical territorial restrictions, but that two factors made United's alleged action unlawful. First, the action was taken at the behest of a competitor *on the same level as the plaintiff*, thus the restraint was horizontal rather than vertical in purpose and effect. Second, the complaining dealer was allegedly seeking to *eliminate price competition*. [595 F.2d at 168](#).

In order to make out a claim under the reasoning of *Cernuto*, JBL would have to allege that a competitor of JBL prevailed on Jhirmack to terminate JBL in order to eliminate either actual or potential price competition from JBL. No such allegation was made, and the district court correctly granted summary judgment on the price-fixing claim.

[*1016] B. Market and Market Share

All parties agreed to a separate trial to determine (a) the relevant product and geographic market, (b) Jhirmack's share of that market, and (c) whether Jhirmack imposed *per se* unlawful tying arrangements. Only the market findings are appealed. **HN4**[] These are findings of fact and thus subject to a clearly erroneous standard of review. [Twin City Sportservice v. Charles O. Finley & Co., 676 F.2d 1291, 1299 \(9th Cir. \[*11\] 1982\)](#). Although market definitions are inherently imprecise, the district court's determination is supported by the available evidence and must be upheld.

As this circuit stated in [Gough v. Rossmoor Corp., 585 F.2d 381, 389 \(9th Cir. 1978\)](#), cert. denied, 440 U.S. 936, 59 L. Ed. 2d 494, 99 S. Ct. 1280 (1979), **HN5**[] analysis of whether a particular action restrains competition involves a consideration of its impact "within the field of commerce in which the plaintiff was engaged and upon those commercially engaged in competition within it." In determining what the field of competition is, "courts are not free to accept whatever market is suggested by the plaintiff," *id. at 389*, but must examine the commercial realities within the industry in question.

HN6[] Defining the market in a case such as this one is actually a two-step process. First the field in which the plaintiff was engaged must be defined in geographic and distributional terms. Then the product (or product line) that competes in that field must be determined. Since the parties stipulated as to the geographic market, the two determinations may be referred to as defining, respectively, the "distributional market" and the [**12] "product market."

The district court defined the relevant market as "the sale of beauty products, including but not limited to shampoos and conditioners, to beauty salons and other professional outlets." [509 F. Supp. at 369](#). Under this definition, Jhirmack's market share was less than 5%. JBL disputes both the product and the distributional market determinations, and argues that the market should be defined as the sale of shampoos and conditioners *alone* either to professional outlets or, alternatively, *by* professional outlets. Although, as stated above, the district court found that the relevant market existed at the wholesale level (sales *to* salons), it carefully considered claims that a distinct submarket existed in the sale of shampoos and conditioners at the retail level (sales *by* salons). The court concluded, however, that *if* the relevant distributional market were to be found at the retail level, PST outlets faced competition from OTC outlets selling similar products, and so the relevant market would be the sale of shampoos and conditioners by all retail outlets. Under this market definition, Jhirmack's market share would have been less than 1% of shampoos [**13] and approximately 2% of conditioners.

We find it unnecessary to address these alternative findings, however, because the district court correctly defined the relevant distributional market. JBL is engaged in the distribution of Jhirmack products to specific retailers, i.e., it operates as a wholesaler. It competes for PST customers with other wholesalers -- some of whom also carry a single (competing) line, others of whom carry the products of many manufacturers.

The court's product market determination must also be upheld. **HN7**[] The standard test of the product market is that it comprises those "commodities reasonably interchangeable by consumers for the same purpose." [United](#)

States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 395, 100 L. Ed. 1264, 76 S. Ct. 994 (1956). However, this principle must be applied with reference to the specific market involved. So long as the distributional market is set at the wholesale level, the fact that face creams and shampoos do not have the same use for the consumer is not as relevant as whether a "cluster" or "product line" of one manufacturer is reasonably interchangeable for that of another by the salon that is making the purchase.

HN8[] This [**14] cluster approach is appropriate where the product package is significantly different from, and appeals to buyers on a different basis from, the individual products [*1017] considered separately. Thus the full service features of commercial banks led the Supreme Court to find a cluster of products and services as the relevant product market in United States v. Philadelphia National Bank, 374 U.S. 321, 356, 10 L. Ed. 2d 915, 83 S. Ct. 1715 (1963), and United States v. Phillipsburg National Bank & Trust Co., 399 U.S. 350, 360, 26 L. Ed. 2d 658, 90 S. Ct. 2035 (1970). The rationale was that consumers do not generally shop for individual banking services, especially because it is usually easier to obtain some services, e.g., loans, at the same bank where other services, e.g., savings accounts, are held. The approach was extended in A.G. Spalding & Bros., Inc. v. FTC, 301 F.2d 585, 604 (3d Cir. 1962), where the court found the relevant market to be "higher priced" athletic goods because each of the major manufacturers promoted and distributed such goods as a line.

In this case, eighty percent of Jhirmack's sales were of shampoos and conditioners. It did, however, manufacture [**15] a full line of beauty products and required each distributor to purchase a small amount of each product for potential sale to PST outlets. The industry generally considers it necessary to carry a full line, and advertising and promotion often group the products. Although salons do purchase individual products, this generally occurs when the particular product is not available in the main product line chosen by the salon. The court thus reasonably concluded that Jhirmack faced competition (at the wholesale level) for PST sales from other product lines, and not only from other shampoos and conditioners.

C. Market Power

The trial court found that Jhirmack's market share was 2.3%-4.2% of beauty products sold to PST outlets (or 1%-2% of shampoos and conditioners sold by all retail outlets). These shares are too small for any restraint on intrabrand competition to have a substantially adverse effect on interbrand competition. See, e.g., Ron Tonkin Gran Turismo, Inc. v. Fiat Distributors, Inc., 637 F.2d 1376, 1379 (9th Cir. 1981) (1.87% or 5.2%); Mutual Fund Investors v. Putnam Management Co., 553 F.2d 620, 627 (9th Cir. 1977) (2% or 3%). JBL's contentions that Jhirmack possessed [**16] sufficient market power to significantly affect interbrand competition despite its insignificant market share are unsupported and were properly rejected at trial.

D. Fraud or Negligent Misrepresentation

JBL's contract with Jhirmack required JBL to purchase a minimum quantity of products each month. The contract states that JBL "acknowledges that the minimum purchase requirements provided herein are fair, just and reasonable." JBL claims that this statement is a fraudulent representation because the quotas were in effect a statement of the minimum revenues JBL could expect from the distributorship.

The district court found it "doubtful that quotas incorporated into a distributor's agreement afford a basis for a later fraud claim based on the distributor's failure to attain them." 519 F. Supp. at 1089. Such a theory would, in effect, make the manufacturer an insurer of the distributor's business. The court found it unnecessary to reach this issue, however, because it concluded that JBL had failed to factually support two elements: (1) that the representations were made negligently or with intent to defraud; and (2) that JBL relied on the representations. We find no error in this conclusion.

II. [**17] *The Booth Action*

Booth contends that Jhirmack's promise to it of an exclusive distributorship meant that if Jhirmack moved into the OTC market within Booth's territory, it would have to do so through Booth. Since the contract also specified that Booth agreed to exclusively devote its full time to the PST outlets, Jhirmack and Playtex contend that the OTC market was excluded from the contract. The district court denied summary judgment on this issue, and Booth has

not [*1018] appealed the later dismissal of the claim. In any event, this contract claim is irrelevant to whether Jhirmack conspired with Playtex to foreclose competition, violated a covenant of good faith and fair dealing, or was induced by Playtex to breach.

A. The Antitrust Claims

Booth claims that Jhirmack and Playtex conspired to foreclose competition in the OTC market for Jhirmack products in order to allow Playtex to fix prices in that market. It alleges, first, that the agreement between Jhirmack and Playtex, by giving Playtex an exclusive OTC license, violated Sherman Act § 1; and second, that its termination for refusing to accede to that agreement likewise violates the Act.

Booth does not dispute that [*18] Jhirmack could, without violating the antitrust laws, decide to appoint only one OTC distributor and refuse to appoint any others, even if the net result of this course of action was to shield the sole distributor from potential price competition. See [GTE Sylvania, 433 U.S. at 54-55; Ron Tonkin Gran Turismo, Inc. v. Fiat Distributors, Inc., 637 F.2d at 1388](#). Booth's position, however, is that there already was competition, or at least potential competition, in the OTC market (i.e., Booth), and that the agreement was designed to eliminate that competition. It is difficult to square the contention that the Jhirmack-Playtex agreement would decrease intrabrand competition without increasing interbrand competition with Booth's position that if Jhirmack wanted to enter the OTC market it would have to do so through Booth, who had an exclusive territorial license. Had Jhirmack taken the route suggested by Booth, it would be Booth, and not Playtex, who would be insulated from price competition from any other OTC distributor in its territory. And Booth would not face any intrabrand competition between PST and OTC outlets, since it would control distribution to both.

Although there are [*19] indications that Jhirmack did not always interpret its contract with Booth as *prohibiting* sales to OTC outlets, it is clear that, as the district court noted, "Jhirmack's products had not theretofore been officially distributed to OTC outlets, having been generally limited to professional outlets except for sporadic diversion." [519 F. Supp. at 1091](#). It is also clear that Jhirmack considered a substantial promotional campaign as a prerequisite to its ability to compete successfully with other shampoos and conditioners available in OTC outlets. Playtex promise to spend seven million dollars on promotion during the first year of its distributorship and substantial amounts thereafter fulfilled that prerequisite. While there is no allegation that Jhirmack would never have entered the OTC market had it not been able to find a distributor able and willing to engage in substantial promotional activity, the admittedly heavy interbrand competition existing in the OTC market for shampoos and conditioners makes it extremely unlikely that it would have entered at the time it did or that it would have been able to add effectively to that interbrand competition if it had chosen to do so without [*20] such a campaign. Jhirmack considered such an arrangement necessary and the realities of the market make that assumption quite reasonable.

The district court was therefore justified in concluding that "the primary effect of the Jhirmack-Playtex agreement on competition in OTC channels was to add the competitive activity of a major distributor and to increase the amount of Jhirmack products available to consumers in OTC outlets. . . . Moreover, the agreement also provided a new source of intrabrand competition for Jhirmack products sold in salons." [519 F. Supp. at 1091](#).

Since the initial agreement between Playtex and Jhirmack did not violate *antitrust law*, Playtex could certainly ask Jhirmack for aid in enforcing it without incurring antitrust liability. Booth, like JBL, seeks to invoke *Cernuto*, but again the situation is not analogous. In *Cernuto*, the manufacturer had not granted an exclusive license to any of its dealers. Rather it was providing kitchen cabinets to both dealers Famous [*1019] and Cernuto. Famous, however, wanted to eliminate competition, and used its influence over the manufacturer to secure Cernuto's termination as a dealer, thereby creating a net [*21] loss of intrabrand competition without any net increase in interbrand competition. Under *Cernuto*'s circumstances, *per se* condemnation may be appropriate; under the circumstances presented here, it is clearly inappropriate.

B. Good Faith and Fair Dealing

Booth claims that Jhirmack breached an implied covenant of good faith and fair dealing by terminating Booth for refusing to recognize Jhirmack's "illegal" contract with Playtex. Since that contract does not violate the antitrust laws, the district court properly rejected this claim.

C. Tortious Interference

The heart of Booth's tortious interference claim parallels its antitrust claims. Booth argues that its contract with Jhirmack conferred on it the right to sell OTC, that Playtex knew Booth had that right, and that Playtex induced Jhirmack to take that right away from Booth and give it to Playtex.

Whether Booth's contract did in fact confer OTC rights on Booth so that Jhirmack could have breached that contract in giving those rights to Playtex is not at issue here. What matters is whether *Playtex* knew that Booth had OTC rights in its territory. [HN9](#)[] The elements of a claim of tortious interference are (1) a valid contract, [\[**22\]](#) (2) knowledge of the contract and *intent to induce its breach*; (3) breach; (4) causation, and (5) damage. [*Richardson v. La Rancherita*, 98 Cal. App. 3d 73, 80, 159 Cal. Rptr. 285 \(1979\)](#). In this case it is clear that Playtex had no reason to believe that Booth and other PST distributors had any OTC rights and therefore could not have intended that they be breached. Playtex was worried that distributors who diverted products to the OTC market had not bound themselves to incur heavy promotion costs, and would be able to "free ride" on Playtex's efforts, and undersell it. But there is no indication that it considered that diversion to be contractually sanctioned.

The district court's judgments are AFFIRMED in all respects.

Opinion

[*1030] FINDINGS OF FACT, CONCLUSIONS OF LAW AND MEMORANDUM OPINION

In our Opinion and Order of December 2, 1980 we dismissed the complaint in this case, [Nesglo, Inc. v. Chase Manhattan Bank, N.A., 506 F. Supp. 254 \(DCPR 1980\)](#); however, parallel proceedings were being carried out in the state local courts which continued their course. Our dismissal of the complaint was appealed to the United States Court of Appeals for the First Circuit and on September 14, 1981 that court entered the following order:

"This Court, while retaining jurisdiction, remands this matter to the District Court for the purpose of receiving from the parties acceptable translations of such pleadings, docket entries, court actions, and other papers relating to litigation in the courts of the Commonwealth of Puerto Rico as may be relevant to the question whether such litigation may have rendered the instant appeal moot, and for the purpose to expeditiously deciding the issue of mootness and reporting [**2] its findings and conclusions to this court.

The parties have agreed to cooperate in assembling the necessary materials without delay. They are to share equally in advancing such monies as may be necessary, the ultimate allocation of such expenses to abide final decision."

In compliance with the aforementioned order, the parties were instructed to file the necessary documents. We also ordered the parties to brief and argue the related matters of *res judicata* and collateral estoppel.

The case was scheduled for hearing but at that time the parties had not reached an agreement as to the documents to be submitted or the translations required. Disagreements between the parties continued. After substantial delays due to that fact, the parties filed legal memoranda which were examined and again we set all the pending matters for oral argument. For the second time we afforded the parties an opportunity to provide the officially certified translation of the state court documents which were finally filed after extended procrastination. Oral arguments were heard and thereafter the parties requested and were granted an additional opportunity to expand upon the arguments made. The **[**3]** additional memoranda were filed and the case was taken under advisement.

After a careful evaluation of all the documentary evidence, the oral arguments and the extensive legal memoranda filed by the parties, we enter the following basic findings **[*1031]** of fact and conclusions of law which will be supplemented in the Memorandum Opinion.

Findings of Fact

- 1- The parties or their privies in the state court action pending when we initially dismissed the complaint in this case, are the same as those participating in the instant proceedings.
- 2- The claim and/or defenses raised in the state court proceedings are substantially the same as those before this court.
- 3- There is a common nucleus of operative facts giving rise to both the state and federal court claims.
- 4- The plaintiffs in this case, defendants and counterclaimants and their privies in state court, had a full and fair opportunity to litigate their claims against the present defendants (plaintiff and its privies in state court).
- 5- In the exercise of its valid and proper jurisdiction, the state court dismissed plaintiffs' claims and/or defenses with prejudice for their willful and intentional failure to comply with **[**4]** a discovery order under rules of civil procedure identical to those governing civil actions for the federal district court.
- 6- The state court judgment became final, firm and unappealable when the state supreme court denied review.
- 7- No further review of the state court proceedings was sought by the present plaintiffs.

Based on the foregoing findings of fact, we reach the following:

Conclusions of Law

- 1- This court must accord full faith and credit to the state court judgment pursuant to [28 U.S.C. Sec. 1738](#).
- 2- By virtue of the full faith and credit statute, this court must give preclusive effect to the state court judgment.
- 3- In view of the fact that the state court judgment disposes of the pending controversy between the parties, the present action has been rendered moot.

Due to the complex procedural history of the present case, a more detailed analysis of the factual framework and the underlying legal theories -- both local and federal -- upon which it rests, is required. Therefore, we issue the following:

Memorandum Opinion

On or about November 9, 1978, defendant The Chase Manhattan Bank, N.A. (Chase) initiated a collection of monies and factor's lien suit **[**5]** in the Superior Court of Puerto Rico, San Juan Part (the state court) against plaintiffs Nesglo, Inc. (Nesglo), Nestor Cruz Soto (Nestor) and Gloria D. de Cruz (Gloria).

The complaint alleged that Nesglo had defaulted on a loan and factor's lien contract and owed Chase \$460,000 plus interest and \$46,000 in legal fees. It requested entry of judgment against Nesglo, Nestor and Gloria in the aforementioned sums of money and, pursuant to the terms of the loan documents ¹ including the factor's lien contract, that the court order the transfer to Chase of all Nesglo's inventory, account receivables, and related utilities.

Simultaneously with the filing of the complaint, Chase moved for attachment of Nesglo's inventory, account receivables, ledgers, and other assets described in its motion to that effect. Chase also requested the appointment of defendants [**6] Stanley Zych (Zych) and Enrique Fernandez (Fernandez) both officers of the Bank, as custodians of the property to be attached.

On November 15, 1978 the state court issued an attachment order granting Chase's motion to secure the effectiveness of judgment, and appointed Zych and Fernandez as custodians of the property to be attached. The court also issued orders attaching personal real estate and other property belonging to guarantors Nestor [*1032] and Gloria. Corresponding writs were also issued and Chase designated the Nesglo goods to be attached.

The attachment was executed by the state court marshals and an inventory prepared, copy of which was delivered to Fernandez.

On February 17, 1979 Chase moved for summary judgment accompanying a sworn statement by Mr. Luis Ledee, an officer of the Bank.

On February 27, 1979 Nestor and Gloria replied to Chase's motion for summary judgment denying that they or Nesglo owed any money to Chase and that, in any event, Chase collected usurious interest from Nesglo, the latter being a close corporation.

On or around March 26, 1979 defendants Nestor and Gloria filed a motion accompanying a sworn statement by Nestor dated March 19, 1979. [**7] Together with Nesglo, they also filed an answer to Chase's complaint raising a series of affirmative defenses very similar to the allegations found in their complaint before this court. Nestor and Gloria also filed a counterclaim, sworn to by Nestor, as president of Nesglo, and a motion to join Zych and Fernandez as defendants.

Nestor's sworn statement dated March 19, 1979 alleged that there was no credit due to Chase from Nesglo, that Chase had not credited certain amounts to Nesglo, had misappropriated certain funds, had refused to honor certain letters of credit, had not given an accounting to Nesglo, had charged Nesglo illegal interest and had imposed certain burdensome and anticompetitive conditions on Nesglo such as forbidding Nesglo to do business with other financial institutions and favoring competitors of Nesglo, also clients of the Bank.

The answer and affirmative defenses filed by Nesglo, Nestor and Gloria generally deny the allegations of Chase's complaint and raise as affirmative defenses fraud, deceit and material misrepresentations, lack of consideration, lack of compliance by Chase of its own obligations, compensation, novation, estoppel and unjust enrichment. [**8] They also adduce a defense that Chase violated the Commerce Code of Puerto Rico, the Tie-in Amendments to the Bank Holding Company Act of 1970, P.L. 91-607, Title I, Sec. 106(a) et seq., 12 U.S.C. 1971, et seq. (the Tie-in Amendments), the usury statutes of Puerto Rico and those found in the national banking laws, 12 U.S.C. Secs. 85 and 86.

Nestor's and Gloria's counterclaim incorporates the previous affirmative defenses and pleads claims for relief very similar to those pleaded by them and Nesglo before this court. They also name Zych and Fernandez as counterdefendants in the third cause of action of the counterclaim.

¹ They consist of the Factor's Lien Contract (Exhibit A), Note (Exhibit B), Continuous and Unlimited Guaranty (Exhibit C), and Collateral Agreement (Exhibit D).

In essence, the counterclaim seeks damages arising out of the commercial contractual relationship between Nesglo and Chase because of violations of the Tie-in Amendments; usurious interest under both the federal banking and local laws; federal and local civil rights violations arising out of Chase's, Zych's and Fernandez' attachment of Nesglo's goods, account receivables, ledgers and other property; violations of the Commerce Code of Puerto Rico due to the exaction of interest over interest; general breach of contract theories under the laws of Puerto Rico as well [**9] as lack of an accounting by Chase; and false and material misrepresentations relating to the promissory note sought to be collected by Chase.

Simultaneously with the filing of the foregoing pleadings, Nestor and Gloria moved to have Zych and Fernandez joined as party counterdefendants to the suit. The motion asserted that these Chase officers were indispensable parties with respect to the alleged illegality of the attachment.

On April 25, 1979 Chase moved to dismiss Nestor's and Gloria's counterclaim before the state court. Nestor and Gloria opposed Chase's motion to dismiss asserting, *inter alia*, that their counterclaim arose from facts and transactions intertwined with the breach of the factor's lien agreement sought to be enforced by Chase. They also stressed their standing to sue under the federal Tie-in Amendments and the Civil [*1033] Code of Puerto Rico because of their status as sole stockholders and joint and several guarantors of Nesglo by virtue of which they, as guarantors, could interpose against Chase, as creditor, the same defenses and causes of action of debtor Nesglo under the theory that debtors and guarantors are in the same procedural posture *vis* [**10] *a vis* their common creditor.

On August 14, 1979 the state court granted "as requested" ² Nestor's and Gloria's opposition to Chase's motion to dismiss their counterclaim. Chase then filed a petition for certiorari (interlocutory appeal) from the trial court's decision. The Supreme Court of Puerto Rico denied the petition on October 11, 1979.

Contemporaneously with their opposition to Chase's motion to dismiss their counterclaim, Nestor and Gloria also challenged the legality of the attachment sought by Chase at the commencement of the action in the state court. Chase opposed on the basis of the rights it had arising from the factor's lien contract and applicable Puerto Rican law.

On October 10, 1979 the state court granted Chase's opposition "as requested".

Chase also moved for the sale of all attached goods consisting of Nesglo's inventory, account receivables and cash, invoking the powers [**11] that Nesglo had granted it pursuant to the factor's lien contract. The court granted Chase's request and Gloria and Nestor moved, on behalf of Nesglo, for reconsideration of said order attacking the requested sale under federal and local due process grants. This motion for reconsideration was denied.

By this time, Nestor, Gloria and Nesglo had commenced the instant action in federal court. During April 1980 this case was temporarily assigned to the Honorable Ted Dalton, Senior District Judge of the Western District of Virginia, sitting by designation. After a series of unsuccessful settlement conferences, Judge Dalton entered an order suggesting that the parties proceed with the concurrent state action.

After Judge Dalton's suggestion, Nesglo filed in the state court a document containing an answer, affirmative defenses and counterclaim. Together with Nestor and Gloria it also requested that the state court issue summons directed to Zych and Fernandez as potential third party defendants. As part of the grounds advanced for the issuance of summons, Nesglo, Nestor and Gloria referred to this action as it stood at that time (May 6, 1980) before this court, also mentioning identity [**12] of parties and causes of action in both suits. As per such request, the court entered an order on May 29, 1980 directing issuance of summons against Zych and Fernandez, who were duly served with process.

Chase replied and moved to dismiss Nesglo's counterclaim and/or third party complaint. It also objected to Nesglo's amendment to plaintiff's prior answer and affirmative defenses of March 26, 1979.

² "As requested" in the courts of Puerto Rico is the equivalent of "Granted and so ordered" in federal court.

On June 2, 1980 Nesglo, Nestor and Gloria opposed Chase's motion arguing, *inter alia*, that Nesglo had not answered the complaint initially. Chase replied and in due course the state court granted Chase's motion and denied Nesglo's, Nestor's and Gloria's June 2 opposing motion.

Nesglo, Nestor and Gloria then filed a motion for reconsideration of the aforementioned order and Chase opposed. On July 18, 1980 the state court entered an order denying the aforementioned motion for reconsideration. There is no evidence that this order was ever appealed to the state supreme court.

Meanwhile, Chase also moved to dismiss Nesglo's, Nestor's and Gloria's counterclaim and/or third party complaint claiming that since the counterclaim had been dismissed as to Chase, it could not be asserted [**13] against Zych and Fernandez. It was also claimed that as a third party complaint it was procedurally incorrect. The state court agreed.

On September 9, 1980, Nesglo, Nestor and Gloria filed a sworn informative motion before [*1034] the state supreme court in a pending collateral incident before said court,³ [**14] wherein they represented that as of September 9, 1980⁴ Nesglo was a defendant and counterdefendant in the state court proceedings. Thereafter, on October 15, 1980, the state court granted Chase's opposition to a partial motion for summary judgment filed by Nesglo, Nestor and Gloria.

On December 2, 1980 we entered an opinion and order dismissing the instant action and Nesglo, Nestor and Gloria appealed to the United States Court of Appeals for the First Circuit. While said appeal was pending, one very important event took place in the local proceedings. The state court issued an Opinion and Judgment dated May 15, 1981, striking all of Nesglo's, Nestor's and Gloria's answers and affirmative defenses and dismissing with prejudice Nestor's and Gloria's counterclaim against Chase. The court also entered the default of defendants and rendered judgment in favor of Chase for the full amount of outstanding indebtedness plus interest, costs and attorney's fees.

In its opinion, the state court, after an extended recitation of the deplorable history of the discovery proceedings, found as a matter of fact that Nesglo, Nestor and Gloria had willfully failed to comply with its discovery orders and had, through their misconduct, abused the state adjudicatory [**15] process. (See Document No. 49).

Nesglo, Nestor and Gloria then filed a motion for reconsideration and simultaneously petitioned the state supreme court for a writ of certiorari to review the state court's order of October 15, 1980 denying their partial motion for summary judgment. They emphasized that concurrently with the state court proceedings, they had

"/filed a Complaint in the United States District Court for the District of Puerto Rico, in which the same parties and basically the same facts are involved, and have also filed and /sic/ appeal before the First Circuit Court in Boston for which said court has set September 2 for oral argument as to the legal basis for said appeal. Exhibit 2".

The state court denied this motion for reconsideration on June 3, 1981.

The petition for certiorari having failed, Nesglo, Nestor and Gloria filed a petition for review again before the state supreme court. In this last petition they referred to some exhibits in their motion for reconsideration and stated that it consisted of:

* * *

³The incident involved a motion to intervene filed by a creditor of Nesglo, Albert E. Rebel & Associates, Inc. ("Rebel") that claimed a preference in its credit to that of Chase. Nesglo, Nestor and Gloria intervened to correct some alleged factual misrepresentations made by Chase in its petition for certiorari. The supreme court finally issued an opinion on November 1981 clarifying the criteria to determine whether Chase's factor's lien credit was of superior rank to that of Rebel. In passing, the court considered the state court judgment against Chase to be final, firm and unappealable. The court did not take into consideration Nesglo's averments in its informative motion. See, *Nesglo, Inc. v. Chase Manhattan Bank*, 81 JTS 108 (1981).

⁴By this date, the state court had dismissed Nesglo's May 6, 1980 counterclaim and had denied reconsideration of its order.

562 F. Supp. 1029, *1034L 1983 U.S. Dist. LEXIS 19436, **15

"(b) Copy of appellants brief filed before the United States Court of Appeals for the First Circuit in Boston, *in a case* [**16] *between the same parties resulting from the same controversies; . . .*" (Emphasis supplied).

Meanwhile, on June 22, 1981, the state supreme court denied the petition for certiorari from the interlocutory order of October 15, 1980 denying Nesglo's, Nestor's and Gloria's motion for partial summary judgment. The court considered the petition to be frivolous and imposed sanctions on petitioners consisting of \$500.00 for attorney's fees.

Two motions for reconsideration of this supreme court resolution were filed and both were denied. The petition for review was likewise denied on August 6, 1981 and a motion to reconsider said denial was also rejected on September 4, 1981.

[*1035] Mandates from all state supreme court proceedings were issued and the case returned to the state court on October 13, 1981 (Petition for Review) and on October 19, 1981 (Certiorari).

No evidence in the record exists that Nesglo, Nestor and Gloria perfected an appeal or petition for certiorari to the Supreme Court of the United States from the state supreme court decisions during the pendency of the proceedings before us, as authorized by [28 U.S.C. 1257](#).

We shall now discuss the legal significance [*17] of the aforementioned findings of fact and their bearing on the ultimate issue of mootness.

Plaintiffs initially contend that they have not been afforded an adequate opportunity to argue the issue of mootness because defendants should have been required to state their position first. This contention is frivolous. While it is true that initial memoranda of law were filed simultaneously by both parties, we later held oral argument on all issues raised therein, and plaintiffs were afforded a reasonable opportunity to rebut defendants' assertions. Indeed, at the close of argument, we invited the parties to file additional memoranda so that each could have one last opportunity to discuss the issues raised in their respective briefs and motions.

As to the issue of mootness, we start with the often cited definition given in [Powell v. McCormack, 395 U.S. 486, 496, 23 L. Ed. 2d 491, 89 S. Ct. 1944](#):

"Simply stated, a case is moot when the issues presented are no longer 'live' or the parties lack a legally cognizable interest in the outcome."

Proper disposition of the mootness issue in this case is thus governed by those Supreme Court cases recognizing that an intervening judicial [*18] decision in a collateral proceeding may moot a parallel action pending in another court. [Murphy v. Hunt, 455 U.S. 478, 71 L. Ed. 2d 353, 102 S. Ct. 1181 \(1982\)](#) (civil rights suit brought in federal district court by sex offender challenging a state's constitutional provision restricting bail, on basis of Eighth Amendment's prohibition of excessive bail, held to have been rendered moot by intervening state court conviction); [Patterson v. Warner, 415 U.S. 303, 39 L. Ed. 2d 343, 94 S. Ct. 1026 \(1974\)](#) reh. den. 416 U.S. 952, 94 S. Ct. 1962, 40 L. Ed. 2d 302 (upholding constitutionality of state statute vacated on direct appeal to Supreme Court and case remanded for district court's initial consideration of whether action was rendered moot by an intervening state court decision);⁵ [Aikens v. California, 406 U.S. 813, 32 L. Ed. 2d 511, 92 S. Ct. 1931 \(1972\)](#) reh. den. 406 U.S. 978, 92 S. Ct. 2407, 32 L. Ed. 2d 677 (court dismisses writ of certiorari on the ground that issue on which writ was granted had been rendered moot by an intervening state court decision); [Lowe v. Duckworth, 663 F.2d 42 \(7th Cir. 1981\)](#) (federal habeas corpus petition rendered moot on appeal by intervening [*19] state court decision ordering a new trial. Since the court granted the relief sought, there was termination of the live controversy between the parties).

The argument of "voluntary cessation" urged by plaintiffs and expounded in [County of Los Angeles v. Davis, 440 U.S. 625, 59 L. Ed. 2d 642, 99 S. Ct. 1379 \(1979\)](#) and followed in [Free v. Landrieu, 666 F.2d 698 \(1st Cir. 1981\)](#), is

⁵The procedure used by the Supreme Court in this case to determine mootness -- whether a live case or controversy has ceased to exist between the parties on appeal -- closely resembles the procedure used herein by the First Circuit Court of Appeals. 415 U.S. at 306.

562 F. Supp. 1029, *1035L 1983 U.S. Dist. LEXIS 19436, **19

not applicable to the facts of this case. As previously stated, we will decide the issue on whether the intervening state judgment fully disposed of the pending controversy between the parties and if so, whether we must accord said judgment full faith and credit pursuant to [28 U.S.C. 1738](#).

The state court judgment of May 15, 1981 is now final, firm and unappealable. **[**20]** We will now determine whether it should be accorded full *res judicata* effects in this court by virtue of the federal full-faith-and-credit statute. As the Supreme Court recently observed:

[*1036] "As one of its first acts, Congress directed that all United States Courts afford the same full-faith-and-credit to state court judgments that would apply in the State's own Courts. Act of May 26, 1790, Ch. 11, 1 Stat. 122, [28 U.S.C. Sec. 1738](#)." [Kremer v. Chemical Construction Corp.](#), [456 U.S. 461, 102 S. Ct. 1883, 72 L. Ed. 2d 262 \(1982\)](#) reh. den. [458 U.S. 1133, 103 S. Ct. 20, 73 L. Ed. 2d 1405 \(1982\)](#).⁶

[21]** If in Puerto Rico a court would give preclusive effects to the state court judgment of May 15, 1981 and the other ancillary decisions made by both the state and supreme courts, then [Section 1738](#) commands that this court do likewise. As we have said earlier, the end effect, consistent with one of the cardinal purposes behind *res judicata*, would be to obliterate any case or controversy hitherto extant between opposing parties to the suit.

In assessing the effects of the state court proceedings we follow the rules laid down by the United States Court of Appeals for the First Circuit in [General Foods v. Mass. Dept. of Public Health](#), [648 F.2d 784, 785-786 \(1st Cir. 1981\)](#) for cases falling within the federal question jurisdiction of federal courts (challenge to state regulations on federal grounds in federal court by members of association previously litigating the issue in state court).

". . . /w/here the State Court rendering the judgment would give it preclusive effect, federal courts must give it such preclusive effect. /Citations omitted / . . . /and/ . . . /w/here the State Court rendering the judgment would not give it preclusive effect, the federal courts would **[**22]** not give it such preclusive effect."

Furthermore, it is now well settled that in Puerto Rico, "the doctrine of *res judicata*, *res judicata pro veritate habetur*, is . . . part of /its/ Civil Law, and except, for comparative purposes /the courts / need not resort to other sources for its analysis". [Republic Security Corporation v. The Puerto Rico Aqueduct and Sewer Authority](#), [674 F.2d 952, 955-956, n. 4 \(1st Cir. 1982\)](#) quoting from [Lausell Marquach v. Diaz de Yanez](#), [103 D.P.R. 533, 535 \(1975\)](#).

As recently described by this court, after a remand from the First Circuit of Appeals,⁷ quoting from a leading Puerto Rico Supreme Court case:⁸

"In general terms, it may be affirmed that the rule of *res judicata* is based on considerations of public policy and necessity: on the one hand, the interest of the State in terminating litigations in order that judicial issues may not be perpetuated, . . . , and, on the other hand, the desirability of not submitting a citizen twice to the inconveniences which the litigation of the same cause entails . . . *In its origin it presupposed an adversative or litigious proceeding and an adjudication on the merits. However, the complexities* **[**23]** *of the modern proceeding and the increase in litigation have resulted in its extension -- by statutory channels -- even to*

⁶ In [Kremer](#) the Court held that a state court judgment upholding a state agency's rejection of an employment discrimination claim, which would have *res judicata* effects in the state's own courts, precludes a federal action under Title VII of the 1964 Civil Rights Act on the same claim of employment discrimination. In so doing, the Court considerably narrowed the scope of judicial exceptions to the preclusive command of 28 U.S.C. Se. 1738 in the context of relitigation of federal claims originally filed and disposed of in state courts.

⁷ [Rodriguez v. Baldrich](#), [628 F.2d 691 \(1st Cir. 1980\)](#) (judgment of dismissal on *res judicata* grounds vacated and remanded to district court for clarification of Puerto Rican law on *res judicata* effect in federal court of a state court dismissal for failure to post a nonresident cost bond).

⁸ [Perez v. Bauza](#), 83 P.R.R. 213, 217-218 (1961).

decisions which have not adjudicated the controversies on its merits. (Emphasis in original)." [*Rodriguez v. Baldrich, 508 F. Supp. 614, 616 \(D.P.R. 1981\)*](#).⁹

[**24] [*1037] The court quoted another passage from *Perez v. Bauza, supra*, which is relevant to the issue in this case, namely: a willful failure to comply with a discovery order must be accorded full *res judicata* effect in this court. The Supreme Court of Puerto Rico fully endorses the view that an involuntary dismissal under Rule 39.2 of the Rules of Civil Procedure of Puerto Rico of 1958¹⁰ (equivalent to [*Fed. R. Civ. Proc. 41\(b\)*](#)) operates as an adjudication on the merits:

"T/he pertinent part of the rule reads as follows:

'(b) *Involuntary Dismissal: Effect Thereof.* For failure of the plaintiff to prosecute or to comply with these rules or any order of the court, a defendant may move for dismissal of an action or of any claim against him. After the plaintiff has completed the presentation of his evidence, the defendant, without waiving his right to offer evidence, in the event the motion is not granted, may move for a dismissal on the ground that upon the facts and the law the plaintiff has shown no right to relief. Unless the court in its order for dismissal otherwise specifies, a dismissal under this subdivision and any dismissal not provided for in this [**25] rule, other than a dismissal for lack of jurisdiction, operates as an adjudication upon the merits.

* * *

"[*Rule 41\(b\)*](#) is consistent with the inherent power of courts to relieve the congestion of their calendars . . . , and likewise *it is undoubtedly consistent with the laudable purpose of discouraging delinquent litigants or those who utilize the judicial channel to cause inconveniences to the adverse party by initiating untenable proceedings.*" (Emphasis in original quotation of [*Rule 41\(b\)*](#) other emphasis, ours). *Id.*

[**26] Clearly a Puerto Rican court would accord full *res judicata* effect, as a matter of statutory law, to a dismissal of claims filed by a recalcitrant party who willfully disregards discovery orders issued by the court, much the same way as a federal court would do in similar circumstances.¹¹ Compare, [*Nasser v. Isthmian Lines, 331 F.2d 124 \(2d Cir. 1964\)*](#) (involuntary dismissal of seaman's complaint for failure to answer interrogatories operates as *res judicata* in subsequent federal suit) with *Souchet v. Cossio*, 83 P.R.R. 730 (1961) (prior involuntary dismissal of action seeking declaration of nullity of a sale, replevin and other remedies for failure to prosecute, accorded full *res judicata* effect in subsequent identical action between the same parties).

[**27] The pronouncements of the Supreme Court of Puerto Rico echoed in *Baldrich*, to the effect that public policy requires that procedural or "penalty dismissals"¹² be accorded full *res judicata* effect in subsequent litigation

⁹ According to *Perez v. Bauza, supra*, as interpreted by *Baldrich*, *res judicata* in Puerto Rico has the same contours that it has in federal law for it "relieve/s/ parties of the cost and vexation of multiple lawsuits, conserves judicial resources, and, by preventing inconsistent decisions, encourages reliance on adjudication". [*Allen v. McCurry, 449 U.S. 90, 94, 66 L. Ed. 2d 308, 101 S. Ct. 411 \(1980\)*](#).

¹⁰ As pointed out in [*Baldrich, supra, 508 F. Supp. at 615, n. 1*](#), the Puerto Rico Rules of Civil Procedure of 1958 were repealed in 1979 by the Rules of Civil Procedure of 1979. Rule 39.2 was reenacted as Rule 39.2(c) and its text, insofar as pertinent here, is identical to that of its predecessor. See, 32 L.P.R.A. App. 111, p. 162 (1980). This rule is virtually identical to [*Fed. R. Civ. Proc. 41\(b\)*](#) governing involuntary dismissals. In 1943 it was also known as [*Rule 41\(b\)*](#) of the Rules of Civil Procedure of Puerto Rico, 1943, and such is the reference in the *Bauza* passage reproduced above.

¹¹ In dismissing complaints for failure to comply with discovery orders the trial courts of the Commonwealth of Puerto Rico seem to enjoy the same discretionary latitude as federal district courts. Orderly administration of justice in this sense is identical both in the state and federal systems. See, e.g., [*Corchado v. Puerto Rico Marine Management, 665 F.2d 410 \(1st Cir. 1981\)*](#) (circuit court underscores that dismissals with prejudice for failure to comply with discovery orders will ordinarily be upheld as being within sound discretion of trial court).

¹² See, generally, 18 C. Wright, A. Miller & E. Cooper, *Federal Practice and Procedure*, Civil: Sec. 4440, at 362-365 (1981).

initiated by the parties affected by such dismissals, is not inconsistent with recent pronouncements on the subject by the Supreme Court of the United States.

In [Allen v. McCurry, 449 U.S. 90, 66 L. Ed. 2d 308, 101 S. Ct. 411 \(1980\)](#), the Court accorded full *res judicata* effect to state court determinations made in the course of criminal proceedings in the context of a **[*1038]** subsequent federal civil rights action brought in federal court by the criminal defendant. The Court made it very clear that litigants have no "unencumbered opportunity to litigate a /federal/ right in federal district court, regardless of the legal posture in which the **[**28]** federal claim arises". [449 U.S. at 103](#). It is only necessary that a particular litigant have a "full and fair opportunity" to present the particular claim or issue in state court. [Id. at 95](#).

The Court has recently stated that the contents of "what a full and fair opportunity to litigate entails is the procedural requirements of due process", [Kremer v. Chemical Construction Corp., supra, 102 S. Ct. at 1898, n. 24](#), and the fact that a particular litigant "fail/s/ to avail himself of the full procedures provided by state law does not constitute a sign of their inadequacy" /citations omitted /. [Id. at 1899](#).

Considering the above, we have no doubt that the courts of the Commonwealth of Puerto Rico would give full preclusive or *res judicata* effects to a dismissal for willful failure to comply with discovery orders, such as was entered here by the state court on May 15, 1981. Notwithstanding, we must now determine whether we should give full preclusive effect to said judgment by virtue of the federal full-faith-and-credit statute, [28 U.S.C. Sec. 1738](#).

Plaintiffs strenuously argue that there is no identity of parties between this suit and the prior state court proceedings. **[**29]** They contend that even though Chase sued Nesglo, Nestor and Gloria in state court, only Nestor and Gloria filed a "permissive and independent counterclaim" and "Nesglo did not file an answer and was not a counterclaimant". We disagree.

An examination of the answer and affirmative defenses filed in the state court on March 26, 1979 reveals that they were filed on behalf of "defendant" (la parte demandada). ¹³ Furthermore, in the portion of the counterclaim (reconvencion) the appearing defendants are singled out and identified as "defendant-counterclaimant Mr. Nestor Cruz and Mrs. Gloria D. de Cruz" (la parte demandada-reconveniente don Nestor Cruz y dona Gloria D. de Cruz). But aside from party identification in connection with the pleadings, there are other indicia that Nesglo, in fact, appeared and made allegations in the state court. In the answer, practically all of the allegations refer to the business relationship between Chase and Nesglo. The same is true as to the affirmative defenses.

[30]** With respect to the counterclaim, while it may be true that it is filed by Nestor and Gloria, it still incorporates the affirmative defenses previously set forth by Nesglo, and sets forth claims for relief properly belonging to Nesglo and not just Nestor and Gloria as joint and several guarantors of the latter. Indeed, a comparison between the counterclaim and the amended complaint filed before this court reveals a substantial similarity, if not identity of, material operative facts underlying the various claims for relief stated in both documents.

Physical identity of parties is not necessary for *res judicata* purposes under Puerto Rican substantive law. As Article 1204 of the Civil Code provides, *in fine*:

"It is understood that there is identity of persons whenever the litigants of the second suit are legal representatives of those who litigated in the preceding suit, or when they are jointly bound with them or by the relationships established by the indivisibility of prestations among those having a right to demand them, or the obligation to satisfy the same." 31 L.P.R.A. Sec. 3343 (Emphasis supplied).

¹³ In Puerto Rico it is common practice to refer to all defendants or the defendants in general as "the party defendant" (literal translation). If a particular defendant or plaintiff is to be singled out then he or she or it (if a corporation) is expressly identified in the pleadings.

The state court record reveals that Nestor and Gloria [**31] were the joint and several ¹⁴ [**32] guarantors of Nesglo's contractual obligations [*1039] to Chase. As such, their prestations were indivisible with those of Nesglo towards Chase and hence they had "a right to demand them, or the obligation to satisfy the same". ¹⁵ Indeed, a close examination of Nestor's and Gloria's counterclaim in state court, and their opposition to Chase's motion to dismiss the same, reveals that Nestor and Gloria are the functional privies of Nesglo within the scope and intendment of the "identity" definition found in the last paragraph of Article 1204.

The contents of the aforementioned opposition to Chase's motion to dismiss establish that Nestor and Gloria asserted standing on their own behalf and that of Nesglo, to prosecute their federal and state claims against Chase, including those arising out of the Tie-in Amendments, relying on their status as joint and several guarantors of Nesglo, entitled to oppose or interpose against the creditor /Chase/ the same defenses and/or causes of action that Nesglo would have opposed or interposed. Nestor and Gloria are therefore bound by the Judgment of May 15, 1981 as privies of Nesglo, for purposes of the identity required under Puerto Rican *res judicata* doctrine. ¹⁶

[**33] Moreover, Nesglo has expressly admitted on the record that it was a party to the state court answer and counterclaim of March 26, 1979.

Plaintiffs' reliance on *A & P General Contractors v. Asociacion Cana, Inc.*, 110 D.P.R. 753 (1981), is misplaced. In *A & P*, a guarantor sued to recover a pledge it had given to the creditor of the principal debtor. When such action was initiated, the principal debtor had already commenced suit against the creditor because of the latter's breach of its contractual obligations to advance money to the former for construction purposes. In the guarantor's suit, as a condition for release of the pledge -- a certificate of deposit -- the court had to determine whether the creditor had indeed breached the contractual obligations to the principal debtor for then, said breach would not only extinguish the principal debtor's obligations to the creditor, but would also terminate the accessory surety agreement binding the guarantor-pledgor. Upon extinguishment of the prime obligation, the guarantor would thus become automatically entitled to return of the certificate of deposit pledged to the creditor, and this is exactly what happened in the guarantor's [**34] suit.

The state supreme court reversed the lower court ruling that had allowed the principal debtor in his separate suit against the creditor, to invoke successfully the doctrine of "offensive collateral estoppel" by judgment on the issue of the creditor's liability for breach of contract. The court advanced two grounds for its decision: (1) that the principal debtor being represented by the same attorneys as the guarantor, could have intervened but had voluntarily chosen not to do so in the guarantor's suit, and (2) that there was really no identity of [*1040] parties between the principal debtor and guarantor since the latter was merely suing *qua* guarantor to recover the pledge. *A & P General Contractors, supra*.

¹⁴ As explained by this court in *Wong v. Key Finance Corporation*, 266 F. Supp. 149, 153, 154 (D.P.R. 1967), the words "joint" or "jointly" in English are the equivalent of "solidaria" or "solidariamente" in Spanish, which in the case of multiple debtors or guarantors, means that *any* of them are liable for the entire sums owed. The Code also confers standing on solidary debtors to "utilize, against the claim of the creditor, all the exceptions arising from the nature of the obligation and those which are personal to him". Article 1101, **31 L.P.R.A. Sec. 3112**. Sureties binding themselves jointly (solidarily) with the principal debtor are treated, according to the Code, as principal solidary debtors subject to the provisions found in Article 1090-1101, 31 L.P.R.A. Secs. 3101-3112. *Wong, supra, Id.*

¹⁵ They also had the right to utilize against the claim of Chase, as creditor, all exceptions arising from the nature of the obligation. Article 1101.

¹⁶ The same result would be obtained under the federal *res judicata* principle as the Supreme Court of the United States indicated in a similar context in *Montana v. United States*, 440 U.S. 147, 59 L. Ed. 2d 210, 99 S. Ct. 970 (1979). The Court at page 154 quoting from *Souffront v. Compagnie des Sucreries*, 217 U.S. 475, 486-487, 54 L. Ed. 846, 30 S. Ct. 608, observed that "/O/ne who prosecutes or defends a suit in the name of another to establish and protect his own right or who assists in the prosecution or defense of an action in aid of some interest of his own . . . is as much bound . . . as he would be if he had been a party to the record."

As commentator Manresa points out, in discussing the requirement of "identity" of parties for the presumption of *res judicata* to be successfully invoked:

"With reference to solidarity and indivisibility of obligations, we will note that the extension of the first judgment to all those interested therein shall have full application concerning the totality of the obligation, to its essence or validity, and to the acts wherein its origin is found; but [**35] not concerning the very personal circumstances of someone who may not have litigated before, except in the event that they /such circumstances / may have been utilized with respect to the *exclusive portion of said interested person by one of his co-obligees*.

"It is to be noted, and it has great importance, that the requirement of identity of parties is in practice satisfied when the two suits are in all other respects *exactly* the same, and, presenting the same question, and exercising the same actions, /they are / ground/ed/ on the same cause and refer/red/ to the same objects."

(Emphasis supplied) (Translation ours). Manresa, *Comentarios al Codigo Civil*, Tome 8 Vol. II, pp. 242-243 (Reus, 5th Ed. 1950).

Scaevara takes the same position on this "identity" issue and concludes that, when two or more persons bound solidarily appear as such in a first suit, their personalities merge or they establish such a procedural unity, that what is done by one or against one binds all the rest, for purposes of *res judicata*. Scaevara, *Codigo Civil*, Tome XX, p. 450 (Madrid 1904). See also, Puig Brutau, *Fundamentos de Derecho Civil*, Tome I, Vol. 2, p. 146, n. 41 (Bosch. [**36] 1959). The Supreme Court of Puerto Rico has adopted these doctrinal views. *Heirs of Zayas Berrios v. Berrios*, 90 P.R.R. 537, 551-552 (1964). (Control of first action by real party defendants, sufficient to bar second suit by said defendants due to their juridical solidarity with nominal party defendant appearing in first suit); Cf. *General Foods v. Mass. Dept. of Public Health, infra*, 648 F.2d at 787-789 and note 6; [*Pan American Match, Inc. v. Sears Roebuck Co.*, 454 F.2d 871, 874 \(1st Cir.\)](#), cert. den. 409 U.S. 892, 34 L. Ed. 2d 149, 93 S. Ct. 113 (1972).

Plaintiffs next contend that the state court proceedings did not involve the same claims as those pressed before this court. They collaterally attack the state court's jurisdiction over the federal Tie-in Amendment violations they voluntarily raised there as affirmative defenses and counterclaim.¹⁷ Their argument is premised on the theory that Congress vested federal courts with exclusive jurisdiction to entertain this type of claim to the exclusion of state courts. With respect to their federal constitutional and civil rights claims, they contend that Judge Dalton, sitting by designation, somehow reserved plaintiffs' [**37] rights to come back to this court.

Upon examining the state court claims pressed by plaintiffs-defendants-counterclaimants therein -- and comparing them to the amended complaint filed before this court¹⁸ in September 1979, we find that all of the causes of action pleaded in the state court have their roots in the [**38] same nucleus of operative facts comprising the business [*1041] contractual relationship between Chase and Nesglo dating back to 1972. It may be that particular theories, bolstered by statutory citations, vary somewhat, but the essential facts giving rise to the claims asserted are a constant factor in both the state and federal pleadings.

In requesting the state court to issue summons to serve Zych and Fernandez as third party defendants, plaintiffs in May 1980 made reference to the federal action and its similarities to the state court proceedings. Later, they even

¹⁷ Plaintiffs themselves characterize Nestor's and Gloria's state court counterclaim as permissive. Though it is not necessary for us to decide whether such counterclaim is permissive or compulsory for purposes of this opinion, certainly this characterization shows that plaintiffs were not involuntary defendants hauled into state court against their wishes. They freely chose their state forum and must abide by their conduct even if it implies waiver of a federal forum and its protections. See, [*Nash County Board of Education v. Biltmore Co.*, 640 F.2d 484, 492 \(4th Cir. 1981\)](#), cert. den. **454 U.S. 878, 70 L. Ed. 2d 188, 102 S. Ct. 359**, reh. den. **454 U.S. 1117, 102 S. Ct. 692, 70 L. Ed. 2d 654**.

¹⁸ A complete description of the claims set forth in this amended complaint of September 1979 is set out in our original reported opinion and order dismissing this action. See, [*506 F. Supp. 254 \(D.P.R. 1980\)*](#).

attached an order of this court as part of their opposition to Chase's request for dismissal of Nesglo's counterclaim filed in state court.

In their motion for reconsideration of the judgment entered by the state court on May 15, 1981, [**39] and apparently aware of the *res judicata* effect that said judgment would have in the federal proceedings, plaintiffs Nesglo, Nestor and Gloria advanced as a ground in support of their request, the concurrent "complaint in the United States District Court for the District of Puerto Rico, *in which the same parties and basically the same facts are involved*" (emphasis added) as well as the appeal pending before the United States Court of Appeals for the First Circuit. They attached as exhibits copies of the brief filed before the First Circuit Court of Appeals.

In Puerto Rico, strict identity between causes of action in the first and second suits is not required. The cause or grounds for the claim or request should not be confused with the remedies actually sought in one or the other action. *Mercado Riera v. Mercado Riera*, 100 P.R.R. 939, 950-51 (1972).

In *Mercado Riera*, *res judicata* was applied by the court to a new action for damages arising out of the dissolution of a partnership because in the previous action plaintiff had failed to claim them. The court expressly overruled two prior cases ¹⁹ which had rejected the defense of *res judicata* "because, despite [**40] the fact that the second action could be joined to the first, the failure to join it did not constitute a waiver of the claim for damages because the right to join several causes of action is discretionary with the plaintiff" /citations omitted /. *Id.* at 953. The trend in Puerto Rico, therefore, is to preclude in the subsequent suit whatever could have been claimed or joined with the first one but was not. This, of course, includes all grounds or defenses that could have been raised either prior to or after judgment in the first suit. And, ordinarily, failure to correct an error in the first action either by motion or on appeal will result in preclusion in the subsequent action, even if the first judgment can be branded as erroneous. Cf. *A.S.A. v. Belendez*, 98 P.R.R. 506, 510-512 (1970) (failure to appeal first ruling that plaintiff had not exhausted his administrative remedies precludes him from raising lack of jurisdiction of an administrative board in second suit even if jurisdictional theory had changed between suits).

[**41] [Lawlor v. National Screen Service Corp., 349 U.S. 322, 99 L. Ed. 1122, 75 S. Ct. 865 \(1955\)](#), advanced by plaintiffs in support of their theory that the state and federal claims are not the same, is distinguishable from the case at bar for there a state court judgment ²⁰ was not involved and under federal principles of *res judicata* new operative facts giving rise to new claims for relief had arisen, as well as new parties joined when the second suit was filed.

In light of the foregoing legal principles, and on the basis of the state court record, we conclude that there is "identity" of claims for *res judicata* purposes between the claims advanced by plaintiffs in this court and those previously advanced in the state court.

Interestingly, [**42] plaintiffs seem to attack the state court's jurisdiction over the claims [*1042] they voluntarily presented there and which were the subject of extensive discovery, contending that the state court lacked subject matter jurisdiction because Congress granted exclusive jurisdiction to federal courts to entertain private treble damage suits based on violations of the Tie-in Amendments prohibitions found in the federal banking laws.

As we pointed out in our original decision in this case, it was not the intention of Congress to preempt state court jurisdiction over activities otherwise covered by the federal banking tie-in amendments. If so, there would not have been any reason for Congress to have inserted the language in [12 U.S.C. Sec. 1978](#)²¹ acknowledging the parallel

¹⁹ *Blanco v. The Capital*, 77 P.R.R. 607 (1954) and *Capo v. A. Hartman & Co.*, 57 P.R.R. 190 (1940).

²⁰ As [General Foods v. Mass. Dept. of Public Health, supra, 648 F.2d at 785-786](#) makes clear, in the case of a state court judgment deciding federal questions, federal courts must refer to state law on *res judicata* to comply with the command of [28 U.S.C. Sec. 1738](#).

²¹ [12 U.S.C. Sec. 1978](#) provides as follows:

power of the states to afford relief to any citizen suffering business injury as a consequence of the conduct prohibited by the preceding sections of the act. This congressional concern for preserving intact concurrent state jurisdiction over banking, is reflected in the abridgment of the original prohibition of anticompetitive practices envisioned in the original Senate Bill, so as not to interfere with traditional, [\[**43\]](#) localized banking customs and customer credit extension practices. [*Nesglo, Inc. v. Chase Manhattan Bank, N.A., supra, 506 F. Supp. at 261-264.*](#)

Indeed, the plain statutory language of [12 U.S.C. Secs. 1975](#)²² and [1978](#), is fully compatible with, and does not implicitly repeal or carve an exception to, the full-faith-and-credit mandate found in [28 U.S.C. Sec. 1738](#). In [*Kremer v. Chemical Construction Corporation, supra*](#), the Supreme Court of the United States refused [\[*44\]](#) to construe the statutory grant of a right to federal court access granted to victims of employment discrimination under Title VII of the Civil Rights Act of 1964, as impliedly repealing the mandate of [28 U.S.C. Sec. 1738](#). Likewise, the deference to state court jurisdiction over banking affairs embodied in [12 U.S.C. Sec. 1978](#), as supported by the legislative history of the bank Tie-in Amendments, should disprove such implied repeal of or exception to a time-tested federal statute of such practical significance for present-day comity and federalism.

[\[**45\]](#) Plaintiffs brought upon themselves the natural consequences of their own voluntary acts before the state court. So much is apparent from the state court Opinion and Judgment of May 15, 1981. In this sense, the state court judgment is, in principle, no different from the state court judgment by stipulation entered and given full *res judicata* effect by a federal court in [*Nash County Board of Education v. Biltmore Co., 640 F.2d 484 \(4th Cir. 1981\)*](#), cert. den. 454 U.S. 878, 70 L. Ed. 2d 188, 102 S. Ct. 359, reh. den. 454 U.S. 1117, 102 S. Ct. 692, 70 L. Ed. 2d 654.

In *Nash* a state county board of education sued in federal district court various milk producers seeking treble damages for a price fixing conspiracy in violation of the federal antitrust laws. However, the State Attorney General had previously entered into a consent decree with the milk producers in a prior state action he had brought under the state antitrust laws. The federal district court gave full *res judicata* effect to the state court judgment and dismissed the action. The U.S. Court of Appeals for the Fourth Circuit affirmed, holding that [28 U.S.C. Sec. 1738](#) barred the second suit. The court used [\[**46\]](#) various alternative theories [\[*1043\]](#) to support its conclusion that the state court judgment was entitled to full-faith-and-credit in the federal court even though the antitrust laws had been judicially construed to confer exclusive federal jurisdiction on federal courts.²³ In comparing the state and federal claims, it focused on the operative facts giving rise to both claims rather than on the statutory source for each, and attached significant consequences to the conduct of plaintiffs' representative in prosecuting the claims in state court:

". . . the plaintiff, by choosing to file the state action on the same cause of action, had voluntarily waived the benefits if any, of a federal forum and both *res judicata* and collateral estoppel should be available to bar a

"Nothing contained in this chapter shall be construed as affecting in any manner the right of the United States or any other party to bring an action under any other law of the United States or of any State, including any right which may exist in addition to specific statutory authority, challenging the legality of any act or practice which may be proscribed by this chapter. No regulation or order issued by the Board under this chapter shall in any manner constitute a defense to such action."

²² [12 U.S.C. Sec. 1975](#) provides as follows:

"Any person who is injured in his business or property by reason of anything forbidden in section 1972 of this title may sue therefor in any district court of the United States in which the defendant resides or is found or has an agent, without regard to the amount in controversy, and shall be entitled to recover three times the amount of the damages sustained by him, and the cost of suit, including a reasonable attorney's fee."

²³ In so doing, the court adopted Moore's comments on [*Connelly v. Balkwill, 174 F. Supp. 49, 11 Ohio Op.2d 289, 83 Ohio L. Abs. 513 \(N.D. Ohio 1959\)*](#), aff'd. [279 F.2d 685 \(6th Cir. 1960\)](#). [*Nash, supra, 640 F.2d at 488, n. 10.*](#) The Supreme Court of the United States has noted the *Nash* method of ascertaining whether there is identity of claims in [*Kremer v. Chemical Construction Corp., supra.*](#)

cause of action, even though the federal action was within the exclusive jurisdiction of a federal court." (Emphasis supplied).

Nash, supra, 640 F.2d at 497.

[**47] As the Supreme Court stated in Federated Department Stores, Inc. v. Moitie, 452 U.S. 394, 69 L. Ed. 2d 103, 101 S. Ct. 2424 (1981), a party who has litigated in a prior action will be held to his conduct therein, and if he fails to pursue a remedy within the prior action that could have preserved his rights, he may not thereafter seek collateral relief in the federal courts. The virtues of *res judicata* were further stressed in *Moitie* as an important tool for the even handed administration of justice within the federal system. Petitioners - retail purchasers of clothing -- Moitie and Brown -- had initially filed an antitrust suit in a California federal district court alleging a price fixing conspiracy among retail chain stores in California. The action was dismissed because, at that time, ultimate consumers or purchasers of products were considered not to have standing to sue under federal antitrust laws. They did not appeal the decision of the district court whereas other plaintiffs *did* appeal. While the latter appeal was pending, the Supreme Court issued an opinion recognizing retail purchasers standing to sue under federal antitrust law,²⁴ and the appeals [**48] court reversed and remanded. Meanwhile, Moitie and Brown had refiled their antitrust claims in state court under California's antitrust laws. Defendants removed the same to the federal district court that had previously entertained the action and now had it on remand from the court of appeals, which had vacated the dismissal in light of the intervening Supreme Court decision on standing. Defendants then moved for dismissal and the court granted it considering its prior decision to be *res judicata* as to Moitie and Brown. An appeal was taken, and the court of appeals reversed because it considered the district court's initial decision to be erroneous, and hence, unjust for Moitie and Brown to suffer the consequences of a dismissal while those in their same procedural posture were allowed to prosecute identical claims. Defendants finally appealed to the Supreme Court and the latter reversed the court of appeals.

[**49] The Supreme Court underscored the conduct of Moitie and Brown in the first action and the fact that they *failed to appeal* the initial district court decision, even though the same was later reversed as being erroneous. Whether the decision was correct or not was considered by the court to be immaterial for *res judicata* purposes,²⁵

²⁴ Reiter v. Sonotone Corp., 442 U.S. 330, 60 L. Ed. 2d 931, 99 S. Ct. 2326 (1979) held that retail purchasers can suffer an "injury" to their business or property within the meaning of section 4 of the Clayton Act, which grants a private treble damage remedy to persons suffering business injury as a consequence of an antitrust violation.

²⁵ Defendants read the *Moitie* decision as signaling the demise of the judicially created doctrine of exclusive federal judicial jurisdiction in antitrust cases. See Nash, supra, 640 F.2d 492, n. 13. They argue that inasmuch as the Supreme Court acted on an action removed from state court, if the pleadings, as the court stated, merely reproduced the initial federal antitrust claims originally filed in the district court, then the state court had no subject matter jurisdiction over the action and the district court could acquire none on removal. General Investment Co. v. Lake Shore & M.S.R. Co., 260 U.S. 261, 288, 67 L. Ed. 244, 43 S. Ct. 106 (1922) (federal court must dismiss for want of jurisdiction federal antitrust action originally filed in state court and subsequently removed to the former court). See also, Blumenstock Bros. Adv. Agency v. Curtis Pub. Co., 252 U.S. 436, 64 L. Ed. 649, 40 S. Ct. 385 (1920); Freeman v. Machine Co., 319 U.S. 448, 451, 87 L. Ed. 1509, 63 S. Ct. 1146, n. 6 (1943); but see, Testa v. Katt, 330 U.S. 386, 389-394, 91 L. Ed. 967, 67 S. Ct. 810 (1947) (state court is obligated under supremacy clause, to enforce private treble damage remedy -- similar to that in antitrust laws -- found in Emergency Price Control Act of 1942, as amended, regardless whether it be considered "penal" in nature). A remand was thus in order and the *res judicata* question need not have been decided. A careful review of the *Moitie* Supreme Court decision reveals that indeed the court was aware of the removal problem, but nevertheless chose to entertain the *res judicata* arguments. Moitie, supra, 452 U.S. at 397, n. 2.

While defendants' arguments certainly bear weight, we find it unnecessary to reach this issue on the present record. Whether or not the state court here had subject matter jurisdiction of the federal claims before this court, is really immaterial in view of the opportunities available to the plaintiffs to redress any jurisdictional errors within the state court system.

We remain unpersuaded that Congress intended to vest federal courts with jurisdiction exclusive of that of state courts to entertain private treble damage actions under the Tie-in Amendments, especially, under the criteria set forth in Gulf Offshore Co. v. Mobil Oil Corp., 449 U.S. 1033, 66 L. Ed. 2d 494, 101 S. Ct. 607, to determine whether a congressional grant of federal jurisdiction displaces state court jurisdiction over the same federal claims:

because [*1044] Moitie and Brown had foregone an initial appeal when their original federal action had been dismissed. They had available an appellate procedure, which they should have used regardless of the settled antitrust doctrine prevalent at that time (prior to the *Sonotone* decision).

[**50] The reasoning in *Moitie* is fully applicable here. Plaintiffs Nesglo, Nestor and Gloria had a full and fair opportunity to present their case in state court, including any objections they may have had to the subject matter jurisdiction of the state court. They voluntarily chose not to avail themselves of that opportunity and they seek further prosecution of their claims in this court under the theory, rejected in *Allen v. McCurry, supra*,²⁶ that "every person asserting a federal right is entitled to one unencumbered opportunity to litigate that right in a federal district court, regardless of the legal posture in which the claim arises". *449 U.S. at 103*.

Let us now examine plaintiffs' assertion that they preserved their federal rights in this [**51] court pursuant to Judge Dalton's Order of April 22, 1980. Plaintiffs' reliance on *England v. Louisiana State Bd. of Med. Exam.*, *375 U.S. 411, 84 S. Ct. 461, 11 L. Ed. 2d 440 (1964)* is again misplaced. Contrary to the *England* situation, where plaintiffs [*1045] first sought relief in federal court (*375 U.S. at 412*), plaintiffs herein and their privies first pressed their federal claims in state court and then refiled them in federal court. See, *Partido Nuevo Progresista v. Barreto Perez*, *639 F.2d 825, 826, n. 2 (1st Cir. 1980)*, cert. den. *451 U.S. 985, 68 L. Ed. 2d 842, 101 S. Ct. 2318* and cases cited. In these circumstances, plaintiffs would seem foreclosed from invoking the doctrine of federal right preservation announced in *England*.

Moreover, while it is true that *England* reversed the lower court dismissal, it did so because it considered appellants to have relied in good faith on prior case law. Hence, it made the requirement of explicit reservation of federal rights in state court prospective in nature, explicitly warning that the mistaken view of the appellants in that case "will not avail other litigants who rely upon it after today's decision". [**52] (*375 U.S. at 422*) Plaintiffs here are therefore not entitled to the relief afforded the *England* plaintiffs, for they actively prosecuted their claims in state court, and voluntarily invoked, as well as used, the state court process, fully and unreservedly submitting to it. Now they are and should be bound by the judgment entered by said court. The fact that the claims pressed in state court were never actually litigated is immaterial for, by operation of law, the state court dismissal here is the equivalent of a trial on the merits,²⁷ [**53] the same way it would have been in this court under *Fed. R. Civ. Proc. 41(b)*. Consequently, all of the federal claims,²⁸ even those allegedly arising under the Tie-in Amendments, were

- 1) an explicit statutory directive;
- 2) an unmistakable implication from legislative history, and
- 3) a clear incompatibility between state court jurisdiction and federal interests.

Aside from the fact that in the case of Tie-in Amendments, there is no explicit statutory directive or legislative history permitting an inference of exclusive jurisdiction -- the contrary is just the situation as embodied in *12 U.S.C. Sec. 1978* -- we fail to perceive a clear incompatibility between state court jurisdiction and the commercial interests sought to be protected by Congress in the amendments. The broad traditional regulatory power of banking by the states, taken into consideration by Congress in enacting the Tie-in Amendments, certainly makes entertainment of such federal claims by state courts conducive to the enforcement of federal rights. *Kremer v. Chemical Construction Corp., supra*; *Dowd Box Co. v. Courtney*, *368 U.S. 502, 507-508, 7 L. Ed. 2d 483, 82 S. Ct. 519 (1962)* (concurrent jurisdiction of state courts upheld in actions under Section 301 of the Labor Management Relations Act). Certainly, the courts of the Commonwealth of Puerto Rico are not foreign to broad antitrust private treble damage remedies to redress unfair methods of competition of the type pressed by plaintiffs in this court. See, the Puerto Rico Monopoly Act, Act No. 77 of June 25, 1964, as amended, *10 L.P.R.A. Secs. 257 et seq.*, especially Secs. 259(a) and 262 (Unfair Methods of Competition and Exclusive Dealing). The act explicitly vests on the Superior Court of Puerto Rico jurisdiction to entertain private treble damage suits in *10 L.P.R.A. Sec. 268(a)*.

²⁶ The U.S. Court of Appeals for the First Circuit had already held *pro tanto* in the context of a state civil proceedings in *Lovely v. Laliberte*, *498 F.2d 1261, 1263-64 (1st Cir. 1974)*, cert. den. *419 U.S. 1038, 42 L. Ed. 2d 316, 95 S. Ct. 526 (1974)*.

²⁷ See *Rodriguez v. Baldrich, supra*.

properly dismissed by the state court. See, [*Key v. Wise, 629 F.2d 1049 \(5th Cir. 1980\)*](#), cert. den. 454 U.S. 1103, 70 L. Ed. 2d 647, 102 S. Ct. 682 (federal claim over which federal courts had exclusive jurisdiction by explicit congressional grant held barred by state court judgment entered after federal court erroneously abstained from entertaining federal claims originally brought to its attention).

Even if the assumption of jurisdiction by the state court over these claims were erroneous, and we remain unpersuaded that this is so,²⁹ we are not at liberty to collaterally review such an implicit exercise of jurisdiction. [*Rooker v. Fidelity Trust Co., 263 U.S. 413, 68 L. Ed. 362, 44 S. Ct. 149 \(1923\)*](#) (subject matter jurisdiction underlying bill in equity to collaterally review state court judgment because of federal prohibitions, held impermissible); [*Chicot County Drainage District v. Baxter State Bank, 308 U.S. 371, 84 L. Ed. 329, 60 S. Ct. 317 \(1940\)*](#) (erroneous assertion of jurisdiction by first court not collaterally reviewable); [*Erspan v. Badgett, 659 F.2d 26, 28-29 \(5th Cir. 1981\)*](#), cert. den. 455 U.S. 945, 102 S. Ct. 1443, 71 L. Ed. 2d 658 (no jurisdiction found, on the basis of *Moitie*, to collaterally [*54] review a state court judgment of doubtful binding force after a U.S. Supreme Court decision); [*Key v. Wise, supra, 629 F.2d at 1055-1057, 1061-1068*](#)) (state court assumption of jurisdiction over federal claims within exclusive jurisdiction of federal court after erroneous abstention by federal district court, held to bar collateral review of state court judgment sought by plaintiffs upon return to federal court); Cf. [*Kremer v. Chemical Construction Corporation, supra, Underwriters National Assurance Company v. North Carolina Life & Accident & Health Insurance Guaranty Association, supra*](#) (state court collateral review of sister state court judgment is very [*1046] narrow and otherwise subject to *res judicata* and full-faith-and-credit constraints).

[**55] In view of the above findings and conclusions, we hold that on the basis of the record before us,³⁰ the courts of Puerto Rico would give full preclusive effects to the state court Judgment of May 15, 1981. This being so, we find that [*28 U.S.C. Sec. 1738*](#) commands this court to do likewise.

Inasmuch as the issues pending appellate review before the U.S. Court of Appeals for the First Circuit have been fully disposed of by the courts of Puerto Rico, we further consider this case to have been rendered moot for interim events or collateral judicial proceedings have fully disposed of the live case or controversy [*56] that at one time may have existed between opposing parties to the litigation. Based on the foregoing, our prior opinion and order entered December 2, 1980 and accompanying judgment, should be substituted³¹ by the present opinion, and a judgment of dismissal on grounds of mootness should be entered. [*United States v. Munsingwear, Inc., 340 U.S. 36, 39-41, 95 L. Ed. 36, 71 S. Ct. 104 \(1950\)*](#); [*Gomes v. Rhode Island Interscholastic League, 604 F.2d 733, 736 \(1st Cir. 1979\)*](#); and [*Duke Power Co. v. Greenwood, 299 U.S. 259, 267, 81 L. Ed. 178, 57 S. Ct. 202 \(1936\)*](#) (when controversy becomes moot on appeal it is duty of appellate court to set aside decision below and remand cause with directions to dismiss).

²⁸ There is no question that state court jurisdiction over the federal constitutional and civil rights claim is concurrent with that of federal courts. See, *Diaz v. Collazo*, 82 JTS 30 (March 10, 1982) and cases cited; see, also, [*Lovely v. Laliberte, supra, note 26*](#).

²⁹ Even if this were a case of exclusive federal judicial jurisdiction, the equities would tend to favor enforcement of traditional *res judicata* preclusion inasmuch as there is simply no need to assess whether uniform national policy in antitrust enforcement would be affected given the voluntary conduct of plaintiffs in state court in refusing to comply with state judicial procedure. If anything, an interest in uniform and proper administration of justice should prevail, and in this instance, the state court judgment fosters this interest the same way as any federal judgment in similar circumstances would.

³⁰ As mentioned previously, in arriving at our findings and conclusions, we have relied in part on our familiarity with Puerto Rican substantive and procedural law. In any event, as respects civil procedure, the Puerto Rican rules are very similar to and sometimes identical with the Federal Rules of Civil Procedure. This identity exists in the area of dismissals for failure to comply with discovery orders.

³¹ Given the retention of appellate jurisdiction by the United States Court of Appeals for the First Circuit, we may not vacate our prior judgment at this stage of the proceedings. However, this should not be construed as a rejection or departure from the views expressed in our original opinion to which we still adhere.

562 F. Supp. 1029, *1046L 1983 U.S. Dist. LEXIS 19436, **56

[**57] The Clerk is ordered to remit forthwith the instant Findings of Fact, Conclusions of Law and Memorandum Opinion, as well as the supplementary record upon which they are based, to the Clerk of the United States Court of Appeals for the First Circuit.

SO ORDERED.

HN2[Torts, Business Torts

A trade secret, whether it be a secret formula, process, pattern, device, or compilation of information is property which its owner makes use of to the exclusion of others. As a property right, the trade secret is protected against its appropriation or use without the owner's consent. The secret is of value only so long as it remains a secret. In an action based upon a secret process, the plaintiff must establish that (a) the process is a secret, (b) the extent to which the information is known outside of the owner's business, (c) the extent to which it is known by employees and others involved in the owner's business, (d) the extent of measures taken by the owner to guard the secrecy of the information, (e) the value of the information to the owner and to his competitors, (f) the amount of effort or money expended by the owner in developing the information, and (g) the ease or difficulty with which the information could be properly acquired or duplicated by others.

Counsel: [**1] Edward F. O'Connor of O'Connor, Baylor, Callas & Elliott, Palm Beach Gardens, for appellant.

Dennis J. Powers of Gunster, Yoakley, Criser & Stewart, P.A., Palm Beach, for appellee.

Judges: Before OWEN, WILLIAM C., Jr., Associate Judge. BERANEK and DELL, JJ., concur.

Opinion by: OWEN

Opinion

[*1] OWEN, WILLIAM C., Jr., Associate Judge.

Appellee, Cercoa, Inc., a corporation engaged in the business of manufacturing and marketing polishing compounds for glass and plastic materials, obtained injunctive relief against its former employee, appellant David Ching Lee, restraining him from utilizing the corporation's trade secrets. We affirm.

For over two years, Lee worked for appellee as a production manager. During that period, Lee became familiar with the manufacturing processes used by his employer. There was no express agreement preventing Lee from disclosing or using appellee's [*2] manufacturing process. When appellee received information that Lee was going to use its trade secrets to start his own business to manufacture glass polishing compound, appellee terminated Lee and initiated this action.

The initial question for determination is whether a valid cause of action [**2] exists to protect an employer's trade secrets from disclosure or use by an employee (or former employee) absent an express contract restraining the employee from disclosing or using such secrets. We answer this in the affirmative. **HN1[]** Where an employee acquires, during the course of his employment, a special technique or process developed by his employer, the employee is under a duty, even in the absence of an express contractual provision, not to disclose such skills, techniques or processes in his new employment for his own or another's benefit to the detriment of his previous employer.¹ *Unistar Corp. v. Child, 415 So.2d 733 (Fla. 3d DCA 1982); Ferroline Corp. v. General Aniline & Film*

¹ However, this does not preclude a former employee from using, in competition with his former employer, methods of doing business and processes which are but skillful variations of general processes known to the particular trade.

Corp., 207 F.2d 912 (7th Cir. 1953); International Election Systems Corp. v. Shoup, 452 F. Supp. 684 (D.C.E.D.Pa.1978); Greenberg v. Croydon Plastics Co., 378 F. Supp. 806 (D.C.E.D.Pa.1974); Microbiological Research Corp. v. Muna, 625 P.2d 690 (Utah 1981); Packard Instrument Co. v. Reich, 89 Ill.App.3d 908, 45 Ill.Dec. 266, 412 N.E.2d 617 (1980); Capsonic Group, Inc. v. Plas-Met Corp., 46 Ill.App.3d 436, 5 Ill.Dec. 41, 361 N.E.2d 41 (1979); Ungar Electric Tools, Inc. [*3] v. Sid Ungar Co., 13 Cal.Rptr. 268, 192 Cal.App.2d 398 (1961).

Appellant next contends that the appellee failed to sustain its burden of proof that trade secrets were involved in the manufacture of glass polish compound.

HN2 A trade secret, whether it be a secret formula, process, pattern, device, or compilation of information is property which its owner makes use of to the exclusion of others. 2 Callman, Unfair Competition, Trademarks & Monopolies (3rd Ed.), Sec. 51.1, pp. 349-350. As a property right, the trade secret is protected against its appropriation or use without the owner's consent. The secret is of value only so long as it remains a secret. In an action based upon a secret process, the plaintiff must establish that (a) the process is a secret, (b) the extent to which the information is known outside of the owner's business, (c) the extent to which it is known by employees and others involved in the owner's business, (d) the extent [**4] of measures taken by the owner to guard the secrecy of the information, (e) the value of the information to the owner and to his competitors, (f) the amount of effort or money expended by the owner in developing the information, and (g) the ease or difficulty with which the information could be properly acquired or duplicated by others. International Election Systems Corp. v. Shoup, supra, Restatement of Torts § 757, comment b.

The trial court here found that appellee had a trade secret in the manufacture of glass polish. These secrets were identified as certain formulations of chemicals and certain techniques in the manufacturing process. Appellant argues that appellee failed to sustain its burden to establish that the foregoing were trade secrets, since, so he argues, all the information was published in literature or patented and the techniques and processes were known to others in this field. While the evidence to which appellant points would support an inference that many of the major elements of the appellee's process are the same as those known to others in this field, it is also sufficient to support the court's factual findings that the *combination of elements* [**5] into a complicated production process amounted to a trade secret and not merely a variation of a general process, see Ferroline Corp. v. General Aniline & Film Corp., supra, and that the appellant made a reasonable attempt to safeguard its process.

As a caveat, we point out that neither the injunction nor this court's decision prohibits [*3] appellant from developing a polishing compound solely through the exercise of his training and experience possessed from working in his profession, so long as it does not utilize appellee's trade secrets nor copy appellee's process.

AFFIRMED.

HN2 [Regulated Practices, Trade Practices & Unfair Competition]

The filing of a single non-sham lawsuit cannot form the basis of a claim under the Connecticut Unfair Trade Practices Act, [Conn. Gen. Stat. § 42-110b\(a\)](#), or Connecticut's common law of tortious interference with a business expectancy.

Counsel: Lawrence W. Kanaga, Bridgeport, Connecticut (Zeldes, Needle & Cooper), for Plaintiff-Appellant.

Robert D. Witte, Bronxville, New York (Witte & Lestz, P.C., Alan M. Lestz, of counsel), for Defendants-Appellees ACMAT Corporation and Robert D. Witte.

James M. Kearns, Bridgeport, Connecticut (for Defendant-Appellee Laborers' International Union of North America, Local 665 AFL-CIO).

Judges: Feinberg, Chief Judge, Mansfield and Kearse, Circuit Judges.

Opinion by: FEINBERG

Opinion

[*99] FEINBERG, Chief Judge:

Suburban Restoration Co., Inc. appeals from an order of the United [*2] States District Court for the District of Connecticut, T. F. Gilroy Daly, J., enforcing Magistrate Thomas P. Smith's order dismissing Suburban's complaint against defendants ACMAT Corporation (ACMAT), Laborers' International Union of North America, Local 665 AFL-CIO (the Union), and Robert D. Witte. Magistrate Smith and Judge Daly concluded that Suburban's suit under the Connecticut Unfair Trade Practices Act (CUTPA), [Conn. Gen. Stat. § 42-110b\(a\)](#), and the common law of tortious interference with a business expectancy, for damages resulting from defendants' filing of a lawsuit in a Connecticut state court, was barred by the [*first amendment to the United States Constitution*](#) as interpreted in the *Noerr-Pennington* doctrine. The *Noerr-Pennington* doctrine refers to a trilogy of Supreme Court cases, [*Eastern Railroad Presidents Conference v. Noerr Motor Freight*, 365 U.S. 127, 5 L. Ed. 2d 464, 81 S. Ct. 523 \(1961\)](#), [*United Mine Workers v. Pennington*, 381 U.S. 657, 14 L. Ed. 2d 626, 85 S. Ct. 1585 \(1965\)](#), and [*California Motor Transport Co. v. Trucking Unlimited*, 404 U.S. 508, 30 L. Ed. 2d 642, 92 S. Ct. 609 \(1972\)](#), holding that activities attempting to influence legislative, [*3] executive, administrative or judicial action to eliminate competition are wholly immune from federal antitrust liability unless the conduct falls within the "sham exception" to the doctrine. Because we find that Connecticut would interpret its law to exempt from liability activities excluded from the ambit of the Sherman Act by the *Noerr-Pennington* doctrine, we affirm the dismissal.

I. Background

This case arises out of an invitation to bid issued by the City of Bridgeport, Connecticut, on October 3, 1980, seeking proposals for a contract to renovate and remove asbestos from a school building. Appellant Suburban and appellee ACMAT were among the bidders; Suburban submitted the lowest bid, and the city began the process of awarding the contract to Suburban. ACMAT, as a disappointed bidder, and appellee Union, as a city taxpayer, then brought suit against officials of the city in the Connecticut Superior Court, through their attorney, appellee Witte. Suburban was not a party to the suit. ACMAT and the Union sought a writ of mandamus and an injunction against the award of the contract to Suburban on the ground that Suburban's bid was deficient. The suit was settled when the [*4] city agreed not to award the contract to Suburban, but to resubmit the project to bidding. Suburban was not successful in the second round of bidding.

This lawsuit, in the federal courts because of diversity, ensued. Appellant Suburban claims that the state court action was a groundless suit constituting an unfair method of competition and an unfair and deceptive trade practice

under CUTPA and a tortious interference with a business expectancy under the common law that caused appellant to lose \$700,000. Appellees moved to dismiss for failure to state a cause of action and for summary judgment. These motions presented several issues of state law, including whether filing a groundless lawsuit can be an unfair trade practice under CUTPA. Magistrate Smith, however, granted the motion to dismiss on a ground not raised by the parties. He found that the threshold issue in the case was whether the complaint alleged conduct falling within the sham exception to the *Noerr-Pennington* doctrine, and he concluded that it did not, so that the doctrine barred Suburban's [*100] suit. Judge Daly adopted this position in his order enforcing the dismissal.

The *Noerr-Pennington* doctrine [**5] and the sham exception were developed by the Supreme Court in a series of cases in which it was alleged that defendants' attempts to obtain commercially favorable actions from different branches of government violated the Sherman Act. *Eastern R.R. Presidents Conference v. Noerr Motor Freight, Inc., supra* (seeking legislation); *United Mine Workers v. Pennington, supra* (attempting to influence executive actions); *California Motor Transport Co. v. Trucking Unlimited, supra* (instituting administrative and judicial proceedings). In *Noerr* and *Pennington* the Court held that the activity alleged was outside the scope of the Sherman Act; in *California Motor Transport*, the Court recognized that the act of filing a legitimate lawsuit was within the *Noerr-Pennington* doctrine, i.e., not covered by the Sherman Act, but held that the Act can reach sham litigation such as the multiple baseless proceedings alleged in *California Motor Transport*. Since Suburban concedes that the state court suit does not fit into the sham exception, *California Motor Transport* would clearly have required dismissal if Suburban had brought suit under the Sherman Act, instead of under [**6] CUTPA and the common law. But the question remains whether the result must be similar under state law. The parties have focused their arguments on appeal on the question raised by the magistrate's decision, namely, whether the *Noerr-Pennington* doctrine is mandated by the United States Constitution. This issue apparently has not been definitively resolved by the Supreme Court and has not been squarely addressed in this circuit. See generally Fischel, Antitrust Liability for Attempts to Influence Government Action: The Basis and Limits of the *Noerr-Pennington* Doctrine, 45 U.Chi.L. Rev. 80, 94-104 (1977).

Magistrate Smith concluded without much discussion that the doctrine is constitutionally mandated, and that therefore it must apply to Connecticut's law as well as to the Sherman Act. There is some support for this position in the cases, but it is not conclusive. *Noerr* expressly refrains from deciding whether the activities complained of are protected under the *first amendment*, basing its holding solely on a construction of the Sherman Act. 365 U.S. at 132 n.6. The Court discerns an "essential dissimilarity between an agreement jointly to seek legislation or law enforcement [**7] and the agreements traditionally condemned by [the Sherman Act]," such as "price-fixing agreements, boycotts, market-division agreements, and other similar arrangements." *365 U.S. at 136* (footnote omitted). This construction is bolstered by two considerations with constitutional overtones: the need in "a representative democracy" for "the people to make their wishes known to their representatives," *365 U.S. at 137*, and the spectre of "important constitutional questions" that would be raised if the Sherman Act were read to regulate the activity alleged. *365 U.S. at 138*. Thus, the *first amendment* lurks in the background of a holding that, strictly speaking, is simply an interpretation of the Sherman Act.

The decision in *Pennington* four years later adds nothing that is inconsistent with limiting *Noerr* to statutory construction. Indeed, Justice White's majority opinion states that *Noerr* held that "the Sherman Act . . . was not intended to bar concerted action of this kind . . ." *381 U.S. at 669*. But *California Motor Transport*, six and a half years later, presents *Noerr* and *Pennington* as resting on the two constitutionally related considerations described [**8] above, with no mention of the preceding statutory construction. Furthermore, Justice Douglas's majority opinion is filled with broad language suggesting that the *first amendment* forbids application of the Sherman Act to activities protected by the *Noerr-Pennington* doctrine. The majority opinion's conclusion that the doctrine applies to actions in the courts as well as to petitions of the legislative and executive branches, while not explicitly based on the constitution, is grounded in the perception that "the right of access to [*101] the courts is indeed but one aspect of the right of petition." *404 U.S. at 510*. And the holding that the activities at issue in the case are nevertheless not exempt from the antitrust laws, because they are "sham," depends on the recognition that "it is well settled that *First Amendment* rights are not immunized from regulation when they are used as an integral part of conduct which violates a valid statute." *404 U.S. at 514*. Thus, the magistrate's assumption that appellant's cause of action could not survive unless it fit the sham exception is not without substantial support. If

indeed the *Noerr-Pennington* doctrine is mandated by the *first amendment*, then the doctrine must also apply to Connecticut's statute and common law.

Courts in other jurisdictions have taken this position. In *Pennwalt Corp. v. Zenith Laboratories, Inc.*, 472 F. Supp. 413 (*E.D. Mich. 1979*), appeal dismissed, 615 F.2d 1362 (6th Cir. 1980), counterclaims for violation of the Sherman Act, interference with business relationships, abuse of trademark and abuse of process were dismissed because the lawsuits complained of were not sham, and therefore were protected by the *first amendment* as embodied in the *Noerr-Pennington* doctrine. 472 F. Supp. at 423-24. Similarly, in *Sierra Club v. Butz*, 349 F. Supp. 934, 936-39 (*N.D. Cal. 1972*), a state law counterclaim for inducing the United States government to break a contract with defendant was dismissed in a decision treating the *Noerr-Pennington* doctrine as a *first amendment* standard analogous to the "malice" standard established for defamation by *New York Times v. Sullivan*, 376 U.S. 254, 11 L. Ed. 2d 686, 84 S. Ct. 710 (1964).

This circuit has not gone so far as to apply the *Noerr-Pennington* doctrine to state law causes of action. But it has, in the process of applying *Noerr-Pennington* [**10] and the sham exception to Sherman Act claims, explicitly described the doctrine as an application of the *first amendment*. See *Landmarks Holding Corp. v. Bermant*, 664 F.2d 891, 895-96 (2d Cir. 1981) (issue is whether the conduct alleged "is immunized by the *First Amendment* from antitrust liability under the *Noerr-Pennington* doctrine"); *Miracle Mile Associates v. City of Rochester*, 617 F.2d 18, 20 (2d Cir. 1980) ("Under *Noerr*, mere solicitation of governmental action through legislative processes . . . is an activity which is fully protected by the *First Amendment* and is immune from Sherman Act liability"); *Mountain Grove Cemetery Assoc. v. Norwalk Vault Co.*, 428 F. Supp. 951, 956 (D. Conn. 1977) ("*Noerr* and *California Motor Transport* teach that when antitrust objectives and the right to petition for government action are in conflict, the scales must tip in favor of the *First Amendment*."). See also *Taylor Drug Stores, Inc. v. Associated Dry Goods Corp.*, 560 F.2d 211, 214 (6th Cir. 1977) (per curiam) (referring to "rights under the *First Amendment* . . . as those rights have been described in [*Noerr*] and [*Pennington*]").

We are [**11] not bound to follow the language of *Landmarks Holding* and *Miracle Mile* quoted above, since it was not necessary to the holdings of those cases, and since the *first amendment* basis of the doctrine was not treated as an issue by the court or by the parties. But we find it unnecessary to decide this constitutional issue at all. It remains an open question whether, as a matter of statutory construction, filing a groundless lawsuit is the sort of "unfair trade practice" that CUTPA was intended to prohibit. Apparently the Connecticut courts have never addressed the issue. In the absence of Connecticut precedent construing CUTPA, we must "do the best we can in estimating 'what the state court would rule to be its law.'" *Bailey Employment System, Inc. v. Hahn*, 655 F.2d 473, 477 (2d Cir. 1981) (quoting *Holt v. Seversky Electronatom Corp.*, 452 F.2d 31, 34 (2d Cir. 1971)). **HN1**[¹] CUTPA is expressly modelled on section 5(a) (1) of the Federal Trade Commission Act, 15 U.S.C. § 45(a) (1), and it directs the state courts and the state commissioner to be guided by federal interpretations of the federal act in interpreting the state statute. *Conn. Gen. Stat. § 42-110b(b), (c)*. At [**12] least one court has held the *Noerr-Pennington* doctrine applicable to the [*102] Federal Trade Commission Act. *Rodgers v. FTC*, 492 F.2d 228 (9th Cir.), cert. denied, 419 U.S. 834, 42 L. Ed. 2d 60, 95 S. Ct. 60 (1974). Moreover, it seems likely that Connecticut's courts would also look to federal interpretations of the Sherman Act to help determine the extent of antitrust regulation under CUTPA. We believe that Connecticut's courts would be guided by the strong suggestions from the federal courts that imposing liability for the act of filing a non-sham lawsuit would present serious constitutional problems, and would construe Connecticut law to avoid those problems. Especially since *Noerr-Pennington*'s statutory exemption is defined in terms of *first amendment* activity, we are confident that Connecticut's courts would carve out a similar exception to CUTPA and the common law, whether or not they believed that they were required to do so by the Constitution. In short, we conclude that the activity complained of here -- **HN2**[²] the filing of a single non-sham lawsuit -- cannot form the basis of a claim under CUTPA or Connecticut's common law of tortious interference with a business [**13] expectancy.

We affirm the judgment of the district court.

Honolulu v. Hawaii Newspaper Agency, Inc.

United States District Court for the District of Hawaii

February 10, 1983

Civil No. 79-0138

Reporter

559 F. Supp. 1021 *; 1983 U.S. Dist. LEXIS 19335 **; 1983-1 Trade Cas. (CCH) P65,327; 9 Media L. Rep. 1382

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Governments > Legislation > Statute of Limitations > General Overview

[**HN4**](#) Antitrust & Trade Law, Sherman Act

A continuing conspiracy to violate the antitrust laws has usually been understood to mean that each time a plaintiff is injured by an act of the defendants a cause of action accrues to plaintiff to recover the damages caused by that act and that, as to those damages, the statute of limitations runs from the commission of the act. However, each separate cause of action that so accrues entitles a plaintiff to recover not only those damages which plaintiff has suffered at the date of accrual, but also those which plaintiff will suffer in the future from the particular invasion, including what plaintiff has suffered during and will predictably suffer after trial.

Governments > Legislation > Statute of Limitations > Time Limitations

Governments > Legislation > Statute of Limitations > General Overview

[**HN5**](#) Statute of Limitations, Time Limitations

If a plaintiff feels the adverse impact of an antitrust conspiracy on a particular date, a cause of action immediately accrues to him to recover all damages incurred by that date and all provable damages that will flow in the future from the acts of the conspirators on that date. To recover those damages, the plaintiff must sue within the requisite number of years from the accrual of the action. Whereas future damages may not be recovered if they are speculative or cannot be proved, they may be recovered in future actions if they do in fact occur.

Governments > Legislation > Statute of Limitations > Time Limitations

Governments > Legislation > Statute of Limitations > General Overview

[**HN6**](#) Statute of Limitations, Time Limitations

Where the violation is final at its impact, for example, where the plaintiff's business is immediately and permanently destroyed, or where an actionable wrong is by its nature permanent at initiation without further acts, then the acts causing damage are unrepeatable, and suit must be brought within the limitations period and upon the initial act.

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

HN7 Trials, Judgment as Matter of Law

A directed verdict is only appropriate when the court finds that viewing the evidence and reasonable inferences therefrom in the light most favorable to the nonmoving party and without weighing witnesses' credibility, a reasonable jury could reach but one conclusion as to the verdict. There is abundant authority to the effect that directed verdicts may be granted when appropriate, even in complex antitrust cases involving issues of motive, intent and the like. Furthermore, the use of the motion for directed verdict in cases where the jury has failed to reach a decision has been held appropriate.

Antitrust & Trade Law > Exemptions & Immunities > Exempt Cartels & Joint Ventures

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Joint Contracts

HN8 Exemptions & Immunities, Exempt Cartels & Joint Ventures

Congress provided that the determination of whether or not a newspaper company should enter into a joint operating agreement with another newspaper company should be made by the Attorney General as to all joint operating agreements made after the Newspaper Preservation Act, [15 U.S.C.S. §§ 1801, et seq.](#), went into effect, and the attorney general's approval was required before any new or amended joint operating agreements could become effective. But as to joint operating agreements entered into before the Newspaper Preservation Act, [15 U.S.C.S. §§ 1801, et seq.](#), went into effect no such approval was required.

Antitrust & Trade Law > Exemptions & Immunities > Exempt Cartels & Joint Ventures

HN9 Exemptions & Immunities, Exempt Cartels & Joint Ventures

The court held that the business judgment rule should apply to all joint operating agreements entered into before the Newspaper Preservation Act, [15 U.S.C.S. §§ 1801, et seq.](#), effective date because such a judgment was in the nature of a business judgment, a judgment made by management in the regular course of business, a judgment generally held to be conclusive.

Judges: Curtis

Opinion by: CURTIS

Opinion

[*1022] The City and County of Honolulu as plaintiff¹ brings this antitrust action against the Star-Bulletin and the Honolulu Advertiser,² two daily newspapers published in Honolulu. The complaint alleges that in 1962 the two newspapers entered into a contract, combination and conspiracy to unreasonably restrain trade in violation of section 1 of the Sherman Act, Title 15 U.S.C. § 1, and in a conspiracy to monopolize trade and commerce in violation of section 2 of the Sherman Act, Title 15 U.S.C. [**2] § 2. The roots of this alleged combination and conspiracy extend back to May 31, 1962 when these newspapers entered into a Joint Operating Agreement (JOA), merging their commercial and mechanical operations under the terms of which, among other things, they set combined circulation and advertising rates.

By way of defense, the defendants contend that such agreement comes within the exemption provisions of the Newspaper Preservation Act (NPA), Title 15 U.S.C. § 1801, et seq., and in any event the action is barred by the statute of limitations or laches.

The court bifurcated the issues and proceeded to try the issues of laches and the applicability of the exception. This trial resulted in a mistrial as the jury was unable to [*3] reach a unanimous verdict. However, prior to submitting the case to the jury the defendants moved for a directed verdict on both the issues of laches and immunity, which motion the court took under submission, announcing its intention to withhold a ruling thereon until after the jury had returned a verdict. The parties agreed that the motion might be deemed a motion for judgment notwithstanding the verdict should the jury return a verdict unfavorable to the defendants. The court now has before it defendants' motion for judgment on these issues and for reasons which will hereinafter appear, the court concludes that this action is barred by the statute of limitations, and that the defendants are entitled to judgment as a matter of law on the exemption issue.

FACTUAL BACKGROUND

Let me begin with a brief review of the facts which have given rise to this controversy.

On May 31, 1962, the defendant newspapers entered into a JOA providing for the merger of their respective commercial and [*1023] mechanical departments for a period of thirty years, pursuant to which agreement subscription and advertising rates were jointly determined and profits were pooled and distributed according [*4] to an agreed formula. However, their respective editorial departments remained separate and independent. This was the type of arrangement which the Supreme Court in Citizen Publishing Co. v. United States, 394 U.S. 131, 22 L. Ed. 2d 148, 89 S. Ct. 927 (1969), held violated sections 1 and 2 of the Sherman Act. This Supreme Court decision in *Citizens*, however, alerted Congress to the rash of newspaper failures occurring throughout the United States, especially in those larger cities unable to support multiple daily newspapers. Congress was concerned with the resulting diminution in editorial output caused by this trend, and it feared that many localities would be left with only one editorial voice if the trend were to continue. In some communities daily newspapers rescued themselves from extinction by merging their commercial operations with those of a competing paper, while leaving their respective editorial staffs independent and competitive. In an attempt to preserve editorial competition within such communities, even at the risk of suffering some commercial anticompetitive impact, HN1³ Congress passed the NPA in 1970, which, among other things, granted antitrust immunity [*5] to newspapers having previously entered into such agreements where those agreements met the standards set forth in the Act.³ As to any future combinations, Congress granted immunity only upon the consent of the Attorney General.

¹ The City and County of Honolulu is a municipal corporation, a single entity.

² This action was originally brought by the City as a class action on behalf of all advertisers, but no class was ever certified and at this point, at least, the City is proceeding on its own account.

³ HN2⁴ 15 U.S.C. § 1803(a) provides:

It shall not be unlawful under any antitrust law for any person to perform, enforce, renew, or amend any joint newspaper operating arrangement entered into prior to July 24, 1970, if at the time at which such arrangement was first entered into,

STATUTE OF LIMITATIONS

Early in this litigation, this court ruled that the statute of limitations was not a bar to this action. However, defendants request this court to again consider that issue and, having done so, I have a different view from that which I have previously expressed.

This action was filed on **[**6]** March 23, 1979, some seventeen years after the JOA was entered into, and some nine years after the effective date of the NPA. Defendants urge again that this action is barred by the provisions of 15 U.S.C. § 15b,⁴ which establishes a limitation period of four years on antitrust actions. The plaintiff urges that in light of the allegations of continuing anticompetitive conduct the statute is not applicable on the theory of "continuing violations," citing Zenith Radio Corp. v. Hazeltine Research, 401 U.S. 321, 28 L. Ed. 2d 77, 91 S. Ct. 795 (1971). The Zenith Court explained the applicability of this theory as follows:

HN3 [↑] The basic rule is that damages are recoverable under the federal antitrust acts only if suit therefor is "commenced within four years after the cause of action accrued," 15 U.S.C. § 15b, . . . Generally, a cause of action accrues and the statute begins to run when a defendant commits an act that injures a plaintiff's business. See, e.g., Suckow Borax Mines Consolidated, Inc. v. Borax Consolidated, Ltd., 185 F.2d 196, 208 (CA9 1950); Bluefields S.S. Co. v. United Fruit Co., 243 F. 1, 20 (CA3 1917), appeal dismissed, 248 U.S. 595, 63 L. Ed. 438, **[**7]** 39 S. Ct. 136 (1919); 2361 State Corp. v. Sealy, Inc., 263 F. Supp. 845, 850 (ND Ill. 1967). This much is plain from the treble-damage statute itself. **HN4** [↑] 15 U.S.C. § 15. In the context of a continuing conspiracy to violate the antitrust laws, such as the conspiracy in the instant case, this has usually been understood to mean that each time a plaintiff is injured by an act of the defendants a cause of action accrues to **[*1024]** him to recover the damages caused by that act and that, as to those damages, the statute of limitations runs from the commission of the act. See, e.g., Crummer Co. v. Du Pont, 223 F.2d 238, 247-248 (CA5 1955); Delta Theaters, Inc. v. Paramount Pictures, Inc., 158 F. Supp. 644, 648 (ED La. 1958); Momand v. Universal Film Exchange, Inc., 43 F. Supp. 996, 1006 (Mass. 1942), aff'd, 172 F.2d at 49. However, each separate cause of action that so accrues entitles a plaintiff to recover not only those damages which he has suffered at the date of accrual, but also those which he will suffer in the future from the particular invasion, including what he has suffered during and will predictably suffer after trial. See, e.g., Farbenfabriken Bayer, **[**8]** A.G. v. Sterling Drug, Inc., 153 F. Supp. 589, 593 (NJ 1957); Momand v. Universal Film Exchange, Inc., *supra*, at 1006. Cf. Lawlor v. Loewe, 235 U.S. 522, 536, 59 L. Ed. 341, 35 S. Ct. 170 (1915). Thus, **HN5** [↑] if a plaintiff feels the adverse impact of an antitrust conspiracy on a particular date, a cause of action immediately accrues to him to recover all damages incurred by that date and all provable damages that will flow in the future from the acts of the conspirators on that date. To recover those damages, he must sue within the requisite number of years from the accrual of the action.

401 U.S. at 338-39.

The Court then goes on to point out that whereas future damages may not be recovered if they are speculative or unprovable, they may be recovered in future actions if they do in fact occur.

In In re Multidistrict **[**9]** Vehicle Air Pollution, 591 F.2d 68 (9th Cir. 1979), the court refused to apply the continuing violation theory. In that case AMF, the plaintiff, brought a treble damage antitrust action against the automobile manufacturers alleging conspiracy not to produce plaintiff's air pollution control device. In that case the court held that the refusal of the defendants constituted a single irrevocable act which, if unlawful, would have given rise to a cause of action at the time of the refusal, and since the action had not been brought within the time allowed, thereafter, it was barred by the statute of limitations. In *Multidistrict* the court said:

regardless of ownership or affiliations, not more than one of the newspaper publications involved in the performance of such arrangement was likely to remain or become a financially sound publication.

⁴ Any action to enforce any cause of action under sections 15, 15a, or 15c of this title shall forever be barred unless commenced within four years after the cause of action accrued.

In *Poster Exchange Inc. v. National Screen Serv. Corp.*, 517 F.2d 117 (5th Cir. 1975) *supra*, the Fifth Circuit clearly distinguished between injury final at its inception and a continuing wrong. A conspiracy had excluded Poster Exchange from access to supplies for a period stretching beyond the four-year limitations period. The court, unable to determine whether during the limitations period there was "a mere absence of dealing, or whether there was some specific act or word" of a wrongful nature, remanded for a determination [**10] of whether such acts or words occurred within the period. [517 F.2d at 128](#). Nevertheless, the court recognized: "Where [HN6](#)[] the violation is final at its impact, for example, where the plaintiff's business is immediately and permanently destroyed, or where an actionable wrong is by its nature permanent at initiation without further acts, then the acts causing damage are unrepeatable, and suit must be brought within the limitations period and upon the initial act."[""]

[591 F.2d at 72](#).

With the teachings of these cases in mind we now turn to an analysis of the facts. Admitting, as I think we must, that the alleged anticompetitive conduct is continuous within the meaning of *Zenith*, nevertheless, this conduct must be shown to be unlawful before we can apply the continuing violation rule, for unless the continuing conduct is unlawful the rule has no meaning. In *Zenith*, *In re Multidistrict Vehicle Air Pollution*, *Poster Exchange*, and their progeny dealing with the continuing violation rule, all assume the alleged anticompetitive conduct to be unlawful. Here the issue of whether the conduct is unlawful or not lies at the very heart of the problem. [Section 1803](#) provides that the [**11] conduct complained of by the plaintiff here is "not unlawful" if carried on by a newspaper which qualifies for the exemption. Our first task, therefore, [**1025] before considering the application of the continuing violation rule is to determine whether or not the newspapers qualify for the exemption. This inquiry takes us back to 1962 when the JOA was entered into. The formation of this agreement and the negotiations which led up to it constitute a single episode which had an immediate and permanent impact upon the plaintiff, for its avowed purpose was to engage in anticompetitive activity which could affect the plaintiff. The plaintiff could have brought an action challenging such a combination any time after its creation in 1962 up until 1970 without respect to the limiting statute, for during this period the theory of continued violations would have been applicable.

However, with the passage of the NPA, plaintiff's potential claim took on a somewhat different aspect. After the NPA, the theory of continuing violation could not be used to prevent the statute from running without a determination that the newspapers did not qualify for the exemption, for if they did, the [**12] alleged conduct was not unlawful and its continuation could not give rise to new causes of action.

When, then, did the cause of action which plaintiff here asserts first accrue? In my view, although the eligibility requirements contained in [section 1803](#) are based upon conduct which was final in 1962, plaintiff's right to challenge defendants' eligibility first occurred upon the passage of the NPA.

For example, an airline passenger buys a ticket for a specific flight in the future and on the day of departure finds that the airline has oversold the plane and is honoring tickets in the order of their issuance until the plane is filled. Although the airline's acceptance of the passenger on that flight depends upon when the passenger purchased the ticket, which occurred at an earlier time, his entitlement to board depends upon the application of a regulation which went into effect at the time of departure. It is at the time of departure that either he or other passengers have the first opportunity to challenge the application of the regulation. Similarly, the plaintiff's opportunity to challenge the defendants' eligibility for the exemption occurred for the first time the day the [**13] NPA went into effect. For four years thereafter, the plaintiff could have brought this action which would have determined whether the JOA, by its terms and considered in the light of the circumstances surrounding its creation, was such as to entitle the defendant newspapers to the exemption provisions of [section 1803](#). Nothing has accrued since which could give rise to a new cause of action on this issue. It seems clear therefore that there can be no reliance upon the continuing violation rule. Since this action was not brought until nine years after the cause of action first arose, it is barred by the four year statute of limitations.

Furthermore, this ruling is consistent with the purposes of the limitation statutes. The Professors Areeda and Turner in their authoritative antitrust treatise discussed the importance of limitations in the antitrust field as follows:

Limitations serve the same functions here as elsewhere in the law: to put old liabilities to rest and to relieve courts and parties from "stale" claims where the best evidence may no longer be available. Repose may seem especially valuable in the antitrust world where tests of legality are often rather vague, **[**14]** where liability doctrines change and expand, where damages are punitively trebled, and where duplicate treble damages for the same offense may be threatened. In addition, the disappearance of relevant evidence over time is often particularly pertinent in antitrust cases. Legality depends not only on the parties' acts but on many surrounding circumstances, including the behavior of rival firms and general market conditions -- matters which may be hard to reconstruct long afterwards.

II P. Areeda & D. Turner, Antitrust Law para. 325a at 119 (1978).

Plaintiff complains that this solution is illogical and cites as an example: Litigant A sues the newspapers in 1973, a time clearly within any statutory period. He assumes that the case results in a determination of **[*1026]** liability and damages for advertising purchased up through the time of the trial. Future damages would have been disallowed as speculative. He then supposes that Litigant B opens a business in Hawaii in 1976, and immediately begins to pay illegally fixed prices for advertising, from which he concludes that regardless of the fact that he sustained no previous damages and therefore had no earlier opportunity **[**15]** to sue, his action might nevertheless be barred. In the first place it is clear that if Litigant A sued the newspapers in 1973, which resulted in a finding of liability and damages for advertising purchased up through the time of the trial, although the plaintiff might not be entitled to future damages because they would be speculative and unprovable, in any subsequent action he could rely upon the previous ruling in his favor establishing liability which would then permit the continuing violation theory to apply, thus permitting him to recover any future damage from continuing unlawful competitive conduct. Insofar as Litigant B is concerned, the statute of limitations begins to run from the first time he has an opportunity to sue, and would therefore begin to run from the first occasion he suffers damage from illegal anticompetitive conduct.

CONCLUSION

For eight years, from 1962 until 1970, the plaintiff sat idly by and failed to complain of the defendants' conduct at a time when such a complaint might have been meritorious. For some nine years, from 1970 until this action was filed in 1979, it failed to assert a cause of action which, if it exists at all, arose in 1970. For **[**16]** a period of four years from 1970 there existed an appropriate forum in which plaintiff's complaints could have been heard and determined. In the event a court during that period had determined the defendants' conduct to be illegal, plaintiff's prayer for injunctive relief would undoubtedly have been granted. The separation of the complex merger of the commercial operations of these two newspapers could have been undone and damages, if any, would have been minimized. Plaintiff's delay in bringing this action has compelled the defendants to face the very difficulties which the limitation statutes are intended to prevent. As was said in *Poster Exchange*:

The function of the limitations statute is simply to pull the blanket of peace over acts and events which have themselves already slept for the statutory period, thus barring the proof of wrongs embedded in time-passed events.

517 F.2d at 127.

I hold therefore that this action is barred by the four year statute of limitations.

LACHES

As an additional defense, the defendants urge laches. Although the evidence overwhelmingly supports this defense, having found that there is an applicable statute of limitations, **[**17]** the defense of laches is unavailable. Straley v. Universal Uranium & Milling Corp., 289 F.2d 370 (9th Cir. 1961).

MOTION FOR DIRECTED VERDICT

We come now to a consideration of defendants' motion for a directed verdict. This court is well aware of the well established principle that [HN7](#) a directed verdict is only appropriate when the court finds that viewing the evidence and reasonable inferences therefrom in the light most favorable to the nonmoving party and without weighing witnesses' credibility, a reasonable jury could reach but one conclusion as to the verdict. [*Marquis v. Chrysler Corp.*, 577 F.2d 624, 639 \(9th Cir. 1978\)](#). There is abundant authority to the effect that directed verdicts may be granted when appropriate, even in complex antitrust cases involving issues of motive, intent and the like. See [*Santa Clara Valley Distributing Co. v. Pabst Brewing Co.*, 556 F.2d 942 \(9th Cir. 1977\)](#). Furthermore, the use of the motion for directed verdict in cases where the jury has failed to reach a decision has been held appropriate. See, [*Noonan v. Midland Capital Corporation*, 453 F.2d 459, 463 \(2d Cir. 1971\)](#), cert. denied, 406 U.S. 945, 32 L. Ed. 2d 333, 92 S. Ct. [\[**18\]](#) 2044 [\[*1027\]](#) (1972); [*O'Brien v. Thall*, 283 F.2d 741 \(2d Cir. 1960\)](#); [*Daniels v. Pacific-Atlantic S.S. Co.*, 120 F. Supp. 96 \(E.D.N.Y. 1954\)](#).

In this phase of the case the jury was confronted with the issue of whether or not the newspapers were qualified for the exemption provided in [section 1803](#). More specifically, was the Honolulu Advertiser, at the time the joint operating agreement was entered into, likely to remain or become a financially sound publication.

FACTUAL ISSUE

In framing the issue for submission to the jury, this court concluded that the "likelihood of the Advertiser remaining or becoming financially sound" was not a question of fact since it had not nor could it ever occur. It appeared rather to be a matter of judgment as to what might occur in the future. Being a matter of judgment, reasonable people might well disagree, in which case, whose judgment controls?

[HN8](#) Congress provided that such judgment should be made by the Attorney General as to all JOA's made after the NPA went into effect, for his approval was required before any new or amended JOA's could become effective. But as to JOA's entered into before the NPA, no such approval was required.

[\[**19\]](#) In the absence then of any indication from Congress as to whose judgment should control in such instances, we must fall back on such inferences as seem reasonable under the circumstances. Congress must have anticipated that such judgments would have been made by the managing officers of the newspapers as those most knowledgeable and most concerned. Since no procedural review was provided, Congress must have assumed that that judgment made by the management would have been controlling, certainly if it were made in good faith and with a reasonable basis in fact.

[HN9](#) In my view, therefore, such a judgment is in the nature of a business judgment, a judgment made by management in the regular course of business, a judgment generally held to be conclusive.

There is ample authority for the business judgment rule and it has been recognized recently in this circuit. [*Shivers v. Amerco*, 670 F.2d 826, 832 \(9th Cir. 1982\)](#). See also, [*Financial Industrial Fund, Inc. v. McDonnell Douglas Corp.*, 474 F.2d 514](#) (10th Cir.), cert. denied, 414 U.S. 874, 38 L. Ed. 2d 114, 94 S. Ct. 155 (1973); [*State Teachers Retirement Bd. v. Fluor Corp.*, 500 F. Supp. 278 \(S.D.N.Y. 1980\)](#), aff'd in relevant [\[**20\]](#) part, [654 F.2d 843 \(2d Cir. 1981\)](#). Accordingly, the jury was instructed as follows:

The decision as to whether the Honolulu Advertiser was likely to remain or become financially sound is a business judgment, the kind of judgment which business men in management positions are called upon to make in directing the affairs of their respective enterprises. The soundness of such decisions when made in good faith and with a reasonable basis cannot ordinarily be challenged in a court of law. If, after considering the facts in this case you find that the managing officers of the Honolulu Advertiser entered into the joint operating agreement in the honest belief that otherwise the Honolulu Advertiser was not likely to remain or become financially sound, and that belief had a rational basis in fact, you must find that the defendants are qualified for the exemption provided in the Newspaper Preservation Act and render your verdict in favor of the defendants.

REASONABLE BASIS IN FACT

This case is rather unusual in that although the facts are voluminous and complex, few are in dispute. The controversy here arises from the differing conclusions and inferences which the parties would **[**21]** have the jury draw from these largely uncontested facts.

For instance, working from exactly the same undisputed raw material, plaintiff's expert, a member of a widely known accounting firm with impressive credentials, after he and his staff had expended **[*1028]** some 3,000 hours and incurred a fee of some \$300,000, concluded that the Honolulu Advertiser was not only sound, but was prospering and was in fact on its way to becoming an outstanding successful enterprise, while the defendants' expert, also a member of a widely known accounting firm with equally impressive credentials, after spending some 2,500 hours and charging a fee of \$250,000, concluded that the Advertiser had experienced a long period of diminishing success and without the help of a joint operating agreement had no hope of future success. Both sides have supported their contentions with graphs, charts, statistical comparisons and accounting adjustments which, by reason of some mysterious legerdemain for which the accounting profession is well known, have given both of these contrary contentions an aura of credibility which is completely beyond the ability of lay persons to comprehend, let alone weigh. Fortunately, **[**22]** it is not necessary in this case to decide which contention is more likely to be correct, for we need only to determine whether the managing officers of the Advertiser acted in a good faith belief that their newspaper was not likely to remain or become financially sound and whether that conclusion had a rational basis in fact.

Basically, it seems that the testimony of experts as well qualified as those testifying for the defendants, after 2,500 hours of research, concluding that the Advertiser was not financially sound and was not likely to become sound at the time the joint operating agreement went into effect, would be sufficient to compel a finding that the managing officers of the Advertiser had a rational basis for such belief. The fact that plaintiff's expert, whose credentials may be equally impressive, comes to an opposite conclusion does no more than suggest that there may be a rational basis for both conclusions, each one of which is just as probable as the other. Since the JOA was in fact entered into, there is no way of proving which conclusion would have been correct.

In fact, the expert testimony in this case has been of doubtful value. The testimony of the experts **[**23]** for both sides has been of necessity speculative and conclusional. They have used seventeen years of hindsight and present day sophisticated techniques to arrive at their own respective reconstructions of the same undisputed raw data only to reach diametrically opposed conclusions. They have largely neutralized, if not destroyed, the persuasiveness of each others testimony.

Furthermore, we must not lose track of the fact that the judgment we are testing here was formed by the management of the Advertiser in 1961-62 without the help of expensive specialists in the field. So, especially in dealing with the question of good faith, we must view the facts as they appeared to the management group in 1961-62.

DEFINITION OF FINANCIAL SOUNDNESS

Before discussing the evidence, we must establish some definition of "financial soundness" as used in [section 1803](#). In this connection, the court instructed the jury as follows:

You may consider the phrase "financially sound" as meaning "earning a reasonable profit." The phrase "likely to remain financially sound" means likely to earn a reasonable profit for a reasonable period of time. The phrase "likely to become financially sound" **[**24]** means likely to become able to earn a reasonable profit within a reasonable period of time. "Likely" means probable. Something is likely if it looks as if it would happen. [Court's Jury Instruction No. 23.]

Defendants' economist Rosse stated without contradiction that a "return on sales" was a proper measure of economic soundness,⁵ and further testified that a normal return on sales for a going newspaper business was in the neighborhood of 12 to 16% before taxes. Although plaintiff's expert Stone used a 6% net return after taxes as a

⁵ Stone, however, preferred "return on equity" as a proper measure of economic soundness.

standard, this would translate into a rate of [*1029] 12% before taxes so that the difference between the two conclusions in this respect is insubstantial.

ANALYSIS

I shall not attempt to treat all of the mass of statistical evidence with which the record is filled, much of which I consider irrelevant. I shall confine myself to a few undisputed facts which were known to the [**25] Advertiser's managers and were relied upon by them, facts which I find relevant and persuasive. As a starting point, a comparison between the Advertiser's return on sales and that of the Star-Bulletin for the years immediately preceding the JOA seems appropriate. Although the experts could not agree precisely on these profit figures, after making such adjustments as each thought appropriate, their differences were so insubstantial as to be irrelevant. The following is such a comparison for the years 1956 through 1959, showing the net income before taxes for each year as calculated by defendants' expert Rosse with the corresponding return on sales. It also shows the calculation as made by plaintiff's expert Stone and a comparison with the return on sales by the Star-Bulletin.

Net Income (Losses) Before Tax

	Advertiser (Rosse)	Return On Sales	Advertiser (Stone)	Return On Sales	Star- Bulletin	Return On Sales
1956	\$142,618	4.91%	\$156,171	5.37%	\$560,119	11.31%
1957	20,537	.66%	30,204	.96%	658,528	12.37%
1958	138,530	4.29%	157,613	4.88%	922,782	15.55%
1959	(51,796)	(1.39%)	16,271	.49%	891,089	13.26%

[**26] The greatest disparity between the calculations of Rosse and Stone appears for the year 1959; whereas, Rosse shows a loss of \$51,796, Stone shows a profit of \$16,271. During this year the Advertiser put out a statehood edition, commemorating Hawaii's admission to the Union. This edition was widely sold and produced a substantial amount of money. Mr. Rosse considered such an edition a one-of-a-kind event which was not likely to reoccur and, therefore, should not be considered in demonstrating statistical trends. Mr. Stone, on the other hand, included it. But, in any event, even taking Mr. Stone's figures during this period of four years, the Advertiser's return on sales varied from .49% to 5.37%; whereas, the Star-Bulletin ranged from 11.31% to 15.55%. Furthermore, it is apparent that the Advertiser was showing a downward trend; whereas, the Star-Bulletin was showing an upward trend. Defendants' position that even during this period the Advertiser was not financially sound has considerable support in the evidence.

But the worse was yet to come. In 1960, the Advertiser suffered a net loss of \$110,615; whereas, the Star-Bulletin had a net income of \$888,591. In 1961, the Advertiser [**27] suffered a net loss of \$72,395; whereas, the Star-Bulletin had a net income of \$896,973.

The joint operating agreement went into effect May 31, 1962. Consequently, there were five months of independent operation by the Advertiser in 1962, prior to the JOA. It is this so called "stub" period which forms the principal basis for the difference of opinion of the two experts. Plaintiff contends that the statistics during this period indicate that the Advertiser had turned the corner and was on its way to an improved financial condition. The defendants, on the other hand, contend that such statistics are entirely irrelevant as they are incomplete and form no reliable basis for future projections. But even if they are relevant, defendants argue, when adjusted to reflect the true circumstances in which the statistics arose, they completely fail to support Mr. Stone's conjecture that the Advertiser had turned the corner and was on its way to success and prosperity.

During this stub period, it appears that the Advertiser made a net profit of \$22,348, [*1030] which represents a return on sales of only 1.35%. This figure was not arrived at by the Advertiser's auditors until March [**28] of 1963, after the JOA was formed. During the first five months of 1962, the management only had before it monthly statements which were inconclusive. In three of the five months, the operation resulted in a loss, and in two profits were earned. Mr. Stone, by making various adjustments, arrives at a profit of \$40,742 for the stub period, a return of 2.48% on sales, still far below the percentage of profit expected by a sound newspaper enterprise.

Furthermore, the defendants contend that the operating profit of \$22,348 as shown by their auditors for the five-month period, if used at all, is subject to certain normalizing adjustments. It appears that their circulation manager, when he heard of the probability of the JOA, resigned as of the first of the year and was not replaced, which caused a saving of \$6,000. Also, the promotion director likewise was terminated at an additional saving of \$6,270. This, together with other normalizing adjustments totaling \$31,510, indicates that had the Advertiser been operating in a normal fashion, and after a proper allocation of expenses on an annual basis, it would have sustained a loss during the five-month period of \$14,666. As these facts **[**29]** are uncontested, they tend to refute plaintiff's contention that the fortunes of the Advertiser had turned for the better.

It is a well established fact that the life blood of the newspaper business is its advertising revenue. This in turn is dependent upon its circulation. Plaintiff contends that during the five-month period both advertising lineage and circulation showed an increase, which indicated that the Advertiser's financial position had turned the corner, and that it was on the way to a profitable operation.

It is uncontradicted that beginning in 1956 a strenuous effort was made on the part of management to improve the Advertiser. New personnel was brought in in an effort to improve the newspaper in all of its aspects. It was also admitted that the editorial content of the newspaper was greatly improved to the point that in the opinion of one witness, at least, the Advertiser was superior editorially to the Star-Bulletin. During this same period an intensive campaign was launched to increase both circulation and advertising lineage by the use of generous discounts, contests and other promotional devices. Although this effort did increase both the circulation and advertising **[**30]** lineage for the Advertiser, it did not produce a comparable increase in revenue. The effort, nevertheless, continued during the latter days of 1961 in order to enhance the Advertiser's negotiating position with the owners of the Star-Bulletin in forming a JOA, the necessity of which by that time had become apparent. The defendants point out that the slight increase in the circulation and advertising lineage during the stub period was the after effect of the high pressure promotion which was terminated at the end of 1961, and that such increased circulation and advertising lineage could not have been maintained without continuing the highly expensive promotional activity which produced it.

But beyond all this, the Advertiser was faced with an event which was to have a permanent, devastating effect upon its future. Prior to 1960, the Advertiser had one distinctive advantage over the Star-Bulletin in that it published a Sunday edition; whereas, the Star-Bulletin did not. Since many merchants preferred Sunday advertising, the Advertiser's Sunday edition had been an important source of revenue. In 1960, however, the Star-Bulletin management decided to put out a Sunday edition. This **[**31]** had a profound effect upon the market. Whereas, the Advertiser had a Sunday circulation during the last quarter of 1959 of 92,520, in the first quarter of 1960 after the Star-Bulletin came into the market with a Sunday circulation of 110,670, the Advertiser's Sunday circulation dropped for that quarter to 84,798, and during 1961 it continued to drop further. According to the testimony of the defendants' witnesses, at that time it became apparent to them that the Advertiser would continue to lose advertising lineage to the Star-Bulletin in the future **[*1031]** and that the Advertiser could no longer successfully compete. The Advertiser's managers then concluded that the only hope for their enterprise was to enter into some joint operating agreement with the Star-Bulletin.

There can be little question but that the evidence establishes, without serious conflict, a rational basis for the belief on the part of the management of the Advertiser that the only hope to maintain an editorial voice in the community was by combining the commercial portions of the two newspapers, as many other newspapers in similar financial conditions had done, and which was thought then to be permissible.

[32] GOOD FAITH**

The management personnel of the Advertiser testified under oath that they believed in good faith that the Advertiser was not financially sound nor would become financially sound without entering into a joint operating agreement with the Star-Bulletin, and there is no hard evidence to the contrary. The plaintiff's charges of a lack of good faith are based entirely upon inferences which it seeks to have the jury draw from facts which neither warrant nor permit such inferences. It is abundantly clear that the finder of fact can draw only such inferences as are *reasonable* in the light of the evidence taken as a whole. The evidence here simply will not support those inferences of bad faith

which the plaintiff suggests. I shall not attempt to discuss all which plaintiff mentions, but only a few where their unreasonableness may not be readily apparent.

Plaintiff points out that two members of the Board of Directors testified that they were unaware that the Advertiser was in bad financial condition and that the minutes of the meeting gave no such indication. These two members were Loren Thurston and Katsuro Miho, neither of whom were active in the management. The minutes [**33] of the meetings merely showed that the financial position of the company "was reported," but stated no details. These facts fall short of furnishing a basis for an inference of lack of good faith.

Plaintiff then refers to the evidence indicating that the matter of a possible JOA had been mentioned many times in previous years, obviously as a method of rescuing the Advertiser's operations, and that an expert in the field of antitrust law had been consulted in connection with a JOA. This is thoroughly consistent with the testimony as a whole, that the Advertiser had been in bad financial condition for some time, that the JOA had been considered as a possible solution, and that in accomplishing it the management did not wish to violate any antitrust law. Certainly these facts can give no support to an inference of bad faith.

Plaintiff makes much of Twigg-Smith's "goal" memorandum of March 21, 1961, wherein, Mr. Twigg-Smith indicated that he hoped for a larger share than was ultimately realized in the JOA, and in which he indicated an intention to continue the intensive promotion of advertising and circulation in order to strengthen the Advertiser's negotiating strength. Any inference [**34] from these facts of bad faith could not possibly be supported by these facts.

Plaintiff relies heavily upon the fact that during the years 1960-61, Twigg-Smith and his friends made various purchases of Advertiser stock, from which plaintiff would have us infer that these purchases were motivated entirely because of their desire to make an immediate profit. Mr. Chapman testified without contradiction that he bought the stock because of his interest in the enterprise of which he was a part, and that he believed he would not lose anything in the long run since the value of the assets, in the event of liquidation, would be sufficient to cover his investment. This testimony was supported by Mr. Chin Ho who said that the newspaper was more valuable dead than alive.

On one occasion, it appears that Mr. Twigg-Smith's brother told Mrs. Thurston, in an attempt to urge her to vote affirmatively for the JOA, that "we are going to make nothing but money." This statement is nothing more than an expression of optimism [*1032] which would not be unexpected from a stockholder who had endured through many of the corporation's unproductive years and finally has hopes of profit if the JOA goes [**35] into effect. This is completely irrelevant on the issue of good faith.

Plaintiff suggests that the Advertiser was not broke, as it could borrow money. One banker testified, however, that he had refused to loan the Advertiser money because he could see no way in which it could pay it back. Plaintiff speculates as to where and how loans could have been obtained. However, there is no evidence to indicate that a mere loan of money would have turned a losing operation into a profitable one. As the evidence indicates, one of the main reasons that the Advertiser could not be expected to become financially sound was that it was losing circulation and advertising to the much stronger Star-Bulletin, a trend which no loan would have reversed.

In my view, the evidence shows here without substantial conflict that the Advertiser had been in serious financial trouble for many years, in that it was not making a reasonable profit for a newspaper publishing company. In 1960-61, it suffered severe financial losses. Its managing officers, justifiably concerned with the future of the Advertiser, decided in 1961 to seek a JOA with the Star-Bulletin. It is further my view that the evidence shows [**36] without substantial conflict that the management negotiated and effected the creation of the JOA in the good faith belief that it was necessary in order to preserve the Advertiser's editorial staff as an editorial voice in the community separate and apart from that of the Star-Bulletin. The evidence further indicates without conflict that there was a reasonable basis in fact for such a belief. I conclude that no jury composed of reasonable people who understood and followed my instructions could come to any other conclusion in the light of the evidence taken as a whole.

I hold, therefore, that the defendant newspapers are entitled to the exemption from antitrust prosecution afforded by section 1803, and that they are therefore entitled to judgment as a matter of law.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

[HN2](#) [down arrow] Monopolies & Monopolization, Actual Monopolization

To establish monopolization, a plaintiff must prove: (1) possession of monopoly power in the relevant market; (2) willful acquisition or maintenance of that power; and (3) causal "antitrust" injury.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

[**HN3**](#) [down] **Actual Monopolization, Anticompetitive & Predatory Practices**

Predatory pricing occurs when a company that controls a substantial market share lowers its prices to drive out competition so that it can charge monopoly prices, and reap monopoly profits, at a later time.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

[**HN4**](#) [down] **Actual Monopolization, Anticompetitive & Predatory Practices**

To establish predatory pricing under the Inglis test, a plaintiff must prove that the anticipated benefits of defendant's price depended on its tendency to discipline or eliminate competition and thereby enhance the firm's long-term ability to reap the benefits of monopoly power. If the defendant's prices were below average total cost but above average variable cost, the plaintiff bears the burden of showing defendant's pricing was predatory. If, however, the plaintiff proves that the defendant's prices were below average variable cost, the plaintiff has established a *prima facie* case of predatory pricing and the burden shifts to the defendant to prove that the prices were justified without regard to any anticipated destructive effect they might have on competitors.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

[**HN5**](#) [down] **Actual Monopolization, Anticompetitive & Predatory Practices**

The appellate court has already recognized that prices exceeding average total cost might nevertheless be predatory in some circumstances.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Evidence > Burdens of Proof > Clear & Convincing Proof

[**HN6**](#) [down] **Actual Monopolization, Anticompetitive & Predatory Practices**

If the challenged prices exceed average total cost, the plaintiff must prove by clear and convincing evidence -- i.e., that it is highly probably true -- that the defendant's pricing policy was predatory.

Civil Procedure > Appeals > Standards of Review

[**HN7**](#) [down] **Appeals, Standards of Review**

The appellate court may uphold correct conclusions of law even though they are reached for the wrong reason or for no reason, and may affirm a correct decision on any basis supported by the record.

Opinion

[*1380] OPINION PREGERSON, Circuit Judge:

Appellant Transamerica Computer Company (Transamerica), a wholly owned subsidiary of Transamerica Corporation, alleges that Appellee International Business Machines (IBM) violated [Section 2](#) of the Sherman Act, [15 U.S.C. § 2](#), when it took various actions to combat emerging competition in the "plug-compatible" peripherals market. The district court held that IBM's actions did not violate the antitrust laws.

On appeal, Transamerica challenges the district court's ruling that IBM's acts did not "unreasonably restrict" competition and, in particular, challenges the court's [*2] test for predatory pricing. We affirm the district court's decision but modify its test for predatory pricing.

BACKGROUND

At the heart of a computer system is the central processing unit (CPU), which houses arithmetical and logical electronic circuits. Attached to the CPU are devices called "peripherals," which perform input, output, storage, and control functions. IBM, long the dominant force in the computer industry, was, and remains, the major supplier of both CPUs and peripherals.

In 1967, a number of companies began offering plug-compatible peripherals -- devices which could be attached to IBM's CPUs. These plug-compatible manufacturers (PCMs) enjoyed immediate market success because they offered, at substantial discounts, plug-compatible peripherals that performed as well as or better than IBM's peripherals.

Transamerica was formed to supply needed capital to PCMs. In financing transactions central to this case, Transamerica purchased millions of dollars of peripherals from two PCMs, Marshall Industries and Telex Corporation, which had previously leased these items to end users. Under this arrangement, these PCMs raised substantial capital, and Transamerica, in addition to [*3] acquiring the equipment and underlying leases, received substantial tax advantages.

IBM responded to vigorous competition from the PCMs by engaging in a number of programs which Transamerica characterizes as violations of the Sherman Act. These challenged programs included:

(1) *Leasing Program* -- Prior to May 1971, IBM customers could either buy peripheral equipment or lease it on a month-to-month basis. In May 1971, IBM announced an additional method of leasing peripheral equipment -- a Fixed-Term Lease Plan under which customers could lease peripheral equipment for one year at an eight percent discount below the month-to-month rate, or for two years at a sixteen percent discount.

(2) *Design Changes* -- In the early 1970s, IBM redesigned the interface between the CPU and the peripherals of three tape drive systems so that PCM's peripherals would no longer be [*1381] compatible with IBM's CPUs. IBM also removed an optional selector channel from two CPU models, the System 370 Models 115 and 125, so that PCM's peripherals could no longer be used with those models.

(3) *Pricing Behavior* -- Also in the early 1970s, IBM introduced several "new" products [*4] -- basically repackaged versions of prior peripherals -- at lower prices.

* The Honorable Malcolm Lucas, United States District Judge for the Central District of California, sitting by designation.

Whether one characterizes IBM's actions as "meeting" competition or "precluding" competition, there is no doubt that IBM's strategy worked. Transamerica, along with fifteen out of seventeen companies involved with plug-compatible peripherals, left the market after suffering huge losses.

Because of IBM's actions in the peripherals market, Transamerica sued IBM for violations of the antitrust laws. Several other companies involved with plug-compatible peripherals also brought suits against IBM. Although initially consolidated, the actions were tried separately. Two of those actions, involving issues and facts similar to those presented here, have already been before this court. In both instances we upheld directed verdicts for IBM. [California Computer Products, Inc. v. IBM, 613 F.2d 727 \(9th Cir. 1979\)](#) (CalComp); [Memorex Corp. v. IBM, 636 F.2d 1188 \(9th Cir. 1980\)](#), cert. denied, 452 U.S. 972, 69 L. Ed. 2d 983, 101 S. Ct. 3126 (1981) (Memorex).

The instant case went to trial before a jury in December 1978. The trial consumed 120 days. After deliberating for ten days, the jury deadlocked and [**5] was discharged. Under a pretrial stipulation, the district judge then became the trier of fact. He ruled for IBM on all major issues. He held that (1) IBM was not a monopolist in either the general computer systems market or the peripherals market; (2) assuming, arguendo, that IBM possessed monopoly power, its leasing program, its design changes -- with the exception of the design of the System 370 Models 115 and 125 -- and its pricing behavior did not unreasonably restrain competition; (3) IBM had not attempted to monopolize the general computer systems market or the peripherals market; and (4) assuming that Transamerica established antitrust liability, it had not proved that it suffered antitrust damages. The district court also found that IBM's redesign of the System 370 Models 115 and 125 would have unreasonably restricted competition had IBM been a monopolist, but since IBM was not a monopolist and since Transamerica suffered no damages resulting from that design change, IBM's redesign of the two CPUs did not render IBM liable for antitrust damages. [In re IBM Peripheral EDP Devices Antitrust Litigation, Transamerica Computer Co. Inc. v. IBM, 481 F. Supp. 965 \(N.D. Cal. 1979\)](#) [**6] (Transamerica Computer).

STANDARD OF REVIEW

Transamerica challenges several of the district court's findings of fact.¹ The district court's findings may not be reversed unless clearly erroneous. [Fed. R. Civ. P. 52\(a\)](#). Under this standard

[\[HN1\]](#) a] finding is "clearly erroneous" when although there is evidence to support it, the reviewing court on the entire evidence is left with the definite and firm conviction that a mistake has been committed.

[United States v. United States Gypsum Co., 333 U.S. 364, 395, 92 L. Ed. 746, 68 S. Ct. 525 \(1948\)](#).

[**7] [*1382] MONOPOLIZATION AND ATTEMPT TO MONOPOLIZE

Transamerica charges that IBM either monopolized or attempted to monopolize certain segments of the computer market. These separate offenses are governed by different tests. [\[HN2\]](#) To establish monopolization, a plaintiff must prove:

- (1) possession of monopoly power in the relevant market;
- (2) willful acquisition or maintenance of that power; and
- (3) causal "antitrust" injury.

¹ Transamerica also challenges a number of jury instructions, arguing that

because this was a jury trial and because there was no waiver of the jury, this Court has the same duty to review the instructions and if erroneous and prejudicial, to reverse the judgment below as it would in any other jury trial.

Transamerica Brief at 27.

Transamerica, however, freely and unconditionally stipulated before trial that the district court would decide the case if the jury was unable to reach a verdict. The stipulation was intended to avoid the expense of a retrial. 10/20/78 Tr. 8-10; 11/17/78 Tr. 18-20. By so stipulating, Transamerica agreed to a court trial if the jury deadlocked, and thus instructions given to the deadlocked jury are irrelevant to this appeal.

CalComp, 613 F.2d at 735.

To establish that a defendant attempted to monopolize, a plaintiff must prove:

- (1) specific intent to control prices or destroy competition with respect to a part of commerce;
- (2) predatory or anticompetitive conduct directed to accomplishing the unlawful purpose;
- (3) a dangerous probability of success; and
- (4) causal "antitrust" injury.

Id. at 736.

There is an important relationship between the second elements of these two offenses. Conduct that does not constitute "willful acquisition or maintenance" of monopoly power (thus precluding establishment of the offense of monopolization) *cannot* constitute the "predatory or anticompetitive conduct" required to establish [**8] the offense of attempt to monopolize. See *CalComp, 613 F.2d at 738*, quoting 3 P. Areeda & D. Turner, ***Antitrust Law*** P 828, at 321 (1978) ("conduct lawful for a monopolist must, *a fortiori*, be excluded as a basis for the attempt offense."). We will analyze IBM's conduct with this principle in mind. We will assume that IBM possessed monopoly power. If IBM's conduct proves lawful despite that assumption, then, *a fortiori*, IBM's conduct could not constitute an attempt to monopolize, thereby eliminating the need to consider this offense.

LEASING PRACTICES

Transamerica alleges that IBM's Fixed Term Lease Plan (FTP) unreasonably restrained competition. Plaintiffs in both *CalComp* and *Memorex* challenged the legality of the FTP. Both times, this court upheld directed verdicts in favor of IBM on that issue. *CalComp, 613 F.2d at 741-42; Memorex, 636 F.2d at 1188*. The district court here also concluded that the FTP was legal. *Transamerica Computer, 481 F. Supp. at 1001-02*.

Transamerica asserts that this court's previous decisions on the FTP are not controlling because they were based on findings of fact proved erroneous in the instant trial. The district [**9] court's findings of fact, however, are indistinguishable from the findings in *CalComp* and *Memorex*. Transamerica has not demonstrated that the district court's findings in the instant case are clearly erroneous. Therefore, the holdings of *CalComp* and *Memorex* control our disposition of this issue, and the district court's holding must be affirmed. See also *Greyhound Computer Corp. v. IBM, 559 F.2d 488, 498-99 (9th Cir. 1977)*, cert. denied, 434 U.S. 1040, 54 L. Ed. 2d 790, 98 S. Ct. 782 (1978).

DESIGN CHANGES

IBM's design changes challenged in this case -- redesign of the interface between the CPU and certain peripherals -- are of the same type as those previously contested in *CalComp* and *Memorex*. Those cases upheld the legality of IBM's design changes. The district court here made a similar ruling, finding that the contested changes were improvements in the products, were not unreasonably restrictive of competition, and hence did not violate the *Sherman Act*.² *Transamerica Computer, 1*13831 481 F. Supp. at 1003-05*. Transamerica has not demonstrated how the design changes in this case can be distinguished from the changes in the two other cases [**10] or how the district court's findings are clearly erroneous. Again, on the authority of *CalComp* and *Memorex*, we affirm the district court's ruling that the interface changes were not unreasonable. See also *Telex Corp. v. IBM, 510 F.2d 894, 902, 906 (10th Cir. 1975)*, rev'd *367 F. Supp. 258 (N.D. Okla. 1973)*, cert. dismissed, 423 U.S. 802, 96 S. Ct. 8, 46 L. Ed. 2d 244 (1975).

²This court has stated that in determining whether a defendant's conduct constitutes the willful acquisition or maintenance of monopoly power required for the offense of monopolization, "the test is whether the defendant's acts, otherwise lawful, were unreasonably restrictive of competition." *CalComp, 613 F.2d at 735-36* (footnote omitted) (emphasis in original). Likewise, we have said that to determine whether defendant's conduct constitutes the kind of predatory or anticompetitive action required for the offense of attempt to monopolize, "individual conduct is measured against the same 'reasonableness' standard." *Id. at 737.*

[**11] Transamerica also charges that IBM's redesign of the System 370 Model 115 and 125 CPUs unreasonably restricted competition. The 115 and 125 models were the smallest of IBM's System 370 CPUs. The models included a channel for attaching slower speed devices. The district court found that IBM redesigned the models to operate just short of the speed that would have enabled peripherals manufactured by PCMs to attach, and thus that the change unreasonably restricted competition. [Transamerica Computer, 481 F. Supp. at 1006-08.](#)

The district court, however, refused to award Transamerica damages for two reasons. First, it found that IBM did not possess monopoly power in the requisite market. Second, it found that Transamerica did not suffer any injury as a result of IBM's conduct because

the market for the tapes excluded by this conduct was insignificant. Only tape drives with data rates between 30 and 50KB were affected. Those were older, low performance technology devices that would only have been competitive at prices far below those contemplated in Transamerica's damage claim. Transamerica probably owned some of them, but its President didn't know how many, and any Transamerica [**12] owned were purchased in the second Telex tape contract. Because that contract was not an arms-length transaction, this Court would be reluctant to award Transamerica any damages on the equipment purchased thereunder. Also, there is no evidence that Transamerica in the past supplied peripherals for the 115/125 migrator systems, or that it intended to, or took any steps to supply peripherals for the 115 and 125 systems.

[Transamerica Computer, 481 F. Supp. at 1008 n. 109.](#)

We need not consider the first of these findings -- that IBM lacked monopoly power -- because we hold that the district court's finding that Transamerica suffered no damages attributable to the redesign of the Models 115 and 125 is not clearly erroneous. Without proving antitrust injury, Transamerica cannot recover for the antitrust violation if, in fact, any violation occurred. [CalComp, 613 F.2d at 732.](#) We affirm the district court's holdings on IBM's design changes.

PREDATORY PRICING

A. *The District Court's Findings*

In response to the challenge from the PCMs, IBM introduced several "new" products which actually were repackaged versions of existing products. The "new" products were priced below [**13] the older versions. Transamerica asserts that these lower prices were predatory.

The district court carefully examined these price cuts. [Transamerica Computer, 481 F. Supp. at 996-1002.](#) It concluded that IBM expected the new products to "return substantial profits," [id. at 997](#); that, in fact, the products were profitable; and that the prices at issue exceeded the average total cost of producing the products. [Id. at 1002.](#) After an extensive analysis, the court concluded that IBM's pricing policy was legal.

The district court's finding that the challenged prices exceeded IBM's average cost is not clearly erroneous.³ The district [*1384] court, however, applied an incorrect test in deciding whether such prices are predatory. We set out the correct test below, apply that test to this case, and conclude that IBM's pricing policy was legal.

³ At trial, IBM presented evidence that the prices challenged by Transamerica were above average total cost. Transamerica contended that IBM's prices, after application of several accounting adjustments, were below average total cost. The district court held that the adjustments were inappropriate. [Transamerica Computer, 481 F. Supp. at 998-1001.](#) Transamerica does not appeal this ruling.

Transamerica also asked the district court to include "impact costs" in calculating IBM's profits. Impact costs are the "reduction in anticipated future profits on an existing product line caused by the introduction of a new product line." [In re IBM Peripheral EDP Devices Litigation, Transamerica Computer Co. Inc. v. IBM, 459 F. Supp. 626, 631 \(N.D. Cal. 1978\).](#) The district court ruled before trial that impact costs should not be included in calculating total costs because to do so would create a disincentive to research and innovation and because impact costs are difficult to calculate. *Id.* Despite this pre-trial ruling, Transamerica was

[**14] B. *The Economic and Legal Background*

We differ with the district court on the proper analysis of situations where a defendant's prices are alleged to be predatory even though they exceed the defendant's average total cost. To analyze such situations, a preliminary discussion of economic terminology and legal precedents is helpful.

HN3 [↑] Predatory pricing occurs when a company that controls a substantial market share lowers its prices to drive out competition so that it can charge monopoly prices, and reap monopoly profits, at a later time. *William Inglis & Sons Baking Co. v. ITT Continental Baking Co., Inc.*, 668 F.2d 1014, 1031-32 (9th Cir. 1981), cert. denied, 459 U.S. 825, 103 S. Ct. 57, 74 L. Ed. 2d 61 (1982); *Janich Bros., Inc. v. American Distilling Co.*, 570 F.2d 848, 856 (9th Cir. 1977), cert. denied, 439 U.S. 829, 58 L. Ed. 2d 122, 99 S. Ct. 103 (1978); L. Sullivan, *Handbook of the Law of Antitrust* 109 (1977). It can be difficult, however, to distinguish predatory price cuts intended to eliminate competition from legitimate price cuts designed to meet or beat competition. An influential attempt to clarify the distinction was made by Professors Phillip Areeda [**15] and Donald Turner, who proposed a "cost-based" test for predation.⁴ Under such a test, the relation between the cost of producing a product and the price charged for it is the criterion for determining whether the price is predatory.

Economists, however, measure a firm's costs in a number of ways, and these measures are relevant in understanding the Areeda-Turner proposal and this court's reaction to it. Costs are divided into *fixed costs* (those that do not vary with changes in output) and *variable costs* (which do so vary). *Total cost* is the sum of fixed and variable costs. *Marginal cost* is the increment to total cost that results from producing an additional unit of output. *Average cost*, or *average total cost*, is obtained by dividing total cost by output. Likewise, *average variable cost* is the sum of all variable costs divided by output. Average cost [**16] [*1385] is thus higher than average variable cost for all output levels.⁵

Areeda and Turner suggest that prices be considered *per se* lawful (i.e., non-predatory) if they exceed the defendant's marginal cost or average variable cost,⁶ [**17] and that prices be considered *per se* illegal (predatory) if they are below marginal or average variable cost.⁷ The rationale for this cost-based *per se* test is the belief that a company that makes a profit, however small, on each additional product does so because it is efficient, and should

allowed to introduce evidence of impact costs. Transamerica Brief at 21, 50; 72 Tr. 12445-519, 73 Tr. 12541-47, 12568-97, 12614-19, 12645-50, 12666-87. Transamerica does not contend on appeal that it was precluded from introducing any evidence on impact costs. Although evidence of impact costs was before the district court, it did not discuss such costs in reaching its findings of fact on Transamerica's predatory pricing claim. On appeal, Transamerica contends the district court committed prejudicial error in foreclosing consideration of impact costs.

Our review of the record indicates that these costs were speculative. IBM's old products were also being displaced by products produced by PCMs. While IBM might have "lost" profits through the introduction of new products, it arguably would have lost more without the new products. The profits that Transamerica claims IBM could have reaped from its old products might never have been realized by IBM because of competition from the PCMs. In these circumstances, we cannot say that the district court was clearly erroneous in not including impact costs in its calculations. *But see* Ordover and Willig, *An Economic Definition of Predation: Pricing and Product Innovation*, 91 Yale L.J. 8, 26 n. 49 (1981). We do not foreclose the possibility that impact costs ought to be considered when appropriate.

⁴ Areeda & Turner, *Predatory Pricing and Related Practices Under Section 2 of the Sherman Act*, 88 Harv. L. Rev. 697 (1975).

⁵ See 3 P. Areeda & D. Turner, *Antitrust Law* P 712, for a full discussion of these terms.

⁶ Areeda and Turner favor using marginal cost as "the economically sound division between acceptable, competitive behavior and 'below-cost' predation." Areeda & Turner, *supra* note 4, at 716. They recognized, however, that marginal cost is usually difficult or impossible to compute and suggested using average variable cost -- which is likely to approximate marginal cost -- as a surrogate. *Id.* at 716-18.

⁷ Areeda and Turner make an exception where marginal cost exceeds average total cost. In this rare case, the price "floor" for permissible pricing is average total cost. Areeda & Turner, *supra*, note 4, at 713.

not face antitrust challenges, whereas a company that loses money on the sale of an additional product is doing so presumably for anti-competitive reasons.

The Areeda-Turner test has provoked much judicial and academic comment.⁸ [**19] This court has been influenced by the Areeda-Turner test without unqualifiedly embracing it. In a series of opinions during the three years preceding the district court's decision reviewed here,⁹ we approved the use of marginal or average variable cost in establishing predation without making that mode of proof exclusive, as Areeda and Turner advocate. Indeed, we adopted neither the Areeda-Turner test's conclusive presumption that prices above marginal or average variable cost are legal, nor its conclusive presumption that prices below that cut-off point are predatory. It is true that in *Hanson v. Shell Oil Co.*, 541 F.2d 1352, 1359 [*1386] n.6 (9th Cir. 1976), cert. denied, 429 U.S. 1074, 50 L. Ed. 2d 792, 97 S. Ct. 813 (1977), we spoke of "proof of pricing below marginal or average variable [**18] cost" as a "prerequisite to a *prima facie* showing of an attempt to monopolize." Nevertheless, we suggested that prices above marginal or average variable cost might, in appropriate circumstances, be found predatory, *id. at 1358 n.5*, and we reiterated that point in *CalComp*, 613 F.2d at 743. We also explicitly denied that prices below marginal or average variable cost were *per se* unlawful. *Hanson*, 541 F.2d at 1359 n.6. In short, the closest we were willing to move to the Areeda-Turner approach was to acknowledge that a "price set at or above marginal cost should not *ordinarily* form the basis for an antitrust violation." *Janich Bros., Inc. v. American Distilling Co.*, 570 F.2d at 857 (footnote omitted) (emphasis added).

Any doubt that this circuit rejects the *per se* aspects of the Areeda-Turner test was dispelled in *William Inglis & Sons Baking Co. v. ITT Continental Baking Co., Inc.*, 668 F.2d 1014 (9th Cir. 1981), cert. denied, 459 U.S. 825, 103 S. Ct. 57, 74 L. Ed. 2d 61 (1982), decided after the district court's decision in the instant case. In *Inglis* we

⁸ While no courts have explicitly adopted the Areeda-Turner test in its entirety for all cases, a number of courts have adopted elements of the Areeda-Turner test. See, e.g., *Northeastern Tel. Co. v. American Tel. & Tel. Co.*, 651 F.2d 76, 87-88 (2d Cir. 1981), cert. denied, 455 U.S. 943, 102 S. Ct. 1438, 71 L. Ed. 2d 654 (1982); *Chillicothe Sand & Gravel Co. v. Martin Marietta Corp.*, 615 F.2d 427, 431-32 (7th Cir. 1980); *Pacific Eng'g & Prod. Co. v. Kerr-McGee Corp.*, 551 F.2d 790, 797 (10th Cir.), cert. denied, 434 U.S. 879, 98 S. Ct. 234, 54 L. Ed. 2d 160 (1977); *National Ass'n of Regulatory Util. Comm'r's v. FCC*, 173 U.S. App. D.C. 413, 525 F.2d 630, 637-38 & n.34 (D.C.Cir.), cert. denied, 425 U.S. 992, 96 S. Ct. 2203, 48 L. Ed. 2d 816 (1976); *International Air Indus. Inc. v. American Excelsior Co.*, 517 F.2d 714, 723-25 (5th Cir. 1975), cert. denied, 424 U.S. 943, 47 L. Ed. 2d 349, 96 S. Ct. 1411 (1976).

The Areeda-Turner test also generated a number of counter proposals for evaluating predatory pricing. Sullivan, for example, suggests that courts look to "human animus" in market conduct. He would focus on the "traces" a predator leaves behind, such as documents containing information about competitors. Sullivan, *Economics and More Humanistic Disciplines: What are the Sources of Wisdom for Antitrust?*, 127 U. Pa. L. Rev. 1214, 1229-30, 1232 (1977).

Joskow and Klevorick suggest a complex cost-based test in which market structure is considered and the defendants have a greater burden to produce documentation of their costs. Joskow & Klevorick, *A Framework for Analyzing Predatory Pricing Policy*, 89 Yale L.J. 213 (1979).

Williamson considers output a more important factor than cost or price. He would prohibit a monopolist confronted with a new competitor from increasing its output for twelve to eighteen months. This restraint would diminish as the entrant gained experience and economies of scale. Williamson, *Predatory Pricing*, 87 Yale L.J. 284 (1977).

For the most recent discussion of these ideas and the Areeda-Turner test see Note, *Predatory Pricing: The Retreat From the AVC Rule and the Search for a Practical Alternative*, 22 B.C.L. Rev. 467 (1981).

See also Ordover and Willig, *An Economic Definition of Predation: Pricing and Product Innovation*, 91 Yale L.J. 8 (1981); Baumol, *Quasi-Permanence of Price Reductions: A Policy for Prevention of Predatory Pricing*, 89 Yale L.J. 1 (1979); Williamson, *Predatory Pricing: A Strategic and Welfare Analysis*, 87 Yale L.J. 284 (1977).

⁹ *California Computer Products, Inc. v. IBM*, 613 F.2d 727 (9th Cir. 1979); *Janich Bros., Inc. v. American Distilling Co.*, 570 F.2d 848 (9th Cir. 1977), cert. denied, 439 U.S. 829, 58 L. Ed. 2d 122, 99 S. Ct. 103 (1978); *Hanson v. Shell Oil Co.*, 541 F.2d 1352 (9th Cir. 1976), cert. denied, 429 U.S. 1074, 50 L. Ed. 2d 792, 97 S. Ct. 813 (1977).

explained that prices are predatory when their justification rests, "not on their effectiveness in minimizing losses, but on their tendency to eliminate rivals and create a market structure enabling the seller to recoup his losses." *Id.* at 1035.¹⁰ We emphasized that this standard, "and not rigid adherence to a particular cost-based rule . . . must govern our analysis of alleged [**20] predatory pricing." *Id.* Yet *Inglis* did not, as Transamerica contends here, repudiate all cost-based tests. Rather, it laid down a cost-based test for allocating the burden of proof on the predation issue in place of one designed (like the Areeda-Turner test) to resolve that issue conclusively:

HN4[] To establish predatory pricing a plaintiff must prove that the anticipated benefits of defendant's price depended on its tendency to discipline or eliminate competition and thereby enhance the firm's long-term ability to reap the benefits of monopoly power. If the defendant's prices were below average total cost but above average variable cost, the plaintiff bears the burden of showing defendant's pricing was predatory. If, however, the plaintiff proves that the defendant's prices were below average variable cost, the plaintiff has established a *prima facie* case of predatory pricing and the burden shifts to the defendant to prove that the prices were justified without regard to any anticipated destructive effect they might have on competitors.

Id. at 1035-36.

[**21] C. The Treatment of Prices Above Average Total Cost

The *Inglis* test, quoted above, addresses only two categories of prices -- those below average variable cost (which, under burden shifting, the defendant must prove are non-predatory)¹¹ and those above average variable cost but below average total cost (which the plaintiff has the burden of proving are predatory). The *Inglis* test says nothing about how to evaluate prices for antitrust purposes that exceed average total cost. Indeed, *Inglis* explicitly left this question open. *668 F.2d at 1035 n.30.*

In the instant case, the district court, which did not have the benefit of *Inglis* and its clarification of our previous discussions of the Areeda-Turner test, held that prices above average total cost "should be conclusively presumed legal." *Transamerica Computer, 481 F. Supp. at 991.*¹² We disagree [**22] for several reasons.

[*1387] First, **HN5[]** this court has already recognized that prices exceeding average total cost might nevertheless be predatory in some circumstances. The specific example we discussed was "limit pricing," in which a monopolist sets prices above average total cost but below the short-term profit-maximizing level so as to discourage new entrants and thereby maximize profits over the long run. See 3 P. Areeda & D. Turner, *supra* P 714b. We explained that "limit pricing by a monopolist might, on a record which presented the issue, [**23] be held an impermissible predatory practice." *CalComp, 613 F.2d at 743.* A similar pricing strategy would be for a monopolist to make *temporary* reductions to a level above average total cost but below the profit-maximizing price whenever a new entrant appears ready to enter the market. One or two such reductions could discourage potential entrants in a market that requires sizable initial investments, leaving the monopolist free to raise his prices to monopoly levels. See 3 P. Areeda & D. Turner, *supra* P 714c. Such a pricing strategy, like limit pricing, could well be found predatory.¹³

¹⁰ See also *D & S Redi-Mix v. Sierra Redi-Mix & Contracting Co., 692 F.2d 1245, 1249 (9th Cir. 1982).*

¹¹ Of course, plaintiff initially bears the burden of proving that defendant's price did in fact fall into this category of suspect prices.

¹² To this extent the district court was, as it noted, agreeing with Areeda and Turner. *Transamerica Computer, 481 F. Supp. at 991.* It disagreed with them, however, by concluding that prices below average total cost are not *per se* lawful even if they exceed average variable cost. *Id. at 991-95.* The treatment of prices between average total cost and average variable cost has since been settled in this circuit by *Inglis* and is not at issue here.

¹³ We do not mean to suggest that all pricing that is not profit maximizing in the short run is illegal. As we stated in *Inglis*, prices below the level at which profit is maximized "may legitimately be justified on long-term considerations, as long as those do not include the anticipation of enhanced market power as a result of predation." *Inglis, 668 F.2d at 1034 n.29.*

Second, the district court's **[**24]** *per se* test rests on the notion that price reductions to average total cost result from efficient production and harm only less efficient competitors. *Transamerica Computer, 481 F. Supp. at 991*. But companies may lower their prices for temporary strategic reasons as well. One critic of the Areeda-Turner test points out that a monopolist can employ price strategies that jeopardize consumers' long-run welfare without lowering prices below average total cost and concludes that "it is unrealistic and even analytically wrong to apply a simple short-run price-cost rule for determining whether exclusionary pricing by a monopolist is socially undesirable and therefore predatory." Scherer, *Predatory Pricing and the Sherman Act: A Comment*, 89 Harv. L. Rev. 869, 890 (1976). It may be difficult in many or most instances to assess the long-run consequences of challenged pricing policies.¹⁴ But where those difficulties can be overcome, the law should not prevent plaintiffs from proving antitrust violations.

[25]** Third, the uncertainty and imprecision inherent in determining "costs" counsel against basing conclusive presumptions on the relation between prices and costs. Assessing those relations for the products of a multi-product firm requires allocating known and estimated costs and revenues among various products. While accounting problems do not warrant ignoring cost figures completely, they do make it unwise to rely exclusively on such figures.

Finally, we should hesitate to create a "free zone" in which monopolists can exploit their power without fear of scrutiny by the law. A rule based exclusively on cost forecloses consideration of other important factors, such as intent, market power, market structure, and long-run behavior in evaluating the predatory impact of a pricing decision.¹⁵

[26] [*1388]** For these reasons, we disagree with the district court's conclusion that prices above average total cost should be legal *per se*. Rather, we believe that *Inglis* adopted the proper approach to the use of cost figures in determining whether prices are predatory: cost categories should be used to allocate the burden of proof on the issue of predation. By this approach, we give due weight to the economic considerations which suggest that prices are presumptively lawful if they exceed marginal or average variable cost and presumptively predatory if they do not. And, of course, this approach does not preclude a litigant from introducing evidence sufficient to overcome these presumptions. *Inglis* followed this approach in evaluating prices below average variable cost and prices between average variable cost and average total cost. The logic of the *Inglis* approach applies with equal force in evaluating prices above average total cost.

The test for determining the antitrust legality of prices that exceed average total cost should be consistent with the *Inglis* approach and with our view that cost-price relations should not be the exclusive method of proving predation. **[**27]** In addition, the test should be consistent with the economic analysis of Areeda and Turner. Their analysis indicates that prices above average total cost will rarely be predatory.¹⁶ Therefore, it is appropriate to impose on

¹⁴ Cf. Areeda & Turner, *Scherer on Predatory Pricing: A Reply*, 89 Harv. L. Rev. 891, 897 (1976); 3 P. Areeda & D. Turner, *supra* note 5, P 715, at 166-67.

¹⁵ The Seventh Circuit also recognizes the importance of considering non-price factors in evaluating whether a pricing policy is predatory. *Chillicothe Sand & Gravel Co. v. Martin Marietta Corp.*, 615 F.2d 427, 432 (7th Cir. 1980); see also *MCI Communications Corp. v. American Tel. & Tel. Co.*, 708 F.2d 1081, slip op. at n.58 (7th Cir. 1983). Cf. *Pacific Eng'g & Prod. Co. v. Kerr-McGee Corp.*, 551 F.2d 790, 797 (10th Cir.), cert. denied, 434 U.S. 879, 98 S. Ct. 234, 54 L. Ed. 2d 160 (1977).

This is also the position of the National Commission for the Review of Antitrust Laws and Procedures, Report to the President and the Attorney General (Jan. 22, 1979). As the Deputy Attorney General for the Antitrust Division noted, cost-based tests do not "truly reflect marketplace realities and provide for anticompetitive behavior." He also noted that even Areeda and Turner "are now troubled by excluding factors like direct evidence of intent." Remarks of Ky P. Ewing, Jr., Deputy Assistant Attorney General, Antitrust Division, before the Fifth Annual Symposium on *Antitrust Law*, The Southwestern Legal Foundation, Dallas, Texas, on May 9, 1980. [1980] Trade Reg. Rep. (CCH) P 55,936. The report recommends that the Sherman Act should be amended to provide that, although marginal cost should be considered in determining whether prices are predatory, showing of pricing below marginal cost should not be a prerequisite to make out an attempt to monopolize based on pricing practices. Report to the President at 40.

the plaintiff a greater burden of proving that prices above average total cost are predatory than the burden imposed by *Inglis* to prove that prices between average variable and average total cost are predatory. We therefore hold that **HN6**¹⁶ if the challenged prices exceed average total cost, the plaintiff must prove by clear and convincing evidence -- i.e., that it is highly probably true -- that the defendant's pricing policy was predatory.

D. ****28** *The Proper Test Applied to This Case.*

While we modify the test applied by the district court, we affirm the court's decision that IBM's pricing policy did not violate the antitrust laws.¹⁷

The district court found that IBM's prices were above its average total cost. *Transamerica Computer*, 481 F. Supp. at 1002. This finding was not clearly erroneous. Thus, to prevail on its claim of predatory pricing, Transamerica must prove by clear and convincing evidence that IBM's pricing policy unreasonably restricted competition. The exhaustive trial record, containing a plethora of evidence on pricing behavior, market structure, production ****29** costs, marketing strategies, and other related information, fails to provide any clear and convincing evidence of predatory pricing.¹⁸ ****30** Transamerica did not, for example, introduce evidence that IBM's prices rose once competition had left the market. The only price increases cited by Transamerica were modest increases in the mid-1970's. During that ***1389** inflationary period, however, IBM increased prices on all its products, not just those involved in this case. Transamerica did not prove that IBM engaged in limit pricing.¹⁹ Transamerica simply introduced evidence of an initial price cut, hardly an unusual act in the computer industry or unusual in the face of competition. Transamerica's evidence of predatory pricing falls far short of the type of clear and convincing evidence that would permit the trier of fact to find predatory pricing when prices are above average total cost.

****31** CONCLUSION

¹⁶ Predatory pricing should not be countenanced merely because it would be difficult to detect in situations where price exceeds average total cost. See *Chillicothe Sand & Gravel Co. v. Martin Marietta Corp.*, 615 F.2d 427, 432 (9th Cir. 1980) ("Section 2 of the Sherman Act makes no exceptions for cases involving administrative difficulty.").

¹⁷ **HNT**¹⁷ "We may uphold correct conclusions of law even though they are reached for the wrong reason or for no reason, and we may affirm a correct decision on any basis supported by the record." *United States v. Washington*, 641 F.2d 1368, 1371 (9th Cir. 1981), cert. denied sub nom. *Duwamish Indian Tribe v. Washington*, 454 U.S. 1143, 71 L. Ed. 2d 294, 102 S. Ct. 1001 (1982).

¹⁸ At trial, Transamerica was not precluded from introducing evidence of predatory pricing. The district court's ruling that prices above average total cost are *per se* legal was made after the trial concluded.

¹⁹ While Transamerica contends that it proved that IBM engaged in limit pricing, the evidence suggests otherwise. Limit pricing exists where entry barriers are "great enough to prevent other entry," *Hanson*, 541 F.2d at 1358 n.5, or are "extremely high," *Pierce Packing Co. v. John Morrell & Co.*, 633 F.2d 1362, 1366 (9th Cir. 1980). Here, the district court found that the entry barriers to the peripherals market were "extraordinarily low." *Transamerica Computer*, 481 F. Supp. at 987.

Further, a limit price is designed to deter entry into the market. To be limiting, therefore, the price must generally be below competitors' prices. Here, "IBM's prices did not undercut the PCM's prices, they did not even equal them, they merely closed the gap; the PCM's prices were still lower." *Id. at 1002*.

The evidence also suggests that IBM's prices did not have a limiting effect. A number of companies entered the peripherals market and took substantial business from IBM. *Id.* at 986. The early success of the PCMs suggests that no limit pricing occurred.

Finally, while *CalComp* held that "limit pricing by a monopolist might, on a record which presented the issue, be held an impermissible predatory practice," *613 F.2d at 743*, *CalComp* found that IBM's prices did not constitute limit pricing but rather were a lawful response to competition. *Id.* Transamerica's evidence is indistinguishable from *CalComp*'s. As in *CalComp*, we find that the evidence does not indicate that IBM engaged in limit pricing.

Thus, even assuming that IBM possessed monopoly power in the relevant market, its lease plan, design changes, and pricing policy did not constitute unreasonable restrictions on competition. On this record, IBM was entitled to judgment as a matter of law. Therefore, we need not consider whether the district court erred in finding that IBM did not possess monopoly power, *Transamerica Computer*, 481 F. Supp. at 974-87, or that Transamerica had failed to prove damages. *Id.* at 1010-21.

The judgment is AFFIRMED.

Concur by: LUCAS

Concur

LUCAS, District Judge, concurring:

I agree that the judgment of the district court in favor of defendant should be affirmed. I disagree, however, with the court's modification of the trial court's test for predatory pricing.

Professors Areeda and Turner, in their article, *Predatory Pricing and Related Practices Under Section 2 of the Sherman Act*, 88 Harv. L. Rev. 697 (1975), proposed an exhaustive *per se* rule for determining whether pricing conduct should be deemed predatory: (1) prices above reasonably anticipated average variable cost should be conclusively presumed lawful; and (2) prices below reasonably anticipated average [**32] variable cost should be conclusively presumed unlawful.¹ In the nearly seven years since this article appeared many courts have considered this suggestion. See Spivak, *Monopolization Under Sherman Act*, *Section 2*, 50 *Antitrust Law* Journal 285, 313-14 n.132 (1982). Although it appears that no court has adopted this proposed rule without modification or qualification, many courts have agreed with Areeda and Turner that the relationship between prices and average variable cost is of significance in evaluating pricing behavior under the Sherman Act. *Id.* This court, in *William Inglis & Sons, Co. v. ITT Continental Baking Co., Inc.*, 668 F.2d 1014 (9th Cir. 1981), cert. denied, 459 U.S. 825, 103 S. Ct. 57, 74 L. Ed. 2d 61 (1982), made clear that the relationship was to be used to allocate the burden of proof on the issue of predation, rather than to resolve the issue conclusively. In thus modifying Areeda and Turner's suggested rule, the court explicitly declined to address their [*1390] more modest yet important suggestion that prices above average *total* cost should be conclusively presumed legal.² Judge Schnacke found this limited rule to be sound and used [**33] it in granting judgment in favor of defendant. In my opinion, the trial court was correct.

[**34] In rejecting the approach taken by Judge Schnacke, the court expresses four concerns. First the court points out that under certain circumstances price reductions might properly be labeled "predatory" even though prices never fall to average total cost or below. Two examples are given, both of which have often been discussed by the academic and by the courts: limit pricing and temporary price reductions in an industry with high entry barriers. See, e.g., Areeda & Turner, *supra*, at 705-09; *In re IBM Peripheral EDP Devices Antitrust Litigation*, *Transamerica Computer Co. Inc. v. IBM*, 481 F. Supp. 965 (N.D. Cal. 1979) [Transamerica Computer]; Scherer, *Predatory Pricing and the Sherman Act: A Comment*, 89 Harv. L. Rev. 869 (1976). The second concern voiced by the court is that the district court erred in assuming that all "price reductions to average total cost result from

¹ Noting that "marginal cost data are typically unavailable," Professors Areeda and Turner use average variable cost as a surrogate for marginal cost. Areeda & Turner, *Predatory Pricing and Related Practices Under Section 2 of the Sherman Act*, 88 Harv. L. Rev. 697, 717 (1975).

² *Inglis, supra*, 668 F.2d 1014, 1035 n.30. Average total cost is, by definition, always higher than average variable cost. See Areeda & Turner, *supra*, note 1, at 700-01. A *per se* rule tied to average total cost creates, therefore, a smaller area in which pricing conduct will be presumed to be legal than a rule tied to average variable cost. (It is true that average variable cost is used as a surrogate for marginal cost and that marginal cost can, in some unusual cases, exceed average total cost. *Id.* Areeda and Turner modify their marginal cost rule in these cases, however, to provide that prices below marginal cost are legal if they exceed average total cost. *Id.* at 712-13.)

efficient production and harm only less efficient competitors." *Ante*, at 1387. This, however, merely restates the first concern noted by the court, for the only price reductions not attributable to efficient production which should be labeled "predatory" are those which harm equally or more [**35] efficient competitors. These fall into the two categories noted in the above examples. Indeed, the court's final argument, that "we should hesitate to create a 'free zone' in which monopolists can exploit their power without fear of scrutiny by the law," expresses the same fear voiced in the first two arguments.

The fear that some pricing conduct in the realm above average total cost might have socially undesirable effects in the long run does not, however, necessarily provide an adequate justification for adopting the rule approved by the court. One must also evaluate the practical utility of the rule, the consequences of adopting such a rule, and the advantages which a contrary rule, in this case a *per se* rule, might provide.

The court concedes that pricing conduct above average total cost will only "rarely" have socially undesirable effects and, thus, constitute predation. *Ante*, at 1388.³ Thus, even absent any practical problems of proof, the court's rule will seldom yield a result different from that which a *per se* rule would yield. The court also recognizes, however, that there will be problems of proof in this area. *Ante*, at 1387 n.14. It will be extremely [**36] difficult if not impossible to prove up facts sufficient to support a finding of predation where prices do not drop below average total cost. See *Transamerica Computer, supra, 481 F. Supp. at 991*. These practical difficulties, combined with the higher burden of proof imposed by the court today, raise a serious question as to whether liability will in fact be imposed in those rare cases in which it might be.

Yet, while the court's rule is likely to have little practical utility, it could well inhibit socially desirable conduct. As Judge Schnacke noted below:

It would be all but impossible to distinguish between above cost limit pricing conduct and a monopolist's [**37] procompetitive reaction to lower priced competitors. [*1391] One external characteristic is common to both cases, a lowered price. An attempt to attach liability to the one will surely inhibit the indistinguishable other.

Transamerica Computer, supra, at 991 (footnotes omitted). Furthermore, the rule approved by the court may well increase the number of meritless antitrust actions filed: without a reasonable "safe harbor" in which to seek shelter, every monopolist engaged in legal price competition above average total cost will be a potential target for attack by a competitor attempting to prove that its case is one of the rare instances of predatory pricing conduct.

In addition to these shortcomings, it cannot be doubted that the court's rule will increase the difficulty of trying complex antitrust cases. Cf. *Inglis, supra, at 1063-64* (Judge Wallace dissenting from denial to rehear *en banc* voiced similar concerns with the court's rejection of the marginal cost rule). A *per se* rule, by contrast, would provide a manageable way of significantly simplifying some aspects of many cases.

In addition to the court's fear of monopolist exploitation of the "free [**38] zone" above average total cost, the court gives an additional ground for rejecting a *per se* rule: the difficulty of calculating costs. Because such costs are difficult to calculate, the court finds it unwise to base conclusive presumptions on the price-cost relationship. Though difficult, the task of calculating costs is not impossible. As with other difficult factual issues, the finder of fact, aided by expert testimony, will, I believe, be able to determine average total cost with reasonable precision. Thus, I cannot agree that the difficulty of calculating costs warrants rejection of a useful and sound decisional tool such as the *per se* test tied to average total cost.

On balance, I find the limited *per se* rule adopted by Judge Schnacke to be preferable to the test approved by the court today. I would affirm the judgment without modifying the trial court's test for predatory pricing.

³ Even Spivak, who disagrees vigorously with the price tests put forward by Areeda and Turner, concedes that where prices are above average total cost, courts could "almost invariably" decide the predatory pricing issue on cost data alone. See Spivak, *Monopolization Under Sherman Act, Section 2*, 50 Antitrust L.J. 285, 315-16 (1982).

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN1[] Exemptions & Immunities, Parker State Action Doctrine

Cities are not themselves sovereign; they do not receive all the federal deference of the states that create them. The limitation of the antitrust exemption to official action directed by a state, is consistent with the fact that the States' subdivisions generally have been treated as equivalents of the States themselves. In light of the serious economic dislocation which could result if cities were free to place their own parochial interests above the nation's economic goals reflected in the antitrust laws, the courts are especially unwilling to presume that Congress intended to exclude anticompetitive municipal action from their reach.

Governments > Local Governments > Claims By & Against

Antitrust & Trade Law > Exemptions & Immunities > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN5 [down] Exemptions & Immunities, Parker State Action Doctrine

The state need not compel a municipality to undertake an anticompetitive activity as a prerequisite for municipal immunity. The only immunity available to municipalities is that derived from the immunity granted to the states. The critical inquiry is to determine if the anticompetitive conduct undertaken by a municipality constitutes state action. Any municipality acting pursuant to clearly articulated and affirmatively expressed state policy which evidences an intent of the legislature to displace competition with regulation -- whether compelled, directed, authorized, or in the form of a prohibition -- is entitled to antitrust immunity because conduct pursuant to such a policy would constitute state action.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN6 [down] Exemptions & Immunities, Parker State Action Doctrine

If the state compels or directs a municipality to undertake anticompetitive conduct, this compulsion or direction is strong evidence of a state policy to displace the antitrust laws.

Governments > Public Improvements > Sanitation & Water

HN7[] Public Improvements, Sanitation & Water

Governments > Public Improvements > Sanitation & Water

HN8[] Public Improvements, Sanitation & Water

Wis. Stat. § 66.069(2)(c) applies to water utilities. Its provisions are incorporated into the statute governing municipal sewage systems by Wis. Stat. § 66.076(8).

Governments > Public Improvements > Sanitation & Water

HN9[] Public Improvements, Sanitation & Water

See Wis. Stat. § 144.07.

Governments > Local Governments > Boundaries

Governments > Public Improvements > Sanitation & Water

HN10[] Local Governments, Boundaries

Wis. Stat. § 144.07(lm) is constitutional. The statute balances and accommodates two matters of state concern: providing vital services to areas surrounding cities and the growth or expansion of cities or villages, with annexation as a means to bring all municipal services to areas annexed.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN11[] Exemptions & Immunities, Parker State Action Doctrine

State supervision is unnecessary to exempt municipal action from antitrust exemption because local governments operate pursuant to clearly articulated and affirmatively expressed restraints imposed by the state in its policies and delegation of authority. If the conduct of local government in providing municipal services is authorized by the state and is clearly articulated and affirmatively expressed as state policy, the activity is state action and entitled to immunity even though state supervision does not exist.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN12[] **Parker State Action Doctrine, Local Governments & Private Parties**

A state is not held to the high standard of active supervision of the conduct of a city performing a traditional municipal function for that city to receive antitrust immunity. The only requirement for receiving immunity when a traditional municipal function is involved is that the challenged restraint must be in furtherance or implementation of clearly articulated and affirmatively expressed state policy.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN13[] **Exemptions & Immunities, Parker State Action Doctrine**

Traditional municipal activity undertaken pursuant to clearly articulated and affirmatively expressed state policy and designed to promote public health and safety should be free from antitrust attack. When municipal activity strays from these functions, which includes the provision of basic services such as sewerage and sanitation, there is a more significant threat to free competition that may warrant active state supervision.

Counsel: Claude J. Covelli, Boardman, Suhr, Curry & Field, Madison, Wisconsin, for Plaintiff.

Frederick W. Fischer, Eau Claire, Wisconsin, for Defendant.

Judges: Eschbach, Circuit Judge, Coffey, Circuit Judge, and Wisdom, * Senior Circuit Judge.

Opinion by: WISDOM

Opinion

[*377] WISDOM, Senior Circuit Judge.

Four towns allege that a city is using a monopoly over sewage treatment services in [*378] the relevant geographic market to gain a monopoly in the markets for sewage collection and sewage transportation in violation of the Sherman Act, [15 U.S.C. § 1 et seq. \(1973\)](#), the Federal Water Pollution Control Act, [33 U.S.C. § 1251 et seq. \(1978\)](#), and a state common law duty of a utility to serve. On appeal, the towns contend that the district court erred in dismissing their claims under the Sherman Act on the ground that the conduct in question falls within the state action immunity doctrine of [Parker v. Brown, 1**21 317 U.S. 341, 63 S. Ct. 307, 87 L. Ed. 315 \(1943\)](#). We conclude that the conduct in question is exempt from the antitrust laws under *Parker* and [Community Communications Company v. City of Boulder, 455 U.S. 40, 102 S. Ct. 835, 70 L. Ed. 2d 810 \(1982\)](#), and we affirm the district court's decision.

I.

* Honorable John Minor Wisdom, Senior Circuit Judge for the United States Court of Appeals for the Fifth Circuit sitting by designation.

The plaintiffs-appellants -- Town of Hallie, Town of Seymour, Town of Union, and Town of Washington ("Towns") -- are four Wisconsin townships that are adjacent to the City of Eau Claire ("City"). The City used federal funds to build a sewage treatment facility within the city limits, and this sewage treatment facility is the only such facility in the market available to the Towns. As a result, the City enjoys a monopoly in the market for sewage treatment services.¹

[**3] The City has refused to supply sewage treatment services to the Towns. The district court found that the City has provided sewage treatment services to individual landowners in the Towns only if they will agree to become annexed by the City and thereby obtain sewage collection and transportation services from the City. *Town of Hallie v. City of Eau Claire*, No. 80-C-527, slip op. at 1 (W.D. Wisc. April 5, 1982). By refusing to provide treatment services to the Towns, the City has prevented the Towns from competing in the markets for sewage collection and transportation. The Towns simply have no means of disposing of the sewage once they collect and transport it, so they do not collect it at all.

In their complaint seeking injunctive relief, the Towns alleged that the City's denial of sewage treatment services to them violated the Sherman Act, the Federal Water Pollution Control Act, and a common law duty of a utility to serve. The City moved to dismiss the complaint pursuant to Fed.R.Civ.Pro. 12(b), and the district court granted the motion. The district court dismissed the antitrust claims on the grounds that the City's conduct was exempt from the Sherman Act under *Parker* [**4] *v. Brown*.² The district court dismissed the Federal Water Pollution Control Act claim, holding that the Act does not provide a right to sue, that the Towns failed to pursue administrative remedies, and that the Act does not mandate the action that the Towns seek. After dismissing the federal claims, the district court dismissed the pendent state claim.

On appeal, the Towns contest only the denial of their antitrust claims. The Towns contend that the City's conduct is exempt from the Sherman Act only if it is in furtherance of clearly articulated [**5] and affirmatively expressed state policy and it is actively supervised by the State of Wisconsin. The Towns contend that state action immunity is unavailable to the City because it has met neither of these two requirements. The City contends that its denial of services to the Towns is authorized by clearly articulated state policy and that state action immunity protects its conduct.

[*379] II.

In *Parker v. Brown*, 317 U.S. 341, 63 S. Ct. 307, 87 L. Ed. 315 (1943), the Supreme Court addressed the issue whether the federal antitrust laws prohibited the State of California from adopting a program that prevented raisin producers from freely marketing their crop in interstate commerce. The Court held that the marketing program was exempt from the antitrust laws by virtue of limitations in the Sherman Act and concepts of federalism:

We find nothing in the language of the Sherman Act or in its history which suggests that its purpose was to restrain a state or its officers or agents from activities directed by its legislature. In a dual system of government in which, under the Constitution, the states are sovereign, save only as Congress may constitutionally subtract [**6] from their authority, an unexpressed purpose to nullify a state's control over its officers and agents is not lightly to be attributed to Congress.

317 U.S. at 350-51, 63 S. Ct. at 313, 87 L. Ed. at 326.

¹ The disposal of sewage is a three-step process. Sewage must be collected from the user, transported to the treatment facility, and treated and disposed of by the treatment facility. The City's monopoly in this case extends only to the third step.

² The Towns brought their antitrust claims under a number of theories. The first claim was that the City used its monopoly over sewage treatment to gain a monopoly over sewage collection and transportation. The second claim was that requiring the consumer to obtain sewage and collection services in order to gain sewage treatment services constituted an illegal tying arrangement. The third claim was that the City's conduct was an illegal refusal to deal with the Towns.

The Supreme Court later addressed the question whether the "state action" immunity exemption of *Parker v. Brown* was available to a state's municipalities.³ ^{**8]} In *City of Lafayette v. Louisiana Power & Light Co.*, [435 U.S. 389, 98 S. Ct. 1123, 55 L. Ed. 2d 364 \(1978\)](#),⁴ a private utility company brought suit under the Sherman Act against several Louisiana cities empowered to own and operate electric utility systems and alleged that they had committed various antitrust offenses in their operation of their utility systems. A majority of the Court rejected the contention that Congress did not intend the Sherman Act to apply to local governments, and a plurality of the Court stated:

HN1[] Cities are not themselves sovereign; they do not receive all the federal deference of the states that create them. *Parker*'s limitation of the exemption to "official action directed by a state," is consistent with the fact that the States' subdivisions generally have been treated ^{**7]} as equivalents of the States themselves. In light of the serious economic dislocation which could result if cities were free to place their own parochial interests above the Nation's economic goals reflected in the antitrust laws, we are especially unwilling to presume that Congress intended to exclude anticompetitive municipal action from their reach.

[435 U.S. at 412-413, 98 S. Ct. at 1136, 55 L. Ed. 2d at 382-83](#). The Court recognized, however, that the state as sovereign might sanction anticompetitive activity by the municipalities and immunize this activity from antitrust liability.⁵ The Court concluded that **HN2[]** "the *Parker* doctrine exempts only anticompetitive conduct engaged in as an act of government by the State as sovereign, or, by its subdivisions, pursuant to state policy to displace competition with [^{*380}] regulation or monopoly public service." *Id. at 413, 98 S. Ct. at 1137, 55 L. Ed. 2d at 383*.⁶

[9]** The Supreme Court returned to the issue of state action immunity for municipalities in *Community Communications Co. v. City of Boulder*, [455 U.S. 40, 102 S. Ct. 835, 70 L. Ed. 2d 810 \(1982\)](#).⁷ The Court

³ During the period from 1943 to 1975, the Supreme Court did not address the state action immunity question. Since 1975, the Court has addressed the issue of immunity under *Parker* in seven cases. The Court responded to the concern that states and municipalities were sheltering too much conduct that contravened the antitrust laws, such as restrictive licensing practices, state action serving as a mask for private cartels, and instances of nominal state regulation in which the state took no active role. M. Handler, *Reforming the Antitrust Laws* 59 (1982). There was also the concern that regulated industries control their regulators and that private corporations use the political process to obtain monopoly profits. See R. Posner, *Economic Analysis of Law* 405-07 (2d ed. 1977).

⁴ For a discussion of the Court's decision in *City of Lafayette*, see Areeda, *Antitrust Immunity for "State Action" After Lafayette*, 95 Harv.L.Rev. 435 (1981) [hereinafter "Antitrust Immunity"].

⁵ The Court recognized that **HN3[]** municipal corporations are instrumentalities of the state for the convenient administration of government and that a state may choose to effect its policies through the instrumentality of its cities and towns. *City of Lafayette*, [435 U.S. at 413, 98 S. Ct. at 1137, 55 L. Ed. 2d at 383](#). See *Community Communications Co. v. City of Boulder*, [455 U.S. 40, 51, 102 S. Ct. 835, 840, 70 L. Ed. 2d 810, 819 \(1982\)](#).

⁶ The Court in *City of Lafayette* reviewed a series of opinions dealing with the *Parker* exemption. The Court discussed *Bates v. State Bar of Arizona*, [433 U.S. 350, 97 S. Ct. 2691, 53 L. Ed. 2d 810 \(1977\)](#), which held that the antitrust laws did not apply to a ban on attorney advertising directly imposed by the Arizona Supreme Court. The Court emphasized that the state policy at issue in *Bates* was part of a comprehensive regulatory system, was clearly articulated and affirmatively expressed as state policy, and was actively supervised by the Arizona Supreme Court. *City of Lafayette*, [435 U.S. at 410, 98 S. Ct. at 1135, 55 L. Ed. 2d at 381](#). The Supreme Court in later cases has focused on the language requiring a "clearly articulated and affirmatively expressed state policy" and "active state supervision" in formulating the test to determine if conduct by governmental entities falls within the *Parker* exemption. See *Community Communications Co. v. City of Boulder*, [455 U.S. 40, 102 S. Ct. 835, 70 L. Ed. 2d 810 \(1982\)](#); *California Retail Liquor Dealers Ass'n v. Midcal Aluminum, Inc.*, [445 U.S. 97, 100 S. Ct. 937, 63 L. Ed. 2d 233 \(1980\)](#).

⁷ Between the decisions of *Lafayette* and *Boulder*, the Supreme Court addressed the issue of state action immunity in *California Retail Liquor Dealers Ass'n v. Midcal Aluminum, Inc.*, [445 U.S. 97, 100 S. Ct. 937, 63 L. Ed. 2d 233 \(1980\)](#). The State of

addressed the question whether the *Parker* immunity extended to a "home rule" municipality that was granted extensive powers in local and municipal matters by the state constitution. The Court concluded that the restraint in question, a moratorium on the expansion of cable television enacted by the City Council of Boulder,⁸ could not be exempt from antitrust scrutiny unless it constituted the action of the State of Colorado itself in its sovereign capacity or municipal action in furtherance of clearly articulated and affirmatively expressed state policy. The Court held that the guarantee of local autonomy to municipalities through the Home Rule Amendment to the Colorado Constitution did not constitute the "clear articulation and affirmative expression" of state policy necessary for anticompetitive conduct to be protected under *Parker*. The Court found that the Home Rule Amendment was neutral with respect to the challenged activity and rejected the City's contention that **[**10]** the general grant of power to enact ordinances necessarily implies state authorization to enact specific anticompetitive ordinances.

[11] III.**

The issue before the Court is to determine if the refusal of the City of Eau Claire to provide sewage treatment facilities to the Towns falls within the protection of *Parker v. Brown* as interpreted in *City of Lafayette* and *City of Boulder*. The holdings of these cases require that municipalities act pursuant to a clearly articulated and affirmatively expressed state policy. Before determining if such a state policy exists, we must resolve two preliminary issues.

First, the Towns contend that the conduct which must be pursuant to state policy is the City's use of monopoly power in sewage treatment services to monopolize sewage collection and transportation. The Towns argue that the district court erred in characterizing the anticompetitive conduct which must be pursuant to state policy as **[*381]** "the City's decision to provide sewage treatment services to the Towns if and only if they also permit the City to provide sewage collection and transportation services via annexation." According to the Towns, the City must point to a state policy authorizing the City's use of monopoly power over sewage treatment to gain monopolies in sewage collection and transportation.

[12]** We reject the Towns' argument that the authorization of the anticompetitive conduct complained of must be as specific as they request. In *City of Lafayette*, the Court rejected the position "that a political subdivision necessarily must be able to point to a specific, detailed legislative authorization before it may properly assert a *Parker* defense to an antitrust suit," and the Court went on to state that an adequate state mandate exists when it is found "from the authority given a city to operate in a particular area that the legislature contemplated the kind of action complained of". [435 U.S. at 415, 98 S. Ct. at 1138, 55 L. Ed. 2d at 384](#). In this case, if we can determine that the state gave the City authority to operate in the area of sewage services and to refuse to provide treatment services, then we can assume that the State contemplated that anticompetitive effects might result from conduct pursuant to that authorization.⁹ The district court properly focused on determining if authorization for the refusal to provide sewage treatment services exists rather than attempting to find a specific authorization for the monopolizing

California by statute required that wine suppliers set dealer resale prices and that dealers sell at those prices. The Court held that two standards must be met if this anticompetitive conduct were to receive antitrust immunity under *Parker v. Brown*. The challenged conduct must be one clearly articulated and affirmatively expressed as a state policy, and it must be actively supervised by the state. The Court struck down the statutory resale price maintenance scheme because there was no active state supervision over the private parties that were given the power to set prices under the statute. [Id. at 105-106, 100 S. Ct. at 943, 63 L. Ed. 2d at 243](#).

⁸ The City had enacted a moratorium on the expansion of cable television enterprises for a period of three months to give the City Council time to draft a model cable television ordinance and to invite new businesses to enter the market. The only existing cable television company in Boulder, Community Communications, sought injunctive relief to prevent the ordinance enacting the moratorium from taking effect.

⁹ See *Antitrust Immunity*, 95 Harv. L. Rev. at 445-46 (1981): "The Supreme Court has found it sufficient that 'the legislature contemplated the kind of action complained of.' A policy to displace antitrust laws will then be inferred if the challenged restraint of competition is a necessary or reasonable consequence of engaging in the authorized activity." *Id.* (quoting *City of Lafayette*, [435 U.S. at 415, 98 S. Ct. at 1138, 55 L. Ed. 2d at 384](#)).

effect that results from refusing to provide [**13] these services. [HN4](#)[[↑]] If the state authorizes certain conduct, we can infer that it condones the anticompetitive effect that is a reasonable or foreseeable consequence of engaging in the authorized activity.¹⁰

[**14] The second preliminary issue is the contention of the Towns that the City must point to a state policy *directing* or *compelling* the challenged conduct to gain *Parker* protection. There has been a great deal of confusion over whether the state must compel a municipality to undertake an anticompetitive activity in order to receive immunity under *Parker*. This confusion arose because of language in [Goldfarb v. Virginia State Bar, 421 U.S. 773, 791, 95 S. Ct. 2004, 2015, 44 L. Ed. 2d 572, 587 \(1975\)](#), and [Cantor v. Detroit Edison Co., 428 U.S. 579, 600, 96 S. Ct. 3110, 3122, 49 L. Ed. 2d 1141, 1155 \(1976\)](#), which appeared to require state compulsion as a prerequisite for municipal immunity. [HN5](#)[[↑]] We conclude that state compulsion is not required. It is clear in *City of Lafayette* and *City of Boulder* that the only immunity available to municipalities is that derived from the immunity granted to the states in *Parker*. The critical inquiry is to determine if the anticompetitive conduct undertaken by a municipality constitutes state action. We hold that any municipality acting pursuant to clearly articulated and affirmatively expressed state policy which evidences [**15] an intent of the legislature to displace competition with regulation -- whether compelled, directed, authorized, or in the form of a prohibition -- is entitled to antitrust immunity because conduct pursuant to such a policy would constitute state action.

Recent Supreme Court cases support our conclusion that compulsion is not required. The Court in *City of Boulder* and *City of Lafayette* explained that a state must only authorize the municipal activity for the *Parker* exemption to apply,¹¹ [**16] and many commentators have rejected the notion [*382] that compulsion is required.¹² Obviously, [HN6](#)[[↑]] if the state compels or directs a municipality to undertake anticompetitive conduct, this compulsion or direction is strong evidence of a state policy to displace the antitrust laws. We hold that the City must show only that clearly articulated and affirmatively expressed state policy authorizes the City's refusal to provide sewage treatment to the Towns to gain the state action immunity of *Parker*.

¹⁰ See P. Areeda, [*Antitrust Law*](#) § 212.3a, at 53-54 & n.8 (Supp. 1982) ("The courts have recognized that state statutes need not confer authorization expressly. It would be sufficient, the Supreme Court said, that 'the legislature contemplated the kind of action complained of.' A policy to displace the antitrust laws will then be found if the challenged restraint of competition is a necessary consequence of engaging in the authorized activity.").

¹¹ The court stated in *City of Boulder*:

Moreover, judicial enforcement of Congress' will regarding the state action exemption renders a state "no less able to allocate governmental power between itself and its political subdivisions. It means only that when the State itself has not directed or authorized an anticompetitive practice, the State's subdivision in exercising their delegated power must obey the antitrust laws."

[455 U.S. at 56-57, 102 S. Ct. at 843, 70 L. Ed. 2d at 822](#) (citations omitted) (emphasis supplied).

In *City of Lafayette*, the Court stated:

Today's decision does not threaten the legitimate exercise of governmental power, nor does it preclude municipal government from providing services on a monopoly basis. *Parker* and its progeny make clear that a State properly may . . . direct or authorize its instrumentalities to act in a way which, if it did not reflect state policy, would be inconsistent with the antitrust laws.

[435 U.S. at 416-17, 98 S. Ct. at 1138, 55 L. Ed. 2d at 385](#) (emphasis supplied), quoted in [City of Boulder, 455 U.S. at 57, 102 S. Ct. at 844, 70 L. Ed. 2d at 822](#).

¹² See P. Areeda, [*Antitrust Law*](#) § 212.5 (Supp. 1982); M. Handler, *Reforming the Antitrust Laws* 64-65 (1982); *Antitrust Immunity*, 95 Harv.L.Rev. at 445 ("Lafayette does not require that governmental acts be compelled or supervised by the state. Rather, it demands that the legislature have *authorized* the challenged activity with an intent to displace the antitrust laws.") (emphasis supplied); Page, *Antitrust Federalism, and the Regulatory Process: A Reconstruction and Critique of the State Action Exemption After Midcal Aluminum*, 61 B.U.L. Rev. 1099, 1122 n.141 (1981).

IV.

The Towns contend that the City's refusal to extend sewer services to them is not pursuant to clearly articulated and affirmatively expressed state policy. We disagree. Several statutes and court decisions interpreting those statutes give the City authority to decide where to extend sewer services and to insist on annexation as a condition to extending sewer services to the surrounding area.

Section 66.069(2) (c) of the Wisconsin Statutes provides that a city may fix the area in which to extend **[**17]** sewage services, and that a city has no obligation to serve beyond that area.¹³ **[**18]** This statute authorizes the City to fix the limits of its utility service and expressly provides that the City "shall have no obligation to serve beyond the area so delineated." In addition, section 144.07(lm) of the Wisconsin Statutes provides that the department of natural resources may order a city to extend its sewerage system to a town, but if that town then refused to become annexed to the city, the order becomes void and the city has no obligation to extend the sewerage system.¹⁴ This statute **[*383]** is evidence of a state policy to require annexation as a condition to receiving municipal services.

[19]** Our conclusion that state policy authorizes the City to refuse sewage treatment services unless the purchaser becomes annexed is strengthened by the holding of *Town of Hallie v. City of Chippewa Falls*, 105 Wis.2d 533, 314 N.W.2d 321 (1982). The Town of Hallie brought suit against Chippewa Falls under the state antitrust laws for the refusal of Chippewa Falls to provide sewage treatment facilities to the Town of Hallie unless the Town agreed to obtain other municipal services from Chippewa Falls. When the Town did not agree, the City annexed a portion of the Town. The court relied on the broad home rule provisions under Wisconsin law and §§ 66.069(2) (c) and 144.07(lm) to hold that state **antitrust law** did not apply to this conduct. The court stated:

Although the statutes do not specifically so provide, it seems that the legislature viewed annexation by the city of a surrounding unincorporated area as a reasonable quid pro quo that a city could require before extending sewer services to the area

While the facts of the present case are clearly not covered by this statute because no DNR order is involved, [sec. 144.07(lm)] is still helpful in indicating that the legislature **[**20]** seems to view annexation as an

¹³ **HN7**  Section 66.069(2) (c) provides:

Notwithstanding § 196.58(5), each village or city may by ordinance fix the limits of such service in unincorporated areas. Such ordinance shall delineate the area within which service will be provided and the municipal utility shall have no obligation to serve beyond the area so delineated. Such area may be enlarged by a subsequent ordinance. No such ordinance shall be effective to limit any obligation to serve which may have existed at the time the ordinance was adopted.

We note that **HN8**  § 66.069(2) (c) applies to water utilities. Its provisions, however, are incorporated into the statute governing municipal sewage systems by § 66.076(8).

¹⁴ **HN9**  Section 144.07 provides:

An order by the department for the connection of unincorporated territory to a city or village system or plant shall not become effective for 30 days following issuance. Within 30 days following issuance of the order, the governing body of a city or village subject to an order under this section may commence an annexation proceeding under § 66.024 to annex the unincorporated territory subject to the order. If the result of the referendum under § 66.024(4) is in favor of annexation, the territory shall be annexed to the city or village for all purposes, and sewerage service shall be extended to the territory subject to the order. If an application for an annexation referendum under § 66.024(4) is against the annexation, the order shall be void. If an annexation proceeding is not commenced within the 90-day period, the order shall be effective.

HN10  The constitutionality of § 144.07(lm) was upheld in *City of Beloit v. Kallas*, 76 Wis.2d 61, 250 N.W.2d 342 (1977). The court held the statute balanced and accommodated two matters of state concern: providing vital services to areas surrounding cities and the growth or expansion of cities or villages, with annexation as a means to bring all municipal services to areas annexed.

appropriate prerequisite to the provision of sewage service outside the limits of a city. This seems reasonable because establishing and maintaining sewage treatment facilities can be a very substantial financial burden upon the city taxpayers and residents. If an area is to have the benefit of such services, it may be appropriate for it to be annexed in order to add to the city's tax base and help pay for the cost of providing such services.

314 N.W.2d at 325-26.

The *Town of Hallie* decision and the statutes that it interprets show that there is a clearly articulated and affirmatively expressed state policy not to burden municipalities with providing services unless they can annex the territory that they service. The City acted pursuant to and in a manner consistent with this policy by refusing to provide sewage treatment services to the Towns unless they agreed to become annexed and acquire the full range of sewage services. We hold that the conduct of the City in refusing to provide these services meets the standards of the *City of Boulder* requiring that the anticompetitive conduct was in furtherance of clearly articulated and affirmatively ^[**21] expressed state policy.

V.

The Towns contend that the State of Wisconsin must actively supervise the anticompetitive conduct for the City to gain the protection of *Parker v. Brown*. The "active state supervision" requirement arose in [California Retail Liquor Dealers Association v. Midcal Aluminum, 445 U.S. 97, 100 S. Ct. 937, 63 L. Ed. 2d 233 \(1980\)](#). *Midcal* involved a California statutory scheme allowing private wine suppliers to establish a program of resale price control to be enforced by the state. The State of California neither established nor reviewed the prices set by these private decision makers. The Supreme Court struck down the state law because it created a private price-setting mechanism that the state did not supervise. The Court concluded, "The national policy in favor of competition cannot be thwarted by casting such a gauzy cloak of state involvement over what is essentially a private price-fixing arrangement." [Midcal, 445 U.S. at 106, 100 S. Ct. at 943, 63 L. Ed. 2d at 243.](#)

We do not conclude that *Midcal* requires active state supervision over the conduct ^[*384] in this case.¹⁵ ^[**23] The *Midcal* case involved private parties that were given ^[**22] power over price and that were free of state supervision. In this context, the requirement of active state supervision ensures that the private parties not abuse the anticompetitive power given to them and act pursuant to the state policy at stake. This case involves a local government performing a traditional municipal function. [HN1\[!\[\]\(d679a97fed7350b7cee161f1580a799f_img.jpg\)](#) Supervision is unnecessary because local governments operate pursuant to clearly articulated and affirmatively expressed restraints imposed by the state in its policies and delegation of authority. If the conduct of local government in providing municipal services is authorized by the state and is clearly articulated and affirmatively expressed as state policy, the activity is state action and entitled to immunity even though state supervision does not exist.¹⁶

¹⁵ In the *City of Boulder*, the Supreme Court left open the question whether a municipality must show active state supervision over its conduct in order to receive immunity under *Parker v. Brown*: "Because we conclude in the present case that Boulder's moratorium ordinance does not satisfy the 'clear articulation and affirmative expression' criterion, we do not reach the question whether that ordinance must or could satisfy the 'active state supervision' test focused upon in *Midcal*." [City of Boulder, 455 U.S. at 51 n.14, 102 S. Ct. at 841 n.14, 70 L. Ed. 2d at 819 n.14.](#)

In [Pueblo Aircraft Service v. City of Pueblo, 679 F.2d 805](#) (10 Cir. 1982), the Court did not require active state supervision for the City of Pueblo to receive *Parker v. Brown* immunity. The conduct in this case involved the City's operation of a municipal airport. The Court concluded that the key inquiry was whether the State of Colorado by affirmative legislative action granted the City an exemption from the operation of the antitrust laws by virtue of statutory language giving municipalities the authority to acquire and operate a municipal airport. Under this standard, the Court held the City's conduct to be exempt from the antitrust laws.

¹⁶ See P. Areeda, [Antitrust Law](#) § 212.2a, at 47 (Supp. 1982) ("Thus, requiring state authorization for local conduct is analogous to requiring active supervision of private conduct; it tests whether challenged local activity is truly state action and therefore entitled to immunity."); *Antitrust Immunity*, 95 Harv. L. Rev. at 445 & n.49 ("Lafayette does not require that government acts . . . be supervised by the state.") ("a few courts erroneously appear to use the *Midcal* formula (clearly articulated state policy plus active public supervision of private parties) to require state supervision of governmental defendants"); Rogers,

[**24] We also conclude that requiring active state supervision over a traditional municipal function would be unwise. A requirement of active state supervision would erode the concept of local autonomy and home rule authority which is expressed in the statutes and constitution of Wisconsin. States would be required to supervise all local actions if municipalities are to avoid antitrust exposure, and courts would have to make the difficult determination of what "active" supervision is in terms of frequency and effectiveness.¹⁷ We doubt that the Court in *Midcal* intended that the states spend their limited resources actively supervising the traditional governmental functions of their municipalities so that they can avoid antitrust liability.

[**25] We hold, therefore, that [HN12](#)[↑] a state is not held to the high standard of active supervision of the conduct of a city performing a traditional municipal function for that city to receive *Parker v. Brown* immunity.¹⁸ The only requirement for receiving immunity when a traditional municipal [*385] function is involved is that the challenged restraint must be in furtherance or implementation of clearly articulated and affirmatively expressed state policy. We do not question the holding of *Midcal*, but we conclude that the Court's concerns with the private price-fixing arrangement in that case are not present when local governments created by state law carry out governmental functions pursuant to clearly articulated and affirmatively expressed state policy.

[**26] VI.

Our examination of Wisconsin statutes and case law reveals that the challenged conduct is in furtherance of a clearly articulated and affirmatively expressed state policy. On the facts of this case, we conclude that the City must make no other showing to be entitled to immunity under *Parker v. Brown*. We hold that the district court properly dismissed the antitrust counts against the City, and we affirm the judgment of the district court.

End of Document

Municipal Antitrust Liability in a Federalist System, 1980 Ariz. St. L.J. 305, 340-342 ("It is questionable whether a showing of active state supervision is necessary for political subdivisions to gain *Parker* immunity, however, in spite of the seemingly unequivocal language of *California Retail Liquor*."). For an argument that the Supreme Court should abandon the active state supervision requirement completely, see Page, *Antitrust, Federalism, and the Regulatory Process: A Reconstruction and Critique of the State Action Exemption After Midcal Aluminum*, 61 B.U.L.Rev. 1099 (1981).

¹⁷ See [City of Boulder, 455 U.S. at 71 n.6, 102 S. Ct. at 851 n.6, 70 L. Ed. 2d at 831 n.6](#) (Rehnquist, J., dissenting) ("The Court understandably avoids determining whether local ordinances must satisfy the 'active state supervision' prong of the *Midcal* test. It would seem rather odd to require municipal ordinances to be enforced by the State rather than the city itself.")

¹⁸ We reserve the question whether a municipality undertaking anticompetitive activity that falls outside the scope of a traditional governmental function must be actively supervised by the state to receive *Parker v. Brown* immunity. This reflects our belief that [HN13](#)[↑] traditional municipal activity undertaken pursuant to clearly articulated and affirmatively expressed state policy and designed to promote public health and safety should be free from antitrust attack. When municipal activity strays from these functions, which includes the provision of basic services such as sewerage and sanitation, there is a more significant threat to free competition that may warrant active state supervision. See *The Supreme Court, 1981 Term*, [96 Harv.L.Rev. 62, 171-273 \(1982\)](#).

Harm to an antitrust plaintiff is sufficient to satisfy the constitutional standing requirement of injury in fact, but a court must make a further determination whether a plaintiff is a proper party to bring a private antitrust action.

[Antitrust & Trade Law > ... > Private Actions > Standing > General Overview](#)

[**HN11**\[\] **Private Actions, Standing**](#)

What is a cause in a legal sense, still more what is a proximate cause, depend in each case upon many considerations. What is meant by the word "proximate" is, that because of convenience, of public policy, of a rough sense of justice, the law arbitrarily declines to trace a series of events beyond a certain point.

[Antitrust & Trade Law > Clayton Act > Remedies > Damages](#)

[Antitrust & Trade Law > Clayton Act > General Overview](#)

[Antitrust & Trade Law > ... > Private Actions > Standing > General Overview](#)

[Antitrust & Trade Law > Clayton Act > Remedies > General Overview](#)

[**HN12**\[\] **Remedies, Damages**](#)

The availability of the § 4 of the Clayton Act remedy to some person who claims its benefit is not a question of the specific intent of the conspirators.

[Antitrust & Trade Law > ... > Private Actions > Standing > General Overview](#)

[Antitrust & Trade Law > Public Enforcement > State Civil Actions](#)

[Antitrust & Trade Law > Regulated Practices > Private Actions > Private Attorneys General](#)

[**HN14**\[\] **Private Actions, Remedies**](#)

The existence of an identifiable class of persons whose self-interest would normally motivate them to vindicate the public interest in antitrust enforcement diminishes the justification for allowing a more remote party to perform the office of a private attorney general.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN15 [] **Private Actions, Standing**

It is appropriate for purposes of § 4 of the Clayton Act to consider whether a claim rests at bottom on some abstract conception or speculative measure of harm.

Antitrust & Trade Law > Clayton Act > Remedies > Damages

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

HN16 [] **Remedies, Damages**

The feasibility and consequences of implementing particular damages theories may, in certain limited circumstances, be considered in determining who is entitled to prosecute an action brought under § 4 of the Clayton Act. Thus, the task of disentangling overlapping damages claims is not lightly to be imposed upon potential antitrust litigants, or upon the judicial system.

Lawyers' Edition Display

Decision

Union held not injured by violation of antitrust laws, within meaning of 4 of Clayton Act ([15 USCS 15](#)), by employer association's coercion of employers.

Summary

Two unions alleged that, in violation of the antitrust laws, a multiemployer association and its members coerced certain third parties, as well as some of the association's members, to enter into business relationships with nonunion firms. This coercion, according to the complaint, adversely affected the trade of certain unionized firms and thereby restrained the business activities of the unions. The unions sought treble damages under 4 of the Clayton Act ([15 USCS 15](#)), which authorizes the award of damages to those injured in their business or property by antitrust violations. The United States District Court for the Northern District of California dismissed the complaint ([404 F Supp 1067](#)). The United States Court of Appeals for the Ninth Circuit reversed the District Court's dismissal of the antitrust claim, holding that (1) a Sherman Act violation, a group boycott, had been alleged, (2) the defendants' conduct was not within the antitrust exemption for labor activities, and (3) the plaintiffs had standing to recover damages for the injury to their own business activities occasioned by the defendants' boycott ([648 F2d 527](#)).

I Í JÁNEÚÁ FJÉÍ FJLÁCHÁÉÓðÀ JÍ ÉÍ JÍ LÁ I ÁSEÓaÉGÁÁ GHÁÉÍ GHÁJÍ HÁEÚÉSÓYÓÁFG ÓÉÉÉ

On certiorari, the United States Supreme Court reversed. In an opinion by Stevens, J., joined by Burger, Ch. J., and Brennan, White, Blackmun, Powell, Rehnquist, and O'Connor, JJ., it was held that based on the allegations of the complaint, the unions were not persons injured by reason of a violation of the antitrust laws within the meaning of 4 of the Clayton Act.

Marshall, J., dissenting, expressed the view that the court's decision imposes an unwarranted judge-made limitation on the antitrust laws and that the unions fit comfortably within the language of 4.

Headnotes

PRACTICES §67 > who may recover -- union -- > Headnote:

[LEdHN\[1A\]](#) [1A] [LEdHN\[1B\]](#) [1B]

A union is not a person injured by reason of a violation of the antitrust laws within the meaning of 4 of the Clayton Act ([15 USCS 15](#)), which authorizes the award of damages to those injured in their business or property by antitrust violations, based on the allegations of its complaint that a multiemployer association and its members coerced certain third parties, as well as some of the association's members, to enter into business relationships with nonunion firms, allegedly adversely affecting the trade of certain unionized firms and thereby restraining the business activities of the union. (Marshall, J., dissented from this holding.)

ERROR §1293 > complaint -- assumption that plaintiff can prove facts alleged -- > Headnote:

[LEdHN\[2\]](#) [2]

The reviewing court must assume that the plaintiff can prove the facts alleged in its amended complaint, on appeal considering the sufficiency of a complaint alleging violation of the antitrust laws; however, it is not proper to assume that the plaintiff can prove facts that it has not alleged or that the defendants have violated the antitrust laws in ways that have not been alleged in the complaint.

PRACTICES §46 > antitrust violations -- multiemployer association and its members -- > Headnote:

[LEdHN\[3\]](#) [3]

The allegations that a multiemployer association and its members have breached their collective bargaining agreements in various ways, and that they have manipulated their corporate names and corporate status in order to divert business to nonunion divisions or firms that they actually control, in the context of the bargaining relationship between them and a union, and the charge that the association and its members advocated, encouraged, induced, and aided nonmembers in refusing to enter into collective bargaining relationships with a union, do not describe antitrust violations.

PRACTICES §9 > coercive activity -- > Headnote:

[LEdHN\[4\]](#) [4]

I I JÁNEĀ FJÉÉ FJLÁCHÚÉDÉ JÍ ÉÉ JÍ LÁ I ÁSEÓaÉGÁÁ GHÁÉÉ GHÁJÍ HÁEÜÉSÓYÓÁFG ÓÉÉÉ

An agreement to restrain trade may be unlawful even though it does not entirely exclude its victims from the market; coercive activity that prevents its victims from making free choices between market alternatives is inherently destructive of competitive conditions and may be condemned even without proof of its actual market effect.

PLEADING §130 > specificity -- > Headnote:

[LEdHN\[5A\]](#) [5A] [LEdHN\[5B\]](#) [5B]

A Federal District Court retains the power to insist upon some specificity in pleading before allowing a potentially massive factual controversy to proceed in a case of the magnitude of an antitrust suit filed by a union alleging that a multiemployer association and its members coerced certain third parties and some of the association's members to enter into business relationships with nonunion contractors and subcontractors, thereby adversely affecting the trade of certain unionized firms and restraining the union's business activities.

PRACTICES §67 > union -- injured party -- > Headnote:

[LEdHN\[6\]](#) [6]

Even though coercion directed by a multiemployer association and its members at third parties in order to restrain the trade of certain contractors and subcontractors may have been unlawful, it does not necessarily follow that still another party, a union, is a person injured by reason of a violation of the antitrust laws within the meaning of 4 of the Clayton Act ([15 USCS 15](#)), which authorizes the award of damages to those injured in their business or property by antitrust violations.

STATUTES §164 > construction -- language of statute -- > Headnote:

[LEdHN\[7\]](#) [7]

The starting point for interpreting a statute is the language of the statute itself.

PRACTICES §7 > Sherman Act -- common-law background -- > Headnote:

[LEdHN\[8\]](#) [8]

Congress intended the Sherman Act ([15 USCS 1 et seq.](#)) to be construed in the light of its common-law background.

PRACTICES §67 > who may recover -- union -- > Headnote:

[LEdHN\[9A\]](#) [9A] [LEdHN\[9B\]](#) [9B] [LEdHN\[9C\]](#) [9C]

The question of whether a union may recover for the injury allegedly suffered by reason of a multiemployer association and its members' coercion against certain third parties cannot be answered simply by reference to the

I I JÁNEĀ FJÉĀ FJLÁCHÁÉDÉ JÍ ÉĀ JÍ LÁ I ÁSEÓaÉGÁÄ GHÁÉÉ GHÁJÌ HÁEÜÉSÓYÓÄGÌ ÉÄFF

broad language of 4 of the Clayton Act ([15 USCS 15](#)) since, as was required in common-law damages litigation in 1890, the question requires an evaluation of the union's harm, the alleged wrongdoing by the defendants, and the relationship between them.

PRACTICES §67 > who may recover -- common-law limitations -- > Headnote:

[LEdHN\[10A\]](#) [] [10A] [LEdHN\[10B\]](#) [] [10B]

The limitations on damages recoveries found in common-law actions in 1890 are not intended to serve permanently as limits on recoveries under the Sherman Act ([15 USCS 1 et seq.](#)) since the common law is an evolving body of law.

PARTIES §3 > PRACTICES §67 > antitrust standing -- > Headnote:

[LEdHN\[11A\]](#) [] [11A] [LEdHN\[11B\]](#) [] [11B]

Harm to the antitrust plaintiff is sufficient to satisfy the constitutional standing requirement of injury in fact, but the court must make a further determination whether the plaintiff is a proper party to bring a private antitrust action.

PRACTICES §67 > Clayton Act -- sufficiency of complaint -- > Headnote:

[LEdHN\[12A\]](#) [] [12A] [LEdHN\[12B\]](#) [] [12B]

The mere fact that a claim is literally encompassed by the Clayton Act does not end the inquiry; an allegation of improper motive, although it may support a plaintiff's damages claims under 4 of the Act ([15 USCS 15](#)), which authorizes the award of damages to those injured in their business or property by antitrust violations, is not a panacea that will enable any complaint to withstand a motion to dismiss; a defendant's specific intent may sometimes be relevant to the question of whether a violation of law has been alleged.

PRACTICES §67 > who may recover -- union -- > Headnote:

[LEdHN\[13A\]](#) [] [13A] [LEdHN\[13B\]](#) [] [13B]

A union's allegations of consequential harm resulting from a violation of the antitrust laws, although buttressed by an allegation of intent to harm the union, are insufficient as a matter of law where other relevant factors--the nature of the union's injury, the tenuous and speculative character of the relationship between the alleged antitrust violation and the union's alleged injury, the potential for duplicative recovery or complex apportionment of damages, and the existence of more direct victims of the alleged conspiracy--weigh heavily against judicial enforcement of the union's antitrust claim.

Syllabus

I I JÁNEĀ FJÉÉ FJLÁCHÚÉDÉ JÍ ÉÉ JÍ LÁ I ÁSEÓaÉGáÄ GHÁÉÉ GHÁFJÍ HÁEÜÉSÓYÓÄFG ÓÉÉÉ

Petitioner multiemployer association and respondents (collectively the Union) are parties to collective-bargaining agreements governing the terms and conditions of employment in construction-related industries in California. The Union filed suit in Federal District Court, alleging that petitioner and its members, in violation of the antitrust laws, coerced certain third parties and some of petitioner's members to enter into business relationships with nonunion contractors and subcontractors, and thus adversely affected the trade of certain unionized firms, thereby restraining the Union's business activities. Treble damages were sought under § 4 of the Clayton Act, which authorizes recovery of such damages by "[any] person who shall be injured [****2] in his business or property by reason of anything forbidden in the antitrust laws." The District Court dismissed the complaint as insufficient to allege a cause of action for treble damages under § 4. The Court of Appeals reversed.

Held: Based on the allegations of the complaint, the Union was not a person injured by reason of a violation of the antitrust laws within the meaning of § 4 of the Clayton Act. Pp. 526-546.

(a) Even though coercion allegedly directed by petitioner at third parties in order to restrain the trade of "certain" contractors and subcontractors may have been unlawful, it does not necessarily follow that the Union is a person injured by reason of a violation of the antitrust laws within the meaning of § 4. Pp. 526-529.

(b) The question whether the Union may recover for the alleged injury cannot be answered by literal reference to § 4's broad language. Instead, as was required in common-law damages litigation in 1890 when § 4's predecessor was enacted as § 7 of the Sherman Act, the question requires an evaluation of the Union's harm, the petitioner's alleged wrongdoing, and the relationship between them. Pp. 529-535.

(c) The Union's allegations [****3] of consequential harm resulting from a violation of the antitrust laws, although buttressed by an allegation of intent to harm the Union, are insufficient as a matter of law. Other relevant factors -- the nature of the alleged injury to the Union, which is neither a consumer nor a competitor in the market in which trade was allegedly restrained, the tenuous and speculative character of the causal relationship between the Union's alleged injury and the alleged restraint, the potential for duplicative recovery or complex apportionment of damages, and the existence of more direct victims of the alleged conspiracy -- weigh heavily against judicial enforcement of the Union's antitrust claim. Pp. 535-546.

Counsel: James P. Watson argued the cause for petitioner. With him on the briefs was George M. Cox.

Victor J. Van Bourg argued the cause and filed a brief for respondents. *

I I JÁNEĀ FJÉÉ FJLÁCHÚÉÓdÀ JÍ ÉÉÉ JÍ LÁ I ÁSEÓaÉGáÄ GHÁÉÉ GHÁFJÍ HÁWÉÉSÓYÓQÁFG ÓÉÉÉ

[*520] [***727] [**899] JUSTICE STEVENS delivered the opinion of the Court.

LEdHN/1A [1A] This case arises out of a dispute between parties to a multi-employer collective-bargaining agreement. The plaintiff unions allege that, in violation of the antitrust laws, the multi-employer association and its members coerced certain third parties, as well as some of the association's members, to enter into business relationships with nonunion firms. This coercion, according to the complaint, adversely affected the trade of certain unionized firms and thereby restrained the [*521] business activities of the unions. The question presented is whether the complaint sufficiently alleges that the unions have been "injured in [their] business or property by reason of anything forbidden in the antitrust laws" and may therefore recover treble damages under § 4 of the Clayton Act. [***5] 38 Stat. 731, 15 U. S. C. § 15. Unlike the majority of the Court of Appeals for the Ninth Circuit, we agree with the District Court's conclusion that the complaint is insufficient.

I

The two named plaintiffs (the Union) -- the California State Council of Carpenters and the Carpenters 46 Northern Counties [**900] Conference Board -- are affiliated with the United Brotherhood of Carpenters and Joiners of America, AFL-CIO. The Union represents more than 50,000 individuals employed by the defendants in the carpentry, drywall, piledriving, and related industries throughout the State of California. The Union's complaint is filed as a class action on behalf of numerous affiliated local unions and district councils. The defendants [***728] are Associated General Contractors of California, Inc. (Associated), a membership corporation composed of various building and construction contractors, approximately 250 members of Associated who are identified by name in an exhibit attached to the complaint, and 1,000 unidentified co-conspirators.

The Union and Associated, and their respective predecessors, have been parties to collective-bargaining agreements governing [***6] the terms and conditions of employment in construction-related industries in California for over 25 years. The wages and other benefits paid pursuant to these agreements amount to more than \$ 750 million per year. In addition, approximately 3,000 contractors who are not members of Associated have entered into separate "memorandum agreements" with the Union, which bind them to the terms of the master collective-bargaining agreements between the Union and Associated. The amended complaint does not [*522] state the number of nonsignatory employers or the number of nonunion employees who are active in the relevant market.

In paragraphs 23 and 24 of the amended complaint, the Union alleges the factual basis for five different damages claims.¹ [***8] Paragraph 23 alleges generally that the defendants conspired to abrogate and weaken the collective-bargaining relationship between the Union and the signatory employers. In seven subsections, paragraph 24 sets forth activities allegedly committed pursuant to the conspiracy. The most specific allegations relate to the labor relations between the parties.² The complaint's description of actions affecting nonparties is both brief and vague. [***7] It is alleged that defendants

"(3) Advocated, encouraged, induced, and aided non-members of defendant Associated General Contractors of California, Inc. to refuse to enter into collective bargaining relationships with plaintiffs and each of them;

¹ The facts set forth in paragraphs 23 and 24, initially alleged in support of the Union's federal antitrust claim, are realleged in each of the other claims for relief: breach of collective-bargaining agreements (PMPM 29-31); intentional interference with contractual relations (PMPM 32-35); intentional interference with business relationships (PMPM 36-39); and violation of the California antitrust statute (PMPM 40-43).

² For example, it is alleged that defendants breached their collective-bargaining agreements "by failing to pay agreed-upon wages, by failing to use the hiring hall, by failing to pay Trust Fund contributions, by failing to observe other terms and conditions of employment, and by generally weakening the good faith requirement of the collective bargaining agreements"; that defendants improperly changed their names and corporate status and made use of so-called "double breasted operations"; and that they encouraged nonmembers of Associated to refuse to enter into collective-bargaining agreements with the Union.

I I JÁNEĀ FJÉÉ GGÁÉHÁUÉÓDÀ JÍ ÉÉJÉELÁ I ÁSEÓAÉGÁÄ GHAÉÉ GÌ LAFJÌ HÁUÉÉSÓYÓQÁFG ÓÉÉÉ

"(4) Advocated, encouraged, induced, *coerced*, aided and encouraged owners of land and other letters of construction contracts to hire contractors and subcontractors who are not signatories to collective bargaining agreements with plaintiffs and each of them;

[*523] "(5) Advocated, induced, *coerced*, encouraged, and aided members of Associated General Contractors of California, Inc., non-members of Associated General Contractors of California, Inc., and 'memorandum contractors' to enter into subcontracting agreements with subcontractors who are not signatories to [***729] any collective bargaining agreements with plaintiffs and each of them"; App. E to Pet. for Cert. 17-19 (emphasis added).³

[***9] [**901] Paragraph 25 describes the alleged "purpose and effect" of these activities: first, "to weaken, destroy, and restrain the trade of certain contractors," who were either members of Associated or memorandum contractors who had signed agreements with the Union; and second, to restrain "the free exercise of the business activities of plaintiffs and each of them."⁴ [***10] Plaintiffs claim that these alleged antitrust violations [*524] caused them \$ 25 million in damages.⁵ The complaint does not identify any specific component of this damages claim.

After hearing "lengthy oral argument" and after receiving two sets of written briefs, one filed before and the second filed after this Court's decision in *Connell Construction Co. v. Plumbers & Steamfitters*, 421 U.S. 616 (1975), the District Court dismissed the complaint, including the federal antitrust claim. *404 F.Supp. 1067 (ND Cal. 1975)*.⁶ [***11] The court observed that the complaint alleged "a rather vague, general conspiracy," and that the allegations "appear typical of disputes a union might have with an employer," which in the normal course are resolved by grievance and arbitration or by the NLRB. *Id.*, at 1069.⁷ Without seeking to clarify or [***730] further amend the first amended complaint, the Union filed its notice of appeal on October 9, 1975.

³The word "coerced" did not appear in the complaint as originally filed. Even as amended after the filing of motions to dismiss, the complaint does not allege that the defendants used any coercion to persuade nonmembers of Associated to refuse to enter into collective-bargaining agreements with the Union (PM 24(3)). The complaint alleges neither the identity nor the number of landowners, general contractors, or others who were coerced into making contracts with nonunion firms.

⁴Paragraph 25, which describes the effect of the conspiracy, reads in full as follows:

"The purpose and effect of the above described activities, plan and conspiracy are oppressive, unreasonable, and illegal, and are in restraint of trade and an unlawful interference and restraint of the free exercise of the business activities of plaintiffs and each of them, all in violation of *15 U. S. C. Section 1*. The purpose and effect of the above described activities, plan and conspiracy, in addition, are to weaken, destroy, and restrain the trade of certain contractors, both members of the Associated General Contractors of California, Inc. and non-members, who are 'memorandum contractors,' who have faithfully performed the terms and conditions set out in the master collective bargaining agreements described above. The effect of this restraint on trade is to further weaken and destroy plaintiffs in this matter. These activities are in restraint of the free exercise of plaintiffs' trade and an interference therein, all in violation of *15 U. S. C. Section 1*." App. E to Pet. for Cert. 20-21.

⁵Plaintiffs do not seek injunctive relief under § 16 of the Clayton Act, *15 U. S. C. § 26*, and they do not ask us to consider whether they have standing to request such relief.

⁶An order dismissing the federal antitrust claim and the state-law claims was filed on August 4, 1975, and an amended order dismissing the entire complaint was entered on September 10, 1975. The District Court had initially stayed the breach-of-contract claim for 120 days pending grievance and arbitration procedures. On reconsideration it also dismissed the breach-of-contract claim, deciding that the suit had been prematurely filed.

⁷Addressing the federal antitrust claim, the District Court concluded:

"The essence of plaintiffs' claim seems to be that defendants violated the antitrust laws insofar as they declined to enter into agreements with plaintiffs to deal only with subcontractors which were signatories to contracts with plaintiffs, precisely the type of agreement which subjected the union in *Connell* to antitrust liability." *404 F.Supp., at 1070*.

The District Court reasoned that the employers' refusal to enter into such an agreement could not provide the basis for an antitrust claim.

I I JÁMEĀ FJĀĀ G LÉCHĀĀDÀ JÍ EEEFLÄ I ÅSEÅÄCA Ä GHÄTT HÉLÄJÌ HÄVÄÅSÖYÖÄG ÄTTFF

Over five years later, on November 20, 1980, the Court of Appeals reversed the District Court's dismissal of the Union's federal antitrust claim. [648 F.2d 527](#).⁸ The majority [*525] of the Court of Appeals disagreed with the District Court's characterization of the antitrust claim; it adopted a construction of the amended complaint which is somewhat broader than the allegations in the pleading itself.⁹ [****13] The Court of [**902] Appeals held (1) that a Sherman Act violation -- a group [****12] boycott -- had been alleged, [*id.* at 531-532](#); (2) that the defendants' conduct was not within the antitrust exemption for labor activities, [*id.* at 532-536](#); and (3) that the plaintiffs had standing to recover damages for the injury to their own business activities occasioned by the defendants' "industry-wide boycott against all subcontractors with whom the Unions had signed agreements . . ." [*Id.* at 537](#). In support of the Union's standing, the majority reasoned that the Union was within the area of the economy endangered by a breakdown of competitive conditions, not only because injury to the Union was a foreseeable consequence of the antitrust violation, but also because that injury was specifically intended by the defendants. The court noted that its conclusion was consistent with other cases holding that union organizational [*526] and representational activities constitute a form of business protected by the antitrust laws.¹⁰

[****14] II

[LEdHN\[2\]](#) [2]As the case comes to us, we [***731] [HN1](#) must assume that the Union can prove the facts alleged in its amended complaint. It is not, however, proper to assume that the Union can prove facts that it has not alleged or that the defendants have violated the antitrust laws in ways that have not been alleged.¹¹

[LEdHN\[3\]](#) [3]We first note that the Union's most specific claims of injury involve matters that are not subject to review under the antitrust laws. The amended complaint alleges that the defendants have breached their collective-bargaining agreements [****15] in various ways, and that they have manipulated their corporate names and corporate status in order to divert business to nonunion divisions or firms that they actually control. Such deceptive diversion of business to the nonunion portion of a so-called "double-breasted" operation might constitute a breach

⁸ The Court of Appeals affirmed the dismissal of all other claims.

⁹ The Court of Appeals majority read subparagraph (4) of paragraph 24, quoted [supra, at 522](#), as though it alleged that the defendants had coerced landowners and other persons who let construction contracts "to hire *only* construction firms, primarily subcontractors, who had not signed with the Unions." [648 F.2d, at 532](#) (emphasis added); see also [id., at 544](#) (denying petition for rehearing). The word "only" does not appear in the amended complaint, and it implies that the defendants' activities gave rise to a broader restraint than was actually alleged.

The majority read subparagraph (5) of paragraph 24 to charge that defendants had "coerced and aided each other to subcontract *only* with subcontractors who had not signed with the Unions." [Id., at 531](#) (emphasis added). Again using the word "only," which does not appear in the complaint itself, the majority characterized the defendants' alleged activities as "very similar to a concerted refusal to deal, or a group boycott." *Ibid.* It concluded that the allegations "present virtually the obverse of the situation described in *Connell*": the conspiracy, if successful, "would effectively lock union-signatory subcontractors out of a portion of the market for carpentry work." [Id., at 532](#).

¹⁰ See *Tugboat, Inc. v. Mobile Towing Co.*, [534 F.2d 1172, 1176-1177 \(CA5 1976\)](#); *International Assn. of Heat & Frost Insulators v. United Contractors Assn.*, [483 F.2d 384, 397-398 \(CA3 1973\)](#).

Circuit Judge Sneed dissented. He first rejected the majority's characterization of the complaint, agreeing instead with the District Court. Second, assuming that the complaint alleged a boycott of certain employers, he concluded that neither the employees of a victim of the boycott nor their collective-bargaining representative had standing to assert the antitrust claim. Finally, he concluded that an injury that affected only the Union's organizational and representational activity was remediable under the labor laws rather than the antitrust laws.

The Court of Appeals denied the petition for rehearing and rehearing en banc on May 22, 1981. Accompanying the order was a statement by the majority rebutting the petitioners' assertion that the opinion rendered multiemployer bargaining units unlawful, and a dissent by Circuit Judge Sneed. [648 F.2d, at 543, 545](#).

¹¹ The Union had an adequate opportunity to amend its pleading to add factual allegations demonstrating that the District Court's decision to dismiss the complaint was based on a misunderstanding of its antitrust claim.

I I JÁMEĀ FJĀĀ G LÉCHUĀDÀ JÍ EEEGLÄ I ÅSEÅAÅA Å GHÄÅH HFLÅFJÌ HÅMÅÅSÖYÓÅG ÅÅÅÅFÍ

of contract, an unfair labor practice, or perhaps even a [*527] common-law fraud or deceit, but in the context of the bargaining relationship between the parties to this litigation, such activities are plainly not subject to review under the federal antitrust laws.¹² [****16] Similarly, the charge that the defendants "advocated, encouraged, induced, and aided nonmembers . . . to refuse [*903] to enter into collective bargaining relationships" with the Union (PM 24(3)) does not describe an antitrust violation.¹³

The Union's antitrust claims arise from alleged restraints caused by defendants in the market for construction contracting and subcontracting.¹⁴ The complaint alleges that defendants "coerced"¹⁵ [****18] two classes of persons: (1) landowners and [*528] others who let construction contracts, *i. e.*, the defendants' customers and potential customers; and (2) general contractors, *i. e.*, defendants' competitors and defendants themselves. Coercion against the members of both classes was designed to [****732] induce them to give some of their business -- but not necessarily all of it -- to nonunion firms.¹⁶ Although the pleading does not allege that the coercive conduct increased the aggregate share of nonunion firms in the market, it does allege that defendants' activities weakened and restrained the trade "of certain contractors." See n. 4, *supra*. Thus, particular victims of coercion may have diverted particular [****17] contracts to nonunion firms and thereby caused certain unionized subcontractors to lose some business.

LEdHN[4] [4] LEdHN[5A] [5A] We think the Court of Appeals properly assumed that such coercion might violate the antitrust laws.¹⁷ [****19] HN2 An agreement to restrain trade may be unlawful even though it does not entirely exclude its victims from the market. See *Associated Press v. United States*, 326 U.S. 1, 17 (1945). Coercive activity that prevents its victims from making free choices between market alternatives is inherently

¹² In analyzing the antitrust allegations in the amended complaint, we therefore construe the references to "contractors and subcontractors who are not signatories to collective bargaining agreements" as referring to completely independent nonunion firms rather than to operations covertly controlled by one or more defendants.

¹³ The Court of Appeals did not reverse the District Court's dismissal of the complaint with regard to these allegations. 648 F.2d, at 531-532, 537, 540.

¹⁴ See Brief for Respondents 37. There is no allegation of wrongful conduct directed at nonunion subcontracting firms. We therefore assume that, if any nonunion firms refused to bargain with the Union because of the conspiracy, they did so because they were rewarded with business they would not otherwise have obtained. Thus, nonunion firms could not be considered victims of the conspiracy; rather, they appear to have been its indirect beneficiaries. None are named either as defendants or as co-conspirators.

The amended complaint also does not allege any restraint on competition in the market for labor union services. Unlike the two cases involving union plaintiffs cited by the Court of Appeals, see n. 10, *supra*, in this case there is no claim that competition between rival unions has been injured or even that any rival unions exist.

¹⁵ The complaint does not specify the nature of the "coercion." It does not, for example, allege that the defendants refused to deal with all members of either of the two classes of persons against whom coercion was applied. Indeed, it is highly improbable that the defendants -- all of whom are signatories to union contracts -- would refuse to deal with all of their customers and potential customers in an attempt to divert all of their business to nonunion firms.

¹⁶ There is no allegation that any person subjected to coercion was required to deal exclusively with nonunion firms.

¹⁷ LEdHN[5B] [5B]

Had the District Court required the Union to describe the nature of the alleged coercion with particularity before ruling on the motion to dismiss, it might well have been evident that no violation of law had been alleged. In making the contrary assumption for purposes of our decision, we are perhaps stretching the rule of *Conley v. Gibson*, 355 U.S. 41, 47-48 (1957), too far. Certainly in a case of this magnitude, HN3 a district court must retain the power to insist upon some specificity in pleading before allowing a potentially massive factual controversy to proceed.

I I J Á N E Ú A F J Á N G L E H Á U Ó D Á J I É E J E H L Á I Á S E O Á E C Á Á G H Á T T Ó H G L Á F J Í H Á V E Ú E S Ó Y Ó Á F G Á T T E F J

destructive of competitive conditions and may be condemned even without proof of its actual market effect. Cf. *Klors, Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207, 210-214 (1959)*.¹⁸

[*529] [LEdHN\[6\]](#) [6][HN4](#) Even though coercion directed by defendants at third parties in order to restrain the trade of "certain" contractors and subcontractors may have been unlawful, it does [*904] not, of course, necessarily follow that still another party -- the Union -- is a person injured by reason of a violation of the antitrust laws within the meaning of § 4 of the Clayton Act.

III

[LEdHN\[7\]](#) [7] [***20] We first consider the language in the controlling statute. See *Consumer Product Safety Comm'n v. GTE Sylvania, Inc., 447 U.S. 102, 108 (1980)*. [HN5](#) The class of persons who may maintain a private damages action under the antitrust laws is broadly defined in § 4 of the Clayton Act. *15 U. S. C. § 15*. That section provides:

[HN6](#) "Any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor in any district court of the United States in the district in which the defendant resides or is found or has an agent, without respect to the amount in controversy, and shall recover threefold the damages by him sustained, [***733] and the cost of suit, including a reasonable attorney's fee."

A literal reading of the statute is broad enough to encompass every harm that can be attributed directly or indirectly to the consequences of an antitrust violation. Some of our prior cases have paraphrased the [***21] statute in an equally expansive way.¹⁹ But before we hold that the statute is as broad as its [*530] words suggest, we must consider whether Congress intended such an open-ended meaning.

[***22] The critical statutory language was originally enacted in 1890 as § 7 of the Sherman Act. 26 Stat. 210. The legislative history of the section shows that Congress was primarily interested in creating an effective remedy for consumers who were forced to pay excessive prices by the giant trusts and combinations that dominated certain interstate markets.²⁰ That history supports a broad construction of this remedial provision. A proper interpretation of the section cannot, however, ignore the larger context in which the entire statute was debated.

¹⁸ Although we do not know what kind of coercion defendants allegedly employed, we assume for purposes of decision that it had a predatory "nature or character," *Klors, Inc. v. Broadway-Hale Stores, Inc., 359 U.S., at 211*, and that it would "cripple the freedom of traders and thereby restrain their ability to sell in accordance with their own judgment." *Kiefer-Stewart Co. v. Joseph E. Seagram & Sons, Inc., 340 U.S. 211, 213 (1951)*.

¹⁹ In *Mandeville Island Farms, Inc. v. Sugar Co., 334 U.S. 219 (1948)*, the Court held that growers of sugar beets could maintain a treble-damages action against refiners who had allegedly conspired to fix the price that they would pay for the beets. Although previous price-fixing cases had involved agreements among sellers to fix sales prices, the Court readily concluded that the Act applied equally to an agreement among competing buyers to fix purchase prices. The Court stated:

[HN7](#) "The statute does not confine its protection to consumers, or to purchasers, or to competitors, or to sellers. Nor does it immunize the outlawed acts because they are done by any of these. Cf. *United States v. Socony-Vacuum Oil Co., 310 U.S. 150*; *American Tobacco Co. v. United States, 328 U.S. 781*. The Act is comprehensive in its terms and coverage, protecting all who are made victims of the forbidden practices by whomever they may be perpetrated." *Id., at 236*.

Similarly broad language was used in later cases holding that actions could be maintained by consumers, *Reiter v. Sonotone Corp., 442 U.S. 330, 337-338 (1979)*, by a foreign government, *Pfizer Inc. v. India, 434 U.S. 308, 313-314 (1978)*, and by the direct victim of a boycott. *Blue Shield of Virginia v. McCready, 457 U.S. 465, 472-473 (1982)*. In each of those cases, however, the actual plaintiff was directly harmed by the defendants' unlawful conduct. The paraphrasing of the language of § 4 in those opinions added nothing to the even broader language that the statute itself contains.

²⁰ See 21 Cong. Rec. 1767-1768, 2455-2456, 2459, 2615, 3147-3148 (1890). The original proposal, which merely allowed recovery of the amount of actual enhancement in price, was successively amended to authorize double-damages and then treble-damages recoveries, in order to provide otherwise remediless small consumers with an adequate incentive to bring suit.

[****23] [*531] [LEdHN\[8\]](#) [8] [LEdHN\[9A\]](#) [9A] The repeated references to the common law in the debates that preceded the enactment of the Sherman Act make it clear that Congress intended the Act to be [**905] construed in the light of its common-law background.²¹ Senator Sherman stated that the bill "does not announce a new principle of law, but applies old and well recognized principles of the common law to the complicated jurisdiction of our State and Federal ***734 Government."²² Thus our comments on the need for judicial interpretation of § 1 are equally applicable to § 7:

"One problem presented by the language of § 1 of the Sherman Act is that it cannot mean what it says. The statute says that 'every' contract that restrains trade is unlawful. But, as Mr. Justice Brandeis perceptively noted, restraint is the very essence of every contract; read literally, § 1 would outlaw the entire body of private contract law. . . .

"Congress, however, did not intend the text of the Sherman Act to delineate the full meaning of the statute or its [****24] application in concrete situations. The legislative history makes it perfectly clear that it expected the courts to give shape to the statute's broad mandate by drawing on common-law tradition." [National Society of J*5321 Professional Engineers v. United States, 435 U.S. 679, 687-688 \(1978\)](#) (footnotes omitted).

Just as the substantive content of the Sherman Act draws meaning from its common-law antecedents, so must we consider the contemporary legal context in which Congress acted when we try to ascertain the intended scope of the private remedy created by § 7.

[****25] [LEdHN\[10A\]](#) [10A] In 1890, notwithstanding general language in many state constitutions providing in substance that "every wrong shall have a remedy,"²³ [****26] a number of judge-made rules circumscribed the availability of damages recoveries in both tort and contract litigation -- doctrines such as foreseeability and proximate cause,²⁴ directness of injury,²⁵ [****27] certainty ***735 of damages, [*533]²⁶ and privity of

Id., at 1765, 2455, 3145. The same purpose was served by the special venue provisions, the provision for the recovery of attorney's fees, and the elimination of any requirement that the amount in controversy exceed the jurisdictional threshold applicable in other federal litigation. See, e. g., *id.*, at 2612, 3149. Moreover, changes in the description of the remedy extended the section's coverage beyond price fixing.

²¹ See, e. g., *id.*, at 2456, 2459, 3151-3152.

²² *Id.*, at 2456. Senator Sherman added: "The purpose of this bill is to enable the courts of the United States to apply the same remedies against combinations which injuriously affect the interests of the United States that have been applied in the several States to protect local interests." *Ibid.*; see also *id.*, at 2459, 3149, 3151-3152. Although Members of Congress referred particularly to common-law definitions of "monopoly" and "restraint of trade," they appear to have been generally aware that the statute would be construed by common-law courts in accordance with traditional canons. For example, at the beginning of the debate on the Sherman Act, one Senator cautioned his colleagues:

"A careful analysis of the terms of the bill is essential. We must know what it means, what its legal effect is, if we give force to it as it is written. . . . We must adopt, therefore, the known methods of the courts in determining what the bill means." *Id.*, at 1765.

²³ For example, the State Constitution of Illinois, adopted in 1870, provided: "Every person ought to find a certain remedy in the laws for all injuries and wrongs which he may receive in his person, property or reputation. . . ." Art. II, § 19. Comparable provisions were found in the State Constitutions of Arkansas, Connecticut, Delaware, Indiana, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Minnesota, Mississippi, New Hampshire, Ohio, and Vermont. See generally F. Hough, *American Constitutions* (1871).

²⁴ One treatise stated: "Natural, proximate, and legal results are all that damages can be recovered for, even under a statute entitling one 'to recover *any* damage.'" 3 J. Lawson, *Rights, Remedies, and Practice* 1740 (1890). Another leading treatise explained:

"The chief and sufficient reason for this rule is to be found in the impossibility of tracing consequences through successive steps to the remote cause, and the necessity of pausing in the investigation of the chain of events at the point beyond which experience and observation convince us we cannot press our inquiries with safety." T. Cooley, *Law of Torts* 73 (2d ed. 1888).

I I JÁMEĀ FJĀĀ HHLÉCHĀ JÓGĀ JÍ EEEJ É LÄ I ÅSEOÅGAÅ GHÉEÜ HÍ LAFJÍ HÁMEÅSÓYÓÅFG ÅEEEG

[**906] contract.²⁷ Although particular common-law limitations were not debated in Congress, the frequent references to common-law principles imply that Congress simply assumed that antitrust damages litigation would be subject to constraints comparable to well-accepted common-law rules applied in comparable litigation.²⁸

[****28] The federal judges who first confronted the task of giving meaning to § 7 so understood the congressional intent. Thus in 1910 the Court of Appeals for the Third Circuit held as a matter of law that [HN8↑](#) neither a creditor nor a stockholder of a corporation that was injured by a violation of the antitrust laws could recover treble damages under § 7. [*Loeb v. Eastman \[*534\] Kodak Co., 183 F. 704.*](#) The court explained that the plaintiff's injury as a stockholder was "indirect, remote, and consequential." [*Id., at 709.*](#)²⁹ This holding was consistent with Justice Holmes' explanation of a similar construction of the remedial provision of the Interstate Commerce Act a few years later: "The general tendency of the law, in regard to damages at least, is not to go beyond the first step." [*Southern Pacific Co. v. Darnell-Taenzer Lumber Co., 245 U.S. 531, 533 \(1918\).*](#)³⁰ When [***736] Congress enacted § 4 of the Clayton Act in 1914, and when it reenacted that section in 1955, 69 Stat. 282, it adopted the language of § 7 and presumably [****29] also the judicial gloss that avoided a simple literal interpretation.

²⁵ In torts, a leading treatise on damages set forth the general principle that, "[where] the plaintiff sustains injury from the defendant's conduct to a third person, it is too remote, if the plaintiff sustains no other than a contract relation to such a third person, or is under contract obligation on his account, and the injury consists only in impairing the ability or inclination of such person to perform his part, or in increasing the plaintiff's expense or labor of fulfilling such contract, unless the wrongful act is willful for that purpose." Thus, A, who had agreed with a town to support all the town paupers for a specific period, in return for a fixed sum, had no cause of action against S for assaulting and beating one of the paupers, thereby putting A to increased expense. Similarly, a purchaser under an output contract with a manufacturer had no right of recovery against a trespasser who stopped the company's machinery, and a creditor could not recover against a person who had forged a note, causing diminution in the dividends from an estate. 1 J. Sutherland, Law of Damages 55-56 (1882) (emphasis in original, footnote omitted).

Similarly, in contract, the common-law courts drew a distinction between direct and consequential damages; the latter had to be specifically included in the contract to be recoverable. See [*id., at 74-93;*](#) 1 T. Sedgwick, Measure of Damages 203-244 (8th ed. 1891) (discussing the rule of *Hadley v. Baxendale*, 9 Exch. 341, 156 Eng. Rep. 145 (1854)).

²⁶ The common law required the plaintiff to prove, with certainty, both the existence of damages and the causal connection between the wrong and the injury. No damages could be recovered for uncertain, conjectural, or speculative losses. See generally cases cited in F. Bohlen, Cases on the Law of Torts 292-312 (2d ed. 1925) (cases alleging emotional harm to plaintiff). Even if the injury was easily provable, there would be no recovery if the plaintiff could not sufficiently establish the causal connection. See 1 Sutherland, *supra* n. 25, at 94-126; 1 Sedgwick, *supra* n. 25, at 245-294.

²⁷ See, e. g., *Winterbottom v. Wright*, 10 M. & W. 109, 152 Eng. Rep. 402 (Ex. 1842).

²⁸ [*LEdHN\[10B\]↑*](#) [10B]

See n. 22, *supra*. The common law, of course, is an evolving body of law. We do not mean to intimate that the limitations on damages recoveries found in common-law actions in 1890 were intended to serve permanently as limits on Sherman Act recoveries. But legislators familiar with these limits could hardly have intended the language of § 7 to be taken literally.

²⁹ See also [*Amex v. American Telephone & Telegraph Co., 166 F. 820 \(CC Mass. 1909\).*](#) Applying "ordinary principles of law" to the general language of the statute, the court held that a stockholder had no legally cognizable antitrust claim against defendants for illegally acquiring the corporation, thereby rendering plaintiff's stock worthless. Plaintiff's claim was not distinguishable from any injury sustained by the company itself. Therefore, the court stated, a contrary result would "subject the defendant not merely to treble damages, but to sextuple damages, for the same unlawful act." [*Id., at 823.*](#)

³⁰ The Court held in that case that the plaintiff shippers could recover damages from the defendant railroad for charging an excessive freight rate, even though they had been able to pass on the damage to their purchasers. Justice Holmes wrote that the law holds the defendant "liable if proximately the plaintiff has suffered a loss," but "does not attribute remote consequences to a defendant." [*245 U.S., at 533-534.*](#)

I I JÁMEĀ FJĀM HI LĀEHAUĀ JI EĒJ ē LĀ I ÅSEÅAÅ GHEĀH H I LÄFJÌ HÄWÆÅSÖYÓÅFG ÅÅEGJ

[****30] As this Court has observed, the lower federal courts have been "virtually unanimous in concluding that Congress did not intend the antitrust laws to provide a remedy in damages for all injuries that might conceivably be traced to an antitrust violation." *Hawaii v. Standard Oil Co.*, 405 U.S. 251, 263, n. 14 (1972). Just last Term we stated:

HN9 [↑] " [**907] An antitrust violation may be expected to cause ripples of harm to flow through the Nation's economy; but 'despite the broad wording of § 4 there is a point beyond which the wrongdoer should not be held liable.' [*Illinois* [*535] *Brick Co. v. Illinois*, 431 U.S.], at 760 (BRENNAN, J., dissenting). It is reasonable to assume that Congress did not intend to allow every person tangentially affected by an antitrust violation to maintain an action to recover threefold damages for the injury to his business or property." *Blue Shield of Virginia v. McCready*, 457 U.S. 465, 476-477 (1982).

LEDHN[9B] [↑] [9B] **LEDHN[11A]** [↑] [11A] [****31] It is plain, therefore, that the question whether the Union may recover for the injury it allegedly suffered by reason of the defendants' coercion against certain third parties cannot be answered simply by reference to the broad language of § 4. Instead, as was required in common-law damages litigation in 1890, the question requires us to evaluate the plaintiff's harm, the alleged wrongdoing by the defendants, and the relationship between them.³¹

[****32] IV

There is a similarity between the struggle of common-law judges to articulate a precise definition of the concept of "proximate cause,"³² [****33] and [***737] the struggle of federal judges to [*536] articulate a precise test to determine whether a party injured by an antitrust violation may recover treble damages.³³ [****34] It is common

³¹ **LEDHN[11B]** [↑] [11B]

The label "antitrust standing" has traditionally been applied to some of the elements of this inquiry. As commentators have observed, the focus of the doctrine of "antitrust standing" is somewhat different from that of standing as a constitutional doctrine.

HN10 [↑] Harm to the antitrust plaintiff is sufficient to satisfy the constitutional standing requirement of injury in fact, but the court must make a further determination whether the plaintiff is a proper party to bring a private antitrust action. See Berger & Bernstein, An Analytical Framework for Antitrust Standing, 86 Yale L. J. 809, 813, n. 11 (1977); Pollock, Standing to Sue, Remoteness of Injury, and the Passing-On Doctrine, 32 A. B. A. Antitrust L. J. 5, 6-7 (1966).

³² In his comment, *Mahoney v. Beatman*: A Study in Proximate Cause, 39 Yale L. J. 532, 533 (1930), Leon Green noted: "Legal theory is too rich in content not to afford alternative ways, and frequently several of them, for stating an acceptable judgment." Earlier, in his Rationale of Proximate Cause 135-136 (1927) (footnote omitted), Green had written:

"Cause,' although irreducible in its concept, could not escape the ruffles and decorations so generously bestowed: remote, proximate, direct, immediate, adequate, efficient, operative, inducing, moving, active, real, effective, decisive, supervening, primary, original, contributory, ultimate, concurrent, causa causans, legal, responsible, dominating, natural, probable, and others. The difficulty now is in getting any one to believe that so simple a creature could have been so extravagantly garbed."

³³ Some courts have focused on the directness of the injury, e. g., *Loeb v. Eastman Kodak Co.*, 183 F. 704, 709 (CA3 1910); *Productive Inventions, Inc. v. Trico Products Corp.*, 224 F.2d 678, 679 (CA2 1955), cert. denied, 350 U.S. 936 (1956); *Volasco Products Co. v. Lloyd A. Fry Roofing Co.*, 308 F.2d 383, 394-395 (CA6 1962), cert. denied, 372 U.S. 907 (1963). Others have applied the requirement that the plaintiff must be in the "target area" of the antitrust conspiracy, that is, the area of the economy which is endangered by a breakdown of competitive conditions in a particular industry. E. g., *Pan-Islamic Trade Corp. v. Exxon Corp.*, 632 F.2d 539, 546-547 (CA5 1980); *Engine Specialties, Inc. v. Bombardier Ltd.*, 605 F.2d 1, 17-18 (CA1 1979); *Calderone Enterprises Corp. v. United Artists Theater Circuit, Inc.*, 454 F.2d 1292, 1292-1295 (CA2 1971). Another Court of Appeals has asked whether the injury is "arguably within the zone of interests protected by the antitrust laws." *Malamud v. Sinclair Oil Corp.*, 521 F.2d 1142, 1151-1152 (CA6 1975). See generally Berger & Bernstein, *supra* n. 31.

I I JÁMEĀ FJÄÄ HÍ LÄCHÄUÖÄ JÍ ÈEJ ËI LÄ I ÄSEÖäÄÄ Ä GÄÄÄÄ HÍ LÄFJÌ HÄWÈÄSÖYÖÄFG ÄÄÄÄH

ground that the judicial remedy cannot encompass every conceivable harm that can be traced to alleged [**908] wrongdoing. In both situations the infinite variety of claims that may arise make it virtually impossible to announce a black-letter rule that will dictate the result in every case.³⁴ Instead, [*537] previously decided cases identify factors that circumscribe and guide the exercise of judgment in deciding whether the law affords a remedy in specific circumstances.

[LEdHN\[9C\]](#) [↑] [9C] [LEdHN\[12A\]](#) [↑] [12A] The factors that favor judicial recognition of the Union's antitrust claim are easily stated. The complaint does allege a causal connection between an antitrust violation and harm to the Union and further [****35] alleges that the defendants intended to cause that harm. As we have indicated, however, the mere fact that the claim is literally encompassed by the Clayton Act does not end the inquiry. We are also satisfied that an allegation of improper motive, although it may support a plaintiff's damages claim under § 4, 35 [****36] is not a panacea that will [***738] enable any complaint to withstand a motion to dismiss.³⁶ Indeed, in *McCready*, we specifically held: "[HN12](#) [↑] The availability of the § 4 remedy to some person who claims its benefit is not a question of the specific intent of the conspirators." [457 U.S., at 479.](#)³⁷

[*538] A number of other factors may be controlling. In this case it is appropriate to focus on the nature of the plaintiff's alleged injury. As the legislative history shows, the Sherman Act was enacted to assure customers the benefits of price competition, and our prior cases have emphasized the central interest in protecting the economic freedom of participants in the relevant market.³⁸ [****38] Last Term in [Blue Shield of Virginia v. McCready, supra](#), we identified the relevance of this central policy to a determination of the plaintiff's right to maintain an action under § 4. McCready alleged that she was a consumer [****37] of psychotherapeutic services and that she had been

As a number of commentators have observed, these labels may lead to contradictory and inconsistent results. See Berger & Bernstein, *supra* n. 31, at 835, 843; Handler, The Shift From Substantive to Procedural Innovations in Antitrust Suits, 71 Colum. L. Rev. 1, 27-31 (1971); Sherman, Antitrust Standing: From *Loeb* to *Malamud*, 51 N. Y. U. L. Rev. 374, 407 (1976) ("it is simply not possible to fashion an across-the-board and easily applied standing rule which can serve as a tool of decision for every case"). In our view, courts should analyze each situation in light of the factors set forth in the text *infra*.

³⁴ Cf. [Blue Shield of Virginia v. McCready, 457 U.S., at 477-478, n. 13](#) (discussing elusiveness of test of proximate cause); [Palsgraf v. Long Island R. Co., 248 N. Y. 339, 162 N. E. 99 \(1928\)](#); *id. at 351-352, 162 N. E. at 103* (Andrews, J., dissenting) ("[HN11](#) [↑] What is a cause in a legal sense, still more what is a proximate cause, depend in each case upon many considerations What we do mean by the word 'proximate' is, that because of convenience, of public policy, of a rough sense of justice, the law arbitrarily declines to trace a series of events beyond a certain point").

³⁵ [LEdHN\[12B\]](#) [↑] [12B]

It is well settled that a defendant's specific intent may sometimes be relevant to the question whether a violation of law has been alleged. See [United States v. Columbia Steel Co., 334 U.S. 495, 522 \(1948\)](#). Moreover, there no doubt are cases in which such an allegation would adequately support a plaintiff's claim under § 4. Cf. Handler, *supra* n. 33, at 30 (specific intent of defendant to cause injury to a particular class of persons should "ordinarily be dispositive" in creating standing to sue); Lytle & Purdue, Antitrust Target Area Under Section 4 of the Clayton Act: Determination of Standing in Light of the Alleged Antitrust Violation, 25 Am. U. L. Rev. 795, 814-816 (1976) (suggesting that standing in a group boycott situation should be based on the purpose of the boycott).

³⁶ See Sherman, *supra* n. 33, at 389-391, citing *Billy Baxter, Inc. v. Coca-Cola Co., 431 F.2d 183, 189 (CA2 1970)*, cert. denied, [401 U.S. 923 \(1971\)](#).

³⁷ In *McCready* we rejected the contention that, because there was no specific intent to harm the plaintiff, her injury was thereby rendered remote. This case presents a different question, but in neither case is the motive allegation of controlling importance.

³⁸ See [United States v. Topco Associates, Inc., 405 U.S. 596, 610 \(1972\)](#) ("Antitrust laws in general, and the Sherman Act in particular, are the Magna Carta of free enterprise. They are as important to the preservation of economic freedom and our free-enterprise system as the [Bill of Rights](#) is to the protection of our fundamental personal freedoms. And the freedom guaranteed each and every business, no matter how small, is the freedom to compete -- to assert with vigor, imagination, devotion, and ingenuity whatever economic muscle it can muster").

I I JÁMEĀ FJĀM HÌ LÀEHAUĀGÀ JÌ ÈEJÈ LÀI ÅSEOÅGAÅ GHÄTT HÌ LÀFJÌ HÀWÈÅSÓYÓÅFG ÄÅTTÅH

injured by the defendants' conspiracy to restrain competition in the market for such services.³⁹ The Court stressed [**909] the fact that "McCready's injury was of a type that Congress sought to redress in providing a private remedy for violations of the antitrust laws." [457 U.S., at 483](#), citing *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc.*, [429 U.S. 477, 487-489 \(1977\)](#). After noting that her injury "was inextricably intertwined with the injury the conspirators sought to inflict on psychologists and the psychotherapy market," [457 U.S., at 484](#), the Court concluded that such an injury "falls squarely within the area of congressional concern." *Ibid.*

[*539] [LEdHN\[13A\]](#) [↑] [13A] In this case, however, the Union was neither a consumer nor a competitor in the market in which trade was restrained.⁴⁰ [****40] It is not clear [***739] whether the Union's interests would be served or disserved by enhanced competition in the market. As a general matter, a union's primary goal is to enhance the earnings and improve the working conditions of its membership; that goal is not necessarily served, and indeed may actually be harmed, by uninhibited competition among employers striving to reduce costs in order to obtain a competitive advantage over their rivals.⁴¹ At common law -- as well as in the early [***39] days of administration of the federal antitrust laws -- the collective activities of labor unions were regarded as a form of conspiracy in restraint of trade.⁴² [****41] Federal policy has since developed not only a broad labor exemption from the antitrust laws,⁴³ but also a separate body of [*540] labor law specifically designed to protect and encourage the organizational and representational activities of labor unions. Set against this background, [HN13](#) [↑] a union, in its capacity as bargaining representative, will frequently not be part of the class the Sherman Act was designed to protect, especially in disputes with employers with whom it bargains. In each case its alleged injury must be analyzed to determine whether it is of the type that the antitrust statute was intended to forestall. See *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., supra, at 487-488*. In this case, particularly in light of the longstanding collective-bargaining relationship between the parties, the Union's labor-market interests seem to predominate, and the *Brunswick* test is not satisfied.

An additional factor is the directness or indirectness of the asserted injury. In this case, the chain of causation between the Union's injury and the alleged restraint in the market for construction subcontracts [**910] contains several somewhat vaguely defined links. According to the complaint, defendants applied coercion against certain landowners and other contracting parties in order to cause them to divert business from certain union contractors to nonunion contractors.⁴⁴ [****43] As a result, [*541] the [***740] Union's complaint alleges, the Union suffered

³⁹ McCready, a Blue Shield subscriber, alleged that Blue Shield and the Neuropsychiatric Society of Virginia, Inc., had unlawfully conspired to restrain competition in the market for psychotherapeutic services by providing insurance coverage only for consumers who patronized psychiatrists, not psychologists. McCready obtained services from a psychologist and was denied reimbursement.

⁴⁰ Moreover, it has not even alleged any marketwide restraint of trade. The allegedly unlawful conduct involves predatory behavior directed at "certain" parties, rather than a claim that output has been curtailed or prices enhanced throughout an entire competitive market.

⁴¹ In *Mine Workers v. Pennington*, [381 U.S. 657, 664 \(1965\)](#), the Court recognized that wages lie at the heart of the subjects of mandatory collective bargaining, and that "the elimination of competition based on wages among the employers in the bargaining unit," which directly benefits the union, also has an effect on competition in the product market. See generally Leslie, Principles of Labor Antitrust, 66 Va. L. Rev. 1183, 1185-1188 (1980); Winter, Collective Bargaining and Competition: The Application of Antitrust Standards to Union Activities, 73 Yale L. J. 14, 17-20, 28-30 (1963).

⁴² See, e. g., *Coronado Coal Co. v. Mine Workers*, [268 U.S. 295, 310 \(1925\)](#) (applying Sherman Act to alleged conspiracy by unions involved in labor dispute to restrain interstate trade in coal); *Loewe v. Lawlor*, [208 U.S. 274 \(1908\)](#) (applying Sherman Act to boycott by labor organization seeking to unionize plaintiff's hat factory); Cox, Labor and the Antitrust Laws -- A Preliminary Analysis, 104 U. Pa. L. Rev. 252, 256-262 (1955); Meltzer, Labor Unions, Collective Bargaining, and the Antitrust Laws, 32 U. Chi. L. Rev. 659, 661-666 (1965); Winter, *supra* n. 41, at 30-38.

⁴³ See [29 U. S. C. § 52](#) (statutory labor exemption); *Mine Workers v. Pennington, supra*; *Meat Cutters v. Jewel Tea Co.*, [381 U.S. 676 \(1965\)](#) (nonstatutory exemption). In this case we need not reach petitioner's contentions that the alleged activities are within the statutory and nonstatutory labor exemptions.

I Í JÁMEÐA FJÆÐI FLÁÐA ÆÐA JÍ ÆÐEJ FELÀ I ÆÐOÐA ÆÐA GHEÐI ÐI ÆÐFJÌ HÁÐEÐSÓYÓÐAG ÞÆÐH

unspecified injuries in its "business activities."⁴⁵ It is obvious that any such injuries were only an indirect result of whatever harm may have been suffered [****42] by "certain" construction contractors and subcontractors.⁴⁶

[****44] If either these firms, or the immediate victims of coercion by defendants, have been injured by an antitrust violation, their injuries would be direct and, as we held in *McCready*, they would have a right to maintain their own treble-damages actions against the defendants. An action on their behalf would encounter none of the conceptual difficulties that [*542] encumber the Union's claim.⁴⁷ [****45] [HN14](#)[↑] The existence of an [***741] identifiable class of persons whose self-interest would normally motivate them to vindicate the public interest in antitrust enforcement diminishes the justification for allowing a [**911] more remote party such as the Union to perform the office of a private attorney general.⁴⁸ Denying the Union a remedy on the basis of its allegations in this case is not likely to leave a significant antitrust violation undetected or unremedied.⁴⁷

Partly because it is indirect, and partly because the alleged effects on the Union may have been produced by independent factors, the Union's damages claim is also highly speculative. There is, for example, no allegation that

⁴⁴ There is a parallel between these allegations and the claim in *Connell Construction Co. v. Plumbers & Steamfitters*, 421 U.S. 616 (1975). The plaintiff in that case, a general building contractor, was coerced by the defendant union into signing an agreement not to deal with nonunion subcontractors. Similarly, in the *McCready* case, the plaintiff was the direct victim of unlawful coercion. As the Court noted, "McCready did not yield to Blue Shield's coercive pressure, and bore Blue Shield's sanction in the form of an increase in the net cost of her psychologist's services." [457 U.S., at 483](#). Her status was thus comparable to that of a contracting or subcontracting firm that refused to yield to the defendants' coercive practices and therefore suffered whatever sanction that coercion imposed. Like *McCready*, and like *Connell Construction Co.*, such a firm could maintain an action against the defendants. In contrast, the Union is neither a participant in the market for construction contracts or subcontracts nor a direct victim of the defendants' coercive practices. We therefore need not decide whether the direct victim of a boycott, who suffers a type of injury unrelated to antitrust policy, may recover damages when the ultimate purpose of the boycott is to restrain competition in the relevant economic market.

⁴⁵ Its brief merely echoes the Court of Appeals' description of its allegations: "the Unions have been injured in their business, i.e., organizing carpentry industry employees, negotiating and policing collective bargaining agreements, and securing jobs for their members." Brief for Respondents 25-26.

⁴⁶ Because of the absence of specific allegations, we can only speculate about the specific components of the Union's claim. If the Union asserts that its attempts to organize previously nonunion firms have been frustrated because nonunion firms wish to continue to obtain business from those subjected to coercion by the defendants, its harm stems most directly from the conduct of persons who are not victims of the conspiracy. See n. 14, *supra*. If the Union claims that dues payments were adversely affected because employees had less incentive to join the Union in light of expanding nonunion job opportunities, its damage is more remote than the harm allegedly suffered by unionized subcontractors. The same is true if the Union contends that revenues from dues payments declined because its members lost jobs or wages because their unionized employers lost business. That harm, moreover, is even more indirect than the already indirect injury to its members, yet a number of decisions have denied standing to employees with merely derivative injuries. See, e.g., *Pitchford v. PEPI, Inc.*, 531 F.2d 92, 97 (CA3), cert. denied, 426 U.S. 935 (1976); *Contreras v. Grower Shipper Vegetable Assn.*, 484 F.2d 1346 (CA9 1973), cert. denied, 415 U.S. 932 (1974); *Reibert v. Atlantic Richfield Co.*, 471 F.2d 727 (CA10), cert. denied, 411 U.S. 938 (1973). But see *Nichols v. Spencer Int'l Press, Inc.*, 371 F.2d 332, 334 (CA7 1967).

⁴⁷ Indeed, if there is substance to the Union's claim, it is difficult to understand why these direct victims of the conspiracy have not asserted any claim in their own right. The Union's suggested explanations of this fact tend to shed doubt on the proposition that these "victims" were actually harmed at all.

"Many unionized firms will respond to the alleged boycott . . . by setting up double-breasted operations or shifting more of their resources to the non-unionized part of their operations when double-breasted operations already exist. In this manner, unionized subcontractors can avoid losing any business and, as a result, these subcontractors will *not* possess the classic economic incentive to file suit." Alternatively, unionized subcontractors may simply not renew the collective bargaining agreement when it expires." Brief for Respondents 49 (citation omitted).

⁴⁸ Cf. *Blue Chip Stamps v. Manor Drug Stores*, 421 U.S. 723, 739-748 (1975) (purchaser-seller limitation on actions under § 10(b) of Securities Exchange Act of 1934).

I Í JÁMEÍA FJÆÍ I GLÆHÚDGA JÍ ÆFFLÀ I ÆSDAÉCA Á GHÆTÍ I FLAFJÍ HÁMEÍSÓYÓÁFG ÆTHÍ I

any collective-bargaining agreement was terminated as a result of the coercion, no allegation that the aggregate share of the contracting market controlled by union firms has diminished, no allegation that the number of employed union members has declined, and no allegation that the Union's revenues in the form of dues or initiation fees have decreased. Moreover, although coercion against certain firms is alleged, there is no assertion that any such firm was prevented from doing business with any union firms or that any firm or group of firms was subjected to a complete boycott. See nn. 9, 15, and 16, *supra*. [**543] Other than the alleged injuries flowing from breaches of [****46] the collective-bargaining agreements -- injuries that would be remediable under other laws -- nothing but speculation informs the Union's claim of injury by reason of the alleged unlawful coercion. Yet, as we have recently reiterated, [HN15](#)⁴⁹ it is appropriate for § 4 purposes "to consider whether a claim rests at bottom on some abstract conception or speculative measure of harm." *Blue Shield of Virginia v. McCready*, 457 U.S., at 475, n. 11, citing *Hawaii v. Standard Oil Co.*, 405 U.S., at 262-263, n. 14.⁴⁹

[****47] The indirectness of the alleged injury also implicates the strong interest, identified in our prior cases, in keeping the scope of complex antitrust trials within judicially manageable limits.⁵⁰ These cases have [***742] stressed the importance of avoiding [*544] either the risk of duplicate recoveries on the one hand, or the danger of complex apportionment of damages on the other. Thus, in *Hanover Shoe, Inc. v. United Shoe Machinery Corp.*, 392 U.S. 481 (1968), we refused to allow the defendants to discount the plaintiffs' damages claim to the extent that overcharges had been passed on to the plaintiffs' customers. We noted that any attempt to ascertain damages with such precision "would often require additional long and complicated proceedings involving massive evidence and complicated theories." *Id.*, at 493. [**912] In *Illinois Brick Co. v. Illinois*, 431 U.S. 720 (1977), we held that treble damages could not be recovered by indirect purchasers of concrete blocks who had paid an enhanced price because their suppliers had been victimized by a price-fixing conspiracy. We observed that potential plaintiffs [****48] at each level in the distribution chain would be in a position to assert conflicting claims to a common fund, the amount of the alleged overcharge, thereby creating the danger of multiple liability for the fund and prejudice to absent plaintiffs.

"Permitting the use of pass-on theories under § 4 essentially would transform treble-damages actions into massive efforts to apportion the recovery among all potential plaintiffs that could have absorbed part of the overcharge -- from direct purchasers to middlemen to ultimate consumers. However appealing this attempt to allocate the overcharge might seem in theory, it would add whole new dimensions of complexity to treble-damages suits and seriously undermine their effectiveness." *Id.*, at 737-738.

⁴⁹ We expressly noted in *McCready*:

"[Our] cautious approach to speculative, abstract, or impractical damages theories has no application to McCready's suit. The nature of her injury is easily stated: As the result of an unlawful boycott, Blue Shield failed to pay the cost she incurred for the services of a psychologist. Her damages were fixed by the plan contract and, as the Court of Appeals observed, they could be 'ascertained to the penny.'" *457 U.S., at 475-476, n. 11*.

⁵⁰ This interest was also identified in the legislative debates preceding the enactment of the Sherman Act. Speaking in opposition to a proposed amendment that might have complicated the procedures in private actions, Senator Edmunds said:

"Therefore I say as to the suggested amendment of my friend from Mississippi -- and I repeat it in all earnestness -- that if I were a lobbyist and wanted to entangle this business, I should provide that everybody might sue everybody else in one common suit and have a regular *pot-pourri* of the affair, as his amendment proposes, and leave it to the lawyers of the trust to have an interminable litigation in respect of the proper parties, whether their interests were common or diverse or how they were affected, and take twenty years in order to get a result as to a single one of them. The Judiciary Committee did not think it wise to do that sort of thing, because we were in earnest about the business, as I know my friend is." 21 Cong. Rec. 3148 (1890).

See also *id.*, at 3149 (remarks of Senator Morgan opposing same amendment: "There is as much harm in trying to do too much as there is in not trying to do anything, and I think we have stopped at about the proper line in this bill, and I shall support it just as it is").

I I JÁMEĀ FJĀM I I LÉCHAUĀGĀ JI EĒJFGĀ I ÅSEÅAÅCÅÅ GÅÅTÅI I GLÅJÌ HÅÅEÅSØYØÅFG ÅÅTÅI

[****49] The same concerns should guide us in determining whether the Union is a proper plaintiff under § 4 of the Clayton Act.⁵¹ [****50] [*545] As the Court wrote in *Illinois Brick*, massive and complex damages litigation not only burdens the courts, but also undermines the effectiveness of treble-damages suits. *Id.* at 745. In this case, if the Union's complaint asserts a claim for damages under § 4, the District Court would face problems of identifying damages and apportioning them among directly victimized contractors and subcontractors and indirectly affected employees and union entities. It would be necessary to determine to what extent the coerced firms diverted business away from union subcontractors, and then to what extent those subcontractors [***743] absorbed the damage to their businesses or passed it on to employees by reducing the work force or cutting hours or wages. In turn it would be necessary to ascertain the extent to which the affected employees absorbed their losses and continued to pay union dues.⁵²

LEdHN[1B] [↑] [1B] LEdHN[13B] [↑] [13B] We conclude, therefore, that the Union's allegations of consequential harm resulting from a violation of the antitrust laws, although buttressed by an allegation of intent to harm the Union, are insufficient as a matter of law. Other relevant factors -- the nature of the Union's injury, the tenuous and speculative character of the relationship between the alleged antitrust violation and the Union's alleged injury, the potential for duplicative recovery or complex apportionment of damages, and the existence of more direct victims of the alleged conspiracy -- weigh heavily against [***51] judicial enforcement of the Union's antitrust claim. Accordingly, we hold that, based on the allegations of this complaint, the District [*546] Court was correct in concluding that the Union is not a person injured by reason of a violation of the antitrust laws within the meaning of § 4 of the Clayton Act. The judgment of the Court of Appeals is reversed.

It is so ordered.

Dissent by: MARSHALL

Dissent

JUSTICE MARSHALL, dissenting.

Section 4 of the Clayton Act provides that a damages action may be brought under the antitrust laws by "[any] person who [has been] injured in his business or [**913] property by reason of anything forbidden in the antitrust laws." 15 U. S. C. § 15 (emphasis added). Despite the absence of an "articulable consideration of statutory policy" supporting the denial of standing, *Blue Shield of Virginia v. McCready*, 457 U.S. 465, 473 (1982), the Court today holds that the intended victim of a restraint of trade does not constitute a "person who [has been] injured in his business or property by reason of anything forbidden in the antitrust laws." Because I believe that this decision imposes an [***52] unwarranted judge-made limitation on the antitrust laws, I respectfully dissent.

Congress' adoption of the broad language of § 4 was not accidental. As this Court observed in *Pfizer Inc. v. India*, 434 U.S. 308, 312 (1978): "Congress used the phrase 'any person' intending it to have its naturally broad and inclusive meaning. There was no mention in the floor debates of any more restrictive definition." Only last Term we emphasized that the all-encompassing language of § 4 "reflects Congress' 'expansive remedial purpose' in enacting

⁵¹ We pointed out in *McCready*, 457 U.S., at 475, n. 11:

"If there is a subordinate theme to our opinions in *Hawaii* and *Illinois Brick*, it is that HN16 [↑] the feasibility and consequences of implementing particular damages theories may, in certain limited circumstances, be considered in determining who is entitled to prosecute an action brought under § 4. . . . Thus we recognized that the task of disentangling overlapping damages claims is not lightly to be imposed upon potential antitrust litigants, or upon the judicial system."

⁵² Although the policy against duplicative recoveries may not apply to the other type of harm asserted in the Union's brief -- reduction in its ability to persuade nonunion contractors to enter into union agreements -- the remote and obviously speculative character of that harm is plainly sufficient to place it beyond the reach of § 4. See n. 46, *supra*.

I Í JÁMEÍA FJÆÍ I Í LÆCHAUÐA JÍ ÆEJFHÄ I ÅSEÐA ÆCA Á GHÆTI Í HLÆFJÍ HÁMEÍSÓYÓÁFG ÆTEG

§ 4: Congress sought to create a private enforcement mechanism that would deter violators and deprive them of the fruits of their illegal actions, and would provide ample compensation to the victims of antitrust violations." [Blue Shield of Virginia v. McCready, supra, \[***744\] at 472](#), quoting [Pfizer Inc. v. India, supra, at 313-314](#).

In keeping with the inclusive language and remedial purposes of § 4, this Court has "refused to engraft artificial limitations [⁵⁴⁷] on the § 4 remedy." [Blue Shield of Virginia v. McCready, supra, at 472](#) (footnote omitted). [⁵³] ¹ Thus, for example, in [Pfizer Inc. v. India](#), the Court held that the statutory phrase "any person" is broad enough to encompass a foreign sovereign. In [Reiter v. Sonotone Corp., 442 U.S. 330 \(1979\)](#), the Court likewise adopted an expansive reading of the statutory term "property," ruling that a consumer who pays a higher price as a result of a price-fixing conspiracy has sustained an injury to his "property" and therefore has standing to sue under § 4.

The plaintiff unions fit comfortably within the language of § 4. The complaint [⁵⁴] alleges that plaintiffs suffered injury as a result of a restraint of trade that was "designed to weaken and destroy plaintiffs and each of them." Complaint para. 26. The Court does not suggest that a union is not a "person" within the meaning of § 4, or that plaintiffs cannot prove injury to their "business or property." Moreover, it would require a strained reading of § 4 to conclude that a party that an antitrust violation was aimed at cannot prove that it suffered injury "by reason of" an antitrust violation.

Far from supporting the Court's conclusion, *ante*, at 531-533, the common-law background of the antitrust laws highlights the anomaly of denying a remedy to the intended victim of unlawful conduct. Since antitrust violations are essentially "tortious acts," [Bigelow v. RKO Radio Pictures, Inc., 327 U.S. 251, 264 \(1946\)](#),² the most apt analogy is to the common law of torts. Although many legal battles have been fought over the extent of tort liability for remote consequences [⁵⁴⁸] of *negligent* conduct, it has always been assumed that the victim of an *intentional* tort can recover from the tortfeasor if he proves that the tortious [⁵⁵] conduct was a cause-in-fact of his injuries. An [⁹¹⁴] inquiry into proximate cause has traditionally been deemed unnecessary in suits against intentional tortfeasors.³ [⁵⁶] For [⁷⁴⁵] example, if one party makes false representations to another, intending them to be communicated to a third party and acted upon to his detriment, the third party can bring an action for misrepresentation against the originator of the false information if he suffers injury as a result.⁴ Indeed, in many

¹ Cf. [Radovich v. National Football League, 352 U.S. 445, 453-454 \(1957\)](#) (given Congress' determination that the activities prohibited by the antitrust laws are "injurious to the public" and its creation of "sanctions allowing private enforcement of the antitrust laws by an aggrieved party," "this Court should not add requirements to burden the private litigant beyond what is specifically set forth by Congress in those laws").

² See [Karseal Corp. v. Richfield Oil Corp., 221 F.2d 358, 363 \(CA9 1955\)](#) (antitrust action is basically a suit to recover "for a tort").

³ See **Restatement of Torts § 279** (1934) ("If the actor's conduct is intended by him to bring about bodily harm to another which the actor is not privileged to inflict, it is the legal cause of any bodily harm of the type intended by him which it is a substantial factor in bringing about"); *id.*, Comment c ("There are no rules which relieve the actor from liability because of the manner in which his conduct has resulted in the injury such as there are where the liability of a negligent actor is in question. Therefore, the fact that the actor's conduct becomes effective in harm only through the intervention of new and independent forces for which the actor is not responsible is of no importance") (citations omitted); *id.*, § 280 (same rule applies to conduct intended to cause harm other than bodily harm); [Seidel v. Greenberg, 108 N. J. Super. 248, 261-269, 260 A. 2d 863, 871-876 \(1969\)](#); [Derosier v. New England Tel. & Tel. Co., 81 N. H. 451, 464, 130 A. 145, 152 \(1925\)](#) ("For an intended injury the law is astute to discover even very remote causation").

The Court's reliance on Sutherland's treatise on damages is misplaced. *Ante*, at 532-533, n. 25. Although Sutherland stated as a general proposition that a defendant is not liable to a plaintiff for injuries suffered as a result of the defendant's conduct with respect to a third party, he distinguished cases in which "the wrongful act is willful for that purpose," by which he presumably meant cases in which the defendant intended to injure the plaintiff. 1 J. Sutherland, *Law of Damages* 55 (1882) (footnote omitted). In the examples given by Sutherland and cited by the Court, there is no suggestion that the defendants intended to inflict injury upon the plaintiffs.

I Í JÁMEĀ FJĀĀ I Í LÄCHÄĀDÄ JÍ ÄEJFI LÄI ÄSEOÄÄÄÄ GÄÄÄÄ I Í LÄFJÌ HÄWÄÄSÖYÖÄFG ÄÄÄÄ I

situations the common law holds [*549] an intentional tortfeasor liable even for the unforeseeable consequences of his conduct.⁵ I am not aware of any cases exonerating an intentional tortfeasor from responsibility for the intended consequences of his actions merely because he inflicted harm upon his victim indirectly rather than directly.

This case does not implicate the sort of "articulable consideration of statutory policy" which we have deemed necessary to deny standing to a party encompassed by the language of § 4. *Blue Shield of Virginia v. McCready*, 457 U.S., at 473. In *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc.*, 429 U.S. 477 (1977), we denied standing to parties that suffered injury because an illegal acquisition prevented them from reaping profits that they would have reaped had the acquired firms been permitted to fail. We reasoned that permitting recovery for "the profits [plaintiffs] [****57] would have realized had competition been reduced" would be "inimical" to the purposes of the antitrust laws, *id.*, at 488, since plaintiffs' injuries did not "reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation," *id.*, at 489. This consideration of statutory policy is not applicable here, for plaintiffs allege that they suffered injury as a result of the defendants' efforts to coerce and induce letters of construction contracts and others to deal with nonunion carpentry firms solely because of their nonunion status. If plaintiffs prove their allegations, they will prove that they suffered harm attributable to the anticompetitive consequences of the defendants' restraint of trade.

Nor does the present case implicate the consideration of statutory policy underlying this Court's decisions in *Illinois Brick Co. v. Illinois*, 431 U.S. 720 (1977), and *Hawaii v. Standard Oil Co.*, 405 U.S. 251 (1972). Critical to the denial of [**915] standing in those cases was [***746] the risk of duplicative recovery that would have been created by affording [****58] the plaintiffs [*550] standing.⁶ In *Illinois Brick* the Court held that an indirect purchaser has no standing to sue a seller on the theory that overcharges paid to the seller by a direct purchaser were passed on to the indirect purchaser. 431 U.S., at 730-731. If the Court had held in *Illinois Brick* that the indirect purchaser has standing, sellers would have faced the prospect of two treble-damages actions based on the same overcharges. *Hanover Shoe, Inc. v. United Shoe Machinery Corp.*, 392 U.S. 481 (1968), had established that a direct purchaser can sue a seller for the entire amount of the seller's overcharges, and that the seller cannot assert as a defense that the direct purchaser passed the overcharges through to its customers (the indirect purchasers). Similarly, in *Hawaii v. Standard Oil Co.*, where the State of Hawaii sought to recover for financial harm allegedly suffered by the general economy of the State, the Court denied standing because "[a] large and ultimately indeterminable part of the injury to the 'general economy,' as it is measured by economists, is no more than a reflection of injuries to the 'business' [***59] or property' of consumers, for which they may recover themselves under § 4." 405 U.S., at 264.⁷

[***60] There is no risk of double recovery here. The plaintiff unions seek recovery for injuries distinct from those that other parties may have suffered. One such distinct injury [*551] plaintiffs may have suffered is a decrease in union dues resulting from a reduction in work available to union members. In addition to regular dues, it is not uncommon for employees to pay periodic dues representing a percentage of their wages. See R. Gorman, Basic

⁴ See, e. g., *Watson v. Crandall*, 7 Mo. App. 233 (1879), aff'd, 78 Mo. 583 (1883); *Campbell v. Gooch*, 131 Kan. 456, 292 P. 752 (1930). See generally Prosser, Misrepresentation and Third Persons, 19 Vand. L. Rev. 231, 240-242 (1966).

⁵ See, e. g., W. Prosser, Law of Torts 32-33 (4th ed. 1971) (doctrine of transferred intent); *id.*, at 67-68 (trespasser is responsible for unforeseeable consequences of his trespass).

⁶ See *Blue Shield of Virginia v. McCready*, 457 U.S. 465, 474-475 (1982) (noting that *Illinois Brick* and *Hawaii v. Standard Oil Co.* "focused on the risk of duplicative recovery engendered by allowing every person along a chain of distribution to claim damages arising from a single transaction that violated the antitrust laws").

⁷ Significantly, the risk of duplicative recovery that the Court relied on in both *Illinois Brick* and *Hawaii v. Standard Oil Co.* is not simply a judicially invented reason for restricting the broad scope of § 4. Permitting two recoveries based on the very same injuries would be contrary to the basic statutory scheme governing damages actions, for the result would be to subject antitrust defendants to sextuple-damages awards rather than the treble-damages awards that Congress contemplated. See 2 P. Areeda & D. Turner, *Antitrust Law* § 337d (1978).

Text on Labor Law 650 (1976).⁸ If union members lost work as a result of the alleged restraint of trade, their wages and thus the dues collected by the plaintiff unions may have been reduced.

Any recovery of lost dues by the plaintiff unions would not duplicate [***61] recoveries that might be obtained by either unionized carpentry firms or employees of those firms. A recovery of lost dues by a union would not duplicate a recovery for lost profits that might be obtained by a firm for which union members worked, for union dues are not an element of a [***747] firm's profits. Nor would a recovery of lost dues by a union duplicate recoveries of lost wages that employees might obtain. Although periodic union dues are based on a percentage of wages, there would be no double recovery because union dues would be subtracted from lost wages in calculating the employees' damages. The *Hanover Shoe* rule barring the assertion of a "pass-through" defense would not prevent subtraction of union dues from wages in determining the employees' damages. The *Hanover Shoe* rule was designed to avoid the "additional long and complicated proceedings involving massive evidence and complicated theories" that would be required to determine the extent to which price overcharges were passed through to an indirect purchaser. [392 U.S., at 493](#). [**916] In sharp contrast, where union dues are a percentage of wages, there is no difficulty in determining [***62] the amount of dues that a union lost as a result of a reduction in the wages earned by union members.

[*552] I recognize that it may not be easy to ascertain to what extent any reduction in union dues was attributable to the defendants' conduct. But our cases make it clear that "[if] there is sufficient evidence in the record to support an inference of causation, the ultimate conclusion as to what the evidence proves is for the jury." [Perkins v. Standard Oil Co., 395 U.S. 642, 648 \(1969\)](#) (reinstating jury verdict based on injury indirectly caused by price discrimination in violation of the Robinson-Patman Act). Insofar as the amount of damages is concerned, an antitrust plaintiff need only provide a reasonable estimate of the damages stemming from an antitrust violation. See [Bigelow v. RKO Radio Pictures, Inc., 327 U.S., at 266](#). "Difficulty of ascertainment is no longer confused with right of recovery," *id.*, [at 265](#), quoting *Story Parchment Co. v. Paterson Co., 282 U.S. 555, 566 (1931), and "[the] most elementary conceptions of justice and public policy require that the wrongdoer shall [***63] bear the risk of the uncertainty which his own wrong has created," [327 U.S., at 265](#).*

Any concern the Court may have that the plaintiffs cannot prove their case does not justify throwing them out of court solely on the basis of the pleadings. If, during discovery, it becomes apparent that plaintiffs cannot establish a reasonable inference of causation or cannot provide evidence supporting a rational estimate of damages, they will be vulnerable to a motion for summary judgment. Dismissal for failure to state a claim is too crude a procedural device to be used to vindicate the "interest . . . in keeping the scope of complex antitrust trials within judicially manageable limits." *Ante*, at 543.

HN7 **Tying Arrangements, Clayton Act**

Tying arrangements have long been considered per se unlawful under the Sherman Act, [15 U.S.C.S. § 1](#).

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN8 **Price Fixing & Restraints of Trade, Tying Arrangements**

A tying arrangement is an agreement by a party to sell one product only on the condition that the buyer also purchases a different or tied product.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Evidence > Burdens of Proof > General Overview

HN9 **Price Fixing & Restraints of Trade, Tying Arrangements**

In order to establish an unlawful tying arrangement, a plaintiff must demonstrate the existence of two distinct products or services, that the sale of the tying product or service is conditioned on the purchase of the tied product or service, that the defendant has sufficient economic power in the market for the tying product to appreciably restrain competition in the market for the tied product, and that the amount of commerce involved in the market for the tied product is not insubstantial.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN10 **Price Fixing & Restraints of Trade, Tying Arrangements**

A significant element of an illegal tying arrangement is coercion by the seller. The seller must condition the sale of the tying product on the buyer's purchase of the tied product. If the buyer is free to take either product by itself, there is no tying problem.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

[**HN11**](#) [blue document icon] Consumer Protection, Deceptive & Unfair Trade Practices

Some modicum of involuntariness or coercion is essential to the existence of a per se illegal tie-in.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Defenses

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

[**HN12**](#) [blue document icon] Tying Arrangements, Defenses

When the prerequisites are met, tying arrangements are illegal in and of themselves, without any requirement that the plaintiff make a showing of unreasonable competitive effect.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Clayton Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN16 [blue icon] **Monopolies & Monopolization, Actual Monopolization**

15 U.S.C.S. § 2 of the Sherman Act proscribes monopolization; it does not render unlawful all monopolies.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN17 [blue icon] **Monopolies & Monopolization, Attempts to Monopolize**

To state a claim for attempted monopolization under 15 U.S.C.S. § 2, a plaintiff must allege: (1) specific intent to control prices or destroy competition in the relevant market; (2) predatory or anticompetitive conduct directed to accomplishing the unlawful purpose; and (3) a dangerous probability of success. In the Ninth Circuit, both the requisite specific intent and dangerous probability of success may, in appropriate cases, be inferred from the existence of predatory or anticompetitive conduct. However, specific intent to monopolize, and hence an inference of dangerous probability of success, cannot be inferred from conduct alone unless that conduct is predatory or anticompetitive and forms the basis for a substantial claim of restraint of trade.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

HN18 [blue icon] **Monopolies & Monopolization, Conspiracy to Monopolize**

As a general rule, any firm, even a monopolist, may bring its products to market whenever and however it chooses.

HN23 [] **Price Discrimination, Competitive Injuries**

703 F.2d 534, *534L 1983 U.S. App. LEXIS 30247, **1

[15 U.S.C.S. § 13\(a\)](#) expressly provides that price discriminations are unlawful only where the effect of such discrimination may be substantially to lessen competition or tend to create a monopoly in any line of commerce, or to injure, destroy, or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination.

Antitrust & Trade Law > Robinson-Patman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > Robinson-Patman Act > General Overview

[HN24](#) [] **Robinson-Patman Act, Claims**

[Section 2\(a\)](#) of the Robinson-Patman Act, [15 U.S.C.S. § 13\(a\)](#), does not make price discriminations per se unlawful.

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

Antitrust & Trade Law > Robinson-Patman Act > General Overview

[HN25](#) [] **Price Discrimination, Competitive Injuries**

Although [15 U.S.C.S. § 13\(e\)](#), does not require that the discriminations must in fact have harmed competition, it is clear that there can be no violation of [15 U.S.C.S. § 13\(a\)](#), if the alleged price differential has no potential for adversely affecting competition.

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

Antitrust & Trade Law > Robinson-Patman Act > General Overview

[HN26](#) [] **Price Discrimination, Competitive Injuries**

The naked demonstration of injury to a specific competitor without more is not sufficient to show that a price discrimination may substantially lessen competition. The test must always focus on injury to competition.

Antitrust & Trade Law > Robinson-Patman Act > Claims

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

Antitrust & Trade Law > Robinson-Patman Act > General Overview

[HN27](#) [] **Robinson-Patman Act, Claims**

The language of [15 U.S.C.S. § 13\(a\)](#) compels the conclusion that a prima facie claim for unlawful price discrimination cannot be stated absent an allegation that the discrimination in price may produce injury to competition.

Counsel: Robert C. Fortune, Attorney at Law, Downey, California, for Plaintiff-Appellant; Robert C. Fortune, Esq., Thomas McCoy, O'Melveny & Meyers, Los Angeles, California, for Defendant-Appellee.

Judges: Goodwin, Wallace, and Pregerson, Circuit Judges.

Opinion by: WALLACE

Opinion

[*537] WALLACE, Circuit Judge:

Foremost Pro Color, Inc. (Foremost) appeals from the district court's judgment for Eastman Kodak Co. (Kodak). The district court dismissed Foremost's antitrust claims for failure to state a claim upon which relief could be granted. The court then granted Kodak's motion for summary judgment on four of Foremost's five breach of contract claims. After Foremost voluntarily dismissed the remaining contract claim, the district court entered final judgment for Kodak. We affirm.

I

Kodak is the preeminent firm in the amateur photographic industry in this country, enjoying a dominant position in the markets for photographic film and conventional amateur still cameras. For example, over eighty percent of all photofinishing -- the development [**2] of negatives and the printing of photographs -- is conducted with Kodak-manufactured photofinishing equipment, photographic paper and chemicals.

Foremost is an authorized Kodak dealer and an independent photofinisher. As a dealer, Foremost has purchased photographic film, paper and chemicals from Kodak for resale to consumers. As a photofinisher, Foremost has purchased photographic equipment, paper and chemicals from Kodak and used them in the photofinishing process on orders placed by its consumer customers. Because Kodak is also a photofinisher, although at a significantly smaller level than in the past as a result of a 1954 consent decree negotiated with the United States Department of Justice, Foremost is both a photofinisher customer and competitor of Kodak.

Kodak's dominance of the photographic film and amateur still camera markets "is no doubt due to the firm's history of innovation." *Berkey Photo, Inc. v. Eastman Kodak Co.*, 603 F.2d 263, 269 (2d Cir. 1979), cert. denied, 444 U.S. 1093, 62 L. Ed. 2d 783, 100 S. Ct. 1061 (1980) (*Berkey*). It is one of those innovations which ignited the present controversy. Similar to *Berkey*, this case arises out of Kodak's [**3] undisclosed development and 1972 introduction of its then-newest line of cameras, the 110 "pocket instamatic," and its supporting photographic system. That system included a new generation of film (Kodacolor II), photographic paper, and photographic film processing and printing chemicals. The relevant history of the development and introduction of this system is well-outlined in *Berkey*. *Id. at 276-78*.

Foremost argues that this introduction of a new, integrated photographic system violated several provisions of the antitrust laws. First, it contends that the introduction constituted monopolization and attempted monopolization of the "amateur photographic market" in the United States in violation of section 2 of the Sherman Act, 15 U.S.C. § 2. Second, Foremost claims that because the 110 cameras could only use new Kodacolor II film and because this film could only be processed with the new papers and chemicals, Kodak implicitly and unlawfully tied the sale of cameras to film, film to chemicals, and chemicals to paper and film in violation of section 1 of the Sherman Act, 15 U.S.C. § 1, and section 3 of the Clayton Act, 15 U.S.C. § 14. Finally, Foremost maintains that Kodak [**4] discriminated against it in the supplying of technical photographic assistance and in the timeliness of deliveries, in violation of section 2(e) of the Robinson-Patman Act amendments to the Clayton Act, 15 U.S.C. § 13(e), and discriminated against it in prices and credit terms in violation of section 2(a) of the same statute, 15 U.S.C. § 13(a).

Although the facts of Foremost's contract claims are more complex, the legal issues they raise are easily analyzed. The jurisdiction of the district court over these state law claims rested upon diversity of citizenship. [HN1](#)[↑] We give substantial deference to the construction of state law by a district judge sitting in that state and will reverse only if the district judge's interpretation of state law is clearly wrong. See, e.g., [Begay v. Kerr-McGee Corp.](#), [682 F.2d 1311 \(9th Cir. 1982\)](#). We turn first to the entry of summary judgment on the breach of contract claims.

II

Foremost's first contract claim was voluntarily dismissed and is not before us. Its second contract claim alleged that in August 1972, more than three years prior to the commencement of this action, Kodak breached a contract to "assist and supervise" Foremost's [\[*5\]](#) efforts to convert its photofinishing operations to utilize the new Kodak chemicals and paper required to develop film from the 110 instamatic camera. The district court granted summary judgment for Kodak on this claim, concluding that (1) the undisputed facts demonstrated that Kodak had not breached the alleged contract, and (2) in the absence of a written agreement, Foremost's claim was barred by California's two-year statute of limitations for actions based on non-sales, oral contracts. [Cal. Civ. Proc. Code § 339](#) (West 1982).

We need not decide whether the district court ruled correctly on the issue of breach because we affirm on the alternative statute of limitations ground. Foremost argued to the district court, and on appeal, that the alleged contract underlying this claim was an August 1, 1972 letter from Kodak. Actually it was a newsletter from Kauffman, Kodak's Manager for Professional and Finishing Markets, announcing the development of the new chemicals and papers to the photofinishing trade. However, Fortune, the president of Foremost, testified that this letter was not the written contract pleaded in Foremost's complaint and that a similar document, the author of [\[*6\]](#) which he could not recall, was the contract pleaded. Foremost never produced this alleged written contract. Thus, the district court was not clearly wrong in granting summary judgment for Kodak on this claim pursuant to [HN2](#)[↑] California's two-year statute of limitations for breach of contract claims "not founded upon an instrument in writing." [Cal. Civ. Proc. Code § 339](#).

Foremost argues that it had a "unilateral" or "implied" contract with Kodak for technical assistance, based upon Kodak's consistent offers of technical assistance to it and other photofinishers, to which the four-year limitations period of [Cal. Com. Code § 2725](#) (West Supp. 1982) applies. Even assuming that Kodak's conduct was sufficient to support such an implied contract, however, there remained no material question of fact. [Section 2725 HN3](#)[↑] applies only to contracts for the sale of goods. See *id.* [§ 2725\(1\)](#) (four-year limit for "any contract for sale"); *id.* § 2106(1) (defining "contract for sale"). The contract alleged and testified to by Foremost was a contract to provide "assistance and supervision" for Foremost's conversion of older equipment purchased from another manufacturer. Therefore, the alleged [\[*7\]](#) contract in no way involved the sale of goods by Kodak.

Foremost's third and fourth contract claims alleged that Kodak's untimely delivery of certain photofinishing equipment ordered by Foremost breached two written contracts. The undisputed facts show that the alleged contracts upon which Foremost relies in both instances are purchase order forms submitted by Foremost to Kodak through the latter's sales representatives, that only one could be located by the parties and it specified no delivery date, and that such order forms specifically state that all orders are "subject to acceptance" by Kodak. The district court concluded that there was no contract underlying either claim because the purchase orders were merely offers to buy, inviting Kodak's acceptance either by a prompt promise to ship or by prompt or current shipment under [Cal. Com. Code § 2206\(1\)\(b\)](#) (West 1964).

The district court was not clearly wrong in this application of [section 2206\(1\)\(b\)](#). The weight of authority is that purchase orders such as those at issue here are not enforceable contracts until they are accepted by the seller. See *Restatement (Second) of Contracts* § 26 comment d (1981); 1 [Corbin on Contracts](#) § 24, at 73-74 (1963); [Zinni v. Royal Lincoln-Mercury, Inc.](#), [84 Ill. App. 3d 1093, 406 N.E.2d 212, 40 Ill. Dec. 511 \(1980\)](#). Foremost has cited no California cases to the contrary. Since there was no promise to ship by Kodak, no contracts were formed until Kodak shipped the merchandise ordered, [Cal. Com. Code § 2206\(1\)\(b\)](#), and, therefore, there could be no late delivery. Foremost's argument that Kodak somehow promised to ship the merchandise by logging the

purchase orders as "received" is without merit; this alone did not manifest Kodak's acceptance of Foremost's offer of purchase. See *Restatement (Second) of Contracts* § 19(2) (1981).

Foremost also argues that [Cal. Com. Code § 2204\(1\)](#) (West 1964) applies to these claims, as there was "conduct by both parties which recognizes the existence of such a contract." While it is true that [section 2204\(1\) HN4](#) [↑] permits a court to find an enforceable contract in the absence of a written agreement, the agreement-making conduct identified by Foremost is that "the equipment was actually shipped and sold by Kodak." If this statute applied, there could be no contracts formed until Kodak shipped the merchandise. Obviously, [**9] Foremost could have no claim for late delivery based upon a failure to deliver the goods before the contracts were formed.

Foremost's fifth and last contract claim alleged that Kodak breached a May 1, 1973 written agreement in which it promised to advise and assist Foremost in converting its photofinishing facilities to permit it to process the new 110 Kodacolor II film. The contract Foremost produced was an "information circular" distributed by Kauffman to the photofinishing trade. The district court granted summary judgment for Kodak on the ground, among others, that this claim was barred by California's two-year statute of limitations for actions based on non-sales, oral contracts. [Cal. Civ. Proc. Code § 339](#) (West 1982). We agree. [HN5](#) [↑] Trade circulars, catalogs and advertisements are uniformly regarded as mere preliminary invitations which create no power of acceptance in the recipient. See, e.g., 1 Corbin on Contracts, *supra*, § 28; [Lonergan v. Scolnick](#), 129 Cal. App. 2d 179, 182, 276 P.2d 8 (1944). Based upon this settled law, the district court correctly concluded that there remained no material question of fact as to whether the alleged agreement had been embodied [**10] in a written contract. As there was no written contract in this claim, it is barred by the two-year statute of limitations for oral contracts.

III

The district court dismissed Foremost's antitrust claims for failure to state a claim upon which relief can be granted. [Fed. R. Civ. P. 12\(b\)\(6\)](#). [HN6](#) [↑] In reviewing this dismissal, we must accept as true all the well-pleaded allegations of the complaint and can affirm only if it appears with certainty that Foremost would not be entitled to relief under any set of facts which might be proved in support of its claims. [Conley v. Gibson](#), 355 U.S. 41, 45-46, 2 L. Ed. 2d 80, 78 S. Ct. 99 (1957); [Jablon v. Dean Witter & Co.](#), 614 F.2d 677, 682 (9th Cir. 1980). The dismissal is a ruling on a question of law and is therefore freely reviewable on appeal. [Halet v. Wend Investment Co.](#), 672 F.2d 1305, 1309 (9th Cir. 1982).

Foremost's seventh claim alleged that Kodak unlawfully tied the sale of the several distinct components of the 110 system in violation of [section 1](#) of the Sherman Act and [section 3](#) of the Clayton Act, and its eighth claim alleged monopolization and attempted monopolization in violation of [section 2](#) of the Sherman Act. [**11] We turn first to the charges of tying.

A.

Foremost's third amended complaint¹ alleged that because "the new Kodacolor II [*540] film . . . was not compatible with any of the then existing film processing procedures or chemical solutions," and because the new "chemistry was not compatible with the then existing . . . paper, [Foremost] was required to discard its complete inventory of the old paper and chemistry and purchase the new . . . papers and . . . chemistry." Foremost alleged

¹ The original complaint alleged five contract and three antitrust claims. One antitrust claim was dismissed voluntarily, and the remaining two were dismissed for failure to state claims for relief. The first amended complaint realleged the two antitrust claims previously dismissed, added three new ones, and realleged all five contract claims. Pursuant to [Fed. R. Civ. P. 12\(b\)\(6\)](#), the district court dismissed all the antitrust claims, with leave to amend, and thus did not rule on Kodak's alternative motion for summary judgment on the antitrust claims. The same process was repeated in the second and third amended complaints, although the third amended complaint contained only four antitrust claims and the contract claims. After the district court dismissed the antitrust claims, Foremost attempted to appeal the order of dismissal without complying with the requirements of [Fed. R. Civ. P. 54\(b\)](#). We dismissed that appeal for lack of jurisdiction. The jurisdictional defect was cured when, after summary judgment on the contract claims, Foremost dismissed its last remaining contract claim, the district court entered judgment for Kodak, and Foremost filed a timely notice of appeal.

that this amounted to the sale of commodities "on an implied contract, condition, agreement or understanding that [Foremost] would purchase other photographic commodities manufactured and sold by [Kodak]." As Foremost has phrased it on appeal, this implied condition, agreement or understanding arose because "whenever Foremost purchased one Kodak product, it *necessarily had to purchase additional Kodak commodities*" (emphasis in original).

[**12] [HN7](#) Tying arrangements have long been considered *per se* unlawful under [section 1](#) of the Sherman Act. [Northern Pacific Railway Co. v. United States](#), 356 U.S. 1, 5, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958). [HN8](#) A tying arrangement is an agreement by a party to sell one product only on the condition that the buyer also purchase a different or "tied" product. *Id.*; [Yentsch v. Texaco, Inc.](#), 630 F.2d 46, 56 (2d Cir. 1980). [HN9](#) In order to establish an unlawful tying arrangement,² a plaintiff must demonstrate the existence of two distinct products or services, that the sale of the "tying" product or service is conditioned on the purchase of the "tied" product or service, that the defendant has "sufficient economic power" in the market for the tying product to appreciably restrain competition in the market for the tied product, and that the amount of commerce involved in the market for the tied product is "not insubstantial." [Portland Retail Druggists Association v. Kaiser Foundation Health Plan](#), 662 F.2d 641, 648 (9th Cir. 1981); [Community Builders, Inc. v. City of Phoenix](#), 652 F.2d 823, 830 (9th Cir. 1981); [Moore v. Jas. H. Matthews & Co.](#), 550 F.2d 1207, 1212 (9th Cir. 1977). [**13] [HN10](#) A significant element of an illegal tying arrangement is coercion by the seller, i.e., the seller must condition the sale of the tying product on the buyer's purchase of the tied product. See [Northern Pacific Railway Co. v. United States](#), *supra*, 356 U.S. at 5-6, 10; [Times-Picayune Publishing Co. v. United States](#), 345 U.S. 594, 605, 97 L. Ed. 1277, 73 S. Ct. 872 (1953); L. Sullivan, *Handbook of the Law of Antitrust* 431 (1977). If the buyer is free to take either product by itself, "there is no tying problem." [Northern Pacific Railway Co. v. United States](#), *supra*, 356 U.S. at 6 n.4. [HN11](#) "Some modicum" of involuntariness or coercion is thus essential to the existence of a *per se* illegal tie-in. See, e.g., [Betaseed, Inc. v. U and I Inc.](#), 681 F.2d 1203, 1215 (9th Cir. 1982); [Hirsh v. Martindale-Hubbell, Inc.](#), 674 F.2d 1343, 1347 (9th Cir. 1982); [Sobrato v. Prudential Insurance Co. of America](#), 632 F.2d 786, 787 (9th Cir. 1980).

[**14] When these prerequisites are met, tying arrangements are illegal in and of themselves, without any requirement that the plaintiff make a showing of unreasonable competitive effect. [Fortner Enterprises, Inc. v. United States Steel Corp.](#), 394 U.S. 495, 498, 22 L. Ed. 2d 495, 89 S. Ct. 1252 (1969). The principal evil of the tying arrangement, that which has traditionally justified its inclusion in the *per se* category, is that it denies competitors access to the market for the tied product not because the party imposing the arrangement necessarily has a superior product in that market, but rather because of the leverage exerted as a result of its economic power in the market for the tying product and the demand for the tying product.³ See [Kentucky Fried Chicken Corp. v.](#)

²The slight differences between the elements of a tying violation under [section 1](#) of the Sherman Act and [section 3](#) of the Clayton Act, see [Moore v. Jas. H. Matthews & Co.](#), 550 F.2d 1207, 1214 (9th Cir. 1977), are not relevant to this case. The rule stated in the text, however, applies to [section 3](#) only if both the tying and tied items are "commodities." [15 U.S.C. § 14](#). They are in this case.

[HN12](#) -

³Other justifications of the *per se* prohibition have been suggested. See [Hirsh v. Martindale-Hubbell, Inc.](#), 674 F.2d 1343, 1348-49 (9th Cir. 1982); [Moore v. Jas H. Matthews & Co.](#), *supra*, 550 F.2d at 1212-13. However, despite the fact that some commentators and economists have criticized the leverage justification mentioned in the text, see R. Bork, *The Antitrust Paradox* 373 (1978), it is that theory on which the Supreme Court has consistently justified the *per se* tying rule from *Northern Pacific* to *Fortner*. While commentators may certainly assist courts in developing legal standards to implement the antitrust laws, see [William Inglis & Sons Baking Co. v. ITT Continental Baking Co.](#), 668 F.2d 1014, 1061-63 (9th Cir. 1981) (Wallace, J., dissenting from denial of rehearing en banc), as of now the Supreme Court has foreclosed our developing new theories by teaching that "there is general agreement . . . that the fundamental restraint against which the tying proscription is meant to guard is the use of power over one product to attain power over another, or otherwise to distort freedom of trade and competition in the second product." [Fortner Enterprises, Inc. v. United States Steel Corp.](#), 394 U.S. 495, 512, 22 L. Ed. 2d 495, 89 S. Ct. 1252 (1969) (White, J., dissenting); see *id.* at 498-99 (majority opinion), quoting [Northern Pacific Railway Co. v. United States](#), 356 U.S. 1, 5-6, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958); see also [United States Steel Corp. v. Fortner Enterprises, Inc.](#), 429 U.S. 610, 617-18 & n.8, 51 L. Ed. 2d 80, 97 S. Ct. 861 (1977).

Diversified Packaging Corp., 549 F.2d 368, 375 (5th Cir. 1977); Siegel v. Chicken Delight, Inc., 448 F.2d 43, 47, 14 A.L.R. Fed. 458 (9th Cir. 1971), cert. denied, 405 U.S. 955, 92 S. Ct. 1172, 31 L. Ed. 2d 232 (1972). Thus, competition in the market for the tied product is severely restrained because competitors "cannot offer their products on an equal basis" with the party imposing [**15] the tying arrangement. Moore v. Jas. H. Matthews & Co., supra, 550 F.2d at 1212.

[**16] Of course, HN13[¹⁴] conduct which does not meet the requirements of the *per se* prohibition against tying arrangements may still constitute a violation of section 1 of the Sherman Act under the "rule of reason" test. Fortner Enterprises, Inc. v. United States Steel Corp., supra, 394 U.S. at 499-500; Phonetele, Inc. v. American Telephone & Telegraph Co., 664 F.2d 716, 738 (9th Cir. 1981). But Foremost has not challenged the alleged tying arrangement under the rule of reason. Thus, the dispositive question before us is whether, under the *per se* rule, Foremost adequately pleaded the requisite coercion in its complaint.

Although the complaint boldly asserts that the purchase of the tied products was "required," that single word is insufficient to support even an inference of the necessary coercion. See Sargent-Welch Scientific Co. v. Ventron Corp., 567 F.2d 701, 708-09 (7th Cir. 1977), cert. denied, 439 U.S. 822, 58 L. Ed. 2d 113, 99 S. Ct. 87 (1978). Foremost did not allege that there existed an express requirement to purchase the 110 components as a package, that Kodak threatened to terminate film sales if Foremost did not also purchase paper and chemicals, or that [**17] a condition of being an authorized dealer of 110 cameras was the purchase of 110 film, paper and chemicals. Rather, as the complaint itself explains, the reason Foremost insists that it was required to purchase new film, chemicals and paper was that the newly introduced 110 film could not be processed with the then existing technology and these new products were necessary to satisfy consumer demand for 110 products and to process 110 photofinishing orders placed by its customers. Thus, Foremost's complaint pointedly refrains from alleging that Kodak itself required the purchase of film as a *condition* of the sale of cameras, or required the purchase of chemicals and paper as a *condition* of the sale of film. HN14[¹⁵] Coercion for purposes of the *per se* rule means "a product sold on [*542] the condition that the buyer also purchase a different or tied product or at least that the buyer agrees not to purchase the product from any other supplier." Betaseed, Inc. v. U and I Inc., supra, 681 F.2d at 1222 n.35. In the absence of an allegation that the purchase of the alleged tied products was required as a condition of sale of the alleged tying products, rather than as a prerequisite [**18] to practical and effective use of the tying products, Foremost's complaint failed to plead the coercion essential to a *per se* unlawful tying arrangement.⁴

Although liberally sprinkled with the word "required," Foremost's tying allegation basically involves the so-called technological tie. In other words, because the new film could not be processed with the old chemicals, and because the needed new photographic paper similarly could not be processed [**19] with the old chemicals, it was necessary to purchase an entire package of film, chemicals and paper. We do not believe that, standing alone, such technological interrelationship among complementary products is sufficient to establish the coercion essential to a *per se* unlawful tying arrangement. Indeed, such a rule could become a roadblock to the competition vital for an ever expanding and improving economy. Product innovation, particularly in such technologically advancing industries as the photographic industry, is in many cases the essence of competitive conduct. Therefore, we decline to place such technological ties in the category of economic restrictions deemed *per se* unlawful by *Northern Pacific* and its progeny. See Continental T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 49-51 & 50 n.16, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977); Betaseed, Inc. v. U and I Inc., supra, 681 F.2d at 1215.

Nor are the allegations that the new 110 film, chemicals and paper were incompatible with the products offered by Kodak's competitors sufficient to support a *per se* unlawful tie-in. Quite obviously, a firm that pioneers new technology will often introduce the first [**20] of a new product type along with related, ancillary products that can

⁴ Under the facts alleged in the complaint, there could not as a matter of law be the sort of implicit coercion discussed in Moore v. Jas. H. Matthews & Co., supra, 550 F.2d at 1217, because Foremost was not forced to "accept the tied item and forego possibly desirable substitutes." Since the complaint alleges that, when the 110 system was introduced, no competing manufacturers produced chemicals and papers compatible with Kodacolor II film, there could have been no substitutes that Foremost or other photofinishing customers were foreclosed from purchasing.

only be utilized effectively with the newly developed technology. Until other, less technologically advanced competitors procure licenses or otherwise develop ancillary products that are compatible with the new product, the technological leader will be faced with no present competition in the newly developed product market. The essence of a *per se* unlawful tying arrangement, however, is that it *forecloses* competition in the market for the tied product or products. The creation of technological incompatibilities, without more, does not foreclose competition; rather, it increases competition by providing consumers with a choice among differing technologies, advanced and standard, and by providing competing manufacturers the incentive to enter the new product market by developing similar products of advanced technology. Any short-run absence of competition in the market for the technologically tied product could just as likely be due to the unwillingness or inability of competitors to devote sufficient economic resources to match the pace of technological development set by the industry's leader, as to the [**21] abuse of market power by that dominant firm. Thus, the *per se* rule does not logically fit and should not be applied. It is clear that a mere technological tie does not present the competitive evils which the *per se* prohibition of tying arrangements is designed to prevent. See [*Kentucky Fried Chicken Corp. v. Diversified Packaging Corp., supra, 549 F.2d at 378-79.*](#)

As a general rule, therefore, we hold that the development and introduction [*543] of a system of technologically interrelated products is not sufficient alone to establish a *per se* unlawful tying arrangement even if the new products are incompatible with the products then offered by the competition and effective use of any one of the new products necessitates purchase of some or all of the others. Any other conclusion would unjustifiably deter the development and introduction of those new technologies so essential to the continued progress of our economy.

Foremost's tying claim alleged only the introduction of technologically related components incompatible with existing products offered by the competition. It did not allege that the dominant purpose motivating Kodak's design and introduction [**22] of the 110 system was to compel purchase of the entire system as a package, rather than to achieve the legitimate goal of marketing new, technologically superior products designed to satisfy consumer demand for smaller, pocket-sized cameras. Therefore, the complaint failed to state a claim for relief predicated on unlawful tying.

B.

Foremost incorporated its tying allegations into its eighth claim, which charges monopolization and attempted monopolization in violation of [section 2](#) of the Sherman Act. In this claim, Foremost's complaint alleged that Kodak's dominance of the "amateur photographic market" was the result of its "continually researching and developing new photographic products," that by introducing new products Kodak would "render[] obsolete existing competitive products, and . . . regain[] . . . the dominant share of the amateur photographic market," and that Kodak "perpetrated certain acts" in the course of its monopolization and attempt to monopolize, including developing new products "that are incompatible with then existing photographic products and photofinishing equipment[,] . . . withholding . . . new . . . products . . . from the amateur photographic [**23] market until competition . . . force[d] the introduction of these products[,] . . . [and] developing and marketing its 110 [system] in such a manner that [Foremost] was required to purchase new paper, chemistry and photofinishing equipment to enable it to photofinish 110 size film and Kodacolor II film." Foremost also alleged that, as an "effect" of the violations asserted, Kodak "has obtained the dominant share of the amateur photographic market . . . [and] has secured the power to control prices and to exclude . . . actual and potential competition" in that market. We discuss first the tying allegations.

Because the conduct Foremost alleged in support of its [section 1](#) tying claim is not anticompetitive, it is of no assistance to Foremost's efforts to state a claim for relief for monopolization or attempted monopolization, both of which require at least some allegation of anticompetitive conduct. For example, [HN15](#) to state a claim for relief for monopolization, the plaintiff must allege (1) the possession of monopoly power in the relevant market, (2) the "willful acquisition or maintenance" of that power, and (3) causal antitrust injury. E.g., [*Forro Precision, Inc. v. IBM Corp., 673 F.2d 1045, 1058 \(9th Cir. 1982\)*](#). It is the second element, the conduct element, which distinguishes lawful possession of monopoly power from unlawful possession of monopoly power. [Section 2](#) of the Sherman Act [HN16](#) proscribes "monopolization"; it does not render unlawful all monopolies. Therefore, we have recently reemphasized that for purposes of a monopolization claim, "willful acquisition or maintenance [of monopoly power] means that the monopolist must have 'engaged in "willful" acts directed at establishing or

retaining its monopoly, "as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." " [Phonetel, Inc. v. American Telephone & Telegraph Co., supra, 664 F.2d at 739-40.](#)

Similarly, [HN17](#) in order to state a claim for attempted monopolization under [section 2](#), a plaintiff must allege (1) specific intent [^{*}544] to control prices or destroy competition in the relevant market, (2) predatory or anticompetitive conduct directed to accomplishing the unlawful purpose, and (3) a dangerous probability of success. [Janich Brothers, Inc. v. American Distilling Co., 570 F.2d 848, 853 \(9th Cir. 1977\),](#) [**25] cert. denied, 439 U.S. 829, 58 L. Ed. 2d 122, 99 S. Ct. 103 (1978); [Ernest W. Hahn, Inc. v. Codding, 615 F.2d 830, 845 \(9th Cir. 1980\)](#); [California Computer Products, Inc. v. IBM Corp., 613 F.2d 727, 736 \(9th Cir. 1979\)](#). In this circuit, both the requisite specific intent and dangerous probability of success may, in appropriate cases, be inferred from the existence of predatory or anticompetitive conduct. [Janich Brothers, Inc. v. American Distilling Co., supra, 570 F.2d at 853-54.](#) However, specific intent to monopolize, and hence an inference of dangerous probability of success, cannot be inferred from conduct alone unless that conduct is predatory or anticompetitive and forms the basis for a substantial claim of restraint of trade. See [Janich Brothers, Inc. v. American Distilling Co., supra, 570 F.2d at 857;](#) [Greyhound Computer Corp. v. IBM Corp., 559 F.2d 488, 505 \(9th Cir. 1977\),](#) cert. denied, 434 U.S. 1040, 54 L. Ed. 2d 790, 98 S. Ct. 782 (1978).

As we indicated earlier, the introduction of technologically related products, even if incompatible with the products offered by competitors, is alone neither a predatory nor anticompetitive act. Foremost's [^{*}26] tying allegations, therefore, are insufficient to aver the requisite willful acquisition or maintenance element of a monopolization claim or the anticompetitive or predatory conduct element of an attempted monopolization claim. Four of the six acts that Foremost alleged Kodak perpetrated in attempting to monopolize and monopolizing the "amateur photographic market" related to these tying allegations. We are left, therefore, with only the two remaining anticompetitive acts pleaded: first, that the 110 system was incompatible with then existing photographic products and photofinishing equipment, and second, that Kodak withheld the 110 system from the amateur photographic market "until competition from other manufacturers force[d] the introduction" of the system.

It is useful to point out that Foremost's complaint did not attempt to state a claim for relief for monopolization or attempted monopolization on the ground that Kodak's failure to "predisclose" its 110 format to the competition constituted willful maintenance of its monopoly power or predatory or anticompetitive conduct in an attempt to monopolize the market. See [Berkey, supra, 603 F.2d at 279-85.](#) Nor did Foremost's [^{*}27] complaint distinguish among the various product markets which comprise the "amateur photographic market." Therefore, there is no occasion to address whether Foremost's complaint stated a valid claim for relief on the ground that Kodak abused its monopoly power in the film market or used that power as a lever to create, or attempt to create, a monopoly in the markets for amateur still cameras or photographic chemicals or paper. See [id. at 275-76, 284, 292;](#) see also [Phonetel, Inc. v. American Telephone & Telegraph Co., supra, 664 F.2d at 739;](#) [Sargent Welch Scientific Co. v. Ventron Corp., supra, 567 F.2d at 711-12.](#) In the absence of either of these allegations, we hold that Foremost's complaint failed to state a claim upon which relief can be granted for monopolization or attempted monopolization under [section 2](#) of the Sherman Act.

For us to hold that Foremost's allegations were sufficient as a matter of law to satisfy the conduct element of [section 2](#) would be contrary to the very purpose of the antitrust laws, which is, after all, to foster and ensure competition on the merits. "It is the possibility of success in the marketplace, attributable to superior performance, [^{*}28] that provides the incentives on which the proper functioning of our competitive economy rests." [Berkey, supra, 603 F.2d at 281.](#) A monopolist, no less than any other competitor, is permitted and indeed encouraged to compete aggressively on the merits, and any success it may achieve solely [^{*}545] through "the process of invention and innovation" is necessarily tolerated by the antitrust laws. *Id.*, quoting [United States v. United Shoe Machinery Corp., 110 F. Supp. 295, 344 \(D. Mass. 1953\), aff'd, 347 U.S. 521, 98 L. Ed. 910, 74 S. Ct. 699 \(1954\)](#) (per curiam); see 3 P. Areeda & D. Turner, [Antitrust Law](#) para. 626b (1978). Foremost's complaint alleged nothing more than conduct of this sort, conduct which is lawful whether or not the defendant enjoys monopoly power in the relevant market. See [Sargent-Welch Scientific Co. v. Ventron Corp., supra, 567 F.2d at 712](#) (a monopolist "is not forbidden from improving his efficiency in manufacturing or marketing, even though the effect of doing so will be to

maintain or improve his sales"). Indeed, the complaint expressly alleged that Kodak "has dominated the amateur photographic market by continually researching and [**29] developing new photographic products."

It is of no legal import that Foremost chooses to characterize the technological incompatibilities of the 110 system with the products offered by Kodak's competitors in 1972, and Kodak's alleged delay in introducing the 110 system, as a form of technological predation. Even assuming that Kodak enjoyed monopoly power in the amateur photographic market, as Foremost alleged in its complaint, Kodak "had the right to redesign its products to make them more attractive to buyers -- whether by reason of lower manufacturing cost and price or improved performance." [California Computer Products v. IBM Corp., supra, 613 F.2d at 744](#). The antitrust laws did not impose a duty on Kodak to assist Foremost, other photofinishers, or manufacturers of competing cameras, film, paper or chemicals to "survive or expand." *Id.* See [ILC Peripherals Leasing Corp. v. IBM Corp., 458 F. Supp. 423, 439 \(N.D. Cal. 1978\)](#) (discussing technological innovations by alleged monopolist), aff'd sub nom., [Memorex Corp. v. IBM Corp., 636 F.2d 1188 \(9th Cir. 1980\)](#) (per curiam), cert. denied, 452 U.S. 972, 69 L. Ed. 2d 983, 101 S. Ct. 3126 (1981). Kodak need not have "constricted [**30] its product development so as to facilitate sales of rival products." [California Computer Products v. IBM Corp., supra, 613 F.2d at 744](#).

We do not, of course, hold that product innovation is immune from antitrust scrutiny and may never provide the requisite conduct element in support of a claim for monopolization or attempted monopolization under [section 2](#) of the Sherman Act. In all cases, however, "it is not the product introduction itself, but some associated conduct, that supplies the violation." [Berkey, supra, 603 F.2d at 286 n.30](#). Here, the only "associated conduct" pleaded by Foremost in support of its [section 2](#) claim is the creation of technological incompatibilities and Kodak's alleged delay in bringing the 110 system to the market. We have discussed the first in sufficient detail already. As to the second, it seems clear that even a monopolist cannot *exclude* or *restrain* competition in its own market or related markets by delaying the introduction of new, technologically advanced products. In this case, for example, any delay by Kodak in introducing the 110 system could have worked only to the advantage of photofinishers and competing manufacturers. Prior [**31] to the introduction of the 110 system, it is obvious that Foremost, along with all other photofinishers, was able to choose among several technologically compatible products offered by Kodak and many of its smaller competitors.

It is appropriate to emphasize that [HN18\[\]](#) as a general rule, "any firm, even a monopolist, may . . . bring its products to market whenever and however it chooses." [Berkey, supra, 603 F.2d at 286](#) (footnote omitted). Without more, it is not unlawful for any competitor in any market to delay the introduction of a new product or an entire line of new products until, as Foremost alleged in this case, the competition forces such introduction. In order to state a claim for relief under [section 2](#), product introduction must be alleged to involve some associated conduct which constitutes an anticompetitive abuse or leverage of monopoly power, or a predatory or exclusionary means of attempting to monopolize the [*546] relevant market, rather than aggressive competition on the merits. That the dominant firm in any market may through technological innovation expand its market share, increase consumer brand identification, or create demand for new products is perfectly [**32] consistent with the competitive forces that the Sherman Act was intended to foster. The antitrust laws were not intended to invalidate all competitive practices tending to improve a firm's market position. [Hirsh v. Martindale-Hubbell, Inc., supra, 674 F.2d at 1348](#).

IV

We now discuss the Robinson-Patman issues. In its sixth claim, Foremost alleged that Kodak violated [section 2\(e\)](#) of the Robinson-Patman Act, [15 U.S.C. § 13\(e\)](#), by "failing to deliver . . . photofinishing equipment orders within the same sixty-day . . . schedule that [was] given to [Foremost's] competitors" and by "providing technical assistance and services [for the] conversion of . . . photofinishing equipment" only to Foremost's competitors. Foremost alleged in its ninth claim that Kodak violated [section 2\(a\)](#) of the Robinson-Patman Act, [15 U.S.C. § 13\(a\)](#), by "offering price reductions to its other customers in competition with [Foremost], while refusing to offer the same price reductions to [Foremost] on a proportionately equal basis." Specifically, Foremost alleged that Kodak allowed its other customers to order a six-month supply of photographic paper and pay for the order in six monthly installments [*33] but did not offer the same terms to Foremost. The district court dismissed these claims for failure to state a claim for relief.

A.

Section 2(e) of the Robinson-Patman Act [HN19](#) prohibits discrimination against "purchasers of a commodity bought for resale" by offering or furnishing "services or facilities" that are not "accorded to all purchasers on proportionately equal terms." [15 U.S.C. § 13\(e\)](#). Kodak argues that the "services or facilities" to which section 2(e) applies are only advertising and promotional services, and thus that neither deliveries of nor technical assistance with respect to photofinishing equipment are covered by the statute. There is a split among the circuits concerning whether the timeliness of delivery services is a form of discrimination cognizable under section 2(e). Compare, e.g., [L & L Oil Co. v. Murphy Oil Corp.](#), 674 F.2d 1113, 1119 (5th Cir. 1982) (section 2(e) does not cover discrimination in deliveries), with [Centex-Winston Corp. v. Edward Hines Lumber Co.](#), 447 F.2d 585 (7th Cir. 1971) (section 2(e) covers discrimination in deliveries), cert. denied, 405 U.S. 921, 30 L. Ed. 2d 791, 92 S. Ct. 956 (1972). We have criticized the [Centex-Winston](#) position, but have not yet decided whether discrimination in "services or facilities" under section 2(e). See [Purdy Mobile Homes, Inc. v. Champion Home Builders Co.](#), 594 F.2d 1313, 1318 (9th Cir. 1979) (Purdy). We need not do so here.

[HN20](#) As a general rule, practices related to the resale of commodities are cognizable under section 2(e), while practices related to the original sale of commodities are cognizable under section 2(a). Thus, section 2(e) "appl[ies] only to services or facilities connected with the *resale* of the product by the purchaser." [Purdy, supra, 594 F.2d at 1317](#) (emphasis added). See also [Corn Products Refining Co. v. FTC](#), 324 U.S. 726, 744, 89 L. Ed. 1320, 65 S. Ct. 961 (1945). Foremost's complaint does not allege that Foremost resold the photofinishing equipment whose delivery was supposedly delayed, nor does it allege that it resold the photofinishing equipment for which Kodak allegedly provided technical assistance only to its other customers, competitors of Foremost. Foremost's failure to allege resale of the photofinishing equipment, the commodities with respect to which the alleged discrimination in deliveries and technical services [**35](#) occurred, is a failure as a matter of law to allege a crucial element of a section 2(e) violation. [Purdy, supra, 594 F.2d at 1317](#).

[\[*547\]](#) Foremost never comes to grips with this fatal flaw. Instead, Foremost argues that its complaint states a section 2(e) claim because it resells *other* commodities purchased from Kodak -- photographic paper, film and chemicals -- in its capacity as an authorized dealer. It is true, as Foremost argues, that section 2(e) [HN21](#) covers commodities bought for resale "with or without processing." [15 U.S.C. § 2\(e\)](#). In addition, the Supreme Court has recognized that [HN22](#) commodities may undergo physical alterations during processing and yet still be purchased for resale within the meaning of section 2(e). See [Corn Products Refining Co. v. FTC, supra, 324 U.S. at 744](#) (section 2(e) covers discrimination in services and facilities "in all cases where the commodity is to be resold, whether in its original form or in a processed product"). However, that Foremost alleged that it resold photographic chemicals and paper to its customers in connection with the sale of processed photographs is not sufficient. Even if these specific commodities were purchased [**36](#) for resale within the meaning of *Purdy*, Foremost did not contend that it resells the photofinishing equipment involved in the alleged discrimination. Thus, it has failed to state a claim for relief under section 2(e).

B.

Foremost contends that its section 2(a) allegations demonstrate that Kodak violated this portion of the Robinson-Patman Act by (1) offering a twelve percent price reduction to competitors of Foremost purchasing a six-month supply of photographic paper, and (2) permitting competitors of Foremost to defer payment on a six-month bulk purchase of paper but not offering the same terms to Foremost. Kodak argues that these allegations plead only credit discrimination, which, it contends, is not a form of indirect price discrimination cognizable under section 2(a). See [Craig v. Sun Oil Co.](#), 515 F.2d 221, 224 (10th Cir. 1975), cert. denied, 429 U.S. 829, 50 L. Ed. 2d 92, 97 S. Ct. 88 (1976). However, Foremost has conceded in its reply brief that it "does not allege that Kodak's discrimination toward it as to [the deferred payment credit plan] violates Section 2(a)." We need not decide, therefore, whether to adopt *Craig*.

Foremost argues that its [\[*37\]](#) first allegation concerning a twelve percent price reduction is sufficient to state a *prima facie* claim for relief under section 2(a). Kodak, on the other hand, argues that Foremost has failed to allege at least two completed, contemporaneous sales by the same seller. See, e.g., [Bruce's Juices, Inc. v. American Can Co.](#), 330 U.S. 743, 755, 91 L. Ed. 1219, 67 S. Ct. 1015 (1947); [Rutledge v. Electric Hose & Rubber Co.](#), 511 F.2d

[668, 677 \(9th Cir. 1975\)](#). This element of a prima facie [section 2\(a\)](#) violation stems directly from the language of the statute referring to discriminations "in price between different *purchasers*." [15 U.S.C. § 13\(a\)](#) (emphasis added). Clearly, a mere "offer" to sell to competing customers at different prices does not satisfy this requirement of two actual, contemporaneous sales. See [Shaw's Inc. v. Wilson-Jones Co., 105 F.2d 331, 333 \(3d Cir. 1939\)](#).

We need not decide whether Foremost's complaint alleges the requisite two contemporaneous sales to competing purchasers at different prices because it suffers from another flaw fatal to its [section 2\(a\)](#) claim. [Section 2\(a\) HN23](#)[¹⁵] expressly provides that such price discriminations are unlawful only "where [**38] the effect of such discrimination may be substantially to lessen competition or tend to create a monopoly in any line of commerce, or to injure, destroy, or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination . . ." [15 U.S.C. § 13\(a\)](#). In this case, therefore, it was incumbent upon Foremost to allege that the price discrimination "may . . . substantially . . . lessen competition" in the photofinishing market. *Id.*

It is undisputed that [section 2\(a\)](#) of the Robinson-Patman Act [HN24](#)[¹⁶] does not make price discriminations *per se* unlawful. See [Foremost \[*548\] Dairies, Inc. v. FTC, 348 F.2d 674, 680](#) (5th Cir.), cert. denied, 382 U.S. 959, 15 L. Ed. 2d 362, 86 S. Ct. 435 (1965). [HN25](#)[¹⁷] And although the statute does not "require that the discriminations must in fact have harmed competition," [Corn Products Refining Co. v. FTC, supra, 324 U.S. at 742](#), it is clear that there can be no violation of [section 2\(a\)](#) if the alleged price differential has no potential for adversely affecting competition. See [Janich Brothers, Inc. v. American Distilling Co., supra, 570 F.2d at 862](#). [HN26](#)[¹⁸] The naked demonstration of injury to a specific [**39] competitor without more is not sufficient to show that a price discrimination "may" substantially lessen competition; the test must always focus on injury to *competition*. See [M.C. Manufacturing Co. v. Texas Foundries, Inc., 517 F.2d 1059, 1067-68 \(5th Cir. 1975\)](#), cert. denied, 424 U.S. 968, 47 L. Ed. 2d 736, 96 S. Ct. 1466 (1976). See also [Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 \(1977\)](#).

Without addressing the dispute about whether [section 2\(a\)](#) requires a mere "possibility" or a more substantial "probability" of injury to competition, see [William Inglis & Sons Baking Co. v. ITT Continental Baking Co., 668 F.2d 1014, 1042 & n.50 \(9th Cir. 1981\)](#), we take note of [HN27](#)[¹⁹] the language of [section 2\(a\)](#) itself, which compels the conclusion that a prima facie claim for unlawful price discrimination cannot be stated absent an allegation that the discrimination in price may produce injury to competition. Although the Robinson-Patman Act is a prophylactic statute which should be construed broadly, consistent with the policies of the antitrust laws, [Great Atlantic & Pacific Tea Co. v. FTC, 440 U.S. 69, 80 n.13, 59 L. Ed. 2d \[*40\] 153, 99 S. Ct. 925 \(1979\)](#), neither [section 2\(a\)](#) nor any other provision of the antitrust laws was intended to protect competitors as opposed to competition. See [Mutual Fund Investors, Inc. v. Putnam Management Co., 553 F.2d 620, 627 \(9th Cir. 1977\)](#). Nothing in Foremost's [section 2\(a\)](#) count provides such an allegation or inference of injury to competition. Foremost alleged only that *it* "has sustained increased cost[s] of doing business" and that "competition by *plaintiff* in the photofinishing trade has been lessened, restrained and eliminated" (emphasis added).

Injury to a specific competitor is not enough from which a court may infer that an alleged price discrimination may "substantially" injure competition. If Foremost had alleged that it occupied a substantial share of the photofinishing market, nationally or in any relevant geographic sub-market, or that the alleged discrimination was "sufficient in amount to influence . . . resale prices" of photographic paper, see [FTC v. Morton Salt Co., 334 U.S. 37, 47, 92 L. Ed. 1196, 68 S. Ct. 822 \(1948\)](#), or that the photofinishing industry operates on relatively low profit margins, see [Foremost Dairies, Inc. v. FTC, \[*411\] supra, 348 F.2d at 680](#), such that the alleged discrimination provided Foremost's competitors with a significant competitive advantage even if it did not directly affect retail prices, the issue would be closer. But Foremost did not. Accordingly, Foremost's [section 2\(a\)](#) claim failed to state a claim for relief.

AFFIRMED.

[**HN5**](#) [PDF] Appellate Review, Appealability

[Fed. R. Civ. P. 60\(b\)](#) applies only to a final judgment, order, or proceeding. The denial of a summary judgment motion is an interlocutory order, and a Court can modify or rescind such an order at any time prior to the entry of a final judgment.

Counsel: [\[**1\]](#) Peter P. Sudnick, Esq., Southfield, Michigan, for Plaintiff.

Timothy D. Wittlinger, Esq., Detroit, Michigan, for Defendant.

Judges: Pratt

Opinion by: PRATT

Opinion

[\[*1267\]](#) MEMORANDUM OPINION AND ORDER

This action involves defendant's alleged refusal to sell plaintiff the store fixtures located in a grocery store which defendant had leased from plaintiff. Plaintiff has filed a three-count complaint in connection with this alleged

refusal.¹ Count I alleges that this refusal was a breach of contract. Count II alleges that defendant tortiously interfered with plaintiff's business relationships. Count III alleges that defendant and American Store Fixtures ("American") conspired to restrain trade, in violation of the Michigan antitrust statute. [Mich.Comp.Laws Ann. §§ 445.701, 445.731.](#)

Defendant subsequently moved **[**2]** for summary judgment. In a Memorandum Opinion and Order issued March 20, 1982, this Court granted summary judgment in favor of defendant as to Count II, but denied summary judgment as to Counts I and III. Defendant has now filed a renewed motion for summary judgment as to Count III. The parties have briefed the issues and have waived oral argument. For the following reasons, defendant's renewed motion is hereby granted.

In Count III, plaintiff alleges that defendant and American conspired to restrain trade, by refusing to sell plaintiff certain store fixtures without first removing them from the store. Prior to March 31, 1980, defendant leased a building in Detroit, Michigan from plaintiff and operated a grocery store in it. After receiving notice from defendant of its decision to terminate its occupancy, plaintiff sent defendant notice that the lease would be cancelled as of March 31, 1980. Plaintiff wished to operate a grocery store at this location once defendant had vacated the premises, and he sought to buy the store fixtures from defendant while they were still installed in the store. Indeed, plaintiff claims that a lease modification executed in 1974 required defendant **[**3]** to give plaintiff the first right to purchase these fixtures when the lease was cancelled.

The parties were unable to reach an agreement for the sale of these fixtures, however. Defendant then contracted with American to remove all of the fixtures and clean the store. Under this agreement, American was to leave the store in "broom clean" condition; in addition, American was to receive title to all of the fixtures once they were removed from the building.

During the time that American's employees were removing the fixtures and cleaning the store, plaintiff offered to purchase the fixtures in place from American. American maintained, however, that its contract with defendant required that the fixtures be removed from the store. In fact, American's vice-president, David Glass, called one of defendant's employees, Donald Plummer, to inform him that plaintiff wished to purchase the fixtures in place. Plummer told Glass that the fixtures could not be sold to plaintiff unless they were removed from the building. Although plaintiff did purchase some of the smaller fixtures from American, he was unable to purchase many of the larger fixtures which he wished to obtain. American removed **[**4]** all of these larger fixtures from the store; plaintiff eventually purchased fixtures elsewhere and opened a grocery store at this location.²

[*1268] Plaintiff claims that the agreement between defendant and American restrained trade in the sale of store fixtures, because it prevented him from purchasing the fixtures while they were still in place. He further claims that this agreement restrained trade in the retail grocery business, because the alleged refusal to sell these fixtures in place caused a three-month delay in his plans to open a grocery store at this location.

In its Memorandum Opinion and Order of March 20, 1982, this Court found that the agreement between defendant and American could be characterized as a restraint **[**5]** of trade if it stifled competition. The Court noted, however, that only unreasonable restraints of trade are actionable under the Michigan statute. The Court concluded that there was a factual question as to whether this agreement was unreasonable, and that summary judgment was therefore inappropriate.

In its renewed motion for summary judgment as to Count III, defendant argues that there was no concerted action in this case, and that it therefore did not violate the Michigan statute. As authority for this position, defendant has

¹This complaint was originally filed in the Wayne County Circuit Court. Defendant removed the action to this Court, on the grounds that the parties are of diverse citizenship. [28 U.S.C. §§ 1332, 1441.](#)

²The facts as stated here are largely undisputed by the parties. They are also based in part on the deposition testimony submitted to the Court in this matter. See Deposition of Samir A. Danou at 67; Deposition of David Glass at 15; Deposition of Donald Plummer at 12.

cited *Harold Friedman, Inc. v. Kroger Co.*, 581 F.2d 1068 (3rd Cir. 1978). Although decided long before defendant's earlier motion, *Friedman* was not cited by defendant in that motion. Defendant now argues that under the authority of *Friedman*, it is entitled to summary judgment as to Count III.

In response, plaintiff argues that the existence of concerted action in the case at bar is a question of Michigan law, and that *Friedman* is therefore inapplicable. Plaintiff further argues that defendant's failure to cite *Friedman* in its earlier motion was caused by its own inexcusable neglect, and that this renewed motion should be denied for [**6] that reason. *Fed.R.Civ.P. 60(b)*.

HN1[] The Michigan antitrust statute is patterned after the Sherman Act. [15 U.S.C. § 1 et seq.](#) Accordingly, the federal courts' interpretations of the Sherman Act are persuasive authority as to the meaning of the Michigan Act. *Goldman v. Loubella Extendables*, 91 Mich. App. 212, 283 N.W.2d 695 (1979). Nevertheless, Count III does allege a violation of state law, and the decisions of the Michigan courts are the controlling authority in seeking to interpret the Michigan statute. Therefore, the Court must look first to the Michigan cases to determine what degree of concerted activity is required under the Michigan statute.

As mentioned above, Count III alleges that defendant violated **HN2**[] [Mich.Comp.Laws Ann. §§ 445.701](#) and [445.731](#). These sections prohibit only concerted action in restraint of trade; they do not prohibit unilateral action. This concerted action requirement was explained in *Goldman v. Loubella Extendables*, *supra*. Plaintiff has excerpted a quotation from that case, and relies on it to argue that there is a material factual issue which precludes granting summary judgment in favor of defendant.³ In order to apply *Goldman* correctly [**7] to the case at bar, however, the Court must examine the circumstances of that case. It is also necessary to examine the cases cited by the Michigan court in *Goldman*, so that the Court's observations may be placed in an appropriate context.

In *Goldman*, plaintiff operated a retail clothing store, and defendant was a clothing manufacturer. Plaintiff alleged that defendant and plaintiff's competitors had conspired to stop defendant's sales to plaintiff, because plaintiff was selling defendant's merchandise at a discount. The trial court granted summary judgment in favor of defendant, finding that plaintiff had presented no [**8] evidence of a conspiracy.

On appeal, the sole issue was whether defendant had conspired or combined with plaintiff's competitors, as required to establish liability under [Mich.Comp.Laws Ann. I-12691 § 445.701](#). The Michigan Court of Appeals reversed the trial court and remanded the case for trial. The court noted that defendant had indeed stopped selling its merchandise to plaintiff, without offering any explanation for its actions. There was also evidence that defendant had informed other retailers that it would not allow them to sell its merchandise at discounted prices, and that it had stopped selling its merchandise to any retailers that did not heed this warning. When defendant learned that other retailers were continuing to supply its merchandise to plaintiff, it had stopped selling to these other retailers as well. Finally, there was evidence that the retailers that were selling defendant's merchandise at full price had contacted defendant to complain about the retailers that were selling at a discount.

In light of these findings, the court concluded that there was some indication that defendant had combined with the non-discounting retailers, and that the complaints [**9] from these retailers had led defendant to stop selling to plaintiff and others. The court held that this presented a factual question which could not be resolved on a motion for summary judgment.

The Michigan court relied on four decisions of the United States Supreme Court which have explained the concerted activity requirement in [§ 1](#) of the Sherman Act. The leading case in this regard is *Albrecht v. Herald Co.*, 390 U.S. 145, 19 L. Ed. 2d 998, 88 S. Ct. 869 (1968). *Albrecht* involved a newspaper publisher's attempt to force distributors to adhere to a retail price set by the publisher. Plaintiff Albrecht distributed defendant's newspaper in a

³ Quoting from *United States v. Parke, Davis & Co.*, 362 U.S. 29, 44, 4 L. Ed. 2d 505, 80 S. Ct. 503 (1960), the Michigan court stated: "When a manufacturer goes 'beyond mere announcement of his policy and the simple refusal to deal, and he employs other means which effect adherence to his resale prices', he has put together a combination." [91 Mich. App. at 221, 283 N.W.2d at 699](#).

particular area of metropolitan St. Louis. When he raised his price above defendant's suggested resale price, defendant informed him that unless he lowered his price, defendant would take over his delivery route. Defendant hired Milne Circulation Sales, Inc. to solicit subscriptions from Albrecht's customers at defendant's lower price. Defendant then hired George Kroner to deliver newspapers to the customers solicited by Milne. Kroner was required to comply with defendant's suggested resale price, and he knew that defendant would [**10] likely return his customers to Albrecht if Albrecht agreed to comply with this price as well.

The Court found that the agreement among defendant, Milne, and Kroner constituted concerted activity and that it violated § 1 of the Sherman Act. The Court noted that both Milne and Kroner knew that defendant's purpose in entering this agreement was to fix the retail price of its newspapers.

The Michigan court also cited [United States v. Parke, Davis & Co., 362 U.S. 29, 4 L. Ed. 2d 505, 80 S. Ct. 503 \(1960\)](#). In that case, it was alleged that defendant had combined with retail and wholesale druggists to maintain the price of its pharmaceutical products. Defendant had announced a resale price maintenance policy in its wholesale and retail catalogs. Each of these catalogs contained a schedule of minimum prices to be charged. Nevertheless, certain retailers began to sell defendant's products at prices well below those listed in defendant's catalog. Defendant then informed its wholesalers that it would no longer sell its products to wholesalers who did not adhere to the catalog prices, nor to wholesalers who distributed these products to retailers who did not adhere to the catalog prices. [**11] Defendant also contacted its retailers directly, and informed them that neither defendant nor its wholesalers would sell to them if they did not observe the minimum prices.

Despite these warnings, several retailers continued to sell defendant's products at prices below the minimum prices. Defendant informed its wholesalers of this, and sales to these retailers were terminated.

The District Court found that defendant had not violated the Sherman Act, because it had acted unilaterally.⁴ The Supreme [*1270] Court reversed. It found that defendant had "(employed) other means which (effected) adherence to his resale prices", and had therefore not acted unilaterally. [362 U.S. at 44](#). The Court found that there was a combination among defendant, its wholesalers, and its retailers to maintain the retail prices of defendant's products.

[**12] The third case cited by the Michigan court was [United States v. Bausch & Lomb Optical Co., 321 U.S. 707, 88 L. Ed. 1024, 64 S. Ct. 805 \(1944\)](#). This case involved a business relationship between Bausch & Lomb and Soft-Lite Lens Co., Inc. Bausch & Lomb manufactured tinted optical lenses which it sold to Soft-Lite. Bausch & Lomb agreed to sell these lenses only to Soft-Lite; Soft-Lite agreed to buy them only from Bausch & Lomb. In addition, Bausch & Lomb was the majority shareholder in most of the wholesale companies through which Soft-Lite distributed these lenses to retail opticians.

Bausch & Lomb and the other wholesalers were allowed to sell the lenses only to retailers which had been licensed by Soft-Lite. Moreover, each pair of lenses was numbered so that Soft-Lite could determine which wholesalers had sold them to unlicensed retailers. Soft-Lite stated the price at which its wholesalers were to sell the lenses to retailers. Soft-Lite also forbade its retailers to sell the lenses for less than locally prevailing prices. Soft-Lite's salesmen and wholesalers policed the conduct of the licensed retailers. If retailers sold the lenses for less than Soft-Lite's stipulated [**13] price or otherwise violated the license granted by Soft-Lite, this was reported to Soft-Lite. Sales to these "undesirable" retailers were then terminated.

When charged with violating § 1 of the Sherman Act, Soft-Lite claimed that it had unilaterally refused to sell its lenses to retailers who failed to meet the terms of their licenses. The Court found that Soft-Lite had combined with Bausch & Lomb and its other wholesalers to fix resale prices and prevent sales to unlicensed retailers.

⁴Under [United States v. Colgate & Co., 250 U.S. 300, 63 L. Ed. 992, 39 S. Ct. 465 \(1919\)](#), [HN3](#) a manufacturer may unilaterally enforce a price maintenance policy by announcing such a policy and refusing to deal with customers who do not observe it. So long as the manufacturer acts alone, this does not constitute concerted activity and therefore does not violate § 1 of the Sherman Act.

Finally, the Michigan court cited [*F.T.C. v. Beech-Nut Packing Co., 257 U.S. 441, 66 L. Ed. 307, 42 S. Ct. 150 \(1922\)*](#). In that case, Beech-Nut circulated a list of uniform resale prices to its wholesalers and retailers. Beech-Nut informed its wholesalers and retailers that it would discontinue selling its products to anyone who failed to adhere to these prices. It also informed its wholesalers that it would discontinue its sales to any wholesaler which distributed its products to a retailer failing to adhere to the uniform prices. In addition, Beech-Nut placed code numbers on its products and instituted a reporting system to detect violations of its pricing policy.

The Court found that Beech-Nut, [\[**14\]](#) its wholesalers, and its retailers had combined to suppress price competition. The Court noted that Beech-Nut could have unilaterally refused to sell its products without violating the Sherman Act. The Court found, however, that by enlisting the cooperation of its wholesalers and retailers Beech-Nut had "(gone) beyond the exercise of this right." [*257 U.S. at 453*](#).

The Court must now examine the alleged combination between defendant and American in the case at bar, and compare it to the concerted activity found to exist in [*Goldman, supra*](#), and the cases cited therein.⁵ [\[*1271\]](#) For three reasons, the Court finds that the relationship between defendant and American was clearly different from the conduct which was found to constitute concerted activity in these other cases.

[\[**15\]](#) First, American derived no benefit from its role in this alleged combination. It would have been much more profitable for American to sell the fixtures in place, as requested by plaintiff. American could have resold the fixtures for a higher price if it had not first removed them. In addition, American could have saved itself the cost of removing the fixtures. Plaintiff has not even alleged that American would have benefitted from a restraint of trade in the retail grocery market; American has no interest in this market. If there was in fact a restraint of trade in the case at bar, it is clear that only defendant benefitted from it.

This is in marked contrast to the alleged circumstances in *Goldman* and the cases cited therein. In *Goldman*, defendant and the non-discounting retailers all benefitted from the restraint. Their actions suppressed price competition in the sale of defendant's products, which permitted all of them to sell these goods at a higher price. In *Albrecht*, Kroner clearly benefitted from defendant's restraint; he received newspaper customers as a direct result of this restraint. Milne also benefitted, by receiving its fee from defendant.

In [\[**16\]](#) *Parke, Davis and Beech-Nut*, the wholesalers and retailers involved benefitted from the price maintenance programs. Because they agreed to adhere to defendants' prices, they were assured of a continuing supply of defendants' products. In addition, they were able to sell these products at higher prices because of the price maintenance programs. The wholesalers in *Bausch & Lomb* similarly benefitted from their combination with Soft-Lite, because it allowed them to sell at higher prices.

Second, defendant's contract with American was clearly collateral to its alleged restraint of trade. American played no part in the alleged decision not to sell plaintiff the fixtures in place; it merely performed its contract with

⁵ Defendant has cited [*Harold Friedman, Inc. v. Kroger Co., supra*](#), a case in which the Third Circuit applied [*Albrecht, supra*](#), under circumstances very similar to those in the case at bar. The Court in *Friedman* formulated a four-part test to determine whether concerted activity existed:

- (1) all members of the combination knew of the defendant's purpose to restrain trade;
- (2) at least two members of the combination benefited by the restraint of trade and, in that sense, shared a common purpose in restraining trade;
- (3) the agreement by two members of the combination actually restrained trade, as opposed to merely facilitating the restraint; and
- (4) at least two members of the combination intended to restrain trade.

[*581 F.2d at 1073*](#). The Court's opinion is a perceptive analysis of *Albrecht*'s concerted activity requirement; as will be discussed *infra*, the relationship between defendant and American clearly did not meet this four-part test. *Friedman* cannot be considered an important authority in the case at bar, however. Its four-part test has never been adopted by the Supreme Court, nor by many other federal courts. While *Friedman* has been frequently cited by the federal courts within the Third Circuit, it has rarely been cited by any others. It therefore cannot be regarded as the "leading authority in the country" which defendant claims it to be. Defendant's Brief at 3.

557 F. Supp. 1266, *1271 (1983 U.S. Dist. LEXIS 18946, **16

defendant. American made no direct contribution to defendant's alleged restraint. At most, American merely facilitated defendant's unilateral restraint by performing its contract and removing the fixtures from the building.

In contrast, the actions of the other retailers in *Goldman* were crucial for the success of defendant's refusal to deal with plaintiff. First, the non-discounting retailers also ceased selling goods to plaintiff when defendant informed [**17] them that plaintiff was selling these goods at discounted prices. Second, the non-discounting retailers complained to defendant that plaintiff was selling at a discount, and this led defendant to stop dealing with plaintiff.

Similarly, defendant's agreement with Kroner in *Albrecht* was an essential element in defendant's enforcement of its retail prices. Defendant would not have solicited Albrecht's customers unless it had made alternate plans for the delivery of its newspapers to these customers. Defendant's agreement with Milne may have been merely collateral and therefore insufficient, standing alone, to support a finding of combination. The Court in *Albrecht* did not indicate whether an agreement between defendant and Milne alone would have constituted concerted activity. It has been persuasively suggested that it would not have.⁶

[**18] [*1272] In *Parke, Davis and Beech-Nut*, the assistance of the wholesalers and retailers was essential to the success of defendants' price maintenance programs. These wholesalers and retailers adhered to the resale prices set by defendants; in addition, they discontinued sales to other persons who did not adhere to these prices. The wholesalers in *Bausch & Lomb* also provided necessary assistance in implementing defendant's restraints. In addition to adhering to defendant's resale prices, they also policed the conduct of defendant's retailers and reported any violations of the retail licensing agreements.

Finally, American had no knowledge of defendant's alleged anticompetitive intent when it agreed to clean the store and remove the fixtures. Nothing in the deposition testimony submitted by the parties indicates that when American agreed to clean the store, it knew that defendant wanted to avoid selling the fixtures in place to plaintiff.⁷ [**19] At

⁶ See [Friedman, supra, 581 F.2d at 1073-1074](#):

It is not clear from the *Albrecht* opinion whether the Supreme Court would have found concerted activity under [§ 1](#) based on the agreement between the Herald and Milne alone if the Herald had delivered the newspapers itself and not hired Kroner. It would have been reasonable for the Court to have found that the Herald acted unilaterally in such a case, for in this hypothetical case only the Herald intended to restrain trade, only the Herald restrained trade, only the Herald stood to benefit from restraining trade, and no one shared with the Herald a common purpose of restraining trade. Professor Areeda also finds this position reasonable and suggests that a purely collateral agreement, such as that between Milne and the Herald, is insufficient to constitute concerted activity It seems to us, therefore, that Kroner's role in the combination was crucial to the outcome of the case.

Other commentators have also criticized the Court's conclusion in *Albrecht* that there was a combination among the Herald, Milne, and Kroner. See *The Supreme Court, 1967 Term*, 82 Harv.L.Rev. 63, 257-258 (1968):

Both Kroner and Milne were agents hired by the corporate defendant to perform specific tasks, in which they had no independent interests beyond the fee they were paid. It is difficult to find in this agency the "contract, combination in the form of trust or otherwise, or conspiracy" that is required to violate [section 1](#) of the Sherman Act Nor does there appear to be any economically significant difference between the defendant's hiring Milne to solicit the customers and its doing the job alone.

See also Handler, *Reforming the Antitrust Laws*, [82 Colum.L.Rev. 1287, 1299-1302 \(1982\)](#):

In *Albrecht* . . . the Court . . . extended [section 1](#) to unilateral conduct by stretching the concept of concerted action well beyond the breaking point The courts of appeals have begun to interpret *Albrecht* properly to apply to cases involving concerted action, and not to those involving the mere "aiding and abetting" of a supplier's unilateral refusal to deal It is time for the Supreme Court to clarify *Albrecht* and explain that merely aiding and abetting a unilateral refusal to deal does not convert that unilateral conduct into a contract, combination, or conspiracy.

557 F. Supp. 1266, *1272L^{1983 U.S. Dist. LEXIS 18946, **19}

most, plaintiff may be able to establish that American learned while it was cleaning the store that defendant would not allow plaintiff to purchase the fixtures in place.⁸

In *Goldman*, on the other hand, there was no question but that the non-discounting retailers knew of defendant's intent to maintain its resale prices. Defendant expressly told its retailers that it would not allow them to sell its merchandise at discounted prices. In addition, it stopped selling its merchandise to any retailer who did sell at a discount.

In *Albrecht*, the Court emphasized that both Milne and Kroner knew of defendant's intent to enforce compliance with its suggested retail prices.⁹ In *Parke, Davis and Beech-Nut*, the wholesalers and retailers clearly knew of defendants' intent to maintain their resale prices; these defendants circulated uniform price lists to their wholesalers and retailers. In *Bausch & Lomb*, [*1273] the wholesalers similarly knew that defendant sought to maintain its resale prices and prevent sales to unlicensed retailers.

[**20] In sum, the alleged conduct of defendant and American in the case at bar falls far short of the conduct found to constitute concerted activity in *Goldman*, *Albrecht*, *Parke, Davis*, *Bausch & Lomb*, and *Beech-Nut*. Measured against the conduct present in *Albrecht*, *Parke, Davis*, *Bausch & Lomb*, and *Beech-Nut*, the conduct of defendant and American was not concerted activity as that term has been defined under the Sherman Act. Moreover, the Michigan court expressly relied on those cases to formulate its definition of concerted activity in *Goldman*. Applying the *Goldman* test to the case at bar, therefore, the Court finds as a matter of law that there was no concerted activity under the Michigan antitrust statute. If there was any restraint of trade in the case at bar, it was caused by defendant's unilateral acts. Accordingly, defendant's renewed Motion for Summary Judgment as to Count III is hereby GRANTED.¹⁰

[**21] IT IS SO ORDERED.

End of Document

⁷ [HN4](#) When a motion for summary judgment is supported by affidavits or depositions, an adverse party may not rely upon mere allegations. The adverse party must set forth facts to demonstrate that there is a genuine factual dispute. [Fed.R.Civ.P. 56\(e\)](#).

⁸ See Deposition of Donald Plummer at 12.

⁹ See [390 U.S. at 150](#):

Milne's purpose was undoubtedly to earn its fee, but it was aware that the aim of the solicitation campaign was to force petitioner to lower his price. Kroner knew that respondent was giving him the customer list as part of a program to get petitioner to conform to the advertised price, and he knew that he might have to return the customers if petitioner ultimately complied with respondent's demands.

¹⁰ Plaintiff has argued that defendant inexcusably neglected to raise the issue of concerted activity in its earlier motion for summary judgment, and that [Fed.R.Civ.P. 60\(b\)](#) mandates that this renewed motion be denied. [HN5](#) Rule 60(b), however, applies only to a "final judgment, order, or proceeding." The denial of a summary judgment motion is an interlocutory order, and the Court can modify or rescind such an order at any time prior to the entry of a final judgment. [Bon Air Hotel, Inc. v. Time, Inc., 426 F.2d 858 \(5th Cir. 1970\)](#).

Antitrust & Trade Law > Sherman Act > General Overview

HN1 [] Sherman Act, Jurisdiction

The jurisdictional requirement under the Sherman Act, [15 U.S.C.S. § 1, et seq.](#), may be satisfied by showing that the challenged activity either occurred in interstate commerce, or, though wholly local in nature, has an effect on interstate commerce. It is also well established that the jurisdictional issue in antitrust cases involving the denial of hospital staff privileges or access to hospital facilities may be determined under the "effect on commerce" test. To establish jurisdiction under the "effect on commerce" test plaintiff need not show that the defendants' challenged conduct itself had a substantial effect on interstate commerce. The plaintiff, then, must establish that there exists a sufficient nexus between the challenged activity and interstate commerce so that it can be said as a matter of practical economics there is a not insubstantial effect on the interstate commerce involved. In determining jurisdiction, there is no talismanic test. Rather, jurisdiction must be determined using a case-by-case analysis of the relevant economic facts. Moreover, the impact defendant's professional activities may have upon interstate commerce is a question of fact.

HN2 [down] **Antitrust & Trade Law, Sherman Act**

Denial of hospital privileges affects interstate commerce because it retards competition. This retardation affects interstate commerce in the following ways: first, by denying to physicians the opportunity to compete, prices will invariably stabilize at some fixed rate and this will affect the amount of payments made by out of state, third-party insurers. Allowing these plaintiff-physicians privileges and access will provide patients and third-party insurers the benefits of free and open competition. This in turn will affect the amount of payments made by out of state, third-party insurers. Second, the competition that will be generated by permitting physicians staff privileges and access will affect the volume of out of state patients treated and the volume of the out of state purchases of supplies.

Healthcare Law > Healthcare Litigation > Antitrust Actions > Physicians

Business & Corporate Compliance > ... > Insurance Company Operations > Conducting Business > Foreign Insurers

HN3 [down] **Antitrust & Trade Law, Sherman Act**

The underpinning of the denial of privileges and access cases is the fact that the defendants' challenged activities have the effect of eliminating competition which in turn affects instate commerce activities of treating patients who travel in interstate commerce, purchases of out of state supplies, and receipt of revenue from out of state third-party insurers.

Antitrust & Trade Law > Sherman Act > General Overview

HN7 Regulated Practices, Price Fixing & Restraints of Trade

Under the "rule of reason," only unreasonable restraints of trade are forbidden. A restraint of trade is deemed unreasonable where the anti-competitive effects outweigh the pro-competitive effects of the challenged activity. Certain business combinations, however, because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use. This principle of per se unreasonableness not only makes the type of restraints which are proscribed by the Sherman Act more certain to the benefit of everyone concerned, but it also avoids the necessity for an incredibly complicated and prolonged economic investigation into the entire history of the industry involved, as well as related industries, in an effort to determine at large whether a particular restraint has been unreasonable. Among the practices which the courts have heretofore deemed to be unlawful in and of themselves are price fixing, division of markets, group boycotts and tying arrangements.

[Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations](#)

[HN9](#)[] **Monopolies & Monopolization, Attempts to Monopolize**

A tying arrangement is an agreement by a party to sell one product but only on the condition that the buyer also purchases a different (or tied) product. The Supreme Court has recognized that the vice of tying arrangements lies in the use of economic power in one market to restrict the competition on the merits in another regardless of the source from which the power is derived and whether the power takes the form of a monopoly or not. However, not all tying arrangements are proscribed by the Sherman Act. A tying arrangement is a per se violation of the Act when it exhibits the following four characteristics: 1. two separate products, the tying product and the tied product; 2. sufficient market power in the tying market to coerce purchase of the tied product; 3. involvement of a not insubstantial amount of interstate commerce in the tied market; and 4. anticompetitive effects in the tied market.

[Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview](#)

[Business & Corporate Compliance > ... > Types of Commercial Transactions > Sales of Goods > Output, Exclusive & Requirements Agreements](#)

[Healthcare Law > Healthcare Litigation > Antitrust Actions](#)

[HN10](#)[] **Price Fixing & Restraints of Trade, Tying Arrangements**

A plaintiff does not have to prove that a hospital totally dominated the market. All that plaintiff must show is that the hospital possessed sufficient economic power to impose an appreciable restraint on free competition in the tied product. As a first step, in demonstrating "sufficient market power," plaintiff must demonstrate the relevant geographic market for the hospital's services. Then it must be shown that, within that geographic market, the seller has the power to raise prices or to require purchasers to accept burdensome terms that could not be exacted in a completely competitive market. In short, the question is whether the seller has some advantage not shared by his competitors in the market for the tying product. There exist many problems and pitfalls in establishing the above two factors. There is a serious question whether the relevant market area can be sliced so small as to embrace a single hospital.

[Healthcare Law > Healthcare Litigation > Antitrust Actions](#)

[Healthcare Law > ... > Health Insurance > Reimbursement > General Overview](#)

[HN11](#)[] **Healthcare Litigation, Antitrust Actions**

Because the prevalence of third party payment of bills eliminates a patient's incentive to compare the relative cost effectiveness of competing hospitals and there exists a lack of complete information regarding the quality of medical care offered, patients tend to choose hospitals by location rather than price or quality, which means that the geographic market area apparently may subsume only an individual hospital.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Business & Corporate Compliance > ... > Types of Commercial Transactions > Sales of Goods > Output, Exclusive & Requirements Agreements

Healthcare Law > Healthcare Litigation > Antitrust Actions

HN12 [] **Price Fixing & Restraints of Trade, Tying Arrangements**

In demonstrating "sufficient market power," that is, that within the relevant market area it must be shown that the hospital is able to coerce its purchasers of services into accepting burdensome terms that could not be exacted in a completely competitive market, a plaintiff must show that patients are compelled to purchase the hospital's chosen service in return for the use of the hospital's operating room and analogous services. There must have existed, then, competition insofar as patients are concerned. If this cannot be shown, the factor of impermissible coercion is missing from the tying arrangement equation and, consequently, a plaintiff cannot prevail on this theory. A demonstrated exclusive contract would then be lawful.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions

HN13 [] **Price Fixing & Restraints of Trade, Tying Arrangements**

If a defendant hospital affords proof of a legitimate articulated medical reason for the existence of a tying arrangement, and further demonstrates that there does not exist a less restrictive way to accomplish the end which justifies that medical reason, defendant hospital will be insulated from liability.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN14 [] **Regulated Practices, Price Fixing & Restraints of Trade**

Maximum and minimum price fixing may have different consequences in many situations. But schemes to fix maximum prices, by substituting the perhaps erroneous judgment of a seller for the forces of the competitive market, may severely intrude upon the ability of buyers to compete and survive in that market.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN15 [] **Price Fixing & Restraints of Trade, Vertical Restraints**

A vertical combination should be analyzed under the rule of reason. As the name suggests, the rule of reason requires the trier of fact to decide whether under all of the circumstances of the case, the restrictive practice imposes an unreasonable restraint on competition. The true test of legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

International Trade Law > General Overview

HN16 [] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

A plaintiff may prevail on a per se price fixing theory if it can be shown that the agreement or combination was formed for the purpose and with the effect of raising, depressing, fixing, pegging or stabilizing the price of a commodity in interstate or foreign commerce.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Healthcare Law > Healthcare Litigation > Antitrust Actions > Physicians

HN17 [] Sherman Act, Claims

A horizontal arrangement between physicians to establish the maximum fees they could claim in full payment for health services provided to policy holders of specified plans can be a per se violation of the Sherman Act.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Physicians

HN18 [] Regulated Practices, Price Fixing & Restraints of Trade

A price restraint tends to provide the same economic rewards to all practitioners regardless of their skill, their experience, their training, or their willingness to employ innovative and difficult procedures in individual cases. Such a restraint also may discourage entry into the market and may deter experimentation and new developments by individual entrepreneurs. It may be a masquerade for an agreement to fix uniform prices, or it may in the future take on that character.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN19 [blue document icon] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Where exclusionary or coercive conduct has been present, the arrangements have been viewed as naked restraints of trade, and have fallen victim to the per se rule. On the other hand, where these elements have been missing, the per se rule has not been applied to collective refusals to deal. Therefore, the resort to the per se rule is justified only when there exists the presence of exclusionary or coercive conduct which, when present, warrants the view that the arrangement is a "naked restraint of trade." Absent these factors, the rule of reason must be followed in determining the legality of the agreement.

HN20 [blue document icon] Causes of Action, Restraints of Trade

Where facilities cannot be practically duplicated by would-be competitors, those in possession of them must allow them to be shared on fair terms. It is illegal restraint of trade to foreclose the scarce facility. To be "essential," a facility need not be indispensable; it is sufficient if duplication of the facility would be economically unfeasible and if denial of its use inflicts a severe handicap on potential market entrants. However, this principle must be carefully delimited: the antitrust laws do not require that an essential facility be shared if such sharing would be impractical or would inhibit the defendant's ability to serve its customers adequately.

Opinion by: MINER

Opinion

[*706] Memorandum-Decision and Order

MINER, D.J.

I

Plaintiff, an anesthesiologist, has commenced this action for declaratory, injunctive and monetary relief against the following defendants: Champlain Valley Physicians Hospital Medical Center (hereinafter the "hospital"), its President, David T. Hannan, its Chief of Staff, Michael J. Moynihan, Anesthesia Associates of Plattsburgh, P. C. (hereinafter "AAP"), its President, John Menustik and the hospital's Chief of Anesthesiology, Salem Bayoumy. Plaintiff's complaint contained claims for relief under the Sherman and Clayton Antitrust Acts, 15 U.S.C. §§ 1 et seq., the Civil Rights Act of 1871, 42 U.S.C. § 1983 and the Medicare Act, 42 U.S.C. §§ 1395 et seq. Subject matter jurisdiction for the various federal claims was predicated upon 28 U.S.C. §§ 1331(a), 1343(3) and 1337. Additionally, the complaint set forth four claims for relief invoking this Court's pendent jurisdiction, and, finally, treble damages, compensatory damages and punitive damages were sought.

On July 19, 1979, the Honorable James T. Foley, U.S.D.J., granted defendants' motion to dismiss as to the civil rights, medicare and state pendent claims and denied defendants' motion to dismiss as to the antitrust claims. Plaintiff's cross-motion for preliminary injunctive relief was denied and dismissed. See *Konik v. Champlain Valley Physicians Hospital Medical Center*, 79-CV-217 (N.D.N.Y. July 19, 1979). The only claims remaining, then, are plaintiff's antitrust claims.¹

[**3] Before this Court is defendants' motion to dismiss the antitrust claims for lack of subject matter jurisdiction and for failure to state a claim pursuant to Fed. R. Civ. P. 12(b)(1) and 12(b)(6), and, in the alternative, for summary judgment pursuant to Fed. R. Civ. P. 56(b). Also before this Court is plaintiff's cross-motion for partial summary judgment pursuant to Fed. R. Civ. P. 56(a).

II

Plaintiff is a physician duly licensed to practice medicine in the State of New York. She has held her license since 1958 and her specialty is anesthesiology. On January 1, 1961, Dr. Konik was appointed to the staff of the predecessor of the defendant, Champlain Valley Physicians Hospital Medical Center, and has remained on the general medical staff of the defendant hospital over the last twenty-two years. (Affidavit of Louise Konik, M.D., sworn to October 27, 1982, para. 8; hereinafter "Konik Affidavit").² Indeed, Dr. Konik has served as Chief of the Anesthesiology Department at the hospital.

[**4] In June, 1969, the anesthesiologists serving the defendant hospital subscribed to a document that stated their intent to form a professional group for the practice of anesthesiology in Plattsburgh. Plaintiff herself signed this document. (Affidavit of David T. Hannan, sworn to April 9, 1979, Ex. A; hereinafter "Hanna Affidavit"). Moreover, due to the expansion of the hospital and the increase in the need for their professional services, the hospital encouraged the five staff anesthesiologists to "enter a group practice arrangement." (Hannan Affidavit, Ex. C). A formal partnership agreement, reciting the wishes of the hospital, was executed by the anesthesiologists on January 1, 1971. (Hannan Affidavit, Ex. B). During this early existence of the anesthesiology group, however, the hospital did not believe that a formal contract between itself and the group was required since the scheduling of services through the [*707] group "would preempt the available caseload." (Hannan Affidavit, Ex. D).

¹ The Court refused to grant defendants' motion as to the plaintiff's first "cause of action," the antitrust claims, in part because there was an insufficiency of discovery to form a basis for summary judgment on the contested jurisdictional issue.

² Dr. Konik's latest appointment occurred on January 18, 1982, when the hospital's board of directors approved her appointment to the "Attending Medical Staff" and granted her "Senior Privileges in Anesthesiology." (Konik Affidavit, para. 9, Ex. 3).

There is no mention of fee arrangements in the anesthesiologists' partnership agreement. However, there is some evidence that a billing fee of \$35.00 was collected by the hospital for [**5] anesthesia services during obstetrical vaginal delivery, that quarterly transfers of the accumulated fees were made to the group, and that such an arrangement was the product of an agreement between the hospital and the anesthesiologists as a group. (Hannan Affidavit, Ex. F).

During the year 1973, the anesthesiology group established a professional corporation, allegedly for administrative and professional reasons. This is the professional corporation which in this action constitutes the defendant AAP (Konik Affidavit, para. 25). Dr. Konik continued to be affiliated with AAP until August, 1978. (*Id.*, P 27).

It is not entirely clear from the record whether plaintiff chose to withdraw from the AAP as a consequence of the hospital's decision to require a formal contractual undertaking between itself and the anesthesiologists as a condition to the delivery of those services, or, whether plaintiff withdrew from the group for internal and personal reasons other than the contractual clauses plaintiff now finds to be objectionable.³ In any event, the hospital's stated reason for the contractual arrangement was to "provide community anesthesiology services sufficient in quantity [**6] and quality to meet the ongoing surgical and obstetrical demands of its patients." (Hannan Affidavit).

Plaintiff alleges that at this time she was advised that she would not be permitted any access to the surgical suites at the hospital unless she agreed "to abide by and become a signatory to the contemplated exclusive contract between the hospital [**7] and defendant, AAP." (Konik Affidavit, para. 30). However, on August 1, 1978, an offer was made to Dr. Konik on behalf of the hospital and its administration, to allow her to practice at the hospital and deliver anesthesia services for a period of time up to September 1, 1978, as an independent physician on the staff practicing as "a solo physician." (Konik Affidavit, para. 31, Exs. 5, 6).

During this period of time, plaintiff maintains, there was no disruption in anesthesia coverage at the hospital, the assignment of anesthesia services was effectively handled by the Department of Anesthesiology, she effectively competed with AAP in delivering anesthesia services to the hospital, and that this arrangement "proceeded smoothly . . . with no problems whatsoever," in part because she was obligated to abide by the bylaws of the General Medical staff of the hospital as well as all of the rules, regulations and bylaws of the Department of Anesthesiology, all of which allegedly provide that physicians must furnish necessary services when required.⁴ (*Id.*, P 33). Plaintiff further maintains that on September 1, 1978 defendant President Hannan ordered defendant Bayoumy, then Chief of [**8] Anesthesiology, to remove Dr. Konik from the anesthesia rotation schedule. As a consequence, plaintiff has not engaged in the active practice of her profession at the defendant hospital since September, 1978.

Between September and November, 1978, the hospital and plaintiff attempted to [*708] reach an accommodation regarding the content of the agreements which the hospital allegedly required as a condition of the delivery of anesthesiology services to its patients. One of the proposed agreements is alleged to have provided for a uniform posted fee schedule to which the plaintiff objected. Dr. Konik signed and submitted a counter proposal, dated September 29, 1978, with a provision, originally contained in the earlier August 31, 1978 tripartite agreement subscribed [**9] to by the hospital and AAP but unsigned by plaintiff, that provided that the fees charged will be no greater than those charged by other anesthesiologists for similar work situations in upstate New York. (Hannan

³Dr. Konik seems to maintain that she discontinued her "affiliation with the defendant, AAP, in order to practice as an independent physician with Senior Privileges in Anesthesiology at defendant, [hospital]." (Konik Affidavit, para. 28). Dr. Konik, however, also hints that she resigned from AAP since "discussions and negotiations had been undertaken [at the time of her departure] between the defendant, [hospital], and defendant, AAP, for purposes of entering into an exclusive contract [between the hospital and AAP] . . . whereby [AAP] would have the exclusive franchise for providing anesthesia services at the [hospital]." (Konik Affidavit, para. 29).

⁴ Plaintiff also contends that no proceedings in accordance with the hospital bylaws have ever been instituted regarding her conduct, either professionally, or, as a consequence of her withdrawal from AAP. This contention is uncontested.

Affidavit, Ex. G). This counter proposal also sought to reserve to the plaintiff all legal rights against the defendants. The defendant hospital and the defendant AAP did not sign this proposal.⁵

Plaintiff states that she was "forced" to sign and submit this counter proposal "to restore my access to the surgical suites of the defendant [**10] hospital in order that I could continue delivering anesthesia services," lest professional inactivity result in a deterioration of her skills. (Konik Affidavit, para. 35). Dr. Konik further states that she will not be coerced into entering into any contract, similar to the August 31, 1978 agreement, regulating her fee schedule and that, as a competent practitioner of 18 years, she will not have her status reviewed every six months as provided for in the contract. She asserts that the matter of a due process violation (denial of the use of hospital facilities for delivery of anesthesiological services), in addition to the contractual impasse, was brought to the attention of the State and County Medical Societies at a November 13, 1978 meeting between the principals and representatives of those societies. (Konik Reply Affidavit).

A new proposal was submitted by defendants, attempting to incorporate the clauses desired by plaintiff and reach an accommodation as to the disputed reservation of legal rights. (Hannan Affidavit, Ex. I). Plaintiff apparently refused to sign this compromise agreement. Therefore, plaintiff claims, the original tripartite agreement (hospital-AAP-plaintiff) [**11] of August 31, 1978, signed only by the defendants hospital and AAP, is presently in effect.⁶

III

Plaintiff's remaining claim, entitled "First Cause of Action," purports to set forth claims under [15 U.S.C. §§ 1, 2, 14](#), [15](#) and [26](#). Under the heading of "First Cause of Action," two individual "counts" are pleaded, alleging violations of [15 U.S.C. §§ 1](#) and [2](#). A liberal reading of plaintiff's antitrust averments reveals that the gravamen of her [§ 1](#) claims are premised upon the *per se* violations of price-fixing, [United States v. Trenton Potteries Co., 273 U.S. 392, 398, 71 L. Ed. 700, 47 S. Ct. 377 \(1927\)](#), and group boycotts or concerted refusals to deal, [Klor's, Inc. v. Broadway-Hale Stores, Inc., 359 \[**12\] U.S. 207, 212, 3 L. Ed. 2d 741, 79 S. Ct. 705 and n. 5 \(1959\)](#) (Complaint, para. 40, 41). Plaintiff's partial summary judgment motion is specifically predicated upon a showing of an illegal tying arrangement (exclusive contract), horizontal price fixing, vertical price fixing, illegal group boycott, and a violation of the essential facilities doctrine. (Notice of Motion by Plaintiff for Partial Summary Judgment, dated October 27, 1982).

[*709] Defendants have asserted in their summary judgment motion⁷ an array of defenses against plaintiff's antitrust claims, including: (1) the lack of a showing of the existence of an exclusive contract, [Capili v. Shott, 620 F.2d 438 \(4th Cir. 1980\)](#); (2) the failure to demonstrate a conspiracy or a combination in restraint of trade or commerce among the states; and (3) the lack of subject matter jurisdiction under the Sherman Act, [Yellow Cab Co. of Nevada v. Cab Emp. Automotive, 457 F.2d 1032 \(9th Cir. 1972\)](#); [Cardio-Medical Associates, Ltd. v. Crozer-Chester Medical Center, 536 F. Supp. 1065 \(E.D. Pa. 1982\)](#). As a threshold matter, this Court shall consider the jurisdictional question.

[**13] Jurisdictional Prerequisites Under the Sherman Act

HN1 [↑] The jurisdictional requirement under the Sherman Act may be satisfied by showing that the challenged activity either occurred in interstate commerce, or, though wholly local in nature, has an effect on interstate

⁵ Paragraph 6 of the September 29th agreement provides, "the execution of this Memorandum of Understanding shall not be deemed a waiver of any cause of action of the party of the third-part [Dr. Konik] heretofore existing against any other party to this agreement." Plaintiff contends that the reason AAP and the hospital refused to sign this agreement was that she intended to challenge the legality of this and prior "exclusive" agreements. (Konik Affidavit, para. 36).

⁶ It is not disputed that the August 31st agreement is still in effect, at least between defendants hospital and AAP. However, it is the effect and scope of the contract that is at the very heart of the dispute at bar. The agreement is provided in Appendix A, *infra*, for the reader's convenience.

⁷ Since the Court is considering material outside the pleadings, defendants' motion shall be treated solely as one for summary judgment.

commerce. *McLain v. Real Estate Board, Inc.*, 444 U.S. 232, 62 L. Ed. 2d 441, 100 S. Ct. 502 (1980). "It can no longer be doubted . . . that the jurisdictional requirement of the Sherman Act may be satisfied under either the 'in commerce' or the 'effect on commerce' theory." *Id. at 242*. It is also well established that the jurisdictional issue in antitrust cases involving the denial of hospital staff privileges or access to hospital facilities may be determined under the "effect on commerce" test. *Crane v. Intermountain Health Care, Inc.*, 637 F.2d 715 (10th Cir. 1980). See also *Mishler v. St. Anthony's Hospital Systems*, 694 F.2d 1225 (10th Cir. 1981).

To establish jurisdiction under the "effect on commerce" test plaintiff need *not* show that the defendants' challenged conduct *itself* had a substantial effect on interstate commerce. "If establishing jurisdiction required a showing that the unlawful [**14] conduct itself had an effect on interstate commerce, jurisdiction would be defeated by a demonstration that the alleged restraint failed to have its intended anticompetitive effect. This is not the rule of our cases."⁸ *McLain v. Real Estate Board of New Orleans, supra*, 444 U.S. at 243. The plaintiff, then, must establish that there exists a sufficient nexus between the challenged activity and interstate commerce so that it can be said "as a matter of practical economics" there is "a not insubstantial effect on the interstate commerce involved." *Id. at 246*. In determining jurisdiction, there is no talismanic test. "Rather, jurisdiction must be determined using a case-by-case analysis of the relevant economic facts." *Heille v. City of St. Paul, Minnesota*, 671 F.2d 1134, 1136 (8th Cir. 1982). Moreover, "the impact defendant's professional activities may have upon interstate commerce . . . is a question of fact. . . ." *Williams v. St. Joseph Hospital*, 629 F.2d 448, 454 (7th Cir. 1980).

[**15] Here, it is conceded that the plaintiff, Dr. Konik, has been denied use of the facilities at the defendant hospital for delivery of anesthesia services because she failed to sign a contract for the rendering of such services. Dr. Konik alleges that this denial of access by the named defendants violated the antitrust laws under the Sherman Act.

In maintaining that the jurisdictional requirement of the Sherman Act has been met, Dr. Konik presents allegations in her complaint, accompanied by certain proof in depositions and affidavits, that:

1. plaintiff treated patients who traveled in interstate commerce;
- [*710] 2. plaintiff administered and prescribed a substantial quantity of pharmaceutical drugs and anesthesia supplies which were manufactured out of state;
3. a substantial portion of the fees charged by plaintiff was paid by out of state, third-party insurers and payers, including the federal government;
4. defendants treat a substantial number of patients who travel in interstate commerce;
5. the defendants purchase, administer, prescribe, and use drugs and supplies manufactured out of state;
6. defendants receive a substantial amount of revenues from third-party, [**16] out of state insurers and payers, including the federal government;
7. the defendant hospital has a direct link with interstate commerce by virtue of its contractual training programs for the medical students of the University of Vermont Medical School and the undergraduates at the University of Vermont; and
8. the defendants' activities are allegedly designed to prevent plaintiff and others from competing with defendants in the delivery of anesthesia services at defendant hospital.⁹

⁸ "Nor is jurisdiction defeated in a case relying on anticompetitive effects by plaintiff's failure to qualify the adverse impact of defendant's conduct. See *Zenith Radio Corp. v. Hazeltine Research, Inc.*, 395 U.S. 100, 123-25, 23 L. Ed. 2d 129, 89 S. Ct. 1562 (1969); *Bigelow v. RKO Radio Pictures, Inc.*, 327 U.S. 251, 265-266, 90 L. Ed. 652, 66 S. Ct. 574 (1946)." *McClain v. Real Estate Bd. of New Orleans, supra*, 444 U.S. at 243.

This Court agrees with plaintiff that these allegations do fall within the "effect on commerce" test. See *Hyde v. Jefferson Parish Hospital District No. 2, 686 F.2d 286 (5th Cir. 1982)*; *Crane v. Intermountain Health Care, supra*; *Everhart v. Jane C. Stormont Hospital*, 1982-1 Trade Cases P 64,703 (D. Kan. 1982); *Malini v. Singleton & Associates, 516 F. Supp. 440 (S.D. Tex. 1981)*; *Williams v. Kleaveland, 534 F. Supp. 912 (W. D. Mich. 1981)*; *Robinson v. Magovern, 521 F. Supp. 842 (W. D. Pa. 1981)*; *Santos v. Columbus-Cuneo-Cabrini Medical Center*, 1982-1 Trade Cases P 64,498 (N.D. Ill. 1981), remanded on other grounds, *684 F.2d 1346 (7th Cir. 1982)*; *Stone v. William* [**17] *Beaumont Hospital*, 79-74212 (E. D. Mich. 1981).¹⁰

[**18] In the present case, defendants have moved for summary judgment in part, claiming that the plaintiff has failed, as a matter of law, to establish the jurisdictional elements of a Sherman Act claim. Defendants rely heavily on a recent case from the Eastern District of Pennsylvania, *Cardio-Medical Associates, Ltd. v. Crozer-Chester Medical Center, 536 F. Supp. 1065 (E.D. Pa. 1982)*. It is contended that *Cardio-Medical* is authority for the following two propositions: (1) in analyzing the nexus between defendants' challenged activities in interstate commerce, the courts must look only to the plaintiff's interstate commerce activities; and (2) the treatment of patients who travel in interstate commerce, the purchase of supplies from out of state sources and the receipt of revenues from out of state third-party insurers, do not satisfy the interstate commerce requirement of *antitrust law*. Neither proposition, this Court believes, is an accurate statement of the current state of the law in this area.

As to the first proposition, the court based its holding solely on *Nara v. American Dental Association, 526 F. Supp. 452 (W. D. Mich. 1981)*. In *Nara*, a dentist's membership [**19] in defendant's national organization was suspended as a result of plaintiff's [*711] violation of the Michigan Dental Code. Plaintiff alleged that this action by the American Dental Association violated the antitrust laws under the Sherman Act, and attempted to establish the jurisdictional element by claiming that the defendant organization was involved in interstate commerce. The *Nara* court rejected this approach.

However, *Nara* is factually distinguishable from the above cited denial of privileges and access cases which, as stated, held that *both* the plaintiffs' and defendants' interstate activities are to be analyzed in meeting the "effect on commerce" jurisdiction test. In *Nara*, the defendant was a national organization that did not provide dental services nor compete with individual practitioners. Moreover, the suspension of one member of the Association for misconduct did not effect competition within the dental profession. As noted earlier, *HN3*[↑] the underpinning of the denial of privileges and access cases is the fact that the defendants' challenged activities have the effect of eliminating competition which in turn affects interstate commerce activities of [**20] treating patients who travel in interstate commerce, purchases of out of state supplies, and receipt of revenue from out of state third-party insurers. This aspect of those denial cases is missing in *Nara*. Thus, viewed in light of the anticompetitive aspect of the denial cases, there does not exist in *Nara* a logical nexus between the defendant's challenged activities and interstate commerce. In other words, the *Nara* court, out of necessity, had to analyze the jurisdictional issue based solely on plaintiff's interstate commerce activities. Therefore, the *Cardio-Medical* court incorrectly relied on the

⁹ See Complaint, para. 28; Defendants' Admissions.

¹⁰ The above cases all involve physicians being denied staff privileges or access to defendant hospital's facilities as a result of alleged exclusive contractual arrangements among the named defendants. The underlying rationale of these cases is that defendants' activities *HN2*[↑] affect interstate commerce because they retard competition. This retardation affects interstate commerce in the following ways: first, by denying to physicians the opportunity to compete, prices will invariably stabilize at some fixed rate and this will affect the amount of payments made by out of state, third-party insurers. Allowing these plaintiff-physicians privileges and access will provide patients and third-party insurers the benefits of free and open competition. This in turn will affect the amount of payments made by out of state, third-party insurers. Second, the competition that will be generated by permitting physicians staff privileges and access will affect the volume of out of state patients treated and the volume of the out of state purchases of supplies. This point was specifically addressed in *Malini v. Singleton and Associates, supra*.

Nara case to support the proposition that a court must look only to plaintiff's interstate commerce activities to establish the nexus between the challenged activities and interstate commerce.¹¹

[**21] In addition, the second proposition enunciated in *Cardio-Medical*, first announced in [Spears Free Clinic and Hospital v. Cleere, 197 F.2d 125 \(10th Cir. 1952\)](#), that the treatment of patients who travel in interstate commerce, the purchase of supplies from out of state sources and the receipt of revenues from out of state third party insurers, do not satisfy the interstate commerce requirement of the Sherman Act, is equally without merit.¹² The Supreme Court, in [Hospital Bldg. Co. v. Rex Hospital Trustees, 425 U.S. 738, 48 L. Ed. 2d 338, 96 S. Ct. 1848 \(1976\)](#), rejected implicitly the idea that there cannot be a "substantial effect" on interstate commerce if coconspirators "succeed[ed] in blocking . . . petitioner's purchases of out-of-state medicines and supplies as well as its revenues from out-of-state insurance companies. . . ." [425 U.S. at 744. HN4](#)¹³ The "substantial effect" test, therefore, may be satisfied upon any showing that there existed an "unreasonable burden on the free and uninterrupted flow of interstate commerce." [Id. at 746.](#)

[**22] Moreover, the Third Circuit, which includes the *Cardio-Medical* Eastern District of Pennsylvania court, expressly rejected the *Spears* rationale in [Doctors, Inc. v. Blue Cross of Greater Philadelphia, 490 F.2d 48 \(3d Cir. 1973\)](#). "The [Spears] opinion even when it was written placed primary reliance on a series of cases that were no longer valid. . . . As a result, the reasoning [*712] of the opinion rested on flawed grounds when it was issued in 1952." [490 F.2d at 52.](#) The court further held, in contravention of the *Cardio-Medical* holding, that [HN5](#)¹⁴ the interstate commerce allegations of treating patients from out of state sources, of the trafficking in out of state goods, and of the receipt of revenues from out of state sources were sufficient to establish jurisdiction under the Sherman Act.¹⁵ [Id. at 53.](#)

[**23] Therefore, the *Cardio-Medical* jurisdictional holding appears to be contrary to the great weight of authority, and this Court declines to follow it. Consequently, the Court finds that plaintiff here has succinctly and sufficiently satisfied the Sherman Act's jurisdictional requirements.

Plaintiff's Per Se Arguments

Defendants argue that the rule of reason is the standard to be exclusively applied in this case. This Court disagrees.

Section 1 of the Sherman Act provides that [HN6](#)¹⁶ "every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several states . . . is declared to be illegal." [15 U.S.C. § 1.](#) A literal reading of this section would give rise to a finding of violation in every commercial contract that affects interstate commerce. [National Society of Professional Engineers, 435 U.S. 679, 687-88, 55 L. Ed. 2d 637, 98 S. Ct. 1355 \(1978\); Standard Oil Co. v. United States, 221 U.S. 1, 55 L. Ed. 619, 31 S. Ct. 502 \(1911\)](#). Consequently, the

¹¹ In addition, *Cardio-Medical* also relied upon [Hahn v. Oregon Physicians' Service, 508 F. Supp. 970 \(D. Or. 1981\)](#) to support this proposition. This Court notes that the Ninth Circuit recently overturned the district court's decision in *Hahn*. [Hahn v. Oregon Physicians' Service, 689 F.2d 840, 1982-2 Trade Cases P 64,970 \(9th Cir. October 5, 1982\)](#). Specifically, the Ninth Circuit held that the trial court erred when it determined the jurisdiction issue solely on the plaintiff's interstate commerce activities, since "jurisdiction may also be established directly by the defendants' activities." *Id.*

¹² The *Spears* rationale has been relied upon and followed in a number of cases. See [Wolf v. Jane Phillips Episcopal-Memorial Medical Center, 513 F.2d 684 \(10th Cir. 1975\); Riggall v. Washington County Medical Society, 249 F.2d 266 \(8th Cir. 1957\); Capili v. Shott, 487 F. Supp. 710 \(S.D.W. Va. 1978\), aff'd, 620 F.2d 438 \(4th Cir. 1980\); Nankin Hospital v. Michigan Hospital Service, 361 F. Supp. 1199 \(E. D. Mich. 1973\).](#)

¹³ Additionally, the Tenth Circuit has cast doubt on the validity of its holding in [Wolf v. Jane Phillips Episcopal-Memorial Center, supra.](#) "To the extent *Wolf* can be read as rejecting, as a matter of law, the possibility that an interstate flow of people seeking a purely local service can have a substantial effect on interstate commerce, it is no longer good law in light of *McLain*." [Crane v. Intermountain Health Care, Inc., supra, 637 F.2d at 726 n.4.](#)

Supreme Court has read the so-called "rule of reason" into the Sherman Act. *Arizona v. Maricopa County Medical Society*, 457 U.S. 332, 102 S. Ct. 2466, 73 L. Ed. 2d ^{**241} 48 (1982); *Standard Oil Co. v. United States*, *supra*.

HN7 [↑] Under the "rule of reason," only unreasonable restraints of trade are forbidden. A restraint of trade is deemed unreasonable where the anti-competitive effects outweigh the procompetitive effects of the challenged activity. *National Society of Professional Engineers*, *supra*, 435 U.S. at 688-92. Certain business combinations, however:

because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use. This principle of per se unreasonableness not only makes the type of restraints which are proscribed by the Sherman Act more certain to the benefit of everyone concerned, but it also avoids the necessity for an incredibly complicated and prolonged economic investigation into the entire history of the industry involved, as well as related industries, in an effort to determine at large whether a particular restraint has been unreasonable . . . Among the practices which the courts have heretofore deemed to be unlawful in and of themselves ^{**25} are price fixing . . . division of markets . . . group boycotts . . . and tying arrangements.

Northern Pacific Ry. Co. v. United States, 356 U.S. 1, 5, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958).

Despite the Supreme Court's strong endorsement of the use of the per se rule in cases involving the above-mentioned restraints of trade, some lower courts have been hesitant to apply this rule in cases where professionals in the health care field are involved. See *Everhart v. Jane C. Stormont Hospital*, *supra*; *Robinson v. Magovern*, *supra*. This argument has recently been rejected by the Supreme Court in *Arizona v. Maricopa County Medical Society*, *supra*.

In *Maricopa County*, the defendants, like the defendants in the instant case, argued that courts "should not apply the per ^{**713} se rule . . . because the judiciary has little antitrust experience in the health care industry." *73 L. Ed. 2d at 62*. However, the Court noted that "[this] argument quite obviously is inconsistent with *Socony-Vacuum*. In unequivocal terms, we stated that, 'whatever may be its peculiar problems and characteristics, **HN8** [↑] the Sherman Act, so far as price-fixing agreements are concerned, establishes ^{**26} one uniform rule applicable to all industries alike.'" *Id.*, citing *United States v. Socony-Vacuum Oil Co.*, 310 U.S. 150, 222, 84 L. Ed. 1129, 60 S. Ct. 811 (1940). The Court also rejected the argument that the per se rule must be rejustified for every industry that has not been subject to significant antitrust litigation. *73 L. Ed. 2d at 63*. Therefore, although *Maricopa County* involved only allegations of horizontal price-fixing, this Court agrees with plaintiff that other per se violations, including group boycotts and tying arrangements, apply equally to the health care profession. See *Hyde v. Jefferson Parish Hospital District No. 2*, *supra*. The Court, then, will deal with plaintiff's per se theories seriatim.

1. Illegal Tying Arrangement.

Plaintiff's first per se argument is that the agreement between defendants hospital and AAP constitutes an illegal tying arrangement. **HN9** [↑] A tying arrangement is "an agreement by a party to sell one product but only on the condition that the buyer also purchases a different (or tied) product. . . ." *Northern Pacific Ry. Co. v. United States*, 356 U.S. 1, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958). The Supreme Court has recognized ^{**27} that "the vice of tying arrangements lies in the use of economic power in one market to restrict the competition on the merits in another regardless of the source from which the power is derived and whether the power takes the form of a monopoly or not." *Id. at 11*.

However, not all tying arrangements are proscribed by the Sherman Act. A tying arrangement is a per se violation of the Act when it exhibits the following four characteristics:

1. two separate products, the tying product and the tied product;

561 F. Supp. 700, *713 LEXIS 1983 U.S. Dist. LEXIS 18953, **27

2. sufficient market power in the tying market to coerce purchase of the tied product;¹⁴
3. involvement of a not insubstantial amount of interstate commerce in the tied market; **[**28]** and
4. anticompetitive effects in the tied market.

Bob Maxfield, Inc. v. American Motors Corp., 637 F.2d 1033, 1037 (5th Cir. 1981).

Plaintiffs contend that a tying arrangement exists here because the users of the hospital's operating rooms (the tying product) are also compelled to purchase the hospital's chosen anesthesia service (the tied product). Thus, it is contended that we are dealing with two distinct services which a buyer should be able to purchase separately. In support of this per se tying arrangement argument, plaintiff cites *Hyde v. Jefferson Parish Hospital District No. 2, supra*.

In *Hyde*, a plaintiff anesthesiologist was denied staff privileges at a New Orleans hospital because that hospital had an exclusive contract with a professional medical corporation for the provision of anesthesia services. Plaintiff filed suit against the hospital, alleging that the exclusive contract between the hospital and the professional corporation constituted a per se illegal tying arrangement. The district court refused to apply the per se rules of antitrust in this situation and granted judgment to the defendant under the "rule of reason." *Hyde v. Jefferson Parish Hospital District No. 2, 513 F. Supp. 532 (E.D. La. 1981).*

The Court of Appeals for the Fifth Circuit reversed the district court and held that the per se rules of **antitrust law** apply in cases involving professionals in the **[*714]** health-care industry and that the exclusive contractual arrangement between the hospital and the professional corporation constituted a per se illegal tying arrangement. Moreover, the court specifically rejected the trial court's finding that plaintiff had failed to demonstrate that the hospital dominated the market for its services. *Hyde v. Jefferson Parish Hospital District No. 2, supra, 686 F.2d at 289.*

However, the starting point, the genesis, of the *Hyde* holding was that there existed an exclusive contract, a point that is hotly contested here. "This action was occasioned by the fact that the hospital had an exclusive contract with . . . a professional medical corporation, to provide anesthesia services." *Id. at 287.* Without the showing of an exclusive contract, which is at the core of this action and is obviously the gravamen of all of plaintiff's antitrust theories, the existence of a tying arrangement remains problematical. **[**30]** Therefore, summary judgment on this issue should be denied.¹⁵

¹⁴Indeed, the Second Circuit has stated that "actual coercion by the seller that in fact forces the buyer to purchase the tied product is an indispensable element of a tying violation." *Unijax, Inc. v. Champion Intern., Inc., 683 F.2d 678, 685 (2d Cir. 1982); Yentsch v. Texaco, Inc., 630 F.2d 46, 57 (2d Cir. 1980).*

¹⁵Even if plaintiff was to prove the existence of an exclusive contract, there exist many attendant problems with the tying arrangement theory, "market power" for one. Plaintiff is quite correct in contending that it **HN10** does not have to prove that the hospital totally dominated the market. All that plaintiff must show is that the hospital possessed "sufficient economic power to impose an appreciable restraint on free competition in the tied product. . . ." *Northern Pacific Ry. Co. v. United States, supra, 356 U.S. at 11.*

As a first step, in demonstrating "sufficient market power," plaintiff must demonstrate the relevant geographic market for the hospital's services. Then it must be shown that, within that geographic market, the seller (here hospital) "has the power . . . to raise prices or to require purchasers to accept burdensome terms that could not be exacted in a completely competitive market. In short, the question is whether the seller has some advantage not shared by his competitors in the market for the tying product." *United States Steel v. Fortner Enterprises, 429 U.S. 610, 620-21, 51 L. Ed. 2d 80, 97 S. Ct. 861 (1977); International Salt Co. v. United States, 332 U.S. 392, 92 L. Ed. 2d, 68 S. Ct. 12 (1947); IBM Corp. v. United States, 298 U.S. 131, 80 L. Ed. 1085, 56 S. Ct. 701 (1936).*

[**31] [**715] 2. The agreement between the defendants constitutes an illegal price fixing agreement.

Plaintiff contends that section 3(c) of the agreement, which provides that "fees charged by the parties of the second and third parts shall be no greater than those charged by other anesthesiologists for similar work situations in Upstate New York,"¹⁶ [**32] establishes unlawful maximum price fixing between defendants. Although this Court

There exist many problems and pitfalls in establishing the above two factors. First, there is a serious question whether the relevant market area can be sliced so small as to embrace a single hospital. The district court in *Hyde* held that the relevant geographic area included an area of at least twenty hospitals, and therefore concluded that if both patient and surgeon are free to go to any one of a large number of competent institutions, the hospital does not possess the power to force the tied product upon consumers. *Hyde v. Jefferson Parish Hospital District No. 2, supra, 513 F. Supp. at 540*. Other courts have accepted this reasoning. See *Santos v. Columbus-Cuneo-Cabriani Medical Center, 684 F.2d 1346 (7th Cir. 1982)*; *Harron v. United Hospital Center, Inc., 522 F.2d 1133 (4th Cir. 1975)* (per curiam), cert. denied, *424 U.S. 916, 47 L. Ed. 2d 321, 96 S. Ct. 1116 (1976)*.

However, the Fifth Circuit in *Hyde* took note of several market imperfections in the health care industry. [HN11](#) [↑] "First, the prevalence of third party payment of bills eliminates a patient's incentive to compare the relative cost effectiveness of competing hospitals. A second market imperfection is the lack of complete information regarding the quality of medical care offered." *Hyde v. Jefferson Parish Hospital District No. 2, supra, 686 F.2d at 290*. Therefore, the Court concluded, patients tend to choose hospitals by location rather than price or quality, which means that the geographic market area apparently may subsume only an individual hospital.

Plaintiff here alleges that the defendant hospital is the *only* major facility in a tri-county service area, and moreover, it is the only hospital facility in Clinton County, New York. Plaintiff further alleges that patients flock to the hospital due to its size, location, reputation, scope of services offered, and also due to the fact that it is the area's only referral hospital. (Konik Affidavit, Ex. 8-12). If plaintiff is able to prove these allegations at trial, it is unnecessary for this Court to enter the fray concerning whether the relevant market area may be limited to a single hospital since the allegations here distill down to one contention that there exists *no* relevant competition among hospitals in the area. However, even if plaintiff fails to prove the above, a relevant market area may still be demonstrated, this Court believes, by showing that patients tend to choose hospitals by location, rather than by price or quality.

As for the second prong [HN12](#) [↑] of demonstrating "sufficient market power," that is, that within the relevant market area it must be shown that the hospital is able to coerce its purchasers of services into accepting "burdensome terms [here exclusive contract] that could not be exacted in a completely competitive market," *United States Steel v. Fortner Enterprises, supra, 429 U.S. at 620-21*; plaintiff must show that patients are compelled to purchase the hospital's chosen anesthesia service in return for the use of the hospital's operating room and analogous services. In other words, there must be evidence proffered that patients requested Dr. Konik, or other anesthesiologists, and were refused. There must have existed, then, competition between anesthesiologists insofar as patients are concerned. See *United States v. American Society of Anesthesiologists, Inc., 473 F. Supp. 147, 160 (S.D. N.Y. 1979)*. If this cannot be shown, the factor of impermissible coercion is missing from the tying arrangement equation and, consequently, plaintiff cannot prevail on this theory. A demonstrated exclusive contract would then be lawful.

Finally, there are two additional problems here. First, it is conceded that [HN13](#) [↑] if defendant hospital affords proof of a legitimate articulated medical reason for the existence of the tying arrangement, and further demonstrates that there does not exist a less restrictive way to accomplish the end which justifies that medical reason, defendant hospital will be insulated from liability. See *Carpa, Inc. v. Ward Foods, Inc., 536 F.2d 39 (5th Cir. 1976)*; *Smith v. Northern Michigan Hospitals, Inc., 518 F. Supp. 644 (W.D. Mich. 1981)*. Here, defendant alleges that the tying arrangement provides for continuous coverage and medical competency. However, at least for purposes of this motion, these contentions appear to be refuted by Dr. Konik's assertion that all staff physicians must guarantee medical competency and needed round-the-clock services. (Konik Affidavit, Exs. 13, 14, 15, 16 and 46).

Second, this Court agrees with defendants that under the tying arrangement theory of liability, only the hospital may be liable. This is so since the AAP lacks sufficient market power in the tying product to have anticompetitive effects on the market, see, e.g., *Times Picayune Publishing Co. v. United States, 345 U.S. 594, 97 L. Ed. 1277, 73 S. Ct. 872 (1953)*; *IBM Corp. v. United States, supra*, and plaintiff has not pleaded a conspiracy to engage in a tying agreement between the hospital and the group. (Complaint, para. 42).

does not quarrel with plaintiff's assertion that maximum -- as well as minimum -- price fixing is a per se evil proscribed by the Sherman Act, see *Albrecht v. Herald Co.*, 390 U.S. 145, 19 L. Ed. 2d 998, 88 S. Ct. 869 (1968),¹⁷ it is not clear that the hospital did not stand in the position of a buyer of anesthesia services, and, as such, had a right to set the fees at which it would then distribute those services. See *Group Life & Health Ins. Co. v. Royal Drug Co.*, 440 U.S. 205, 59 L. Ed. 2d 261, 99 S. Ct. 1067 (1979). Moreover, the *sine qua non* of this, and plaintiff's other theories, that there exists an exclusive contract, has yet to be proven.

Instead, this Court believes that, with one exception,¹⁸ this matter should be properly treated, once the exclusivity of the contract has been demonstrated, as one involving a vertical combination. See *Broadcast Music, Inc. v. Columbia Broadcasting System, Inc.*, 441 U.S. 1, 60 L. Ed. 2d 1, 99 S. Ct. 1551 (1979). Such HN15[↑] a vertical combination should be analyzed under the rule of reason. *Tampa Electric Co. v. Nashville Coal Co.*, 365 U.S. 320, 5 L. Ed. 2d 580, 81 S. Ct. 623 (1961); *Twin City Sportservice, Inc. v. Charles O. Finley & Co.*, 676 F.2d 1291 (9th Cir. 1982). As the name suggests, the rule of reason requires the trier of fact to decide whether under all of the circumstances of the case, the restrictive [*716] [**33] practice imposes an unreasonable restraint on competition. *Arizona v. Maricopa County Medical Society, supra*; *Continental T.V., Inc. v. GTE Sylvania Inc.*, 433 U.S. 36, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977). "The true test of legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition." *National Society of Professional Engineers v. United States, supra*, 435 U.S. at 691 (quoting *Board of Trade v. United States*, 246 U.S. 231, 238, 62 L. Ed. 683, 38 S. Ct. 242 (1918)).

[**34] Here, in the context of a demonstrated exclusive dealing arrangement, the plaintiff may prevail only upon a showing that the agreement results in a substantial foreclosure of competition in an area of competition, that is, in a relevant market. *Tampa Electric Co. v. Nashville Coal Co., supra*, 365 U.S. at 327-28. Since these factors have not been amply demonstrated, summary judgment should be denied on the vertical combination contention. See *Oreck Corp. v. Whirlpool Corp.*, 579 F.2d 126 (2d Cir. 1978).

3. The fee schedule set by the members of AAP constitutes an illegal price-fixing arrangement.

In *Arizona v. Maricopa County Medical Society, supra*, the Supreme Court held that HN17[↑] a horizontal arrangement between physicians to establish the maximum fees they could claim in full payment for health services provided to policy holders of specified plans was a per se violation of the Sherman Act. In *Maricopa County*, seventh percent of the physicians in that county formed two non-profit foundations for the purpose of promoting fee-for-service medicine and to provide an alternative form of health insurance coverage. The physicians agreed to accept the fees set by the foundations [**35] as full payment for services provided patients insured under the foundations' plan. The foundations used relative values and conversion factors in compiling their fee schedule.¹⁹

¹⁶ See Appendix A, *infra*.

¹⁷ HN14[↑] "Maximum and minimum price fixing may have different consequences in many situations. But schemes to fix maximum prices, by substituting the perhaps erroneous judgment of a seller for the forces of the competitive market, may severely intrude upon the ability of buyers to compete and survive in that market." *Albrecht v. Herald Co., supra*, 390 U.S. at 152.

¹⁸ However, HN16[↑] plaintiff may prevail on a per se price fixing theory here if it can be shown that the agreement or combination was "formed for the purpose and with the effect of raising, depressing, fixing, pegging or stabilizing the price of a commodity (here anesthesiology services) in interstate or foreign commerce. . . ." (emphasis added) *Arizona v. Maricopa County Medical Society, supra*, 73 L. Ed. 2d at 60 (quoting *Kiefer-Stewart Co. v. Seagram & Sons*, 340 U.S. 211, 213, 95 L. Ed. 219, 71 S. Ct. 259 (1951)). This is a question of fact that remains to be proved, if possible, at trial.

¹⁹

Thus, for example, the conversion factors for "medicine" and "laboratory" were \$8.00 and \$5.50, respectively, in 1972, and \$10.00 and \$6.50 in 1974. The relative value schedule provides a numerical weight for each different medical service -- thus, an office consultation has a lesser value than a home visit. The relative value was multiplied by the conversion factor

In concluding [**36] that this scheme was a per se violation, the Court stated:

In this case the rule is violated by [HN18](#)[↑] a price restraint that tends to provide the same economic rewards to all practitioners regardless of their skill, their experience, their training, or their willingness to employ innovative and difficult procedures in individual cases. Such a restraint also may discourage entry into the market and may deter experimentation and new developments by individual entrepreneurs. It may be a masquerade for an agreement to fix uniform prices, or it may in the future take on that character.

73 L. Ed. 2d at 61.

Here, plaintiff argues that defendant AAP has set a fee schedule similar to that of the foundations in the *Maricopa County* case, and, therefore, since there is no price competition among the individual members of the professional corporation, the fee schedule adopted by AAP constitutes an illegal price fixing arrangement, a per se violation of the Sherman Act.²⁰ Plaintiff, [*717] however, misses the point of the *Maricopa County* holding, which deals exclusively with a horizontal price fixing arrangement between hundreds of competing physicians. Here in contrast, [**37] we are dealing, concededly, with a professional corporation, a situation which is expressly exempted from the *Maricopa County* holding:

The foundations are not analogous to partnerships or other joint arrangements in which persons who would otherwise be competitors pool their capital and share the risks of loss as well as the opportunities for profit. In such joint ventures, the partnership is regarded as a single firm competing with other sellers in the market. The agreement under attack is an agreement among hundreds of competing doctors concerning the price at which each will offer his own services to a substantial number of consumers. It is true that some are surgeons, some anesthesiologists, and some psychiatrists, but the doctors do not sell a package of three kinds of services. If a clinic offered complete medical coverage for a flat fee, the cooperating doctors would have the type of partnership arrangement in which a price fixing agreement among the doctors would be perfectly proper. But the fee agreements disclosed by the record in this case are among independent competing entrepreneurs. They fit squarely into the horizontal price fixing mold.

73 L. Ed. 2d at 66, 67.

to determine the maximum fee. The fee schedule has been revised periodically. The foundation board of trustees would solicit advice from various medical societies about the need for change in either relative values or conversion factors in their respective specialties. The board would then formulate the new fee schedule and submit it to the vote of the entire membership.

Arizona v. Maricopa County Medical Society, supra, 73 L. Ed. 2d at 56.

²⁰ Plaintiff alleges that AAP:

establishes its price based upon units. Two (2) distinct units are used, the first set is based upon the complexity of the procedure used; these units are established by the American Society of Anesthesiologists. The second set is based upon time: 15 minutes equals one unit. The classes of units are added together then multiplied by a dollar value to determine the fee charged. The dollar value is set by the P. C. [AAP]. This value has periodically been raised. No member of the P.C. has charged anything but the fees set by this arrangement. Any price modification is subject to unanimous agreement of all members of the P.C., at a board meeting. The P.C. also sets a flat fee for O.B. services provided. Again, no member of the P.C. has charged less than [sic] the fee established.

In addition to the doctors at the P.C. following this fee schedule the *nurse anesthetists* [sic] employed at the P.C. employ the same schedule. There is no differential in the dollar value assigned to units associated with a doctor at the P.C. than those associated with a nurse anesthetists [sic]. The fees charged by each are identical. In addition, there is no competition with the P.C. for the provision of anesthesia services at the defendant, medical center.

(Memorandum of Law, p.18).

[**39] Since the situation at bar involves a small professional corporation, the functional equivalent of a partnership arrangement for antitrust purposes, plaintiff's motion for summary judgment is denied on this price fixing contention and, conversely, granted in favor of the defendants as a matter of law.

4. Denying plaintiff access to the hospital facilities because of her refusal to partake in an allegedly illegal and exclusive price fixing agreement constitutes an illegal boycott.

Plaintiff argues that defendants, by refusing Dr. Konik access to the hospital facilities due to her refusal to join an allegedly illegal and exclusive price fixing agreement, are per se liable under an illegal boycott theory. It must be noted that cases applying per se illegality to collective refusals to deal fall into three categories.

The first group, exemplified by [Eastern States Retail Lumber Dealers Assoc. v. United States, 234 U.S. 600, 58 L. Ed. 1490, 34 S. Ct. 951 \(1914\)](#), have involved horizontal combinations among traders at one level of distribution, whose purpose was to exclude direct competitors from the market. See also [Silver v. New York Stock Exchange, 373 U.S. 341, 10 L. Ed. 1**401 2d 389, 83 S. Ct. 1246 \(1963\)](#); [Press v. United States, 326 U.S. 1, 89 L. Ed. 2013, 65 S. Ct. 1416 \(1945\)](#). [Klor's, Inc. v. Broadway-Hale Stores, supra](#), illustrates a second category of group boycott cases, involving vertical combinations among traders at different marketing levels, designed to exclude from the market direct competitors of some members of the combination.²¹ See also [Radiant Burners, \[*718\] Inc. v. Peoples Gas Light & Coke Co., 364 U.S. 656, 5 L. Ed. 2d 358, 81 S. Ct. 365 \(1961\)](#). The third group of cases, unlike the first two categories, has concerned combinations designed to influence coercively the trade practices of boycott victims rather than to eliminate them as competitors. The leading case in this group is [Fashion Originators Guild of America v. Federal Trade Comm'n, 312 U.S. 457, 85 L. Ed. 949, 61 S. Ct. 703 \(1941\)](#), in which a group of designers refused to sell their "creations" to retailers who purchased and sold copies of the original designs. In holding this refusal to deal illegal per se, the Court stated that even though the object of the boycott was to prevent the retailers from dealing with manufacturers of the copies and thereby [**41] eliminate "style piracy," the coercion practiced indirectly on a rival method of competition precluded application of the rule of reason.²²

In all of these cases, the cornerstone of per se illegality has been the *purpose and effect* of the questioned arrangement:

HN19 where exclusionary or coercive [**42] conduct has been present, the arrangements have been viewed as 'naked restraints of trade', and have fallen victim to the *per se* rule. On the other hand, where these elements have been missing, the *per se* rule has not been applied to collective refusals to deal.

[E. A. McQuade Tours, Inc. v. Consolidated Air Tour Manual Committee, 467 F.2d 178, 187 \(5th Cir. 1972\)](#). Therefore, the resort to the *per se* rule is justified only when there exists the presence of exclusionary or coercive conduct which, when present, warrants the view that the arrangement is a "naked restraint of trade." Absent these factors, the rule of reason must be followed in determining the legality of the agreement. See [Oreck Corp. v. Whirlpool Corp., supra](#).²³

²¹ In *Klor's* a large appliance dealer, Broadway-Hale, used its purchasing power to induce defendants manufacturers and wholesalers to sell only at discriminatory prices to plaintiff, a competing appliance dealer. Since the effect of the agreement was to drive *Klor's* out of competition with Broadway-Hale, the Court found the tripartite agreement illegal *per se*, notwithstanding the fact that the manufacturers and wholesalers, not in competition with *Klor's*, probably had no anti-competitive motive.

²² See also [Kiefer-Stewart Co. v. Joseph E. Seagram & Sons, Inc., 340 U.S. 211, 95 L. Ed. 219, 71 S. Ct. 259 \(1951\)](#) (liquor manufacturers' collective refusal to sell to price-cutting wholesalers).

²³ Defendants cite [Oreck Corp. v. Whirlpool Corp., supra](#), for justification that plaintiff's group boycott theory should be analyzed solely under the rule of reason standard since only a "vertical" restraint exists here. However, it is clear that defendants have misread *Oreck*.

Oreck involved a case where a dealer's [*Oreck Corporation*] exclusive distributorship was cancelled by a manufacturer [*Whirlpool*]. The Second Circuit in *Oreck* distinguished the Supreme Court's holding in [Klor's Inc. v. Broadway-Hale Stores, Inc.](#),

[**43] Plaintiff claims here to fall under both the second and third type of per se group boycott. Specifically, plaintiff alleges that the purpose of the "exclusive" agreement between defendants was to either "drive her out of business" or to coerce her into entering or ratifying an illegal price fixing agreement. (Konik Affidavit, *supra*). It is clear, then, that if proof of these allegations exists, defendants will be liable under the per se group boycott analysis. However, it is equally clear to this Court that plaintiff's summary judgment motion on the above contentions is premature. There exists numerous factual issues remaining to be resolved in the group boycott claim.

5. Defendants have violated the essential facilities doctrine by denying plaintiff access to the hospital facilities.

[*719] The plaintiff has advanced the theory that the defendants have violated the essential facility doctrine. This doctrine, recently defined by the Court of Appeals for the District of Columbia, establishes the rule that [HN20](#) [↑] "where facilities cannot be practically duplicated by would-be competitors, those in possession of them must allow them to be shared on fair terms. It is illegal [**44] restraint of trade to foreclose the scarce facility." [*Hecht v. Pro-Football, Inc., 187 U.S. App. D.C. 73, 570 F.2d 982, 992 \(D. C. Cir. 1977\)*](#) (quoting A. D. Neale, *The Antitrust Laws of the United States*, 67 (2d ed., 1970)).²⁴

[**45] The essential facility doctrine, also called the "bottleneck principle," derives from the Supreme Court's 1912 decision in [*United States v. Terminal R. R. Ass'n, 224 U.S. 383, 56 L. Ed. 810, 32 S. Ct. 507 \(1912\)*](#), and more recently was reaffirmed in [*Otter Tail Power Co. v. United States, 410 U.S. 366, 377-78, 35 L. Ed. 2d 359, 93 S. Ct. 1022 \(1973\)*](#). To be "essential," a facility need not be indispensable; it is sufficient if duplication of the facility would be economically unfeasible and if denial of its use inflicts a severe handicap on potential market entrants. See, e.g., [*Helix Milling Co. v. Terminal Flour Mills Co., 523 F.2d 1317, 1320 \(9th Cir. 1975\)*](#), cert. denied, 423 U.S. 1053, 46 L. Ed. 2d 642, 96 S. Ct. 782 (1976). However, the *Hecht* court warned, "this principle must be carefully delimited: the antitrust laws do not require that an essential facility be shared if such sharing would be impractical or would inhibit the defendant's ability to serve its customers adequately." [*570 F.2d at 992-93*](#).

Plaintiff claims that defendant hospital is an essential facility, since the hospital is the only major medical facility in the tri-county Plattsburgh area,²⁵ [*46] since it is operating continuously and providing major anesthesia services, since it is the area's only referral hospital and teaching institution, and since its reputation and the expertise of its staff are unequaled in the tri-county area. (Konik Affidavit). However, it is not clear, at this point, even assuming, *arguendo*, that defendant hospital is an "essential facility,"²⁶ that plaintiff has been unfairly denied use of the

supra, in that *Klor's* specifically exempted from per se liability a situation where a manufacturer and its dealer agreed to an exclusive distributorship. [*Klor's Inc. v. Broadway-Hale Stores, Inc., supra, 359 U.S. at 212*](#). Thus, "the present case, involving as it does an alleged agreement between a single manufacturer and a single dealer, is in essence, an exclusive distributorship controversy [and subject to rule of reason analysis], and the 'group boycott' doctrine is, therefore, not applicable." [*Oreck Corp. v. Whirlpool Corp., supra, 579 F.2d at 131*](#).

However, *Oreck* does not, as defendants contend, hold that all "vertical" restraint cases must be analyzed under the rule of reason standard. Such a view would nullify the *Klor's* and [*Fashion Originators Guild of America, supra*](#), holdings. Indeed, plaintiff's argument here is predicated, it seems, not on the cancellation of *her* agreement with the hospital (a theory that would place plaintiff under the *Oreck* case), but on a situation where it is alleged the defendants combined to exclude her from a market or to coerce her into ratifying the hospital-AAP "exclusive" contract (allegations that fall under *Klor's* and *Fashion Originators Guild*).

²⁴In *Hecht*, plaintiff attempted to acquire a professional football franchise in Washington, D.C., from the American Football League. To acquire a franchise, the plaintiff had to secure a stadium for the team. The only facility available was RFK Stadium. RFK Stadium was the home of the National Football League, Washington Redskins. The Redskins held a long-term lease at RFK Stadium. This lease contained a restrictive covenant which provided that no other football team could rent RFK Stadium during the lease term. The owners of RFK Stadium had tentatively arranged a lease with the plaintiffs for the use of RFK Stadium. However, the deal failed when the Redskins refused to waive their restrictive covenant. The Court in *Hecht* stated that although, "a restrictive covenant did not violate [Section 1](#) of the Sherman Act unless it is an unreasonable restraint of trade; when the restrictive covenant covers an essential facility, however, all possible competition is by definition excluded and the restraint is thus unreasonable per se." [*Hecht v. Pro-Football, Inc., supra, 570 F.2d at 993 n. 45*](#).

²⁵Clinton, Essex and Franklin Counties.

hospital facilities.²⁷ Indeed, it has not even been established that the contract between the defendants is an exclusive dealing agreement or that Dr. Konik was justified in not partaking in that agreement. Summary judgment on this issue also must be denied.

[47] Defendants' Further Summary Judgment Contentions**

Besides defendants' jurisdictional argument and their contention that there exist no facts which can support the presence of an exclusive dealing contract, illegal tying arrangement, group boycott and exclusive facility, all of which this Court believes are questions left to be resolved by the trier of facts, defendant hospital contends that its actions are exempt from Sherman Act liability under the *Colgate* doctrine. Under the doctrine, enunciated in [*720] [United States v. Colgate & Co., 250 U.S. 300, 63 L. Ed. 992, 39 S. Ct. 465 \(1919\)](#), [HN21](#)[ unilateral policy decisions, motivated by "market strategy" or "business necessity," which impose a reasonable vertical restraint, cannot give rise to antitrust liability.²⁸ See also [Michelman v. Clark-Schwebel Fiber Glass Corp., 534 F.2d 1036, 1042 \(2d Cir. 1976\)](#), cert. denied, 429 U.S. 885, 50 L. Ed. 2d 166, 97 S. Ct. 236 (1976); [Modern Home Inst. Inc. v. Hartford Acc. & Indemnity Co., 513 F.2d 102, 108-09 \(2d Cir. 1975\)](#).

[48]** Here, it is argued that the hospital is acting in a reasonable manner by requiring an agreement to provide regularity in the delivery of anesthesiology services. However, it is not apparent that the agreement is necessary to provide such services. (Konik Affidavit, para. 33). Moreover, since plaintiff's group boycott theory remains to be established at trial, it would be inappropriate to grant summary judgment on behalf of defendant hospital under the *Colgate* doctrine.²⁹

[49]** Finally, defendants assert that the agreement between the parties cannot possibly be exclusive since Dr. Konik has been asked many times to become a signatory of the agreement. Therefore, the argument goes, since plaintiff's [Section 1](#) claims are all predicated on the existence of an exclusive agreement, the non-existence of exclusivity warrants summary judgment.

While this Court agrees with defendants that plaintiff's [Section 1](#) claims are predicated upon the existence of an exclusive agreement, the very fact that plaintiff refused to join in the agreement does not necessitate an award of summary judgment. This is true for two reasons. First, defendants' offer to join plaintiff to the agreement is only some evidence of non-exclusivity. Plaintiff may still demonstrate that, as to others, this agreement remains closed and that an exclusive dealing contract exists. Second, plaintiff alleges that the contract itself is unlawful. To force plaintiff to agree to, and abide by, the allegedly unlawful contract in order to be able to attack that agreement under the Sherman Act would present Dr. Konik with the ironic situation of litigating the lack of competition while being a party [\[**50\]](#) to the restraint of trade, a position that this Court finds untenable.

IV

²⁶ Defendants contend that there exist many hospitals in the tri-county area that duplicate defendant hospital's services.

²⁷ Defendant hospital, moreover, may demonstrate that an exclusive agreement may serve to improve the delivery of anesthesiology services and, thus, be justified under *Hecht*.

²⁸ In [United States v. Colgate, supra](#), the Court held that a seller has complete freedom to select his own customers absent an attempt to enforce retail price maintenance.

²⁹ As the Court in [Cernuto, Inc. v. United Cabinet Corporation, 595 F.2d 164, 168](#), (3rd Cir. 1979), stated:

when a manufacturer acts on its own, in pursuing its own market strategy, it is seeking to compete with other manufacturers by imposing what may be defended as reasonable vertical restraint . . . However, if the action of a manufacturer or other supplier is taken at the direction of its customer, the restraint becomes primarily horizontal in nature in that one customer is seeking to suppress its competition by utilizing the power of a common supplier. Therefore, although the termination in such a situation is, itself, a vertical restraint, the desired impact is horizontal and on the dealer, not the manufacturer level.

561 F. Supp. 700, *720L 1983 U.S. Dist. LEXIS 18953, **50

In conclusion, since there are a number of material facts remaining to be resolved, plaintiff's motion for partial summary judgment is denied. *Adickes v. S.H. Kress & Co., 398 U.S. 144, 26 L. Ed. 2d 142, 90 S. Ct. 1598 (1970).* Defendants' motion for summary judgment is granted to the extent that plaintiff's horizontal price-fixing claim is dismissed in accordance with the above, and denied in all other respects.

This Memorandum-Decision and Order is intended to support and modify the Order signed on February 1, 1983 denying summary judgment in this action.

It is so Ordered.

Public Contracts Law > Bids & Formation > Mutual Obligation

Public Contracts Law > Contract Provisions > General Overview

Public Contracts Law > Contract Provisions > Changes Clauses

[HN12](#) Alterations & Modifications, Authorized Changes

The mere existence of the changes clause found in most Government military contracts does not permit a contractor to breach its preexisting contractual obligations to other private parties.

Business & Corporate Compliance > ... > Transportation Law > Air & Space Transportation > Antitrust

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Necessary Parties

HN14 [] **Air & Space Transportation, Antitrust**

The Government is not a necessary party to what is essentially a contract and antitrust action between private parties solely because the dispute arises in the regulated military aircraft industry. Absent a more particularized and compelling governmental interest, private disputes arising within this important commercial sector shall be governed by traditional [Fed. R. Civ. P. 19](#) principles.

Civil Procedure > ... > Defenses, Demurrs & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Dismissal > Involuntary Dismissals > Failure to State Claims

HN15 [] **Motions to Dismiss, Failure to State Claim**

In reviewing a dismissal for failure to state a claim, the court construes that material allegations in the complaint are true.

Civil Procedure > ... > Justiciability > Political Questions > General Overview

HN16 [] **Justiciability, Political Questions**

There are several considerations that help identify a non-justiciable political question: (1) a textually demonstrable constitutional commitment of the issue to a coordinate political department; (2) a lack of judicially discoverable and manageable standards; (3) the impossibility of deciding without an initial policy determination reserved for nonjudicial discretion; (4) the impossibility of deciding without expressing lack of respect for the coordinate branches of government; (5) unusual need for adherence to a political decision already made; and (6) the potentiality for embarrassment from multifarious pronouncements by various departments.

Civil Procedure > ... > Justiciability > Political Questions > General Overview

HN17 [] **Justiciability, Political Questions**

The mere fact that the challenged conduct occurs in a regulated industry does not alone alter its private commercial character.

International Law > Dispute Resolution > Act of State Doctrine

International Law > Dispute Resolution > General Overview

HN18 [] **Dispute Resolution, Act of State Doctrine**

Pursuant to the act of state doctrine, this nation's courts will not sit in judgment on the acts of another country. Even in private suits, American courts will not resolve issues requiring inquiries into the authenticity and motivation of the acts of foreign sovereigns.

International Law > Dispute Resolution > Act of State Doctrine

[**HN19**](#) [blue icon] **Dispute Resolution, Act of State Doctrine**

In determining whether the act of state doctrine compels dismissal of litigation, courts must carefully balance the relevant considerations. The justification for forbearance depends greatly on the importance of the issue's implications for United States foreign policy.

International Law > Dispute Resolution > Act of State Doctrine

[**HN20**](#) [blue icon] **Dispute Resolution, Act of State Doctrine**

Military procurement decisions by foreign sovereigns are acts of state.

Civil Procedure > ... > Summary Judgment > Opposing Materials > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

[**HN21**](#) [blue icon] **Summary Judgment, Opposing Materials**

Summary judgment is appropriate under [*Fed. R. Civ. P. 56\(c\)*](#) only where there is no genuine issue of material fact and the moving party is entitled to judgment as a matter of law. The showing of a genuine issue for trial is predicated upon the existence of a legal theory which remains viable under the asserted version of the facts, and which would entitle the party opposing the motion (assuming his version to be true) to a judgment as a matter of law. In reviewing the record to make this determination, the court must draw all inferences in the light most favorable to the party opposing the motion.

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > Judgments > Summary Judgment > General Overview

[**HN22**](#) [blue icon] **Antitrust & Trade Law, Sherman Act**

Although summary judgment is sometimes appropriate in antitrust litigation, it is generally disfavored, especially when motive or intent is at issue.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Horizontal Market Allocation

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

[**HN23**](#) [down] Antitrust & Trade Law, Sherman Act

The Sherman Act, [15 U.S.C.S. § 1 et seq. \(1979\)](#), bans all arrangements that are adopted to reduce competition, or which, regardless of purpose, have a significant tendency to reduce competition. Thus, arrangements that are adopted for and tend to achieve other purposes are not condemned by the Act merely because they carry some incidental and inconsequential restraining effect on competition. Although this determination is ordinarily made through a rule-of-reason analysis---a process calling for thorough investigation of the industry at issue and a balancing of the arrangement's positive and negative effects on competition---certain agreements or practices are so plainly anticompetitive and so lack any redeeming virtue that they are conclusively presumed illegal without the need for detailed rule-of-reason analysis. Horizontal market division is one of four main categories of competitive restraints, which the court holds to be unreasonable per se.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

[**HN24**](#) [down] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

It is only after considerable experience with certain business relationships that courts classify them as per se antitrust violations.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

[**HN25**](#) [down] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

A new per se rule is not justified until the judiciary obtains considerable rule of reason experience with the particular type of restraint challenged.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

[**HN26**](#) [down] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

The critical inquiry in determining whether per se condemnation shall be extended to a previously unexamined business practice is whether the practice facially appears to be one that will always or almost always tend to restrict competition and decrease output, or instead one designed to increase economic efficiency and render markets more, rather than less, competitive. Departure from the rule-of-reason standard must be based upon demonstrable economic effect rather than upon formalistic line drawing.

Securities Law > ... > Self-Regulating Entities > National Securities Exchanges > General Overview

[**HN32**](#) [blue icon] **Antitrust & Trade Law, Regulated Industries**

Antitrust immunity is disfavored and can be justified only by a convincing showing of clear repugnancy between the antitrust laws and the regulatory system. Pervasive regulations of an industry alone is insufficient to confer blanket immunity on every action taken within the industry. Immunity is especially disfavored where the antitrust implications of a business decision are neither compelled nor explicitly approved by a governmental regulatory body. Immunity from the antitrust laws is justified only where necessary to ensure that the regulatory scheme works, and even then only to the minimum extent necessary.

Antitrust & Trade Law > Exemptions & Immunities > General Overview

[**HN33**](#) [blue icon] **Antitrust & Trade Law, Exemptions & Immunities**

Antitrust immunity is not conferred by the bare fact that defendants' activities might be controlled by an agency having broad powers over their conduct. There is no general presumption that Congress intends the antitrust laws to be displaced whenever it gives an agency regulatory authority over an industry. The area of immunity from antitrust laws is not coterminous with areas of agency jurisdiction or agency expertise.

Antitrust & Trade Law > Exemptions & Immunities > General Overview

[**HN34**](#) [blue icon] **Antitrust & Trade Law, Exemptions & Immunities**

A regulatory mandate sufficient to confer implied antitrust immunity may in some cases exist where there is explicit congressional approval of the challenged conduct and its ultimate anticompetitive effect, and there is no inconsistency or plain repugnancy between the conduct and the express policies of the regulating body.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN40 [Actual Monopolization, Anticompetitive & Predatory Practices]

Although specific intent may be demonstrated by direct evidence of unlawful design, if corroborated, intent is, for practical reasons, more commonly proven through circumstantial evidence such as by inference from predatory conduct and market power.

Judges: Poole and Boochever, Circuit Judges, and Solomon, * Senior District Judge.

Opinion by: BOOCHEVER

Opinion

[*1035] BOOCHEVER, Circuit Judge

This appeal and cross-appeal present complex issues concerning the extent to which private parties may obtain redress for alleged issues concerning the extent to which private parties may obtain redress for alleged injuries occurring in the heavily regulated military aircraft industry. The principal issues are whether: (1) suit against the Government pursuant to [22 U.S.C. § 2356](#) (disclosure of proprietary data) is the exclusive remedy; (2) the Government is a necessary party; (3) the claims present non-justiciable political or foreign policy questions; [*1036] (4) certain agreements between the parties are per se illegal restraints of trade; and (5) the Government so pervades the relevant market that no trade or commerce exists for Sherman [**2] Act purposes.

The case arises out of a series of "teaming" agreements that Northrop and McDonnell Douglas ("McDonnell") entered into at the Government's request to develop military aircraft. The agreements allegedly limited Northrop to marketing those aircraft developed through the teaming effort that were suitable for land-based operation and McDonnell to marketing those suitable for aircraft-carrier operation. Despite its extensive involvement in the military aircraft industry, the Government is not a formal party to either the agreements or this action.

The trouble giving rise to Northrop's complaint and McDonnell's counterclaim began when McDonnell was awarded a large Navy contract, Northrop lost the competition for a similar Air Force contract, and McDonnell subsequently began marketing land-based aircraft to foreign countries. Northrop contends that McDonnell's marketing of land-based aircraft violated the agreements. It filed suit claiming, inter alia, fraud, breach of contract, economic coercion, refusal to deal, unfair competition, and industrial espionage. McDonnell subsequently filed a counterclaim seeking, inter alia, a declaration of rights under the agreements [**3] and damages for Northrop's allegedly illegal conduct and breaches of the agreements.

After some preliminary procedural maneuvering, the district court dismissed Northrop's first amended complaint in its entirety and, alternatively, granted McDonnell summary judgment as to five of the eight counts in the complaint. [*Northrop Corp. v. McDonnell Douglas Corp., 498 F. Supp. 1112 \(C.D.Cal.1980\)*](#). The district court also dismissed

* Honorable Gus J. Solomon, Senior United States District Judge for the District of Oregon, sitting by designation.

McDonnell's counterclaim and, alternatively, granted Northrop summary judgment on the ground that the counterclaim was the "mirror image" of Northrop's complaint.

We conclude that dismissal and summary judgment were inappropriate as to Northrop's complaint and McDonnell's counterclaim. Accordingly, except for the denial of a motion to modify a finding of fact, which we affirm, the decision of the district court is reversed and the matter remanded for further proceedings.

I

Background

A. Facts

Between 1965 and 1972 Northrop devoted substantial resources toward developing a lightweight, moderately priced, multi-mission jet fighter. This development effort produced an aircraft design Northrop termed the P-530.

In 1972, the United States Air Force [**4] awarded Northrop a multi-million dollar contract to produce two prototype aircraft (designated the "YF-17") based generally on the P-530 design. The Air Force concurrently awarded a similar contract to General Dynamics Corporation to produce two prototypes based on an alternative design concept (designated the "YF-16"). Both contracts were awarded as part of the Air Force's Air Combat Fighter ("ACF") competition for prototype development of lightweight land-based fighters. In keeping with its usual procurement policy (see generally Armed Services Procurement Regulations ["ASPR"], 32 C.F.R. §§ 7-104.9, 9-201(d), and 9-202.2(b) (1981)), the Government obtained unlimited rights through the contracts in the technology incorporated in the YF-16 and YF-17 prototypes.

McDonnell did not compete for an ACF contract. Instead, McDonnell concentrated on improving its F-15 design, which was for a more specialized and expensive land-based fighter than the YF-16 and YF-17 designs.

In 1974, the United States Navy announced the Navy Air Combat Fighter ("NACF") competition to develop a lightweight fighter suitable for aircraft carriers. To cut costs, Congress directed the Navy to [*1037] [**5] make maximum use of the technology already developed and paid for in the Air Force's ACF program. The Navy was thereby forced to limit its NACF competition to proposals based on General Dynamics's YF-16 and Northrop's YF-17 technology. Because of the headstart possessed by General Dynamics and Northrop in this technology and the limited funds the Navy had available to compensate other companies for the expense of catching up, the NACF competition was effectively limited to General Dynamics and Northrop.

Although General Dynamics and Northrop were essentially the only NACF competitors, neither possessed significant experience in producing carrier-suitable aircraft. To overcome this shortcoming, the Defense Department and Navy urged them to "team"¹ with companies having greater Navy experience. McDonnell was one of three or four companies that possessed the requisite Navy experience. Although, as noted by the district court, the parties dispute who was the pursuer and who the pursued,² the outcome of the corporate courtship is clear. On October 2,

¹ In teaming arrangements, often used in large military projects, two or more private contractors pool their financial and technological resources to work on a project they would be unable to handle alone. See [Experimental Engineering v. United Technologies Corp., 614 F.2d 1244, 1245 \(9th Cir. 1980\).](#)

² See [498 F. Supp. at 1115](#). The record supports the district court's view that Northrop and McDonnell "desperately needed each other if they -- jointly and severally -- were to succeed in tapping the great potential of the opportunity presented by the Navy's need for a new aircraft. . . ." Id. For instance, a McDonnell executive noted in an internal memorandum that a teaming agreement:

was the only crap game in town, so we had to play it. . . . The Navy wasn't going to let us propose our own airplane and win with it, so we had to go this way.

Similarly, although both parties make extravagant claims about their respective contributions to the eventual teaming effort, it seems clear that neither party would have gotten far without the other.

1974, Northrop and McDonnell executed a "Teaming Agreement" to develop and propose variants of the YF-17 to the Air Force and Navy. [**6]

[**7] The Teaming Agreement was the first of three major written agreements between the parties. The parties agreed that Northrop would concentrate on the Air Force's ACF competition while McDonnell concentrated on the Navy's NACF competition. The proposal submitted to the Air Force listed Northrop as prime contractor and McDonnell as associate contractor; the roles were reversed in the proposal submitted to the Navy. The Agreement was intended "to be the basis for later agreements to be definitized."

On January 14, 1975, Northrop's YF-17 lost the ACF competition to General Dynamic's YF-16. On May 2, 1975, the Navy announced that McDonnell's proposed fighter had won the NACF competition, designating the winning design the "F-18". Approximately two months later, the parties entered into a "Basic Agreement" drawn along the same lines as the prior Teaming Agreement.³ The Basic Agreement has five key provisions:

1. In the "Definition" clause, the F-18 is defined as "a carrier-based derivative of [Northrop's] YR-17 aircraft. . . ."
2. In the "Objective" clause, the parties expressed their commitment to:

work together (without in any manner intending to create a joint venture [**8] or otherwise incur or imply joint or several liability) for the purpose of obtaining and performing contracts for the development and production of derivatives of [Northrop's] YF-17 aircraft that are responsive to the requirements of the U.S. Navy and foreign customers.

3. In the "Contract Responsibilities" clause that is at the heart of this dispute, the parties agreed:

3.(a) . . . that [McDonnell] will be prime contractor in connection with [*1038] contracts with the U.S. Navy for the development of the F-18 and for the production of those F-18 aircraft purchased by the U.S. Navy for its own use. Furthermore, in the event a foreign customer desires to procure from [McDonnell] . . . F-18 aircraft of basically the same configuration . . . [McDonnell] will be prime contractor. . . .

(b) [Northrop] may elect to be prime contractor on any or all contracts for the development and production of aircraft derived from the [Northrop] YF-17 other than those referred to in paragraph (a) above.

(emphasis added). The parties dispute whether the underscored phrase "of basically the same configuration" limits McDonnell to providing only carrier-suitable derivatives [**9] of the F-18.

4. The "Data Exchange" clause mutually obligates the parties to exchange available information on the F-18 and YF-17 technology. Pursuant to this clause, the exchanged technology "may be used by the receiving party only in furtherance of the contracts referred to in paragraph 3. . . ." ⁴

5. The "Division of Effort" clause provides that, absent a contrary Navy directive, all F-18 production was to be performed according to the distribution of labor specified by the parties in the agreement (see the "Workshare" discussion, *infra*, at § III).

The Government subsequently awarded McDonnell a prime [**10] contract for over \$1.06 billion to make the F-18 operational. McDonnell, in turn, awarded Northrop the principal subcontract for the project. Under the prime contract, the Government paid McDonnell for interim design activities not covered by prior contracts. This payment was "flowed down" to the subcontract, reimbursing Northrop for its previously unfunded interim design work. Both the prime contract and subcontract granted the Government unlimited rights in F-18 technology and incorporated by

³Both the Teaming and Basic Agreements were drafted in apparent accordance with ASPR 32 C.F.R. § 4-117 (1981) (authorizing "contractor team arrangements"). The Government was not a party to either agreement.

⁴The parties sharply dispute whether this clause reflects a "license" of technology, or is merely a new teaming arrangement consistent with ASPR 32 C.F.R. § 4-117 (1981).

reference an addendum (No. 438 to MIL-D-8706) that authorized the use and submission of any YF-17 technology found applicable to the F-18.

In late 1975 and early 1976, Iran commenced negotiations with Northrop to become the first customer of a YF-17 derivative land-based fighter. Northrop's land-based derivative was designated the F-18L; McDonnell's Navy design had become known by this time as the F-18A. Concerned that Northrop's sales of F-18L fighters to Iran might undermine its F-18A program, the Navy persuaded the parties to enter a new agreement on August 26, 1976.

The August 26, 1976 Agreement essentially reaffirms the Basic Agreement, but contains a more explicit provision [**11] regarding the type of fighter Northrop could develop and market. The August 26th Agreement provided that Northrop "has elected to design, develop and produce for sale to the United States and to foreign governments all aircraft designed only for land-based operations which are derived from the YF-17."⁵ Northrop's agreement to limit its F-18L production to land-based aircraft assured the Navy that Northrop's efforts would not interfere with McDonnell's completion of the carrier-suitable F-18A. The August Agreement also satisfied the Navy's demand that the parties agree upon a Foreign Military Sales Master Plan pursuant to Defense Department Directive 5105.38M.

B. Procedural Posture

Northrop initiated the present action on October 26, 1979. In its first amended complaint, Northrop alleged that McDonnell has waged a deliberate campaign to monopolize the market for YF-17 derivative [**12] aircraft by crippling Northrop as a viable competitor. Although Northrop attacked on a broad front, its numerous allegations [**1039] generally related to one of four main theories of wrongful conduct on the part of McDonnell.⁶ First, McDonnell allegedly delayed production of all F-18 derivatives, including Northrop's F-18L, in order to promote sales of its own land-based F-15 in the interim. Second, McDonnell allegedly attempted to restrict Northrop's F-18L to a specialized class of limited-use fighters known as "day fighters" so that McDonnell's F-15 and F-18A fighters would be more attractive to customers desiring multi-mission aircraft. Third, McDonnell allegedly breached its obligations under the Basic Agreement to exchange F-18 technology and to subcontract the specified share of work to Northrop on F-18A aircraft sold in foreign countries. Finally, McDonnell allegedly breached paragraph 3 of the Basic Agreement by representing to foreign customers, particularly Israel, that McDonnell could serve as prime contractor on any version of the F-18, including a land-based version. McDonnell subsequently filed its counterclaim.

[**13] II

Dismissal of Northrop's Claims

⁵ The August 26th Agreement expressly provided that McDonnell's rights under the Basic Agreement were left unchanged.

⁶ The relief sought by Northrop in the first amended complaint may be summarized as follows:

Count One -- injunctive relief to prevent McDonnell from misappropriating Northrop's property by breaching the Agreements.

Count Two -- injunctive relief to prevent McDonnell from misappropriating Northrop's property by exceeding the "license" of technology granted under the Agreements.

Count Three -- a declaration of the parties' rights under the Agreements.

Count Four -- damages for fraud by McDonnell in the inducement to enter the Agreements.

Count Five -- an accounting for profits earned by McDonnell as a result of its breaches of the Agreements.

Count Six -- injunctive relief and damages for McDonnell's alleged attempt to monopolize the domestic and foreign markets for F-18's in violation of section 2 of the Sherman Act.

Count Seven -- injunctive relief and damages for McDonnell's acts of unfair competition.

Count Eight -- recovery in quantum meruit for contributions to the joint business relationship for which Northrop has not been compensated.

The district court dismissed Northrop's complaint for (A) lack of subject matter jurisdiction; (B) failure to join an indispensable party -- the United States; and (C) failure to state a claim because of non-justiciable political and foreign policy questions. Northrop challenges each of these determinations on direct appeal (No. 81-5165).^{6a}

[14] A. Subject Matter Jurisdiction: Exclusivity of [22 U.S.C. § 2356](#)**

The district court held that the "Government's clear agency in [Foreign Military] sales [FMS] and its, at least putative, agency relationship in the licensing of commercial sales permissible only in the best interest of United States foreign policy can only be clarified in an action brought pursuant to [22 U.S.C. § 2356](#)."⁷ [498 F. Supp. at 1119](#). **[*1040]** It then dismissed the entire complaint for lack of jurisdiction,⁸ because [§ 2356](#) makes suit against the United States the exclusive remedy. Northrop argues that its claims do not involve McDonnell's disclosures but rather, *inter alia*, fraud, breach of contract, and attempt to monopolize, none of which are within the statute. McDonnell characterizes misuse and misappropriation as the *sine qua non* of all of Northrop's claims, states that those are within the statute, and argues that it was the Government's agent in using the information.

[15] [Section 2356](#),** on its face, does not encompass Northrop's claims for fraud, breach of contract, attempt to monopolize, or anything else not pertaining to disclosure of proprietary information.⁹ Moreover, even if, *arguendo*, misuse and misappropriation were the *sine qua non* of such claims, McDonnell's alleged misuse and misappropriations are not covered by the statute because, as discussed below, it is not an agent of the Government.¹⁰

Because at least some **[**16]** of Northrop's claims can arguably be construed as challenging McDonnell's disclosure of proprietary data, it is appropriate to consider whether McDonnell is the Government's "agent" within

^{6a}We discern no merit in McDonnell's contention that Northrop has abandoned the claims in counts 4-8 of its complaint by not explicitly challenging the district court's rulings that Northrop could not show injury in fact and failed to allege an unlawful combination. The two rulings are found in the order drafted for the court by McDonnell, but are not mentioned in the court's findings or opinion. Our review of the findings and opinion demonstrate that, notwithstanding the inconsistent language in its order, the court considered itself precluded from examining the injury issue by the political question and act of state doctrines. The application of those doctrines has been challenged on appeal. Northrop's discussion in its Opening Brief of the evidence of an unlawful combination suffices to preserve the claim.

The conduct and relief at issue in counts 4-8 overlap and are inextricably intertwined with that in counts 1-3. We decline to seize upon the variance between the district court's order and its findings and opinion to effect an abandonment of claims, particularly given that the evidence relevant to the allegedly abandoned claims is so similar to that underlying the other claims that must be tried on remand in any event.

⁷ [22 U.S.C. § 2356 \(1976\)](#) **HN1** [↑] waives sovereign immunity for claims within its scope, and provides that:

(a) Whether, in connection with the furnishing of assistance under this chapter --

(1) * * *

(2) information, which is (A) protected by law, . . . , is disclosed by the United States Government or any of its officers, employees, or agents in violation of such restriction, the exclusive remedy of the owner . . . is to sue the United States Government for reasonable and entire compensation for such practice or disclosure in . . . district court . . . or in the Court of Claims. . . .

⁸ The court denied McDonnell's motion to dismiss with respect to [10 U.S.C. § 2273 \(1976\)](#) and [28 U.S.C. §§ 1346\(a\)\(2\)](#) and [1491 \(1980\)](#). [498 F. Supp. at 1119-20](#). McDonnell has not cross-appealed that denial.

⁹ **HN2** [↑] In reviewing a dismissal for lack of subject matter jurisdiction, we review the pleadings and evidence in the light most favorable to plaintiff. See [Western Waste Service Systems v. Universal Waste Control](#), [616 F.2d 1094, 1095](#) (9th Cir.), cert. denied, [449 U.S. 869, 101 S. Ct. 205, 66 L. Ed. 2d 88 \(1980\)](#).

¹⁰ To a certain extent, our discussion of why the Government is not a necessary party under [Rule 19](#) applies here. Northrop is not claiming that the Government has misused proprietary information or that it has directed McDonnell to do so.

the meaning of [§ 2356](#) in disclosing information to potential foreign buyers. In addressing this question it is important to note that there are principally two types of foreign sales -- FMS sales and commercial sales. Commercial sales are distinguishable from FMS sales in that:

Commercial sales are made directly between a private contractor and a foreign country; the sale does not go through the government-to-government channels which foreign military sales go through. Consequently, the FMS rules do not apply to commercial sales. Although not a party to the sale, the government plays a substantial role inasmuch as a contractor must obtain an export license before it can conclude a commercial sale.

Scherzer, Janik and Green, Foreign Military Sales: A Guide to the United States Bureaucracy, 13 Geo.Wash.J. of Int'l. & Econ. 545, 555 (1979).

Neither the district court nor the parties have offered any explicit guidance regarding the extent to which the disclosure claims, if any, pertain to [\[**17\]](#) FMS rather than commercial sales. We leave that question for resolution on remand. To the extent that any disclosure claims involve FMS sales, [§ 2356](#) is the exclusive remedy. Northrup does not challenge that position. To the extent, however, that any disclosure claims involve commercial sales, [§ 2356](#) is inapplicable.¹¹

[\[**18\] \[*1041\]](#) The Foreign Assistance Act defines "officer or employee", terms carried over from the Mutual Security Act of 1954, as "civilian personnel and members of the Armed Forces of the United States Government." Id., § 644 at 515. The legislative history of the Act states that the section is a "rewrite and simplification, without substantial change" of the previous version. S.Rep. No. 612, 87th Cong., 1st Sess. (1961), reprinted in [1961] U.S.Code Cong. & Ad.News 2472, 2501. It therefore does not appear that the addition of the term "agent" in 1961 broadened the scope of [§ 2356](#).

Neither the language nor the legislative history of [§ 2356](#) suggests that the section encompasses disclosure by Government contractors. Indeed, we are unable to find a single case in which a private contractor has been found to be an agent of the Government under [§ 2356](#). Even [HN3](#) under general agency principles, procurement contractors are ordinarily independent contractors unless the contract expressly makes them the Government's agents. See generally [United States v. Township of Muskegon](#), 355 U.S. 484, 486, 78 S. Ct. 483, 485, 2 L. Ed. 2d 436 (1958); [Deltec Corp. v. United States](#), 164 Ct. Cl. [\[**19\]](#) 432, 326 F.2d 1004, 1005 n. 1 & 1006-07 (Ct.Cl.1964).

¹¹ [Section 2356](#) was originally promulgated as § 517 of the Mutual Security Act of 1951, Pub.L. No. 165, 65 Stat. 373, 382. That section referred to the "disclosure of information by reason of acts of the United States or its officers or employees." Reprinted in [1951] U.S.Code Cong. & Ad.Serv. 517, 526. The available legislature history refers only to disclosure by the Government. See S.Rep. No. 703, 82d Cong., 1st Sess. (1951), reprinted in id. 2250 at 2298. The provision was carried over as § 506 of the Mutual Security Act of 1954, Pub.L. No. 665, 68 Stat. 832, 852. That section also referred only to Government disclosure. Cf. [Kaplan v. United States](#), 153 F. Supp. 787, 790, 139 Ct. Cl. 682, 114 U.S.P.Q. (BNA) 248 (1957) (dismissing a claim under the section because the product manufactured for the Government was not used "in connection with the furnishing of any assistance in furtherance of the purpose of this Act"; noting that the Government assumes liability under the section for certain disclosures by "United States Government officials").

The section was reenacted in its present form as Section 606 of the Foreign Assistance Act of 1961, Pub.L. No. 87-195, 75 Stat. 424, 440. The Foreign Assistance Act authorized the President to "furnish military assistance . . . to any friendly country . . . by - (a) acquiring from any source and providing . . . any defense article or defense service. . . ." Id. § 503; reprinted in [1961] U.S.Code Cong. & Ad.News 470, 482-83. Specifically, it permitted the President to "furnish defense articles from the stocks of the Department of Defense" or enter into procurement contracts. Id., § 507 at 484. It did not mention export licenses for commercial sales. Therefore, "the furnishing of assistance under this Act" in section 606 (now [§ 2356](#)) does not expressly include commercial sales such as McDonnell's.

McDonnell argues that [§ 2356](#) embodies the same policy as [28 U.S.C. § 1498 \(1976 & Supp. 1980\)](#):¹² "to insulate contractors from lawsuits disruptive of the procurement process." H.R. Rep. No. 872, 82d Cong., 1st Sess. 1420 (1951). It also relies on [Hughes Aircraft Co. v. United States, 209 Ct. Cl. 446, 534 F.2d 889, 192 U.S.P.Q. \(BNA\) 296](#), (Ct.Cl.1976), in arguing that [§ 2356](#) extended [§ 1498](#) to foreign sales. The language of the two section, however, is very different.¹³ Moreover, both the legislative history that McDonnell quotes and the Hughes court were discussing the language "by or for the United States" of [§ 1498](#). They did not address the disclosing parties encompassed within [§ 2356](#).

[**20] McDonnell argues that it is an agent of the Government because of [HN5](#)¹⁴ the International Traffic in Arms Regulations ("ITARS"), 22 C.F.R. §§ 121.01 et seq. (subchapter M) (1981). These regulations provide that a State Department license is required for export of equipment on the United States Munitions List; the license may be denied in furtherance of world peace, national security, or foreign policy; and that State Department approval is required before opening marketing talks with a prospective foreign buyer. 22 C.F.R. § 123.01, 123.05(a), and [123.16\(a\) \(1981\)](#). The regulations require that a proposed agreement regarding a license to manufacture abroad or the furnishing of technical assistance (the disclosure of technical data) relating to Munitions List items must be approved by the State Department; the agreement may be disapproved for the same reasons as above; and the sales pitch must be approved. 22 C.F.R. §§ 124.01, 124.05(a), and [124.12\(a\) \(1981\)](#).

When the Government permits disclosures abroad, it does not concern itself with the commercial ramifications of the arrangement. The regulations make this [*1042] explicit with respect to proposed manufacturing license [**21] and technical assistance agreements. For instance, [HN6](#)¹⁵ the regulations on proposed manufacturing license and technical assistance agreements require each agreement to state that:

No liability shall be incurred by or attributed to the U.S. Government in connection with any possible infringement of privately owned patent or proprietary rights . . . by reason of the U.S. Government's approval of this agreement.

[22 C.F.R. § 124.10\(h\) \(1981\)](#). They also require the cover letter to state that State Department approval will not be construed "as constituting either approval or disapproval of any of the business terms or conditions between the parties to the agreement." [22 C.F.R. § 124.11\(d\) \(1981\)](#). Finally, the regulations apply the same standards to the export of technical data. 22 C.F.R. §§ 125.03 n. 2, 125.03-05 (1981). See generally Sherzer, Janik and Green, *supra*, 13 Geo.Wash.J. of Int'l L. & Econ., at 581-90. Therefore, McDonnell's contention that the ITARS confer agency status on it also fails.¹⁴ Accordingly, McDonnell is not the Government's agent in making commercial sales for purposes of [§ 2356](#) so as to justify dismissal of Northrop's complaint on the ground that its [**22] exclusive remedy is against the Government.

B. Joinder of the Government

¹² [HN4](#)¹⁶ Suit against the Government under [§ 1498](#) is the exclusive remedy for unlawful use of a patented invention by the Government.

¹³ For instance, in contrast to the "officers, employees, or agents" language of [§ 2356](#), [§ 1498](#) provides that:

For the purposes of this section, the use or manufacture of an invention described in an covered by a patent of the United States by a contractor, a subcontractor, or any person, firm, or corporation for the Government and with the authorization or consent of the Government, shall be construed as use or manufacture for the United States.

[28 U.S.C. § 1498\(a\) \(1976\)](#) (emphasis added).

¹⁴ 32 C.F.R. § 7.104.9(7) (1981) provides that the Government may "have or permit others" to disclose information in which it has unlimited rights. "Permitting" McDonnell to disclose information by granting it an export license, however, does not make it an agent of the Government under [§ 2356](#).

1. **HN7** Joinder under [Fed.R.Civ.P. 19](#) entails a practical two-step inquiry.^{14a} First, a court must determine whether an absent party should be joined as a "necessary party" under subsection (a). Second, if the court concludes that the nonparty is necessary and cannot be joined for practical or jurisdictional reasons, it must then determine under subsection (b) whether in "equity and good conscience" the action should be dismissed because the nonparty is "indispensable." See generally [Provident Tradesmens Bank & Trust Co. v. Patterson, 390 U.S. 102, 108-25, 88 S. Ct. 733, 737-46, 19 L. Ed. 2d 936 \(1968\)](#); [Eldredge v. Carpenters](#) 46, 662 **[**23]** F.2d at 537.

[24]** The district court concluded that the Government was "both necessary and indispensable," [498 F. Supp. at 1119](#), because: Northrop's claims "called into question" the Government's unfettered right to "designate the who, what, when and where of weapons system production," [498 F. Supp. at 1117](#); injunctive relief would "necessarily limit the United States Government in its F-18 procurement activities," [id. at 1118](#); **[*1043]** and relief would impinge on the Government's conduct of foreign relations by limiting the source of land-based F-18's for foreign buyers.¹⁵ The court apparently concluded that the Government could not be joined because Congress has not authorized such suits against the Government.¹⁶ [Id.](#) **HN8** Our standard of review of the district court's decision is abuse of discretion. [Bakia v. County of Los Angeles, 687 F.2d 299 \(9th Cir. 1982\)](#) (per curiam), and [Walsh v. Centeio, 692 F.2d 1239 \(9th Cir. 1982\)](#). We hold that the court abused its discretion in holding that the government is a necessary party. Because, as discussed below, we conclude that the Government is not a necessary party to this action, we need not determine whether joinder is feasible, and, if not, whether **[**25]** the Government's presence would be indispensable.

^{14a} Due to the rigid, formalistic approach taken by some early courts, [Rule 19](#) was revised in 1966 to emphasize that the appropriate focus is on the practical ramifications of joinder versus nonjoinder. [Eldredge v. Carpenters](#) 46, 662 F.2d 534, 537 (9th Cir. 1981), cert. denied, [459 U.S. 917, 103 S. Ct. 231, 74 L. Ed. 2d 183 \(1982\)](#). The Rule now provides:

(a) Persons to be Joined if Feasible. A person who is subject to service of process and whose joinder will not deprive the court of jurisdiction over the subject matter of the action shall be joined as a party in the action if (1) in his absence complete relief cannot be accorded among those already parties, or (2) he claims an interest relating to the subject of the action and is so situated that the disposition of the action in his absence may (i) as a practical matter impair or impede his ability to protect that interest or (ii) leave any of the persons already parties subject to a substantial risk of incurring double, multiple, or otherwise inconsistent obligations by reason of his claimed interest. . . .

(b) Determination by court Whenever Joinder not Feasible.

If a person . . . cannot be made a party, the court shall determine whether in equity and good conscience the action should proceed among the parties before it, or should be dismissed, the absent person being thus regarded as indispensable. The factors to be considered by the Court include: first, to what extent a judgment rendered in the person's absence might be prejudicial to him or those already parties; second, the extent to which, by protective provisions in the judgment, by the shaping of relief, or other measures, the prejudice can be lessened or avoided; third, whether a judgment rendered in the person's absence will be adequate; fourth, whether the plaintiff will have an adequate remedy if the action is dismissed for nonjoinder.

¹⁵ Review of the district court's decision is complicated by its failure to articulate clearly the considerations underlying its conclusions as to each step in the [Rule 19](#) inquiry. For example, after reciting the factors in subsection (b)'s test for an indispensable party, the court observed that Northrop "disclaims the necessity of joinder," a consideration pertinent to subsection (a). [Id. at 1117-18.](#)

The confusion that frequently accompanies joinder rulings is attributable in part to the degree to which the factors cited in [Rule 19](#)'s two subsections overlap each other. Impairment of the absent party's ability to protect its interest (19(a)(2)(i)) is similar to the prejudice to the absent party consideration under subsection (b); risk of leaving a defendant exposed to inconsistent obligations (19(a)(2)(ii)) is similar to the prejudice to the defendant factor under (b); and whether complete relief can be accorded (19(a)(1)) is similar to the adequacy of relief inquiry under (b).

¹⁶ Although the district court's opinion does not discuss the feasibility of joining the Government, one of its conclusions of law provides that "no act of Congress would permit Northrop to bring this particular action against the United States" (emphasis added). Because the Government is not a necessarily party, we need not address Northrop's contention that the court should have joined the Government in a claim under [22 U.S.C. § 2356\(a\)\(2\)](#) (waiving sovereign immunity for disclosure of protected information) (see Section IIA, *infra*) rather than find it indispensable.

[**26] Subsection (a) of [Rule 19 HN9](#)[↑] defines two categories of parties that should be joined if feasible. If the Government fit within either category it would be a necessary party. [Eldredge, 662 F.2d at 537](#); [A.J. Kellogg Construction Co. v. Balboa Insurance Co., 495 F. Supp. 408, 414 \(S.D.Ga.1980\)](#), rev'd on other grounds, [661 F.2d 402 \(5th Cir. 1981\)](#). We conclude that it does not.

To fit within the first category, it must appear that "complete relief" cannot be accorded between Northrop and McDonnell absent the Government's joinder. [Rule 19\(a\)\(1\)](#). See generally 3A J. Moore & J. Lucas, *Moore's Federal Practice*, para. 19.07-1[1], at 19-128 (2d ed.1982). This factor is concerned with consummate rather than partial or hollow relief as to those already parties, and with precluding multiple lawsuits on the same cause of action. [Advisory Committee's Note, 39 F.R.D. 89, 91 \(1966\)](#). McDonnell does not directly contend that the Government's absence would preclude the district court from being able to fashion meaningful relief as between the parties, and we discern no reason for so concluding.

McDonnell's necessary party argument is founded upon two contentions: (1) the Government would allegedly [**27] lose a valuable source of supply if Northrop were granted any of the requests; and (2) any decree entered in Northrop's favor would allegedly expose McDonnell to conflicting obligations. McDonnell's two contentions track the alternative subparts (i) and (ii) of [Rule 19\(a\)\(2\)](#), concerning prejudice to the absent party or to those already parties. Subparts (i) and (ii) are contingent, however, upon an initial requirement that the absent party claim a legally protected interest relating to the subject matter of the action. Cf. [Central Council of Tlingit & Haida Indians v. Chugach Native Association, 502 F.2d 1323, 1326 \(9th Cir. 1974\)](#), cert. denied, [421 U.S. 948, 95 S. Ct. 1680, 44 L. Ed. 2d 102 \(1975\)](#) (Secretary of the Interior not a necessary party to a boundary dispute between Native American groups because he claimed no protectable interest).

The Government is not a party to any of the teaming agreements, and has never asserted a formal interest in either the [*1044] subject matter of this action or the action itself. On the contrary, the record reflects that the Government has meticulously observed a neutral and disinterested posture, and regards this as a private dispute. [**28] The Navy has declared its intent to respect the teaming relationship, and has consistently advised the parties to resolve their disagreements in accordance with law and their private agreements. McDonnell offers no cogent reason why we should second-guess the Government's assessment of its own interests.

[HN10](#)[↑] A nonparty to a commercial contract ordinarily is not a necessary part to an adjudication of rights under the contract. See, e.g., [Helzberg's Diamond Shops, Inc. v. Valley West Des Moines Shopping Center, Inc., 564 F.2d 816, 820 \(8th Cir. 1977\)](#); [Trans Pacific Corp. v. South Seas Enterprises, Ltc., 291 F.2d 435, 436-37 \(9th Cir. 1961\)](#); 7 C. Wright & A. Miller, *Federal Practice and Procedure: Civil* § 1613, at 135 (1972). This rule is not inapplicable merely because the absent party happens to be the Government. See, e.g., [Coastal Modular Corp. v. Laminators, Inc., 635 F.2d 1102, 1108 \(4th Cir. 1980\)](#); [Fidelity & Casualty Co. v. Reserve Insurance Co., 596 F.2d 914, 918 \(9th Cir. 1979\)](#); [R.C. Hedreen Co. v. Crow Tribal Housing Authority, 521 F. Supp. 599, 608 \(D.Mont. 1981\)](#). The correlative rule that [HN11](#)[↑] all parties who may be affected by a suit to set aside a contract must be present, [**29] see [Lomayaktewa v. Hathaway, 520 F.2d 1324, 1325 \(9th Cir. 1975\)](#), cert. denied, [425 U.S. 903, 96 S. Ct. 1492, 47 L. Ed. 2d 752 \(1976\)](#), is inapplicable here because Northrop is not seeking to set aside or enjoin performance under any contract between McDonnell and the Government.

McDonnell correctly points out that this case differs from the usual commercial dispute in that the absent party, the Government, is involved with the agreements at issue, even though it is not a party to them. The Government prompted the parties to enter the teaming agreements and, due to its extensive involvement in the military procurement arena, exerts a tremendous influence on them. Although we have previously adjudicated disputes between federal defense contractors where the Government was not a party, see [Experimental Engineering, Inc. v. United Technologies Corp., 614 F.2d 1244 \(9th Cir. 1980\)](#); [American Pipe & Steel Corp. v. Firestone Tire & Rubber Co., 292 F.2d 640 \(9th Cir. 1961\)](#), we have found no decision directly addressing the necessity of joining the

Government when such disputes are litigated.¹⁷ We are therefore reluctant to rely too heavily on the rules applicable to ordinary commercial [**30] contracts and will take a closer look at the nature of the Government's interest in this dispute.

McDonnell's contention that the Government's interest will be prejudiced -- the controlling inquiry under [Rule 19\(a\)\(2\)\(i\)](#) -- springs from the erroneous premise that Northrop is challenging the Government's rights in the data and technology surrounding the F-18 development effort and right to control weapons system production. First, neither Northrop's allegations regarding McDonnell's use of YF-17 derivative technology nor its requested relief would in any way challenge the Government's "unlimited rights"¹⁸ to use and dispense that data. The Government's rights in that data, although [**31] unlimited, were neither sole nor exclusive and did not divest Northrop of the residual right to continue to use the technology itself and to share it with other private parties. See [*Regents of University of Colorado v. K.D.I. Precision Products, Inc., 488 F.2d 261, 264 \(10th Cir. 1973\)*](#) (interpreting language [*1045] identical to that in 32 C.F.R. § 7-104.9(a) [see note 14, *supra*]).

Second, Northrop seeks no relief from the Government and no relief against McDonnell that would preclude McDonnell from complying with any Governmental directive or from producing a particular aircraft. As Northrop represented below:

If the Government . . . goes to McDonnell and says "we have unlimited rights in this data and taking those unlimited rights and [**32] giving them to you we want you to do this," the Government [is] free to do that. They can go to Grumman, they can go to LTV, they can go to Lockheed. They have unlimited rights. That is not anything we are contesting here.

It is undisputed that McDonnell may use the YF-17 derivative data in responding to a Government procurement request. Unlike other contractors, however, McDonnell would be liable to Northrop if, in electing to respond, it violated its antecedent promises to Northrop.

Focusing on [Rule 19\(a\)\(2\)\(ii\)](#), McDonnell argues that Northrop's construction of the agreements would deter McDonnell from responding to such a Government request by saddling it with inconsistent obligations, and, in so doing, would interfere with the Government's procurement prerogatives. To reach this conclusion, however, it would be necessary to make several assumptions that are unwarranted on this limited record and at this preliminary stage of the proceedings. We would have to hypothesize both that the Government will ask McDonnell to develop land-based F-18's and that, when presented with the opportunity to participate as prime contractor in such a procurement request, McDonnell would [**33] forego that opportunity because of its prior contractual agreements with Northrop. To conclude that such a hypothetical election by McDonnell would impair the Government's unlimited right to use F-18 technology, we would have to assume further that the Government has an enforceable expectation that a defense contractor like McDonnell will fill a procurement request.¹⁹ [**34] The Record is replete with evidence to the contrary. There are any number of commercial considerations, including existing contractual obligations, that routinely prompt defense contractors to decline to participate in a particular Government procurement offering. As Northrop cogently argues in its brief, a contractor's commercially based decision to forego

¹⁷ The most useful decision appears to be [*Coastal Modular Corp. v. Laminators, Inc., 635 F.2d at 1108*](#), where the Fourth Circuit held that the Navy was not a necessary party to a contract action between airport contractors merely because the defendant "theorize[d] the possibility that the Navy would institute suit against it."

¹⁸ "Unlimited Rights" are defined in 32 C.F.R. § 7-104.9(a)(7) (1981) as the "rights to use, duplicate or disclose technical data or computer software in whole or in part in any manner and for any purpose whatsoever, and to have or permit others to do so."

¹⁹ McDonnell cannot avoid this fallacy in its argument by suggesting that the Government might ask it to modify the carrier-suitable features of the F-18A under the "changes clause" of its prime contract with the Navy. First, no such change order has been issued. [HN12](#)[] Second, the mere existence of the changes clause found in most Government military contracts does not permit a contractor to breach its preexisting contractual obligations to other private parties. See [*Westinghouse Electric Corp. v. Garrett Corp., 437 F. Supp. 1301, 1338 n.53 \(D.Md. 1977\)*](#), aff'd, [*601 F.2d 155 \(4th Cir. 1979\)*](#).

a military contract does not impair the Government's unlimited rights in the desired product's technology or right to control military procurement activity.²⁰

[35] [*1046]** We conclude that the Government's hypothetical interest in having McDonnell serve as prime contractor for land-based F-18's does not mandate joinder under [Rule 19\(a\)](#).²¹ **HN13**[] Speculation about the occurrence of a future event ordinarily does not render all parties potentially affected by that future event necessary or indispensable parties under [Rule 19](#). See [Coastal Modular Corp., 635 F.2d at 1108](#); [Arthur v. Starrett City Associates, 89 F.R.D. 542, 547 \(E.D.N.Y. 1981\)](#); [Sierra Club v. Leslie Salt Co., 354 F. Supp. 1099, 1105 \(N.D.Cal. 1972\)](#). **HN14**[] The Government is not a necessary party to what is essentially a contract and antitrust action between private parties solely because the dispute arises in the regulated military aircraft industry. Cf. [Grumman Corp. v. LTV Corp., 665 F.2d 10 \(2d Cir. 1981\)](#) (resolving an antitrust and securities law dispute between private manufacturers of military aircraft with no suggestion that the Government's joinder was necessary). Absent a more particularized and compelling governmental interest, private disputes arising within this important commercial sector should be governed by traditional [Rule 19](#) principles. Finally, if Northrop eventually **[**36]** succeeds on any or all of its claims, a matter on which we express no opinion, we believe that adequate relief could be shaped that would neither impair a significant Government interest nor subject McDonnell to any greater inconsistent obligation than it freely assumed.

C. Failure to State a Claim

The district court held that the complaint failed to state a claim because the political question and act of state doctrines precluded judicial inquiry into the subject matter of this dispute. The act of state doctrine is essentially the foreign counterpart to the political question doctrine. Both doctrines require courts to defer to the executive or legislative branches of government when those branches are better equipped to handle a politically sensitive issue. [International \[*37\] Association of Machinists v. OPEC, 649 F.2d 1354, 1358 \(9th Cir. 1981\)](#), cert. denied, [454 U.S. 1163, 102 S. Ct. 1036, 71 L. Ed. 2d 319 \(1982\)](#). Neither doctrine is susceptible to inflexible definition, and both must be applied on a case-by-case basis by balancing a variety of factors. [Id. at 1358-59](#). With that in mind, we turn to the case at hand.²²

1. Political Question: The district court construed the complaint as asking the court to decide "WHO will be the exclusive builder (prime contractor) for the carrier-suitable or land-based versions of the F-18 weapons system" and to be, in effect, "the super-procurer and sales licensor of a military weapons system." [498 F. Supp. at 1120](#). It held that the case therefore presented a nonjusticiable political question under [Baker v. Carr, 369 U.S. 186, 82 S. Ct. 691, 7 L. Ed. 2d 663 \(1962\)](#). [Id.](#)

²⁰ Northrop points out that:

The impact on the government that would result from an award of declaratory or monetary relief to Northrop in this case is no different from that which would occur if [McDonnell], when presented with the opportunity for a federal contract, determined that it had insufficient capacity to perform any resulting contract unless it diverted facilities and personnel currently dedicated to the production of DC-9's and DC-10's for its commercial airline customers. In such an event, [McDonnell] would be required to balance the value of the added federal business against the liabilities it would incur by abandoning its prior contractual commitments to the airlines. And if [McDonnell] elected to pursue the later-presented federal opportunity, the airlines would be entitled to seek declaratory and/or monetary relief under their contract with [McDonnell]. Clearly, the United States would not be indispensable to such litigation. To so hold would -- contrary to all precedent -- pervert [Rule 19](#) by transforming it into a haven for sellers like [McDonnell] who, when they find it expedient or profitable, elect to disavow prior commitments by subsequently entering into contracts that are inconsistent with their previous contractual promises.

²¹ Any interest the Government may have in McDonnell's production efficiencies and sunk costs, if cognizable, is at most a disputed question of fact that was not addressed below and therefore does not justify dismissal at this juncture.

²² **HN15**[] In reviewing a dismissal for failure to state a claim, we construe that material allegations in the complaint as being true. [Benson v. Arizona State Board of Dental Examiners, 673 F.2d 272, 275 n.7 \(9th Cir. 1982\)](#).

Baker contains [HN16](#)²³ several considerations that help identify a political question: (1) a textually demonstrable constitutional [[**38](#)] commitment of the issue to a coordinate political department; (2) a lack of judicially discoverable and manageable standards; (3) the impossibility of deciding without an initial policy determination reserved for nonjudicial discretion; (4) the impossibility of deciding without expressing lack of respect for the coordinate branches of government; (5) unusual need for adherence to a political decision already made; and (6) the potentiality for embarrassment from multifarious pronouncements by various departments. 369 U.S. 217, 82 S. Ct. at 710. See also *Goldwater v. Carter*, 444 U.S. 996, 998, 100 S. Ct. 533, 534, 62 L. Ed. 2d 428 (1979) (Powell, J., concurring) (summarizing indicia of a political question). The district court did not identify which of the Baker factors suggests that Northrop's entire [[*1047](#)] action presents a political question. McDonnell invokes the last three Baker factors because the Government approved McDonnell's sale of F-18's to Canada, has authorized it to export F-18 technology to several other countries, and has allegedly asked it to make a presentation about the F-18 to the Air Force and a Defense Department committee.²³

[[**39](#)] We discern no support for characterizing Northrop's claims as political questions regardless of which factors are considered. Northrop does not challenge the wisdom or legality of any governmental act or decision. Instead, it seeks to restrain and recover damages from McDonnell for the latter's allegedly improper tactics in marketing F-18's. The challenged activity by McDonnell was neither authorized nor directed by any branch of Government. [HN17](#)²⁴ The mere fact that the challenged conduct occurred in a regulated industry does not alone alter its private commercial character. The issues presented for trial are not political questions -- they are legal issues, involving private commercial activity which the judiciary is uniquely equipped to resolve. Northrop's claims do not seek the kind of direct interjection of the judiciary into the Government's procurement activity that would transform this private suit into a political question. See [Gilligan v. Morgan](#), 413 U.S. 1, 93 S. Ct. 2440, 37 L. Ed. 2d 407 (1973) (court supervision of National Guard training constituted a political question); [Sarnoff v. Connally](#), 457 F.2d 809, 809-10 (9th Cir.), cert. denied, 409 U.S. 929, 93 S. Ct. 227, [[**40](#)] 34 L. Ed. 2d 186 (1972) (action challenging war-power provisions of the Foreign Assistance Act presented a political question); [Rappenecker v. United States](#), 509 F. Supp. 1024, 1028-30 (N.D.Cal. 1980) (claim that President was negligent in responding to seizure of American cargo vessel by Cambodian gunboats dismissed as political question).²⁴

2. Act of State: [HN18](#)²⁵ Pursuant to the act of state doctrine, this nation's courts will not "sit in judgment on the acts of" another country. [Underhill](#) [[**41](#)] *v. Hernandez*, 168 U.S. 250, 252, 18 S. Ct. 83, 84, 42 L. Ed. 456 (1897). Even in private suits, American courts will not resolve issues requiring "inquiries . . . into the authenticity and motivation of the acts of foreign sovereigns." [Occidental Petroleum Corp. v. Buttes Gas & Oil Co.](#), 331 F. Supp. 92, 110 (C.D.Cal. 1971), aff'd, 461 F.2d 1261 (9th Cir.), cert. denied, 409 U.S. 950, 93 S. Ct. 272, 34 L. Ed. 2d 221 (1972). The doctrine has no explicit fountainhead in our Constitution or statutes, and derives principally from the judiciary's desire not to interfere with the conduct of foreign policy by the political branches of government. [International Association of Machinists v. OPEC](#), 649 F.2d at 1359; [Timberlane Lumber Co. v. Bank of America, N.T. & S.A.](#), 549 F.2d 597, 605 (9th Cir. 1976). In [HN19](#)²⁶ determining whether the doctrine compels dismissal, courts must carefully "balance [the] relevant considerations." [Timberlane](#), 549 F.2d at 606, 607 (quoting [Banco Nacional de Cuba v. Sabbatino](#), 376 U.S. 398, 428, 84 S. Ct. 923, 940, 11 L. Ed. 2d 804 (1964)). The justification for forbearance depends greatly on the importance of the issue's implications for our foreign policy. Id.

McDonnell [[**42](#)] argued below that Northrop's claims would require the district court to review the procurement actions of foreign sovereigns in order to decide whether McDonnell's alleged conduct was causally connected to Northrop's lost foreign F-18 sales. The court stated that "if" McDonnell was correct in its assertion, the doctrine

²³ Although the record offers little evidence of a Government request for such a presentation, and Northrop vigorously disputes it, we assume it to be true for purposes of this issue.

²⁴ McDonnell's reliance on [Haig v. Agee](#), 453 U.S. 280, 101 S. Ct. 2766, 69 L. Ed. 2d 640 (1981) and [Rostker v. Goldberg](#), 453 U.S. 57, 101 S. Ct. 2646, 69 L. Ed. 2d 478 (1981) is misplaced. In contrast to Northrop, the plaintiffs in Agee and Rostker directly challenged the propriety of decisions made by the President and Congress. Agee challenged the validity of the President's revocation of his passport. Rostker involved an equal protection challenge to the validity of the males only provision of the Military Selective Service Act.

mandated dismissal. [498 F. Supp. at 1121.](#) [*1048] The court failed, however, to determine whether McDonnell was in fact correct and never identified a foreign act of state that would require review to adjudicate Northrop's claims.

Northrop concedes that [HN20](#) military procurement decisions by foreign sovereigns are acts of state. The issue here, however, is whether resolution of Northrop's claims would necessitate direct judicial inquiry into such decisions. We conclude that it would not.

Northrop's damage allegations pertain to McDonnell's private commercial conduct and are not inextricably bound up in any foreign act of state.²⁵ The claims relating to the increased costs associated with duplicating technology that McDonnell was allegedly contractually obligated to furnish Northrop will not require the court to inquire into any foreign procurement decisions because [***43] Northrop can establish the fact of damage without reference to lost sales by proof of increased costs. Northrop has alleged injury of a type and amount sufficient to avoid dismissal. See [Radiant Burners, Inc. v. Peoples Gas Light & Coke Co., 364 U.S. 656, 659-60, 81 S. Ct. 365, 367-68, 5 L. Ed. 2d 358 \(1961\)](#) (per curiam). Whether Northrop can eventually establish the amount of damages without implicating foreign procurement decisions, and whether that implication is permissible, are disputed questions which we need not address at this stage of the proceedings. See [Williams v. Curtiss-Wright Corp., 694 F.2d 300, 304 \(3d Cir. 1982\); Industrial Investment Development Corp. v. Mitsui & Co., 594 F.2d 48, 55](#) (5th Cir.), reh. denied, 599 F.2d 449 (1979), cert. denied, 445 U.S. 903, 100 S. Ct. 1078, 63 L. Ed. 2d 318 (1980). The same conclusion applies to Northrop's contract and tort claims for monetary relief.

[**44] We decline to construe the act of state doctrine to shield all violators of private agreements that involve some foreign governmental act. As noted by the Fifth Circuit in reaching this same conclusion:

Precluding all inquiry into the motivation behind or circumstances surrounding the sovereign act would uselessly thwart legitimate American goals where adjudication would result in no embarrassment to executive department action. [Plaintiff] must only question that government's motivation to the extent of measuring its damage. No ethical standard is set by which the propriety of its decision is tested. Surely the limited nature and effect of determining the proportional cause of plaintiffs' damage allocable to defendants' conduct does not trigger the type of special political considerations protected by the act of state doctrine.

Id.

McDonnell's contention that Northrop's claims for injunctive relief are barred is also unpersuasive. Even if Northrop's harm from future misconduct would be measured solely by lost sales, there is no reason to extend the act of state doctrine to future decisions by foreign governments. The court need only find a likelihood that McDonnell's [***45] actions will cost Northrop some amount of future sales. That finding would not create the foreign policy tensions that the act of state doctrine was designed to avoid.

A comparison of this case with OPEC and Timberlane, this court's most comprehensive forays into act of state analysis, confirms that the doctrine is inapplicable here. The doctrine compelled dismissal in OPEC because the plaintiff directly sued a cartel of sovereign nations, charging them with violating this country's antitrust laws, and sought to enjoin and recover damages from the nations. [649 F.2d at 1361](#). In Timberlane, we refused to invoke the doctrine even though the activity complained of (conspiracy to monopolize Honduran lumber export business) primarily involved foreign [*1049] citizens, took place in a foreign nation, and had the greatest impact on the foreign nation. We reasoned that the plaintiff did not seek to name any foreign nation or officer as a defendant and did not directly challenge the foreign nation's conduct in a way that would threaten relations with the country. [549 F.2d at 608](#). We emphasized that "there is no indication that the actions of the Honduran [government]

²⁵ Although "seemingly commercial activity" can trigger act of state concerns, see [OPEC, 649 F.2d at 1360](#) (alleged oil price-fixing by cartel of foreign nations), purely commercial activity ordinarily does not require judicial forbearance under the act of state doctrine. [Alfred Dunhill of London, Inc. v. Cuba, 425 U.S. 682, 698, 96 S. Ct. 1854, 1863, 48 L. Ed. 2d 301 \(1976\)](#).

reflected [**46] a sovereign decision that [plaintiff's commercial] efforts should be crippled or that trade with the United States should be restrained." Id.

Timberlane is clearly the more analogous decision. In contrast to the OPEC plaintiff, Northrop does not seek monetary or injunctive relief against any sovereign and does not ask the court to pass judgment on any foreign sovereign's act or policy. As noted in Timberlane, the act of state doctrine "does not bestow a blank-check immunity upon all conduct blessed with some imprimatur of a foreign government".²⁶ [549 F.2d at 606](#).

III

Workshare Claims

Northrop requested that McDonnell be [**47] enjoined from subcontracting to anyone else the share of work Northrop was entitled to under the teaming agreements and Navy subcontract. Neither the district court's opinion nor its Finding of Fact and Conclusions of Law address Northrop's workshare claims. The court's order stated that those claims "are moot and not ripe for determination in light of [McDonnell's] stipulation of November 28, 1979." That stipulation apparently involved the parties' respective share of the work generated by Canadian sales.

Northrop argues that the court erred in finding that the stipulation mooted its Canadian workshare claims and that, in any event, the workshare claims are not limited to Canada. McDonnell does not argue the mootness issue. It contends that the workshare claims were properly dismissed for absence of an indispensable party, lack of subject matter jurisdiction, and nonjusticiability, "regardless of whether [they] were moot."

Our disposition of the dismissal rulings relied on by McDonnell makes it necessary to address the mootness issue. On remand, the district court should make specific findings and conclusions regarding the scope of the stipulation and the extent to which [**48] Northrop's workshare claims are mooted by it. If, as Northrop contends, the stipulation was purely pendente lite or was limited to Canadian sales, wholesale dismissal for mootness was clearly inappropriate.

IV

Summary Judgment

The district court granted McDonnell summary judgment on the grounds that: (1) the contract-responsibility clause of the Basic Agreement, as amplified in the August 26, 1976 Agreement, was per se unreasonable under [section 1](#) of the Sherman Act; and (2) Northrop had failed to establish a prima facie case of attempt to monopolize under section 2 of the Sherman Act. We conclude that summary judgment was inappropriate on either ground.

Before turning to the specifics of the two issues, we note by way of overview that the summary judgment rulings reflect two basic inconsistencies. The first inconsistency pertains to the jurisdictional requirement of interstate commerce. The court held that no "trade or commerce" existed for section 2 purposes because the Government exercised absolute control over the relevant markets, yet, concomitantly, ruled that sufficient interstate commerce would be restrained by Northrop's interpretation of the contract-responsibility [**49] clause to justify [*1050] holding the practice per se unreasonable under [section 1](#). The second inconsistency stems from the court holding that there was nothing so unique about this practice or industry to warrant rule-of-reason analysis under [section 1](#), but that this case is so unlike those cases where section 2 sanctions have traditionally been applied that the section was inapplicable here.

A. Applicable Standard

²⁶ In a similar vein, the court noted that "mere governmental approval or foreign governmental involvement which the defendants had arranged does not provide a defense". Id. Accord, [Continental Ore Co. v. Union Carbide & Carbon Corp.](#), 370 U.S. 690, 82 S. Ct. 1404, 8 L. Ed. 2d 777 (1962); [United States v. Sisal Sales Corp.](#), 274 U.S. 268, 47 S. Ct. 592, 71 L. Ed. 1042 (1927).

HN21[] Summary judgment is appropriate under [Fed.R.Civ.P. 56\(c\)](#) only where there is no genuine issue of material fact and the moving party is entitled to judgment as a matter of law. [Bank of California, N.A. v. W.H. Opie, 663 F.2d 977, 979 \(9th Cir. 1981\)](#); [Sherman v. British Leyland Motors, Ltd., 601 F.2d 429, 438-39 \(9th Cir. 1979\)](#). This court has noted that "the showing of a genuine issue for trial is predicated upon the existence of a legal theory which remains viable under the asserted version of the facts, and which would entitle the party opposing the motion (assuming his version to be true) to a judgment as a matter of law." [Ron Tonkin Gran Turismo, Inc. v. Fiat Distributors, Inc., 637 F.2d 1376, 1381 \(9th Cir. 1981\)](#), cert. denied, 454 U.S. 831, 102 S. Ct. **[**50]** 128, 70 L. Ed. 2d 109 (1982). In reviewing the record to make this determination, the court must draw all inferences in the light most favorable to Northrop, the party opposing the motion. [Mutual Fund Investors, Inc. v. Putnam Management Co., 553 F.2d 620, 624 \(9th Cir. 1977\)](#). **HN22**[] Although summary judgment is sometimes appropriate in antitrust litigation, see, e.g., [Thomsen v. Western Electric Co., 680 F.2d 1263, 1265 \(9th Cir. 1982\)](#); [Ron Tonkin Gran Turismo, 637 F.2d at 1381](#); [Thi-Hawaii, Inc. v. First Commerce Financial Corp., 627 F.2d 991 \(9th Cir. 1980\)](#), it is generally disfavored, especially when motive or intent is at issue. See, e.g., [Poller v. Columbia Broadcasting System, Inc., 368 U.S. 464, 82 S. Ct. 486, 7 L. Ed. 2d 458 \(1962\)](#); [Betaseed, Inc. v. U. & I. Inc., 681 F.2d 1203, 1207 \(9th Cir. 1982\)](#); [A.H. Cox & Co. v. Star Machinery Co., 653 F.2d 1302, 1305 \(9th Cir. 1981\)](#); [California Steel & Tube v. Kaiser Steel Corp., 650 F.2d 1001, 1003 \(9th Cir. 1981\)](#).

B. Restraint of Trade

Northrop challenges the district court's ruling that the "contract-responsibility" clause (quoted [supra at 5-6](#)) at issue in counts 1-3, 6, and 7 of Northrop's complaint is per se unreasonable as a market-allocation **[**51]** restraint of trade under [section 1](#) of the Sherman Act. We conclude that the court erred in applying per se, rather than rule-of-reason, analysis in this novel context.

Generally speaking, **HN23**[] the Sherman Act bans all arrangements that are adopted to reduce competition, or which, regardless of purpose, have a significant tendency to reduce competition. Thus, arrangements that are adopted for and tend to achieve other purposes are not condemned by the Act merely because they carry some incidental and inconsequential restraining effect on competition. L. Sullivan, Antitrust, § 63 at 166 (1977).

Although this determination is ordinarily made through rule-of-reason analysis -- a process calling for thorough investigation of the industry at issue and a balancing of the arrangement's positive and negative effects on competition -- certain agreements or practices are so "plainly anticompetitive", [National Society of Professional Engineers v. United States, 435 U.S. 679, 692, 98 S. Ct. 1355, 1365, 55 L. Ed. 2d 637 \(1978\)](#); [Continental T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 50, 97 S. Ct. 2549, 2558, 53 L. Ed. 2d 568 \(1977\)](#), and so "lack [] any redeeming virtue," [Northern Pacific **\[**52\]** Railway v. United States, 356 U.S. 1, 5, 78 S. Ct. 514, 518, 2 L. Ed. 2d 545 \(1958\)](#), that they are conclusively presumed illegal without the need for detailed rule-of-reason analysis. Horizontal market division, the practice claimed to exist here, is one of four main categories of competitive restraints this court has held unreasonable per se. See [A.H. Cox & Co. v. Star Machinery, 653 F.2d at 1305](#); [Gough v. Rossmoor Corp., 585 F.2d 381, 386 \(9th Cir. 1978\)](#), cert. denied, 440 U.S. 936, 99 S. Ct. 1280, 59 L. Ed. 2d 494 (1979). Nevertheless, even within this class of restraints, there **[*1051]** are recognized circumstances where rule-of-reason analysis remains appropriate. See e.g., [Broadcast Music, Inc. v. Columbia Broadcasting System, 441 U.S. 1, 99 S. Ct. 1551, 60 L. Ed. 2d 1 \(1978\)](#) (blanket licensing arrangement between horizontal competitors not per se illegal); [Turf Paradise, Inc. v. Arizona Downs, 670 F.2d 813, 821-24](#) (9th Cir.) (as amended) (temporal market allocation provision of lease drafted by horizontal competitors not per se illegal), cert. denied, 456 U.S. 1011, 102 S. Ct. 2308, 73 L. Ed. 2d 1308 (1982).

Northrop argues that three such circumstances make rule-of-reason **[**53]** analysis appropriate here: (1) neither the exact type of teaming arrangement at issue in this case nor the military aircraft industry in general have been subjected to prior antitrust scrutiny; (2) the arrangement actually enhanced competition by introducing a new competitor, McDonnell, into a market from which it was otherwise foreclosed; and (3) the contract-responsibility clause is an essential aspect of, and reasonable limitation upon, the agreement to exchange technology. We agree that the case involves novel antitrust considerations, and reject McDonnell's contention that this is simply a run-of-

the-mill case of market allocation between horizontal competitors.²⁷ We shall discuss each of these factors supporting the rule of reason.

[**54] 1.Judicial experience with the challenged conduct: This factor strongly supports application of rule-of-reason analysis. As recognized in *United States v. Topco Associates*, 405 U.S. 596, 607-08, 92 S. Ct. 1126, 1133-34, 31 L. Ed. 2d 515 (1972), and recently reaffirmed in *Broadcast Music*, 441 U.S. at 9, 99 S. Ct. at 1557, "it is only after considerable experience with certain business relationship that courts classify them as per se violations. . . ." Neither the district court nor McDonnell point to a single instance in which the military aircraft industry in general or Government prompted contractor teaming agreements in particular have received judicial scrutiny in a Sherman Act context.

McDonnell reads Broadcast Music too narrowly. McDonnell argues that because the contract-responsibility clause can be viewed as a simple market-splitting device and because market-splitting devices have been held per se unreasonable in other contexts, per se treatment was appropriate here. According to McDonnell, a court need go no further than determining the general type of "practice" at issue in deciding whether to apply rule-of-reason analysis. This is precisely the type of "literalness" [**55] expressly condemned in Broadcast Music:

The Court of Appeals' literal approach does not alone establish that this particular practice is one of those types or that it is "plainly anticompetitive" and very likely without "redeeming virtue." Literalness is overly simplistic and often overbroad.

...

HN24 [↑] "it is only after considerable experience with certain business relationships that courts classify them as per se violations. . . ." See *White Motor Co. v. United States*, 372 U.S. 253, 263/83 S. Ct. 696, 702, 9 L. Ed. 2d 738] (1963). We have never examined a practice like this one before; indeed, the Court of Appeals recognized that "in dealing with performing rights in the music industry we confront conditions both in copyright law and in **antitrust law** which are sui generis. " 562 F.2d, at 132. And though there has been rather intensive antitrust scrutiny of ASCAP and its blanket licenses, that experience hardly counsels that we should outlaw the blanket license as a per se restraint of trade.

441 U.S. at 9-10, 99 S. Ct. at 1557.

In Maricopa County, the Court rejected the contention that it should not apply the usual per se rule against horizontal price [*1052] fixing [**56] because the judiciary had little antitrust experience with the health-care industry. The Court rejected the argument because "so far as price-fixing agreements are concerned, [the Sherman Act] establishes one uniform rule applicable to all industries alike." *457 U.S. at 349, 102*, S. Ct. at 2476, quoting *United States v. Socony-Vacuum Oil Co.*, 310 U.S. 150, 222, 60 S. Ct. 811, 843, 84 L. Ed. 1129 (1940). The Court was careful to point out, however, that its decision "should not be confused with the established position that **HN25** [↑] a new per se rule is not justified until the judiciary obtains considerable rule of reason experience with the particular type of restraint challenged." *457 U.S. at 349, 102 S. Ct. at 2476 n. 19* (emphasis in the original). We find no significant judicial rule-of-reason experience with either the particular practice or industry at issue here and therefore conclude that imposing a new per se rule would be premature.

2. Effect on competition: This is the most troubling and conceptually elusive of the three factors. Echoing the district court, McDonnell argues that the agreements destroy competition because they split the market into product categories -- limiting [**57] Northrop to selling land-based F-18L's and McDonnell to selling carrier-suitable F-

²⁷ In doing so, we note that the contract-responsibility clause at issue here differs significantly from the horizontal price-fixing arrangements the Supreme Court has uniformly subjected to per se condemnation. See, e.g., *Arizona v. Maricopa County Medical Society*, 457 U.S. 332, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982); *Catalano, Inc. v. Target Sales, Inc.*, 446 U.S. 643, 100 S. Ct. 1925, 64 L. Ed. 2d 580 (1980) (per curiam).

18A's. Although tenable, the argument is overly simplistic and is not an entirely accurate reading of either the agreements or the relief sought by Northrop.

[HN26] The critical inquiry in determining whether per se condemnation should be extended to a previously unexamined business practice is whether the "practice facially appears to be one that would always or almost always tend to restrict competition and decrease output, . . . or instead one designed to 'increase economic efficiency and render markets more, rather than less, competitive.'" *Broadcast Music, 441 U.S. at 19-20, 99 S. Ct. at 1562* (citations omitted). Accord, *Krehl v. Baskin-Robbins Ice Cream Co., 664 F.2d 1348, 1356 (9th Cir. 1982)*. In making this inquiry, we are mindful of the Court's admonition that "departure from the rule-of-reason standard must be based upon demonstrable economic effect rather than . . . upon formalistic line drawing." *Continental T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 58-59, 97 S. Ct. 2549, 2561-62, 53 L. Ed. 2d 568 (1977)*.

The agreements call for a joint effort by both "teammates" in the production and sale [**58] of all F-18's. The agreements allocate which party may act as prime contractor and which as principal subcontractor (depending on the type of F-18); they do not foreclose, at least in the traditional market-splitting sense, these competitors from competing in regard to their respective versions of the jointly developed F-18 fighter concept. There is evidence, which must be accepted as true at this posture of the proceedings, that the agreements have not eliminated head-to-head competition in international markets between the two variants of the joint F-18 development effort -- a surprising procompetitive occurrence in an industry typified by single-source products.²⁸ For example, Canada, the first international purchaser of an F-18, chose McDonnell's carrier-suitable F-18A over Northrop's land-based F-18 even though it intended to base the aircraft on land. The market appeal of carrier-suitable aircraft for land-based operation was demonstrated during the 1970's by McDonnell's successful marketing of its carrier-suitable F-4 "Phantom" for land-based use.

[**59] More important, however, is the fact that but for the teaming effort General Dynamics and other manufacturers of aircraft fitting the same general buyer needs as the F-18 would have had neither F-18 variant to compete against. Thus, not only do the agreements not preclude all competition between the parties' respective variants of the F-18, they actually foster competition by [*1053] allowing both parties to compete in a market from which they were otherwise foreclosed.²⁹

Thus, McDonnell's impact-on-competition argument is misleading in the special context of this industry and practice. For although the agreements suppress competition between the parties in the sense that they designate which party will be the prime contractor [**60] for different versions of the F-18, there would be no competition but for the agreements. As noted by one deponent:

The agreements between Northrop and [McDonnell] do not have the effect of limiting competition to an extent greater than the naturally existing limitations brought about by . . . the Congressional mandate limiting the Navy to choosing between a General Dynamics YF-16 and a Northrop YF-17. Without the opportunity of teaming with Northrop, [McDonnell] would not have been able to participate in the Navy competition and would not be in a position to participate in sales of current generation YF-17 type fighters either in the United States or abroad.

Given this evidence, it would be a reversion of the kind to "formalistic line drawing" eschewed in *GTE Sylvania, 433 U.S. at 58-59, 97 S. Ct. at 2561-2562*, to hold this novel teaming arrangement a per se violation of the Sherman Act solely because it arguably has some characteristics of a horizontal restraint.**[HN27]**

²⁸ The record indicates that almost every military aircraft marketed by an American manufacturer since World War II has, for all practical purposes, been available from only a single source. One obvious reason for this phenomenon is the magnitude of the economic and technological bases necessary to enter the military aircraft markets where a single product such as the F-18 reflects nearly a decade of development and sells for over \$15 million each.

²⁹ Moreover, the agreements do not impinge upon the parties' unfettered right to develop and market aircraft suitable for any type of basing so long as the new aircraft are not "of basically the same configuration" as the team produced F-18 (see Para. 3 of the Basic Agreement).

Where the effect on competition is equivocal, it is appropriate to examine the purpose of the restraint in deciding whether to apply the per se rule. [Broadcast Music, 441 U.S. at 19-20, 99 S. Ct. at 1562-1563](#). The [**61] teaming effort at issue here was done at its customer's request (the Government). The undisputed purpose of the teaming effort was to develop a particular weapons system desired by the Government. There is evidence that the contract-allocation clause was included to avoid repeating a previous military-aircraft contracting "fiasco" ³⁰ that occurred due to lack of teaming, not to suppress competition. Thus, viewing the evidence in the light most favorable to Northrop, the agreements are not the sort of "naked restraint of trade with no purpose except stifling competition," [White Motor Co., 372 U.S. at 263, 83 S. Ct. at 702](#), for which per se condemnation is appropriate.

We note by way of conclusion on this point, without deciding on the basis of the incomplete record before us, that there is a question as to whether it even matters if [**62] the agreements foreclosed some competition between Northrop and McDonnell. In distinguishing the price-fixing practice fashioned by the health-care foundation in Maricopa County from the blanket licenses in Broadcast Music, the Court stated that:

The foundations are not analogous to partnerships or other joint arrangements in which persons who would otherwise be competitors pool their capital and share the risks of loss as well as the opportunities for profit. In such joint ventures, the partnership is regarded as a single firm competing with other sellers in the market.

[Maricopa County, 457 U.S. at 356, 102 S. Ct. at 2479-80](#). As the Court notes, [HN28](#)[] affiliated businesses cannot be held to conspire with each other where they function as essentially a single economic unit. Accord, [Murray v. Toyota Motor Distributors, Inc., 664 F.2d 1377, 1379](#) (9th Cir.) (per curiam), cert. denied, 457 U.S. 1106, 102 S. Ct. 2905, 73 L. Ed. 2d 1314 (1982). See also [Thomsen v. Western Electric Co., 680 F.2d 1263, 1266 \(9th Cir. 1982\)](#). No adverse effect on competition need be shown here if it develops on [*1054] remand that, despite the disavowal of a joint venture contained in the agreement, Northrop [**63] and McDonnell should be viewed as "teammates" constituting a single economic unit for purposes of the F-18 market.

3. Limitation upon license of technology: As an additional basis for holding per se treatment inappropriate, Northrop argues that the agreements are reciprocal licenses of technology and that the contract-responsibility clause is a reasonable use limitation. [HN29](#)[] Reciprocal license agreements are not per se violations if the technology was otherwise unobtainable by the licensee (McDonnell) and the use limitation is "reasonable." [A & E Plastik Pak Co. v. Monsanto Co., 396 F.2d 710, 715 \(9th Cir. 1968\)](#).

McDonnell argues that the YF-17 technology transferred by Northrop was otherwise available to McDonnell, albeit in less useful form, because the Government had purchased unlimited rights in such technology. McDonnell argues further that the use limitations sought by Northrop are unreasonable because: (1) they are broader and of longer duration (arguably for as long as F-18's can be marketed) than is necessary to protect Northrop's legitimate interests; (2) the F-18 product they are sought to be imposed on is far different from the "paper" technology and YF-17 prototype [**64] technology provided by Northrop; (3) the Government provided the business opportunity (i.e., the chance to compete for the Navy contract), not Northrop; and (4) territorial restraints are unreasonable where the parties receive their quid pro quo in the mutual exchange of valuable information.

The fatal weakness in McDonnell's argument is that, although advanced in support of summary judgment, it hinges on bitterly contested facts. Also, McDonnell's position regarding the availability of the technology appears somewhat disingenuous -- for if the technology was readily obtainable and usable, why do the memoranda by McDonnell's top executives indicate the necessity of teaming to obtain the technology? Although Northrop's licensing theory alone is probably an insufficient reason to require rule-of-reason analysis, it does add weight to the other factors, especially the argument that the antitrust implications of such teaming/technology/licensing arrangements in the military aircraft industry are *sui generis*.

C. Attempt to Monopolize

³⁰ This occurred when a single contractor was unable to resolve the conflicting design demands of producing variants of a single aircraft for both the Air Force and Navy.

Northrop contends that McDonnell breached the agreements in such a manner as to attempt to monopolize the F-18 market.³¹ McDonnell argues that even [**65] if its conduct contravened the terms of the agreements, there was sufficient governmental involvement by regulation and licensing of foreign sales efforts to support dismissal.

The parties characterize the district court's ruling very differently. Northrop contends that the court held that McDonnell's conduct in the F-18 markets was "immune" from section 2 of the Sherman Act because the military aircraft industry is subject to such pervasive federal regulation. McDonnell argues that the ruling is based, not on an immunity theory, but, rather, on the conclusion that two of the requisite elements of attempted monopolization are absent -- namely, "dangerous probability of success" and "monopolistic intent."

Careful study of the district court's opinion and findings fails to disclose the exact basis for the ruling. The truth appears to lie somewhere between the extremes advocated by the parties.

The [**66] most tenable reading of the district court's opinion is that, although the court based its decision on the pervasive role of the government in the military-aircraft industry (rather than on the absence of the elements of attempt to monopolize), it did not squarely base its decision on immunity [*1055] grounds.³² The court appears to have reasoned that the Government so controls the normal competitive process -- from the inception of the F-18 design to its eventual marketing -- that no "trade or commerce" as defined by the Sherman Act exists.³³ The district court's ruling is erroneous regardless of whether it is evaluated as being based on "trade or commerce," "immunity," or "failure to prove a *prima facie* case" grounds.

[**67] 1. Interstate commerce: Viewing the record in the light most favorable to Northrop, we cannot conclude as a matter of law that Northrop's section 2 claim fails for lack of a sufficient nexus with interstate commerce. Neither party disputes the district court's findings that the relevant product market is the "F-18 weapons system" and that the relevant geographic market is "arguably the world." [498 F. Supp. at 1123](#). The fact that the Government exercises significant control over the entry of private parties into these markets does not mean that there is no trade or commerce involved in competing in such markets. As noted by Northrop, there is undisputed evidence that the F-18 is being assembled in at least two different states, using materials and components shipped by vendors from all over the country and world. The Supreme court has repeatedly observed that, consonant with the broad purposes of the antitrust laws, [HN30](#) [↑] almost any activity that has "interstate incidents" satisfies the Sherman Act's jurisdictional requirement. See, e.g., [McLain v. Real Estate Board of New Orleans, Inc., 444 U.S. 232, 100 S.](#)

³¹ See footnote 6 *supra*, and accompanying text for a more specific description of Northrop's claims.

³² This reading of the decision is corroborated by the absence of any direct immunity analysis or case law references in the opinion and by the fact that McDonnell did not explicitly argue for immunity in the lengthy memorandum it submitted in support of its motion for summary judgment.

³³ In the district court's words:

The concern of product and geographic market from the traditional antitrust viewpoint becomes unimportant here for one very basic reason. The United States Government has the absolute and over-riding control of both the production and sales potential of the product that brings these parties into vitriolic conflict.

What strikes the Court under such circumstances is that there is not the "trade or commerce among the several States, or with foreign nations" essential to antitrust concerns of monopolization including the critical inquiry here -- attempt to monopolize. The United States Government is the market concerned with production and distribution of weapons systems for governmental military establishments. As such, this differs from the basic thrust of antitrust laws applicable to governmental procurement practices in competition with consumer enterprises buying goods generally available in the marketplace.

. . . No single group of producers has any power to expand a market share beyond that considered by the United States Government in the implementation of domestic defense and foreign policy which is in the best interest of its citizens.

Political considerations aside, the monopoly, if any, enjoyed or threatened by MDC is a governmental creation outside the reaches of the Sherman Act Section 2.

Ct. 502, 62 L. Ed. 2d 441 (1980); Hospital Building Co. v. Trustees of Rex Hospital, [*68] 425 U.S. 738, 96 S. Ct. 1848, 48 L. Ed. 2d 338 (1976). Accord, *Community Builders, Inc. v. City of Phoenix*, 652 F.2d 823, 827 (9th Cir. 1981) (need only affect a "not insubstantial" amount of interstate commerce).

The fact that the Government is the sole domestic purchaser and regulates foreign F-18 sales does not mean that no market exists which a competitor can attempt to monopolize. HN31[ A manufacturer can attempt to monopolize a market by eliminating competition through predatory actions regardless of the product's sophistication and the limited number of its potential customers. The record does not indicate as a matter of law that the military aircraft industry enjoys some sort of natural monopoly that renders inapplicable the premise of the antitrust laws that competition will assure the consumer the best product at the lowest price.

The Record is replete with evidence regarding the competitive nature of the military aircraft industry. The Air Force and Navy competitions alone are evidence of the [*1056] competitive process fostered by the Government to ensure its choice of the best weapons system at the lowest cost. In foreign F-18 markets, the Government's role is **69 limited to determining what technologies may be exported to what countries. Once this determination is made, the Government allows the foreign buyer to choose freely between the competing offerings of exportable technologies.

2. Implied immunity: To the extent, if any, that the district court's decision can be viewed as a determination that Congress intended to confer blanket antitrust immunity on private conduct in the military aircraft industry by virtue of its extensive regulation of that industry, the decision is in error. Although there are no reported antitrust decisions involving this industry, treatment of the immunity question in regard to other regulated industries is instructive.³⁴

**70 Courts have generally framed the immunity issue in terms of whether Congress intended to repeal the antitrust laws with respect to the particular industry when it enacted the regulatory scheme. Phonetel, Inc. v. American Tel. & Tel. Co., 664 F.2d 716, 726, 731-32 (9th Cir. 1982) (as amended). See generally Comment, The Application of Antitrust Law to Telecommunication, 69 Calif.L.Rev. 497, 505-14 (1981). HN32[ Antitrust immunity is disfavored and "can be justified only by a convincing showing of clear repugnancy between the antitrust laws and the regulatory system." National Gerimedical Hospital v. Blue Cross of Kansas City, 452 U.S. 378, 388, 101 S. Ct. 2415, 2421, 69 L. Ed. 2d 89 (1981), quoting United States v. National Association of Securities Dealers, 422 U.S. 694, 719-20, 95 S. Ct. 2427, 2442-43, 45 L. Ed. 2d 486 (1975). Pervasive regulations of an industry alone is insufficient to confer blanket immunity on every action taken within the industry. Otter Tail Power Co. v. United States, 410 U.S. 366, 372-75, 93 S. Ct. 1022, 1027-28, 35 L. Ed. 2d 359 (1973); United States v. R.C.A., 358 U.S. 334, 346, 79 S. Ct. 457, 464, 3 L. Ed. 2d 354 (1959). Immunity is especially disfavored where **71 the antitrust implications of a business decision are neither compelled nor explicitly approved by a governmental regulatory body. Gerimedical Hospital, 452 U.S. at 389, 101 S. Ct. at 2421-22; National Association of Securities Dealers, 422 U.S. at 730-34, 95 S. Ct. at 2448-50; Gordon v. New York Stock Exchange, 422 U.S. 659, 689-90, 95 S. Ct. 2598, 2614-15, 45 L. Ed. 2d 463 (1975). Immunity from the antitrust laws is justified only where necessary to ensure that the regulatory scheme works, and even then only to the minimum extent necessary. Silver v. New York Stock Exchange, 373 U.S. 341, 357, 83 S. Ct. 1246, 1257, 10 L. Ed. 2d 389 (1963).

Applying these standards to the present case demonstrates the inappropriateness of granting blanket immunity, especially at the summary judgment stage. Although both McDonnell and the district court speak at length about the extensive matrix of federal regulations under which the military aircraft industry operates, neither points to a

³⁴ In looking at the treatment accorded other regulated industries, we are cognizant of Professor Sullivan's warning that:

It is important to recognize that there is no single conception which defines the scope of the exemption for a regulated industry. Although one can draw on case law from one industry for guidance as to outcome in another, there are, in a sense, as many sets of exemption doctrines as there are industries subject to state or federal regulation. In each industry the process of accommodating regulatory doctrine to antitrust doctrine is responsive to particulars such as those here referred to and, in some degree no doubt, to the degree of confidence which the court has in the quality of the regulatory performance by the particular regulatory agency. Antitrust, *supra*, § 239 at 743-44.

single instance in which the predatory conduct alleged by Northrop was either compelled or directly approved by a governmental body.

As we noted in rejecting a similar immunity claim in Phonotele:

[HN33](#) [↑] Antitrust [**72] immunity is not conferred by the bare fact that defendants' activities might be controlled by an agency having broad powers over their conduct. There [*1057] is no general presumption that Congress intends the antitrust laws to be displaced whenever it gives an agency regulatory authority over an industry . . . the area of immunity from antitrust laws is not coterminous with areas of agency jurisdiction or agency expertise.

[664 F.2d at 729](#) (citations omitted). [HN34](#) [↑] A regulatory mandate sufficient to confer implied antitrust immunity may in some cases exist where there is explicit congressional approval of the challenged conduct and its ultimate anticompetitive effect, and there is no inconsistency or "plain repugnancy" between the conduct and the express policies of the regulating body. [Id. at 731-32](#). As in Phonotele, no such mandate is evident here. [HN35](#) [↑]

The principal regulatory provisions pertaining to the military aircraft industry are the International Security Assistance and Arms Export Control Act ("ISAAEC Act"), [22 U.S.C. §§ 2751 et seq.](#), implemented, inter alia, by the International Traffic In Arms Regulations ("ITARS"), 22 C.F.R. §§ 121.01 et seq. (1981), and the Armed [**73] Services Procurement Act ("ASP Act"), [10 U.S.C. §§ 2301 et seq.](#), implemented by ASPR Regulations ("ASPR"), 32 C.F.R. §§ 1-100 et seq. (1981). These provisions contain no affirmative indication that Congress intended to modify or eclipse the application of the antitrust laws to the military aircraft industry. Indeed, there are several indications that Congress intended private conduct in the industry to be subject to the antitrust laws. For instance, the ITARS require the inclusion of a clause in all technical assistance agreements that expressly acknowledges that license approval by the Office of Munitions Control is not to be construed as "passing on the legality of the agreement from the standpoint of antitrust laws." 22 C.F.R. § 124.11(d) (1981). Similarly, the ASP Act [HN36](#) [↑] provides that a military procuring agency must notify the Attorney General whenever the agency has reason to believe that a "violation of the antitrust laws" has occurred. [10 U.S.C. § 2305\(d\)](#). Finally, ASPR § 4-117, which describes and authorizes "contractor team arrangements" and was the basis for the agreements now in issue, provides that "these [teaming] policies do not authorize arrangements in [**74] violation of anti-trust statutes. . ." ³⁵ ASPR § 4-117(b).

The Court held in Otter Tail that because the regulatory scheme in question preserved the right of voluntary action by private actors, its pervasiveness could not be construed to mean that the scheme was intended to supplant the antitrust laws. [410 U.S. at 373, 93 S. Ct. at 1027](#). A similar conclusion is warranted in this case. [HN37](#) [↑] Where, as here, the challenged conduct is the product of the regulated business' independent initiative and choice, it is properly subject to antitrust scrutiny. [Phonotele, 664 F.2d at 1**751 735 n. 49.](#)

3. Prima facie case of attempt to monopolize: In addressing this issue, it is appropriate to bear in mind the admonition that summary judgments are most disfavored in antitrust cases where, as with this issue, "motive and intent play leading roles." [California Steel & Tube, 650 F.2d at 1003](#). [HN38](#) [↑] At least two elements of proof are indispensable to make out a prima facie case of attempt to monopolize: (1) specific intent to control prices or destroy competition, and (2) predatory conduct designed to accomplish that unlawful purpose. [BLair Foods, Inc. v. Ranchers Cotton Oil, 610 F.2d 665, 669 \(9th Cir. 1980\); Greyhound Computer Corp. v. IBM Corp., 559 F.2d 488, 504 \(9th Cir. 1977\)](#), cert. denied, 434 U.S. 1040, 98 S. Ct. 782, 54 L. Ed. 2d 790 (1978). Although this court has periodically stated that dangerous probability of successful monopolization is also an indispensable element, e.g., [William Inglis & Sons Baking Co. v. ITT Continental Baking Co., 668 F.2d 1014, 1027](#) [*1058] (9th Cir.) (as amended), cert. denied, 459 U.S. 825, 103 S. Ct. 58, 74 L. Ed. 2d 61, 103 S. Ct. 57 (1982); [Janich Bros., Inc. v. American Distilling Co., 570 F.2d 848, 853 \(9th Cir. 1977\)](#), cert. denied, [**76] 439 U.S. 829, 99 S. Ct. 103, 58 L.

³⁵ Another factor militating against immunity is the apparent inadequacy of nonexistence of agency structures to remedy anticompetitive behavior in the military aircraft industry. See [Carnation Co. v. Pacific Westbound Conference, 383 U.S. 213, 224, 86 S. Ct. 781, 787, 15 L. Ed. 2d 709 \(1966\)](#), modified, [383 U.S. 213, 86 S. Ct. 781, 15 L. Ed. 2d 709 \(1966\); Phonotele, 664 F.2d at 734-735](#). See also, Comment, supra, 69 Calif.L.Rev. at 511.

Ed. 2d 122 (1978), there is also Ninth Circuit authority for the view that probability of success is merely circumstantial evidence of intent. E.g., [Forro Precision, Inc. v. IBM Corp., 673 F.2d 1045, 1059 \(9th Cir. 1982\)](#); [Blair Foods, Inc., 610 F.2d at 669](#); [Lessig v. Tidewater Oil Co., 327 F.2d 459, 474 \(9th Cir.\)](#), cert. denied, 377 U.S. 993, 84 S. Ct. 1920, 12 L. Ed. 2d 1046 (1964).³⁶ We need not add further fuel to the controversy by adding our opinion regarding the inquiry's proper significance, because, as discussed below, there was sufficient evidence of McDonnell's probability of success to avoid summary judgment. Finally, [HN39](#)[] evidence of market power, while not essential, may suggest the existence of specific intent to monopolize. [Janich Bros., 570 F.2d at 853](#). The interplay between these elements is exhaustively discussed in *Continental Baking*, 668 F.2d at 1027-31 ("Each element interacts with the others in significant and unexpected ways", *id.* at 1027).

[**77] [HN40](#)[] Although specific intent may be demonstrated by direct evidence of unlawful design, if corroborated, *Continental Baking*, 668 F.2d at 1028, intent is, for practical reasons, more commonly proven through circumstantial evidence such as by inference from predatory conduct and market power. [Forro Precision, 673 F.2d at 1059](#); [California Computer Products v. IBM Corp., 613 F.2d 727, 736-37 \(9th Cir. 1979\)](#). The combination of direct and circumstantial evidence of McDonnell's intent was sufficient to avoid summary judgment. The memoranda prepared by top McDonnell executives offer strong direct evidence of McDonnell's alleged intent to monopolize. The record also contains evidence that McDonnell possesses great leverage in the relevant market and, through its allegedly predatory actions, has a dangerous probability of successfully monopolizing that market. These latter factors offer additional evidence in support of Northrop's allegation of monopolistic intent. See [Blair Foods, 610 F.2d at 669](#).

Northrop's assertions in the pleadings of predatory conduct are also adequate to avoid summary judgment. We cannot accept McDonnell's contention that its alleged breaches of the agreements, fraud [**78] in the inducement, and various other unfair practices could not be found predatory in the circumstances of this case. The alleged activity is clearly conduct "without legitimate business purpose." [Janich Bros., 570 F.2d at 853](#). McDonnell's argument is unpersuasive for two reasons. First, McDonnell appears to concede that this alleged conduct would be predatory if as we have already determined, it enjoyed market power. See [Hunt-Wesson Foods, Inc. v. Ragu Foods, Inc., 627 F.2d 919, 925 \(9th Cir. 1980\)](#), cert. denied, 450 U.S. 921, 101 S. Ct. 1369, 67 L. Ed. 2d 348 (1981). Second, McDonnell focuses too closely on each of the individual practices complained of without reference to the intent motivating them or to their overall effect on Northrop's ability to remain McDonnell's principal competitor in the F-18 market. Cf. [Continental Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 699, 82 S. Ct. 1404, 1410, 8 L. Ed. 2d 777 \(1962\)](#) (plaintiff should be given "the full benefit of [its] proof without tightly compartmentalizing the various factual components. . . .").

V.

McDonnell's Cross-Appeal

McDonnell concedes that most of its counterclaim is a "mirror image" of Northrop's [**79] complaint and that the disposition of one should be consistent with the other. [*1059] The disposition of the motions to dismiss and for summary judgment of Northrop's complaint dictated that the counterclaim be treated similarly in that it was subject to the same perceived flaws. In light of our reversal of the district court's rulings on Northrop's claims, it is necessary to remand for further consideration of the counterclaim.³⁷

VI

³⁶ The significance of the dangerous-probability-of-success inquiry "has been controversial . . . within this circuit." [Hunt-Wesson Foods, Inc. v. Ragu Foods, Inc., 627 F.2d 919, 925 \(9th Cir. 1980\)](#), cert. denied, 450 U.S. 921, 101 S. Ct. 1369, 67 L. Ed. 2d 348 (1981).

³⁷ In the two limited aspects of the counterclaim that can arguably be construed as nonmirror images of Northrop's claims, McDonnell essentially sought an affirmative declaration of what the court held below. Had we affirmed the district court in regard to Northrop's complaint, there may have been some justification for treating those two claims as non-mirror images. Given the present posture of the case, however, summary treatment of those aspects of the counterclaim is unwarranted.

Conclusion

We reverse the district court's dismissal and summary judgment rulings [****80**] as to Northrop's complaint and McDonnell's counterclaim; affirm the denial of the motion to modify finding of fact #31;³⁸ and remand the matter for further proceedings consistent with this opinion.

[81]** REVERSED, in part; AFFIRMED, in part; and REMANDED.

End of Document

³⁸ McDonnell contends that it was clearly erroneous for the district court to strike the words "Northrop claims that" from the beginning of the second sentence of McDonnell's proposed finding of fact #31. The finding goes on to say that both parties intended the agreements to limit McDonnell to marketing carrier-suitable aircraft and Northrop to land-based aircraft. The district court denied to McDonnell's motion to reinstate the deleted phrase. Although conceding that the phrase "is not material to the [district] court's orders", McDonnell argues that the deletion is inconsistent with other findings that the parties intended different interpretations of the Agreements and sought different relief based upon their respective interpretations.

McDonnell's objection to the deletion is apparently aimed at protecting itself from being caught in contradictory positions in responding to Northrop's claims and in pressing its own counterclaims. Our disposition of this appeal renders this fear more illusory than real. For this and other reasons, we find no abuse of discretion.

HN4 Subject Matter Jurisdiction, Federal Questions

Where a plaintiff's claim contains both a federal ground and a state ground, the plaintiff is free to ignore the federal question and pitch his claim on the state ground. The artful pleading doctrine creates an exception to this general rule only when the plaintiff by his own conduct, either by filing originally in federal court or by acceding to federal jurisdiction after removal, has made his claim a federal one.

Opinion by: WEIGEL

Opinion

[*560] Order Granting Plaintiff's Motion for an Order Dismissing Defendants' Petition for Removal and Remanding to State Court

WEIGEL, J.:

Plaintiff is a fish processing business in Eureka, California. Defendants are the major purchasers, processors, and marketers of albacore tuna on the west coast of North America. Defendant Castle & Cooke, Inc. is an Hawaiian corporation, which markets tuna under the "Bumble Bee" brand name; defendant Star-Kist Foods, Inc. is a wholly-owned subsidiary **[**2]** of defendant H.J. Heinz Corporation, a Pennsylvania corporation, which markets tuna under the "Star-Kist" brand name; defendant Ralston Purina, Inc. is a Missouri corporation, which markets tuna under the

brand name "Chicken-of-the-Sea"; defendant CHB Foods, Inc. is a California Corporation, which markets tuna under the brand name "Pan Pacific."

On December 7, 1982, plaintiff filed this antitrust suit in Superior Court of the State of California, City and County of San Francisco, claiming violations of California's Cartwright Act, [Cal. Bus. & Prof. Code \[*561\] §§ 16700 et seq.](#), and Unfair Trade Practices Act, [Cal. Bus. & Prof. Code §§ 17000 et seq.](#) Plaintiff claims that defendants unlawfully conspired to fix, raise, maintain, and stabilize the prices of fresh albacore tuna and canned albacore tuna. On January 6, 1983, defendants removed the case here on the grounds that this Court has original jurisdiction pursuant to [28 U.S.C. §§ 1331, 1337](#), and [15 U.S.C. § 15](#). Plaintiff moves for an order dismissing defendants' petition for removal and remanding the case to state court. Defendants move to dismiss for failure to join a party or, in the alternative, for an order that [\[**3\]](#) a party be joined.¹

[HN1](#) Any civil action brought in state court of which the district courts of the United States have original jurisdiction founded on a claim arising under federal law "shall be removable" to federal court. [28 U.S.C. § 1441\(b\)](#). Defendants assert that because they purchase albacore tuna primarily from a fishermen's cooperative association which enjoys immunity from federal antitrust laws under the Fisheries Cooperative Marketing Act, [15 U.S.C. § 521 et seq.](#), plaintiff's complaint, even though it presents a prima facie claim solely under state law, challenges an entire federal regulatory scheme and thus "aris[es] under" federal law pursuant to [28 U.S.C. § 1441\(b\)](#). [HN2](#) A claim arises under federal law only if a question of federal law forms "a direct and essential element of the plaintiff's cause of action." [Smith v. Grimm, 534 F.2d 1346, \[**4\] 1350](#) (9th Cir.), cert. denied, 429 U.S. 980, 50 L. Ed. 2d 589, 97 S. Ct. 493 (1976); see [Guinasso v. Pacific First Federal Sav. & Loan Ass'n, 656 F.2d 1364, 1367](#) & nn. 7-8 (9th Cir. 1981), cert. denied, 455 U.S. 1020, 102 S. Ct. 1716-17, 72 L. Ed. 2d 138 (1982). Defendants do not argue that plaintiff relies on a federal right, remedy, or relationship in asserting his claim; rather, they seek to anticipate a possible federal defense based upon the antitrust immunity conferred upon agricultural and fishermen's cooperatives.² It is well established that [HN3](#) the assertion of a federal defense is an insufficient basis for federal jurisdiction. [Guinasso, supra, 656 F.2d at 1366](#); C. Wright, A. Miller, & E. Cooper, *Federal Practice and Procedure*, § 3722, at 550 & n. 11 (1976).

[\[**5\]](#) Defendants also urge that plaintiff has attempted to conceal the federal nature of his claim through "artful pleading." They assert that large portions of plaintiff's complaint are copied from a complaint filed in 1974 in federal court by plaintiff's counsel, on behalf of a different plaintiff, against four of the five defendants named in this suit.³ Because the earlier case was federal, defendants contend that this Court cannot lack jurisdiction over the instant suit merely because plaintiff has deleted any references to federal law in his complaint.

Defendants misconstrue the proper scope of the so-called "artful pleading" doctrine. [HN4](#) Where, as here, plaintiff's claim contains both a federal ground and a state ground, plaintiff "is free to ignore the federal question and pitch his claim on the state ground." 1A Moore's *Federal Practice* para. 0.160, at 185 (2d ed. 1982) (footnote [\[*6\]](#) omitted). The artful pleading doctrine creates an exception to this general rule "only when the plaintiff by his own conduct, either by filing originally in federal court or by acceding to federal jurisdiction after removal, [\[*562\]](#) has made his claim a federal one." [Salveson v. Western States Bankcard Ass'n, 525 F. Supp. 566, 572, 575](#) & n. 8 (N.D. Cal. 1981); see [Federated Dept. Stores v. Moitie, 452 U.S. 394, 69 L. Ed. 2d 103, 101 S. Ct. 2424 \(1980\)](#)

¹ Because the Court grants plaintiff's motion, and remands the case to state court for further proceedings, the Court need not reach defendants' motion.

² Thus, defendants' reliance on [Smith v. Kansas City Title & Trust Co., 255 U.S. 180, 65 L. Ed. 577, 41 S. Ct. 243 \(1921\)](#), is misplaced. In that case, plaintiff, a shareholder in a trust company, challenged the company's proposed investment in certain bonds on the ground that the federal statutes authorizing issuance of the bonds were unconstitutional. Hence, an essential element of plaintiff's claim was the alleged unconstitutionality of the federal statutes involved, and federal jurisdiction was proper. By contrast, in the instant case plaintiff's claim does not necessarily rely upon rights conferred by the Fisheries Cooperative Marketing Act, [15 U.S.C. § 521 et seq.](#), or upon the unconstitutionality of that statute or upon rights conferred by any other federal statute.

³ *Western Fishboat Owners Association, et al. v. Castle & Cooke, Inc., et al.*, C 74-1748 LHB (N.D. Cal.) (filed August 19, 1974).

557 F. Supp. 559, *562 (1983 U.S. Dist. LEXIS 18924, **6

(case filed in state court after identical federal suit dismissed properly removed to federal court); C. Wright, A. Miller, & E. Cooper, Federal Practice and Procedure, § 3722, at 174 (Supp. 1981); cf. *Vitarroz v. Borden, Inc.*, 644 F.2d 960, 964-65 (2d Cir. 1981). Here, plaintiff seeks to bring his claim for the first time, has pleaded only violations of state **antitrust law**, and has chosen to pursue his claim in a state forum. Thus, plaintiff has in no way "acced[ed] to federal jurisdiction."

Accordingly,

It Is Hereby Ordered that defendants' petition for removal is dismissed.

It Is Further Hereby Ordered that this case is remanded to state court for further proceedings. [**7]

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN10 [down] Tying Arrangements, Clayton Act

To prevail on a tying claim, whether under the Sherman Act, [15 U.S.C.S. § 1](#), or the Clayton Act, [15 U.S.C.S. § 14](#), a plaintiff must first identify a tie between separate products. Separateness is determined in part by whether the products are normally sold or used as a unit and whether their joint sale effects savings beyond those of combined marketing. The critical factor is the extent to which a producer's offerings are in response to independently structured consumer demand. Products that function together and are sold in combination may still be separate if consumers would prefer to buy them individually at the price necessary to market them separately.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN11 [down] Price Fixing & Restraints of Trade, Tying Arrangements

Tying denotes illegal coercion: Rules governing tying arrangements are designed to strike, not at the mere coupling of physically separable objects, but rather at the use of a dominant desired product to compel the purchase of a second, distinct commodity. Whether a producer's combined products should be considered as separate can be decided only by looking at consumer behavior. It is the relationship of the producer's selling decision to market demand, not the physical characteristics of the products alone, that determines the existence of legally separable products.

Opinion by: SNEED

Opinion

[*1279] SNEED, Circuit Judge:

This appeal was filed by Klamath-Lake Pharmaceutical Association (Association), the assignee of the antitrust claims of a group of pharmacies that service the Klamath Falls, Oregon area. Association's assignors have been losing business to a local nonprofit health care provider, Klamath Medical Service Bureau (Provider), ever since it began to offer prescription drugs in kind under its group health insurance policies. Association in 1978 sued Provider and Klamath Bureau Pharmacy, Inc. (Pharmacy), a local for profit pharmacy Provider once used to distribute prescription drugs under its pharmacy benefit. The district court, after allowing Association to conduct extensive discovery, could not find any wrongdoing and dismissed the lawsuit in a series of partial summary judgments. For the reasons stated below, we affirm.

I.

STATEMENT OF FACTS

At the time Association brought this suit, Provider offered two different group policies.¹ Both had major medical [**2] coverage and a package of basic benefits, but only one included a pharmacy benefit. This supplemental benefit, available for a higher [*1280] policy premium, entitled insureds to purchase prescription drugs for a small processing fee. The nominal "copay" amount was set at one or two dollars per prescription. Provider's success in marketing its pharmacy benefit led to this lawsuit.

Until July 1, 1976, Provider supplied pharmacy benefits exclusively through Pharmacy. Provider at one point considered expanding its distribution network. Its board of directors voted at their August 1974 meeting to invite local pharmacies to participate if they would accept reimbursement for each prescription at pharmacy cost plus ten percent, minus a copay amount of one dollar. The pharmacies' response, outlined in a letter from pharmacist Robert Gion, was to insist on receiving average [**3] wholesale cost plus \$2.50 per prescription, minus the copay amount. This rate, which was modeled after Blue Cross' reimbursement policies, would have increased Provider's direct cost for most prescriptions. An expanded program would also have been more expensive to operate. Ted Dicken, Provider's executive director, estimated to the board of directors that increasing the number of participating pharmacies would result in a three-percent increase in administrative costs. The board referred the question to its consumer advisory committee, which recommended that the program not be expanded on these terms. The board agreed, deciding, in Dicken's words, that "at this time it would not be feasible to open the K.M.S.B. Prescriptive drug benefit to other prescription outlets." The increase in premiums and in administrative complexity outweighed the benefit of any added convenience to subscribers.

In 1976 Provider decided to distribute drugs directly. It bought out Pharmacy, dissolved it, and set up a pharmacy on its own premises. Thus, as of July 1, 1976, insureds with few exceptions had to get their prescriptions filled by Provider if they used the pharmacy benefit.

Competing pharmacies [**4] were not entirely cut off from business with the insureds of Provider. Groups without the pharmacy benefit had no incentive to shop at Pharmacy while it supplied drugs for Provider because it charged them full market rates. Furthermore, once Provider began to fill prescriptions, it limited sales to insureds using the pharmacy benefit. This restriction forced other policyholders, and all uninsured customers, to use the community pharmacies. The 10,000 policyholders without the pharmacy benefit were still entitled to reimbursement under their major medical provision for 80% of their medical expenses, including prescription drugs, subject to a fifty or hundred dollar deductible. Their purchases constituted a substantial amount of business of the pharmacies. Even policyholders with the pharmacy benefit were free to patronize other pharmacies after hours or during holidays. Although these purchases were made at full cost, reimbursement of 100% of this cost less the copay amount was provided under the terms of the pharmacy benefit. This privilege was important because Provider's pharmacy was only open until 6:00 P.M. on weekdays and 3:00 P.M. on Saturday. Policyholders traveling [**5] outside of the

¹ Provider's other two policies, one an individual policy and the other a group Medicare supplement, are not at issue in this lawsuit.

Klamath Falls area, and those living in outlying communities, could also use local pharmacies and be repaid under the terms of the pharmacy benefit.

Nonetheless, Provider's prescription drug program cut substantially into the business of local pharmacies. Provider's prescriptions more than doubled between 1974 and 1978, from 33,440 to 77,541; several local pharmacies went out of business and the sales of others dropped rapidly. In response seven pharmacies assigned their antitrust claims to Association, which then brought this lawsuit.

II.

THE ISSUES ON APPEAL

Association alleged three causes of action in its complaint. First, it accused Pharmacy and Provider of receiving prescription drugs on terms unavailable to its members, in violation of the Robinson-Patman Act, [15 U.S.C. § 13\(f\)](#). Second, it claimed that Pharmacy and Provider conspired with affiliated [*1281] affiliated physicians, public and private signatories of the group contracts, and labor unions in an attempt to monopolize and restrain trade by compelling insureds to boycott Association's members, in violation of [sections 1](#) and [2](#) of the Sherman Act, [15 U.S.C. §§ 1-2](#). Third, it alleged that [**6] the insurance contracts tied the health care policy to the prescription drug benefit, in violation of [section 3](#) of the Clayton Act, [15 U.S.C. § 14](#).

Provider and Pharmacy answered with the affirmative defense of exemption from the antitrust laws under the McCarran-Ferguson Act, [15 U.S.C. §§ 1011-1015](#). Association sought summary judgment on this issue in March, 1979. The district court agreed to strike the defense as it affected the agreement between Provider and Pharmacy.
2

In October 1979 Provider filed for partial summary judgment asserting that the [**7] McCarran-Ferguson Act shielded it from both the charges of tying and those parts of the boycott claim that rested on the health insurance contract between Provider and its insureds. The court agreed.

This left for resolution only the Robinson-Patman charge and the boycott claim as it applied to Provider's agreement with Pharmacy. Provider and Pharmacy moved for summary judgment on these remaining claims in August 1981. They sought, in the alternative, dismissal of the action under [Fed.R.Civ.P. 17\(a\)](#) because Association was not a real party in interest. They also argued that the assignments did not convey all of the assignors' claims. The district court granted the motion to dismiss. Because of the likelihood of appeal, it went on to reach the merits of the remaining issues. It held for the defendants on these as well. The Robinson-Patman claim fell because Association had turned up only one minor price variation in the thousands of invoices it reviewed during discovery. The court then summarily denied the residual boycott and tying claims.³ Association appealed.

[**8] The issues that must be considered by this court are as follows. First is the validity of the assignments. If Association cannot act as assignee, this appeal must be dismissed. Next are the major substantive problems: the merits of the Robinson-Patman claim, the affirmative defense based on the McCarran-Ferguson Act to the tying and boycott claims, and the merits of these two claims. Last is Association's argument that the district court should have allowed it to amend or supplement its claim. After considering briefly the use of summary judgment in antitrust cases, we will address these issues in order.

III.

² This motion was granted on stipulation, with Pharmacy and Provider free to renew the defense for the provider agreement if the Ninth Circuit later found a claim of exemption available in the aftermath of [Group Life & Health Ins. Co. v. Royal Drug Co., 440 U.S. 205, 99 S. Ct. 1067, 59 L. Ed. 2d 261 \(1979\)](#). Such a defense has not become available. See [Portland Retail Druggists Ass'n v. Kaiser Found. Health Plan, 662 F.2d 641, 647 \(9th Cir.1981\)](#).

³ As we read the district court's earlier amended opinion, it had in fact already disposed of the tying claim in full. The meaning of its amended opinion is discussed in notes 13 & 15 *infra*.

SUMMARY JUDGMENT AS APPLIED TO ANTITRUST CASES

HN1[] Summary judgment, dependent as it is on the absence of a "genuine issue as to any material fact," requires an assessment of evidence regarding issues of material fact in the light most favorable to the party opposing the motion to grant such judgment. *ILGW v. Sureck*, 681 F.2d 624, 628-29 (9th Cir. 1982); *Heiniger v. City of Phoenix*, 625 F.2d 842, 843 (9th Cir. 1980). Summary judgment traditionally has been used sparingly in antitrust litigation because of the factual intricacy of many antitrust issues. See *Poller* [^{**91}] v. *Columbia Broadcasting System, Inc.*, 368 U.S. 464, 473, 82 S. Ct. 486, 491, 7 L. Ed. 2d 458 (1962). At the same time, however, antitrust litigation, if made immune from summary judgment, could become an anticompetitive activity itself. For example, a losing competitor could employ an antitrust suit to harass its victorious [^{**1282}] opponents. So employed the antitrust laws would impose unwarranted economic costs on the marketplace. Thus, to keep these costs in check we should use summary dispositions to dispose of antitrust complaints that lack any significant supporting evidence. See, e.g., *First National Bank v. Cities Service Co.*, 391 U.S. 253, 289-90, 88 S. Ct. 1575, 1592-93, 20 L. Ed. 2d 569 (1968); *Betaseed, Inc. v. U & I, Inc.*, 681 F.2d 1203, 1207-08 (9th Cir. 1982). Our analysis in this case is guided by these principles.

IV.

THE VALIDITY OF THE ASSIGNMENT TO ASSOCIATION

The district court found that Association was not a real party in interest as required by *Rule 17(a)*, but was merely a nominal party which should not have been allowed to prosecute this action. It reached this result because, in its view, the assignors "retained their interest in the [^{**10}] outcome of the litigation." Association's request for treble damages for the assignors was taken as an indication that no true transfer of claims had occurred.

The district court **HN2**[] erred. An assignment of claims does not prevent the assignors from receiving the benefits of the litigation. *Pacific Coast Agricultural Export Association v. Sunkist Growers, Inc.*, 526 F.2d 1196 (9th Cir. 1975), cert. denied, 425 U.S. 959, 96 S. Ct. 1741, 48 L. Ed. 2d 204 (1976). Thus, in *Sunkist Growers* we upheld an award of damages to fresh fruit growers in litigation brought on assignment by their trade association. See *id. at 1200*. The consideration that moved to Association in this case consists of the transfer to it of authority to bring this suit and to allocate the proceeds. In exchange Association undertook to bring the suit. **HN3**[] It is not necessary that the assignors forfeit all interest in possible damages before consolidating their claims in a more efficient class suit.⁴ *Rule 17(a)* is **HN4**[] designed to ensure that lawsuits are brought in the name of the party possessing the substantive right at issue. See 6 C. Wright & A. Miller, *Federal Practice and Procedure* § 1541, at [^{**11}] 635-36 (1971 & Supp. 1982). It is not to prevent a consolidation of individual claims such as occurred here.

[**12] The district court also found the transfer of Clayton and Robinson-Patman Act claims ineffective because of a lack of specificity in the assignment. Whether this is correct presents a question of law reviewable de novo by this

⁴The cases cited by Provider to challenge the assignment involve defects in the party bringing suit that are not present in this case. In *Archie v. Shell Oil Co.*, 110 F. Supp. 542 (E.D.La. 1953), aff'd per curiam, 210 F.2d 653 (5th Cir.), cert. denied, 348 U.S. 843, 75 S. Ct. 64, 99 L. Ed. 665 (1954), the nominal plaintiff was an unpaid yardboy for an attorney who had given him a subsequently invalidated interest in real property via a third party. The district court dismissed the "strange document," which gave the nominal plaintiff the third party's power of attorney over the interest in land and, as consideration, conveyed the interest itself, as void under Louisiana law. *Id. at 544*. *California League of Indep. Ins. Producers v. Aetna Casualty & Sur. Co.*, 175 F. Supp. 857 (N.D.Cal. 1959), did note in dictum that a suit brought by an association of insurance agents would have to be dismissed if the association were a "mere agent for collection," but it added that the association could maintain the suit as an "assignee for collection." *Id. at 861*. *District Distrib. Inc. v. Heublein, Inc.*, 1971 Trade Cases (CCH) P. 73,695, at 90,901 (D.D.C. 1971), involved an ultra vires assignment that was also void for lack of consideration and champerty. In *Cordova v. Bache & Co.*, 1971 Trade Cases (CCH) P. 73,406, at 89,651 (S.D.N.Y. 1970), the president of an association of employees in the securities industry was denied standing to maintain an action in his own name without an assignment from the employees. In the absence of similar defects, there is no need to prevent Association from bringing this lawsuit. The rule that an assignor can prosecute its case even if it must later account to the assignees for the proceeds is a seasoned part of Oregon law. See *Hibernia Sec. Co. v. United Mfg. Co.*, 59 P.2d 384, 388, 154 Or. 369, 379 (1936).

court. *Maykuth v. Adolph Coors Co.*, 690 F.2d 689, 693 (9th Cir. 1982); *Martin v. United States*, 649 F.2d 701, 703 (9th Cir. 1981); *Kittitas Reclamation District v. Sunnyside Valley Irrigation District*, 626 F.2d 95, 98 (9th Cir. 1980), cert. denied, 449 U.S. 1079, 101 S. Ct. 861, 66 L. Ed. 2d 802 (1981). Because there are no disputed factual circumstances, this issue is also ripe for summary disposition.

[*1283] We again find that the district court erred. Our task is to enforce the intent of the parties. *Sunkist Growers*, 526 F.2d at 1208. Each assignment contained three descriptions of the claims transferred. An initial paragraph described the transfer as covering all claims arising "by reason of any violation of the Sherman Antitrust Act, as amended, 15 U.S.C. § 1, et seq." Association for its part promised to seek relief "under the federal antitrust laws." The paragraph following this phrase then waived the assignors' rights "under [*13] the antitrust laws to proceed as an individual named plaintiff." The district court held that the first description should be given controlling weight and be read to limit the assignment to Sherman Act claims, leaving the pharmacies free to relitigate claims under the Clayton and Robinson-Patman Acts.

We do not find this a plausible interpretation. The contract must be read as a whole. The common-sense meaning of the transfer under the Sherman Act, "as amended," when read in conjunction with Association's broad promise to pursue relief "under the federal antitrust laws" and the assignors' equally broad waiver of their rights to proceed "under the antitrust laws," is that it conveys *all* antitrust claims against Provider and Pharmacy. This is what the parties to the assignment intended. Provider has not suggested any reason for them to have intended otherwise. Association's assignors, whose interests do not diverge, understandably sought to secure more vigorous prosecution of a common opponent, and to increase the likelihood of recovery for related injuries. The added expense of separate actions on non-Sherman Act claims makes Provider's theory of reservation for later prosecution [*14] implausible. Furthermore, had the assignors sought to save their claims for later use, they would not have employed the language in question. The assignments are not exemplars suitable to guide future litigants; they are, however, adequate to effectuate a full assignment of all claims. We therefore proceed to Association's substantive claims.

V.

PRICE DISCRIMINATION IN PROVIDER'S PURCHASE OF DRUGS FROM LEDERLE

The district court found no merit in Association's complaint of price discrimination. Provider produced over 7,000 documents that covered its purchases from 1974 until mid-1979. Among these Association turned up only one instance of alleged discrimination. Provider purchased drugs from Lederle Laboratories on a ten percent volume discount during 1978 and early 1979. The discount was available to any buyer with purchases over \$300. Although its members did not remember having received the offer, Association presented no other evidence of unavailability. This is not enough.

The district court was correct in holding that there was no violation. *HN5* Any difference in the prices of similar goods is, of course, price discrimination. *FTC v. Anheuser-Busch, Inc.* [*15], 363 U.S. 536, 549-51, 80 S. Ct. 1267, 1274-75, 4 L. Ed. 2d 1385 (1960); *William Inglis & Sons Baking Co. v. ITT Continental Baking Co.*, 668 F.2d 1014, 1040 (9th Cir. 1981), cert. denied, 459 U.S. 825, 103 S. Ct. 57, 74 L. Ed. 2d 61, 103 S. Ct. 58 (1982). To be forbidden, however, the discrimination must be *illegal*. A buyer who receives a price differential cannot be liable under the Robinson-Patman Act unless the seller is in violation of the Act as well. *Great Atlantic & Pacific Tea Co. v. FTC*, 440 U.S. 69, 75-78, 99 S. Ct. 925, 930-931, 59 L. Ed. 2d 153 (1979). Association did not prove any violation by Lederle. It offered no proof that Lederle's discount injured competition substantially. It therefore failed to make the showing required of it. See *Inglis*, 668 F.2d at 1039-40; *Janich Brothers v. American Distilling Co.*, 570 F.2d 848, 854-55 (9th Cir. 1977), cert. denied, 439 U.S. 829, 99 S. Ct. 103, 58 L. Ed. 2d 122 (1978); *Texas Gulf Sulphur Co. v. J.R. Simplot Co.*, 418 F.2d 793, 806-07 (9th Cir. 1969).

Nor did Association attempt to show that Provider knowingly induced or received Lederle's discriminatory offer. *15 U.S.C. § 13(f)*; *Automatic* [*16] *Canteen Co. v. FTC*, [*1284] 346 U.S. 61, 73 S. Ct. 1017, 97 L. Ed. 1454 (1953); *J.R. Simplot*, 418 F.2d at 803-06. Construing the evidence in the light most favorable to Association, we hold that there was no Robinson-Patman violation.

Association argues that it should have been allowed additional discovery that would enable it to examine Provider's records for recent years. Provider produced documentation for its purchases through mid-1979. Some two years elapsed before the district court issued its final opinion in October 1981. In September 1981 Association filed a request to extend discovery to cover this period, complaining that "since mid-1979 Provider has engaged in a major expansion of its activities, and said expansion is highly relevant to the . . . issues raised by the pending summary judgment motion."

The district court denied the request. In doing so it acted well within its discretion. Association does not indicate what it might expect to discover. At some point, the possibility that additional investigation might turn up a real lead becomes less important than the injustice to a defendant against whom no significant evidence has been produced. We [**17] have reached that point in this case. The district court did not abuse its discretion. See [Portland Retail Druggists Association \(PRDA\) v. Kaiser Foundation Health Plan, 662 F.2d 641, 646 \(9th Cir.1981\)](#); [Program Engineering, Inc. v. Triangle Publications, Inc., 634 F.2d 1188, 1193 \(9th Cir.1980\)](#).

VI.

THE TYING CLAIM

A. As Between The Basic Health Care Contract And The Pharmacy Benefit

We now turn to Association's allegation of tying. Association alleged a tie between "the basic prepaid health care contract, and the optional prescription drug benefit that can be obtained only if the subscriber has the basic plan." The district court rejected Association's argument because it found that both the *basic health care contract* and the *optional drug benefit contract* came with the McCarran-Ferguson exemption. We agree.

1. The business of insurance

The antitrust exemption for the "business of insurance" arose in response to the Supreme Court's decision in [United States v. South-Eastern Underwriters Association, 322 U.S. 533, 64 S. Ct. 1162, 88 L. Ed. 1440 \(1944\)](#), which overruled prior holdings placing insurance outside the reach of the *commerce clause*. [**18] Congress, wishing to protect the states' traditional role in the regulation of insurance and to avoid endangering the cooperative ratemaking that had played a major role in the industry's development, see [Group Life & Health Insurance Co. v. Royal Drug Co., 440 U.S. 205, 217-24, 99 S. Ct. 1067, 1076-79, 59 L. Ed. 2d 261 \(1979\)](#), quickly passed the McCarran-Ferguson Act. The Act removed the "business of insurance" from antitrust enforcement if (1) it was subject to state regulation and (2) did not amount to a boycott under the Sherman Act.⁵

[**19] The Supreme Court in *Royal Drug* excluded health insurers' agreements with third party providers from the business of insurance. Blue Shield, the defendant in *Royal Drug*, invoked the insurance exemption when a group of pharmacists challenged the administration of the pharmacy benefit in Blue Shield's health insurance policy. Blue Shield's benefit, although similar to Provider's in many respects, did not supply drugs directly to its insureds. Independent pharmacies could participate in the plan if they accepted Blue Shield's reimbursement schedule. Most pharmacies [*1285] chose to participate and signed a provider agreement with Blue Shield.⁶

⁵ [Section 2\(b\), 15 U.S.C. § 1012\(b\)](#), provides in part that [HN6↑](#) "no Act of Congress shall be construed to invalidate, impair, or supersede any law enacted by any State for the purpose of regulating the business of insurance . . . unless such Act specifically relates to the business of insurance." [Section 3\(b\), 15 U.S.C. § 1013\(b\)](#), adds the qualification that "nothing contained in this chapter shall render the said Sherman Act inapplicable to any agreement to boycott, coerce, or intimidate, or act of boycott, coercion, or intimidation."

⁶ Both nonparticipating and participating pharmacies brought the antitrust suit against Blue Shield. The headnotes to the Supreme Court opinion and that of the Fifth Circuit identify the plaintiffs as nonparticipating pharmacists. [440 U.S. at 205, 99 S. Ct. at 1070](#); 556 F.2d at 1375. In fact, half of the eighteen plaintiffs participated in Blue Shield's program, see [Royal Drug Co. v. Group Life & Health Ins. Co., 415 F. Supp. 343, 347 \(W.D.Tex.1976\)](#), rev'd, [556 F.2d 1375 \(5th Cir.1977\)](#), aff'd, [440 U.S. 205, 99](#)

[**20] The question before the Supreme Court was whether the exemption covered the agreements with third party providers. The Court held that it did not; provider agreements between health care insurers and participating pharmacies were not part of the business of insurance. Such agreements were subject to normal antitrust scrutiny.

HN7 [↑] The "underwriting or spreading of risk" was held to be an "indispensable characteristic of insurance." [*Id. at 212, 99 S. Ct. at 1073*](#). Cost-cutting efforts pursued through such arrangements as provider agreements, however, were no different than the acts of "any enterprise with the responsibility to minimize costs and maximize profits." [*Id. at 217, 99 S. Ct. at 1076*](#). Such business activities affected only the method of payment -- not the spreading of risk. The provider agreements were further distinguishable from the business of insurance because they were not part of the contract between the insurer and its insureds and because they involved the insurer's relationship with entities outside of the insurance industry. [*Id. at 215-17, 231-32, 99 S. Ct. at 1075-76, 1083*](#).

The Court applied *Royal Drug* in [*Union Labor Life Insurance Co. v. Pireno, 458 U.S. 119, 102 S. Ct. 3002, 73 L. Ed. 2d 647 \(1982\)*](#). Pireno, a New York chiropractor, challenged an insurer's practice of conditioning reimbursement of unusually high chiropractic fees on the decisions of a peer review committee staffed by the New York State Chiropractic Association.⁷ The Court tested the referral policy under three requirements drawn from *Royal Drug*: (1) whether the practice transferred or spread a policyholder's risk; (2) whether it lay at the heart of the relationship between insurer and insured; and (3) whether it was limited to entities within the insurance industry. [*Id. 102 S. Ct. at 3009*](#). It held that the referral practice did not transfer risk; it merely reduced costs. The insurance policy transferred risk and was the indispensable component of insurance. Although the policy defined the burden transferred as the cost of "necessary" treatments and "reasonable" charges, standards apparently applied in practice by the chiropractors' committee, this did not make the committee's involvement the business of insurance. This involvement was "logically and temporally unconnected to the transfer of risk accomplished by ULL's insurance policies." [**22] [*Id.*](#)⁸

[**23] [*1286] The Court also held that the insurer's relationship with the peer review committee failed *Royal Drug*'s second and third requirements. The peer review arrangement was beyond the primary relationship between insurer and insured. [*Id. at 3009-10*](#). And the peer review board was not an "entity" in the insurance industry. Its assistance in regulating fees was but cost-cutting activity. [*Id. at 3010-11*](#).

2. The business of insurance exemption and tying between the basic health care contract and the pharmacy benefit

Association's tying claim, as already noted, strikes at the health care contract and the pharmacy benefit appended to it. *Royal Drug* requires that we consider the possibility that the health insurance contract here involved, even when shorn of a pharmacy benefit contract, does not fit the insurance exemption. [*440 U.S. at 225-30*](#) & n. 37, [*99 S. Ct. 1067, 59 L. Ed. 2d 261 \(1979\)*](#).

[*S. Ct. 1067, 59 L. Ed. 2d 261 \(1979\)*](#). Their role in the case may have resulted more from a desire to hedge their bets than to correct an antitrust violation.

⁷ The insurer, Union Labor Life Insurance Company (ULL), would reimburse only charges it decided were reasonable and necessary, a determination in which it deferred to the committee. Pireno had once sought review of his fees voluntarily, because he believed that going directly to peer review would permit him to avoid a cumbersome substantiation process. [*Pireno v. New York State Chiropractic Ass'n, 650 F.2d 387, 389 n.2 \(2d Cir. 1981\)*](#), aff'd sub nom. [*Union Labor Life Ins. Co. v. Pireno, 458 U.S. 119, 102 S. Ct. 3002, 73 L. Ed. 2d 647 \(1982\)*](#). His enthusiasm for the process waned when ULL began submitting his claims independently and the committee began rejecting them. [*Id.*](#)

⁸ The Court left the contours of its distinction unclear. It explained that the decision to honor a claim rested "entirely" with ULL. [*Pireno, 102 S. Ct. at 3010*](#). Under this analysis, the peer review committee was only an "aid" in making this decision. It did not affect the policyholder directly because his only concern was "whether the claim is paid, not why it is paid." [*Id.*](#) (emphasis in original). But if Pireno was correct that ULL always followed the committee's decisions -- an allegation the Court was to weigh most favorably to Pireno when considering ULL's motion for summary judgment -- then ULL's decision "whether" to pay chiropractors would turn exclusively on the review board's actions. The questions "whether" and "why" a claim was paid would both rest with the chiropractors' association. Compare [*id. 102 S. Ct. at 3011 n. 8*](#) (peer review merely ancillary to claims adjustment because non-binding, even when ULL acted on committee's advice).

Ct. at 1080-82 & n. 37. We have thus far skirted the issue in other situations. See *Hahn v. Oregon Physicians Service*, 689 F.2d 840, 843 n. 2 (9th Cir. 1982); *Portland Retail Druggists Association v. Kaiser Foundation Health Plan*, 662 F.2d 641, 647 (9th Cir. 1981); see also *St. Bernard Hospital v. Hospital Service Association*, 618 F.2d 1140, 1144-45 & nn. 3-5 (5th Cir. 1980). We cannot do this here because Provider argues that the exemption attached to its health insurance policy and also shielded the alleged tying agreement.

We hold that it does. Our decision turns on the Supreme Court's reasoning in *Royal Drug*. The insurer-insured agreement embodied in the basic health care contract and its supplemental pharmacy benefit settles the distribution of the risk that insureds will need medical goods and services, including prescription drugs. It defines the relationship between insurer and insured. And it is limited to these two traditional actors in the insurance industry.

The Court in *Royal Drug* did observe that health insurance was not a common form of insurance in 1945, the year Congress passed the McCarran-Ferguson Act. 440 U.S. at 225-30, 99 S. Ct. at 1080-82.⁹ It did not, however, exclude the business of health insurance from the exemption. All it said was, "This is not to say that the contracts offered by Blue Shield to its policyholders, as distinguished from its provider agreements with participating pharmacies, may not be the 'business of insurance' [**25] within the meaning of the Act." *Id. at 230 n. 37, 99 S. Ct. at 1082 n. 37.*

We do not believe that the Court intended to remove the business of health insurance from the McCarran-Ferguson exemption. Had it so intended its detailed analysis of the limits of the insurance exemption in *Royal Drug* would have been unnecessary. Nor does *Pireno* suggest otherwise. There both the majority and the dissenters discussed the health care policies without once suggesting that the business of health insurance was not included in the business of insurance. Although the insurer was a traditional insurer, not, as in this case, a health care provider, this should not be determinative. It is the business of insurance, not merely the business [**26] of traditional insurers, that activates the exemption. See *id. at 217, 99 S. Ct. at 1076, quoted in Pireno, 102 S. Ct. at 3008, 3010.*

Isolation of risk distribution as the primary characteristic of the business of insurance also weighs against limiting that business to risks being shifted by traditional insurers in 1945. It is the actuarial uncertainty inherent in projecting risks and the insurance industry's corresponding need for cooperation that makes its exemption from the antitrust laws appropriate. See *Royal Drug, 440 U.S. at 221-22, 99 S. Ct. at 1078*. Health insurance also has these characteristics. The business of insurance, within the [*1287] meaning of the McCarran-Ferguson exemption, should not be closed to policies that shift risks not ordinarily so shifted in 1945. Thus, Provider's policies with its insureds, insofar as they shift the risks of medical costs, including pharmacy costs, fully qualify as the business of insurance.

3. The state regulation requirement

Having settled that Provider's policies, insofar as they shift the risks of medical and pharmacy costs, partake of the business of insurance, we must next determine whether these [**27] policies were subject to state regulation. 15 U.S.C. § 1012(b). We hold that they were. Oregon unquestionably regulated health insurance policies. Specific regulations for health care service contractors were included in the Insurance Code, Or.Rev.Stat. §§ 750.005-340 (1981), as were guidelines for group health insurance, *id.* §§ 743.522-558. More generally, the State authorized the Insurance Commissioner to issue regulations banning "any unfair or deceptive act or practice," *id.* § 746.240, and directed insurers to refrain from "anything which is detrimental to free competition in the business or injurious to the insuring public," *id.* § 746.160(3). It specifically prohibited abuses like rate control, *id.* § 746.160(1), and those tying practices that it found undesirable, see *id.* § 746.130 (prohibiting insurers from tying sale of property or services to insurance without a separate charge); *id.* § 746.191 (prohibiting tying of insurance to sale of property or

⁹The Court's attempt to demonstrate that the McCarran-Ferguson Congress did not consider health service plans insurance policies drew a detailed response from the four dissenters. 440 U.S. at 233, 99 S. Ct. at 1084 (Brennan, J., joined by Burger, C.J., and Marshall & Powell, JJ.).

real estate). Furthermore, insurers were subject to state antitrust regulation to the extent free of state insurance regulation. *Id.* § 646.740(4).

This meets the McCarran-Ferguson requirement [**28] that the state regulate the challenged activity. See *Addrisi v. Equitable Life Assurance Society of the United States*, 503 F.2d 725, 727-28 (9th Cir. 1974), cert. denied, 420 U.S. 929, 95 S. Ct. 1129, 43 L. Ed. 2d 400 (1975).¹⁰

[**29] 4. *The boycott exclusion*

The shelter of the exemption does not extend to practices amounting to a boycott under [15 U.S.C. § 1013\(b\)](#). This requirement, however, does not stand in the way of an exemption for Provider's policy. The definition of a boycott for purposes of the McCarran-Ferguson exemption is set forth in *St. Paul Fire & Marine Insurance Co. v. Barry*, 438 U.S. 531, 98 S. Ct. 2923, 57 L. Ed. 2d 932 (1978). *St. Paul* rejected prior definitions that restricted the scope of the term to boycotts among insurers and agents, see, e.g., *Addrisi*, 503 F.2d at 728-29. The Court held that the boycott exception should take its broad Sherman Act meaning. Thus, [HN9](#)¹¹ boycotts were not merely limited "to concerted activity against insurance companies or agents or, more generally, against competitors of members of the boycotting group," but extended to refusals to deal with customers of some or all of those engaged in the boycott. [438 U.S. at 552, 98 S. Ct. at 2935](#).

[*1288] To foreclose an exemption for Provider's health insurance policies, however, Association had to prove that the policies constituted an "agreement to boycott, coerce, or intimidate." This it has not [**30] done. Association asserts that the conspirators induced policyholders to boycott the local pharmacies by the "effective economic compulsion" derived from its pharmacy benefits. It is true that Provider offered an effective economic inducement for customers to buy drugs from it. And it is undisputed that policyholders who had chosen the pharmacy benefit had to patronize Pharmacy and, later, Provider's on-premises pharmacy to use the benefit.¹¹ Reimbursement for after-hours and emergency prescriptions purchased elsewhere probably did little to diminish the appeal of Provider's pharmacy benefit. But this does not establish that the health insurance policies implemented a boycott. Insureds remained free to purchase drugs from Association's members if they chose to do so. Provider offered to the public an attractive package which sold well to the detriment of Association's members. The package is part of the many changes affecting the delivery of health care in our time. We are not prepared to hold that the package

¹⁰ [HN8](#)¹² Unless the practice amounts to a boycott, the states are free to regulate it or choose not to regulate. They do not have to expressly authorize a specific activity, or proscribe it, for the exemption to apply. *Addrisi*, 503 F.2d at 728. It is enough that a detailed overall scheme of regulation exists. *Id.*; see, e.g., *Freier v. New York Life Ins. Co.*, 679 F.2d 780, 782 (9th Cir. 1982). Our opinion in *United States v. Crocker Nat'l Corp.*, 656 F.2d 428 (9th Cir. 1981), cert. granted sub nom *BankAmerica Corp. v. United States*, 456 U.S. 1005, 102 S. Ct. 2294, 73 L. Ed. 2d 1299 (1982), did not narrow this requirement. *Crocker* indicated only that regulation of interlocking directorates among insurance companies would not be construed to protect interlocking directorates between insurance companies and banks. We did state that the "most obvious reason for rejecting a claim of immunity is the absence of any state law regulating the challenged activity." *Id. at 452*. It is wrong to read this, as did the Court of Appeals for the District of Columbia in *Proctor v. State Farm Mut. Auto. Ins. Co.*, 218 U.S. App. D.C. 289, 675 F.2d 308, 317 n. 17 (D.C. Cir.), cert. denied, 459 U.S. 839, 103 S. Ct. 86, 74 L. Ed. 2d 81 (1982), to require that a regulation specifically affect the challenged practice for it to be exempt. *Crocker* only applies in the absence of any general scheme of regulation governing insureds' corporate interlocks with banks. We distinguished cases where, as here, a general system of regulation might imply an affirmative decision to allow the behavior not specifically prohibited. [656 F.2d at 453 n. 88](#). Thus *Crocker* did not narrow the general language in *Addrisi*. See *id.*

¹¹ Provider claimed that these insureds could also buy prescriptions under their major medical plan. For those making numerous purchases of low-priced drugs, it could be cheaper to pay 20% of drug charges and the deductible, as the major medical required, rather than the copay charge of one or two dollars for every purchase under the pharmacy benefit. Association reads Provider's policy to prohibit those with the pharmacy benefit from getting prescription reimbursement under any other provision. This was a major issue throughout this litigation. Although we find Provider's reading of its contract fully credible, we are unwilling to reject Association's further argument that the deductible amount was a sufficiently effective deterrent to prevent the major medical policy from being fully substitutable for the pharmacy benefit. As we find no merit in Association's claims, our decision does not turn on the question whether the major medical provisions further weakened Association's charges that the pharmacy benefit created an "effective boycott" of its members.

should be banned from the marketplace by the antitrust laws. Only such a holding would yield the result the plaintiff seeks.

[**31] Such a holding would be particularly inappropriate in this case. Provider not only did not exclude Association's members from competing for its policyholders; it also gave them a chance to join the business. Their response was to offer to participate only under terms more favorable to them. When this was rejected they chose to sell less at a higher price rather than more at a lower price. They are entitled to make that choice. They are not entitled to employ the antitrust laws to obtain the market position that will produce both greater sales and higher prices.

Thus, we agree with the district court that the health care policy between Provider and its insureds constituted part of the business of insurance; that Provider was regulated by the State of Oregon; and that its pharmacy benefit did not embody a boycott of Association's members. The tying claim, resting as it does on the agreements in the policy, accordingly must fail.¹²

[32] B. As Between The Pharmacy Benefit And The Restrictions On The Sources From Which Drugs Can Be Purchased**

Association had two tying theories. The first, as already demonstrated, alleged a tie between Provider's standard health policy and the pharmacy benefit addition. The second is more nebulous. Association's initial complaint read as follows:

A Provider subscriber desiring a prescriptive drug benefit was and is compelled to purchase the benefit as part of a Provider health care policy that "ties" said benefit to purchase of prescription drugs under the policy to a Provider-designated [**1289] pharmacy and forbids the subscriber, at the risk of losing the benefit, from obtaining prescription drugs under the policy from any competitor of Provider-designated pharmacy.

The district court took the mention of the designated pharmacy to raise, in addition to the tie in the insurance policy, a tie based on Provider's agreement with Pharmacy. The court summarily rejected the claim.¹³ We agree. The provider arrangement did not tie purchase of one product to purchase of another.

[**33] However, Association may also seek to allege a tie between the pharmacy benefit and its restrictions on the sources from which drugs may be purchased. As Association stated in its Amended Motion for Partial Summary Judgment, "The two products are an insurance benefit covering prescription drugs and the form in which that benefit is to be provided."

Interpreting Association's claim to rest on a tie between the pharmacy benefit and the drug purchase restrictions does not change the outcome. This "tying agreement," linking the pharmacy benefit set forth in the policy and the requirement that drugs be purchased from Provider or Pharmacy, fails for the fundamental reason that it does not implicate two different products.

HN10 To prevail on a tying claim, whether under section 1 of the Sherman Act, 15 U.S.C. § 1, or section 3 of the Clayton Act, 15 U.S.C. § 14, a plaintiff must first identify a tie between separate products. Hirsh v. Martindale-

¹² Association's argument that Provider's non-exempt involvement with Pharmacy barred it from receiving the protection of the exemption for its other activities is frivolous. Were that the case, every insurer with a provider arrangement (as in *Royal Drug*) or consultative relationship with third parties (as in *Pireno*) would forfeit all of its exemption from the antitrust laws. The business of noninsurance would overwhelm the business of insurance. There is no support for this position in law or logic.

¹³ The court first granted partial summary judgment under the McCarran-Ferguson Act for Provider on the tying claim only "for those violations which are based on a contract between Provider and its insureds." It left out any claim based on the contract between Provider and Pharmacy. It then amended its opinion, apparently to include the full tying claim in its disposition. See *supra* note 15. Yet in its final opinion the court went to the merits to decide that the provider agreement was not a tying agreement. As we find no support for a tying claim predicated on the provider agreement, we need not decide whether the court intended to dispose of it under the McCarran-Ferguson Act.

Hubell, Inc., 674 F.2d 1343, 1346-47 (9th Cir.), cert. denied, 459 U.S. 973, 103 S. Ct. 305, 74 L. Ed. 2d 285 (1982); Hamro v. Shell Oil Co., 674 F.2d 784, 787 (9th Cir. 1982); Krehl v. Baskin-Robbins Ice Cream Co., 664 F.2d 1348, 1352 (9th Cir. 1982). Separateness is determined in part by whether the products are normally sold or used as a unit and whether their joint sale effects savings beyond those of combined marketing. Siegel v. Chicken Delight, Inc., 448 F.2d 43, 48 (9th Cir. 1971), cert. denied, 405 U.S. 955, 92 S. Ct. 1172, 31 L. Ed. 2d 232 (1972) (describing the "function of the aggregate" test). The critical factor is the extent to which a producer's offerings are in response to independently structured consumer demand. Products that function together and are sold in combination may still be "separate" if consumers would prefer to buy them individually at the price necessary to market them separately. HN11¹⁴ Tying denotes illegal coercion: "Rules governing tying arrangements are designed to strike, not at the mere coupling of physically separable objects, but rather at the use of a dominant desired product to compel the purchase of a second, distinct commodity." *Id. at 47* (citing Times-Picayune Publishing Co. v. United States, 345 U.S. 594, 614, 73 S. Ct. 872, 883, 97 L. Ed. 1277 (1953)). Whether a producer's combined products should be considered as separate can be decided only by looking [**35] at consumer behavior. It is the relationship of the producer's selling decision to market demand, not the physical characteristics of the products alone, that determines the existence of legally separable products.¹⁴

[**36] [*1290] There was no separation between the pharmacy benefit and the restrictions on the sources from which drugs can be purchased on these principles. Insureds, the consumers, certainly did not consider these as two separate products. In deciding whether to buy the pharmacy benefit, they made just one decision, comparing the expected cost of the benefit plus copayments for drug purchases against the expected cost of drugs bought at the independent pharmacies. The risk insureds sought to transfer was the risk of high pharmacy bills. The product these consumers sought was a means by which they could satisfy their drug needs on favorable terms. Their purchase of drugs in the required manner was the consummation of the pharmacy benefit, not an unwanted and unnecessary product tied to the desired product.

To treat the pharmacy benefit as separate from the drug purchase provisions makes no more sense than treating a contract granting an option with respect to an item as a product distinct from that consisting of the terms on which the option is to be exercised. The entire option is one product.

This conclusion is not at odds with the Supreme Court's functional division of [**37] Provider's role into risk distribution and cost reduction. Provider performed both functions with one product. It differs not from an offer to perform garden maintenance. To maintain a garden requires many tasks of a different nature. The offer, however, is of a single product.

Nor does the split payment for the benefit, requiring an initial premium and then a copayment with each purchase, indicate two products. Copayment's purpose, whatever it might be, does not split the drug purchase terms of the pharmacy benefit from the pharmacy benefit itself. It functions no differently than would a provision in the offer to perform garden maintenance that required the owner of the garden to supply the fertilizer.

No doubt some insureds would have preferred to receive cash from Provider and then to buy their drugs from Association's members had their prices been comparable to those available under the pharmacy benefit. This

¹⁴ That the product determination hinges on market demand is perhaps clearest in the trademark cases. If consumers seek only the general services of the franchisees, a franchisor cannot tie its trademark to purchase of component goods used in operating franchises. In this "business format" system, consumers "have no reason to associate with the trademark." Baskin-Robbins, 664 F.2d at 1353 (discussing *Chicken Delight*). Because franchisees can satisfy consumer demand by using "commonplace" items and applying the franchisor's general methods, coerced purchase of supplies from the franchisor forces consumers to pay for component products they don't really want. The coerced purchase of supplies thus can only have an anticompetitive motive. *Id.* In a "distributor" franchise, on the other hand, consumers are drawn to the franchise because its trademark indicates the availability of the franchisor's quality component products. "The franchised outlets serve merely as conduits through which the trademarked goods of the franchisor flow to the ultimate consumer." *Id.* To prevent the franchisor from forcing franchises to use only company products would prevent consumers from effecting their market choices. The legality of the franchise arrangement thus turns on the court's perception of its place in consumer demand. See generally Hamro v. Shell Oil Co., 674 F.2d 784, 787-88 (9th Cir. 1982).

contingent preference does not demonstrate the existence of two products. It merely shows that Provider's pharmacy benefit product would have been less appealing had Association members' prices been lower.

In conclusion, we find no support for a second tying [**38] claim. As we stated in *Hirsh*, [HN12](#)[[↑]] "rules governing tying arrangements are designed to strike solely at practices employed to impede competition on the merits." [674 F.2d at 1348](#). Provider did not impede, but rather stimulated, competition within the pharmaceutical market. We therefore proceed to Association's remaining charge.

VII.

THE ALLEGED BOYCOTT TO EXCLUDE ASSOCIATION'S MEMBERS FROM PROVIDER'S BUSINESS

The most favorable interpretation of Association's boycott complaint yields charges of a refusal to deal, an attempt to monopolize, and an exclusive purchasing agreement. The district court, in its amended opinion, dismissed part of this cause of action -- the part that rested on Provider's contract with its insureds -- under the McCarran-Ferguson Act. We have already affirmed the exemption for Provider's health insurance policies. The court later granted summary judgment against Association on the merits of the residual claims [*1291] (based on Provider's contract with Pharmacy).¹⁵ We address these next.

[**39] We find no evidence, even interpreting the record most favorably toward Association, that requires that we reverse the district court's grant of summary judgment to Provider on the merits of the boycott claim. Association treated the health insurance contract as the end product of a wide group of conspirators that included Provider, Pharmacy, affiliated physicians, public body signatories, employer signatories, and labor unions. It alleged that these conspirators, by establishing the pharmacy benefit while refusing to deal with Association's members, sought to drive independent pharmacies from the market.

Association has done little, however, to support its charges. Some evidence of concerted activity directed at the alleged victims of the boycott must be offered for the case to survive summary judgment. The failure to meet this requirement enables us to dispose of Association's claims of a conspiracy between Provider and Pharmacy, on the one hand, and various physicians, public and private signatories of the health plan, and labor unions, on the other. Association has not pursued its charges against any of the latter group. [HN13](#)[[↑]] Although conspiracy sufficient to survive summary [**40] judgment may be inferred from circumstantial evidence, the plaintiff must come forward with "significant probative evidence" that supports its conclusion. [Ron Tonkin Gran Turismo, Inc. v. Fiat Distributors, Inc.](#), 637 F.2d 1376, 1386 n. 9 (9th Cir.), cert. denied, 454 U.S. 831, 102 S. Ct. 128, 70 L. Ed. 2d 109 (1981); [Blair Foods, Inc. v. Ranchers Cotton Oil](#), 610 F.2d 665, 672 (9th Cir. 1980).

The possibility of a conspiracy between Provider and Pharmacy is no better supported. Whether Pharmacy be viewed as the sole distributor of Provider's products, administering a package of benefits created by the health care provider, or as a supplier of products under contract to Provider, the arrangement constitutes a lawful scheme of vertical distribution. In the aftermath of [Continental T.V., Inc. v. GTE Sylvania, Inc.](#), 433 U.S. 36, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977), [HN14](#)[[↑]] we have established narrow grounds for imputing per se illegality to such restrictions: they must "always or almost always tend to restrict competition and decrease output [and not] 'increase economic efficiency and render markets more, rather than less, competitive.'"¹⁶ [Krehl v. Baskin-Robbins Ice Cream Co.](#), 664 F.2d 1348, 1356 (9th Cir. 1982) (quoting [Broadcast Music, Inc. v. CBS](#), 441 U.S. 1, 19-20, 99 S. Ct. 1551, 1562, 60 L. Ed. 2d 1 (1980)); see, e.g., [A.H. Cox & Co. v. Star Machinery Co.](#), 653 F.2d 1302, 1305 & nn. 3 & 5 (9th Cir. 1981); [Ron Tonkin](#), 637 F.2d at 1381-82, 1385-88. There is no indication that the arrangement

¹⁵ The district court first granted partial summary judgment against Association on the second (boycott) cause of action. It also granted summary judgment on the third (tying) cause of action, but only for violations based on the insurance contract, not those resting on the agreement between Provider and Pharmacy. It amended its opinion to issue full judgment on the third cause of action and only partial summary judgment on the second. Nevertheless, in its final opinion the court decided on the merits those portions of both the second and third causes of action that rested on the agreement between Provider and Pharmacy. Our decision here does not turn on the scope of the McCarran-Ferguson exemption actually granted in the district court's earlier opinion.

between Provider and Pharmacy would "always" have -- or has ever had -- the proscribed effect. Therefore, it does not constitute a per se violation of the Sherman Act.

Association fares no better under rule of reason analysis. [HN15](#) Its burden below was to uncover either anticompetitive intent or specific anticompetitive effects. [A. H. Cox, 653 F.2d at 1306](#). It demonstrated neither. Provider's purpose in structuring the provision of drugs for its policyholders was to meet the terms of its policy at the least cost. Association has not shown that Provider or Pharmacy sought to injure competition in the pharmaceutical market. Provider even considered having Association's members join it; but they showed no interest in handling Provider's business at its prices.

[*1292] There is also no evidence of injury to competition. Association complains [**42] of its members' business losses, but [HN16](#) economic injury to competitors is not a per se violation of the antitrust laws. It is injury to the market, not to individual firms, that is significant. See [A.H. Cox, 653 F.2d at 1307](#); [Ron Tonkin, 637 F.2d at 1388](#); [Kaplan v. Burroughs Corp., 611 F.2d 286, 291 \(9th Cir. 1979\)](#), cert. denied, 447 U.S. 924, 100 S. Ct. 3016, 65 L. Ed. 2d 1116 (1980). A plaintiff must show that the defendant intended to or did reduce the ability of others to compete before it has shown an actionable restraint of trade. See [Knutson v. Daily Review, Inc., 548 F.2d 795, 803 \(9th Cir. 1976\)](#), cert. denied, 433 U.S. 910, 97 S. Ct. 2977, 53 L. Ed. 2d 1094 (1977). In an openly competitive market the inefficient fail; in a non-competitive system the efficient are precluded from competing. We cannot say that Association's members have demonstrated that they are the efficient barred from competing rather than the inefficient who have failed. To hold otherwise would require that the Provider-Pharmacy arrangement be treated as illegal per se. This we cannot do. Provider's arrangement with Pharmacy was simply an exercise of its freedom to contract with [**43] whomever it chose in order to sustain itself in the marketplace. [HN17](#) The general freedom of a single business to select its partners has been an established part of [antitrust law](#) since [United States v. Colgate & Co., 250 U.S. 300, 39 S. Ct. 465, 63 L. Ed. 992 \(1919\)](#).¹⁶

[**44] Neither of the other two charges that emerges from a liberal reading of Association's boycott complaint has any validity. There is insufficient evidence of either intent or predatory conduct to support an attempted monopolization claim. See [Moore v. Jas. H. Matthews & Co., 550 F.2d 1207, 1219 \(9th Cir. 1977\)](#); see generally [William Inglis & Sons Baking Co. v. ITT Continental Baking Co., 668 F.2d 1014, 1027-39 \(9th Cir. 1981\)](#), cert. denied 459 U.S. 825, 103 S. Ct. 57, 74 L. Ed. 2d 61, 103 S. Ct. 58 (1982). As Association has not proven this charge, we need not decide whether an attempted monopolization claim resting solely on Provider's direct provision of drugs would qualify for McCarran-Ferguson exemption. Finally, as already indicated, we reject Association's argument that Provider's agreement to supply discount drugs to subscribers who would patronize its pharmacy was an illegal purchasing agreement. See [supra at pp. 1287-1288](#). There is no merit to any of the boycott claims.

VIII.

ASSOCIATION'S PROCEDURAL MOTIONS

Association seeks to sustain the flickering life of this lawsuit by attacking the district court's denial of its motions to amend and to supplement [**45] its complaint. The trial court did not abuse its discretion by denying these motions.

Motions to amend, we recognize, are commonly granted. [HN18](#) Although within the trial court's discretion, leave to amend "shall be freely given when justice so requires." [Fed.R.Civ.P. 15\(a\)](#); see [Foman v. Davis, 371 U.S. 178, 182, 83 S. Ct. 227, 230, 9 L. Ed. 2d 222 \(1962\)](#); [McCartin v. Norton, 674 F.2d 1317, 1320 \(9th Cir. 1982\)](#);

¹⁶ This freedom extends to the manufacturer who for any lawful reason terminates one distributor or supplier and puts another in its place, even if the terminated businessman is put out of business. See [Chandler Supply Co. v. GAF Corp., 650 F.2d 983, 989 \(9th Cir. 1980\)](#); [Las Vegas Sun, Inc. v. Summa Corp., 610 F.2d 614, 619-20 \(9th Cir.\)](#), cert. denied, [447 U.S. 906, 100 S. Ct. 2988, 64 L. Ed. 2d 855 \(1980\)](#); [Bushie v. Stenocord Corp., 460 F.2d 116, 119 \(9th Cir. 1972\)](#); [Joseph E. Seagram & Sons, Inc. v. Hawaiian Oke & Liquors, Ltd., 416 F.2d 71, 76 \(9th Cir. 1969\)](#), cert. denied, [396 U.S. 1062, 90 S. Ct. 752, 24 L. Ed. 2d 755 \(1970\)](#). It easily applies to the case at hand, where Provider did not drop an old associate but merely decided not to initiate contracts with companies that would not deal with it on acceptable terms.

701 F.2d 1276, *1292L 1983 U.S. App. LEXIS 29952, **45

United States v. Webb, 655 F.2d 977, 979 (9th Cir.1981); Howey v. United States, 481 F.2d 1187, 1190 (9th Cir.1973). **HN19**[] We are required to review the exercise of the trial court's discretion to deny a motion to amend strictly. Thus, where the record does not clearly dictate the district court's denial, we have been unwilling to affirm absent written [*1293] findings, Webb, 655 F.2d at 980, and have reversed findings that were merely conclusory, Howey, 481 F.2d at 1190-91.

At the same time, **HN20**[] futile amendments should not be permitted. Foman, 371 U.S. at 182, 83 S. Ct. at 230; Smith v. Commanding Officer, Air Force Accounting, 555 F.2d 234, 235 (9th Cir.1977). In this case, it is clear that Association's motion should be denied for this reason. [**46] The district court rejected the motion because it was untimely, and for "other reasons." The most important "other reason" was futility. Asked the purpose of amendment, Association's attorney could only answer vaguely that it would "bring damages up to the current" and "clarify the point" that Pharmacy was a for profit institution. Association has not used Pharmacy's profit status to support any of its claims. And it does not have compensable damages unless it proves its case. It is clear that the district court believed that amendment on these lines could not affect the outcome of this lawsuit. We agree. We find no reason to overturn its decision.

The judgment of the district court is affirmed.

AFFIRMED.

End of Document

DEAK-PERERA HAWAII, INC. v. DOT

United States District Court for the District of Hawaii

March 7, 1983

CIVIL NO. 82-0334

Reporter

1983 U.S. Dist. LEXIS 18754 *

DEAK-PERERA HAWAII, INC., a Hawaii corporation, Plaintiff, vs. DEPARTMENT OF TRANSPORTATION, STATE OF HAWAII, RYOKICHI HIGASHIONNA, in his official capacity as the Director of the Department of Transportation for the State of Hawaii, OWEN MIYAMOTO, in his official capacity as Chief of the Airport Division of the Department of Transportation of the State of Hawaii, Defendants, and CITICORP (U.S.A.), INC., Intervenor.

Core Terms

airport, immunity, state-action, contracts, sovereign, Sherman Act, anti trust law, instrumentality, political subdivision, supervised, wine, governmental function, Transportation, facilities, cases

Governments > Local Governments > Claims By & Against

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN1[Exemptions & Immunities, Parker State Action Doctrine

To have state-action immunity, the agency must show that (1) it is an agent or instrumentality of the state acting as sovereign and as such is entitled to state-action immunity; or (2) as an independent political subdivision, it meets the criteria of the two-prong analysis: a clearly articulated and affirmatively expressed state policy with adequate review and supervision by the state.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN2[Exemptions & Immunities, Parker State Action Doctrine

When it is not clear that the state is acting as a sovereign, the crucial questions are whether there has been a "clearly articulated and affirmatively expressed" state policy, and if that policy is being "actively supervised" by the state.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

[HN3](#) [down] Exemptions & Immunities, Parker State Action Doctrine

A state, acting as sovereign, is immune from federal antitrust laws unless such laws are overridden by specific national laws.

Transportation Law > Air & Space Transportation > Airports > General Overview

Transportation Law > Air & Space Transportation > Airports > Governmental Liability

Transportation Law > Air & Space Transportation > Maintenance & Safety

[HN4](#) [down] Exemptions & Immunities, Parker State Action Doctrine

The operations of the state's airports are expressly recognized as "public and governmental functions, exercised for a public purpose, and matters of public necessity."

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Transportation Law > Air & Space Transportation > Airports > Governmental Liability

Transportation Law > Air & Space Transportation > Airports > General Overview

Transportation Law > Air & Space Transportation > Maintenance & Safety

[HN5](#) [down] Exemptions & Immunities, Parker State Action Doctrine

The function of the airport system in Hawaii is viewed as a fundamental government function. As such, actions taken to manage and develop the airport system must initially be viewed as acts of the state in its sovereign capacity for the public good.

Opinion

[*1] AMENDED DECISION

This matter came before the court on cross motion for summary judgment pursuant to [Rule 56 of the Federal Rules of Civil Procedure](#). The arguments were heard on September 1, 1982.

The motions sought to determine the legal issues of whether or not defendants, the State of Hawaii's Department of Transportation, its director Ryokichi Higashionna and Airport Chief Owen Miyamoto (collectively the DOT), were entitled to "state-action immunity" under [Parker v. Brown, 317 U.S. 341 \(1943\)](#), or were entitled to [Eleventh Amendment](#) immunity; or whether plaintiff, Deak-Perera Hawaii, Inc. ("Deak") was entitled to a permanent injunction and judgments as to violations of state and federal antitrust statutes.

An order was entered on September 2, 1982, granting defendants' motion on the basis of Parker v. Brown immunity and denying plaintiff's motion.¹ For the reasons herein given, it was unnecessary for the court to reach the Eleventh Amendment issue or the alleged violation of state and federal antitrust statutes.

[*2] FACTUAL BACKGROUND

Hawaii, as an island state, has always been especially dependent upon ships and, more recently, planes for inter-island and mainland communication and transportation.² Even before commercial aviation came to the islands, the Territorial legislature had appropriated funds for what has become today the state's commercial airport system for each and all of the Hawaiian Islands.³

The importance of the airport system is further emphasized by the expansion of tourism as a mainstay of the State economy. [n4] The nearly four million tourists coming to Hawaii each year from the continental United States, Canada, Japan, Australia, and literally all parts of the globe, depend almost entirely upon the availability of efficient and dependable airport facilities.⁵ The development, management, and financing of the airport system is governed by an enabling Act of the Hawaiian Legislature.⁶ In effect, the support of this airport system, [*3] under the Legislative mandate, must be met by the Airport Revenue Fund. This is made up of rents, concessions, Aircraft landing fees, and the aviation fuel tax. For the last few years, the concession fees have provided the lion's share of the Fund's revenues.⁷

The concession activities at Honolulu International Airport (HIA) encompass the full range of facilities one might find at a large airport. At HIA, the duty-free concession is the largest revenue producer.⁸ Other concessions include bars, restaurants, and snack bars; newsstands, fruit and packaged-food stands; barber shop, shoeshine stand, telegrams and flight insurance, and the parking lot.⁹ Also, the Bank of Hawaii maintains a branch at HIA.¹⁰

[*4] Most of these concessions are "exclusive", including the ground transportation for rent-a-car, airport shuttle bus, and airport taxi.¹¹ The lei stands are about the only "non-exclusive" concessions at HIA.¹²

¹ Order Granting and Denying Motions for Summary Judgment was amended on September 3, 1982, to accelerate dissolving the temporary restraining order when Deak abandoned the premises earlier than expected. The order was further amended by order filed December 1, 1982, after a hearing on plaintiff's motion to alter the previous orders concerning payment of rents due to State.

² Horvat, *Above the Pacific* (1966) at 63. Commercial aviation did not begin until 1929. See Hawaiian Aeronautics Commission, First Annual Report, 1947-48 (1948) at 10.

³ Act 176, Session Laws of Hawaii 1925. See n. 2, *supra*.

⁵ See generally Hawaii Business (Jan. 1982); Hawaii Business (Mar. 1982); and Hawaii Business (July 1982).

⁶ Haw. Rev. Stat. Ch. 261 (Supp. 1981). See nn. 32-35, 44, 45, and 48, *infra*.

⁷ In fiscal year 1981, the concession fees amounted to 76% of operating revenues. See DOT Annual Report (1982) at 30.

⁸ See Defendant State of Hawaii's Pre-Trial Brief, filed Aug. 20, 1982, at 7.

⁹ *Ibid.*

¹⁰ Bank of Hawaii, Airport Branch, also provides some limited foreign currency exchange. However, the amount may be considered as de minimus relative to the whole market at HIA.

¹¹ Each of the "exclusive" ground transportation contracts at HIA is involved in an antitrust suit: Civ. No. 79-0146, Pacific Auto Rental Corp. dba Dollar Rent-A-Car Systems v. State of Hawaii, et al., filed April 2, 1979; Civ. No. 79-0383, Charley's Taxi Radio Dispatch Corp. v. SIDA of Hawaii, Inc., et al., filed August 31, 1979; and Civ. No. 80-0060, Charley's Tour & Transportation, Inc. v. Interisland Resorts, Ltd., et al., filed February 2, 1980. The Pacific Auto case has been consolidated in M.D.L. No. 338, Airport Car Rental Antitrust Litigation and is assigned to District Judge William W. Schwarzer in the Northern District of California.

¹² See n. 8, *supra*.

For the past twenty years, Deak has operated foreign exchange concessions at HIA. For the last ten years, Deak has enjoyed exclusive contracts between itself and the Department of Transportation for the HIA foreign exchange concession.¹³ In the 1982 bids, Deak lost the bid to Citicorp (USA), Inc.,¹⁴ [*5] which bid almost two and one-half (2 1/2) times as much as Deak for the five-year exclusive concession.

The foreign exchange concession at HIA consists of five physical locations. Only one of these locations is sufficiently large enough for office space and a secure area, as well as a counter; all others are merely counter space.¹⁵ Deak has also maintained a sixth location at the Japan [*6] Airlines lounge servicing passengers under a private contractual agreement with that airline.¹⁶

DECISION

The gravamen of plaintiff's action is that defendants have violated federal **antitrust law** by the issuance of an exclusive lease for the foreign exchange concession at HIA.¹⁷ Defendants have responded that they are shielded from such a suit under the [Parker v. Brown, 317 U.S. 341 \(1943\)](#), state-action immunity doctrine. For the DOT **HN1**[¹⁸] to have state-action immunity in its grant of the exclusive concession here in question, it must either show that (1) it is an agent or instrumentality of the state acting as sovereign and as such is entitled to state-action immunity; or (2) as [*7] an independent political subdivision, it meets the criteria of the [California Retail Liquor Dealers' Assn. v. Midcal Aluminum, Inc., 445 U.S. 97 \(1980\)](#) two-prong analysis (the Midcal Test), viz: a clearly articulated and affirmatively expressed state policy with adequate review and supervision by the state.

PART I: PARKER V. BROWN STATE-ACTION IMMUNITY

Here, as in all decisions on claims of state-action immunity, the perimeters of state-action immunity as defined in Parker v. Brown and refined in its progeny must be clearly understood.¹⁸ Actually, it is a misconception to say that the state-action doctrine was "defined" in Parker v. Brown, the [*8] doctrine has always existed in our federalist system, and Parker v. Brown merely restated and applied that doctrine to the antitrust laws:

¹³ Deak was the "sole bidder" in both 1972 and 1977 for five-year exclusive contracts. Three bids were received by June 17, 1982, for the exclusive five-year contract to commence July 1st. At the opening it appeared Citicorp (USA), Inc. was the high bidder at \$1.25 million for the five years. Deak was second high bidder at \$505,000 for the same period. Deak immediately filed the present action.

¹⁴ Citicorp (USA), Inc. is a Delaware corporation and a subsidiary of Citibank International. Citibank International originally attempted to intervene. Such was denied after a finding that Citicorp (USA), Inc. was the proper party in interest. Eventually, Citicorp (USA), Inc. did intervene in its own right and has submitted briefs and argued to this court on behalf of the state's motions.

¹⁵ The locations are designated as Space No. 346-118 comprising counter area of 121 square feet; Space No. 346-111A comprising counter area of 196 square feet; Space No. 344-237 comprising counter area of 25 square feet; Space No. 344-210 comprising counter space of 68 square feet (soon to be replaced by Space No. 342-262 comprising counter and office area of 690 square feet).

¹⁶ This was apparently a portable booth arrangement used only for the "package tour" groups arriving on Japan Airlines.

¹⁷ The antitrust claims are brought under both the Sherman Act, [15 U.S.C. §§ 1 & 2](#); and the Clayton Act, [15 U.S.C. § 16](#). Plaintiff also alleges violations of state antitrust laws and violations of state bidding procedures. The latter count, on bidding procedures, has been dismissed by a previous order (Order Granting Intervenor's Motions for Dismissal of Count V and for Protective Order, filed September 2, 1982). The other counts need not be reached unless plaintiff hurdles the defenses to the alleged Sherman Act violations.

¹⁸ [Community Communications Co., Inc. v. City of Boulder, Colorado, 455 U.S. 40, 102 S.Ct. 835 \(1982\)](#); [California Retail Liquor Dealers' Assn. v. Midcal Aluminum, Inc., 445 U.S. 97 \(1980\)](#); [City of Lafayette v. Louisiana Power & Light Co., 435 U.S. 389 \(1978\)](#); [Cantor v. Detroit Edison Co., 428 U.S. 579 \(1976\)](#); [Goldfarb v. Virginia State Bar, 421 U.S. 773 \(1975\)](#); reh. denied [423 U.S. 886 \(1975\)](#), and [New Motor Vehicle Bd. of Calif. v. Orrin W. Fox Co., 439 U.S. 96 \(1978\)](#) to cite but a few.

In a dual system of government in which, under the Constitution, the states are sovereign, save only as Congress may constitutionally subtract from their authority, an unexpressed purpose to nullify a state's control over its officers and agents is not lightly to be attributed to Congress.

317 U.S. at 351.

The United States Supreme Court has not decided a state-action case based on the state acting as sovereign since Parker.¹⁹ In the Parker decision, Mr. Chief Justice Stone approvingly cited *Lowenstein v. Evans*, 69 F. 908 (C.C.D.S.C. 1895),²⁰ which [*9] held that South Carolina's regulation of the liquor trade was the act of a state as sovereign. The fact that the law was administered by certain state agents did not create a monopoly for and in those individuals and thus preclude immunity from the federal antitrust laws.²¹

[*10] In Parker, the Court had to decide the further question of whether state-action immunity could be extended to give protection to "private" individuals -- the raisin growers. To that end, the Court examined the state's involvement in the regulation of raisin price setting. The Court determined that the state involvement was sufficient since the regulation was mandated by state law; the recommended prices were reviewed by the state commission; and the final decision rested with the state acting through the State Agriculture Proration Advisory Commission. 317 U.S. at 346-50.

In short, the Parker Court found that the raisin prorate program derived its authority from the legislative command of the state and was not designed to create a monopoly by force of individual agreement or combination. The Court concluded that:

We find nothing in the language of the Sherman Act or its history which suggests that its purpose was to restrain a state or its officers or agents from activities directed by its legislature.

317 U.S. at 350-351.

The Court noted that while a state may be considered a "person" for purposes of suing under the antitrust laws, the State of California was not in [*11] that category of "persons" that the Sherman Act intended to restrain. 317 U.S. at 351, (citing *Georgia v. Evans*, 316 U.S. 159 (1942)).

Parker v. Brown, and most of its progeny, have never denied nor even suggested that Congress intended to subject states, as sovereigns, to federal antitrust laws. Rather, all have denied immunity to "private parties" or "political subdivisions" seeking to cloak their alleged monopolistic actions under the "gauzy cloak of state involvement".²² In each recent case before the Supreme Court, the question has been whether some entity other than the state may claim state-action immunity. None of those cases has held that a state acting in its sovereign capacity should be denied immunity from federal antitrust laws.

¹⁹ 317 U.S. 341 (1943). See also n. 18. All of these cases address the extension of state-action immunity to persons or corporations claiming immunity under state authority. None of the cases suggest that the state is acting as sovereign and that such action is being questioned.

²⁰ Chief Justice Stone cited Lowenstein to compare it with *Olsen v. Smith*, 195 U.S. 332 (1904). Olsen held that a state may regulate pilotage, even though such regulates commerce, until such time as federal laws should override or preempt the area. The comparison was that in Lowenstein the lower court had held that a state was neither a "person" nor a "corporation" within the meaning of the Act of Congress dealing with monopolies and trusts. Therefore, the South Carolina law regulating the liquor trade was a state monopoly in those individuals; rather, they were mere instrumentalities of the state acting as and for the state. As such, the monopoly was immune from antitrust prosecution as an action of the state as sovereign.

²¹ ²¹ Ibid.

²² See generally n. 18, supra. See specifically *Midcal*, 445 U.S. at 106.

All of those decisions are perfectly consistent with our federalist system and the purpose of the federal antitrust laws viz., to protect the public from unreasonable interference with competition in interstate and foreign commerce. Where private parties are attempting to monopolize an area of trade, the public has every right to expect protection; with governmental [*12] bodies, the people have a more direct recourse -- the vote.

While federal laws can override state laws which are inconsistent with national law,²³ the Sherman Act has not been interpreted to override all state laws which impinge on competition. In the latter situation, [HN2](#)[[↑]] when it is not clear the state is acting as a sovereign, the crucial questions are whether there has been a "clearly articulated and affirmatively expressed" state policy, and if that policy is being "actively supervised" by the state. [Midcal, 445 U.S. at 105](#) (quoting [City of Lafayette v. Louisiana Power & Light Co., 435 U.S. 389 at 410](#)).²⁴ The Midcal test was neither new nor unexpected when applied to "private individuals" seeking state-action immunity,²⁵ but the application of the Midcal test to "public officials, agencies and treasuries" has created substantial confusion and apprehension both in the courts and in public officials generally.²⁶

[*13] Nevertheless, even after Lafayette and Midcal, and even after [Community Communications Co., Inc. v. City of Boulder, Colorado, 455 U.S. 40, 102 S.Ct. 835 \(1982\)](#), it is still clear that [HN3](#)[[↑]] a state, acting as sovereign, is immune from federal antitrust laws unless such laws are overridden by specific national laws.²⁷ Therefore, this court must initially determine whether or not the DOT was acting as "the state" or as some independent "political subdivision". If DOT acted "as the state", then obviously it can be afforded state-action immunity; if it was acting independently and was merely seeking to protect itself under some "gauzy cloak of state involvement", then the court must continue on to the Midcal test.

The cases of [E.W. Wiggins Airways, Inc. v. Massachusetts Port Authority, 362 F.2d 52 \(1st Cir. 1966\)](#), and [New Mexico v. American Petrofina, Inc., 501 F.2d 363 \(9th Cir. 1974\)](#), underscore [*14] the need for this court to examine the threshold question of whether or not the challenged acts are done by the state in its sovereign capacity, before considering a secondary examination under Midcal.

Wiggins dealt with the authority of the Massachusetts Port Authority (MPA) to enter into exclusive contracts in the operation of Logan and Butler-Boston Airports. The court held that the MPA was an "instrumentality or agency" of the Commonwealth of Massachusetts and, as such, was acting in an official capacity for and as the state. [362 F.2d at 55-56](#). In essence, the court found the MPA was acting for the state in the exercise of a valid state governmental function and, therefore, was entitled to state-action immunity under Parker. [Id. at 55](#).

In Petrofina, the State of New Mexico brought suit for alleged antitrust violations by various asphalt suppliers. The defendants counterclaimed that the state and some of its political subdivisions had conspired in violation of the

²³ Cf. [Bates v. State Bar, 433 U.S. 350 \(1977\)](#) and [Toomer v. Witsell, 334 U.S. 385 \(1948\)](#). See also [Gibson v. Berryhill, 411 U.S. 564 \(1973\)](#).

²⁴ Actually one may argue that this test was applied in [Parker v. Brown, 317 U.S. 341 \(1943\)](#). In that case, the court sought to determine whether or not the state was the controlling force behind the raisin subsidy. In effect, the court was looking for adequate state authority to fix the price and sufficient state involvement in review of the price set by the private raisin growers. Chief Justice Stone did so find.

²⁵ See [Goldfarb, 421 U.S. 773 \(1975\)](#); [Cantor, 428 U.S. 579 \(1976\)](#); and [Bates v. State Bar, 433 U.S. 350 \(1977\)](#).

²⁶ Areeda, Antitrust Immunity for "State Action" After Lafayette, 95 Harv. L. Rev. 435, 438-439. See also [Lafayette, 435 U.S. at 440-441](#) and 441 n. 32 (dissenting opinion of Stevens, J.).

²⁷ See nn. 18 and 23, supra. An examination of these cases indicates none dealt with a state acting as sovereign. Rather, all concerned attempts by private individuals or independent political subdivisions seeking immunity for their actions under the "gauzy cloak of state involvement."

Sherman Act. After discussing the meaning of the word "person" in the Sherman Act,²⁸ and examining the purpose of the Sherman Act in relation to the acts of a state as sovereign, the court stated:

Since the [*15] suit here is directly against the state, there can be no such question [as to whether or not the conduct was committed by the state], and the Whitten [[George R. Whitten, Jr., Inc. v. Paddock Pool Builders, Inc., 424 F.2d 25, 30 \(1st Cir. 1970\)](#)]²⁹ analysis is inapplicable. [Footnote omitted.] The "legislative mandate" test is useful, indeed possibly necessary, when there is doubt if the defendant or the regulatory scheme is really an instrument of the state. But when there is no doubt that the defendant is the state, the "legislative mandate" analysis is unnecessary.

[*16] [501 F.2d at 370.](#)

More recent Ninth Circuit cases and the United States Supreme Court cases since 1974 have indicated that there now is even more than a "valid argument" against "automatically" giving counties and cities state-action immunity.³⁰ Such political subdivisions may be subjected to the Midcal analysis. However, nothing since Petrofina has eroded its central theme that when it is the state itself being sued or acting, then it is entitled to Parker immunity against the Sherman Act and the Midcal analysis is "unnecessary".³¹

[*17] The DOT is legally an instrumentality of the State of Hawaii. It is clearly to be distinguished from an independent "political subdivision" of a state, such as a city or county and their administrative instrumentalities. Obviously, the latter fall under the Lafayette-Midcal rubric and would be subject to Midcal's additional two-prong test. For the purpose of this case, it is manifest that the DOT has been delegated the responsibility for the construction, operation and maintenance of all the state-operated commercial airports in Hawaii.³² [HN4](#) The

²⁸ The appellate court distinguished the definition of "person" in [Georgia v. Evans, 316 U.S. 159 \(1942\)](#) as permitting a state to bring suit as a "person" under the Sherman Act with the definition in [Parker v. Brown, 317 U.S. 341 \(1943\)](#) as not permitting a state to be sued as a "person" under the same act.

²⁹ The Whitten test was a precursor to the Midcal analysis of whether or not there has been a "clearly articulated and affirmatively expressed" state policy and, if so, whether it was being "actively supervised" by the state. In the omitted footnote in Petrofina, the court opined that there could not be any valid argument that a county was a private party masquerading under the umbrella of state authority. [501 F.2d at 370, n. 15.](#)

³⁰ [Ronwin v. State Bar of Arizona, 686 F.2d 692 \(9th Cir. 1982\)](#) (amended opinion) citing [Lafayette, 435 U.S. at 408](#); and [City of Boulder, 455 U.S. 40, 102 S.Ct. at 842](#), state that the Court has rejected such automatic extension of Parker immunity to government entities "simply by reason of their status as such." See also, [Benson v. Arizona State Board of Dental Examiners, 673 F.2d 272](#) (9th Cir. March 29, 1982); [Miller v. Oregon Liquor Control Commission, 688 F.2d 1222](#) (9th Cir. July 7, 1982); and [Knudsen v. Nevada State Dairy Commission, 676 F.2d 374](#) (9th Cir. May 3, 1982).

Because of the rather unclear and incorrect analysis as to what sort of "government entities" might require Midcal analysis other than a "state commission, state board, and a state department" mentioned in Ronwin, this court has performed a Midcal analysis for this case, infra, Part II.

³¹ As has been suggested earlier, [Parker, 317 U.S. 341 \(1943\)](#) and all of its progeny, including [City of Boulder, 455 U.S. 40, 102 S.Ct. 835 \(1982\)](#), have dealt only with political subdivisions seeking to assume the immunity granted to a state as sovereign. None of the United States Supreme Court decisions hold or suggest that the states acting as sovereigns through their officers and agents are to be denied state-action immunity. The section on Midcal analysis as applied to the present case, infra, demonstrates why such a holding would be logically superfluous.

³² [Haw. Const. Art. V, § 6](#) provides for not more than twenty principal departments under the supervision of the governor. Haw. Rev. Stat. Ch. 26 creates seventeen executive departments; [Haw. Rev. Stat. § 26-19](#) provides for a department of transportation, headed by a director, which "shall establish, maintain, and operate transportation facilities of the State, including highways, airports, harbors. . . ."

operations of the state's airports are expressly recognized as "public and governmental functions, exercised for a public purpose, and matters of public necessity."³³ Under other sections of Hawaii Revised Statutes, the DOT is authorized to enter into contracts to provide for goods and services at the airports,³⁴ and is required to "generate sufficient revenues from its airport properties to meet all of the expenditures of the statewide system of airports."³⁵

§ 261-4 Airports, general. (a) Establishment, operation, maintenance. The department of transportation may on behalf of and in the name of the State, out of appropriations and other moneys available or made available for such purposes, plan, acquire, and establish, construct, enlarge, and improve in the manner herein provided, maintain, equip, operate, regulate, and protect, airports and air navigation facilities, including the construction, installation, equipment, maintenance, and operation at airports of buildings and other facilities for the servicing of aircraft or for the comfort, accommodation, and convenience of air travelers, and including protection against airport hazards. For such purposes the department may, by purchase, gift, devise, lease, condemnation in accordance with chapter 101, or otherwise, acquire property, real or personal, or any interest therein, including the property, rights, estates, and interests mentioned in section 262-11. The department may acquire rights and interests in airports owned or controlled by others, for the purpose of meeting a civilian need which is within the scope of its functions, even though it does not have the exclusive control and operation of such airports. No officer, board, or department of the State, or municipality, shall perform any function which is within the jurisdiction of the department without its approval, except for military purposes.

(b) Acquisition of real property. In the acquisition of real property and interests therein, the department of accounting and general services shall assist the department of transportation at its request, and assign thereto state officers and employees under its supervision for the making of surveys, abstracts, and otherwise as may be of assistance, for which services the department of transportation shall pay out of the appropriations available to it, unless the department of accounting and general services has a general fund appropriation for such services.

(c) Structures and improvements. All structures and improvements to land shall be initiated by the department of transportation and shall be constructed or made by or under the comptroller, in conformity with plans and specifications approved by the department of transportation, for which purpose the department of transportation shall make allotments of the funds under its control for expenditure by the comptroller and for services of the department of accounting and general services for which the department has no general fund appropriation.

(d) Use of state and municipal facilities and services. In carrying out this chapter, the department of transportation may use the facilities and services of other agencies of the State and of the municipalities of the State to the utmost extent possible, and the agencies and municipalities shall make available their facilities to the department of accounting and general services with respect to services and facilities in addition to those specified by subsections (b) and (c). [L 1947, c 32, pt of § 1; RL 1955, § 15-9; am L Sp 1959 2d, c 1, §§ 12, 26]

³³ Haw. Rev. Stat § 261-11:

§ 261-11 Public purpose of activities. The acquisition of any lands or interests therein pursuant to this chapter, the planning, acquisition, establishment, construction, improvement, maintenance, construction, improvement, maintenance, equipment, and operation of airports and air navigation facilities; and the exercise of any other powers granted by this chapter to the department of transportation are declared to be public and governmental functions, exercised for a public purpose, and matters of public necessity. All lands and other property and privileges acquired and used by or on behalf of the State in the manner and for the purposes enumerated in this chapter shall and are declared to be acquired and used for public and governmental purposes and as a matter of public necessity. [L 1947, c 32, pt of § 1; RL 1955, § 15-17; am L Sp 1959 2d, c 1, § 26]

³⁴ Haw. Rev. Stat. § 261-7:

§ 261-7 Operation and use privileges. (a) Under department operation. In operating an airport or air navigation facility owned or controlled by the department of transportation, or in which it has a right or interest, the department may enter into contracts, leases, licenses, and other arrangements with any person:

- (1) Granting the privilege of using or improving the airport or air navigation facility or any portion or facility thereof or space therein for commercial purposes;
- (2) Conferring the privilege of supplying goods, or facilities at the airport or air navigation facility;

[*18] **HN5** The function of the airport system in Hawaii must be viewed as a fundamental government function.

(3) Making available services, facilities, goods, commodities, or other things to be furnished by the department or its agents at the airport or air navigation facility; or

(4) Granting the use and occupancy on a temporary basis by license or otherwise any portion of the land under its jurisdiction which for the time being may not be required by the department so that it may put the area to economic use and thereby derive revenue therefrom.

All the arrangements shall contain a clause that the land may be repossessed by the department when needed for aeronautics purposes upon giving the tenant temporarily occupying the same not less than thirty days' notice in writing of intention to repossess.

Except as otherwise provided in this section, in each case mentioned in paragraphs (1), (2), (3) and (4), the department may establish the terms and conditions of the contract, lease, license, or other arrangement, and may fix the charges, rentals, or fees for the privileges, services, or things granted, conferred, or made available, for the purpose of meeting the expenditures of the statewide system of airports set forth in [section 261-5\(a\)](#), which includes expenditures for capital improvement projects approved by the legislature. Such charges shall be reasonable and uniform for the same class of privilege, service, or thing.

The department shall enter into separate contracts with no more than two persons ("contractors") for the sale and delivery of in-bond merchandise at Honolulu International Airport, in the manner provided by law. Each such contract shall confer the right to operate and maintain commercial facilities within the airport for the sale of in-bond merchandise and the right to deliver to the airport in-bond merchandise for sale to departing foreign-bound passengers.

The department shall grant such contracts pursuant to the laws of this State and may take into consideration:

(1) The payments to be made on in-bond merchandise sold at Honolulu International Airport and on in-bond merchandise displayed or sold elsewhere in the State and delivered to the airport;

(2) The ability of the applicant to comply with all federal and state rules and regulations concerning the sale and delivery of in-bond merchandise; and

(3) The reputation, experience, and financial capacity of the applicant.

The department shall actively supervise the operation of the contractors to insure its effectiveness. The department shall develop and implement such guidelines as it may find necessary and proper to actively supervise the operations of such contractors, and shall include guidelines relating to the department's review of the reasonableness of contractors' price schedules, quality of merchandise, merchandise assortment, operations, and service to customers.

Apart from the contracts described above, during the period ending June 30, 1982, the department shall confer no right upon any person to offer to sell, sell, or deliver in-bond merchandise at Honolulu International Airport.

(b) Under other operation. The department may, by contract, lease, or other arrangement, upon a consideration fixed by it, grant to any qualified person the privilege of operating, as agent of the State or otherwise, any airport owned or controlled by the department; provided that no such person shall be granted any authority to operate the airport other than as a public airport or to enter into any contracts, leases, or other arrangements in connection with the operation of the airport which the department might not have undertaken under subsection (a) of this section.

(c) Miscellaneous fees and charges. The department may fix and regulate, from time to time, reasonable landing fees for aircraft and other reasonable charges for the use and enjoyment of the airports and the services and facilities furnished by the department in connection therewith, including the establishment of a statewide landing fee which may vary among different classes of users such as foreign carriers, air taxi operators and such other classes as may be determined by the director of transportation, for the purpose of meeting the expenditures of the statewide system of airports set forth in [section 261-5\(a\)](#), which includes expenditures for capital improvement projects approved by the legislature.

(d) Liens. To enforce the payment of any charges for repairs or improvements to, or storage or care of any personal property made or furnished by the department or its agent in connection with the operation of an airport or air navigation facility owned or operated by the department, the department shall have liens on the property, which shall be enforceable by it as provided by sections 507-18 to 507-22.

(e) Buildings and land areas for general aviation activities; developmental rates. The department may from time to time establish developmental rates for buildings and land areas used exclusively for general aviation activities at rates not less than fifty per cent of the fair market rentals of the buildings and land areas and may restrict the extent of buildings and land areas to

³⁶ Much as schools, police services, and fire protection, the airport system is vital to the State of Hawaii from both functional and economic points of view.³⁷ As such, actions taken to manage and develop the airport system must initially be viewed as acts of the state in its sovereign capacity for the public good. Under these circumstances, a court must be most cautious about attempting to impose a hindrance or unnecessary burden upon the public officials in the execution of this public duty.³⁸

The DOT, therefore, acts as the state in matters concerning the management of HIA. The DOT, as an instrumentality of the state, has full power to enter into contracts for concessions at HIA, even though monopolistic in nature, to fulfill its mandate to generate sufficient funds to support the statewide airport system. In all of this, the DOT is authorized and required to act and to act in the name of the State of Hawaii. This court can only conclude, therefore, that when the DOT acts, it is the same, in full [*19] part and parcel, as if the State of Hawaii were acting. Therefore, the actions of the DOT, whether they concern contracts or management of Hawaii's airport system, are entitled to state-action immunity as the acts of the State of Hawaii as sovereign.

PART II: THE MIDCAL ANALYSIS

Were it not for what Judge Ferguson, in dissent, in *Ronwin v. State Bar of Arizona*, 686 F.2d 692, (9th Cir. 1982), characterized as the application of "erroneous standards"³⁹ by the majority in determining whether the state agency there in question was exempt from antitrust laws, this court would not feel compelled to apply the Midcal analysis to this case. However, while this court agrees with Judge Ferguson that "[t]he majority incorrectly applies a test of compulsion by asking whether the action of the Committee [on Examinations and Admissions] was required by the state supreme court" (emphasis in original), thereby applying a Midcal analysis to "public" as well as "private" conduct, such an analysis has been made. Having made the analysis, this court finds that even if it were assumed that the DOT is merely a "political subdivision" of the state, there is ample authority from and supervision [*20] by the state to satisfy the Midcal test.

be utilized. [L 1947, c 32, pt of § 1; am L 1949, c 374 § 1; am L 1953, JR 14, § 1; RL 1955, § 15-12; am L Sp 1959 2d, c § 1, 26; am L 1962, c 24, §§ 4, 5; HRS § 261-7; am L 1968, c 20, §§ 3, 4; am L 1972, c 14, § 1; am L 1976, c 235, § 2; am L 1981, c 243, § 2]

³⁵ *Haw. Rev. Stat. § 261-5:*

§ 261-5 Disposition of airport revenue fund. (a) All moneys received by the department of transportation from rents, fees and other charges pursuant to this chapter as well as all aviation fuel taxes paid pursuant to section 243-4(a)(2) shall be paid into the airport revenue fund created by section 248-8. All such moneys paid into the airport revenue fund shall be expended by the department for the statewide system of airports, including the construction of airports and air navigation facilities approved by the legislature, including acquisition of real property and interests therein; and for operation and maintenance of airports and air navigation facilities; and for the payment of indebtedness heretofore or hereafter incurred by the department, or its predecessor, the Hawaii aeronautics commission, for any of the purposes of this chapter. The department shall generate sufficient revenues from its airport properties to meet all of the expenditures of the statewide system of airports and to comply with section 39-59; provided that as long as sufficient revenues are generated to meet such expenditures, the director of transportation may, in his discretion, grant a rebate of the aviation fuel taxes paid into the airport revenue fund during a fiscal year pursuant to sections 243-4(a)(2) and 248-8 to any person who has paid airport use charges or landing fees during such fiscal year. Such rebate may be granted during the next succeeding fiscal year but shall not exceed one-half cent per gallon per person, and shall be computed on the total number of gallons for which the tax was paid by such person, for such fiscal year.

(b) All expenditures by the department shall be made on vouchers duly approved by the director of transportation or such other director. [L 1947, c 32, pt of § 1; RL 1955, § 15-10; am L Sp 1959 2d, c 1, § 26; am L 1962, c 24, §§ 2, 3; HRS § 261-5; am L 1968, c 20, § 2; am L 1969, c 10, § 6 and c 99, § 1]

³⁶ See n. 33, *supra*.

³⁷ See nn. 1-5, *supra*.

³⁸ See n. 26, *supra*.

³⁹ *Ronwin v. State Bar of Arizona*, 686 F.2d 692 (9th Cir. 1982).

The Midcal case dealt with the necessity of filing fair trade contracts or price schedules with the State of California. [California Liquor Dealers Assn. v. Midcal Aluminum, Inc., 445 U.S. 97, 99 \(1980\)](#). Wholesalers had to post a resale price schedule and no state-licensed wine merchant could sell wine to a retailer at other than the posted effective price. Midcal Aluminum, Inc., a southern California distributor of wine, challenged the wine pricing system as a restraint on trade in violation of the Sherman Act.

The Midcal Court initially noted, in its review of the state court's decision, that "[t]he State [had] no direct control over wine prices, and it [did] not review the reasonableness of the prices set by the wine dealers." [Midcal, 445 U.S. at 100](#).⁴⁰ The Court then continued on to decide whether or not Parker immunity should apply absent direct control of an activity which appeared to violate the policies of the Sherman Act. [Id. at 103-104](#).

[*21] Reviewing its recent cases,⁴¹ the Midcal Court outlined the analysis which must be followed where it is not evident at the threshold that the state is exercising direct control as a sovereign over the activity. The analysis was first stated in [Lafayette, 435 U.S. 389 \(1978\)](#), and consists of a two-prong test:

First, the challenged restraint must be "one clearly articulated and affirmatively expressed as state policy"; second, the policy must be "actively supervised by the state itself. [City of Lafayette v. Louisiana Power & Light, 435 U.S. 389, 410 \(1978\)](#) (opinion of Brennan, J.). [Footnote omitted.]

[445 U.S. at 105](#).

Examining the legislative enactment to determine if it satisfied [*22] the first prong, the Court held that it did forthrightly state a clear purpose to mandate resale price maintenance. [Midcal, 445 U.S. at 105](#). However, the Court found that the program failed to satisfy the second prong -- the state failed to regulate prices or monitor market conditions or engage in any "pointed re-examination" of the program. [Id. at 105-106](#). The Court then stated that Parker teaches "'a state does not give immunity to those who violate the Sherman Act by authorizing them to violate it, or by declaring that their action is lawful. . . ." [31 U.S. at 351](#)." [Id. at 106](#). The question in Midcal concerned the state's participation in and control of the legislatively authorized activity violating the Sherman Act.

In this case, the state authorization for the DOT's action on the concession contracts at HIA can be found in the Hawaii Revised Statutes under Title 15 - Transportation and Utilities, Chapter 261 Aeronautics. [Section 261-4\(a\)](#) directs the DOT to

maintain, equip, operate, regulate, and protect, airports and air navigation facilities, including . . . maintenance, and operation at airports of buildings and other facilities . . . for the comfort, accommodation, [*23] and convenience of air travelers. . . .⁴²

⁴⁰ Cf. [Lowenstein v. Evans, 69 F. 908 \(C.C.D.S.C. 1895\)](#). In Lowenstein, a state also sought to control the liquor trade. However, South Carolina exercised direct control and management over the pricing and sale of all liquors. Cf. [Rice v. Alcoholic Beverage Control Appeals Bd., 21 Cal. 3d 431, 579 P.2d 476 \(1978\)](#) in which the prices were established by the producers with the state exercising no control or pointed re-examination of those prices to insure that policies of the Sherman Act are not unnecessarily subordinated. [21 Cal. 3d at 445, 579 P.2d at 486](#). While the Court indicates that the threshold question is whether the action violates the [Sherman Act, Midcal, 445 U.S. at 102](#), the threshold question in that inquiry is the extent of direct control and supervision of the activity by the state, such as to provide Parker immunity. [445 U.S. at 103-104](#). It is only after a failure at this hurdle that the Court must continue on to examine the extent of the state's mandate and review of the activity. Obviously if the Court had found direct state action and control there is no need for further examination.

⁴¹ See n. 18, supra. This two-prong analysis was reaffirmed in the recent [Community Communications Co., Inc. v. City of Boulder, 455 U.S. 40, 102 S.Ct. 835 \(1982\)](#). City of Boulder also reaffirmed the state's powers and immunity as a sovereign under the Constitution. [455 U.S. 40, 102 S.Ct. at 842](#). In advancing the Midcal analysis, the High Court merely declined to "automatically" extend the state sovereign's right to Parker immunity to "cities, counties, and other organized bodies." Ibid.

⁴² See n. 32, supra, for full text of [§ 261-4](#).

To these ends, [§ 261-7](#) permits the DOT to

enter into contracts, leases, licenses, and other arrangements with any person:

(2) Conferring the privilege of supplying goods, commodities, things, services, or facilities at the airport or air navigation facility. . . .⁴³

Further, per [§ 261-7](#), the DOT may establish the "terms and conditions of the contract".⁴⁴

This language is reiterated in [H.R.S. § 261-9](#) - Contracts, Law governing;⁴⁵ and [H.R.S. § 261-10](#) - Exclusive rights prohibited.⁴⁶ In the latter, while the state forbids exclusive contracts as to the "use of an airway, landing area, or air navigation facility," the section also specifically says "[t]his section shall not prevent the making of contracts, leases, and other arrangements pursuant to [section 261-7](#)".⁴⁷ This broad grant of authority to the DOT is limited only by directives to manage the airport system in the best interest of the public and to generate sufficient revenue to support the statewide airport system. There can be no [*24] reasonable doubt that the state has authorized the DOT to act as its agent in the managing and financing its airport system.

[*25] Additionally, the expressed goals of this legislation, as stated in [H.R.S. § 261-11](#), are that the airport system is to be "used for public and governmental purposes and as a matter of public necessity".⁴⁸ The exercise of these powers is considered to be "public and governmental functions."⁴⁹ This clearly satisfies the first prong of the Midcal test.

⁴³ See n. 34, supra, for full text of [§ 261-7](#).

⁴⁴ Ibid.

⁴⁵ [Haw. Rev. Stat. § 261-9](#):

[§ 261-9](#) Contracts, law governing. The department of transportation may enter into any contracts necessary to the execution of the powers granted it by this chapter. All contracts made by the department shall be made pursuant to the laws of the State governing the making of like contracts; provided, that where the planning, acquisition, construction, improvement, maintenance, or operation of any airport, or air navigation facility is financed wholly or partially with federal moneys, the department may let contracts in the manner prescribed by the federal authorities acting under the laws of the United States and any rules or regulations made thereunder. [L 1947, c 32, pt of [§ 1](#); RL 1955, § 15-15; am L Sp 1959 2d, c 1, [§ 26](#)]

⁴⁶ [Haw. Rev. Stat. § 261-10](#):

[§ 261-10](#) Exclusive rights prohibited. The department of transportation shall grant no exclusive right for the use of an airway, landing area, or air navigation facility under its jurisdiction. This section shall not prevent the making of contracts, leases, and other arrangements pursuant to [section 261-7](#). [L 1947, c 32, pt of [§ 1](#); RL 1955, § 15-16; am L Sp 1959, 2d, c 1, [§ 26](#)]

⁴⁷ Read in conjunction with the broad powers enunciated in [§ 261-7](#), it is clear that the legislature has considered and condones the use of exclusive contracts by DOT and its various concessioners. Indeed in one case the legislature experimented in 1981 (H.B. 1470, Act 243 of the 1981 Session Laws) with specifically requiring the DOT to provide at least two duty-free in-bond concessions at the airport and then finding that unacceptable, not only returned the statute to the status quo, but mandated a sole source duty-free in-bond concession at the airport. (Act 90, S.B. 2261-82 S.D.2 of the 1982 Session Laws.) This approval of exclusive contracts by the legislature emphasizes the already clear mandate by the state that DOT has the power and authority to enter such contracts with such parties as will best serve the public's interest and provide adequate funds for the airport system. See also nn.32, 33 & 35, supra.

⁴⁸ See n. 33, supra, for full text of [§ 261-11](#).

⁴⁹ Ibid. See also [Haw. Rev. Stat. § 261-12](#):

[*26] The second prong of the Midcal analysis compels this court to determine if the DOT, in its contracting and management of the airport system, is actively supervised and subjected to "pointed re-examination" of its policies by the state.⁵⁰

§ 261-12 Rules, standards. (a) Powers to adopt. The director of transportation may perform such acts, issue and amend such orders, adopt such reasonable general or special rules and procedures, and establish such minimum standards, consistent with this chapter, as the director deems necessary to carry out this chapter and to perform the duties assigned thereunder, all commensurate with and for the purpose of protecting and insuring the general public interest and safety, the safety of persons operating, using, or traveling in aircraft, and the safety of persons and property on land or water, and developing and promoting aeronautics in the State. No rule of the director shall apply to airports or air navigation facilities owned or operated by the United States.

In furtherance of the duties assigned under this chapter, the director may adopt rules relating to:

- (1) Safety measures, requirements and practices in or about the airport premises;
- (2) The licensing and regulation of persons engaged in commercial activities in or about the airport premises;
- (3) The regulation of equipment and motor vehicles operated in or about the airport operational area;
- (4) Airport security measures or requirements, and designation of sterile passenger holding areas and operational areas;
- (5) The regulation of motor vehicles and traffic;
- (6) Any other matter relating to the health, safety and welfare of the general public and persons operating, using, or traveling in aircraft.

(b) Definitions. For the purpose of this section, if not inconsistent with the context:

"Sterile passenger holding area" means any portion of a public airport designated by the director and identified by appropriate signs as an area into which access is conditioned upon the prior inspection of persons and property in accordance with the approved Federal Aviation Administration air carrier screening program.

"Operational area" means any portion of a public airport, from which access by the public is prohibited by fences or appropriate signs, and which is not leased or demised to anyone for exclusive use and includes runways, taxiways, all ramps, cargo ramps and apron areas, aircraft parking and storage areas, fuel storage areas, maintenance areas, and any other area of a public airport used or intended to be used for landing, takeoff or surface maneuvering of aircraft or used for embarkation or debarkation of passengers.

Notwithstanding the restriction on access by the public into operational areas, entry may be authorized for airport operational area related purposes with the prior permission of the director or his duly authorized representative.

(c) Conformity to federal legislation and rules. No rules, orders, or standards prescribed by the director shall be inconsistent with, or contrary to, any act of the Congress of the United States or any regulation promulgated or standard established pursuant thereto.

(d) How made. All rules having the force and effect of law, shall be adopted by the director pursuant to chapter 91.

(e) Distribution. The director shall provide for the publication and general distribution of all of its rules and procedures having general effect. [L 1947, c 32, pt of § 1; RL 1955, § 15-18; am L Sp 1959 2d, c 1, § 26; am L 1965, c 96, § 11; HRS § 261-12; am L 1980, c 155, § 1]

⁵⁰ Of course when one considers that the DOT is composed of officers and agents of the state, the question becomes facetious. But for the sake of argument and in the hopes of exposing exactly why a Midcal analysis is unnecessary in such cases as this one, the court will overlook this obvious discontinuity. Especially since at least one other judge, sitting by designation in this district, overlooked this relationship and failed to grant the DOT state-action immunity for a similar exclusive concession contract at HIA, this court wishes to spell out quite clearly this symbiosis. Cf. *Leia, Inc. v. Photo Management, Inc.*, Civ. No. 78-0263 (Opinion & Order filed February 4, 1980, by Judge Stanley Weigel). In short, the DOT is but an instrumentality created by the state to conduct certain specific state policies. The DOT exists only because of the state's grant of authority and only to perform the specific mandates outlined in its Organic Act. See nn. 51 & 53, infra, and accompanying text.

[*27] Since the DOT is a state agency,⁵¹ which must submit budgets and is funded by the state,⁵² and whose director holds his office at the whim of the governor,⁵³ it is abundantly clear that the actions of the DOT are subjected to "pointed re-examination" by the state. By statute as well, H.R.S. § 261-7, the DOT is mandated to "actively supervise the operation of the contractors to insure its effectiveness. The department shall develop and implement such guidelines as it may find necessary and proper to actively supervise the operations . . . [and review] the reasonableness of contractors' price schedules. . . ."⁵⁴

From the above, it is manifest that the DOT is, from every aspect, an instrumentality of the state. To ask if the state controls and reviews the DOT is to simply ask if the state exercises control over and governs its own actions.

The tautology is complete. The DOT, as an agent and instrumentality of the state, is controlled [*28] and reviewed constantly by the state. Since the DOT accounts directly to the state, and the state is merely acting through its agent, which performs and controls the action, this court can hardly imagine how the Midcal analysis could fail to be satisfied.⁵⁵ As indicated above, in such situations as the present case, the Midcal test is simply not necessary to be made. But if made, as here done, it will almost certainly be met.

CONCLUSION

This court finds that the DOT is an instrumentality of the State of Hawaii. As such, the DOT's acts in regard to certain exclusive contracts at HIA are the acts of the state. Further, the acts relate to a fundamental governmental function, that is, the building, maintaining, managing and financing of a necessary statewide airport system for an island state. In so operating, the acts of the DOT are entitled to *Parker v. Brown* immunity against any claims of alleged violations of the Sherman Act.

For reasons heretofore stated, this [*29] court has considered and applied a Midcal analysis. The application of this superfluous analysis confirms this court's earlier conclusion. When the state is acting through one of its instrumentalities, the Midcal analysis logically should be satisfied automatically. The Midcal two-prong test having been met, the DOT's actions are entitled to the same *Parker v. Brown* immunity to antitrust suits as the state.

This court finds it unnecessary to consider the remaining claims of the plaintiff's complaint.

IT IS HEREBY ORDERED that plaintiff's motion for summary judgment is DENIED; and defendants' motion for summary judgment is GRANTED.⁵⁶

End of Document

⁵¹ The Department of Transportation was created by ***Haw. Rev. Stat. § 26-4(15)*** (1976); and is a unit within the office of the governor.

⁵² *Ibid.*

⁵³ *Haw. Const. Art. V, § 6.*

⁵⁴ See n. 34, supra, for full text of *§ 261-7*.

⁵⁵ Perhaps it is logically possible to postulate the ultimate "right hand in ignorance of the left hand's acts" sort of situation. But then the courts would be forced to decide which "hand" was the state.

⁵⁶ See Order Granting and Denying Motions for Summary Judgment, filed on September 2, 1982. See also n. 1, supra.

Governments > Legislation > Types of Statutes

HN6 Legislation, Interpretation

Criminal statutes cannot be extended to cases not included within the clear and obvious import of their language. And if there is doubt as to whether an act charged is embraced in the prohibition, that doubt is to be resolved in favor of a defendant.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN7 Price Fixing & Restraints of Trade, Vertical Restraints

The trust or conspiracy sections of Michigan's current **antitrust law**, Mich. Comp. Laws § 750.558 (Mich. Stat. Ann. § 28.826), do not appear to apply to the sale of services, only goods and commodities. Services course become vastly more significant in modern times. The catch-all general language in the provision of the 1899 act may embrace services, but the other parts of that statute are expressly limited to goods as are the 1889 initial act and the 1905 machinery statute.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Governments > Legislation > Interpretation

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN8 Price Fixing & Restraints of Trade, Vertical Restraints

Only those activities described in [§ 5](#) of Mich. Comp. Laws § 750.558 (Mich. Stat. Ann. § 28.826) are intended to be proscribed.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Governments > Legislation > Interpretation

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN9 Price Fixing & Restraints of Trade, Vertical Restraints

In Michigan, the legislature prefacing para. 5 of Mich. Comp. Laws § 750.558 (Mich. Stat. Ann. § 28.826), in both its present and original versions, with an express declaration of the prospective illegality of the activity described in that paragraph and reiterates that declaration at the conclusion of the original version of para. 5. (This latter declaration is now found in the body of para. 5.) It is reasonable to presume some intentionality in the insertion of this additional language. The task of the courts in interpreting the statute is to discern the intent of the legislature at the time of passage of the statute. It is reasonable to conclude that the Michigan Legislature in 1899 is concerned with remedying the evils of only those activities in para. 5 of Mich. Comp. Laws § 750.558 (Mich. Stat. Ann. § 28.826).

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Governments > Legislation > Interpretation

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN10 [] Price Fixing & Restraints of Trade, Vertical Restraints

The prefatory language of para. 5 of Mich. Comp. Laws § 750.558 (Mich. Stat. Ann. § 28.826) provides strong support for a restrictive interpretation of the statute. Similarly, while the statement in para. 5 that "Every such trust as is defined herein is declared to be unlawful, against public policy, and void" may constitute a legislative declaration of the criminality of all combinations described in paras. 1 through 5, para. 5's prefatory language and the general structure of the statute indicate otherwise. It is equally reasonable to construe paras. 1 through 4 as statements of definition, general description, and purpose.

Opinion by: WALSH

Opinion

[*778] [**354] On February 7, 1980, a Wayne County citizens grand jury returned an indictment against 183 defendants, charging unlawful combination and conspiracy in unreasonable restraint of trade and commerce. MCL 750.558; MSA 28.826. The specific charge was combination and conspiracy to fix prices for services in the automobile collision repair business. The 183 defendants are the Automotive Service Councils of Michigan, Inc. (a trade association of automobile repair businesses), the officers of the association, and numerous automobile dealers, collision repair shops and individual officers, employees, and agents thereof.

In district court, defendants sought dismissal of the indictment, arguing: (1) inapplicability of MCL 750.558; MSA 28.826 to the activity alleged by the prosecution, (2) insufficiency of the evidence, and (3) prosecutorial misconduct. The district court, in a thoughtful and well-reasoned opinion, ruled that the Legislature did not intend that MCL 750.558; MSA 28.826 be applied to services, as opposed to articles and commodities. The court further found that the statute was "so poorly [***4] drafted, so confusing and ambiguous" that it could not support a criminal prosecution for the concerted fixing of prices for services. The indictment was, therefore, dismissed as to all defendants. In anticipation of the Attorney General's appeal of its ruling, the district court resolved defendants' remaining challenges to the indictment. Assuming *arguendo* the applicability of the statute to service activities, the court ruled that there had been sufficient evidence to indict all but 19 of the defendants, and the [*779] court found no prosecutorial misconduct which would justify dismissal of the indictment. The Attorney General's motion for reconsideration was denied.

The Attorney General's appeal to circuit court was limited to the district court's ruling that the prohibitions of MCL 750.558; MSA 28.826 do not reach service activities. There was no challenge to the district court's finding of insufficient evidence as to 19 of the defendants. The remaining defendants cross-appealed from the district court's findings of sufficient evidence and absence of prejudicial prosecutorial misconduct. The circuit court affirmed the

district court in all respects. By leave granted, [***5] the Attorney General now appeals from the circuit court's order and the remaining defendants cross-appeal.

The sole issue presented in the Attorney General's appeal is whether MCL 750.558; MSA 28.826 assigns criminal liability to the fixing of prices for services, as opposed, for example, to the fixing of prices of commodities. [HN1](#)[

The statute provides in its entirety:

"A trust is a combination of capital, skill or arts by two or more persons, firms, partnerships, corporations or associations of persons, or of any two or more of them, for either, any or all of the following purposes:

"1. To create or carry out restrictions in trade or commerce;

"2. To limit or reduce the production, or increase or reduce the price of, merchandise or any commodity;

"3. To prevent competition in manufacturing, making, transportation, sale or purchase of merchandise, produce or any commodity;

*"4. To fix at any standard or figure, whereby its price to the public or consumer shall be in any manner controlled or established, any article or commodity of [*780] merchandise, produce or commerce intended for sale, barter, use or consumption in this state;*

[HN2](#)[] " [**355] 5. *It shall hereafter [***6] be unlawful* for two or more persons, firms, partnerships, corporations or associations of persons, or of any two or more of them to make or enter into or execute or carry out any contracts, obligations or agreements of any kind or description, by which they shall bind or have bound themselves not to sell, dispose of or transport any article or any commodity or any article of trade, use, merchandise, commerce or consumption below a common standard figure or fixed value, or by which they shall agree in any manner to keep the price of such article, commodity or transportation at a fixed or graduated figure, or by which they shall in any manner establish or settle the price of any article, commodity, or transportation between them or themselves and others, so as to directly or indirectly preclude a free and unrestricted competition among themselves, or any purchasers or consumers, in the sale or transportation of any such article or commodity, or by which they shall agree to pool, combine, or directly or indirectly unite any interests that they may have connected with the sale or transportation of any such article or commodity, that its price might in any manner be affected. [HN3](#)[] Every [***7] such trust as is defined herein is declared to be unlawful, against public policy and void: Provided, however, That nothing contained in the provisions of this section shall be construed to forbid producers of farm or dairy products from co-operating or organizing corporations or associations not primarily for profit, for the purpose of insuring and providing a reasonably certain and stable market for, and distribution of, such products upon terms fair and reasonable to the public and to themselves, and bargaining with distributors of such products singly or collectively in relation thereto, nor shall such co-operative undertaking, corporations, associations or members thereof be held or construed to be illegal combinations or conspiracies in restraint of trade.

[HN4](#)[] "Any violation of the provisions of this section shall be and is hereby declared a conspiracy against trade, and any person who may become engaged in any such conspiracy or take part therein, or aid or advise in its [*781] commission, or who shall as principal, manager, director, agent, servant or employer, or in any other capacity, knowingly carry out any of the stipulations, purposes, prices, rates or furnish any [***8] information to assist in carrying out such purposes or orders thereunder or in pursuance thereof, shall be guilty of a misdemeanor, punishable by imprisonment in the state prison not more than two years or by a fine of not more than one thousand dollars. Each day's violation of this provision shall constitute a separate offense.

[HN5](#)[] "In any indictment for any offense named in this and the following section, it is sufficient to state the purpose or effects of the trust or combination, and that the accused is a member of, acted with or in pursuance of it, or aided or assisted in carrying out its purposes, without giving its name or description, or how, when and where it was created.

"In prosecutions under this and the following section, it shall be sufficient to prove that a trust or combination, as defined herein, exists, and that the defendant belonged to it, or acted for or in connection with it, without proving all

the members belonging to it, or proving or producing any article of agreement, or any written instrument on which it may have been based; or that it was evidenced by any written instrument at all. The character of the trust or combination alleged may be established by [***9] proof of its general reputation as such." (Emphasis added.)¹

Analyzing the statutory language, the district court observed:

[**356] "It is obvious both by a review of the statute and by the acknowledgement of the prosecution that [paras.] 2, 3 and 4 do not encompass services. It is also clear that para. 5 specifically refers to articles, commodities, merchandise, [*782] etc., and would not include services. We are then led to the inquiry as to whether services are included under the 'trade or commerce' language of [para.] 1."

Even assuming that the phrase "trade or commerce" in para. 1 of [***10] the statute includes services, however, the court found that the statute does not set forth a general proscription against combinations "to carry out restrictions in trade or commerce". In support of its conclusion that the activity described in the indictment had not been declared criminal, the court offered the following analysis of the statutory language:

"the statute makes a division into 'definitional provisions' and 'conduct provisions'. The first portion of the statute [*i.e.*, paras. 1 through 4] seems clearly to provide a definition. It is of great significance that para. 5 commences with the words, 'It shall hereafter be unlawful.' A plain reading would seem to indicate that the placement of those words at the beginning of para. 5 would be a clear indication that what went before para. 5 was not intended to be unlawful."

The district court went on to discuss the principle of strict construction of criminal statutes, [People v Hall, 391 Mich 175, 189; 215 NW2d 166 \(1974\)](#), and the concomitant requirement of statutory clarity:

"It is a fundamental rule of construction of [HN6](#) criminal statutes that they cannot be extended to cases not included within the clear and [***11] obvious import of their language. And if there is doubt as to whether the act charged is embraced in the prohibition, that doubt is to be resolved in favor of the defendant." [People v Ellis, 204 Mich 157, 161; 169 NW 930 \(1918\)](#).

In addition to its own difficulty in ascertaining [*783] the statute's intended scope of coverage, the court observed that the Attorney General, in a November 14, 1978, memorandum to Governor William Milliken analyzing Senate Bill 1284 (a proposed revision of Michigan's antitrust legislation which died in the House Judiciary Committee), had stated that "the present antitrust statute [1899 PA 255] * * * does not provide for coverage of services in the same manner as commodities, transportation and machinery". Also cited was the text of a speech delivered by the assistant attorney general in charge of the consumer protection division of the Department of the Attorney General, in which the "absence of clear coverage of services, rather than just commodities, transportation and machinery" had been noted and advanced in support of adoption of Senate Bill 1254, which "[for] the first time, [provided] a clear understanding * * * that services, as [***12] well as all kinds of commodities and property" were included within the definition of "trade and commerce". (In contrast to the current statute, Senate Bill 1254 clearly set forth a blanket proscription against all contracts, combinations, and conspiracies in restraint of trade or commerce).

The district court further noted the comments made by the chairman of the state bar's [antitrust law](#) section:

[HN7](#) "[The] trust or conspiracy sections [of Michigan's current [antitrust law](#)] do not appear to apply to the sale of services, only goods and commodities. Services have of course become vastly more significant in modern times. The catch-all general language in the provision of the 1899 act * * * may embrace services, but the other parts of that statute are expressly limited to goods as are the 1889 initial act and the 1905 machinery statute." Alterman, [Toward a New Michigan Antitrust Law](#), 55 Mich St Bar J 19, 22 (1976).

¹ The original version of the statute was 1899 PA 255, which provided for both criminal and civil actions against restraint of trade. The current civil counterpart of MCL 750.558; MSA 28.826 is [MCL 445.701 et seq.](#); MSA 28.31 et seq. The current criminal statute (MCL 750.558; MSA 28.826) is, for purposes of resolution of the instant controversy, identical to [§§ 1, 4, 5, and 6](#) of 1899 PA 255.

[*784] Finding that the statutory language did not cover the activity charged in the indictment and, alternatively, that the statute lacked the requisite clarity to support this criminal prosecution, the district court dismissed the indictment. We follow the [***13] lead of the circuit court and affirm the district court's order of dismissal.

[**357] No Michigan case has addressed the issue of whether the fixing of prices for services was intended to be covered by MCL 750.558; MSA 28.826. In [Hunt v Riverside Co-Operative Club, 140 Mich 538; 104 NW 40 \(1905\)](#), the Wayne County prosecutor sought injunctive relief, under 1899 PA 255, against two plumbers' associations -- the Master Plumbers' Exchange and the Riverside Co-Operative Club. The members of the association had agreed that the price of plumbers' supplies would be fixed by a committee and that member plumbers would buy all of their supplies from wholesale members, who agreed to sell only to qualified master plumbers and to charge nonmembers more than members. The master plumbers agreed not to sell their labor or materials at prices below those fixed by the club's schedule, and members of the exchange agreed that, in bidding for contract work, they would estimate materials and labor at specified levels. The Supreme Court affirmed the circuit court's determination that a violation of the statute had been established.

The Attorney General argues that the district court's order [***14] in the instant case is at odds with the Supreme Court's decision in *Hunt*. Careful scrutiny of the Supreme Court's opinion, however, reveals the Court's exclusive concern with the effects of the defendants' agreements on the price of plumbing supplies. The Court expressly declined to determine whether the statute prohibits contracts [*785] fixing installation charges. [Hunt v Riverside Co-Operative Club, supra, pp 546-547](#). Mere characterization of the plumbing industry as a "service industry" is not dispositive of the issue raised in the instant case.

Also cited by the Attorney General is [Barrows v Grand Rapids Real Estate Board, 51 Mich App 75; 214 NW2d 532 \(1974\)](#), *app dis* 392 Mich 752 (1974), a civil action for injunctive relief against restraint of trade and monopoly. [MCL 445.701](#); MSA 28.31, MCL 445.762; MSA 28.62. The *Barrows* case was discussed in Alterman, *supra*, 55 Mich St Bar J, p 22, fn 14.

" [Barrows v Grand Rapids Real Estate Board, 51 Mich App 75 \(1974\)](#), challenged an exclusion from a real estate multiple listing service under the catch-all language in the 1899 act and the general language of the conspiracy to monopolize section of the [***15] 1905 monopoly statute. The court found the restraint reasonable. It did not discuss whether services are embraced by the catch-all provision of the 1899 act, perhaps because services are included in the monopoly conspiracy section of the 1905 act."

In the above-mentioned speech, the assistant attorney general also mentioned the insufficient clarity of the *Barrows* decision as it related to the issue of the coverage of agreements to fix the price of services. In addition, we note that *Barrows* was a civil, not a criminal, proceeding.²

Cases which discuss Michigan's antimonopoly statute, MCL 445.762; MSA 28.62, are inapposite, since the language of that statute differs significantly from the language of MCL 750.558; MSA 28.826. For the same reason, cases discussing the [*786] federal [antitrust law](#), the Sherman Act, [15 USC 1 et seq.](#), are [***16] not helpful to resolution of the instant controversy. The narrow issue presented is construction of the language in the Michigan criminal statute.

The district court's determination that [HN8](#)[↑] only those activities described in § 5 of MCL 750.558; MSA 28.826 were intended to be proscribed finds support in the early Texas case of [Queen Ins Co v State, 86 Tex 250; 24 SW 397 \(1893\)](#). With a few significant additions, the language of the 1899 Michigan statute echoed the 1889 Texas act. The Texas court described the economic climate which had prompted many states to enact antitrust legislation and identified

² See also [Michigan Ass'n of Psychotherapy Clinics v Blue Cross and Blue Shield of Michigan \(After Remand\), 118 Mich App 505; 325 NW2d 471 \(1982\)](#).

"the causes of popular discontent, and the evils which the Legislatures of several states sought to remedy by direct statutory [**358] enactments upon the subject. They were combinations organized for the purpose of affecting the prices of articles of prime importance in commerce, or the rates of transportation and intercommunication. The evils resulting from these operations were doubtless paramount in the minds of our legislators when they passed the statute under consideration; and it was to repress these practices that the law was enacted. By 'the plain import of its [***17] language' it makes unlawful all combinations to raise or depress the price of all articles of commerce whatever, or to increase or diminish the rates of transportation of such articles." [86 Tex 266-267; 24 SW 402.](#)

The Texas court analyzed the language of the statute as follows:

"It seems to us, therefore, that the words in the first subdivision of [section 1](#) of the act 'to create or carry out restrictions in trade,' were intended only as a general expression of the purpose of the law, and that the acts defined in the subsequent members of the section were [*787] intended as a specific definition of what was meant in the first." [86 Tex 267; 24 SW 402.](#)

The court concluded that the Texas statute was not intended to reach agreements fixing rates of insurance and insurance agents' commissions.

HN9[] In Michigan, the Legislature prefaced para. 5 of MCL 750.558; MSA 28.826, in both its present and original versions, with an express declaration of the prospective illegality of the activity described in that paragraph and reiterated that declaration at the conclusion of the original version of para. 5. (This latter declaration is now found in the body of para. 5.) It is reasonable [***18] to presume some intentionality in the insertion of this additional language. The task of the courts in interpreting the statute is to discern the intent of the Legislature at the time of passage of the statute. [Detroit Edison Co v Dep't of Revenue, 320 Mich 506, 519; 31 NW2d 809 \(1948\)](#). It is reasonable to conclude that the Michigan Legislature in 1899 was concerned with remedying the evils of only those activities in para. 5 of MCL 750.558; MSA 28.826.

While the district court's construction of the statute is persuasive, we affirm on the narrower ground of the statute's unquestionable lack of the clarity required of criminal statutes. The language of MCL 750.558; MSA 28.826 does not clearly and obviously embrace the activities with which the defendants have been charged. While the Legislature's intention may have been to prohibit all agreements which unreasonably restrain trade or commerce, **HN10**[] the prefatory language of para. 5 provides strong support for a more restrictive interpretation of the statute. Similarly, while the statement in para. 5 that "Every such trust as is defined herein is declared to be unlawful, against public policy and void" may constitute a legislative [***19] declaration of [*788] the criminality of all combinations described in paras. 1 through 5, para. 5's prefatory language and the general structure of the statute indicate otherwise. It is equally reasonable to construe paras. 1 through 4 as statements of definition, general description, and purpose.

We are constrained to resolve the doubtful state of the statutory language in defendants' favor. [People v Ellis, supra, p 161](#). The Attorney General has himself recognized the statute's ambiguity and urged passage of new legislation to remedy its inadequacies. We agree with defendants that the Attorney General's pursuit of this criminal prosecution has been less than admirable and we affirm dismissal of the indictment. It is, therefore, unnecessary to address the issues raised on cross-appeal.

Affirmed.

Laker Airways, Ltd. v. Pan American World Airways

United States District Court for the District of Columbia

Antitrust & Trade Law > Sherman Act > General Overview

[**HN6**](#) Sherman Act, Jurisdiction

No British tribunal could or would proceed to enforce the Sherman Act. [15 U.S.C. § 15](#) lays venue only in any district court of the United States. The problems that would be involved in trying to prove American [antitrust law](#) for purposes of application by a foreign court are reason enough for a foreign court to decline to hear such a case.

Antitrust & Trade Law > Sherman Act > General Overview

[**HN7**](#) Antitrust & Trade Law, Sherman Act

Under British law it is not unlawful for a corporation to monopolize commerce by offering exceptional terms resulting in losses so as to drive competitors out of business, with the expectation that the losses will be recouped later once the competitor has been eliminated. These decisions further hold that the crux of an unlawful conspiracy is an intent to injure the plaintiff, and that an agreement or combination which has as its purpose the protection of the interests of the defendants, whatever they may be, is not unlawful.

Civil Procedure > Preliminary Considerations > Venue > Forum Non Conveniens

[**HN8**](#) Venue, Forum Non Conveniens

The fact that another country's law may be less favorable to a plaintiff than is American law is not reason alone to refuse to dismiss a lawsuit on forum non conveniens grounds. But when the remedy provided by the alternative forum is so clearly inadequate or unsatisfactory that it is no remedy at all, the unfavorable change in the law may be given substantial weight.

Opinion by: GREENE

Opinion

[*1126] This is an antitrust action brought by Laker Airways against a number of American and foreign airlines. Presently before the Court is plaintiff's motion for a preliminary injunction. Because of the apparently unprecedented circumstances which gave rise to this application,¹ it is appropriate to recite the background of the lawsuit in some detail.

I

On November 24, 1982, Laker Airways Limited (Laker)² brought an action in this Court under the Sherman Act ([15 U.S.C. §§ 1](#) and [2](#)) and the Clayton Act ([15 U.S.C. § 15](#)) against Pan American World Airways, Inc. (Pan American), Trans World Airlines Inc. (TWA), McDonnell Douglas Corporation (McDonnell **[**3]** Douglas), McDonnell Douglas Finance Corporation (McDonnell Finance), British Airways Board (British Airways), Deutsche Lufthansa Aktiengesellschaft (Lufthansa), Swiss Air Transport Company Limited (Swissair), and British Caledonian Airways Limited (British Caledonian). On February 15, 1983, a separate action, containing essentially the same allegations

¹ See slip op. at pp. 11-15 *infra*.

² Laker Airways Limited is a subsidiary of Laker Airways (International) Limited, which in turn is controlled by Sir Freddie Laker.

as those recited in the November 1982 complaint,³ was brought by Laker against Sabena Belgian World Airlines (Sabena) and KLM Royal Dutch Airlines (KLM).

The complaints allege the following.

Since **[**4]** 1946 the fares for scheduled air transportation have been set by the International Air Transport Association (IATA), an association of the world's major airlines,⁴ at levels higher than would prevail in a competitive market. Laker began charter flight operations between Great Britain and the United States in 1970, and, starting in June 1971, it also began to seek permission to operate low-cost "Skytrain" transatlantic service. Resistance from the IATA airlines delayed implementation of the scheduled service until September 1977, but eventually Laker was able to provide every week over forty scheduled flights⁵ at low fares, in addition to extensive charter service between the United States and Great Britain. Prior to the advent of Laker's Skytrain service from London to New York, which cost \$115, the IATA-fixed economy fare on the same route was almost three times as much, or \$313.

[5]** The complaints further allege that, in response to Laker's low-fare service, the IATA airlines agreed on a predatory scheme to destroy both Laker's transatlantic charters and its Skytrain service.⁶ In execution of that scheme, some of the IATA airlines offered their services on the New York-London route at below cost, expecting to drive Laker out of business, and expecting further that, once Laker was gone, they could and would raise their fares again to their previous high levels or above. In short, the complaint alleges a classic antitrust conspiracy.

[*1127] Plaintiff further claims that although the conspiracy did not bear fruit at first,⁷ by 1981 Laker was so weakened by defendants' predatory activities and by a substantial **[**6]** drop in the dollar value of the pound sterling that it could not afford to reduce its fares further so as to compete with the fares adopted by defendants on some of Laker's routes. In October 1981, Pan American, TWA, and British Airways, seeking to end Laker's low-fare competition once and for all, decided to offer their own attractive, high-cost services at Laker's low prices on all of Laker's routes.⁸ Subsequently, in the winter of 1981-82, the IATA met in Switzerland and in Florida to agree on a program to set new and higher fares for the spring and summer of 1982, but to fix the fares of IATA members at Laker's level as long as Laker was in business.⁹

[7]** According to the complaint, the defendants also interfered with Laker's financing. By Christmas 1981, Laker had reached an agreement with its lenders for the financial support made necessary by its weakened condition. The IATA members thereupon successfully pressured Laker's lenders to deny Laker that financing, and on February 5, 1982, succumbing to this pressure, Laker was forced into liquidation.

It was in response to these alleged activities that Laker filed the instant actions in this Court.

II

³ In view of the fact that the cases appear to present similar or related issues of fact and law, and in the interest of judicial economy, the Court will consolidate the two actions unless one or more of the parties shows sufficient cause within five days of the date of this Opinion why such consolidation should not be effected.

⁴ IATA includes Pan American, TWA, British Airways, Lufthansa, Swissair, British Caledonian, KLM, and Sabena.

⁵ This service employed the widebodied jets typically used by the major airlines for transatlantic flights.

⁶ It is alleged that the airlines based in continental Europe participated in this scheme because many of their passengers travelled to the United States via London in order to benefit from Laker's low fares, bypassing the European airlines' direct service to the United States.

⁷ Until 1981 Laker was showing a profit.

⁸ By then, Laker offered service from three cities in the United Kingdom to four cities in the United States.

⁹ The meetings are referred to only in the complaint in No. 83-0416, the action against KLM and Sabena, but in that pleading plaintiff alleges that all of the IATA defendants participated in the meetings.

The first lawsuit proceeded in its normal course from November 24, 1982 to January 21, 1983. On that date, with no challenge to jurisdiction having been raised in this Court by any of the defendants, British Airways filed a declaratory judgment action against Laker filed in the Queen's Bench Division of the High Court of Justice in England¹⁰ seeking a declaration of non-liability to Laker and a permanent injunction preventing Laker from continuing with its suit against British Airways in the United States. At the time of the filing of its complaint, British Airways also applied for and was immediately granted an injunction against interference with the conduct of the British court [**8] proceedings.¹¹ Within hours, British Caledonian, Lufthansa, and Swissair filed similar writs against Laker in the British court, and they likewise applied for, and were granted the identical injunction against Laker's seeking a counterinjunction.

[**9] Mr. Justice Parker of the Queen's Bench Division set a hearing for March 21, 1983, at which it is to be determined whether Laker should be permanently enjoined from proceeding with its lawsuit in this Court against both British airlines on the basis that Great Britain is the more appropriate forum.¹²

[**10] However, subsequently, by an order dated March 2, 1983, the British court all but [*1128] decided this question at least with respect to British Airways and British Caledonian. That order, issued without a hearing and without any notice to plaintiff or to this Court, enjoins Laker from "taking any further steps in Civil Action 82-3362 [in this Court]" against the two British defendants.¹³ The March 2 order, if valid, would preclude plaintiff from filing applications or motions in this Court, oppositions to motions filed by the defendants, and any other pleadings or papers.¹⁴

¹⁰ The previous November 29, five days after Laker's first complaint was filed here, Midland PLC (Midland) had filed a declaratory judgment action in Britain against Laker, having been informed that Laker was considering joining Midland as a defendant in the U.S. action. This action is presently proceeding to trial. Midland hopes to prove facts that show that it could not have been involved in any conspiracy against Laker "under American Law, Anti-trust or otherwise, or English law." Transcript of judgment, February 4, 1983. The British court has described Laker's assertions of Midland's complicity as "inherently unlikely." Transcript at 14.

¹¹ Plaintiff had two hours notice of this application. The injunction restrains Laker, its liquidators, and their agents from attempting to obtain a counterinjunction that would prevent British Airways from proceeding with the British action. The factual basis for the injunction is not clear. No one had apparently even thought of obtaining a counterinjunction, if only because presumably no one knew or suspected that British Airways, not having challenged the jurisdiction of this Court in this Court, would do so elsewhere.

¹² After the issuance of the first British injunction on January 21, 1983, the remaining four defendants in C.A. No. 82-3362 -- TWA, Pan American Airways, McDonnell Douglas Corp., and McDonnell Douglas Finance Corp. -- were enjoined by a temporary restraining order issued by this Court from participating in the English lawsuit. Subsequently, KLM and Sabena were similarly made subject to a TRO. Five days ago, on March 4, 1983, a hearing was held on plaintiff's motions for a preliminary injunction and for partial summary judgment with respect to the issue of *forum non conveniens*. Inasmuch as not all of the parties agreed to an extension of the TRO until such time as the Court might be able to make a decision on the preliminary injunction in due course, that decision was issued on March 7, 1983. This Opinion details the reasons for the issuance of the injunction.

The Court will decide the motion for partial summary judgment at a later date, and it may further supplement this Opinion at that time. The Court does not envision that its decision on the summary judgment motion will be long delayed, contrary to the prediction made in affidavits submitted to the British court on January 25, 1983. It is worth noting that while the airlines complained in the British court about an expected delay here, in their opposition to plaintiff's motion for partial summary judgment filed in this Court they urged a delay in the ruling on that motion.

¹³ The order contradicts statements made to Mr. Justice Parker by English counsel for Lufthansa, back in January, that the British injunction "does not and has never been intended to stop the flow of proceedings in the United States."

¹⁴ The British court appears to have rationalized its action on the ground that its injunctions operate only on the plaintiff, not this Court. See Transcript of proceedings, February 4, 1983, pp. 5-6. At least in this country, as the Supreme Court held over a century ago, [HN1](#) there is no difference between addressing an injunction to the parties and addressing it to the foreign court itself. [*Peck v. Jenness*, 48 U.S. \(7 How.\) 612, 624-625, 12 L. Ed. 841 \(1849\)](#). See also, [*Compagnie des Bauxites de Guinée v. Insurance Company of North America*, 651 F.2d 877, 887 \(3d Cir. 1981\)](#). Mr. Justice Parker has also stated (Transcript of

[**11] The British court has indicated that it will decide at a later date the appropriateness of a permanent injunction at Lufthansa's and Swissair's urging, and that it will also hold trials on the merits of the claims that the airlines are not liable to Laker. In passing on these claims, the court apparently intends to decide issues of American antitrust law as well as of British law.¹⁵

The papers filed in the British court, which have been forwarded to this Court by various parties¹⁶ [**13] indicate¹⁷ two bases for [*1129] the extraordinary action of the British tribunal: (1) Laker is incorporated in Britain and for that reason it may and in these circumstances should be restrained from suing in the [*12] United States courts, and (2) because of the way the American legal system is structured, it is unlikely that the defendants can receive justice here.

III

The Court must decide whether to issue a preliminary injunction against the four American defendants and Sabena and KLM.¹⁸ The Court will consider first the question whether it is likely that plaintiff will prevail on the merits of its

proceedings, January 27, 1983, p. 3) that the type of injunction he issued "does not represent an interference by one court with the proceedings of another." With utmost respect, this Court must differ. It can hardly be said that an order which, for example, directs a party not to file further papers in this Court, as did the order of the British court of March 2, is anything other than a direct interference with the proceedings in this Court. The orders secured by the defendant airlines on January 21, 1983, have a like effect.

¹⁵ Mr. Justice Parker said with regard to the *Midland* case (see note 10 *supra*) that "the declaration [is], on its face, in very wide terms and appears to involve an English court deciding on American law, and in particular on American Anti-Trust law." Transcript of judgment, February 4, 1983, p. 11.

¹⁶ By order of the British court, all the papers filed there, including the transcripts of the hearings and the court's decisions, are to be kept confidential, and this Court was advised of this confidentiality order by those who at various times forwarded the papers to it. This Court did not seek or request these documents which came to it on an entirely unsolicited and haphazard basis. In any event, HN2 [↑] it is the law in the United States that, except in unusual situations such as those involving well-defined national security matters or particular trade secrets, the public is entitled to access to what is happening in the courts, for the courts' business is the public's business. See *Richmond Newspapers v. Commonwealth*, 448 U.S. 555, 65 L. Ed. 2d 973, 100 S. Ct. 2814 (1980).

For that reason and in fairness to the British court, this Court wants to make it clear that, if additional materials regarding these proceedings may be forwarded to this Court, it will not regard itself as bound by confidentiality requirements to the extent that the British documents bear on the proceedings here. Such requirements would be at odds with the public's right to know what is occurring in United States courts, especially in an extraordinary case such as this.

It is obviously difficult for all concerned -- including the British Court and this Court -- to conduct proceedings such as these where the information imparted to one tribunal does not always precisely correspond to that which is made known to the other. If, therefore, reference needs to be made here to the proceedings in Great Britain, this Court would prefer that it be done on the basis of a precise record available to all, just as this Court believes that Mr. Justice Parker should be furnished with, and be allowed to use in every way, a transcript of all that transpires in this Court that has any relationship to the proceedings in the United Kingdom. Certainly, the suggestion by the British court (Transcript of proceedings, January 27, 1983, p. 2) that an affidavit that was used there should not have been disclosed to this Court, if followed by both courts with respect to all proceedings and documents, could only aggravate an already difficult situation, fraught as it is with possible misunderstandings.

This Court has given instructions that copies of all transcripts of proceedings here, all orders and decisions, and all documents filed with the Court which bear on the proceedings in Great Britain shall be transmitted to Mr. Justice Parker. Of course the British court may make any use that it wishes of these papers, including their publication as part of an official record.

¹⁷ Since the British court, in accordance with custom in the United Kingdom, did not issue a written opinion, its reasoning must partly be discerned from its colloquies with counsel and the transcripts of its judgments, delivered orally.

¹⁸ The four airlines before the British court are not affected by the present injunction proceedings.

permanent injunction request,¹⁹ and thereafter (in Part VI) it addresses the relative balance of injuries and the public interest.²⁰

[**14] First. If the British court is proceeding on the assumption that, because Laker is a British corporation, it may not, under American law, sue in the courts of the United States²¹ to vindicate rights under the American antitrust laws,²² it would be mistaken. See *Pfizer Inc. v. India*, 434 U.S. 308, 54 L. Ed. 2d 563, 98 S. Ct. 584 (1978). As the Supreme Court there said:

The fact that Congress' foremost concern in passing the antitrust laws was the protection of Americans does not mean that it intended to deny foreigners a remedy when they are injured by antitrust violations. Treble-damages suits by foreigners who have been victimized by antitrust violations clearly may contribute to the protection of American consumers.

434 U.S. at 314.

[**15] Second. **HN4**[] Except in unusual, very narrow circumstances, there is no basis -- at least not in a free country -- for precluding a citizen by an injunction-type order from suing in the courts of another nation. A number of courts have repeated in dicta the proposition that a court "has the power to enjoin a party over whom it has personal [*1130] jurisdiction from pursuing litigation before a foreign tribunal." See, e.g., *Western Electric Co. v. Milgo Electronic Corp.*, 450 F. Supp. 835, 837 (S.D. Fla. 1978). The power is rarely exercised, however, for "restraining a party from pursuing an action in a court of foreign jurisdiction involves delicate questions of comity and therefore 'requires that such action be taken only with care and great restraint.' *Canadian Filters (Harwich) Ltd. v. Lear-Siegler, Inc.*, 412 F.2d 577, 578 (1st Cir. 1969)." *Compagnie des Bauxites de Guinée v. Insurance Company of North America*, *supra*, 651 F.2d at 887 n.10 (3rd Cir. 1981). Indeed, when one examines the reported instances in which this power has actually been used, one finds that the fact situations are quite different from those involved in the instant cases.

In *Medtronic, Inc. v. Catalyst Research Corp.*, 518 F. Supp. 946, 955-56 (D. Minn. 1981), the court issued an injunction directed at proceedings in Germany and Canada (1) only after taking pains to emphasize that its order merely prevented the foreign courts from awarding a form of relief -- an injunction -- that is not an issue on the merits in the lawsuit before this Court,²³ and (2) by noting that the dispute between the parties was based on a contract between them that could be construed to forbid the foreign plaintiff from seeking injunctive relief against the United States plaintiff. Needless to say, here no similar contractual relationship exists between the parties, and the injunction proposed to be issued by the British court would abort all aspects of Laker's lawsuit.

In another case cited by defendants, *Harvey Aluminum, Inc. v. American Cyanamid Co.*, 203 F.2d 105 (2d Cir. 1953), the Court of Appeals stated that [**17] it was of the opinion that the District Court could enjoin prosecution

¹⁹ As in many cases, **HN3**[] the preliminary injunction in large part decides the merits. Nevertheless, the parties may, if they wish, have their claims considered again on the basis of additional evidence.

²⁰ *Washington Metropolitan Area Transit Commission v. Holiday Tours, Inc.*, 182 U.S. App. D.C. 220, 559 F.2d 841 (D.C. Cir. 1977); *Virginia Petroleum Jobbers Assn. v. Federal Power Commission*, 104 U.S. App. D.C. 106, 259 F.2d 921 (D.C. Cir. 1958).

²¹ See, e.g., the memorandum of KLM in opposition to the motion for preliminary injunction which contends (at p. 11) that "there is grave doubt" that the American antitrust laws can be given extraterritorial effect so as to encompass "the injury to Laker, a U.K. company."

²² Until its insolvency, Laker was, of course, daily engaging in business in the United States, and so were and are all of the defendants in this action. Defendants' business activities, including any alleged antitrust violations, had an intended effect upon American commerce, and hence defendants are subject to United States **antitrust law**. See, e.g., *In re Uranium Antitrust Litigation*, 617 F.2d 1248 (7th Cir. 1980).

²³ The Court's order allowed the foreign suits to proceed by their normal course in all other respects.

559 F. Supp. 1124, *1130 LEXIS 1983 U.S. Dist. LEXIS 18680, **17

of an action in British Guinea if that action had been filed purely out of vexatiousness, but that if the plaintiff had a legitimate reason to be in the British Guinea court on account of British Guinea law, the injunction should not issue.

In *Velsicol Chemical Corp. v. Hooker Chemical Corp.*, 230 F. Supp. 998 (N.D. Ill. 1964), the court stated that it would be inclined to issue an injunction solely to ensure the finality of its judgment, that is, to prevent a losing plaintiff from initiating proceedings abroad against the same defendant on the same cause of action. Similarly, in *Bethell v. Peace*, 441 F.2d 495 (5th Cir. 1971), a Florida court enjoined a Florida resident from proceeding with a previously filed lawsuit in the Bahamas involving a contract concerning Bahamian land against Florida residents. Like in *Velsicol Chemical*, the injunction constituted an effort to make conclusive the court's judgment.²⁴ This is wholly different from the instant cases, which (1) implicate a key statute of the United States; (2) involve alleged conduct that in part occurred and had significant effects in the United [**18] States; and (3) do not concern the enforcement of an existing British judgment.²⁵

[**19] [*1131] Finally, in *Cole v. Cunningham*, 133 U.S. 107, 33 L. Ed. 538, 10 S. Ct. 269 (1890), a Massachusetts court enjoined a creditor of a Massachusetts insolvent from proceeding with an attachment action in New York. The creditor's action was an intentional circumvention of the Massachusetts laws regarding insolvency, not that much different from defendants' deliberate avoidance of American substantive and procedural law by their resort to the British courts. The holding is thus supportive of plaintiff's position rather than defendants'.²⁶

[**20] In short, the precedents cited by defendants differ factually in significant respects from the cases now before this Court. For that reason, and because of the breadth of the interference with United States law, ongoing court proceedings, and United States public policy, the injunction proposed to be issued by the British court is truly unprecedented by American standards.²⁷

²⁴ Moreover, the injunction was upheld because the lawsuit involved "the validity of a contract signed in Florida by Florida residents," *441 F.2d at 498*, and which was based on fraud.

²⁵ There is obviously a large difference between enforcement of a judgment and interference with an ongoing action so severe that a judgment could never be obtained. American courts occasionally stay proceedings before them that are duplicative of proceedings pending elsewhere, but this occurs when the foreign proceeding was filed first, see *Darr v. Burford*, 339 U.S. 200, 204, 94 L. Ed. 761, 70 S. Ct. 587 (1950), and when "the expected foreign judgment would be entitled to enforcement in the forum." Ehrenzweig, Conflict of Laws § 36, at 129. Clearly Laker filed his lawsuit first in this Court, and it is entirely inappropriate to suggest that a court of the United States should stay or otherwise abandon a proceeding brought under the Sherman Act to wait to see how another nation's courts would handle the same allegations. Ehrenzweig states that the British courts generally do not stay their proceedings *pendente lite*, because of their "preference for their own courts." *Id.*, § 36, at 127. In this case, the British court is being asked not simply to disregard the first-filed suit, but to ensure that its later-filed proceedings are the *only* proceedings between the parties.

²⁶ Defendants also cite *Dames & Moore v. Regan*, 453 U.S. 654, 69 L. Ed. 2d 918, 101 S. Ct. 2972 (1981), the case upholding the actions of President Carter in extinguishing claims against Iran pending in United States courts and referring them to an international tribunal. These actions were taken as part of an executive agreement negotiated with Iran to free Americans who had been taken hostage there. At issue was the power of the Executive Department, not that of a court, to decide where American nationals might bring suit. The President's actions were taken, moreover, after the declaration of a national emergency implicating the foreign policy of the United States. As the Supreme Court noted, its holding was a narrow one; it did not "attempt to lay down . . . general 'guidelines covering other situations not involved here.'" *453 U.S. at 661*. It held that "where, as here, the settlement of claims has been determined to be a necessary incident to the resolution of a major foreign policy dispute between our country and another, and where, as here, we can conclude that Congress acquiesced in the President's action, we are not prepared to say that the President lacks the power to settle such claims." *453 U.S. at 688*. The holding has no bearing on the question of when a court, acting on its own, should exercise its injunctive powers to direct a national where to sue, or, more accurately, where not to sue.

²⁷ To be sure, a British court is governed by British law, and the defendants cite a recent British case in which injunctive procedures were used. See *Smith, Kline & French Laboratories Ltd. v. Bloch*, 1980 S. No. 6514 (C.A. May 13, 1982). It may be noted that *Bloch* enjoined American proceedings having to do with actions that took place in Britain, not between Britain and the United States or in the United States. Moreover, the action was clearly based on a contract. When plaintiff's American counsel

[**21] Third. In addition to the circumstance that the American precedents would not support issuance of an injunction on the facts presented to Mr. Justice Parker, there is the perhaps even more significant fact that there are so few instances where any court, either in the United States or the United Kingdom, has asserted the power to enjoin its citizens from suing in the courts of another nation. The minimum lesson one can draw from this paucity of precedent is that, [HN5↑](#) if a court has the authority to prevent a national from suing elsewhere, it may exercise this power only in the most extraordinary circumstances.²⁸

Yet there is nothing extraordinary about the suits brought in this Court by Laker. They are the garden-variety type of antitrust suit, involving what is claimed to be a combination [**22] of American corporations and foreign corporations doing substantial business in the United States which allegedly committed anticompetitive acts. In this age of multinational corporations, ever closer trade relations among the nations, instant communications, and air carriers [[*1132](#)] closely binding the continents together, it is not at all unusual that activities of the kind here alleged should be claimed to have occurred in some instances. In short, there is nothing either unusual or vexatious²⁹ about the lawsuits brought in this Court.³⁰

[**23] Thus, if these lawsuits may be singled out for the extraordinary remedy of an injunction requiring a national to cease prosecuting this action, then a great many other lawsuits on both sides of the Atlantic, in the field of [antitrust law](#) as in many other fields, would qualify for similar treatment.³¹ To put it another way, any decision which accepted the proposition that the court of the plaintiff's nationality may interfere with and effectively halt proceedings abroad in circumstances such as those involved here would set a far-reaching and dangerous precedent.

American companies operate, directly or through subsidiaries, in many countries all over the world, sometimes on a massive scale.³² Under the rationale which underlies the lawsuit in Great Britain, and which has at least provisionally been [**24] accepted by the British tribunal,³³ American courts could legitimately interject themselves, by means of injunctions, between those American corporations and the foreign courts, and the courts of nations other than the United States and the United Kingdom could, and no doubt would, do likewise. The

discovered that his client had previously assigned his rights under the contract, a second complaint sounding in antitrust was filed in the hope that an antitrust claim would survive the assignment. In contrast, in these cases Laker alleges antitrust violations of a primary and significant form, and the actions would therefore not be governed by *Bloch* with its peculiar facts. For these reasons, among others, it appears that with respect to the instant cases there may be no significant difference between British and American law, and it is not necessary therefore at this juncture to contemplate the outcome in the event of an ultimate irreconcilable conflict between the two legal systems with respect to these cases.

²⁸ Mr. Justice Parker has expressed his own view that an injunction by what might be called the "nationality" court against litigation elsewhere would be a "rare case." Transcript of proceedings, January 27, 1983, p. 4.

²⁹ This is also demonstrated by the fact that the Justice Department independently empanelled a grand jury to consider the questions that are raised in these lawsuits. See note 49 *infra*.

³⁰ For that reason, there is somewhat of an Alice-in-Wonderland flavor to the arguments made by defendants both in the British court and in this Court. In both places, some of the defendants proceed as if clearly and without question the British court has jurisdiction -- notwithstanding its own statement that interference with a suit pending elsewhere would be a rare, or exceptional case -- and as if this Court, somehow, were an interloper for continuing to proceed with an action that is regularly pending before it, without any challenge to its jurisdiction having been made and without anything out of the ordinary having occurred until some of the defendants suddenly secured an order from a foreign court. See also note 41 *infra*.

³¹ It would be naive to expect that, were this kind of precedent to be set by the British court in these cases, other parties and other courts both in Great Britain and the United States would not follow suit.

³² Of course, companies chartered by other nations (e.g., Japan, Germany, France) do business on a similar scale in the United States and elsewhere.

³³ The court has indicated its view that the Laker controversy may "be one of the rare cases where a court in this country would restrain a defendant [Laker]." Transcript of proceedings, January 27, 1983, p. 20.

consequences to international trade and to amicable relations between nations that would result from this kind of interference are difficult to overestimate.³⁴

[**25] Fourth. As concerns defendants' contention that the American courts are unable to do justice, the theory appears essentially to be that the discovery process established by American law is too expensive.³⁵ [**26] Debates have been going on for some time in the American legal profession as to whether pretrial discovery is, on balance, beneficial because it removes the element of surprise from litigation and contributes to fairer trials and fairer settlements [*1133] by revealing evidence that might otherwise not be available, or whether it is detrimental because of its cost. Whatever may be the answer to that question,³⁶ it is hardly the proper province of a foreign court to prohibit the conduct of litigation here because it does not agree with the way in which the United States Congress and the American courts, including the Supreme Court, have dealt with this particular procedural problem.

Again, if that were a proper standard in the British courts, it would also be appropriate for the American courts and the courts of other nations to take like factors into account in determining whether they should interfere with litigation abroad. There are few nations which measure up to the elaborate safeguards guaranteeing fairness that one finds in the United States Constitution and laws. Under the rationale upon which the British proceedings involving Laker and the other airlines are thus predicated, injunctions [**27] against foreign proceedings involving American citizens or corporations could become commonplace in the courts of this country whenever a United States court regarded the foreign country's procedures as inadequate.

What is perhaps even more surprising than the denigration of American law by British courts³⁷ [**28] is that very large and reputable American law firms which routinely proceed under, and whose clients daily benefit from, the American discovery rules, would send their English solicitors into a foreign court to seek to enjoin proceedings in the United States on the ground that American courts cannot, under American legal procedure, be expected to do justice.³⁸ The argument based on the expense of litigation in this country is especially strange when it is advanced on behalf of many of the largest airlines in the world represented by these vast and, no doubt, expensive law firms against a plaintiff which is insolvent.

³⁴ Another practical factor militating against use of the "nationality" rule proposed by the defendants comes readily to mind. What about multinational corporations? If such a corporation brought suit in the courts of nation X, and if its affiliates or subsidiaries were incorporated in counties A, B, and C, the courts of which nation would have control over the lawsuit? Under the customary rule, the courts of nation X decide on their own jurisdiction, both in the broadest and in the more narrower *forum non conveniens* sense. Under the rule advocated by defendants, presumably any of the three, four, or more nations in which the corporation may be regarded as a national would have the authority to halt the lawsuit in nation X in its tracks. The impracticability of the rule and its propensity for mischief are apparent.

³⁵ Also referred to in various papers are the differences between the American and British rules respecting attorney's fees, the availability of jury trial, and the American treatment of antitrust defendants as jointly and severally liable.

³⁶ A proposed amendment to **Fed. R. Civ. P. 26(b)(1)** would allow a court, on its own initiative or pursuant to motion, to limit discovery if "the discovery is unduly burdensome or expensive, given the needs of the case, the amount in controversy, the parties' available resources, and the values at stake in the litigation." See also *Dolgow v. Anderson*, 53 F.R.D. 661, 664 (E.D.N.Y. 1971) (Weinstein, J.) ("court has duty, of special significance in lengthy and complex cases . . . , to supervise and limit discovery to protect parties and witnesses from annoyance and excessive expense").

³⁷ Lord Denning, Master of the Rolls, stated in *Bloch, supra*, that, "As a moth is drawn to the light, so is a litigant drawn to the United States. If he can only get his case into their courts, he stands to win a fortune." Mr. Justice Parker, after noting that a particular exhibit "savour[s] of either fiction or journalism rather than legal exposition," added that the exhibit "was apparently prepared by Laker's American attorneys." Transcript of proceedings, February 4, 1983, p. 6.

³⁸ The English solicitors were armed with lengthy affidavits from the American lawyers detailing the claimed inadequacies and injustices of the American system of laws.

Fifth. While two of the defendants are British, four of the other corporations are American and four are carriers chartered in continental Europe. It is difficult to visualize on what basis a British court could legitimately take jurisdiction -- let alone displace the jurisdiction of a United States tribunal -- where the complaint alleges violations of American law by American corporations and by foreign corporations which provide air service between the United States and Rotterdam, Brussels, Frankfurt, and other cities of continental Europe.³⁹ The arguments of the European defendants distill down to the proposition that continental Europe is closer to Britain than to the United States.⁴⁰ This is hardly a distinction that may be thought to make a difference in an era of multinational corporations and instant communications, especially when it is the parties' business to [*1134] provide frequent commercial air service [*29] between Europe and America.

Sixth. This Court does not know what evidence of antitrust violations will be adduced at trial. As noted, the complaint alleges a conspiracy involving both the American and the foreign carriers to violate the American antitrust laws with respect to their operations between Europe and the United States. Nevertheless, it would not be surprising if the effective elimination from the lawsuit of several of the defendants could cripple plaintiff's lawsuit. Furthermore, if that elimination through the action of the [*30] British court were to succeed, a precedent would be set that would be likely to undermine the effectiveness of the antitrust laws whenever multinational or foreign corporations are part of the anticompetitive scheme: a court somewhere in the world could surely always be found to issue orders similar to those sought from the British court in these cases to abort an ongoing antitrust action in this country.

IV

The defendants argue with considerable emphasis that the British court has an interest in deciding whether a British plaintiff may prosecute a lawsuit in a foreign court.⁴¹ [*31] Assuming that such an interest exists -- as discussed *supra*, at least in the United States and in Great Britain any power based on such an interest is exercised only in very narrow circumstances -- it cannot displace the Court's authority and duty⁴² to entertain and decide the instant lawsuits.⁴³

These actions were brought under a positive command of a crucial American statute that represents a very strong public policy. Indeed, the Sherman Act has frequently been called the charter of economic freedom and its role has been compared to that which the *Bill of Rights* plays with respect to personal freedoms. See *United States v. Topco Associates, Inc.*, 405 U.S. 596, 610, 31 L. Ed. 2d 515, 92 S. Ct. 1126 (1972). The duty of this Court to entertain the present actions is buttressed by the constitutional mandate which guarantees to all those residing or doing business in the United States, such as Laker, due process and the equal protection of the laws. See, e.g., *Plyler v. Doe*, 457 U.S. 202, 72 L. Ed. 2d 786, 796, [*32] 102 S. Ct. 2382 (1982); quoting *Yick Wo v. Hopkins*, 118

³⁹ Britain is not involved in this service.

⁴⁰ Additionally, defendants KLM and Sabena argue that the Court may not enter any injunction against them because they are owned by foreign governments. There is, of course, a significant difference between a sovereign's public and its commercial activities. In any event, this issue has not been developed either factually or legally, by adequate briefing or otherwise, and it is more appropriate for subsequent consideration.

⁴¹ That is not to say that all defendants make the identical arguments, approach the subject of the current motions with the same decree of sophistication, or claim for the British court the same decree of supremacy. Some of them (e.g., Lufthansa) recognize the existence of several significant operative factors; others (e.g., Sabena) content themselves with ignoring the interests of plaintiffs under American law and the legitimate authority of the American courts, evidently in the belief that these interests and that authority can thereby be made to vanish.

⁴² See *Cohens v. Virginia*, 19 U.S. (6 Wheat.) 264, 404, 5 L. Ed. 257 (1821).

⁴³ This case contrasts with *Cole v. Cunningham*, 133 U.S. 107, 134, 33 L. Ed. 538, 10 S. Ct. 269 (1890), in which there was "[nothing] in the law or policy of [the state of the first-filed, enjoined action] opposed to the law or policy" of the state of the second-filed case.

U.S. 356, 369, 30 L. Ed. 220, 6 S. Ct. 1064 (1886). See also, Russian Volunteer Fleet v. United States, 282 U.S. 481, 489, 75 L. Ed. 473, 51 S. Ct. 229 (1930).⁴⁴

In the end, then, what is involved in this unfortunate controversy is the question whether greater weight ought to be accorded in cases of conflicting claims of jurisdiction to the nationality of the plaintiff or to the substantive law and the substantive public policies of the nation in whose courts the plaintiff brings the action. That question, moreover, must here be decided in the context of a factual situation [**33] where all the defendants were and still are substantially engaged in doing business in the United States; where certain of the acts allegedly committed in furtherance of the illegal conspiracy [*1135] occurred in the United States;⁴⁵ where only in the United States can all the defendants surely be reached;⁴⁶ and where, if the British court enjoins the plaintiff with respect even to some of the defendants, it may be impossible to prove the conspiracy against any of them.

But these are matters to be explored more fully at other stages -- perhaps on the motion for partial summary judgment on the *forum non conveniens* issue. The immediate question is whether this Court shall have the opportunity to decide whether it is an appropriate forum or whether a British court will assume [**34] that function. See Transcript of proceedings, January 27, 1983, where counsel for defendants stated (at pp. 16-17) that "the point of *forum non conveniens* . . . [is an issue which] we want . . . decided by the English court and not by the American court." This Court is aware of no precedent, and none has been cited by any party, holding that a *forum non conveniens* claim is to be decided by the tribunal to which a defendant wishes to have an action transferred rather than by the court in which the action is pending.

V

The conflict here is far from being a dry, abstractly legal dispute between jurisdictions or courts -- that is the least of it. Plaintiff has represented that in 1981 one in seven passengers flying between the United States and the United Kingdom was using low-fare Laker;⁴⁷ today, by contrast, travellers using scheduled airlines must pay the fare set by the IATA. According to the complaint, this result was brought about because several of the most powerful airlines of the western world banded together to commit violations of the American antitrust laws, engaging in activities which had the effect of driving Laker out of business and of injuring American consumers, [*35] among others, by making it impossible for them to continue to benefit from low airfares over the North Atlantic route.

If the allegations of the complaint are true, but if United States courts are nevertheless prevented by the actions of a foreign tribunal from deciding these cases under American law,⁴⁸ [**36] transatlantic airfares are likely to be kept artificially inflated by the alleged cartel on a permanent basis.⁴⁹ Such a development would every year cost many thousands of American travellers hundreds of dollars each, and it would significantly injure American tourism and other businesses which depend upon or make substantial use of commercial air transport between the United States and Europe.

⁴⁴ See also, the treaty entered into between the United States and Great Britain during the tenure of President Madison which provides that "generally, the merchants and traders of each nation respectively shall enjoy the most complete protection and security for their commerce but always subject to the laws and statutes of the two countries respectively." 8 Stat. 228 (1815).

⁴⁵ E.g., the IATA meeting in Florida.

⁴⁶ Although the defendants represent that all of them are either subject to process in Great Britain or would submit to British jurisdiction, this has not yet been demonstrated.

⁴⁷ Transcript of hearing, March 4, 1983. At the same hearing, plaintiff asserted that President Carter had hailed Laker's service as a breakthrough for the American consumer. Laker had 17,000 agents in this country selling tickets to American travellers.

⁴⁸ It cannot seriously be questioned that British conspiracy laws, to the degree that they may be applicable at all, provide little, if any, protection from anticompetitive activities. See slip op. at pp. 28-30 *infra*.

⁴⁹ The allegations of wrongdoing by the defendant airlines are so significant that the Department of Justice has commenced a grand jury investigation of their activities vis-a-vis Laker. See Aviation Daily at 311 (February 29, 1983), a citation submitted to the Court in the papers filed here.

Now that lawsuits are pending which are designed to determine whether the charges of law violations have merit, the defendant airlines have taken steps which, whatever the intention, would have the effect of aborting these actions so that they could never be decided.⁵⁰ Clearly, this [*1136] Court has an obligation to see to it that the cases before it are disposed of in accordance with law, and it intends to discharge that obligation.

[**37] It is to be hoped that the court in Great Britain will ultimately decide that it has no basis for interjecting itself into ongoing foreign lawsuits,⁵¹ [**38] or that those who sought or have indicated their intention to seek an injunction in the British court will, upon reflection, proceed by way of normal litigation procedures here.⁵² In any event, for the reasons stated, should these injunction cases be required to go forward, it is likely that plaintiff will prevail on the merits of its request for a permanent injunction. See note 20 *supra*.

VI

What remains to be considered is the balance of injuries and the public interest.

It is clear that, if this Court does not issue an injunction to preclude the defendants from joining British Airways, British Caledonian, Swissair and Lufthansa in their actions in the British court, at least some of them, or more likely all of them, will do just that. KLM and Sabena have acknowledged their desire to join the British suits; the American defendants disavow any present intention to sue in the British courts but state that they may wish to "participate" in the proceedings there. Given the advantages to antitrust defendants of having the merits of antitrust claims adjudicated in the United Kingdom rather than in the United States (see *infra*), there is a strong likelihood [**39] that all defendants would move in the British courts as soon as they would be legally free to do so.

Defendants argue that even if this forecast is accurate, plaintiff would still not be injured because the British court may decide that Britain is not the only proper forum for Laker's claims and may decline to issue a permanent injunction restraining the proceedings here. If the British court does proceed to the merits of the allegations, they continue, it may be expected to grant just relief, either under the United States antitrust laws or the British conspiracy laws.⁵³ These predictions can only be characterized as a mirage.

It is quite clear that [HN6](#)[] no British tribunal could or would proceed to enforce the Sherman Act. [15 U.S.C. § 15](#) lays venue only "in any district court of the United States." Cf. [General Investment Co. v. Lake Shore & Michigan Southern Ry. Co., 260 U.S. 261, 287, 1**401 67 L. Ed. 244, 43 S. Ct. 106 \(1922\)](#) (state court may not hear claim brought under antitrust laws; right to sue to be "exercised only in a 'court of the United States'"). The problems that

⁵⁰ In addition to their efforts in the United Kingdom, the defendants, represented as they are by large and prestigious law firms, have sought to disqualify Laker's own counsel. The effect of that effort, if fully successful, would be to leave Laker unrepresented. The disqualification motion, which raises serious and substantial claims, is pending and will be considered by the Court in due course. Defendants have also refused to participate in any meaningful discovery, and they have requested that the Court excuse them from discovery until the disqualification motion is decided. That request is being denied this date by a separate order. And, as has been noted elsewhere, the defendants are seeking in various ways to defer the decisions of this Court while they are proceeding at a rapid pace before the court in Great Britain.

⁵¹ It would be a far different and less serious matter had the airlines limited their prayer for relief in the British court to a declaration of British antitrust law. Then the issue would become purely one of the res judicata effect to be accorded the judgment first obtained. See Restatement (Second) of the Law of Judgments § 98.

Similarly, were the lawsuits in this Court to result in a judgment in plaintiff's favor after trial, this Court would have no business interfering with the British courts' application of British law regarding treble damage awards. See slip op. at p. 30 *infra*.

⁵² Obviously, if there are jurisdictional or other defects in Laker's lawsuit with respect to any, or all, defendants, this Court is obligated by law, and it will, enforce the defendants' rights in that and in all other respects. Beyond that, appellate courts and appellate remedies are fully available to any dissatisfied party.

⁵³ Some defendants focus on the American antitrust laws, others assert that the British laws provide comparable relief.

would be involved in trying to prove American **antitrust law** for purposes of application by a foreign court are reason enough for a foreign court to decline to hear such a case.⁵⁴

Moreover, given the hostility of the British courts to the American antitrust laws, see *infra*, it would be wholly unrealistic to assume that a British court would enforce [*1137] the Sherman Act even if it had legal power to do so.

Confining Laker to British law is equally inadequate. The House of Lords has ruled twice, once in 1891 and again in 1982, that **HN7** under British law it is not unlawful for a corporation to monopolize commerce by offering exceptional terms resulting in losses so as to drive competitors out of business, with the expectation [**41] that the losses will be recouped later once the competitor has been eliminated. These decisions further hold that the crux of an unlawful conspiracy is an intent to injure the plaintiff, and that an agreement or combination which has as its purpose the protection of the interests of the defendants, whatever they may be, is not unlawful. See *Lonrho Ltd. v. Shell Petroleum Co. Ltd.*, [1982] A.C. 173, 189 (1981); *Mogul Steamship Co., Ltd. v. McGregor, Gow & Co.*, [1982] A.C. 25, 35-6, 40 (1891). In these critical respects, British law is thus totally different from American law,⁵⁵ and it is plain that to relegate Laker to British law as applied by the British courts would only be to ensure that those courts would issue the declaration of non-liability that the airlines which are already before the Queen's Bench are presently seeking.⁵⁶

[**42] Such a result is quite consistent with the way in which British law, both parliamentary and judge-made, regards antitrust principles in general. The Protection of Trading Interests Act of 1980 directs British courts not to enforce treble damage awards against British firms, and this same act's "clawback" provision allows non-United States firms doing business in the United Kingdom to sue there to recover two-thirds of treble damage awards levied against them in the United States. British courts have long bemoaned what they regard as the wrongful extraterritorial reach of the American antitrust laws. See, e.g., *British Nylon Spinners Ltd v. Imperial Chemical Industries Ltd.*, [1953] 1 Ch. 19 (Court of Appeal, 1952).

In short, the situation is not that British law might be slightly less favorable to plaintiff than American law,⁵⁷ and that therefore Laker cannot be deemed to be truly injured if it is left to its remedies in the British courts. See note 59 *infra*. Rather, it may be expected that, if this Court should fail to issue an injunction and thus allow those defendants which are still before this Court to join with their alleged coconspirators before the Queen's [**43] Bench Division, the British court may very well (1) enjoin Laker from pursuing its remedies against any of the defendants in this Court,⁵⁸ [**44] and (2) enter a judgment on the merits that the defendants here (plaintiffs there) are not liable to

⁵⁴ American law would have to be proved by the roundabout method of testimony by expert witnesses.

⁵⁵ See, e.g., *United States v. American Telephone & Telegraph Co.*, 524 F. Supp. 1336, 1368 (D.D.C. 1981), citing 3 Areeda & Turner, **Antitrust law**, para. 771b, at p. 151 (1978).

⁵⁶ Counsel for the defendants make much of a statement made in the *Midland* case by Mr. Justice Parker that "if the alleged conspiracy did exist and Midland was a party to it there would clearly be a cause of action in conspiracy here where Laker could recover full compensatory damages." Transcript of Judgment, February 4, 1983, p. 13. The British court makes no reference to any cases. The phrasing, moreover, would seem to state a tautology: if Midland is found to have engaged in the sort of conspiracy that British law will penalize, then British law will penalize it. The statement does nothing to allay the indication that British law, unlike American law, would not penalize the sort of conspiracy alleged by Laker.

⁵⁷ Laker might well be entitled to an injunction to protect its American antitrust rights even in that situation, on the basis that it simply cannot be deprived of those rights by the kind of procedural maneuver resorted to by defendants.

⁵⁸ It is obviously not certain that the British court will do so, particularly with respect to the American parties. However, given the fact that, once the British court issues an injunction of the type sought before it, it may very well be too late for Laker ever to find its way back to the American judicial system, less than absolute certainty concerning the British court's intentions suffices to support a finding of irreparable injury.

Laker for the acts averred in the complaints.⁵⁹ The Court [*1138] finds that, for these reasons, plaintiff would be irreparably injured if the Court does not issue an injunction.

The defendants argue that they will suffer irreparable injury if an injunction is granted. Sabena states that if "forced to defend itself against Laker's claims in the United States, it will be exposed to the risk of enormous potential liability, the possible use of 'escalating settlement' tactics by the plaintiffs, substantial litigation expense, and a significant disruption of its affairs." Memorandum at 15. It observes that [**45] "all of these undesirable consequences can be avoided if the British courts determine that Laker may not lawfully pursue its claims against Sabena in the United States. None of them can be recouped if Sabena is prevented from obtaining such a ruling." KLM makes a similar argument.

A court of the United States can have little sympathy with such a position. If Sabena and KLM are concerned about the prospect of United States antitrust liability they should not do business here.⁶⁰ On the other hand, if they feel strongly that they are immune from the antitrust laws for some reason, or that this Court should decline to exercise its subject matter jurisdiction in this case, they may legitimately be expected to follow the established American procedures and file appropriate motions to that effect. Their proper remedy is not to assume the existence of a "right" to go into the courts of a third country so as to circumvent American substantive and procedural law.⁶¹

[**46] The irreparable injury claimed by the American defendants consists of their being prevented "from protecting their rights by participating, or even providing evidence, in the ongoing English proceedings whose outcome may well reflect on the American defendant's own potential liability, if any, under English law." This injury is purely speculative at this point. Moreover, as noted *infra* (note 63), the Court will entertain a proposal by the American defendants to modify the order.

For the foregoing reasons, the Court finds that the injury to Laker from a denial of the injunction far outweighs the injury to defendants resulting from its issuance. Considerations of the public interest also favor the plaintiff. Laker alleges that numerous American consumers were injured by the defendants' predatory acts that led to its demise and with it the alternative of low-cost, no frills transatlantic air service. The public interest clearly favors a full airing of these claims in the manner envisioned by the Sherman Act.

VII

The Court exceedingly regrets that it must issue an injunction in this case. However, it is worth emphasizing that this Court had no part in precipitating the current [**47] dispute. The lawsuit pending before it was proceeding in its normal course,⁶² when the British court, without appropriate regard to principles of comity, proceeded to interfere with that action. At that juncture, this Court's options were severely limited. It could either issue its own injunction [*1139] to prevent at least the remaining defendants -- those from the United States and some of those from the European continent -- from seeking shelter from United States law in a British court, or it could acquiesce

⁵⁹ [HN8](#) [↑] The fact that another country's law may be less favorable to a plaintiff than is American law is not reason alone to refuse to dismiss a lawsuit on *forum non conveniens* grounds. [*Piper Aircraft v. Reyno*, 454 U.S. 235, 70 L. Ed. 2d 419, 102 S. Ct. 252 \(1981\)](#). But when "the remedy provided by the alternative forum is so clearly inadequate or unsatisfactory that it is no remedy at all, the unfavorable change in the law may be given substantial weight." [454 U.S. at 254](#). See also, [*Industrial Investment Development Corp. v. Mitsui Co.*, 671 F.2d 876, 890-91 \(5th Cir. 1982\)](#), vacated on other grounds, [460 U.S. 1007, 103 S. Ct. 1244, 75 L. Ed. 2d 475 \(1983\)](#).

⁶⁰ If this consequence be viewed as an undue burden on U.S. commerce, the remedy, if a remedy is needed, lies with the Congress.

⁶¹ Absent congressional action, surely a foreign corporation cannot expect that it may do business here but be entitled at the same time to retreat to the sanctuary of a foreign legal system as soon as its conduct of business in the United States involves what are claimed to be violations of United States laws. Only diplomatic personnel have that privilege.

⁶² Defendants have argued that no weight should be given to the fact that Laker won the "race to the courthouse." There was no such race. The Laker suit had been pending for three months before defendants brought any action in the United Kingdom.

in silence in the effort to have a foreign tribunal decide on this Court's jurisdiction and to see the plaintiff's Sherman Act rights dissipated. With regret, the Court has no choice but to follow the former course.

For the reasons stated, a preliminary **[**48]** injunction ⁶³ **[**49]** was issued ⁶⁴ restraining the defendants from taking any action in a foreign forum that would impair or interfere with the jurisdiction of this Court in these cases or the freedom of plaintiff to prosecute these actions. ⁶⁵

[50]**

End of Document

⁶³ Several defendants have complained about the breadth of plaintiff's injunction request. In response, plaintiff cogently argues that it is difficult to draft language which would relieve defendants' complaints yet would not provide them with the opportunity, on one basis or another, to proceed in the British court aggressively rather than defensively, as have several other airlines. See, for example, the request of the American defendants to "participate" in the British action without specifying what that participation would entail. If the parties are able to agree on language, or if any party will submit language which will accomplish the objective of permitting the defendants to offer defenses in Great Britain without at the same time leaving them free to secure orders which would interfere with the litigation pending in the United States, the Court will consider modifying the terms of the preliminary injunction.

⁶⁴ See [Seattle Totems v. National Hockey League, 652 F.2d 852, 855 n.5 \(9th Cir. 1981\); 28 U.S.C. § 1651](#) (All Writs Act).

⁶⁵ It is necessary to deal separately with the British court's order to preclude plaintiff from filing motions or pleadings in this Court with respect to its pending action against British Airways. Even if it be assumed *arguendo*, and contrary to what has been stated above, that a court in the United Kingdom has the power to enjoin a British subject from initiating and pursuing a legal action of this kind in the United States, such a court cannot, on any theory, be assumed to possess either the power to issue an order precluding a party to an action in this Court from routine participation in that action, or the capacity to enforce such an order against parties admittedly subject to this Court's *in personam* jurisdiction.

Since Laker is not unwilling, but merely unable, to act, it may ultimately become appropriate to appoint a receiver or trustee to protect its interests and possibly those of American creditors pending final resolution of this controversy. Cf. [Rule 17\(c\), Fed. R. Civ. P.](#); 3A *Moores Federal Practice* para. 17.26; [In re Air Crash Disaster Near Saigon, Etc., 476 F. Supp. 521 \(D.D.C. 1979\); Field v. American West African Line, Inc., 154 F.2d 652 \(2d Cir. 1946\)](#). In the interim, to preserve the status quo, the Court expects plaintiff's counsel, as officers of this Court, with professional responsibilities, to continue to represent Laker's interests in the action pending here, notwithstanding the March 2 order against Laker, and to take such measures, including the filing of motions and oppositions, as may be necessary or appropriate to protect these interests.

Antitrust & Trade Law > Sherman Act > General Overview

HN1 [down arrow] **Antitrust & Trade Law, Sherman Act**

The effect upon interstate commerce necessary to establish jurisdiction, must, as a matter of practical economics, have a not insubstantial effect on the interstate commerce involved.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Jurisdiction

HN2 [down arrow] **Sherman Act, Claims**

The jurisdictional element of a Sherman Act violation is established by a showing of activities actually in interstate commerce or by other activities which, while wholly local in nature, substantially affect interstate commerce. The jurisdictional requirement of the Sherman Act is satisfied under either the in commerce or the effect on commerce theory. To establish jurisdiction, a plaintiff alleges the critical relationship in the pleadings and if these allegations are controverted, demonstrates by submission of evidence beyond the pleadings either that a defendant's activity is

itself in interstate commerce or, if it is local in nature, that it has an effect on some other appreciable activity demonstrably in interstate commerce.

Antitrust & Trade Law > Sherman Act > General Overview

HN3  **Antitrust & Trade Law, Sherman Act**

In a civil action under the Sherman Act, liability is established by proof of either an unlawful purpose or an anticompetitive effect. Even where there is an inability to prove that concerted activity has resulted in legally cognizable damages, jurisdiction is not impaired, though such a failure confines the available remedies to injunctive relief.

Antitrust & Trade Law > Sherman Act > General Overview

Transportation Law > ... > Federal Powers > Powers of Congress > Substantial Relations

HN4  **Antitrust & Trade Law, Sherman Act**

The determination of whether an activity has a substantial effect on interstate commerce is not determined with mathematical nicety. Nor does a lack of intent to affect interstate commerce or the lack of impact on market price preclude a viable jurisdictional determination.

Antitrust & Trade Law > Sherman Act > General Overview

HN5  **Antitrust & Trade Law, Sherman Act**

An effect on interstate commerce can be substantial under the Sherman Act even if its impact on interstate commerce falls far short of causing enterprises to fold or affecting market price.

Antitrust & Trade Law > Sherman Act > Jurisdiction

Antitrust & Trade Law > Sherman Act > General Overview

HN6  **Sherman Act, Jurisdiction**

A federal court has jurisdiction under the Sherman Act if the plaintiff establishes either that the challenged activity occurs within the flow of interstate commerce or that the activity, although wholly local in nature, substantially affects interstate commerce. Additionally, the plaintiff is not required to show that the flow of interstate commerce is diminished; an unreasonable burden on commerce may exist even though the anticompetitive conduct may increase interstate commerce.

Antitrust & Trade Law > Sherman Act > General Overview

Transportation Law > ... > Federal Powers > Powers of Congress > Substantial Relations

HN7  **Antitrust & Trade Law, Sherman Act**

Once a plaintiff establishes a substantial effect on interstate commerce, he need not establish an adverse effect on interstate commerce.

Antitrust & Trade Law > Sherman Act > General Overview

HN8 [] **Antitrust & Trade Law, Sherman Act**

A mere allegation that a defendant's general or overall business affects interstate commerce falls short of alleging the required critical relationship, for it leaves the court, impermissibly, to presume the nexus between the challenged activity and interstate commerce.

Antitrust & Trade Law > Sherman Act > General Overview

HN9 [] **Antitrust & Trade Law, Sherman Act**

An elaborate analysis of interstate impact is not necessary at the jurisdictional stage, only an allegation showing a logical connection as a matter of practical economics between the unlawful conduct and interstate commerce.

Antitrust & Trade Law > Sherman Act > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

HN10 [] **Antitrust & Trade Law, Sherman Act**

A private action is beyond the protective umbrella of the antitrust laws.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Physicians

Antitrust & Trade Law > Sherman Act > General Overview

HN11 [] **Regulated Practices, Price Fixing & Restraints of Trade**

Restraints of trade and monopolization inherently involve injury to the public and competition.

Opinion by: BARRETT

Opinion

[*795] BARRETT, Cir. J.

Lease Lights, Inc., Knight Lights Company, Inc., Protective Lighting, Inc., and Jack R. Seay, d/b/a Seay Electric Company (appellants), appeal from an order granting Public Service Company of Oklahoma (PSO) a directed verdict.

Appellants are engaged in the business of installing, leasing, servicing, and maintaining commercial and industrial outdoor lighting in Oklahoma. PSO is an electric public utility company regulated by the Oklahoma [*796] Corporate Commission. Appellants initiated this action against PSO for alleged violation of Section 2 of the Sherman Act as well as Sections 4 and 16 of the Clayton Act (15 U.S.C.A. § 2 and § 15). Appellants sought a total of \$8,500,000 in actual damages to be trebled.

Within their complaint, [*2] appellants alleged that PSO had a virtual monopoly in the supply of electricity within its service area, that PSO had monopolized and was attempting to monopolize the outdoor lighting business for private, commercial, and industrial users within its service area, and that PSO's actions had occurred in and had an effect upon interstate commerce. Appellants specially alleged that PSO had monopolized the outdoor lighting business by: furnishing outdoor lighting business in the public utility business; refusing to afford appellants the same service it furnished to its other customers; utilizing its public utility status unlawfully to install, service and maintain outdoor lighting on private property; refusing to allow appellants to install their lights on its poles; and by refusing to connect and delaying the connection of electrical current to appellants' lights for unreasonable periods of time.

Within its original answer, PSO admitted that the acts complained of occurred in and had an effect upon interstate commerce. Thereafter, PSO filed an amended answer in which it specifically denied that the acts complained of occurred in and had an effect upon interstate commerce. PSO further [*3] alleged, *inter alia*, that: as a state regulated entity, conducting state regulated business, it is exempt from the federal antitrust statutes; its rates are established in compliance with the directives of the Oklahoma Corporate Commission; its rates for outdoor lighting have, since May 16, 1975, been profitable; its rates for outdoor lighting have never been below its costs; appellants were never refused any service to which they were entitled; if appellants were in fact improperly denied service, they had a clear and adequate remedy before the Oklahoma Corporate Commission which they failed to pursue; its refusal to allow appellants the right to install their lights on its poles was based on sound business decisions; and, any losses sustained by appellants are attributable to appellants' mismanagement of their respective businesses.

During the course of trial appellants established that their interstate purchases for poles, lights, brackets, wiring, controls, and other components amounted to \$110,000 to \$185,000 a year. Appellants also presented evidence reflecting that PSO's share of the commercial and industrial lighting business in the Tulsa metropolitan area had grown [*4] from 24.6% in 1969 to 63.2% in 1981 while appellants' market share decreased from 69.27% to 33.9% during the same period.

At the conclusion of appellants' case, and prior to presenting any evidence, PSO moved for a directed verdict. PSO alleged that its outdoor lighting business as a public utility was regulated by the State of Oklahoma and, accordingly, was immune to federal antitrust laws; further, that appellants had failed to establish that interstate commerce had been substantially and adversely affected.

Within its order granting PSO's motion for a directed verdict the district court found/concluded:

The Plaintiffs herein contend that the business activity in question is the supplying of outdoor lighting to certain types of customers within the service area served by Defendant. It is not the rental of lights, poles and fixtures, but the rental of illumination. There is no dispute that the Defendant's service area is wholly within the State of Oklahoma. The Court, therefore, must conclude that because the business in question, as defined by the Plaintiffs, is wholly local in nature, the Plaintiffs' burden is to produce evidence which, when viewed in the light most [*5] favorable to Plaintiffs, shows that the Defendant's activity has an effect on some other appreciable activity demonstrably in interstate commerce.

[*797] In *McLain, supra*, the Court stated that **HN1**[] the effect upon interstate commerce necessary to establish jurisdiction, must, "as a matter of practical economics . . . have a not insubstantial effect on the interstate commerce involved." 100 S. Ct. at 511.

Plaintiffs' evidence on this crucial point shows that some of their customers were involved in interstate commerce (a trucking company, for example), and that substantially all of the components used in the business (lights and poles) were manufactured outside of the State of Oklahoma. There is simply no evidence that the interstate business of Plaintiffs' customers was affected in anyway by any activity of the Defendant; nor is there any evidence that the commerce between the states in lights, poles, and fixtures was adversely affected by any activity of the Defendant. The Plaintiffs' evidence actually shows that this business was increasing steadily during the times in question herein.

The Court, upon its review of the Plaintiffs' evidence, can come to no conclusion [**6] other than that Plaintiffs have failed to produce any evidence showing that interstate commerce was adversely affected in any way by the Defendant's activities.

R., Vol. I at pp. 62-63.

The district court also found that appellants had presented sufficient evidence to establish the claimed relevant market; appellants' evidence to establish that PSO possessed monopoly power in any relevant market was sufficient, although perilously close to being a "mere scintilla"; appellants failed to show any causal connections between PSO's activities and the damages they were claiming; appellants failed to present evidence by which the impact of PSO's allegedly unlawful acts could be separated from lawful competition, appellants' own business decisions, actions taken by customers, and general increases in costs and labor over a period of years; appellants' evidence on damages, although extremely weak, was adequate for submission "to the jury, had the other requirements [jurisdiction] been met"; and that in view of the lack of evidence relative to the extent of the Oklahoma Corporate Commission's regulation of PSO's business, a ruling on PSO's assertion that its regulated status caused [**7] it to be immune from the application of the Sherman Act would be premature.

On appeal appellants contend, *inter alia*, the district court erred in: (1) concluding that the evidence would not support a jury finding of causation or fact of damage; (2) finding that there was an absence of evidence to show that the interstate commerce jurisdictional requirements were satisfied; and (3) directing a verdict in violation of their right to a jury trial.

I.

Appellants contend that the trial court erred in finding that there was an absence of evidence to show that the interstate commerce jurisdictional requirements were satisfied. Appellants argue that they established the interstate commerce jurisdictional requirements by showing that: the lights and lighting components installed in the market area were purchased in states outside of Oklahoma; a portion of PSO's business occurs in interstate commerce; and that some of their lighting customers were engaged in businesses that operate in interstate commerce. PSO does not dispute these contentions.

PSO argues that such a showing does not establish jurisdiction when, as here, it is undisputed that: the business of outdoor lighting is [**8] wholly local in nature; the number of lights in the relevant market claimed by appellants has increased each year; there was no evidence that the movement in interstate commerce of outdoor lighting components has been reduced or adversely affected; and that appellants' evidence shows that the relevant market growth rate for several of the lights supplied by appellants [*798] and PSO was twice as fast following PSO's alleged anticompetitive actions as it was in the six immediately preceding years. As such, PSO contends that the district court did not err in finding that appellants had failed to establish jurisdiction, having "failed to produce any evidence showing that interstate commerce was adversely affected in any way by the Defendant's activities". We disagree.

HN2[] The jurisdictional element of a Sherman Act violation may be established by a showing of activities "actually *in* interstate commerce" or by other activities which, "while wholly local in nature substantially affect

701 F.2d 794, *798L^A 1983 U.S. App. LEXIS 29831, **8

interstate commerce." [McLain v. Real Estate Board of New Orleans, 444 U.S. 232, 241, 62 L. Ed. 2d 441, 100 S. Ct. 502 \(1980\)](#). In *McLain* the Court stated:

It can no longer be doubted, **[**9]** however, that the jurisdictional requirement of the Sherman Act may be satisfied under either the "in commerce" or the "effect on commerce" theory. . . . To establish jurisdiction a plaintiff must allege the critical relationship in the pleadings and if these allegations are controverted must proceed to demonstrate by submission of evidence beyond the pleadings either that the defendants' activity is itself in interstate commerce or, if it is local in nature, that it has an effect on some other appreciable activity demonstrably in interstate commerce. *Gulf Oil Corp. v. Copp Paving Co.*, *supra*, at 202.

To establish the jurisdictional element of a Sherman Act violation it would be sufficient for petitioners to demonstrate a substantial effect on interstate commerce generated by respondents' brokerage activity. Petitioners need not make the more particularized showing of an effect on interstate commerce caused by the alleged conspiracy to fix commission rates, or by those other aspects of respondents' activity that are alleged to be unlawful. . . . A violation may still be found in such circumstances because [HN3](#)[↑] in a civil action under the Sherman Act, liability may be established **[**10]** by proof of *either* an unlawful purpose or an anticompetitive effect.

* * *

Nor is jurisdiction defeated in a case relying on anticompetitive effects by plaintiff's failure to quantify the adverse impact of defendant's conduct. . . . Even where there is an inability to prove that concerted activity has resulted in legally cognizable damages, jurisdiction need not be impaired, though such a failure may confine the available remedies to injunctive relief.

[444 U.S. at pp. 242-243.](#)

[HN4](#)[↑] The determination of whether an activity has a "substantial effect" on interstate commerce cannot be determined with mathematical nicety. In [Goldfarb v. Virginia State Bar, 421 U.S. 773, 44 L. Ed. 2d 572, 95 S. Ct. 2004 \(1975\)](#) the Court stated:

The fact that there was no showing that home buyers were discouraged by the challenged activities does not mean that interstate commerce was not affected. Otherwise, the magnitude of the effect would control, and our cases have shown that, once an effect is shown, no specific magnitude need be proved.

[421 U.S. at p. 785.](#)

Nor does a lack of intent to affect interstate commerce or the lack of impact on market price preclude a **[**11]** viable jurisdictional determination. In [Hospital Building Company v. Rex Hospital Trustees, 425 U.S. 738, 48 L. Ed. 2d 338, 96 S. Ct. 1848 \(1976\)](#) the Court held:

Whether the wholesalers intended their restraint to affect interstate commerce was simply irrelevant to our holding. See also [United States v. McKesson & Robbins, 351 U.S. 305, 100 L. Ed. 1209, 76 S. Ct. 937 \(1956\)](#). In the same way, the fact that respondents in the instant case may not have had the purposeful goal of affecting interstate commerce does not **[*799]** lead us to exempt that conduct from coverage under the Sherman Act.

The Court of Appeals further justified its holding of "no substantial effect" by arguing that "no source of supply or insurance company or lending institution can be expected to go under if Mary Elizabeth doesn't expand, and no market price likely will be affected." 511 F.2d, at 684. While this may be true, it is not of great relevance to the issue of whether the "substantial effect" test is satisfied. [HN5](#)[↑] An effect can be "substantial" under the Sherman Act even if its impact on interstate commerce falls far short of causing enterprises to fold or affecting market price.

[**12]

425 U.S. at p. 745.

In Mishler v. St. Anthony's Hospital Systems, 694 F.2d 1225 (10th Cir. 1981) we stated:

HN6 [↑] A federal court has jurisdiction under the Sherman Act if the plaintiff establishes either that the challenged activity occurs within the flow of interstate commerce or that the activity, although wholly local in nature, substantially affects interstate commerce.

* * *

Additionally, even at trial Dr. Mishler is not required to show that the flow of interstate commerce is diminished; an unreasonable burden on commerce may exist even though the anticompetitive conduct may increase interstate commerce. Harold Friedman, Inc. v. Thorofare Markets, Inc., 587 F.2d 127, 132 & n. 14 (3d Cir. 1978); P. Marcus, Antitrust Law and Practice 86 (1980).

694 F.2d at pp. 1227-1228.

Applying these standards to the facts herein, we hold that appellants did establish a jurisdictional predicate for PSO's alleged antitrust violations and that the trial court erred in granting PSO's motion for a directed verdict. It was uncontested that the service in question, i.e., the supplying of illumination in and about the Tulsa metropolitan area, albeit admittedly [**13] local in nature, had a substantial impact on interstate commerce by the repeated, ongoing interstate purchase of lights and lighting components by both appellants and PSO. Having HN7 [↑] established a substantial effect on interstate commerce, appellants need not, as determined by the trial court, establish an "adverse effect" on interstate commerce.

We reject PSO's contention that the district court's directed verdict for lack of jurisdiction was in accord with our Crane v. Intermountain Health Care, Inc., 637 F.2d 715 (10th Cir. 1980) (en banc). In Crane, a pathologist sued Intermountain Health Care, Inc., (Intermountain), alleging that Intermountain and others had acted in concert to restrain the practice of pathology at Cottonwood Hospital and to boycott his services in violation of the Sherman Act. Within Crane, as observed by PSO, we stated:

Even though the defendant's overall business may impact interstate commerce greatly, the challenged activity may in every practical economic sense be unrelated to interstate commerce. HN8 [↑] A mere allegation that the defendant's general or overall business affects interstate commerce falls short of alleging the required "critical" [**14] relationship," for it leaves the court -- impermissibly, under McLain, see 444 U.S. at 242, 100 S. Ct. at 509 -- to "presume" the nexus between the challenged activity and interstate commerce.

637 F.2d at p. 724.

Although not conceded by PSO, appellants' evidence in this case did more than merely allege that PSO's general or overall business affects interstate commerce. As set forth, *supra*, appellants presented unrebutted evidence that most of the lights and lighting components installed in the relevant market area were shipped into Oklahoma from other states. PSO did not challenge this evidence. It did not present evidence that the lights and lighting components it installed were not received in the course of interstate commerce. Under such circumstances, we need not "presume the nexus" between the challenged activity [*800] (PSO's outdoor lighting business) and interstate commerce (interstate shipment of lights and lighting components).

Contrary to PSO's contention, appellants' evidence was in keeping with *Crane*. We there held, *citing to McLain, supra*:

By stating that plaintiff "need not make the more particularized showing of an [**15] effect on interstate commerce caused by the conspiracy . . . or other aspects of respondents' activity that are alleged to be unlawful," the Court [McLain] was only confirming the principle set forth in *Hospital Building*, *Burke*, and *Goldfarb* that for jurisdictional purposes a plaintiff need not "make the . . . particularized showing." [444 U.S. at 242, 100 S. Ct. at 509](#). In other words, [HN9](#)[¹⁵] an elaborate analysis of interstate impact is not necessary at the jurisdictional stage, *only an allegation showing a logical connection as a matter of practical economics between the unlawful conduct and interstate commerce*.

[637 F.2d at p. 723](#). [Emphasis supplied].

We are not inclined to accept PSO's contention that the substantial reduction in appellants' share of the market was due to their own mismanagement, which, if accepted, would effectively relegate appellants' action to [HN10](#)[¹⁶] a private one, beyond the protective umbrella of the antitrust laws. In [Mishler v. St. Anthony's Hospital Systems, supra](#), we stated:

Additionally, we cannot say from the pleadings that this case involves a mere private wrong in which revenues were diverted from one set of doctors to [**16] another, and thus fails to demonstrate the requisite harm to the public. We assume that doctors do not all deliver identical services for identical fees. [HN11](#)[¹⁷] Restraints of trade and monopolization inherently involve injury to the public and competition. [Almeda Mall, Inc. v. Houston Lighting & Power Co.](#), [615 F.2d 343, 351](#) (5th Cir.), cert. denied, [449 U.S. 870, 101 S. Ct. 208, 66 L. Ed. 2d 90](#) (1980).

[694 F.2d at p. 1228](#).

II.

In view of our determination that the district court erred in finding lack of subject matter jurisdiction, we decline to address appellants' remaining allegations of error.

Reversed and Remanded.

HN2[] Administrative Law, Agency Adjudication

A specific purpose to secure anticompetitive governmental action and to burden rivals cannot itself make activities wrongful. Monopolists or collaborators are privileged to pursue their private and selfish objectives through

602 F. Supp. 105, *105L^A 1983 U.S. Dist. LEXIS 18645, **18645

legislation, adjudication, or executive and administrative machinery. Conduct thus immune from antitrust attack would not be immune when the governmental action is a "mere sham" or in bad faith. In the legislative context, however, such bad faith is virtually beyond proof and should be ignored, at least presumptively and perhaps conclusively. It will also be difficult to prove in dealings with the executive or administrative arms of government. Bad faith is more readily detected, though still elusive in the context of administrative adjudication.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > General Overview

HN3 [↓] Exemptions & Immunities, Noerr-Pennington Doctrine

The employment of improper means in dealing with government is not privileged. The courts, however, hesitate to use antitrust law to define what is proper in the political arena, although this hesitation need not have the effect of immunizing from antitrust challenge conduct that is already "legally proscribed" apart from antitrust law. The criteria of impropriety varies according to the governmental body involved; there is, for example, very wide latitude for questionable activity in the legislative context. Moreover, there are significant doubts about the causal connection between the impropriety and the anticompetitive results of government action. Such doubts are great enough to warrant antitrust law's ignoring improprieties altogether in the legislative context. In other contexts, improprieties may be considered by the antitrust tribunal, subject to the cautions slated elsewhere about significance and causation.

HN7 [down] **Sherman Act, Defenses**

Under the "state action" doctrine enunciated in Parker, the actions of the City of Cheyenne, the Cheyenne City Council, and the Public Service Commission are immune from liability under the antitrust laws if they were taken pursuant to state policy. This does not mean, however, that a political subdivision necessarily must be able to point to a specific, detailed legislative authorization before it properly may assert a Parker defense to an antitrust suit. An adequate state mandate for anticompetitive activities of cities and other subordinate governmental units exists when it is found from the authority given a governmental entity to operate in a particular area, that the legislature contemplated the kind of action complained of. To be exempt from antitrust scrutiny the municipal action must be in furtherance or implementation of clearly articulated and affirmatively expressed state policy. Broad powers are conferred upon municipal governments to grant franchises to utility companies, and franchises are special privileges conferred by the government on individuals, which do not belong to the citizens of the country generally of common right; no franchise can be held which is not derived from the law of the state.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

[**HN8**](#) Exemptions & Immunities, Noerr-Pennington Doctrine

No violation of the Sherman Act can be predicated upon mere attempts to influence the passage or enforcement of laws. Neither does the Sherman Act prohibit two or more persons from associating together in an attempt to persuade the legislature or the executive to take particular action with respect to a law that would produce a restraint or a monopoly. The only exception to this general principle recognized by the Noerr court is when the action complained of is not legitimately directed at influencing official action, but is instead a mere "sham," frivolous in its nature, designed solely to have a detrimental effect upon the business of a competitor or potential competitor. Such allegations are virtually impossible to prove, and may, for practical purposes, be ignored. In attempting to categorize an activity as merely a "sham" lobbying, hiding behind the most frivolous of contentions, it must be remembered that in a political forum, almost no contention can be characterized categorically as frivolous. A contention cannot, by definition, be frivolous when it is actually adopted by a legislature, administrator, or court.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

[**HN9**](#) Exemptions & Immunities, Noerr-Pennington Doctrine

The United States Supreme Court (Court) has concluded that it would be destructive of rights of association and of petition to hold that groups with common interests may not, without violating the antitrust laws, use the channels and procedures of state and federal agencies and courts to advocate their causes and points of view respecting resolution of their business and economic interests vis-a-vis their competitors. The court also held that the exercise of the above rights could not be taken in such a manner as was designed to foreclose one's competitors from meaningful access to the same public bodies.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

Governments > Legislation > Interpretation

[**HN10**](#) Exemptions & Immunities, Noerr-Pennington Doctrine

To be sure, the legislature may be mistaken or unaware of the consequences of its actions, or it may be responding to political pressures not truly reflecting "the public interest," but the antitrust court may not reappraise the legislature's assessment of the public welfare. This sound advice will be heeded by the court.

Judges: [\[**1\]](#) Clarence A. Brimmer, Chief United States District Judge.

Opinion by: BRIMMER

Opinion

[**\[*105\]** MEMORANDUM DECISION AND ORDER OF DISMISSAL](#)

The Plaintiff, Rural Electric Company, of Pine Bluffs, Wyoming, brought suit against the City of Cheyenne, Wyoming, its mayor and city councilmen, and the Cheyenne Light, Fuel & Power Company, a private utility, alleging that (1) Cheyenne Light, Fuel & Power breached a contract dividing the service area in an industrial [\[*106\]](#) park near Cheyenne, (2) that the mayor, councilmen and the City, by denying the Plaintiff a franchise for electric service, acted in violation of State law, (3) that the mayor, councilmen and City have illegally granted the Defendant utility a monopoly, (4) that Cheyenne Light, Fuel & Power violated federal antitrust laws by conspiring with the other Defendants to monopolize the electric service area, (5) that the municipal Defendants have engaged in an unlawful

conspiracy to monopolize an electric service area in violation of the antitrust laws, and (6) that the Defendant Higday has engaged also in an unlawful conspiracy to violate the antitrust laws. The municipal Defendants (the mayor, councilmen and the City) and the [**2] utility Defendants (Cheyenne Light, Fuel & Power and its manager, Higday) have each moved to dismiss Plaintiff's complaint for lack of jurisdiction and failure to state a claim under [Rule 12\(b\)\(6\), Federal Rules of Civil Procedure.](#)

The Plaintiff is a nonprofit Wyoming public utility company furnishing electric service to rural residents in southeastern Wyoming, northeastern Colorado and western Nebraska. The Defendant Cheyenne Light, Fuel & Power is a Wyoming intrastate public utility company serving the City of Cheyenne and specified rural areas adjacent thereto with electric and gas utility service. Jurisdiction is claimed under [28 U.S.C. § 1331](#), relating to federal questions, and § 1337 relating to Acts of Congress regulating commerce and protecting trade and commerce against restraints and monopolies.

The first cause of action for breach of contract is a pendent jurisdiction claim, as are the second and third causes of action, claiming that the municipal Defendants acted in violation of State statutes and the Wyoming Constitution. Whether or not this Court has jurisdiction of the remaining three causes of action, which allege that the Defendants engaged in an unlawful combination [**3] or conspiracy to restrain trade in violation of [15 U.S.C. §§ 1-30](#), is the issue presented by Defendants' motions.

The facts alleged by the Plaintiff's complaint, and which are assumed to be true for the purposes of these motions, are that Plaintiff and Cheyenne Light, Fuel & Power Company on December 7, 1953 by written contract, thereafter approved by the Public Service Commission, agreed that what is now Lot 24 of Rocky Mountain Industrial Park would be part of the Plaintiff's certificated service area. In December 1978 the Rocky Mountain Industrial Park was annexed to the City of Cheyenne. Prior to March 11, 1982 the Defendants had numerous meetings with Quanex Corporation, a large industrial company, concerning location of an industrial facility on Lot 24 and utility service to it, but at a meeting with Plaintiff's representatives on March 11, 1982 the Plaintiff refused to give up this portion of its certificated area. The Plaintiff then asked the municipal Defendants to grant it a franchise to serve Lot 24 but on April 16, 1982 the Cheyenne City Council refused to grant Plaintiff a franchise and by resolution asked the Wyoming Public Service Commission to grant Cheyenne Light, [**4] Fuel & Power the right to serve Quanex Corporation. The Plaintiff's subsequent efforts to secure a franchise from the City failed. On August 2, 1982 the Wyoming Public Service Commission held a public hearing, at which the Plaintiff, the City of Cheyenne and Cheyenne Light, Fuel & Power were present, on the application of Defendant Cheyenne Light, Fuel & Power to serve the disputed area, and on September 27, 1982 the Public Service Commission of Wyoming by order granted Cheyenne Light, Fuel & Power authority to serve the Quanex Corporation. Cheyenne Light, Fuel & Power is the only utility company serving the City of Cheyenne and has a monopoly on the electric and gas utility business therein.

Paragraphs 43(a) and 43(b) of the Plaintiff's Complaint allege that Cheyenne Light, Fuel & Power has appeared three times before the Cheyenne City Council and that its agents have contacted members of the City Council to keep the Plaintiff from obtaining a franchise for electric service within the City. Plaintiff also alleges [**107] that the municipal defendants as well as the Defendant Higday have engaged "in an unlawful combination and conspiracy" to restrain and monopolize interstate [**5] trade. In argument Plaintiff's counsel stated that he hoped to discover proof of such allegations in the course of discovery.

Mr. Justice Cardozo observed, in his dissent in [U.S. v. Constantine, 296 U.S. 287, 299, 80 L. Ed. 233, 56 S. Ct. 223 \(1935\)](#), "[HN1](#)" There is a wise and ancient doctrine that a Court will not inquire into the motives of a legislative body or assume them to be wrongful." Alexander M. Bickel in "The Least Dangerous Branch" cites this as the established view (p. 208). *Areeda & Turner on Antitrust*, Vol. II, p.36, summarize their conclusions respecting efforts of collaborators to use the machinery of government to maintain or strengthen market power as follows:

"(1) [HN2](#) A specific purpose to secure anticompetitive governmental action and to burden rivals cannot itself make activities wrongful. Monopolists or collaborators are privileged to pursue their private and selfish objectives through legislation, adjudication, or executive and administrative machinery.

(2) Conduct thus immune from antitrust attack would not be immune when the governmental action is a "mere sham" or in bad faith. In the legislative context, however, such bad faith is virtually beyond proof [**6] and should ignored, at least presumptively and perhaps conclusively. It will also be difficult to prove in dealings with the executive or administrative arms of government. Bad faith is more readily detected, though still elusive in the context of administrative adjudication.

(3) [HN3](#) The employment of improper means in dealing with government is not privileged. The courts, however, hesitate to use anti-trust law to define what is proper in the political arena, although this hesitation need not have the effect of immunizing from antitrust challenge conduct that is already "legally proscribed" apart from antitrust law. The criteria of impropriety varies according to the governmental body involved; there is, for example, very wide latitude for questionable activity in the legislative context. Moreover, there are significant doubts about the causal connection between the impropriety and the anticompetitive results of government action. Such doubts are great enough to warrant antitrust law's ignoring improprieties altogether in the legislative context. In other contexts, improprieties may be considered by the antitrust tribunal, subject to the cautions slated elsewhere about significance and [**7] causation."

In [United Mine Workers v. Pennington, 381 U.S. 657, 670, 14 L. Ed. 2d 626, 85 S. Ct. 1585 \(1965\)](#) the Supreme Court held that,

[HN4](#) "Joint efforts to influence public officials do not violate the antitrust laws even though intended to eliminate competition. Such conduct is not illegal either standing alone or as a part of a broader scheme itself violative of the Sherman Act."

The Supreme Court held in [Parker v. Brown, 317 U.S. 341, 87 L. Ed. 315, 63 S. Ct. 307 \(1943\)](#) that a state marketing program did not violate the Sherman Act because it derived its authority from the "legislative command of the state" and the Court found nothing in the Sherman Act or its history suggesting that its purpose was to restrain a state or its agents. [HN5](#) [Article XIII, Section 4 of the Wyoming Constitution](#) provides

"No street passenger railway, telegraph or electric light line shall be constructed within the limits of any municipal organization without the consent of its local authorities."

The Wyoming Supreme Court in [Tri-County Electrical Association Inc. v. City of Gillette, 584 P.2d 995](#) (Wyo., 1978), held that this provision gave cities extensive [**8] control over electric utilities within their boundaries. Here, the Plaintiff alleges (1) that the disputed area is within the city's boundaries, and (2) that the City Council wanted to keep the City of Cheyenne "under one power company" (Complaint, paragraph [*108] 15). [HN6](#) The State Legislature in § 37-2-205(b), W.S. 1977, provided further that no public utility shall exercise a right or franchise without first obtaining from the Public Service Commission a certificate of convenience and necessity.

We must conclude that the action of the City of Cheyenne as well as of the Public Service Commission of Wyoming, is immune from suit under the Sherman Act. [HN7](#) Under the "state action" doctrine enunciated in *Parker*, the actions of the City of Cheyenne, the Cheyenne City Council, and the Public Service Commission are immune from liability under the antitrust laws if they were taken pursuant to state policy. [Pueblo Aircraft Service, Inc. v. City of Pueblo, Colo., 679 F.2d 805 \(10th Cir. 1982\)](#); [Lafayette v. Louisiana Power and Light Company, 435 U.S. 389, 55 L. Ed. 2d 364, 98 S. Ct. 1123 \(1978\)](#).

This does not mean, however, that a political subdivision necessarily must [**9] be able to point to a specific, detailed legislative authorization before it properly may assert a Parker defense to an antitrust suit. . . . An adequate state mandate for anticompetitive activities of cities and other subordinate governmental units exists when it is found 'from the authority given a governmental entity to operate in a particular area, that the legislature contemplated the kind of action complained of.' [Lafayette, supra, p. 415](#).

To be exempt from antitrust scrutiny the municipal action must be "in furtherance or implementation of clearly articulated and affirmatively expressed state policy." [Community Communications Co. v. City of Boulder, 455 U.S. 40, 55, 70 L. Ed. 2d 810, 102 S. Ct. 835 \(1982\)](#).

In *Tri-County Electrical Association, Inc., supra, p. 1001*, the Wyoming Supreme Court recognized the broad powers conferred upon municipal governments to grant franchises to utility companies, and noted that "franchises are special privileges conferred by the government on individuals, which do not belong to the citizens of the country generally of common right; no franchise can be held which is not derived from the law of the state." It appears from [**10] an application of the state action doctrine to the laws of the State of Wyoming, as found in Article XIII of the Wyoming Supreme Court in Tri-County, that the City of Cheyenne is immune from antitrust liability in this matter, and the causes of action against it on this basis must be dismissed.

Even if the Plaintiff's allegations that various of the Defendants collaborated to influence the decision-making of public bodies are true, such activity would not amount to a violation of the antitrust laws. **HN8**[] "No violation of the [Sherman] Act can be predicated upon mere attempts to influence the passage or enforcement of laws." *Eastern Railroad Presidents Conference v. Noerr Motor Freight, 365 U.S. 127, 135, 5 L. Ed. 2d 464, 81 S. Ct. 523 (1961)*. Neither does the Sherman Act "prohibit two or more persons from associating together in an attempt to persuade the legislature or the executive to take particular action with respect to a law that would produce a restraint or a monopoly." *Noerr, supra, p. 136*.

The only exception to this general principle recognized by the *Noerr* court is when the action complained of is not legitimately directed at influencing official action, but is [**11] instead a mere "sham," frivolous in its nature, designed solely to have a detrimental effect upon the business of a competitor or potential competitor. *Noerr*, p. 144. Areeda and Turner point out, however, that such allegations are virtually impossible to prove, and may, for practical purposes, be ignored. *Areeda and Turner, supra*, paragraph 203. They also point out an obvious fact of significance in this action. In attempting to categorize an activity as merely a "sham" lobbying, hiding behind the most frivolous of contentions, it must be remembered that "in a political forum, almost no contention can be characterized categorically as frivolous [A] contention cannot, by definition, be frivolous when it is actually adopted by a legislature, administrator, or court." *Id.*, paragraph [*109] 203(c). See also *Franchise Realty Interstate Corp. v. San Francisco Local Joint Executive Board of Culinary Workers, 542 F.2d 1076, 1079 (9th Cir. 1976)*.

The Supreme Court, in *California Motor Transport Co. v. Trucking Unlimited, 404 U.S. 508, 30 L. Ed. 2d 642, 92 S. Ct. 609 (1972)* reiterated its earlier stances in *Noerr* and *Pennington*.

HN9[] We conclude [**12] that it would be destructive of rights of association and of petition to hold that groups with common interests may not, without violating the antitrust laws, use the channels and procedures of state and federal agencies and courts to advocate their causes and points of view respecting resolution of their business and economic interests vis-a-vis their competitors. *Id.*, p. 510-511.

In *California Motor Transport, supra*, the Supreme Court also held that the exercise of the above rights could not be taken in such a manner as was designed to foreclose one's competitors from meaningful access to the same public bodies. Plaintiff herein has raised no such issue, and cannot be heard to complain that it was unable to petition the same public officials as certain of the Defendants. To the contrary, the Plaintiff is merely dissatisfied with the actions taken by those public bodies.

HN10[] "To be sure, the legislature may be mistaken or unaware of the consequences of its actions, or it may be responding to political pressures not truly reflecting 'the public interest,' but the antitrust court may not reappraise the legislature's assessment of the public welfare." *Areeda and Turner* [**13] , *supra*, paragraph 202b. This sound advice, concurring as it does with the wisdom of Justice Cardozo, will be heeded by this Court. The allegedly violative activities of the Defendants in influencing the granting of a franchise to the Defendant Cheyenne Light, Fuel & Power were apparently successful attempts to persuade a public body to exercise its powers in a particular way. Such activities, even if selfishly motivated, do not violate the Sherman Act if endorsed ultimately by a public body. This Court will not endeavor to speculate upon the motivations of the City Council, the City of Cheyenne, or the Public Service Commission in acting as they did. Even if the conduct of various of the Defendants was unethical

602 F. Supp. 105, *109 (1983 U.S. Dist. LEXIS 18645, **13

in interacting as it is alleged they did in influencing the City Council, such activity is also immune from suit under the antitrust laws when conducted in the context of lobbying the City Council as a legislative body. [Metro Cable Co. v. CATV of Rockford, 516 F.2d 220 \(7th Cir. 1975\).](#)

It is clear that the fourth, fifth, and sixth claims of the Plaintiff's complaint fail to state a claim upon which relief can be granted by this Court. Pursuant to [Federal Rules of Civil Procedure 12\(b\)\(6\)](#), these claims are properly dismissed from this action. Since the only basis of jurisdiction in this Court rests upon these claims, the pendent state claims contained in the first, second, and third causes of action must also be dismissed for lack of subject matter jurisdiction.

Dated this 11th day of March, 1983.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

702 F.2d 1207, *1207LÁ1983 U.S. App. LEXIS 29681, **1

The plaintiff must introduce sufficient evidence upon which a jury would be warranted in finding a contract, combination or conspiracy as a prerequisite to [15 U.S.C.S. § 1](#), liability. If such is found, it must be one which is unreasonably in restraint of trade.

Antitrust & Trade Law > Sherman Act > General Overview

Torts > ... > Concerted Action > Civil Conspiracy > General Overview

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

[**HN3**](#) Antitrust & Trade Law, Sherman Act

Antitrust civil conspiracy or combination has traditionally been inferred from a course of dealing or other circumstances in which the determinative facts are what the parties actually did rather than whether an express agreement existed. The courts, being sensitive to the realities of the marketplace, have extended the concept of concerted activity far beyond the classic case of actual agreement to engage in a common course of conduct.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

[**HN4**](#) Antitrust & Trade Law, Sherman Act

Proof of termination following competitor complaints is sufficient to support an inference of concerted action. A termination even more unilateral in nature could constitute a [15 U.S.C.S. § 1](#) violation if it evinces sufficient anticompetitive character.

Opinion by: WINTER

Opinion

[*1209] WINTER, Chief Judge:

Bostick Oil Company, Inc., (Bostick) brought this private antitrust suit under various federal and state statutes when the Michelin Tire Corporation, Commercial Division, (Michelin) terminated Bostick's contract as a distributor of Michelin truck tires. At the close of Bostick's evidence at trial, the district court granted Michelin's motion for a directed verdict on the causes of action then remaining:¹ attempt to monopolize under [§ 2](#) of the Sherman Act, [15 U.S.C. § 2](#); contract, combination or conspiracy in restraint of trade, in violation of [§ 1](#) of the Sherman Act; and, unfair or deceptive trade practices [*2] violating the South Carolina Unfair Trade Practices Act, [§ 39-5-20\(a\)](#), Code of Laws of South Carolina 1976. Bostick appeals only from the judgment entered against it on its state law claim and on its two theories of the [§ 1](#) Sherman Act violations,² asserting that sufficient evidence was introduced to warrant [*1210] submission of these issues to the jury. We agree, and therefore reverse and remand for a new trial. Because of our disposition of this appeal, we need address only briefly an evidentiary issue also raised by Bostick.

[**3] I.

HN1 [↑] In reviewing the grant of a motion for directed verdict under [Rule 50\(a\), Fed. R. Civ. P.](#), we view all evidence presented by Bostick, the nonmoving party, in the light most favorable to it, drawing all reasonable inferences in Bostick's favor, *Ard v. Seaboard Coast Line Railroad Company*, [487 F.2d 456, 457](#) (4 Cir. 1973), without weighing the credibility of witnesses. *Old Dominion Stevedoring Corp. v. Polskie Linie Oceaniczne*, [386 F.2d 193, 197](#) (4 Cir. 1967).

Bostick was at one time a small, family-owned oil concern based in Estill, South Carolina, which began shifting its focus to tire sales in 1967. By 1974, Bostick was offering for sale a wide range of passenger car tires and some truck tires. In April 1974, Bostick contacted Michelin, seeking to become an authorized distributor. Michelin, the marketing division of the Michelin Tire Corporation, was then expanding distribution of its radial tires and related products through numerous distributorship arrangements.³ Responding to the inquiry, Michelin sent its district truck

¹ By consent of the parties, a claim for breach of contract and a counterclaim for abuse of process had been dismissed with prejudice prior to trial.

² Michelin maintains that only one theory of [§ 1](#) liability, regarding Bostick's termination as a result of pressure on Michelin from complaints by competing distributors, was presented in the pleadings and at trial, so that Bostick should now be foreclosed from arguing that the evidence also supports finding Michelin liable for a resale price maintenance arrangement. Although there may have been some imprecision below as to whether Bostick presented two separate theories or merely two types of evidence in support of a single theory, it is apparent from the district court's memorandum opinion that the resale price maintenance theory was argued by Bostick as a distinct basis for liability. Where the evidence "as developed provides a basis for recovery not covered strictly by the pleadings", the pleadings are treated as conforming to the evidence. *Keeffe Bros. v. Teamsters Local Union No. 592*, [562 F.2d 298, 306](#) and n. 11 (4 Cir. 1977); [Rule 15\(b\), Fed. R. Civ. P.](#) To dispel any doubt, Bostick formally moved to amend the pleadings at oral argument, as it is allowed to do. See generally 6 Wright & Miller, *Federal Practice and Procedure: Civil* § 1494. We therefore consider both [§ 1](#) theories.

tire sales manager to Estill to survey Bostick's operation and prepare a dealership application. The Michelin representative noted, among [**4] other items, the type of tire service available from Bostick. Bostick's application was approved, and it entered the first of four successive one-year standard form Dealer Sales Agreement (DSA) contracts with Michelin on May 29, 1974, authorizing it to sell both passenger and truck tires.

Beginning sometime in 1975 with the employment of an experienced truck tire saleswoman, Bostick shifted the vast majority of its Michelin business into truck tire sales. During its first calendar year as a Michelin dealer, Bostick sold approximately \$38,000 in truck tires and \$39,000 in passenger tires of that brand.⁴ For the calendar year 1976, Bostick's gross sales of truck and light truck tires had soared [**5] to slightly over \$1,100,000 as compared to \$936,827 in passenger tire sales, according to a memorandum written by Michelin's corporate sales manager for the Eastern United States. By the end of April 1978, its last fiscal year as a Michelin dealer, Bostick had sold approximately \$2,000,000 worth of Michelin truck tires during the preceding twelve months. The initial impetus for this shift to truck tire sales, according to company president Joe Bostick, came from Michelin's local sales representative during 1974 and 1975, as well as the enticing quantity discounts and commissions built into Michelin's pricing structure.

In expanding its business, [**6] Bostick employed the practice of "drop-shipping", i.e., transferring the tires to the purchaser by taking an order and having tires shipped directly, without providing any initial mounting or other service. Although one provision of the Dealer Sales Agreement required Bostick to maintain facilities sufficient to "enabl[e the] Dealer to sell and service Michelin Products in a first class manner", Bostick introduced the testimony of several major truck fleet-owning customers to explain that such purchasers usually maintained their own service facilities. Joe Bostick also testified that his company maintained a service arrangement with a mechanic in Estill, and had received virtually no complaints about a lack of service from customers during the period it was a Michelin dealer.

[*1211] Bostick's primary method of expanding sales was through its aggressive price cutting and rebating of commissions and quantity discounts to its customers. Until the summer of 1977, Michelin offered dealers truck tires at a basic price of 22 percent off of the manufacturer's suggested list price. From this "net billing price," Bostick or any dealer was able to subtract up to an additional [**7] 9 percent for a quantity purchase, another 2 percent discount for early payment to Michelin, and a further 2 percent discount if certain shipping arrangements were made.⁵ Thus, Bostick was able to give as much as a 6 percent discount to the purchaser off of the "net billing price" and still sell at a gross profit; in effect, Bostick could buy a tire listed by the manufacturer as worth \$100 for approximately \$68, offering it for as low as approximately \$73.30, while a dealer taking no advantage of discounts would have to sell the tire for \$83.30 for a comparable total return on each unit sold.⁶

[**8] Bostick's sales practices provoked complaints by various competing Michelin dealers to field and district level personnel of the tire company. One general manager of a Charleston, South Carolina, Michelin dealer during the

³ A more detailed chronicle of the French tire manufacturer's expansion into the American market can be found in [Donald B. Rice Tire Company v. Michelin Tire Corporation](#), 483 F. Supp. 750, 752-53 (D. Md. 1980), aff'd, 638 F.2d 15 (4 Cir.), cert. denied, 454 U.S. 864, 70 L. Ed. 2d 164, 102 S. Ct. 324 (1981).

⁴ These figures actually represent Bostick's purchases of Michelin tires through the end of 1974, but they are indicative of its sales. By its method of operation, Bostick bought from Michelin those tires for which it had orders, rather than carrying a large stock. Company president Joe Bostick estimated each figure in the \$40,000 range when testifying from memory.

⁵ There was also the potential for a 5 percent calendar year bonus if sales reached a certain volume. During the period until mid-1977, Bostick apparently never reached the requisite volume; its allegation that a quantity bonus was earned but unpaid was in part the subject of one of the claims not at issue in this appeal.

⁶ Of course, for a comparable percentage markup based on the cost of the tire (i.e., approximately 7.8 percent), the other dealer would have charged roughly \$84.00. In addition, the discount price available to Bostick may have been better still; the evidence was unclear whether the additional discounts were taken from the assumed \$78 net billing price, from the \$100 list price, or from the net price to Bostick after each prior discount was figured. The figures used here as examples reflect the most conservative manner of calculating the discount.

period 1974 to 1978 testified that he had complained to Michelin of Bostick's "coming into the Charleston area and selling truck tires at prices much below what we were selling them for." Three other South Carolina Michelin dealers testified to having complained to Michelin personnel about Bostick's low prices forcing them to decrease their profit margins to compete; one stated that he preferred buying from Bostick as a wholesale supplier because in small quantities it proved cheaper and more convenient than buying directly from Michelin. Several of these dealers on cross-examination gave some support to Michelin's contention that Bostick's lack of service facilities resulted in their having to provide service to Michelin tire owners who had bought the product elsewhere. But one of the dealers explained that the cost of the tire did not reflect the cost of future service, for which the customer was charged separately as provided, and that service had become for [**9] that dealer "a big key to our growth" representing approximately 50 percent of his total business volume.

Internal Michelin memoranda, and testimony of Michelin personnel at various levels, showed that numerous such complaints were passed along to middle and upper-level management, as well as being originated by Michelin field and sales representatives themselves. As early as August 1975, a field representative's monthly report to management quoted Bostick's discount pricing and noted that another dealer "will not meet this price." By the spring of 1976, complaints about Bostick had reached Jean Pierre Duleyrie, Michelin's vice-president in charge of sales, prompting him to send a corporate sales manager (the Michelin official immediately below Duleyrie) to talk directly with Joe Bostick in April 1976. Though the actual motivation behind the meeting and its contents were much in dispute at trial, the outcome was a renewal of Bostick's dealership for 1976-77 and possibly a promise by Bostick to expand service facilities. The complaints by competitors and Michelin sales personnel nonetheless persisted during the remainder of Bostick's distributorship.

Shortly before the May 29 [**10] renewal date of Bostick's dealership contract in 1977, Michelin's district manager approached Joe [**11] Bostick to explain the company's proposal to enroll Bostick in a "National Accounts" program. Various large-volume purchasers designated "national accounts" were billed and their accounts collected centrally through Michelin, while distributors such as Bostick continued to perform the actual selling and delivery of tires for which they were paid a commission. Participation in the program required disclosure of customer lists to Michelin, and loss of the ability in the first instance to quote a price for the tires. Continuation as a Michelin dealer was not made expressly conditional on joining the National Accounts program; by the stated terms, a dealer could continue to sell to some accounts as before and list others as National Accounts in any desired mix.

Michelin explained, through cross-examination, that the National Accounts pricing structure proved capable of giving a dealer an advantage over the regular distribution terms. A National Accounts customer was billed by Michelin at a 20 percent discount off the list price; the dealer who delivered the tire from his [**12] stock was credited by Michelin at 22 percent off suggested list price and was paid a 12 percent commission on each National Accounts tire sold.⁷ Thus the dealer could rebate a substantial part of the commission to the National Accounts customer and in effect reduce the price of the tire below that of a direct sale from the dealer. Bostick, as an aggressive seller, eventually gave from half to all of the commission back to its National Accounts customers in the form of rebates. Michelin officially did not disclose the price it charged the customer, although the suggested price list apparently was easily obtainable from customers.

Despite the eventual attractiveness [**13] of National Accounts sales to Bostick, Joe Bostick testified that he personally had felt "intimidated" into joining the National Accounts program during meetings near dealership renewal time in 1977.⁸ In support of this contention, Bostick introduced the recommendation in the April 1977

⁷ In actual practice, much of the financial relationship between dealer and Michelin was accomplished through accounting for tires "bought" and "sold" on each company's books. The record does not reflect clearly at what point cash actually flowed between the companies, but the practical effect on Bostick's credit with Michelin was as described here.

⁸ Michelin has argued before us that Joe Bostick's testimony was "incredible" given his business acumen. While that may well be the case, we think, as we explain more fully below, that the issue remains one of many for resolution by the jury. For the most part, moreover, Bostick's subjective feeling of intimidation is of little relevance, as there is sufficient objective evidence from which a jury could conclude that as a matter of fact dealership renewal was being held up until Bostick acquiesced in joining the National Accounts program.

monthly report of Michelin district manager Elroy Earl "Pete" Christensen, Jr. to "management" that Bostick not be renewed as a dealer. During April and May, Christensen, despite frequent contact, refused to answer Joe Bostick's inquiries as to whether or not the dealership would be renewed. On May 28, 1977, with Michelin representatives still seeking to enroll Bostick in the National Accounts program, the dealership legally expired. On June 7, 1977, Bostick made its first sale through the National Accounts program, and actual dealership renewal followed on June 14. Contemporaneously, Christensen noted in a semi-annual June 1977 planning report to management that encouragement from Michelin representatives to larger purchasers to participate in the National Accounts program "should help a great deal in the area where dealers are wholesaling and dropping off." A preceding portion of the same memorandum [**13] identified Bostick as "the most pressing problem" in the district and expressed optimism over Bostick's recent willingness to enter the National Accounts program.

Michelin's enthusiasm over Bostick's National Accounts participation soon waned. Christensen's July 1977 report expressed concern over Bostick's solicitation of existing customers for National Accounts treatment and noted that Bostick had begun giving rebates as high as 15 percent on purchases program. Internal [**14] memoranda were also directed to management complaining [**13] that Bostick was purchasing tires from a Canadian source and selling them through the National Accounts program; the Michelin corporate sales manager informed district manager Christensen that although "we can do nothing legally" about the practice "you will ask him kindly not to do so."

Complaints about Bostick's merchandising tactics continued to be reported to Michelin management throughout 1977-78. Finally, for reasons that are the central subject of this dispute, Michelin representatives notified Bostick in April 1978, that its truck tire dealership would not be renewed in May, although continuation of passenger and light truck tire distributorship was offered. Bostick refused the limited dealership offer and instead brought this suit on May 26, 1978.

II.

Bostick asserts claims under [§ 1](#) of the Sherman Act on essentially two distinct but related theories. The first is that Bostick was eventually terminated as a dealer because Michelin heeded the complaints of Bostick's competitors, who were threatened by Bostick's ability to undersell them. The alternative theory is that the National Accounts program [**15] was a resale price maintenance scheme, and to enforce it Michelin terminated Bostick, a dealer who continued effectively to lower the manufacturer-imposed minimum price for its customers. The interrelationship of the two is shown by perhaps a third view, that Michelin's pressing Bostick to join the National Accounts program was a less drastic attempt at satisfying the competing dealers' complaints which failed to curb Bostick's price cutting, ultimately requiring Bostick's termination. For all these claims, of course, [HN2](#) Bostick must introduce sufficient evidence upon which a jury would be warranted in finding a "contract, combination, . . . or conspiracy" as a prerequisite to [§ 1](#) liability. [15 U.S.C. § 1](#); compare [United States v. Parke, Davis & Co.](#), 362 U.S. 29, 4 L. Ed. 2d 505, 80 S. Ct. 503 (1960), with [United States v. Colgate & Co.](#), 250 U.S. 300, 63 L. Ed. 992, 39 S. Ct. 465 (1919). If such is found, it must be one which is unreasonably "in restraint of trade." [Continental T.V., Inc. v. GTE Sylvania Incorporated](#), 433 U.S. 36, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977). The district court believed one or the other element was lacking in plaintiff's case for each theory [**16] and so granted Michelin a directed verdict. We discuss each theory and the necessary elements seriatim.

A.

Michelin argues strenuously that mere complaints do not a conspiracy make, and cites to us cases for this proposition. See, e.g., [H.L. Moore Drug Exchange v. Eli Lilly and Company](#), 662 F.2d 935 (2 Cir. 1981), cert. denied, 459 U.S. 880, 103 S. Ct. 176, 74 L. Ed. 2d 144 (1982); [Roesch, Inc. v. Star Cooler Corporation](#), 514 F. Supp. 890 (E.D. Mo. 1981), aff'd, 671 F.2d 1168 (8 Cir. 1982).⁹ Were this a proper case, we might well agree with

⁹ Roesch, however, holds in conflict with [Battle v. Lubrizol Corp.](#), 673 F.2d 984 (8 Cir. 1982), which was decided the same day. The Eighth Circuit granted rehearing en banc in both cases on May 21, 1982, and heard arguments in October 1982. Decision is currently pending.

this unstartling principle. In this case, however, the evidence elicited at trial showed more than just uninfluential competitors' complaints "standing alone", [H.L. Moore Drug, supra, 662 F.2d at 941.](#)

[**17] [HN3](#) Antitrust civil conspiracy or combination¹⁰ has traditionally been inferred "from a course of dealing or other circumstances" in which the determinative facts are "what the parties actually did" rather than whether an express agreement existed. [Parke, Davis, supra, 362 U.S. at 43-44; Eastern States Retail Lumber Dealers' Assoc. v. United States, 234 U.S. 600, 58 L. Ed. 1490, 34 S. Ct. 951 \(1914\); Albrecht v. The Herald Co., 390 U.S. 145, 149-50, 19 L. Ed. 2d 998, 88 S. Ct. 869 \(1968\).](#) As we noted in [Hester v. Martindale-Hubbell, \[*1214\] Inc., 659 F.2d 433, 436](#) (4 Cir. 1981), cert. denied, 455 U.S. 981, 102 S. Ct. 1489, 71 L. Ed. 2d 691 (1982), the courts, being "sensitive to the realities of the marketplace" . . . have extended the concept of concerted activity far beyond the classic case of actual agreement to engage in a common course of conduct." Contrary to what the district court believed, that Michelin did not expressly inform complaining dealers that it would terminate Bostick at their behest cannot be determinative.

[**18] In an analogous case we recently addressed the basis upon which the trier of fact could be permitted to find "the requisite degree of involvement of other parties" to infer a conspiracy under *United States v. Parke, Davis & Co.*" [Donald B. Rice Tire Company v. Michelin Tire Corporation, 638 F.2d 15, 16](#) (4 Cir.), cert. denied, 454 U.S. 864 (1981) (citation omitted). In *Rice*, we affirmed the district court's finding of a "combination" despite the absence of any formal manufacturer-dealers agreement, or even of evidence that rival dealers had ever been consulted by Michelin following their complaints against Rice, like Bostick a high-volume Michelin dealer eventually terminated. The evidence at that trial showed:

Jean Pierre Duleyrie, the Vice-President in charge of sales, and the individual primarily responsible for the nonrenewal decision conceded that complaints from Michelin sales personnel in other areas and from other tire dealers about plaintiff's geographically extensive and large-scale wholesaling activities contributed to the decision. While Michelin sales personnel do not qualify as economically distinct entities with whom defendant could conspire¹¹ or contract, [Fuchs Sugars & Syrups, Inc. v. Amstar Corp., 602 F.2d 1025 \(2d Cir. 1979\)](#), other Michelin tire dealers do qualify. Numerous other witnesses testified that other tire dealers complained to Michelin personnel about plaintiff's activities. In light of this testimony, as well as Duleyrie's concession that no other types of complaints from any sources about any other aspects of plaintiff's business were received prior to the nonrenewal decision, it is apparent that a combination existed for the purposes of [§ 1](#) between Michelin and some of its authorized dealers.

[Rice v. Michelin Tire, supra, 483 F. Supp. at 754.](#) The evidence adduced in the instant case, as we have summarized it, was quite similar.

As in *Rice*, the testimony of Mr. Duleyrie, Michelin's sales vice president during the relevant time period, shows personal knowledge of the complaints and discussions between Bostick and Michelin's district manager leading up to the renewal decision in 1976. Speaking generally, Duleyrie admitted hearing of complaints by other dealers about Bostick's underselling them "all the time," although he characterized such complaints as "everyday-type" to which¹² "our people are instructed not to pay attention." He also conceded, "I don't know of any instances where Bostick was asked to perform service and failed to do it."¹¹

Mr. Duleyrie's knowledge of the complaints, and his direction of subordinates to take various actions in response, can also be inferred from admitted knowledge of the situation and directives to local Michelin officials by the

¹⁰ There is no contention that a contract was entered into between Michelin and other dealers regarding Bostick in regard to this first theory.

¹¹ When questioned about Bostick's lack of service facilities as a basis for termination when other dealers without service facilities were assertedly allowed to continue, Mr. Duleyrie stated that "we took exactly the same type of action that was taken in the Bostick oil case" in terminating Rice as a dealer.

702 F.2d 1207, *1214-1983 U.S. App. LEXIS 29681, **20

regional corporate sales manager, who reported directly to and took orders from Mr. Duleyrie. Michelin's own theory of the termination -- that it was merely responding to the disillusionment of other dealers stemming from Bostick's lack of service facilities -- implicitly recognizes that the termination was something **[**21]** more than a unilaterally motivated action. Thus, even absent an express "concession" from Mr. Duleyrie, a reasonable jury could find a "causal nexus" between the complaints and the termination without speculating about the involvement of rival dealers. *Roesch v. Star Cooler, supra, 514 F. Supp. at *1215-1984*. Indeed, the Seventh Circuit in a highly lucid discussion of § 1 liability predicated upon termination of a dealer has held "that HN4¹ proof of termination following competitor complaints is sufficient to support an inference of concerted action." *Spray-Rite Service Corp. v. Monsanto Co., 684 F.2d 1226, 1238* (7 Cir. 1982). And we have previously found that a termination even more unilateral in nature could constitute a § 1 violation if it evinces sufficient anticompetitive character. *Osborn v. Sinclair Refining Company, 286 F.2d 832, 837* (4 Cir. 1960), cert. denied, 366 U.S. 963, 6 L. Ed. 2d 1255, 81 S. Ct. 1924 (1961).¹²

[22]** It is ultimately, then, a factual issue for the jury to determine whether Bostick was terminated to placate rival dealers objecting to price-cutting, or instead for lack of service facilities as Michelin claims.¹³ The question next to be considered is whether termination for either purpose is a violation of § 1.

The answer is found in *Rice*,¹⁴ where we said:

We think it is important to distinguish between a conspiracy among dealers and their supplying manufacturer for the purpose of retail price maintenance that would benefit the dealers and one involving the same parties but redounding primarily to the benefit of the manufacturer as a result of increased interbrand competition. A restraint imposed by the former conspiracy would be horizontal in nature and *per se* illegal, while one imposed by the latter would be vertical and analyzed under the rule of reason.

638 F.2d at 16. On the authority of *Rice* **[**23]**, we conclude that HN5¹ a finding of *per se* violation of § 1 would result from a factual determination that the termination was in furtherance of competitors' desires to eliminate a

¹² Michelin contends that to rule for Bostick we must necessarily embrace an expansive reading of *Girardi v. Gates Rubber Company Sales Division, Inc., 325 F.2d 196* (9 Cir. 1963), and that *Girardi* has been sapped of precedential value by universal criticism. Neither is true. *Girardi* perhaps can be read quite broadly as in effect creating a presumption of combination or conspiracy whenever distributors' complaints are followed by a supplier's termination of the disfavored rival distributor. But we need not adopt such a presumption here to require submission of the case to the jury in the face of other evidence, beyond bald complaints, upon which a causal connection between the competitors' objections to price-cutting and the termination could be found. Also, those cases cited as rejecting *Girardi*, see, e.g., *Roesch v. Star Cooler, supra, 671 F.2d at 1172; E.J. Sweeney & Sons, Inc. v. Texaco, Inc., 478 F. Supp. 243, 256 (E.D. Pa. 1979)*, aff'd, 637 F.2d 105 (3 Cir. 1980), cert. denied, 451 U.S. 911, 68 L. Ed. 2d 300, 101 S. Ct. 1981 (1981), in actuality only criticize the expansive view of that case, while preserving the narrower point that such other evidence as we find here will be enough to raise an issue of fact regarding § 1 concerted activity. And the Seventh Circuit has refused to follow the stringent proof requirements set out in *Sweeney*, see *Spray-Rite, supra, 684 F.2d at 1238-39*, while the authority of *Roesch* is in doubt pending the Eighth Circuit's resolution of its in banc hearing. See *supra* note 9; *Spray-Rite, supra, 684 F.2d at 1239 n.7*.

¹³ Or, for that matter, for a third reason as yet undisclosed by Michelin.

¹⁴ Bostick does not challenge on appeal the service clause in his Dealer Sales Agreement as itself an unreasonable restraint of trade, as did the plaintiff in *Rice*. The district court in *Rice* had found that defendant's evidence, *in rebuttal* to the plaintiff's evidence of a horizontal combination among rival dealers, showed that Rice had underspent on Michelin promotional activities, and, although maintaining "adequate" service facilities, had effectively shifted much of the tire service and repair work it could have been expected to perform on to other dealers. 483 F. Supp. at 757-59. These service and promotional deficiencies therefore were found to create a "free-rider" problem, see, e.g., *GTE Sylvania, supra, 433 U.S. at 55*, justifying enforcement of Michelin's contractual requirements, and hence the termination of Rice. But the reasonableness of the clause did not come into question until a *prima facie* case of a horizontal combination as the impetus to the termination had first been shown.

price-cutting rival. *Com-Tel, Inc. v. DuKane Corp.*, 669 F.2d 404, 411-13, (6 Cir. 1982); *Klor's, Inc. v. Broadway-Hale Stores, Inc.*, 359 U.S. 207, 3 L. Ed. 2d 741, 79 S. Ct. 705 (1959); *United States v. General Motors Corp.*, 384 U.S. 127, 16 L. Ed. 2d 415, 86 S. Ct. 1321 (1966). While we are not unmindful that a *per se* label should not be mechanically applied, *Broadcast Music, Inc. [**1216] v. Columbia Broadcasting System, Inc.*, 441 U.S. 1, 9, 60 L. Ed. 2d 1, 99 S. Ct. 1551 (1979); *National Electrical Contractors Assoc., Inc. v. National Constructors Assoc.*, 678 F.2d 492, 500 (4 Cir. 1982), [HN6](#)¹⁵ where the facts support a finding that competing distributors provoked a manufacturer to eliminate one of their number as a marketplace competitor, there is no need to proceed to the more finely tuned "rule of reason" analysis that is proper when considering manufacturer-imposed vertical restrictions like the tire service requirement in *Rice*.

[**24] Of course, it is possible that the jury will reject Bostick's proof and instead find that termination occurred for the reasons Michelin claims. Michelin has yet to put on its proof, and had, by cross-examination, only begun to draw out evidence to support its defense. In *Rice*, by way of illustration, Michelin eventually failed to convince the trier of fact of the applicability of two of the three explanations for viewing the termination as a vertically imposed manufacturers' restraint promoting competition against other tire brands.¹⁵ Only the "free rider" justification was proven, a justification yet to emerge as applicable here; although some rival dealers' dissatisfaction with Bostick apparently stemmed from the perception that Bostick's minimal service facilities allowed it a cost advantage, at least one dealer claimed a benefit from an expansion in the service portion of his business. Whether provision of Michelin service paid for itself or even produced a profit for other dealers will be a matter the parties will be free to explore at a new trial. We find only that the evidence so far submitted rendered the court's grant of a directed verdict erroneous.

[**25] B.

Analysis of the National Accounts program presents no problem in finding the concerted action element of a [§ 1](#) violation, as the program itself was a contractual agreement between Michelin and various of its dealers including Bostick.¹⁶ More difficult is the issue of whether the program operated as an unreasonable restraint of trade. The district court reasoned that the program fell short of a *per se* illegal resale price maintenance arrangement, see, e.g., *Parke, Davis, supra, 362 U.S. 29*, for two reasons: (1) the program was voluntary in that dealers could join or not, or only partially, and remain dealers, and (2) no minimum resale price was set by Michelin given that Bostick could effectively alter the final sales "price" by rebating to his customers. Were these two salient features of the National Accounts program uncontestedly true, we would agree with the district court that a central billing program by a manufacturer is not *per se* illegal under the Sherman Act.¹⁷ See *Ohio-Sealy Mattress Manufacturing [**1217]*

¹⁵ In *Rice*, the district court considered whether Michelin's actions fell within any of the three rationales discussed in *GTE Sylvania, supra, 433 U.S. at 55-56*, as justifying restrictions or policies enhancing competition among different product manufacturers ("interbrand") at the expense of lessened competition among dealers of the same brand ("intrabrand"). These rationales were (1) inducing aggressive retailers to become dealers to enhance the manufacturer's likelihood of successful entry into a new market, (2) stemming the "free rider" effect, see *supra* note 13, and (3) assuming direct manufacturer oversight of quality and safety to lessen product liability exposure. In affirming *Rice*, we noted carefully that such actual positive benefits must be shown before a restraint imposed by a manufacturer is accorded the deference of a "rule of reason" analysis. [638 F.2d at 16](#).

¹⁶ In addition, the program appears to be the kind of arrangement in which no single dealer can be sufficiently assured of not losing a competitive advantage in joining unless competing dealers also join. To this extent there is an additional element of "combination" involved, see *Albrecht, supra, 390 U.S. 145*, one which goes "beyond mere announcement of [the manufacturer's] policy and the simple refusal to deal" allowed under the doctrine announced in *Colgate, supra, 250 U.S. 300*. *Parke, Davis, supra, 362 U.S. at 44*.

¹⁷ Because of the posture of this case we are not called upon to determine whether the potential for resale price maintenance of a central pricing and billing system is justified as in effect creating a new "product", see, e.g., *B.M.I. v. C.B.S.*, *supra*, 441 U.S. 1, or as promoting interbrand competition through economies of scale in a manner that cannot be achieved through less restrictive alternatives, see e.g., *GTE Sylvania, supra, 433 U.S. 36*.

[Co. v. Sealy, Inc., 585 F.2d 821](#) (7 Cir. 1978), cert. denied, 440 U.S. 930, 59 L. Ed. 2d 486, 99 S. Ct. 1267 (1979); cf. B.M.I. v. [**26] C.B.S., *supra*, 441 U.S. 1. But the evidence so far presented permitted a contrary finding.

[**27] The voluntariness of the program in a formal sense was not a proper basis for the granting of a directed verdict when Bostick had introduced sufficient evidence of Michelin's efforts to pressure it into joining the program unwillingly. Such evidence can be found in the simultaneous refusal of Michelin to disclose its intention to renew or terminate the dealership while vigorously promoting the virtues of the National Accounts program; the delay in formalizing renewal past the usual May 29 anniversary until mid-June in 1977, *after* Bostick had made its first sale through the National Accounts program and had begun to express an interest in participating; and to some degree Joe Bostick's own account of feeling "intimidated" by Michelin representatives at pre-renewal meetings where the possibility of termination for failure to join the National Accounts program was assertedly conveyed to him.¹⁸ Moreover, although large-volume customers were ostensibly free to choose to join the program and dealers free to solicit national accounts for business, Michelin soon became critical of Bostick's active promotion of itself as a National Accounts dealer.

[**28] As to Michelin's lack of control over the ultimate sales price, the evidence is not at all clear that Michelin anticipated the availability of an "end run" around the central pricing and billing system directly to the customer through rebates by Bostick. Even if the potential for dealer rebating was perceived in advance, Michelin personnel showed considerable disenchantment with Bostick's continued price-cutting. That Bostick was eventually able to turn the program to its advantage once enrolled does not imply that its participation was not initially urged as a means of dampening its ability to discount. The record reveals frustration and attempts by Michelin during 1977-78 to exert indirect pressures on Bostick to curtail its sales practices. A jury could reasonably conclude that the nonrenewal in May 1978 was a last resort by Michelin to bring a maverick into line and make the National Accounts program as *enforced* an effective barrier to dealer price competition.

Accordingly we conclude that proof of an illegal resale price maintenance arrangement does not rest upon a showing that the National Accounts program in its structure on paper restricts market pricing if in practical [**29] effect the "coercive potential of summary termination" keeps discounting dealers in line. [Greene v. General Foods Corp., 517 F.2d 635, 658](#) (5 Cir. 1975), cert. denied, 424 U.S. 942, 47 L. Ed. 2d 348, 96 S. Ct. 1409 (1976).

HN7 Price maintenance schemes have been consistently condemned as *per se* illegal, [Arizona v. Maricopa County Medical Society, 457 U.S. 332, 102 S. Ct. 2466, 73 L. Ed. 2d 48, 50 U.S.L.W. 4687](#) (1982); [Albrecht, supra, 390 U.S. 145, 88 S. Ct. 869, 19 L. Ed. 2d 998](#), [Kiefer-Stewart Co. v. Seagram & Sons, 340 U.S. 211, 95 L. Ed. 219, 71 S. Ct. 259](#) (1951); [United States v. Trenton Potteries, 273 U.S. 392, 71 L. Ed. 700, 47 S. Ct. 377](#) (1927), and are not saved by claims of redeeming interbrand virtues when there is sufficient evidence of their initiation at the instigation of horizontally competing entities. [United States v. Topco Associates, Inc., 405 U.S. 596, 31 L. Ed. 2d 515, 92 S. Ct. 1126](#) (1972). Michelin, of course, is not generally a dealers' collective or joint venture of competitors. But in establishing a National Accounts billing program involving review of dealers' customer lists, the setting of uniform prices to all participating [**30] customers, the potential for insulation of the dealer from the customer in pricing matters, and an opportunity for monitoring dealers' [*1218] sales tactics and policies in greater depth, it has taken on this role of a regulator of the horizontal competition among otherwise legally distinct dealerships selling tires they legally own.¹⁹ See [United States v. Sealy, Inc., 388 U.S. 350, 18 L. Ed. 2d 1238, 87 S. Ct. 1847](#) (1967). If the cancellation of Bostick is found to have been for the reasons claimed in this suit, a violation of § 1 of the Sherman Act was committed.

C.

From the foregoing the outlines of a third view of the evidence becomes clear without need for great elaboration. Even if the National Accounts program itself was insufficient to constitute a resale price maintenance arrangement, Michelin's insistence on Bostick's participation [**31] can be understood as a first attempt to carry out the wishes of

¹⁸ See *supra* note 8.

¹⁹ Indeed, the apparent justification for Michelin acting as billing clearinghouse for its dealers is that joint efforts in this area benefit dealers as a whole.

competing dealers. As Bostick's discounting continued, so did complaints. The ultimate cancellation of only Bostick's truck dealership was a more drastic second step in an essentially horizontal effort to remove downward pressure on Michelin truck tires. That Michelin offered to continue Bostick as a passenger and light truck tire distributor could be taken as signaling a desire to take steps strong enough to placate other dealers but not so drastic as to lose itself a highly effective dealer outright.²⁰ Viewing Michelin's entire course of dealing with Bostick as a consistent two-stage progression, a jury could find the termination in furtherance of a horizontal combination with anticompetitive effect.²¹

[**32] III.

Bostick also urges that the facts underlying its Sherman Act claims equally support a finding of liability under the South Carolina Unfair Trade Practices Act, § 39-5-10 et seq., Code of Laws of South Carolina 1976. Specifically, § 39-5-20(a) provides:

HN8 [↑] Unfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce are hereby declared unlawful.

Bostick contends that a jury could have found that its nonrenewal was "contrary to equity and good conscience", deTreville v. Outboard Marine Corporation, 439 F.2d 1099, 1100 (4 Cir. 1971), or, alternatively, that in dealing with Bostick, Michelin went beyond a unilateral refusal to deal to seek compliance with an anticompetitive price maintenance arrangement.²² The district court dismissed this count on a variety of grounds which we consider in turn.

[**33] [*1219] Most quickly disposed of is the district court's passing suggestion that federal law preempted application of the South Carolina Unfair Trade Practices Act. This position is untenable, and Michelin makes little effort to defend it here. Nothing in the nearly century-old history of federal antitrust regulation is cited to us to suggest that Congress has manifested a clear intent to displace state regulation of unfair trade practices. See 1 P. Areeda & D. Turner, Antitrust Law para. 208 (1978). Cf. New York State Dept. of Social Services v. Dublino, 413 U.S. 405, 413, 37 L. Ed. 2d 688, 93 S. Ct. 2507 (1973); Parker v. Brown, 317 U.S. 341, 351, 87 L. Ed. 315, 63 S. Ct. 307 (1943).

²⁰ Michelin suggested at oral argument that Bostick's various "Dr. Tire" retail outlets provided sufficient service facilities to satisfy the Dealer Sales Agreement. This may be established on remand; evidence currently in the record is at best minimal on this point, and certainly inconclusive.

²¹ Further supporting this conclusion is the Supreme Court's observation in GTE Sylvania, supra, 433 U.S. at 56, that many economists "have argued that manufacturers have an economic interest in maintaining as much intrabrand competition as is consistent with the efficient distribution of their products." Because the National Accounts program dampens intrabrand price competition, which is only then reinvigorated by rebating, it could follow that it was contrary to Michelin's interests standing alone to terminate an effective intrabrand competitor like Bostick. The jury could thus infer that Michelin was instead responding to the pressures from Bostick's competitors, who had more reason to oppose strong intrabrand competition than Michelin, especially if it doubted Michelin's service-related justification in this case.

²² Bostick advanced two other Unfair Trade Practices Act-based theories which are no longer tenable in this cases. One was that Michelin fraudulently induced Bostick to enter the National Accounts program, a claim identical to that dismissed with prejudice below by agreement of the parties. We think that Bostick is foreclosed from reopening its fraud claim under a different heading here on appeal. The other was that Michelin restricted the territory of its dealers or to whom the product could be transferred. Bostick, however, failed to offer any proof of this, aside from perhaps a strained view of the potential of the National Accounts program as a means of overseeing dealer-customer contact. These theories were properly dismissed.

To the extent the district court relied on the inverse proposition, that the state law exempts from its coverage all federally regulated conduct, the following language of [§ 39-5-40](#) governs:

[HN9](#) Nothing in this article shall apply to:

* * *

(d) Any challenged practices that are subject to, and comply with, statutes administered by the Federal Trade Commission and the rules, regulations and decisions interpreting such statutes.

For the purpose of this section, *the burden* [\[*34\]](#) *of proving exemption from the provisions of this article shall be upon the person claiming the exemption.*

(emphasis added). As Bostick points out, Michelin failed to raise this defense in its answer. The above language appears to [HN10](#) require the party claiming exemption to raise [§ 39-5-40\(d\)](#) affirmatively,²³ such that the defense is untimely when first raised on motion for directed verdict. [Rule 8\(c\), Fed. R. Civ. P.](#); [Hardy-Latham v. Wellons](#), 415 F.2d 674, 677 (4 Cir. 1968).

Even if considered properly [\[*35\]](#) raised as more akin to a defense of failure to state a claim upon which relief can be granted and hence timely, [Rule 12\(h\) \(2\), Fed. R. Civ. P.](#), this exemption is not available to Michelin on the ground of its action being "subject to, and comply[ing] with" F.T.C. rules, regulations and interpretations. No case has been pointed to of Federal Trade Commission approval of the type and manner of dealer termination alleged here. Instead, some terminations are found lawful, others not, on a case-by-case basis. Compare [Naifeh v. Ronson Art Metal Works, Inc.](#), 218 F.2d 202, 206 (10 Cir. 1954) (simple refusal to deal not illegal), with [Adolph Coors Company v. F.T.C.](#), 497 F.2d 1178, 1185-86 (10 Cir. 1974), cert. denied, 419 U.S. 1105, 42 L. Ed. 2d 801, 95 S. Ct. 775 (1975) (conduct going beyond a simple refusal to deal found illegal where distributorship terminated for anti-competitive purpose). [Section 39-5-40](#) instead runs to activity given a blanket exemption or endorsement by federal law.

In [State ex rel. McLeod v. Rhoades](#), 275 S.C. 104, 267 S.E.2d 539, 541 (1980), the South Carolina Supreme Court found certain allegedly unfair stock trading practices to be within [\[*36\]](#) the regulatory scheme of the Securities and Exchange Act of 1934 and therefore exempted from the Unfair Trade Practices Act.²⁴ By contrast, where the less comprehensive Federal Motor Vehicle Information and Cost Savings Act was asserted [\[*1220\]](#) to have exempted allegedly fraudulent automobile odometer setting practices from state law coverage, the court found that "the Federal Act clearly reveal[s] it was not intended to supersede or otherwise limit state law remedies". [State ex rel. McLeod v. Fritz Waidner Sports Cars, Inc.](#), 274 S.C. 332, 263 S.E.2d 384, 385 (1980).

[\[*37\]](#) Interpretation of the Act, though scant, indicates that the exemption relates only to fields extensively governed by federal law, where federal preemption might otherwise already apply. As discussed, we do not view the body of federal **antitrust law** as preemptive in this way, and therefore no exemption arises merely by virtue of Michelin's asserting that its conduct in a particular case might not be illegal under federal law. Michelin thus has failed to carry its burden of proving an exemption under [§ 39-5-40](#).

²³ Dealing with a pendent state law claim, we look to state law for guidance on whether the defense is affirmative in nature. [Freeman v. Chevron Oil Company](#), 517 F.2d 201, 204 (5 Cir. 1975). As Professor Day of the University of South Carolina School of Law has summarized the procedural status of [§ 39-5-40](#), "Proof of an exemption is clearly an affirmative defense." Day, The South Carolina Unfair Trade Practices Act: Sleeping Giant or Illusive Panacea?, 33 S.C.L. Rev. 479, 501 n.147 (1982).

²⁴ Strictly speaking, *Rhoades* addressed only the exemption provided for in [§ 39-5-40\(a\)](#) regarding "actions or transactions permitted under laws administered by any regulatory body" of the state or the United States, and not 40(d) claimed by Michelin. As 40(d) apparently has not been interpreted by the South Carolina Supreme Court, the treatment of the broader exemption of 40(a) discussed in the text gives guidance on the scope of the entire section. It follows that if the cause of action against Michelin is not exempted under the broader view of actions "permitted" by other law, it also fails to meet the stricter demands of alleging acts subject to and complying with criteria set forth by the FTC, itself a regulatory body administering federal law.

Looking then to the merits of Bostick's state law claim, we conclude that the district court overly restricted the Act's coverage to only those practices which would be unlawful under § 5(a) (1) of the Federal Trade Commission Act, [15 U.S.C. § 45\(a\) \(1\)](#).²⁵ [HN11](#)[↑] The Act instead states only that "the courts will be *guided* by the interpretations given" to the federal FTC Act. [§ 39-5-20\(b\)](#) (emphasis added). This language neither revokes pre-existing South Carolina definitions of unfair or deceptive trade practices, nor binds the Act to the scope of federal law. Pertinent, then, is our statement of South Carolina law applicable to a claim of wrongful franchise termination: [\[**38\]](#)

Although some states may give full effect to broad unilateral powers of termination, South Carolina, whose law governs here, does not. It is settled law in that state that regardless of broad unilateral termination powers, the party who terminates a contract commits an actionable wrong if the manner of termination is contrary to equity and good conscience. That standard of conduct is far more stringent than one forbidding only actual fraud, and it may apply to an unconscionable reason for termination as well as to the causing of needless injury in the course of termination.

[deTreville v. Outboard Marine, supra, 439 F.2d at 1100](#) (citations and footnote omitted). The principle that proof sufficient to sustain a finding of fraud need not be prerequisite to establishing an unfair trade practice has been applied directly to the Act. [State ex rel. McCleod v. Brown, 278 S.C. 281, 294 S.E.2d 781, 783 \(S.C. 1982\)](#).

[\[**39\]](#) Accordingly, evidence sufficient to withstand a motion for directed verdict on the federal causes of action provides at least as sufficient a basis for also requiring jury determination of the state law claim. Moreover, there is no requirement in the Unfair Trade Practices Act of a contract, combination or conspiracy as there is under [§ 1](#) of the Sherman Act. It is therefore entirely possible that the jury could find Bostick to have been terminated in furtherance of unfair or anticompetitive purposes -- e.g., to harm its business because of its role as a growing wholesale competitor of Michelin's -- without rendering a verdict duplicative of the federal claims. It is, of course, proper that the jury be instructed not to award duplicative damages for violations of both the state and federal statutes based upon precisely the same conduct, and the defendant will be free to ask for an instruction to this effect. But dismissal of the Unfair Trade Practices Act claim as a matter of law was incorrect here.

IV.

Bostick contends that the district court committed reversible error in excluding [\[*1221\]](#) from evidence a memorandum written by Michelin's district manager on May 7, [\[**40\]](#) 1977, offered as plaintiff's Exhibit 42. The memorandum concerned plaintiff's sales activities and was prepared by defendant's district manager to set forth his comments and recommendations for the use of his corporate superior. The district court originally found admissible all but two paragraphs of the memorandum,²⁶ and ruled that the exhibit would be admitted if plaintiff agreed to delete those two paragraphs. However, when defendant continued to press its objection, the district court ruled the entire document inadmissible on a variety of grounds.

Even if admissible, we do not think that the ruling excluding this evidence would be reversible error because the statements it contains are largely cumulative of other evidence regarding the district manager's reports and recommendations to defendant's management. [\[**41\]](#) We would thus not consider the point were it not that we order a retrial at which it is not unlikely that the exhibit will be offered again.

²⁵ Indeed, read this way the Act truly would be redundant and, in some cases, possibly in conflict with federal law. Instead, "the statutory mandate to follow federal interpretations of the FTC Act indicates that state courts 'are now free to find methods, acts or practices not heretofore specifically declared unlawful by the FTC or the federal courts prohibited by the [UTPA]' Day, The South Carolina Unfair Trade Practices Act, *supra* note 23, 33 S.C.L. Rev. at 482, quoting [Murphy v. McNamara, 36 Conn. Supp. 183, 187 n.4, 416 A.2d 170, 174 n.4 \(1979\)](#) (interpreting identical language in Connecticut's Unfair Trade Practices Act).

²⁶ The two paragraphs ruled inadmissible allegedly related solely to the sale of passenger tires and were ruled irrelevant because the alleged antitrust violations all related to the sale of truck tires.

In our view the memorandum is admissible as an admission, under Rule 801(d) (2) (C) and (D), Fed. Rules of Evidence, whether or not unfavorable to defendant, provided that it is shown either (a) that the district manager was authorized to make a statement concerning the subject, or (b) that the memorandum was made by defendant's agent concerning a subject within the scope of his agency during the existence of the agency relationship. If either of those conditions is met, the district court, on retrial, should admit the memorandum as an exhibit. The statement's status as a nonhearsay admission does not turn, as the district court believed, on proof that a company superior actually relied on the memorandum. Of course, the admissibility of the memorandum is subject to the limitations of Fed. R. Evid. 402 and 403, that it be relevant and that its probative value not be substantially outweighed by the danger of unfair prejudice, confusion of the issues, etc. Thus the district court may properly require the memorandum to be redacted either because [**42] portions are irrelevant or would result in the evils protected against by Rule 403, or both. In that event, however, the elimination of the improper material should be made by the district court without requiring the plaintiff's agreement and the balance should be admitted.

REVERSED AND REMANDED.

HN1[] Communications, Sherman Act

The appropriate standard for determining the adequacy of a claim under § 1 of the Sherman Act for unfair competition cases is the following two-part standard: (1) a market effect that would be prohibited under the law of mergers, and (2) other conduct by the defendant that threatens Sherman Act values. To meet the first part of the test there must be a concentrated market and a powerful potential entrant attempting to buy out or merge with the most significant competitor in that market, so that the merger would have such a potential for lessening competition that it could be prevented by the Federal Trade Commission. If a defendant could achieve a desired result either by lawful merger or by engaging in unfair competition, the choice of the unfair competition route alone should not give rise to an antitrust violation. The second prong of the test is met if the defendants engage in anticompetitive conduct having an anticompetitive effect.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Resale Price Maintenance

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

HN2 [down] **Vertical Restraints, Resale Price Maintenance**

Resale price maintenance is, in the absence of state fair trade legislation, a per se violation of the antitrust laws. But before this doctrine can come into play there must be resale price maintenance. The United States Supreme Court cases have involved situations in which the attempt to set retail prices was clear. Taken together, these cases suggest that a case of illegal resale price maintenance is made out when a price is announced and some course of action is undertaken or threatened contingent on the willingness or unwillingness of the retailer to adopt the price. The action need not necessarily fit under the rubric "coercion," but it must involve making a meaningful event depend on compliance or non-compliance with the "suggested" or stated price.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN3 [down] **Tying Arrangements, Sherman Act Violations**

An illegal tying arrangement has four characteristics: (1) two separate products, the tying product and the tied product; (2) sufficient market power in the tying market to coerce purchase of the tied product; (3) involvement of a not insubstantial amount of interstate commerce in the tied market; and (4) anticompetitive effects in the tied market.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Restraints of Trade

Business & Corporate Law > Distributorships & Franchises > Causes of Action > General Overview

HN4 [down] **Price Fixing & Restraints of Trade, Tying Arrangements**

To make out a case of tying violative of the antitrust laws the plaintiff must establish that the defendant distributor tied two products (a more and a less marketable one) and conditioned the sale of the more marketable one upon the purchase of the less desirable, "tied" companion.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

HN5 [down] **Price Fixing & Restraints of Trade, Vertical Restraints**

Where a manufacturer is alleged to have imposed restrictions requiring his distributors to abide by territorial limitations, the agreement is a vertical one, governed by the rule of reason. A plaintiff must show that the defendant's conduct had an adverse effect on competition to prevail under the rule of reason.

Antitrust & Trade Law > Sherman Act > General Overview

HN6 Sherman Act, Claims

In the absence of a showing of anticompetitive effect, the decision of a manufacturer to switch from an independent distributor to an in-house distribution system does not establish a violation of [§ 1](#) of the Sherman Act.

Civil Procedure > Trials > Judgment as Matter of Law > Directed Verdicts

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

HN7 Judgment as Matter of Law, Directed Verdicts

The standard to determine whether there is sufficient evidence to submit a case to the jury following a motion for a directed verdict in a federal court trial is as follows: The district court should consider all evidence and not just evidence supporting the nonmover's case. The evidence must be considered in the light and with all reasonable inferences most favorable to the party opposed to the motion. If the facts and inferences point so strongly and overwhelmingly in favor of one party that reasonable persons could not reach a different conclusion, the court should direct a verdict. On the other hand, if there is substantial evidence of such quality and weight that reasonable persons in the exercise of impartial judgment might reach different conclusions, the court should deny the motion for a directed verdict and submit the case to the jury. A mere scintilla of evidence is insufficient to present a question for the jury; there must be a conflict in substantial evidence to create a jury question.

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Pendent Claims

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

Civil Procedure > Trials > Separate Trials

HN8 Supplemental Jurisdiction, Pendent Claims

The decision whether to accept a pendent claim lies in the court's discretion. There are several reasons why a court would use its discretion to refuse a pendent claim. Examples: (1) The real substance of the case is the state claim. Even if the federal question is significant, when the main orientation of the case is state based, jurisdiction may well not be taken over the pendent state claim. (2) The federal claim asserted is frivolous. (3) There would be jury confusion caused by litigating the federal and state claims together. If the state claim would have to be severed under [Fed. R. Civ. P. 42](#), and separate trials held, then the efficiency-economy consideration is undercut and there is no practical reason for the federal court to take the state claim. (4) A federal court should dismiss the state-based insufficient claim if the federal claim collapses before trial. This was read as mandatory for many years, but in recent years the United States Supreme Court has indicated that this consideration likewise lies within the discretion of the district court.

Governments > Courts > Authority to Adjudicate

Governments > Courts > Judicial Comity

HNG[] Courts, Authority to Adjudicate

Comity is not a rule of law, but one of practice, convenience, and expediency. It is something more than mere courtesy, which implies only deference to the opinion of others, since it has substantial value in securing uniformity of decision and discouraging repeated litigation of the same question, but its obligation is not imperative. It recognizes the fact that the primary duty of every court is to dispose of cases according to the law and the facts; in a word, to decide them right. In doing so, the judge is bound to determine them according to his own convictions. If he is clear in those convictions, he should follow them. It is only in cases where, in his own mind, there may be a doubt as to the soundness of his views that comity comes into play and suggests a uniformity of ruling to avoid confusion, until a higher court has settled the law.

Opinion

[*1139] MEMORANDUM OPINION

This is an action under the Sherman Act, [15 U.S.C. §§ 1 et seq.](#), with a pendent state claim for unfair competition.

At the close of the plaintiff's case on the thirteenth day of trial, the defendants, Wheelabrator-Frye, Inc., HESSCO Industrial Supply, Inc., and Fred Z. Hester, moved for a directed verdict. During the hearing on the motion for directed verdict, defendants made an oral motion to dismiss the [*1140] pendent state claim without prejudice, stipulating that the time period from the filing of the present action in federal court to the trial court's entry of final judgment would be excluded from the calculation of any period for the statute of limitations. At the conclusion [**2] of the hearing on these motions, the court dictated into the record its decision to grant defendants' motion for directed verdict as to the antitrust claim in Count One of the complaint and denying the motion as to the unfair competition claim in Count Two. The court also granted the oral motion to dismiss the pendent state claim without prejudice to its disposition in state court. Plaintiff has filed Motions for Various Types of Alternative Relief, which the court elects to treat as a motion for reconsideration. That motion is denied. This memorandum opinion sets forth the findings of fact and conclusions of law upon which the court's denial is based.

L.A. Draper & Son, Inc. ("LADSCO"), is a corporation incorporated under the laws of the State of Alabama, with its principal place of business in Anniston, Alabama. Since 1958 LADSCO has been in the business of selling foundry supplies, including abrasive shot, primarily in the states of Alabama, Georgia, Mississippi, Tennessee, North Carolina, South Carolina, Kentucky, and Florida. Wheelabrator-Frye ("W-F") is a corporation incorporated under the laws of the State of Delaware, with its principal place of business in Indiana. [**3] For many years, Wheelabrator-Frye was the principal supplier to LADSCO of abrasive shot. Abrasive shot are pellets with a variety of industrial uses including the cleaning of castings and applying a finish to metal. Fred Z. Hester, a resident of Anniston, Alabama, for approximately 22 years, was a managerial employee of LADSCO. For the last eight or ten years of his employment, Hester was Vice-President and Director of LADSCO. On August 23, 1979, Hester

resigned from employment with LADSCO and sometime thereafter joined with several other former LADSCO employees to form HESSCO Industrial Supply, Inc. ("HESSCO"), a foundry supply business located chiefly in Anniston, Alabama. Thus HESSCO and LADSCO became competitors.

The plaintiff complains that HESSCO is an unfair competitor and that the circumstances surrounding its formation and ultimate acquisition by Wheelabrator-Frye violate Section One of the Sherman Act, [15 U.S.C. § 1](#).

HN1[] The appropriate standard for determining the adequacy of a claim under the Sherman Act, Section One, for unfair competition cases is the following two-part standard: (1) a market effect that would be prohibited under the law of mergers, and (2) other [**4] conduct by the defendant that threatens Sherman Act values. [Associated Radio Service Co. v. Page Airways, Inc.](#) *624 F.2d 1342 (5th Cir. 1980)*, cert. denied 450 U.S. 1030, 68 L. Ed. 2d 226, 101 S. Ct. 1740 (1981); [Northwest Power Products, Inc. v. Omard Industries, Inc.](#), *576 F.2d 83 (5th Cir. 1978)*, cert. denied 439 U.S. 1116, 59 L. Ed. 2d 75, 99 S. Ct. 1021 (1979). To meet the first part of the test there must be a concentrated market and a powerful potential entrant attempting to buy out or merge with the most significant competitor in that market, so that the merger would have such a potential for lessening competition that it could be prevented by the Federal Trade Commission. [Associated Radio v. Page Airways](#), *624 F.2d at 1352*. "If a defendant could achieve a desired result either by lawful merger or by engaging in unfair competition, the choice of the unfair competition route alone should not give rise to an antitrust violation." [Northwest Power v. Omard Industries](#), *576 F.2d at 89*. The second prong of the test is met if the defendants engage in anticompetitive conduct having an anticompetitive effect. *Id. at 89-90*; [Associated Radio v. Page Airways](#), *[**5] 624 F.2d 1342 at 1353*. The decision of this court is definitively resolved on the second prong of the *Northwest Power* test; thus, this opinion will consider that aspect first.

The plaintiff alleged that the defendants engaged in four activities which threaten Sherman Act values: resale price maintenance, unlawful territorial restrictions, tying [***1141**] arrangement, and group boycott. The court finds that there is no substantive evidence to support any of these claims.

Resale Price Maintenance

The rule binding in this circuit governing cases of alleged resale price maintenance was stated in [Aladdin Oil Co. v. Texaco, Inc.](#), *603 F.2d 1107, 1117 (5th Cir. 1979)*, quoting [Butera v. Sun Oil Co.](#), *496 F.2d 434, 436-57 (1st Cir. 1974)*:

HN2[] Resale price maintenance is, in the absence of state fair trade legislation, a *per se* violation of the antitrust laws. [Kiefer-Stewart Co. v. Joseph E. Seagram & Sons, Inc.](#), *340 U.S. 211, 71 S. Ct. 259, 95 L. Ed. 219 (1951)*; [Dr. Miles Medical Co. v. John D. Park & Sons Co.](#), *220 U.S. 373, 31 S. Ct. 376, 55 L. Ed. 502 (1911)*. But before this doctrine can come into play there must be resale price maintenance. The [**6] Supreme Court cases have involved situations in which the attempt to set retail prices was clear. In [Simpson v. Union Oil Co.](#), *377 U.S. 13, 84 S. Ct. 1051, 12 L. Ed. 2d 98 (1964)*, upon which [plaintiff] relies, Union Oil had signed an agreement with the retailer containing the latter's promise to resell at the price set by Union Oil. In *Kiefer-Stewart* a refusal to sell at a fixed price was met by a concerted refusal to deal. In [Albrecht v. Herald Co.](#), *390 U.S. 145, 88 S. Ct. 869, 19 L. Ed. 2d 998 (1968)* and [United States v. Parke, Davis & Co.](#), *362 U.S. 29, 80 S. Ct. 503, 4 L. Ed. 2d 505 (1960)*, the retailer was confronted with minimum or maximum prices and harassed by his supplier and others if he stepped out of line. Taken together, these cases suggest that a case of illegal resale price maintenance is made out when a price is announced and some course of action is undertaken or threatened contingent on the willingness or unwillingness of the retailer to adopt the price. The action need not necessarily fit under the rubric "coercion", but it must involve making a meaningful event depend on compliance or non-compliance with the 'suggested' or stated price. The [**7] dealers in *Parke, Davis* and *Albrecht* were told that the harassment directed against them would end as soon as they acceded to the manufacturer's price desires. The cancellation of the lease in *Simpson* was a direct consequence of the refusal to charge the manufacturer's desired price. The other cases adhere to the same pattern. Cf. [Lehrman](#)

560 F. Supp. 1138, *1141-983 U.S. Dist. LEXIS 18489, **7

v. Gulf Oil Corp., 464 F.2d 26 (5th Cir.), cert. denied 409 U.S. 1077, 93 S. Ct. 687, 34 L. Ed. 2d 665 (1972); Bowen v. New York News, Inc., 366 F. Supp. 651 (S.D.N.Y. 1973).

Plaintiff alleged that Wheelabrator-Frye imposed a system of resale price maintenance on LADSCO. Since there has been no written contract between these two parties since 1969 or 1970, LADSCO relied on the old contract to make out its case on this claim. The plaintiff tried to show that the old contract with the defendant required it to "maintain . . . the prices and terms and observ[e] . . . all sales policies and regulations as established by Wheelabrator Corporation." The plaintiff did not establish that the aforementioned provision remained in force after the late 1960s when the alleged wrongdoing at the center of this dispute is said to [**8] have occurred; though there was evidence that the tenor of the agreement continued after its lapse. More importantly, however, there has been no evidence of the coercion, harassment, or intimidation on the part of the defendants required to make out a *prima facie* case of illegal price maintenance. What the evidence did show was that Wheelabrator thought that in instances where the plaintiff's salesman called upon the same customers as its own jobbers the two "ought to be selling at the same price." Wheelabrator's view about prices did not issue forth as an ultimatum; it was little more than a stated preference about the manner in which business should be conducted where both manufacturer and distributor are calling upon the same potential customer. There has been no showing that Wheelabrator, in any way or at any time, threatened the plaintiff with harm to its business if it did not comply with a certain price list. What the evidence does show is that LADSCO's success in selling Wheelabrator's products was due to its willingness to sometimes cut its profit margin [*1142] and reduce its prices. Even though Wheelabrator was aware of this, there is no evidence that it took any [**9] action, coercive or otherwise, to stop it.

Wheelabrator-Frye never conditioned dealing with LADSCO upon compliance with its suggested prices. No meaningful event turned upon LADSCO's compliance when its contract with Wheelabrator contained a pricing provision. There has been no contract in force since 1969 or 1970, and no evidence that the unwritten working arrangement between the parties contained a pricing provision. Wheelabrator-Frye has certainly not tried to enforce such a provision. This being the case, these facts will not maintain a resale price claim; the plaintiff's proof fails.

Tying Arrangement

In *Bob Maxfield, Inc. v. American Motors Corp., 637 F.2d 1033, 1037 (5th Cir. 1981)*, the Fifth Circuit said that [HN3](#)[
↑] an illegal tying arrangement has four characteristics:

- (1) two separate products, the tying product and the tied product;
- (2) sufficient market power in the tying market to coerce purchase of the tied product;
- (3) involvement of a not insubstantial amount of interstate commerce in the tied market; and
- (4) anticompetitive effects in the tied market.

The plaintiff alleged that defendants violated the Sherman Act by facilitating [**10] a tying arrangement of shot with equipment and parts. As a Wheelabrator-Frye distributor, plaintiff wanted to sell W-F parts and equipment in addition to the shot it was selling, but was not permitted to do so. It is undisputed that LADSCO had been remarkably successful in selling abrasives such as shot. They were Wheelabrator's largest distributor of that product. But LADSCO's business relationship to Wheelabrator was limited to abrasives; it did not encompass the sale of parts. There is testimony to the effect that Wheelabrator did not think that because LADSCO was successful selling shot it would be equally successful selling parts. Thus Wheelabrator made a bona fide business decision regarding the selection of a distributor for parts.

More to the point of the issue of tying, however, is the simple fact that the alleged facts do not constitute tying. [HN4](#)[
↑] To make out a case of tying violative of the antitrust laws the plaintiff must establish that the defendant distributor tied two products (a more and a less marketable one) and conditioned the sale of the more marketable one upon the purchase of the less desirable, "tied" companion. The facts of this case show, rather than [**11] the imposition of undesirable goods as a condition for purchasing more salable ones, the manufacturer limiting the distributor to certain products that he (the distributor) has shown himself expert at marketing.

Counsel for the plaintiff, while not conceding that the tying claim was a tenuous one, was heard to characterize the claim as kin to tying. The court finds, under these facts, that the claim is such a distant cousin it bears no family resemblance to the kind of tying that the **antitrust law** forbids. The plaintiff has failed to establish his case of tying.

Territorial Restriction

HN5 Where a manufacturer is alleged to have imposed restrictions requiring his distributors to abide by territorial limitations, the agreement is a vertical one, governed by the rule of reason. [Continental TV v. GTE Sylvania Inc., 433 U.S. 36, 97 S. Ct. 2549, 53 L. Ed. 2d 568 \(1977\)](#). A plaintiff must show that the defendant's conduct had an adverse effect on competition to prevail under the rule of reason. [Daniels v. All Steel Equipment, 590 F.2d 111, 113 \(5th Cir. 1979\)](#).

The plaintiff has alleged that Wheelabrator-Frye is guilty of imposing an impermissible territorial restriction **[**12]** upon LADSCO. There is no evidence in the record to support this claim. W-F did not restrict LADSCO's sale of shot to any particular territory. In certain areas, such as the Carolinas, W-F competed with LADSCO in the retail market. It is the defendant manufacturer's insistence on distributing **[*1143]** its own product and competing with LADSCO that is the gravamen of the territorial restriction claim. W-F's presence in the market as a distributor of its own goods, troubling though it may be to a distributor such as LADSCO, does not constitute an impermissible territorial restriction violative of Sherman Act values. Indeed, to the extent that LADSCO's real concern is to have W-F withdraw from the market and allow it to be the exclusive distributor of W-F's goods, it is the plaintiff, not the defendant, who would curb competition and risk offending Sherman Act values.

The court in [Red Diamond Supply, Inc. v. Liquid Carbonic Corp., 637 F.2d 1001, 1005 \(5th Cir. 1981\)](#), said that to prevail on an antitrust claim for impermissible restrictions,

a plaintiff must show that the defendants' conduct has an adverse effect on competition. [Daniels v. All Steel Equipment, I^{**131} Inc., 590 F.2d 111, 113 \(5th Cir. 1979\)](#); [H&B Equipment Co. v. Int'l. Harvester Co., 577 F.2d 239, 246 \(5th Cir. 1978\)](#); [Northwest Power Products, Inc. v. Ormark Industries, Inc., 576 F.2d 83, 90 \(5th Cir. 1978\)](#), cert. denied, 439 U.S. 1116, 99 S. Ct. 1021, 59 L. Ed. 2d 75 (1979); [Kentucky Fried Chicken Corp. v. Diversified Packaging Corp., 549 F.2d 368, 380 \(5th Cir. 1977\)](#).

Since the plaintiff has not shown it was restricted to certain geographic areas, it comes as no surprise that it has not shown any adverse effect on interbrand competition. Any adverse competitive results in the market are due to behavior of the plaintiff, not the defendants. The plaintiff has complained that W-F would not permit it to have exclusive right to the North and South Carolina market; yet it fired its salesman for that area, effectively abandoning the market to W-F and others. Any plan of the defendant to exclude LADSCO from the Carolina territory was preempted by LADSCO's own withdrawal from that market. The plaintiff will not be heard to complain about being restricted from territory it quite deliberately abandoned. The plaintiff has not alleged facts sufficient to make **[**14]** out a colorable claim for territorial restriction.

Group Boycott

The plaintiff alleged that a group of its former suppliers boycotted it and substituted HESSCO as their distributor. There was no substantial evidence, however, of concerted action on the part of these suppliers. Indeed, for reasons of its own, LADSCO did not place any orders with ALCOA, its main supplier for primary aluminum, after August 1979. Nor did it place orders with W-F for shot after this period. Consequently, for these suppliers, the opportunity to boycott LADSCO never presented itself. Though it is true that some other of LADSCO's suppliers did switch to HESSCO, this, by itself, does not establish a conspiracy. LADSCO underwent a major change in August of 1979. The man who had been in charge of the day-to-day operations left the company. The sales team, persons with many years of service and proven ability, also subsequently left. Faced with this, many suppliers could have, individually, come to the conclusion that LADSCO's sales structure was so weakened by these changes that it was no longer the able distributor it once was. Thus, what the plaintiff has established is parallel behavior **[**15]** on the

part of several suppliers acting independently in their own interest. There is simply no evidence of an improper motive or concerted action by suppliers. Nor does the effort of LADSCO's dismissed salesman to attract its suppliers constitute a group boycott or a refusal to deal by suppliers. The concerted action must be on the part of the group of suppliers, not third parties. There is no evidence to support plaintiff's group boycott claim.

As the foregoing discussion shows, there has been no violation of Sherman Act values. Fred Hester, a LADSCO Vice-President and Director, resigned. Shortly thereafter, the sales force was fired. Several of the salesmen joined with Mr. Hester and formed HESSCO, which was later purchased by Wheelabrator-Frye. The former LADSCO employees, now in competition [*144] with their old company, used ability and experience to the advantage of their new venture and, predictably, to LADSCO's disadvantage. Some of LADSCO's suppliers left it for the competition. Other of the suppliers, ALCOA and W-F among them, no longer received orders from the plaintiff. These are not the facts of a Sherman Act claim; under the second prong of the Associated [**16] Radio test, the claim fails.

In addition to plaintiff's failure to establish anticompetitive conduct through any of its four claimed Sherman Act values that were threatened, there was no showing by the plaintiff of an adverse effect on competition arising from the transactions in this case. The evidence showed that LADSCO has continued to engage in competition with the new entrant into the market, HESSCO. [HN6](#)[↑] In the absence of a showing of anticompetitive effect, the decision of a manufacturer to switch from an independent distributor to an in-house distribution system does not establish a violation of Sherman Act Section One. [Red Diamond Supply, Inc. v. Liquid Carbonic Corp., 637 F.2d 1001 \(5th Cir. 1981\)](#); [H&B Equipment Co., Inc. v. International Harvester, 577 F.2d 239 \(5th Cir. 1978\)](#). For these reasons the court concludes that the plaintiff has failed under the [Boeing v. Shipman, 411 F.2d 365, 373-76](#) and nn. 13-16 (5th Cir. 1969), standard to satisfy the second prong of the *Northwest Power* test of conduct by the defendants that threatens Sherman Act values.

The court also finds as a fact that plaintiff did not satisfy the first prong of the test, because it failed [**17] to establish a relevant geographic market and also failed to prove that defendants' actions would be prohibited under the law of mergers. These alternative findings are each sufficient reason not to change the court's earlier ruling granting a directed verdict for the defendants on the antitrust claims of the plaintiff.

The Eleventh Circuit announced the standard for directed verdicts in federal court trials in [Kaye v. Pawnee Const. Co., Inc., 680 F.2d 1360 \(11th Cir. 1982\)](#), relying on the former Fifth Circuit's *en banc* decision in [Boeing Company v. Shipman, 411 F.2d 365 \(5th Cir. 1969\)](#). The *Kaye* court held:

The Fifth Circuit *en banc* in [Boeing Company v. Shipman, 411 F.2d 365 \(5th Cir. 1969\)](#), enunciated [HN7](#)[↑] the standard to determine whether there is sufficient evidence to submit a case to the jury following a motion for a directed verdict in a federal court trial. The district court should consider all evidence and not just evidence supporting the nonmover's case. The evidence must be considered in the light and with all reasonable inferences most favorable to the party opposed to the motion. If the facts and inferences point so strongly and overwhelmingly [**18] in favor of one party that reasonable persons could not reach a different conclusion, the court should direct a verdict. On the other hand, if there is substantial evidence of such quality and weight that reasonable persons in the exercise of impartial judgment might reach different conclusions, the court should deny the motion for a directed verdict and submit the case to the jury. A mere scintilla of evidence is insufficient to present a question for the jury; there must be a conflict in substantial evidence to create a jury question. [Boeing, 411 F.2d at 373-76](#) & nn. 13-16.

[680 F.2d at 1364](#) (footnote omitted).

On the antitrust claims in this case, the evidence is overwhelmingly in favor of the defendants. The *Kaye* standard for directing verdicts in federal cases is met here.

Plaintiff's state law claim of unfair competition came before this court solely on the basis of pendent jurisdiction; there is no other basis for subject matter jurisdiction over this claim. The defendants have moved for a directed verdict against it. The court finds that there is sufficient evidence of one or more acts by defendant Hester that *prima facie* [**19] constitute a breach of trust that possibly may be fairly characterized as unfair competition. There is great question, however, whether under Alabama [*1145] law such a breach, if found by a jury, establishes plaintiff's broad claims for destruction of its business by means of the unfair competition alleged in Count Two of the complaint. Furthermore, to proceed with the unfair competition claim after dismissal of the antitrust claim would be impossible without the jury being infected by prejudice from evidence received on the antitrust claim. Thus it would be necessary to retry the unfair competition claim under any circumstances. The court finds that a retrial would be more fairly and appropriately accomplished in the state court.

United Mine Workers of America v. Gibbs, 383 U.S. 715, 86 S. Ct. 1130, 16 L. Ed. 2d 218 (1966), laid down several considerations that serve as limitations on the assertion of pendent jurisdiction. First and foremost, [HN8](#) [↑] the decision whether to accept the pendent claim lies in the court's discretion. This was expressly asserted in *Gibbs* and later in *Rosado v. Wyman*, 397 U.S. 397, 90 S. Ct. 1207, 25 L. Ed. 2d 442 (1970). There are several [**20] reasons why a court would use its discretion to refuse a pendent claim. Examples:

- (1) The real substance of the case is the state claim. Even if the federal question is significant, when the main orientation of the case is state based, jurisdiction may well not be taken over the pendent state claim.
- (2) The federal claim asserted is frivolous.

- (3) There would be jury confusion caused by litigating the federal and state claims together. If the state claim would have to be severed under [Rule 42](#), and separate trials held, then the efficiency-economy consideration is undercut and there is no practical reason for the federal court to take the state claim.

- (4) There is a clear statement by Justice Brennan in *Gibbs* that a federal court should dismiss the state-based insufficient claim if the federal claim collapses before trial. This was read as mandatory for many years, but in recent years the Supreme Court has indicated that this consideration likewise lies within the discretion of the district court.

The federal antitrust claim in this case is totally without merit. A review of the more than two thousand pages of trial transcript reaffirms the correctness [**21] of the court's earlier order directing a verdict for the defendants. The plaintiff was not forthcoming with evidence that would even begin to make out an antitrust case. A lesser lawyer inexperienced at evaluating the merits of antitrust claims might have, in his ignorance, failed to recognize the insubstantial, utterly frivolous character of the claims put forth here, but plaintiff's lead counsel, an eminent member of this bar, and an expert on antitrust matters, could not but know he had no colorable antitrust claim. This being the case, the court finds that the formulation and filing of an antitrust claim was but a pretext for getting the pendent state unfair competition claim into a federal court. Customarily counsel will hedge his bet by filing two suits, one in both state and federal court, if there is a colorable pendent claim. That was not done here. This shows a lack of confidence in the state claim. There is, in fact, good reason for such a lack of confidence.

The federal claim in this case did not collapse; it never appeared. There was no substantial evidence of a Sherman Act violation; thus, that claim was a false federal issue incapable of properly founding jurisdiction [**22] of a pendent claim in this court. Over the objections of the defendants, the court permitted the plaintiff to enjoy on damages issues liberal evidentiary rulings that were proper *only* on the assumption that legitimate antitrust claims were before the court. Thus the jury was exposed to evidence that could not have been properly admitted to prove the only possibly legitimate claim in this case, the one arising from state law. Much of that evidence is necessarily confusing and prejudicial now that there is no antitrust issue before the court. Fairness and substantial justice between the parties mandates that the state [*1146] claim be properly tried and judged on its merits, with a jury untainted by its unfortunate history in this court. The case should be tried in the appropriate judicial system, the state courts of Alabama.

There can be no overlap of issues here between claims because only one true issue exists: the state law claim for unfair competition. Nearly all the evidence of damage was let in under rules which contemplate an antitrust claim.

That evidence is inappropriate for a jury's consideration. Thus, this consideration provides no basis for a federal court [**23] retaining jurisdiction of this state law claim.

For the foregoing reasons, this case will have to be retried under any circumstances. Because the defendant's state law claim is a novel one (in the context of the facts presented here it is a case of first impression), this court cannot efficiently or authoritatively render judgment on the question, which is wholly a matter of Alabama law.

It is doubtful that the question in this case would qualify for certification to the Alabama Supreme Court. The Alabama Supreme Court rule requires that the certified question be a dispositive issue. It does not render advisory opinions shaping the parameter of doctrines, the requirements, limits, conditions, and exceptions that are the heart of a body of jurisprudence. The novel unfair competition and conspiracy questions presented here require a subtle, nuanced reading of the law that cannot be rendered as a response to a necessarily abstract query from this court.

Finally, comity requires that this court defer to the courts of Alabama for a ruling on the alleged unfair competition claim. That claim, as alleged in the complaint, has never been recognized by the Alabama courts. A preliminary [**24] search for Alabama authority has revealed a single case on the general issue, with facts quite dissimilar from the facts here. Thus, what is helpful in that opinion is, for the most part, mere dictum.

As the Supreme Court noted in [Mast, Foos & Co. v. Stover Mfg. Co., 177 U.S. 485, 488, 20 S. Ct. 708, 44 L. Ed. 856 \(1899\)](#):

HNg Comity is not a rule of law, but one of practice, convenience and expediency. It is something more than mere courtesy, which implies only deference to the opinion of others, since it has substantial value in securing uniformity of decision and discouraging repeated litigation of the same question, but its obligation is not imperative. . . . It recognizes the fact that the primary duty of every court is to dispose of cases according to the law and the facts; in a word, to decide them right. In doing so, the judge is bound to determine them according to his own convictions. If he be clear in those convictions, he should follow them. It is only in cases where, in his own mind, there may be a doubt as to the soundness of his views that comity comes into play and suggests a uniformity of ruling to avoid confusion, until a higher court has settled the law.

[**25] It is in the interest of both comity and federalism for this court to defer to the courts of Alabama. It is most improper for a federal court, without suitable law to guide it, to plow new ground in a state law field. This court declines the invitation.

Defendants' motion for a directed verdict is granted as to Count One of plaintiff's complaint and denied as to Count Two of the same. The defendants' oral motion to dismiss Count Two of plaintiff's complaint is granted. Count Two is dismissed without prejudice to its disposition in state court. This dismissal is conditioned upon the offer made by defendants, before the court ruled on the motions for directed verdict, to waive any portion of the limitations period as to the unfair competition claim which fell between filing of this action and entry of final judgment. Without such offer, the court would grant the directed verdict motion on behalf of all defendants except Hester, and deny it as to Hester. The only colorable evidence of unfair competition in the record is of actions by Hester before HESSCO was created and before W-F had any connection with Hester.

[*1147] Plaintiff argues that W-F and HESSCO "joined the [**26] conspiracy later." This position ignores the total lack of evidence of conspiracy involving the corporate defendants and further ignores the fundamental truth that one cannot conspire with oneself. The argument that certain salesmen conspired with Hester is without the support of evidence. The proof would not support a verdict against the salesmen, so there is no proven conspiracy for anyone to join. Plaintiff apparently recognized the lack of proof as to the salesmen. It did not sue them. It certainly had no hesitation about suing anyone else.

A separate order in conformity herewith is being entered.

[*none] [EDITOR'S NOTE: The following court-provided text does not appear at this cite in 560 F. Supp.]

FINAL ORDER

This cause came to be heard at the close of plaintiff's case at trial upon motion of the defendants, Wheelabrator-Frye, Inc., HESSCO Industrial Supply, Inc., and Fred Z. Hester, for a directed verdict against plaintiff L.A. Draper and Son, Inc.; and upon motion of the same defendants to dismiss Count Two of plaintiff's complaint, which contains a pendent state law claim for unfair competition.

On April 1, 1982, the court issued an oral order granting **[**27]** defendants' motion for directed verdict as to the antitrust count, and denying the motion as to the unfair competition claim and dismissing the unfair competition claim without prejudice. On April 8, 1982, the plaintiff filed a pleading denominated Motions for Various Types of Alternative Relief which requested the court to reconsider its oral order and grant alternative relief. The court elected to treat this pleading as a motion for reconsideration and, on June 4, 1982, withdrew its judgment and considered findings of fact and conclusions of law which were submitted by the plaintiff on September 9, 1982. The defendants' version of the facts and the law, submitted on or about October 8, 1982, was also considered. In addition to these submissions, the court has reviewed the more than two thousand pages of trial transcript. Having considered the motions, pleadings, arguments and submissions of counsel, evidence, and the applicable law, the court is of the opinion its previous ruling directing a verdict for the defendants on the antitrust claim, denying the motion for directed verdict as to the unfair competition claim, and granting the motion to dismiss the unfair competition upon **[**28]** the condition that the limitations period be waived for the period between the filing of this action and the entry of final judgment should be reaffirmed. The plaintiff's motions for alternative relief are all due to be denied. The conclusions of fact and law supporting these rulings are found in the memorandum opinion filed contemporaneously herewith. Accordingly, it is

ORDERED, ADJUDGED and DECREED that defendants' motion for directed verdict be and the same hereby is GRANTED as to Count One of plaintiff's complaint and DENIED as to Count Two of the same. It is further

ORDER, ADJUDGED and DECREED that defendants' motion to dismiss Count Two of plaintiff's complaint be and the same hereby is GRANTED UPON THE CONDITION, stipulated to by all parties to this action, that any and all portions of the limitations period for the unfair competition claim contained in that count which fell between the filing of this action and the entry of final judgment are waived. It is further

ORDERED, ADJUDGED and DECREED that plaintiff's Motions for Various Types of Alternative Relief, which the court elects to treat as a Motion for Reconsideration, be and the same hereby is DENIED.

Costs of this **[**29]** action are taxed against the plaintiff.

[HN1](#) [down arrow] Antitrust & Trade Law, Sherman Act

The Sherman Act, [15 U.S.C.S. § 1](#), proscribes every contract, combination, or conspiracy in restraint of trade or commerce. As the myriad of cases which interpret those words make clear, it is not every agreement in restraint of competition that is prohibited since almost every contract has that effect to some extent. In fact, most agreements are analyzed under the rule of reason. This rule obliges a court to consider whether the particular agreement places an unreasonable restraint on competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN2 Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

The true test of legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition. To determine that question the court must ordinarily consider the facts peculiar to the business to which the restraint is applied; its condition before and after the restraint was imposed; the nature of the restraint and its effect, actual or probable. The history of the restraint, the evil believed to exist, the reason for adopting the particular remedy, the purpose or end sought to be attained are all relevant facts.

HN3 Regulated Practices, Price Fixing & Restraints of Trade

It is not relevant whether a public official knows he can be held liable for a particular violation of the antitrust law, only whether a clearly established violation exists.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Horizontal Market Allocation

HN4 Price Fixing & Restraints of Trade, Horizontal Market Allocation

Territorial market division has long been recognized as a violation of the antitrust law.

Counsel: Stephen D. Susman, Houston, Texas, William H. White, Houston, Texas, Charles J. Brink, Houston, Texas, Michael M. Barron, Austin, Texas, for Appellant.

(For: Hon. Jim McConn), Rufus Wallingford, Houston, Texas, Layne E. Kruse, Houston, Texas, (For Gulf Coast Cable), Richard B. Miller, Houston, Texas, Theodore F. Weiss, Jr., Houston, Texas, John L. Jeffers, Houston, Texas, Richard B. Miller, Houston, Texas, for Appellee.

Judges: Clark, Chief Judge, Gee and Garza, Circuit Judges. Clark, Chief Judge dissenting.

Opinion by: GARZA

Opinion

[*227] GARZA, Circuit Judge:

The district court's grant of judgment *non obstante veredicto* caused the plaintiff to initiate this appeal. After a thorough consideration of the record, we find the territorial market division involved in this case to be a *per se* violation of the Sherman Act, [15 U.S.C. § 1](#). We, therefore, reverse the lower court judgment and reinstate the jury's award of \$ 2,100,000 damages.

FACTS

The events which culminated in this litigation [**2] were played out in Houston, Texas, where in 1978, cable television franchises were awarded. This was not the first time that cable television for the city of Houston had been discussed. Six years earlier, the city had sought applicants for cable television franchises. In 1972, several firms submitted applications and, following the review of these applications by the Public Service and Legal

Departments, two were recommended to the Mayor and City Council. The vote of Mayor and City Council determined that a franchise for the entire city be awarded to one corporation.

The unsuccessful franchise applicant, Gulf Coast Cable Television Co. [hereinafter **[*228]** Gulf Coast], thereafter secured a petition of more than five hundred Houston voters calling for a referendum on the Council action.¹ When put to a vote of the populace of the city, the "monopoly" franchise was soundly defeated.

[3]** The Mayor of Houston in 1978 had been a city councilman in 1973, and accordingly, was anxious to avoid a repeat of the problems encountered. The Mayor testified at the trial below that he, therefore, determined that a number of franchises would be granted instead of the monopoly approved in 1973. Additionally, he resolved that, where qualified, local applicants would be favored. Finally, he concluded that minority participation should be permitted. Unfortunately, the Mayor did not stop there at his manipulation of the cable television franchising process.

Defendant Gulf Coast was the first of many concerns to seek a cable television franchise in 1978.² There is ample evidence that the city of Houston did not even initiate the franchise process; defendant Gulf Coast approached the city and made application for a franchise. This action served as the commencement of a very unusual process. The city of Houston must be characterized as a highly desirable market for cable television. The city, however, made no effort to take advantage of this fact by broadcasting, via trade publication or otherwise, its intention to award franchises. Instead of following this common practice, **[**4]** the city simply passively accepted applications as they arrived. From the many applications which were submitted to the Public Service Department, four emerged as strong contenders based not on the strength of their proposals, but rather the political strength of the men behind them. These four actors were Gulf Coast, Houston Cable Television Co., Houston Community Cable Television Co., and Meca. Mayor McConn had let it be known that he did not want to choose between competing applicants. He wanted the applicants to work together, resolve any overlaps in their territories and present him with a finished product. He abdicated his responsibility in the franchising process to a group of powerful Houston businessmen. In turn, these businessmen became "friendly competitors" in an effort to segment the city among themselves and prevent any outsiders from competing with them.

[5]** These businessmen and their attorneys met, and over a period of time arrived at mutually agreeable franchise areas. The Mayor reentered upon the scene at this juncture, however, and informed Gulf Coast that another applicant must be added to the ranks. Westland Corporation, a group controlled in large part by the Mayor's personal attorney, must be given a franchise. The area involved was a portion of the territory sought by Gulf Coast. Conscious of both the political realities of the situation and the need to avoid competition among potential franchises, Gulf Coast decided to redraw the franchise boundaries in order to comply with McConn's wishes. Now the businessmen were prepared to present a *fait accompli* to the Mayor and City Council.

While Gulf Coast and the above-mentioned applicants were cutting out competition by cutting up the city among themselves, the plaintiff, Affiliated Capital Corporation [hereinafter Affiliated] entered the picture. Affiliated is a publicly-held corporation that owned a savings and loan association. A federal prohibition against owning both savings and loan associations and cable television systems prevented Affiliated from making application **[**6]** for a franchise until it sold the savings and loan association. After the mid-September sale, Affiliated hired a local attorney to check into the status of the franchising process. When the attorney contacted counsel for **[*229]** Gulf Coast, he was informed that Affiliated was too late because the "pie had been cut." Amazed by this news, Affiliated's president, Billy Goldberg, went to visit the Mayor, who assured him that there was still time for Affiliated to receive a fair hearing. Consequently, Affiliated made application for a cable television franchise on October 16th.

¹ [Tex.Rev.Civ.Stat.Annot. art. 1181](#) (Vernon 1963) and the Charter of the city of Houston provided for this procedure.

² Gulf Coast is a limited partnership which operates solely in the cable television business. After its unsuccessful bid for a franchise in the city of Houston in 1972, Gulf Coast remained in business and obtained franchises for a number of the small cities that lie within the Houston metropolitan area.

Although the city never advertised its intention to award cable television franchises, it did take several other measures during this period calculated to give the appearance that the citizens of Houston would receive quality cable television service. The Public Service Department prepared a questionnaire which was distributed to all franchise applicants. The city hired a consultant, Dr. Robert Sadowski, to evaluate the applicants based on their responses to this questionnaire. By the middle of November, Dr. Sadowski had completed a report which was highly critical of the manner in which the franchising [**7] process was being handled. He declared that it was not rational to allow the applicants themselves to divide the city into franchise territories. He concluded that this was not a procedure designed to give the citizens of Houston the best possible cable television service.

In addition to this general indictment of the process, Dr. Sadowski recommended that only two of the applicants, Meca and Cable-Com, be awarded the franchise areas they sought.³ [**8] He urged that three applicants, Houston Cable, Westland, and Houston Community Cable, be rejected and that the size of defendant Gulf Coast's service area be substantially reduced. He apparently had doubts about the ability of Gulf Coast to service even this smaller territory so he made a personal visit to its facility. Shortly after this visit, Sadowski was fired. His conclusions were altered before the report was made public. The five ultimately successful applicants were pronounced qualified.⁴

The City Council was now prepared to take final action on the cable television franchise applications. The president of Affiliated appeared before City Council and requested that his application be given due consideration. Instead of due consideration, Council, through Councilman Johnny Goyen, offered the advice that Affiliated should go and work out an agreement with defendant and the other above-mentioned applicants.

Mr. Goldberg, let me address Council's wisdom. As these applications came in, they were sent to the Legal [**9] Department. Obviously, a number of lawyers got together and did whatever they did. I was not privy to it nor did I want to sit in on any meeting.

Apparently, they came up with the formula that those applicants agreed upon. I was hoping that your situation might end up in the same pot as the others, whereby there would be some kind of recommendation coming before this Council, and this Council would not have to carve from one to give to another, which we have not had to do in the past and which I do not want to do now nor do I intend to.

I do not want to taketh away and giveth to somebody else, because I haven't had to do that in the past. You have a very competent attorney, and the other people have very competent attorneys. What I would like to see done, and it might take a motion to get this done, is to send this to the Legal Department and try to work something out.

Plaintiff's Exhibit 150 at 27-28.

The message to Goldberg was clear: it was not the Council, but rather private [**230] businessmen who would decide the future of cable television in Houston. When Mr. Goldberg did not make an agreement with those businessmen, the City Council and Mayor voted for [**10] the convenient franchise package with which they were presented by Gulf Coast. This action led Affiliated to the federal courthouse with the allegation that defendants had engaged in a conspiracy to prohibit its entry into the Houston cable television market, thereby violating section 1 of the Sherman Act. Specifically, the plaintiff claimed that certain applicants for cable television franchises agreed to define the territories in which they would apply for franchises, so that no two members of the conspiracy would compete for the same territory. In addition, plaintiff charged defendants with participation in a more general conspiracy to limit competition for cable television franchises by excluding non-conspirator competitors.

³ Doctor Sadowski never evaluated the application submitted by Affiliated for this report. It was submitted after the termination of his employment.

⁴ Shortly before the franchise ordinances were considered by City Council, the Public Service Director submitted a letter to the City Attorney to the effect that he lacked the information necessary to judge the merits of each application. In relevant part, the letter concluded that "while these issues may have been considered by the drafting principals, and may have been addressed satisfactorily by them, I have no way of knowing this." Record on Appeal, vol. 14, at 616. The "drafting principals" were later identified as the attorneys for certain franchise applicants.

DISTRICT COURT JUDGMENT

At the close of evidence in the trial of the instant case, the jury was presented with a series of interrogatories. The relevant interrogatories, as well as the jury responses thereto, are reproduced below.

INTERROGATORY NO. 1

It is established that two or more franchise applicants, including defendant Gulf Coast, participated in agreements on boundary lines so as to divide the geographic areas for which these applicants [**11] would seek cable television franchises. Do you find from a preponderance of the credible evidence that these arrangements were part of a conspiracy in unreasonable restraint of trade, in violation of Section 1 of the Sherman Act. Answer "yes" or "no."

ANSWER: No.

INTERROGATORY NO. 3

Do you find from a preponderance of the credible evidence that one or more of the defendants participated in a conspiracy in unreasonable restraint of trade to limit competition for cable television franchises, in violation of Section 1 of the Sherman Act? Answer "yes" or "no."

ANSWER: Yes.

INTERROGATORY NO. 4

Do you find from a preponderance of the credible evidence that any of the following persons participated in that conspiracy? Answer "yes" or "no."

a. City of Houston

Yes

b. Mayor Jim McConn

Yes

c. Gulf Coast Cable Television

Yes

INTERROGATORY NO. 5

Do you find from a preponderance of the credible evidence that either of the conspiracies, if you have so found in answer to Interrogatories 1 or 3, proximately caused injury to the plaintiff's business or property? Answer "yes" or "no."

ANSWER: Yes.

INTERROGATORY NO. 6

What sum of money, if paid now [**12] in cash, do you find from a preponderance of the credible evidence would fairly and reasonably compensate plaintiff for the damages, if any, you find plaintiff has incurred? Answer in dollars and cents, if any.

ANSWER: \$ 2,100,000.00.

The jury's verdict was not destined to be entered into judgment. In a post-trial motion, defendant Gulf Coast argued for judgment notwithstanding the verdict on three grounds. Defendant asserted that all of plaintiff's evidence had related to boundary agreements so that there was no evidence to support the jury's finding of an independent conspiracy under interrogatory three. Likewise, defendant claimed that there was no evidence exclusive of boundary agreements to support the finding of causation [*231] on the fifth interrogatory.⁵ In a thorough and carefully researched opinion, Affiliated Capital Corp. v. City of Houston, 519 F. Supp. 991 (S.D.Tex.1981), the district court granted the requested relief. Although the judge found evidence independent of the boundary agreements to support the answer to interrogatory three,⁶ he concluded [*233] that plaintiff had failed to

⁵ Defendant also argued that the *Noerr-Pennington* doctrine mandated judgment notwithstanding the verdict. This contention is discussed in a later portion of this opinion.

demonstrate that its injury was caused by anything other [**13] than defendants' boundary agreements. Thus,

⁶ In response to defendant's motion, plaintiff cited a wealth of evidence to demonstrate a second theory of conspiracy. In its memorandum opinion the court set out all the evidence which it agreed would support a second theory of conspiracy to limit competition:

By late August 1978, Clive Runnells, on behalf of Gulf Coast, had agreed with Meca that they would be friendly competitors. Testimony of Clive Runnells. Al Levin, Affiliated Capital's lawyer during the franchising process, testified that by September 20, 1978, he contacted Bill Chamberlain, an agent of Gulf Coast. Chamberlain told him that Gulf Coast's attorney Bill Olson "was a pushing force of the cable TV situation at that point." Levin further testified that he then contacted Olson and Olson told him, "as far as I am concerned, Al, it's too late; the pie has already been cut." Olson added: "Al, tell Billy [Goldberg] he is too late on this one." "[Olson's] words were, 'the City is locked up by five franchises. '" On the day before this telephone conversation between Levin and Olson, Olson had told Jonathan Day, an attorney for Houston Cable, that Olson was "trying to put map together" and that "most of areas are defined on eastern side." Plaintiff's Exhibit 63.

On September 28, 1978 a lawyer for Houston Cable wrote to the lawyer for Gulf Coast regarding the franchise ordinance:

Enclosed is a copy of the proposed cable television ordinance marked to show deletions and additions, including some recommended by our FCC counsel. Also enclosed is an unmarked copy for your convenience.

The enclosed form of the proposed ordinance has been placed in our word processing equipment. Consequently, any changes or additions you wish to make can be easily accommodated. As we discussed, the enclosed form should be considered as an internal working draft so that we can reach an agreed proposal to present to the city.

Plaintiff's Exhibit 14. A week later he wrote another letter recounting that they had met on this franchise ordinance, and noting their discussions of various provisions of this proposed ordinance, including the provision with respect to the percentage of the City's interest in the gross revenues from the ordinances:

Enclosed is a revised form of CATV ordinance with the changes we discussed at our last meeting in Section 8.G; Section 10.B; Section 11.D; Section 12.H, J, and M; and Section 23.A.

Also enclosed is a suggested revision to Section 20.A regarding the three percent of gross revenue issue in the event we are unsuccessful in limiting the franchise fee to regular subscriber service.

If you have further comments or suggestions regarding this proposed form of ordinance, please let me know.

Plaintiff's Exhibit 15. None of the referenced sections of the proposed ordinance relates to boundaries.

In October 1978, Runnells and others met with Mayor McConn. At that meeting, Runnells was informed that McConn wanted Westland to have a franchise. Westland had applied for a portion of the area sought by Gulf Coast, and the Mayor indicated to Gulf Coast that a general area, Westbury-Meyerland, was what he wanted Westland to have. Testimony of Clive Runnells; Testimony of James McConn.

On November 22, 1978, notice of the November 29th City Council agenda indicated that six (6) ordinances, five of which ultimately were approved, would be considered. On November 27, 1978, the attorney for Houston Cable, one of the applicants scheduled on the upcoming agenda, sent a final proposed cable television ordinance to the City Attorney:

Enclosed is a revised form of the proposed cable t.v. ordinance which includes the modifications made this week-end.

In order to meet the proposed time schedule, any further revisions must be agreed by 12 noon on Tuesday, November 28. Final proofing of the enclosure will be completed by that time.

Plaintiff's Exhibit 29. He also sent a copy of the ordinance to Gulf Coast's attorney, who had discussed it with the lead counsel for Houston Cable earlier that morning:

Enclosed is the proposed cable t.v. ordinance which Jonathan Day discussed with you this morning. Also enclosed is a copy of the transmittal letter to the City attorney.

I have marked significant changes in red in order to facilitate your review. If you have any questions or comments, please let me know.

Plaintiff's Exhibit 30. The next day Houston Cable's attorney sent copies of the ordinances to the ultimately successful applicants. The proposed ordinances were complete except for the names of the applicants and their proposed service area. Plaintiff's Exhibits 32 & 189. The successful applicants then filled in the blanks with their names and service areas, and forwarded the ordinances to the City Attorney. Some applicants sent their proposed ordinances back to the Houston Cable Attorney who then forwarded them to the City. Plaintiff's Exhibit 35.

there was no evidence to support interrogatory five.

The agenda for the City Council meeting of November 29, 1978 contained six (6) cable television franchises, not including plaintiff's, Plaintiff's Exhibit 33; those ordinances had been placed on the agenda on or before November 22, 1978, Plaintiff's Exhibit 174. When Affiliated attorney Levin heard of this, he contacted Assistant City Attorney Adrian Baer. Baer relayed the following information to Levin:

The Mayor and City Council had made their decision, and [Baer] said, "I learned this directly from the Mayor, the franchises are non-exclusive, he does not know about the areas, it's still being worked out by Williams and Baer . . . so the net result will be a de facto exclusive."

He [,Baer,] explained to me that there were--the decisions as to who was going to get what areas, specifically in terms of the actual boundaries, were still under negotiations, but the decision as to who was fait accompli.

Testimony of Al Levin; Plaintiff's Exhibit 106.

After an on-site inspection of Gulf Coast's Bellaire facilities, Sadowski, the consultant hired by the City of Houston, told Earle, Director of Public Service, and Baer, Assistant City Attorney, that he would reject Gulf Coast's application. The next morning, Sadowski was fired. One day later a messenger from Earle retrieved the notes Sadowski had made concerning the applications. In his notes, Sadowski had not recommended that Gulf Coast's application be rejected, in spite of his oral suggestion to that effect to Earle and Baer, and he testified that he would have made no substantive changes in his report after the visit to Gulf Coast's facilities. He had recommended in his report, however, that Gulf Coast be given a smaller franchise area than that for which it had applied. When Sadowski's notes were typed by someone in the City, that recommendation was deleted. Moreover, other significant changes were reflected in the typed version of the notes Sadowski had turned over to Earle's messenger: his recommendations that Houston Community Cable, Houston Cable, and Columbia (Westland) be rejected were changed to recommendations that they should continue to be considered; and his statement that Cablecom had presented the only satisfactory application was omitted. Testimony of Robert Sadowski.

Prior to the plaintiff's hearing before City Council on December 12, 1978, McConn suggested to Goldberg that Affiliated seek a franchise in another area of the City rather than in the area sought by Gulf Coast. McConn testified as to his motivation for the suggestion: "I thought that, in trying to really help Mr. Goldberg, it was pretty obvious to me that Gulf Coast had the muscle and that Mr. Goldberg did not."

At the City Council hearing on plaintiff's application which was conducted on December 12, 1978, the following comments were made by Councilman Goyen:

Mr. Goldberg, let me address Council's wisdom. As these applications came in, they were sent to the Legal Department. Obviously, a number of lawyers got together and did whatever they did. I was not privy to it nor did I want to sit in on any meeting.

Apparently, they came up with the formula that those applicants agreed upon. I was hoping that your situation might end up in the same pot as the others, whereby there would be some kind of recommendation coming before this Council, and this Council would not have to carve from one to give to another, which we have not had to do in the past and which I do not want to do now nor do I intend to.

I do not want to taketh away and giveth to somebody else, because I haven't had to do that in the past. You have a very competent attorney, and the other people have very competent attorneys. What I would like to see done, and it might take a motion to get this done, is to send this to the Legal Department and try to work something out.

Plaintiff's Exhibit 150 at 27-28. Subsequently, the Council discussed how to proceed with plaintiff's application, and Councilman Mann made the following suggestions:

I want to make a substitute motion that the [plaintiff's] application be referred to the Legal Department, and they in turn can contact these other applicants who have come forward and see if they can work out something.

....

If you take this, fine, then see how much Gulf Coast is going to knock off this other group on farther down and then around and around.

....

[**14]

The agreements to allocate and divide territory cannot be considered as evidence proving causation of plaintiff's injury, and no other evidence in the record, either direct or inferential, provides the necessary connection between the second theory of conspiracy to exclude non-conspirators and the plaintiff's failure to receive a franchise.

Substitute motion that this application be referred to the Legal Department and Public Service, and they are to contact the other people that have ordinances and guarantee that these boundaries are being adjusted between them, and they report back to Council.

Plaintiff's Exhibit 150 at 37, 39, 40.

Also at that hearing, Mann indicated his knowledge of a house-count survey that had been conducted by Gulf Coast. Plaintiff's Exhibit 150 at 25. The survey resulted in a comparison between the area plaintiff was applying for and an area that was within Houston Cable's application, Plaintiff's Exhibit 84, and was conducted in conjunction with a proposal by Gulf Coast that if Houston Cable would give the identified area to Gulf Coast, then Gulf Coast would be willing to give plaintiff its area. Testimony of Al Levin. A document, prepared sometime between November 28, 1978, and December 20, 1978, by Assistant City Attorney Baer bears an alternative boundary description for the Gulf Coast franchise including the Houston Cable area, with Baer's notation: "I-10 line shifted to Hwy. 290 without Goldberg's tract--contingency." Plaintiff's Exhibit 56.

City Council favored Gulf Coast's franchise, which subsumed the area plaintiff had applied for, and at trial several councilmen and Mayor McConn testified as to their reasons therefor. McConn's concern was to keep politically influential groups content:

Q You didn't want to step on anybody's political toes, did you?

A Not if I could avoid it.

Q You didn't want to make any type of political decision where some powerful person like Walter Mischer would be unhappy, did you?

A Not if I could avoid it.

Q And if all of the parties could work things out, then you wouldn't have to make any type of decision, other than approving their agreements, isn't that correct?

A Yes, generally that is correct, yes, sir

Q And isn't that what you wanted to happen?

A That would have been beautiful, if it could have happened that way.

Q But when it didn't happen and you had to make the choice between Southwest Houston and Gulf Coast, you stated that the other--you thought the other people were more politically powerful than Southwest, isn't that correct?

A Yes, sir. I don't know if I said that, but I'll say it now.

Testimony of James McConn.

Councilman Goyen testified by deposition that he would have voted for Affiliated Capital's application if "on the 20th, Mr. Goldberg had come in and Mr. Runnells had come in, Mr. Mischer had come in, and all the principals had come in, and a piece of Houston had been carved out for Mr. Goldberg with no objection by anybody." Councilman Robinson testified that he would have supported Affiliated Capital's application if plaintiff had been able to work something out with Gulf Coast to give him what he wanted. Councilman Westmoreland testified that he did not disagree with his prior deposition testimony that Affiliated had been unable to work out any type of arrangement with Gulf Coast, and for that reason Westmoreland voted in favor of Gulf Coast.

Finally, plaintiff's expert witness, Martin Malarkey, testified at length about the detrimental results of the noncompetitive franchising process in Houston, and about the benefits to residents of other cities where the process has involved competition on the merits of the applications. According to his testimony, the benefits include lower rates, provisions for sanctions in the event of noncompliance by the franchisee, provisions for performance bonds, and provisions requiring city approval prior to changes in ownership or control of the franchises. Further, he testified that normally the city itself prepares the franchise ordinance, rather than allowing applicants to do so.

The testimony elicited by plaintiff from its expert witness further demonstrates that what plaintiff established was a causal relationship between the applicants' agreements to eliminate overlaps in territory and the plaintiff's failure to be awarded a franchise, rather than a relationship between the agreement to exclude non-conspirators and plaintiff's injury.

Record on Appeal, vol. 9 at 1846.

IMPACT ON COMPETITION

It is abundantly clear from the record of this case that a group of Houston businessmen decided to ensure the receipt of cable television franchises by agreeing to seek separate parts of the city. That they joined together at least with the blessing of the Mayor, if not at his behest, is also certain.⁷ In order to fully comprehend the devastating impact on competition occasioned by this gentlemen's agreement, we digress [****15**] briefly to set out an important characteristic of the cable television industry presented by Gulf Coast.

[***234**] Defendant Gulf Coast asserts that cable television, like the electric utility, is generally considered a natural monopoly. According to the common wisdom, the extremely high fixed costs incurred in preparing a cable television company for operation prevent the survival of competition in the marketplace. Plaintiff's expert witness on the cable television industry admitted that it did not make economic sense to grant franchises with overlapping boundaries. Record on Appeal, vol. 35, at 28. The economies of scale do not approach those of electric utilities but the theory for both industries holds that the long-run average costs tend to fall as output increases. We assume for purposes of this discussion that cable television is indeed a natural monopoly and proceed to discuss the pernicious effects of the conspiracy given this factor.

Defendant Gulf Coast [****16**] argues that since cable television is a natural monopoly and competition within franchise areas is impractical, the division of territories caused no harm. The boundary agreements did nothing more than conform to an important characteristic of this industry. In reality, however, the impact of these agreements is all the more devastating precisely because a natural monopoly is involved.

If there is to be no competition within a given territory, competition is only possible before the franchise is granted. Unfortunately for both Affiliated Capital and the citizens of Houston, there was no competition between the corporations that received franchises. The result was lower quality, higher priced cable television for Houston.⁸

Plaintiff's expert witness, Martin Malarkey, compared the Houston cable television ordinance with those of a number of Texas cities.⁹ He testified that while no performance bond was required in Houston, it was common practice to require one. [****17**] With regard to rates, the Houston ordinance states that rates can be changed upon sixty days' notice unless the city suspends them by calling a public hearing. The other cities do not countenance this practice of allowing the companies to make the first move toward rate increases. Franchise fees are also lower in Houston because the city receives three percent of gross revenues *excluding* revenues from connections, reconnections, and sale or rental of equipment. Each customer must rent a converter for the price of \$ 2.50 per month. When this amount is calculated for 100,000 subscribers over a year's time, the resulting sum equals a substantial loss for city coffers.

In addition to opining about the relative merits of the Houston ordinance, Malarkey also noted that the procedure employed in Houston did not even permit an adequate determination of the merits of each application. He stated that the city did not adequately review the financial qualifications of the applicants. [****18**]¹⁰ He also asserted that all of the applications were woefully substandard.¹¹

⁷ Record on Appeal, vol. 12, at 450.

⁸ Record on Appeal, vol. 34, at 23-27.

⁹ Record on Appeal, vol. 34, at 13-26.

¹⁰ Record on Appeal, vol. 33, at 53-54.

¹¹ Record on Appeal, vol. 33, at 58-59.

By far the most searing indictment of the procedure comes from a simple comparison of the requirements of the 1973 and 1979 ordinances, as the following colloquy with the expert witness demonstrates:

Q Sir, as a further benchmark of the Houston franchising process in 1978, did I ask you to compare the franchise ordinance awarded by the City of Houston in 1973 with the ordinance awarded in '79?

A Yes, sir, you did.

Q If you had consulted for the City of Houston in 1978, would you have made this comparison as a matter of course?

A Yes, sir.

Q All right. Was the '73 ordinance, Mr. Malarkey, awarded by Houston in certain respects a better deal for the Houston consumers than the '79 ordinance?

A Yes, it was.

Q Did the '73 ordinance require a performance bond?

[*235] A It did.

Q In what amount?

A [**19] \$ 1 million, as I recall.

Q Did the '79 ordinance require a performance bond?

A No, sir.

Q Did the '73 ordinance require free connections for city buildings, schools and colleges?

A Yes, sir, it did.

Q Did the '79 ordinance require such free connections?

A No, sir.

Q Did the '73 ordinance require commencement of construction within 90 days after obtaining all necessary permits, licenses and certificates?

A Yes, it did.

Q Did the '79 ordinance have that type of construction commencement schedule?

A No, sir, it did not.

Q Did the '73 ordinance require that the 3 per cent franchise fee be paid to the city based upon all revenues, including revenues from the sale or rental of converters?

A It required payment on all revenues.

Q Did the '79 ordinance require payment on all revenues?

A No, sir, it did not.

Record on Appeal, vol. 34, at 27-28.

PER SE RULE

HN1  [Section 1](#) of the Sherman Act proscribes "every contract, combination . . . or conspiracy in restraint of trade or commerce. . ." As the myriad of cases which interpret those words make clear, it is not *every* agreement in restraint of competition that **[**20]** is prohibited since almost every contract has that effect to some extent. In fact, most agreements are analyzed under the rule of reason.¹² This rule obliges a court to consider whether the particular agreement places an unreasonable restraint on competition.

¹² In [Chicago Board of Trade v. United States, 246 U.S. 231, 38 S. Ct. 242, 62 L. Ed. 683 \(1918\)](#), Justice Brandeis set forth the following classic statement of the rule of reason:

HN2  The true test of legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition. To determine that question the court must ordinarily consider the facts peculiar to the business to which the restraint is applied; its condition before and after the restraint was imposed; the nature of the restraint and its effect, actual or probable. The history of the restraint, the evil believed to exist, the reason for adopting the particular remedy, the purpose or end sought to be attained, are all

[**21] However, as the Supreme Court declared very recently in [Arizona v. Maricopa County Medical Society, 457 U.S. 332, 102 S. Ct. 2466, 73 L. Ed. 2d 48 \(1982\)](#),

the elaborate inquiry into the reasonableness of a challenged business practice entails significant costs. Litigation of the effect or purpose of a practice often is extensive and complex. [Northern Pac. R. Co. v. United States, 356 U.S. 1, 5 \[78 S. Ct. 514, 518, 2 L. Ed. 2d 545\] \(1958\)](#). Judges often lack the expert understanding of industrial market structures and behavior to determine with any confidence a practice's effect on competition. [United States v. Topco Associates, Inc., 405 U.S. 596, 609-610 \[92 S. Ct. 1126, 1134-1135, 31 L. Ed. 2d 515\] \(1972\)](#). And the result of the process in any given case may provide little certainty or guidance about the legality of a practice in another context.

[Id. at 609, n. 10 \[92 S. Ct. at 1134, n. 10\]; Northern Pac. R. Co. v. United States, supra \[356 U.S.\] at 5 \[78 S. Ct. at 518\]](#).

The costs of judging business practices under the rule of reason, however, have been reduced by the recognition of *per se* rules. Once experience with a particular [**22] kind of restraint enables the Court to predict with confidence that the rule of reason will condemn it, it has applied a [*236] conclusive presumption that the restraint is unreasonable. As in every rule of general application, the match between the presumed and the actual is imperfect. For the sake of business certainty and litigation efficiency, we have tolerated the invalidation of some agreements that a fullblown inquiry might have proved to be reasonable.

[102 S. Ct. at 2472-73](#) (footnotes omitted).

A limited number of practices have been condemned by *per se* rules.¹³ The Supreme Court, in [United States v. Topco Associates, Inc., 405 U.S. 596, 92 S. Ct. 1126, 31 L. Ed. 2d 515 \(1972\)](#), declared that "one of the classic examples of a *per se* violation of § 1 is an agreement between competitors at the same level of the market structure to allocate territories in order to minimize competition." [405 U.S. at 608, 92 S. Ct. at 1133](#). Such agreements have been classified as naked restraints of trade. A long line of cases stretching back to the nineteenth century has condemned market division. E.g., [Addyston Pipe & Steel Co. v. United States, 175 U.S. 211, 20 \[**23\] S. Ct. 96, 44 L. Ed. 136 \(1899\)](#); [Timken Roller Bearing Co. v. United States, 341 U.S. 593, 71 S. Ct. 971, 95 L. Ed. 1199 \(1951\)](#); [United States v. Sealy, Inc., 388 U.S. 350, 87 S. Ct. 1847, 18 L. Ed. 2d 1238 \(1967\)](#); [Gainesville Utilities Department v. Florida Power and Light Co., 573 F.2d 292 \(5th Cir.\), cert. denied, 439 U.S. 966, 99 S. Ct. 454, 58 L. Ed. 2d 424 \(1978\)](#).

Defendants argue vigorously against a *per se* analysis in the instant case. They concede that horizontal market division is a *per se* violation of [section 1](#). The boundary agreements in this case, however, had no effect until they received the City Council's stamp of approval. This vertical characteristic, defendants assert, [**24] must take this case outside the *per se* rule.¹⁴

relevant facts. This is not because a good intention will save an otherwise objectionable regulation or the reverse; but because knowledge of intent may help the court to interpret facts and to predict consequences.

[246 U.S. at 238, 38 S. Ct. at 244](#).

¹³ "Among the practices which the courts have heretofore deemed to be unlawful in and of themselves are price fixing, division of markets, group boycotts, and tying arrangements." [Northern Pac. R. Co. v. United States, 356 U.S. 1, 5, 78 S. Ct. 514, 518, 2 L. Ed. 2d 545 \(1958\)](#) (citations omitted).

¹⁴ Defendant Gulf Coast also asserts that a *per se* analysis is inappropriate "in this 'market' for franchises where nothing is being bought or sold in the normal sense. . . ." Defendant's Brief at 26-27. In response, plaintiff notes that one of the oldest, most frequently cited cases involving territorial market division dealt with a similar practice. See [Addyston Pipe & Steel Co. v. United States, 175 U.S. 211 \[20 S. Ct. 96, 44 L. Ed. 136\]](#) where the Court condemned an agreement between pipe manufacturers to divide territories and apportion the business among themselves. We reject defendant's proffered distinction.

It is true that this Court has applied the rule of reason to cases involving vertical territorial restrictions. [Joe Mendelovitz v. Adolph Coors Co., 693 F.2d 570 \(1982\)](#). Vertical territorial restrictions cannot be condemned with the certainty of their horizontal counterparts. As the Supreme Court recognized in *Continental T.V.*, [**25] [Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 97 S. Ct. 2549, 53 L. Ed. 2d 568 \(1977\)](#),

the market impact of vertical restrictions is complex because of their potential for a simultaneous reduction of intrabrand competition and stimulation of interbrand competition.

[433 U.S. at 51, 97 S. Ct. at 2558](#) (footnotes omitted).

There is no question here, as there is in a vertical territorial restraint case, of a stimulation of competition. The agreement between the conspirators to "cut the pie" served only to eliminate competition from other applicants such as Affiliated. As Mr. Justice Hughes recognized in [Appalachian Coals, Inc. v. United States, 288 U.S. 344, 53 S. Ct. 471, 77 L. Ed. 825 \(1933\)](#), "Realities must dominate the judgment. . . . The Anti-Trust Act aims at substance." [288 U.S. at 360, 53 S. Ct. at 474](#), quoted in [Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. at 47, 97 S. Ct. at 2556](#). The conspiracy charged in this case is the classic horizontal territorial restraint for which the *per se* rule was designed. The fact that the Mayor and City Council were involved is of no moment except as it relates to the immunity questions with which we must [**26] now deal.

Although the district court grounded its grant of judgment on the lack of causation [**27] evidence, the court went on to consider the applicability of the immunity/exemption doctrines which could have precluded liability even if an antitrust violation had been established. The lower court rejected the applicability of these doctrines, and we adopt that portion of the district court's opinion. [Affiliated Capital Corp. v. City of Houston, 519 F. Supp. at 1012-1029](#).¹⁵

Mayor McConn argues strenuously that a recent Supreme Court decision, [Harlow v. Fitzgerald, 457 U.S. 800, 102 S. Ct. 2727, 73 L. Ed. 2d 396 \(1982\)](#), guarantees his immunity from liability. That case announced that qualified or "good faith" immunity for public officials would be judged solely by an objective inquiry. The Court found that the subjective inquiry had proven unworkable:

The subjective element [**27] of the good faith defense frequently has proved incompatible with our admonition in *Butz* that insubstantial claims should not proceed to trial. [Rule 56 of the Federal Rules of Civil Procedure](#) provides that disputed questions of fact ordinarily may not be decided on motions for summary judgment. And an official's subjective good faith has been considered to be a question of fact that some courts have regarded as inherently requiring resolution by a jury.

In the context of *Butz*'s attempted balancing of competing values, it now is clear that substantial costs attend the litigation of the subjective good faith of government officials. Not only are there the general costs of subjecting officials to the risks of trial-distraction of officials from their governmental duties, inhibition of discretionary action, and deterrence of able people from public service. There are special costs to "subjective" inquiries of this kind. Immunity generally is available only to officials performing discretionary functions. In contrast with the thought processes accompanying "ministerial" tasks, the judgments surrounding discretionary action almost inevitably are influenced by the decisionmaker's [**28] experiences, values, and emotions. These variables explain in part why questions of subjective intent so rarely can be decided by summary judgment. Yet they also frame a background in which there often is no clear end to the relevant evidence. Judicial inquiry into subjective motivation therefore may entail broadranging discovery and the deposing of numerous persons, including an official's professional colleagues. Inquiries of this kind can be peculiarly disruptive of effective government.

[102 S. Ct. at 2737-38](#) (footnotes omitted).

The Court held that

¹⁵ We note that the city of Houston was dismissed as a party to this action, with the concurrence of plaintiff.

government officials performing discretionary functions generally are shielded from liability for civil damages insofar as their conduct does not violate clearly established statutory or constitutional rights of which a reasonable person would have known.

102 S. Ct. at 2738.

McConn contends that the state of the law regarding a municipal official's liability for antitrust violations was unsettled in 1978. Since he could not have known that he would be liable for violating the antitrust law, the argument continues, he is entitled to qualified immunity. This argument is based upon a misinterpretation of [**29] the Supreme Court's statement. HN3[[↑]] It is not relevant whether the official knows he can be held liable for a particular violation of the antitrust law, only whether a clearly established violation exists. As stated throughout this opinion, HN4[[↑]] territorial market division has long been recognized as a violation of the antitrust law. McConn cannot escape liability on this basis.

CONCLUSION

For the reasons set forth, we conclude that the territorial market division charged is a *per se* violation of section 1 of the Sherman Act. The boundary agreements [*238] certainly prevented plaintiff from securing a cable television franchise. We are constrained, therefore, to reverse the judgment of the court below and reinstate the jury's verdict of \$ 2,100,000 in damages.

REVERSED.

Dissent by: CLARK

Dissent

CLARK, Chief Judge, dissenting:

I respectfully dissent.

The majority presumes that cable television franchises are natural monopolies. Based on this assumption, it further presumes that competition is only possible before a franchise is granted. On these two presumptions, the court then erects a third--that the rule of reason would so certainly condemn an agreement to divide areas of cable [**30] television service in a single city that, for sake of efficiency, the agreement must be ruled invalid *per se*. These presumptions are not just unwarranted, they are contrary to proof in this record about the particular business of cable television franchising in Houston, Texas.

This case does not concern price fixing. Nor does it present a case of a group boycott, tying arrangement or a horizontal division of markets (though each of these categories has not invariably been held to be a naked restraint of trade). No applicant proposed to serve the whole city of Houston. The Council would not have accepted such an application. Therefore, the relevant geographic market for potential franchisees here is not the city of Houston, but some part or area thereof. No absolute *per se* category is presented. Absent the majority's presumptions, there is no way for me to predict with confidence that the rule of reason will condemn the present boundary agreements between franchise applicants which this jury found reasonable. Thus, I cannot say that the conduct of the applicants for franchises in this case is manifestly anticompetitive.

Under the district court's instructions, the jury [**31] was asked: Was the agreement of defendant, Gulf Coast, with other companies to allocate cable television franchise territories part of a conspiracy which constituted an unreasonable restraint of trade? The jury said no. The trial court who heard the witnesses and took the evidence found this answer was supported by the record. The majority does not controvert this. Rather, it acknowledges that the political history of cable television in Houston shows Houston voters rejected a single "monopoly" cable

television franchising effort in 1972, and that the mayor's anxiety to avoid a similar situation in 1978 led to the city's demand for multiple franchises. Every applicant, including plaintiff, accepted this requirement.

Instead of analyzing the impact of these facts, the majority chooses to rely only on the theoretical testimony of the plaintiff's aptly named expert to create a series of presumptions. From other proof, a reasonable jury could have found the mayor's political concern, and a concomitant refusal by the Council to get into actually drawing boundary lines, dominated the actions of the applicants and produced a reasonable boundary agreement. Also, the jury could have [**32] found from the proof that a reasonable way to secure multiple franchises was to tell all prospective franchisees that applicants must define individual service areas without gaps and without overlaps.

There is no showing that plaintiff or any other potential applicant was limited as to formation of its own group of bidders. All those who wanted franchises were faced with the city's ukases that no single citywide franchise would be granted and that the Council would not draw lines. There was an opportunity for competition in the pre-award area, even for those who started as late as plaintiff. They could have become members of a new group of bidders or tried to attract members of the existing group to go with them. Moreover, the proof shows the city could reject any part or all of any area sought when the matter came before the Council for approval. No testimony suggested that plaintiff did not have an opportunity to urge the city to require changed boundaries to make room for its tardy entry. Indeed, it did so and a request for accommodation was made. Thus, the mere fact that Gulf Coast refused Goldberg's [*239] demand that it give up a substantial part of the area the [**33] agreement allowed it to request was not enough to require the jury to find the boundary agreement kept plaintiff from competing.

There is another pro-competitive aspect of the proof that even more clearly argues against the imposition of a *per se* rule to this particular territorial agreement. The statements of plaintiff's president, Billy Goldberg, to the city Council told the jury how competition would work between franchised areas *after* they were awarded.

"In determining the geographical breakdown of cable TV franchise areas it is my judgment that this Council is wise awarding multiple franchises throughout the city. I will say a little bit more on that at a later time.

"Conceptually, the notion of a smaller, more responsive franchise is likely to be substantially more acceptable to this community. Careful thoughts should be given to the proposition that no one applicant should receive more area to serve than could be constructed and energized within a reasonable period of time.

....

"It seems to me that . . . our application for this area is more in keeping with the wishes of the people of this community previously expressed, where they indicated to me, [**34] and I think to everyone, the desire not to have the vast territories of our city under one operation, and there's a reason for it. There's a reason of competition.

". . . Let me tell you where the competition comes in.

"If this Council does as I think it will do, divide this city up into as small portions as possible, you will have various cable companies throughout the city, and everybody in the city knows what the other fellow is doing. He's either got a friend or a relative over there, and they will be saying, 'Well, why is it, Mr. Goldberg, that your system and Affiliated's system doesn't have so-and-so, and if you go to the other part of town they have that service, ' and that's where the area of competition comes in, and I think it's healthy."

Franchise areas, levels of service, and fees were not immutable. If a franchisee's level of performance did not keep pace with neighboring cable companies, all sorts of post-franchise problems could occur, up to and including another referendum to undo everything.

I do not understand how an appellate court can erect the majority's pyramid of presumptions based on one expert's opinion, contradicted by his own employer, and [**35] allow it to overcome a factfinding by a jury that finds support in the record.

Because I believe that the jury validly found that the agreement to submit nonoverlapping bids met the rule of reason, I am further compelled to agree with the district court that the finding that any later conspiracy to refuse plaintiff's request to participate in the agreement could not have caused plaintiff harm. The interrogatories on separate conspiracies were put separately at plaintiff's insistence to accord with its theory that separate

conspiracies were proven. What turns out to have been a tactical mistake should not be allowed to bootstrap to credibility a verdict that the proof establishes was unwarranted. This is especially true where the appellate device for the levitation is supplied by unsupported presumptions of wrongdoing.

The proof tells me, just as it told the jury, that those who wanted to seek a cable television franchise in Houston in 1978 knew the only way to get one was to agree with others on boundaries for multiple service areas that would cover the city without overlaps. The jury found that after the group had validly made these agreements, plaintiff sought to have the group [**36] redo its plans and was improperly rebuffed. The district court reasoned that the failure to get a franchise was solely the result of the valid agreement, not the invalid rebuff. So do I.

At a time when the clear trend in **antitrust law** is away from the use of the "expedient" *per se* rule, except for pricefixing, and toward proving the truth of [*240] particular transactions, it seems altogether wrong to rely on speculative malarkey to assume that a conspiracy to restrain trade existed.

I would affirm the district court.¹

[**37]

End of Document

¹ As an aside, and because the majority's holding required that it address the *Noerr-Pennington* doctrine, I would briefly point out that the district court's analysis of this issue (the only analysis on which the majority relies) necessarily depends on a fact determination that the city and mayor participated in a conspiracy to unreasonably restrain trade by requiring defendants to agree on territorial boundaries. In adopting this reasoning, the majority overlooks the same basic premise missed by the district court. This judicial fact-finding is antithetical to the district court's determination that adequate proof supported the jury's finding to the contrary. That the decision-makers may have been members of a later conspiracy to refuse to change boundary lines does not affect their administrative position vis-a-vis the initial agreement.

Opinion by: PHILLIPS

Opinion

[*127] PHILLIPS, Circuit Judge:

This interlocutory appeal has been certified, pursuant to *28 U.S.C. § 1292(b)*, on the question whether the state attorneys general of Maryland, Delaware, and Pennsylvania, and the Corporation Counsel of the District of

Columbia, may maintain statutory *parens patriae* damage actions [**2] under the Hart-Scott-Rodino Antitrust Improvements Act of 1976, [15 U.S.C. §§ 15c-15h \(1976\)](#) (the Act), in the names of their respective jurisdictions on behalf of their natural-person residents injured by an alleged price-fixing conspiracy in violation of the Sherman Act, [15 U.S.C. § 1](#). While departing somewhat from the reasoning of the district court, we affirm its ruling that the state attorneys general¹ involved here may prosecute these statutory *parens patriae* actions under the antitrust laws.

I

Between December 1980 and August 1981, the states of Maryland, Delaware, Pennsylvania, Virginia, and West Virginia, and the District of Columbia, instituted civil antitrust [**3] actions in federal district courts in their respective jurisdictions against Toyota automobile dealers and distributors in the middle-Atlantic region. These actions, brought pursuant to the Antitrust Improvements Act of 1976, [15 U.S.C. §§ 15c-15h](#), have been consolidated along with two private actions in the District of Maryland by the Judicial Panel on Multidistrict Litigation. The state attorneys general, acting in their statutory *parens patriae* capacity, seek damages on behalf of their natural-person residents injured by an alleged conspiracy to fix the prices of Toyotas.²

Defendants moved to dismiss the states' actions, alleging *inter alia* that the attorneys general lack authority to bring *parens patriae* damage actions under the federal antitrust laws.³ The district [**4] court denied the motion to dismiss, ruling (1) that the state attorneys general were authorized by federal law, irrespective of local law, to maintain these actions, or alternatively (2) that state law provided the attorneys general with authority independent of federal law to bring these actions. Following certification by the district court under [28 U.S.C. § 1292\(b\)](#), we granted defendants' petition to appeal from this interlocutory order.

[**5] II

HN1[] The Antitrust Improvements Act provides that an "attorney general of a State may bring a civil action in the name of such State, as *parens patriae* on behalf of natural persons residing in such State," to secure treble money damages for injury to their property flowing from violations of the antitrust laws.⁴ [15 U.S.C. § 15c\(a\)\(1\)](#). See generally Scher, *Emerging Issues Under the Antitrust Improvements Act of 1976*, 77 Colum. L. Rev. 679 (1977). While the structure of this statutory scheme -- whether it deals essentially with notions of cause of action, right of action, party [*128] capacity, real party in interest, representative action, or other concepts -- may not be the clearest, its essence is plain enough.

It creates in the states a new right of action under existing substantive federal *antitrust law*. [**6] See [Reiter v. Sonotone Corp.](#), [442 U.S. 330, 344 n.7, 60 L. Ed. 2d 931, 99 S. Ct. 2326 \(1979\)](#) ("the statute authorizes the states to assert [consumers' causes of action] in a *parens patriae* capacity"); [Illinois v. Sangamo Construction Co.](#), [657 F.2d 855, 859 \(7th Cir. 1981\)](#); S. Rep. No. 803, 94th Cong., 2d Sess. 42 (1976) (the Act "creates a new statutory

¹ Unless otherwise indicated, references to "attorneys general" will include the Corporation Counsel of the District of Columbia, who for all relevant purposes is classified under the statutory scheme as a state attorney general. See [15 U.S.C. § 15\(g\)](#). Similarly, references to "states" will include the District of Columbia.

² In addition, each state seeks injunctive relief under [15 U.S.C. § 26](#), Pennsylvania alleges a tie-in violation under [15 U.S.C. §§ 1 & 14](#), and Maryland and Delaware assert pendent claims under their state antitrust statutes.

³ On appeal, defendants challenge the authority of only four of the six attorneys general involved in this consolidated litigation. No challenge was made to the authority of the West Virginia Attorney General to bring a *parens patriae* action, apparently because the West Virginia legislature has vested the attorney general with explicit power to sue under the federal antitrust laws, see [W. Va. Code § 47-18-17\(a\)](#) (1980). Furthermore, no challenge is raised here to the *parens patriae* authority of the Virginia Attorney General; the Virginia case was not transferred to the District of Maryland until after the district court issued an appropriate certification under [28 U.S.C. § 1292\(b\)](#).

⁴ **HN2**[] "The term 'State attorney general' means the chief legal officer of a State, or any other person authorized by State law to bring actions under [section 15c. . .](#)." [15 U.S.C. § 15g\(1\)](#).

704 F.2d 125, *128L^A 1983 U.S. App. LEXIS 29414, **6

cause of action for States"). Because it involves no change in the substantive basis for antitrust liability, it is purely procedural⁵ in its effect. *Illinois Brick Co. v. Illinois*, 431 U.S. 720, 734 n.14, 52 L. Ed. 2d 707, 97 S. Ct. 2061 (1977); *In re Montgomery County Real Estate Antitrust Litigation*, 452 F. Supp. 54, 60-61 (D. Md. 1978); Scher, *supra*, at 721-25. **HN3**[⁶] Emphasizing its wholly procedural cast, the Act specifically recognizes the power of the states to forego any benefit of the Act by legislatively renouncing the right of action conferred. See [15 U.S.C. § 15h](#). And, in a final procedural twist, the Act recognizes the "authority" of state attorneys general -- so far as federal interests are concerned -- to prosecute the actions in the name of the state.⁶ See [15 U.S.C. § 15c\(a\)\(1\)](#). [**7]

As the legislative history makes apparent, see H.R. Rep. No. 499, 94th Cong., 2d Sess. 6-8, *reprinted in* 1976 U.S. Code Cong. & Ad. News 2572, 2575-78; S. Rep. No. 803, *supra, at 42*, the Act was aimed primarily at enlarging the potential for consumer recovery for antitrust violations by effectively bypassing the burdensome requirements of *Rule 23, Fed. R. I**81 Civ. P.* 23, that might tend to dissuade private litigants from pursuing conventional consumer class actions for antitrust injury, see Scher, *supra*, at 707-12; Comment, *Parens Patriae Antitrust Actions for Treble Damages*, 14 Harv. J. Legis. 328, 336-37, 341-43 (1977). Therefore, the Act is best understood as constituting the states, acting through their attorneys general, as "consumer advocates in the [antitrust] enforcement process." H.R. Rep. No. 499, *supra*, at 8. See *In re Grand Jury Investigation of Cuisinarts, Inc.*, 665 F.2d 24, 35 (2d Cir. 1981), *cert. denied*, 460 U.S. 1068, 103 S. Ct. 1520, 75 L. Ed. 2d 945 (1982).

III

Defendants do not appear seriously to challenge the essential accuracy of this analysis of the structure and purpose of the statutory scheme. They attack instead the district court's conclusions (1) that the "authority" conferred by the Act upon state attorneys general empowers them to sue on this federally created right of action irrespective of state law limitations on their power, and (2) that, in any event, the law of each state involved supplies, or does not limit, the power of these attorneys general to maintain the right of [**9] action contemplated by the Act.

As to (1), defendants contend that, because Congress obviously lacks power to override state law definitions of the duties and authority of state officers, the Act must be interpreted as not intending to confer any federal authority at odds with state limitations. This accepted, the argument runs, none of the jurisdictions involved vests its attorney general with authority to prosecute the right of action created by the Act, so that the suits must be dismissed.

We do not think it necessary to address the validity of the district court's [*129] determination that, irrespective of state law, the authority of state attorneys general to prosecute these actions is properly conferred by the federal Act. Accepting, *arguendo*, defendants' postulate that Congress could not have intended to redefine or expand the state-defined offices of these attorneys general, we hold that each of these state attorneys general derives power from his respective state law framework to prosecute this federal right of action.

Defendants' contention that the state laws involved here do not provide for, or proscribe, suit by these attorneys general on the federal right [**10] of action has two prongs. First, they argue that such power cannot be traced to any common law authority⁷ [**11] to bring *parens patriae* actions, because the right of action defined by the Act,

⁵ Though the new procedural right does involve a remedial expansion in the form of a "civil penalty" recoverable by the state itself. See [15 U.S.C. § 15e\(2\)](#).

⁶ The state attorney general thus might be viewed as suing on the state's cause of action *ex relatione*, in a "legal proceeding . . . instituted by the attorney general . . . in the name and behalf of the state, but on the information and at the instigation of an individual." Black's Law Dictionary 522-23 (5th ed. 1979). Although obviously not dispositive, we note that each of the consolidated actions at issue here has been styled as "State" *ex rel.* "Attorney General."

⁷ The plaintiff-attorneys general here involved, like those in a vast majority of jurisdictions, possess common law powers and duties in addition to those defined expressly by statutory or constitutional provision. See *Commonwealth v. Schab*, 477 Pa. 55, 383 A.2d 819 (1978) (Pennsylvania); *Murphy v. Yates*, 276 Md. 475, 348 A.2d 837 (1975) (Maryland); *Darling Apartment Co. v. Springer*, 25 Del. Ch. 420, 22 A.2d 397 (Del. Ch. 1941) (Delaware); cf. *Mead v. Phillips*, 77 U.S. App. D.C. 365, 135 F.2d 819,

though so denominated, expands common law *parens patriae* principles.⁸ This accepted, they contend, power to sue on the federal right of action can derive only from the statutes or constitutions of the several states. These, defendants say, limit the attorneys general to prosecuting actions that vindicate quasi-sovereign or proprietary state interests.

[**12] We disagree. The state laws and constitutions do not confine the authority of the states attorneys general to the prosecution of common law *parens patriae* actions and actions to vindicate quasi-sovereign state interests. Instead, they fully authorize [*130] prosecution of the statutory right of action here in issue,⁹ which concededly is of neither type. See *supra* note 8.

[**13] To show why requires analysis of the relevant state provisions. See *Wallis v. Pan American Petroleum Corp.*, 384 U.S. 63, 68-69, 16 L. Ed. 2d 369, 86 S. Ct. 1301 (1966); *United States v. Yazell*, 382 U.S. 341, 352-57, 15 L. Ed. 2d 404, 86 S. Ct. 500 (1966). Cf. *Florida ex rel. Shevin v. Exxon Corp.*, 526 F.2d 266, 267 n.2 (5th Cir.) (state law controls question of attorney general's authority to bring federal antitrust action), cert. denied, 429 U.S. 829, 97 S. Ct. 88, 50 L. Ed. 2d 92 (1976); accord, *Ohio v. United Transportation, Inc.*, 506 F. Supp. 1278, 1281 (S.D. Ohio 1981).

824 (D.C. Cir. 1943) (common law an important and substantial part of the law of the District of Columbia). See generally Shepperd, *Common Law Powers and Duties of the Attorney General*, 7 Baylor L. Rev. 1, 1-3 (1955). None of the four jurisdictions involved in this appeal explicitly forbids its attorney general to maintain these actions, and "in the absence of express statutory or constitutional restrictions, the common law duties and powers attach themselves to the office as far as they are applicable and in harmony with our system of government." *State ex rel. Derryberry v. Kerr-McGee Corp.*, 516 P.2d 813, 818-19 (Okla. 1974) (citing cases); see also *D'Amico v. Board of Medical Examiners*, 11 Cal. 3d 1, 112 Cal. Rptr. 786, 520 P.2d 10, 20 (1974); *Lund ex rel. Wilbur v. Pratt*, 308 A.2d 554, 558 (Me. 1973).

⁸ We agree that the statutory right of action is more expansive. In strict contemplation, common law *parens patriae* actions only involved the state in two capacities: as "the general guardian of all infants, idiots, and lunatics" and supervisor of "all charitable uses in the kingdom," 3 W. Blackstone, *Commentaries* *47; and as the watchdog of its "quasi-sovereign" interests. See *Hawaii v. Standard Oil Co.*, 405 U.S. 251, 257-58, 31 L. Ed. 2d 184, 92 S. Ct. 885 (1972); *West Virginia v. Chas. Pfizer & Co.*, 440 F.2d 1079, 1089 (2d Cir.), cert. denied, 404 U.S. 871, 92 S. Ct. 81, 30 L. Ed. 2d 115 (1971). See generally Curtis, *The Checkered Career of Parens Patriae: The State as Parent or Tyrant*, 25 DePaul L. Rev. 895 (1976). Neither capacity embraces actions such as those here in issue where the state sues on behalf of injured natural residents. The putatively injured consumers do not suffer from any legal disability; indeed, the statute presumes in them existing individual rights of action, see *Illinois Brick Co. v. Illinois*, 431 U.S. 720, 734 n.14, 52 L. Ed. 2d 707, 97 S. Ct. 2061 (1977). Furthermore, "no state has a legitimate quasi-sovereign interest in seeing that consumers or any other group of persons receive a given sum of money." Malina & Blechman, *Parens Patriae Suits for Treble Damages Under the Antitrust Laws*, 65 Nw. L. Rev. 193, 214 (1970). In Justice Holmes' classic formulation, there cannot be a state quasi-sovereign interest "independent of and behind the titles of its citizens," *Georgia v. Tennessee Copper Co.*, 206 U.S. 230, 237, 51 L. Ed. 1038, 27 S. Ct. 618 (1907), when by definition the statute empowers the state to enforce the rights of injured citizens. See *Pfizer, Inc. v. Lord*, 522 F.2d 612, 616-18 (8th Cir. 1975), cert. denied sub nom. *Imperial Government of Iran v. Pfizer, Inc.*, 424 U.S. 950, 96 S. Ct. 1422, 47 L. Ed. 2d 356 (1976); *California v. Frito-Lay, Inc.*, 474 F.2d 774, 775-77 (9th Cir.), cert. denied, 412 U.S. 908, 36 L. Ed. 2d 974, 93 S. Ct. 2291 (1973); *Philadelphia Housing Authority v. American Radiator & Standard Sanitary Corp.*, 309 F. Supp. 1057, 1062-63 (E.D. Pa. 1969); *Land O'Lakes Creameries, Inc. v. Louisiana State Board of Health*, 160 F. Supp. 387, 388-89 (E.D. La. 1958).

But, as our discussion in text indicates, the fact that the statutory "*parens patriae*" action is broader in scope than the common law action is not dispositive of the issue raised by defendants.

⁹ It is important to distinguish Congress' assumed lack of power (or intention) to expand the authority of state attorneys general from its obvious power to create a right of action which would be available to a state attorney general acting fully within the scope of predefined powers. On oral argument, counsel for defendants blurred this distinction by urging that Congress had necessarily expanded the powers of state attorneys general because a "*parens patriae*" action seeking damages on behalf of individual consumers could not have been maintained prior to passage of the Antitrust Improvements Act. See *California v. Frito-Lay, Inc.*, 474 F.2d 774 (9th Cir.), cert. denied, 412 U.S. 908, 36 L. Ed. 2d 974, 93 S. Ct. 2291 (1973). But it is entirely possible that a state attorney general could be acting within the limits of state-defined power while prosecuting a new federal right of action.

While the statutory and constitutional definitions of the powers of the several plaintiff-attorneys general differ significantly, a common thread runs throughout. The Maryland Constitution provides that the Attorney General shall [HN4](#) "commence, and prosecute . . . any civil . . . action . . . on the part of the State or in which the State may be interested," [Md. Const. art. V, § 3\(a\)\(2\)](#); ¹⁰ [HN5](#) the Delaware Antitrust Act empowers the Attorney General to institute proceedings "on behalf of the State and its public bodies; for suspected antitrust violations, [Del. Code Ann. tit. 6, § 2105](#) (Supp. [**14] 1980); District of Columbia law provides that the Corporation Counsel shall [HN6](#) "have charge and conduct of all law business" of the District, D.C. Code Ann. § 1-361 (1981); and Pennsylvania's Commonwealth Attorneys Act specifies that the Attorney General [HN7](#) "shall represent the Commonwealth and its citizens in any action brought for violation of the antitrust laws," 71 Pa. Cons. Stat. Ann. § 732-204(c) (Purdon Supp. 1982).

While the language differs, each provision allocates to the attorney general power and authority to represent the jurisdiction and its interests in litigation. In at least two ways, we find the present actions to fall clearly within the ambit of each [**15] of the attorneys general's state-derived authority.¹¹

A

First, these attorneys general have brought suits in the names of their respective states to enforce causes of action created by federal law. Whether the state is a real party in interest or merely a representative party, this cause of action exists in favor of the state. See *New Mexico v. Scott & Fetzer* [**16] Co., 1981-2 Trade Cas. (CCH) para. 64,439, at 75,149 (D.N.M. Dec. 22, 1981). Because the attorneys general are suing to enforce their jurisdictions' causes of action, these lawsuits indeed are "on the part of" Maryland, on "on behalf of" Delaware, and representative of the Commonwealth [*131] of Pennsylvania and the "law business" of the District of Columbia.¹² Cf. [Oklahoma ex rel. Johnson v. Cook](#), 304 U.S. 387, 390-91, 82 L. Ed. 1416, 58 S. Ct. 954 (1938) ("Since the state is the proper party plaintiff by virtue of the . . . statute, it may maintain the action regardless of whether it is the real party in interest or merely a nominal plaintiff for the use and benefit of [affected citizens].") (quoting [State ex rel. Murray v. Pure Oil Co.](#), 169 Okl. 507, 509, 37 P.2d 608, 610 (1934)); [State ex rel. Norvell v. Credit Bureau of Albuquerque, Inc.](#), 85 N.M. 521, 524, 514 P.2d 40, 43 (1973) (in suit brought *ex relatione* in the name of the state by the attorney general, the state is the proper party litigant and the attorney general is the attorney for the state).

[**17] B

In addition to their authority to sue to enforce their jurisdictions' statutory causes of action, these [HN9](#) attorneys general have undoubted authority to pursue litigation that advances or vindicates public interests. See [Brown v. Stanton](#), 617 F.2d 1224, 1232 n.14 (7th Cir. 1980) ("In general, a state Attorney General may institute such suits as he deems necessary for . . . the protection of public rights."), vacated and remanded on other grounds, 453 U.S. 917, 101 S. Ct. 3151, 69 L. Ed. 2d 999 (1981). See, e.g., [Md. Const. art. V, § 3\(a\)\(2\)](#) (Attorney General may bring any civil action "in which the state may be interested"); [Darling Apartment Co. v. Springer](#), 25 Del. Ch. 420, 22 A.2d 397, 403 (Del. Ch. 1941) (Attorney General may represent the State "in all litigation where the public interests are

¹⁰ [HN8](#) The Maryland Constitution requires as well that either the General Assembly or the Governor authorize the Attorney General to prosecute an action on the part of the State. See [Md. Const. art. V, § 3\(a\)\(2\)](#). As the parties concede, the Maryland Attorney General has received authorization from the Governor to maintain this cause of action.

¹¹ Our resolution avoids a substantial separation-of-powers question that would be presented by a judicial determination that a state attorney general has exceeded the broad scope of legislatively and constitutionally delegated authority. Cf. [Nader v. Kleindienst](#), 375 F. Supp. 1138, 1141-42 (D.D.C. 1973) (discussing separation-of-powers issue presented by judicial review of prosecutor's discretion to refuse to prosecute); [Secretary of Administration v. Attorney General](#), 367 Mass. 154, 326 N.E.2d 334, 339 (1975) (suggesting that recourse to the political arena must serve as the ultimate check on the powers of a state attorney general).

¹² We do not mean to suggest, as the district court seemingly did, that any action brought by the attorney general and captioned in the name of the state *ipso facto* falls within the scope of an attorney general's functions. Here, however, we do not rely on the styling of the complaint, but look rather to whether there exists an underlying federal right of action in the name of the state.

concerned"); cf. *District of Columbia v. Pryor*, 366 A.2d 141 (D.C. 1976) (Corporation Counsel may represent a private party in a civil commitment proceeding when proper or necessary, in the judgment of the executive). Indeed, the notion that these attorneys general may institute actions to remedy invasions of the public interest appears implicit in the statutory [**18] and constitutional schemes defining their powers.¹³

[**19] As Congress fully recognized in enacting the Antitrust Improvements Act, see H.R. [*132] Rep. No. 499, 94th Cong., 2d Sess. 6-8, reprinted in 1976 U.S. Code Cong. & Ad. News 2572, 2575-78; S. Rep. No. 803, 94th Cong., 2d Sess. 39-40 (1976), this statutory cause of action promotes enforcement of the federal antitrust laws, which promotes at the same time a state's public interest in protecting its citizens from violations of these laws,¹⁴ see *New Mexico v. Scott & Fetzer Co.*, 1981-2 Trade Cas. (CCH) para. 69,439, at 75,149 (D.N.M. Dec. 22, 1981); *Clark Oil & Refining Corp. v. Ashcroft*, 639 S.W.2d 594, 596-97 (Mo. 1982); see also *Iowa v. Scott & Fetzer Co.*, 1982-2 Trade Cas. (CCH) para. 64,873, at 72,359 (S.D. Iowa July 8, 1982). We reject the defendants' contention that a state has an "interest," under the various provisions involved here, only in those suits which vindicate quasi-sovereign or proprietary interests. Undoubtedly, a state can have a legitimate public interest in ensuring the economic well-being of its citizens -- and in indirectly promoting a smoothly functioning economy freed of antitrust violations -- even though the most obvious beneficiaries [**20] may be individual consumers who ultimately recoup money damages.¹⁵ See *Oklahoma ex rel. Johnson v. Cook*, 304 U.S. 387, 391, 82 L. Ed. 1416, 58 S. Ct. 954 (1938); *Hyland v. Kirkman*, 157 N.J. Super. 565, 576, 385 A.2d 284, 289 (N.J. Super. Ct. Ch. Div. 1978).

¹³ A state may well have a "public interest" in maintaining an action without having a "quasi-sovereign" interest sufficient to support original jurisdiction in the Supreme Court or to overcome an *Eleventh Amendment* bar to the recovery of damages. Cf. *Alfred L. Snapp & Son, Inc. v. Puerto Rico ex rel. Barez*, 458 U.S. 592, 102 S. Ct. 3260, 3271, 73 L. Ed. 2d 995 (1982) (Brennan, J., concurring) ("the question whether a State can bring a *parens patriae* action within the original jurisdiction of this Court may well turn on considerations quite different from those implicated where the State seeks to press a *parens patriae* claim in the district courts"). **HN10** The question of whether a state possesses a "quasi-sovereign" interest in an action, vitally important in challenges to a state's standing to sue under the antitrust laws, see, e.g., *Alfred L. Snapp & Son*, or suits seeking to invoke the original jurisdiction of the Supreme Court, see, e.g., *Georgia v. Pennsylvania Railroad Co.*, 324 U.S. 439, 89 L. Ed. 1051, 65 S. Ct. 716 (1945); *Oklahoma v. Atchison, Topeka, & Santa Fe Railway Co.*, 220 U.S. 277, 55 L. Ed. 465, 31 S. Ct. 434 (1911); *New Hampshire v. Louisiana*, 108 U.S. 76, 27 L. Ed. 656, 2 S. Ct. 176 (1883), does not bear on the separate question whether a state has an interest in "present[ing] and enforc[ing] individual claims of its citizens as their trustee." *North Dakota v. Minnesota*, 263 U.S. 365, 376, 68 L. Ed. 342, 44 S. Ct. 138 (1923).

This distinction was recognized in *Oklahoma ex rel. Johnson v. Cook*, 304 U.S. 387, 82 L. Ed. 1416, 58 S. Ct. 954 (1938), where the Supreme Court held that Oklahoma could not invoke the Court's original jurisdiction in an action brought by the state seeking to liquidate the assets of an insolvent bank and repay depositors and creditors. At the same time, however, the Court observed that "the protection of depositors of insolvent state banks is a distinct economic policy of the state" and that "in so far as the object of th[e] action is to further the established economic policy of the state, the state may be said to have a real interest created by its governmental policy, as distinguished from a mere nominal interest, even though the pecuniary benefits of the litigation, if ultimately successful, go to the depositors and creditors of the insolvent bank." *Id. at 391, 58 S. Ct. at 956* (quoting *State ex rel. Murray v. Pure Oil Co.*, 169 Okla. 507, 510, 37 P.2d 608, 610 (1934)).

¹⁴ In this circumstance, where the state seeks recovery of damages on behalf of specific individuals injured by antitrust violations, it is concededly not acting in its "quasi-sovereign" capacity. See *supra* note 8. But see *Massachusetts ex rel. Bellotti v. Russell Stover Candies, Inc.*, 541 F. Supp. 143, 145 (D. Mass. 1982).

¹⁵ Furthermore, many cases have recognized vast discretion in state attorneys general to determine the scope of the public interest, to be disturbed only where the action is "clearly inimical to the people's interest." *Michigan State Chiropractic Association v. Kelley*, 79 Mich. App. 789, 262 N.W.2d 676, 677 (Mich. Ct. App. 1978). See, e.g., *Florida ex rel. Shevin v. Exxon Corp.*, 526 F.2d 266, 268-69 (5th Cir.) (citing cases), cert. denied, 429 U.S. 829, 97 S. Ct. 88, 50 L. Ed. 2d 92 (1976); *Hyland v. Kirkman*, 157 N.J. Super. 565, 576, 385 A.2d 284, 289 (N.J. Super. Ct. Ch. Div. 1978). Cf. *Alfred L. Snapp & Son, Inc. v. Puerto Rico ex rel. Barez*, 458 U.S. 592, 102 S. Ct. 3260, 3271-72, 73 L. Ed. 2d 995 (1982) (Brennan, J., concurring) ("I know of nothing -- except the Constitution or overriding federal law -- that might lead a federal court to superimpose its judgment for that of a State with respect to the substantiality or legitimacy of a State's assertion of sovereign interest.").

[**21] Moreover, in addition to enforcing the public interest in protecting citizens from antitrust injury, damage actions under the Antitrust Improvements Act such as the ones in issue, which allege illegal price-fixing behavior, may result in an award "deemed a civil penalty . . . and deposited with the State as general revenues." [15 U.S.C. § 15e\(2\)](#); see Scher, *supra*, at 727-28. It would seem beyond question that all the jurisdictions involved in this litigation have vested their respective attorneys general with the authority to maintain antitrust actions in the federal courts that could, quite conceivably, result in substantial monetary awards to their state treasuries.

IV

For the foregoing reasons, we hold that the attorneys general of Maryland, Delaware, and Pennsylvania, and the Corporation Counsel of the District of Columbia, properly may maintain these actions under the Antitrust Improvements Act of 1976, [15 U.S.C. §§ 15c-15h](#).

AFFIRMED.

HN1 [down arrow] Regulated Practices, Private Actions

Summary procedures should be used sparingly in complex antitrust litigation where motive and intent play leading roles, the proof is largely in the hands of the alleged conspirators, and hostile witnesses thicken the plot.

HN2 **Summary Judgment, Evidentiary Considerations**

Even in an antitrust action, the party opposing summary judgment may not rest on its pleadings. The adverse party must present sufficient evidence supporting its claims to require a judge or jury to resolve the parties' differing versions of the truth at trial. Although the court should treat antitrust plaintiffs leniently in examining their proofs for issues of fact on a summary judgment motion, those proofs must nonetheless provide some factual basis upon which the conspiracy and intent elements may be reasonably inferred. Once the defendant has adequately rebutted the plaintiff's allegations by establishing legitimate alternative explanations for its conduct which disprove the inferences the plaintiffs seek to draw, then the plaintiffs must come forward with some significant probative evidence tending to support the complaint.

HN5 **Antitrust & Trade Law, Sherman Act**

703 F.2d 942, *942L 1983 U.S. App. LEXIS 29379, **1

Two or more individual officers, directors or agents within a corporation, acting on behalf of that corporation, are considered incapable of conspiring with each other or with their corporation, for purposes of [§ 1](#) of the Sherman Antitrust Act, [15 U.S.C.S. § 1](#). To find liability on this basis would require approval and application of a limited independent personal stake exception to the traditional rule that a corporation cannot conspire with its officers or agents. Under this exception, a conspiracy may be found to exist between a corporation and its employee by virtue of the employer's independent personal stake in achieving the object of the conspiracy.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

[**HN6**](#) **Price Fixing & Restraints of Trade, Exclusive & Reciprocal Dealing**

Not all exclusive dealing contracts even by a monopolist are illegal.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

[**HN7**](#) **Monopolies & Monopolization, Actual Monopolization**

To establish the offense of monopolization a plaintiff must show that a defendant either unfairly attained or maintained monopoly power. Monopoly power consists of the power to control prices or exclude competition.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

[**HN8**](#) **Monopolies & Monopolization, Attempts to Monopolize**

An attempted monopolization occurs when a competitor, with a dangerous probability of success, engages in anti-competitive practices the specific design of which are, to build a monopoly or exclude or destroy competition.

Judges: Lively and Kennedy, Circuit Judges; and Spiegel, * District Judge.

Opinion by: KENNEDY

Opinion

[*945] KENNEDY, Circuit Judge.

Plaintiff physicians appeal the District Court's grant of summary judgment dismissing their claim that the defendants, Northern Michigan Hospitals, Inc., and the Burns Clinic Medical Center, P.C., had violated sections 1 and 2 of the Sherman Antitrust Act.¹ We affirm the summary judgment on appellants' ² section 1 and 2 claims involving conspiracy but reverse and remand appellants' section 2 monopolization and attempted monopolization [*2] claims against the Burns Clinic for further consideration by the District Court.³

On June 1, 1977 the Little Traverse and Lockwood-MacDonald hospitals of Petoskey, Michigan merged to form Northern Michigan Hospitals, Inc. (NMH), one of two defendants in this lawsuit.⁴ The second defendant, Burns Clinic Medical Center, P.C. (Burns Clinic), is a multi-specialty professional corporation of which 90% of the doctors and nearly all of the specialists in Petoskey are members. The plaintiffs are independent physicians formerly on the Lockwood-MacDonald staff who became members of the NMH staff with the merger. All of the plaintiffs, except one, [*3] practice or had practiced family medicine in Petoskey.⁵

After the merger in 1977, the emergency rooms of Little Traverse and Lockwood-MacDonald were consolidated into one [*4] facility at the Little Traverse division of NMH. It is not claimed that the consolidation was undertaken for other than legitimate medical and financial reasons. However, appellants assert that the method of staffing the

* Honorable S. Arthur Spiegel, United States District Court for the Southern District of Ohio, sitting by designation.

¹ *Smith v. Northern Michigan Hospitals, Inc.*, 518 F. Supp. 644 (W.D. Mich. 1981).

² The five plaintiff physicians will be referred to, for convenience, interchangeably as either "plaintiffs" or "appellants."

³ All claims against defendant Northern Michigan Hospitals must be dismissed under our disposition of this case. See text, *infra*, at p. 26.

⁴ One major impetus for this merger was the desire of Little Traverse to expand its facilities. To do so required the approval of the regional Health Systems Agency and the Michigan Department of Public Health. Lockwood-MacDonald at the same time had excess capacity. The Michigan Department of Public Health approved a scaled down version of Little Traverse expansion conditioned on the merger taking place.

⁵ Three of the five plaintiff physicians left the Petoskey area subsequent to the merger of the two former hospitals. Dr. DePuydt left Petoskey on June 1, 1979, and Dr. Foster moved to Indiana in August of that same year. Dr. Taylor moved his practice to Cheboygan, Michigan on October 17, 1977, prior to any of the allegedly anti-competitive acts now complained of had occurred. His claims must be dismissed on this basis alone.

consolidated emergency facility and hospital practices with respect to referrals of emergency room patients, violated and continues to violate the antitrust laws. Three practices at NMH form the basis of the appellants' complaints.⁶

The appellants first challenge the award of an exclusive contract to the Burns Clinic for the provision of emergency room services. Shortly after the merger, NMH determined, through a staff committee comprised of both Burns Clinic and independent [*946] physicians, [**5] that its new consolidated emergency room would be staffed by a small group of full-time physicians specializing in emergency room medicine.⁷ [**6] To this end, NMH solicited bids from the Burns Clinic, independent physicians in Petoskey, and the "Williams Group," a private company that specializes in providing emergency room staffing. Although only two weeks were allowed for preparation of bids, both the Burns Clinic and the Williams Group submitted proposals. The appellants did not. The exclusive contract was, not unexpectedly, awarded to the Burns Clinic.⁸ The appellants contend that this grant of an exclusive contract for the provision of the emergency room services constitutes an unreasonable restraint of trade in violation of section 1. The appellants also urge that this arrangement results from a conspiracy designed to monopolize acute care medicine in the Petoskey market in violation of section 2.

The second practice complained of involves NMH's system of referring uncommitted emergency room patients for follow-up care. Under this system, emergency room patients who do not have or do not prefer a particular doctor in the community are referred, in accordance with the medical judgment of the emergency room physician, to an "on-call" NMH physician in the appropriate area of medical expertise. All physicians on the NMH staff, including the appellants, share rotation on the "on-call" list and theoretically would receive a "fair-share" of those uncommitted patients requiring follow-up care in the area of medicine they practice. The appellants, however, assert that the referral system, while fair on its face, was applied in a discriminatory fashion from 1977 to 1978 before NMH instituted formal [**7] auditing. This discriminatory application of the referral system is alleged to have been designed to drive the appellants out of the practice of medicine in Petoskey, in violation of both sections 1 and 2 of the Sherman Act.

Finally, the appellants assert that NMH's so-called "pediatrician rule" violates sections 1 and 2. This rule requires that medical emergencies involving children 14 and younger, who have no physician, be treated by a pediatrician. All of the pediatricians in Petoskey are with Burns Clinic.⁹ A similar rule had been in effect at the Little Traverse emergency room since 1955. The rule was, in a manner not clearly disclosed by the record, continued at NMH after merger and consolidation of emergency room services.¹⁰ Appellants allege that the rule was continued at NMH at the behest of Burns Clinic pediatricians with whom the appellants compete directly for the general or "primary" treatment of children. Although there are no pediatricians among the non-Burns Clinic physicians, all of

⁶ The appellants' theories for recovery have shifted as the case has developed through almost two years of discovery. Initially, the appellants challenged both the merger and the consolidation of emergency rooms. These claims were dropped prior to the District Court's grant of summary judgment.

⁷ Prior to the merger the emergency room at Lockwood-MacDonald was staffed by various independent physicians including appellants on a rotating part-time basis. The emergency room at Little Traverse was staffed by Burns Clinic under an exclusive contract.

⁸ The cost differential between the only two competitors, Burns and the Williams Group, was apparently minimal. NMH awarded the contract to the Burns Clinic on the basis of prior favorable experience with the Burns emergency room physicians and a strong NMH staff preference for "in house" staffing. .

⁹ Although the rule does not require treatment by a Burns Clinic pediatrician, that is, in fact, its practical effect. The record reveals that an independent pediatrician has investigated setting up practice in Petoskey but has not done so. He was offered staff privileges but Burns Clinic pediatricians were unwilling to cover for him on weekends or emergencies.

¹⁰ The hospital also requires mandatory consultations with a pediatrician for all patients who are admitted with certain medical problems, e.g., Cesarean section and neonatal care infants require an attending physician. The appellants vaguely complain of these rules but fail to specify how such manifestly reasonable medical practice requirements imposed by the hospital are in any way violative of the antitrust laws. Such rules, therefore, play no part in our disposition of the appellants' claims.

the appellants enjoy or enjoyed pediatric privileges at NMH and assert that they are and were fully qualified to treat many of the children in the emergency room who are automatically [**8] treated by Burns Clinic pediatricians.

[*947] Defendants moved for summary judgment shortly before the scheduled trial date. This was two [**9] years after the case had been filed and after extensive discovery including depositions from most, if not all, potential witnesses. The District Court found that the appellants had failed to make "even a preliminary showing" that the defendants had "unfairly restrained" trade or conspired to do so and granted summary judgment. In light of the appellants' weak factual proofs and the countervailing medical purposes justifying the practices complained of, the court concluded that no legal basis existed upon which to try the case.

On appeal the appellants assert three grounds for reversal. First, the District Court erroneously failed to apply the more stringent standard for summary judgment appropriate in antitrust actions. Second, the court ignored substantial evidence from which a reasonable jury could infer a conspiracy to eliminate the appellants from acute care practice and to monopolize such services in the Petoskey market. Finally, the District Court erroneously failed to premise its decision on economic analysis and instead accepted the defendants' incantation of medical justifications.

While there is some merit to the appellants' first and third assertions of legal error, [**10] we nevertheless find that summary judgment was appropriate on appellants' [section 1](#) and [2](#) conspiracy claims. Because the District Court's inquiry on appellants' [section 2](#) monopolization and attempted monopolization claims is incomplete, we remand for further development of those claims.

Summary Judgment in Antitrust Litigation

Both the Supreme Court and this Circuit have expressed a clear reluctance to dispose of antitrust litigation on motions for summary judgment. *E.g., Poller v. Columbia Broadcasting System, Inc.*, 368 U.S. 464, 474, 7 L. Ed. 2d 458, 82 S. Ct. 486 (1962); *First National Bank of Arizona v. Cities Service Co.*, 391 U.S. 253, 284-90, 20 L. Ed. 2d 569, 88 S. Ct. 1575 (1968); *Davis-Watkins Co. v. Service Merchandise*, 686 F.2d 1190, 1197 (6th Cir. 1982); *Taylor Drug Stores, Inc. v. Associated Dry Goods Corp.*, 560 F.2d 211, 213 (6th Cir. 1977); *Bohn Aluminum & Brass Corp. v. Storm King Corp.*, 303 F.2d 425, 427 (6th Cir. 1962). This reluctance to utilize summary judgment dispositions stems from the crucial role that intent and motive have in antitrust claims and the difficulty of proving conspiracy by means other than factual inference. Thus, the [**11] Supreme Court in *Poller* stated that:

Summary procedures should be used sparingly in complex antitrust litigation where motive and intent play leading roles, the proof is largely in the hands of the alleged conspirators, and hostile witnesses thicken the plot.

[368 U.S. at 473.](#)

The District Court interpreted language in [First National Bank](#), 391 U.S. at 284-90, as eliminating the distinction between summary judgment in antitrust cases and other civil litigation. We do not believe it can be read so broadly. Rather, the Court merely re-emphasized that [HN2](#) even in an antitrust action the party opposing summary judgment may not rest on its pleadings. See [Fed. R. Civ. P. 56\(e\)](#). The adverse party must present sufficient evidence supporting its claims to " require a judge or jury to resolve the parties' differing versions of the truth at trial." [First National Bank](#), 391 U.S. at 286-90. See [Norfolk Monument Co., Inc. v. Woodlawn Memorial Gardens, Inc.](#), 394 U.S. 700, 701, 703-04, 22 L. Ed. 2d 658, 89 S. Ct. 1391 (1968) (per curiam). In *First National Bank*, summary judgment was found appropriate because the plaintiff's "total failure to produce evidence [**12] tending to show [the defendant's] part in a conspiracy" and the adversity of interests among co-conspirators "conclusively showed" that the allegations were "not susceptible" of the interpretation the plaintiff sought. [391 U.S. at 286-90.](#)

To the extent that petitioner's burden-of-proof argument can be interpreted to suggest that [Rule 56\(e\)](#) should, in effect, be read out of antitrust cases and permit [*948] plaintiffs to get to a jury on the basis of the allegations in their complaints, coupled with the hope that something can be developed at trial in the way of

evidence to support those allegations, we decline to accept it. While we recognize the importance of preserving litigants' rights to a trial on their claims, we are not prepared to extend those rights to the point of requiring that anyone who files an antitrust complaint setting forth a valid cause of action be entitled to a full-dress trial notwithstanding the absence of any significant probative evidence tending to support the complaint.

Id. at 289-90.

The lesson learned from *Poller* and *First National Bank* is that, although the court should treat antitrust plaintiffs leniently in examining [**13] their proofs for issues of fact on a summary judgment motion, those proofs must nonetheless provide some factual basis upon which the conspiracy and intent elements may be reasonably inferred.¹¹ Once the defendant has adequately rebutted the plaintiff's allegations by establishing legitimate alternative explanations for its conduct which disprove the inferences the plaintiffs seek to draw, then the plaintiffs must come forward with some "significant probative evidence tending to support the complaint." *First National Bank*, 391 U.S. at 290.

[**14] Although the District Court in the present case appears to have misinterpreted the effect of *First National Bank* on summary judgment standards in antitrust litigation, this error does not require reversal. The defendants have provided a number of legitimate alternative explanations for their conduct which adequately rebut the inferences of intent and conspiracy alleged by the plaintiffs. And by affidavit and reference to their depositions they have denied under oath the existence of any conspiracy. The appellants have failed to advance any "significant probative evidence" in response which would provide a sufficient factual basis to withstand summary judgment even under the more lenient standard. We, therefore, reject the appellants' second and more dispositive asserted error, that the District Court ignored substantial probative evidence from which a jury could infer a conspiracy to violate the antitrust laws. Appellants' Section 1 claims are treated first.

Appellants' Section 1 Claims

The three practices of NMH alleged to violate Section 1 of the Sherman Antitrust Act are (1) discriminatory application of the NMH's emergency room referral system from 1977 to 1979; [**15] (2) continuation of a "pediatrician rule" requiring emergency room patients 14 years old and younger who exhibit medical as opposed to traumatic injury to be seen by a pediatrician; and (3) the grant of an exclusive contract to the [*949] Burns Clinic to staff the NMH emergency room.

¹¹ The Seventh Circuit in *Weit v. Continental Ill. National Bank & Trust Co.*, 641 F.2d 457, 464 (7th Cir. 1981), cert. denied, 455 U.S. 988, 71 L. Ed. 2d 847, 102 S. Ct. 1610 (1982) suggests that the distinction between summary judgment in antitrust litigation versus other civil matters is no longer viable. However, this Circuit, as well as others, has reaffirmed the distinction as recognized in *Poller* and clarified in *First National Bank*. E.g., *David-Watkins Co. v. Service Merchandise*, 686 F.2d 1190, 1197 (6th Cir. 1982); *Taylor Drug Stores v. Assoc. Dry Goods*, 560 F.2d 211, 213 (6th Cir. 1977); *National Electrical Contractors Ass'n, Inc. v. National Constructors Ass'n*, 678 F.2d 492, 497 (4th Cir. 1982); *Clark v. United Bank of Denver National Ass'n*, 480 F.2d 235, 240 (10th Cir.), cert. denied, 414 U.S. 1004, 38 L. Ed. 2d 240, 94 S. Ct. 360 (1973); *Battle v. Lubrizol Corp.*, 673 F.2d 984, 987 (8th Cir. 1982) (rehrg. en banc granted May 21, 1982); *Feminist Women's Health Center, Inc. v. Mohammad*, 586 F.2d 530, 548 (5th Cir. 1978), cert. denied, 444 U.S. 921, 100 S. Ct. 262, 62 L. Ed. 2d 180 (1979). See also *Norfolk Monument v. Woodlawn*, 394 U.S. 700, 701, 703-04, 89 S. Ct. 1391, 22 L. Ed. 2d 658 (1968) (per curiam); *ALW, Inc. v. United Airlines, Inc.*, 510 F.2d 52, 55 (9th Cir. 1975) (expressing reluctance to grant summary judgment in antitrust litigation but nonetheless requiring that the plaintiff come forward with specific factual support upon which the requisite inference of conspiracy may be drawn once the defendant rebuts plaintiff's allegations with probative evidence). *Proctor v. State Farm Mutual Auto. Ins. Co.*, 218 U.S. App. D.C. 289, 675 F.2d 308, 335 (D.C. Cir. 1982) (the amount of discovery taken weighs against traditional reluctance to grant summary disposition).

HN3[] To establish a violation of [section 1](#) of the Act the plaintiff must establish that the defendants combined or conspired with an intent to unreasonably restrain trade.¹² E.g., [Perma Life Mufflers, Inc. v. International Parts Corp.](#), 392 U.S. 134, 141-42, 20 L. Ed. 2d 982, 88 S. Ct. 1981 (1968). The appellants have failed to provide a sufficient factual basis upon which to even infer the existence of the prerequisite conspiracy.

[**16] (1) The Referral System:

Under the NMH emergency room referral system the emergency room physician who initially examines patients must determine whether follow-up treatment is needed, and if so, what type of care would be medically prudent. Victims of heart disease are presumably referred to heart specialists, broken bones are sent to orthopedists, and more common problems referred to generalists or family practitioners. If a patient has no local physician, a referral is made to the physician "on-call" on a rotating list of physicians which includes appellants in the appropriate category of medical care as determined by the individual emergency room physician.

That the rule is fair on its face is undisputed. However, the appellants claim that they have been deprived of their "fair share" of these referrals through inconsistent application of the rules. We will assume that this may, in fact, have been true. Such deprivation alone, however, would not constitute a violation of [section 1](#). The appellant must provide some factual basis upon which to find that the ostensibly independent referral decisions of the emergency room physicians are part of some concerted design between [**17] the two defendants or one defendant and some other conspirator. They have not done so.

The appellants have not alleged knowledge much less participation on the [*950] part of NMH in the unfair implementation of this referral. Indeed, when independent orthopedists complained of a lack of referrals early in the life of the system, the hospital immediately responded by conducting spot audits of orthopedic referrals.¹³ There is nothing in the present record to indicate that the alleged abuses of the referral system were, if they occurred, anything other than the result of unilateral actions by individuals in the emergency room. The emergency room doctors were not employees of the hospital. Their acts are exclusively those of the Burns Clinic. **HN4**[] Close ties

¹² The medical profession is, of course, not exempt from application of the antitrust laws. E.g., [Arizona v. Maricopa County Medical Society](#), 457 U.S. 332, 73 L. Ed. 2d 48, 102 S. Ct. 2466, 2475-76 (1982). See also [National Society of Professional Engineers v. United States](#), 435 U.S. 679, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978); [Goldfarb v. Virginia State Bar](#), 421 U.S. 773, 44 L. Ed. 2d 572, 95 S. Ct. 2004 (1977). Nevertheless, some professional practices might survive antitrust scrutiny under the rule of reason even though illegal in other contexts. [Maricopa County](#), 457 U.S. at 349, 102 S. Ct. at 2475, 73 L. Ed. 2d 48; [National Society of Professional Engineers](#), 435 U.S. at 686, 696; [Goldfarb](#), 421 U.S. at 788-89 n.17.

The Supreme Court has not delineated exactly when or how the special circumstances relevant to learned professions should properly affect application of the antitrust laws. In *National Society of Professional Engineers*, the Court reasserted the basic principle that the focus of inquiry in any antitrust analysis is confined to consideration of "the challenged restraint's impact on competitive conditions." [435 U.S. at 688](#). In response to the defendant engineer's professional ethics and public safety justifications for their restraint on competitive bidding the Court emphasized that "the purpose of the analysis is to form a judgment about the competitive significance of the restraint; it is not to decide whether a policy favoring competition is in the public interest, or in the interest of the members of an industry. Subject to exceptions defined by statute, that policy decision has been made by Congress." *Id. at 692*. See [National Gerimedical Hospital v. Blue Cross](#), 452 U.S. 378, 393 n.19, 69 L. Ed. 2d 89, 101 S. Ct. 2415 (1981); [Academy of Clinical Psychologists v. Blue Shield of Va.](#), 624 F.2d 476, 485-86 (4th Cir. 1980), cert. denied [450 U.S. 916](#), 67 L. Ed. 2d 342, 101 S. Ct. 1360 (1981). The Court thereby "intimated" that the professions may adopt ethical rules which regulate and promote competition in a manner appropriate to the profession but may not create rules which have an "overall anti-competitive effect." *Id. at 686, 696 n. 22*. See *id. at 699* (Blackmun, J. concurring). Despite this language the Court has apparently not entirely foreclosed consideration of benefits other than enhanced competition -- such as quality of service, or protection from malpractice claims -- when applying the rule of reason to the professions. See [Maricopa County](#), 457 U.S. at 349, 102 S. Ct. at 2475.

In the present case, since there is no evidence to support an inference of the required concerted action, it is not necessary to consider what effect, if any, the defendants' potential medical justifications would have on a rule of reason analysis.

¹³ The results of these audits found that only a small number of errors had actually been made.

between defendants or even the power of one to dominate the other are not, by themselves, sufficient predicates for inferring the existence of a conspiracy to restrain trade. See *Oreck Corp. v. Whirlpool Corp.*, 639 F.2d 75 (2d Cir. 1980), cert. denied, 454 U.S. 1083, 70 L. Ed. 2d 618, 102 S. Ct. 639 (1981).

[**18] The appellants advance the theory that the emergency room staff, all members of the Burns Clinic, conspired with other specialists in the Burns Clinic who stood to directly benefit from the alleged improper diversion of referrals. Appellant's theory directly contradicts the traditional rule that " HN5¹⁴ Two or more individual officers, directors or agents within a corporation, acting on behalf of that corporation, are considered incapable of conspiring with each other or with their corporation, for § 1 purposes." *Harvey v. Fearless Farris Wholesale, Inc.*, 589 F.2d 451, 455 n.7 (9th Cir. 1979) (citing cases). To find liability on this basis would require approval and application of a limited "independent personal stake" exception to the traditional rule that a corporation cannot conspire with its officers or agents.¹⁴ See, e.g., *Greenville Publishing Co., Inv. v. Daily Reflector, Inc.*, 496 F.2d 391, 399 (4th Cir. 1974); *Nurse Midwifery Assoc. v. Hibbett*, 549 F. Supp. 1185, 1189-90 (M.D. Tenn. 1982); *Hoffman v. Delta Dental Plan of Minn.*, 517 F. Supp. 564, 571 (D.Minn. 1981). Under this exception, a conspiracy may be found to exist between a corporation and its employee [**19] by virtue of the employer's independent personal stake in achieving the object of the conspiracy. Without in any way endorsing the merits of this theory in general¹⁵ we hold that no such conspiracy is possible in the present case.

[**20] There has been no showing to support even an inference of an understanding, explicit or tacit, between the Burns Clinic specialists and the Burns Clinic emergency room staff. Indeed, plaintiffs' own evidence indicates that, if in fact referrals to specialists predominated emergency room referrals, it was because the emergency room doctors believed specialists were better qualified to undertake the follow-up care required. Thus, even if we were to find that the circumstances of this case warranted looking beyond the corporate form of the Burns Clinic, there would nonetheless be insufficient evidence of the required plurality of action and meeting of the minds.

It is true that the income of specialists in the clinic depends, in part, upon each physician's individual billing contribution to the clinic. However, even were we to accept the dubious proposition that such income constitutes a personal independent stake, only the specialists are in a position to benefit from discrimination in referrals in a manner independent of the advancement of [*951] the Burns Clinic as a corporate enterprise.¹⁶ [**22] The emergency room physicians cannot, by hospital rule, make self-referrals for [**21] follow-up care. Thus, these doctors -- the only doctors in this case with the power to wrongfully withhold referrals -- do not themselves have any personal stake in the outcome of the alleged conspiracy independent of their stake in the clinic itself. A potential motive on the part of the specialists alone is too speculative a basis upon which to infer an illicit combination.¹⁷ To

¹⁴ Although often referred to as the "intra-enterprise" theory of conspiracy, the exception at issue in this case is distinct from those cases in which conspiracy is alleged to exist among the vertically related corporate subsidiaries of a defendant parent corporation. See, e.g., *Perma Life Mufflers v. International Parts Corp.*, 392 U.S. 134, 141-42, 20 L. Ed. 2d 982, 88 S. Ct. 1981 (1968); *Kiefer-Stewart Co. v. Joseph E. Seagram & Sons*, 340 U.S. 211, 215, 95 L. Ed. 219, 71 S. Ct. 259 (1951). Here the conspiracy is supposed to exist between a single, professional corporation and its member physicians.

¹⁵ There are rather substantial policy reasons for not adopting such an exception. See Note, "Conspiring Entities" Under Section 1 of the Sherman Act, 95 Harv. L.Rev. 661 (1981-82) (summarizing the policy aspects of the intra-enterprise doctrine of corporation conspiracies).

¹⁶ The present case should be distinguished from the *Nurse Midwifery* and *Delta Dental Plan* cases cited by the appellants. In those cases the corporations involved were incorporated associations of independent physician members created to provide health care insurance programs. These corporate entities served purposes other than the actual physical delivery of health care services by member physicians. Each participating physician in the incorporated association maintained the actual practice of their profession independent of that corporate body. Under these circumstances, the independent personal stake of either member is readily apparent. Compare *Virginia Academy*, 624 F.2d at 479 (finding that "Blue Shield" of Virginia was an agent under the direction and control of its member physicians and not a single entity for antitrust purposes). In contrast, the Burns Clinic in the present case was organized by member physicians to facilitate delivery of specialized medical services in a group practice. The interest of each clinic physician is one and the same as the enterprise they form a part of.

apply this supposed exception for "independent stake" to the present case would be paramount to allowing the exception to subsume the rule.

Appellants also ask that we disregard the corporate structure of the Burns Clinic because it is a professional corporation. Appellants argue that because the Michigan Professional Service Corporations Act¹⁸ provides that an officer, stockholder, agent or employee of such corporation remains personally liable for his or her acts while rendering professional care, doctor members of a professional corporation should be treated as individuals for antitrust purposes. We see no reason to treat professional corporations in any [**23] different manner than any other corporation. Group practice by professional corporations is a common method of delivering health care. Such corporations are lawfully organized.¹⁹ The professional corporation has the same needs as any corporation to have its officers, members and employees engage in concerted activity. As with every corporation, it cannot exist unless its shareholder members can agree among themselves with respect to all aspects of its operation. It is recognition of this need which forms the basis for the rule that since a corporation cannot combine or conspire with itself, the acts of a corporation acting through its directors, officers, and employees are not generally subject to condemnation under section 1. Greenville Publishing Co., 496 F.2d at 399. See, e.g., Tamaron Distrib. Corp. v. Weiner, 418 F.2d 137, 138-39 (7th Cir. 1969); Cliff Food Stores, Inc. v. Kroger, Inc., 417 F.2d 203, 205-06 (5th Cir. 1969); Chapman v. Rudd Paint & Varnish Co., 409 F.2d 635, 642-43 (9th Cir. 1969); Nelson Radio & Supply Co. v. Motorola, Inc., 200 F.2d 911, 914 (5th Cir. 1952), cert. denied, 345 U.S. 925, 97 L. Ed. 1356, 73 S. Ct. 783 (1953); Allen [**24] Organ Co. v. North Am. Rockwell Corp., 363 F. Supp. 1117, 1128-29 (E.D. Pa. 1973).

Appellants raise the specter of doctors incorporating for the purpose of avoiding the antitrust laws. However, the agreement to form a corporation for that [*952] purpose would be subject to the scrutiny of the antitrust laws.²⁰ And the use of a professional corporation for that purpose would run afoul of the attempt to monopolize prohibition of section 2. Moreover, there is no claim that the Burns Clinic was organized for that purpose. Burns Clinic had been in existence, first as a partnership and later as a professional corporation, for many years. It owns its own building in which all the members practice. It is not a [**25] mere shell.

(2) NMH Pediatrician Rule:

The second anti-competitive practice of the defendants alleged to be the result of an illegal combination concerns the existence of a "pediatrician rule" at the NMH emergency room. This rule requires that all emergency patients 14 years of age or younger, who have no family physician, must be seen by a pediatrician if they suffer from a medical problem as opposed to a traumatic injury. The Burns Clinic had instituted the rule originally at the Little Traverse emergency room in 1955, and it was apparently adopted or continued by NMH in its present form sometime after merger and consolidation.²¹

¹⁷ The present case is in this sense clearly distinguishable from the *Greenfield Publishing* cases. There, the individual employee held capable of conspiring with his corporation had both an independent personal stake in achieving the conspiracy's object and the power to himself institute the anti-competitive policy for his corporation. However, even were this distinguishing feature absent, it is doubtful that we would follow the analysis in that case. Compare with America's Best Cinema Corp. v. Fort Wayne Newspapers, Inc., 347 F. Supp. 328 (N.D. Ind. 1972).

¹⁸ See Mich. Comp. Laws Ann. § 450.226 (West 1967).

¹⁹ That such corporations are often organized primarily for tax and pension purposes does not warrant disregarding their corporate structure under Michigan state law. See Kline v. Kline, 104 Mich. App. 700, 305 N.W.2d 297 (1981).

²⁰ E. Kintner, *Federal Antitrust Law*, Vol. II, § 9.8, pp. 22-23 (1980), discusses and agrees with this proposition.

²¹ The Little Traverse Hospital rule originally required that both medical and trauma cases be referred to a pediatrician and set a higher age limit of 16. With changes in patient load and staffing, however, the rule was modified to its present form sometime prior to the merger of Little Traverse and Lockwood-MacDonald hospitals. Apparently a further informal modification has recently changed the rule so that medical problems are also treated by the emergency room physician if the patient is admitted after midnight. In that circumstance the pediatrician is called for consultation.

[**26] The appellants' claim is essentially that the rule unnecessarily eliminates their access to a certain segment of the new patient population treated at the NMH emergency room. Since the appellants have pediatric privileges at NMH they are in direct competition with pediatricians insofar as the routine treatment of children are concerned. Yet, the rule requires that only a pediatrician be called whether or not the individual case is also actually within the acknowledged capabilities of the family practitioners.

We agree with the appellants that the pediatrician rule may in theory ²² restrain competition between family practitioners and pediatric specialists. The appellants have failed, however, to provide any factual basis upon which a jury might find the prerequisite concerted activity for a [section 1](#) violation. Although the record is not clear, it appears that the decision to continue the Little Traverse pediatrician rule was made by the NMH board of directors upon the endorsement of the NMH executive committee and an emergency room subcommittee formed of both Burns Clinic and independent doctors. However, no record of these committee meetings or other evidence has been offered [**27] which even implies that continuation of the rule was other than solely the product of NMH's singular efforts to provide appropriate medical care. The appellants have again failed to provide probative evidence tending to infer the existence of a conspiracy sufficient to withstand summary judgment.

(3) Exclusive Emergency Room Contact:

The final act of the defendants alleged to be a concerted effort to unreasonably restrain trade is the award of an exclusive contract to provide emergency services at NMH to a small group of Burns Clinic physicians. Sometime after consolidation of the Little Traverse and Lockwood-MacDonald emergency rooms [**28] NMH determined that the consolidated services should be operated by a small group of full-time emergency room specialists. The appellants, [*953] who did not bid for the contract themselves and were unwilling to work in the emergency room on a full-time basis, claim that the award of an exclusive contract violates [section 1](#) of the Sherman Act. We disagree.

HN6 [↑] Not all exclusive dealing contracts even by a monopolist are illegal.²³ See, e.g., [Harron v. United Hospital Center, Inc.](#), 522 F.2d 1133 (4th Cir. 1975), cert. denied, 424 U.S. 916, 47 L. Ed. 2d 321, 96 S. Ct. 1116 (1976) (exclusive radiology contract); [Brown v. Hansen Publications, Inc.](#), 556 F.2d 969, 970 (9th Cir. 1977) (exclusive sales agreement imposed on retail outlets for defendant's products); [Export Liquor Sales, Inc. v. Ammax Warehouse Company, Inc.](#), 426 F.2d 251 (6th Cir. 1970), cert. denied, 400 U.S. 1000, 27 L. Ed. 2d 451, 91 S. Ct. 460 (1971) (exclusive leasing of facilities on toll bridge in tax free zone). See also [Tampa Electric](#), 365 U.S. at 327-29 (exclusive "requirements" contract held lawful under § 3 of the Clayton Act and, *a fortiori*, lawful under [section 1](#) and [2](#) of the [**29] Sherman Act). But see [Hyde v. Jefferson Parish Hospital District No. 2](#), 686 F.2d 286 (1982), cert. granted, 460 U.S. 1021, 103 S. Ct. 1271, 75 L. Ed. 2d 493 (1983) (analyzing an exclusive contract to provide anesthesia services as a tying arrangement illegal per se under the Sherman Act).²⁴

[**30] In the present case NMH has only one emergency room through which to provide emergency services to the public. It was required to choose among alternative methods of providing this service in an effective, efficient and medically prudent manner. We agree with the District Court that the defendant NMH chose to staff its

²² We say "in theory" because the appellants have not actually presented any evidence as to the number of uncommitted children that are actually admitted to NMH with medical problems within the appellants' range of qualifications. However, finding no evidence to support an inference of conspiracy this deficiency is superfluous to disposition of appellants' [section 1](#) claims.

²³ Exclusive dealing contracts are analytically similar to cases involving unilateral refusals to deal in that the defendant has, in an exclusive contract, unilaterally determined to deal only with a single entity. Compare, [United States v. Colgate & Company](#), 250 U.S. 300, 63 L. Ed. 992, 39 S. Ct. 465 (1919); [Byars v. Bluff City News Co., Inc.](#), 609 F.2d 843, 863 (6th Cir. 1979), with [Tampa Electric Co. v. Nashville Coal Co.](#), 365 U.S. 320, 327-29, 5 L. Ed. 2d 580, 81 S. Ct. 623 (1961); [Brown v. Hansen Publications, Inc.](#), 556 F.2d 969, 970 (9th Cir. 1977). However, this category of cases is more helpful in analyzing whether a monopolist's refusal to deal with a potential competitor violates [section 2](#) of the Sherman Act.

²⁴ Unlike [Hyde](#), 686 F.2d at 289, 293, there is no discernible "tying" arrangement in the present case, nor has one been alleged.

consolidated emergency room with full-time specialists in emergency care for undisputedly legitimate financial and medical reasons. The appellants have failed to present any evidence which would contradict NMH's manifestly legitimate and well-supported justification that full-time specialists trained as emergency room physicians provide medical services superior to those of generalists who rotate on a part-time basis while maintaining full private practices.

The appellants' analogy to the "bottle neck" theory exemplified by cases such as *United States v. Terminal Railroad Association*, 224 U.S. 383, 56 L. Ed. 810, 32 S. Ct. 507 (1912), is unsound. The present case does not involve a group of horizontal competitors whose joint control over some essential facility produces an unreasonable restraint on trade. Rather, NMH, as the coordinator and supplier of an [**31] essential but limited public service, stands in a vertical relationship to both the Burns Clinic and the independent physicians in Petoskey. NMH not only may, but also is obliged, to staff its limited facilities in the manner which best serves the public interest. The evidence is overwhelming that it has done just that. There is nothing which would permit a jury to infer that the NMH Board adopted the exclusive contract concept to force appellants out of any market.

The "non-competitive" nature of emergency room services also supports the legitimacy of exclusive contracts for their provision under the antitrust laws. Patients may conceivably choose between two competing hospitals in seeking emergency services, depending upon the proximity of the hospitals and the nature of their injuries. The patient necessarily has only limited choices as to how that service is to be provided, however, once a certain hospital has been selected. Presumably the fees [*954] charged by the hospital for various treatments are consistent from one emergency room physician to the next and the choice of treatment a matter left to the medical judgment of the emergency room doctor and hospital policies. [**32] In essence it makes virtually no competitive difference to the consuming public in terms of acute care service whether the emergency room is run by full-time specialists or part-time physicians supplementing their regular practices.

To the extent that exclusive contracts for emergency room services may adversely affect the practice of medicine by reducing the number of new patient referrals, that effect is ancillary and uniform among all competing physicians on the NMH staff. The system of referrals at the NMH emergency room is, without dispute, a fair means of distributing such new patients among the various physicians on the NMH staff including the appellants. Nor can the appellants legitimately complain that NMH has collusively or unfairly awarded its exclusive emergency room contract to the Burns Clinic. Appellants, by their own admission, failed to submit bids for the emergency room contract and were unwilling to staff the service on the required full-time basis.

Appellants' Section 2 Claims:

The appellants' various assertions of antitrust liability include ill-defined claims of monopolization, attempted monopolization and a conspiracy to monopolize in violation [**33] of section 2 of the Sherman Act.²⁵ [**34] The claim of a conspiracy to monopolize fails for the same reason as did the appellants' section 1 claims; there has been no factual basis presented upon which to reasonably infer the existence of a conspiracy in view of the legitimate explanations for defendant's conduct. The appellants' remaining section 2 claims, however, may be established solely by unilateral actions of the defendants. We agree with the District Court that these remaining section 2 claims are somewhat speculative. However, because the court failed to fully develop the initial factual issues concerning relevant product and geographic markets, summary disposition of appellants' monopolization and attempted monopolization was premature. We therefore, remand the section 2 claim against the Burns Clinic to the District Court for further development.²⁶

²⁵ 15 U.S.C. § 2 provides: Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a felony. . . .

²⁶ The District Court may, of course, still dispose of these claims by summary judgment if after development of the necessary facts it determines that no genuine issues of material fact remain for trial.

HN7 To establish the offense of monopolization a plaintiff must show that a defendant either unfairly attained or maintained monopoly power. [United States v. Grinnell Corp., 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 \(1966\)](#). Monopoly power consists of "the power to control prices or exclude competition." [Id. at 571](#).

HN8 An attempted monopolization occurs when a competitor, with a "dangerous probability of success," engages in anti-competitive practices the specific design of which are, to build a monopoly or exclude or destroy competition. See [Times-Picayune Publishing Co. v. United States, 345 U.S. 594, 627, 73 S. Ct. 872, 97 L. Ed. 1277 \(1952\)](#); [Swift & Co. v. United States, 196 U.S. 375, 396, 25 S. Ct. 276, 49 L. Ed. 518 \(1905\)](#); E. Kintner, [Federal Antitrust Law](#), Vol. II, § 13.1, p. 406 (1980) (citing cases).

HN9 In order to succeed on either a monopolization or **[**35]** attempt to monopolize claim plaintiffs must establish the relevant product and geographic markets in which they compete with the alleged monopolizers. See, e.g., [United States v. Grinnell Corp., 384 U.S. 563, 571-73, 16 L. Ed. 2d 778, 86 S. Ct. 1698 \(1966\)](#); [Walker Process Equipment, Inc. v. Food Machinery & Chemical Corp., 382 U.S. 172, 177, 86 S. Ct. 347, 15 L. Ed. 2d 247 \(1965\)](#); [United States v. E.I. duPont de Nemours & Co., 351 U.S. 377, 395-99, 396 n.23, 100 L. Ed. 1264, 76 S. Ct. 994 \(1956\)](#); [Times-Picayune, 345 U.S. at 611-12 \(1953\)](#).

In the present case the District Court granted summary judgment on appellants' [section 2](#) claims because it found that neither defendant enjoyed monopoly power in a market in which appellants compete.

As to NMH we agree. It is beyond question that NMH does not compete in any fashion with the appellants. Indeed, the appellants have not so alleged.²⁷ Accordingly, NMH must on remand be dismissed as a defendant to this lawsuit.

[36]** There is, however, no evidence provided by the present record to contradict the appellants' allegations that competition exists between appellants and the Burns Clinic for referral patients from the NMH emergency room. It is true, as the District Court points out, that Burns Clinic provides specialized secondary care medicine almost exclusively. The appellants, on the other hand, are all, except one, family practitioners whose services center on the delivery of primary care. However, there may exist, as the appellants allege,²⁸ an area of overlap at which these two broad classifications of medicine compete. Appellants, for example, have a wide-range of privileges at NMH for treating medical problems that might also be treated by a Burns Clinic specialist.

[37]** If the evidence shows that this area of overlap properly constitutes a relevant discernible market,²⁹ **[**38]** then a summary disposition of the appellants' monopolization and attempted monopolization claims was

²⁷ NMH provided the District Court with an affidavit disclaiming that any point of competition existed between it and the appellants -- all of whom were members of the NMH medical staff. The appellants have provided no contrary evidence.

²⁸ The appellants have admittedly not cogently defined a relevant product market. In their initial complaint appellants alleged a conspiracy designed to eliminate them from the practice of "medicine." In oral arguments before the District Court appellants narrowed their concept of the market to that of "primary care." On appeal the appellants have focused their arguments on "acute medical care." Acute medical care, if a market, must include referrals from the emergency room for follow-up treatment in order to support the appellants' claims. We assume the appellants intended this version of acute care. Appellants have offered no evidence supporting their shifting definitions of the product market. Such a failure is typically fatal to a plaintiff's [section 2](#) claims. See, e.g., [Morton Bldgs. of Neb. v. Morton Bldgs., Inc., 531 F.2d 910, 918 \(8th Cir. 1976\)](#). The defendants however, have not presented any probative evidence to contradict the appellants' various asserted markets. For this reason in reviewing the grant of summary judgment we will assume that product market alleged which would prove most supportive of the appellants' respective claims.

²⁹ This area of overlap, if it exists, might conceivably be as narrow as "acute care referrals" or "acute care referrals for follow-up primary care." See, e.g., [E.I. duPont de Nemours & Co., 351 U.S. at 395-96](#); [Byars v. Bluff City News, 609 F.2d at 852-53](#). See also [Borden, Inc. v. FTC, 674 F.2d 498, 508-09 \(6th Cir. 1982\)](#) (cert. granted, [461 U.S. 940, 103 S. Ct. 2115, 77 L. Ed. 2d 1298 \(1983\)](#)) (discussing submarket analysis). We intimate no view on whether such a market in fact exists as distinct from the broader classification of primary care and specialized secondary care. It is an issue which must be considered first by the

inappropriate. The Burns Clinic has an obvious, but legitimately obtained monopoly in Petoskey³⁰ over the delivery of acute care medicine to the extent it is delivered through an emergency room.³¹ If this is a submarket and if the Burns Clinic has utilized this monopoly power unfairly to either exclude competition for emergency room [*956] referrals or in an attempt to gain monopoly power in primary care³² or the "overlap" market alleged to exist by the appellants, liability under section 2 might be established. The District Court must, therefore, fully consider the issue of relevant market prior to final disposition of appellants' section 2 claims.³³

Economic Analysis of Antitrust Claims Against the Professions

The appellants also argue that the District Court erred by failing to premise its decision on economic [**39] analysis. While the appellants' argument accurately states the law, the appellants mischaracterize the District Court's opinion. The court premised its judgment on appellants section 1 claims primarily upon the appellants' failure to provide any factual basis upon which to reasonably infer the prerequisite concerted action. The court also emphasized that the defendants had offered substantial medical justifications to contradict any potential inferences of either concerted action or an intent to restrain trade. In this the District Court was perfectly correct. HN10[] In the absence of legitimate explanation for conduct a fact finder may be warranted in drawing an inference that the anti-competitive conduct resulted from concerted activity and an improper motive.³⁴ However, such an inference is not permissible when there is persuasive evidence of legitimate purposes or other explanation which negates that inference. See, e.g., Times-Picayune, 345 U.S. at 627; Davis-Watkins Co., 686 F.2d at 1199. For this purpose the medical justification is highly relevant. To the extent that the District Court's opinion may be read to imply that economic analysis of an antitrust claim is [**40] unnecessary once a defendant in a learned profession proffers justifications it must be rejected. Such a proposition would be contrary to basic anti-trust principles, see, e.g., National Society of Professional Engineers, 435 U.S. at 688, 696 n.22; Virginia Academy, 624 F.2d at 485-86, and plays no part in our disposition of this case.

AFFIRMED in part, REVERSED in part, and REMANDED for further proceedings in accordance with this opinion.

End of Document

District Court, however, prior to final disposition of the appellants' section 2 claims. Similarly, the District Court must consider the relevant geographic dimensions of this market in evaluating these claims.

³⁰ The record again does not reveal whether Petoskey is the relevant geographic market for acute care medicine assuming that acute care is a discernible product market. The Burns Clinic may, of course, present contrary evidence to the District Court.

³¹ The clinic's monopoly is one created by a contract held lawful in this opinion. See **supra, at 954-956**. It is not, of course, a necessarily permanent one in that NMH controls its existence through competitive bidding.

³² The Burns Clinic apparently maintains, contrary to the District Court's assertions, primary care services in direct competition with the appellants. This fact must also be evaluated by the District Court on remand.

³³ Since NMH's pediatrician role was presumably endorsed and adopted by the hospital and there is no evidence of actual Burns Clinic input much less responsibility in its adoption, it should play no part in the decision on remand.

³⁴ This is equally true in the context of section 2 monopolization and attempted monopolization claims. See, e.g., Times-Picayune, 345 U.S. at 627. In the present case, however, it is difficult to perceive what justification there could be for totally excluding the appellants -- all qualified by hospital rules -- from receiving their fair share of emergency room referrals. This matter is, of course, left for development by the District Court.

560 F. Supp. 591, *591A 1983 U.S. Dist. LEXIS 18162, **18162

Proof of a combination or conspiracy under the Sherman Act, [15 U.S.C.S. § 1](#), does not require the existence of an express agreement. It is enough that, knowing that concerted action was contemplated and invited, the distributors gave their adherence to the scheme and participated in it.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

[**HN4**](#) **Per Se Rule & Rule of Reason, Sherman Act**

While the language of the Sherman Act, [15 U.S.C.S. § 1](#), is broad enough to render illegal many commercial understandings, the "rule of reason" is the prevailing mode of analysis. Under this rule, the fact finder balances all the circumstances of a case in deciding whether a restrictive practice is illegal under the Act as an unreasonable restraint on competition. The analysis required by the rule of reason, however, is laborious, and as the courts gained experience with antitrust problems they identified certain types of agreements that were so consistently unreasonable that they could be deemed illegal per se, without exhaustive inquiry into their purported justifications.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

[**HN5**](#) **Price Fixing & Restraints of Trade, Horizontal Refusals to Deal**

Among the practices that have been deemed so pernicious as to be unreasonable per se are group boycotts. The classic group boycott, deserving of per se condemnation, is an agreement designed to eliminate competition by a concerted refusal to purchase from or sell to the business rivals of one or more of the conspirators.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

[**HN6**](#) **Price Fixing & Restraints of Trade, Horizontal Refusals to Deal**

The traditional definition of group boycott is a concerted attempt by a group of competitors at one level to protect themselves from competition from non-group members who seek to compete at that level. In other words, the agreement is between business competitors in the traditional sense.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Practices Governed by Per Se Rule > Boycotts

Business & Corporate Law > Cooperatives > General Overview

[**HN10**](#) Sports, Baseball

Sports other than baseball are subject to the antitrust laws, and among the antitrust restrictions that apply to sports are prohibitions against group boycotts. However, in professional sports, unlike many other forms of business competition, a few rules are essential to survival, and courts have been reluctant automatically to subject the cooperative activities of sports organizations to application of the group boycott per se rule. The legitimate goal of

such sports regulation is the preservation of participant parity and competitive equivalency, and some courts have chosen a more extended analysis of the administrative regulations of sports organizations that focuses on the purpose of the regulation and the procedures followed in adopting it. Sports organizations, however, do not have unlimited discretion in adopting rules and regulations. When the purpose of a sports regulation is to eliminate business competition, the concerted action is not eligible for rule of reason analysis and must be subjected to per se treatment.

Antitrust & Trade Law > Regulated Industries > Sports > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN11[**Regulated Industries, Sports**

Sports regulations must satisfy basic tenets of procedural fairness. According to the following three-pronged test, a sports regulation can escape per se treatment only if: (1) there is a legislative mandate for self-regulation, or otherwise, and; (2) the collective action is intended to achieve an objective consistent with the policy justifying self-regulation, is reasonably related to that objective, and is no more extensive than necessary, and; (3) the governing organization provides procedural safeguards to protect against arbitrary restraints and to provide a basis for judicial review.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

HN12[**Regulated Industries, Higher Education & Professional Associations**

Under the rule of reason, a restraint must be evaluated to determine whether it is significantly anticompetitive in purpose or effect. In making this evaluation, the court analyzes the facts peculiar to the business, the history of the restraint, and the reasons why it was imposed. If, on analysis, the restraint is found to have legitimate business purposes whose realization serves to promote competition, the anticompetitive evils of the challenged practice must be balanced carefully against its pro-competitive virtues to ascertain whether the former outweighs the latter. A restraint is unreasonable if it has the net effect of substantially impeding competition. The true test of legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition.

Opinion

[*594] CAFFREY, Ch. J.

Plaintiff brings this action under the antitrust laws of the United States seeking permanent injunctive relief and treble damages pursuant to Sections 4 and 16 of the Clayton Act, [15 U.S.C. §§ 15](#) and [26](#), for defendants' alleged violation of [Section 1](#) of the Sherman Act, [15 U.S.C. § 1](#). The Court has jurisdiction of the action and the parties under [15 U.S.C. §§ 15, 22](#), and [26](#).

I. *Proceedings to Date*

Plaintiff commenced this action on March 11, 1982, alleging that the so-called "single tire rule" (described below), as adopted under the circumstances of this case, violated [Section 1](#) of the Sherman Act in that it constituted an illegal group boycott, a tying arrangement, and a tortious interference with plaintiff's advantageous business relations.

[*595] Plaintiff sought a preliminary injunction against the use of the tire rules at the defendant tracks for the 1982 racing season. [*2] After an evidentiary hearing upon the motion on March 22, 1982, this Court denied plaintiff's motion for preliminary injunction in an opinion dated March 31, 1982.

On April 15, 1982 defendant filed a counterclaim for a declaratory judgment as to the validity under the antitrust laws of the single tire rule, as adopted in this case, and if adopted in the future.

The case was tried to this Court from December 14 through 20, 1982. At the close of its case plaintiff waived Counts 3 through 7, leaving only claims that the adoption of the single tire rule was a concerted refusal to deal, and as such was unlawful under the Sherman Act, Section 1 either *per se* (Count 1), or under the rule of reason (Count 2). Hoosier waived its counterclaim.

This opinion will constitute the Court's findings of fact and conclusions of law pursuant to Fed.R.Civ.P. 52(a).

II. Parties

A. Plaintiff

M & H Tire Co., Inc. (M&H) is a Massachusetts Corporation with its principal place of business in Watertown, Massachusetts. M&H designs, produces, and sells racing tires for use in organized motorcar-racing competition. Marvin Rifchin is the President of M&H.

B. Defendants

1. Hoosier [*3] Racing Tire Corp. (Hoosier) is an Indiana Corporation with its principal place of business in Lakeville, Indiana. Hoosier also designs, produces, manufactures, and sells racing tires and does business in direct competition with M&H. Robert Newton is the President of Hoosier.
 2. Bobby Summers is the New England distributor for Hoosier and resides in Connecticut.
 3. New England Drivers and Owners Club (NEDOC), organized in 1970, is an unincorporated association existing under the laws of Massachusetts, with an address in Franklin, Massachusetts. NEDOC is an association many of whose members are racing-car owners or drivers who compete in organized racing events in the Northeastern United States. NEDOC is composed of many but not all, of the racing car drivers and owners who compete in the modified class at Stafford Motor Speedway, Seekonk Speedway, Thompson Speedway, and Riverside Speedway. Richard Armstrong is the President of NEDOC.
 4. Stafford Springs Enterprises, Inc. is a Connecticut corporation with its principal place of business in New Britain, Connecticut. Stafford Springs Enterprises, Inc. owns and manages Stafford Motor Speedway (Stafford), in Stafford Springs, [*4] Connecticut, and promotes organized automobile racing events at that facility. Edwin Yerrington is the promoter of that track.
 5. Bristol County Stadium, Inc. (Bristol County) is a Massachusetts corporation with its principal place of business in Seekonk, Massachusetts. Bristol County leases the Seekonk Speedway in Seekonk, Massachusetts. Bristol County is owned and managed by D. Anthony Venditti and his family, and has its principal place of business in Venditti's home. Through ARC (below) and Venditti, Bristol County is responsible for promoting auto racing and other events at the track.
- Both Stafford and Seekonk Speedway (Seekonk) feature "short oval" or "circle" track automobile racing in various classes, including the modified class. The bulk of the participants in such racing are amateur drivers who race several times weekly during the season.
6. Auto Racing Club (ARC) is a non-profit Massachusetts corporation. ARC was organized by Venditti and also has its headquarters in Venditti's home. ARC promotes the automobile racing conducted at Seekonk, segregating divisions, supplying insurance, handicapping racers, conducting the races, paying referees and officials, disbursing [*5] prize money from funds it received from Bristol County and promulgating rules (including the subject single-tire rule).

[*596] III. General Background

The present controversy grew out of a decision involving Hoosier, its dealer Summers, NEDOC, and the promoters at four major automobile race tracks, to adopt a rule requiring drivers to use a Hoosier "Budget" tire during the 1982 automobile racing season. Under this commonly called "track-tire" rule, only one brand of tire can be used at a particular track during a racing season.

A. The Racing Tire Market

It is not disputed that the production and sale of racing tires constitutes a distinct market in interstate commerce. Racing tires are designed for use on high performance vehicles in organized competition rather than for street or highway use. They differ from street tires, in size, construction, and materials and they require specialized equipment and technical knowledge for their manufacture.

During 1982, the active manufacturers of racing tires of the sort involved in this case were M&H, McCreary Tire and Rubber Co. (McCreary), Goodyear, and Hoosier, Firestone had largely dropped out of this market by [*6] 1982.

Traditionally, racing tires were sold by independent dealers to racing car owners and drivers. Tires were transported by dealers to the race tracks and sold directly to drivers and owners from the dealers' trucks on the day of the race. Under the open competition system which traditionally has prevailed in the racing tire market, the sales of a particular brand of tire were directly related to the success which the tire had enjoyed at recent races. As Hoosier President Robert Newton testified, sales were based on last night's or last week's results, the reasonable inference being, that upon learning that winning cars have raced with a particular tire, drivers and owners would change brands to purchase the "winning circle" brand for their own cars. Consequently, tire companies competed vigorously throughout the racing season by making technical adjustments and introducing new tires in order to improve their sales.

B. Racing in the Northeast

There are numerous distinct classes of racing cars, each with its own set of rules, and its own special tire needs. The most popular and prestigious class of racing in the Northeast is the modified class, which attracts the fastest [*7] cars, draws the most spectators, and pays the largest purses in the region. Technical standards for modified race cars are promulgated by the National Association of Stock Car Auto Racing, Inc. (NASCAR). NASCAR, which is not a party in this lawsuit, sanctions and administers races at those tracks that adhere to its rules and conducts a "point fund" for drivers who compile the best record in NASCAR-sanctioned events. Modified racing is conducted at Stafford, Seekonk, Riverside Park Speedway (Riverside), and Thompson Speedway (Thompson). Stafford, Thompson, and Riverside are sanctioned by NASCAR. In order to allow drivers the opportunity to compete for NASCAR points, these three tracks schedule their regular events on different days of the week so that drivers can race at each track in the course of a weekend. NASCAR does not sanction races at Seekonk, but Seekonk follows the NASCAR rule book for its modified class.

NASCAR is not a recognized sanctioning organization. The NASCAR rules regulate only sanctioned events and thus do not embody a thoroughly regulatory scheme over the tracks as a whole, or even over all modified races at the tracks. The NASCAR rules leave the tracks [*8] free to promulgate regulations regarding the equipment used by competitors. It is to be noted that NASCAR regulations do not regulate the compounds or the brands of tires to be used at NASCAR-sanctioned events.

NEDOC, as stated above, is composed of drivers and owners who race in the modified divisions at the four above-stated tracks. As is the case with NASCAR, NEDOC is not a recognized sanctioning organization. NEDOC's principal function has been to negotiate with promoters on behalf of drivers and owners. The organization [*597] has also been a source of proposals for rules to be adopted by the tracks. Among the rules proposed were those regulating equipment such as gear and carburetor rules, as well as bans on the use of fuel injection and aluminum block engines. Rules such as these regulating equipment had the avowed purpose of enhancing participant equality.

C. The Cost of Automobile Racing

Modified racing cars originally resembled "stock cars" sold for street use and ran on tires similar to street tires. During the 1960's, however, competitors began to refurbish their cars with special racing components that increased engine horsepower and reduced car weight. **[**9]** In response, tire companies began to produce wider, softer tires capable of handling greater horsepower and speed. Since 1975, the costs of modified racing have increased substantially due to more expensive engines, chassis, frames, fuel, and tires. However, according to Arute, owner of Stafford, the prize money has remained relatively stable.

Arute also testified regarding the evolution of the so-called tire problem. Commencing at a time when M&H was the only manufacturer involved in furnishing tires specially for modified racing, and continuing through a period when the several manufacturers competed to provide even faster and softer compounds creating more demands for tires and tire changes from race to race, the sport of automobile racing had allegedly become a tire race, not a driver's race. Thus, in the early years of modified racing, a relatively small recapped tire was being used by all drivers at a more reasonable cost; but as tire technology evolved and tire sizes increased to the 15-inch tread of the 1981 modified season, tires became increasingly softer and, correspondingly, faster, less durable, and more expensive. The cost of a single 15-inch modified tire, as **[**10]** sold by Goodyear in the 1981 racing season, was \$140 and the price of the comparable tire at the beginning of the 1982 season was \$170.

In an effort to control costs, promoters in the Northeast advocated track-tire rules under which all competitors at a particular track are required to race with a single brand of tire for an entire season. As early as 1972, Seekonk adopted a track-tire rule for the modified class. Three years later, Arute organized a meeting in New York City among track promoters and tire company representatives to discuss tire rules. In 1978, the Northeast Promoters Association, organized by Stafford promoter Edwin Yerrington, proposed that twenty tracks in the Northeast implement a one-brand, one-tire rule. Initially and for various reasons, drivers and owners opposed track-tire rules. The track-tire rule adopted at Seekonk in 1972 led to a driver's strike allegedly due to manufacturer failure to supply enough of the designated tires. The 1978 proposal for a twenty-track tire rule was rejected by NEDOC members, in part because they believed that the single brand rule would violate federal antitrust laws.

IV. Facts

In 1980, Stafford's Yerrington **[**11]** renewed his proposal for a track-tire rule. At a NEDOC meeting held on August 5, 1980, Yerrington informed the members present that Stafford planned to impose its own track-tire rule for the 1981 season. The promoters at Seekonk, Thompson, and Riverside later made similar announcements. Following Yerrington's announcement, NEDOC selected a rules committee to investigate the adoption of a single-brand tire rule.

At the annual meeting of NEDOC held on January 6, 1981, Yerrington informed the membership that he had conducted some tire tests at Stafford. He further suggested that NEDOC itself adopt a single-brand rule. The members voted to study the feasibility of a tire rule and contact tire companies regarding their ability to supply the required tires. The day after NEDOC's annual meeting, Yerrington contacted Hoosier and McCreary to inform them of NEDOC's interest in a single-brand tire rule and to request those companies to submit proposals for such a rule. In response to Yerrington's inquiry and a subsequent request by NEDOC president Armstrong, **[*598]** Newton, president of Hoosier, replied that Hoosier was ready to recommend a suitable tire. McCreary also replied that **[**12]** it was willing to supply a tire for track-tire rule purposes.

At a March 3, 1981 meeting, NEDOC members voted to conduct tests to select a single-brand, low cost tire for use in modified racing. After the March 3 vote, NEDOC again contacted the tire companies, this time to request tires for testing. The date set for testing was May 1, 1981. In response, M&H questioned the legality of the rule and the fairness of the proposed test in a memorandum to NEDOC dated April 19, 1981.

M&H agreed to submit tires for testing, but otherwise refused to participate in the NEDOC program until the issues of legality and fairness were addressed. NEDOC did not attempt to answer M&H upon these issues.

The May 1, 1981 test was cancelled because only two volunteer drivers and two tire companies appeared. As a result, NEDOC did not adopt a tire rule for the 1981 season.

NEDOC again tried to implement a tire rule in the fall of 1981. On October 1, 1981, the NEDOC Rules Committee met with representatives of Hoosier, M&H, Goodyear, and McCreary to discuss a tire rule for the 1982 racing season. Armstrong informed each tire company representative that the company whose tire was chosen would be required [**13] to supply all the tires needed at the four tracks where NEDOC members raced at a guaranteed price for the entire 1982 season. Armstrong also told the tire company representatives that NEDOC required a tire in the \$90-\$100 range, about \$40-\$50 less than the prevailing price for modified tires during the 1981 season.

NEDOC conducted two tire tests at Stafford in the fall of 1981: the first in September or October; and the second on November 7. That organization did not adopt any written procedures for conducting the tire tests prior to the beginning of testing. According to the testimony, NEDOC gave relatively short notice of the first test, so that M&H had only a four-year old tire available and Goodyear was unable to produce a tire in the required size in time for the first test. Armstrong did, nevertheless, use the available tires from these two companies for testing purposes.

The first test was held at Stafford and took about two to two and one-half hours. Three cars participated and four tire companies: Hoosier, M&H, Goodyear, and McCreary. Notes were taken regarding the testing by Richard Armstrong's wife as well as by Robert Garbarino, Chairman of the Rules Committee.

[**14] On the basis of the first day of testing, it was Armstrong's opinion that at least two of the tires might meet NEDOC's requirements: The Hoosier Budget Tire and the M&H 91.

The second day of testing took place on November 7, 1981 and took one and one-half to two hours. Two different cars participated in the second test and were driven by two different drivers. The same four tire companies took part although not necessarily using the same tires that had been used in the first test. Both M&H and Goodyear furnished new tires for the second test. NEDOC did not inform Goodyear or M&H that the new tires had to be tested twice for "repeatability" in order to be considered for the NEDOC rule. According to Armstrong's testimony he believed the tire companies knew or should have known this fact without being told. In any event, neither the M&H 91 nor M&H's new tire were tested a second time.

After the second test, NEDOC solicited and received bids from the four tire companies. The Rules Committee then selected the Hoosier 13-inch Budget Tire for use in modified racing during the 1982 season.

On November 23, 1981, the NEDOC Rules Committee met with Stafford promoter Yerrington, the [**15] original proponent of the track-tire rule. Yerrington, however, was reluctant to adopt the proposed rule unless the promoters at the other area tracks also agreed to implement the rule. At Yerrington's request, the Rules Committee arranged [*599] a meeting at the Howard Johnson's Motor Lodge in Warwick, Rhode Island on December 17, 1981 attended by Stafford promoter Yerrington, Seekonk promoter D. Anthony Venditti, and Irving Potter, president of NEPRA, the promoter at Thompson and Riverside. At the meeting, the promoters and NEDOC officials unanimously agreed to require all cars in the modified division to use the Hoosier 13" Budget tire for the 1982 season.

In order to be assured that Hoosier had the capacity to supply the required number of tires, members of the Rules Committee, NEDOC President Armstrong, and Seekonk promoter Venditti visited the Hoosier plant in Lakeville, Indiana on January 15, 1982.

At NEDOC's 1982 Annual Meeting held on January 19, 1982, the Rules Committee reported on the selection of the Hoosier Tire and the visit to the Hoosier plant. On January 28, 1982, NEPRA President Potter withdrew from the tire rule agreement because of the advice of counsel [**16] to the effect that the tire rule could cause antitrust problems. On February 18, 1982, NEDOC held a Special Car Owners Meeting to discuss rule changes and immediately after that, on March 11, 1982, M&H filed the present suit. At the start of the 1982 season, both Seekonk and Stafford enforced the Hoosier tire rule. Problems with the Hoosier tire began to surface, soon after the season began. Despite attempted modifications, the problems persisted and consequently, Stafford abandoned the tire rule on August 6, 1982. Seekonk continued to enforce it through the 1982 season.

V. Applicable Law

The issue in this case is whether the Hoosier track-tire rule proposed by NEDOC and enforced at Stafford and Seekonk during the 1982 season constituted a group boycott of non-tire rule tires, having the express purpose as well as the effect of restraining competition in the manufacture and distribution of modified class racing tires in violation of [Section 1](#) of the Sherman Act. [Section 1](#) of the Sherman Act provides, in relevant part, that

HN1[] Every contract, combination . . . or conspiracy in restraint of trade or commerce among the several states, . . . is declared to be illegal [**17] . . .

[15 U.S.C. § 1.](#)

This case requires the Court to consider: 1) whether the legality of the track-tire rule is governed by a *per se* rule or by the rule of reason, and; 2) whether the track-tire rule, if tested by the rule of reason, is a reasonable restraint. On the basis of each test considered separately, I rule the tire rule violates the Sherman Act.

A. Per Se Illegality

1. Conspiracy

HN2[] [Section 1](#) of the Sherman Act requires that there be concerted action among businessmen from which the Court or jury can reasonably infer that the participants had a conscious commitment to a common scheme designed to achieve an unlawful objective. [Sweeney & Sons, Inc. v. Texaco](#), 637 F.2d 105, 111 (3d Cir. 1980).

I find that on December 17, 1981, there was a meeting at the Howard Johnson Motor Lodge in Warwick, Rhode Island, attended by members of the NEDOC Rules Committee and by the promoters at Stafford, Seekonk, Thompson, and Riverside. At that meeting, NEDOC President Richard Armstrong proposed that the tracks adopt a Hoosier tire rule. I also find that the promoters unanimously agreed with Armstrong's recommendation and that the Hoosier tire rule was thereafter [**18] enforced at Stafford and Seekonk. NEPRA, the promoter at Thompson and Riverside, withdrew from the Hoosier tire rule only after its attorney advised that participation in the tire rule could cause legal problems.

Despite this uncontested evidence of coordinated behavior, the defendants maintain that the adoption of the Hoosier tire rule was a separate and unilateral decision on the part of each track. I find no such separate or unilateral decision. Defendants' position ignores both the law of illegal combinations and the evidence at trial.

[*600] **HN3**[] Proof of a combination or conspiracy under [Section 1](#) of the Sherman Act does not require the existence of an express agreement. In the leading case of [Interstate Circuit Inc. v. United States](#), 306 U.S. 208, 226, 83 L. Ed. 610, 59 S. Ct. 467 (1939) the Supreme Court ruled that it was "enough that, knowing that concerted action was contemplated and invited, the distributors gave their adherence to the scheme and participated in it." [United States v. Paramount Pictures, Inc.](#), 334 U.S. 131, 142, 92 L. Ed. 1260, 68 S. Ct. 915 (1948); [United States v. Parke, Davis & Co.](#), 362 U.S. 29, 4 L. Ed. 2d 505, 80 S. Ct. 503 (1960); [**19] [United States v. Container Corp. of America](#), 393 U.S. 333, 337, 21 L. Ed. 2d 526, 89 S. Ct. 510 (1969); [Sweeney & Sons, Inc. v. Texaco](#), *supra*.

The evidence at trial proved that concerted action was contemplated, invited, and adhered to. New England promoters had been attempting to institute track-tire rules since 1972, when Venditti introduced such a rule at Seekonk. According to Joseph Jacobs, Manager of Racing for McCreary Tire and the self-proclaimed inventor of track-tire rules, track rules permit promoters to offer competitors some relief from the escalating costs of racing without increasing prize money.

However, I find that to introduce a track-tire rule successfully, the promoter must have the acquiescence of the drivers who regularly race at his track. Drivers have the power to undermine unwanted rules by staying home, as they did in 1972, when Venditti introduced a tire rule at Seekonk. Moreover, when a promoter adopts a track-tire rule at a NASCAR-sanctioned track, he risks the wrath of drivers who travel from track to track in pursuit of point

money, and who resent having to purchase special equipment to race one track. Thus, the promoters have a strong incentive [**20] to coordinate their tire rules with each other and with car owners.

In this case, I find that the invitation to concerted activity was first extended by Yerrington on August 5, 1980, when he informed a meeting of NEDOC car owners that he planned to implement a track-tire rule at Stafford for the 1981 season. Yerrington renewed this invitation in January 1981, when he told the Annual Meeting of NEDOC that NEDOC should adopt its own tire rule. Later, the promoters at Seekonk, Thompson, and Riverside informed NEDOC that they too would adopt track-tire rules unless NEDOC acted.

I find that the NEDOC membership, concerned that the tracks would adopt inconsistent rules, formed a committee to investigate available tires. The Committee met with representatives of major tire companies, conducted two tests at Stafford, solicited bids from the tire companies, and decided to recommend that the tracks adopt the Hoosier 13-inch Budget tire for the 1982 season.

As soon as the NEDOC committee selected the Hoosier Budget tire, it met with Yerrington, the original proponent of the rule. Yerrington was reluctant, however, to commit Stafford unless promoters at the other three area tracks also [**21] agreed. NEDOC then summoned the promoters to the December 17 meeting at the Howard Johnson Motor Lodge, at which I find that it was unanimously agreed by the four race facilities promoters to adopt the NEDOC proposed Hoosier 13-inch Budget tire for the 1982 racing season.

I rule that from this evidence it is clear that, for purposes of the Sherman Act, NEDOC and the tracks contemplated and participated in concerted action to adopt the Hoosier tire rule.

I further find that Hoosier participated in the combination between NEDOC and the track promoters. Among the actions that I find were taken by Hoosier to insure that its Budget tire would be designated by NEDOC are the following. Hoosier offered to participate in the tire test originally scheduled for May 1, 1981. Hoosier representative Bobby Summers attended the meeting between NEDOC and the tire companies on October, 1981. Hoosier submitted tires for testing at the two tire tests held in the fall of 1981. After the tire tests, Hoosier submitted a bid. Hoosier agreed to hold the [*601] retail price at a specified price for the entire 1982 season and to supply all the tires needed at the four New England tracks where NEDOC [**22] members raced. Newton invited NEDOC and the track promoters to visit Hoosier's plant in Lakeville, Indiana. After the racing season began Hoosier, at the request of NEDOC, made technical changes in its track tire. From this evidence, the Court finds that Hoosier as well as NEDOC and the tracks participated in a combination within the meaning of Section 1.

Contrary to defendant's assertions, the conspiracy was not terminated as of February 18, 1982, when Seekonk and Stafford became aware of NEPRA's withdrawal from the track-tire rule agreement. The conspiracy existed as of December 17, 1981 and continued until the end of the 1982 racing season at Seekonk, the last remaining track operating, pursuant to the conspiracy. The withdrawal of various conspirators along the way did not affect the existence of the conspiracy itself which continued until its objectives were fulfilled. Accordingly, I rule that plaintiff has proved that NEDOC, the tracks and Hoosier shared a mutual commitment to an anticompetitive course when they contemplated and participated in a concerted action to adopt the Hoosier tire rule to the exclusion of all competing tires.

2. Group Boycott

HN4 [↑] While the language [**23] of Section 1 is broad enough to render illegal many commercial understandings, the Supreme Court in Standard Oil of New Jersey v. United States, 221 U.S. 1, 55 L. Ed. 619, 31 S. Ct. 502 (1911), established the "rule of reason" as the prevailing mode of analysis. Under this rule, the fact finder balances all the circumstances of a case in deciding whether a restrictive practice is illegal under the Act as an unreasonable restraint on competition. The analysis required by the rule of reason, however, is laborious, and as the courts gained experience with antitrust problems they identified certain types of agreements that were so consistently unreasonable that they could be deemed illegal *per se*, without exhaustive inquiry into their purported justifications. Northern Pacific Railway Co. v. United States, 356 U.S. 1, 5, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958). **HN5** [↑] Among the practices that have been deemed so pernicious as to be unreasonable *per se* are group boycotts. United States

v. General Motors Corp., 384 U.S. 127, 145-46, 16 L. Ed. 2d 415, 86 S. Ct. 1321 (1966); Radiant Burners, Inc. v. Peoples Gas Light and Coke Co., 364 U.S. 656, 5 L. Ed. 2d 358, 81 S. Ct. [*241] 365 (1961); Klor's, Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207, 212-13, 3 L. Ed. 2d 741, 79 S. Ct. 705 (1959); Fashion Originators' Guild v. FTC, 312 U.S. 457, 85 L. Ed. 949, 61 S. Ct. 703 (1941); See Silver v. N.Y. Stock Exchange, 373 U.S. 341, 347, 10 L. Ed. 2d 389, 83 S. Ct. 1246 (1963). The classic group boycott, deserving of *per se* condemnation, is an agreement designed to eliminate competition by a concerted refusal to purchase from or sell to the business rivals of one or more of the conspirators. United States v. General Motors Corp., *supra*, at 140; Klor's Inc. v. Broadway-Hale Stores, Inc., *supra*, at 213.

The tire rule agreed upon by Hoosier, NEDOC, Stafford Springs, and Seekonk represents precisely such an agreement: a group of purchasers (the NEDOC members) combined with a group of middlemen (the track promoters) and with one supplier (Hoosier) to eliminate all competition for the sale of racing tires at the affected tracks. The adoption of the track-tire rule in effect enabled Hoosier to foreclose other racing tire manufacturers from the most popular class of racing at some of the most prestigious tracks in the Northeast.

Defendants argue [**25] correctly that the circumstances of this case do not fit the traditional parameters of horizontal group boycott activity. HN6 [↑] The traditional definition of group boycott is a concerted attempt by a group of competitors at one level to protect themselves from competition from non-group members who seek to compete at that level. Klor's Inc. v. Broadway-Hale Stores, Inc., *supra*, at 212; Brenner v. World Boxing Council, 675 F.2d 445, 454 (2d Cir. 1982). In other words, the agreement is "between business competitors in the traditional sense." Mackey v. National Football League, 543 F.2d 606, 619 (8th Cir. 1976). Defendants claim, in effect, that a group boycott would exist in this case only if two or more tire companies joined together to eliminate a third.

Defendants' argument overlooks however, the clear teaching of Klor's, Inc. v. Broadway-Hale Stores, Inc., *supra*, at 107. In that case, Klor's operated an appliance store next door to one of the outlets of Broadway-Hale. Klor's alleged that Broadway-Hale had conspired with major manufacturers and distributors of appliances not to sell to Klor's. The Supreme Court held that HN7 [↑] the conspiracy between Broadway-Hale [**26] and the manufacturers and distributors of appliances constituted a *per se* violation of Section 1 of the Sherman Act, even though the conspiracy involved only a single retailer and was directed at only a single competitor. The case of United States v. Ciba Geigy Corp., 508 F. Supp. 1118 (D.N.J. 1976), is also relevant on the issue whether to treat business arrangements as horizontal or vertical for purposes of group boycott analysis. In *Ciba Geigy* there were a series of supply agreements which limited the range of uses to which a purchaser was entitled to put sold material. Although the contracts were reached in a vertical, supplier-purchaser contract, the Court found that they in fact were designed to limit horizontal competition between Ciba and its vendees. The Court further held that HN8 [↑] where it is shown that a vertically imposed restraint is intended to suppress horizontal competition, the agreement is the equivalent of a horizontal restraint of trade. United States v. Ciba Geigy Corp., *supra*, at 1146.

Defendants claim that the arrangement among NEDOC, the track promoters and Hoosier is analogous to a vertical relationship, and that vertical agreements are illegal [**27] *per se* only if their purpose is price fixing. Products Liability Insurance Agency, Inc. v. Crum & Forster Insurance Companies, 682 F.2d 660, 663 (7th Cir. 1982). The combination among NEDOC, the tracks, and Hoosier bears little resemblance to the vertical relationship between manufacturer and dealer dealt within the leading case of Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 52-54, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977). Moreover, even if the proposed analogy to vertical relationships were apt, the combination among the defendants' would still be illegal *per se*, because the aim of the tire rule was unmistakably to fix prices.

At the meeting between NEDOC and the tire companies on October 1, 1981, NEDOC informed each of the tire companies that it expected them to guarantee a fixed price of between \$90 and \$100 for the upcoming season. To achieve this goal, it was necessary to adopt track rules designating a single brand of tire at a stated price. Only through single-brand rules could NEDOC and the tracks assure themselves that the price of racing tires would not rise over the course of a season through the introduction of new, more successful, and [**28] accordingly more expensive products.

HN9 [↑] The evidence demonstrates, therefore, that a group of purchasers combined with two track promoters and a tire company to fix the maximum price of tires by eliminating competition from other sellers. I rule that this combination is in fact "within the undeniably anti-competitive *per se* boycott paradigm." [U.S. Trotting Assoc. v. Chicago Downs Assoc. Inc., 665 F.2d 781, 790 \(7th Cir. 1981\)](#).

3. Sports Self-Regulation

Defendants argue that this case is a case of attempted sports self-regulation by a sports organization, and that the rule of reason, not the *per se* rule is uniformly applied to such cases of self-regulation.

The Court notes in the first instance that **HN10** [↑] sports other than baseball are subject to the antitrust laws, [Flood v. Kuhn, 407 U.S. 258, 276-83, 32 L. Ed. 2d 728, 92 S. Ct. 2099 \(1972\)](#), and among the antitrust restrictions that apply to sports are prohibitions [*603] against group boycotts. [Washington State Bowling Proprietors Assoc. v. Pacific Lanes Inc., 356 F.2d 371, 376 \(9th Cir. 1966\)](#); [Blalock v. Ladies Professional Golf Assoc., 359 F. Supp. 1260, 1264-68 \(N.D. Ga. 1973\)](#).

There has been judicial [**29] recognition, however, that in professional sports, unlike many other forms of business competition, "a few rules are essential to survival," [Hatley v. American Quarter Horse Assoc., 552 F.2d 646, 652 \(5th Cir. 1977\)](#), and accordingly courts have been reluctant automatically to subject the cooperative activities of sports organizations to application of the group boycott *per se* rule. [Brenner v. World Boxing Council, 675 F.2d 445, 454 \(2d Cir. 1982\)](#). These cases all recognize that the legitimate goal of such sports regulation is the preservation of participant parity and competitive equivalency,¹ and some courts have chosen a more extended analysis of the administrative regulations of sports organizations that focuses on the purpose of the regulation and the procedures followed in adopting it. See, e.g., [Brenner v. World Boxing Council, supra at 454-55](#). The cases do not, however, give sports organizations unlimited discretion in adopting rules and regulations. First, it has been recognized generally that when the purpose of a sports regulation is to eliminate business competition, the concerted action is not eligible for rule of reason analysis and must be subjected [**30] to *per se* treatment. See [U.S. Trotting Assoc. v. Chicago Downs Assoc., supra at 788-89](#); [Smith v. Pro Football, Inc., 193 U.S. App. D.C. 19, 593 F.2d 1173, 1177-80 \(D.C. Cir. 1978\)](#); [Blalock v. Ladies Professional Golf Assoc., supra, at 1265-68](#).

[**31] Second, recent cases have recognized that **HN11** [↑] sports regulations must satisfy basic tenets of procedural fairness. According to the three-pronged test announced in [Denver Rockets v. All-Pro Management Co., Inc., 325 F. Supp. 1049, 1064-65 \(C.D.Cal. 1971\)](#), a sports regulation can escape *per se* treatment only if: 1) there is a legislative mandate for self-regulation, or otherwise, and; 2) the collective action is intended to achieve an objective consistent with the policy justifying self-regulation, is reasonably related to that objective, and is no more extensive than necessary, and; 3) the governing organization provides procedural safeguards to protect against arbitrary restraints and to provide a basis for judicial review. Accord, [Brenner v. World Boxing Council, supra, at 454-55](#); [Gunter Harz Sports, Inc. v. United States Tennis Assoc., 511 F. Supp. 1103, 1116 \(D.Neb.\), aff'd, 665 F.2d 222 \(8th Cir. 1981\)](#); [Linseman v. World Hockey Assoc., 439 F. Supp. 1315, 1321 \(D.Conn. 1977\)](#).

The Hoosier track-tire rule does not meet these standards for several reasons. First, the objective of the rule is plainly to fix prices. NEDOC recommended the adoption of the tire [**32] rule in order to fix the price of modified racing tires in the range of \$90-\$100 for the 1982 season. Price-fixing even to achieve a legitimate goal such as competitive equivalency is not an objective of sports regulation.

¹ [Brenner v. World Boxing Council, 675 F.2d 445 \(2d Cir. 1982\)](#); [North American Soccer League v. National Football League, 670 F.2d 1249, 1258-59 \(2d Cir. 1982\)](#); [U.S. Trotting Assoc. v. Chicago Downs Assoc., Inc., 665 F.2d 781, 789-90 \(7th Cir. 1981\)](#); [Gunter Harz Sports, Inc. v. United States Tennis Assoc., 511 F. Supp. 1103, 1115-16 \(8th Cir. 1981\)](#); [Hatley v. American Quarter Horse Assoc., 552 F.2d 646, 652 \(5th Cir. 1977\)](#); [Neeld v. NHL, 594 F.2d 1297, 1298-1300 \(9th Cir. 1979\)](#); [Mackey v. NFL, 543 F.2d 606, 619 \(8th Cir. 1976\)](#), cert. denied, [434 U.S. 801, 54 L. Ed. 2d 59, 98 S. Ct. 28 \(1977\)](#); [Cooney v. American Horse Shows Assoc., 495 F. Supp. 424, 430 \(S.D.N.Y. 1980\)](#); [Denver Rockets v. All-Pro Management Inc., 325 F. Supp. 1049, 1064-65 \(C.D. Cal. 1971\)](#); [STP Corp. v. U.S. Auto Club, Inc., 286 F. Supp. 146 \(S.D. Ind. 1968\)](#).

Second, the goal of fixing the price of modified racing tires was achieved by designating one tire company as the sole supplier of tires, thereby eliminating all inter-brand competition at the affected tracks. The Court is not aware of any case that has approved the elimination of inter-brand competition as a legitimate form of sports self-regulation.

[*604] Third, the rule was not adopted by an independent sanctioning organization interested in the health of the sport as a whole. The defendants admit that neither NEDOC, NEPRA nor NASCAR (the latter two not parties to this suit) is the recognized sanctioning organization governing amateur and/or professional automobile racing in the Northeast. Defendants contend that "short oval" automobile racing lacks the formal overall regulatory scheme of such sports as football and basketball, and that the tracks themselves are the customary and primary source of the rules and regulations governing their races in [*33] the various divisions. Defendants would have the Court hold that each race track is itself a recognized sanctioning organization for purposes of antitrust analysis. That position is not supportable in law. If the Court were to hold that any sports organization lacking in overall regulatory scheme were exempt from *per se* application of the antitrust laws, it would in effect extend to such independent sports groups *carte blanche* permission to adopt any rules they chose regardless of the anticompetitive effect. The weight of the antitrust law, on the contrary, suggests that if sports associations wish to avoid strict application of the antitrust laws, they must organize and create sanctioning bodies whose responsibility it is to insure the integrity and continuity of the sport.

Defendants claim that the existence of a formal sanctioning body is not formally required by law before defendants can claim the benefit of the rule of reason holdings in the sports cases. Defendants argue that to impose such requirement is tantamount to forcing defendants to conspire (i.e. to form a league or sanctioning body) before they could further conspire (i.e. under the aegis of such a league) [*34] to adopt a reasonable rule. Defendants assert that the situation of the unorganized tracks here is analogous to local golf clubs who in conjunction with their membership adopt rules respecting permitted equipment. The Court suggests that were all the major golf clubs in the Northeast to decide as a group that, to insure competitive equivalency among golfers, they would adopt a rule designating one brand of golf club to be manufactured by one company; and were the clubs further to agree that no golfer without the designated brand could play in tournaments at those clubs, there would be an antitrust problem in that situation as serious as the one in this case.

Fourth, the procedures followed by NEDOC in arriving at the Hoosier tire rule lacked procedural fairness. The notice given to the tire manufacturers of the tests held in the fall of 1981 was inadequate; the tire manufacturers were not informed of key criteria used in judging the tires; the procedures followed during the tire tests were hit or miss as well, in that they failed to account for relevant variables and were not adequately recorded. Moreover, from the scanty NEDOC records which survived, it is not possible for the [*35] Court to determine why NEDOC thought that the Hoosier Budget tire was superior to other tires tested, such as the Goodyear M-23 or the M&H 91 and 95. Compare [Silver v. New York Stock Exchange, supra, 373 U.S. at 362-363](#) (discussing importance of procedural due process as providing a basis for judicial review).

The Court fully supports the proposition that professional sports need some rules preferably ones superior to the law of the jungle in order to survive. However, that proposition does not legalize the track-tire rule under the circumstances of this case, since it is a device designed by a group of purchasers to fix the price of tires by eliminating inter-brand competition. This Court accordingly rules that the tract-tire rule proposed by NEDOC and enforced at Stafford and Seekonk during the 1982 racing season constituted a group boycott in *per se* violation of [Section 1](#) of the Sherman Act.

B. Rule of Reason

I further rule that even if judged under the rule of reason, the track-tire rule violated the antitrust laws. [HN12](#) Under the rule of reason, a restraint must be evaluated to determine whether it is significantly anticompetitive in purpose or effect. [*605] [*36] In making this evaluation the Court will analyze "the facts peculiar to the business, the history of the restraint, and the reasons why it was imposed." [National Society of Professional Engineers v. United States, 435 U.S. 679, 692, 55 L. Ed. 2d 637, 98 S. Ct. 1355 \(1978\)](#); [Smith v. Pro Football, Inc., supra, at 1183](#). If, on analysis, the restraint is found to have legitimate business purposes whose realization serves to promote competition, the anticompetitive evils of the challenged practice must be balanced carefully against its

procompetitive virtues to ascertain whether the former outweighs the latter.² [**37] A restraint is unreasonable if it has the net effect of substantially impeding competition.³

The Court notes that the more carefully considered sports regulation cases have applied a very restricted version of the rule of reason. Under the test announced in *Denver Rockets*, *supra*, [HN13](#)[] a sports regulation that seeks an improper objective, or is overly broad, or was not adopted pursuant to fair procedures, is condemned as a *per se* violation of the antitrust laws without further inquiry into its ultimate economic consequences. In this respect, the *Denver Rockets* decision follows the teachings of the Supreme Court in [*Silver v. New York Stock Exchange, supra, 373 U.S. at 364-65*](#). As analyzed by the Court above, the Hoosier tire rule fails the *Denver Rockets* test and is therefore illegal [**38] *per se*.

Defendants argue that the *Denver Rockets* case is not applicable in the present context. They argue that *Denver Rockets* involved a situation in which the particular restriction entirely precluded the complainant from the market in question, in that the rule was adopted by a sporting association whose determination then became binding on every competitor in the league. Defendants contend that in the instant case, the challenged rule-making activities were done on a single or two-track basis and that plaintiff was not precluded from doing business with the other two tracks who withdrew from the track-tire rule prior to the opening of the 1982 season. Defendant argues that whether or not the adoption of the rule was joint as between Seekonk and Stafford, it was certainly confined to those two tracks alone and did not have any further exclusionary effect.

The Court has found *supra* that the December 17, 1981 meeting resulted in a conspiracy among all four major Northeast automobile racing tracks to adopt the tire rule, and that the conspiracy continued until the end of the 1982 racing season. Accordingly, M&H was initially foreclosed from the tire market at [**39] all four tracks, and ultimately foreclosed from 50 percent of the market during most of the 1982 season. The exclusionary effect of foreclosure from even 50 percent of the market is significant and substantial for purposes of antitrust analysis.

Defendants further object to the use of the *Denver Rockets* case on the grounds that it is now a largely outmoded analytic approach to the avoidance of *per se* rule. The more modern analysis, defendants suggest, is reflected in the First Circuit's recent case, [*Allied International, Inc. v. ILA, 640 F.2d 1368 \(1st Cir. 1981\)*](#). *Allied* involved a suit by a Massachusetts importer of wood products from the Soviet Union [*606] against the longshoremen's union for refusing to unload a Soviet ship in a United States harbor as a protest against the Soviet Union's invasion of Afghanistan.

Allied involves a politically motivated boycott. In this regard it is similar to the case of [*Missouri v. National Organization of Women, Inc., 620 F.2d 1301 \(8th Cir. 1980\)*](#) which involved a boycott of all convention facilities in states that had not ratified the equal rights amendment. In neither of these cases did the Court apply the [**40] Sherman Act. As stated by those Courts, and as stated above by this Court, [HN14](#)[] the Act is aimed primarily at combinations having commercial objectives and should be applied sparingly to organizations that normally have other objectives such as labor unions, political lobbying groups, or sports associations.

² See [*Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 49, 97 S. Ct. 2549, 2557, 53 L. Ed. 2d 568 \(1977\)*](#), citing [*Chicago Bd. of Trade v. United States, 246 U.S. 231, 238, 38 S. Ct. 242, 62 L. Ed. 683 \(1918\)*](#) (under the rule of reason, "the factfinder weighs all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition"). Cf. [*id. at 50 n.16, 97 S. Ct. at 2558*](#) (in determining whether a particular commercial practice should be prohibited *per se*, "the probability that anticompetitive consequences will result from [the] practice and the severity of those consequences must be balanced against its pro-competitive consequences").

³ See [*National Society of Professional Engineers v. United States, 435 U.S. at 691, 98 S. Ct. at 1365*](#), quoting [*Chicago Bd. of Trade v. United States, 246 U.S. at 238, 38 S. Ct. at 244*](#), ("The true test of legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition.")

Contrary to defendants contentions, however, the case at bar is not appropriately analyzed within a political framework such as the one in *Allied* or *Missouri*. It is appropriately analyzed within the rule of reason framework as it is established in the sports regulation cases including *Denver Rockets* and its progeny.

Moreover, even under the extended rule of reason analysis advocated by the defendants, the Hoosier track-tire rule must fail. [HN15](#)[[↑]] Analysis under the rule of reason starts from the premise that the Sherman Act reflects a legislative judgment that ultimately competition will produce not only lower prices, but also better goods and services. [*National Society of Professional Engineers v. United States, supra, 435 U.S. at 695*](#). The purpose of a rule of reason analysis is to form a judgment about the competitive significance of the restraint. And practices which [**41] are unreasonably restrictive of competitive conditions must be condemned, even though they have beneficial effects in other areas.

In this case there was evidence in the form of testimony from Dr. Dalton, that multi-track tire rules have a detrimental impact on competition in the racing tire market. Although the racing tire market is relatively concentrated with only four or five active suppliers, it is nevertheless highly competitive, primarily because, according to Dr. Dalton, open competition gives tire manufacturers the opportunity and the incentive to innovate. Track-tire rules eliminate competition over the course of the season and substitute, instead, the designation of a single tire made from less-expensive material. Such rules lessen both the incentive and the opportunity to innovate. Such rules also raise barriers to entry into the market and increase opportunities for collusion, although there was no evidence of collusion in this case. Thus, in the long run, these rules are likely to lead to higher prices and lower-quality tires.

Defendants have offered the testimony of certain drivers who claim to prefer competition under track-tire rules. No doubt many drivers [**42] are in favor of such rules because under the Hoosier tire rule, the price of tires was approximately \$50 less in 1982 than in 1981. In our economy, however, prices are set by the impersonal forces of competition, and not by consumer preference. Furthermore [HN16](#)[[↑]] the law protects the impersonal forces of competition, rather than consumer preference, on the basis that economic forces will ultimately enhance consumer welfare. See [*Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 486, 50 L. Ed. 2d 701, 97 S. Ct. 690 n. 10 \(1977\); Reiter v. Sonotone Corp., 442 U.S. 330, 343, 60 L. Ed. 2d 931, 99 S. Ct. 2326 \(1979\)*](#).

The defendants also seek to justify tire rules as essential to controlling the cost crisis in racing. The evidence at trial, however, indicated that the cost crisis affects not only racing tires, but also racing engines, racing chassis, gasoline, and other components as well. The evidence further demonstrated that one of the reasons for the crisis is that purses offered by track promoters have not kept pace with the every-day cost of racing an automobile. Alternative approaches to the cost crisis could include increased purses, objective specifications restricting [**43] engine performance, or [*607] some more reasonable approach to tire specification.

In sum, the evidence at trial did not demonstrate that the Hoosier tire rule was essential to the survival of professional auto racing as a sport, or that, over time, such a tire rule would effectively cut costs at all.

Defendant argues that when a restraint is challenged under the rule of reason, the plaintiff has the burden of establishing not only that the restraint is unreasonable but also a relevant geographic and product market within which to measure the effect of the restraint. [*Gough v. Rossmoor Corp., 585 F.2d 381 \(9th Cir. 1978\)*](#) (the restraint, even if unreasonable, must adversely affect competition and not merely one competitor); [*Dougherty v. Continental Oil Co., 579 F.2d 954 \(5th Cir. 1978\)*](#) (must evaluate the operation of the restraint in the context of a defined geographic and product market).

As stipulated among the parties, the relevant product market was racing tires. Plaintiff has established that the relevant geographic market was the Northeastern United States. Plaintiff further established that there are four major New England race tracks that conduct such racing. [**44] Defendants contend that in addition to the four defendant tracks there were other tracks in New England that conduct modified racing. Since no sales data was furnished on tire sales at those tracks, defendant argues that plaintiff has failed to establish a defined geographic market. The Court holds, to the contrary, that [HN17](#)[[↑]] plaintiff has made out a prima facie case under the rule of reason of "proof of a well-defined relevant market upon which the challenged anticompetitive actions would have

had a substantial impact." *Dougherty v. Continental Oil Co., supra, at 963*. Plaintiff has presented evidence that there are four *major* tracks in the Northeast that conduct automobile racing in the modified class. Defendant has presented no convincing evidence to the contrary and therefore plaintiff adequately established the existence of a relevant market.

Accordingly, the Court rules that under a rule of reason analysis, the Hoosier track-tire rule as it existed in 1982 had severe anticompetitive effects and demonstrated insufficient procompetitive virtues, and that it therefore unreasonably restrained trade in violation of *Section 1* of the Sherman Act.

VI. Damages

HN18 [**45] Once the fact of injury to the plaintiff has been established, the amount of damages may be fixed by the trier of fact according to a just and reasonable estimate of the damages based on relevant data, including both probable and inferential, as well as direct and positive proof. *Bigelow v. RKO Radio Pictures, Inc.*, 327 U.S. 251, 264, 90 L. Ed. 652, 66 S. Ct. 574 (1946); see *Story Parchment Co. v. Paterson Parchment Paper Co.*, 282 U.S. 555, 75 L. Ed. 544, 51 S. Ct. 248 (1931).

At Thompson and Riverside in 1982 where open tire competition was permitted, M&H, according to Rifchin and Garuti, his distributor, sold approximately 40 percent of the tires sold at Riverside and approximately 60 to 65 percent of those sold at Thompson. Potter, the promoter at those two tracks, contradicted this testimony. Potter testified that in the beginning of the 1982 season M&H had a 45 to 50 percent share of sales at those two tracks but that, by the end of the season, that figure had declined to approximately 35 percent. According to Potter's testimony, Goodyear had the major portion of the tire market for the modified class in 1981 when drivers were running on a 15-inch tire. When track promoters [**46] revised the allowable tire size on the modified division in 1982 to 13 inches, however, Goodyear was late in producing the new-sized tire, apparently giving M&H a competitive edge in the 1982 season. By the end of the season Goodyear had come out with its 13-inch tire and, according to Potter, M&H's lead was reduced.

In 1982, Hoosier sold 1,822 13-inch Budget tires for use under track-tire rules at Seekonk for the whole season and at Stafford until August 6. Rifchin testified that M&H could have supplied all these tires without purchasing additional equipment, hiring additional personnel, leasing additional [*608] space, or incurring other overhead expenses. The Court finds that, based upon Goodyear and M&H tire sales at Riverside and Thompson, it is reasonable to infer that, had the track-tire rule not been in effect, M&H would have obtained approximately 45 percent of those Hoosier sales, at a gross profit of \$30 per tire equalling \$24,597.⁴

[**47] VII. Injunctive Relief

HN19 [**48] Under Section 16 of the Clayton Act, a plaintiff is entitled to an injunction to prevent threatened loss or damage by a violation of the antitrust laws. *15 U.S.C. § 26 (1982)*. Injunctive relief is appropriate, even though the illegal practice has been seasonally discontinued, unless it is clear that the practice will not recur. *United States v. Concentrated Phosphate Export Assoc.*, 393 U.S. 199, 203, 21 L. Ed. 2d 344, 89 S. Ct. 361 (1968); *United States v. W. T. Grant*, 345 U.S. 629, 632, 97 L. Ed. 1303, 73 S. Ct. 894 (1953); *Allee v. Medrano*, 416 U.S. 802, 810-11, 40 L. Ed. 2d 566, 94 S. Ct. 2191 (1974). In this case it is likely that, due to driver pressure, multi-track tire rules will be proposed and may well be adopted in the future. Track promoters have advocated such rules for over a decade, and at least two tire companies, McCreary and Hoosier, advertise the availability of tires for such rules. Moreover, successful tire rules in the modified class require the cooperation of drivers and owners. Therefore I rule that M&H is entitled to injunctive relief against multi-track, single-brand tire rules that designate in the conjunctive, [**48] one compound, one manufacturer, and one price.

Order accordingly.

⁴Total Hoosier sales (1,822 tires) X M&H market share (45%) X M&H gross profit per tire (\$30) = \$24,597.

ORDER

CAFFREY, Ch. J.

In accordance with opinion filed this date, it is ORDERED:

1. That M&H Tire Company, Inc. is awarded single damages in the amount of \$24,597 which when trebled produces a judgment for \$73,791 for plaintiff.
2. Defendants are permanently enjoined from promulgating or enforcing a multi-track, single-brand tire rule which designates one compound, one manufacturer, and one tire price.

Opinion by: BROWNING

Opinion

[*829] BROWNING, Chief Judge:

The district court dismissed plaintiffs-appellants' antitrust treble damage action on the grounds that the statute of limitations barred a portion of the claim and plaintiffs lacked standing to sue on the remainder. We reverse.

I.

Plaintiffs' complaint alleged defendant-appellees, who were engaged in the lumbering and milling business in Oregon, entered into a combination and conspiracy to restrain trade and commerce in timber, logs, and other forest products, the substantial terms of which were:

- (a) To eliminate competitive bidding for United States Forest [**2](#) Service and other timber;
- (b) To allocate United States Forest Service and other timber among themselves;
- (c) To fix, reduce, and stabilize the price paid for United States Forest Service and other timber at or near the minimum acceptable bid set by the United States Forest Service;
- (d) To bid up any non-conspirator who attempted to bid on United States Forest Service and other timber;
- (e) To allocate geographical areas among themselves for buying timber and logs from private landowners, and thus make it difficult for private landowners to receive a fair price for their timber.

The effects of the conspiracy were alleged to have been to eliminate competition and reduce prices paid for Forest Service timber and consequently all timber within the State of Oregon; to prevent sellers of timber such as plaintiffs from selling timber at competitive prices; and to eliminate plaintiffs as a source of logs.

The complaint alleged that in February 1973 plaintiffs acquired an option to purchase certain timber lands in Oregon. The option was to expire May 3, 1973. Plaintiffs intended to finance the purchase by selling timber from the land. As a result of defendants' conspiracy, **[**3]** plaintiffs were prevented from selling the timber at competitive prices. They were forced to relinquish their interest in the property, losing anticipated profits from the sale of the timber and \$35,000 in earnest money.

Plaintiffs' complaint was filed November 6, 1979. Since plaintiffs allegedly lost their option May 3, 1973, the four-year limitations period established by [15 U.S.C. § 15b](#), had expired unless tolled. Plaintiffs alleged the running of the limitations period was suspended pursuant to [15 U.S.C. § 16\(i\)](#) because their complaint was based in part upon facts alleged in prior civil and criminal proceedings instituted by the United States.¹ See [United States v. Champion International Corp., 1975-2 Trade Cas. \(CCH\) P60, 453](#), Crim. No. 74-183 (D. Or. 1975) and [United States v. Champion International Corp.](#), Civ. No. 74-698 (D. Or. 1981).

[4]** Within a month of the filing of the complaint three of the four defendants filed a motion to dismiss under [Federal Rule of Civil Procedure 12](#) on the grounds that the suit was barred by limitations and that plaintiffs lacked standing. The motion also asked the court "to examine into the certificate of the attorneys filing the complaint that there is good ground to support it and that it is not interposed for delay, and, if such certificate is found to be false, to strike the complaint as sham and false." These three defendants requested a stay of discovery pending filing of a [Rule 11](#) certificate. [Fed. R. Civ. P. 11](#). The fourth defendant filed a motion for summary judgment. On January 7, two months after the complaint was filed, the magistrate ordered all discovery stayed pending the filing by plaintiffs' counsel of a "detailed certificate showing facts in [plaintiffs] possession" supporting their contention that the statute of limitations had been tolled. Plaintiffs eventually filed three such certificates in response to the order.

Following oral argument on all pending motions, the district court dismissed the complaint.

The district court noted that three of the four defendants **[**5]** in this action were charged in the prior government proceedings with illegal price fixing in the sale of United States Forest Service timber in the Detroit Ranger District of the Willamette National Forest. The elements of the conspiracy alleged in this action were identical to those alleged in the government actions, except for the addition in the first four elements (subparagraphs (a) through (d) quoted above) of this complaint of the words "and other timber," and the addition of a fifth element -- the allocation among the conspirators of geographic territories for the purchase of timber from private landowners (subparagraph (e) quoted above). The court concluded that "in spite of the added words 'and other timber,' plaintiffs' first four allegations of an illegal conspiracy simply restate the conduct complained of in the government cases."

The court held plaintiffs lacked standing as to this part of the alleged conduct for two reasons: First, plaintiffs' inability to sell timber from private lands outside the Detroit Ranger District, as alleged in their complaint, "was at best incidental to defendants' illegal bidding activities in the Detroit Ranger District" relating to Forest **[**6]** Service timber alleged in both the government and private suits. Second, "plaintiffs have made no showing that, absent defendants' conduct in the Detroit Ranger District, they would have found a buyer" in time to exercise their option, and therefore the relationship between plaintiffs' alleged loss in the sale of private timber outside the Detroit Ranger District and defendants' price fixing in the purchase of Forest Service timber within that District was "totally speculative and [did] not confer standing." Accordingly, the court dismissed "that portion of plaintiffs' claim that rests on the conspiracy complained of in the prior government cases."

The court held plaintiffs' remaining claim of illegal territorial allocation was barred by the statute of limitations. The court held, and plaintiffs agree, that since the judgment was entered against defendants in the criminal case more than a year before the plaintiffs filed their complaint, by the express terms of [15 U.S.C. § 16\(i\)](#) plaintiffs may not rely

¹  [15 U.S.C. § 16\(i\)](#) provides:

Whenever any civil or criminal proceeding is instituted by the United States to prevent, restrain, or punish violations of any of the antitrust laws, but not including an action under section 15a of this title, the running of the statute of limitations in respect of every private or State right of action arising under said laws and based in whole or in part on any matter complained of in said proceeding shall be suspended during the pendency thereof and for one year thereafter. . . .

upon the criminal action to toll the running of the four-year limitations period of [15 U.S.C. § 15b](#). The court also held that the statute of limitations was not tolled by the [**7] government's civil case, which was then pending. The court said, "the conspiracy regarding timber sales in the Detroit Ranger District complained of in the government's civil action does not bear a real relation to plaintiffs' claim of territorial [**831] allocation designed to depress the price of private timber. This action is therefore not based in whole or in part on matters complained of in the government civil action. That action accordingly does not toll the statute of limitations for purposes of this action."

Summarizing, the court said, "to the extent plaintiffs' . . . claim is based solely upon the defendants' illegal activities in the Detroit Ranger District, the plaintiffs lack standing and . . . to the extent it is one of illegal territorial allocation of private timber, [it] is barred by the statute of limitations."

II.

The district court did not state that it relied in any way upon the challenge to the [Rule 11](#) certification, and clearly any such reliance would have been error.

Plaintiffs' counsel signed the complaint. By the terms of [Rule 11](#), those signatures constituted a certification "that to the best of [their] knowledge, information, and belief [**8] there is good ground to support" the pleading. No more is required. See [United States v. International Association of Bridge, Structural & Ornamental Iron Workers, Local No. 1, 438 F.2d 679, 681 \(7th Cir. 1971\)](#). The rule is not a discovery device. It is not to be used to require plaintiff to offer proof of his case through supplemented [Rule 11](#) certificates before discovery and before trial. See [Lau Ah Yew v. Dulles, 236 F.2d 415, 416 \(9th Cir. 1956\)](#); Risinger, *Honesty in Pleading and Its Enforcement: Some "Striking" Problems with Federal Rule of Civil Procedure 11*, 61 Minn. L. Rev. 1, 34 (1976). Filing of groundless litigation for harassment or delay should be dealt with under Rule 16, Rule 36, or [Rule 56](#), rather than under [Rule 11](#). 5 C. Wright & A. Miller, *Federal Practice and Procedure*, § 1333, at 500 (1969). Requiring supplementary certificates under [Rule 11](#) improperly exposes plaintiff to the risk of adverse judgment without the safeguards of [Rule 56](#).

III.

The district court's rulings on both standing and limitations rested upon the court's erroneous construction of the complaint.²

[**9] Standing

HN2 Plaintiffs were entitled to have the allegation of their complaint read broadly and liberally, and to have them taken as true. [Beltz Travel Service, Inc. v. International Air Transport Association, 620 F.2d 1360, 1365 \(9th Cir. 1980\)](#); [Walker Distributing Co. v. Lucky Lager Brewing Co., 323 F.2d 1, 3-4 \(9th Cir. 1963\)](#). So read, plaintiffs alleged a single conspiracy among the defendants and other purchasers of timber, beginning in 1968 and continuing through June 1973, to eliminate competition, fix prices, and allocate timber from United States Forest Service lands and other lands in Oregon.

² If the court relied in any part upon any deficiency in plaintiffs' factual showing in opposition to defendants' motion for summary judgment, it would have been error to do so since discovery was stayed and plaintiffs were not afforded an adequate opportunity to develop facts in opposition to the motion. See [Portland Retail Druggists Association v. Kaiser Foundation Health Plan, 662 F.2d 641, 645-46 \(9th Cir. 1981\)](#); [Program Engineering, Inc. v. Triangle Publications, Inc., 634 F.2d 1188, 1193 \(9th Cir. 1980\)](#); [Schoenbaum v. Firstbrook, 405 F.2d 215, 218 \(2d Cir. 1968\)](#) (en banc); [Fed. R. Civ. P. 56\(f\)](#). See also [Hospital Building Co. v. Trustees of Rex Hospital, 425 U.S. 738, 746, 48 L. Ed. 2d 338, 96 S. Ct. 1848 \(1976\)](#).

Defendants contend that discovery was not totally foreclosed but only limited to potentially dispositive issues, an entirely proper procedure. [Hayashi v. Red Wing Peat Corp., 396 F.2d 13, 14-15 \(9th Cir. 1968\)](#); 8 C. Wright & A. Miller, *Federal Practice and Procedure* § 2040 (1970). However, the minute order reflecting the court's ruling prohibited discovery without limitations. Defendants say they invited plaintiffs to engage in discovery as to the dispositive issues and plaintiffs declined to do so. We agree with plaintiffs that the transcript does not reflect such an offer and rejection.

HN3 As a potential seller of timber in the market affected by the alleged conspiracy, plaintiffs clearly had standing. *Solinger v. A & M Records, Inc.*, 586 F.2d 1304, 1310-11 (9th Cir. 1978). They were not merely "incidental" victims of a conspiracy to fix prices of timber from Forest Service land in another area, but were the intended "targets" of at least the territorial allocation aspect of a broader conspiracy encompassing the sale of timber for private lands in an area in which they sought unsuccessfully to do business, and therefore had standing to challenge **[**10]** the overall conspiracy. See *id.*

Nor was there merit in the court's alternate holding that plaintiffs lacked standing because it was "totally speculative" whether they would have found a buyer in time to exercise their option. The complaint alleges that "as a direct and proximate result of the aforesaid combination and conspiracy, plaintiffs were prevented from selling the logs to be cut from timber standing on the property at competitive prices, forcing them to forfeit their earnest money and to relinquish all interest in the property." The causation alleged is not so inherently speculative as to justify denying plaintiffs an opportunity to prove it. See *id.* Cf. *City of Rohnert Park v. Harris*, 601 F.2d 1040, 1048-49 (9th Cir. 1979).

Limitations

The pace of government antitrust litigation is slow. A private litigant should not be required to defer filing suit until after the defendants' conduct has been disclosed by the government's proof at trial. Nor should the private litigant's right to his day in court depend upon the government's success in its litigation, or upon the likelihood that the private litigant will be able to establish his case. "Suspension of **[**11]** the running of the statute of limitations pending resolution of the government action may not be made to turn on whether the United States is successful in proving the allegations of the complaint . . . Equally, the availability of section 5(b) to the private claimant may not be made dependent on his ability to prove his case, however fatal failure may prove to his hopes of success on the merits." *Leh v. General Petroleum Corp.*, 382 U.S. at 65-66. Cf. *Greyhound Corp. v. Mt. Hood Stages, Inc.*, 437 U.S. at 336 (1978).

For these reasons **HN4** consideration of whether a later private suit is "based in whole or in part on any matter complained of" in a prior government action, as required to suspend the running of limitations on the private claim during the pendency of the government suit under *section 16(i)*, "in general . . . must be limited to a comparison of the two complaints on their face." *Leh v. General Petroleum Corp.*, 382 U.S. 54, 65-66, 15 L. Ed. 2d 134, 86 S. Ct. 203 (1965). See also *Greyhound Corp. v. Mt. Hood Stages, Inc.*, 437 U.S. 322, 331, 57 L. Ed. 2d 239, 98 S. Ct. 2370 (1978); *Rader v. Balfour*, 440 F.2d 469, 473 (7th Cir. 1971).

It is clear from the face **[**12]** of the two complaints that plaintiffs' action is "based . . . in part on any matter complained of" in the government's civil suit, and *15 U.S.C. § 16(i)* therefore tolled the running of the period of limitations on plaintiffs' suit during the pendency of the government action. Plaintiffs' complaint alleged a conspiracy that included the objectives, means, time span, and geographic scope of the conspiracy alleged in the government suit. Because of this overlap, evidence adduced in the trial of the government suit would be of practical assistance to plaintiffs in proving their own complaint. It was precisely the purpose of *section 16(i)* to provide such assistance to private antitrust complainants. *Greyhound Corp. v. Mt. Hood Stages, Inc.*, 437 U.S. at 333-34; *Minnesota Mining & Manufacturing Co. v. New Jersey Wood Finishing Co.*, 381 U.S. 311, 317-19, 14 L. Ed. 2d 405, 85 S. Ct. 1473 (1965). This is true, and accordingly *section 16(i)* applies, if the private action is based "in part" on "any matter" complained of in the government suit. If the necessary overlap is present, the purpose of the statute is served though there are differences in the allegations of the two complaints **[**13]** as to the **[*833]** means used, the defendants named, and the time period and geographic area involved. *Leh v. General Petroleum Corp.*, 382 U.S. at 59, 61, 62-63, 64; *Zenith Radio Corp. v. Hazeltine Research, Inc.*, 401 U.S. 321, 335-36, 28 L. Ed. 2d 77, 91 S. Ct. 795 (1971).

Section 16(i) does not apply if the government suit is initiated "under section 15a of this title." Section 15a authorizes the government to recover actual damages for injuries sustained by reason of an antitrust violation. Since the government's civil suit sought damages, defendants argued below and argue here that it was excluded from *section 16(i)*. The district court rejected the argument and we agree. The government also sought injunctive

relief as authorized by [15 U.S.C. § 4](#). Because [section 16\(i\)](#) must be broadly construed to accomplish its remedial purpose, see [Leh v. General Petroleum Corp.](#), [382 U.S. at 59](#), its exclusionary clause must be restricted to cases brought solely under section 15a. So long as the government suit seeks to "prevent, restrain, or punish" an antitrust violation, [section 16\(i\)](#) is not rendered inapplicable by the fact that monetary relief is also sought. Defendants' [**14] suggestion that the result should turn upon the relative importance of the claim for damages and the request for injunctive relief in the particular case is inconsistent both with liberal construction of the statute and with the requirement that the statute be construed to achieve certainty and predictability. See [Greyhound Corp. v. Mt. Hood Stages, Inc.](#), [437 U.S. at 335-36 \(1978\)](#); [Dungan v. Morgan Drive-Away, Inc.](#), [570 F.2d 867, 870-71 \(9th Cir. 1978\)](#).

Reversed and remanded for further proceedings consistent with this opinion.

Antitrust & Trade Law > Exemptions & Immunities > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN2 [down arrow] **Exemptions & Immunities, Parker State Action Doctrine**

For conduct to be shielded from application of federal antitrust laws the conduct must pass a two-part test which requires that the conduct be pursuant to a clearly articulated and affirmatively expressed state policy to displace competition and that it be actively supervised by the state itself. This test is to be used in deciding whether either a state agency or a private individual may be granted immunity from federal antitrust law.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN3 Exemptions & Immunities, Parker State Action Doctrine

Competition may be replaced with state regulation where the state has taken a positive and clearly enunciated stand to do so. A state cannot legitimize otherwise illegal anticompetitive activity merely by authorizing it; there has to be a state policy to replace the forces of the marketplace with the benefits of state regulation. Thus, for conduct to be exempt, first it must be based upon a state policy to displace competition that is clearly articulated and affirmatively expressed, and second, the conduct must be actively supervised by the state itself. Clear articulation with active supervision show that the state is not merely acquiescing in the anticompetitive activity of others, but is truly involved in replacing competition with adequate state regulation.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN4 Exemptions & Immunities, Parker State Action Doctrine

Even where the state has authorized or participated in the challenged anticompetitive activity, that activity must be required by a clearly articulated and affirmatively expressed state policy to displace competition with active state supervision for the state action exemption to apply.

Opinion

[*713] Opinion and Order

Introduction

BURNS, D.J.:

The economies of the State of Hawaii and of her citizens are more dependent on the airplane than are those of any other state in the Union.¹ As an island people with tourism as their major source of income,² Hawaiians focus great attention on their airport and its ancillary services. Many of these services, including car rental, tour bus, currency and photographic greeting services, have been or currently are involved in anti-trust litigation.³ [**3]

¹ Horvat, *Above the Pacific* (1966)

² *The State of Hawaii Data Book* (1981). In 1980 tourism brought \$3.0 billion to Hawaii. Defense spending, Hawaii's second source of outside income, generated \$1.3 billion in 1980.

562 F. Supp. 712, *713L^A983 U.S. Dist. LEXIS 18059, **3

Unlike [*714] most airports Honolulu International Airport (HIA) is state owned ⁴ and its contracts for airport services are, with the exception of [*2] lei stands, exclusive.⁵

The subject of this case is a fifteen-year contract between defendants State of Hawaii and SIDA, an association of independent taxicab owner-operators, by which SIDA acquired the exclusive right to provide metered taxicab service to deplaning passengers at both terminals of HIA (International and inter-island terminals). Plaintiff (Charley's) is a Hawaii corporation whose drivers are licensed by the City and County of Honolulu to provide metered taxicab service. Plaintiff alleges that the exclusive contract between the defendants violates sections one and two of the Sherman Act ([15 U.S.C. §§ 1, 2](#)); it has moved for partial summary judgment on the issues of 1) the legality of the SIDA/State contract and 2) the availability to the defendants of the so-called state action immunity defense. [*4] Both defendants SIDA and the state defendants (the State of Hawaii and the State Department of Transportation)⁶ have moved for summary judgment contending they are exempt from federal anti-trust laws under the *Parker* doctrine. *Parker v. Brown* [1940-1943 TRADE CASES P 56,250], [317 U.S. 341, 87 L. Ed. 315, 63 S. Ct. 307 \(1943\)](#).

Because plaintiff has failed to show that no genuine issues of material fact remain to be determined, I deny its motion for partial summary judgment on the legality of the SIDA-State contract. This motion involves canvassing the issues of what constitutes a group boycott and whether [*5] one exists in this case; whether SIDA's composition and the nature of its activities constitute a horizontal restraint of trade; whether a *per se* rule or "rule of reason" should be used in this case; what constitutes the relevant market in this case; whether SIDA possesses

³ The car rental litigation is on-going. *Pacific Auto Rental Corp., dba Dollar Rent-A-Car Systems v. State of Hawaii et al.*, Civ. No. 79-0146 (D. Hawaii) was filed on March 30, 1979, and on July 23, 1979 was transferred to the Northern District of California to be made a part of the multi-district litigation. In March 1978 the Judicial Panel on Multi-district Litigation centralized in that district six cases pending in five districts charging major car rental companies with violation of the antitrust laws. [In re Airport Car Rental Antitrust Litigation, 448 F. Supp. 273 \(J. Pan. M.L. 1978\)](#). Currently the cases are awaiting the outcome of a petition for certiorari following the Ninth Circuit's affirmance of Judge Schwarzer's granting of a motion for summary judgment for defendants against one plaintiff. [In re Airport Car Rental Antitrust Litigation, 521 F. Supp. 568 \(N.D. Cal. 1981\)](#) aff'd, [693 F.2d 84 \(9th Cir. 1982\)](#). These rulings involved the *Noerr-Pennington* exemption from [antitrust law](#) rather than state action immunity. This applies to lobbying and other attempts to influence official government action. See [United Mine Workers v. Pennington, 381 U.S. 657, 14 L. Ed. 2d 626, 85 S. Ct. 1585 \(1965\)](#); [Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 5 L. Ed. 2d 464, 81 S. Ct. 523 \(1961\)](#).

The tour bus case is a part of this litigation; *Charley's Taxi* was consolidated on August 10, 1981 with *Charley's Tour & Transportation, Inc. dba Charley's Scenic Tours v. Interisland Resorts Ltd. et al.*, Civ. No. 80-0060 (D. Hawaii) filed February 5, 1980. It is likely that the two cases will be deconsolidated, at least for trial purposes.

The currency concession was at issue in [Deak-Perera Hawaii, Inc. v. Department of Transportation, 553 F. Supp. 976 \(D. Hawaii 1983\)](#), in which Judge Pence granted defendants' motion for summary judgment on the basis of [Parker. Parker v. Brown, 317 U.S. 341, 87 L. Ed. 315, 63 S. Ct. 307 \(1943\)](#). See text, *infra* slip op. at 6-8. Photographic greeting services were at issue in *Leia, Inc. v. Photo Management et al.*, Civ. No. 78-0263 (D. Hawaii March 18, 1982). In an opinion filed February 4, 1980 Judge Weigel denied the defendants' motion for summary judgment on the grounds of state action "immunity", finding that defendants could not pass the *Midcal* test. [California Retail Liquor Dealers Association v. Midcal Aluminum, Inc., 445 U.S. 97, 63 L. Ed. 2d 233, 100 S. Ct. 937 \(1980\)](#). See text, *infra* slip op. at 6, 8, 11, 13-14. *Leia* was dismissed for lack of prosecution in March 1982.

⁴ Only in Hawaii, Alaska and Rhode Island are airports owned and operated by the state. *Membership Directory, Airport Operators Council International* (1983).

⁵ Defendant State of Hawaii's memorandum in opposition to plaintiff's motion for partial summary judgment at 8; *Deak-Perera*, slip op. at 3.

⁶ Plaintiffs originally had filed suit against the Hawaii Department of Land and Natural Resources and Messrs. S. Ono, M. Kealoha, S. Hong, R. Higashi, T. Yagi and T. Yamamoto in their capacities as members of the Board of Land and Natural Resources and against Dr. R. Higashionna as Director of Transportation. By stipulation the case against these state defendants was dropped on March 25, 1983.

monopoly power; whether that power -- if it exists -- was acquired or maintained wilfully; and whether plaintiff has suffered injury cognizable under the Sherman Act. The question of whether the contract between SIDA and the state unlawfully restrains and monopolizes [*715] trade is the "meat of the coconut"; neither side has yet sufficiently honed the issues of which it is composed. [HN1](#) Summary judgment should be used but sparingly in antitrust litigation. [*Poller v. Columbia Broadcasting System, Inc.*, 368 U.S. 464, 473, 7 L. Ed. 2d 458, 82 S. Ct. 486 \(1962\);](#) [*General Business Systems v. North American Philips Corp.*, 699 F.2d 965 at 971](#), (9th Cir. 1983). On the current state of the record the question of the legality of the contract cannot be adequately dealt with by way of a summary judgment motion. The time may come when such a motion is apposite. However, I decline to find that this case now [**6] presents one of those infrequent situations where summary judgment on the central issue is appropriate in an anti-trust case.

I grant plaintiff's, and therefore deny defendants', motion for partial summary judgment on the issue of the availability to defendants of the state action immunity defense. Defendants have failed to show that their conduct is beyond the reach of the federal antitrust laws pursuant to the state action doctrine of *Parker v. Brown*.

Statement of Facts

In 1978 defendants State of Hawaii and SIDA of Hawaii entered into a fifteen-year contract whereby SIDA was granted the exclusive right to provide metered taxicab service at HIA's two terminals. SIDA had first received this contract in 1963. It had been renewed every two years until 1973 when SIDA's contract was renewed for five years. In 1974 plaintiff was awarded the contract to provide metered taxicab service at HIA's inter-island terminal, a substantially less lucrative market than the international terminal.⁷ The contract was scheduled to run until the end of 1978 but was terminated by the state in 1977 for payment default.

[**7] The contract awards SIDA "the exclusive privilege of soliciting passengers for and providing metered taxicab services to such passengers at the domestic and foreign arrivals area, Honolulu International Airport . . .". No other taxicab company or independent taxi driver unaffiliated with SIDA may solicit passengers at HIA or provide taxi service if hailed, unless the passenger has pre-arranged for this service. "Pre-arranged" taxi service refers to service either arranged by the passenger before leaving her mainland or foreign port of departure or service arranged by a deplaning passenger at HIA who telephones to taxi companies located in Honolulu. Absent such a "pre-arrangement" only SIDA may serve deplaning passengers. It is undisputed that the "pre-arranged" taxi market is negligible; Mr. Miyamoto, Chief of [*716] Airports Division of defendant DOT characterized the number of HIA passengers who "pre-arrange" taxi service as "very few if any" (Miyamoto Dep. at 90.) Taxicabs other than SIDA's

⁷ Defendants in this case have not asserted, and are unlikely to assert, the defense of *in pari delicto* against Charley's on the basis of this inter-island contract. The doctrine was severely limited, if not dealt a fatal blow, by the Supreme Court in [*Perma Life Mufflers Inc. v. International Parts Corp.*, 392 U.S. 134, 20 L. Ed. 2d 982, 88 S. Ct. 1981 \(1968\)](#).

The Ninth Circuit has, on several occasions, asserted the doctrine's demise, see, e.g., [*Royal Printing Co. v. Kimberly-Clark Corp.*, 621 F.2d 323, 326 n. 5 \(9th Cir. 1980\);](#) [*Calnetics Corp. v. Volkswagen of America, Inc.*, 532 F.2d 674, 688-90 \(9th Cir. 1976\)](#), and has held that for public policy reasons the illegal conduct of an antitrust plaintiff does not completely and automatically bar his claim. [*First Beverages, Inc. of Las Vegas v. Royal Crown Cola Co.*, 612 F.2d 1164, 1174-75 \(9th Cir. 1980\);](#) [*Memorex Corp. v. International Business Machines Corp.*, 555 F.2d 1379, 1380-82 \(9th Cir. 1977\)](#).

In [*Thi-Hawaii v. First Commerce Financial Corp.*, 627 F.2d 991 \(9th Cir. 1980\)](#), its latest statement on the status of the *in pari delicto* defense, the Ninth Circuit recognized that the defense still exists to the extent of barring recovery by a plaintiff who is "truly complete[ly] involve[d] and participat[ing]" in the illegal activity. [*Perma Life*, 392 U.S. at 140](#). The Ninth Circuit has adopted the "but for" test in determining whether a plaintiff's participation in the monopoly is so complete as to give the defendant an *in pari delicto* defense. By this test a "plaintiff's recovery is not barred unless the illegal conspiracy would not have been formed but for its participation. See [*Javelin Corp. v. Uniroyal, Inc.*, 546 F.2d 276, 279 \(9th Cir. 1976\)](#)." [*Thi-Hawaii* 627 F.2d at 995](#).

In this circuit, therefore, a defense of *in pari delicto* can apparently only be successfully asserted against an antitrust plaintiff who was an original and meaningful participant in the monopolistic or conspiratorial conduct. A late-comer like Charley's is likely to be safe from such a defense.

may take passengers to HIA from Honolulu; in fact they are required to do so by city ordinance that mandates the acceptance of all lawful fares.⁸ However, they cannot accept paying [**8] passengers for their return trip to Honolulu, thus forcing them to "deadhead" back to the city, even if there are deplaning HIA passengers in need of taxi service.

Discussion

The state defendants and SIDA contend that their conduct in entering into an exclusive contract, if anticompetitive, is exempted from federal antitrust legislation under the state action doctrine first enunciated in *Parker v. Brown*, 317 U.S. 341, 87 L. Ed. 315, 63 S. Ct. 307 (1943).⁹ The state defendants assert that their mere status as the [**9] state and a state department gives them "immunity". SIDA acknowledges that [HN2](#) for its conduct to be shielded from application of federal antitrust laws the conduct must pass the two-part *Midcal* test which requires that the conduct be pursuant to a clearly articulated and affirmatively expressed state policy to displace competition and that it be actively supervised by the state itself. *California Retail Liquor Dealers Association v. Midcal Aluminum, Inc.*, 445 U.S. 97, 63 L. Ed. 2d 233, 100 S. Ct. 937 (1980). SIDA argues that its conduct passes this test. Plaintiff contends that the conduct of all defendants must be judged by the *Midcal* test and that the challenged conduct fails to meet that test and is therefore subject to federal antitrust laws.

[**10] I agree with the state defendants that an exemption from *antitrust law*, without resort to the *Midcal* test, for the type of state conduct at issue here would be a wiser policy and would be a truer reading of *Parker* if *Parker* is read absent intervening Supreme Court and Ninth Circuit cases. The wisdom of recognizing state sovereignty in this situation is shown in Judge Pence's opinion in *Deak-Perera Hawaii, Inc. v. Department of Transportation State of Hawaii*, 553 F. Supp. 976 (D. Hawaii 1983) which involved the currency concession at HIA. Despite the substantial deference I pay to the ruling of Judge Pence,¹⁰ neither [*717] stare decisis nor judicial comity requires

⁸ (c) Responding to Calls.

The operator of a taxicab stand shall not refuse to furnish unengaged, available taxicab and driver during the business hours of such stand upon call or request from an orderly person located within one mile of such stand, by the most direct street route. No taxicab driver, while on duty and not engaged in another call, shall fail to drive an available taxicab in response to a call or request from an orderly person.

Revised Ordinance of Honolulu § 12-1.5(c)(1978)

⁹ Although most cases and commentators refer to *Parker* as the source of the state action doctrine, Judge Pence in *Deak-Perera* points out that this is actually a misconception; the doctrine always existed as part of the theory of federalism in which it is grounded. *Deak-Perera* slip op. at 5.

¹⁰ My deference to Judge Pence's ruling is all the greater because I am a visiting judge designated only temporarily to Judge Pence's district. By tradition and comity a judge in a multiple-judge district follows the prior decision of a brother judge upon the same question. *Buna v. Pacific Far East Line, Inc.*, 441 F. Supp. 1360 (N.D. Cal. 1977); *In re Carmona*, 224 F. Supp. 497 (S.D. Cal. 1963); *Rojas-Gutierrez v. Hoy*, 161 F. Supp. 448 (S.D. Cal. 1958). Even without my ruling in this case, however, there was not complete unanimity in the District of Hawaii on the state action exemption issue; Judge Weigel in *Leia*, ruled as I have, that *Midcal* applies to the state defendants and that they have not demonstrated sufficient articulation and supervision, whereas Judge Pence found that *Midcal* did not apply to the same state defendants.

Comity and tradition do not bind when a judge has a cogent reason or reasons for diverging from the ruling of his brother or brethren. *Id.* In this case I believe I have such a cogent reason. My reading of controlling Supreme Court and Ninth Circuit cases requires me to differ from the prior ruling of Judge Pence. I note that the state action question will not be the first break with judicial comity in this complex series of airport antitrust cases. In granting defendant's motions for summary judgment on the *Noerr-Pennington* question, Judge Schwarzer reconsidered and reversed the earlier ruling by Judge Renfrew on the same question in the same consolidated cases, albeit the motions were directed against a different plaintiff. In *Re Airport Car Rental Antitrust Litigation*, 521 F. Supp. 568 (N.D. Cal. 1981); 474 F. Supp. 1072 (N.D. Cal. 1979).

Further, there is one important difference between *Deak-Perera* and *Charley's* in terms of the statutory authorization upon which state defendants rely. The currency concession in *Deak-Perera* is covered by chapter 102 of the Hawaii Revised Statutes which

me to follow it. *Starbuck v. City & County of San Francisco*, 556 F.2d 450, 457 n. 13 (9th Cir. 1977); *In Re Brents-Pickell*, 12 Bankr. 352, 357 (Bkrtcy. S.D. Cal. 1981). Neither may my decision in this case be based on my opinion of the best policy. I must instead adhere to what seems to me to be the compulsion of the Supreme Court's post-Parker state action cases and to the even clearer command of recent Ninth Circuit cases on the issue. This circuit has consistently, and recently, [**11] held that the *Midcal* test is to be used in deciding whether either a state agency or a private individual may be granted "immunity" from federal antitrust law. *Miller v. Oregon Liquor Control Commission*, 688 F.2d 1222 (9th Cir. 1982); *Ronwin v. State Bar of Arizona*, 686 F.2d 692 (9th Cir. 1982); *Knudsen Corp. v. Nevada State Dairy Commission*, 676 F.2d 374 (9th Cir. 1982); *Benson v. Arizona State Board of Dental Examiners*, 673 F.2d 272 (9th Cir. 1982); *Turf Paradise Inc. v. Arizona Downs*, 670 F.2d 813 (9th Cir. 1982). Using this test, I cannot find either the state defendants or SIDA exempt from the reach of the Sherman Act.

[**12] The *Midcal* Test Applies to State Defendants

The basis of the Supreme Court's decision in *Parker* was that federal antitrust law had not preempted state sovereignty; California could decide to dispense with competition in the marketing of raisins and institute a system of state regulation without running afoul of the Sherman Act. The Court analyzed Congressional intent and found "nothing in the language of the Sherman Act or in its history which suggests that its purpose was to restrain a state or its officers or agents from activities directed by its legislature." *Parker v. Brown*, 317 U.S. at 350.

For thirty years the Supreme Court was silent on the applicability of federal antitrust law to actions of the states. Then in a spate of decisions commencing with *Goldfarb v. Virginia State Bar*, 421 U.S. 773, 95 S. Ct. 2004, 44 L. Ed. 2d 572 (1975) the Court developed what is now referred to as the *Midcal* test.¹¹ The rationale for the test is that HN3[↑] competition, the "raison d'etre" of the Sherman Act, may be replaced with state regulation where the state has taken a positive and clearly enunciated stand to do so. *Parker* declared that a state could not legitimize [**13] otherwise illegal anticompetitive activity merely by authorizing it; there had to be a state policy to replace the forces of the marketplace with the benefits of state regulation. Thus the *Midcal* test requires that for conduct to be exempt first it must be based upon a state policy to displace competition that is "clearly articulated and affirmatively expressed" and second, the conduct must be "actively supervised" by the state itself. *Midcal* 445 U.S. at 105. Clear articulation with active supervision show that the state is not merely acquiescing in the anticompetitive activity of others, but is truly involved in replacing competition with adequate state regulation.

[**14] The state defendants argue that the *Midcal* test was not intended to be applied to [*718] the state as an antitrust defendant. However persuasive their argument may be from a policy standpoint, it is not the law of this circuit. Nor is it a wholly accurate portrayal of Supreme Court cases.¹² Although the State of California was not the named defendant in *Midcal*, the state had been the defendant in the case below, had chosen not to appeal the adverse state court decision, but was permitted to appear as amicus curiae in the Supreme Court. The retail liquor

mandates competitive bidding. This bespeaks greater articulation of a state policy to displace competition than does the indeterminate grant of authority embodied in chapter 261, which applies to the taxi issue.

¹¹ As the Court developed this test it also came to refer to the non-applicability of federal antitrust law to the states as an "immunity" for the states. This may well be a misnomer. *Parker* applied standard state sovereignty federal preemption analysis in the context of antitrust law; it did not create an exception or immunity for states. See *Community Communications Co. v. City of Boulder*, 455 U.S. 40, 60, 70 L. Ed. 2d 810, 102 S. Ct. 835 (1982) (Rehnquist, J., dissenting); M. Handler, *Reforming the Antitrust Laws*, 82 Colum. L. Rev. 1287, 1330 (1982). Perhaps the present confusion in this area stems from the readiness with which we attach labels to concepts, which subsequently give rise to legal consequences, frequently not intended or contemplated by the labeler.

¹² In its most recent antitrust decision, *Jefferson County Pharmaceutical Association, Inc. v. Abbott Laboratories et al.*, 460 U.S. 150, 103 S. Ct. 1011, 74 L. Ed. 2d 882, 51 U.S.L.W. 4195 (1983), the Court adheres to its policy of applying the federal antitrust laws to state and local governmental bodies. *City of Lafayette v. Louisiana Power and Light Co.*, 435 U.S. 389, 55 L. Ed. 2d 364, 98 S. Ct. 1123 (1978) is cited in the opinion for the proposition that cities and states are persons within the ambit of the Sherman Act. *Jefferson* continues the trend of nonexemption for the states, at least in their proprietary capacities.

562 F. Supp. 712, *718 (1983 U.S. Dist. LEXIS 18059, **14

dealers association, an intervenor below, took it upon itself to try to vindicate the state's interest in its resale price maintenance scheme for wine. Although it preceded *Midcal, New Motor Vehicle Board v. Orrin Fox Co., 439 U.S. 96, 58 L. Ed. 2d 361, 99 S. Ct. 403 (1978)* also involved a California state agency defending its conduct from antitrust attack. In that case the Court found that the anticompetitive conduct passed the precursor to the *Midcal* test.

[**15] This circuit has applied the *Midcal* test to a state bar, (*Ronwin v. State Bar of Arizona*) to state commissions (*Miller v. Oregon Liquor Control Commission* and *Knudsen v. Nevada State Dairy Commission*) and to a state board (*Benson v. Arizona State Board of Dental Examiners*); it has done so in areas, such as the licensing of professionals, that have historically been regarded as uniquely the province of the states themselves. Since *Ronwin* there can be no doubt that [HN4](#)¹⁴ even where the state has authorized or participated in the challenged anticompetitive activity, that activity must be required by a clearly articulated and affirmatively expressed state policy to displace competition with active state supervision for the state action exemption to apply:

The fact that the Committee was established by Supreme Court Rule and composed of members selected from the Bar by the Arizona Supreme Court is not, as defendants assert, dispositive in itself of the state-action question. Although the defendants in the United States Supreme Court's state-action decisions were public bodies, or subdivisions of the state, that did not end the Court's analysis. The Court still [**16] looked to see whether the challenged restraints were clearly articulated and affirmatively expressed as state policy and were actively supervised by the state acting as sovereign. Thus, for instance, it was not dispositive that the restraints challenged in *Parker*, *Orrin W. Fox*, and *Midcal* were enforced, respectively, by a state commission, a state board, and a state department. (Citations omitted) In *City of Lafayette, 435 U.S. at 408, 98 S. Ct. at 1134*, a plurality of the Court expressly rejected the argument that the state-action exemption extends to "all governmental entities, whether state agencies or subdivisions of a State . . . simply by reason of their status as such." This position has since been adopted by a majority of the Court. See *City of Boulder*, [455] U.S. at [53], [102 S. Ct. at 842 \(1982\)](#).

[Ronwin v. State Bar of Arizona, 686 F.2d at 697](#).

Although the state defendants, represented by the State Attorney General's Office, here assert that the *Midcal* test should not be applied to them, the Attorney General has previously recognized the applicability of *Midcal* to the operation of HIA.¹³ In March 1981 the Antitrust Division of [**17] the Attorney General's office analyzed proposed legislation to create two duty-free concessions [*719] at HIA. In an opinion prepared for the House Committee on Transportation, the Division concluded that the legislation "failed to meet the two-tiered test set out in . . . *Midcal* . . . , a standard necessary to immunize state regulatory schemes which violate the federal antitrust laws from legal liability". (Opinion at 4)

Clear Articulation and Affirmative Expression

Defendants¹⁴ assert that the state has clearly articulated and affirmatively expressed its policy to displace competition in the provision of taxi service at HIA in chapter 261 of the Hawaii Revised Statutes.¹⁵ I find no such

¹³ Application of the arcane analysis required by the *Parker* doctrine is surely not assisted merely because the Attorney General of Hawaii believes his legal shoulders are sufficiently broad for a bucket of water on both (or) on each one.

¹⁴ Because the state defendants base their case on the nonapplicability of the *Midcal* test to them, they do not specifically assert that the facts of this case pass muster under the test. It is defendant SIDA who applies the test to the facts here. However, I will refer only to defendants, without specifying, as I will presume that the state defendants would assert that their challenged conduct did in fact pass the *Midcal* test were they to be aware that I now hold that the test applies to them.

¹⁵ The following sections of chapter 261 are pertinent here. [Haw. Rev. Stat. § 261-4](#):

§ 261-4 Airports, general. (a) Establishment, operation, maintenance. The department of transportation may on behalf of and in the name of the State, out of appropriations and other moneys available or made available for such purposes, plan, acquire, and establish, construct, enlarge, and improve in the manner herein provided, maintain, equip, operate, regulate and protect airports and air navigation facilities, including the construction, installation, equipment, maintenance, and operation at airports of buildings and other facilities for the servicing of aircraft or for the comfort, accommodation, and convenience of air travelers, and including protection against airport hazards. For such purposes the department may, by purchase, gift, devise, lease, condemnation in accordance with chapter 101, or otherwise, acquire property, real or personal, or any interest therein, including the property, rights, estates, and interests mentioned in section 262-11. The department may acquire rights and interests in airports owned or controlled by others, for the purpose of meeting a civilian need which is within the scope of its functions, even though it does not have the exclusive control and operation of such airports. No officer, board or department of the State, or municipality, shall perform any function which is within the jurisdiction of the department without its approval, except for military purposes.

(b) Acquisition of real property. In the acquisition of real property and interests therein, the department of accounting and general services shall assist the department of transportation at its request, and assign thereto state officers and employees under its supervision for the making of surveys, abstracts, and otherwise as may be of assistance, for which services the department of transportation shall pay out of the appropriations available to it, unless the department of accounting and general services has a general fund appropriation for such services.

(c) Structures and improvements. All structures and improvements to land shall be initiated by the department of transportation and shall be constructed or made by or under the comptroller, in conformity with plans and specifications approved by the department of transportation, for which purpose the department of transportation shall make allotments of the funds under its control for expenditure by the comptroller and for services of the department of accounting and general services for which the department has no general fund appropriation.

(d) Use of state and municipal facilities and services. In carrying out this chapter, the department of transportation may use the facilities and services of other agencies of the State and of the municipalities of the State to the utmost extent possible, and the agencies and municipalities shall make available their facilities and services. This subsection shall apply to the department of accounting and general services with respect to services and facilities in addition to those specified by subsections (b) and (c). [L 1947, c 32, pt. of § 1; RL 1955, § 15-9; am L Sp 1959 2d, c 1, §§ 12, 26]

Haw. Rev. Stat. § 261-5:

§ 261-5 Disposition of airport revenue fund. (a) All moneys received by the department of transportation from rents, fees and other charges pursuant to this chapter as well as all aviation fuel taxes paid pursuant to section 243-4(a)(2) shall be paid into the airport revenue fund created by section 248-8. All such moneys paid into the airport revenue fund shall be expended by the department for the statewide systems of airports, including the construction of airports and air navigation facilities approved by the legislature, including acquisition of real property and interests therein; and for operation and maintenance of airports and air navigation facilities; and for the payment of indebtedness heretofore or hereafter incurred by the department, or its predecessor, the Hawaii aeronautics commission, for any of the purposes of this chapter. The department shall generate sufficient revenues from its airport properties to meet all of the expenditures of the statewide system of airports and to comply with section 39-59; provided that as long as sufficient revenues are generated to meet such expenditures, the director of transportation may, in his discretion, grant a rebate of the aviation fuel taxes paid into the airport revenue fund during a fiscal year pursuant to sections 243-4(a)(2) and 248-8 to any person who has paid airport use charges or landing fees during such fiscal year. Such rebate may be granted during the next succeeding fiscal year but shall not exceed one-half cent per gallon per person, and shall be computed on the total number of gallons for which the tax was paid by such person, for such fiscal year.

(b) All expenditures by the department shall be made on vouchers duly approved by the director of transportation or such other officer as may be designated by the directors." [L 1947, c 32, pt of § 1; RL 1955, § 15-10; am L Sp 1959 2d, c 1, § 26; am L 1962, c 24, §§ 2, 3; HRS § 261-5; am L 1968, c 20, § 2; am L 1969, c 10, § 6 and c 99, § 1]

Haw. Rev. Stat. § 261-7:

§ 261-7 Operation and use privileges.

(a) Under department operation. In operating an airport or air navigation facility owned or controlled by the department of transportation, or in which it has a right or interest, the department may enter into contracts, leases, licenses, and other arrangements with any person:

- (1) Granting the privilege of using or improving the airport or air navigation facility or any portion or facility thereof or space therein for commercial purposes;
- (2) Conferring the privilege of supplying goods, commodities, things, services, or facilities at the airport or air navigation facility;
- (3) Making available services, facilities, goods, commodities, or other things to be furnished by the department or its agents at the airport or air navigation facility; or
- (4) Granting the use and occupancy on a temporary basis by license or otherwise any portion of the land under its jurisdiction which for the time being may not be required by the department so that it may put the area to common use and thereby derive revenue therefrom.

All the arrangements shall contain a clause that the land may be repossessed by the department when needed for aeronautics purposes upon giving the tenant temporarily occupying the same not less than thirty days' notice in writing of intention to repossess.

Except as otherwise provided in this section, in each case mentioned in paragraphs (1), (2), (3) and (4), the department may establish the terms and conditions of the contract, lease, license, or other arrangement, and may fix the charges, rentals or fees for the privileges, services, or things granted, conferred, or made available, for the purpose of meeting the expenditures of the statewide system of airports set forth in [section 261-5\(a\)](#), which includes expenditures for capital improvement projects approved by the legislature. Such charges shall be reasonable and uniform for the same class of privilege, service, or thing.

The department shall enter into separate contracts with no more than two persons ("contractors") for the sale and delivery of in-bond merchandise at Honolulu International Airport, in the manner provided by law. Each such contract shall confer the right to operate and maintain commercial facilities within the airport for the sale of in-bond merchandise and the right to deliver to the airport in-bond merchandise for sale to departing foreign-bound passengers.

The department shall grant such contracts pursuant to the laws of this State and may take into consideration:

- (1) The payments to be made on in-bond merchandise sold at Honolulu International Airport and on in-bond merchandise displayed or sold elsewhere in the State and delivered to the airport;
- (2) The ability of the applicant to comply with all federal and state rules and regulations concerning the sale and delivery of in-bond merchandise; and
- (3) The reputation, experience, and financial capability of the applicant.

The department shall actively supervise the operation of the contractors to insure its effectiveness. The department shall develop and implement such guidelines as it may find necessary and proper to actively supervise the operations of such contractors, and shall include guidelines relating to the department's review of the reasonableness of contractors' price schedules, quality of merchandise, merchandise assortment, operations, and service to customers.

Apart from the contracts described above, during the period ending June 30, 1982, the department shall confer no right upon any person to offer to sell, or deliver in-bond merchandise at Honolulu International Airport.

(b) Under other operation. The department may, by contract, lease or other arrangement, upon a consideration fixed by it, grant to any qualified person the privilege of operating, as an agent of the State or otherwise, any airport owned or controlled by the department; provided that no such person shall be granted authority to operate the airport other than as a public airport or to enter into any contracts, leases, or other arrangements in connection with the operation of the airport which the department might not have undertaken under subsection (a) of this section.

(c) Miscellaneous fees and charges. The Department may fix and regulate, from time to time, reasonable landing fees for aircraft and other reasonable charges for the use and enjoyment of the airports and the services and facilities furnished by the department in connection therewith, including the establishment of a statewide landing fee which may vary among different classes of users such as foreign carriers, domestic carriers, inter-island carriers, air taxi operators and such other classes as may be determined by the director of transportation, for the purpose of meeting the expenditures of the statewide system of airports set forth in [section 261-5\(a\)](#), which includes expenditures for capital improvement projects approved by the legislature.

clearly articulated [***720**] state policy, but rather a [****18**] vague, unrestrained grant of authority to the Department

(d) Liens. To enforce the payment of any charges for repairs or improvements to, or storage or care of any personal property made or furnished by the department or its agent in connection with the operation of an airport or air navigation facility owned or operated by the department, the department shall have liens on the property, which shall be enforceable by it as provided by sections 507-18 to 507-22.

(e) Buildings and land areas for general aviation activities; developmental rates. The department may from time to time establish developmental rates for buildings and land areas used exclusively for general aviation activities at rates not less than fifty per cent of the fair market rentals of the buildings and land areas and may restrict the extent of buildings and land areas to be utilized. [L 1947, c 32 pt of § 1; am L 1949, c 374, § 1; am L 1953, JR 14, § 1; RL 1955, § 15-12; am L Sp 1959 2d, c 1, § 26; am L 1962, c 24, §§ 4, 5; HRS § 261-7; am L 1968, c 20, §§ 3, 4; am L 1972, c 14, § 1; am L 1976, c 235, § 2; am L 1981, c 243, § 2]

§ 261-9 Contracts, Law governing. The department of transportation may enter into any contracts necessary to the execution of the powers granted it by this chapter. All contracts made by the department shall be made pursuant to the laws of the State governing the making of like contracts; provided, that where the planning, acquisition, construction, improvement, maintenance, or operation of any airport, or air navigation facility is financed wholly or partially with federal money, the department may let contracts in the manner prescribed by the federal authorities acting under the laws of the United States and any rules or regulations made thereunder. [L 1947, c 32, pt of § 1; RL 1955, § 15-15; am L Sp 1959 2d, c 1, § 26]

Haw. Rev. Stat. § 261-10:

§ 261-10 Exclusive rights prohibited. The department of transportation shall grant no exclusive right for the use of an airway, landing area, or air navigation facility under its jurisdiction. This section shall not prevent the making of contracts, leases, and other arrangements pursuant to section 261-7. [L 1947, c 32, pt of § 1; RL 1955, § 15-16; am L Sp 1959 2d, c 1, § 26]

Haw. Rev. Stat. § 261-11:

§ 261-11 Public purpose of activities. The acquisition of any lands or interests therein pursuant to this chapter, the planning, acquisition, establishment, construction, improvement, maintenance, equipment, and operation of airports and air navigation facilities; and the exercise of any other powers granted by this chapter to the department of transportation are declared to be public and governmental functions, exercised for a public purpose, and matters of public necessity. All lands and other property and privileges acquired and used by or on behalf of the State in the manner and for the purposes enumerated in this chapter shall and are declared to be acquired and used for public and governmental purposes and as a matter of public necessity. [L 1947, c 32, pt of § 1; RL 1955, § 15-17; am L Sp 1959 2d, c 1, § 26]

Haw. Rev. Stat. § 261-12:

§ 261-12 Rules, standards. (a) Powers to adopt. The director of transportation may perform such acts, issue and amend such orders, adopt such reasonable general or special rules and procedures, and establish such minimum standards, consistent with this chapter, as the director deems necessary to carry out this chapter and to perform the duties assigned thereunder, all commensurate with and for the purpose of protecting and insuring the general public interest and safety, the safety of persons operating, using or traveling in aircraft, and the safety of persons and property on land or water, and developing and promoting aeronautics in the State. No rule of the director shall apply to airports or air navigation facilities owned or operated by the United States.

In furtherance of the duties assigned under this chapter, the director may adopt rules relating to:

- (1) Safety measures, requirements and practices in or about the airport premises;
- (2) The licensing and regulation of persons engaged in commercial activities in or about the airport premises;
- (3) The regulation of equipment and motor vehicles operated in or about the airport operational area;
- (4) Airport security measures or requirements, and designation of sterile passenger holding areas and operational areas;
- (5) The regulation of motor vehicles and traffic;
- (6) Any other matter relating to the health, safety and welfare of the general public and persons operating, using or traveling in aircraft.

of Transportation to run the airport as it chooses, bound only by the statutory [*721] requirement to generate sufficient revenue to cover airport expenditures. HRS § 261-5(a).

[**19] The statutory scheme of chapter 261 allows the Department of Transportation to establish, operate and maintain the airport [*722] system "out of appropriations and other moneys available or made available for such purposes" § 261-4(a). In so doing the department "may enter into contracts, leases, licenses, and other arrangements with any person . . . conferring the privilege of supplying goods, commodities, things, services, or facilities at the airport. . . ." § 261-7(a)(2). Other than the requirement, in § 261-5(a), that all revenues generated from such leases and contracts be paid into the statutorily created airport revenue fund, the statute sets no limits on how, with whom and for what price the department may contract for provision of airport services. The department is free to establish the terms and conditions of the contract as it sees fit and may fix the charges or rentals, limited only by the requirement that such charges be "reasonable and uniform for the same class of privilege, service, or thing". § 261-7(a). Finally, defendants point to § 261-11 which makes the operation of Hawaii's airports a "public and governmental function".

These sections read as [**20] a whole do not evince a clear legislative intent to displace competition with state regulation in the provision of airport taxi services. Rather they show state acquiescence in how the DOT Director and his Airport Chief decide to run things. In deposition both officials, and those who had formerly held the DOT directorship, admitted that the granting of exclusive concession contracts was a department and staff preference rather than a state policy.

There is evidence that the Hawaii legislature sought to avoid rather than encourage exclusive concessions at HIA. 1982 Journal of the Senate, Act 5, § 1; 1960 Journal of the Senate, Act 14, § 1. Chapter 102 of the Hawaii Revised Statutes requires that most concessions on public property, including the HIA currency concession at issue in *Deak-Perera*, be put up for public bid. The contracts for ground transportation at HIA, including taxi service, are specifically exempted from this competitive bidding requirement. § 102-2(b)(1). Legislative history suggests that this exemption was to prevent monopolization by a single contractor:

Prior to passage of Act 245, Session Laws of Hawaii, 1959, government agencies were empowered [**21] to grant by private negotiation concessions for profit on government land to private persons. For example, the Hawaii Aeronautics Commission granted concession rights to approximately fifty ground operators (taxi operators) at the several airports . . . Act 245, Session of Laws of Hawaii 1959, by requiring that all such concessions or concession spaces be awarded by bid, deprives most of the incumbent concessionaires from having their licenses, leases or contracts renewed, however worthwhile their performances may be. Moreover *there is danger that such a system of awarding all concessions or concession spaces by bid could result in a monopoly. Such effects were not intended by the Legislature.*

1960 Journal of the Senate, Act 14 § 1 (emphasis added).

The 1960 amendment to Act 245, Session Laws of Hawaii 1959 exempted from competitive bidding lei vendors, coin operated machine vendors and all airport ground transportation except HIA taxi operators. In 1962 HIA taxicab drivers were added to the list of those concessionaires not required to competitively bid for an exclusive contract, because "especially in regards to the awarding of concessions at the new Honolulu International [*22] Airport in many instances compliance with said Act [Act 245] creates the evils which this Act was intended to avoid." 1962 Journal of the Senate Act 5, § 1. There is no evidence that the legislature meant to require an exclusive contract for the provision of taxi service, and I cannot now read this intent into the statutory scheme. I therefore find that defendants have failed to show a clear articulation and affirmative expression of state policy to displace competition for state regulation in the provision of taxi service at HIA.

Active State Supervision

To avoid application of the federal antitrust laws, defendants must also show that [*723] the clearly articulated state policy to displace competition has been replaced with active supervision of the conduct by the state itself.

This requirement ensures that the state is doing more than merely legitimizing the anticompetitive conduct of the private parties with whom it has contracted. The state must be an active partner in the conduct, regulating and overseeing as a substitute for the "economic constraints of the competitive market" P. Areeda & D. Turner, I Antitrust Law: An Analysis of Antitrust Principles and [**23] Their Application para. 213, at 73 (1978).

On this record, I cannot find that the state is an active supervisor. The state, through its Department of Transportation, signed a contract with SIDA and collects from SIDA the agreed monthly fee. However, it does nothing further to ensure adequacy of the provision of taxi service, and in fact has no control over the SIDA taxi drivers. SIDA is an association of independent owner-operators, which itself exercises no control over the activities of individual drivers. No individual driver can be ordered to the airport to pick up deplaning passengers to meet airport needs; each driver is an independent entrepreneur. SIDA runs its own dispatch service, and no one from the state monitors this. SIDA's base yard is located off HIA grounds, and no state supervision is conducted there. The rates SIDA may charge its passengers are set, like those of all Honolulu licensed taxi operators, by city ordinance and not by state regulation.¹⁶ Complaints about taxi drivers are routed to SIDA for action rather than being dealt with by the state. The evidence shows that it is SIDA cabbies and dispatchers who enforce the exclusivity of their contract; [**24] SIDA personnel intervene to prevent non-SIDA cabbies from accepting fares at HIA. In a letter to Hawaii's Governor Ariyoshi, the Director of defendant DOT, Dr. Ryokichi Higashionna, admitted that his department "has little control, if any, on SIDA's management of their service." (Letter memorandum attached as Appendix A.)

Conclusion

Defendants have failed to show that their conduct in entering into an exclusive contract is either pursuant to a clearly articulated and affirmatively expressed state policy or that the activity is actively supervised by the state itself. Defendants cannot, therefore, avail themselves of state action "immunity" from federal [**25] antitrust laws.

It Is So Ordered.

Appendix A

April 22, 1980

Memorandum

To: The Honorable George R. Ariyoshi, Governor of Hawaii

From: Director of Transportation

Subject: Taxi Service-Honolulu International Airport Governor Referral 80:186-15

Airport taxi service is an essential part of ground transportation at large and medium hub airports. Taxi service at Honolulu, Hilo, Kahului, Lihue, and Ke-ahole is under exclusive licenses issued by the Department authorizing the licensee to solicit passengers at these airports. In return for this privilege, the licensee is required to provide a minimum level of service, including standards of competence and courtesy for drivers.

It is obvious management has a difficult time enforcing standards for their personnel. Our files have many letters from passengers complaining about the attitude and service provided by taxi operators. In addition to speeding and reckless driving, drivers are known to refuse to comply with parking restrictions on the number of vehicles [*724] in loading zones and create sanitation problems in the parking areas. Unsightly chemical toilets adjacent to the public parking lot are provided [**26] simply because SIDA management is unable to assure drivers will use public facilities in the terminal building.

¹⁶ The city as licensor of all taxicab operators supervises taxicab activities through a comprehensive set of regulations, the state as airport owner-operator has nothing comparable. Chapter 12 of the Revised Ordinances of Honolulu deals with regulations for common carriers, including taxis. § 12-1.11 R.O.H. (1980) sets rates for fare and baggage charges.

562 F. Supp. 712, *724L^A 1983 U.S. Dist. LEXIS 18059, **26

Policing drivers will be [a] continuous problem. Speeding and reckless driving can be controlled as soon as we are authorized more HPD officers. If necessary, we can insist that SIDA prohibit any driver that we find too undesirable from ever serving the airport.

Jonathan Shimada has recently observed the problem and authorized additional enforcement by the HPD. Beyond that, DOT has little control, if any, on SIDA's management of their service.

Ryokichi Higashionna

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

HN2 [] Entitlement as Matter of Law, Appropriateness

In considering the proper summary judgment standard, summary judgment should not be granted unless the entire record shows a right to judgment with such clarity as to leave no room for controversy and establishes affirmatively that the adverse party cannot prevail under any circumstances. Neither should summary judgment be granted if the evidence is such that conflicting inferences may be drawn therefrom, or if reasonable men might reach different conclusions. Summary judgment under [Fed. R. Civ. P. 56](#) should be granted only where it is perfectly clear that no issue of fact is involved and inquiry into the facts is not desirable to clarify the application of the law. This is true even where there is no dispute as to the evidentiary facts, but only as to the conclusions or inferences to be drawn therefrom, and the party opposing a motion for summary judgment is entitled to all favorable inferences which can be drawn from the evidence. Not merely must the historic facts be free of controversy, but also there must be no controversy as to the inferences to be drawn from them.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN3 [] Summary Judgment, Entitlement as Matter of Law

Summary procedures should be used sparingly in complex antitrust litigation where motive and intent play leading roles, the proof is largely in the hands of the alleged conspirators, and hostile witnesses thicken the plot. It is only when the witnesses are present and subject to cross-examination that their credibility and the weight to be given their testimony can be appraised. Trial by affidavit is no substitute for trial by jury.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

HN4 [] Summary Judgment, Burdens of Proof

To the extent that an argument can be interpreted to suggest that [Fed. R. Civ. P. 56\(e\)](#) should, in effect, be read out of antitrust cases and permit plaintiffs to get to a jury on the basis of the allegations in their complaints, coupled with the hope that something can be developed at trial in the way of evidence to support these allegations, such an argument is unsupportable. While it is important to preserve litigants' rights to a trial on their claims, those rights may not be extended to the point of requiring that anyone who files an antitrust complaint setting forth a valid cause of action be entitled to a full-dress trial notwithstanding the absence of any significant probative evidence to support the complaint.

HN8 [PDF] **Antitrust & Trade Law, Sherman Act**

560 F. Supp. 760, *760LÁ1983 U.S. Dist. LEXIS 17987, **17987

To assert a cause of action under either [15 U.S.C.S. § 15](#) or the Hart-Scott-Rodino Antitrust Improvements Act of 1976, [15 U.S.C.S. § 15c\(a\)\(1\)](#), a plaintiff must assert actual injury sustained either by the plaintiff or those on whose behalf he is suing. The alleged substantive violation of the antitrust laws which must underlie either a parens patriae or treble damage action is in turn based upon the Sherman Act, [15 U.S.C.S. § 1](#), which states that every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal. The ordinary restraint of trade will be deemed illegal only if the actual competitive effects the restraint has upon the relevant market demonstrate it to be an unreasonable restraint of trade. There are certain exceptions to the rule of reason for agreements or practices that because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm that they have caused or the business excuse for their use.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

[HN9](#) [] Per Se Rule Tests, Manifestly Anticompetitive Effects

There are two complementary categories of antitrust analysis. In the first category are agreements whose nature and necessary effect are so plainly anticompetitive that no elaborate study of the industry is needed to establish their illegality because they are illegal per se. In the second category are agreements whose competitive effect can only be evaluated by analyzing the facts peculiar to the business, the history of the restraint, and the reasons why it was imposed.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Evidence > Types of Evidence > Circumstantial Evidence

Antitrust & Trade Law > Sherman Act > General Overview

[HN10](#) [] Conspiracy to Monopolize, Sherman Act

While the Sherman Act, [15 U.S.C.S. § 1](#), speaks of "contract, combination, or conspiracy," courts read the phrase as an alliterative compound noun, roughly translated to mean concerted action. Hence, the statutory language presents a single concept about common action, not three separate ones. In determining the existence of such concerted action, proof of conspiracy need not be direct, and business behavior is admissible circumstantial evidence from which the fact finder may infer agreement. Most importantly, explicit agreement is not a necessary part of a Sherman Act conspiracy. Instead, the crucial question is whether the defendants' conduct stemmed from independent decision or from an agreement, tacit or express.

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

[HN11](#) [] Antitrust & Trade Law, Sherman Act

560 F. Supp. 760, *7601983 U.S. Dist. LEXIS 17987, **17987

It is elementary that an unlawful conspiracy may be and often is formed without simultaneous action or agreement on the part of the conspirators. Acceptance by competitors, without previous agreement, of an invitation to participate in a plan, the necessary consequence of which, if carried out, is restraint of interstate commerce, is sufficient to establish an unlawful conspiracy under the Sherman Act, [15 U.S.C.S. § 1](#).

Antitrust & Trade Law > Sherman Act > General Overview

[HN12](#) [L] Antitrust & Trade Law, Sherman Act

An unlawful combination is not just such as arises from a price maintenance agreement, express or implied; such a combination is also organized if the producer secures adherence to his suggested prices by means which go beyond his mere declination to sell to a customer who will not observe his announced policy.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

[HN13](#) [L] Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints

The organizer of a horizontal conspiracy may be liable as a co-conspirator even if the organizer was not one of the actual competitors and the organizer does not have to produce an actual intercompetitor agreement in order to be held to have provoked an illegal combination.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

[HN14](#) [L] Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints

Co-conspirators do not have to have identical motives in order to conspire with each other. In other words, a plaintiff does not have to establish that the ultimate objective of each conspirator was the actual restraint of trade - it is sufficient if effectuation of the restraint is an intermediate goal sought for the facilitation of some other overriding objective. Thus, independent parties assisting a company in achieving its restraint can be co-conspirators with the company even though they will never be in a position to reap the benefits that directly flow from the restraints.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

[HN15](#) [L] Price Fixing & Restraints of Trade, Vertical Restraints

A restraint is "vertical" if the purpose of the restraint is to promote interbrand competition. The phrase "undertaken for the purpose of promoting interbrand competition" is meant as encompassing any act which a supplier takes for the purpose of maximizing his profit in the product being restrained.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

560 F. Supp. 760, *760 (1983 U.S. Dist. LEXIS 17987, **17987

HN16 [blue document icon] Price Fixing & Restraints of Trade, Vertical Restraints

A practice is "vertical" restraint of trade if its source is at least partially the supplier's drive for profits in the product concerned.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

International Trade Law > General Overview

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN17 [blue document icon] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Price fixing is one of those practices that is illegal per se under the Sherman Act, [15 U.S.C.S. § 1](#). To be guilty of price fixing, the conspirators do not have to adopt a rigid price, substantially less has been found to be price fixing. An activity can violate the per se rule even if its effect upon prices is indirect. In essence, an interference with the market forces freely setting the prices of goods is sufficient.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN18 [blue document icon] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

An agreement among competitors on the starting price to be used in commencing negotiations with their customers falls within the forbidden category of price fixing.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN19 [blue document icon] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

The presence of a "vertical" element in a price restraint does not immunize it from per se status. Both minimum resale price maintenance and maximum resale price maintenance are illegal per se.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

HN20 [blue document icon] Private Actions, Remedies

There are three essential elements in every private antitrust action. They are (1) a violation of the [antitrust law](#), (2) direct injury to the plaintiff from such violations, and (3) damages sustained by the plaintiff. It follows, therefore, that a mere finding of violation does not result in liability. However, once a plaintiff has proven that some antitrust injury did in fact occur, the courts impose a much lighter burden upon him in establishing the precise extent of his

damages. While damages may not be the result of mere guesswork or speculation, quite relaxed standards govern. The rationale for this relaxation includes the inherent complexity and imprecision in calculating antitrust damages, and above all the inequity of allowing the defendant to profit from the uncertainty created by his own wrongdoing. In particular, courts are loathe to entertain defendants' pleas about the speculative nature of determining the free market conditions that would have prevailed in the absence of a restraint when the defendant's own conduct has eliminated those free market conditions.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN21 [+] **Private Actions, Remedies**

In any action under section the Hart-Scott-Rodino Antitrust Improvements Act of 1976, [15 U.S.C.S. § 15c\(a\)\(1\)](#), in which there has been a determination that a defendant agreed to fix prices, damages may be proved and assessed in the aggregate by statistical or sampling methods, by the computation of illegal overcharges, or by such other reasonable system of estimating aggregate damages as the court in its discretion may permit without the necessity of separately proving the individual claim of, or amount of damage to, persons on whose behalf the suit was brought, pursuant to the Hart-Scott-Rodino Antitrust Improvements Act of 1976, [15 U.S.C.S. § 15d \(1976\)](#).

Opinion

[*762] MEMORANDUM OPINION AND ORDER

YOUNG, United States District Judge

The Judicial Panel on Multidistrict Litigation has consolidated the eight above-captioned actions for pretrial purposes and assigned them to this Court pursuant to [28 U.S.C. § 1407\(a\) \(1976\)](#). These lawsuits include six actions brought by the Corporation Counsel of the District of Columbia and the attorneys general of Delaware, Maryland, Pennsylvania, Virginia, and West Virginia on behalf of their respective citizenry under the *parens patriae* provisions of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, [15 U.S.C. §§ 15c-15h \(1976\)](#),¹ [\[**3\]](#) [\[**2\]](#) and two private treble damage antitrust actions asserted pursuant to [15 U.S.C. § 15 \(Supp. V 1981\)](#).² All eight

¹ The six consolidated *parens patriae* actions are *State of Maryland ex rel. Sachs v. Mid-Atlantic Toyota Distributors, Inc., et al.*, Civil No. Y-80-3238; *State of Delaware ex rel. Gebelein v. Mid-Atlantic Toyota Distributors, Inc., et al.*, Civil No. Y-81-650; *State of West Virginia ex rel. Browning v. Mid-Atlantic Toyota Distributors, Inc., et al.*, Civil No. Y-81-726; *District of Columbia ex rel. Rogers v. Mid-Atlantic Toyota Distributors, Inc., et al.*, Civil No. Y-81-805; *Commonwealth of Pennsylvania On Its Own Behalf And As Parens Patrie v. Mid-Atlantic Toyota Distributors, Inc., et al.*, Civil No. Y-81-1880, and *Commonwealth of Virginia v. Mid-Atlantic Toyota Distributors, Inc., et al.*, Civil No. Y-82-479. As indicated above, the Commonwealth of Pennsylvania also sues on its own behalf.

actions [*763] commonly allege violations of [§ 1](#) of the Sherman Act, [15 U.S.C. § 1 \(1976\)](#), by the regional Toyota distributor for the mid-Atlantic states and various local Toyota dealers within the distributor's region.³ Plaintiffs in all actions have named three common defendants (hereafter "Weisman defendants"): the distributor, Mid-Atlantic Toyota Distributors, Inc. (hereafter "MAT"), its corporate affiliate, Carecraft Industries, Ltd. (hereafter "Carecraft"), and the controlling individual behind both entities, Frederick R. Weisman (hereafter "Weisman"). Individual dealers comprise all of the remaining defendants in each action and appear only in those suits appropriate to their respective geographic locations.

The Court currently has before it numerous defense motions for summary judgment.⁴ After a full round of briefing, [*4] the Court heard oral argument on the motions on October 28, 1982. The Court subsequently concluded that it needed certain additional information for full consideration of the issues raised, and the parties promptly provided the Court with appropriate stipulations as well as supplemental memoranda commenting on the legal significance of the submitted information. After careful consideration of the extensive record in this litigation, the Court grants the defendants' motions to a limited extent and enters partial summary judgment in their favor on all claims grounded upon the so-called "Double Value Days" program. [Fed.R.Civ.P. 56\(d\)](#). The Court denies all other portions of the defense motions, but reviews certain principles of law which will govern the remainder of this litigation. In particular, the determination of [§ 1](#) liability may proceed under a "*per se*" standard, although not in the precise manner the plaintiffs have argued for. A fuller exposition of the scope of and basis for these rulings follows.

[**5] SUMMARY JUDGMENT STANDARDS IN ANTITRUST LITIGATION

HN1 [↑] Summary judgment is ordinarily appropriate when:

the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law.

[*764] [Fed.R.Civ.P. 56\(c\)](#). **HN2** [↑] The Fourth Circuit has amply elaborated upon this standard in an opinion which merits quotation at length:

² The two private actions are *Golub, et al. v. Mid-Atlantic Toyota Distributors, Inc., et al.*, Civil No. Y-81-806, and *Johnston, et al. v. Mid-Atlantic Toyota Distributors, Inc., et al.*, Civil No. Y-81-2954. The Court previously denied motions for class certification under [Fed.R.Civ.P. 23](#) in both of these actions, [In re Mid-Atlantic Toyota Antitrust Litigation, 93 F.R.D. 485 \(D. Md. 1982\)](#), and the cases have remained relatively dormant since that time.

³ Both private actions and the Pennsylvania and Virginia *parens actiones* also assert "tying" claims pursuant to § 3 of the Clayton Act, [15 U.S.C. § 14 \(1976\)](#). In a pretrial conference on October 28, 1982, the Court declared all current issues about the validity of the tying counts to have been mooted by the parties. Consequently, the present opinion will only address the plaintiff's [§ 1](#) claims, with the Court deferring any ruling on the tying counts until such time as the parties decide to raise the issue again.

⁴ The following defendants have filed formal motions: Mid-Atlantic Toyota Distributors, Inc., Frederick R. Weisman, and Carecraft Industries, Ltd., MDL-456, Pleading No. 116; Schaefer & Strominger, Inc., MDL-456, Pleading No. 142; Washington Area Dealer defendants, MDL-456, Pleading No. 143; Castle Toyota, Inc., Civil No. Y-80-3238, Pleading No. 169; Jones Plymouth, Inc., Civil No. Y-80-3238, Pleading No. 170; Torrey, Inc., Civil No. Y-80-3238, Pleading No. 172; R&H Motor Cars, Inc., Civil No. Y-80-3238, Pleading No. 173; Russel Motor Cars, Inc., Civil No. Y-80-3238, Pleading No. 173; Younger Toyota, Inc., Civil No. Y-80-3238, Pleading No. 174; Laurel Toyota, Inc., Civil No. Y-80-3238, Pleading No. 175; Delaware dealer defendants, Civil No. Y-81-650, Pleading No. 44; Certain Pennsylvania dealer defendants, Civil No. Y-81-1880, Pleading No. 302; and Southern Virginia dealer defendants, Civil No. Y-82-479, Pleading No. 179. While certain defendants originally styled their motions as a motion for judgment on the pleadings pursuant to [Fed.R.Civ.P. 12\(c\)](#), the Court ruled during a pretrial conference on June 25, 1982, that all motions for judgment on the pleadings would be treated as [Fed.R.Civ.P. 56](#) motions for summary judgment. The Court notes that certain defendants have filed formal motions while others have only submitted supportive or reply memoranda "joining in" other defendants' formal motions. To avoid confusion and needless balkanization, the Court will treat all defendants as having appropriately moved in all actions for summary judgment upon the general *factual* grounds which the states have had an opportunity to respond to in their two memoranda.

It is well settled that summary judgment should not be granted unless the entire record shows a right to judgment with such clarity as to leave no room for controversy and establishes affirmatively that the adverse party cannot prevail under any circumstances. [sic] Neither should summary judgment be granted if the evidence is such that conflicting inferences may be drawn therefrom, or if reasonable men might reach different conclusions. 3 Barron & Holtzoff, Federal Practice & Procedure § 1234 (Rules ed. 1958). Burden [sic] is upon party moving for summary judgment to demonstrate clearly that there is no genuine issue of fact, and any doubt as to the existence of such [**6] an issue is resolved against him. 3 Barron & Holtzoff, Federal Practice & Procedure § 1235 (Rules ed. 1958).

In *Kirkpatrick v. Consolidated Underwriters*, 227 F.2d 228 (4th Cir. 1955), this court repeated its holding in *Pierce v. Ford Motor Co.*, 190 F.2d 910 (4th Cir. 1951), that summary judgment under *Rule 56* should be granted only where it is perfectly clear that no issue of fact is involved and inquiry into the facts is not desirable to clarify the application of the law. This is true even where there is no dispute as to the evidentiary facts but only as to the conclusions or inferences to be drawn therefrom, and the "party opposing a motion for summary judgment is entitled to all favorable inferences which can be drawn from the evidence." *Cram v. Sun Ins. Office, Ltd.*, 375 F.2d 670, 674 (4th Cir. 1967).

As we stated in *American Fid. & Cas. Co. v. London & Edinburgh Ins. Co.*, 354 F.2d 214, 216 (4th Cir. 1965):

"Not merely must the historic facts be free of controversy but also there must be no controversy as to the inferences to be drawn from them. It is often the case that although the basic facts are not in dispute, the parties nevertheless disagree [**7] as to the inferences which may properly be drawn. Under such circumstances the case is not one to be denied on a motion for summary judgment."

Phoenix Savings and Loan, Inc. v. Aetna Casualty & Surety Co., 381 F.2d 245, 249 (4th Cir. 1967).

In light of this strict standard, it is not surprising that some courts have traditionally demonstrated a marked reluctance towards summary disposition of complex antitrust cases. See, e.g., *Norfolk Monument Co., Inc. v. Woodlawn Memorial Gardens, Inc.*, 394 U.S. 700, 704, 22 L. Ed. 2d 658, 89 S. Ct. 1391 (1969); *Poller v. Columbia Broadcasting System, Inc.*, 368 U.S. 464, 473, 7 L. Ed. 2d 458, 82 S. Ct. 486 (1962); *Morrison v. Nissan Motor Co., Ltd.*, 601 F.2d 139, 141-42 (4th Cir. 1979). See generally 10A C. Wright, A. Miller & M. Kane, *Federal Practice and Procedure* § 2732.1 at 313-31 (2nd Ed. 1983). As Justice Clark said for the majority in *Poller*:

HN3[] summary procedures should be used sparingly in complex antitrust litigation where motive and intent play leading roles, the proof is largely in the hands of the alleged conspirators, and hostile witnesses thicken the plot. It is only when the witnesses [**8] are present and subject to cross-examination that their credibility and the weight to be given their testimony can be appraised. Trial by affidavit is no substitute for trial by jury. *

* *

Poller, 368 U.S. at 473. On the other hand, the Supreme Court has indicated that some limits exist upon this judicial reluctance:

HN4[] To the extent that petitioner's argument can be interpreted to suggest that *Rule 56(e)* should, in effect, be read out of antitrust cases and permit plaintiffs to get to a jury on the basis of the allegations in their complaints, coupled with the hope that something can be developed at trial in the way of evidence to support these allegations, we decline to accept it. While we recognize the importance of preserving litigants' rights to a trial on their claims, we are not prepared to extend those rights to the point of requiring that anyone who files an antitrust complaint [*765] setting forth a valid cause of action be entitled to a full-dress trial notwithstanding the absence of any significant probative evidence to support the complaint.

First National Bank of Arizona v. Cities Service Co., 391 U.S. 253, 289-90, 20 L. Ed. 2d 569, [**9] 88 S. Ct. 1575 (1968). Accord National Electrical Contractors Association, Inc. v. National Constructors Association, 678 F.2d 492, 497 (4th Cir. 1982). See generally 2 P. Areeda & D. Turner, Antitrust Law para. 316 (1978) (suggesting broader appropriateness of summary judgment). Nevertheless, summary disposition remains a highly elusive goal in cases such as the present one which contain allegations of § 1 conspiracy dependent upon divination of subjective intent. Neel v. Waldrop, 639 F.2d 1080, 1084 (4th Cir. 1981).

REVIEW OF THE UNDISPUTED FACTS AND DISPUTED ALLEGATIONS⁵

[10]** This case centers around the antitrust implications of two sets of multiple individual agreements between MAT and its dealers regarding a package of accessories for 1980 model Toyotas. Featuring "Polyglycoat" brand sealant products, the package of accessories (hereafter "protective package") included rustproof shielding, paint sealant, interior (textile or vinyl) sealant, soundshielding (undercoating), and membership in the "Cross Country Motor Club."⁶

The parties do not dispute the facial elements of the individual contracts within each set of agreements. In the first group of agreements, solicited by MAT under its "Total Concept Protective Program" (hereafter "Total **[**11]** Concept Program"), each dealer individually contracted with MAT to have the protective package applied to all of the 1980 Toyotas the dealer ordered, at a cost to the dealer of \$113.90.⁷ The protective package on cars furnished under the Total Concept Program had a suggested retail price of \$533.90 listed on the "sticker" which the Monroney Act, 15 U.S.C. §§ 1231-1233 (1976), requires automobile manufacturers and distributors to attach to all new vehicles.

In the second set of agreements, entered into as part of the distributor's "Double Value Days" program, many dealers individually contracted with the distributor to reduce the price on all Toyotas containing the protective package by the full suggested retail price of \$533.90. In consideration, the distributor would rebate to the dealer the entire wholesale price of \$113.90. This **[**12]** retail discount did not actually appear on the Monroney sticker. Instead, the participating dealer agreed to inform the customer of the \$533.90 discount at the time the dealer initially showed the customer the car (*i.e.*, the dealer agreed not to wait and see if perhaps the customer would take the car without the discount).

While these bare contractual terms appear to be conceded by all parties, the import of these individual agreements when **[*766]** cumulated is hotly disputed. Asserting that far more exists to these two aggregations of contracts than meets the eye, the plaintiffs allege that defendants used these agreements as the convenient vehicle for a massive price-fixing conspiracy. The defendants counter that these agreements were discrete, atomized, and designed to promote interbrand competition in the retail automobile market. To consider fully these divergent contentions, let alone attempt to resolve them, one must first appreciate the independent interest the Weisman defendants had in promoting the sale of the components of the protective package.

⁵ In determining the existence of a genuine issue of material fact, a court views the record in the light most favorable to the non-moving party. Poller, 368 U.S. at 473; Neel, 639 F.2d at 1082; 2 P. Areeda & D. Turner, *supra*, at 58. Exhuming legitimate disputes which might not otherwise be noticed, this principle particularly applies when conflicting inferences may be drawn "from the subsidiary facts contained in the affidavits, attached exhibits, and depositions. . . .", United States v. Diebold, Inc., 369 U.S. 654, 655, 8 L. Ed. 2d 176, 82 S. Ct. 993 (1962). Consequently, the following discussion primarily focuses upon the evidence in the record supporting the plaintiffs' allegations. The Court recognizes that the record contains significant contrary evidence and obviously does not attempt to sit as the trier of fact at this early stage of the litigation. However, for purposes of economy in a regrettably lengthy opinion, the Court will not dwell upon the defendants' contrary factual allegations.

⁶ Some indication exists that on occasion not all of the five accessories were actually applied to a given car. However, as the parties appear to be in accord that all five components usually came together, the Court will follow the parties practice and assume for the sake of convenience that all five accessories were consistently applied.

⁷ The Court recognizes that the wholesale cost to the dealer as well as other relevant price figures varied over time.

The Court will ignore all such minor monetary fluctuations.

The Weisman Defendants: Structure and Interests

Counsel for the Weisman defendants have stipulated to the [**13] relevant facts concerning both the interrelationships among the Weisman defendants and their financial interest in the sale of the Polyglycoat products. For the entire time period relevant to this litigation, individual defendant Frederick R. Weisman owned and controlled numerous corporate entities through the Frederick Weisman Holding Company.⁸ [**14] The corporate subsidiaries of the holding company included both distributor defendant MAT⁹ and defendant Carecraft's stipulated predecessor in interest Crown Atlantic Corporation (hereafter "Crown Atlantic"). Mr. Weisman served as president of both entities.

Crown Atlantic was MAT's "port handling agent" in Baltimore, accepting the 1980 Toyotas off the ships from Japan and preparing them for distribution to the various local dealers. In particular, Crown Atlantic actually applied the Polyglycoat sealant products to the vehicles covered by the contracts in question. Crown Atlantic itself owned CPC Distributors, Inc. (hereafter "CPC"), a franchised distributor of Polyglycoat Corporation automotive products.¹⁰

In summary, Weisman's companies possessed distributional franchises for both Polyglycoat products and Toyotas. CPC exercised its Polyglycoat distributorship [**15] on a consignment basis, paying the Polyglycoat Corporation \$42.00 for every vehicle equipped with the protective package.¹¹ CPC in turn sold the package for a profit to Crown Atlantic, which applied the sealant components of the package and billed MAT \$78.00 for product and labor. As previously mentioned, MAT would charge its dealers \$113.00 per covered vehicle. When these transactions are consolidated, it becomes evident that Weisman, through his companies, received a 260% markup between the price paid Polyglycoat Corporation and the price charged the local Toyota dealers for the protective package.

Defendants' Potential Motivations for Entering Into the Agreements

With the Weisman defendants' Polyglycoat interests plainly in view, one can more readily appreciate the multiple potential incentives which may have prompted the contracts in question. As will be elaborated [**16] upon later, the incentives actually motivating the defendants to bargain together will play a crucial role in several liability issues. The Court of course does not presently rule [*767] on which motivations actually controlled, but merely review the possibilities open to the ultimate trier of fact.

Three alternative incentives may have motivated the Weisman defendants.¹² The plaintiffs assert that the driving force behind the Weisman defendants' initiation of these programs was a desire to sell more Toyotas. It does not

⁸ The Frederick Weisman Holding Company later changed its name to the Frederick Weisman Company. Weisman apparently did not own stock in the holding company directly but instead controlled it through the "Weisman Group," which in turn consisted of the Frederick R. Weisman Family Trust, Richard L. Weisman (Weisman's son), and Lerand, Inc. (an investment firm in which Frederick R. Weisman held a 5% equity interest and in which he and Richard L. Weisman each held 50% of the voting shares). The parties have simplified matters by stipulating that "during all relevant times, Frederick R. Weisman directly, through members of his immediate family, or through corporate interests was a majority shareholder of relevant corporate entities."

⁹ Weisman interests never possessed 100% ownership of MAT but instead "substantially owned" the distributor through control of more than 80% of the outstanding shares.

¹⁰ Between January, 1979 and September, 1979, CPC was controlled not by Crown Atlantic but by Crown Pacific Corporation, another Weisman company.

¹¹ The Polyglycoat Corporation sold CPC the rights to the Cross Country Motor Club membership along with its own sealant products.

¹² In accordance with the admonition that a court entertaining a summary judgment motion must view the record in the light most favorable to the non-moving party, the Court treats the Weisman defendants as a single economic unit for the purposes of this motion. It is true that the Supreme Court has frequently invoked an "intra enterprise conspiracy doctrine" and declared commonly owned corporate entities to be legally distinct actors capable of conspiring together in violation of § 1. United States

appear to be disputed that MAT had had a relatively poor market penetration vis-a-vis other Toyota regional distributors during the late 1970's. As MAT received a constant profit margin per wholesale sale regardless of the ultimate retail price, its revenues were almost completely dependent upon the *volume* of retail sales as opposed to the price obtained in those sales. According to a market study performed for MAT in 1979 by the management consulting firm Harbridge House, MAT had become trapped in a "vicious cycle" of declining regional sales volume:

1. The regional dealers extracted too high a profit per car sold and hence depressed total **[**17]** retail sales;
2. The national Toyota importer employed a formula for allocating the available imports among the various regional distributors which penalized distributors with slower turnover rates and higher inventories;
3. The proportionately fewer imports allocated to MAT under this formula reduced dealer confidence that MAT could satisfy their needs should they switch to a high volume, low profit per car strategy; and
4. The dealers therefore saw no reason to switch from their low volume, high profit per car approach.

The Harbridge House report recommended that MAT attempt to reduce the dealer profit per car, but recognized that the individual dealers would probably take a dim view of this proposal unless MAT provided them with credible assurances that it could actually fill the increased orders that such an approach would produce.

[18]** The States assert that the protective package provided MAT with an opportunity to break out of this "vicious cycle." Central to their argument is the assumption that automobile consumers base their purchasing decisions as much on the perceived "deal" or **[*768]** "bargain" they are getting as on the absolute price they actually pay. By adding a set of accessories to a Toyota with a wholesale price of \$133.00 but with a suggested retail price on the Monroney sticker of \$533.00, MAT supposedly gave its dealers \$420.00 worth of room to "bargain" with. The dealer could discount from the suggested retail price and increase the "deal" a buyer perceived he was receiving without reducing the dealer's original profit margin on the car. The defendants generally agree with plaintiffs' assertion that the programs were designed to increase Toyota sales. However, defendants prefer to stress the alleged intrinsic value of the protective package itself ¹³ as the means by which the protective package could generate those sales.

[19]** In addition to the plaintiffs' position, the record reveals two alternative possible motivations for the Weisman defendants. One is that the Weisman defendants were motivated not by a desire to sell more Toyotas to the public but by a desire to sell more Polyglycoat products to the Toyota dealers. The record reveals potential evidence that:

1. Weisman had attempted for several years to get the dealers to order Polyglycoat products;
2. The chief executive officer of MAT consistently opposed programs involving Polyglycoat products but Weisman regularly overruled him;

v. *Citizens & Southern National Bank*, 422 U.S. 86, 116, 45 L. Ed. 2d 41, 95 S. Ct. 2099 (1975) (dicta); *Perma Life Mufflers, Inc. v. International Parts Corp.*, 392 U.S. 134, 141-42, 20 L. Ed. 2d 982, 88 S. Ct. 1981 (1968); *Kiefer-Stewart Co. v. Seagram & Sons, Inc.*, 340 U.S. 211, 215, 95 L. Ed. 219, 71 S. Ct. 259 (1951); *United States v. Yellow Cab Co.*, 332 U.S. 218, 227, 91 L. Ed. 2010, 67 S. Ct. 1560 (1947). But cf. *Sunkist v. Winckler & Smith Co.*, 370 U.S. 19, 8 L. Ed. 2d 305, 82 S. Ct. 1130 (1962)

(farmer's combination itself permissible under Capper-Volstead Act not distinct from its subsidiaries). However, the Supreme Court has never fully elaborated on the parameters of this doctrine, and the Circuit Courts, no doubt prompted by criticism of the doctrine by learned commentators, see, e.g., P. Areeda, *Antitrust Analysis* para. 334 (3rd ed. 1981), have developed numerous exceptions to the general rule. See generally authorities collected in *Harvey v. Fearless Farris Wholesale, Inc.*, 589 F.2d 451, 455-56 n. 8 (9th Cir. 1979). In particular, a "one man show" exception has recently evolved in the Ninth Circuit: corporate entities controlled by a single individual are treated as a single business unit when that individual made the relevant decisions. *Thomsen v. Western Electric Co., Inc.*, 680 F.2d 1263, 1266 (9th Cir. 1982); *Las Vegas Sun, Inc. v. Summa Corp.*, 610 F.2d 614 (9th Cir. 1979); *Harvey*, 589 F.2d at 457; *Knutson v. Daily Review, Inc.*, 548 F.2d 795 (9th Cir. 1976) (alternative holding). The Court finds these authorities to be well reasoned and rules that as a matter of law a "one man show" exception exists to the general rule of intra-enterprise conspiracy. However, as the parties have not had an opportunity to marshall the facts in light of these principles, the Court will not definitively apply them to the particulars of this case at the present time. The Court also reserves ruling on the disputed issue of whether the applicability of the intra-corporate conspiracy rule or its exception is itself a question of fact or law. See generally discussion of authorities in *Ogilvie v. Fotomat Corp.*, 641 F.2d 581, 588 (8th Cir. 1981).

¹³ The defendants allege that the price of the protective package was lower than the sum of the retail prices of its constituent components.

3. Weisman assumed greater personal control of MAT at the time the protective package programs were initiated;
4. After meeting with his subordinates, Weisman personally initiated the protective package programs at issue here; and
5. After institution of the program, MAT continued to be reluctant to implement it as fully as Crown Atlantic's representative desired.

Such evidence might support an inference that Weisman had decided that the potential increased profits for his Polyglycoat distributorship would outweigh any potential losses feared by his Toyota distributorship and that **[**20]** hence the program should go forward despite the misgivings of MAT itself.

The third and perhaps most plausible alternative motivation for the Weisman defendants was that they hoped to increase both Toyota and Polyglycoat sales. Significant documentary evidence in the record exists to this effect.

Alternatives also exist as to what financial considerations allegedly impelled the individual dealers to join the Total Concept program.¹⁴ A dealer might have been tempted to use the higher suggested retail price as a device to maximize per car profits even further. Conversely, a dealer might have concurred in MAT's assessment of the need to increase sales volume and utilize the full opportunity for discounting which the accessory profit spread would provide. The dealers themselves intimate that the protective package afforded them an opportunity for what would be in effect price discrimination: they could charge the uncomplaining buyer the full \$533.00 but use the discount potential to secure the wavering buyer who balked at the full price. In this manner, they could perhaps increase both per car profits and sales volume.

[21] The Alleged Barrier to Utilizing Polyglycoat Products: Dealer Atomization**

In spite of the potential incentives reviewed above, relatively few Toyotas were sold with Polyglycoat products in the years **[*769]** preceding the initiation of the protective package programs in September, 1979.¹⁵ Plaintiffs assert, and defendants vigorously dispute, that the dealers were previously reluctant to order cars with the sealants because consumers did not like the products and other Toyota dealers selling cars without the sealants would be able to undercut them. The record does contain documents expressly stating that certain dealers did not care for the Polyglycoat products because of "competitive" reasons. As a Vice-President of Rosenthal Toyota, Inc., wrote to MAT, "We are in a very competitive market in the Greater Washington area and these port installed options will not allow us to be able to compete with the other Toyota dealers." The record also contains potential evidence that MAT incurred its dealers' wrath by attempting to force Polyglycoat products upon them. Supposedly prompting complaints to the national importer, these "coercive" tactics also allegedly provoked a **[**22]** charge by the Maryland Motor Vehicle Administration that MAT had violated the express language of [HN5](#) Md. Trans. Code Ann. [§ 15-207\(b\)\(2\)](#) (Michie 1977), by attempting to "coerce [a] dealer to order or accept delivery of . . . accessories for a vehicle . . . that is not required by law or by the dealer's franchise or that was not ordered voluntarily by the dealer."

¹⁴ As a dealer joining the Double Value Days program was by the terms of the individual agreement relinquishing the possibility of additional per car profit, the only rational motivation which could be inferred from his participation in the program would be a desire to increase sales volume by "giving away" the protective package. Similarly, the Weisman defendants could have only sought to stimulate Toyota sales by establishing the Double Value Days program, since they were contractually relinquishing the profit they had garnered on the sale of the protective packages to the dealers.

¹⁵ While the parties disagree and the record is not clear on exactly how many Toyotas were equipped with Polyglycoat products before September, 1979, it appears beyond dispute that markedly fewer cars were equipped with the sealant before the program than were equipped during the program.

Defendants strongly claim that fears of competitive disadvantage did not prompt the dealers to reject Polyglycoat products, and point to significant deposition testimony to that effect.¹⁶ However, this only raises the genuine issue of fact which a court cannot resolve on summary judgment. For purposes of the present motion, it is sufficient that the record suggests **[**23]** that evidence might well be introduced at trial which would allow the trier of fact to conclude that the dealers had largely avoided Polyglycoat products before September, 1979 because of competitive concerns.

Overcoming The Atomization: The Total Concept Program

Supposedly unable to overcome this individualized dealer reluctance by forcing the Polyglycoat products on them, the Weisman defendants allegedly decided to attack the dealer's underlying competitive concerns directly by facilitating an interdealer conspiracy. In the late summer of 1979, MAT announced the "Total Concept Protective Program" and urged its dealers to order all of their 1980 models with the sealant pre-applied. MAT convened a series of subregional dealer meetings which both Weisman and substantially all of the **[**24]** dealers attended.¹⁷ Hearing a report by a Harbridge House representative similar to the economic analysis summarized earlier,¹⁸ the dealers then received a direct appeal from William Abbott, MAT Vice-President for marketing, in support of the program. Abbott allegedly stressed the flexibility the protective package afforded the dealers, with the dealer keeping the full additional profit unless the customer balked.¹⁹ The additional profit margin attached to the package would then allow the dealer to "close the deal" without harming his original profit margin.

[25] [**770]** Controversy swirls over what happened after Abbott's presentation. The plaintiffs allege that the dealers "milled around," hovering over sign-up sheets which stated "Yes, we want to participate in the Polyglycoat Total Concept Program" and discussing unrevealed subjects. It appears to be undisputed that significant numbers of dealers did in fact sign up at the meetings, that MAT conducted at least some follow-up on those dealers who did not sign up at the time, and that by January, 1980 all but three dealers either had signed up or were ordering the protective package on their vehicles. Conceding this widespread dealer participation with the program, defendants proffer numerous dealer depositions indicating that each dealer signed up for the program solely for independent business reasons.²⁰ Plaintiffs counter that the meetings, sign-up sheets, and follow-ups provide strong circumstantial evidence that the dealers instead conspired with each other uniformly to incorporate the protective package into all Toyotas sold in the region and raise the suggested retail price of all Toyotas by \$533.00.

[26]** Plaintiffs also submit affidavits asserting that Polyglycoat-free Toyotas became almost impossible to obtain after the Total Concept Program took force. One consumer states that dealers told him they would have to wait for up to eight months to obtain a vehicle without the accessories. Having so far operated on the assumption that this is a *per se* case, plaintiffs have not submitted any evidence on what actual effect the Total Concept Program had upon retail prices. Defendants point to some assertions that most dealers "gave the protective package away" by discounting the retail price by the full amount of the accessory profit margin. The dealers also contend that only

¹⁶ For example, one dealer claims that he did not order the Polyglycoat because Crown Atlantic did a very sloppy job of applying the sealants at the port, necessitating a significant cleaning effort on the dealer's part.

¹⁷ MAT did not convene the meetings solely to promote the Total Concept Program. Defendants allege that the Program was only one among many promotional efforts pushed at the meetings.

¹⁸ The parties dispute the extent to which the Harbridge House representatives stressed the need for "joint" action by the dealers to break out of the "vicious cycle."

¹⁹ The Court notes some inconsistency between the Harbridge representative's stress on lower per car profits and Abbott's claims of the potential for increased profits per car. This inconsistency might be resolved if one assumes that the price discrimination available with the protective package would equal a flat automatic discount in economic results.

²⁰ Some deposition testimony also indicate that the dealers desired uniform adherence to the Program in order to (1) increase the efficiency of the port operation and hence speed the delivery of the cars to the dealers and (2) improve the possibility of interdealer exchanges of inventory to assist a dealer who had closed an unexpectedly large number of sales.

60% of the 1980 Toyotas actually had the protective package applied to them. Finally, some documents before the Court indicate that regional Toyota sales climbed dramatically in the months after the institution of the program.

Overcoming the Atomization: The Double Value Days Program

From January, 1980 to March, 1980, MAT supplemented the Total Concept Program with the Double Value Days Program: those dealers who discounted the entire \$533.00 suggested retail price to the consumer would themselves [**27] receive a \$113.00 rebate from MAT. The defendants do not contest the existence of this program, but question how it could possibly injure an automobile purchaser who was essentially getting something for nothing. Plaintiffs have responded that they are not sure that the dealers adhered to the agreement and actually provided the full discount to the purchasers.

STATUTORY OVERVIEW: THE THREE BASIC ISSUES

The *parens patriae* plaintiffs sue under [HN6](#)[] [15 U.S.C. § 15c\(a\)\(1\)](#), which states in relevant part:

Any attorney general of a State may bring a civil action in the name of such State, as *parens patriae* on behalf of natural persons residing in such State, in any district court of the United States having jurisdiction of the defendant, to secure monetary relief as provided in this section *for injury sustained* by such natural persons to their property by reason of any violation of [Sections 1 to 7](#) of this title [emphasis supplied].

[HN7](#)[] [15 U.S.C. § 15](#) provides the authority for the private plaintiff's treble damage action:

Any person *who shall be injured* in his business or property by reason of anything forbidden in the antitrust laws may sue therefor [**28] in any district court of the United States in the district in which the defendant resides or is found or has an agent, without respect to the amount in controversy, and shall recover threefold the damages by him sustained, and the cost of suit, including a reasonable attorney's fee [emphasis supplied].

[*771] [HN8](#)[] To assert a cause of action under either statute, a plaintiff must, as indicated by the phrases highlighted in the above quotations, assert actual injury sustained either by the plaintiff or those on whose behalf he is suing.

The alleged substantive violation of the antitrust laws which must underlie either a *parens patriae* or treble damage action is in turn based upon [§ 1](#) of the Sherman Act:

Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal . . .

[15 U.S.C. § 1 \(1976\)](#). While the language of [§ 1](#) appears on its face to condemn all contracts "in restraint of trade," the Supreme Court has long ruled that "it cannot mean what it says." [National Society of Professional Engineers v. United States, 435 U.S. 1](#)[*29] [679, 687, 55 L. Ed. 2d 637, 98 S. Ct. 1355 \(1978\)](#). Instead, the ordinary restraint of trade will be deemed illegal only if the actual competitive effects the restraint has upon the relevant market demonstrate it to be an *unreasonable restraint of trade*. [*Id. at 690*](#). As the Court knows from experience, a case tried under this "Rule of Reason" standard of liability frequently involves almost overwhelming factual complexity. In response to this practical problem, the Supreme Court has carved out certain exceptions to the Rule of Reason for "agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm that they have caused or the business excuse for their use." [Northern Pacific Railroad Co. v. United States, 356 U.S. 1, 5, 2 L. Ed. 2d 545, 78 S. Ct. 514 \(1958\)](#). Accord [Broadcast Music, Inc. v. Columbia Broadcasting System, Inc., 441 U.S. 1, 7-8, 60 L. Ed. 2d 1, 99 S. Ct. 1551 \(1979\)](#). Courts describe such agreements as "*illegal per se*" and do not require demonstration of actual competitive impact in the [**30] particular case. [*Id.*](#) As Justice Stevens has recently summarized,

HN9 There are, thus, two complementary categories of antitrust analysis. In the first category are agreements whose nature and necessary effect are so plainly anticompetitive that no elaborate study of the industry is needed to establish their illegality -- they are "illegal per se." In the second category are agreements whose competitive effect can only be evaluated by analyzing the facts peculiar to the business, the history of the restraint, and the reasons why it was imposed.

Engineers, 435 U.S. at 692.

In attempting to apply these basic authorities, the parties have raised three separate issues:

First, does the present record contain sufficient evidence to create a genuine issue as to the existence of a § 1 "contract, combination or conspiracy" among the defendants?

Second, if one assumes that such a combination existed, is the determination as to whether the combination was "in restraint of trade" governed by a *per se* or a Rule of Reason standard?

Third, if one assumes that a combination in restraint of trade existed, have the plaintiffs alleged §§ 15, 15c "injury" [**31] to the Toyota purchasers?

The Court will address these issues *seriatim*.

LIABILITY UNDER § 1: CONTRACT, COMBINATION OR CONSPIRACY?

No one disputes that the Total Concept Program involved individual "contracts" between MAT and its dealers. Taken alone, such an individual contract plainly did not create antitrust problems.²¹ However, the [*772] plaintiffs base their claim of § 1 concerted action upon an additional agreement among the dealers themselves and between the dealers as a group and the Weisman defendants. To clarify the analysis of this issue, the Court first examines the possibility of concerted action among the dealers alone. As it finds that sufficient potential evidence exists to raise a genuine issue about interdealer concerted action, the Court then assumes the existence of an interdealer conspiracy and evaluates whether the Weisman defendants can be added on as additional co-conspirators with the dealers.

[**32] Concerted Action Among the Dealers

HN10 While § 1 speaks of "contract, combination, or conspiracy," courts have read the phrase "as an alliterative compound noun, roughly translated to mean 'concerted action.'" *Edward J. Sweeney & Sons, Inc. v. Texaco, 637 F.2d 105, 111 (3d Cir. 1980)* (quoting *Bogosian v. Gulf Oil Corp., 561 F.2d 434, 445-46 (3rd Cir. 1977)*, cert. denied, 434 U.S. 1086, 55 L. Ed. 2d 791, 98 S. Ct. 1280 (1978)). Hence, "the statutory language presents a single concept about common action, not three separate ones." *Sweeney & Sons, 637 F.2d at 111*. In determining the existence of such concerted action, "proof of § 1 conspiracy need not be direct," *United States v. Foley, 598 F.2d 1323, 1331 (4th Cir. 1979)*, and "business behavior is admissible circumstantial evidence from which the fact finder may infer agreement," *Theatre Enterprises, Inc. v. Paramount Film Distributing Corp., 346 U.S. 537, 540, 98 L. Ed. 273, 74 S.*

²¹ A dealer might have attempted to contend that the contract was a "tie" in violation of § 3 of the Clayton Act, *15 U.S.C. § 14 (1976)*. However, the dealer would have had to establish that MAT coerced him into taking the tied product along with the tying product. *Ogden Food Service Corp. v. Mitchell, 614 F.2d 1001, 1002 (5th Cir. 1980); Capital Temporaries, Inc. of Hartford v. Olsten Corp., 506 F.2d 658, 661-63 (2nd Cir. 1974)*. In the present case, the dealers plainly had the option of purchasing their 1980 models without the protective package.

While the individual Total Concept Program contracts posed no antitrust concerns, each individual Double Value Days contract did in fact create a vertical price fixing agreement, as discussed at page 783, *infra*. Plaintiffs do not appear to allege that the Double Value Days contracts taken collectively constituted an additional restraint of trade, and the Court will not consider that issue.

Ct. 257 (1954). Most importantly, "it has long been settled that explicit agreement is not a necessary part of a Sherman Act conspiracy." United States v. General Motors, 384 U.S. 127, 142-43, 16 L. Ed. 2d 415, 86 S. Ct. 1**331 1321 (1966). Accord Interstate Circuit, Inc. v. United States, 306 U.S. 208, 226, 83 L. Ed. 610, 59 S. Ct. 467 (1939). Instead, "the crucial question is whether . . . [the defendants'] conduct stemmed from independent decision or from an agreement, *tacit* or express [emphasis supplied]." Theatre Enterprises, 346 U.S. at 540. Some examination of the elements of a § 1 "tacit" agreement is merited.

It is clear that proof of consciously parallel business behavior without more does not entitle a plaintiff to a directed verdict in his favor. Theatre Enterprises, 346 U.S. at 541-42. While the Supreme Court in Norfolk Monument, 394 U.S. 700, 89 S. Ct. 1391, 22 L. Ed. 2d 658, reversed a directed verdict for defendants where the record contained only evidence of similar business practices by the defendants, many Circuit Courts have construed Theatre Enterprises to authorize summary judgment or a directed verdict for defendants when the exclusive evidence is of parallel behavior. See, e.g., Dahl, Inc. v. Roy Cooper Co., 448 F.2d 17, 19 (9th Cir. 1971). However, additional indicia of concerted action above and beyond mere parallelism ordinarily will allow a case [**34] to reach the jury. See generally Areeda, *supra*, at P 325 (reviewing most common "plus factors"). Professor Areeda calls one such category of additional evidence "actions facilitating oligopolistic collaboration." Id. at 379.

The two Supreme Court decisions establishing the doctrine of "tacit agreement" provide apt examples of "facilitating actions." In Interstate Circuit, 306 U.S. at 208, two powerful first run motion picture exhibitors faced competition from certain second run exhibitors who charged a markedly lower admission price for the same film. Thwarting such competition indirectly, the first run houses obtained separate agreements from each of the eight major movie distributors that each distributor would sell to the second run [*773] houses only on the condition that the second run houses raise their admission prices. To enlist the distributors' assistance in this plan, the first run houses sent a letter jointly addressed to all distributors informing them that the first runs would not deal with an individual distributor unless that distributor agreed to impose the restraints upon the second runs. The first runs then followed up the letter with a [**35] series of separate meetings with each distributor at which they obtained each individual distributor's agreement.

The Supreme Court held that sufficient circumstantial evidence existed to support a finding of express agreement among the distributors. Noting that the distributors failed to produce any witness who would have had personal knowledge of whether an interdistributor agreement existed or not, Justice Stone also commented in part:

The O'Donnell letter named on its face as addressees the eight local representatives of the distributors, and so from the beginning each of the distributors knew that the proposals were under consideration by the others. Each was aware that all were in active competition and that without substantially unanimous action with respect to the restrictions for any given territory there was risk of a substantial loss of the business and good will of the subsequent-run and independent exhibitors, but that with it there was the prospect of increased profits. There was, therefore, strong motive for concerted action, full advantage of which was taken by Interstate and Consolidated in presenting their demands to all in a single document.

Interstate [**36] Circuit, 306 U.S. at 222. More importantly, Justice Stone then described why the evidence permitted a finding of concerted action *without* an express agreement:

While the District Court's finding of an agreement of the distributors among themselves is supported by the evidence, we think that in the circumstances of this case such agreement for the imposition of the restrictions upon subsequent-run exhibitors was not a prerequisite to an unlawful conspiracy. *It was enough that, knowing that concerted action was contemplated and invited, the distributors gave their adherence to the scheme and participated in it.* Each distributor was advised that the others were asked to participate; each knew that cooperation was essential to successful operation of the plan. They knew that the plan, if carried out, would result in a restraint of commerce, and knowing it, all participated in the plan. The evidence is persuasive that each distributor early became aware that the others had joined. With that knowledge they renewed the arrangement and carried it into effect for the two successive years.

HN11 [↑] It is elementary that an unlawful conspiracy may be and often is formed without simultaneous [**37] action or agreement on the part of the conspirators. . . Acceptance by competitors, without previous

560 F. Supp. 760, *773L^A 1983 U.S. Dist. LEXIS 17987, **37

agreement, of an invitation to participate in a plan, the necessary consequence of which, if carried out, is restraint of interstate commerce, is sufficient to establish an unlawful conspiracy under the Sherman Act [emphasis added].

Interstate Circuit, 306 U.S. at 226-27.

The Supreme Court reaffirmed its doctrine of "tacit agreement" in United States v. Masonite Corporation, 316 U.S. 265, 86 L. Ed. 1461, 62 S. Ct. 1070 (1942). Masonite entered into a series of "agency" agreements with its competitors which Justice Douglas ultimately found to constitute a subterfuge for intra-industry price fixing. While Masonite secured each competitor's agreement separately, each competitor knew that Masonite was entering into similar agreements with the other firms. The Supreme Court ruled that these facts alone could support a finding of concerted action:

there can be no doubt that this is a price-fixing combination which is illegal *per se* under the Sherman Act. That is true enough though the District Court found that, in negotiating and entering into the first [**38] agreements, each appellee, other [*774] than Masonite, acted independently of the others, negotiated only with Masonite, desired the agreement regardless of the action that might be taken by any of the others, did not require as a condition of its acceptance that Masonite make such an agreement with any of the others, and had no discussions with any of the others. It is not clear at what precise point of time each appellee became aware of the fact that its contract was not an isolated transaction but part of a larger arrangement. But it is clear that, as the arrangement continued, each became familiar with its purpose and scope. Here, as in Interstate Circuit, Inc. v. United States, 306 U.S. 208, 226, 83 L. Ed. 610, 59 S. Ct. 467, "It was enough that, knowing that concerted action was contemplated and invited, the distributors gave their adherence to the scheme and participated in it. [citations omitted].

Masonite, 316 U.S. at 274-75.

A recent Fourth Circuit decision demonstrates that *Interstate Circuit* and *Masonite* are far from anachronisms. In United States v. Foley, 598 F.2d at 1323, real estate brokers in Montgomery County, Maryland faced [**39] severely declining revenues. When one broker attempted unilaterally to raise his commission percentage, competition forced him back down. Another broker then held a dinner for his competitors and announced that, regardless of what the others did, he was raising his commission. Evidence conflicted over what was discussed at the dinner following the announcement, but all attendees subsequently did raise many of their commissions. Essentially following the *Interstate Circuit* language of "acceptance of an invitation," the Fourth Circuit affirmed the defendants' felony convictions.

Application of these authorities leaves no doubt that plaintiffs have raised an issue of whether the Total Concept Program constituted concerted action by the defendants to raise the starting price for 1980 Toyotas.²² [**44] The record contains potential evidence that:

²² The plaintiffs have alleged a conspiracy to raise the suggested retail price. However, the coexistence of the Monroney and Sherman Acts require that S.1 liability can attach only for a tacit agreement to increase the starting point in dealer/customer negotiations by the amount of the suggested retail price of the accessories. In other words, the dealers had to have impliedly agreed that each would not unilaterally discount the price of the Toyota before commencing negotiations with the customer. Such a unilateral reduction is what the Weisman defendants requested in the Double Value Days Program but is precisely the opposite of what Abbott urged each dealer to do in the initial Total Concept Program. Abbott allegedly told the dealers that they could charge the full \$533.00 and keep the resulting \$420.00 unless the customer balked. A tacit agreement among the dealers that each would do exactly what Abbott was suggesting would, as will be explained *infra*, create problems under the antitrust laws.

The Court also notes that defendants assume that plaintiffs have alleged (1) an agreement among the dealers to order all of their Toyotas with the protective package with (2) the [agreed] purpose of raising the suggested price. Defendants base many of their arguments about the proper definition of price fixing upon this characterization of plaintiffs' position. The Court has carefully examined plaintiffs' submissions and believes that plaintiffs' position could also be characterized as: (1) an agreement among

[*775] 1.) As in *Interstate Circuit*, raising the starting price contained profit potential (because the starting price would become the actual price unless the purchaser balked), but unilateral action posed competitive peril (since other Toyota dealers would be offering cars that were both "cleaner and cheaper").

2. The [**40] Weisman defendants assembled groups of dealers and invited them to join in the program, specifically telling each gathering of the profit potential that pocketing the starting price promised. Abbott raised the core element of the agreement -- keeping the suggested price as the starting price -- in a collective gathering of precisely those people who had the anti-competitive financial incentive to adopt it as a joint course of action. While meetings among competitors without more are not *per se* illegal, it certainly is not rank speculation to observe that a meeting provides an ideal device for facilitating horizontal agreements once the anti-competitive idea is jointly planted in the minds of those competitors present at the meetings.

3. The Weisman defendants then facilitated the dealers' adherence to the scheme by circulating sign up sheets. The use of these sheets allowed each dealer to observe which other dealers were joining the program. While the sign up sheets specifically dealt with ordering the protective package, and hence certainly are competent circumstantial evidence of a tacit agreement for uniform ordering, they also could have served as a facilitating mechanism [**41] for an agreement to raise the starting price, especially when viewed in the light of Abbott's comments about profit potential immediately prior to their circulation.

4. MAT representative had follow-up meetings with those dealers who attended the meeting, but did not sign up, to pressure them to join. *Masonite* indicates that these individual meetings alone could suffice if each dealer knew, as indeed each must have known by attending the group meetings, that others were participating in the same program.

5. At least one dealer has testified in his deposition that the suggested price usually was the starting price. If true, this standard practice provided an additional facilitating mechanism for raising the starting price -- dealers had less cause to doubt mutual adherence to their joint course of action if such action was an adjunct to ordinary procedures. While the dealers had a right and duty under the Monroney Act to display a uniform suggested price set by the manufacturer, they had neither a duty nor a right jointly to utilize that suggested price as a starting point in price negotiations.²³

6. A marked change in dealer purchasing patterns occurred between [**42] August, 1979 and January, 1980. If the previously mentioned congruence between suggested price and starting price as a standard business practice is also established, then one rational inference from the uniform ordering of the protective package would be that starting prices also rose over that period. The fact that the Weisman defendants had to institute the Double Value Days Program, which as previously mentioned automatically eliminated any increase in the starting price, also supports the inference that the dealers were utilizing the suggested price as the starting point and were in fact not discounting as often as Mr. Weisman had hoped. While any such parallel dealer behavior taken alone might not suffice under *Theatre Enterprises*, it certainly can serve as partial circumstantial evidence of conspiracy when viewed together with the "invitation" and "facilitators" outlined above.

the defendants to raise the suggested price (2) via the facilitating mechanism of uniform application of the protective package. Defendants do not squarely address this alternative position of plaintiffs and, when combined with their certainly justifiable failure to anticipate the Court's current ruling on the suggested/starting price distinction, appear understandably to assume as the premise of their price fixing argument that plaintiffs have not marshalled sufficient circumstantial evidence to raise a genuine issue about a tacit interdealer agreement to raise the starting price (as opposed to an interdealer agreement to order all of their Toyotas with the protective package). As will be intimated later, many of defendants' arguments on the *per se* issue may have some merit if one assumes that the agreement in question is an agreement for uniform ordering of the protective package. However, before one determines the standard that must be employed to ascertain whether a tacit agreement is in restraint of trade, one must first determine what that tacit agreement is. As the Court finds sufficient circumstantial evidence to raise an issue about a tacit agreement to raise the starting price, the Court will approach the *per se* issue with that agreement in mind. Plaintiffs of course should amend their pleadings to allege concerted action by a tacit agreement to raise the starting price.

²³ For a more detailed explanation of this point, see page 783 *infra*.

[*776] In summary, plaintiffs could establish evidence of: (1) dealer motivation to raise the starting price collectively, (2) an understanding that an effective raising of the starting price could in fact only be done collectively, (3) an invitation, in a collective setting, to raise [*43] the starting price, (4) mechanism for facilitating the collective acceptance of that invitation, and (5) subsequent action consistent with a collective acceptance of that invitation. If established, such evidence could allow a trier of fact to find concerted dealer action to raise the starting price within the principles of *Interstate Circuit*. Defendants proffer numerous depositions in which the various dealers assert that no concerted action of any kind occurred. However, this only crystallizes the factual issue which the Court cannot resolve on a summary judgment motion. n23A

The Weisman Defendants as Co-Conspirators

The Weisman defendants stress their "vertical" relationship with the dealers.²⁴ While this may have some relevance in determining whether a case proceeds under a *per se* or Rule of Reason standard, it poses no barrier to the trier of fact on the threshold issue of concerted action between the dealers as a group and the Weisman defendants.

The traditional Supreme Court cases on "vertical" concerted action [*45] deal with the existence of a manufacturer/dealer combination for maintenance of the resale prices of the manufacturer's products.²⁵ In the seminal case, Justice McReynolds held that a manufacturer could announce the resale prices it wished its retailers to charge and then unilaterally refuse to sell to those retailers who did not adhere to his suggestions. *United States v. Colgate & Co., 250 U.S. 300, 63 L. Ed. 992, 39 S. Ct. 465 (1919)*. Later decisions refused to construe *Colgate* as requiring that a finding of an actual "agreement" was a prerequisite for a price maintenance combination:

Thus, whatever uncertainty previously existed as to the scope of the *Colgate* doctrine, *Bausch & Lomb* and *Beech-Nut* plainly fashioned its dimensions as meaning no more than that a simple refusal to sell to customers who will not resell at prices suggested by the seller is permissible under the Sherman Act. In other words, *HN12* [↑] an unlawful combination is not just such as arises from a price maintenance *agreement*, express or implied; such a combination is also organized if the producer secures adherence to his suggested prices by means which go beyond his mere declination [*46] to sell to a customer who will not observe his announced policy.

United States v. Parke, Davis & Co., 362 U.S. 29, 43, 4 L. Ed. 2d 505, 80 S. Ct. 503 (1960). In *Parke, Davis*, the drug manufacturing company went beyond merely announcing that it would not deal with retailers who did not adhere to its suggested resale price schedule. Justice Brennan found that *Parke, Davis* also enlisted its wholesalers' assistance in enforcing the retailers' price schedules and approached individual retailers to "remind" them of its policy. Always telling each retailer that it was similarly warning the other retailers to adhere to its policy, *Parke, Davis* at one stage even served as a relay mechanism among dealers to transmit messages to the effect that "an individual dealer would adhere to the policy if the other dealers did." *Id. at 35-36*. Justice Brennan found the manufacturer to be not only a full participant in illegal concerted action but in fact the actual ringleader:

When the manufacturer's actions, as here, go beyond mere announcement of [*777] his policy and the simple refusal to deal, and he employs other means which effect adherence to his resale prices, [*47] he has *put together* a combination in violation of the Sherman Act . . . It must be admitted that a seller's announcement that he will not deal with customers who do not observe his policy may tend to engender confidence in each customer that if he complies his competitors will also. But if a manufacturer is unwilling to rely on individual self-interest to bring about general voluntary acquiescence which has the collateral effect of eliminating price

²⁴ As will be described *infra*, "vertical restraints" frequently occur among firms operating at different levels of the production and distribution chain of a given product.

²⁵ Express contracts of minimum resale price maintenance violate § 1 under *Dr. Miles Medical Co. v. John D. Park & Sons, Co., 220 U.S. 373, 55 L. Ed. 502, 31 S. Ct. 376 (1911)*.

competition, and takes affirmative action to achieve uniform adherence by inducing each customer to adhere to avoid such price competition, the customers' acquiescence is not then a matter of individual free choice prompted alone by the desirability of the product. The product then comes packaged in a competition-free wrapping -- a valuable feature in itself -- by virtue of concerted action induced by the manufacturer. *The manufacturer is thus the organizer of a price-maintenance combination or conspiracy in violation of the Sherman Act.* [emphasis supplied].

Parke, Davis, 362 U.S. at 44, 46-47. Parke, Davis indicates both: (1) that [HN13](#) the organizer of a horizontal conspiracy may be liable as a co-conspirator even [**48](#) if the organizer was not one of the actual competitors and (2) that the organizer did not have to produce an actual intercompetitor agreement in order to be held to have provoked an illegal combination.

The subsequent Supreme Court decision of [Albrecht v. Herald Co., 390 U.S. 145, 19 L. Ed. 2d 998, 88 S. Ct. 869 \(1968\)](#), established that [HN14](#) co-conspirators do not have to have identical motives in order to conspire with each other. In other words, a plaintiff does not have to establish that the ultimate objective of each conspirator was the actual restraint of trade -- it is sufficient if effectuation of the restraint is an intermediate goal sought for the facilitation of some other overriding objective. Thus, the Supreme Court has indicated that independent parties assisting a company in achieving its restraint can be co-conspirators [**49](#) with the company even though they will never be in a position to reap the benefits that directly flow from the restraints. [Albrecht, 390 U.S. at 150](#) (man hired by newspaper to solicit customers away from one of newspaper's delivery men); [Poller, 368 U.S. at 470](#) ("special agent" who received commission for facilitating condemned transaction). Lower courts, concerned about the *Albrecht*'s potential to sweep mere "pawns" of large corporations within the reach of [§ 1](#),²⁶ have attempted to narrow its reach. See, e.g., [Fuchs Sugars & Syrups, Inc. v. Amstar Corp., 602 F.2d 1025, 1031-32 \(2nd Cir. 1979\)](#) (knowing and active participation in competitive scheme required); [Harold Friedman, Inc. v. Kroger Co., 581 F.2d 1068, 1072-75 \(3rd Cir. 1978\)](#) (pawn's agreement must itself restrain trade). However, none of the Circuit Court decisions dislodge the fundamental import of *Albrecht* and require perfect symmetry of the co-conspirators' motivation. Immunization of the pawn "just doing his job" does not imply immunization of the intentional orchestrator of a restraint.

[\[**50\]](#) Moving to the instant facts, the Court finds that a genuine issue exists as to whether the Weisman defendants joined as co-conspirators in an interdealer combination to raise the starting price of 1980 Toyotas. A canvassing of the current record reveals potential evidence that:

1. Weisman strongly desired to have the dealers accept Polyglycoat accessories on the cars. He may have had an ultimate motivation of selling more sealants, selling more cars, or selling more of both.
2. Communications from the dealers before 1979 informed Weisman that competitive concerns prevented the dealers from acceding to Weisman's wishes.

[\[*778\]](#) 3. At meetings which Weisman attended, Abbott specifically informed the dealers of the very act -- charging the starting price unless the customer balked -- which if collectively pursued would violate [§ 1](#).

4. The Weisman defendants provided all of the previously discussed "facilitators": common meetings, galvanizing speeches, circulating sign up sheets, and vigorous individual follow-ups.

It is hardly rank speculation to combine the above and infer that Weisman purposefully organized concerted dealer action to raise [\[**51\]](#) the starting price in order to give the dealers incentive to order Polyglycoat products. That Weisman's ultimate motivation was not to raise the starting price, and that raising the starting price may in fact have been somewhat inconsistent with the Harbridge House recommendations of reducing dealer profit per car,²⁷

²⁶ Professor Areeda shares this concern over the inclusion of "pawns" as [§ 1](#) conspirators and queries whether the telephone company could be held to be a co-conspirator if competitors reached agreements on a restraint of trade over the telephone. Areeda, *supra*, at P 528.

²⁷ The extent of this inconsistency revolves around the effectiveness of the Total Concept Program's "discount only if the customer balks" approach in approximating the sales results obtained if the dealer unilaterally reduced the price before the commencement of the customer negotiations.

perhaps weaken but do not eliminate this inference. One could review the prior dealer complaints filed with the national importer and the Maryland Motor Vehicle Administration and conclude that Weisman deliberately decided to accomplish by conspiracy what he could not accomplish by coercion. He was present, after all, when his employee repeatedly stressed the potential profits available from using the suggested price as the starting price. As the above authorities indicate, it is irrelevant that: (1) the Weisman defendants were not competitors of the dealers, (2) the Weisman defendants did not provoke actual express agreements and (3) the conspiracy was but a means to their end rather than the end itself.

[52] LIABILITY UNDER § 1: PER SE OR RULE OF REASON?**

Application of a *per se* or Rule of Reason standard usually revolves around the characterization of a given transaction. In arguing for their respective positions, the parties apply distinctly different nomenclature to categorize the programs at issue. Plaintiffs contend the program constituted "classic horizontal price fixing" while defendants assert that they were mere "vertical non price restraints." Before specifically addressing these respective positions, the Court reviews the distinctions among "horizontal," "vertical," "price," and "non price" restraints.

Review of The Authorities: The Horizontal/Vertical Distinction

In economists' terms, "vertical" restraints are restraints among firms operating at different levels of the production and distribution chain of a product while "horizontal" restraints occur among firms competing on the same level of several production and distribution chains. In 1977, the Supreme Court ruled that all non price vertical restraints were governed by the Rule of Reason. *Continental T.V., Inc. v. GTE Sylvania, Inc.*, 433 U.S. 36, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977).²⁸ Justice [**53] Powell found a *per se* approach inappropriate because one could not say that non price vertical restraints lacked redeeming virtue. He observed: "The market impact of [non price] vertical restraints is complex because of their potential for a simultaneous reduction of intrabrand competition and stimulation of interbrand competition."²⁹ *Id. at 51-52*. Specifically, "vertical restrictions promote interbrand competition by allowing the manufacturer to achieve certain efficiencies in the distribution of his products." *Id. at 54*.

[**54] After *Sylvania*, dispute has arisen over precisely what constitutes the legal definition [*779] of a "vertical" restraint, as the Supreme Court did not actually define the term itself. Courts have long condemned restrictions originating among the dealers but including the manufacturer as illegal *per se*. See, e.g., *United States v. General Motors*, 384 U.S. 127, 16 L. Ed. 2d 415, 86 S. Ct. 1321 (1966); *Valley Liquors, Inc. v. Renfield Importers, Ltd.*, 678 F.2d 742, 743 (7th Cir. 1982) (Posner, J.). The *Sylvania* court specifically indicated that such arrangements remained both "horizontal" and illegal *per se*. *Sylvania*, 433 U.S. at 58, n.28. The Fifth Circuit of Appeals has seized upon this affirmation of the traditional rule that restraints originating among the dealers were illegal *per se* to assert the converse: restraints originating with the manufacturer are automatically "vertical" and subject to the Rule of Reason. See, e.g., *Muenster Butane, Inc. v. Stewart Co.*, 651 F.2d 292, 295 (5th Cir. 1981); *H & B Equipment Co., Inc. v. International Harvester Co.*, 577 F.2d 239, 245-46 (5th Cir. 1978); cf. *United States v. Arnold, Schwinn & Co.*, 388 U.S. 365, 372, 18 L. Ed. 2d 1249, 87 S. Ct. 1856 (1967) (language intimating a "source" test). Based primarily upon the language of *Schwinn*, the Court has also followed the "source" rule and held that the potentially "horizontal" aspects of a restraint in which the manufacturer also competes with its distributors should be analyzed within the general Rule of Reason construct. *Donald B. Rice Tire Co., Inc. v. Michelin Tire Corp.*, 483 F. Supp. 750, 754 (D. Md. 1980). However, the Fourth Circuit on appeal disagreed with the Court's invocation of the source rule, stating "we must reject, however, any implication arising from the district court's discussion of *Schwinn* that a restraint may always be regarded as vertical if it is imposed by the manufacturer." *Donald B. Rice Tire Co. v.*

²⁸ An example of a non price vertical restraint is the "location clause" found in *Sylvania*: a term in a manufacturer-retailer franchise agreement prohibiting the retailer from selling franchised products from locations other than those specified in the agreement.

²⁹ Implicit in much of the Supreme Court's reasoning in *Sylvania* is the eminently reasonable assumption that interbrand competition should be the true focus of the antitrust laws in a non-monopolistic market.

Michelin Tire Corp., 638 F.2d 15, 16 (4th Cir. 1981) (per curiam). The Fourth Circuit then implied that a "functional analysis" would be preferable, although it was willing within the facts of that particular case to accept the Court's Rule of Reason analysis as an effective surrogate for the "functional analysis" because the Court's Rule of Reason opinion "clearly indicated that the restraints [**56] were for the purpose of promoting interbrand competition [Emphasis supplied]." *Id. at 16-17.*

In light of the dictates of *Rice*,³⁰ the Court adopts a "functional analysis" for characterizing a restraint as "horizontal" or "vertical." Specifically, the Court follows the implications of *Rice* that [HN15](#) a restraint is "vertical" if the purpose of the restraint is to promote interbrand competition. The Court amplifies the phrase "undertaken for the purpose of promoting interbrand competition" as encompassing any act which a supplier³¹ takes for the purpose of maximizing his profit in the product being restrained. Such a definition fully incorporates all of the potentially pro competitive practices stressed by Justice Powell in *Sylvania*.³² [\[**58\]](#) For example, acts designed to achieve distributional efficiencies automatically qualify, as they are directed towards profit maximization by attempting to reduce [\[*780\]](#) costs.³³ [\[**59\]](#) Profit maximization in that product need not be the exclusive purpose of the supplier; a court cannot say with assurance that a practice lacks all redeeming virtue if even one of its purposes is to maximize the supplier's profits in the product being [\[**57\]](#) restrained. Cf. *Northern Pacific, 356 U.S. at 5* (per se practice must lack any redeeming virtue). Hence, the Court adopts what might best be described as a "qualified source rule:" [HN16](#) a practice is "vertical" if its source was at least partially the supplier's drive for profits in the product concerned.³⁴

³⁰ Defendants urge the Court to disregard the *dicta* of the Fourth Circuit in *Rice* as poorly reasoned and inconsistent with *Sylvania, 433 U.S. at 36*. However, the Court will not ignore the explicit directions of its reviewing tribunal, even if the comments of that tribunal were not inevitably required by the decision. Furthermore, the Court regards the "functional analysis" adopted in the present case as fully consistent with and logically implied by *Sylvania*.

³¹ For purposes of convenience, the Court employs the term "supplier" to designate the entity on which is higher on the distribution scale than its co-conspirators, whether that entity be a manufacturer or, as here, a distributor.

³² As the Third Circuit observed in construing *Sylvania*, "When a manufacturer acts on its own, *pursuing its own market strategy*, it is seeking to compete with other manufacturers by imposing what may be defined as reasonable vertical restraints. This would appear to be the rationale of the *GTE Sylvania* decision [emphasis added]." *Cernuto, Inc. v. United Cabinet Corp., 595 F.2d 164, 168 (3rd Cir. 1979)*. The Court's definition would encompass any act related to a supplier "pursuing its own market strategy" in a product.

³³ The definition also encompasses certain categories of cases which defendants argue would be in effect overruled by a variation from the source rule. For example, defendants point to those cases where the manufacturer initiating a restraint also competes with his distributors at the distribution level. See, e.g., *H & B Equipment Co. v. International Harvester Co., 577 F.2d 239 (5th Cir. 1978)*. Such decisions uniformly retain a "vertical" characterization of the restraint. *Id.* However, these decisions are fully consistent with the Court's formulation: a manufacturer acting to maximize profits by a restriction of intrabrand competition in the distribution of his product is still attempting to maximize his profits from that product. A manufacturer might believe that greater efficiencies could be obtained by distributing more of his product directly; hence a court may not condemn out of hand a manufacturer's attempts to ensure that he retains certain distributional advantages for himself.

Similarly, defendants' concern that a variation from a rigid source rule would "eliminate tying doctrine" is also misplaced. While the Court's definition if rigorously applied would characterize a manufacturer-dealer "tie" as "horizontal" (since the manufacturer's acts with regard to the "tying" product are motivated by a desire for profits in the "tied" product), such a characterization has relevance only on the level of abstract theory. The "horizontal"/"vertical" distinction has traditionally been made only in the areas of mergers and "restricted distribution" arrangements; tying constitutes a completely separate category of **antitrust law** with its own specific rules.

³⁴ Additional support of this formulation may be found in the reasoning of those courts upholding the traditional *per se* treatment of restraints originating among the dealers. See, e.g., *Cernuto, 595 F.2d at 168*. The Third Circuit observed there: ". . . both the purpose and effect of . . . [the particular dealer-instigated restraint] was to eliminate competition at the retail level and not as in *GTE Sylvania*, to promote competition at the manufacturing level. Accordingly, the pro competitive virtues so critical in *GTE Sylvania* may not be presented here." *Id.* The definition adopted here would carry this rationale to its logical conclusion and

Review of The Authorities: The Definition of Price Fixing

All parties acknowledge the *per se* illegality of price fixing. See, e.g., [Arizona v. Maricopa County Medical Society, 50 U.S.L.W. 4687, 457 U.S. 332, \[*60\] 102 S. Ct. 2466, 73 L. Ed. 2d 48 \(1982\)](#). However, counsel have argued at length over what transactions may be categorized as "price fixing." Defendants contend that only those agreements which "on their face apply to price terms" qualify as price fixing. Envisioning a broader definition, plaintiffs assert that price fixing also encompasses those restraints which do not apply to price terms on their face but which nevertheless have the "purpose and effect" of raising prices. In light of the Court's determination that sufficient circumstantial evidence exists to raise a genuine issue about a tacit agreement among defendants to raise the starting price, this debate becomes superfluous, as plaintiffs would be alleging a restraint which *does* apply to price terms on its face.³⁵ Hence, the Court [[*781](#)] will canvass the authorities without specific reference to this interesting but now irrelevant issue.

[**61] Stemming from Justice Douglas' opinion in [United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 84 L. Ed. 1129, 60 S. Ct. 811 \(1940\)](#), the traditional definition of quite price fixing is quite broad, as recently reaffirmed by the Fourth Circuit:

[**HN17**](#) [↑] price fixing is one of those practices that the Court has held to be illegal *per se* under the Sherman Act. [United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 60 S. Ct. 811, 84 L. Ed. 1129 \(1940\)](#). The Court stated at 223, [60 S. Ct. at 844](#) [sic] "a combination formed for the purpose and with the effect of raising, depressing, fixing, pegging or stabilizing the price of a commodity in interstate or foreign commerce is illegal *per se*." To be guilty of price fixing, the conspirators do not have to adopt a rigid price, substantially less has been found to be price fixing. An activity can violate the *per se* rule even if its effect upon prices is indirect. [United States v. General Motors, 384 U.S. 127, 147, 86 S. Ct. 1321, 1331, 16 L. Ed. 2d 415 \(1966\)](#). In essence, an interference with the market forces freely setting the prices of goods is sufficient. *In Re Yarn Processing Patent Validity Litigation*, 541 F.2d 1127, [[**62](#)] 1137 (5th Cir.), cert. denied, 433 U.S. 910, 97 S. Ct. 2976, 53 L. Ed. 2d 1094 (1977).

[National Electrical Contractors Association, Inc. v. National Constructors Association, 678 F.2d 492, 500 \(4th Cir. 1982\)](#). The continuing vitality of Socony as the leading case on price fixing is indicated by the great reliance the Supreme Court placed on Socony in its two most recent price fixing decisions. [Maricopa, 50 U.S.L.W. at 4690; Catalano, Inc. v. Target Sales, Inc., 446 U.S. 643, 647, 64 L. Ed. 2d 580, 100 S. Ct. 1925 \(1980\)](#). Given the breadth of Socony, it is indeed not surprising that courts have categorized a wide variety of practices as price fixing. The Fourth Circuit recently summarized a sampling of those varied practices:

[Catalano, Inc. v. Target Sales, Inc., 446 U.S. 643, 100 S. Ct. 1925, 64 L. Ed. 2d 580 \(1980\)](#), elimination of interest free short term credit; [United States v. Container Corp. of America, 393 U.S. 333, 89 S. Ct. 510, 21 L. Ed. 2d 526 \(1969\)](#), exchange of price information as stabilizing although lowering prices; [United States v. Parke, Davis & Co., 362 U.S. 29, 80 S. Ct. 503, 4 L. Ed. 2d 505 \(1960\)](#), setting [[**63](#)] minimum prices; [Kiefer-](#)

exclude from "vertical" characterization all those practices not directed at "promoting competition at the manufacturers level" and hence lacking "the pro competitive virtues so critical in *GTE Sylvania*."

³⁵ If plaintiffs proceed with an alternative theory that the defendants "conspired to order collectively all of their cars with the protective package with the purpose and effect of raising the starting price," then the issue will have to be addressed. At this stage, it appears that horizontal restraints with the purpose and effect of raising prices are *per se* illegal, see, e.g., [Catalano, Inc. v. Target Sales, Inc., 446 U.S. 643, 647, 64 L. Ed. 2d 580, 100 S. Ct. 1925 \(1980\); United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 223, 84 L. Ed. 1129, 60 S. Ct. 811 \(1940\)](#), but also that blind application of the "purpose and effect" doctrine in the vertical context would eviscerate settled Supreme Court doctrine in such areas as restricted distribution, [Sylvania, 433 U.S. 36, 97 S. Ct. 2549](#), and tying, [United States Steel Corp. v. Fortner Enterprises, 429 U.S. 610, 51 L. Ed. 2d 80, 97 S. Ct. 861 \(1977\)](#). However, the Court avoids any definitive exposition unless the parties subsequently make an actual decision necessary.

560 F. Supp. 760, *781 (1983 U.S. Dist. LEXIS 17987, **63

Stewart Co. v. Seagram & Sons, 340 U.S. 211, 71 S. Ct. 259, 95 L. Ed. 219 (1951), setting maximum prices; *United States v. Socony-Vacuum Oil*, 310 U.S. 150, 60 S. Ct. 811, 84 L. Ed. 1129 (1940), buying surplus gasoline to stabilize prices; *Plymouth Dealers Assoc. of Northern Cal. v. United States*, 279 F.2d 128 (9th Cir. 1960), establishing price list from which negotiations began.

National Electrical Contractors, 678 F.2d at 500, n.12.³⁶ [**65]

[*782] In particular, as noted by the Fourth Circuit in the above quotation, [HN18](#) an agreement among competitors on the starting price to be used in commencing negotiations with their customers falls within the forbidden category. *Plymouth Dealers' Association of Northern California v. United States*, 279 F.2d 128 (9th Cir. 1960); *Theophil v. Sheller-Globe Corp.*, 446 F. Supp. 131 (E.D. N.Y. 1978). The Ninth Circuit observed:

The test is not what the actual effect is on prices, but whether such agreements interfere with "the freedom of traders and thereby restrain their ability to sell in accordance with their own judgment." *Kiefer-Stewart Co. v. Joseph E. Seagram & Sons, supra*, [*64] 340 U.S. at page 213, 71 S. Ct. at page 260. The competition between the Plymouth dealers and the fact that the dealers used the fixed uniform list price in most instances only as a starting point, is of no consequence. It was an agreed starting point; it had been agreed upon between competitors; it was in some instances in the record respected and followed; it had to do with, and had its effect upon, price.

The fact that there existed competition of other kinds between the various Plymouth dealers, or that they cut prices in bidding against each other, is irrelevant.

Plymouth Dealers, 279 F.2d at 132.³⁷

³⁶ Defendants understandably rely on *Broadcast Music, Inc. v. Columbia Broadcasting System, Inc.*, 441 U.S. 1, 60 L. Ed. 2d 1, 99 S. Ct. 1551 (1979), in arguing that a narrower scope is appropriate for price fixing doctrine. *Broadcast Music* asserts that a particular practice may not be condemned as price fixing, even if it "literally" sets prices, unless prior experience has convinced a court that that particular practice is plainly anticompetitive and very likely without redeeming virtue. *Broadcast Music*, 441 U.S. at 9-10. If the Supreme Court's pronouncement is itself taken "literally," then *Socony* and its progeny are effectively eliminated. Almost any able antitrust defense attorney would be able to characterize the particular actions of his clients as "unique" or "unfamiliar," thereby plunging a court into the very detailed competitive analysis that *per se* rules were designed to avoid. Perhaps recognizing the severe practical effects of *Broadcast Music*, the Supreme Court has not seen fit to follow the literal implications of the opinion in its subsequent price fixing decisions. *Maricopa*, 50 U.S.L.W. at 4687, *Catalano*, 446 U.S. at 643. In particular, the *Maricopa* court condemned as illegal *per se* a very complicated and innovative health care plan allegedly designed to reduce health care costs. Justice Powell in dissent strongly argued that this innovative arrangement presented just the sort of "novel" practice to which "the *per se* label should not be assigned without carefully considering substantial benefits and pro competitive justifications." *Maricopa*, 50 U.S.L.W. at 4695 (Powell, J., dissenting). Justice Powell later concluded that "the court's effort to distinguish *Broadcast Music* thus is unconvincing." *Id.* Given this apparent retreat from *Broadcast Music*, the Court has no alternative but to follow the traditional *Socony-Maricopa* line of cases until the Supreme Court clearly indicates the contrary.

³⁷ A copiously annotated opinion by the United States District Court for the Southern District of New York provides further indication as to why an agreement to raise the starting price is properly within the reach of *Socony*. *Checker Motors Corp. v. Chrysler Corp.*, 283 F. Supp. 876 (S.D. N.Y. 1968) (Mansfield, J.). In *Checker*, the plaintiff taxicab manufacturing company alleged that its manufacturing competitor Chrysler had conspired with Chrysler dealers to fix the retail price of Chrysler taxis. The sole basis for this allegation was Chrysler's policy of providing direct rebates from Chrysler itself to purchasers of Chrysler's taxis. Denying plaintiff's motion for summary judgment, Judge Mansfield distinguished *Plymouth Dealers* and stated:

Regardless of the absence of agreement as to a specific or uniform price, a wide variety of horizontal and vertical arrangements have been classified as price-fixing agreements and therefore condemned as unlawful *per se*, e.g. . . ., *Plymouth Dealers Assn. of Northern Cal. v. United States*, 279 F.2d 128 (9th Cir. 1960) (agreements on starting price for bargaining and trade-in allowances). However, an essential element is the competitor's surrender, express or implied, of some measure of pricing discretion. The evil of price-fixing agreements is that they

[**66] [HN19](#)[↑] The presence of a "vertical" element in a price restraint does not immunize it from *per se* status. Both minimum resale price maintenance, [Parke, Davis, 362 U.S. at 47](#); cf. [Dr. Miles Medical Company v. John D. Park & Sons Co., 220 U.S. 373, 55 L. Ed. 502, 31 S. Ct. 376 \(1911\)](#) (seminal decision antedating *per se* doctrine and declaring minimum resale price maintenance contracts unlawful), and maximum resale price maintenance, [Albrecht, 390 U.S. 145, 88 S. Ct. 869, 19 L. Ed. 2d 998](#) are illegal *per se*. These decisions have come under severe scholarly criticism,³⁸ but Justice Powell specifically reaffirmed the *per se* illegality of vertical price restraints in [Sylvania, 1*7831 433 U.S. at 51, n.18](#). Cf. [Maricopa, 50 U.S.L.W. at 4690-91](#) (quoting from *Albrecht* in condemning maximum price fixing). The presence of a manufacturer in a scheme to raise the starting price of motor homes did not alter its *per se* status in [Theophil, 446 F. Supp. at 131](#), and the Court perceives no judicial, as opposed to scholarly, authority to do so here.

[**67] Application of The Authorities: The Total Concept Program

Plaintiffs assert that the Weisman defendants initiated the restraint at issue in order to raise the suggested/starting price of 1980 Toyotas and thereby enhance the possibility for substantial "discounting" or "packing." Plaintiffs in fact repeatedly assert that the Weisman defendants sought to sell more Toyotas. Under the Court's "qualified source rule," such a theory of the case would clearly establish a vertical restriction. Indeed, plaintiffs may only establish a horizontal restriction if they successfully prove that the Weisman defendants' exclusive motivation was to sell more Polyglycoat products. Only then could it be said that the Weisman defendants' acts had no relation to Toyota profit maximization and hence no potential for enhancing interbrand competition in Toyotas.

However, regardless of the classification of the Total Concept Program as "horizontal" or "vertical," its potential price fixing implications will not permit the Court to rule as a matter of law that its legality will be determined solely under a Rule of Reason standard. As previously described, a genuine issue exists as to whether or [**68] not the defendants entered into a tacit agreement to raise the starting price of the 1980 Toyotas. If the jury in fact finds that such an agreement occurred, then the concerted action clearly qualifies as price fixing illegal *per se* under [Plymouth Dealers, 279 F.2d at 128](#) and [Theophil, 446 F. Supp. at 131. Parke, Davis, 362 U.S. at 47](#), and [Albrecht, 390 U.S. 145, 88 S. Ct. 869, 19 L. Ed. 2d 998](#) indicate that any "vertical" aspect of the Total Concept Program will not alter this result.

The existence of the Monroney Act, while certainly removing MAT's setting of the suggested retail price from antitrust scrutiny, in no way immunizes any of the defendants from the consequences of an agreement to utilize the suggested price as an actual starting point in negotiations. ". . . There is a plain distinction between the lawful right to publish prices and terms of sale on the one hand, and an agreement among competitors limiting action with respect to the published prices, on the other." [Catalano, 446 U.S. at 649-50](#). Cf. [Sugar Institute v. United States, 297 U.S. 553, 80 L. Ed. 859, 56 S. Ct. 629 \(1936\)](#) (agreement to adhere to previously announced prices held

"cripple the freedom of traders and thereby restrain their ability to sell in accordance with their own judgment." ([Kiefer-Stewart Co. v. Joseph Seagram & Sons, Inc., 340 U.S. 211, 213, 71 S. Ct. 259, 260, 95 L. Ed. 219 \(1951\)](#)).

Conduct or agreements not restricting a competitor's price independence, on the other hand, falls [sic] short of illegal price fixing . . . Thus, there is a failure to show any provision of the plan, or any facts, indicating that the plan would tend to affect the exercise of competitive pricing discretion, or to affect or tamper with the range, level, scale, or amount of the price paid for Chrysler taxicabs, such as appears in price-fixing or distribution agreements that have been struck down as unreasonable without more. In the absence of proof that the Rebate Plan has a tendency to restrict the dealer's pricing independence, or has some pricing effect, it amounts to nothing more than a promotional device which cannot be labelled illegal *per se*.

[Id. at 882-83](#). A starting price conspiracy, on the other hand, does contain a "surrender, express or implied, of some measure of pricing discretion," and properly qualifies for *per se* treatment.

³⁸ *Albrecht* has fared particularly poorly in the eyes of learned commentators. See, e.g., Areeda, *supra*, at P 506.

unlawful). **[**69]** In *dicta*, the *Plymouth Dealers* court specifically applied this distinction to the potential impact of the Monroney Act:

Suffice it to say that it is one thing for Congress to say each manufacturer must, acting alone, set a suggested retail list price for his product, and another thing to say that competing dealers may so agree. Many unilateral acts are completely lawful but become violative of **antitrust law** when performed pursuant to an agreement between competitors. Further, the purpose of the Monroney Bill was to prevent misbranding, abuse of caravan car prices and the "packing" which were appellant's primary objective here.

Plymouth Dealers, 279 F.2d at 134. In summary, plaintiffs will have established a *per se* violation of the Sherman Act if they prove that the defendants tacitly agreed to raise the starting price of 1980 Toyotas through the facilitating mechanism of the Total Concept Program.

The Authorities Applied: The Double Value Days Program

The status of the Double Value Days Program requires far less elaboration. It was manifestly a program initiated by the Weisman defendants in order to deepen their penetration into the regional **[**70]** Toyota market by increasing "discounting." As **[*784]** such, it is a classic vertical restraint. However, as it involves explicit contracts between a manufacturer and its dealers about lowering the resale price of the manufacturer's product, it is also a form of maximum vertical price fixing arrangement illegal *per se* under *Albrecht, 390 U.S. 145*. The Court acknowledges the trenchant economic critiques of *Albrecht*, but as a lower federal court has no authority to effectuate them.³⁹

[71] CAUSE OF ACTION UNDER §§ 15, 15c: "INJURY SUSTAINED"?**

As mentioned earlier, both the *parens patriae* and private action statutes require that a plaintiff demonstrate "injury." The *parens patriae* statute is of quite recent origin and has been construed by relatively few decisions. However, since Congress enacted the *parens patriae* statute in response to *State of Hawaii v. Standard Oil Co. of California, 405 U.S. 251, 31 L. Ed. 2d 184, 92 S. Ct. 885 (1972)*, a Supreme Court decision prohibiting *parens patriae* suits from being brought under the private action statute, see 15 J. von Kalinowski, *Antitrust Laws and Trade Regulations* § 115.05 [1] at 115-43, n.2 (1982), the Court assumes in the absence of Congressional language to the contrary that Congress intended for *parens* actions largely to parallel treble damage suits. Hence, the Court combines the issues of "injury" under the respective statutes and accepts decisions construing the private action "injury" requirement as authoritative on the parameters of *parens* "injury" as well.

The private antitrust action requires significantly more than mere proof of a substantive violation of the antitrust **[**72]** laws:

HN20  there are three essential elements in every private anti-trust action: They are (1) a violation of the **antitrust law**, (2) direct injury to the plaintiff from such violations, and (3) damages sustained by the plaintiff. It follows, therefore, that a mere finding of violation does not result in liability. The statute gives a right of action only to the extent that one has been "injured in his business or property by reason of anything forbidden in the

³⁹ In another case involving the application of the same protective package to 1980 (and 1979) Toyotas, the United States District Court for the Northern District of Alabama has ruled that the legality of alleged restraints initiated by the Toyota distributor for the southeastern United States would be tried under a Rule of Reason standard. *Moore v. Southeast Toyota Distributors, Inc.*, Civil 81-P-0491-S (N.D. Ala. June 22, 1982). As the *Moore* court provided no memorandum along with its order, one cannot ascertain what authorities Judge Pointer relied upon in reaching his decision. In addition, the precise restraint Judge Pointer was reviewing and its potential similarity to the present facts remain unclear. In a previous order denying class certification, Judge Pointer indicated that the Toyota distributor for a significant period of time had actually discounted the entire price of the protective package *on the Monroney sticker*. *Moore v. Southeast Toyota Distributors*, 1982-2 Trade Cas. para. 64,743 (N.D. Ala. 1982). Besides causing no harm to the consumer, see *infra*, such an act without more appears to support an inference of unilateral distributor behavior beyond the scope of *§ 1*. Given such significant factual variances, the Court does not believe that *Moore* permits it to part company with the authorities reviewed above.

anti-trust laws." The gravamen of the complaint is not the conspiracy; the crux of the action is injury, individual injury.

Windham v. American Brands, 565 F.2d 59, 65-66 (4th Cir. 1977). In addition, "plaintiffs must prove antitrust injury, which is to say injury of the type of antitrust laws were intended to prevent and flows from that which makes defendants' acts unlawful." Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 Accord J. Truett Payne Co. v. Chrysler Motors Corp., 451 U.S. 557, 561, 68 L. Ed. 2d 442, 101 S. Ct. 1923 (1981). However, once plaintiff has proven that some antitrust injury did in fact occur, the courts impose a much lighter burden [**73] upon him in establishing the precise extent of his damages. Story Parchment Co. v. Paterson Co., 282 U.S. 555, 562-63, 75 L. Ed. 544, 51 S. Ct. 248 (1931); Montreal Trading Ltd. v. Amax, Inc., 661 F.2d 864, 867, n.1 (10th Cir. 1981); Malcolm v. Marathon Oil Co., 642 F.2d 845, 858 (5th Cir. 1981); cf. J. Truett, 451 U.S. at *785 567, n.5 (recognizing distinction). While damages may not be the result of mere guesswork or speculation, Bigelow v. RKO Radio Pictures, Inc., 327 U.S. 251, 264, 90 L. Ed. 652, 66 S. Ct. 574 (1946); Story Parchment, 282 U.S. at 563; but cf. Malcolm, 642 F.2d at 858 ("proof of losses which border on the speculative is allowed"); Jewel Tea Co. v. Local Unions, 274 F.2d 217, 224 (7th Cir. 1960) (speculation as to amount of damages won't prevent recovery once fact of actual damages proven), quite relaxed standards govern, see generally Malcolm, 642 F.2d at 858 (detailed listing of various damage rules). The rationale for this relaxation includes the inherent complexity and imprecision in calculating antitrust damages, J. Truett, 451 U.S. at 566; Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 123, **741 23 L. Ed. 2d 129, 89 S. Ct. 1562 (1969), and above all the inequity of allowing the defendant to profit from the uncertainty created by his own wrongdoing, J. Truett, 451 U.S. at 566-69; Bigelow, 327 U.S. at 264-66; Story Parchment, 282 U.S. at 563. In particular, courts appear to be loathe to entertain defendants' pleas about the speculative nature of determining the free market conditions which would have prevailed in the absence of a restraint when the defendant's own conduct has eliminated those free market conditions. *Id.*

In a price fixing case, the essential inquiry after liability has been established is the amount of any overcharge created by the defendant's conduct. Chattanooga Foundry and Pipe Works v. City of Atlanta, 203 U.S. 390, 396, 51 L. Ed. 241, 27 S. Ct. 65 (1906) (Holmes, J.); State of Hawaii v. Standard Oil Co. of California, 405 U.S. 251, 263, 31 L. Ed. 2d 184, 92 S. Ct. 885 n.14 (1972) (*dicta*); Ohio Valley Electric Corp. v. General Electric Co., 244 F. Supp. 914, 933 (S.D. N.Y. 1965). "[Injury] and damages are coextensive; the overcharge constitutes the plaintiff's injury (impact) as well as the measure of his damage (damages) [**75] and is the difference between the price actually paid and the price he would have paid absent the conspiracy." Ohio Valley, 244 F. Supp. at 933. In addition, Congress has provided *parens patriae* plaintiffs with a significant easing of their evidentiary burden in price fixing cases by eliminating the necessity for proof of individual damage:

HN21[] In any action under section 15c (a) (1) of this title, in which there has been a determination that a defendant agreed to fix prices in violation of the sections 1 to 7 of this title, damages may be proved and assessed in the aggregate by statistical or sampling methods, by the computation of illegal overcharges, or by such other reasonable system of estimating aggregate damages as the court in its discretion may permit without the necessity of separately proving the individual claim of, or amount of damage to, persons on whose behalf the suit was brought.

15 U.S.C. § 15d (1976).

The above authorities may be readily applied to the present facts. If the Total Concept Program did in fact involve a price fixing combination, then each individual Toyota consumer was "overcharged" by the difference between (1) the amount he actually [**76] paid for the 1980 Toyotas with the protective package and (2) the amount he would have paid for the 1980 Toyota with the protective package if the dealers had not agreed to raise the starting price. This "overcharge" varies with the individual purchaser. If the purchaser bargained the dealer down from the full \$533.00, then the purchaser's individual overcharge was correspondingly reduced. If, on the other hand, the purchaser bought at the full \$533.00 and the dealer would have unilaterally discounted the \$533.00 suggested price down to the \$113.00 cost in the absence of the conspiracy to raise the starting price, then the purchaser suffered an overcharge of \$420.00. Obviously may other potential scenarios exist.

The summation of these overcharges represents the transfer of wealth from consumers to sellers as a result of the sellers' interference with the free workings of [*786] the marketplace and constitutes the quintessential "antitrust injury." While plaintiffs' proof of "injury in fact" and "extent of injury" must await trial, they certainly have alleged actual injury. The Court cannot assume that all defendants' pricing behavior would have remained precisely the same [**77] in the absence of their concerted action, for such an assumption would ignore the very economic tenets of free market behavior which underlie our antitrust laws.⁴⁰

On the other hand, the record clearly establishes that the Double Value Days Program by its very terms inflicted no injury upon the consumer. The program required the dealer to discount the entire suggested [**78] list price for the protective package from the starting price of the car and essentially gave the consumer something for nothing. The Court cannot assume that a car was physically worse off with the protective package than without it.⁴¹

For the foregoing reasons, it is this day of April, 1983, by the United States District Court for the District of Maryland, ORDERED:

1. That defendants' motions for partial summary judgment on the Double Value Days Program BE, and the same ARE, hereby GRANTED;
2. That the remainder of defendants' motions for summary judgment BE, and the same ARE, hereby DENIED;
3. That the rulings of law made herein shall govern the remainder [**79] of this action; and
4. That plaintiffs have leave to amend their pleadings to bring them into conformity with the rulings herein.

End of Document

⁴⁰ Defendants argue that plaintiffs must show that each consumer was "coerced" into buying the protective package in order to establish injury. However, the consumers' injury arises not from an "unwanted" purchase of the Toyota with the protective package but in paying more for the Toyota with the protective package than they would have paid for the Toyota with the protective package in the absence of the conspiracy. Defendants contend that the fact that the purchaser received something of at least some value as part of the transaction is being ignored, but the Court explicitly incorporates this inherent "off-set" into the damage formula.

⁴¹ Plaintiffs claim that they do not know for certain that the dealers actually adhered to their end of the deal and unilaterally discounted the suggested price. However, to the extent this occurred, it would indicate that the consumer was "injured" not as a result of any concerted action but because the dealer/distributor contract was *breached*.

Opinion

[*498] LOGAN, Circuit Judge.

These appeals arise out of Dart Industries, Inc.'s termination of The Plunkett Company of Oklahoma, Inc. as its Tulsa area distributor of the laminates and adhesives it manufactures. Dart sued Plunkett for monies owed on Plunkett's purchases, after having given credit for returned inventory. Plunkett counterclaimed, alleging antitrust violations.

At trial, the only item in dispute on the accounting issue was the amount of credit to be given for cut sheets of plastic Dart repossessed with the other inventory. Dart gave no credit for these materials. The jury award gave Plunkett credit at the same value per square foot as that given for uncut sheets. Dart appeals [**2] this determination. The only question is whether the record contains sufficient evidence to support the verdict. We find there is substantial evidence to support the verdict and therefore affirm the judgment entered on the jury verdict on that accounting.

Plunkett's counterclaim alleged Sherman Act § 1, Clayton Act, and Robinson-Patman Act violations. In the alternative, Plunkett sought damages for breach of contract. A month before trial Plunkett sought to amend its pleadings and add a Sherman Act § 2 claim. This motion was denied. Upon cross motions for summary judgment the court granted summary judgment in favor of Dart and dismissed Plunkett's antitrust claims. Plunkett appeals, asserting that summary judgment was improper in this case because there exist genuine issues as to material facts. We have examined Plunkett's contentions and affirm the trial court's judgment. The situation here involves no more than a manufacturer terminating a distributor with whom it is unhappy and substituting another distributor in its place, sanctioned by [United States v. Colgate & Co., 250 U.S. 300, 63 L. Ed. 992, 39 S. Ct. 465 \(1919\)](#). See also [Joseph E. Seagram & Sons, Inc. v. \[**3\] Hawaiian Oke & Liquors, Ltd., 416 F.2d 71, 78 \(9th Cir. 1969\)](#), cert. denied, 396 U.S. 1062, 24 L. Ed. 2d 755, 90 S. Ct. 752 (1970).

Plunkett alleged that the termination was unlawful because it was motivated by anticompetitive purpose or accompanied by anticompetitive effect. Specifically, Plunkett alleged that the termination implicates (1) price fixing, (2) vertical and horizontal territorial allocations, (3) concerted refusals to deal, (4) Robinson-Patman Act violations, and (5) tying arrangements. [HN1](#) [↑] A party resisting a motion for summary judgment must do more than make conclusory allegations, it "must set forth specific facts showing that there is a genuine issue for trial." [Fed. R. Civ. P. 56\(e\); First National Bank of Arizona v. Cities Service Co., 391 U.S. 253, 288-90, 20 L. Ed. 2d 569, 88 S. Ct. 1575 \(1968\)](#). This Plunkett did not do. In support of its contention that Dart engaged in price fixing, Plunkett cites three facts: (1) Dart constantly urged Plunkett to lower its prices; (2) on one occasion Dart pressured Plunkett to reduce its prices to a customer; and (3) Dart published a rebate list establishing the amount of rebate Dart would give at particular prices. [**4] Neither these facts nor any inferences to be drawn therefrom support the allegation of price fixing. Plunkett retained complete discretion over its pricing policies.

Plunkett also argues that Dart's practices of selling directly to large accounts in Plunkett's area or of "taking over" the accounts when the market price drops below that shown on the rebate list constitutes a horizontal customer allocation. This argument is without merit. There is no evidence of a horizontal agreement to [**499] allocate customers. Dart's selling directly to certain large accounts reflects a dual distribution system that standing alone, is perfectly lawful; Dart is simply ensuring a continued presence in the market. Dart's taking over particular accounts from its distributor reflects that there is a certain price level below which Dart will not automatically subsidize a distributor's operation, but rather will determine directly, on a case by case basis, whether to lower its price to meet competition. Plunkett asserts that Dart's refusal to "drop-ship" on behalf of Plunkett into areas serviced by other distributors constitutes an illegal vertical territorial arrangement. This too is without [**5] merit. [HN2](#) [↑] Even rigid vertical territorial divisions are not per se illegal, [Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 53 L. Ed. 2d 568, 97 S. Ct. 2549 \(1977\)](#), and the record reflects no injury to competition that is a predicate to illegality under the rule of reason. Furthermore, the Dart policy is not a rigid territorial division; rather, it resembles [HN3](#) [↑] an "area of primary responsibility" scheme, which is generally lawful. [White Motor Co. v. United States, 372 U.S. 253, 270-72 & n.12, 9 L. Ed. 2d 738, 83 S. Ct. 696 \(1963\)](#) (Brennan, J., concurring); [Colorado Pump & Supply Co. v. Febco, Inc., 472 F.2d 637, 639-40](#) (10th Cir.), cert. denied, 411 U.S. 987, 36 L. Ed. 2d 965, 93 S. Ct. 2274 (1973); ABA Section of [Antitrust Law](#), *Vertical Restrictions Limiting Intrabrand Competition* 20-25 & n.62 (ABA Monograph No. 2, 1977). In the instant case Dart allows distributors to sell outside their territories; Dart merely refuses to facilitate such sales by direct shipment from the factory. This refusal does not constitute an antitrust violation.

In its counterclaim Plunkett alleged that Dart "contacted numerous accounts of Plunkett and its suppliers, directly [**6] or indirectly, in an attempt to cause others to refuse to deal and/or boycott Plunkett." However, in its answers to interrogatories and in its deposition testimony Plunkett admitted that the only fact on which it based this allegation was Plunkett's termination as Dart's distributor. The termination alone does not raise an issue as to any

material fact relating to a concerted refusal to deal. Neither can the fact that Central Floor Distributors, Inc. and Dart agreed prior to Plunkett's termination that Central Floor would supplant Plunkett support a boycott allegation.

"Lest any other former distributors succumb to the temptation of treble damages, we reiterate that it is simply not an antitrust violation for a manufacturer to contract with a new distributor, and as a consequence, to terminate his relationship with a former distributor, even if the effect of the new contract is to seriously damage the former distributor's business."

Burdett Sound, Inc. v. Altec Corp., 515 F.2d 1245, 1249 (5th Cir. 1975). To hold otherwise would require a manufacturer to permit a gap in its product distribution system and would not serve the procompetitive aims of the antitrust [**7] laws. Replacing one exclusive distributor with another impairs neither inter nor intrabrand competition. The record reflects that in the instant case the effect on interbrand competition was procompetitive: after losing the Wilsonart line Plunkett became the Tulsa area distributor for Nevamar, which previously had not been represented in the area. Nor is there any evidence of anticompetitive intent in the termination. Plunkett's allegations regarding concerted refusals to deal were properly resolved on summary judgment.

Plunkett's argument that Dart violated the Robinson-Patman Act was also properly resolved on summary judgment. The difference in the prices charged to Plunkett and those charged to direct accounts such as Oklahoma Fixtures do not constitute a Robinson-Patman violation. See American Oil Co. v. McMullin, 508 F.2d 1345, 1352-53 (10th Cir. 1975). HN4 [**8] Illegal price discrimination requires that the same product be sold at different prices to competitors. *Id.* There is no evidence that Oklahoma Fixtures and the other direct accounts were in competition with Plunkett. Furthermore, the record reflects that the lower prices were occasioned by competitive [*500] [**8] pressures and may well have been within the statutory "meeting competition" defense. See 15 U.S.C. § 13(b). That Central Floor received lower prices than had previously been charged Plunkett also fails to support a Robinson-Patman claim. Plunkett and Central Floors were not in competition for the purchase of Dart products. The price break given Central Floors represents an effort by Dart to subsidize start-up costs. It does not violate the antitrust laws.

Plunkett asserts that the termination implicates the prohibition against tying arrangements because it was motivated by Plunkett's failure to adequately promote Wilsonart adhesives. This contention is based on an incident in which, after securing an account for the use of Wilsonart adhesives, Dart discovered that Plunkett had suggested a different brand to the customer. See Brief of Appellant at 29. Dart's reaction does not reflect an attempt to tie adhesives to laminates.

"James [Plunkett], I appreciate your right to sell other brands, but we ask that you support our efforts when we set up an account. If you feel you cannot, we must reserve the right to sell those accounts on a direct basis."

[**9] Letter from Lou Maspero to James Plunkett (October 4, 1977), R. XI, Defendant's Exhibit 44. There is no other evidence in the record to support an allegation of tying, and this incident, standing alone, is too attenuated to provide such support. Nor does this case fit within the rule of Siegel v. Chicken Delight, Inc., 448 F.2d 43 (9th Cir. 1971), cert. denied, 405 U.S. 955, 92 S. Ct. 1172, 31 L. Ed. 2d 232 (1972). There, a franchisor insisted that the franchisees purchase its equipment, food, and packaging requirements exclusively from the franchisor. Here, Dart never required Plunkett to forego merchandising other laminates and adhesives. We do not consider the trademark "Wilsonart" to be a product separate from Wilsonart adhesives and laminates. See Redd v. Shell Oil Co., 524 F.2d 1054, 1057 (10th Cir. 1975), cert. denied, 425 U.S. 912, 47 L. Ed. 2d 762, 96 S. Ct. 1508 (1976); Principe v. McDonald's Corp., 631 F.2d 303, 308-09 (4th Cir. 1980), cert. denied, 451 U.S. 970, 68 L. Ed. 2d 349, 101 S. Ct. 2047 (1981). Consequently, Plunkett's tying allegations were properly dismissed on summary judgment.

Although HN5 [**10] summary judgment in an antitrust case is the exception rather than the rule, Poller v. Columbia Broadcasting System, Inc., 368 U.S. 464, 473, 7 L. Ed. 2d 458, 82 S. Ct. 486 (1962), we believe that it

was proper in this case. The record was significantly developed; it contains nearly 900 pages of deposition testimony of all the principal actors and over 700 pages of pleadings, motions, and exhibits. Our review of the record reveals no factual disputes which, if resolved in Plunkett's favor, would support its antitrust allegations.

The district court's grant of summary judgment on the breach of contract claim was also proper. Plunkett's sole complaint in this regard is that reasonable notice of termination was not given. See Brief of Appellant at 32-33. There was no written distribution agreement and Plunkett was given three months notice before the date of termination. Instead of continuing to merchandise Dart products during the three months, Plunkett became a distributor for one of Dart's competitors. Under these circumstances, the notice of termination was reasonable as a matter of law.

Finally, the court did not abuse its discretion in refusing to permit Plunkett to amend its counterclaim to allege a Sherman [**11] Act § 2 violation. Discovery had been essentially completed. The case was ready to go to trial. The amendment would have changed the entire complexion of the case. Plunkett made no showing that the amendment could not have been made earlier. Rather, it stated that the § 2 claim was based on the same facts alleged from the beginning. See Brief of Appellant at 38. In this situation it was not error to refuse the proffered amendment. See Landon v. Northern Natural Gas Co., 338 F.2d 17, 20 (10th Cir. 1964), cert. denied, 381 U.S. 914, 14 L. Ed. 2d 435, 85 S. Ct. 1529 (1965); Layfield v. Bill Heard Chevrolet Co., 607 F.2d 1097, 1099 (5th Cir. 1979), cert. denied, 446 U.S. 939, 64 L. Ed. 2d 793, 100 S. Ct. 2161 (1980).

AFFIRMED.

[**HN11**](#) [down] **Amendment of Pleadings, Leave of Court**

In examining a complaint, a court is guided by the principle that the liberal pleading policy of the Federal Rules of Civil Procedure prevents dismissal of a meritorious action for purely formal or technical reasons and that the court is to construe the pleadings in the plaintiff's favor. Moreover, a court may grant leave to amend the complaint to correct even substantive errors in the pleadings where this would facilitate a decision on the merits and no prejudice would ensue to the defendants.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

[**HN12**](#) [down] **Motions to Dismiss, Failure to State Claim**

When it does not appear beyond doubt that a plaintiff can prove no set of facts in support of his claim which would entitle him to relief, a court cannot dismiss the complaint on the basis of that deficiency.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > Fraud

Opinion by: WOOD

Opinion

[*1344] WOOD, Circuit Judge.

This is an interlocutory appeal from the district court's order denying defendants' motion to dismiss the complaint; it was certified to this court for resolution of controlling questions of law, pursuant to [28 U.S.C. § 1292\(b\)](#). While the district court did not limit its certification to a [*2] particular question, it stated that it viewed the "controlling question" to be whether the plaintiff may sue for the type of injury he alleges here under the Racketeer Influenced and Corrupt Organizations Act, [18 U.S.C. §§ 1961-1968](#) (hereinafter, RICO). In order to reach this jurisdictional issue, however, we find it first necessary to determine the standing of the plaintiff, the Director of Insurance of the State of Illinois (Director), who is the statutory liquidator of Reserve Insurance Company (Reserve), to maintain [*1345] the action, and to determine the sufficiency of the complaint. We conclude that the Director has standing, that his complaint is sufficient, and that it alleges an injury which may be redressed by a civil action under RICO.

I. *Factual Background*

Although the alleged events giving rise to this action are complex, they may be outlined briefly for the purposes of this appeal. The main focus of the allegations is that, as a result of the fraudulent actions of the various defendants, Reserve's corporate parent was caused to continue Reserve in business even though the latter was insolvent, and was caused to saddle Reserve with additional liabilities [*3] and drive deeper into insolvency, all of which consequences resulted in damage to Reserve, as well as its policyholders and creditors, exceeding \$ 100,000,000.

The complaint recites that, as of December 31, 1974, Reserve was insolvent as a result of its policy of accepting extraordinarily high-risk insurance business and underreserving and maintaining insufficient surplus for potential claims. In late 1974, the Director alleges, the Illinois Department of Insurance became concerned about the diminution of Reserve's surplus, and initiated negotiations with the officers and directors of Reserve and American Reserve Corporation (ARC), Reserve's corporate parent, to rectify the problem. While these negotiations were proceeding, however, the officers and directors of Reserve and ARC caused their companies to enter into an agreement with defendants Societe Commerciale De Reassurance (SCOR), a deal brokered by SCOR Reinsurance Company (SCOR Re). Under the terms of this agreement, Reserve ceded to SCOR most of its more profitable and least risky business (in return for SCOR's payments of commissions to Reserve), most of which business SCOR in turn secretly retroceded to another ARC subsidiary, [*4] Guarantee Reserve Co., Ltd. (GRC). Also, because the capitalization of GRC was insufficient to cover the potential losses involved in this retrocession, the Director alleges, ARC's officers and Directors secretly agreed to guarantee GRC's obligations to SCOR. The purpose of these agreements, the Director charges, was to enable Reserve to report on paper a smaller volume of business and an increase in surplus and thus a lower liability-to-surplus ratio, a fraudulent result which concealed and exacerbated Reserve's actual insolvency.

By concealing Reserve's continued liability for the retroceded business and hence Reserve's continued insolvency, the Director alleges, the defendant directors and officers were able to fraudulently obtain approval of the Illinois Department of Insurance for the cession agreements and were able to reach a consent agreement with the Department in April, 1975 which enabled Reserve to continue operations if certain surplus requirements were met. In addition, the subsequent continuation of these concealments effected through the SCOR agreements enabled Reserve's officers to violate the explicit surplus maintenance requirements of the consent agreement, the [*5] Director avers, while the SCOR agreements had the further cumulative effect of draining away from Reserve its more profitable and less risky business and over \$ 3,000,000 in income. If the Department had at any time known of Reserve's actual insolvency, the complaint charges, it would not have permitted Reserve to continue to write insurance and suffer further dissipation of its assets, but would have caused Reserve to stop writing insurance pursuant to Ill. Rev. Stat., ch. 73, § 756.1 (1981). The complaint alleges that defendants SCOR and SCOR Re were aware of the fraudulent purposes (and the further crippling impact upon Reserve) of the underlying agreements which they entered into and brokered. The director further alleges that the defendant accounting firms,

Coopers and Lybrand, Alexander Grant and Co., and Arthur Andersen and Co., knew of Reserve's insolvency and of the further impairing effect of the SCOR agreements and Reserve's continued operations, but that, despite this knowledge, each of them prepared unqualified opinion letters as to ARC's consolidated financial statements in 1974, 1975, 1976 and 1977, even though those statements failed to disclose that the SCOR agreement [**6] was entered into to conceal Reserve's insolvency, that the SCOR agreement did not remove any substantial risk of loss from Reserve and ARC, that the SCOR arrangement had been used to evade the consent agreement, that Reserve was at all times insolvent, and that the SCOR arrangement resulted in the multiplication of Reserve's high risk business while draining it of its least risky and most profitable business. In short, the Director claims that SCOR, SCOR Re and the accounting firm defendants joined with ARC and Reserve's officers and directors in [*1346] a multifaceted, fraudulent scheme which kept Reserve operating long past insolvency in a manner which resulted in enormous losses to the latter company.

In 1979, Reserve was finally adjudicated insolvent and the Director was designated as the Liquidator of Reserve pursuant to Ill. Rev. Stat., ch. 73, §§ 799 et seq. (1981). [HN1](#)[] Under that statute, the Director is vested with all rights of action belonging to Reserve. Ill. Rev. Stat., ch. 73 §§ 805 (1981). Pursuant to that mandate, the Director filed this action in district court in 1981, seeking relief for damages sustained by Reserve as a result of the alleged fraudulent [**7] scheme under RICO and a variety of Illinois statutory and common law theories. In January, 1982, the district court granted the defendants' motion to dismiss fifteen pendent state law claims, but denied their motion to dismiss Counts II and IV, seeking relief under RICO, and Counts I and III, alleging and seeking relief for damages resulting from a criminal conspiracy under Illinois law.

After discovery had commenced, the district court denied defendants' motion to reconsider, but certified its order to this court for an interlocutory appeal; we thereafter granted defendants' petition for interlocutory appeal. The defendants' chief contention on appeal is that the district court lacks jurisdiction over the present matter because Reserve's injuries as alleged in Count II and Count IV of the Director's complaint are not actionable under RICO's civil damage provision, [18 U.S.C. § 1964\(c\)](#), but some of the defendants also argue that, even assuming that RICO applies, the Director still lacks standing to maintain the present action, and that in any event the Director's complaint insufficiently invokes the formal elements of a RICO claim. We first address the defendant's standing arguments, [**8] and then consider defendants' RICO-related contentions.

II. *The Director's Standing: Capacity and Equitable Estoppel*

RICO considerations aside, defendants Grant, Coopers and Lybrand, Arthur Andersen, and SCOR and SCOR Re argue that the Director either lacks standing *ab initio* to maintain the present action or is estopped from doing so.¹ Their main argument proceeds in two stages. First, they note, the Director as Liquidator acquires only those rights of action that would accrue to Reserve itself; the Director may not assert the legal claims of Reserve's policyholders or creditors. As the next step, they argue that since the Director admits that Reserve's officers and directors instigated the illegal conduct here, the Director, standing in the shoes of Reserve, is estopped² from proceeding against the extra-corporate confederate defendants under our decision in [Cenco, Inc. v. Seidman & Seidman, 686 F.2d 449 \(7th Cir. 1982\)](#). SCOR and SCOR Re argue additionally that, Cenco considerations aside, prevailing law does not permit an insurance liquidator to pursue on behalf of the corporation he represents claims for losses stemming from the artificially and fraudulently [**9] prolonged life of the corporation and its consequent dissipation of assets.

¹ The other defendants, directors and officers of Reserve and ARC, do not challenge in their brief on appeal the Director's right to proceed against them on any basis other than RICO.

² Some defendants have also characterized this procedural bar as a substantive one, arguing that the complaint must fail because its facts demonstrate that the Director will be unable to demonstrate *causation* of fraud, given the corporation's imputed knowledge. Because both characterizations raise the same issue, both will be dealt with under the "estoppel" heading.

Even accepting the first step of the defendants' argument,³ i.e., that the Director [*1347] may prosecute only those legal actions available to the corporate body, we disagree with the defendants' contention that *Cenco* applies to the instant case, or that, even if it does apply, its underlying policy forbids the Director from maintaining the present action on behalf [**10] of Reserve. In addition, we reject SCOR and SCOR Re's fallback position that Reserve lacks standing to sue, either derivatively or through a receiver, to recover damages resulting from the fraudulently extended life of the corporation and its concomitant dissipation of assets.

[**11] Our reasons for finding *Cenco* inapplicable to the estoppel issue in the present case are twofold. First, the main controverted claim in *Cenco* arose under Illinois common law, and therefore this court's analysis of circumstances under which the knowledge of fraud on the part of the plaintiff's directors be imputed to the plaintiff corporation were merely an attempt to divine how Illinois courts would decide that issue. *Cenco*, 868 F.2d at 455. By contrast, the cause of action here arises under RICO, a federal statute; we therefore write on a clean slate and may bring to bear federal policies in deciding the estoppel question.

Second, even if the estoppel holding in *Cenco* were relevant to a RICO claim, an important prerequisite for its invocation in the present case is lacking. The *Cenco* court limited its estoppel analysis to cases where "the managers are not stealing from the company . . . but instead are turning the company into an engine of theft against outsiders." *Cenco*, 686 F.2d at 454. As the court explained,

HN4[↑] Fraud on behalf of a corporation is not the same theory as fraud against it. Fraud against the corporation usually hurts just the corporation; [**12] the stockholders are the principal if not only victims But the stockholders of a corporation whose officers commit fraud for the benefit of the corporation are beneficiaries of the fraud.

Id. at 456. In *Cenco*, this court found that the fraudulent inflation of the corporation's inventories and hence stock prices clearly benefited the corporation to the detriment of outside creditors, stock purchasers and insurers; this fact, in the court's view, made the case ripe for an analysis of whether the directors' knowledge of the fraud should

³ Although we need not reach the question for the purpose of this appeal, we note our agreement with the proposition that the Director may pursue no action which could not have been asserted directly by Reserve before liquidation. This conclusion is supported first by the plain text of the statute which provides that **HN2**[↑] the Director as Liquidator "shall be vested by operation of law with the title to all property, contracts and *rights of action of the company* as of the date of the order . . . directing liquidation." Ill. Rev. Stat., ch. 73, § 803 (emphasis added).

Second, a century of interpretation of this and its predecessor provisions has established the basic rule that **HN3**[↑] "where a receiver is appointed for the purpose of taking charge of the property and assets of a corporation, he is, for the purpose of determining the nature and extent of his title, regarded as representing only the corporate body itself, and not its creditors or shareholders He takes only the rights of the corporation such as could be asserted in its own name, and that upon that basis, only, can he litigate for the benefit of other shareholders or creditors." *Republic Life Insurance Co. v. Swigert*, 135 Ill. 150, 167, 25 N.E. 680 (1890); *People ex rel. Barret v. Bank of Peoria*, 295 Ill. App. 543, 549, 15 N.E.2d 333, 335-36 (1938); *Sangamon Loan & Trust Co. v. People's Savings Bank & Trust Co.*, 204 Ill.App. 7, 14 (1917); *Golden v. Cervenka*, 278 Ill. 409, 437, 116 N.E. 273, 284 (1917) see also 19 Appleman, *Insurance Law and Practice*, § 10682 at 122, 123 (1982); 2 Couch on Insurance 2d, § 22:48 (1959). A narrow exception to this rule has been permitted where, unlike here, the receiver sues to recover on behalf of a plaintiff's creditors a specific asset from a defendant who has, with the knowledge of the plaintiff's corporate officials, misrepresented its existence. *Sangamon*, 204 Ill.App. at 14; *Golden*, 278 Ill. at 427; see also *Wheeler v. American National Bank*, 347 S.W. 2d 918, 925, 165 Tex. 502 (Tex. 1961); *Magnusson v. American Allied Insurance Co.*, 290 Minn. 465, 189 N.W.2d 28, 33 (1971). *Bonhiver v. Graff*, 311 Minn. 111, 248 N.W.2d 291 (1976) and *McTamany v. Day*, 23 Idaho 95, 128 P.563 (1912), cited by the Director, are distinguishable. The statute involved in *Bonhiver*, Minn.Stat.Ann. § 60 B. 25 (13), authorized the liquidator to assert claims of creditors and policyholders, while in *McTamany*, the court held only that the receiver could proceed on behalf of creditors and policyholders against the insolvent company's directors, not extracorporate parties. *McTamany*, 128 P. at 565. In any event, to the extent that either of these cases can be read to authorize an insurance liquidator to pursue claims more extensive than those accruing to the corporation itself, they conflict with the clear rule fashioned by the Illinois courts and the leading authorities. It is therefore incumbent upon this court not to effect innovation in what appears to be settled state law. *Murphy v. White Hen Pantry Co.*, 691 F.2d 350, 355 (7th Cir. 1982).

be imputed to the benefited corporation. By contrast, the complaint in the instant case alleges a far-reaching scheme in which, as a consequence of the illegal activities of Reserve's directors and the outside defendants, Reserve was, *inter alia*, [*1348] fraudulently continued in business past its point of insolvency and systematically looted of its most profitable and least risky business and more than \$ 3,000,000 in income -- all actions which aggravated Reserve's insolvency. In no way can these results be described as beneficial to Reserve.⁴ Compare *Security America Corp. v. Schact*, No. 82-C-2132, slip op. at [**13] 3, 4 (N.D. Ill. Jan. 31, 1983) ("particular fact pattern" established that plaintiff corporation had been created solely to carry out fraudulent scheme and thus had no other purpose than to be "engine of theft" against outsiders under *Cenco*).

[**14] Defendants argue nonetheless that since the alleged fraudulent scheme had the effect of continuing Reserve's active corporate existence past the point of insolvency to the detriment of outside creditors and policyholders, Reserve was *pro tanto* benefited. But the fact that Reserve's existence may have been artificially prolonged pales in comparison with the real damage allegedly inflicted by the diminution of its assets and income. Under such circumstances, the prolonged artificial insolvency of Reserve benefited only Reserve's managers and the other alleged conspirators, not the corporation. See *In re Investor's Funding Corp.*, [1980] Fed. Sec. L. Rep. (CCH) P97,696 at 98,655 (1980). More colloquially put, if defendants' position were accepted, the possession of such "friends" as Reserve had would certainly obviate the need for enemies. We do not believe that such a Pyrrhic "benefit" to Reserve is sufficient to even trigger the *Cenco* analysis which seeks to determine the propriety of imputing to the corporation the directors' knowledge of fraud.

Even if a *Cenco* - type analysis were applied to the instant case, however, it would not yield the result that defendants [**15] urge, i.e., estoppel of the Director based on the imputation to Reserve of the directors' knowledge of fraud. In *Cenco*, we undertook a two-pronged analysis to determine whether such imputation should occur: whether a judgment in favor of the plaintiff corporation would properly compensate the victims of the wrongdoing, and whether such recovery would deter future wrongdoing. *Cenco*, 686 F.2d at 455. We find that, if warranted by the proof at trial, recovery by the Director on behalf of Reserve would do both.

First, any recovery by the Director from the instant suit will inure to Reserve's estate. And [HN5](#) under the distribution provisions of the governing liquidation statute, it is the policyholders and creditors who have first claim (after administrative costs and wages owed) to the assets of the estate. Ill. Rev. Stat., ch. 73, § 817 (1981). Thus, the claims of these entirely innocent parties must be satisfied in full before Reserve's shareholders, last in line for recovery, receive anything.

Moreover, there is no indication here that the Director's success entails the likelihood of the kind of "perverse" compensation pattern which we declined to permit in *Cenco* [**16]. In *Cenco*, the court was troubled first by the fact that among the shareholders benefiting from a successful recovery were the corrupt officers themselves, *Cenco*, 686 F.2d at 455; here, the defendants do not claim that the wrongdoing officers or directors hold equity positions in Reserve entitling them to recover from the instant suit. We [*1349] were also troubled in *Cenco* by the prospect of double recovery by the shareholders via the plaintiff corporation in view of the previous successful recovery of damages by these same shareholders in a direct suit against the defendants. In this case, by contrast, the other actions noted to this court based on these alleged events have yet to result in any recovery. Of course, if the Director recovers successfully in the instant suit, the defendants in these actions will be able to assert the

⁴These defendants argue that, since Reserve was a wholly-owned subsidiary of ARC, the owners of Reserve, i.e. ARC shareholders, automatically benefited from the direct draining of Reserve and the fraudulent prolongation of Reserve's life. This argument founders on both logic and fact. First, it defies common sense to suggest that a parent corporation's shareholders are not injured when their directors fraudulently prop up, drain, and thereby deepen the insolvency of a subsidiary for whose liabilities the shareholders will eventually be liable. The damage resulting to the parent corporation's shareholders is as real as if the management had impaired a valuable working asset or sold it for a meager sum far less than its present value. Second, as a factual matter, the complaint alleges that not all of the proceeds resulting from the crippling of Reserve redounded to the benefit of ARC and ARC's shareholders. According to the allegations, as a result of the SCOR agreements, ARC was secretly exposed to increased liability for GRC's performance; also as part of these agreements, SCOR allegedly received additional payments from ARC in excess of \$ 2,500,000 for its assistance in furthering the scheme.

previous satisfaction of the claims of the shareholders, policyholders and creditors of Reserve as a bar to subsequent recovery.

Second, from the standpoint of deterrence, this court in *Cenco* based its refusal to permit the plaintiff to recover unimpeded by the directors' knowledge in large part on two circumstances not present [**17] here: 1) that the directors, as shareholders, would recover directly from the suit, and 2) that there existed large corporate shareholders in a position to police the plaintiff's corrupt officers, an activity that would be discouraged by allowing the shifting of corruption-caused loss to outside defendants. *Cenco*, 686 F.2d at 456. By contrast, here, as noted earlier, there is no evidence that the wrongdoing officers of Reserve would benefit directly from the instant suit. There is also no evidence here of the existence of large corporate shareholders capable of conducting an independent audit, as in *Cenco*, and whose lack of investigatory zeal would be rewarded by a decision favorable to the Director.

The court in *Cenco* also expressed reluctance to permit even innocent, atomized shareholders to recover damages for wrongdoing in which their officers were implicated, but that concern must be viewed against the background of the recovery of many of those same shareholders in an earlier action, and the fact that, suing directly, the full recovery in the later suit would injure to them. Significantly, due to the operation of the liquidation statute here, Reserve's shareholders [**18] are last in line for recovery from Reserve's estate and will receive only a residual recovery from the instant suit, if successful after trial, after all of the policyholders and creditors are compensated in full. Thus, unlike the situation in *Cenco*, permitting recovery in this case would not send unqualified signals to shareholders that they need not be alert to managerial fraud since they may later recover full indemnification for that fraud from third party participants.⁵ In sum, we believe not only that *Cenco* is not applicable to the present case, but also that even if it were, application of its compensation and deterrent principles would not inhibit the right of the Director to proceed against the defendants here.

[**19] We turn finally to SCOR and SCOR Re's fallback argument that, even if the Director were not barred from proceeding under *Cenco*, the Director still lacks standing to sue on behalf of Reserve. Citing *Bergeson v. Life Insurance Corp.*, 265 F.2d 227 (10th Cir. 1959), cert. denied, 360 U.S. 932, 3 L. Ed. 2d 1545, 79 S. Ct. 1452 (1959); *Kinter v. Connolly*, 233 Pa. 5, 81 A.2d 905 (1911); *Patterson I**13501 v. *Franklin*, 176 Pa. 612, 35 A. 205 (1896); *Kelly v. Overseas Investors, Inc.*, 18 N.Y.2d 622, 219 N.E.2d 288, 272 N.Y.S.2d 773 (1966); and *Cotten v. Republic National Bank*, 395 S.W.2d 930 (Tex. Civ. App. 1965), these defendants argue that a corporation may never sue to recover damages alleged to have resulted from the artificial prolongation of an insolvent corporation's life. Next, they argue, since Count II and Count IV of the instant complaint assert that "Reserve continued to write insurance" as a result of the underlying mail fraud, and "Reserve's assets were dissipated notwithstanding that Reserve was at all times insolvent," the sole thrust of the Director's complaint is that the damages to Reserve occurred only because Reserve continued to do business [**20] past its point of insolvency. Therefore, they conclude, the Director's claim in this case is barred by the general rule prohibiting a corporation from suing for damages caused by the artificial prolongation of its life.

⁵ The defendants have argued that, due to the statutory authorization of treble damages in RICO civil actions, Reserve's shareholders will experience an enormous windfall recovery to the extent of the full damage increment exceeding single damages. This is not necessarily the case, however, for under the controlling statute, the shareholders will receive only the last residual of Reserve's estate, not a share of each recovery before it is added to that estate. As noted, there are other prior claims on that estate which must be satisfied first, including wages, administration costs, and the claims of policyholders and creditors which may well exceed the amount, or even triple the amount, asserted to have arisen from the damages to the corporation claimed in the present action. Without knowledge of the size of each of these prior claims, evidence of which has not been presented at this stage, we decline to speculate on the existence or relative size of any recovery to Reserve's shareholders.

Moreover, since the deterrence policy of *Cenco* is a forward-looking one, we should apply it with the normal case in mind and not be overly swayed by the fortuity of a treble damage provision which may in some cases result in a large recovery to a plaintiff's shareholders. This is especially so where to hold otherwise, as here, would do immense damage to the policy underlying the statutory liquidation process: the protection of the interests of policyholders, shareholders and creditors jointly by the Director.

We reject both premises of this argument. First, in the underlying allegations here, the Director charges that the damage to Reserve stemmed not only from the mere extension of the normal business operation of Reserve, but from specific actions crippling Reserve which were taken as an integral part of that extension. *Inter alia*, the Director alleges that with the smoke screen of the underlying mail fraud, Reserve's directors and other defendants were able to drain Reserve of over \$ 3,000,000 of income, and to drain Reserve of its most profitable and least risky business, thereby deepening Reserve's insolvency. Thus, the "asset dissipation" alleged was not only that which resulted from the normal operation of the business, as in the cases cited by the defendants,⁶ but also that which resulted from the bleeding of Reserve which was a part of the underlying scheme to defraud.

[**21] Alternatively, to the extent that the cited cases suggest that [HN6](#) a corporation may not sue to recover damages resulting from the fraudulent prolongation of its life past insolvency, we decline to speculate that the Illinois courts would accept this restriction on the Director's freedom of action. For each of these cases rests upon a seriously flawed assumption, *i.e.*, that the fraudulent prolongation of a corporation's life beyond insolvency is automatically to be considered a benefit to the corporation's interests. See, e.g., [Bergeson](#), 265 F.2d at 232; [Kinter](#), 81 A. at 905; [Patterson](#), 35 A. at 206. This premise collides with common sense, for the corporate body is ineluctably damaged by the deepening of its insolvency, through increased exposure to creditor liability. See *In Re Investor's Funding Corp.*, [1980] Fed. Sec. L. Rep. (CCH) P97,696, at 98,655 (S.D.N.Y. 1980). Indeed, in most cases, it would be crucial that the insolvency of the corporation be disclosed, so that shareholders may exercise their right to dissolve the corporation in order to cut their losses. See Ill. Rev. Stat., ch. 32, §§ 157.75, 157.76 (1981). Thus, acceptance of a rule which would [**22] bar a corporation from recovering damages due to the hiding of information concerning its insolvency would create perverse incentives for wrong-doing officers and directors to conceal the true financial condition of the corporation from the corporate body as long as possible. We are not prepared to conclude that the Illinois courts would adopt such a regime.

III. The Applicability of RICO

We turn now to defendants' contentions that the injury to Reserve which the Director alleges is not compensable under RICO. [HN7](#) The civil damage provision of RICO, 18 U.S.C. [§ 1964\(c\)](#), creates a private right of action with treble damage recovery for "any person injured in his business or property by reason of a violation of [§ 1962](#)." [Section 1962](#) enumerates two violations relevant to the instant case: [§ 1962\(a\)](#) [HN8](#) makes it "unlawful for any person who has received any income derived, directly or indirectly, from a pattern of racketeering activity . . . to use or invest, directly or indirectly, any part of such income, or the proceeds of such income, in [*1351] acquisition of any interest in, or establishment or operation of, any enterprise" which touches interstate commerce; and [§ 1962\(c\)](#) [**23] [HN9](#) makes it "unlawful for any person employed by or associated with any enterprise [engaged in interstate commerce] to conduct or participate directly or indirectly, in the conduct of such enterprise's affairs through a pattern of racketeering activity. . . ." [HN10](#) Finally, RICO [§ 1961](#) defines a "pattern of racketeering activity" as at least two occurrences within ten years of any of several predicate offenses, including mail fraud.

In his complaint, the Director alleges that injury to Reserve stemmed from the violation by the defendants of both [§ 1962\(a\)](#) and [§ 1962\(c\)](#). The underlying "pattern of racketeering activity" alleged consists of the mail fraud which occurred in connection with the mailing of the fraudulent financial statements of Reserve which all defendants knew did not disclose Reserve's insolvency or the purpose and effects of the SCOR deal. Count II of the complaint alleges that the officers and directors, SCOR and SCOR Re used income derived from the pattern of racketeering activity in the operation of their businesses in violation of [§ 1962\(a\)](#), and that the same defendants conducted the affairs of ARC, SCOR, and SCOR Re through the underlying pattern of racketeering [**24] activity, in violation of [§ 1962\(c\)](#). Count IV alleges that the officers and directors and the three defendant accounting firms used income derived from the racketeering activity in the operation of ARC and the accounting firms in violation of [§ 1962\(a\)](#), and that the officers and directors and the accounting firms conducted the affairs of ARC and the accounting firms through a pattern of racketeering activity in violation of [§ 1962\(c\)](#).

⁶ In [Kinter v. Connolly](#), 233 Pa. 5, 81 A. 905 (1911), for example, the lower court noted specifically that in "the bill before us . . . there is no averment that any act or omission of the defendants . . . caused loss or injury to the company." [81 A. at 905](#).

Because each of the described violations amount to alternative characterizations of the same conduct, *i.e.*, the cooperation of the defendants in a scheme which impaired Reserve, we can find that RICO applies if any one of the Director's theories is sufficient to invoke the statute. Indeed, we find, after careful consideration, an adequate description of a compensable civil RICO claim in the portions of Counts II and IV of the complaint which allege injury to Reserve as a result of the defendants' direct or indirect participation in the conduct of ARC's affairs through the alleged mail fraud in such a manner as to artificially prolong Reserve's existence and worsen its insolvency and losses.

The defendants contend that numerous fatal defects [**25] inhere in these portions of the Director's complaint. First, they argue that the complaint itself is technically insufficient on its face by failing to explicitly allege that all of the defendants participated in the conduct of ARC and by failing to allege that Reserve's injury occurred as a result of the *operation of ARC* through the underlying mail fraud. Second, and more generally, they argue that Congress did not intend that the civil provisions of RICO would be applicable to the general universe of business fraud encompassing the acts alleged here. Third, the defendants argue that the proper causational predicates for the invocation of [§ 1964\(c\)](#) are not present here; recovery, they aver, may only follow a showing that the plaintiff suffered "competitive" rather than "direct" injury from the defendants' actions, and, in any case, they maintain, there is a failure to allege that *any* injury to Reserve stemmed from the operation of ARC through the mail fraud. Finally, the accounting firm defendants, SCOR and SCOR Re argue several miscellaneous theoretical insufficiencies in the Director's complaint: no recovery is possible by Reserve, the "perpetrator" of the fraud, against [**26] Reserve's "unwitting tools," under our decision in [Cenco, Inc. v. Seidman & Seidman, 686 F.2d 449 \(7th Cir. 1982\)](#); the accountants, SCOR and SCOR Re were not sufficiently "employed by or associated with" ARC; and SCOR and SCOR Re could not have been culpable of the alleged underlying mail fraud. We shall consider each of these arguments *seriatim*.

A. Technical Sufficiency of the Complaint

The defendants first insist that, even were the theoretical hurdles to RICO coverage [*1352] cleared, the Director's complaint does not recite coherently an underlying violation of [§ 1962\(c\)](#) or injury stemming therefrom. We find that these arguable technical insufficiencies inhere only in the cumulative and summary portions of the complaint, and that the Director's basic theory is supported by the complaint's full factual allegations. [HN11](#) In examining the complaint, we are guided by the principle that the "liberal pleading policy of the [Federal Rules of Civil Procedure] prevents dismissal of a meritorious action for purely formal or technical reasons," [Murphy v. White Hen Pantry Co., 691 F.2d 350, 353 \(7th Cir. 1982\)](#), and that we are to construe the pleadings in the plaintiff's [**27] favor, [Schnell v. City of Chicago, 407 F.2d 1084, 1086 \(7th Cir. 1969\)](#).⁷ Moreover, this court may grant leave to amend the complaint to correct even substantive errors in the pleadings where this would facilitate a decision on the merits and

⁷The defendants argue that there is no place in the instant appeal for application of the liberal pleading policy embodied in [Murphy v. White Hen Pantry Co. and Conley v. Gibson, 355 U.S. 41, 2 L. Ed. 2d 80, 78 S. Ct. 99 \(1955\)](#), because the basic question to be decided here concerns the alleged absence of federal jurisdiction, and not a 12(b)(6) -- related challenge to the sufficiency of the complaint. However, the liberal construction policy of [Fed. R. Civ. P. 8\(f\)](#) is not limited to the context of 12(b)(6) motions. Moreover, although this case is not formally an appeal of denial of a 12(b)(6) motion, the defendants' assault on the technical adequacy of the complaint raises the identical issue involved in such an appeal; we therefore find it appropriate to seek guidance from precedents addressing that procedure.

The defendants argue that liberal construction and amendment of the Director's complaint is especially inappropriate here because the latter was admonished in proceedings below to make sure that its pleadings were sufficient before the appeal was certified. The Director declined to do so, but only in the face of statements by some of the defendants that they would object to such an attempt to amend the complaint, and that, in any case, their primary challenge to the Director's complaint was that no set of facts describing the alleged events, however arranged, could support the invocation of RICO. We also take note of the extraordinary conceptual disarray and schism even among district courts in this circuit, discussed *infra*, as to the proper elements of a RICO pleading. Under these circumstances, we decline to penalize the Director for failing to state the summary portions of his RICO allegation with technical precision, especially where his preceding factual allegations amply support on their face a proper RICO claim.

no prejudice would ensue to the defendants. 3 J. Moore, *Moore's Fed. Practice* PP15.08, 15.10 (2d ed. 1976); Wright and Miller, *Federal Practice and Procedure*, §§ 1474, 1487 (1977).

[**28] The first arguable technical deficiency in the complaint concerns the statements in paragraphs 81 and 98 that Reserve was damaged "as a direct result of the intentional scheme to defraud, the use of the United States mails in its furtherance and the above described pattern of racketeering activity. . ." This statement, defendants argue, fails to meet the requirement that RICO damages must be alleged to have occurred "by reason of" the conduct of an *enterprise* through a pattern of racketeering activity, not by reason of the underlying racketeering activity itself. But a natural, let alone liberal, reading of the complaint reveals it to be in full conformance with RICO's requirements. For the "intentional scheme to defraud" (the source of the injury) is defined at paragraphs 73 and 90 precisely as the above "conspiracy" set forth in the extensive prefatory factual allegations; that "conspiracy" describes precisely those aspects of the *operation* of ARC and Reserve's affairs made possible "through" the SCOR agreement and the cover-up of Reserve's insolvency. Indeed, it is ARC's operation in such a manner as to artificially prolong the operation of Reserve, not the mail [**29] fraud itself, which is separately underscored by the Director as the gravamen of the complaint. See paragraphs 41, 43, 44, 57 (realleged at P72 (Count II) and P89 (Count IV)). Thus, we find that the causal nexus as alleged easily satisfies the requirements of [§ 1964\(c\)](#). However, to clarify the complaint and eliminate any possible misunderstanding, the district court may grant leave to amend the complaint to meet the problems discussed above.

The second technical deficiency in the complaint is the phrasing of the paragraphs [*1353] in Count II and Count IV charging a violation of [§ 1962\(c\)](#):

The officers and directors, SCOR, SCOR Reinsurance . . . [Anderson, Coopers and Grant] conducted the affairs of ARC, SCOR, SCOR Reinsurance . . . [Anderson, Coopers and Grant] respectively, through the pattern of racketeering activity . . . in violation of [18 U.S.C. § 1962\(c\)](#). (emphasis added).

While it is true that these cumulative paragraphs, taken in themselves, state that only the *officers and directors* conducted the affairs of ARC, there are ample factual allegations, realleged in Counts II and IV, describing the participation of SCOR, SCOR Re and the [**30] accountant defendants in the conduct of ARC. See paragraphs 29, 30, 33, 34, 37, 42, 44, 49, 49.1, 52, 53, 54. Whether these allegations are sufficient to allege a RICO violation as a policy matter is discussed *infra*, but here we note only that a reading of the full face of the complaint, rather than just the technically insufficient cumulative paragraph, discloses that the Director has alleged conduct which will at least arguably satisfy [§ 1962\(c\)](#). Since it therefore does not appear [HN12](#)↑ "beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief," [Conley v. Gibson, 355 U.S. 41, 45-46, 2 L. Ed. 2d 80, 78 S. Ct. 99 \(1957\)](#) (footnote omitted), we cannot dismiss the complaint on the basis of this deficiency. However, to help clarify the complaint, the district court may grant leave to amend paragraphs 79 and 96 in Counts II and IV to specify the participation of *all* of the defendants in the conduct of ARC's affairs, in conformance with the numerous preceding allegations.⁸

[**31] B. *The Application of RICO to Business Fraud*

The defendants' main line of attack upon the Director's complaint is that, while it alleges conduct to which RICO might literally apply, Congress did not intend that the statute would reach so far. To allow the Director's complaint to proceed, they argue, would be to unreasonably federalize the common law of "garden variety" business fraud, and eclipse the federal securities laws, providing treble damage actions for all securities-related mail fraud. We agree that [HN13](#)↑ the civil sanctions provided under RICO are dramatic, and will have a vast impact upon the federal-state division of substantive responsibility for redressing illegal conduct, but, like most courts who have

⁸ Not only did the existence of these numerous paragraphs detailing the defendants' participation in ARC's affairs give notice to the defendants of the Director's [§ 1962](#) theory, but also any arguable prejudice resulting from an amendment would be minimal in view of the preliminary status of the case at present. Wright and Miller, *Federal Practice and Procedure*, § 1487 (1971).

considered this issue, we believe that such dramatic consequences are necessary incidents of the deliberately broad swath Congress chose to cut in order to reach the evil it sought; we are therefore without authority to restrict the application of the statute. *United States v. Turkette*, 452 U.S. 576, 587, 69 L. Ed. 2d 246, 101 S. Ct. 2524 (1981); *United States v. Aleman*, 609 F.2d 298, 303-04 (7th Cir. 1979); *Bennett v. Berg*, 685 F.2d 1053, 1064 (8th Cir. [**32] 1982), pet. for reh. en banc granted, Sept. 17, 1982.

We begin our analysis with the plain language of the statute, which provides that "any person" may be liable for a violation of § 1962(c). "Person" is defined at § 1961(3) as "any individual or entity capable of holding a legal or beneficial interest in property. . . ." It does not appear that any of the defendants seriously argue that we should impose a further gloss on that definition requiring that the "person" be affiliated with "organized crime." Such an argument would, of course, be unavailing in light of the clear decisions of this and other courts that HN14[↑] application of § 1962(c) "is not restricted to members of organized crime." *Cenco, Inc. v. Seidman & Seidman*, 686 F.2d 449, 557 (7th Cir. 1982); *United States v. Aleman*, 609 F.2d 298, 303 (7th Cir. 1979); *Bennett v. Berg*, 685 F.2d 1053, 1063 (8th Cir. 1982), pet. for reh. en banc granted, Sept. 17, 1982; *Hanna v. Norcen Energy Resources Ltd.* [Current] Fed. Sec. L. Rep. [*1354] (CCH) P98,742 at 93,738 (N.D. Ohio 1982); *Lode v. Leonardo*, 557 F. Supp. 675 (N.D. Ill. 1982); *D'lorio v. Adonizio*, 554 F. Supp. 222 (M.D. Pa. 1982); *Hellenic* [**33] *Lines, Ltd. v. O'Hearn*, 523 F. Supp. 244, 247 (S.D.N.Y. 1981); *Engl v. Berg*, 511 F. Supp. 1146, 1155 (E.D. Pa. 1981); *Parnes v. Heinold Commodities*, 487 F. Supp. 645, 646 (N.D. Ill. 1980); *United States v. Gibson*, 486 F. Supp. 1230, 1240-41 (S.D. Ohio 1980); *United States v. Chovanec*, 467 F. Supp. 41, 44-45 (S.D.N.Y. 1979). See also Strafer, Massumi & Skolnick, *Civil RICO in the Public Interest: "Everybody's Darling,"* 19 Am. Crim. L. Rev. 655, 665-88 (1982). Note, *Civil RICO: The Temptation and Impropriety of Judicial Restriction*, 95 Harv. L. Rev. 1101, 1106-09 (1982); Comment, *Reading the "Enterprise" Element Back into RICO Sections 1962 and 1964(c)*, 76 N.W. U.L. Rev. 100, 100-01 & n.4 (1982). But see *Moss v. Morgan Stanley, Inc.*, [Current] Fed. Sec. L. Rep. (CCH) P99,045 at 94,982 (S.D.N.Y. 1983); *Wagner v. Bear, Stearns and Co., Inc.*, [Current] Fed. Sec. L. Rep. (CCH) P99,032 at 94,913 (N.D. Ill. 1982); *Adair v. Hunt International Resources Corp.*, 526 F. Supp. 736, 746-48 (N.D. Ill. 1981); *Waterman Steamship Corp. v. Avondale Shipyards, Inc.*, 527 F. Supp. 256, 260 (E.D. La. 1981); *Barr v. WUI/TAS, Inc.*, 66 F.R.D. 109, 113 (S.D.N.Y. [**34] 1975). Nonetheless, defendants argue, the use of civil RICO suits against business fraud, such as that alleged here, would duplicate existing state law and federal securities law remedies, would not further the purposes of the Act, and was not within the contemplation of Congress.

The chief problem with this argument is that Congress was well aware of the range of application authorized by RICO's capacious statutory language.⁹ HN36 But Congress was equally adamant that the fight against organized criminal social exploitation not be impeded by an overly narrow definition of actionable conduct.¹⁰ Congressman Poff, a sponsor of the bill, defended the broad reach of the act by noting,

The curious objection has been raised to [RICO's provisions] that that they are not somehow limited to organized crime -- as if organized crime were a precise and operative legal concept, like murder, rape or robbery. Actually, of course, it is a functional concept like white-collar or street crime serving simply as a

⁹ As Representative Mikva noted in House debate,

My objection to the bill in toto is that whatever its motives to begin with, we will end up with cases involving all kinds of things not intended to be covered, and a potpourri of language by which you can parade all kinds of horrors of overreach . . . under the definition if five or more of [my colleagues] engage in . . . a game of poker and it lasts past midnight . . . thus continuing for a period of two days, then [they] have been running an organized gambling business and [they] can get 20 years, and the Federal Government can grab off the pot besides.

¹⁰ 116 Cong. Rec. at 35,204 (1970).

Similar objections were voiced by civil liberties groups, fearing overbroad application. See *Measures Relating to Organized Crime: Hearings on S. 30, S. 974, S. 975, S. 976, S. 1623, S. 1624, S. 1861, S. 2022, S. 2122 and S. 2292*, before the Subcommittee on Criminal Laws and Procedure of the Senate Committee on the Judiciary, 91st Cong., 1st Sess. at 475 (1969).

¹⁰ See, e.g., 116 Cong. Rec. 601 (1970) (statement by Sen. Hruska, outlining problem in demonstrating connections between abhorred activity and formal criminal syndicates).

shorthand method of referring to a large and varying group of individual criminal offenses committed in diverse circumstances.¹¹

And as Senator McClellan conceded, "Of course, **[**35]** it is true that Title X will have some application to individuals who are not themselves members of La Cosa Nostra or otherwise engaged in organized crime. However, that is not a reason to cut back its scope. . ." ¹² Later, he noted that "the Senate report does not claim . . . that the listed offenses are committed *primarily* by members of organized crime, only that these offenses are characteristic of organized crime."¹³ In short, Congress chose to provide civil remedies for an enormous variety of conduct, balancing the need to redress a broad social ill against the virtues of **[*1355]** tight, but possibly overly astringent, legislative draftsmanship. It is not for this court to reassess the balance struck.

That deference to the conscious assessment of Congress should be our guiding principle is made especially clear upon examination of the defendants' specific objection that our reading of RICO will unreasonably eclipse existing federal civil remedies for securities law violations by providing a treble damage action where two acts of mail fraud accompany the disputed sale or purchase of securities. Defendants' contention proves too much, for such a result is to a degree *explicitly* accomplished, even without the simultaneous presence of mail fraud, by the designation in [§ 1961](#) of "fraud in the sale of securities" as a predicate offense giving rise to a civil damage action where an enterprise is operated **[**37]** through such fraud; clearly, such an outcome is not the result of a strained interpretation of RICO, but rather is explicitly mandated. Defendants' objection that our interpretation will unreasonably bring into the federal ambit regulation of common law fraud likewise proves too much, for such a realignment of the federal-state role has already been accomplished in the criminal sphere through the existence of the mail fraud statute itself. Moreover, the defendants, in raising the spectre of the opening of the litigation floodgates, overlook the fact that neither common law fraud nor securities law violates will, by themselves, be automatically eligible for redress through a civil RICO action; there is the additional requirement under [§ 1964\(c\)](#), discussed *infra*, that an interstate enterprise be conducted "through" a pattern of such activity.

In sum, defendants' profession of alarm at the expansion of federal jurisdiction over business fraud through RICO amounts to nothing less than a dispute with the very design, and not the mere application, of the statute. As the Supreme Court has noted in the criminal context,

The language of the statute and its legislative history **[**38]** indicate that Congress was well aware that it was entering a new domain of federal involvement through the enactment of this measure. Indeed, the very purpose of the Organized Crime Control Act of 1970 was to enable the Federal Government to address a large and seemingly neglected problem. The view was that existing law, state and federal, was not adequate to address the problem, which was of national dimensions. That Congress included within the definition of racketeering activities a number of state crimes strongly indicates that RICO criminalized conduct that was also criminal under state law, at least when the requisite elements of a RICO offense are present. As the hearings and legislative debates reveal, Congress was well aware of the fear that RICO would "mov[e] large substantive areas formerly totally within the police power of the State into the Federal realm." [citations omitted] . . . In the face of these objections, Congress nonetheless proceeded to enact the measure, knowing that it would alter somewhat the role of the Federal Government in the war against organized crime and that the alteration would entail prosecutions involving acts of racketeering that are **[**39]** also crimes under state law. There is no argument that Congress acted beyond its power in so doing. That being the case, the courts are without authority to restrict the application of the statute.

¹³ McClellan, *The Organized Crime Act or Its Critics: Which Threatens Civil Liberties?*, 46 Notre Dame Law Rev. 55, 142 (1970).

In view of this legislative history, it is not surprising that most courts in this and other circuits have had little trouble in entertaining RICO civil actions for damages flowing from the operation by otherwise "legitimate" business people of enterprises through a pattern of mail fraud and securities law violations. See, e.g., [Bennett v. Berg, 685 F.2d 1053 \(8th Cir. 1982\)](#), *pet. for reh. en banc granted*, Sept. 17, 1982 (upholding finding that defendant mortgage lender, insurance company, developer, accountants, attorneys and corporate directors caused compensable RICO damages through operation of retirement community through, *inter alia*, mail fraud); [USACO Coal Co. v. Carbomin Energy, Inc., 689 F.2d 94 \(6th Cir. 1982\)](#) (upholding injunction in [*1356] civil RICO action founded on corporate promoter's breach of fiduciary duty); [Parnes v. Heinold Commodities, Inc., 487 F. Supp. 645 \(N.D. Ill. 1980\)](#) (**40) (RICO action stemming from mail fraud in commodities trading); [Heinold Commodities, Inc. v. McCarty, 513 F. Supp. 311 \(N.D. Ill. 1979\)](#) (commodities fraud); [Hanna v. Norcen Energy Resources, Ltd.](#), [Current]Fed. Sec. L. Rep. (CCH) P98,742 (N.D. Ohio 1982) (RICO action against corporation and its investment banking firm upheld); [Engl v. Berg, 511 F. Supp. 1146 \(E.D. Pa. 1981\)](#) (upholding action against mortgage company in securities fraud RICO claim); [Spencer Companies v. Agency Rent-A-Car, Inc.](#), [1981]Fed. Sec. L. Rep. (CCH) P98,361 (D. Mass. 1981) (alleged fraud in misleading public statement in corporate takeover actionable under RICO); [Computer Terminal Systems, Inc. v. Gross, 1982-1 Trade Cas. \(CCH\) P64,531 \(E.D.N.Y. 1981\)](#) (action against company officers involving kickback scheme). But see [Wagner v. Bear, Stearns and Co., Inc.](#), [Current]Fed. Sec. L. Rep. (CCH) P94,032 at 94,913 (N.D. Ill. 1982); [Moss v. Morgan Stanley, Inc.](#), [Current]Fed. Sec. L. Rep. (CCH) P99,045 at 94,982 (S.D.N.Y. 1983); [Adair v. Hunt International Resources Corp., 526 F. Supp. 736 \(N.D. Ill. 1981\)](#); [Waterman Steamship Corp. v. Avondale Shipyards, Inc., 527 F. Supp. 256 \(E.D. La. 1981\)](#); [Barr v. WUI/TAS, Inc., 66 F.R.D. 109 \(S.D.N.Y. 1975\)](#).

Another major problem with the sort of judicial pruning of RICO's civil provisions, advocated by defendants, where business fraud is alleged is that there is simply no legitimate principled criterion through which to accomplish this distinction. Presumably, the infiltration of a corporation by an organized crime syndicate and the subsequent commission of fraud which results in the looting of the corporation's assets for the syndicate's benefit would and should form the basis for a legitimate RICO action. But the only way in which to distinguish this case from the commission of "garden variety" fraud by "legitimate" corporate directors and outside corporations and auditors, as here alleged, is the presence of an "organized crime" nexus in the first case. Indeed, most courts have squarely exempted "normal" business or securities fraud-related claims from RICO's coverage have been forced to rely on the already discredited "organized crime" limitation. See, e.g., [Wagner v. Bear Stearns and Co., Inc.](#), [Current]Fed. Sec. L. Rep. (CCH) P94,032 at 94,913 (N.D. Ill. 1982); [Moss v. Morgan Stanley, Inc.](#), [Current]Fed. Sec. L. Rep. (CCH) P99,045 at 94,982-43; [Adair v. Hunt International Resources Corp., 526 F. Supp. 736, 747 \(N.D. Ill. 1981\)](#); [Waterman Steamship Corp. v. Avondale Shipyards, Inc., 527 F. Supp. 256, 259 \(E.D. La. 1981\)](#); [Barr v. WUI/TAS, Inc., 66 F.R.D. 109, 112-13 \(S.D.N.Y. 1975\)](#). Obviously, having already rejected the "organized crime" limitation, [United States v. Aleman, 609 F.2d at 303](#); [Cenco, Inc., 686 F.2d at 557](#), this court does not wish that limitation to be revived under the guise of determining the kinds of activity covered by RICO.

In short, while we are mindful of the jurisprudential maxim that statutes are not to be interpreted woodenly and without regard to their aim, we do not see how any legitimate or principled tailoring of RICO could be effected without impairing the broad strategy embodied in the act. If Congress wishes to avoid the inclusion under RICO's umbrella of "garden variety" fraud claims involving the operation of enterprises through mail and securities fraud, it may easily do so through removing mail and securities fraud from the list of predicate acts enumerated in § 1961. That is not, however, a program which [*43] may be undertaken by this court. [United States v. Turkette, 452 U.S. 576, 586-87, 69 L. Ed. 2d 246, 101 S. Ct. 2524 \(1981\)](#).

C. The Requirement of "Competitive" or "Indirect" Injury

The defendants' next line of attack on the Director's complaint recites that the allegations point to no "competitive injury" to Reserve from the operation of ARC. Citing Congress' concern with the impact of organized crime infiltration upon free competition and the structural similarity of the RICO treble damage provisions to those available under the antitrust laws, the defendants argue that the civil remedy provided [*1357] in § 1964 to "any person injured in his business or property" is not available to those who have suffered *directly* through the operation

of a business through a pattern of racketeering, but only to those injured as competitors. Since Reserve is not a competitor of ARC, defendants conclude, the former may not invoke [§ 1964\(c\)](#).

We note at the outset that the defendants' construction has been accepted by some district courts. See [North Barrington Development, Inc. v. Fanslow, 547 F. Supp. 207 \(N.D. Ill. 1980\)](#); [Van Schaick v. Church of Scientology of California, Inc., 535 F. Supp. 1125 \(D. Mass. 1982\)](#); [Erlbaum v. Erlbaum \[Current\] Fed. Sec. L. Rep. P98,772 at 93,922-23 \(E.D. Pa. 1982\)](#); [Landmark Savings and Loan v. Rhoades, 527 F. Supp. 206 \(E.D. Mich. 1981\)](#). But it has been rejected by the greater number of courts and commentators. See, e.g., [Bennett v. Berg, 685 F.2d at 1059](#), pet. for reh. en banc granted, Sept. 17, 1982; [D'Iorio v. Adonizio, C.A., 554 F. Supp. 222 \(M.D. Pa. 1982\)](#); [Prudential Lines, Inc. v. McKeon, No. 80 Civ. 5853 \(S.D.N.Y. April 21, 1982\)](#); [Parnes v. Heinold Commodities, Inc., 487 F. Supp. 645 \(N.D. Ill. 1980\)](#); [Heinold Commodities v. McCarty, 513 F. Supp. 311, 313 \(N.D. Ill. 1979\)](#); [Hanna Mining Co. v. Norcen Energy Resources, Ltd., \[Current\] Fed. Sec. L. Rep. \(CCH\) P98,742 at 93,737 \(N.D. Ohio 1982\)](#); [Engl v. Berg, 511 F. Supp. 1146 \(E.D. Pa. 1981\)](#); [Hellenic Lines, Inc. v. O'Hearn, 523 F. Supp. 244, 248 \(S.D.N.Y. 1981\)](#) ("RICO does not countenance racketeering activity so long as it is done uniformly across competing concerns"); [Spencer Companies, Inc. v. Agency Rent-A-Car, Inc., \[1981\] F. Sec. L. Rep. \(CCH\) P98,361 \(D. Mass. 1981\)](#); Strafer, Massumi & Skolnick, [Civil \[*45\] RICO in the Public Interest](#), *supra*, at 689-707; Blakely and Gettings, [Racketeer Influenced and Corrupt Organizations \(RICO\): Basic Concepts -- Civil and Criminal Remedies](#), 53 Temple L.Q. 1009, 1040-43 (1983); Note, [Civil RICO: The Temptation and Impropriety of Judicial Restriction](#), *supra*, at 1109-1114; *But see Comment, Reading the "Enterprise" Element Back into RICO*, *supra*, at 125-26 (1981). And, we think, rightly so, for such a crabbed interpretation as the defendants offer does not fully credit Congressional intent or fulfill the purposes of RICO.

First, while in enacting RICO Congress expressed its concern that organized crime "interfere[s] with free enterprise," and noted its desire to protect those injured competitively by businesses infused with the gains of racketeering,¹⁴ it also indicated its concern that "organized crime activities in the United States weaken the stability of the Nation's economic system, *harm innocent investors* and competing organizations . . . and undermine the general welfare of the Nation and its citizens."¹⁵ (emphasis added). Rejecting an alternative legislative course which would have involved simply amending the antitrust [\[*46\]](#) laws to provide remedies for competitive harm caused by racketeering infiltration,¹⁶ Congress instead enacted RICO as a separate tool in the fight against organized crime. As noted by the Antitrust Section of the American Bar Association in committee hearings on RICO, the latter course possessed precisely the advantage of allowing for the effectuation of purposes beyond the protection of competition:

[Some] activities of organized crime in legitimate business may or may not be subject to the antitrust laws. Thus, some extortion tactics and business takeovers by organized crime might not be reached under the antitrust laws, particularly if they affected only the victimized business rather than resulted in a lessening of competition in an entire line of commerce.¹⁷

In short, RICO was broadly aimed at "striking . . . a mortal blow against the property [\[*1358\]](#) interests of organized crime." 116 Cong. Rec. 602 (1970) (statement of Senator Hruska). This court is reluctant to undermine that broad mission of RICO by engraving onto its civil provisions a competitive injury requirement. See [Bennett v. Berg, 685 F.2d at 1059](#) ("In a RICO context, there are few [\[*47\]](#) countervailing reasons to lessen the impact of RICO remedies by imputing the limitations on standing which apply to [antitrust law](#).").

¹⁴ OCCA Publ. L. No. 91-452, 84 Stat. 922, 923 (1970) (Statement of Findings and Purpose); 116 Cong. Rec. 602 (1970) (statement of Senator Hruska).

¹⁵ Publ. L. No. 91-452, Sec. 1(4), 84 Stat. 922 (1970).

¹⁶ S. 2048, 90th Cong., 1st Sess. (1967), extending the Sherman Act to coverage of organized criminal activity, was left dormant in committee.

¹⁷ 1969 Hearings, Note 6, [supra, at 556, 557](#).

The structural similarity of the RICO civil damages apparatus to that contained in the antitrust laws does not persuade us otherwise. An examination of the relevant Congressional debate reveals that the references to **antitrust law** and precedent were attempts to justify the extraordinary treble damage action as a device to deter organized crime; the notion that the objectives of RICO and the Sherman Act were identical was discounted.¹⁸ Moreover, HN15↑ to the extent that **antitrust** [**48] **law** and policy are increasingly concerned primarily with market efficiency rather than the deleterious effects of concentrated market power itself,¹⁹ analogies to that body of law become increasingly irrelevant, since the exercise of social power by organized crime is thought to be *malum in se*.²⁰

Finally, Congress' specific refusal to expand the Sherman [**49] Act to authorize RICO-type recoveries is not without significance. As the President of the American Bar Association noted in testifying on behalf of a separate RICO statute,

The use of the antitrust laws themselves as a vehicle for combating organized crime could create inappropriate and unnecessary obstacles in the way of persons injured by organized crime who might seek treble damage recovery. Such a private litigant would have to contend with a body of precedent -- appropriate in a purely antitrust context -- setting strict requirements on questions such as "standing to sue" and "proximate cause."²¹ In short, we believe, like most other courts, that the erection of a "competitive" or "indirect" injury barrier to RICO recovery comports with neither the plain language nor the central goal of the statute.

D. Injury "By Reason Of" A **§ 1962(c)** [**50] Violation

Defendants' next argument is that, even if a RICO plaintiff need not allege a "competitive injury," he must plead injury "by reason of" a **§ 1962(c)** violation, *i.e.*, by reason of the *operation* of an enterprise through the underlying pattern of racketeering activity, not by reason of the predicate offense itself. And the Director's complaint, they argue, alleges no such injury from the operation of ARC but rather only from the underlying mail fraud. Further, defendants maintain that **§ 1964(c)** requires that plaintiffs must allege injury caused indirectly by a racketeering enterprise separate from the plaintiff itself. While we believe this latter argument to be without merit in view of our determination in III. C. *supra* that RICO was designed to protect *direct*, and not just second-order, victims of organized crime infiltration, we need not reach it here, for the Director's complaint, as construed in III A. *supra*, does allege an injury to Reserve by reason of the operation of a separate enterprise, ARC, through a pattern of racketeering activity. We also cannot accept the defendants' contention that the Director's complaint does not allege injury [**51] to Reserve by reason of the [*1359] operation of ARC through the underlying fraud.

As noted in III A. *supra*, the whole thrust of the Director's complaint is that Reserve was a victim of the dishonest *operation* of ARC through a pattern of sham reinsurance, falsification of financial statements, and fraudulent dealings with state insurance regulators which allowed ARC to prolong Reserve's life beyond insolvency and thus exacerbate its financial woes. The Director does not allege that the predicate fraudulent acts were aimed directly at Reserve, as was the case with the plaintiffs in *Johnsen v. Rogers*, 551 F. Supp. 281 (C.D. Cal., 1982); *Bays v. Hunter Savings Association*, 539 F. Supp. 1020, 1024 (S.D. Ohio 1982); *Harper v. New Japan Securities*, 545 F. Supp. 1002, 1007-08 (C.D. Cal. 1982); and *Erlbaum v. Erlbaum*, [Current]Fed. Sec. L. Rep. (CCH) P98,722 (E.D. Pa. 1982), cited by defendants.

¹⁸ Senator Hruska noted that the legislation "seeks to strengthen the defense of legitimate business takeover by organized crime" and disavowed antitrust standing parallels. See 115 Cong. Rec. 6992 (1969). Senator McClellan echoed this point later, noting, "There is . . . no intention here of importing the great complexity of **antitrust law** enforcement into this field. . . ." *Id.* at 9567.

¹⁹ See, e.g., *MCI Communications Corp. v. American Telephone and Telegraph Co.*, 708 F.2d 1081, slip op. at 37, 38 (7th Cir. 1983).

²⁰ See Note, *Civil RICO: The Temptation and Impropriety of Judicial Restriction*, *supra*, at 1113, 1114.

²¹ Organized Crime Control: Hearings on S. 30 Before the Subcommittee No. 5, House Committee on the Judiciary, 91st Cong., 20th Sess. at 149 (1969).

Instead, the Director asserts that Reserve suffered from the defrauding of the State Department of Insurance which permitted ARC to cause Reserve to continue to operate beyond its insolvency and to allow Reserve to be further drained of its income and more favorable [**52] business. Thus, the Director's allegation suggests an even stronger example of damage incurred through the operation of an enterprise than was alleged and upheld in *Computer Terminal Systems, Inc. v. Gross*, 1982 Trade Cases (CCH) P64,532 (E.D.N.Y. 1981), and *Hellenic Lines Ltd. v. O'Hearn*, 523 F. Supp. 244 (S.D.N.Y. 1981), approvingly cited by defendants, in which the plaintiff corporations were damaged by a scheme of bribes and kickbacks conducted *through* the plaintiff corporation, thus entailing financial losses which stemmed directly from the commission of the predicate offenses.

The defendant directors argue alternatively that the "by reason of" requirement is not met by the Director in the present allegations because he fails to allege that Reserve suffered damage which it would not have suffered had Reserve become insolvent for reasons having nothing to do with the underlying fraudulent operations proscribed by RICO. We must reject this argument on behalf of such attenuated "but for" causation; it is the logical equivalent of proposing that a murderer may not be held liable for his victim's death since the state cannot demonstrate that the victim may not have perished [**53] eventually by accident. Equally fatuous is the suggestion of some of the defendants that they may not be held liable for damage arising from the fraudulent operation of ARC since Reserve's immediate injury stemmed from the Illinois Department of Insurance's assent to Reserve's continued operation. Such an argument plainly confuses cause with result, for the fraudulent operation of ARC was surely the alleged progenitor of Reserve's damage, regardless of whether the state regulatory authority was a necessary instrument in the accomplishment of that end.

In sum, we find that the complaint alleges a causal nexus between RICO-proscribed conduct and Reserve's damage sufficient to meet the requirements of [§ 1964\(c\)](#).

E. Miscellaneous Contentions

The defendants cite several other defects in the theory of the Director's complaint. We find them also to be without merit, and discuss them briefly below.

Defendants first argue that our decision in *Cenco*, denying civil RICO standing to an accounting firm attempting to sue its client corporation for damages stemming from a fraud aided by the accounting firm, precludes the maintenance of the Director's standing in the instant case. [**54] In denying standing to the auditors in that case, we noted that it "is probably on behalf of the owners, perhaps also the customers and competitors, of such businesses that the [RICO] civil damages remedy was created, and not on behalf of the people who supply office equipment or financial or legal services to criminal enterprises that may be violating RICO." [Cenco, 686 F.2d at 455](#). We therefore concluded that Congress did not intend to create a cause of action for "all who may have suffered *indirectly* from the violation, especially where many of them would inevitably be, as here, the *witting* [*1360] or *unwitting tools* of the violator." [Id. at 457](#) (emphasis added). Defendants seize on this latter phrase and argue that, if an action may be denied to an auditor who is a "witting or unwitting tool" of the violator, *a fortiori* a "violator" (i.e., Reserve) may not sue its "unwitting tool" (i.e., the accountant defendants). Such an argument must fail, for, unlike in *Cenco*, we have found here that the complaint alleges that Reserve was a *victim* of the RICO violation, not its perpetrator. See II, *supra*, at 8-9. Therefore, the Director, as [**55] the statutory "owner" of Reserve and the *direct* victim of the defendants' unlawful activity, is precisely the kind of plaintiff who must be given standing in order to fulfill the deterrent objectives of RICO. [Cenco, 686 F.2d at 455](#).

Defendants SCOR and SCOR Re next argue that they were not "employed by or associated with" ARC and are therefore excluded from liability under [§ 1962\(c\)](#). They argue that [§ 1962\(c\)](#) in essence requires that a defendant must be an "insider" or "manager" of the damage-causing enterprise in order to suffer liability. We do not believe that the language and purpose of [§ 1962\(c\)](#) supports such an interpretation.

As this court has noted before, in finding that a non-manager defendant arsonist met the [§ 1962\(c\)](#) requirement, "The nature of racketeering connections to an otherwise legitimate business suggests that elements outside a company may assist in obtaining the company's illegal goals. Thus, [HN16](#)[] the substantive proscriptions of the RICO statute apply to insiders and outsiders -- those merely "associated with" an enterprise -- who participate

directly and indirectly in the enterprise's affairs through a pattern of racketeering activity. [**56] [Citations omitted]. Thus, the RICO net is woven tightly to trap even the smallest fish, those peripherally involved with the enterprise." *United States v. Starnes*, 644 F.2d 673, 679 (7th Cir. 1981), quoting *United States v. Elliott*, 571 F.2d 880, 903 (5th Cir. 1978), cert. denied, sub nom. *Delph v. United States*, 439 U.S. 953, 99 S. Ct. 349, 58 L. Ed. 2d 344 (1978) (emphasis in the original).²² Other courts as well have had little trouble in finding that defendants who are not managers or employees in the colloquial sense are nevertheless reached by § 1962(c). See *Bennett v. Berg*, 685 F.2d 1053 (8th Cir. 1982), pet. for reh. en banc granted, Sept. 17, 1982 (upholding liability against mortgage lender, attorneys, accountants of enterprise); *United States v. Bright*, 630 F.2d 804, 830-31 (5th Cir. 1980) (bonding company paying kickbacks to sheriff's office in return for business is sufficiently "associated with" that office); *United States v. Forsythe*, 560 F.2d 1127, 1135-36 (3rd Cir. 1977) (magistrate receiving bribes from local bonding agency is sufficiently "associated with" latter enterprise; alternatively, magistrates are constructive "employees" [**57] of the enterprise); *Hanna v. Norcen Energy Resources, Ltd.*, [Current]Fed. Sec. L. Rep. (CCH) P98,742 (N.D. Ohio 1982) (upholding RICO liability against accounting firm and company in connection with client enterprise's securities fraud). The defendant insurance companies here, who allegedly entered into long-term contracts with ARC entailing complicated reinsurance and financing arrangements and SCOR's service as a conduit for Reserve's income and retroceded business, and the defendant auditors, who allegedly aided the managerial defendants in operating ARC through systematic fraud, are sufficiently "associated with" or "employed by" ARC within the meaning of the statute.

[**58] Defendants SCOR and SCOR Re argue next that their alleged conduct does not entail culpability under the predicate mail fraud allegation. They first argue that no deception took place because the State Director of Insurance was aware of, and agreed to, the SCOR reinsurance agreement. SCOR neglects to mention, however, that a key to the allegedly deceptive [*1361] scheme, the clandestine retrocession agreement and guarantee by ARC of GRC's obligations to SCOR, were not disclosed to the state authorities, with the contemplated result that Reserve's *de facto* retention of liability for formally ceded business²³ secretly continued and deepened its insolvency. SCOR also argues that the fact that it entered into the reinsurance agreement several months before the consent decree negates any inference of SCOR's intent to defraud. The complaint, however, alleges that the negotiations in connection with the consent decree may have been underway in late 1974 at the time the SCOR agreement was concluded, with the full fraudulent impact in view and that SCOR was aware throughout subsequent years that the continued viability of the consent decree rested on the continued transmission [**59] of the fraudulent information; if proven, such facts clearly support an invocation of the mail fraud predicate offense under § 1961.

Finally, defendant Andersen suggests that the presence of the terms "he" and "his" in certain sections of RICO indicates that only biological individuals may violate RICO § 1962(c). We must reject this contention, as § 1961(3) HN17[+] plainly states that a violating "person" may be "any individual or entity capable of holding a legal or beneficial interest in property."

Conclusion

[**60] There is no doubt that many theoretical and practical objections may be raised to even the most routine application of RICO's civil damage provisions. As suggested above, Congress, by granting both plaintiff and defendant status to "any person" who possesses the rudimentary connection with the operation of an enterprise

²² Defendants suggest that *Starnes* is distinguishable because it involved a violation alleged under § 1962(d) which makes it unlawful for a person to conspire to violate § 1962(c). However, in *Starnes* we explicitly determined that the same enterprise-person nexus requirements contained in § 1962(c) were independently satisfied vis-a-vis the accused arsonist. See *Starnes*, 644 F.2d at 679.

²³ It is true, as defendants note, that the allegation does not spell out in detail the precise monetary liability which Reserve effectively maintained as a result of the secret agreements, but it does assert that there was "substantial risk of loss" from the ceded business retained by the entire "ARC insurance group," which includes Reserve. We consider such an allegation, at least at this stage, adequate to suggest that SCOR could have been aware of the misleading impact of the secret guarantee.

through predicate offenses or who suffers injury therefrom, may well have created a runaway treble damage bonanza for the already excessively litigious. The statute, however, does not speak ambiguously, and Congress, as RICO's legislative history indicates, was alerted to the far-reaching implications of its enactment. The legislature having spoken, it is not our role to reassess the costs and benefits associated with the creation of a dramatically expansive, and perhaps insufficiently discriminate, tool for combating organized crime. *United States v. Turkette, 452 U.S. at 586-87 (1981)*.

With this principle in view, we find that the Director's complaint adequately states at least one cognizable claim under RICO, § 1962(c). We thus affirm the district court's denial of defendants' motion to dismiss Counts I, II, III and IV of the complaint. We intend to [**61] express no judgment on the merits of the complaint.

AFFIRMED.

HN1 [?] Exemptions & Immunities, Parker State Action Doctrine

Insofar as the Sherman Act (Act), [15 U.S.C.S. § 1](#), applies only to persons, Congress intended application of the Act to the business combinations of individuals and corporations. The Act was not, therefore, intended to restrain a state or its officers or agents from activities directed by its legislature. Congress made no mention of states, and in a dual system of government in which, under the United States Constitution, the states are sovereign, save only as Congress may constitutionally subtract from their authority, an unexpressed purpose to nullify a state's control over its officers and agents is not lightly to be attributed to Congress.

* FORMER FIFTH CIRCUIT CASE (SECTION 9(3) OF PUBLIC LAW 96-452 -- OCTOBER 14, 1980).

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN2 [down] Exemptions & Immunities, Parker State Action Doctrine

The state action issue is a question of whether the challenged acts could be attributed to the state as sovereign.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN3 [down] Parker State Action Doctrine, Local Governments & Private Parties

The fact that Congress did not intend to restrain anticompetitive acts attributable to states does not mean that only states could assert a state action defense. A defense of state action may also be available to private parties under certain limited circumstances.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN4 [down] Parker State Action Doctrine, Local Governments & Private Parties

In determining whether compulsion is present, the court does not believe that private parties may have no role in proposing mandatory state action. An action still may be compelled by the state even though private parties petitioned the state to consider requiring such action. Still, once a state has adopted some policy, whether or not after a petition by a private party, private parties will be exempt from the antitrust laws only if the state requires some action pursuant to that policy.

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

Antitrust & Trade Law > Sherman Act > General Overview

HN5 [down] Exemptions & Immunities, Parker State Action Doctrine

The legislative history and wording of the Sherman Act (Act), [15 U.S.C.S. § 1](#), point to the conclusion that Congress wished to restrain the anticompetitive actions of persons, that is, individuals and corporations. Thus, an anticompetitive action undertaken by a private party necessarily is proscribed by the Act unless for some reason that action cannot fairly be attributed to the private party. When a state compels the private party to act, it deprives him of his freedom of choice; his action, being mere obedience, cannot be described as individual action and must therefore be attributed to the state.

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

HN6 Scope, Exemptions

A state may not give immunity to those who violate the Sherman Act. [15 U.S.C.S. § 1](#), by authorizing them to violate it, or by declaring that their action is lawful, and state authorization, approval, encouragement, or participation in restrictive private conduct confers no antitrust immunity. So long as the state merely allows, but does not compel, anticompetitive conduct, the decision to adopt such conduct remains that of the individual and is within the scope of the Act. Regardless of how strongly a state may wish to remove private action from the Act's jurisdiction, it will not succeed unless it structures a program so as to make individual actions the actions of the state itself, by means of the mechanism of compulsion.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN7 Exemptions & Immunities, Parker State Action Doctrine

If a private party is permitted by the state to make the choice whether or not to compete, there is no necessary conflict between state and federal law because the private party may comply with both federal and state law at the same time.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN8 Parker State Action Doctrine, Local Governments & Private Parties

Compulsion should not be required of state defendants. Regardless of their motives for undertaking anticompetitive behavior, states are nevertheless acting as states. The analysis of state action differs substantially depending on whether the defendant is a private party or a public institution. The same analysis applies to municipalities, at least when they act as agents of the state. Thus, the supreme court has not required compulsion for municipalities, but has held that when a state indicates its intention that the municipality may act as an instrumentality of the state, when the state sanctions anticompetitive behavior of the municipality, a state action defense may be available to the municipality.

Business & Corporate Compliance > ... > Transportation Law > Commercial Vehicles > Rates & Tariffs

HN9 [blue icon] Exemptions & Immunities, Parker State Action Doctrine

N.C. Gen. Stat. § 62-152.1(b) states that in order to realize and effectuate the policy of uniform rates among carriers, any party to an agreement with other carriers regarding uniform rates may apply to a state commission for approval of the agreement; Section 62-152.1(h) relieves parties to an agreement so approved from the operation of the antitrust laws. The statute does no more than authorize or permit collective ratemaking. There is no compulsion.

Business & Corporate Compliance > ... > Transportation Law > Commercial Vehicles > Rates & Tariffs

HN10 [blue icon] Regulated Industries, Transportation

Tennessee Public Service Commission Rule 1220-2-1.40 adopts section 5a of the Interstate Commerce Act, 49 U.S.C.S. § 10706(b), which permits carriers to file joint rates and exempts those who do file such rates from the antitrust laws. In addition, Tenn. Code Ann. § 65-1506 permits the Public Service Commission to establish joint ratemaking procedures. Again, there is no state compulsion.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Antitrust & Trade Law > Exemptions & Immunities > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN13[] Exemptions & Immunities, Parker State Action Doctrine

Decisions establish two standards for antitrust immunity. First, the challenged restraint must be one clearly articulated and affirmatively expressed as state policy; second, the policy must be actively supervised by the state itself.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN14[] Exemptions & Immunities, Parker State Action Doctrine

Anticompetitive restraints engaged in by state municipalities or subdivisions must be clearly articulated and affirmatively expressed as state policy in order to gain an antitrust exemption.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN15[] Exemptions & Immunities, Parker State Action Doctrine

Both supervision and compulsion are necessary for a finding of state action. A state cannot deprive competitors of their ability to subvert competition merely by compelling them to formulate collective rates. Conversely, active supervision of anticompetitive conduct undertaken at the voluntary election of a private party also is not by itself adequate. For example, a state may by regulation supervise the reasonableness of rates, but the reasonableness of any particular rate may have little to do with whether it was arrived at anti-competitively. A state regulatory system does not even necessarily have the regulatory power to supervise anticompetitive behavior if the resulting rate falls somewhere within the zone of reasonableness. Compulsion serves an entirely different purpose from supervision: the compulsion inquiry is to determine whether the specific anticompetitive activity at issue was actually that of the state acting as sovereign.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN16[] Exemptions & Immunities, Parker State Action Doctrine

It is not enough that anticompetitive conduct is prompted by state action; rather, anticompetitive activities must be compelled by direction of the state acting as a sovereign. Private action must be compelled by the state in order for the private party to invoke state action immunity.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

[**HN17**](#) [blue document icon] Parker State Action Doctrine, Local Governments & Private Parties

The mere fact that anticompetitive conduct by a private party effectuates a clearly articulated state regulatory policy is not in itself sufficient to justify a state action defense against injunctive relief. The defense is only available if the state has elected to effectuate its policy by requiring the private conduct under attack. To summarize, a state action defense against injunctive relief should be available for private conduct only if the state has specifically required the conduct in question without abdicating final decisionmaking authority to private parties.

Antitrust & Trade Law > Sherman Act > Defenses

Antitrust & Trade Law > Clayton Act > Defenses

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

[**HN18**](#) [blue document icon] Sherman Act, Defenses

The rationale of the state action doctrine is federalism, not the maximization of competition. It is the source of the decision not to compete, not the extent of competition, which determines whether state action exists. Unless it is the state rather than the individual or corporation that decides to act anti-competitively, a state action defense would be inconsistent with the wording and intent of the Sherman Act, [15 U.S.C.S. § 1](#).

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Antitrust & Trade Law > Exemptions & Immunities > General Overview

[**HN19**](#) [blue document icon] Exemptions & Immunities, Parker State Action Doctrine

Congress has instructed courts not to treat lightly overt collusion by private parties in setting prices. Permitting states to confer antitrust immunity on private parties who voluntarily elect state regulation would open the way for the creation of large loopholes in federal **antitrust law**, loopholes whose contours would be difficult to contain. If a state wishes to displace federal antitrust laws, it should be permitted to do so only if it speaks in the clearest and strongest possible terms, by compelling private parties to submit to its own regulatory system.

Opinion by: JOHNSON

Opinion

[*534] FRANK M. JOHNSON, Jr., Circuit Judge:

In November 1976 the United States instituted this action under Section 4 of the Sherman Act, 15 U.S.C.A. § 4, to enjoin the continuing violation of Section 1 of the Sherman Act, 15 U.S.C.A. § 1, by three rate bureaus. These defendants, Southern Motor Carriers Rate Conference, Inc. (SMCRC), North Carolina Motor Carriers Association, Inc. (NCMCA), and Motor Carriers Traffic Association, Inc. (MCTA), represent common carriers before the regulatory commissions of the states of Alabama, Georgia, Mississippi, North Carolina, and Tennessee. The rate bureaus perform three basic functions: (1) they provide a forum for competing member carriers to discuss and agree on rates for intrastate transportation of general commodities to be proposed to state public service commissions for approval; (2) they publish tariffs and supplements containing **[**3]** the rates on which the carriers agree; and (3) they provide counsel, staff experts, and facilities for the preparation of cost studies and other exhibits and testimony for use in support of proposed rates at hearings held by the regulatory commissions.¹ The government challenged the first of these functions as price fixing in violation of Section 1 of the Sherman Act.

The district court granted the government's motion for summary judgment and held that defendants were in violation of Section 1. The court rejected arguments² that defendants' activities were immune under the state action doctrine or under the *Noerr-Pennington* doctrine. **[**4]** Defendants SMCRC and NCMCA and intervenor NARUC appealed, and a panel of the former Fifth Circuit affirmed. United States v. Southern Motor Carriers Rate Conference, Inc., 672 F.2d 469 (5th Cir. Unit B 1982). The Court en banc voted to rehear the case to consider two issues: first, whether a private party may avail itself of the state action exception to federal antitrust laws only if the state compels it to perform the disputed actions; and second, whether, if state compulsion is not necessary, the

¹ For further elaboration of the facts regarding the role of the rate bureaus, their relationship with the state regulatory commissions, and the general pattern of regulatory procedures in the five subject states, see the district court's carefully written opinion. United States v. Southern Motor Carriers Rate Conference, Inc., 467 F. Supp. 471, 476-78 (N.D.Ga.1979).

² In the district court, the state attorneys general of the states of Alabama, Georgia, Mississippi, North Carolina, and Tennessee participated as amici curiae. The National Association of Regulatory Utility Commissioners (NARUC) also was allowed to participate as an intervenor.

state policies here at issue were sufficiently clearly articulated and affirmatively expressed for the state action exception to apply. We hold that compulsion is required of private parties and thus do not reach the second issue. Accordingly, we affirm the judgment of the district court.

[**5] [*535] The Supreme Court first clearly articulated the "state action" exception to the antitrust laws in *Parker v. Brown*, 317 U.S. 341, 63 S. Ct. 307, 87 L. Ed. 315 (1943). At issue in *Parker*, a suit against state officials, was the applicability of the Sherman Act to an agricultural proration system established by a California statute authorizing a commission to impose marketing programs for raisins upon the petition of raisin growers. Once the program was approved and instituted by the commission, participation by the growers was mandatory; under the statute, growers who refused to follow a program once instituted were subject to fines and imprisonment. *Id. at 347, 63 S. Ct. at 311-312*.³ Analyzing the intent of Congress in enacting the Sherman Act, the Court concluded that, **HN1** insofar as the Act applied only to "persons," Congress intended application of the Act to the "business combinations" of "individuals and corporations." *Id. at 351, 63 S. Ct. at 313-314*. The Act was not, therefore, intended to "restrain a state or its officers or agents from activities directed by its legislature." *Id. at 350-51, 63 S. Ct. at 313*. Congress made no mention of states, and [**6] "in a dual system of government in which, under the Constitution, the states are sovereign, save only as Congress may constitutionally subtract from their authority, an unexpressed purpose to nullify a state's control over its officers and agents is not lightly to be attributed to Congress." *Id. at 351, 63 S. Ct. at 313*.⁴ Applying this analysis to the California program, the Court reasoned that the Sherman Act was not intended to apply to the state of California in its establishment of a program operating under "state command." "The state in adopting and enforcing the prorate program," the Court concluded, "made no contract or agreement and entered into no conspiracy in restraint of trade or to establish monopoly but, as sovereign, imposed the restraint as an act of government which the Sherman Act did not undertake to prohibit." *Id. at 352, 63 S. Ct. at 314*. The Court's opinion in *Parker* therefore established **HN2** the state action issue as a question of whether the challenged acts could be attributed to the state as sovereign.

HN3 The fact that the Court in *Parker* concluded that Congress did not intend to restrain anticompetitive acts attributable to states of course did not mean that only states could assert a state action defense. Thus, while *Parker*'s holding applied to state party defendants, the Supreme Court in *Goldfarb v. Virginia State Bar*, 421 U.S. 773, 95 S. Ct. 2004, 44 L. Ed. 2d 572 (1975), suggested that a defense of state action may also be available to private parties under certain limited circumstances. *Goldfarb* was a class action against the Virginia State Bar and a Virginia county bar association in which the Court considered the validity under the Sherman Act of a minimum fee schedule for lawyers published by the county bar association. After determining that the county bar association was not a state agency, [**8]⁵ the Court addressed the "threshold inquiry" of whether the bar association's "activity is required by the State acting as sovereign." *Id. at 790, 95 S. Ct. at 2015*. The county bar association had [*536] argued that its action was "prompted" by the state, but a unanimous Court held that this was not enough for a state action defense. Rather, the action must be "compelled by direction of the State acting as a sovereign." *Id. at 791, 95 S. Ct. at 2015*. Deciding that the state of Virginia did not require the publication of minimum fee schedules, the Court stated that it "need not inquire further into the state-action question," *id. at 790, 95 S. Ct. at 2015*, and held that the challenged action was not state action for Sherman Act purposes.

³ Appellants seek to characterize *Parker* as a case in which individual growers were not compelled to act anticompetitively, citing a provision of the program which permitted growers to set aside up to 30% of their crops for sale on the free market. The 30% set-aside provision, however, did not affect the ability of a grower to elect not to participate as to the remaining 70% of his crops. In this sense, the state mandated the participation of every grower and compelled the challenged anticompetitive behavior.

⁴ [**7] Significantly, this reference to federalism concerns was directed not to any limitation on Congress' power to act; instead, it was stated merely as a rule of statutory interpretation -- that is, whether and to what extent Congress had chosen to override existing state regulation.

⁵ The State Bar was, for "some limited purposes," a state agency. *421 U.S. at 791, 95 S. Ct. at 2015*. But because the fee schedule itself was published by the county bar association, we agree with those who characterize *Goldfarb* as an action against a private party. Cf. *Bates v. State Bar of Arizona*, 433 U.S. 350, 97 S. Ct. 2691, 53 L. Ed. 2d 810 (1977) (antitrust claims raised only against state bar, which was a state defendant).

[**9] After *Goldfarb*, the question remained as to what would be required in addition to the threshold compulsion requirement for a finding of state action for private parties. This question was partially answered the next term in *Cantor v. Detroit Edison Co.*, 428 U.S. 579, 96 S. Ct. 3110, 49 L. Ed. 2d 1141 (1976). At issue in *Cantor* was a program in which Detroit Edison -- a private defendant -- provided light bulbs to its electricity customers without a separate charge. Detroit Edison could not discontinue its program, the Court stated, without the approval of a Michigan state commission, and in this sense the threshold compulsion requirement was at least formally satisfied. See *id. at 592, 96 S. Ct. at 3118* ("In this case we are asked to hold that private conduct *required by state law* is exempt from the Sherman Act." (emphasis added)); *id. at 594, 96 S. Ct. at 3119*.⁶ As *Goldfarb* had hinted, however, compulsion alone was not enough, particularly in *Cantor*, where "there can be no doubt that the option to have, or not to have, such a program is primarily [Detroit Edison's], not the [State's]," *id. at 594, 96 S. Ct. at 3119*, and where the state [**10] was neutral as to the desirability of providing the light bulbs. Noting that it would not find an exception to federal **antitrust law** unless one was required for the state regulatory program to function, a majority of the Court concluded that Michigan's policy interest in regulating electricity would not be affected by the inapplicability of the state action doctrine.⁷ Thus, although Detroit Edison's action was formally commanded by the state, the Court declined to grant the company state action immunity where no significant state interest would be undermined by enforcement of federal **antitrust law**. This discussion as to the factors necessary for private party invocation of the state action doctrine is, however, for the most part not at issue in the present case. It is enough for our purposes that the Court premised its discussion on the fact that Detroit Edison's action was "required" by the state. *Id. at 592, 96 S. Ct. at 3118*. In fact, although there were four separate opinions in *Cantor*, none of the Justices questioned the continued validity of *Goldfarb*'s requirement -- which had been imposed by a unanimous Court -- that a private party must first meet the compulsion [**11] requirement as a threshold matter.⁸

[*537] In our view, the analytical basis for *Goldfarb*'s compulsion requirement for private parties traces its roots directly to the analysis in *Parker*. The lesson of *Parker* is that **HN5**↑ the legislative history and wording of the Sherman Act point to the conclusion that Congress wished to restrain the anticompetitive actions of "persons," that is, "individuals and corporations." Thus, an anticompetitive action undertaken by a private party necessarily is proscribed by the Sherman Act unless for some reason that action cannot fairly [**13] be attributed to the private party. Under *Goldfarb*, when a state compels the private party to act, it deprives him of his freedom of choice; his action, being mere obedience, cannot be described as individual action and must therefore be attributed to the state. The Court elaborated on this freedom of choice analysis in *Cantor* after reviewing Supreme Court cases involving state action immunity:

In each of these cases the initiation and enforcement of the program under attack involved a mixture of private and public decisionmaking. In each case, notwithstanding the state participation in the decision, the private

⁶ **HN4**↑ In determining whether compulsion is present, we do not believe that private parties may have no role in proposing mandatory state action. In *Parker and New Motor Vehicle Bd. v. Orrin W. Fox Co.*, 439 U.S. 96, 99 S. Ct. 403, 58 L. Ed. 2d 361 (1979), the Supreme Court made it clear that an action still may be compelled by the state even though private parties petitioned the state to consider requiring such action. See also California *Motor Transp. Co. v. Trucking Unlimited*, 404 U.S. 508, 92 S. Ct. 609, 30 L. Ed. 2d 642 (1972); *United Mine Workers v. Pennington*, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965); *Eastern R.R. Presidents Conference v. Noerr Motor Freight, Inc.*, 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961). In *Cantor*, formal compulsion was present despite the fact that Detroit Edison could with little difficulty have petitioned the state commission for discontinuance of the program which the company itself had proposed. Thus, by compulsion we mean something less than that envisioned by some commentators. See e.g., 1 P. Areeda & D. Turner, **Antitrust Law** para. 215 (1978). Still, once a state has adopted some policy, whether or not after a petition by a private party, private parties will be exempt from the antitrust laws only if the state requires some action pursuant to that policy.

⁷ [**12] In a prior part of the opinion (Part II) Justice Stevens, joined only by three other members of the Court, concluded that *Parker* should be limited to suits against state officials.

⁸ The disagreement in the Court centered on what in addition to compulsion was required for state action immunity for private parties. In fact, Justice Stewart, joined by Justices Powell and Rehnquist, argued that Michigan's decision to adopt Detroit Edison's proposal and then compel compliance with it should have been by itself sufficient for state action immunity.

party exercised sufficient freedom of choice to enable the Court to conclude that he should be held responsible for the consequences of his decision.

[428 U.S. at 593, 96 S. Ct. at 3119](#). This reasoning also explains the Court's statement in *Parker* that [HN6](#) a state may "not give immunity to those who violate the Sherman Act by authorizing them to violate it, or by declaring that their action is lawful," [317 U.S. at 351, 63 S. Ct. at 314](#), and its statement in *Cantor* that "state authorization, approval, encouragement, or participation in restrictive [\[***14\]](#) private conduct confers no antitrust immunity," [428 U.S. at 592-93, 96 S. Ct. at 3118-3119](#) (footnotes omitted). So long as the state merely allows, but does not compel, anticompetitive conduct, the decision to adopt such conduct remains that of the individual and is within the scope of the Sherman Act. Regardless of how strongly a state may wish to remove private action from the Act's jurisdiction, it will not succeed unless it structures a program so as to make individual actions the actions of the state itself -- by means of the mechanism of compulsion.⁹

A necessary corollary of the rationale of *Goldfarb* and *Cantor* is that [HN8](#) compulsion should not be required of state defendants. Regardless of their motives [\[***15\]](#) for undertaking anticompetitive behavior, states are nevertheless acting as states.¹⁰ Since *Goldfarb*, the Court has consistently pointed out that the analysis of state action differs substantially depending on whether the defendant is a private party or a public institution. See, e.g., [Bates, 433 U.S. at 361, 97 S. Ct. at 2697-2698](#) (*Cantor* would have been an "entirely different case" had the action been against a public official or public agency rather than against a private party); [Cantor, 428 U.S. at 600-601, 96 S. Ct. at 3122-3123](#) (plurality opinion) (noting that *Parker* might have been different had there been a private defendant); [id. at 585-92, 96 S. Ct. at 3115-3118](#) (distinguishing *Parker* as case against public officials). The same analysis applies to municipalities, at least when they act as agents of the state. Thus, the Supreme Court has not required compulsion for municipalities, but has held that when a state indicates its intention that the municipality may act as an instrumentality of the state -- i.e., when the state "sanctions" anticompetitive behavior of the municipality -- a state action defense may be [\[*538\]](#) available to the municipality. [\[***16\] Community Communications Co. v. City of Boulder, 455 U.S. 40, 51, 102 S. Ct. 835, 840, 70 L. Ed. 2d 810 \(1982\); City of Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 413, 98 S. Ct. 1123, 1136-1137, 55 L. Ed. 2d 364 \(1978\)](#) (plurality opinion).

Under the foregoing analysis of the state action doctrine, we have little difficulty in holding that the activities of appellants are not immune from Sherman Act coverage. Specifically, a defense of state action fails because this litigation was brought against private defendants and none of the states in question compels the ratemaking bureaus to set rates collectively.¹¹ Because the anticompetitive practices [\[***17\]](#) challenged by the government are

⁹ Another rationale for the compulsion requirement is that [HN7](#) if a private party is permitted by the state to make the choice whether or not to compete, there is no necessary conflict between state and federal law because the private party may comply with both federal and state law at the same time.

¹⁰ We acknowledge that *Bates* and *Parker*, which involved state defendants, discussed the presence of compulsion, but we view those cases -- as appellants would have us do -- as instances in which the presence of compulsion provides the best evidence of clear articulation and affirmative expression of state policy to displace competition.

¹¹ The district court found that "regardless of the virtual romance between the states and the ratemaking conferences, no state requires that rates be published collectively." [467 F. Supp. at 483](#) (emphasis in original). An analysis of each state's policies reveals the correctness of the district court's finding. [HN9](#) [North Carolina General Statute § 62-152.1\(b\)](#) states that in order to realize and effectuate the policy of uniform rates among carriers, any party to an agreement with other carriers regarding uniform rates may apply to a state commission for approval of the agreement; [Section 62-152.1\(h\)](#) relieves parties to an agreement so approved from the operation of the antitrust laws. The statute does no more than authorize or permit collective ratemaking. There is no compulsion. [HN10](#) [Tennessee Public Service Commission Rule 1220-2-1.40](#) adopts Section 5a of the Interstate Commerce Act, [49 U.S.C.A. § 10706\(b\)](#), which permits carriers to file joint rates and exempts those who do file such rates from the antitrust laws. In addition, Tenn. Code Ann. § 65-1506 permits the Public Service Commission to establish joint ratemaking procedures. Again, there is no state compulsion. [HN11](#) [Georgia Code Ann. § 68-613](#), which requires a state commission to "establish ratemaking procedures for all motor common carriers, which procedure shall include, but not be limited to, collective ratemaking procedures," explicitly indicates that Georgia intends to give carriers the option of filing rates

undertaken at the individual election of the carriers and the rate bureaus, appellants fail to pass the threshold test established in *Goldfarb*. Thus, appellants' action cannot be said to constitute state action.

[**18] Appellants, however, urge that state action analysis has been changed in their favor by the recent Supreme Court decision in *California Retail Liquor Dealers Association v. Midcal Aluminum, Inc.*, 445 U.S. 97, 100 S. Ct. 937, 63 L. Ed. 2d 233 (1980). *Midcal* involved a challenge under the Sherman Act to a California statute that required wine producers and wholesalers to file fair trade contracts or price schedules with the state. Under the statute, wholesalers could not resell wine to retailers at prices below those on the contracts or schedules. In order to evaluate whether the state defendant California Department of Alcoholic Beverage Control was state action immune, the Court briefly reviewed several of the state action cases discussed above and then stated that "these [HN13](#)¹² decisions establish two standards for antitrust immunity under *Parker*. First, the challenged restraint must be 'one clearly articulated and affirmatively expressed as state policy'; second, the policy must be 'actively supervised' by the state itself. *City of Lafayette v. Louisiana Power & Light Co.*, 435 U.S. 389, 410 [98 S. Ct. 1123, 1135, 55 L. Ed. 2d 364] (1978) (opinion of Brennan, J.)." [**19] 445 U.S. at 105, [*5391](#) 100 S. Ct. at 943. California's regulatory system, the Court ruled, met the first standard but not the second; it therefore refused to hold that the state defendant's activity was outside the coverage of the Sherman Act. Applying *Midcal* to the facts in the present case, the government and appellants agree that each state actively supervises the collective ratemaking process,¹² so the second *Midcal* standard is satisfied. As to the first *Midcal* standard, the parties disagree concerning the importance of the fact that none of the five states compels the challenged anticompetitive activity. Appellants assert that, despite the lack of compulsion, their actions meet the first standard. This is because the Supreme Court allegedly abandoned the practice established in *Goldfarb* of requiring compulsion of private parties, as evidenced by the fact that the first standard did not specifically refer to compulsion. We disagree with appellants' argument for several reasons.

[**20] Initially, we question the very premise upon which appellants' argument is based -- that the specific choice of wording in *Midcal* implies a rejection of a compulsion requirement for private parties. In the context of private parties, the first *Midcal* standard makes sense only if it includes a compulsion requirement. This is because we do not see how a private party can carry out a clearly articulated and affirmatively expressed state policy when it is left to the private party to carry out that policy or not as he sees fit. Our interpretation of the disputed passage in *Midcal* is that it should be read as a broad, general restatement of the Court's earlier holdings; the absence of any mention of compulsion in one specific application of the standard -- that is, to private parties -- therefore does not strike us as unusual. One additional factor points to the conclusion that the Court's choice of wording in *Midcal* does not imply a rejection of its prior holdings. The Court introduced the two standards with the statement that the prior decisions "establish" the standards, 445 U.S. at 105, 100 S. Ct. at 943, thus indicating that it did not view them as anything new. [**21] Furthermore, the Court used similar or identical language in earlier cases. See *New Motor Vehicle Bd.*, 439 U.S. at 109, 99 S. Ct. at 411-412; *City of Lafayette*, 435 U.S. at 410, 98 S. Ct. at 1135 (plurality opinion); *Bates*, 433 U.S. at 362, 97 S. Ct. at 2698. If these cases did not alter the standard for state action immunity for private parties, we see no reason to believe that *Midcal* did.

jointly or individually. The State of Georgia, participating as amicus in the district court, presented a 1942 order issued by its public service commission stating that "all for hire motor common carriers operating under Class A certificates be, and they are hereby, directed and required to publish and file with this Commission . . . a *tariff* containing all local and joint class and/or commodity rates applicable between points within Georgia." Pointing to the italicized language, the state argued that the commission "clearly directed all Class 'A' carriers to file a single joint tariff with the Commission," thus indicating its policy in favor of collective action. *Id.* We are not persuaded that the language of the 1942 order is susceptible of only this interpretation. At best it is ambiguous. Given the statute, only recently amended to insert the provisions outlined above, it would not, in any event, be controlling. A 1942 order of the Alabama Public Service Commission requires carriers to "prepare, publish and file with the Commission an individual tariff or . . . participate in an agency issue." As with Georgia, Alabama explicitly permits individual rate applications. Finally, [HN12](#)¹² Mississippi in *Miss.Code Ann. §§ 77-7-1* to -341 merely contemplates cooperation among carriers to the limited extent of establishing "joint rates." This falls short of compelling joint applications for proposed rates.

¹² The government points out that the district court conducted no fact-finding as to this issue. The record, however, reveals that the state commissions conduct hearings to review the reasonableness of proposed carrier tariffs and routinely suspend their effectiveness.

Our interpretation of *Midcal* is supported by the consideration that the case had nothing to do with the applicability of a state action defense to a private party. *Midcal* involved an action by a wholesale distributor of wine for a writ of mandate for an injunction against the California Department of Alcoholic Beverage Control -- a state agency.¹³ Because, as we said earlier, *Parker* immunity for state defendants does not require compulsion, it makes sense that the Court did not require compulsion of the state Department.¹⁴ Moreover, because the Court's holding against state action immunity in *Midcal* was grounded on the fact that the second standard, requiring active state supervision, was lacking, it is not surprising that the Court did not articulate a standard [**22] designed to encompass every conceivable state action case. The Court's citation to *City of Lafayette* -- a non-private party case -- immediately after listing the two standards further evidences that the Court's focus was only on cases involving public defendants. The Supreme Court recently agreed with our reading of this passage, referring to *Midcal* as having adopted the principle "that [HN14](#)[] anticompetitive restraints engaged in by state municipalities or subdivisions must be 'clearly articulated' [[*540](#)] and affirmatively expressed as state policy' in order to gain an antitrust exemption. *Midcal*, 435 U.S. at 105 [100 S. Ct. at 943]."[Community Communications Co., 455 U.S. at 51 n. 14, 102 S. Ct. at 841 n. 14](#) (emphasis added). The fact remains that the only two state action cases in the Supreme Court to date involving private defendants have applied the threshold compulsion requirement.¹⁵

[**24] Appellants suggest that their view of the state action doctrine does not really constitute a significant change from prior law, arguing that *Goldfarb* would have come out the same way under their reading of *Midcal* because in *Goldfarb* the minimum fee schedule lacked even state authorization. Such speculation, however, ignores the fact that the Supreme Court in *Goldfarb* could not possibly have been more clear in imposing a compulsion requirement on private parties. The very basis of the Court's holding was that compulsion was lacking; having made that determination, the Court reached no other issues, including whether the state had authorized the bar association's action. More importantly, reading a compulsion requirement out of the private party state action doctrine would require a complete reformulation of the theoretical foundations for state action first established in *Parker*. Under the view of federalism espoused in *Parker* and followed in *Goldfarb* and *Cantor*, the Court's inquiry focuses on the wording and intent of the Sherman Act in determining whether private action is mere obedience to a state command and therefore effectively the action of [**25] the state itself. Under appellants' view of federalism, on the other hand, Congress' explicit legislative determination to reach the conduct of "individuals and corporations" may be overridden by a state's decision to implement a voluntary supervision scheme that permits but does not compel anticompetitive behavior.¹⁶ Even if [[*541](#)] such a view of federal-state relations could be supported, its adoption

¹³ In the Supreme Court, petitioner California Retail Liquor Dealers Association had appealed the case as an intervenor.

¹⁴ In any event, compulsion was in fact present in *Midcal*. See [445 U.S. at 100, 100 S. Ct. at 940](#).

¹⁵ [**23] Appellants cite several lower court cases in support of their position, but only two of them actually found that private parties were immune without compulsion by the state. The first, [Caribe Trailer Systems, Inc. v. Puerto Rico Maritime Shipping Authority, 475 F. Supp. 711 \(D.D.C. 1979\)](#), aff'd per curiam, No. 79-1658 (D.C.Cir. 1980), cert. denied, 450 U.S. 914, 101 S. Ct. 1355, 67 L. Ed. 2d 339 (1981), a district court opinion, is of only limited relevance because in that case the court reviewed a governmental restraint involving a private party (and a state defendant) rather than, as here, a private restraint approved by the government. In the second case, [Turf Paradise, Inc. v. Arizona Downs, 670 F.2d 813 \(9th Cir. 1982\)](#), cert. denied, 456 U.S. 1011, 102 S. Ct. 2308, 73 L. Ed. 2d 1308 (1982), in which the Ninth Circuit reviewed an antitrust challenge to a private agreement allocating horse racing dates between two race track operators, the state had by statute specifically reserved the right to perform the allocation in the event that the private parties could not agree. [Id. at 816](#). Thus, although the state did not compel the private parties to enter into the racing date agreement, it had effectively ensured that the anticompetitive conduct would occur one way or another.

¹⁶ Appellants reason that the Court eliminated the compulsion requirement because the basis for state compulsion is the concern that the economic self interest of private parties might affect the rate setting process and, according to appellants, the second standard in *Midcal* -- the requirement of state supervision -- assuages that concern. They assert that a supervision requirement adequately ensures that the state has determined that the challenged activity is in furtherance of the state's policy and that the state does not abdicate its responsibility to private parties. We disagree with this analysis. If the second *Midcal* standard accomplished as much as appellants claimed, there would have been no need for the first standard. Further, if compulsion and supervision served the same purpose, the Supreme Court would have upheld, rather than denied, state action immunity in

would require at least some explanation or discussion. In *Midcal* there was none. Additionally, appellants' view of state action for private parties would raise extremely difficult practical questions of interpretation and application. For example, appellants presumably do not dispute the continued validity of the Court's statement in *Cantor* in 1976 that state authorization, approval, encouragement, or participation in restrictive private conduct does not confer antitrust immunity. See [428 U.S. at 592-93, 96 S. Ct. at 3118-3119](#). Yet appellants' interpretation of *Midcal* would have us find antitrust immunity where a state grants private parties the option of participating in a scheme of state supervision. If there is a significant difference between these two [\[**26\]](#) schemes, it eludes us. Thus, in light of the significant theoretical and practical difficulties that a reformulation in state action doctrine would create, we are not inclined to infer such a reformulation from a Supreme Court opinion which is completely silent on the subject.

[\[**27\]](#) The final reason why we conclude that *Midcal* does not represent a rejection of a compulsion requirement for private parties is found in the language of the opinion itself. The Court chose to cite *Goldfarb* with approval, and even quoted from it to the effect that "[HN16](#)"¹⁷ it is not enough that . . . anticompetitive conduct is 'prompted' by state action; rather, anticompetitive activities *must be compelled* by direction of the State acting as a sovereign." [445 U.S. at 104, 100 S. Ct. at 943](#) (quoting [421 U.S. at 791, 95 S. Ct. at 2015](#)) (emphasis added). Moreover, in a footnote immediately after setting out the two standards for state action immunity applicable to that case, the Court cited a student note in which the only argument contained at the cited page was that private action must be compelled by the state in order for the private party to invoke state action immunity.¹⁷

[\[**28\]](#) In addition to arguing that *Midcal* represents a rejection of a compulsion requirement for private parties, appellants also rely on various policy arguments against affirming the judgment of the district court. Even if we were not bound by the Supreme Court's decisions in *Goldfarb* and *Cantor*, we would find these arguments unpersuasive.

Appellants argue first that competition is undermined by a state action requirement that allows states to eliminate competition completely but not to maintain a policy that gives parties the choice of whether or not to compete. But [HN18](#)¹⁷ the rationale of the state action doctrine is federalism, not the maximization of competition. As we stated earlier, it is the source of the decision not to compete -- not the extent of competition -- which determines whether

Midcal because compulsion was present in that case. See [445 U.S. at 99-100, 100 S. Ct. at 940-941](#). That the Court did not reach this result is evidence that supervision and compulsion serve different purposes. In our view, [HN15](#)¹⁷ both supervision and compulsion are necessary for a finding of state action. A state cannot deprive competitors of their ability to subvert competition merely by compelling them to formulate collective rates. Conversely, active supervision of anticompetitive conduct undertaken at the voluntary election of a private party also is not by itself adequate. For example, a state may by regulation supervise the reasonableness of rates, but the reasonableness of any particular rate may have little to do with whether it was arrived at anticompetitively. A state regulatory system does not even necessarily have the regulatory power to supervise anticompetitive behavior if the resulting rate falls somewhere within the zone of reasonableness. As we stated earlier, compulsion serves an entirely different purpose from supervision: as *Goldfarb* and *Parker* established, the compulsion inquiry is to determine whether the specific anticompetitive activity at issue was actually that of the state acting as sovereign.

17

[HN17](#)¹⁷ The mere fact that anticompetitive conduct by a private party effectuates a clearly articulated state regulatory policy is not in itself sufficient to justify a state action defense against injunctive relief. The defense is only available if the state has elected to effectuate its policy by *requiring* the private conduct under attack.
