[32]** In addition, the complaint contains several vague statements about the potential general consequences of hypothetical monopolization of the Spanish-language radio market: it "ultimately results in supra-competitive prices for advertisements and reduces the number of Spanish stations available." Id. at P 113. A reduction in the number of stations, in turn, "reduces the inventory of available advertisements and hinders the advertisers' ability to target Hispanics of different origins." Id. Finally, this situation "ultimately results in higher prices for the advertisers' products," "will likely deteriorate programming quality," and "affect the viability of artists in the marketplace." Id. at PP 114-16. Unfortunately, SBS offers no specific factual allegations to support the likelihood of any of this happening. Rather, SBS merely assumes, conclusorily, a pernicious monopoly capable of limiting output and raising prices and then proceeds to describe the other evils that might flow from this monopoly. We hold that these conclusory allegations, unsupported by specific factual allegations, do not state a claim for relief under the antitrust laws. Because SBS, even in the proposed **[**33]** Second Amended Complaint, offered only conclusory allegations of harm to competition, we cannot say that the district court abused its discretion in denying the motion for reconsideration and the implicit motion for leave to amend the complaint.

AFFIRMED.

Unitherm Food Sys. v. Swift-Eckrich, Inc.

United States Court of Appeals for the Federal Circuit

July 12, 2004, Decided

03-1472, -1473

Civil Procedure > Appeals > Standards of Review > De Novo Review

Governments > Courts > Judicial Precedent

Antitrust & Trade Law > Sherman Act > General Overview

Patent Law > Infringement Actions > Infringing Acts > General Overview

HN14[] **Regulated Practices, Market Definition**

The United States Court of Appeals for the Federal Circuit applies Federal Circuit law to all antitrust claims premised on the bringing of a patent infringement suit. Whether a patentee's conduct in procuring or enforcing a patent is sufficient to strip its immunity from the antitrust laws is therefore a legal question that the Federal Circuit reviews de novo under Federal Circuit law. The Federal Circuit applies the law of the regional circuit to the elements of antitrust claims that are not unique to patent law. These elements include but are not restricted to considerations of antitrust standing, market definition, antitrust injury, and damages.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Civil Procedure > Appeals > Standards of Review > De Novo Review

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

HN15[] **Regulated Practices, Market Definition**

The United States Court of Appeals for the Tenth Circuit recognizes antitrust standing, like all questions of standing to sue, as a question of law subject to de novo review. Market definition and antitrust injury, on the other hand, are intensely factual determinations. The appellate court must therefore review the evidence supporting the jury's necessary findings of a relevant antitrust market and of antitrust injury.

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

Civil Procedure > Appeals > Standards of Review > General Overview

Civil Procedure > Appeals > Standards of Review > Questions of Fact & Law

Civil Procedure > ... > Standards of Review > Substantial Evidence > General Overview

Civil Procedure > ... > Standards of Review > Substantial Evidence > Sufficiency of Evidence

HN16[] **Jury Trials, Province of Court & Jury**

The United States Court of Appeals for the Tenth Circuit limits the review of a jury verdict challenged on appeal to determining whether the record--viewed in the light most favorable to the prevailing party--contains substantial evidence to support the jury's decision. The jury has the exclusive function of appraising credibility, determining the weight to be given to the testimony, drawing inferences from the facts established, resolving conflicts in evidence, and reaching ultimate conclusions of fact.

Civil Procedure > ... > Standards of Review > Substantial Evidence > General Overview

HN17[] **Standards of Review, Substantial Evidence**

In conducting a review for substantial evidence, the court must disregard all evidence favorable to the moving party that the jury is not required to believe.

A federal appellate court reviews state law causes of action under the applicable state law for matters not committed to the federal court's exclusive jurisdiction.

Civil Procedure > Appeals > Standards of Review > General Overview

HN19[] **Appeals, Standards of Review**

Oklahoma courts must affirm a jury verdict if there is any competent evidence reasonably tending to support it. This standard is unchanged even if the jury awards damages in amounts inconsistent with its finding of liability.

Civil Procedure > ... > Jury Trials > Jury Instructions > General Overview

Patent Law > Infringement Actions > Claim Interpretation > General Overview

HN20[] **Jury Trials, Jury Instructions**

In the context of jury instructions, the United States Court of Appeals for the Federal Circuit has doubted that Markman requires the trial judge to instruct as to an undisputed "claim construction" for every term, by simply parroting the words of the claim. The Federal Circuit doubts even more strongly that a district court is obliged to construe undisputed claim terms prior to issuing a summary judgment of invalidity.

Evidence > Inferences & Presumptions > Presumptions > Rebuttal of Presumptions

Governments > Courts > Judicial Precedent

Patent Law > Jurisdiction & Review > Subject Matter Jurisdiction > Appeals

Patent Law > Infringement Actions > Claim Interpretation > General Overview

HN21[] **Presumptions, Rebuttal of Presumptions**

It has been long recognized in United States Court of Appeals for the Federal Circuit precedent and in the precedent of that court's predecessor court, the United States Court of Customs and Patent Appeals, that dictionaries, encyclopedias and treatises are particularly useful resources to assist the court in determining the ordinary and customary meanings of claim terms. But the intrinsic record also must be examined in every case to determine whether the presumption of ordinary and customary meaning is rebutted. This presumption will be overcome where the patentee, acting as his or her own lexicographer, has clearly set forth an explicit definition of the term different from its ordinary meaning. Further, the presumption also will be rebutted if the inventor has disavowed or disclaimed scope of coverage, by using words or expressions of manifest exclusion or restriction, representing a clear disavowal of claim scope.

Patent Law > ... > Specifications > Definiteness > General Overview

Patent Law > Infringement Actions > Claim Interpretation > General Overview

HN22[] **Specifications, Definiteness**

Judges may rely on dictionary definitions when construing claim terms, so long as the dictionary definition does not contradict any definition found in or ascertained by a reading of the patent documents.

Patent Law > Infringement Actions > Claim Interpretation > General Overview

HN23[] **Infringement Actions, Claim Interpretation**

Where the district court's adoption of a plain meaning patent construction is presumptively correct, to overcome that presumption, the party opposing the construction must demonstrate that the intrinsic evidence provides both a clear and explicit disclaimer of the plain meaning and substitutes a more specific, technical construction of the term being construed.

Patent Law > Infringement Actions > Claim Interpretation > General Overview

HN24[] **Infringement Actions, Claim Interpretation**

Where the plain language of a patent claim is clear and uncontradicted by anything in the written description or the figures, the district court should not rely upon the written description, the figures, or the prosecution history to add limitations to the claim. Under such circumstances, relying on the written description and prosecution history to reject the ordinary and customary meanings of the words themselves is impermissible. While claims are to be interpreted in light of the specification and with a view to ascertaining the invention, it does not follow that limitations from the specification may be read into the claims. There is sometimes a fine line between reading a claim in light of the specification, and reading a limitation into the claim from the specification.

Patent Law > Infringement Actions > Claim Interpretation > General Overview

HN25[] **Infringement Actions, Claim Interpretation**

A patentee cannot rebut the presumption of ordinary meaning simply by pointing to the preferred embodiment or other structures or steps disclosed in the specification or prosecution history.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Patent Law > ... > Defenses > Inequitable Conduct > General Overview

HN26[] **Attempts to Monopolize, Sherman Act**

To establish monopolization or attempt to monopolize a part of trade or commerce under *§ 2* (*15 U.S.C.S. § 2*) of the Sherman Act, it would then be necessary to appraise the exclusionary power of the illegal patent claim in terms of the relevant market for the product involved. Without a definition of that market there is no way to measure the defendant's ability to lessen or destroy competition. It may be that the patented process does not comprise a relevant market. There may be effective substitutes which do not infringe the patent. This is a matter of proof, as is the amount of damages.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Patent Law > ... > Defenses > Inequitable Conduct > General Overview

HN27[] **Monopolies & Monopolization, Attempts to Monopolize**

In order to prevail on a Walker Process claim, a competitor must establish: that the patentee attempted to enforce a patent; that the patent issued because the patentee defrauded the Patent and Trademark Office; that patentee's attempted enforcement threatened to lessen competition in a relevant antitrust market; that the competitor suffered antitrust damages; and that all other elements of attempted monopolization are met.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > General Overview

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > General Overview

HN28[] **Inequitable Conduct, Anticompetitive Conduct**

United States Court of Appeals for the Federal Circuit law governs all antitrust claims premised on the abuse of a patent right. In all antitrust cases, the Federal Circuit applies the same basic choice of law rule that it applies to all other matters--and for precisely the same reason. Because the Federal Circuit is in the best position to impose uniformity on the patent laws, it now decide issues raised in an antitrust claim that are unique to the patent law under Federal Circuit law, and all other issues under the law of the relevant regional circuit.

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > General Overview

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Patent Law > Jurisdiction & Review > Subject Matter Jurisdiction > Appeals

HN29[] **Antitrust & Trade Law, Sherman Act**

The regional circuits retain appellate jurisdiction over cases in which the complaint does not allege a claim arising under federal patent law, but the answer does contain a patent-law counterclaim. As a result, antitrust claims met with counterclaims of infringement may not come before the United States Court of Appeals for the Federal Circuit. If the resolution of the dispute rests, in part, upon a determination of whether or not a patentee's behavior stripped it of its antitrust exemption, the appellate court hearing the matter will have to decide whether to apply Federal Circuit law or risk disturbing Congress's goal of ensuring patent-law uniformity, by applying its own law. Federal Circuit law determines whether or not the patentee enjoys antitrust immunity under the patent laws, while regional circuit law determines the other elements of the antitrust claim.

Antitrust & Trade Law > Sherman Act > General Overview

Patent Law > Invention Date & Priority > General Overview

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Patent Law > ... > Defenses > Inequitable Conduct > General Overview

HN30[] **Antitrust & Trade Law, Sherman Act**

The fundamental question of United States Court of Appeals for the Federal Circuit ***antitrust law*** is whether or when a patentee's behavior in either procuring or enforcing a patent can give rise to antitrust liability. As a general rule, behavior conforming to the patent laws oriented towards procuring or enforcing a patent enjoys immunity from the antitrust laws. But this immunity is hardly absolute. Nearly forty years ago, the Supreme Court recognized that an inventor who obtains a patent by defrauding the patent office deserves no immunity. This recognition falls well within a long-established understanding of the limits of patent protection, as reflected in the Supreme Court's much earlier announcement that patentees who attempt to leverage their appropriately obtained patents beyond the claimed product lose the right to enforce their patents. The United States Supreme Court subsequently refined this notion of patent misuse and its consequent penalties, so that it is now, of course, familiar law that the courts will not aid a patent owner who has misused his patents to recover any of their emoluments accruing during the period of misuse or thereafter until the effects of such misuse have been dissipated, or purged as the conventional saying goes.

Antitrust & Trade Law > Sherman Act > General Overview

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN31[] **Antitrust & Trade Law, Sherman Act**

The patent laws which give a monopoly on making, using, or selling the invention are in pari materia with the antitrust laws and modify them pro tanto.

Antitrust & Trade Law > Sherman Act > General Overview

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN32[] **Antitrust & Trade Law, Sherman Act**

The United States Supreme Court has held many times that power gained through some natural and legal advantage such as a patent, copyright, or business acumen can give rise to liability if a seller exploits his dominant position in one market to expand his empire into the next.

Antitrust & Trade Law > Sherman Act > Remedies > General Overview

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Patent Law > ... > Defenses > Inequitable Conduct > General Overview

Patent Law > Remedies > General Overview

HN34[] **Remedies, Damages**

The gist of a Walker Process claim is that since the patentee obtained its patent by fraud it cannot enjoy the limited exception to the prohibitions of *§ 2* (*15 U.S.C.S. § 2*) of the Sherman Act, but must answer under that section and § 4 (*15 U.S.C.S. § 15(a)*) of the Clayton Act in treble damages to those injured by any monopolistic action taken under the fraudulent patent claim. Nor can the interest in protecting patentees from "innumerable vexatious suits" be used to frustrate the assertion of rights conferred by the antitrust laws. It must be remembered that in such a case, the court deals only with a special class of patents, i.e., those procured by intentional fraud. Walker Process claims therefore relate to a single type of behavior capable of stripping a patentee's patent-law immunity and thereby exposing the patentee to liability under other laws. Though one cannot enumerate the full range of activities capable of effecting such a loss of immunity, the determination of which actions can cause a patentee or a patent applicant to lose the general protection of the patent law and to risk liability for damages is clearly an issue unique to the patent law--and therefore inappropriate for resolution under the potentially varying interpretations of the regional circuits.

Antitrust & Trade Law > ... > Intellectual Property > Bad Faith, Fraud & Nonuse > Fraud

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN35[] **Bad Faith, Fraud & Nonuse, Fraud**

Federal Circuit ***antitrust law*** centers on a single critical question: What behavior by the patentee in procuring or in enforcing a patent can strip the patentee of antitrust immunity? When the courts consider a patentee's behavior under Federal Circuit law and determine that it involved nothing more than an appropriate attempt to procure a patent and an appropriate attempt to enforce a legitimately obtained patent, the antitrust inquiry is over with respect to the behavior at issue. When, on the other hand, the courts consider a patentee's behavior under Federal Circuit law and determine that it involved either an inappropriate attempt to procure a patent or an inappropriate attempt to enforce a patent, the remainder of the antitrust inquiry must proceed under the law of the regional circuit.

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Antitrust & Trade Law > Exemptions & Immunities > Labor > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN36[] **Scope, Exemptions**

The patent law's pro tanto modification of the ***antitrust law*** extends to behavior, not to either patents or patentees. It is entirely possible for a patentee to retain its antitrust exemption with respect to some behavior while being stripped of the exemption with respect to other behavior. Beyond the limited monopoly which is granted, the arrangements by which the patent is utilized are subject to the general law. The possession of a valid patent or patents does not give the patentee any exemption from the provisions of the Sherman Act beyond the limits of the patent monopoly. The Sherman Act imposes strict limitations on the concerted activities in which patent owners may lawfully engage.

Antitrust & Trade Law > ... > Intellectual Property > Bad Faith, Fraud & Nonuse > General Overview

Civil Procedure > ... > Pleadings > Counterclaims > General Overview

Patent Law > Remedies > Declaratory Judgments

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN37[] **Intellectual Property, Bad Faith, Fraud & Nonuse**

An antitrust claim premised on stripping a patentee of its immunity from the antitrust laws is typically raised as a counterclaim by a defendant in a patent infringement suit. The logic governing Walker Process claims, however, suggests that a court should treat claims brought ancillary to Declaratory Judgment Actions precisely as it treats counterclaims.

Civil Procedure > Judgments > Enforcement & Execution > General Overview

Patent Law > US Patent & Trademark Office Proceedings > Examinations > General Overview

Antitrust & Trade Law > ... > Intellectual Property > Bad Faith, Fraud & Nonuse > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > Judgments > Declaratory Judgments > General Overview

Civil Procedure > ... > Declaratory Judgments > Federal Declaratory Judgments > General Overview

Civil Procedure > Judgments > Entry of Judgments > General Overview

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Patent Law > Jurisdiction & Review > Subject Matter Jurisdiction > Declaratory Judgments

Patent Law > Remedies > Declaratory Judgments

HN38[] **Judgments, Enforcement & Execution**

Strictly speaking, a Walker Process claim is premised upon the enforcement of a patent procured by fraud on the Patent Office. A plaintiff may bring a Declaratory Judgment Action of patent invalidity, however, even in the absence of overt enforcement actions. When the defendant's conduct, including its statements, falls short of an express charge, one must consider the "totality of the circumstances" in determining whether that conduct meets the first prong of the test for jurisdiction to hear a Declaratory Judgment Action. If the circumstances warrant, a reasonable apprehension may be found in the absence of any communication from defendant to plaintiff. If, on the other hand, defendant has done nothing but obtain a patent, there can be no basis for the required apprehension, a rule that protects quiescent patent owners against unwarranted litigation. Therefore, as a matter of United States Court of Appeals for the Federal Circuit ***antitrust law***, the standards that the Federal Circuit has developed for determining jurisdiction in a Declaratory Judgment Action of patent invalidity also define the minimum level of "enforcement" necessary to expose the patentee to a Walker Process claim for attempted monopolization.

Civil Procedure > Judgments > Declaratory Judgments > General Overview

Patent Law > Jurisdiction & Review > Subject Matter Jurisdiction > Declaratory Judgments

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > ... > Declaratory Judgments > Federal Declaratory Judgments > General Overview

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Patent Law > Remedies > Declaratory Judgments

HN39[] **Judgments, Declaratory Judgments**

On dismissal of both a Declaratory Judgment Action for invalidity and a Walker Process claim, it is enough to simply point out that the same facts that compel the conclusion that the plaintiff failed to establish declaratory judgment jurisdiction for the district court also compel the conclusion that no reasonable fact finder could find that the defendant has acted to enforce its patent. In other words, if the patentee has done nothing but obtain a patent in a manner that the plaintiff believes is fraudulent, the courts lack jurisdiction to entertain either a Declaratory Judgment Action or a Walker Process claim.

Patent Law > ... > Defenses > Inequitable Conduct > General Overview

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Torts > Business Torts > Fraud & Misrepresentation > General Overview

HN40[] **False Statements, Elements**

Walker Process fraud is a variant of common law fraud, and the elements of common law fraud include: (1) a representation of a material fact, (2) the falsity of that representation, (3) the intent to deceive or, at least, a state of mind so reckless as to the consequences that it is held to be the equivalent of intent (scienter), (4) a justifiable reliance upon the misrepresentation by the party deceived which induces him to act thereon, and (5) injury to the party deceived as a result of his reliance on the misrepresentation. The court's determination of whether or not to strip a patentee of its antitrust immunity therefore requires the court to apply the facts of the case to each of these elements.

Business & Corporate Law > ... > Duties & Liabilities > Negligent Acts of Agents > Liability of Principals

HN43[] **Authority to Act, Apparent Authority**

A principal is subject to liability for loss caused to another by the other's reliance upon a tortious representation of a servant or other agent, if the representation is: (a) authorized; (b) apparently authorized; or (c) within the power of the agent to make for the principal. The principal's liabilities do not depend upon the theory of respondeat superior but upon the reason underlying liability upon authorized or apparently authorized contracts.

Patent Law > ... > Defenses > Inequitable Conduct > Burdens of Proof

Evidence > Inferences & Presumptions > Inferences

Evidence > Burdens of Proof > Clear & Convincing Proof

Patent Law > ... > Defenses > Inequitable Conduct > General Overview

HN44[] **Admissibility, Circumstantial & Direct Evidence**

Where clear and convincing circumstantial evidence establishes that, at the very least, a patentee's behavior exhibited a state of mind so reckless as to the consequences that it is held to be the equivalent of intent, such circumstantial evidence is sufficient to establish the intent element of common-law fraud. Intent need not be proven by direct evidence; it is most often proven by a showing of acts, the natural consequences of which are presumably intended by the actor. Generally, intent must be inferred from the facts and circumstances surrounding the applicant's conduct. The drawing of inferences, particularly in respect of an intent-implicating question is peculiarly within the province of the fact finder that observed the witnesses. However, given the ease with which a relatively routine act of patent prosecution can be portrayed as intended to mislead or deceive, clear and convincing evidence of conduct sufficient to support an inference of culpable intent is required. While intent to deceive the Patent and Trademark Office (PTO) may be found as a matter of inference from circumstantial evidence, circumstantial evidence cannot indicate merely gross negligence. Clear and convincing evidence must prove that an applicant had the specific intent to accomplish an act that the applicant ought not to have performed, viz., misleading or deceiving the PTO.

Patent Law > ... > Inequitable Conduct > Effect, Materiality & Scienter > General Overview

Patent Law > Infringement Actions > Infringing Acts > General Overview

HN46[] **Bad Faith, Fraud & Nonuse, Fraud**

A patent by its very nature is affected with a public interest. The far reaching social and economic consequences of a patent, therefore, give the public a paramount interest in seeing that patent monopolies spring from backgrounds free from fraud or other inequitable conduct and that such monopolies are kept within their legitimate scope. Where fraud is committed, injury to the public through a weakening of the patent system is manifest.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN47[] **Inequitable Conduct, Anticompetitive Conduct**

Once the court has determined that a patentee deserves no antitrust immunity, the inquiry shifts to apply the substantive antitrust laws of the regional circuit.

Antitrust & Trade Law > Sherman Act > General Overview

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Torts > Business Torts > General Overview

HN48[] **Antitrust & Trade Law, Sherman Act**

An antitrust plaintiff must allege more than simply that the defendant's wrongful behavior directly damaged the plaintiff's business, but also that the accused behavior stifled competition. The line between antitrust claims and ordinary business tort and contract claims is not always clear. Some behavior can give rise to both sets of claims; the classic example is a near monopolist who burns down the plant of his only competitor. For the plaintiff to possess antitrust standing under United States Court of Appeals for the Tenth Circuit law, it must demonstrate that the patentee's behavior caused it to suffer an "antitrust injury."

Antitrust & Trade Law > Sherman Act > General Overview

HN49[] **Antitrust & Trade Law, Sherman Act**

An antitrust injury is defined as an injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. Factors to consider in evaluating antitrust standing include: (1) the causal connection between the alleged antitrust violation and the harm; (2) improper motive or intent of defendants; (3) whether the claimed injury is one sought to be redressed by antitrust damages; (4) the directness between the injury and the market restraint resulting from the alleged violation; (5) the speculative nature of the damages claimed; and (6) the risk of duplicative recoveries or complex damage apportionment.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN50[] **Market Definition, Relevant Market**

It is well settled that defining the relevant market is an issue of fact for the jury to determine.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

HN51[] **Sherman Act, Claims**

Under United States Court of Appeals for the Tenth Circuit law, claims of attempted monopolization under *§ 2* (*15 U.S.C.S. § 2*) of the Sherman Act require four elements of proof: (1) a relevant geographic and product market; (2) specific intent to monopolize the market; (3) anticompetitive conduct in furtherance of the attempt; and (4) a dangerous probability that the firm will succeed in the attempt.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN52[] **Market Definition, Relevant Market**

In the Tenth Circuit, a relevant product market is composed of products that have reasonable interchangeability for the purposes for which they are produced. Because the ability of consumers to turn to other suppliers restrains a firm from raising prices above the competitive level, the definition of the relevant market rests on a determination of available substitutes. To define a market in product and geographic terms is to say that if prices were appreciably raised or volume appreciably curtailed for the product within a given area, while demand held constant, supply from other sources could not be expected to enter promptly enough and in large enough amounts to restore the old price and volume. Market definition therefore hinges on economic evidence.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Mergers & Acquisitions Law > Merger Guidelines

Patent Law > ... > Defenses > Inequitable Conduct > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN53[] **Market Definition, Relevant Market**

For every product, substitutes exist. But a relevant market cannot meaningfully encompass that infinite range. The circle must be drawn narrowly to exclude any other product to which, within reasonable variations in price, only a limited number of buyers will turn; in technical terms, products whose cross-elasticities of demand are small. Not only is economic substitutability critical to market definition, but it is improper to interpret the Sherman Act to require that products be fungible to be considered in the relevant market.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN54[] **Regulated Practices, Market Definition**

Market power is the power to force a purchaser to do something that he would not do in a competitive market. It has been defined as the ability of a single seller to raise price and restrict output.

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > General Overview

Civil Procedure > ... > Standards of Review > Substantial Evidence > Preservation for Appeal

Patent Law > Jurisdiction & Review > Subject Matter Jurisdiction > Appeals

HN55[] **Regulated Practices, Market Definition**

As a matter of Federal Circuit law, for issues unique to that court's jurisdiction, a *Fed. R. Civ. P. 50(b)* motion is necessary to preserve a sufficiency of the evidence argument for appeal. On most issues related to *Rule 50* motions, however, the Federal Circuit generally applies regional circuit law unless the precise issue being appealed pertains uniquely to patent law.

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > Preservation for Review

Civil Procedure > ... > Standards of Review > Substantial Evidence > Preservation for Appeal

HN56[] **Trials, Judgment as Matter of Law**

In the Tenth Circuit, the failure of a party to move for a judgment as a matter of law (JMOL) post-verdict does not bar the party from appealing the sufficiency of the evidence, provided that the party made the appropriate motion prior to the submission of the case to the jury.

Torts > ... > Commercial Interference > Contracts > General Overview

Torts > Business Torts > Commercial Interference > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN57[] **Commercial Interference, Contracts**

Oklahoma jurisprudence teaches that one has the right to prosecute a lawful business without unlawful molestation or unjustified interference from any person, and any malicious interference with that business is an unlawful act and an actionable wrong.

Torts > ... > Business Relationships > Intentional Interference > Elements

Torts > Business Torts > General Overview

Torts > Business Torts > Commercial Interference > General Overview

Torts > ... > Commercial Interference > Business Relationships > General Overview

Torts > ... > Commercial Interference > Contracts > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

Torts > ... > Prospective Advantage > Intentional Interference > Elements

HN58[] **Intentional Interference, Elements**

In Oklahoma, interference with a prospective economic advantage usually involves interference with some type of reasonable expectation of profit, whereas interference with a contractual relationship results in loss of a property right. The basic elements of tortious interference with a business relationship are the existence of a valid business relation or expectancy, knowledge of the relationship or expectancy on the part of the interferer, an intentional interference inducing or causing a breach or termination of the relationship or expectancy, and resultant damage to the party whose relationship has been disrupted.

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN59[] Commercial Interference, Prospective Advantage

In Oklahoma, bad faith is a prerequisite to a state-law tortious interference claim.

Civil Procedure > Appeals > Standards of Review > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN60[] Appeals, Standards of Review

Oklahoma courts must affirm a jury verdict if there is any competent evidence reasonably tending to support it.

Counsel: Burck Bailey, Fellers, Snider, Blankenship, Bailey & Tippens, of Oklahoma City, Oklahoma, argued for plaintiffs-appellees. With him on the brief were Greg A. Castro and Jay P. Walters. Also on the brief was Dennis D. Brown, of Tulsa, Oklahoma.

Robert A. Schroeder, Bingham McCutchen LLP, of Los Angeles, California, argued for defendant-appellant. With him on the brief were Leigh O. Linder and Kevin K. Leung. Of counsel on the brief were John P. Passarelli and David H. Roe, McGrath North Mullin & Kratz, PC LLO, of Omaha, Nebraska.

Judges: Before SCHALL, GAJARSA, and LINN, Circuit Judges.

Opinion by: GAJARSA

Opinion

[*1707] [*1344]** GAJARSA, *Circuit Judge*.

Swift-Eckrich, Inc. (d/b/a ConAgra Refrigerated Foods) ("ConAgra") appeals the judgment of the United States District Court for the Western District of Oklahoma following a jury verdict, granting the claims of Unitherm Food Systems, Inc. ("Unitherm") and of Jennie-O Foods, Inc. ("Jennie-O") (collectively, "plaintiffs") that ConAgra was liable for attempted monopolization and for tortious interference **[**2]** with prospective economic advantage, and that same court's earlier partial summary judgment finding U.S. Patent No. 5,952,027 ("the '027 Patent") invalid and unenforceable under *35 U.S.C. § 102(b)* [1] and dismissing ConAgra's counterclaim for infringement. *Unitherm Food Systems, Inc. & Jennie-O Foods, Inc., v. Swift-Eckrich, Inc., 2003 U.S. Dist. LEXIS 25665, Case No. CIV-01-347-C (W.D. Okla, March 27, 2003)*.

The district court construed the disputed claim terms in the '027 Patent correctly, and properly found the '027 Patent invalid and unenforceable for reasons of both prior use and prior sale under *35 U.S.C. § 102(b)*. The district court was also correct, under Oklahoma law, in allowing the jury to decide the issue of tortious interference **[**3]** and in accepting the jury's findings on both liability and damages. The district court erred, however, in allowing the jury to decide Unitherm's antitrust claims despite the total absence of economic evidence capable of sustaining those claims. We therefore affirm-in-part, vacate-in-part, and remand to the district court for further proceedings consistent with this opinion. **[***1708]**

---

[1] *HN1*[] "A person shall be entitled to a patent unless . . . the invention was . . . in public use or on sale in this country, more than one year prior to the date of the application for patent in the United States. . . . " *35 USCS § 102(b)*.

BACKGROUND

A. The '027 Patent

On May 11, 1998, a ConAgra engineer named Prem Singh filed a patent application for "A Method for Browning Precooked Whole Muscle Meat Products" with the United States Patent and Trademark Office ("PTO"). That application became the '027 Patent, which the PTO issued to Singh on September 14, 1999. Singh assigned the patent to ConAgra.

In early 2000, ConAgra wrote to several companies who sell equipment and/or processes for preparing and browning pre-cooked meats. ConAgra attached a copy of the '027 Patent to that letter, which included the explicit warning: "Others in the industry may approach your company regarding this patent, and we would appreciate it if you would inform them that we intend to aggressively protect all of our rights under this patent."

[*1345] Unitherm, which **[**4]** describes itself as "a manufacturer and supplier of equipment and processes used in the food industry," did not receive one of ConAgra's letters. Unitherm, however, believed--and asserts as the basis of this suit--that its President, David Howard, had conceived the process claimed in the '027 Patent and reduced it to practice as the "Unitherm process" no later than September 1993.

In July 2000, ConAgra sent out another round of letters, this set to its direct competitors in the pre-cooked meats business. ConAgra attached both a copy of the patent and a blank license to this letter, and announced that it was "making the '027 Patent and corresponding patents that may issue available for license at a royalty rate of 10 cents per pound, adjusted for inflation, to all responsible parties who have not infringed these patents." No one licensed the '027 Patent on these or any other terms.

Jennie-O (a division of Hormel), a direct ConAgra competitor in the pre-cooked meats business, received one of these letters. Some time earlier, Jennie-O had installed Unitherm equipment at its plant in Montevideo, MN, where it used the Unitherm process to brown roughly 18,000,000 pounds of meat per year. **[**5]** Upon receiving ConAgra's letter, Jennie-O undertook an investigation to determine its rights and responsibilities. Jennie-O executives later testified that their investigation led them to conclude that the Unitherm process and the '027 Patent process were one and the same, that David Howard had invented that process no later than 1993, and that unless a court invalidated the '027 Patent, Jennie-O would be infringing it by using the Unitherm process. According to Jennie-O executive Robert Wood, ConAgra's letter had "a chilling effect on any further possibility of Unitherm selling its products to Jennie-O."

On February 23, 2001, Unitherm and Jennie-O together sued ConAgra alleging numerous causes of action. Only three causes of action are relevant to this appeal: (1) a Declaratory Judgment Action for invalidity and unenforceability of the '027 Patent; (2) a state law claim for tortious interference with Unitherm's prospective economic relationships; and (3) Unitherm's *Walker Process* claim that ConAgra violated *Section 2 of the Sherman Act*. [2] All of the plaintiffs' other claims were either dismissed or otherwise resolved in ways that the parties do not appeal. In addition, ConAgra **[**6]** counterclaimed that Jennie-O infringed the '027 Patent. The district court granted Jennie-O summary judgment of noninfringement. ConAgra does not appeal the summary judgment of noninfringement.

B. Summary Judgment **[**7]** *of Invalidity*

---

[2] ***HN2***[] *Section 2 of the Sherman Act* defines the substantive violation of attempted monopolization. It states, in pertinent part: ***HN3***[] "Every person who shall . . . attempt to monopolize . . . any part of the trade or commerce among the several States . . . shall be deemed guilty of a felony . . ." *15 U.S.C. § 2*. ***HN4***[] Private antitrust suits, including this one, technically proceed under *Section 4 of the Clayton Act*, which states, again in pertinent part: ***HN5***[] "Any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor in . . . district court of the United States . . . and shall recover threefold the damages by him sustained, and the cost of suit, including a reasonable attorney's fee." *15 U.S.C. § 15(a)*.

Both parties moved for dismissal of and/or for summary judgment on various claims. The district court first considered the plaintiffs' claim that the '027 Patent is invalid and unenforceable under *§ 102(b)*. The '027 Patent includes 36 claims. Claims 1 and 20 are independent. The **[*1346]** other 34 claims are dependent. The independent claims read:

> 1. A process for browning precooked, whole muscle meat products comprising: coating a browning liquid pyrolysis product onto at least a portion of the surface of a precooked whole muscle meat product; and then exposing the coated surface to an energy source and selectively heating the coated surface of the whole muscle meat product at a temperature **[***1709]** and for a time sufficient to develop a *golden-brown color* on the exposed surface, without substantial shrinking the precooked, whole muscle meat product.

'027 Patent, col. 8, ll. 4-14 (emphasis added).

> 20. A process for browning a precooked chicken breast or a turkey breast comprising: coating at least a portion of the surface of a precooked chicken breast or a precooked turkey breast with from about 0.05 to about 1.0 wt. %, based on the weight of the breast, **[**8]** of a browning liquid pyrolysis product obtained from hardwoods or sugars; and then selectively heating the coated surface of the breast in an environment having a temperature greater than about 60[deg] C. with energy provided by a circulating air oven, an impinging air oven, a laser light source, a medium wavelength energy infra red radiation source or a source of microwave radiation for a time sufficient to develop a *golden-brown color* on the coated surface, where the shrinkage of the precooked, whole muscle meat product is less than 4 wt. % based on the initial weight of the meat product.

'027 Patent, col. 9, ll. 17-33 (emphasis added). All of the remaining claims represent minor variations on these themes; they vary heat source temperatures, core meat temperatures, amounts of shrinkage, browning liquids for pyrolysis, amounts of browning product, masking/flavoring agents, and energy sources.

Though ConAgra, in its brief opposing the motion for summary judgment, stressed the importance of having the district court construe all disputed claim limitations, it failed either to identify disputed claim terms or to submit specific interpretations of claim terms. Instead, **[**9]** ConAgra countered the plaintiffs' interpretation of the claim language with little other than a sweeping objection. The sole claim term in the '027 Patent that ConAgra disputed explicitly was "golden brown." Nevertheless, ConAgra argues on appeal that "claim construction could not be properly addressed without a separate hearing, given stringent page limitations. . . . "

The district court provided a formal construction for only the single term that ConAgra had actually disputed: "golden brown." ConAgra contends (and the plaintiffs do not dispute) that "the 'golden-brown' limitation is obviously the heart of the '027 patent." The heart of the dispute over this term both below and on appeal, in turn, is whether or not the proper construction of "golden brown" flows from the term's plain meaning. The plaintiffs argued that it does. ConAgra, on the other hand, noted that the patent's five illustrative examples all included Hunter-Lab Color Meter measurements to describe color, asserted that construction according to plain meaning was therefore misplaced, and proposed a more technical definition gleaned from the examples.

The district court first reviewed the intrinsic evidence to determine **[**10]** that "the '027 ***HN6***[] patentee did not act as his own 'lexicographer' and failed to specifically define the term 'golden brown.' Thus, the Court **[*1347]** views the term 'golden brown' with its plain meaning to one of skill in the art." Having failed to find a precise meaning in the intrinsic evidence, the district court turned to *Webster's Third New International Dictionary* 975 (1986) as a source of plain meaning, and formally construed "golden brown" as "a variable color averaging a strong brown that is yellower and slightly darker than gold brown, yellower and paler than average russet, and yellower and less strong than rust."

Given that claim construction, the district court next considered whether or not the Unitherm process and the patented process were the same process. The district court described the Unitherm process in detail, compared the voluminous documentary evidence describing the Unitherm process to the individual claim limitations claimed in the '027 Patent, reviewed what it characterized as undisputed evidence of prior sales and concluded that the '027 Patent "describes a process that was both on sale and in public use prior to May 11, 1997. Thus, the Court finds that the 1999 **[**11]** issuance of the '027 Patent was in error." The district court granted the plaintiffs' motion for summary judgment of invalidity and unenforceability for reasons of both prior use and prior sale under *§ 102(b)*, and consequently also granted Jennie-O's motion for summary judgment of noninfringement on the grounds that the '027 Patent is invalid and unenforceable.

C. Antitrust

Both plaintiffs also claimed that ConAgra's behavior in securing and enforcing the '027 Patent violated the antitrust laws. ConAgra moved to have Unitherm's claim dismissed for lack of antitrust standing, and Jennie-O's **[***1710]** claim dismissed for lack of cognizable antitrust injury. The district court considered both of these motions at its summary judgment hearing, and determined that the plaintiffs had pled a viable claim, citing the Supreme Court's *Walker Process* decision:

> ***HN7***[] The enforcement of a patent procured by fraud on the Patent Office may be violative of *§ 2 of the Sherman Act* provided the other elements necessary to a *§ 2* case are present. In such event the treble damage provisions of *§ 4 of the Clayton Act* would be available to an injured party.

Walker Process Equip., Inc. v. Food Mach. & Chem. Corp., 382 U.S. 172, 174, 15 L. Ed. 2d 247, 86 S. Ct. 347 (1965). **[**12]** The district court then ruled that Unitherm, but not Jennie-O, had antitrust standing because first, as ConAgra's direct competitor for sales of browning/smoking processes, Unitherm was susceptible to the types of injuries that the antitrust laws are supposed to prevent, and second, ConAgra's threats to enforce its patents could cause those injuries. The district court dismissed Jennie-O's antitrust claim, but allowed Unitherm's claim to proceed to trial. Jennie-O has not appealed the dismissal.

At the end of the trial, the judge gave the jury various instructions concerning ***antitrust law***. Of particular relevance to the issues raised on appeal, Jury Instruction number 11 defined the relevant market:

> Monopoly power must be found to exist within an economically meaningful market. Plaintiff asserts the relevant market consists of the browning process defined in the 027 patent. It is for you to determine if Plaintiff's definition is proper. . . The product market consists of processes that have reasonable interchangeability for the purposes for which they are developed when price, use, and qualities are considered. . . .

Jury Instruction number 14 defined antitrust injury: **[**13]**

> Plaintiff must establish that it was injured as a result of Defendant's alleged **[*1348]** attempt to gain a monopoly. . . . To establish injury, Plaintiff must prove that some damage flowed to Unitherm as a result of Defendant's alleged attempt to gain a monopoly. . . . It is enough if Plaintiff proves that the alleged attempt to gain a monopoly was a material cause of its injury.

The verdict form simply asked the jury to find for plaintiff Unitherm or for defendant ConAgra on the claim of attempted monopolization. The jury returned a verdict for Unitherm.

D. Other Claims and Damages

The district court proceedings led to final judgments on all claims. In addition to the antitrust claims, the court also allowed the plaintiffs to proceed to trial on their claims of tortious interference with prospective economic relationships and of actual or constructive fraud on Unitherm. The jury found that ConAgra was liable for tortious interference with prospective economic relationships, but not for fraud on Unitherm. Unitherm has not appealed the finding of no fraud.

The jury then awarded Unitherm $ 18 million in antitrust damages ($ 6 million, trebled), $ 2 million for ConAgra's **[**14]** tortious interference with their prospective economic advantage, and $ 2 million in punitive damages consequent to the tortious interference. Because the parties had stipulated that antitrust damages would subsume any damages assessed for tortious interference, the district court entered judgment for $ 18 million plus applicable interest. Because the ***HN8***[] antitrust laws also provide for reasonable attorneys fees, the court awarded the plaintiffs an additional $ 1,022,445. ConAgra timely appealed. We have jurisdiction to hear this appeal under 28 U.S.C. § 1295(a)(1).

DISCUSSION

A. Standard of Review

This appeal requires us to consider a number of different issues, and raises a number of questions concerning choice of law and standard of review. The district court granted the plaintiffs' summary judgment motion to find the '027 Patent invalid and unenforceable under *both* the prior sale and prior use bars of § 102(b). **HN9**[] We review all grants of summary judgment de novo, construing the facts in the light most favorable to the non-movant. *Liquid Dynamics Corp. v. Vaughan Co., 355 F.3d 1361, 1367 (Fed. Cir. 2004)*. **HN10**[] Summary judgment is appropriate **[**15]** when there are no issues of material fact and the moving party is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56*; *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 247-48, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986)*.

HN11[] Prior use under *§ 102(b)* includes any use of the claimed invention by a person other than the inventor who is under no limitation, restriction or obligation of secrecy to the inventor. *Netscape Communications Corp. v.* ***[***1711]*** *Konrad, 295 F.3d 1315, 1320 (Fed. Cir. 2002)*. Whether a patent is invalid due to a *§ 102(b)* public use is a question of law based on underlying questions of fact. *Id.*

Our standards for reviewing a district court's finding of *§ 102(b)* prior sale are similar: **HN12**[] "In order to invalidate a patent under the on-sale bar of *35 U.S.C. § 102(b)*, an accused infringer must demonstrate by clear and convincing evidence that there was a definite sale or offer to sell more than one year before the application." *3M v. Chemque, Inc., 303 F.3d 1294, 1301 (Fed. Cir. 2002)*. "A determination that a product was placed on sale prior to the critical date is a conclusion **[**16]** of law based on underlying findings of fact. We review the ultimate determination de **[*1349]** novo, and the underlying factual findings for clear error." *Linear Tech. Corp. v. Micrel, Inc., 275 F.3d 1040, 1047 (Fed. Cir. 2001)*.

HN13[] Taken together, then, we must review the district court's summary judgment of invalidity and unenforceability by considering whether the facts, viewed in the light most favorable to ConAgra, nevertheless provide clear and convincing evidence of either (or both) prior use or prior sale. *See* *Linear Tech., 275 F.3d at 1047*; *Liquid Dynamics, 355 F.3d at 1367*.

The district court also entered judgment against ConAgra after the jury found antitrust liability on Unitherm's *Walker Process* claim. **HN14**[] We apply Federal Circuit law to all antitrust claims premised on the bringing of a patent infringement suit. *Nobelpharma AB v. Implant Innovations, 141 F.3d 1059, 1068 (Fed. Cir. 1998)* (en banc in relevant part). Whether a patentee's conduct in procuring or enforcing a patent is sufficient to strip its immunity from the antitrust laws is therefore a legal question that we review de novo under Federal Circuit law. **[**17]** *Id.* We apply the law of the regional circuit, in this case, the Tenth Circuit, to the elements of antitrust claims that are not unique to patent law. *Id.* These elements include but are not restricted to considerations of antitrust standing, market definition, antitrust injury, and damages. *Id.*

HN15[] The Tenth Circuit recognizes antitrust standing, like all questions of standing to sue, as a question of law subject to de novo review. *Ashley Creek Phosphate Co. v. Chevron USA, Inc., 315 F.3d 1245, 1253-1254 (10th Cir. 2003)*; *Motive Parts Warehouse v. Facet Enters., 774 F.2d 380, 389 (10th Cir. 1985)*. Market definition and antitrust injury, on the other hand, are intensely factual determinations. *See e.g.*, *Eastman Kodak Co. v. Image Technical Servs., 504 U.S. 451, 482, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992)* ("The proper market definition in this case can be determined only after a factual inquiry into the 'commercial realities' faced by consumers."); *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 585-586, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)* ("To survive petitioners' motion for summary judgment, respondents must establish **[**18]** that there is a genuine issue of material fact as to whether petitioners entered into an illegal conspiracy that caused respondents to suffer a cognizable injury."). We must therefore review the evidence supporting the jury's necessary findings of a relevant antitrust market and of antitrust injury.

HN16[] The Tenth Circuit limits the review of a jury verdict challenged on appeal to

> determining whether the record--viewed in the light most favorable to the prevailing party--contains substantial evidence to support the jury's decision. The jury has the exclusive function of appraising credibility, determining the weight to be given to the testimony, drawing inferences from the facts established, resolving conflicts in evidence, and reaching ultimate conclusions of fact.

Garrison v. Baker Hughes Oilfield Operations, Inc., 287 F.3d 955, 959 (10th Cir. 2002). ***HN17***[] In conducting our review for substantial evidence, we must "disregard all evidence favorable to the moving party that the jury is not required to believe." *Reeves v. Sanderson Plumbing Prods., Inc., 530 U.S. 133, 151, 147 L. Ed. 2d 105, 120 S. Ct. 2097 (2000)*.

This same standard for reviewing a jury verdict **[**19]** applies to the jury's finding that ConAgra was liable for tortious interference with prospective economic advantage, a state law question. ***HN18***[] We review state law causes of action under the applicable state law for matters not committed to this court's exclusive jurisdiction, *Univ. of W. Va. v.* ***[*1350]*** *Van Voorhies, 278 F.3d 1288, 1296 (Fed. Cir. 2002)*, here the laws of Oklahoma. ***HN19***[] Oklahoma courts must affirm a jury verdict if there is any competent evidence reasonably tending to support it. *Computer Publ'ns., Inc. v. Welton, 2002 OK 50, 49 P.3d 732, 735 (Okla. 2002)*. This standard is unchanged even if the jury awards damages in amounts inconsistent with its finding of liability for tortious interference. *See* *Pine Island RV Resort, Inc. v. Resort Mgmt., 1996 OK 83, 922 P.2d 609, 615 (Okla. 1996)*. **[***1712]**

B. Claim Construction

Neither ConAgra's generalized request that the district court conduct a *Markman* hearing nor its insistence on appeal that many complex issues lurk in various unnamed claim terms creates a disputed issue of material fact. As noted, the district court construed the only term that ConAgra disputed explicitly: "golden brown. **[**20]** " Presumably, all other claim terms were undisputed because one of ordinary skill in the art would understand their plain meanings. ***HN20***[] In the context of jury instructions, we have doubted "that *Markman* requires the trial judge to instruct as to an undisputed 'claim construction' for every term, by simply parroting the words of the claim. . . ." *U.S. Surgical Corp. v. Ethicon, Inc., 103 F.3d 1554, 1567 (Fed. Cir. 1997)*. We doubt even more strongly that a district court is obliged to construe undisputed claim terms prior to issuing a summary judgment of invalidity. *See also* *PSC Computer Prods., Inc. v. Foxconn Int'l, Inc., 355 F.3d 1353, 1357* ("Although an infringement analysis typically begins with claim construction, the district court here did not construe the claims. . . because their meaning is not disputed."). ConAgra's attempt to preserve its right to identify new "disputed" claims on appeal by requesting a generalized *Markman* hearing must therefore fail. *See* *United States Surgical, 103 F.3d at 1567*.

As to the content of the district court's construction, colors can indeed pose challenging construction tasks. At one level, **[**21]** they are commonly used terms with well-accepted plain definitions that rarely need construction. At another, they are precise scientific terms corresponding to very specific portions of the spectrum that require precise definitions and constructions. ConAgra argued below--and argues again on appeal--that the court should extract the range of Hunter-Lab Color Meter measurements from the '027 Patent's examples, and construe the term "golden brown" to include colors falling between "about" the low end and the high end of the illustrated ranges.

This dispute follows a classic pattern. The district court found no specific definition in the intrinsic evidence, and used a dictionary to find the term's plain meaning; ConAgra would have us extract a more technical construction by reading limitations into the claims from the examples. We discussed both the nature and the appropriate resolution of such disputes in *Texas Digital Systems v. Telegenix, Inc., 308 F.3d 1193, 1202-04 (Fed. Cir. 2002)*:

> ***HN21***[] It has been long recognized in our precedent and in the precedent of our predecessor court, the Court of Customs and Patent Appeals, that dictionaries, encyclopedias and treatises **[**22]** are particularly useful resources to assist the court in determining the ordinary and customary meanings of claim terms. . . .

> [But] the intrinsic record also must be examined in every case to determine whether the presumption of ordinary and customary meaning is rebutted. . . . [This] presumption . . . will be overcome where the patentee, acting as his or her own lexicographer, has *clearly set forth an explicit definition of the term different from its ordinary meaning*. Further, **[*1351]** the presumption also will be rebutted if the inventor has disavowed or disclaimed scope of coverage, by using *words or expressions of manifest exclusion or restriction, representing a clear disavowal of claim scope.* . . .

Id. (emphasis added).

The district court here did not consult a dictionary prior to searching the intrinsic evidence for a definition. To the contrary, the district court explicitly concluded that "the '027 patentee did not act as his own 'lexicographer' and failed to specifically define the term 'golden brown'" as a *precursor* to concluding that the proper construction of "golden brown" flowed from its plain meaning. Given that conclusion, the district court **[**23]** *then* consulted a dictionary to affix a legal definition at least somewhat more precise than an intuitive understanding of a color. The district court's approach is proper. ***HN22***[] We have often noted that "[judges may] rely on dictionary definitions when construing claim terms, so long as the dictionary definition does not contradict any definition found in or ascertained by a reading of the patent documents." *Vitronics Corp. v. Conceptronic, Inc., 90 F.3d 1576, 1584 n.6 (Fed. Cir. 1996)*. Such is the case here; the dictionary definition that the district court adopted did not contradict any definition that one of ordinary skill in the art could ascertain from the intrinsic evidence in the record.

HN23[] The district court's adoption of a plain meaning construction is therefore presumptively correct. To overcome that presumption, ConAgra must demonstrate that the intrinsic evidence provides both a clear and explicit **[***1713]** disclaimer of the plain meaning and substitutes a more specific, technical construction of "golden brown." *See* *Tex. Digital, 308 F.3d at 1203*. ConAgra's suggestion that we glean numeric ranges from examples represents neither clear nor explicit **[**24]** disavowal of the common meaning. In fact, the examples are precisely what they purport to be: *examples* of Hunter-Lab Color Meter measurements falling within the commonly understood range of "golden brown." ConAgra does little other than "invite[] a violation of our precedent counseling against importing limitations into the claims." *Id. at 1204*.

We recently reversed a district court's claim construction for doing precisely as ConAgra urges--reading a limitation from an example into a claim term:

> ***HN24***[] Because the plain language of the claim was clear and uncontradicted by anything in the written description or the figures, the district court should not have relied upon the written description, the figures, or the prosecution history to add limitations to the claim. Under such circumstances, relying on the written description and prosecution history to reject the ordinary and customary meanings of the words themselves is impermissible.

Liquid Dynamics, 355 F.3d at 1368 (citations omitted). This admonition was hardly new. We have often stated that while . . . claims are to be interpreted in light of the specification and with a view **[**25]** to ascertaining the invention, it does not follow that limitations from the specification may be read into the claims. We recognize that there is sometimes a fine line between reading a claim in light of the specification, and reading a limitation into the claim from the specification.

Comark Communications v. Harris Corp., 156 F.3d 1182, 1187 (Fed. Cir. 1998) (citations omitted). *See also* *CCS Fitness, Inc. v. Brunswick Corp., 288 F.3d 1359, 1366 (Fed. Cir. 2002)* (explaining that ***HN25***[] a patentee cannot rebut the presumption of ordinary meaning "simply by pointing to the preferred embodiment or other structures or **[*1352]** steps disclosed in the specification or prosecution history").

In short, the district court properly considered all intrinsic evidence before determining that none of it could overcome the presumption favoring plain meaning, and only then turned to a dictionary to affix the plain meaning that one of ordinary skill in the art would assign to the color "golden brown." The district court therefore correctly construed the only disputed term according to its plain meaning as one of ordinary skill in the art would understand it, and we affirm its **[**26]** claim construction.

C. Invalidity and Unenforceability

ConAgra argues that the district court erred by ignoring numerous disputed facts that should have precluded its entry of summary judgment of invalidity and unenforceability. The district court, however, considered undisputed evidence that Unitherm had entered into the record, and concluded that Unitherm's enumeration of the parallels between the Unitherm process and the '027 Patent's process succinctly demonstrated that the two processes are one and the same. This undisputed evidence combined contemporaneous correspondence, color photographs, witness testimony, and promotional videos. Together, it established numerous points of identity between the Unitherm process and the patented process.

The evidence showed that in 1993, Unitherm demonstrated and attempted to sell its process to Rocco Foods, Bilmar, Carolina Turkeys, *and ConAgra*. These demonstrations were performed in Elk Grove, Illinois and included: removing purge from and drying precooked, whole muscle turkey and ham products; the use of Maillose; quickly conveying products dipped in browning liquid pyrolysis products through Unitherm's RapidFlow circulating air **[**27]** oven over a range of temperatures (250-350 [degree] C) to demonstrate any shade of naturally baked, smoked, or roasted golden-brown desired with minimal shrinkage; applying the pyrolysis products at times and concentrations providing 0.05-1.0 wt. % and 0.15-0.3 wt. % pick-up; shrinkage of as little as 1% or less; as little as 1 [degrees] C or less increase in core temperature; mixtures of broth and Maillose or liquid smoke in broth concentrations of 5% and higher; and core temperatures remaining below 5 [degrees] C (41 [$0degrees F).

These demonstrations alone proved Unitherm's prior public use of every limitation of independent Claims 1 and 20. The process of Claim 1 browned muscle meats by coating them with a pyrolysis product, and then exposing them to an energy source for a time and at a temperature sufficient for them to become golden brown, without substantial shrinkage. *See* '027 Patent, col. 8, ll. 4-14. The **[***1714]** similar process of Claim 20 browned chicken or turkey breasts, but also specified that the pyrolysis product had to be obtained from hardwoods or sugars, and added specificity to the amount of pyrolysis product and the allowable amounts of shrinkage. *Id.* **[**28]** at col. 9, ll. 17-33. Maillose is a sugar derivative, and the 1993 demonstrations met both the pyrolysis usage and the allowable shrinkage specified in Claim 20.

Unitherm did not, however, cease demonstrating its process in public in 1993. Between 1994 and the critical date of May 11, 1997, Unitherm's demonstrations to *ConAgra*, Carolina Turkeys, Hudson Foods (now Willow Brook), Jennie-O, Foster Farms, Perdue, Plainville, and Wilson Foods involved (in various combinations): temperatures of 250 [degrees] F and higher; dip times of 10-70 seconds in 20-70% Maillose or liquid smoke solutions; measured liquid pickup amounts of 0.05% and higher; the use of infrared energy for purge removal and drying; and the achievement of any **[*1353]** shade or darkness of golden-brown desired. One of Unitherm's presentations to Perdue explained that "by altering dwell time or temperature, you dial in the degree of color you require," implying at least much of the variability captured in the various '027 Patent claims.

Unitherm also prepared promotional videos in 1993 and 1996. The 1993 video includes demonstrations of precooked, whole muscle turkey breasts and hams dipped in Maillose or liquid smoke and **[**29]** then conveyed through the RapidFlow oven. To broadly demonstrate the ability to produce any shade desired, the video shows product colors matching light oven-roasted, medium oven-roasted, Black Forest oven-roasted, and smoked ham and smoked, skinless turkey. The video notes that a spray station can be added for smoking, flavoring, or enhancing product browning. Unitherm distributed approximately 500 copies of this video throughout the industry.

The 1996 videos showed whole muscle ham logs in a tub of Maillose, conveyed through the RapidFlow oven for 7.5 minutes to provide an oven-roasted, golden-brown color. The videos also showed one and then six Maillose-dipped, precooked whole muscle turkey breasts being delivered through the oven to produce a golden-brown color. Unitherm distributed approximately 500 copies of these videos in 1996, with no obligation of secrecy. Taken together, Unitherm's overwhelming evidence of prior public use captures every limitation in every one of the '027 Patent's claims.

Unitherm also submitted evidence that, prior to the critical date of May 11, 1997, it had sold both its RapidFlow ovens and the process that it had been demonstrating. In addition to **[**30]** its 1995 sale to Jennie-O, Unitherm proved sales to Thorn Apple in 1995 and to Hudson Foods in 1996. Unitherm further proved that Plantation ordered a Unitherm system on February 7, 1997 and that Foster Farms ordered a system and made its first payment by May 9, 1997. Jennie-O's Robert Wood testified that the process that Jennie-O purchased from Unitherm "was able to prepare the surface, apply liquid smoke and set liquid smoke." The demonstrations to ConAgra alone suggest that ConAgra was aware of the Unitherm process for at least several years prior to the critical date.

ConAgra does not dispute this evidence, but rather insists that material factual disputes about the identity of its patented process and the Unitherm process remain--and that therefore the district court should not have entered summary judgment of either prior use or prior sale. Even on appeal, however, ConAgra appears unable to point to any specific disputed material fact. Broadly speaking, ConAgra's briefs to this court either mischaracterize Unitherm's general desire to protect its trade secrets as evidence that the Unitherm process was a trade secret or attempt to demonstrate that not every use of Unitherm's **[**31]** ovens was consistent with the patented process.

First, ConAgra argues that the district court's reliance on Unitherm's promotional videos was misplaced because Unitherm itself admitted that the videos do not meet *all* of the patent claims. ConAgra cites as support a Unitherm document showing the correspondence between its videos and the '027 Patent's claim terms. In this document, Unitherm asserts that the processes demonstrated in its video meets all limitations of Claims 1-7, 10-12, 15-23, 26, 29-36, and renders Claims 8, 9, 13, 24-27 obvious under *§ 103(a)*. This purported "admission" therefore fails to account for only dependent claims 14 and 28. These two claims differ from others only in requiring a slightly more restricted temperature **[*1354]** range. This argument does not establish a material factual dispute.

Second, ConAgra asserts that Unitherm gave conflicting testimony concerning whether or not its process remained a trade secret in 1998. In support, ConAgra cites Unitherm's admission that the Unitherm process **[***1715]** was not a secret, while nevertheless maintaining nondisclosure agreements with various customers and competitors and expressing a general desire to keep its trade secrets **[**32]** secret. This argument does not establish a material factual dispute.

Third, ConAgra contrasted the district court's statement that Unitherm's President, David Howard, first disclosed the Unitherm process to ConAgra in 1993 with a letter from Howard stating that Unitherm first revealed the process to ConAgra in 1995. While this discrepancy could have been significant if the critical date had been in 1994, apparent confusion between two equally invalidating dates does not qualify as *material*. This argument does not establish a material factual dispute.

Fourth, ConAgra turns to one of its own witnesses, Dr. Syed Hussain. ConAgra suggests that the district court placed great weight on a factually sparse data sheet describing Unitherm's 1993 demonstrations to Dr. Hussain. While these data sheets are, in fact, less than clear, so is the district court's reliance on them. ConAgra has not pointed to a specific place in which the district court found these sheets particularly significant. ConAgra also cites to Hussain's testimony that he could not remember whether or not the demonstrated Unitherm process produced a "golden brown" finish. It is unclear why Hussain's inability to recall **[**33]** a color should create a dispute. This argument does not establish a material factual dispute.

Fifth, ConAgra asserts that the district court ignored triable issues of fact by pointing to experiments that do not show that the Unitherm process met the limitations of the '027 Patent. While this argument is true, there is no particular basis for its conclusion that these experiments *did not* meet the limitations. This argument does not establish a material factual dispute.

Sixth, ConAgra cites from the testimony of a Hudson executive. Unitherm's sale of both product and process to Hudson was among the district court's key undisputed prior sales. ConAgra argues that the witness lacked a personal knowledge of the details of the process. ConAgra also points to some handwritten documents that are difficult to read and whose significance is unclear. ConAgra does not assert that they establish a material dispute, but rather that they fail to provide solid evidence. Again, even if true, this argument does not establish a material factual dispute.

In short, Unitherm's undisputed evidence proved that its own process included each and every limitation of every claim of the '027 Patent. ConAgra's **[**34]** evidence failed to establish even a single material factual dispute. The district court correctly determined that the undisputed facts--Unitherm's various demonstrations to ConAgra and its sales to Hudson, Jennie-O and other suppliers--constituted clear and convincing evidence of *both* prior use and prior sale. The claim language in the '027 Patent was straightforward, a detailed construction was unnecessary, and the district court correctly granted summary judgment. *See 3M*, 303 F.3d at 1301. The '027 Patent is invalid and unenforceable by reason of prior use and sale under § 102(b).

D. Antitrust

(i) Elements

It is important to outline the elements of a *Walker Process* claim before considering ConAgra's appeal of the jury verdict. Unitherm **[*1355]** alleged that ConAgra attempted to enforce the '027 Patent, which it obtained by defrauding the PTO. If true, ConAgra would lose its exemption from the antitrust laws. *Walker Process, 382 U.S. at 177*. On the same basis, ConAgra's good faith attempts to behave in accordance with the patent laws would furnish a complete defense, and ConAgra would retain its antitrust exemption; ConAgra would have done **[**35]** little but attempt to enforce a patent right which it reasonably believed itself to possess. *Id.*

The elimination of ConAgra's antitrust immunity would mark only the beginning of the antitrust inquiry, not its endpoint.

> ***HN26***[] To establish monopolization or attempt to monopolize a part of trade or commerce under *§ 2 of the Sherman Act*, it would then be necessary to appraise the exclusionary power of the illegal patent claim in terms of the relevant market for the product involved. Without a definition of that market there is no way to measure [the defendant's] ability to lessen or destroy competition.

Id. It may be that the patented process "does not comprise a relevant market. There may be effective substitutes . . . which do not infringe the patent. This is a matter of proof, as is the amount of damages . . ." *Id. at 178*.

HN27[] In order to prevail on its *Walker Process* claim, Unitherm must therefore establish: that ConAgra attempted to enforce the '027 Patent; that the '027 Patent issued because ConAgra defrauded the PTO; that ConAgra's attempted **[***1716]** enforcement threatened to lessen competition in a relevant antitrust market; that Unitherm suffered **[**36]** antitrust damages; and that all other elements of attempted monopolization are met. *Id.* These requirements frame our antitrust inquiry.

(ii) Choice of Law

ConAgra appeals the jury's antitrust verdict, claiming that Unitherm did not produce evidence sufficient to support findings of a relevant antitrust market, a dangerous probability of success, antitrust injury, or standing--all critical elements of a *§ 2* attempted monopolization claim. *See generally* *Verizon Communications, Inc. v. Law Offices of Curtis V. Trinko, LLP, 157 L. Ed. 2d 823, 540 U.S. 398, 124 S. Ct. 872 (2004)*. Unitherm counters that it provided the jury with "substantial evidence," but does not point to any.

Both parties cite Tenth Circuit law to guide our analysis. This pointer is only partially correct; ***HN28***[] Federal Circuit law governs all antitrust claims premised on the abuse of a patent right. *Nobelpharma, 141 F.3d at 1067-68*. We first announced this rule of Federal Circuit ***antitrust law*** as a unanimous en banc court in 1998. *Id. at 1067 n.5*. We explained that in all future antitrust cases, we would apply the same basic choice of law rule that we **[**37]** apply to all other matters--and for precisely the same reason. *Id. at 1067-68*. Because this court is in the best position to impose uniformity on the patent laws, we now decide issues raised in an antitrust claim that are unique to the patent law under Federal Circuit law, and all other issues under the law of the relevant regional circuit--in this case, the Tenth Circuit. *Id. at 1067-68*. The parties' confusion about the choice of law, however, suggests that we need to clarify both the reasons that we introduced Federal Circuit ***antitrust law*** and the relationship between our law and that of the regional circuits. [3]

[38]** ***HN30***[] **[*1356]** The fundamental question of Federal Circuit ***antitrust law*** is whether or when a patentee's behavior in either procuring or enforcing a patent can give rise to antitrust liability. *Id.* As a general rule, behavior conforming to the patent laws oriented towards procuring or enforcing a patent enjoys immunity from the antitrust laws. *Simpson v. Union Oil Co., 377 U.S. 13, 24, 12 L. Ed. 2d 98, 84 S. Ct. 1051 (1964)* ***HN31***[] ("The patent laws which give a . . . monopoly on making, using, or selling the invention are in pari materia with the antitrust laws and modify them pro tanto.").

But this immunity is hardly absolute. Nearly forty years ago, the Supreme Court recognized that an inventor who obtains a patent by defrauding the patent office deserves no immunity. *Walker Process, 382 U.S. at 174*. This recognition fell well within a long-established understanding of the limits of patent protection, as reflected in the Supreme Court's much earlier announcement that patentees who attempt to leverage their appropriately obtained patents beyond the claimed product lose the right to enforce their patents. *Motion Picture Patents Co. v. Universal Film Mfg. Co., 243 U.S. 502, 513, 61 L. Ed. 871, 37 S. Ct. 416, 1917 Dec. Comm'r Pat. 391 (1917).* **[**39]** The Supreme Court subsequently refined this notion of patent misuse and its consequent penalties, so that it "is now, of course, familiar law that the courts will not aid a patent owner who has misused his patents to recover any of their emoluments accruing during the period of misuse or thereafter until the effects of such misuse have been dissipated, or 'purged' as the conventional saying goes." *United States Gypsum Co. v. Nat'l Gypsum Co., 352 U.S. 457, 465, 1 L. Ed. 2d 465, 77 S. Ct. 490 (1957)*. More broadly, ***HN32***[] "the Court has held many times that power gained through some natural and legal advantage such as a patent, copyright, or business acumen can give rise to liability if a seller exploits his dominant position in one market to expand his empire into the next." *Eastman Kodak, 504 U.S. at 479 n.29*.

The Supreme Court itself noted the policy consistency between penalizing patent misuse and stripping antitrust immunity from patentees who defraud the PTO. *Walker Process, 382 U.S. at 176*. ***HN33***[] As a well established matter **[***1717]** of law, then, patentees acting under the color of their patents may nevertheless be liable if they engage in any one of a number **[**40]** of improper activities. *See, e.g.*, *Eastman Kodak, 504 U.S. at 479 n.29*; *CSU, L.L.C. v. Xerox Corp., 203 F.3d 1322, 1326 (Fed. Cir. 2000)* ("The patentee's right to exclude, however, is not without limit."); *Zenith Elecs. Corp. v. Exzec, Inc., 182 F.3d 1340, 1355 (Fed. Cir. 1999)* (holding that a patentee's bad faith allegations that a competitor is infringing a valid patent may strip the patentee of the liability exemptions that the patent law generally provides patentees). In short, the policy rationale behind stripping selected patentees of their antitrust immunity is straightforward.

HN34[] The gist of a *Walker Process* claim

> **[*1357]** is that since [the patentee] obtained its patent by fraud it cannot enjoy the limited exception to the prohibitions of *§ 2 of the Sherman Act*, but must answer under that section and *§ 4 of the Clayton Act in* treble

---

[3] The Supreme Court has ruled that ***HN29***[] the regional circuits retain appellate jurisdiction over cases in which the complaint does not allege a claim arising under federal patent law, but the answer does contain a patent-law counterclaim. *Holmes Group v. Vornado Air Circulation Sys., 535 U.S. 826, 827, 153 L. Ed. 2d 13, 122 S. Ct. 1889 (2002)*. As a result, antitrust claims met with counterclaims of infringement may not come before this court. If the resolution of the dispute rests, in part, upon a determination of whether or not a patentee's behavior stripped it of its antitrust exemption, the appellate court hearing the matter will have to decide whether to apply Federal Circuit law or risk disturbing "Congress's goal of ensuring patent-law uniformity," *id.*, by applying its own law The choice of law rule that we announced in *Nobelpharma, 141 F.3d at 1067-68*, is a sensible approach to preserving the uniformity of the patent law without regard to the appellate forum: Federal Circuit law determines whether or not the patentee enjoys antitrust immunity under the patent laws, while regional circuit law determines the other elements of the antitrust claim.

> damages to those injured by any monopolistic action taken under the fraudulent patent claim. Nor can the interest in protecting patentees from "innumerable vexatious suits" be used to frustrate the assertion of rights conferred by the antitrust laws. It must be remembered that we deal **[**41]** only with a special class of patents, i.e., those procured by intentional fraud.

Walker Process, 382 U.S. at 176. *Walker Process* claims therefore relate to a single type of behavior capable of stripping a patentee's patent-law immunity and thereby exposing the patentee to liability under other laws. Though we cannot enumerate the full range of activities capable of effecting such a loss of immunity, the determination of *which* actions can cause a patentee or a patent applicant to lose the general protection of the patent law and to risk liability for damages is clearly an issue unique to the patent law--and therefore inappropriate for resolution under the potentially varying interpretations of the regional circuits. *Nobelpharma, 141 F.3d at 1067-68*.

As a result, ***HN35***[] Federal Circuit ***antitrust law*** centers on a single critical question: What behavior by the patentee in procuring or in enforcing a patent can strip the patentee of antitrust immunity? When the courts consider a patentee's behavior under Federal Circuit law and determine that it involved nothing more than an appropriate attempt to procure a patent and an appropriate attempt to **[**42]** enforce a legitimately obtained patent, the antitrust inquiry is over with respect to the behavior at issue. [4] When, on the other hand, the courts consider a patentee's behavior under Federal Circuit law and determine that it involved either an inappropriate attempt to procure a patent or an inappropriate attempt to enforce a patent, the remainder of the antitrust inquiry must proceed under the law of the regional circuit. *Id. at 1068*.

[43]** (iii) Patent Enforcement

The present matter implicates ConAgra's behavior in *obtaining* the '027 Patent. Unitherm's allegations differ from standard *Walker Process* claims in that Unitherm raised them as ancillary to its Declaratory Judgment Action, rather than as a counterclaim to an allegation of patent infringement. *See* *id. at 1068* ***HN37***[] ("An antitrust claim premised on stripping a patentee of its immunity from the antitrust laws is typically raised as a counterclaim by a defendant in a patent infringement suit."). The logic governing *Walker Process* claims, however, suggests that we should treat claims brought ancillary to Declaratory Judgment Actions precisely as we treat counterclaims, *see* *Walker Process, 382 U.S. at 176-77*, though this atypical posture does raise an additional question. ***HN38***[] Strictly speaking, a *Walker Process* claim is premised upon "the ***[*1358]*** *enforcement* of a patent procured by fraud on the Patent Office." *Id. at 174*. A plaintiff may bring a Declaratory Judgment Action of patent invalidity, however, even in the absence of overt enforcement actions.

> When the defendant's conduct, including its statements, falls **[**44]** short of an express charge, one must consider the "totality of the circumstances" in determining whether that conduct meets the first prong of the test [for jurisdiction to hear a Declaratory Judgment Action]. If the circumstances warrant, a reasonable **[***1718]** apprehension may be found in the absence of any communication from defendant to plaintiff. If, on the other hand, defendant has done nothing but obtain a patent, there can be no basis for the required apprehension, a rule that protects quiescent patent owners against unwarranted litigation.

Arrowhead Indus. Water, Inc. v. Ecolochem, Inc., 846 F.2d 731, 736 (Fed. Cir. 1988). We therefore hold that, as a matter of Federal Circuit ***antitrust law***, the standards that we have developed for determining jurisdiction in a Declaratory Judgment Action of patent invalidity also define the minimum level of "enforcement" necessary to expose the patentee to a *Walker Process* claim for attempted monopolization.

---

[4] ***HN36***[] The patent law's pro tanto modification of the ***antitrust law***, *Simpson, 377 U.S. at 24*, extends to behavior, not to either patents or patentees. It is entirely possible for a patentee to retain its antitrust exemption with respect to some behavior while being stripped of the exemption with respect to other behavior. "Beyond the limited monopoly which is granted, the arrangements by which the patent is utilized are subject to the general law. . . . The possession of a valid patent or patents does not give the patentee any exemption from the provisions of the Sherman Act beyond the limits of the patent monopoly." *United States v. Singer Mfg. Co., 374 U.S. 174, 196-197, 10 L. Ed. 2d 823, 83 S. Ct. 1773, 1963 Dec. Comm'r Pat. 547 (1963)*. The Sherman Act "imposes strict limitations on the concerted activities in which patent owners may lawfully engage." *Id.*

This holding adopts the reasoning that we once applied prior to our announcement of Federal Circuit ***antitrust law***, at a time that we evaluated all antitrust issues under the law of the regional circuits, [5] in affirming **[**45]** a district court's ***HN39***[] dismissal of both a Declaratory Judgment Action for invalidity and a *Walker Process* claim: "It is enough to simply point out that the same facts that compel the conclusion that [the plaintiff] failed to establish declaratory judgment jurisdiction for the district court also compel the conclusion that no reasonable fact finder could find that [the defendant] has acted to enforce [its] patent." *Cygnus Therapeutic Sys. v. ALZA Corp., 92 F.3d 1153, 1162 (Fed. Cir. 1996)*. In other words, if the patentee has done nothing but obtain a patent in a manner that the plaintiff believes is fraudulent, the courts lack jurisdiction to entertain either a Declaratory Judgment Action or a *Walker Process* claim. *See Gen-Probe Inc. v. Vysis, Inc., 359 F.3d 1376, 1379 (Fed. Cir. 2004)*.

(iv) Fraud on the PTO

Unitherm's *Walker* **[**46]** *Process* claim alleges that ConAgra attempted to enforce a patent that it obtained only because it defrauded the PTO. We have consistently explained that ***HN40***[] *Walker Process* fraud is a variant of common law fraud, *see, e.g.*, *In re Spalding Sports Worldwide, Inc., 203 F.3d 800, 807 (Fed. Cir. 2000)*; *C.R. Bard, Inc. v. M3 Sys., Inc., 157 F.3d 1340, 1364 (Fed. Cir. 1998)*; *Nobelpharma, 141 F.3d at 1069-71*, and that the elements of common law fraud include:

> (1) a representation of a material fact, (2) the falsity of that representation, (3) the intent to deceive or, at least, a state of mind so reckless as to the consequences that it is held to be the equivalent of intent (scienter), (4) a justifiable reliance upon the misrepresentation by the party deceived which induces him to act thereon, and (5) injury to the party deceived as a result of his reliance on the misrepresentation.

Spalding, 203 F.3d at 807 (citations omitted). Our determination of whether or not to strip ConAgra of its antitrust immunity therefore requires us to apply the facts of this case to each of these elements:

[*1359] The first element **[**47]** of the alleged fraud was ConAgra's relevant material representation to the PTO that Prem Singh invented the claimed process, and that he neither used it in public nor offered it for sale prior to May 11, 1997. Though the plaintiffs' have provided no direct evidence proving that either Singh or ConAgra actually made this material representation, we may nevertheless presume that Singh, the named inventor and applicant, must have reviewed the specification and signed the required declaration before the application was filed. [6] *Glaxo Inc. v. Novopharm Ltd., 52 F.3d 1043, 1051 (Fed. Cir. 1995)*. Any other conclusion would

> completely ignore[] the *requirement* that ***HN41***[] patents are applied for "in the name of the actual inventor or inventors" according to *37 C.F.R. § 1.41(a) (1983)*. The inventor(s) must submit an oath or declaration attesting that they have "reviewed and understand[] the contents of the specification" and believe **[***1719]** "the named inventor or inventors to be the original and first inventor or inventors of the subject matter which is claimed and for which a patent is sought." *37 C.F.R. § 1.63*; see also *37 C.F.R. § 1.51(a)(2)* **[**48]** .

Id. (emphasis in the original). This presumption, of course, would hold only Singh himself liable for the material misrepresentation. It is undisputed, however, that Singh filed the patent application as a ConAgra employee and

---

[5] We decided *Cygnus Therapeutic Sys. v. ALZA Corp., 92 F.3d 1153, 1162 (Fed. Cir. 1996)* as a matter of Ninth Circuit law.

[6] Under normal circumstances, we would expect the prosecution history to play a critical role in proving that a patentee defrauded the PTO. The prosecution history is, after all, the record of all correspondence between the patentee and the PTO, and therefore provides the best *direct* evidence of every representation that the patentee made. In the present matter, neither party placed the prosecution history in the record. Because of this omission, the plaintiffs must build an entirely circumstantial case using inferences and presumptions. ***HN42***[] The presumption of validity implies that the Examiner believed the patent to be valid when it issued. *American Hoist & Derrick Co. v. Sowa & Sons, Inc., 725 F.2d 1350, 1359 (Fed. Cir. 1984)*. Regulations required the named inventor, Singh, to sign an oath attesting to his inventorship. *37 C.F.R. § 1.63*. We may therefore presume that Singh represented to the PTO that he was the process' original inventor.

assigned the patent to ConAgra. Nor is there any dispute that both Singh and numerous ConAgra colleagues and supervisors knew of Howard's demonstrations of the Unitherm process to ConAgra.

[49]** According to the *Restatement (Second) of Agency § 257*, ***HN43***[] "[a] principal is subject to liability for loss caused to another by the other's reliance upon a tortious representation of a servant or other agent, if the representation is: (a) authorized; (b) apparently authorized; or (c) within the power of the agent to make for the principal." Comment (a) explains that "the principal's liabilities do not depend upon the theory of respondeat superior but upon the reason underlying liability upon authorized or apparently authorized contracts." *Id.* The undisputed facts surrounding Singh's patent application demonstrate that he filed it as an employee of ConAgra, to whom he assigned it. These same facts therefore establish ConAgra's potential liability for any damages arising from Singh's misstatements.

The second element of the alleged fraud, the falsity of ConAgra's material representation to the PTO, is evident from the same facts that led the district court to conclude, and this court to affirm, that David Howard invented the process claimed by the '027 Patent no later than 1993, and both used it and sold it numerous times prior to the critical **[**50]** date--thereby rendering the '027 Patent invalid under *§ 102(b)*.

[*1360] The third element of the alleged fraud, ConAgra's intent to deceive, is the most difficult to prove. Nevertheless, ***HN44***[] clear and convincing circumstantial evidence establishes that, at the very least, ConAgra's behavior exhibited "a state of mind so reckless as to the consequences that it is held to be the equivalent of intent." *Spalding, 203 F.3d at 807*. Such circumstantial evidence is sufficient to establish the intent element of common-law fraud. *Id.*

> Intent need not be proven by direct evidence; it is most often proven by a showing of acts, the natural consequences of which are presumably intended by the actor. Generally, intent must be inferred from the facts and circumstances surrounding the applicant's conduct. The drawing of inferences, particularly in respect of an intent-implicating question . . . is peculiarly within the province of the fact finder that observed the witnesses. . . . However, given the ease with which a relatively routine act of patent prosecution can be portrayed as intended to mislead or deceive, clear and convincing evidence of conduct sufficient to support an inference **[**51]** of culpable intent is required. . . . While intent to deceive the PTO may be found as a matter of inference from circumstantial evidence, circumstantial evidence cannot indicate merely gross negligence. . . . Clear and convincing evidence must prove that an applicant had the specific intent to accomplish an act that the applicant ought not to have performed, viz., misleading or deceiving the PTO.

Molins plc v. Textron, 48 F.3d 1172, 1180-1181 (Fed. Cir. 1995).

Unitherm's burden at trial was therefore to present evidence that a reasonable jury could view as clear and convincing proof that ConAgra intended to defraud the PTO. *See id.* ConAgra argues on appeal that Unitherm failed to meet that burden. We must therefore review the sufficiency of Unitherm's evidence, while assuming that the jury disbelieved all evidence favorable to ConAgra. *See Reeves, 530 U.S. at 151*.

Unitherm proffered ample evidence that its personnel performed several browning demonstrations for ConAgra between September 1993 and January 1994. The key ConAgra representative at these demonstrations was Syed Hussein, ConAgra's product development manager and a co-worker **[**52]** of the named inventor, Prem Singh. At trial, on direct examination, Hussein testified that "to the best of his recollection," when he presented the product to a group of his co-workers, Singh was part of the group. Unitherm's David Howard also testified that Singh had attended a marketing seminar at which Howard personally spoke for about ninety minutes, and other Unitherm personnel provided a video demonstration of the product. This evidence demonstrates that ConAgra knew of prior uses of the process.

Unitherm also proffered ample evidence of a second round of demonstrations for ConAgra between 1995 and 1997. At his deposition, ConAgra's Arnold Mikelberg testified that shortly after becoming president of Armour Swift-Eckrich in mid-1995, he invited **[***1720]** David Howard to demonstrate his process, and that this demonstration led to further testing at ConAgra. ConAgra and Unitherm followed these tests with further discussions. On April 25, 1996, for example, Unitherm directed a fax to Singh containing drawings and schematics for a browning line. Unitherm proffered numerous other documents indicating that, at the very least, Unitherm directed detailed plans to Singh. On April 21, 1997, Howard **[**53]** wrote to ConAgra's David Liddle, noting that: "I have sold the process to four competitors. How do I get [you] to move forward?" This letter indicates **[*1361]** that ConAgra knew of prior sales, as well as the prior demonstrations.

Unitherm submitted additional documents and testimony to bolster its arguments even further. ConAgra questioned the implications of some of the documents and the accuracy of some of the witnesses' memories. ConAgra also denied that its patented process was the same as the Unitherm process, and insisted that it was impossible to know what "golden brown" meant without formal measurements. Such responses, however, cannot save ConAgra from the limited factual review that we apply to sufficiency of evidence arguments about jury findings. *Reeves, 530 U.S. at 151*.

The jury was entitled to find *all* of Unitherm's evidence credible and to disbelieve *every* assertion that ConAgra made about a disputed fact. *Id.* Viewed in this light, it is reasonable for the jury to have concluded that Singh was fully aware that his "invention" was precisely the Unitherm process that David Howard had been trying to sell to ConAgra since 1993. The jury could also **[**54]** have concluded reasonably that Singh intended to deceive the PTO by claiming that he was "the original and first inventor or inventors of the subject matter which is claimed and for which a patent is sought," *37 C.F.R. § 1.63*, when he knew that he was not.

The best evidence of the fourth element of the alleged fraud, the PTO's justifiable reliance on Singh's deception that induced PTO action, is that the PTO issued the patent. ***HN45***[] The statutory pronouncement that "a patent shall be presumed valid," *35 U.S.C. § 282* implies that patent examiners are presumed to issue only valid patents. *Am. Hoist & Derrick Co. v. Sowa & Sons, Inc., 725 F.2d 1350, 1359 (Fed. Cir. 1984)*. Singh's misrepresentation of his own inventorship, and his omission of the evidence that ConAgra possessed about the Unitherm process and about Unitherm's demonstrations and sales of that process, defrauded the PTO. *See* *Nobelpharma, 141 F.3d at 1070*. Had the PTO not relied on this fraud, the Examiner would have reached the same conclusion as did the district court and this court--that David Howard had invented the claimed process no later than **[**55]** 1993, and that no valid patent could issue from Singh's application.

The fifth element of the alleged fraud, injury to the PTO and to the public that it serves, arises as a matter of course whenever the other four elements are met, because

> ***HN46***[] [a] patent by its very nature is affected with a public interest. The far reaching social and economic consequences of a patent, therefore, give the public a paramount interest in seeing that patent monopolies spring from backgrounds free from fraud or other inequitable conduct and that such monopolies are kept within their legitimate scope. Where fraud is committed, injury to the public through a weakening of the Patent System is manifest.

Norton v. Curtiss, 57 C.C.P.A. 1384, 1406, 433 F.2d 779 (1970) (citations omitted).

Taken together, then, (1) ConAgra is liable for Singh's material representation to the PTO that he invented the claimed process, which had been neither used nor sold more than a year prior to filing his patent application; (2) David Howard invented the claimed process and both used or sold it before the critical date; (3) ConAgra intended to deceive the PTO by filing a patent application misrepresenting **[**56]** the material facts of inventorship; (4) The PTO relied upon ConAgra's misrepresentations to issue the '027 Patent; and (5) ConAgra's fraud injured the public through a weakening of the patent system. *Norton*, 57 C.C.P.A. at 1406. ConAgra's knowing and willful misrepresentation **[*1362]** therefore constituted fraud on the PTO. *See* *Molins, 48 F.3d at 1180-1181*; *Spalding, 203 F.3d at 807*.

Unitherm has thus met the first and most basic requirement for bringing a *Walker Process* claim. Unitherm has shown that, as a matter of Federal Circuit ***antitrust law***, ConAgra attempted to enforce a patent that it obtained through fraud on the PTO. ConAgra is therefore stripped of its antitrust immunity and susceptible to antitrust liability--provided that Unitherm can show that ConAgra's behavior met all other necessary elements of a *§ 2* claim subject to Tenth Circuit law.

(v) Standing

Federal Circuit ***antitrust law*** is directed, almost entirely, to a single question: "Whether **[***1721]** conduct in procuring or enforcing a patent is sufficient to strip a patentee of its immunity from the antitrust laws." *Nobelpharma, 141 F.3d at 1068*. ***HN47***[] Once we have determined, **[**57]** as we have here, that a patentee deserves no antitrust immunity, our inquiry shifts to apply the substantive antitrust laws of the regional circuit. *Id.*

ConAgra challenges on appeal, as it did below, Unitherm's standing to bring its antitrust claim. It is widely recognized ***HN48***[] that an antitrust plaintiff must allege more than simply that the defendant's wrongful behavior directly damaged the plaintiff's business, but also that the accused behavior stifled competition. *See, e.g.*, *Ill. Brick Co. v. Illinois, 431 U.S. 720, 724, 52 L. Ed. 2d 707, 97 S. Ct. 2061 (1977)*; *E. Food Servs., Inc. v. Pontifical Catholic Univ. Servs. Ass'n, 357 F.3d 1, 4 (1st Cir. 2004)*; *Hayes v. Solomon, 597 F.2d 958, 973 (5th Cir. 1979)*. The line between antitrust claims and ordinary business tort and contract claims is not always clear. Some behavior, (according to Unitherm, ConAgra's behavior), can give rise to both sets of claims; the classic example is a near monopolist who burns down the plant of his only competitor. *See E. Food, 357 F.3d at 4*.

For Unitherm to possess antitrust standing under Tenth Circuit law, it must demonstrate that ConAgra's **[**58]** behavior caused it to suffer an "antitrust injury." *Ashley Creek Phosphate Co. v. Chevron USA, Inc., 315 F.3d 1245, 1252 (10th Cir. 2003)*.

> ***HN49***[] An antitrust injury is defined as an injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. . . . Factors to consider in evaluating antitrust standing include: (1) the causal connection between the alleged antitrust violation and the harm; (2) improper motive or intent of defendants; (3) whether the claimed injury is one sought to be redressed by antitrust damages; (4) the directness between the injury and the market restraint resulting from the alleged violation; (5) the speculative nature of the damages claimed; and (6) the risk of duplicative recoveries or complex damage apportionment.

Sports Racing Servs. v. Sports Car Club of Am., 131 F.3d 874, 882 (10th Cir. 1997) (internal citations and quotations omitted). *See also Indium Corp. of Am. v. Semi-Alloys, Inc., 781 F.2d 879, 882 (Fed. Cir. 1985)*.

Unitherm's allegations met all six of the Tenth Circuit's enumerated factors: (1) ConAgra's attempts to block **[**59]** the "Unitherm process" by enforcing the '027 Patent caused Unitherm to lose prospective sales; (2) ConAgra's fraud of the PTO demonstrated improper intent; (3) Antitrust laws provide remedies for competition reduced in a relevant antitrust market, which Unitherm pled; (4) Enforcement of a patent right directly reduces competition; (5) A lost-sales analysis could, in theory, measure the harm; **[*1363]** and (6) Damage calculations should be neither unusually complex nor duplicative. The district court was therefore correct in ruling that Unitherm had antitrust standing and in allowing its action against ConAgra to proceed.

(vi) Market Definition

Despite possessing antitrust standing, however, Unitherm never presented any evidence that could possibly support critical factual elements of its claim. In particular, Unitherm failed to present any facts that could allow a reasonable jury to accept either its proposed market definition or its demonstration of antitrust injury. ***HN50***[] "It is well settled that defining the relevant market is an issue of fact" for the jury to determine. *Westman Comm'n Co. v. Hobart Int'l, Inc., 796 F.2d 1216, 1220 (10th Cir. 1986)*. ConAgra challenges the jury's **[**60]** factual findings. We must therefore review Unitherm's proffered evidence, once again disregarding all disputed evidence favorable to ConAgra, *Reeves, 530 U.S. at 151*, to determine whether a reasonable jury could have accepted Unitherm's definition of the relevant market.

HN51[] Under Tenth Circuit law, "claims of attempted monopolization under *§ 2 of the Sherman Act* require four elements of proof: (1) a relevant geographic and product market; (2) specific intent to monopolize the market; (3) anticompetitive conduct in furtherance of the attempt; and (4) a dangerous probability that the firm will succeed in the attempt." *United States v. AMR Corp., 335 F.3d 1109, 1113 (10th Cir. 2003)*. ***HN52***[] A relevant product market, in turn, is

> composed of products that have reasonable interchangeability for the purposes for which they are produced . . . Because the ability of consumers to turn to other suppliers restrains a firm from raising prices above the competitive level, the definition of the relevant market rests on a determination of available substitutes. . . To define a market in product and geographic terms is to say that if prices were appreciably raised **[***1722]** **[**61]** or volume appreciably curtailed for the product within a given area, while demand held constant, supply from other sources could not be expected to enter promptly enough and in large enough amounts to restore the old price and volume. . . .

Telecor Communications., Inc. v. Southwestern Bell Tel. Co., 305 F.3d 1124, 1130-1131 (10th Cir. 2002).

Market definition therefore hinges on economic evidence. If Unitherm provided economic evidence sufficient to convince a reasonable jury of its proposed market definition and to demonstrate antitrust injury, ConAgra's appeal must fail; the district court would have been correct in allowing the jury to consider Unitherm's antitrust claim--and in accepting their conclusion. But if, on the other hand, Unitherm provided economic evidence insufficient to convince any reasonable jury that ConAgra's enforcement of the '027 Patent harmed a relevant antitrust market, the antitrust claims should never have reached the jury. We therefore review the sufficiency of the economic evidence that Unitherm proffered in support of its antitrust claim.

Unitherm's brief to this court asserts that its expert, Dr. Mangum, testified at length **[**62]** on the lack of substitutes for the patented process. Mangum's testimony, or at least the relevant excerpts in the appellate record, cannot sustain Unitherm's definition of a relevant market. Mangum defined the market as: "the process for browning precooked whole muscle products by coating with a browning agent and applying sufficient heat to brown the product without substantial shrinkage." He relied on his understanding of the **[*1364]** court's summary judgment ruling to assume that the patented process and the Unitherm process were the same process--and therefore the only one included in his market definition. Consequently, he defined the scope of the '027 Patent as coterminous with a relevant antitrust market.

Mangum identified seven technical benefits that the patented process provided, and explained that no other process could provide all seven of these benefits. This unique combination of benefits led Mangum to conclude that no substitutes exist for the patented process (a.k.a. the Unitherm process), and therefore that it defined a relevant antitrust market. He also, however, concluded that pre-cooked turkeys prepared using the patented process competed with pre-cooked turkeys not prepared **[**63]** by the patented process at the retail level, but somehow not at the wholesale level. He never explained this seeming anomaly.

Mangum did not explain the relationship between technological substitution and economic substitution. Nothing in the record addresses whether potential customers of the patented process faced with a price increase would shift to other processes offering different combinations of benefits. *Id.* This determination, however, lies at the heart of market definition in antitrust analysis. ***HN53***[] "For every product, substitutes exist. But a relevant market cannot meaningfully encompass that infinite range. The circle must be drawn narrowly to exclude any other product to which, within reasonable variations in price, only a limited number of buyers will turn; in technical terms, products whose cross-elasticities of demand are small." *Times-Picayune Pub. Co. v. United States, 345 U.S. 594, 613, n.31, 97 L. Ed. 1277, 73 S. Ct. 872 (1953)*. Not only is economic substitutability critical to market definition, but it is improper to interpret "the Sherman Act to require that products be fungible to be considered in the relevant market." *United States v. E. I. Du Pont de Nemours & Co., 351 U.S. 377, 394, 100 L. Ed. 1264, 76 S. Ct. 994 (1956).* **[**64]** *See generally* U.S. Department of Justice, Merger Guidelines (1982), ch. 1.1 (describing the agencies' approach to product market definition in a merger analysis and the critical rule of *economic* substitutability).

Mangum's testimony specifically described the market in terms of technological substitutability, not economic substitutability. The scant economic evidence in the record suggests strongly that his market definition is incorrect. ConAgra's inability to attract any licensees is indicative of a lack of pricing power--*the* single most important element in defining a relevant antitrust market. ***HN54***[] "Market power is the power to force a purchaser to do something that he would not do in a competitive market. It has been defined as the ability of a single seller to raise price and restrict output." *Eastman Kodak, 504 U.S. at 464* (citations omitted). Mangum's reliance upon technological, rather than economic, substitution is therefore a fatal flaw in establishing his proposed market definition; it left him with no economic content to sustain his relevant market.

Furthermore, on cross-examination, Mangum testified that he was unaware of anyone who had ever **[**65]** sold the process that defined his relevant market--other than tied to the sale of an oven. Mangum explicitly testified that, to the best of his knowledge, there has never been a transaction in his proposed relevant **[***1723]** market. He steadfastly refused to clarify the relationship among the market for the specific browning process that he had identified, the market for browning processes generally, and the market for ovens that enabled their owners to use either the specific browning process or browning processes more generally. He testified to a lack of **[*1365]** knowledge as to whether or not the bundling of the identified process with an oven bore any relation to the prices charged for enabling ovens. Mangum's testimony cannot sustain the narrow market that he defined and that Unitherm pleads as a relevant antitrust market.

Beyond that initial omission, Mangum's testimony on other points is short on economic content. His assessment of ConAgra's "dangerous probability of success," another critical component of an attempted monopolization claim, *Spectrum Sports v. McQuillan, 506 U.S. 447, 459, 122 L. Ed. 2d 247, 113 S. Ct. 884 (1993)*, essentially rests upon a tautology: Because he defined the relevant **[**66]** market as coterminous with the '027 Patent, any attempt to enforce the patent would qualify as an attempt with a dangerous probability of succeeding. He then pointed to ConAgra's counterclaim against Jennie-O and ConAgra's letters as evidence of attempted patent enforcement.

Finally, when asked about antitrust injury, Mangum pointed to the analysis of Dr. Kinrich, Unitherm's damages expert. According to Mangum, Kinrich's ability to measure damages proves that Unitherm suffered antitrust injury. Kinrich, however, "was asked to assume that the jury finds in favor of Unitherm and finds against Swift-Eckrich and compute what the damages were or would have been to Unitherm if liability is found." Kinrich's testimony gave no indication that he ever tried to differentiate harm attributable to ConAgra's *antitrust* liability from harm attributable to other allegations for which ConAgra might be liable. Nor, for that matter, did either Mangum or Kinrich try to differentiate between ConAgra's liability and other potential causes of the losses that Kinrich measured. In other words, neither Kinrich's testimony nor Mangum's testimony attempted to show any form of causality, a critical element **[**67]** needed to establish antitrust injury, *Ashley Creek, 315 F.3d at 1252*, and a point upon which the judge instructed the jury correctly.

In short, Unitherm failed to present any economic evidence capable of sustaining its asserted relevant antitrust market, and little to support any other aspect of its *Section 2* claim. Unitherm has presented conclusory testimony from its expert that defines the market as coterminous with the patent based entirely on issues of *technical* substitutability, described no market analysis, inferred market power from the possession of a patent, tautologically equated unsuccessful attempts at collecting royalties with a dangerous probability of success, and inferred antitrust injury from economic loss. ConAgra is correct in asserting that Unitherm failed to provide any evidence capable of sustaining the jury's finding of antitrust liability. We therefore vacate the court's judgment of ConAgra's antitrust liability and the award of the consequent damages. [7]

---

[7] ConAgra failed to renew its motion for judgment as a matter of law ("JMOL") after the verdict pursuant to *Federal Rules of Civil Procedure 50(b)*. Unitherm contends that ConAgra therefore waived its right to dispute the sufficiency of the evidence supporting the jury's antitrust verdict. We have ruled ***HN55***[] as a matter of Federal Circuit law that, for issues unique to our jurisdiction, a 50(b) motion is necessary to preserve a sufficiency of the evidence argument for appeal. *Biodex Corp. v. Loredan Biomedical, Inc., 946 F.2d 850, 859-62 (Fed. Cir. 1991)*. On most issues related to *Rule 50* motions, however, we generally apply regional circuit law unless the precise issue being appealed pertains uniquely to patent law. *Duro-Last, Inc. v. Custom Seal, Inc., 321 F.3d 1098, 1106 (Fed. Cir. 2003)*. Because we decide antitrust issues that do not implicate patent law, including market

[68]** ***[*1366]*** *E. Tortious Interference*

ConAgra also appeals the jury verdict finding it liable for tortious interference with prospective economic advantage, a state law claim. [8] The Oklahoma Supreme Court has explained its approach to this tort largely by incorporation:

> ***HN57***[] Oklahoma jurisprudence teaches that one has the right to prosecute a lawful business without unlawful molestation or unjustified **[***1724]** interference from any person, and any malicious interference with that business is an unlawful act and an actionable wrong. For a discussion of the difference between interference with a prospective economic advantage and with contractual or business relations, see *Overbeck v. Quaker Life Ins. Co., 1984 OK CIV APP 44, 757 P.2d 846, 847-48 (Okla. Civ. App. 1984)*. See in this connection [e.g.] *Lakeshore Community Hosp., Inc. v. Perry, 212 Mich. App. 396, 538 N.W.2d 24, 27 (Mich. App. 1995)*. . . for the elements of tortious interference with advantageous business relationships or prospective economic relations.

Gaylord Entm't Co. v. Thompson, 1998 OK 30, 958 P.2d 128, 150, n.96 (Okla. 1998). ***HN58***[] "Interference with a prospective economic advantage usually involves interference **[**69]** with some type of reasonable expectation of profit, whereas interference with a contractual relationship results in loss of a property right." *Overbeck, 757 P.2d at 847-48*.

> The basic elements of tortious interference with a business relationship are the existence of a valid business relation or expectancy, knowledge of the relationship or expectancy on the part of the interferer, an intentional interference inducing or causing a breach or termination of the relationship or expectancy, and resultant damage to the party whose relationship has been disrupted.

Lakeshore Cmty., 538 N.W.2d at 27.

Oklahoma law therefore required Unitherm to prove first, that it possessed a reasonable expectation of future profits from future sales of its browning process (likely in conjunction with its ovens), and **[**70]** second, that ConAgra intentionally interfered with that reasonable expectation. *See Gaylord, 958 P.2d at 150 n.96*. Unitherm's President, David Howard, and of one of its salesmen, Ron Snider, both testified that they expected future profitable sales, and offered the names of prospective customers. Unitherm's damages expert, Dr. Kinrich, presented an event study purporting to show that Unitherm's business declined beginning about the time that news of ConAgra's patent application spread throughout the industry. Kinrich also showed that his study measured losses somewhere between $ 4.5 million and $ 7.5 million.

This proffered evidence could lead a reasonable jury to conclude that Unitherm possessed a valid business expectancy. [9] **[*1367]** ConAgra knew that Unitherm sold browning processes to pre-cooked meat producers, such as Jennie-O. ConAgra's attempts to enforce its fraudulently obtained patent were an intentional interference with the future of Unitherm's business relationship with Jennie-O, and Kinrich's model measured Unitherm's damages. The jury's finding was not inherently unreasonable given this evidence. ***HN60***[] Oklahoma courts must affirm a

---

definition, under the law of the regional circuits, *Nobelpharma, 141 F.3d at 1067 n.5*, we similarly apply Tenth Circuit law to determine whether or not ConAgra has preserved its right to appeal. ***HN56***[] In the Tenth Circuit, the failure of a party to move for a JMOL post-verdict does not bar the party from appealing the sufficiency of the evidence, provided, as is the case here, that the party made the appropriate motion prior to the submission of the case to the jury. *See Cummings v. Gen. Motors Corp., 365 F.3d 944, 950-51 (10th Cir. 2004)*. The absence of a *Rule 50(b)* post-verdict motion for JMOL, however, precludes our entering judgment in favor of ConAgra. "The only remedy available is a new trial." *Id. at 951*. Thus, we may only vacate the jury's verdict in favor of Unitherm.

[8] ***HN59***[] "Bad faith is a prerequisite to [a] state-law tortious interference claim; without it, the claim is preempted by patent law." *Zenith, 182 F.3d at 1355*.

[9] Under Tenth Circuit law, ConAgra preserved its right to appeal the sufficiency of the evidence by moving for a directed verdict at the close of Unitherm's evidence and again at the close of its defense, despite failing to move for a post-verdict JMOL. *See Cummings, 365 F.3d at 950-51*.

jury verdict if there is any competent **[**71]** evidence reasonably tending to support it. *Computer Publs., 49 P.3d at 735*. We therefore affirm the jury's finding of liability for intentional interference with prospective advantage, and of the consequent damages.

CONCLUSION

Because the district court construed the only disputed term in the '027 Patent correctly and properly granted summary judgment that the '027 Patent is invalid and unenforceable under *35 U.S.C. § 102(b)*, we affirm those judgments. Because the district court was also correct, under Oklahoma law, in allowing the jury to decide the issue of tortious interference and to accept the jury's findings on both liability and damages, we affirm those judgments **[**72]** as well. Because the district court erred, however, in allowing the jury to decide Unitherm's antitrust claims despite the total absence of economic evidence capable of sustaining those claims, we vacate the judgment finding ConAgra liable for violating *§ 2 of the Sherman Act.* We also vacate all damages awarded consequent to antitrust liability. We remand the matter to the district court for further proceedings consistent with this opinion.

AFFIRM-IN-PART, VACATE-IN-PART, AND REMANDED

COSTS

LexisNexis® Headnotes

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN1[] **Defenses, Demurrers & Objections, Motions to Dismiss**

A motion to dismiss should not be granted unless a party can prove no set of facts entitling it to relief.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN2[] **Motions to Dismiss, Failure to State Claim**

For a *Fed. R. Civ. P. 12(b)(6)* dismissal to properly lie, a complaint must reveal an insuperable bar to relief on its face. A court must accept as true, in a hypothetical sense, all of the factual claims of the complaint, and must view those facts in a light most favorable to the nonmoving party. In treating the factual allegations of a complaint as true, the court does not, however, blindly accept the legal conclusions drawn by the pleader from the facts. In construing the facts, the court shall reject conclusory allegations of law and unwarranted inferences. Finally, the court must only consider the pleadings in determining whether a plaintiff has stated a claim upon which relief may be granted.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN3[] **Regulated Practices, Trade Practices & Unfair Competition**

Cal. Bus. & Prof. Code § 17200 prohibits "unfair competition" including any unlawful, unfair or fraudulent business act or practice. Except in cases brought by competitors alleging anticompetitive practices, business conduct need not be illegal to implicate the statute.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN4[] **Regulated Practices, Trade Practices & Unfair Competition**

In an unfair competition context, a breach of the duty of good faith and fair dealing will support an injunction under *Cal. Bus. & Prof. Code § 17200*.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Governments > Legislation > Interpretation

HN5[] **Regulated Practices, Trade Practices & Unfair Competition**

In an unfair competition context under *Cal. Bus. & Prof. Code § 17200*, the test is that a practice merely be unfair. The statute is far-reaching, and California courts have consistently interpreted the language of *§ 17200* broadly.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN6[] **Regulated Practices, Trade Practices & Unfair Competition**

In an action by a competitor alleging anticompetitive practices, the alleged misconduct must be conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN7[] **Regulated Practices, Trade Practices & Unfair Competition**

In an unfair competition context, *Cal. Bus. & Prof. Code § 17200* reaches any "business practice or act" and does not necessarily require repeated acts of misconduct.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Evidence > Burdens of Proof > General Overview

HN8[] **Regulated Practices, Trade Practices & Unfair Competition**

In an unfair competition context under *Cal. Bus. & Prof. Code § 17200*, the only requirement is that the defendant's practice is unlawful, unfair, deceptive, untrue, or misleading. The burden of proof is modest: a representative plaintiff must show that members of the public are likely to be deceived by the practice.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN9[] **Regulated Practices, Trade Practices & Unfair Competition**

In an unfair competition context, *Cal. Bus. & Prof. Code § 17200* is not confined to anticompetitive business practices, but is also directed toward the public's right to protection from fraud, deceit, and unlawful conduct.

Torts > ... > Fraud & Misrepresentation > Actual Fraud > General Overview

Torts > Business Torts > Fraud & Misrepresentation > General Overview

HN10[] **Fraud & Misrepresentation, Actual Fraud**

See *Cal. Civ. Code § 1710*.

Torts > Business Torts > Fraud & Misrepresentation > General Overview

HN11[] **Business Torts, Fraud & Misrepresentation**

The elements of actionable fraud in California include a false representation, actual or implied, or concealment of matter of fact, that is material to transaction, made falsely; knowledge of falsity, or statements made with such disregard and recklessness that knowledge is inferred; intent to induce another into relying on representation; reliance by one who has right to rely; and resulting damage.

Torts > Business Torts > Fraud & Misrepresentation > General Overview

HN12[] **Business Torts, Fraud & Misrepresentation**

Minnesota law requires a party asserting a fraud claim to plead the following with specificity that there was a false representation regarding a past or present fact, the fact was material and susceptible of knowledge, the representor knew it was false or asserted it as his or her own knowledge without knowing whether it was true or false, the representor intended to induce the claimant to act or justify the claimant in acting, the claimant was induced to act or justified in acting in reliance on the representation, the claimant suffered damages, and the representation was the proximate cause of the damages.

Torts > Business Torts > Fraud & Misrepresentation > General Overview

HN13[] **Business Torts, Fraud & Misrepresentation**

In a fraud context, where a representation regarding a future event is alleged, an additional element of proof is that the party making the representation had no intention of performing when the promise was made.

Opinion by: JOHN R. TUNHEIM

Opinion

MEMORANDUM OPINION AND ORDER ON PLAINTIFF'S MOTION TO DISMISS

C.H. Robinson Worldwide, Inc., ("CHR"), a shipping and logistics company, sued Ghirardelli Chocolate Company ("Ghirardelli") alleging Ghirardelli had failed to pay for shipping services provided by CHR. Ghirardelli brought several counterclaims, and Ghirardelli also brought a separate action in California state court. The California case was removed to federal court, and transferred to the District of Minnesota, and has been consolidated with this case. CHR has moved to dismiss Ghirardelli's claims of unfair competition and fraud, as well as Ghirardelli's request for declaratory judgment. After CHR filed this motion, but before the Court heard argument, Ghirardelli filed an amended answer and counterclaim. The parties addressed the amended counterclaim in supplemental briefing. For the **[*2]** reasons discussed below, the Court grants CHR's motion to dismiss the unfair competition claim, and denies the motion to dismiss in all other respects.

BACKGROUND

The Court provides the following preliminary sketch of the background of this dispute. Beginning in about 1999, CHR provided warehousing, shipping and distribution services to Ghirardelli. In 2001, the parties contemplated "stepping up" their relationship, and began negotiating a contract by which CHR would provide additional services to Ghirardelli. Based initially on a bid, Ghirardelli agreed to hire CHR contingent upon the parties successfully negotiating an appropriate written contract. The negotiations proceeded for several months. Ghirardelli claims that CHR sent a final version of the contract to California in spring of 2002, and Ghirardelli executed the contract in California on May 6, 2002. Ghirardelli claims the final, executed contract was then faxed to CHR.

CHR argues that the parties negotiated, but that they never reac hed an agreement. CHR claims that it continued to provide services to Ghirardelli under their prior understanding, and that Ghirardelli owes CHR about $ 4 million for those services. **[*3]** CHR says that the "contract" Ghirardelli purportedly executed was really just a template that would allow the parties to continue their negotiations.

CHR claims that beginning in 2002, Ghirardelli consistently refused to pay invoices. Ghirardelli claims that CHR provided substandard service and failed to provide important services, such as vital monthly reports, and communications capabilities. Ghirardelli also claims that it detrimentally relied on CHR's representations that CHR was proceeding under the contract. For example, Ghirardelli claims that it consolidated three eastern warehouses, had CHR take on the management role of Ghirardelli's west coast provider of warehousing, and implemented a new shipping schedule and minimum order policy. (Amended Counterclaim at P 11.) Ghirardelli further claims that CHR failed to carry out its obligations under the contract.

The parties ended the relationship in 2003. This lawsuit followed.

ANALYSIS

I. Standard of Review

HN1[] "A motion to dismiss should not be granted unless [Ghirardelli] can prove no set of facts entitling [it] to relief." Kottschade v. City of Rochester, 319 F.3d 1038, 1040 (8th Cir. 2003). HN2[] For **[*4]** a 12(b)(6) dismissal to properly lie, the complaint must reveal an insuperable bar to relief on its face. United States v. Aceto Agric. Chems. Corp., 872 F.2d 1373, 1376 (8th Cir. 1989). The Court must accept as true, in a hypothetical sense, all of the factual claims of the complaint, and must view those facts in a light most favorable to the nonmoving party, in this case Ghirardelli. *See* Schaller Telephone Co. v. Golden Sky Systems, Inc., 298 F.3d 736, 740 (8th Cir. 2002); Anderson v. Franklin County, 192 F.3d 1125, 1131 (8th Cir. 1999). In treating the factual allegations of a complaint as true, the Court "does not, however, blindly accept the legal conclusions drawn by the pleader from the facts." Westcott v. City of Omaha, 901 F.2d 1486, 1488 (8th Cir. 1990). In construing the facts, the Court shall "reject conclusory allegations of law and unwarranted inferences." Silver v. H & R Block, Inc., 105 F.3d 394, 397 (8th Cir. 1997). Finally, the Court must only consider the pleadings in determining whether the plaintiff has stated a claim upon which relief may be granted. Fed. R. Civ. P. 12(b)(6) **[*5]** .

II. "Unfair competition"

Ghirardelli brings a claim of "unfair competition" pursuant to California Business and Professions Code § 17200, which HN3[] prohibits "unfair competition" including "any unlawful, unfair or fraudulent business act or practice." Cal. Bus. & Prof. Code § 17200. *See also* ABC Int'l Traders, Inc. v. Matsushita Elec. Corp. of America, 14 Cal. 4th 1247, 61 Cal. Rptr. 2d 112, 931 P.2d 290 (Cal. 1997). Except in cases brought by competitors alleging anticompetitive practices, business conduct need not be illegal to implicate the statute. *See* State Farm Fire & Cas. Co. v. Superior Court, 45 Cal. App. 4th 1093, 53 Cal. Rptr. 2d 229 (1996) (holding that HN4[] a breach of the duty of good faith and fair dealing will support an injunction under § 17200). [1] Rather, HN5[] the "test … is that a practice merely be unfair." Allied Grape Growers v. Bronco Wine Co., 203 Cal. App. 3d 432, 249 Cal. Rptr. 872, 883 (1988). The statute is far-reaching, and "California courts have consistently interpreted the language of section 17200 broadly." South Bay Chevrolet v. General Motors Acceptance Corp., 72 Cal. App. 4th 861, 85 Cal. Rptr. 2d 301, 309 (Cal. Ct. App. 1999). **[*6]**

HN7[] The statute reaches any "business practice or act" and does not necessarily require repeated acts of misconduct. **[*7]** Cal. Bus. & Prof. Code § 17200; *see also* Podolsky v. First Healthcare Corp., 50 Cal. App. 4th 632, 58 Cal. Rptr. 2d 89, 102 (Cal. Ct. Ap. 1996) (acknowledging previous requirement of pattern or course of injury, but noting that 1982 amendment "presumably permit[s] invocation of the UCA based on a single instance of unfair conduct").

CHR asserts that Ghirardelli's claim fails as a matter of law, because Ghirardelli has not pled (and could not prove) that any member of the public is likely to be deceived--or is impacted in anyway--by the alleged misconduct. Ghirardelli disputes the necessity of pleading that members of the public are impacted by the business practice or act at issue.

Support, at least in a general sense, for each of these propositions may be found in California case law. In Allied Grape Growers v. Bronco Wine Co., 203 Cal. App. 3d 432, 249 Cal. Rptr. 872, 884-85 (Cal. Ct. App. 1988), the California Court of Appeals noted that no California case required that a "business practice" had to affect more than one victim to be actionable. The court continued, "there is nothing in the word 'practice' that necessarily **[*8]** limits section 17200 cases to those actions involving multiple victims." Id. The court left the question open, however,

[1] The California Supreme Court, in Cel-Tech Comm., Inc. v. Los Angeles Cellular Tel. Co., 20 Cal. 4th 163, 83 Cal. Rptr. 2d 548, 973 P.2d 527, 543 - 44 (Cal 1999), announced that HN6[] in an action by a competitor alleging anticompetitive practices, the alleged misconduct must be "conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." The *Cel-Tech* court explicitly limited its discussion to actions by competitors alleging only anticompetitive practices. "Nothing we say relates to actions by consumers or by competitors alleging other kinds of violations of the unfair competition law such as 'fraudulent' or 'unlawful' business practices or 'unfair, deceptive, untrue or misleading advertising.'" Id. at 544 n.12.

"because [plaintiff] is a cooperative comprised of over 1,000 growers, many of whom were victims, and there was also evidence at trial that there were non-Allied victims …." *Id.*

CHR, in contrast, cites several cases for the proposition that the "public" must be impacted by the alleged business practice, and indeed, many California courts assume a public or consumer component to claims brought pursuant to *§ 17200*. *See, e.g., Prata v. Superior Court, 91 Cal. App. 4th 1128, 111 Cal. Rptr. 2d 296, 308 (Cal. Ct. App. 2001)* (noting that ***HN8***[] "the only requirement is that the defendant's practice is unlawful, unfair, deceptive, untrue, or misleading. The burden of proof is modest: the representative plaintiff must show that **members of the public** are likely to be deceived by the practice.") (emphasis added); *South Bay Chevrolet v. General Motors Acceptance Corp., 72 Cal. App. 4th 861, 85 Cal. Rptr. 2d 301, 309 (Cal. Ct. App. 1999)* (noting that "*Section 17200* ***HN9***[] 'is not confined to anticompetitive business practices, but is also **[*9]** directed toward the **public's** right to protection from fraud, deceit, and unlawful conduct.'") (emphasis added) (quoting *Hewlett v. Squaw Valley Ski Corp., 54 Cal. App. 4th 499, 63 Cal. Rptr. 2d 118 (Cal. Ct. App. 1997))*. Most of the cases cited by the parties involve some sort of "public" or consumer component, or contain language intimating such a component. *See, e.g., Podolsky, 50 Cal. App. 4th 632, 58 Cal. Rptr. 2d 89* (addressing suit against nursing home operator brought by relatives of nursing home residents who had guaranteed payment to nursing homes for services provided to residents); *Schnall v. Hertz Co., 78 Cal. App. 4th 1144, 93 Cal. Rptr. 2d 439, 456-59 (Cal. Ct. App. 2000)* (involving alleged fraudulent concealment of certain car rental charges in contract likely to deceive members of the public).

Although the Court recognizes that *Section 17200* is intended to provide broad protection, Ghirardelli cited no case, and the Court's own research has revealed none, in which an unfair competition claim under *Section 17200* was maintained by a sophisticated business entity dealing at arm's length with a business associate. **[*10]** Contrary to Ghirardelli's representation, Ghirardelli is not a "consumer" of CHR's services--at least as how that term is discussed in *Section 17200* cases. *See, e.g., Schnall, 93 Cal. Rptr. 2d at 457-59* (discussing members of the public who rent cars as "consumers"); *Podolsky, 58 Cal. Rptr. 2d at 98-100* (discussing "unfairness" prong is intentionally broad, and noting that it is intended to prevent conduct injurious to consumer--in this case, relatives of nursing home residents). In this case, there is no indication that the interactions between CHR and Ghirardelli had any impact on the "public" or "consumers." There is no indication that this is the type of conduct the California legislature intended to reach. As such, the Court grants CHR's motion to dismiss this claim.

III. Fraud

Ghirardelli also brings a cause of action pursuant to *California Civil Code § 1710(a)*, alternatively asserts a common law fraud action under Minnesota common law. Ghirardelli suggests that CHR's promises to enter into a contractual relationship, and its statements and actions affirming the existence of the contractual relationship amount **[*11]** to fraud, because at the time CHR made the statements and affirmed the contract, CHR had no intention of performing. Ghirardelli claims that it relied on CHR's promises to its detriment.

California law defines "actual fraud" as ***HN10***[] "any of the following acts, committed by a party to the contract, or with his connivance, with intent to deceive another party thereto, or to induce him to enter into the contract: 1) The suggestion, as a fact, of that which is not true, by one who does not believe it to be true; 2) The positive assertion, in a manner not warranted by the information of the person making it, of that which is not true, though he believes it to be true; 3) The suppression of that which is true, by one having knowledge or belief of the fact; 4) A promise made without any intention of performing it; or, 5) Any other act fitted to deceive." *Cal. Civ. Code § 1710*.

HN11[] The elements of actionable fraud in California include a false representation, actual or implied, or concealment of matter of fact, that is material to transaction, made falsely; knowledge of falsity, or statements made with such disregard and recklessness that knowledge is inferred; intent to induce **[*12]** another into relying on representation; reliance by one who has right to rely; and resulting damage. *Ach v. Finkelstein, 264 Cal. App. 2d 667, 70 Cal. Rptr. 472, 477 (Cal. Ct. App. 1968)*.

HN12[] Minnesota law requires a party asserting a fraud claim to plead the following with specificity: "that there was a false representation regarding a past or present fact, the fact was material and susceptible of knowledge, the representer knew it was false or asserted it as his or her own knowledge without knowing whether it was true or false, the representer intended to induce the claimant to act or justify the claimant in acting, the claimant was induced to act or justified in acting in reliance on the representation, the claimant suffered damages, and the representation was the proximate cause of the damages." *Martens v. Minnesota Mining & Mfg. Co., 616 N.W.2d 732, 747 (Minn. 2000)*. In this case, Ghirardelli suggests that CHR made a false statement as to CHR's future intent. HN13[] "Where a representation regarding a future event is alleged, as here, an additional element of proof is that the party making the representation had no intention of performing when the promise **[*13]** was made." *Id.*

Ghirardelli adequately has pled the elements required by both California and Minnesota law, therefore CHR is not entitled to dismissal of the fraud cause of action. [2]

IV. Declaratory Judgment

The "contract" contained a paragraph titled "Freight Cost Reduction Initiative" on which Ghirardelli appears to premise its claim for declaratory judgment. The paragraph provides:

> a. It is understood by both Shipper (Ghirardelli) and CHRW that this agreement was entered into by Shipper for the purpose of reducing overall transportation costs. Therefore, based on the proposed rates supplied by CHR, the cost of transportation services provided by CHR under this agreement **[*14]** would yield, in 2002, a one time freight cost reduction of 10% in the freight cost per pound shipped when compared to a mutually agreed baseline of the Shipper actual costs per pound shipped in the calendar year 2001.

CHR argues that Ghirardelli has not stated a claim for declaratory judgment because the contract, even if there is one, does not provide for the requested relief as the quoted paragraph creates only an initiative, not a guaranteed 10% cost reduction. In addition, CHR argues that the "baseline" is not identified in the contract, so there will be no way to calculate the 10% savings. Ghirardelli counters that the claim should not be dismissed unless the Court concludes that Ghirardelli will be entitled to no manner of declaratory relief should it prevail at trial. Ghirardelli also argues that the "baseline" was understood by the parties, and that because CHR drafted the contract (and is the moving party in this motion to dismiss) any ambiguity should be resolved in favor of maintaining the claim.

Construing the facts in the counterclaim in the light most favorable to Ghirardelli, it appears that Ghirardelli could establish that it will be entitled to some form of declaratory **[*15]** relief. Ghirardelli has pled facts which would allow the Court to find the contractual language binding. CHR argues that Ghirardelli cannot be in a better position than it would have been had the contract been executed, and that is what Ghirardelli's declaratory judgment claim seeks. CHR's logic ultimately might be persuasive, but at this time, it is premature.

ORDER

Based upon the foregoing, the submissions of the parties, the arguments of counsel and the entire file and proceedings herein, **IT IS ORDERED** that plaintiff's motion to dismiss [Docket No. 32] is **GRANTED IN PART and DENIED IN PART** as follows:

1. Plaintiff's motion to dismiss the first cause of action of the amended counterclaim (for Unfair Competition) is **GRANTED.** This cause of action is **DISMISSED WITH PREJUDICE;**

---

[2] The parties did not address whether Minnesota or California law applies to this dispute. Instead, the parties agree that the laws are similar. For the purposes of this motion, the Court need not address choice of law issues, because under either State's law, Ghirardelli has adequately pled a fraud cause of action.

2. In all other respects, Plaintiff's motion is **DENIED.**

DATED: July 19, 2004

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Motions to Dismiss, Failure to State Claim**

In ruling on a motion to dismiss, the court must draw all reasonable inferences that favor the plaintiff, construe the allegations of the complaint in the light most favorable to the plaintiff, and accept as true all well-pleaded facts and allegations in the complaint.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Dismissal > Involuntary Dismissals > Failure to State Claims

Civil Procedure > Judgments > Relief From Judgments > General Overview

HN2[] **Motions to Dismiss, Failure to State Claim**

The allegations of a complaint should not be dismissed for a failure to state a claim unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief. Nonetheless, in order to withstand a motion to dismiss, a complaint must allege the "operative facts" upon which each claim is based. The plaintiff need not allege all of the facts involved in the claim and can plead conclusions. However, any conclusions pled must provide the defendant with at least minimal notice of the claim, and the plaintiff cannot satisfy federal pleading requirements merely by attaching bare legal conclusions to narrated facts which fail to outline the bases of his claim.

15 U.S.C.S. § 2 of the Sherman Act makes it unlawful to monopolize, to attempt to monopolize, or to conspire to monopolize.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

HN5[] **Private Actions, Standing**

Private parties are authorized to bring civil actions to enforce the Sherman Act pursuant to § 4 of the Clayton Act, *15 U.S.C.S. § 15*.

Antitrust & Trade Law > Clayton Act > General Overview

HN6[] **Antitrust & Trade Law, Clayton Act**

See *15 U.S.C.S. § 15*.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN7[] **Private Actions, Standing**

To bring an action under *15 U.S.C.S. § 15* a private plaintiff must show more than injuries that might conceivably be traced to an antitrust violation.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN8[] **Private Actions, Remedies**

The purpose of the Sherman Act is to assure customers the benefits of price competition, and protect the economic freedom of participants in the relevant market. The reason for limiting the application of ***antitrust law*** to privately brought actions is to filter out complaints by competitors and others who may be hurt by productive efficiencies, higher output, and lower prices, all of which the antitrust laws are designed to encourage, and a plaintiff who wants something, such as less competition or higher prices, that would injure consumers, does not suffer antitrust injury.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN9[] **Private Actions, Standing**

A private plaintiff bringing an antitrust claim is required to show a direct link between the antitrust violation and the antitrust injury. The plaintiff in an antitrust action must show that: (1) it suffered an antitrust injury, and (2) the plaintiff is the proper plaintiff to maintain an antitrust action with respect to each of the markets.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN10[] **Monopolies & Monopolization, Actual Monopolization**

For a monopoly claim brought under *15 U.S.C.S. § 2* of the Sherman Act a plaintiff must show: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Torts > ... > Concerted Action > Civil Conspiracy > General Overview

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > General Overview

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

HN11[] **Complaints, Requirements for Complaint**

The notice pleading standard for federal courts requires a plaintiff only to allege the "operative facts" rather than all the pertinent facts. The United States Court of Appeals for the Seventh Circuit has made it clear that there is no requirement in federal suits of pleading the facts or the elements of a claim, with the exceptions listed in *Fed. R. Civ. P. 9*, and thus it is enough in pleading a conspiracy merely to indicate the parties, general purpose, and approximate date, so that the defendant has notice of what he is charged with.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

HN12[] **Complaints, Requirements for Complaint**

A plaintiff is not required under the notice pleading standard to plead sufficient facts to establish the legal elements of his claim. At the pleading stage the plaintiff receives the benefit of imagination, so long as the hypotheses are consistent with the complaint, and matching facts against legal elements comes later.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Dismissal > Involuntary Dismissals > Failure to State Claims

HN13[] **Motions to Dismiss, Failure to State Claim**

The allegations of a complaint should not be dismissed for failure to state a claim unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief.

Opinion

MEMORANDUM OPINION

SAMUEL DER-YEGHIAYAN, District Judge

This matter is before the court on Plaintiff/Counter-Defendant the Multiple Listing Service of Northern Illinois, Inc.'s ("MLS") motion to dismiss the counterclaim pursuant to *Federal Rules of Civil Procedure 12(b)(6)*. For the reason stated below we deny the motion to dismiss the counterclaim.

BACKGROUND

Defendant/Counter-Plaintiffs Amerihall of Illinois, **[*2]** LLC and Defendant David Hall ("Hall") (collectively "Amerihall") alleged that MLS maintains a multiple listing service that provides real estate listing information to licensed real estate brokers and sales agents in the Chicago and Northern Illinois geographic region. Amerihall also alleges that it provides a unique brokerage structure which allows it to provide brokerage services and support to its agents for a nominal fee while allowing its agents to keep almost of their commissions. Hall is the president and owner of Amerihall. Amerihall is a participant in MLS and Hall is a subscriber to MLS. As a participant and subscriber, Amerihall and Hall admit that they are bound by the MLS Rules and Regulations.

Amerihall alleged that MLS has a unique and monopolistic position in the real estate industry in the Northern Illinois market because it has no direct competitors to the services and information MLS provides to real estate professionals. According to Amerihall, since its inception Amerihall has attempted to enter this market but MLS has prevented them from doing so. Amerihall contends that MLS's promulgation of Rule 10.8, as amended, prohibits any MLS participant or subscriber **[*3]** from using the email addresses of other MLS participants and subscribers that are contained in MLS's copyrighted real estate information database and the rule further prohibits sending to such participants or subscribers unsolicited electronic mail messages containing job recruitment notices or other advertisements. Amerihall alleges that this rule is unreasonable and was implemented for no justifiable purpose other than to restrict Amerihall's efforts to conduct their business and compete with MLS.

As a result of these allegations, Amerihall as the Counter-Plaintiff brought a two count complaint against MLS in its counterclaim. Count I alleges that MLS violated the prohibitions on monopolization contained in Section 2 of the Sherman Act, *15 U.S.C. § 2*, when it enforced against Amerihall Section 10.8 of its Rules and Regulations. Count II requests a declaration that MLS has restrained trade as alleged in Count I by enforcing Rule 10.8 of its Rules and Regulations against Amerihall. MLS has moved to dismiss both Counts I and II of the counterclaim.

LEGAL STANDARD

HN1[] In ruling on a motion to dismiss, the court must draw all reasonable inferences that favor **[*4]** the plaintiff, construe the allegations of the complaint in the light most favorable to the plaintiff, and accept as true all well-pleaded facts and allegations in the complaint. *Thompson v. Illinois Dep't of Prof'l Regulation, 300 F.3d 750, 753 (7th Cir. 2002)*; *Perkins v. Silverstein, 939 F.2d 463, 466 (7th Cir. 1991)*. ***HN2***[] The allegations of a complaint should not be dismissed for a failure to state a claim "unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief." *Conley v. Gibson, 355 U.S. 41, 45-46, 2 L. Ed. 2d 80, 78 S. Ct. 99 (1957)*. Nonetheless, in order to withstand a motion to dismiss, a complaint must allege the "operative facts" upon which each claim is based. *Kyle v. Morton High School, 144 F.3d 448, 454-55 (7th Cir. 1998)*; *Lucien v. Preiner, 967 F.2d 1166, 1168 (7th Cir. 1992)*. The plaintiff need not allege all of the facts involved in the claim and can plead conclusions. *Higgs v. Carver, 286 F.3d 437, 439 (7th Cir. 2002)*; *Kyle, 144 F.3d at 455*. However, any conclusions pled must "provide the **[*5]** defendant with at least minimal notice of the claim," *Id.,* and the plaintiff cannot satisfy federal pleading requirements merely "by attaching bare legal conclusions to narrated facts which fail to outline the bases of [his] claim." *Perkins, 939 F.2d at 466-67*

DISCUSSION

In Count I of the counterclaim, Amerihall alleges a violation of Section 2 of the Sherman Act, *15 U.S.C. § 2* which states as follows:

> ***HN3***[] Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a felony, and, on conviction thereof, shall be punished by fine not exceeding $ 10,000,000 if a corporation, or, if any other person, $ 350,000, or by imprisonment not exceeding three years, or by both said punishments, in the discretion of the court.

15 U.S.C. § 2. Section 2 of the Sherman act ***HN4***[] "makes it unlawful to monopolize, to attempt to monopolize, or to conspire to monopolize." *Goldwasser v. Ameritech Corp., 222 F.3d 390, 396 (7th Cir. 2000).* **[*6]**

HN5[] Private parties are authorized to bring civil actions "to enforce the Sherman Act" pursuant to "§ 4 of the Clayton Act, *15 U.S.C. § 15*." *Sanner v. Board of Trade of City of Chicago, 62 F.3d 918, 926-27 (7th Cir. 1995)*. The Clayton Act provides that ***HN6***[] "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue . . . ." *15 U.S.C. § 15*. However, ***HN7***[] to bring such an action a private plaintiff must show more than "injuries that might conceivably be traced to an anti-trust violation." *Sanner, 62 F.3d at 926-27*. ***HN8***[] The purpose of the Sherman Act was "to assure customers the benefits of price competition, and . . . protect[] the economic freedom of participants in the relevant market." *Serfecz v. Jewel Food Stores, 67 F.3d 591, 596-97 (7th Cir. 1995)*(quoting *Associated General Contractors, Inc. v. California State Council of Carpenters, 459 U.S. 519, 538, 74 L. Ed. 2d 723, 103 S. Ct. 897*). The reason for limiting the application of antritrust law to privately brought actions is to "filter out complaints by competitors and others who may be hurt by productive efficiencies, higher output, and lower prices, all **[*7]** of which the antitrust laws are designed to encourage" and "[a] plaintiff who wants something, such as less competition or higher prices, that would injure consumers, does not suffer antitrust injury." *U.S. Gypsum Co. v. Indiana Gas Co., Inc., 350 F.3d 623, 627 (7th Cir. 2003)*.

Therefore, ***HN9***[] a private plaintiff bringing an antitrust claim is required to show "a direct link between the antitrust violation and the antitrust injury." *See* *Sanner, 62 F.3d at 926-27* (considering six factors to address causal connection). The plaintiff in an antitrust action must show that: 1) it "suffered an antitrust injury," and 2) the plaintiff is "the proper plaintiffs to maintain an antitrust action with respect to each of these markets." *Serfecz, 67 F.3d at 596*. ***HN10***[] For a monopoly claim brought under *Section 2 of the Sherman Act* a plaintiff must show: "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *Endsley v. City of Chicago, 230 F.3d 276, 282 (7th Cir. 2000)* **[*8]** (quoting *Eastman Kodak Co. v. Image Technical Servs., 504 U.S. 451, 481, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992))*; *Goldwasser v. Ameritech Corp., 222 F.3d at 397*.

MLS attacks Count I of the counterclaim element by element arguing first that Amerihall has not alleged sufficient facts regarding element one and second that Amerihall has not alleged sufficient facts concerning element two. However, in making such arguments MLS fails to understand ***HN11***[] the notice pleading standard for federal courts which requires a plaintiff only to allege the "operative facts" rather than all the pertinent facts. *Kyle, 144 F.3d at 454-55*. The Seventh Circuit has made it clear that there "is no requirement in federal suits of pleading the facts or the elements of a claim, with the exceptions . . . listed in *Rule 9* . . .[and thus] it is enough in pleading a conspiracy merely to indicate the parties, general purpose, and approximate date, so that the defendant has notice of what he is charged with." *Walker v. Thompson, 288 F.3d 1005, 1007 (7th Cir. 2002)*. *See also* *Head v. Chicago School Reform Bd. of Trustees, 225 F.3d 794, 801 (7th Cir. 2000)* **[*9]** (stating that ***HN12***[] the plaintiff was not required under the notice pleading standard to "pleaded sufficient facts to establish the legal elements of his claim."); *Sanjuan v. American Bd. of Psychiatry and Neurology, Inc., 40 F.3d 247, 251 (7th Cir. 1994)*(stating that a "at this stage the plaintiff receives the benefit of imagination, so long as the hypotheses are consistent with the complaint" and that "matching facts against legal elements comes later."). Amerihall provided MLS with notice of exactly how MLS is alleged to have excluded others from the market. Amerihall alleges that MLS used its customer rules regarding e-mails to prevent others from entering the same market.

In its motion to dismiss the counter-claim MLS attempts to argue the merits of its position and attempts to draw the court into an analysis that is far beyond the spectrum of a proper inquiry for a motion to dismiss. Thus, the motion to dismiss is premature at this juncture. There are sufficient allegations for the court to infer that MLS has a monopoly in a certain isolated market and that MLS utilized that position to exclude Amerihall's entrance into the market.

The only argument presented by MLS **[*10]** that is applicable for a motion to dismiss is that it cannot be considered a competitor of Amerihall because they do not provide the same types of services and are not in the same market. MLS argues that Amerihall alleges that it provides real estate brokerage services and that Amerihall concedes that MLS does not provide such services. Amerihall alleges that MLS provides real estate listing information and concedes that MLS is not in the real estate brokerage business. MLS thus argues that it cannot be a competitor of Amerihall since they operate in completely separate markets.

Even though Amerihall is not entirely clear as to exactly what market Amerihall is being excluded from by MLS, we are required to draw all inferences in MLS' favor at this juncture. *Thompson, 300 F.3d at 753*. We can infer from the allegations in the counterclaim that Amerihall contends that it is being excluded from entrance into the business of providing listing information rather than being excluded from the real estate brokerage business. Amerihall in fact makes this clear on page 5 of its answer to the instant motion when Amerihall describes the services provided by MLS and states: "This **[*11]** is the exact market Amerihall is attempting to enter, but has been and continues to be denied entry to by MLSNI and its monopolistic control and unjustifiable actions." (Ans 5). Therefore, MLS's argument is without merit as it incorrectly relies upon inferences made in its favor and fails to acknowledge that the allegations make out a claim. *See* *Conley, 355 U.S. at 45-46* (holding that ***HN13***[] the allegations of a complaint should not be dismissed for failure to state a claim "unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief."). We are not ruling at this juncture whether Amerihall has or has not met its burden of proving any of the aspects of the counterclaim. We merely hold that MLS's arguments are premature at this juncture.

CONCLUSION

Based on the foregoing analysis, we deny the motion to dismiss the counterclaim.

HN1[] **Preliminary Considerations, Removal**

A defendant in a state court may remove an action to federal court so long as the action could have originally asserted federal-question jurisdiction. *28 U.S.C.S. § 1441(b)*. Federal question jurisdiction is governed by the "well-pleaded complaint" rule which provides that federal jurisdiction exists only when a federal question is presented on the face of the plaintiff's well-pleaded complaint. As the master of his or her complaint, a plaintiff may by eschewing claims based on federal law, choose to have the cause be heard in state court. A plaintiff, however, may not defeat removal by omitting to plead necessary federal questions in a complaint. A federal court may exercise removal under the "artful pleading" doctrine even if a federal question does not appear on the face of the complaint. The artful pleading doctrine occurs in three circumstances: (1) where federal law completely preempts state law; (2)

where the claim is necessarily federal in character; or (3) where the right to relief depends on the resolution of a substantial, disputed federal question.

Civil Procedure > ... > Subject Matter Jurisdiction > Federal Questions > General Overview

HN2[] Subject Matter Jurisdiction, Federal Questions

A claim raises a substantial federal question when its resolution requires reference to or interpretation of federal law.

Torts > Business Torts > Unfair Business Practices > General Overview

HN3[] Business Torts, Unfair Business Practices

Cal. Bus. & Prof. Code § 17200 essentially prohibits three different types of wrongful business practice: (1) unlawful business practices; (2) unfair business practices; or (3) fraudulent or deceptive business practices. Each type is a separate and distinct theory from which to assert a violation of § 17200. In other words, a practice may be prohibited as unfair or deceptive even if not unlawful and vice versa.

Torts > Business Torts > Unfair Business Practices > General Overview

Trademark Law > ... > Unfair Competition > Federal Unfair Competition Law > General Overview

HN4[] Business Torts, Unfair Business Practices

To assert a claim for unlawful business practices, Cal. Bus. & Prof. Code § 17200 borrows violations of other laws and treats them as unlawful practices that the unfair competition law makes independently actionable.

Antitrust & Trade Law > Procedural Matters > Jurisdiction > Exclusive Jurisdiction

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

Antitrust & Trade Law > Sherman Act > Jurisdiction

Civil Procedure > ... > Subject Matter Jurisdiction > Federal Questions > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > Exclusive Jurisdiction

HN5[] Jurisdiction, Exclusive Jurisdiction

Federal courts have exclusive jurisdiction over claims for monopolization and attempted monopolization because California's antitrust laws do not address such unilateral, monopolization conduct.

Civil Procedure > ... > Removal > Specific Cases Removed > General Overview

Torts > Business Torts > Unfair Business Practices > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Federal Questions > General Overview

HN6[] **Removal, Specific Cases Removed**

Immunity from removal does not exist under *Cal. Bus. & Prof. Code § 17200*. Even if *§ 17200* provides for a separate remedy for a violation of borrowed federal law, the "unlawful" prong of *§ 17200* necessarily requires a determination that the borrowed federal law was violated. When the borrowed law is a federal law, then the claim for unlawful business practices rests on resolution of the federal law. Such an unlawful claim may be removed because the federal law is essential to the claim.

Civil Procedure > ... > Removal > Specific Cases Removed > General Overview

Securities Law > Regulators > Self-Regulating Entities > National Association of Securities Dealers

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Federal Questions > General Overview

HN7[] **Removal, Specific Cases Removed**

The United States Court of Appeals for the Ninth Circuit consistently upholds removal where a state-law claim is predicated upon federal law. The rule that state law claims cannot be alchemized into federal causes of action by incidental reference has no application when relief is particularly predicated on a subject matter committed exclusively to federal jurisdiction.

Opinion

ORDER DENYING PLAINTIFF'S MOTION FOR REMAND AND GRANTING DEFENDANTS' MOTION TO TRANSFER VENUE

INTRODUCTION

This order addresses whether the presence of an embedded federal issue within a state-created cause of action defeats plaintiff's motion for remand. Plaintiff contends that its claim under *Section 17200* of the California Business and Professions Code is immune from removal because *Section 17200* provides a separate and independent claim despite resting on violations of federal antitrust laws. This order disagrees. No such blanket immunity from removal exists. Because plaintiff alleged violations of federal antitrust laws in its complaint as the predicate for an "unlawful" practice, its *Section 17200* claim necessarily requires resolution of federal law. Accordingly, plaintiff's motion for remand is **DENIED**. In that connection, defendants' motion for transfer is **GRANTED** since plaintiff's sole opposition to transfer was its arguments for remand.

STATEMENT

Plaintiff is a non-profit trade organization of independent consumer credit reporting agencies, commonly known as "credit **[*3]** resellers." Plaintiff filed its complaint against defendants in the Superior Court for Alameda County on March 25, 2004. Therein, plaintiff alleged that each defendant had significant market power as one of the three dominant repositories of consumer credit information (Compl. PP 12-15). With monopolistic power, defendants supposedly engaged in numerous anticompetitive acts (Compl. PP 5-6, 12-15, 20-22, 43-47, 49, 51-55). Plaintiff asserted that such conduct violated both state and federal antitrust laws (Compl. P 56) (emphasis added):

> Defendants' wrongful conduct described above (i) *violates state and federal antitrust laws* and threatens incipient violations of those laws and violates the policy and spirit of those laws because the effects of Defendants' conduct are comparable to or the same as a violation of those laws, and (ii) significantly threatens to harm competition in the credit information industry.

Although the complaint asserted violations of state and federal antitrust laws, it did not assert a cause of action under any specific ***antitrust law***, state or federal. Instead, the complaint alleged a single cause of action for violations of *California Business and Professions Code Section 17200* **[*4]** . In its only cause of action, plaintiff alleged in relevant part (emphasis added):

> 59. *Section 17200* defines unfair competition to mean and include any "unlawful, unfair or fraudulent business act."
>
> 60. For the reasons stated in this complaint, Defendants' unfair, *unlawful and* deceptive business acts and practices described herein present a continuing threat to all California consumers.

Based on these allegations in the complaint, defendants removed the action asserting federal-question jurisdiction. In their notice of removal, defendants argued that plaintiff's complaint has only alleged claims for monopolization and attempted monopolization, which could be only redressed under *Section 2 of the Sherman Act*. Defendants also represented that, concurrently with this present action, twenty-four of plaintiff's members had filed a similar complaint but alleging violations of *Section 2 of the Sherman Act* in a separate action in a federal court in the Central District of California.

Now, defendants seek to transfer this action to the Central District of California. While defendants seek transfer of venue, plaintiff seeks remand, its only response to the transfer motion. **[*5]** Accordingly, both motions are considered herein.

ANALYSIS

1. LEGAL STANDARD FOR REMOVAL AND REMAND.

Defendants herein assert that original jurisdiction would have been proper under federal-question jurisdiction. ***HN1***[] A defendant in a state court may remove an action to federal court so long as the action could have originally asserted federal-question jurisdiction. *28 U.S.C. 1441(b)*. Federal-question jurisdiction is governed by the "well-pleaded complaint" rule which provides that federal jurisdiction exists only when a federal question is presented on the face of the plaintiff's well-pleaded complaint. *See Duncan v. Stuetzle, 76 F.3d 1480, 1485 (9th Cir. 1996)*. As the master of his or her complaint, a plaintiff may "by eschewing claims based on federal law, choose to have the cause be heard in state court." *Caterpillar, Inc. v. Williams, 482 U.S. 386, 399, 96 L. Ed. 2d 318, 107 S. Ct. 2425(1987)*.

A plaintiff, however, may not defeat removal by omitting to plead necessary federal questions in a complaint. *Franchise Tax Bd. of California v. Construction Laborers Vacation Trust, 463 U.S. 1, 22, 77 L. Ed. 2d 420, 103 S. Ct. 2841 (1983).* **[*6]** A federal court may exercise removal under the "artful pleading" doctrine even if a federal question does not appear on the face of the complaint.

Arco Environmental Remediation, L.L.C. v. Dep't of Health & Environmental Quality of the State of Montana, 213 F.3d 1108, 1114 (9th Cir. 2000). The artful pleading doctrine occurs in three circumstances: (1) where federal law completely preempts state law; (2) where the claim is necessarily federal in character; or (3) where the right to relief depends on the resolution of a substantial, disputed federal question. *Ibid.*

2.PLAINTIFF'S *SECTION 17200* CLAIM.

Applying this standard to the facts of this case, the complaint asserts only one cause of action under *Section 17200*. Thus, on its face, the complaint does not assert any federal claims. Plaintiff's complaint, however, may still be removed under the artful pleading doctrine if it is predicated on a violation of federal antitrust laws. [1]

[*7] Defendants contend that plaintiff's complaint requires resolution of a substantial federal question. ***HN2***[] A claim raises a substantial federal question when its resolution requires reference to or interpretation of federal law. *Hendricks v. Dynegy Power Marketing, Inc., 160 F. Supp. 2d 1155, 1162 (S.D. Cal. 2001)*. As discussed below, plaintiff's *Section 17200* claim requires an interpretation of the *Sherman Act*. Thus, removal was proper under the artful pleading doctrine.

A. Unlawful Business Practices.

Section 17200 ***HN3***[] essentially prohibits three different types of wrongful business practice: (1) unlawful business practices; (2) unfair business practices; or (3) fraudulent or deceptive business practices. *See Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co., 20 Cal. 4th 163, 180, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*; *Committee on Children's Television v. General Foods Corp., 35 Cal. 3d 197, 211, 197 Cal. Rptr. 783,*

[1] This order does not address whether the artful pleading doctrine applies under the first two circumstances where it has been applied. Neither parties have argued that federal antitrust laws completely preempt state equivalents nor have defendants argued that plaintiff's *Section 17200* claim is necessarily federal in character.

673 P.2d 660 (1983). Each type is a separate and distinct theory from which to assert a violation of *Section 17200*. "In other words, a practice [may be] prohibited as unfair' or deceptive' even if not unlawful' and vice versa." *Cel-Tech, 20 Cal. 4th at 180.* **[*8]**

While asserting only one claim for relief under *Section 17200*, plaintiff has alleged that defendants committed "unfair, unlawful *and* deceptive business actions and practices" (Compl. P 60) (emphasis added). Thus, it asserted that defendants committed all three different types of wrongful conduct. Plaintiff's allegations of unlawful business practices justifies removal of this case.

HN4[] To assert a claim for unlawful business practices, "*Section 17200* borrows violations of other laws and treats them as unlawful practices that the unfair competition law makes independently actionable." *Cel-Tech, 20 Cal. 4th at 180* (internal quotation marks omitted). Herein, plaintiff has borrowed federal antitrust laws. Plaintiff has alleged that "defendants' wrongful conduct described above (i) violated state *and federal antitrust laws"* (Compl. P 56). At the hearing, plaintiff's counsel clarified that the phrase "federal antitrust laws" refers to the Sherman Act. As the master of its complaint, plaintiff could have avoided any issue of federal question and, instead, could have simply borrowed state antitrust laws. But it did not. Rather, plaintiff's claim for unlawful business **[*9]** practices necessarily rests on questions of federal ***antitrust law***.

On the face of its complaint, it also appears that plaintiff could not have avoided borrowing *Section 2 of the Sherman Act*. In the complaint, plaintiff alleged that each defendant used its significant market power to engage in anticompetitive practices. Defendants' anticompetitive conduct supposedly had "the effect of lessening competition and promoting the acquisition and maintenance of monopoly power of the Defendants in this market" (Compl. P 1; *see also id.* PP 4-6, 15, 22, 47, 57). The complaint was void of any allegations of an agreement or a conspiracy to act among defendants. Thus, the gravamen of plaintiff's complaint was that each defendant had unilaterally engaged in anticompetitive conduct to maintain or augment its monopoly. Thus, plaintiff seems to have asserted only claims for monopolization or attempted monopolization under *Section 2 of the Sherman Act*. ***HN5***[] Federal courts have exclusive jurisdiction over such claims because California's antitrust laws do not address such unilateral, monopolization conduct. *Dimidowich v. Bell & Howard, 803 F.2d 1473, 1478 (9th Cir. 1986)* ("No California **[*10]** statute deals expressly with monopolization or attempted monopolization").

Plaintiff contends that it has not raised a federal question because *Section 17200* provides, arguably, for an independent state-authorized remedy in addition to those authorized under the borrowed federal law. ***HN6***[] Immunity from remover, however, does not exist. Even if *Section 17200* provides for a separate remedy for a violation of the borrowed federal law, the "unlawful" prong of *Section 17200* necessarily requires a determination that the borrowed federal law was violated. *See* *Chavez v. Whirlpool Corp., 93 Cal. App. 4th 363, 374, 113 Cal. Rptr. 2d 175 (2001)* (dismissing claim for unlawful business practice after finding no violation of the underlying state law). When the borrowed law is a federal law, then the claim for unlawful business practices rests on resolution of the federal law. Such an unlawful claim may be removed because the federal law is essential to the plaintiff's claim. *See, e.g.,* *People of the State of Cal., ex rel Lockyer v. Dynegy, Inc., 375 F.3d 831, 841 (9th Cir. 2004)* (affirming removal of *Section 17200* claim because it was predicated on federal law).

Plaintiff **[*11]** contends that its immunity argument is supported by *Schwartz v. Visa Int'l Corp., No. C 00-03955 THE, 2001 U.S. Dist. LEXIS 105 (N.D. Cal. Jan. 8, 2001)*. *Schwartz*, however, is distinguishable. Unlike the present action, the *Schwartz* defendants conceded that the complaint provided no basis for removal. *2001 U.S. Dist. LEXIS 105, at *7*. Moreover, to the extent *Schwartz* appears to immunize removal of the *Section 17200* claim, it is inconsistent with Ninth Circuit law.

HN7[] The Ninth Circuit has consistently upheld removal where the state-law claim was predicated upon federal law. *See, e.g.,* *Dynegy, 375 F.3d 831, 841 (9th Cir. 2004)*; *Sparta Surgical Corp. v. National Assoc. of Sec. Dealers, Inc., 159 F.3d 1209, 1212-13 (9th Cir. 1998)* (affirming removal because the state-law claims were predicated upon NASD regulations issued pursuant to federal securities law); *Brennan v. Southwest Airlines Co., 134 F.3d 1405, 1409 (9th Cir. 1998)* (holding that plaintiff's *Section 17200* claim was inherently federal because it sought refund of tax governed exclusively by federal law). In *Dynegy*, the Ninth Circuit held that **[*12]** an action alleging unfair competition under Section 17200 was inherently federal because plaintiff's claim rested entirely on alleged violations of federal tariff obligations under the Federal Power Act. Dynegy, 375 F.3d at 839. Though the plaintiff's complaint only asserted state-law claims, it cited the tariffs filed with Federal Energy Regulatory Commission, which was subject to the Federal Power Act. 375 F.3d at 835, 843 The tariffs filed directly implicated the federal regulatory regime. Thus, the Ninth Circuit reasoned that there must be a finding of a violation of the federal law before any state law liability on Section 17200 could exist. 375 F.3d at 841. Similarly in *Sparta*, the Ninth Circuit explained that plaintiff had challenged the conduct of the National Association of Security Dealers ("NASD") and thus "if NASD's action conformed to the rules, there can be no viable cause of action." 159 F.3d at 1212. Consequently, the Ninth Circuit reasoned that "the rule that state law claims cannot be alchemized into federal causes of action by incidental reference . . . has no application when relief is particularly predicated on a subject matter **[*13]** committed exclusively to federal jurisdiction." Id. at 1212-13.

As inDynegy andSparta, plaintiff herein has specifically referenced a violation of federal antitrust laws in the complaint despite asserting a single state-law claim. For a finding of "unlawful" business practices under Section 17200, there must first be resolution of federal antitrust laws, namely the Sherman Act which counsel admits he is asserting. Plaintiff's claim is merely a naked attempt to enforce the Sherman Act in the guise of a Section 17200 claim and remedy.

At the hearing, plaintiff also argued that its reference to federal antitrust laws was merely an incidental reference which is unnecessary to its Section 17200 claim. [2] In essence, plaintiff contends that its Section 17200 claim rests on its allegations of unfair and deceptive business practices. This order disagrees. As discussed above, plaintiff has asserted a violation of Section 17200 on unlawful business practices *in addition to* unfair and deceptive business practices. In the complaint, plaintiff recognized that Section 17200 sets forth three disjunctive theories upon which relief could be granted: "Section 17200 defines **[*14]** unfair competition to mean and include any unlawful, unfair *or* fraudulent business act" (Compl. P 59) (emphasis added). Yet, in the following paragraph, the complaint asserted that defendants committed all three types of wrongful conduct: "For the reasons stated in this complaint, defendants' unfair, unlawful *and* deceptive business acts and practices described herein present a continuing threat to all California consumers" (*id.* P 60) (emphasis added). The complaint alleged unlawful business practices which rested on federal law. Plaintiff cannot at this juncture re-write its complaint.

In that connection, the complaint herein is distinguishable from those considered **[*15]** in Lippitt v. Raymond James Fin. Servs., 340 F.3d 1033 (9th Cir. 2003), and Hendricks v. Dynegy Power Marketing, Inc., 160 F. Supp. 2d 1155 (S.D. Cal. 2001). In *Lippitt*, the plaintiff asserted a Section 17200 claim, challenging the marketing practices associated with certain brokerage firms. 340 F.3d at 1036. The defendants contended that the Section 17200 claim rested on resolution of federal regulations governing brokerage firms. The Ninth Circuit, however, disagreed with the defendants. The *Lippitt* court construed the complaint to allege fraud and deceptive advertising practices rather than any violation of federal regulation. Id. at 1042-43. Thus, it noted "unlike the situation in *Sparta* . . ., a state court need not inquire into NYSE regulations, or even refer to federal law, in the case before us." Id. at 1045.

Similarly, in *Hendricks*, the district court determined that no claim rested on federal law. 160 F. Supp. 2d at 1156-57. The *Hendricks* plaintiff alleged that the defendants engaged in anticompetitive conduct by artificially inflating the prices of electricity. **[*16]** The plaintiff contended that such conduct violated California's Cartwright Act and Section 17200. Id. at 1156. The defendants argued that plaintiff's complaint essentially challenged the rates which were governed by the Federal Powers Act. The district court, however, disagreed and reasoned that liability under the Cartwright Act for combination in restraint of trade did not depend on resolution of the Federal Powers Act. Id. at 1163.

---

[2] Also at the hearing, plaintiff raised for the first time that it would have no standing to assert a federal claim under the Sherman Act. This order does not address the standing issue since plaintiff did not brief the issue in its motion. Moreover, the issue is moot since defendants expressly conceded that plaintiff does have standing.

Unlike*Lippitt* and*Hendricks*, plaintiff herein specifically alleged that defendants committed unlawful business practices by violating federal antitrust laws in addition to any state antitrust laws. This distinction is crucial. Plaintiff has made a Sherman Act bed and must now lie in it.

CONCLUSION

In sum, plaintiff's complaint specifically referenced violation of federal antitrust laws for its claim of unlawful business practices. Accordingly, its *Section 17200* claim requires resolution of federal law. Accordingly, plaintiff's motion for remand is **DENIED**; defendants' motion to transfer venue is **GRANTED.** The **Clerk** shall transfer this action to the United States District Court for the **[*17]** Central District of California.

IT IS SO ORDERED.

Dated: July 21, 2004.

WILLIAM ALSUP

UNITED STATES DISTRICT JUDGE

AG Acceptance Corp. v. Glinz

Supreme Court of North Dakota

HN1[] **Standards of Review, De Novo Review**

Summary judgment is a procedural device for promptly disposing of a lawsuit without a trial if there are no genuine issues of material fact or inferences which can reasonably be drawn from undisputed facts, or if the only issues to be resolved are questions of law. Whether summary judgment was properly granted is a question of law which is reviewed de novo on the entire record. An appellate court decides if the information available to the trial court precluded the existence of a genuine issue of material fact and entitled the moving party to summary judgment as a mater of law. Summary judgment is appropriate against parties who fail to establish the existence of a factual dispute on an essential element of a claim on which they will bear the burden of proof at trial.

HN2[] **Summary Judgment, Opposing Materials**

A party resisting a motion for summary judgment may not simply rely upon the pleadings or upon unsupported, conclusory allegations. Factual assertions in a brief do not raise an issue of material fact satisfying *N.D. R. Civ. P. 56(e)*. Nor may a party merely reassert the allegations in his pleadings in order to defeat a summary judgment motion. The resisting party must present competent admissible evidence by affidavit or other comparable means which raises an issue of material fact and must, if appropriate, draw the court's attention to relevant evidence in the record by setting out the page and line in depositions or other comparable documents containing testimony or evidence raising an issue of material fact.

Evidence > Inferences & Presumptions > General Overview

HN3[] **Summary Judgment, Evidentiary Considerations**

In summary judgment proceedings, neither the trial court nor the appellate court has any obligation, duty, or responsibility to search the record for evidence opposing the motion for summary judgment. The opposing party must also explain the connection between the factual assertions and the legal theories in the case, and cannot leave to the court the chore of divining what facts are relevant or why facts are relevant, let alone material, to the claim for relief. Mere speculation is not enough to defeat a motion for summary judgment, and a scintilla of evidence is not sufficient to support a claim. If no pertinent evidence on an essential element is presented to the trial court in resistance to a motion for summary judgment, it is presumed that no such evidence exists.

Contracts Law > Contract Interpretation > General Overview

Contracts Law > Contract Interpretation > Intent

Contracts Law > Contract Interpretation > Parol Evidence > General Overview

HN6[] **Standards of Review, De Novo Review**

A contract must be interpreted to give effect to the mutual intention of the parties as it existed at the time of contracting. *N.D. Cent. Code § 9-07-03*. When a contract has been reduced to writing, the intention of the parties is to be ascertained from the writing alone if possible. *N.D. Cent. Code § 9-07-04*. Construction of a written contract to determine its legal effect is a question of law for the court to decide, and on appeal a reviewing court will independently examine and construe the contract to determine if the trial court erred in its interpretation. Extrinsic evidence is properly considered only if the language of the agreement is ambiguous and the parties' intentions cannot be determined from the writing alone. An unambiguous contract is particularly amenable to summary judgment.

Contracts Law > Types of Contracts > General Overview

HN7[] **Contracts Law, Types of Contracts**

Under the revolving charge agreement statute, the parties are designated as the "retail buyer" and "retail seller," and "credit" is extended. *N.D. Cent. Code § 51-14-01*.

Contracts Law > Types of Contracts > General Overview

HN8[] **Contracts Law, Types of Contracts**

The sine qua non of a revolving charge account is that it revolves: it has no specific date upon which the total amount is due. An agricultural operating loan evidenced by a promissory note specifying that all principal and interest shall be due on a date certain shortly after completion of that crop year is not a revolving charge agreement.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN9[] **Price Fixing & Restraints of Trade, Tying Arrangements**

To establish an antitrust violation through an illegal tying of products, a party must show possession of the seller of sufficient economic power with respect to the tying product to appreciably restrain a free market. The focus of the antitrust laws prohibiting tying is upon the effect on the relevant markets in which the two products are sold, not upon individual instances of a forced sale. If only a single purchaser were "forced" with respect to the purchase of a tied item, the resultant impact on competition would not be sufficient to warrant the concern of ***antitrust law***. It is for this reason that courts have refused to condemn tying arrangements unless a substantial volume of commerce is foreclosed thereby.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Evidence > Inferences & Presumptions > General Overview

HN10[] **Price Fixing & Restraints of Trade, Tying Arrangements**

In order to establish an antitrust violation based upon illegal tying, it must be shown that the seller possesses significant market power in the tying market. Having found sufficient evidence of a tying arrangement, a considers the other necessary feature of an illegal tying arrangement: appreciable economic power in the tying market. Market power is the power to force a purchaser to do something that he would not do in a competitive market. It has been defined as the ability of a single seller to raise price and restrict output. The existence of such power ordinarily is inferred from the seller's possession of a predominant share of the market.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN11[] **Antitrust & Trade Law, Sherman Act**

The essential characteristic of an invalid tying arrangement lies in the seller's exploitation of its control over the tying product to force the buyer into the purchase of a tied product that the buyer either did not want at all, or might have preferred to purchase elsewhere on different terms. When such "forcing" is present, competition on the merits in the market for the tied item is restrained and the Sherman Antitrust Act is violated.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN12[] **Price Fixing & Restraints of Trade, Tying Arrangements**

In an antitrust case, cases do not require that a defendant have a monopoly or even a dominant position throughout the market for a tying product. They do, however, focus attention on the question whether the seller has the power, within the market for the tying product, to raise prices or to require purchasers to accept burdensome terms that could not be exacted in a completely competitive market. In short, the question is whether the seller has some advantage not shared by his competitors in the market for the tying product.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN13[] **Price Fixing & Restraints of Trade, Tying Arrangements**

There is nothing inherently illegal about tying the sale of one product or service to another. It is clear, however, that not every refusal to sell two products separately can be said to restrain competition. If each of the products may be purchased separately in a competitive market, one seller's decision to sell the two in a single package imposes no unreasonable restraint on either market, particularly if competing suppliers are free to sell either the entire package or its several parts. A tying arrangement is not illegal if the seller lacks control or power in the market. Of course where the seller has no control or dominance over the tying product so that it does not represent an effectual weapon to pressure buyers into taking the tied item any restraint of trade attributable to such tying arrangements would obviously be insignificant at most. As a simple example, if one of a dozen food stores in a community were to refuse to sell flour unless the buyer also took sugar it would hardly tend to restrain competition in sugar if its competitors were ready and able to sell flour by itself.

Opinion by: William A. Neumann

Opinion

[634] Neumann, Justice.**

[*P1] Cecelia Glinz and the Estate of Bruce Glinz appealed from a summary judgment awarding Ag Acceptance Corporation ("Ag Acceptance") judgment in the amount of $ 238,874 on a promissory note. We affirm.

I

[*P2] Cecelia Glinz and her husband, Bruce Glinz, ran a farming operation. On August 15, 1997, the Glinzes signed a "Master Promissory Note" payable to Ag Services of America, Inc. ("Ag Services") to **[***2]** finance their 1998 crop. The note was in the amount of $ 750,000 with interest at 2.75 percent above the prime rate. All principal and interest was due on January 15, 1999. The note was secured by security agreements covering personal property, including farm products, equipment, government payments, and proceeds. In addition, because a portion of the proceeds were to be used to purchase agricultural supplies from Ag Services, the parties executed a document entitled "Customer Pricing Agreement, Program Fee Agreement, Release, and Disclaimer of Warranties" outlining the terms of any sales by Ag Services to the Glinzes.

[*P3] On October 20, 1997, Ag Services assigned its rights under the note to Ag Acceptance. On March 30, 1998, the Glinzes signed a supplement to the note increasing the principal amount of the note to $ 1,300,000. This supplement to the note referred to the prior assignment of the note to Ag Acceptance.

[*P4] On September 22, 1998, the Glinzes signed a Master Promissory Note in the amount of $ 1,300,000 payable to Ag Services to finance their 1999 crop. The interest rate was 2.75 percent above the prime rate and all principal and interest was due on January 15, 2000. The **[***3]** Glinzes again executed security agreements on **[**635]** personal property and a customer pricing agreement. On February 22, 1999, Ag Services assigned its rights under the note to Ag Acceptance.

[*P5] Bruce Glinz died in September 1999. Cecelia Glinz was named personal representative of his estate.

[*P6] In February 2000, Ag Acceptance brought this action against Cecelia Glinz and the Estate of Bruce Glinz alleging the notes were in default and the Glinzes owed $ 859,318.31, with interest accruing at the rate of $ 246.75 per day. Ag Acceptance sought immediate delivery of all collateral and a deficiency judgment. Cecelia and the Estate answered, alleging that the notes were not loans of money but constituted revolving charge agreements under *N.D.C.C. ch. 51-14* and that only the amounts owed at the time the notes were assigned to Ag Acceptance were due and owing. Cecelia Glinz claimed any funds advanced after the notes were assigned constituted unsecured loans on an open account to Bruce Glinz personally, and were not covered by the notes or security agreements.

[*P7] Ag Acceptance took possession of and sold the collateral. As a result, the 1997 note was paid in full, and Ag **[***4]** Acceptance sought a deficiency judgment in the amount of $ 232,579.93, plus $ 38.73 interest per diem, on the 1998 note. Both sides moved for summary judgment, and the trial court denied Glinzes' motion for summary judgment and granted Ag Acceptance's motion for summary judgment. Judgment in favor of Ag Acceptance in the amount of $ 238,874.08 was entered on May 1, 2003. Cecelia Glinz and the Estate of Bruce Glinz (collectively "Glinz") have appealed.

II

[*P8] This case comes to us in the posture of an appeal from a summary judgment. We outlined our standard of review of appeals from a summary judgment in *Zuger v. State, 2004 ND 16, PP7-8, 673 N.W.2d 615* (citations omitted):

> ***HN1***[] Summary judgment is a procedural device for promptly disposing of a lawsuit without a trial if there are no genuine issues of material fact or inferences which can reasonably be drawn from undisputed facts, or if the only issues to be resolved are questions of law. "Whether summary judgment was properly granted is 'a question of law which we review de novo on the entire record.'" *Iglehart v. Iglehart, 2003 ND 154, P9, 670 N.W.2d 343* (quoting *Wahl v. Country Mut. Ins. Co., 2002 ND 42, P6, 640 N.W.2d 689*). **[***5]** On appeal, this Court decides if the information available to the trial court precluded the existence of a genuine issue of material fact and entitled the moving party to summary judgment as a mater of law. Summary judgment is appropriate against parties who fail to establish the existence of a factual dispute on an essential element of a claim on which they will bear the burden of proof at trial.
>
> ***HN2***[] A party resisting a motion for summary judgment may not simply rely upon the pleadings or upon unsupported, conclusory allegations. "Factual assertions in a brief do not raise an issue of material fact satisfying Rule 56(e)." *Kemp v. City of Grand Forks, 523 N.W.2d 406, 408 (N.D. 1994)*. "Nor may a party merely reassert the allegations in his pleadings in order to defeat a summary judgment motion." *Id.*
>
> The resisting party must present competent admissible evidence by affidavit or other comparable means which raises an issue of material fact and must, if appropriate, draw the court's attention to relevant evidence in the record by setting out the page and **[**636]** line in depositions or other comparable documents containing testimony or evidence raising **[***6]** an issue of material fact.
>
> ***HN3***[] In summary judgment proceedings, neither the trial court nor the appellate court has any obligation, duty, or responsibility to search the record for evidence opposing the motion for summary judgment. The opposing party must also explain the connection between the factual assertions and the legal theories in the case, and cannot leave to the court the chore of divining what facts are relevant or why facts are relevant, let alone material, to the claim for relief.
>
> *Iglehart, at P10* (quoting *Anderson v. Meyer Broad. Co., 2001 ND 125, P14, 630 N.W.2d 46* (citations omitted)). Mere speculation is not enough to defeat a motion for summary judgment, and a scintilla of evidence is not sufficient to support a claim. If no pertinent evidence on an essential element is presented to the trial court in resistance to a motion for summary judgment, it is presumed that no such evidence exists.

III

[*P9] Ag Acceptance argues, and the trial court concluded, that the written agreements between the parties constitute a traditional loan of money secured by personal property. Glinz argues the agreement is a revolving **[***7]** charge account under *N.D.C.C. ch. 51-14* between the Glinzes and Ag Services, and that any sales made to the Glinzes after the notes were assigned by Ag Services to Ag Acceptance were made to Bruce Glinz personally on an open account. Glinz therefore argues any transactions occurring after February 19, 1999, were not made under the notes, are not covered by the security agreements, and therefore are owed by Bruce Glinz personally on an open account, with an interest rate of six percent. Glinz further argues that Ag Acceptance's failure to comply with statutory requirements for revolving charge agreements under *N.D.C.C. ch. 51-14* precludes the collection of certain fees and interest charges.

A

[*P10] Initially, the parties dispute which state's law governs their agreements. The promissory notes contain choice of law clauses providing the agreements are deemed to have been made in Iowa and that Iowa law is to govern their interpretation. Ag Acceptance argues *N.D.C.C. ch. 51-14* is therefore inapplicable, and the agreements must be construed under Iowa law. Glinz argues there are strong public policy reasons to apply North Dakota law in this case, and *N.D.C.C. ch. 51-14* should control. **[***8]** For purposes of this case we will assume, without deciding, that North Dakota law applies.

B

[*P11] The trial court concluded the parties' agreement was for a loan, not a revolving charge agreement under *N.D.C.C. ch. 51-14*. Glinz contends the agreement in this case falls within the definition of "revolving charge agreement" under the statute. "Revolving charge agreement" and other related relevant terms are defined in *N.D.C.C. § 51-14-01*:

> ***HN4***[] 1. "Credit service charge" means the amount, however expressed, which the retail buyer contracts to pay or pays the retail seller in excess of the amount of credit extended, representing the total charges by the retail seller incident to investigating and extending credit under a revolving charge agreement and for extending **[**637]** to the retail buyer the privilege of paying over a period of time therefor. 2. "Retail buyer" or "buyer" means a person who buys personal property from a retail seller, or to whom a retail seller otherwise extends credit, pursuant to a revolving charge agreement. 3. "Retail seller" or "seller" means a person who agrees to sell or sells goods or services pursuant to a revolving charge **[***9]** agreement and a state-chartered or national bank that extends credit by the advancement of moneys or the payment for goods or services under a revolving charge agreement. 4. "Revolving charge agreement" means a written instrument, defining the terms of credit extended from time to time pursuant thereto, pursuant to which the buyer's total unpaid balance thereunder, whenever incurred, is payable over a period of time and under the terms of which a credit service charge, other than the portion thereof consisting of late payment or other charges, is to be computed in relation to the buyer's unpaid balance from time to time.

A "loan of money" is defined in *N.D.C.C. § 47-14-01*:

> ***HN5***[] A loan of money is a contract by which one delivers a sum of money to another and the latter agrees to return at a future time a sum equivalent to that which the person borrowed.

[*P12] ***HN6***[] A contract must be interpreted to give effect to the mutual intention of the parties as it existed at the time of contracting. *N.D.C.C. § 9-07-03*; *Binek v. Binek, 2004 ND 5, P13, 673 N.W.2d 594*. When a contract has been reduced to writing, the intention of the **[***10]** parties is to be ascertained from the writing alone if possible. *N.D.C.C. § 9-07-04*; *Binek, at P13*; *Kondrad ex rel. McPhail v. Bismarck Park District, 2003 ND 4, P6, 655 N.W.2d 411*. Construction of a written contract to determine its legal effect is a question of law for the court to decide, and on appeal this Court will independently examine and construe the contract to determine if the trial court erred in its interpretation. *Lamb v. Riemers, 2003 ND 148, P6, 669 N.W.2d 113*; *Kondrad, at P6*. Extrinsic evidence is properly considered only if the language of the agreement is ambiguous and the parties' intentions cannot be determined from the writing alone. *Binek, at P13*; *Lamb, at P6*. An unambiguous contract is particularly amenable to summary judgment. *Airport Inn Enters., Inc. v. Ramage, 2004 ND 92, P10, 679 N.W.2d 269*; *Kondrad, at P6*.

[*P13] The parties in this case reduced their agreement to writing. The August 15, 1997, promissory note provides:

> FOR VALUE RECEIVED, the undersigned debtors jointly and severally, as principals, promise to pay to the order of Ag Services **[***11]** of America, Inc. . . . the principal sum of *Seven Hundred Fifty Thousand and No/100* - - - - - - - - - - - - Dollars ($ *750,000.00*) or, if less, the outstanding principal balance of all loans and advances made hereunder, together with accrued interest, said principal balance and accrued interest to be due and payable in full on or before *January 15, 1999*. The undersigned agree to pay interest on the principle balance outstanding hereunder from time to time at the rate equal to *Two Pt. Seven Five* percent (*2.75* %) in excess of the Prime Rate, and shall be adjusted as of each date of change thereof to reflect changes in the Prime Rate.

The note makes numerous further references to principal and interest. The September 22, 1998, **[**638]** note is identical except the face amount is increased to $ 1,300,000 and the note is due on January 15, 2000.

[*P14] The parties' March 30, 1998, Agreement to Supplement the Master Promissory Note identifies the Glinzes as "Debtor" and Ag Services and Ag Acceptance collectively as "Lender." The supplement provides "Debtor is desirous of increasing the maximum funds available under the Note" and increases the "principal amount under **[***12]** the Note" to $ 1,300,000.

[*P15] The language used by the parties indicates a loan of money, not a revolving charge agreement. The notes state that the Glinzes promise to pay "the outstanding principal balance of all *loans* and advances made hereunder, together with accrued interest." The notes use the terms "principal" and "interest," denoting a loan of money, rather than the corresponding terms "credit extended" and "credit service charge," indicative of a revolving charge agreement, found in *N.D.C.C. § 51-14-01*. The supplement to the first note designates the parties as debtor and lender, and provides for increasing the "funds" available under the note, further indicative of a loan of money. ***HN7***[] Under the revolving charge agreement statute, the parties are designated as the "retail buyer" and "retail seller," and "credit" is extended. *See* *N.D.C.C. § 51-14-01*. The language of the parties' written agreement unambiguously characterizes the agreement as a loan of money, not a revolving credit agreement.

[*P16] Glinz argues that Ag Services sold products to the Glinzes on credit under the notes, that Ag Services was **[***13]** therefore a "retail seller," and that the agreement constituted a revolving charge agreement. Although the parties anticipated that a portion of the proceeds of the notes would be used to purchase products from Ag Services, the language of the notes also provides for loans and advances of money. Glinz relies upon the "Customer Pricing Policy Agreement, Program Fee Agreement, Release, and Disclaimer of Warranties" to support her assertion that this was a revolving credit agreement. The language of that document, however, indicates that all products purchased will be treated as an advance against the note, and explicitly envisions cash advances to the Glinzes:

> 3. The undersigned agrees that all products purchased, cash advanced and insurance premium due Ag Services will be charged as an advance against the undersigned's Master Promissory Note payable to Ag Services or its assignee as of the date of shipment of products or the date of the cash advanced and shall be secured by and subject to the terms of the Agricultural Security Agreement and all other agreements or documents executed in connection therewith.

The parties clearly intended their agreement to cover more **[***14]** than an extension of credit to finance purchases under a revolving credit agreement.

[*P17] Furthermore, the written agreements in this case provided that the full amounts due under the notes must be paid by a specific date. ***HN8***[] The sine qua non of a revolving charge account is that it revolves: it has no specific date upon which the total amount is due. *See* H.R. Rep. 90-1040 (1967), *reprinted in* 1968 U.S.C.C.A.N. 1962, 1971 (indicating revolving credit accounts are synonymous with open-ended credit). An agricultural operating loan evidenced by a promissory note specifying that all principal and interest shall be due on a date certain shortly after completion of that crop year is not a **[**639]** revolving charge agreement.

[*P18] We conclude the trial court did not err in concluding the parties' written agreement was a loan of money, not a revolving charge agreement under *N.D.C.C. ch. 51-14*.

IV

[*P19] Glinz contends that, if the transaction between the parties was a loan, the agreement violated the *Sherman Antitrust Act*, *15 U.S.C. §§ 1-7*, and the state antitrust act, *N.D.C.C. ch. 51-08.1*, because the agreement impermissibly tied the extension of credit **[***15]** to an agreement to purchase agricultural products from Ag Services.

A

[*P20] The trial court concluded it did not have jurisdiction over Glinz's claimed violation of the Sherman Antitrust Act because jurisdiction under the Act is vested exclusively in the federal courts. Glinz contends state courts may consider Sherman Act violations which are pleaded as a defense in a contract action. We find it unnecessary to determine whether the trial court properly declined to exercise jurisdiction because we conclude Glinz failed to present sufficient evidence of an antitrust violation to preclude summary judgment.

B

[*P21] In her brief on appeal, Glinz concedes that ***HN9***[] to establish an antitrust violation through an illegal tying of products she must show "possession of the seller of sufficient economic power with respect to the tying product to appreciably restrain a free market." The focus of the antitrust laws prohibiting tying is upon the effect on the relevant markets in which the two products are sold, not upon individual instances of a forced sale. *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 16, 18, 80 L. Ed. 2d 2, 104 S. Ct. 1551 (1984)*. As the Court explained in **[***16]** *Jefferson Parish, at 16*:

> If only a single purchaser were "forced" with respect to the purchase of a tied item, the resultant impact on competition would not be sufficient to warrant the concern of ***antitrust law***. It is for this reason that we have refused to condemn tying arrangements unless a substantial volume of commerce is foreclosed thereby.

[*P22] Thus, ***HN10***[] in order to establish an antitrust violation based upon illegal tying, it must be shown that the seller possesses significant market power in the tying market:

> Having found sufficient evidence of a tying arrangement, we consider the other necessary feature of an illegal tying arrangement: appreciable economic power in the tying market. Market power is the power "to force a purchaser to do something that he would not do in a competitive market." *Jefferson Parish, 466 U.S., at 14, 104 S. Ct., at 1559*. It has been defined as "the ability of a single seller to raise price and restrict output." *Fortner [Enters., Inc. v. United States Steel Corp.], 394 U.S. [495,] 503, 22 L. Ed. 2d 495, 89 S. Ct. [1252,] 1259 [1969]*; *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 391, 76 S. Ct. 994, 1005, 100 L.E. 1264 (1956).* **[***17]** The existence of such power ordinarily is inferred from the seller's possession of a predominant share of the market.

Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 464, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992) (footnote omitted). The Court in *Eastman Kodak* further noted:

> ***HN11***[] "The essential characteristic of an invalid tying arrangement lies in the seller's exploitation of its control over the tying product to force the buyer into the purchase of a tied product that the buyer either did not want at all, or **[**640]** might have preferred to purchase elsewhere on different terms. When such 'forcing' is present, competition on the merits in the market for the tied item is restrained and the Sherman Act is violated."

Id. at 464 n.9 (quoting *Jefferson Parish, 466 U.S. at 12*).

[*P23] In *United States Steel Corp. v. Fortner Enters., Inc., 429 U.S. 610, 51 L. Ed. 2d 80, 97 S. Ct. 861 (1977)*, the Court addressed allegations that sale of prefabricated houses had been illegally tied to an offer of credit.

Reversing a judgment of the Court of Appeals which concluded the creditor had sufficient economic power in the **[***18]** credit market to make the tying arrangement illegal, the Supreme Court stated:

> ***HN12***[] These decisions do not require that the defendant have a monopoly or even a dominant position throughout the market for a tying product. They do, however, focus attention on the question whether the seller has the power, within the market for the tying product, to raise prices or to require purchasers to accept burdensome terms that could not be exacted in a completely competitive market. In short, the question is whether the seller has some advantage not shared by his competitors in the market for the tying product.

Id.. at 620 (citation and footnote omitted); *see also Fortner Enters., Inc. v. United States Steel Corp., 394 U.S. 495, 502-03, 22 L. Ed. 2d 495, 89 S. Ct. 1252 (1969)*. Glinz has not directed our attention to any evidence in the record showing Ag Services or Ag Acceptance had some advantage in the credit market not shared by their competitors.

[*P24] ***HN13***[] There is nothing inherently illegal about tying the sale of one product or service to another:

> It is clear, however, that not every refusal to sell two products separately can be said to restrain **[***19]** competition. If each of the products may be purchased separately in a competitive market, one seller's decision to sell the two in a single package imposes no unreasonable restraint on either market, particularly if competing suppliers are free to sell either the entire package or its several parts.

Jefferson Parish, 466 U.S. at 11-12. A tying arrangement is not illegal if the seller lacks control or power in the market:

> Of course where the seller has no control or dominance over the tying product so that it does not represent an effectual weapon to pressure buyers into taking the tied item any restraint of trade attributable to such tying arrangements would obviously be insignificant at most. As a simple example, if one of a dozen food stores in a community were to refuse to sell flour unless the buyer also took sugar it would hardly tend to restrain competition in sugar if its competitors were ready and able to sell flour by itself.

Northern Pacific Railway Co. v. United States, 356 U.S. 1, 6-7, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958); *see also Jefferson Parish, 466 U.S. at 11-12*.

[*P25] Glinz has not drawn our attention **[***20]** to any evidence in the record which demonstrates Ag Services or Ag Acceptance had significant market power or an advantage not shared by its competitors in the relevant markets. Glinz argues it may be inferred that the tying of these products appreciably restrained a free market because Ag Services does business in 35 states and the prices Ag Services charged for the tied products were higher than Glinzes could have purchased the products **[**641]** for elsewhere. Neither of these facts creates an inference of market power in the tying market by Ag Services or Ag Acceptance. *See Fortner, 429 U.S. at 617-18* (fact that lender was a subsidiary of one of the nation's largest corporations and charged a higher price for the tied product than its competitors did not demonstrate the lender had economic power in the credit market). There is no evidence showing Ag Services or Ag Acceptance had a predominant share of the market or sufficient economic power to control prices. *See Eastman Kodak, 504 U.S. at 464*. Nor is there any evidence suggesting Glinz could not have obtained financing and products separately from other businesses. *See Jefferson Parish, 466 U.S. at 11-12.* **[***21]**

[*P26] ***HN14***[] A party opposing a motion for summary judgment may not rely upon unsupported, conclusory allegations nor mere speculation, and a scintilla of evidence is not sufficient to support a claim. *Zuger v. State, 2004 ND 16, P8, 673 N.W.2d 615*. The resisting party must present, and draw the court's attention to, competent admissible evidence which raises a genuine issue of material fact. *Id.* Because Glinz has failed to draw our attention to any evidence showing that Ag Services or Ag Acceptance had significant market power in the relevant markets, we conclude summary judgment on the antitrust issues was appropriate.

V

[*P27] We have considered the remaining issues raised by Glinz and find they were either not raised in the court below, are unnecessary to our decision, or are without merit. The judgment is affirmed.

false claim, license to practice, res judicata, public official, recommended, complaints, licensed, caption, dismissal with prejudice, parties

Counsel: **[*1]** Antonio Gutierrez, United States of America, ex rel, Plaintiff, Pro se, Santa Fe, NM.

For United States of America, Legislative, Executive and Judicial Department, who were also licensed to practice law under rules created, promulgated and enforced by the officers assigned duties within the New Mexico Supreme Court, Defendant: Jay D. Majors, LEAD ATTORNEY, US Department of Justice, Washington, DC.

Judges: Lorenzo F. Garcia, Chief United States Magistrate Judge.

Opinion by: Lorenzo F. Garcia

Opinion

MEMORANDUM OPINION RECOMMENDING DISMISSAL[1]

THIS MATTER comes before the Court on the United States' Suggestion of Dismissal of False Claims Act Complaint for Lack of Subject Matter Jurisdiction and for Failure to State a Claim [Doc. 5]. Relator Antonio Gutierrez

---

[1] This matter was referred to the undersigned magistrate judge pursuant to the Court' s Order Designating United States Magistrate Judge [Doc. 2].

Within ten (10) days after a party is served with a copy of this analysis and recommended disposition, that party may, pursuant to *28 U.S.C. § 636(b)(1)*, file written objections to such analysis and recommendation. A party must file any objections within the ten-day period allowed if that party wants to have appellate review of the analysis and recommendation.

("Gutierrez") filed a Response [Doc. 7] on July 12, 2004.[2] No Reply by the United States is necessary. The Court has considered the United States' suggestion, as well Gutierrez' s Response in opposition, and determines that oral argument is not necessary. For the reasons hereafter stated, the Court recommends that the United States' Suggestion be granted and that Gutierrez' s lawsuit be dismissed with prejudice.

Background

This case has a convoluted procedural **[*2]** history, but resolution of the United States' Suggestion of Dismissal is relatively simple and turns on principles of *res judicata*.

Gutierrez filed his complaint in this matter on August 5, 2003. In it, he characterized his claim as a Qui Tam suit, and as jurisdictional grounds for the complaint cited the False Claims Act, *31 U.S.C. § 3729 et seq.* He named as defendants all " persons holding office as public officers within the state government of the State of New Mexico, the legislative, executive and judicial departments of United States government, who were also licensed to practice law under rules created, promulgated and enforced by the officers assigned duties within the New Mexico Supreme Court." [Complaint, Doc. 1, Caption].

Gutierrez claims that Defendants submitted false claims to the United States government, violated ***antitrust law***, and have otherwise engaged in unconstitutional acts by taking salaries as public officials while licensed as lawyers. Gutierrez further asserts that the State, through illegal " tying agreements" with the American Bar Association and the New Mexico State Supreme Court is denying all unlicensed lay citizens the right to engage in a profession of their choice, that is, **[*3]** the practice of law, based on nothing more than these citizens' failure to have a law degree or license to practice law. Gutierrez does not contend that he, as a *pro se* litigant, has ever been denied the right to represent his own interests in court. Instead, he contends that the illegal " tying agreements" deny him and similar situated untrained and unlicensed individuals the right to practice law in New Mexico and elsewhere.

In his certificate of service included with the complaint, Gutierrez stated that he served the complaint in this case on the United States (he does not give a date) by mailing it to the Office of the United States Attorney General " rather than the United States Attorney for the District of New Mexico on the ground the latter is a defendant." [Doc. 1, at 10].[3]

Aside from an order in February 2004 by the U.S. District Judge assigned to this case, referring the matter to the undersigned U.S. Magistrate Judge for a recommended disposition, no action was taken in the case until May 28, 2004. On that date, the United States filed an Ex Parte Status Report [Doc. 3]. In this Report, the United States, through attorney Jay D. Majors ("Majors") on behalf of Assistant Attorney **[*4]** General Peter D. Keisler of the Civil Division of the Department of Justice in Washington, D.C., stated as follows:

Majors confirmed that a copy of the complaint was indeed served on the United States, presumably to the Department of Justice in Washington, D.C., in August 2003. However, the copy was unsigned and did not have a case number or a file stamp from the Court. Based on a series of misunderstandings, to which the United States did not contribute, it appeared to the United States that Gutierrez had never filed a complaint in this matter.

On October 23, 2003, Majors wrote to Gutierrez, informing him that the Clerk' s Office told him it had no record of his complaint and that, unless Gutierrez informed them otherwise, the United States would consider the matter closed. Majors states that Gutierrez did not confirm that the complaint in this case had been filed, even though it had. Instead, on November 17, 2003, Gutierrez filed a second complaint, nearly identical to the complaint in this

---

[2] Gutierrez purports to bring this *qui tam* lawsuit on behalf of the United States of America.

[3] The False Claims Act, § 3730(b)(2), requires that a Relator effect service of process on both the United States Attorney General and the United States Attorney in the district where the action was filed. Gutierrez failed to comply with this service of process requirement.

case, and thereby commenced a new action, United States ex rel. Gutierrez v. Persons Holding License to Practice Law, et al., Civ. No. 03-1320 MV/LFG.

Meanwhile the United States, unaware that the **[*5]** present case was " live," proceeded to litigate cause Civ. No. 03-1320. It requested that the seal be lifted in that case, and the request was granted by the Court in an order dated April 7, 2004. On March 16, 2004, the undersigned Magistrate Judge, to whom cause No. 03-1320 had also been referred, recommended that the United States' Suggestion of Dismissal be granted in that case, citing numerous legal deficiencies. The recommendation was adopted by the assigned District Judge in an order dated April 16, 2004, after consideration of Gutierrez' s objections and the United States' reply.

On June 16, 2004, Judgment was entered in Civ. No. 03-1320 in favor of defendants on all claims, and the case was dismissed with prejudice. The Court also rejected Gutierrez' s contention that it was improper for any judge in this district, or presumably anywhere else, to issue a decision in this case, since all judges are licensed attorneys and therefore " named defendants." The Court cited the " rule of necessity" under which a judge, even though he or she may have an interest in the outcome of litigation, has a duty to hear and decide a case if it cannot otherwise be heard. *United States v. Will, 449 U.S. 200, 101 S. Ct. 471, 66 L. Ed. 2d 392 (1980)*; *Williams v. United States 240 F.3d 1019 (Fed. Cir. 2001)*.

The District Judge cited **[*6]** the following grounds in her order of dismissal in Civ. No. 03-1320: The complaint fails to plead the essential elements for a false claim under *31 U.S.C. § 3729(a)(1)*;

The complaint fails to state a claim to the extent it contends that the State of New Mexico has been defrauded by licensed attorneys, because the False Claims Act extends only to frauds committed against the United States;

The complaint fails to satisfy the requirements of *Fed. R. Civ. P. 9(b)*, which requires that allegations of fraud be pled with particularity;

Gutierrez failed to comply with provisions of the False Claims Act requiring that the complaint be served on the Attorney General, as well as the United States Attorney in the district where the complaint is filed;

To the extent Gutierrez named as defendants elected or appointed State officers who hold their positions as a result of being licensed attorneys, he is attempting to sue State public officials in their official capacity - the equivalent of a suit against the State - and states are not " persons" subject to suit under the False Claims Act;

To the extent Gutierrez named as defendants elected or appointed federal authorities who hold law licenses, he is attempting to sue federal public officials **[*7]** in their official capacity - the equivalent of a suit against the federal government - and the United States has not consented to be sued and is therefore immune from suit;

The complaint fails to state a claim insofar as it invokes the Sherman Antitrust Act as courts and legislators are immune from liability for exercise of their authority to license attorneys and regulate the practice of law, and are not subject to antitrust liability with respect to such activities.

Gutierrez did not appeal the Court' s dismissal of the lawsuit. Indeed, Gutierrez stated in a pleading [Doc. 37], filed after the Order of Dismissal was entered, that he intended to pursue his claims by way of extraordinary writ in the United States Supreme Court.

The present litigation picked up again when the United States filed its Suggestion of Dismissal [Doc. 5] in this case, along with a Suggestion to Lift Seal. The Court agrees with the United States' position that the proceedings in Civ. No. 03-1320 are *res judicata* of the present case and therefore finds that this case must likewise be dismissed with prejudice.

Discussion

In its Suggestion, the United States urges several grounds for dismissal. The Court agrees with **[*8]** the first posited ground, that the complaint herein is barred by *res judicata*, a doctrine which is necessary to the fair and efficient operation of the court system. Under the principle of *res judicata*, a prior judgment on the merits in one lawsuit will bar consideration of another suit involving the same parties, or their privies, based on the same cause of action. *Montana v. United States, 440 U.S. 147, 153, 99 S. Ct. 970, 973, 59 L. Ed. 2d 210 (1979)*. " The doctrine of *res judicata* bars relitigation of issues that were or could have been raised in the first action." *Ten Mile Indus. Park v. Western Plains Serv. Corp., 810 F.2d 1518, 1522-23 (10th Cir. 1987)*.[4]

In order for *res judicata* to apply, three elements must be present: (1) the first suit must have proceeded to a final judgment on the merits; (2) the parties must be identical or in privity; and (3) the suits must be based on the same cause of action. *Clark v. Haas Group, Inc., 953 F.2d 1235, 1236 (10th Cir. 1992)*. The Court finds that all three of these elements have been satisfied.

An examination of the complaints in these two cases reveals that they are, in almost every respect, identical. The United States characterizes these differences as " some inconsequential changes to the phrasing of the caption of the case and some immaterial revisions to the body of the Complaint, primarily in the ' Introduction' section." [Doc. 5, at 6]. This characterization **[*9]** is accurate.

The caption in cause Civ. No. 03-1320 names as Defendants, " Persons holding license to practice law, and persons holding public office in the State of New Mexico and the United States who were qualified to do so by holding license to practice under political authority of court rules produced by public officers with duties in the Supreme Court of the State of New Mexico."

The caption in the present case names as Defendants, " Persons holding office as public officers within the state government of the State of New Mexico, the legislative, executive and judicial departments of United States government, who were also licensed to practice law under rules created, promulgated and enforced by the officers assigned duties within the New Mexico Supreme Court."

Although the captions are worded a bit differently, the Court finds that the group of defendants in both cases is actually the same. In each complaint, Gutierrez purports to sue persons who hold license to practice law while serving as public officers of the State of New Mexico or the United States. In addition, the two complaints use identical language in their respective sections labeled " Parties," in which Gutierrez describes **[*10]** the defendants in detail. [Complaint in Civ. No. 03-1320, at ¶¶ 4-5; Complaint in Civ. No. 03-920, at ¶¶ 4-5].

A party may not avoid the effects of *res judicata* or collateral estoppel by simply naming a different defendant while bringing the same claim, *Parklane Hosiery Co., Inc. v. Shore, supra, 439 U.S. at 329*; nor by bringing the same claim under a different legal theory. *Clark v. Haas Group, Inc., supra.* The Court finds that, even though the captions of the two complaints are worded somewhat differently, Gutierrez intended to bring these two actions against the same defendants.

As Defendant points out, there are also some minor differences in the language of the introductory paragraphs of the two complaints. The complaint in the present action alleges in its Introduction that defendants:

> have defrauded the United States as addressed by *18 U.S.C. § 371* and upon accepting appointments or elective offices either in the New Mexico Government or the United States Government during relevant periods while authorized unconstitutionally and statutorily to practice law before some defendants in state and federal

[4] The related doctrine of collateral estoppel has a similar preclusive effect. That doctrine provides that, "once a court has decided an issue of fact or law necessary to its judgment, that decision is conclusive in a subsequent suit based on a different cause of action involving a party to the prior litigation." *United States v. Mendoza, 464 U.S. 154, 158, 104 S. Ct. 568, 571, 78 L. Ed. 2d 379 (1984)*. A litigant who has been afforded a full and fair opportunity to litigate an issue will be collaterally estopped from re-litigating the same issue in a different lawsuit. *Parklane Hosiery Co., Inc. v. Shore, 439 U.S. 322, 328-30, 99 S. Ct. 645, 649-51, 58 L. Ed. 2d 552 (1979)*. *Res judicata* has been described as " claim preclusion" and collateral estoppel as " issue preclusion." *United States v. Mendoza, supra, 464 U.S. at 158 n.3*.

> courts under rules created, promulgated, interpreted, and enforced by other defendants assigned duties as justices of the New Mexico Supreme Court or as judges of state courts of general **[*11]** jurisdiction.

[Complaint, Doc. 1 at ¶ 1].

The Introduction to the complaint in Civ. No. 03-1320 includes additional allegations regarding antitrust violations but also encompasses the same charge as that raised in the earlier case: *i.e.*, that defendants have defrauded the State of New Mexico and the United States " while authorized unconstitutionally to practice law . . ." and that:

> [t]hose accepting appointments to or accepting elective offices in the New Mexico Government or the United States Government based upon the prior qualification of being licensed to practice law in the State of New Mexico during relevant periods did so deceptively . . . [and] the excluded People of New Mexico involuntarily came under control of rules unconstitutionally and politically created, published, promulgated, interpreted, and enforced by other defendants assigned duties as justices of the Supreme Court of New Mexico or as judges of state courts of general and appellate jurisdiction.

[Complaint, Civ. No. 03-1320, at ¶ 1].

The Introductions in both complaints go on to state, in identical language, that persons (such as Defendants) who knowingly submit false claims to the United States are liable for a civil **[*12]** penalty of up to $ 10 million for each claim submitted, plus three times the amount of damages sustained by the government; that persons (such as Gutierrez) having information regarding a false claim may bring an action to share in the recovery; and that Gutierrez, as relator, is seeking to recover his share of the penalties and damages. [Complaint, Civ. No. 03-1230, at ¶¶ 2-3; Complaint in Civ. No. 03-920, at ¶¶ 2-3].

As noted above, the next two paragraphs, 4-5, are identical in their descriptions of the parties to the respective suits. The jurisdictional statements (¶¶ 6-8 in both complaints) are substantially similar as well, the complaint in Civ. No. 03-1320 containing some additional statements which do not appear in the complaint in Civ. No. 03-920.

The remainder of the complaint in Civ. No. 03-920 is worded identically, with very minor changes, to that in Civ. No. 03-1320. *See*, in each complaint: ¶¶ 9-15 ("General Allegations"); ¶¶ 16-23 (" Count I: Substantive Violations of the False Claims Act"); ¶¶ 23-29 in Civ. No. 03-290 and ¶¶ 24-30 in Civ. No. 03-1320 (" Count II: False Claim Conspiracy").

The respective Prayers of the two complaints are worded somewhat differently, but **[*13]** similar relief is requested in both, including: an injunction directing defendants to " cease and desist from violating" certain federal statutes; a request that the Court enter judgment against defendants for treble damages and civil penalties under the False Claims Act; that Gutierrez be awarded all costs and expenses of the action; a request that the United States, the State of New Mexico and Gutierrez receive such other relief as the Court deems proper; and a demand that Defendants - that is, all persons employed by the state or federal governments who are also licensed attorneys - be removed from office and prevented from holding public office in the future. The complaint in Civ. No. 03-1320 includes additional requests for relief; however, all relief requested in the present case was also requested in Civ. No. 03-1320, and that relief has been denied.

The Court finds that Gutierrez is pursuing the same claims, against the same parties, in Civ. No. 03-920 as he attempted to bring in Civ. No. 03-1320. The claims in Civ. No. 03-1320 having been dismissed with prejudice to failure to state a claim, he cannot now raise them again.

Conclusion

The doctrines of collateral estoppel and ***[*14]*** *res judicata* are meant to promote the following laudable objectives: to "relieve parties of the cost and vexation of multiple lawsuits, conserve judicial resources, and, by preventing inconsistent decisions, encourage reliance on adjudication." *Allen v. McCurry, 449 U.S. 90, 94, 101 S. Ct. 411, 66 L. Ed. 2d 308, (1980)*.

Gutierrez had a full and fair opportunity to present his claims in Civ. No. 03-1320 and the Court ruled against him in that case, on the merits of the very issues he attempts to raise in this action. That case was dismissed with prejudice, *res judicata* applies, and the Court finds that, for the reasons exhaustively treated in the prior litigation, this action should likewise be dismissed.

The Court further finds that the "rule of necessity" requires resolution of this case by judges of this district, even though all such judges are within the category of defendants described in Plaintiffs caption as "persons holding office as public officers within the . . . judicial department[] of the United States government, who were also licensed to practice law . . .." *United States v. Will, supra.*

Recommended Disposition

The Court accepts the United States' Suggestion of Dismissal [Doc. 5] and recommends that the complaint be dismissed with prejudice.

Governments > Federal Government > US Congress

International Trade Law > General Overview

Constitutional Law > Supremacy Clause > General Overview

Governments > Federal Government > General Overview

HN5[] **Supremacy Clause, Federal Preemption**

Under the *supremacy clause of the United States Constitution*, U.S. Const. art. VI, *cl. 2*, Congress has the power to preempt state law concerning matters that lie within the authority of Congress. In determining whether federal law preempts state law, a court's task is to discern congressional intent. Congress's express intent in this regard will be found when Congress explicitly states that it is preempting state authority. Congress's implied intent to preempt is found (i) when it is clear that Congress intended, by comprehensive legislation, to occupy the entire field of regulation, leaving no room for the states to supplement federal law; (ii) when compliance with both federal and state regulations is an impossibility; or (iii) when state law stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress.

Constitutional Law > Supremacy Clause > General Overview

Evidence > Burdens of Proof > General Overview

HN6[] **Constitutional Law, Supremacy Clause**

The party who claims that a state statute is preempted by federal law bears the burden of demonstrating preemption. An important corollary of this rule is that, when Congress legislates in a field traditionally occupied by the states, the court starts with the assumption that the historic police powers of the states were not to be superseded by the federal act unless that was the clear and manifest purpose of Congress. This venerable presumption provides assurance that the federal-state balance will not be disturbed unintentionally by Congress or unnecessarily by the courts.

Constitutional Law > Supremacy Clause > General Overview

HN16[] **Constitutional Law, Supremacy Clause**

An express definition of the pre-emptive reach of a statute supports a reasonable inference that Congress did not intend to pre-empt other matters.

Administrative Law > Agency Rulemaking > Rule Application & Interpretation > General Overview

Constitutional Law > Supremacy Clause > Federal Preemption

Governments > Federal Government > Claims By & Against

Constitutional Law > Supremacy Clause > General Overview

HN17[] **Agency Rulemaking, Rule Application & Interpretation**

The United States Supreme Court has stated that it is even more reluctant to infer pre-emption from the comprehensiveness of regulations than from the comprehensiveness of statutes. As a result of their specialized functions, agencies normally deal with problems in far more detail than does Congress. To infer pre-emption whenever an agency deals with a problem comprehensively is virtually tantamount to saying that whenever a federal agency decides to step into a field, its regulations will be exclusive. Such a rule, of course, would be inconsistent with the federal-state balance embodied in the Supremacy Clause jurisprudence. Moreover, because agencies normally address problems in a detailed manner and can speak through a variety of means, including regulations, preambles, interpretive statements, and responses to comments, they will make their intentions clear if they intend for their regulations to be exclusive.

Constitutional Law > Supremacy Clause > General Overview

HN18[] **Constitutional Law, Supremacy Clause**

What constitutes a sufficient obstacle for a finding of implied preemption is a matter of judgment, to be informed by examining the federal statute as a whole and identifying its purpose and intended effects. A court's inquiry in this regard requires it to consider the relationship between state and federal laws as they are interpreted and applied, not merely as they are written.

Antitrust & Trade Law > Consumer Protection > Deceptive Labeling & Packaging > General Overview

Constitutional Law > Supremacy Clause > General Overview

HN19[] **Consumer Protection, Deceptive Labeling & Packaging**

Cal. Bus. & Prof. Code § 25241 is consistent with Congress's overall purpose in enacting *27 U.S.C.S. § 205(e)* -- that is, to insure that the purchaser should get what he thought he was getting, and that the representations both on labels and in advertising should be honest and straightforward and truthful. The state statute also is consistent with the recognition that the Federal Alcohol Administration Act, *27 U.S.C.S. § 201 et seq.*, was necessary in order to do something to supplement legislation by the States to carry out their own policies because the states alone cannot do the whole job. *Cal. Bus. & Prof. Code § 25241* does not stand as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress.

Constitutional Law > Supremacy Clause > General Overview

HN20[] Constitutional Law, Supremacy Clause

The presumption against preemption reinforces the appropriateness of a narrow reading of assertedly preempting language.

Antitrust & Trade Law > Consumer Protection > Deceptive Labeling & Packaging > General Overview

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Quality

HN21[] Consumer Protection, Deceptive Labeling & Packaging

It is apparent from the Federal Alcohol Administration Act, *27 U.S.C.S. § 201 et seq.*, and from the corresponding regulations, that both Congress and the Bureau of Alcohol, Tobacco, and Firearms (BATF) well understand the distinction between a license or permit, on one hand, and a certificate of label approval (COLA), on the other. Congress requires wine importers, producers, and wholesalers to secure a "basic permit," *27 U.S.C.S. § 203(a)-(c)*, and the BATF has adopted extensive corresponding regulations concerning such permits, *27 C.F.R. §§ 1.20-1.59 (2003)*. By contrast, nowhere in the separate COLA procedures set forth in *27 U.S.C.S. § 205(e)*, or the extensive COLA regulations, *27 C.F.R. §§ 4.50-4.52*, 13.1-13.92 (2003), does Congress or the BATF even imply that a COLA constitutes a license or permit.

Antitrust & Trade Law > Consumer Protection > Deceptive Labeling & Packaging > General Overview

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Quality

International Trade Law > General Overview

HN22[] Consumer Protection, Deceptive Labeling & Packaging

The Bureau of Alcohol, Tobacco, and Firearms (BATF) has observed that a certificate of label approval (COLA) was never intended to convey any type of proprietary interest to the certificate holder and that a certificate is issued for BATF use only. The COLA is a statutorily mandated tool used to help the BATF in its enforcement of the labeling requirements of the Federal Alcohol Administration Act, *27 U.S.C.S. § 201 et seq.* *64 Fed. Reg. 2122, 2123 (Jan. 13, 1999)*. A COLA goes no further than evidencing compliance with federal regulatory standards imposed only for the purposes mentioned in the valid exercise of federal authority.

Headnotes/Summary

Summary

CALIFORNIA OFFICIAL REPORTS SUMMARY

A bulk wine producer and a wine bottler filed an original petition for a writ of mandamus in the Court of Appeal, seeking to prohibit the Department of Alcoholic Beverage Control and its director from enforcing *Bus. & Prof. Code, § 25241*, the state wine labeling statute, with respect to three brand-name wines bottled and marketed by the wine company, on the ground that regulations designed to implement the Federal Alcohol Administration Act (FAA Act), *27 U.S.C. § 201 et seq.*, preempted the state statute. *Bus. & Prof. Code, § 25241*, requires that, when the word "Napa" (or the name of any federally recognized viticultural region within Napa County, such as Rutherford) appears on a brand label, at least 75 percent of the grapes used to make that wine must be from Napa County. The wine company however, uses the three brand names (Napa Ridge, Napa Creek Winery, and Rutherford Vintners) exclusively to sell wines made from grapes grown outside Napa County. The brand names had been acquired from predecessor owners of wineries located in Napa County and the wine company's continued use of the brand-name labels had been approved by the federal agency charged with enforcing the federal labeling law. A “grandfather clause” appended to the federal regulations (*27 C.F.R. § 4.39(i)(2)(ii)*) exempted the three labels from the federal regulation, which would have similarly required that 75 percent of the grapes had in fact been grown in Napa County or one of its viticultural regions (*27 C.F.R. § 4.39(i)(1)*), because the brand name had been in use prior to July 7, 1986, and the front labels also disclosed the true geographic source of the grapes used to make the wines. The Court of Appeal, Third Dist., No. C037254, concluded that *Bus. & Prof. Code, § 25241*, is preempted by federal law.

The Supreme Court reversed the judgment of the Court of Appeal and remanded the. The court concluded that the state labeling statute was neither expressly nor impliedly preempted by federal law. Extensive review of the history of state and federal regulation of beverage and wine labels revealed **[*944]** substantial state involvement and very little federal regulation prior to the adoption of the *FAA Act*, leading to the conclusion that the presumption against preemption applied. The intent of Congress in enacting the *FAA Act* was to preventing the deception or misleading of consumers related to the labeling of wine, and to supplement—but not supplant—existing state regulation of the industry. The wine company failed to demonstrate that the long history of concurrent state and federal regulation of wine labeling, including historically, the representations appearing on labels suggesting the place of origin of the grapes used to make wine, was no longer compatible with the overall purposes of the federal regulation of wine labeling. *Bus. & Prof. Code, § 25241*, by prohibiting, with respect to Napa County, what was not prohibited by the federal regulation's grandfather clause—the use of established geographical brand names for wines from a variety of appellation areas—did not stand as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress. The congressional and regulatory acquiescence in California's long-standing regulations applicable to the labeling of wines produced in California demonstrated that the responsible federal regulatory agency operated on the understanding that states may and would continue to impose their own stricter wine labeling regulations. Finally, by purchasing a brand name that had been used prior to 1986, the wine company had not acquired a federally recognized right of license exempting it from stricter state regulation. (Opinion by George, C. J., with Kennard, Baxter, Chin, Brown, and Moreno, JJ., and Swager, J.[*] concurring.)

Headnotes

CA(1)[] **(1)**

Alcoholic Beverages § 4—Alcoholic Beverage Control Act—Wine Produced or Marketed in California—Brand Name and Label—Napa County and Napa Viticultural Regions—Appellation of Origin.

Bus. & Prof. Code, § 25241, subd. (b), provides in relevant part that no wine produced or marketed in California shall use a brand name or have a label bearing the word “Napa” (or any federally recognized viticultural area within Napa County) unless at least 75 percent of the grapes from which the wine was made was grown in Napa County.

CA(2)[] **(2)**

Alcoholic Beverages § 3—Federal Alcohol Administration Act—Wine—Geographic Brand Name—Viticultural Region—Appellation of Origin—Grandfather Clause.

[*] Associate Justice of the Court of Appeal, First Appellate District, Division One, assigned by the Chief Justice pursuant to article VI, section 6, of the California Constitution.

The Federal Alcohol Administration **[*945]** Act, *27 U.S.C. § 201 et seq.*, bars misleading statements on wine labels (*27 U.S.C. § 205(e)*) and requires federal approval of each label via a certificate of label approval before that label may be used in interstate or foreign commerce. Title *27 C.F.R. § 4.39(i)(1)*, designed to implement *27 United States Code § 205(e)*, generally prohibits the use of a label bearing a brand name that implies the wine was made from grapes grown in the area suggested by the brand, unless at least 75 percent of the grapes used to make the wine was in fact grown in that area. But a “grandfather clause” appended to the federal regulation exempts from the federal regulation's prohibition an otherwise misleading geographic brand name if the brand name was in use prior to July 7, 1986, and the front label also discloses the true geographic source of the grapes used to make the wine contained in the bottle. (*27 C.F.R. § 4.39(i)(2)(ii)*.)

CA(3)[] **(3)**

Constitutional Law § 34—Distribution of Governmental Powers—Between Federal and State Governments—Conflicts Between Federal and State Powers—Federal Preemption.

Under the supremacy clause of the *U.S. Const., art. VI, cl. 2*, Congress has the power to preempt state law concerning matters that lie within the authority of Congress. In determining whether federal law preempts state law, a court's task is to discern congressional intent. Congress's express intent in this regard is found when Congress explicitly states that it is preempting state authority. Congress's implied intent to preempt is found (i) when it is clear that Congress intended, by comprehensive legislation, to occupy the entire field of regulation, leaving no room for the states to supplement federal law; (ii) when compliance with both federal and state regulations is an impossibility; or (iii) when state law stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress.

CA(4)[] **(4)**

Constitutional Law § 34—Distribution of Governmental Powers—Between Federal and State Governments—Conflicts Between Federal and State Powers—Federal Preemption—Burden of Proof.

The party who claims that a state statute is preempted by federal law bears the burden of demonstrating preemption.

CA(5)[] **(5)**

Constitutional Law § 34—Distribution of Governmental Powers—Between Federal and State Governments—Conflicts Between Federal and State Powers—Federal Preemption—Field Traditionally Occupied by the States.

When Congress legislates in a field traditionally occupied by the states, a court starts with the assumption that the historic police powers of the states were not to be superseded by the federal act unless that was the clear and manifest purpose of Congress.

[*946] ***CA(6)***[] **(6)**

Alcoholic Beverages § 3—Federal Alcohol Administration Act—Preemption.

Historic evidence demonstrates that when Congress finally entered the specific field of wine label regulation in August 1935 by enacting the Federal Alcohol Administration Act, *27 U.S.C. § 201 et seq.*, Congress was legislating in a field traditionally regulated by the States. Accordingly, a strong presumption against federal preemption of state law applies, and a court should not find that the traditional police powers of the states to regulate wine labels (in order to prevent the deception of consumers) are superseded unless it is clear and manifest that Congress intended to preempt state law.

CA(7)[] **(7)**

Alcoholic Beverages § 3—Federal Alcohol Administration Act—Federal Preemption—No Intent to Preempt State Regulation—Wine Labeling.

The history of the 1935 Federal Alcohol Administration Act discloses no intent on the part of Congress to supplant or preempt state efforts to regulate wine labeling.

CA(8)[] **(8)**

Alcoholic Beverages § 3—Federal Alcohol Administration Act.

The Federal Alcohol Administration Act (FAA Act), *27 U.S.C. § 201 et seq.*, makes it illegal for any person to produce, sell, or ship wine in interstate or foreign commerce unless that person is licensed to do so by the Secretary of the Treasury. (*27 U.S.C. § 203(a)* & *(b)*.) Title *27 U.S.C. § 205(e)*, directs the Secretary of the Treasury to promulgate such regulations with respect to packaging, marking, branding, and labeling (1) as will prohibit deception of the consumer with respect to alcoholic beverage products and (2) as will provide the consumer with adequate information as to the identity and quality of the products. To enforce these requirements, this section of the FAA Act also requires that any person who sells or ships wine in interstate or foreign commerce first obtain from the Secretary of the Treasury a certificate of label approval, for each wine, and directs that no wine may be shipped or sold in interstate commerce unless it bears a label that has been reviewed and approved by the Secretary of the Treasury, through issuance of such a certificate. Finally, the section further provides that no wine label may be removed or altered except as authorized by federal law or except pursuant to federal regulations authorizing relabeling for purposes of compliance with the requirements of this subsection or of state law.

CA(9)[] **(9)**

Alcoholic Beverages § 3—Federal Alcohol Administration Act—Federal Preemption—No Intent to Preempt State Regulation—Wine Labeling.

Nothing in the body of the Federal Alcohol Administration Act, *27 U.S.C. § 201 et seq.*, reveals congressional intent to supersede concurrent (or more stringent) regulation of wine labeling by the states under their traditional police powers.

[*947] *CA(10)*[] **(10)**

Alcoholic Beverages § 3—Federal Alcohol Administration Act—Federal Regulation—Concurrent or Stricter State Regulation—Wine Labeling.

The federal agencies within the Department of the Treasury responsible for wine labeling regulation have long contemplated or at least acquiesced in concurrent and stricter state regulation.

CA(11)[] **(11)**

Alcoholic Beverages § 3—Federal Alcohol Administration Act—Federal Labeling Regulations—Wine Labels—Appellation of Origin.

Title *27 C.F.R. § 4.25(b)(1)(i), (iii)* states that a wine is entitled to be described with an appellation of origin if at least 75 percent of the wine is derived from fruit grown in the appellation area indicated and it conforms to the laws and regulations of the named appellation area governing the composition, method of manufacture, and designation of wines made in such place.

CA(12)[] **(12)**

Alcoholic Beverages § 3—State Department of Health Services—Wine Regulation.

Since mid-1939, the California Legislature has authorized state wine regulations that are stricter than federal wine regulations, and since 1970, the Legislature expressly has authorized state wine regulations to differ from or be inconsistent with federal wine regulations (*Health & Saf. Code, § 110525*).

CA(13)[] **(13)**

Alcoholic Beverages § 3—Federal Alcohol Administration Act—Federal Preemption.

The history of the federal and Oregon wine labeling regulations in the mid-1970s through the present reveals no evidence of any intent to preempt more stringent state regulations. Instead, that history strongly indicates that the Bureau of Alcohol, Tobacco and Firearms has long contemplated that the states will enforce their own stricter labeling requirements, and that the agency did not and does not view its labeling regulations as preempting more stringent state regulations such as *Bus. & Prof. Code, § 25241*.

CA(14)[] **(14)**

Constitutional Law § 34—Distribution of Governmental Powers—Between Federal and State Governments—Conflicts Between Federal and State Powers and Their Resolution—Federal Preemption.

An express definition of the preemptive reach of a statute supports a reasonable inference that Congress did not intend to preempt other matters.

CA(15)[] **(15)**

Alcoholic Beverages § 4—Alcoholic Beverage Control Act—Wine Produced or Marketed in California—Brand Name and Label—Napa County and Napa Viticultural Regions—Appellation of Origin—Not Obstacle to Purposes and Objectives of Federal Alcohol Administration Act.

Bus. & Prof. Code, § 25241, is consistent with **[*948]** Congress's overall purpose in enacting *27 U.S.C. § 205(e)*—that is, to ensure that the purchaser should get what he or she thought he or she was getting, and that the representations both on labels and in advertising should be honest and straightforward and truthful. The state statute also is consistent with the recognition that the Federal Alcohol Administration Act, *27 U.S.C. § 201 et seq.*, was necessary in order to do something to supplement legislation by the states to carry out their own policies because the states alone cannot do the whole job. *Bus. & Prof. Code, § 25241*, does not stand as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress.

CA(16)[] **(16)**

Alcoholic Beverages § 4—Alcoholic Beverage Control Act—Wine Produced or Marketed in California—Geographical Brand Name and Label—Napa County and Napa Viticultural Regions—Not Preempted by the Grandfather Clause of Federal Regulations Which Exempted Certain Geographic Brand Names from Appellation of Origin Requirements.

Nothing in the history of the Federal Alcohol Administration Act, *27 U.S.C. § 201 et seq.*, or its enabling regulations, *27 C.F.R., §§ 4.20–4.39*, suggests that, although the Bureau of Alcohol, Tobacco and Firearms (BATF) may have determined that the grandfather clause of *27 C.F.R. § 4.39(i)(2)(ii)*, which exempted from federal regulation certain established but otherwise misleading geographic brand names, was appropriate so as to avoid destroying an entire class of brand-name labels, states would or should be precluded from adopting more stringent brand-name labeling requirements as necessary to address local concerns. The more stringent requirement of *Bus. & Prof. Code, § 25241*, that no wine produced or marketed in California can use a brand name label bearing the word "Napa" (or any federally recognized viticultural area within Napa County) unless at least 75 percent of the grapes from which the wine was made were grown in Napa County, did not frustrate Congress's intent or stand as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress. A wine company that had acquired three brand names bearing the words "Napa" or "Rutherford" from predecessor owners of wineries in Napa County could not demonstrate that the grandfather clause of *27 C.F.R. § 4.39(i)(2)(ii)*, preempted *Bus. & Prof. Code, § 25241*, and, thus, could not establish its right to use, on wines made from grapes grown in areas far from Napa County and the Rutherford viticultural region, the geographical brand names it had acquired.

[7 Witkin, Summary of Cal. Law (9th ed. 1988) Constitutional Law, § 15.]

[*949] *CA(17)*[] (17)

Alcoholic Beverages § 3—Federal Alcohol Administration Act—Federal Preemption—Bureau of Alcohol, Tobacco and Firearms—Enforcement of Bare Terms of Federal Wine Labeling Law.

The Bureau of Alcohol, Tobacco and Firearms (BATF) envisions that states will enforce their own labeling laws to the extent they impose more stringent requirements, and generally views its role as being confined to ensuring compliance with the bare terms of federal labeling law. The BATF itself has confirmed this view of its enforcement authority and of any resulting certificate of label approval that it issues by noting, on its application form, that the BATF uses the form only for its own federal enforcement duties but that it may share the information supplied to state regulators to aid in the performance of their duties.

***CA(18)*[] (18)**

Alcoholic Beverages § 3—Federal Alcohol Administration Act—Federal Preemption—Bureau of Alcohol, Tobacco and Firearms—Certificate of Label Approval.

A federal certificate of label approval cannot properly be viewed as conferring a right on the holder to market wines in interstate or foreign commerce so long as the bare Bureau of Alcohol, Tobacco and Firearms (BATF) labeling regulations are satisfied. The BATF itself has observed that a certificate of label approval was never intended to convey any type of proprietary interest to the certificate holder and that a certificate is issued for BATF use only. The certificate of label approval is a statutorily mandated tool used to help the BATF in its enforcement of the labeling requirements of the Federal Alcohol Administration Act, *27 U.S.C. § 201 et seq.* A certificate goes no further than evidencing compliance with federal regulatory standards imposed only for the purposes mentioned, in the valid exercise of federal authority.

Counsel: Howard, Rice, Nemerovski, Canady, Falk & Rabkin, Jerome B. Falk, Jr., Steven L. Mayer; Ropes & Gray, Peter M. Brody and Kelly B. Kramer, for Petitioners.

Opinion by: George

Opinion

[*183]** **[**424]** **GEORGE, C. J.**?This case concerns three brand-name labels (Napa Ridge, Napa Creek Winery, and Rutherford Vintners) appearing on wine bottled and marketed by petitioners Bronco Wine Company and Barrel Ten Quarter Circle, Inc. (hereafter Bronco). These wines are made not from grapes grown in Napa County, or in the Rutherford viticultural (wine grape growing) region of Napa County, [1] but instead from grapes grown in areas far from Napa, such as Stanislaus County and the environs of the City of Lodi—areas where the cost of grapes, and often their perceived quality as well, is considerably lower. The challenged bottle labels have been approved by the federal agency charged by Congress with enforcing federal labeling law but violate a four-year-old California wine labeling statute, which requires that, when the word "Napa" (or any federally recognized viticultural **[**425]** region within Napa County) appears on a brand label, at least 75 percent of the grapes used to make that wine must be from Napa County. (*Bus. & Prof. Code, § 25241* (hereafter *section 25241*).) We granted review to consider the Court of Appeal's conclusion that federal **[****3]** law preempts the state law. We conclude that the state labeling statute is not preempted by federal law and hence that the judgment rendered by the Court of Appeal must be reversed.

I.

Bronco asserts that it specializes in "premium wines at affordable prices." Some of Bronco's wine is bottled at its facilities in Ceres (near Modesto, in Stanislaus County) and in Sonoma County; other Bronco wines are bottled by petitioner Barrel Ten Quarter Circle, Inc., at a recently completed facility in the City of Napa, in Napa County. The latter plant is capable of producing approximately 18 million 12-bottle cases per year—output that would be more than double the current annual production of Napa-grown wines.

[*951] Bronco sells wines under approximately 30 labels or brand names. A representative **[****4]** label for the three challenged brand names (Napa Ridge, Napa Creek Winery, and Rutherford Vintners) is set forth in the appendix. [2] **[****5]** As can be seen, with regard to the representative Napa Ridge label, the label lists (in smaller lettering and below the brand name) the "designation" of the wine (the varietal name White Merlot), followed underneath by the "appellation of origin"—the geographic source of the grapes (Lodi). The representative Napa

---

[1] Rutherford is a federally recognized viticultural region located within Napa County. (*27 C.F.R. § 9.133 (2003)*; all further citations to the Code of Federal Regulations are to the 2003 edition unless otherwise indicated.)

[2] The labels set forth in Bronco's appendix to the petition for writ of mandate are divided into sections for each of the three brand names. The labels selected for description below and displayed in the appendix to our opinion are the first from each section.

Creek Winery label lists (in smaller lettering and below the brand name) the appellation of origin (Lodi), followed underneath by the varietal name (Chardonnay). **[***184]** The representative Rutherford Vintners label lists (in smaller lettering and below the brand name) the appellation of origin (Stanislaus County), followed underneath by the varietal name (Merlot). The "back label" of each states that the wine was "vinted and bottled" by the named winery in "Napa, CA" or in "Napa, California." [3] In addition, many of the Napa Ridge wines include the word "Napa" on bottleneck collars, and some include that word on branded corks.

Bronco acquired these three brand names, and the right to use these labels, from predecessor owners of wineries located in Napa County. The Napa Ridge brand, which Bronco acquired in January 2000 from Beringer Wine Estates for more than $ 40 million, had been in use since **[****6]** the early 1980s. The Napa Creek Winery brand, introduced in 1981, was acquired by Bronco in 1993. The Rutherford Vintners brand originated in the early 1970s, and was acquired by Bronco in 1994.

The prior owner of the Napa Ridge brand had used that name and label for wines made from grapes grown in California's Central Coast, North Coast, and Lodi appellation areas, as well as from Napa County. All of the wines previously marketed by the prior owner under the Napa Creek Winery brand and most wines previously marketed by the prior owner under the Rutherford Vintners brand had been made from Napa County grapes. Under Bronco's **[*952]** ownership, all three of these brands have been used almost exclusively to sell wines made from grapes grown outside Napa County.

The bill that became *section 25241* was introduced in the California Legislature in February 2000 (Assem. Bill No. 683 (1999– **[**426]** 2000 Reg. Sess.)). After receiving substantial public comment and holding hearings,[4] **[****8]** the Legislature found: "(a)(1) … [F]or more than a century, Napa Valley and Napa County have been widely recognized for producing grapes and wine of the highest quality. Both consumers and the wine industry understand the **[****7]** name Napa County and the viticultural area appellations of origin contained within Napa County (collectively 'Napa appellations') as denoting that the wine was created with the distinctive grapes grown in Napa County. [¶] (2) The Legislature finds, however, that certain producers are using Napa appellations on labels, on packaging materials, and in advertising for wines that are not made from grapes grown in Napa County, and that consumers are confused and deceived by these practices. [¶] (3) The Legislature further finds that legislation is necessary to eliminate these misleading practices. It is the **[***185]** intent of the Legislature to assure consumers that the wines produced or sold in the state with brand names, packaging materials, or advertising referring to Napa appellations in fact qualify for the Napa County appellation of origin." (*§ 25241, subd. (a)*, added by Stats. 2000, ch. 831, § 1.) [5]

---

[3] The word "vinted" is used when wine is fermented at one address and thereafter subjected to "cellar treatment" (such as filtering) at a different address stated on the label. (See 27 C.F.R. § 4.35a(a)(3)(iii) & (v).) Each back label also contains a further statement concerning the appellation of origin. The Napa Ridge back label states: "This White Merlot, from the Lodi Region of Northern California, starts with an enticing aroma of strawberry and cherry … ." The Napa Creek Winery back label states: "From vineyards blessed by the warm days and cool nights of California's famed Lodi viticultural area, our Chardonnay is well structured with complex flavors from partial barrel fermentation. …" The Rutherford Vintners back label reads: "These grapes were harvested from the lush vineyards of Stanislaus County. …"

[4] The Legislature heard evidence of intent, or at least willingness, to expand dramatically the marketing of Napa-named brands, including the hope of fully utilizing the capacity of the new 18-million-case bottling plant in the City of Napa, to produce wine from grapes grown outside Napa County. (See transcript of Sen. Governmental Organization Com., hearings on Assem. Bill No. 683 (1999–2000 Reg. Sess.) (June 27, 2000), pp. 29 & 31 [responses to questions by Sen. Chesbro].)

[5] Bronco contests the Legislature's findings, asserting that labels such as those set out in the record are not in law or in fact deceptive because they display a correct appellation of origin. The Legislature's findings to the contrary, however, are supported both by testimony and survey results presented at the hearings disclosing consumer confusion relating to such labels. Moreover, as observed at the hearings, an uninformed consumer may not know that an unelaborated term (for example, Lodi) appearing on a label refers to a geographic location outside Napa County or even that the named location (in contrast to the brand name of the wine) signifies the place where the grapes used to make the wine actually were grown. Similarly, consumers in restaurants who order wine by the bottle or the glass from menus may be aware only of the brand name of the wine and generally will not have an opportunity to read the label of the bottle before placing an order.

CA(1)[] **(1)** The resulting legislation, *section 25241*, provides in relevant part that no wine produced or marketed in California shall use a brand **[****9]** name or have a label bearing the word "Napa" (or any federally recognized viticultural area within Napa County) unless at least 75 percent of the grapes from which the wine was made were grown in Napa County. (*Id., subd. (b)*.) [6]

[**10]** **[*953]** **[**427]** ***CA(2)***[] **(2)** The legislative history discloses that *section 25241* was designed to close what some legislators termed a "loophole" created by an exception in a federal wine labeling **[***186]** regulation. As discussed more fully below, federal law, ***HN2***[] the Federal Alcohol Administration Act, or FAA Act (*27 U.S.C. § 201 et seq.*), enacted by Congress in 1935, bars misleading statements on wine labels (*id*., *§ 205(e)*) and requires federal approval of each label via a certificate of label approval (hereafter sometimes COLA) before that label may be used in interstate or foreign commerce. A 1986 federal regulation, also described more fully below, designed to implement *27 United States Code section 205(e)*, generally prohibits the use of a label bearing a brand name that implies the wine was made from grapes grown in the area suggested by the brand, unless at least 75 percent of the grapes used to make the wine were in fact grown in that area (*27 C.F.R. § 4.39(i)(1)*). But a "grandfather clause" appended to the federal regulation exempts from the federal regulation's prohibition an otherwise misleading geographic brand name if the brand name was in use prior to July 7, 1986, **[****11]** *and* the front label also discloses the true geographic source of the grapes used to make the wine **[*954]** contained in the bottle. (*Id*., *§ 4.39(i)(2)(ii)*.) [7] **[****12]** In other words, the state statute prohibits, with respect to Napa County, what the federal regulation's grandfather clause does not prohibit. [8]

---

[6] *Section 25241* sets out in *subdivision (a)* the findings quoted above, and then ***HN1***[] provides:

"(b) No wine produced, bottled, labeled, offered for sale or sold in California shall use, in a brand name or otherwise, on any label, packaging material, or advertising, any of the names of viticultural significance listed in subdivision (c), unless that wine qualifies under Section 4.25a [now section 4.25—see 68 Federal Register 39454, 39455 (July 2, 2003)] of Title 27 of the Code of Federal Regulations for the appellation of origin Napa County and includes on the label, packaging material, and advertising that appellation or a viticultural area appellation of origin that is located entirely within Napa County, subject to compliance with Section 25240.

"Notwithstanding the above, this subdivision shall not grant any labeling, packaging, or advertising rights that are prohibited under federal law or regulations.

"(c) The following are names of viticultural significance for purposes of this section:

"(1) Napa.

"(2) Any viticultural area appellation of origin established pursuant to Part 9 (commencing with Section 9.1) of Title 27 of the Code of Federal Regulations that is located entirely within Napa County.

"(3) Any similar name to those in paragraph (1) or (2) that is likely to cause confusion as to the origin of the wine.

"(d) The appellation of origin required by this section shall meet the legibility and size-of-type requirements set forth in either Section 4.38 or Section 4.63 of Title 27 of the Code of Federal Regulations, whichever is applicable.

"(e) Notwithstanding subdivision (b), any name of viticultural significance may appear either as part of the address required by Sections 4.35 and 4.62 of Title 27 of the Code of Federal Regulations, if it is also the post office address of the bottling or producing winery or of the permittee responsible for the advertising, or as part of any factual, nonmisleading statement as to the history or location of the winery.

"(f) The department may suspend or revoke the license of any person who produces or bottles wine who violates this section. Following notice of violation to the person in possession of the wine and a hearing to be held within 15 days thereafter, if requested by any interested party within five days following the notice, the department may seize wine labeled or packaged in violation of this section regardless of where found, and may dispose of the wine upon order of the department. From the time of notice until the departmental determination, the wine shall not be sold or transferred.

"(g) This section applies only to wine which is produced, bottled, or labeled after January 1, 2001."

[7] *27 Code of Federal Regulations section 4.39(i)* ***HN3***[] provides:

[**13]** In late December 2000, shortly before *section 25241* was to become effective, Bronco filed an original petition for a writ **[***187]** of mandamus in the Court of Appeal, [9] seeking to prohibit respondents (the Department of Alcoholic Beverage Control and its then Interim **[**428]** Director, Manuel R. Espinoza, currently Jerry R. Jolly, Director) (hereafter the Department) from enforcing *section 25241* with respect to Bronco's wines, on the ground that the state **[*955]** statute to the extent it applies to wine destined for interstate or foreign commerce is preempted by the grandfather clause contained in the federal law. Bronco also claimed that the California statute violates the *First Amendment*, the commerce clause, and the *takings clause of the United States Constitution.* Intervener Napa Valley Vintners Association (NVVA) joined with the Department in defending the validity of the state enactment. The Court of Appeal issued an alternative writ and granted a stay of enforcement of *section 25241*. As noted above, that court ultimately concluded that *section 25241* is preempted by federal law, and to date that statute has not been enforced. We granted review to address the preemption issue only.

[**14]** II.

A.

CA(3)[] **(3)** The basic rules of preemption are not in dispute: ***HN5***[] Under the supremacy clause of the *United States Constitution (art. VI, cl. 2)*, Congress has the power to preempt state law concerning matters that lie within the authority of Congress. (*Crosby v. National Foreign Trade Council (2000) 530 U.S. 363, 372 [147 L. Ed. 2d 352,*

"(i) *Geographic brand names*. (1) Except as provided in subparagraph 2, a brand name of viticultural significance may not be used unless the wine meets the appellation of origin requirements for the geographic area named.

"(2) For brand names used in existing certificates of label approval issued prior to July 7, 1986:

"(i) The wine shall meet the appellation of origin requirements for the geographic area named; or

"(ii) The wine shall be labeled with an appellation of origin in accordance with *§ 4.34(b)* as to location and size of type of either:

"(A) A county or a viticultural area, if the brand name bears the name of a geographic area smaller than a state, or;

"(B) A state, county or a viticultural area, if the brand name bears a state name; or

"(iii) The wine shall be labeled with some other statement which the appropriate ATF [Bureau of Alcohol, Tobacco and Firearms] officer finds to be sufficient to dispel the impression that the geographic area suggested by the brand name is indicative of the origin of the wine.

"(3) A name has viticultural significance when it is the name of a state or county (or the foreign equivalents), when approved as a viticultural area in part 9 of this chapter, or by a foreign government, or when found to have viticultural significance by the appropriate ATF officer."

[8] Bronco asserts that the statute was drafted in such a manner as to protect other established Napa County wineries, and to target "only a single brand owner—Bronco" (and its three grandfathered brands). The record discloses, however, at least 32 other Napa-related "grandfathered" brands (none of which, it appears, *presently* produces any wine that would violate *section 25241*) that also would be covered by the statute, including the "Napa named" brands Napa Wine Cellars, Napa Wine Co., Napa Cellars, Napa Valley Winery, Napa Vintners, and "Napa viticultural appellation" brands Rutherford Hill, Stag's Leap Wine Cellars, Stags' Leap Winery, Spring Mountain, Mount Veeder Winery, St. Helena Vineyards, and Oakville Vineyards.

Bronco also complains that the statute is underinclusive, in that it does not restrict the use of non-Napa brand names, such as "Monterey Vineyards" or "Sonoma Creek," nor does it preclude the use of brand labels denoting a viticultural area within Napa, such as the brand "Stag's Leap Wine Cellars," for a Napa County wine made with grapes grown outside the Stags Leap District of the Napa Valley. (Cf. *Bus. & Prof. Code, § 25240* [requiring such labels to state a "Napa Valley" appellation in addition to the viticultural area within Napa Valley].) Any such underinclusiveness, however, is irrelevant to our present preemption inquiry.

[9] *Business and Professions Code section 23090.5* ***HN4***[] divests the superior court of jurisdiction to enjoin or restrain a decision of the Department of Alcoholic Beverage Control, the agency charged with enforcing *Business and Professions Code section 25241*.

120 S. Ct. 2288] (Crosby).) In determining whether federal law preempts state law, a court's task is to discern congressional intent. (English v. General Elec. Co. (1990) 496 U.S. 72, 78–79 [110 L. Ed. 2d 65, 110 S. Ct. 2270].) Congress's express intent in this regard will be found when Congress explicitly states that it is preempting state authority. (Jones v. Rath Packing Co. (1977) 430 U.S. 519, 525 [51 L. Ed. 2d 604, 97 S. Ct. 1305] (Jones).) Congress's implied intent to preempt is found (i) when it is clear that Congress intended, by comprehensive legislation, to occupy the entire field of regulation, leaving no room for the states to supplement federal law (Rice v. Santa Fe Elevator Corp. (1947) 331 U.S. 218, 230 [91 L. Ed. 1447, 67 S. Ct. 1146] (Rice)); (ii) when compliance with both federal and state regulations is an impossibility **[****15]** (Florida Avocado Growers v. Paul (1963) 373 U.S. 132, 142–143 [10 L. Ed. 2d 248, 83 S. Ct. 1210] (Florida Avocado)); or (iii) when state law "stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress." (Hines v. Davidowitz (1941) 312 U.S. 52, 67 [85 L. Ed. 581, 61 S. Ct. 399] (Hines); see also Crosby, supra, 530 U.S. at p. 373; Barnett Bank of Marion Cty., N.A. v. Nelson (1996) 517 U.S. 25, 31 [134 L. Ed. 2d 237, 116 S. Ct. 1103] (Barnett Bank); Lawrence County v. Lead-Deadwood School Dist. (1985) 469 U.S. 256, 260 [83 L. Ed. 2d 635, 105 S. Ct. 695] (Lawrence County); Capital Cities Cable, Inc. v. Crisp (1984) 467 U.S. 691, 699 [81 L. Ed. 2d 580, 104 S. Ct. 2694]; see also Dowhal v. SmithKline Beecham Consumer Healthcare (2004) 32 Cal.4th 910, 923–924 [12 Cal. Rptr. 3d 262, 88 P.3d 1] (Dowhal).)

In the present case, it is clear that Congress has not expressly preempted state authority with respect to the regulation of wine generally, or with **[*956]** respect to wine labels in particular, and Bronco does not **[***188]** contend otherwise. Neither does Bronco contend that this is a case in which Congress has occupied the field and **[****16]** thus impliedly preempted the state statute here at issue. Nor does Bronco contend that implied preemption is shown because compliance with both federal and state regulations is impossible; as Bronco concedes, it can comply with the stricter state law and simultaneously comply with federal law. Instead, Bronco asserts that we should find implied preemption in this case because section 25241 stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress. [10] (Cf. Dowhal, supra, 32 Cal.4th 910, 929, 935 [state law warnings concerning nicotine frustrate the purposes of the federal *Food, Drug & Cosmetic Act* and corresponding federal regulations].)

[429]** As we shall explain, we disagree that section 25241 is impliedly preempted by federal **[****17]** law. In reaching this conclusion we first address Bronco's assertion that a presumption against preemption does not apply in this matter. (See *post*, pt. II.B.1.) After extensively reviewing the history of state regulation of beverage and wine labels prior to Congress's adoption of the FAA Act in 1935—a history that reveals substantial state involvement and very little federal regulation—we conclude that a presumption against preemption does indeed apply in this case. Next, we address the intent of Congress in enacting the FAA Act in 1935. (See *post*, pt. II.C.1.) The legislative history of that enactment reveals congressional intent, among other things, (i) to prevent the deception or misleading of consumers related to the labeling of wine and other alcoholic beverages, and (ii) to supplement—but not supplant—existing state regulation of the industry. We next consider the intent of the responsible federal regulatory agency vis-à-vis state regulation of wine brand labeling, as reflected in regulations and comments set out in the Federal Register. (See *post*, pt. II.C.2.) As we explain, the record reveals that the federal regulatory agency has long operated on **[****18]** the understanding that states may and would continue to impose their own stricter wine labeling regulations. Finally, we address the substantive issue of implied preemption of the particular state legislation at issue and conclude that the California statute in question does not stand as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress. (See *post*, pt. II.D.)

B.

HN6[] ***CA(4)***[] **(4)** The party who claims that a state statute is preempted by federal law bears the burden of demonstrating preemption. (See, e.g., McCall v. PacifiCare of Cal., Inc. (2001) 25 Cal.4th 412, 422 [106 Cal. Rptr. 2d 271, 21 P.3d ***[*957]*** 1189], and cases cited.) ***CA(5)***[] **(5)** An important corollary of this rule, often noted and applied by the United States Supreme Court, is that "[*w*]*hen Congress legislates in a field traditionally occupied by*

---

10 Bronco suggests, however, that the state properly may "enact an 'in-state' version of section 25241"—a regulation that would, presumably, apply only with respect to wine that is not sold in interstate commerce.

the States, 'we start with the assumption that the historic police powers of the States were not to be superseded by the Federal Act unless that was the clear and manifest purpose of Congress.' Ct. 2240] (Medtronic) [presumption applies both to the existence of preemption and the scope of preemption]; Ray v. Atlantic Richfield Co. (1978) 435 U.S. 151, 157 [55 L. Ed. 2d 179, 98 S. Ct. 988] (Ray); Jones, supra, 430 U.S. 519, 525; Florida Avocado, supra, 373 U.S. 132, 146; Allen-Bradley Local v. Board (1942) 315 U.S. 740, 749 [86 L. Ed. 1154, 62 S.Ct. 820]; Napier v. Atlantic Coast Line R. Co. (1926) 272 U.S. 605, 611 [71 L. Ed. 432, 47 S. Ct. 207]; Savage v. Jones (1912) 225 U.S. 501, 533 [56 L. Ed. 1182, 32 S. Ct. 715] (*Savage*); Reid v. Colorado (1902) 187 U.S. 137, 148 [47 L. Ed. 108, 23 S. Ct. 92].) As explained in Jones, supra, 430 U.S. 519, 525, this venerable presumption "provides assurance that 'the federal-state balance,' … will not be disturbed unintentionally by Congress or unnecessarily by the courts." (Citation omitted; see Olszewski v. Scripps Health (2003) 30 Cal.4th 798, 815 [135 Cal. Rptr. 2d 1, 69 P.3d 927] (Olszewski).) **[****20]**

The Department and the NVVA assert that the state regulation at issue in this case directly implicates the traditional police powers of the states to protect consumers from deception in the marketing of food and beverages and to safeguard the integrity—and worldwide market—of a vital California industry. (See, e.g., Florida Avocado, supra, 373 U.S. 132, 146 ***HN7***[] [state police powers properly are employed both to protect consumers' health and to "prevent the deception of consumers"]; Pike v. Bruce Church, Inc. (1970) 397 U.S. 137, 143 [25 L. Ed. 2d 174, 90 S. Ct. 844] [recognizing a state's interest in protecting its reputation as a reliable source of authentic, high-quality goods in all markets where its **[**430]** goods compete].) Indeed, we observed as much concerning the California wine industry more than 100 years ago. (Ex parte Kohler (1887) 74 Cal. 38, 42–43 [15 P. 436] [state wine labeling statute, designed to protect the health of consumers and the integrity of the wine industry, was a proper exercise of the police power].)

[*958] Bronco and amici curiae on its behalf, Abundance Vineyards et al, [11] **[****22]** assert, however, that no presumption **[****21]** against preemption applies in this case because there is no evidence that states traditionally have exercised their police powers to regulate the labeling of wine. [12] Specifically, Bronco argues **[***190]** that prior to the August 1935 enactment of the FAA Act, 27 United States Code section 201 et seq., federal regulation of wine labeling was "well-established," whereas the activity of the states in that enterprise was "limited." Bronco maintains that "although the states have played a limited role in regulating wine labeling over the past century, the federal government's presence in that field … would negate the application of any presumption against preemption in this case." Amici curiae assert, similarly and more emphatically, that prior to enactment of the FAA Act in August

[11] Counsel for amici curiae represent, among other entities, more than 68 wineries in Alabama, Arizona, Arkansas, California, Georgia, Maine, Massachusetts, Michigan, New Jersey, New Mexico, New York, Oklahoma, Oregon, Pennsylvania, Tennessee, Texas, Virginia, and Washington, as well as 47 wine grape growers in California.

[12] Bronco, relying upon two Eleventh Circuit Court of Appeals decisions (Lewis v. Brunswick Corp. (11th Cir. 1997) 107 F.3d 1494, 1502, and Taylor v. General Motors Corp. (11th Cir. 1989) 875 F.2d 816, 826), and, to a lesser extent, two high court decisions (Geier v. American Honda Motor Co. (2002) 529 U.S. 861, 870–874 [146 L. Ed. 2d 914, 120 S. Ct. 1913] (Geier), and Engine Manufacturers Association v. South Coast Air Quality Management District (2004) 541 U.S. 246, 256 [158 L. Ed. 2d 529, 124 S. Ct. 1756, 1763] (Engine Manufacturers)), also asserts, as a preliminary matter, that the presumption against preemption is categorically inapplicable in implied preemption cases such as this, in which the question is whether state law would stand as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress. The United States Supreme Court has not so held, however, and indeed has assumed otherwise. (Crosby, supra, 530 U.S. 363, 373–374 & fn. 8.) Geier, by contrast, did not even address the presumption-against-preemption doctrine, and in Engine Manufacturers the court simply found it unnecessary, because of its conclusion that the federal legislation *expressly* preempted the relevant state law, to address the presumption against preemption or even the legislative history of the federal statute. We discern no persuasive reason why the traditional presumption against preemption should be categorically inapplicable in the present circumstances, and until the high court directs otherwise, we reject Bronco's view on this point. (See, e.g., Philip Morris Inc. v. Harshbarger (1st Cir. 1997) 122 F.3d 58, 85–86 [applying a "strong presumption against preemption" concerning state health and safety regulations and finding those regulations not to frustrate congressional purposes].)

1935 "state and local authorities had exercised control over the *distribution* and *sale* of liquor" but that "it was the federal government that first comprehensively regulated the packaging and labeling" of wine.

[**23]** The Department and the NVVA, on the other hand, point to early California statutes addressing wine labeling, isolated statements in treatises and legal articles, and statements in congressional reports and debates suggesting an intent by Congress in 1935 that the *FAA Act*, including *27 United States Code section 205(e)* and the regulations that would be expected to flow therefrom, would supplement state regulation of wine labeling but not preempt it.

[*959] Prior to oral argument we solicited supplemental briefing from the parties, asking them to address the effect, if any, of numerous additional state statutes and regulations disclosed in the course of our review of this case. Having considered those materials and the parties' supplemental briefs, we conclude below that the historic record amply supports the conclusion that a presumption against preemption applies in this case because the protection of consumers from potentially misleading brand names and labels of food and beverages in general, and wine in particular, is a subject that traditionally has been regulated by the states. [13]

[**24]**

[431]** 1. *Regulation of wine labels prior to adoption of the FAA Act in August 1935*

Prior to the 20th century, federal legislation relating to wine and alcohol focused essentially upon revenue collection—specifically, enforcement of federal tax laws. **[***191]** (See Byse, *Alcoholic Beverage Control Before Repeal* (1940) 7 Law & Contemp. Probs. 543, 552, fns. 57 & 58 (*Alcoholic Beverage Control Before Repeal*).) By contrast, as disclosed below, widespread legislation enacted by states in the mid to late 19th century, and continuing through adoption of the *FAA Act in August 1935*, focused upon the substantive public problems of "adulteration" and "misbranding" (or "mislabeling") of wines and alcohol. This historic record supports the view that prior to adoption of the federal act in 1935, states vigorously exercised their police powers to regulate wine labeling.

a. *The emergence of state "pure food" and labeling statutes*

During the latter half of the 19th century, awareness gradually increased throughout the nation concerning a combination of related problems in the supply of food and beverages. Some food and beverage products were mere imitations or dilutions of what they purported **[****25]** to be; other products, subject to spoilage, were "adulterated" by a "soaring employment of chemical preservatives." (Young, Pure Food (1989) p. 126.) Many of these preservatives—such **[*960]** as salicylic acid, employed as a preservative in wine (*id*., at p. 105)—were used in excessive quantities dangerous to health. (*Id*., at pp. 110, 112, 126.) As a result, it was found that more than "73 per cent of the milk in Buffalo [New York] was watered, 69 of 171 samples of ground coffee collected in New York were adulterated, 71 percent of the olive oils examined in New York and Massachusetts were mixed with cotton seed oil which had been shipped from the United States and returned as 'olive oil'[, and] [f]orty-six percent of candy samples collected in Boston contained mineral pigments, chiefly lead chromate." (Hart, *A History of the Adulteration of Food Before 1906* (1952) 7 Food Drug Cosm. L.J. 5, 21); see also McCumber, *The Alarming Adulteration of Food and Drugs* (Jan. 5, 1905) The Independent, 28, 29–31 [listing common adulterations of various products].) Wines too were subject to abuses. Some were "made from cheap substances and then doctored **[****26]** up."

---

[13] At oral argument, as in the Department's briefs, the NVVA maintained that the "relevant area" for purposes of determining whether the presumption against preemption is applicable should be viewed as consumer protection related to the labeling of foods and beverages in general or, more specifically, as consumer protection related to the labeling of wines. Bronco, although generally challenging the appropriateness of applying any presumption against preemption in this case (see *ante*, fn. 12), does not contest the definition of the relevant area for such an inquiry as proposed by the Department and the NVVA. For purposes of this opinion, and consistently with the high court's approach in such matters (see, e.g., *ARC America Corp., supra, 490 U.S. 93, 101* [in addressing whether federal ***antitrust law*** preempts state law, defining the relevant area as "state common-law and statutory remedies against monopolies and unfair business practices"]), we view the relevant area as being consumer protection related to food and beverage labeling, with special emphasis upon wine labeling.

(Regier, *The Struggle for Federal Food and Drugs Legislation* (1933) 1 Law & Contemp. Probs. 3, 8.) Others were mislabeled as to place of origin. (Carosso, The California Wine Industry: A Study of the Formative Years (1951) p. 25 (California Wine Industry); see also Fanshawe, Liquor Legislation in the United States and Canada (1892) p. 308.)

In response to the general threat to the food and beverage supply, many if not most states exercised their traditional police powers to regulate generally the marketing of impure or deceptively labeled foods and beverages. (See, e.g., Dig. of Pure Food and Drug Laws, Sen. Rep. No. 3, 57th Cong., 1st Sess. (1901).) [14] The vast majority of the resulting general "pure food" statutes broadly covered liquors and wines, as well as the mislabeling of those products.

[**27]** For example, in 1879 Wisconsin enacted a general pure food, drugs, and liquors statute, making it illegal to manufacture or sell any **[**432]** food (defined to include "drink"), accompanied by "any label, mark or device whatever, so as and with intent to mislead **[***192]** or deceive as to the true name, nature, kind and quality thereof … ." (1879 Wis. Laws, ch. 248, § 3, p. 502.) A similar labeling law was enacted in North Dakota. (1903 N.D. Laws, ch. 6, §§ 1–2, pp. 9–10; 1905 N.D. Laws, ch. 11, §§ 1–2, pp. 19–20.) An Ohio statute, enacted in 1884, made it illegal to manufacture or sell any food (defined to include drink) "if by any means it is made to appear better or of greater value than it really is," or if it contained any impure substance not "distinctly labeled" as such. (1884 Ohio Laws, § 3, p. 67; 1890 Ohio Laws, § 3, p. 248.) Substantially similar labeling statutes were enacted in Indiana, Massachusetts, **[*961]** Michigan, Pennsylvania, and Washington. (1899 Ind. Acts, ch. 121, § 1, pp. 189–190; 1882 Mass. Acts, ch. 263, §§ 1–3, pp. 206–207; 1895 Mich. Pub. Acts, No. 193, § 3, p. 358; 1895 Pa. Laws, No. 233, § 3, p. 317; 1899 Wash. Laws, ch. 113, §§ 1–3, pp. 183–184.) A Maryland statute, enacted **[****28]** in 1890, required that food or drink "be so manufactured … or sold, or offered for sale under its true and appropriate name" and required that the purchaser be "fully informed by the seller of the true name and ingredients … of such article of food or drink … ." (1890 Md. Laws, ch. 604, § 1, p. 733.) Similar laws were enacted in Connecticut, North Carolina, and Tennessee. (1895 Conn. Pub. Acts, ch. 235, §§ 1, 2, p. 578; 1895 N.C. Sess. Laws, ch. 122, §§ 1, 2, 5, pp. 176–178; 1897 Tenn. Pub. Acts, ch. 45, §§ 1, 4, pp. 177–178.) Finally, a New York statute (1893 N.Y. Laws, ch. 338), subsequently amended in 1903 and 1905, prohibited "adulterated or misbranded food." The statute defined as "misbranded"—and illegal—any food or beverage "package … or label" that bore "any statement regarding the ingredients or the substances contained therein, which statement [is] false or misleading in any particular, or if the same is *falsely branded as to the state or territory in which it is manufactured or produced* … ." (1903 N.Y. Laws, ch. 524, § 1, p. 1192, italics added; 1905 N.Y. Laws, ch. 100, § 1, p. 141.) A substantially identical labeling law was enacted in **[****29]** South Dakota. (1905 S.D. Laws, ch. 114, §§ 6, 8 & 10, pp. 162–163.) [15]

b. *Early state wine labeling statutes*

As early as 1860, California enacted a statute to penalize the sale of "adulterated alcoholic or spirituous liquors, wines, cider, beer, or other liquid used as a beverage." **[****30]** (Stats. 1860, ch. 223, § 2, p. 186, currently *Pen. Code, § 382*.) But in the face of rampant deception in the labeling of wines—including the bottling of California wines under false foreign labels, and the bottling of inferior foreign wines under California labels (Cal. Wine Industry, *supra*, at p. 25) the California Legislature in 1866 passed a resolution asking Congress to enact nationwide legislation to curb the marketing of "spurious" and "imitation" wines and alcohols. (Sen. Conc. Res. No.

[14] Some state laws of this era regulated the production and labeling of specific items of food such as flour, butter, oleomargarine, and vinegar. (E.g., Hutt & Hutt, *A History of Government Regulation of Adulteration and Misbranding of Food* (1984) 39 Food Drug Cosm. L.J. 2, 42–44 [citing and describing early Virginia statutes].) During this same period, Congress enacted similar laws concerning specific food items such as tea, oleomargarine, and meats. (*Id*., at pp. 45–46.)

[15] Citing only the 1895 North Carolina law, Bronco asserts that "some" of these state laws were intended to apply only to food and beverages sold within a given state. The North Carolina provision, however, is the only such law of which we are aware to have intimated or specified such a limitation; none of the other laws cited above was so confined, and most instead broadly applied to foods and beverages that were "manufactured for sale"—wherever that sale would occur. But in any event, the relevant point is that the states (most of them broadly, although in the case of North Carolina, narrowly) exercised their traditional police powers by specifically regulating the labeling of food products and beverages, including wines.

36, Stats. 1866 (approved Apr. 2, 1866) p. 908.) After much effort during the ensuing two decades, this endeavor ultimately failed in 1886. (See Cal. Wine Industry, *supra*, at pp. 154–155.)

[*193]** **[*962]** Congress's inability to adopt a nationwide wine regulation and labeling statute induced the three primary wine-producing states—California, New York, and Ohio [16] **[****31]** —as well as other states with lesser wine industries (such as Arkansas, Colorado, and Oregon) [17] to enact, **[**433]** under their traditional police powers, specific and detailed statutes tailored to the problems of impurity and deception in the production and labeling of wines.

California—then, as now, by far the leading producer of wine in the nation, [18] **[****33]** and an acknowledged leader in quality as well [19]—apparently was the first state to adopt such a statute, in March 1887. (Stats. 1887, ch. 36, p. 46; see *Ex parte Kohler, supra, 74 Cal. 38, 42–43*.) The California statute defined as "pure wine" that which was made from only pure grapes. (Stats. 1887, ch. 36, § 1, p. 46.) The statute further defined "[d]ry wine" as that produced by "complete fermentation of saccharine contained in [grape] must"; "[s]weet wine" as that which contains "saccharine appreciable to the taste"; "[f]ortified wine" as "wine to which distilled spirits have been added"; and "[p]ure champagne, or sparkling wine" as that which "contains … effervescence produced only by natural fermentation of saccharine matter of [grape] must, or partially fermented wine in bottle." (*Id.*, § 1, p. 47.) The statute prevented the use **[****32]** or introduction of impure "substitutes for grapes" or coloring, or foreign fruit juices "not the pure product of grapes," and further barred the use of preservatives such as "salicylic acid, glycerin, alum, or other chemical antiseptics." (*Id.*, § 2, p. 47.) The statute also provided for inspection of wine samples and for the use of bottleneck seals and label certificates (*id.*, § 7, pp. 48–49), and required either the statement " 'Pure California wine' " (together with the maker's name) or the label certificate to be affixed to each bottle of pure wine. (*Id.*, § 8, p. 49.) [20] This court's decision in *Ex parte Kohler, supra, 74 Cal. 38*, rejected constitutional challenges to the act and concluded that, like legislation designed to ensure the marketing of **[*963]** pure milk and safe meats, the statute was a proper exercise of the state's police powers. (*Id., at pp. 41–42*.) [21]

[*194]** Colorado quickly followed in April 1887 with its own statute regulating the "manufacture or sale" of wine and other alcoholic **[****34]** beverages. [22] New York adopted its own wine labeling statute in June 1887. [23] **[****35]** Two **[**434]** years later Ohio adopted a law that expanded upon the three wine labeling statutes

---

[16] As of 1890, those three states produced approximately 60, 10, and 8 percent, respectively, of the wine produced in the United States. (U.S. Dept. of Interior, Census Off., Rep. of Statistics of Agriculture in the U.S. at the 11th Census: 1890 (1895) p. 602.)

[17] See Pinney, A History of Wine in America (1989) pages 404–405, 420–422 (describing early winemaking in Arkansas and Oregon).

[18] As observed *ante*, footnote 16, by 1890 California produced most of the wine grown and made in the United States. Today, according to the Wine Institute, California produces more than 90 percent of the nation's wine. (See <*http://www.wineinstitute.org/communications/statistics/wine_production_key_facts.htm*> [as of Aug. 5, 2004].)

[19] See generally, California Wine Industry, *supra*, at pages 26 ("the French viticultural journal, *Revue Viticole*, in 1862, credited California with being the only wine-producing area of North America capable of competing with the product from Europe") and 133 (noting that 35 medals were awarded to California wines at the Paris Exposition Universelle in 1889).

[20] In addition—and belying Bronco's claims that this and similar statutes lacked detail—the statute contained various other provisions dealing comprehensively with the production and labeling of wine. (See Stats. 1887, ch. 36, §§ 3–6, pp. 47–49.)

[21] The *Ex parte Kohler* decision proceeded to construe the act's labeling requirements as prohibiting the sale of wines not meeting the definition of pure wines under the act, but as not subjecting to penalty a merchant who sells wine that is pure but lacks the required labels. (*Ex parte Kohler, supra, 74 Cal. at pp. 44–45*.)

[22] (1887 Colo. Sess. Laws, § 2, p. 18 et seq.) The legislation required that wine be "pure"—defined as made from "the juice of the grape"—and specified that "[n]o vinous … liquors shall be offered or exposed for sale in this State, unless the … package, containing such liquors, shall be plainly" marked with "the word 'pure' wine," and displaying "the name or brand of the particular kind of wine so offered or exposed." (*Id.*, §§ 3 & 4, pp. 18–19.)

described above. [24] Arkansas adopted a wine labeling statute in 1897, [25] and in 1905 Oregon adopted its own wine labeling statute. [26]

[*964] **[****36]** c. *Relevant federal law in the early 20th century: A failed wine statute; adoption of the Pure Food and Drugs Act of 1906; administrative "food standards"; and "Food Inspection Decisions"*

Far from supplanting these early efforts by the states, Congress in 1906 at first attempted but failed to enact a federal wine labeling statute similar to those adopted by the states. [27] As explained below, **[***195]** later in the same session Congress did enact a general pure food and beverage statute, but the resulting federal scheme produced no enforceable wine labeling regulation.

[**37]** Congress's 1906 federal Pure Food and Drugs Act (*Pub.L. No. 59-384 (June 30, 1906) 34 Stat. 768* (hereafter sometimes the 1906 Act)) borrowed substantially from the preceding state food and beverage legislation. Like the earlier New York statute described above (*ante*, pt. II.B.1.a.), the federal act defined as "misbranded"—and

---

[23] (1887 N.Y. Laws, ch. 603, p. 814 et seq.) The New York law was designed to address its specific regional needs as reflected in the industry practices of New York winemakers who, like those in Europe and other areas of the United States but unlike those in California, often found it necessary to add sugar in the production of their wines. The law defined and made illegal adulterated wine, and thereafter defined and required the proper labeling of "pure wine," "half wine," and "made wine." (*Id*., §§ 1–4, pp. 814–816.)

As Bronco observes, the New York provision, as codified in 1889 (N.Y. Pub. Health Law, ch. 25, art. III, §§ 46–49 (Birdseye 1889)), referred, in its definition of adulterated wines, to those "offered for sale or manufactured with intent to sell within this state." (*Id*., § 46.) Bronco asserts this and similar phrasing in the statute's penalty provision (*id*., § 49) suggests the New York statute was intended to apply only to wines sold within the state. There is no evidence that the similar California law mentioned above, or the Ohio law mentioned below, was so confined or intended. But in any event, the relevant point is that New York—like the other states—exercised its traditional police powers by specifically regulating the labeling of wines.

[24] (1889 Ohio Laws, p. 96 et seq.; 1891 Ohio Laws, p. 231.) As amended in 1891, the Ohio law defined three versions of permitted wine: "pure wine," "wine," and "compound wine," and specifically allowed sugar to be added to the latter two products. The statute provided that each type of wine "shall be … labeled, designated and sold" as such and made it illegal to label or package, in a manner "calculated to mislead or deceive any person, or cause to be supposed that the contents thereof be pure wine," any product not meeting the definition of pure wine. (1891 Ohio Laws, §§ 2–4, pp. 231–233.)

[25] (1897 Ark. Acts, act 42, § 4, p. 108.) As subsequently amended (1899 Ark. Acts, act 80, pp. 137–138) and codified (Stats. of Ark., ch. 103, § 5101 (Kirby 1904)), the statute provided: "All wine sold in this State shall, before sale, be labeled so as to truly designate its kind and quality. Nothing but the pure fermented juice of the grape shall be labeled 'Natural Wine.' Wine to which sugar has been added before fermentation shall be labeled 'Sugared Wine.' The label shall also state if the wine be sweetened or unsweetened."

[26] (1905 Or. Laws, ch. 209, p. 347 et seq.) The Oregon law defined and barred "adulterated wine," allowed certain amounts of sugar to be used in the production of "pure wine," and defined and permitted "half wine" and "made wine," so long as those products were labeled as such. (*Id*., §§ 54–56, pp. 361–362.)

[27] See Hearing before the House Committee on Ways and Means, on House Resolution No. 12868, 59th Congress, 1st Session, pages 1–60 (Feb. 1, 1906) (February hearings); Second Hearing before the House Committee on Ways and Means, 59th Congress, 1st Session, pages 61–114 (Apr. 6 & 10, 1906) (April hearings). The proposed legislation would have defined wine as "pure," "carbonated," or "artificial," and required labeling as such. (Feb. hearings, *supra*, at pp. 5–7.) During a second committee hearing concerning the bill and a revised version of the bill, the committee made clear that in considering the proposed federal legislation it had consulted the related wine laws of France, Italy, Germany, Ohio, New York, "and other states." (Apr. hearings, *supra*, at pp. 62, 73, 101, 109–112.)

A recurring theme during the hearings was the harm posed to the wine industry by the sale of "sophisticated and fabricated wines." The proponents' stated concern was that if the sale of such products were "allowed or countenanced … in time honest wine will be driven from the market, … to the injury of the vineyardists … ." (Apr. hearings, *supra*, at p. 66; see also *id*., at pp. 73–74, 102.) That wine labeling legislation, however, died in committee.

illegal—any food or beverage "package … or label" that bore "any statement, design, or device regarding … the ingredients or the substances contained therein, which [is] false or misleading in any particular, and [] any food or drug product which is falsely branded as to the State, Territory, or country in which it is manufactured or produced." (*Pub.L. No. 59-384, § 8 (June 30, 1906) 34 Stat. 770*.)

Also like the previous general pure food and beverage laws of the states, the 1906 federal Act applied to food and "drink" (*Pub.L. No. 59-384, § 6 (June 30, 1906) 34 Stat. 769*), which in turn was construed to include wine. (See *United States v. Sweet Valley Wine Co. (N.D. Ohio 1913) 208 F. 85, 87 (Sweet Valley)*.) The 1906 Act directed **[**435]** three department secretaries—the Secretary of the Treasury, the Secretary of Agriculture, **[****38]** and the Secretary of Commerce and Labor—jointly to adopt regulations "for carrying out the provisions of this Act." (*Pub.L. No. 59-384, § 3 (June 30, 1906) 34 Stat. 768–769*.)

As commanded by Congress, in October 1906 the three department secretaries jointly adopted a set of regulations under the 1906 Act. (See U.S. **[*965]** Dept. of Agriculture, Circular No. 21, reprinted as amended through 1909 in Thornton, The Law of Pure Food and Drugs, National and State (1912) pp. 843–860 (Law of Pure Food and Drugs); see generally Hayes & Ruff, *The Administration of the Federal Food and Drugs Act* (1933) 1 Law & Contemp. Probs. 16, 20 (*Administration of the Federal Food and Drugs Act*).) One provision of those regulations governed the labeling of foods and beverages and prohibited, among other things, false or misleading statements concerning a product's "place [of] origin." (Circular No. 21, *supra*, Reg. 17(d), reprinted in Law of Pure Food and Drugs, *supra*, at p. 851.)

Implicitly acknowledging, as it must, that "[p]rior to the repeal of Prohibition, no agency of the Federal Government was provided with statutory authority to regulate the labeling … of alcoholic beverages **[****39]** specifically" (Russell, *Controls Over Labeling and Advertising of Alcoholic Beverages* (1940) 7 Law & Contemp. Probs. 645, 645 (*Controls Over Labeling*)), Bronco's supplemental brief points to (i) separate "food standards" (including wine standards) adopted solely by the Secretary of Agriculture **[***196]** in the two years prior to enactment of the 1906 federal Pure Food and Drugs Act, and (ii) two "Food Inspection Decisions" (hereafter sometimes F.I.D.), one issued solely by the Secretary of Agriculture and the other issued jointly by the three secretaries. (See Standards of Purity for Food Products (June 26, 1906) Circular No. 19, reprinted in Westervelt, American Pure Food and Drug Laws (1912) pp. 61, 78–79 (American Pure Food and Drug Laws); F.I.D. No. 109 (Aug. 21, 1909); & F.I.D. No. 120 (May 13, 1910), both reprinted in American Pure Food and Drug Laws, *supra*, at pp. 212–214.) As explained below, under federal law the cited food standards (including the wine standards) were merely advisory, and not legally binding, and with respect to the cited Food Inspection Decisions, the first was nonbinding and the second, even if binding, did not demonstrate federal control over the labeling **[****40]** of wines.

The cited food standards had been created at the behest of Congress, which in 1902 and 1903 directed the Secretary of Agriculture to undertake numerous projects, including one "to establish standards for purity of food products and determine what are regarded as adulterations therein, *for the guidance of the officials of the various States* and of the courts of justice … ." (*Pub.L. No. 57-1008 (Mar. 3, 1903) 32 Stat. 1147, 1158*, italics added; see also *Pub.L. No. 57-139 (June 3, 1902) 32 Stat. 286, 296*.) The resulting detailed food standards addressed more than 200 categories of food items, including salted meats, oatmeal, lemon and vanilla extracts, olive oil, coffee, and—in part II.F.a.3 of the secretary's food standards—what Bronco characterizes as "detailed and comprehensive" standards for wine, dry wine, fortified dry wine, sweet wine, fortified sweet wine, sparkling wine, modified wine (a **[*966]** low-alcohol product made by the addition of sugar), and raisin wine (a product made from pomace—dried, evaporated, or previously crushed grapes).

Contrary to Bronco's suggestions and representations, the Secretary of Agriculture's food standards (and hence the wine **[****41]** standards contained therein) were not enforceable under the 1906 federal Pure Food and Drugs Act (which, as noted, required that enforcing regulations be adopted by *all three* named secretaries), or indeed under *federal* law at all. (See *United States v. St. Louis Coffee & Spice Mills (E.D.Mo. 1909) 189 F. 191* [finding the food standards relating to vanilla extract unenforceable under the 1906 Act].) In view of the 1906 Act's "three secretaries" requirements for regulations and the resulting case law, the food standards proclaimed by the Secretary of Agriculture acting alone have been described by authoritative commentators as merely "advisory" and as being "for the guidance of officials and the trade but *not having the force and effect of* ***[**436]*** [*federal*] *law*." (Salthe, *State*

Food, Drug and Cosmetic Legislation and its Administration (1939) 6 Law & Contemp. Probs. 165, 167, italics added; see also Lee, *Legislative and Interpretative Regulations* (1940) 29 Geo. L.J. 1, 4–17 (*Interpretative Regulations*) [noting that despite many congressional attempts in the course of three decades to make the food standards enforceable, **[****42]** manufacturers " 'could take 'em or leave 'em' without legal consequences" under *federal* law]; *Alcoholic Beverage Control Before Repeal, supra,* 7 Law & Contemp. Probs. 544, 553; cf. *Administration of the Federal Food and Drugs Act, supra,* 1 Law & Contemp. Probs. 16, 32, fn. 71.) Indeed, even the treatise upon which Bronco relies concurred on this point, characterizing those same food standards as "not controlling" under federal law. (American Pure Food and Drug Laws, *supra*, at p. 60.) In view of this history, we must **[***197]** reject Bronco's suggestion that the cited food standards, and the wine standards contained therein, constituted enforceable federal regulations under the 1906 Act or were otherwise enforceable as a matter of federal law.

We reach similar conclusions with respect to the two Food Inspection Decisions cited by Bronco, issued in 1909 and 1910, respectively. The first Food Inspection Decision, approved by the Secretary of Agriculture acting alone, stated that Missouri and Ohio wines, which typically were produced by adding substantial amounts of sugar, "would properly be called a 'sugar wine' "—and that when made by the mixture of pomace, sugar, water, **[****43]** colorings and preservatives, such products should be called " 'imitation wine.' " (F.I.D. No. 109, reprinted in American Pure Food and Drug Laws, *supra*, at p. 212.) The second cited Food Inspection Decision, issued under the signatures of the three department secretaries, essentially retreated from and modified the first and stated that in light of (and apparently in deference to) the fairly lax Ohio wine statute (see *ante*, fn. 24), which had long permitted the use of sugar in wine production, such "sugared" wines properly **[*967]** could be called " 'Ohio Wine,' or 'Missouri Wine,' respectively, without further qualification." (F.I.D. No. 120, reprinted in American Pure Food and Drug Laws, *supra*, at p. 213.) Moreover, the decision stated, Ohio and Missouri imitation wines could be labeled as " 'Ohio Pomace Wine,' or 'Missouri Pomace Wine.' " (*Id*., at p. 214.)

These decisions reveal that the federal agency, far from exercising federal authority to control state practices by requiring adherence to the "detailed and comprehensive" wine provisions of the food standards cited by Bronco, instead completely ignored those federal standards and, in the second decision, actually **[****44]** *deferred* to the applicable state wine statute, which in turn codified long-standing and lenient regional winemaking practices.

In any event, contrary to Bronco's suggestion that these Food Inspection Decisions evinced federal control, the first cited decision, No. 109 (approved by the Secretary of Agriculture acting alone), did not constitute a regulation under the 1906 Act and was merely advisory. [28] Because the second cited Food Inspection Decision, No. 120, was signed by all three secretaries it arguably qualified as an enforceable federal regulation under the 1906 Pure Food and Drugs Act. (See American Pure Food and Drug Laws, *supra*, at p. 17.) As noted above, however, in substance this assumed regulation merely acquiesced in and adopted fairly lax state (Ohio) law. It does not, therefore, support Bronco's implicit **[**437]** argument that federal regulatory authorities during **[***198]** this period exercised power to control wine labels in a manner different from that of the states.

[**45]** For these reasons we reject Bronco's suggestion that the Secretary of Agriculture's food standards, including the detailed and comprehensive wine standards, constituted enforceable federal law, that Food Inspection Decision No. 109 constituted an enforceable federal wine labeling regulation, or that Food Inspection Decision No.

---

[28] The very limited effect of such decisions was described by the issuing entity itself as follows: "*The opinions or decisions of this Department* … are … issued more in an advisory than in a mandatory spirit. It is clear that if the manufacturers, jobbers, and dealers interpret the rules and regulations in the same manner *as they are interpreted by this Department*, and follow that interpretation in their business transactions, no prosecution will lie against them. … [¶] It may often occur that the opinion of this Department is not that of the manufacturer, jobber, or dealer. In this case there is no obligation resting upon the manufacturer, jobber, or dealer to follow the line of procedure marked out or indicated by the opinion of this Department. Each one is entitled to his own opinion and interpretation and to assume the responsibility of acting in harmony therewith. …" (F.I.D. No. 44 (Dec. 1, 1906), reprinted in Gwinn, U.S. Dept. of Agriculture, Food and Drugs Act (1914) pp. 35–36, italics added; see also American Pure Food and Drug Laws, *supra*, at pp. 16–18; *Administration of the Federal Food and Drugs Act, supra,* 1 Law & Contemp. Probs. at pp. 20–21.)

120 evinced anything more than federal acquiescence in state law. Based upon the material cited to us, we conclude that whatever federal regulation of wine labeling existed between the first decade of the 20th century and the advent **[*968]** of Prohibition was achieved only indirectly, on a case-by-case basis, through prosecutions under the general misbranding provisions of the 1906 federal Pure Food and Drugs Act. [29] *That* relatively limited federal activity, however, neither erased nor eclipsed the previous quarter-century of state regulation described above. (*Ante*, pt. II.B.1.a. & b.)

[**46]** Moreover, at the same time federal activity in this area was commencing, state activity was continuing and at least keeping pace. By 1906, nearly all of the states had exercised their traditional police powers to enact pure food and beverage laws, almost all of which covered drinks, including wine. [30] Even more importantly, as explained below, within a few years of 1906 the Secretary of Agriculture's food standards (including the detailed and comprehensive wine standards)—although remaining merely advisory and unenforceable under *federal* law—specifically were adopted as part of the general food laws of most states (including California). The perhaps ironic result was that the Secretary of Agriculture's wine standards were to become enforceable substantive law in most states under *state* law, even while they remained unenforceable as a matter of federal law.

[**47]** d. *Relevant state law in the early 20th century: Adoption of California's place—name wine statute; California's Pure Foods Act and adoption of the food standards, including the wine standards; and corresponding labeling regulations*

Nothing in the 1906 federal Pure Food and Drugs Act implied that the existing and continuing state regulation of the misbranding of food and beverages was preempted by that federal legislation. Indeed, the act "disclose[d] very clearly that it [was] not intended to trench upon the powers of the states in any respect." (*Cleveland Macaroni Co. v. State Board of **[***199]** Health (N.D.Cal. 1919) 256 F. 376, 379*; see also *Savage, supra, 225 U.S. 501* [upholding, against a claim of preemption, Indiana food and drug labeling **[*969]** regulations]; see generally Fisher, *The Proposed Food and Drugs Act: A Legal Critique* (1933) 1 Law & Contemp. Probs. 74, 75 & fn. 4 (*Proposed Food and Drugs Act*) [noting case law holding that states were permitted to prescribe "additional standards" and that "[c]ompliance with federal standards does not secure the right to interstate transportation free from 'reasonable' regulation by the state"]. **[****48]**)

Soon after passage of the 1906 federal act, the California Legislature, in an apparent effort to combat the continuing problem of **[**438]** the labeling of California wines as foreign wines, adopted a statute requiring a "uniform wine nomenclature" that, for the first time, specifically regulated the use of place names on wine labels. The statute provided for "pure" California wines to be labeled with the "prefix 'Cal' or 'Cala' … as for example, 'Calclaret,' 'Calburgundy,' 'Calariesling,' etc., …" (Stats. 1907, ch. 104, § 1, pp. 127–128.) The statute further prohibited the use of any such label on wines other than pure California wines. It barred "labeling any vessel, bottle, … or package containing any liquid other than pure wine of California manufacture, … or any paper or brand in similitude or resemblance thereof, or any paper or brand of such form and appearance as to be calculated to mislead or deceive

---

[29] In addition to the federal prosecution under the 1906 Act that resulted in the decision in *Sweet Valley, supra, 208 F. 85*, in which the federal district court held that the challenged "pomace wine" product in that case, labeled as German "Select Riesling" and "Hochheimer," was misbranded under both the 1906 Act and the Ohio wine statute—we are aware of one similar wine mislabeling prosecution under the 1906 Act (*Sixty Barrels of Wine (D.C.Mo. 1915) 225 F. 846*) and three similar federal prosecutions concerning bottled "Champagne." (*Duffy-Mott Co. v. United States (3d. Cir. 1923) 285 F. 737*; *Schraubstadter v. United States (9th Cir. 1912) 199 F. 568*; *United States v. Five Cases of Champagne (N.D.N.Y. 1913) 205 F. 817*.) One might ask why the *Duffy-Mott* case arose during Prohibition. The answer is that even during Prohibition, *pharmacists* were permitted to sell "prescription Champagne." (Byszewski, *What's in the Wine? A History of the FDA's Role* (2002) 57 Food & Drug J. 544, 554.)

[30] See Hearings before the House Committee on Interstate and Foreign Commerce on the Pure-Food Bills, 59th Congress, 1st Session (Feb. 13, 1906) page 308. Indeed, according to contemporaneous assessments, those states with adequate enforcement mechanisms (approximately 20 states) were, by 1906, applying their laws "very rigidly." (*Ibid*.)

any unwary person or cause him to suppose the contents thereof to be pure wine of California manufacture, origin or production … ." (*Id.*, § 2, p. 128.)

Following passage of the 1906 federal Pure Food and Drugs Act, states left in place or expanded (or in **[****49]** other instances enacted for the first time) their own statutes to address the problems of adulteration, misbranding, and mislabeling of food and beverages. (See generally American Pure Food and Drug Laws, *supra*, at pp. 260–1450; *Proposed Food and Drugs Act, supra,* 1 Law & Contemp. Probs. 74, 75 & fn. 4.) California, for its part, adopted such a general scheme in March 1907, addressing the problem of "adulterated, mislabeled or misbranded food, or liquor." (Stats. 1907, ch. 181, § 1, p. 208; 1907 Pure Foods Act or 1907 State Act.) That statute—like those of many other states—specifically adopted under *state* law the food standards (including the wine standards) that had been formulated by the Secretary of the United States Department of Agriculture, but which, as described above, were unenforceable under *federal* law. (Stats. 1907, ch. 181, § 3, p. 209.) Further going beyond anything set forth in the federal law, the state statute also made it illegal to, among other things, "*falsely brand*[]" any food or liquor concerning the "*county, … city, town,* [*or*] *state … in which it is manufactured, or produced*" (*id*., § 5, p. 210, italics added), [31] **[****50]** and provided that "[f]ood and liquor shall be deemed *mislabeled or misbranded* within the **[*970]** meaning of this act … [¶] … [¶] [i]f the package containing it or its label shall bear any statement, design or device regarding the ingredients or the substance contained therein, which statement, design, or device shall be false or misleading in any particular." (Stats. 1907, ch. 181, § 6, p. 210, italics added.) [32]

[**51]** **[***200]** Accordingly, as of March 1907 and continuing through the next three decades, California (like many other states) [33] **[****52]** had adopted **[**439]** specific and enforceable wine standards that exceeded federal law. During this same period—and indeed, until repeal of the 1906 federal Pure Food and Drugs Act in 1938—the Secretary of Agriculture's food standards remained unenforceable under federal law despite periodic attempts to provide otherwise. (See *Interpretative Regulations, supra,* 29 Geo. L.J. 1, 6–17.) [34]

e. *California's post-Prohibition-repeal wine labeling regulations*

With the advent of Prohibition, which became effective on January 29, 1920 (*U.S. Const., 18th Amend.*), the California wine industry fell into a dormant phase, awakening upon repeal of Prohibition in December 1933 through

---

[31] In this respect, the author of the 1912 treatise relied upon by Bronco observed that "the prohibitions in the California statute … against misstatements as to geographical source" were "more detailed" than those under federal law. (American Pure Food and Drug Laws, *supra*, at p. 339.)

[32] In early 1908, California's Department of Public Health adopted comprehensive regulations implementing the 1907 state Act, broadly regulating "for domestic commerce" the labeling of foods and beverages and specifically providing that "[*t*]*he label shall be free from any statement, design, or device regarding … place of origin, which is false or misleading in any particular.*" (Cal. Dept. of Pub. Health, Rules and Regs. for Enforcement of Cal. Pure Foods and Drugs Acts (1909) reg. No. 16, p. 22, italics added.) Those regulations, as periodically amended, continued in force through at least 1935. (Cal. Dept. of Pub. Health, Rules and Regs. for Enforcement of Cal. Pure Foods and Drugs Acts (1928) reg. No. 13(d) & (e), p. 20 [providing as quoted above, and further providing that food or beverages shall not be "labeled or branded in such a manner as to deceive or mislead the consumer"]; Cal. Dept. of Pub. Health, Rules and Regs. for Enforcement of Cal. Pure Foods and Drugs Acts (1933) reg. No. 13(d) & (e), p. 18 [same].)

[33] See American Pure Food and Drug Laws, *supra*, listing, as of 1912, the following additional states that had adopted the Secretary of Agriculture's food (and wine) standards, or essentially identical standards: Alabama (at p. 270); Delaware (at p. 418); Florida (at p. 438); Georgia (at pp. 468–474); Idaho (at p. 499); Illinois (at pp. 524–525); Indiana (at p. 551); Kansas (at pp. 604–605); Kentucky (at pp. 634–635); Louisiana (at pp. 661–662); Maine (at pp. 680–681); Maryland (at pp. 705–706); Mississippi (at pp. 828–829); Missouri (at p. 851); Montana (at p. 880); Nevada (at p. 932); New Hampshire (at p. 952); New Jersey (at p. 980); North Carolina (at p. 1051); Oklahoma (at p. 1128); Rhode Island (at pp. 1207–1208); South Dakota (at p. 1241); Texas (at p. 1285); Utah (at p. 1306); Virginia (at pp. 1350–1351); Wisconsin (at pp. 1416–1417); and Wyoming (at p. 1441). (See also *Interpretative Regulations, supra,* 29 Geo. L.J. at p. 13 & fn. 27.)

[34] Effective through at least 1935, the state's 1907 Pure Foods Act continued to adopt—as *minimum* standards—the federal food standards (including the wine standards). (Stats. 1933, ch. 758, § 10, pp. 2001–2002.)

adoption of the *Twenty-first Amendment to the federal Constitution*. **[*971]** At least two years prior to adoption of the FAA Act in August 1935—and indeed before, and in anticipation of, the repeal of Prohibition—the California Legislature, exercising both its traditional police powers and its authority under newly enacted *article XX, section 22* of the state Constitution, [35] adopted as an interim measure the State Liquor Control Act (Stats. 1933, ch. 178, p. 625; *id*., ch. 658, p. 1697) and thereafter adopted the California Alcoholic Beverage Control Act (ABC Act), which **[****53]** went into effect on June **[***201]** 13, 1935. (Stats. 1935, ch. 330, p. 1123; see *Bus. & Prof. Code, § 23000 et seq.*) [36]

[**54]** Meanwhile, in late December 1934—*before* adoption of *any* federal regulation applicable to wine labels—California, acting through its Department of Public Health, Bureau of Food and Drug Inspections, and pursuant to its own 1907 Pure Foods Act (Stats. 1907, ch. 181, §§ 5 & 6, p. 210), adopted regulations concerning "Definitions and Standards—Wines." (Cal. Dept. of Pub. Health, Bur. of Food and Drug Inspection, Regs. adopted Dec. 31, 1934, amended April 13, 1935, as printed Jan. 18, 1936 (1934 Regulations).) A preamble set forth in broad terms the purpose and scope of the regulations. The stated goal was to protect both "the consuming public" and "the wine industry as a whole." (*Id.*, at p. 1.) [37] To this end, the regulations adopted specific chemical definitions for dry red wines, dry white wines, and sweet wines (*id*., at pp. 1–2), similar in substance to the standards incorporated into the state's 1907 Pure Foods Act, and which, as explained *ante*, part II.B.1.d, had by then been in place in California (and numerous other states) for nearly 30 years. The 1934 Regulations also established strict and detailed labeling requirements for sparkling and artificially **[****55]** carbonated wines (**[*972]** Regs., at p. 2) [38] **[****56]** and for still wines (*id*., at pp. 2–3). **[**440]** In the latter respect, the regulations addressed the decades-old problem of California wines being labeled with foreign place names such as "Burgundy." The state regulations allowed the unqualified use of that name and similar French place names "only [for] products from France," and provided that a wine would be "regarded as *misbranded*" (and hence in violation of the state's 1907 Act and ensuing regulations described *ante*, pt. II.B.1.d.) if the label read "Burgundy" (or any other foreign place name) and the wine was not produced there, unless the label also "displayed with prominence equal to that" of the foreign place name, "the name of the state or country where the wine is produced." (1934 Regs., at p. 2, italics added.) [39]

---

[35] In 1932, anticipating ratification of the repeal of Prohibition, California voters passed a constitutional amendment, providing as follows: "***HN8***[] The State of California, subject to the internal revenue laws of the United States, shall have the exclusive right and power to license and regulate *the manufacture*, sale, purchase, possession and transportation of alcoholic beverages within the State, and subject to the laws of the United States regulating commerce between foreign nations and among the states shall have the exclusive right and power to regulate the importation into and *exportation from the State*, of alcoholic beverages. …" (*Cal. Const., art XX, § 22*, italics added.)

[36] At that same time, the Legislature repealed the 1907 "Cala" wine labeling statute. (See Stats. 1935, ch. 330, § 69, p. 1152; Caddow, *Permanent Wine Labeling Regulations* in Wines & Vines (Feb. 1936) 10.) The 1887 state "pure wine" labeling statute (Stats. 1887, ch. 36, p. 46) previously had been repealed in 1911. (Stats. 1911, ch. 587, § 1, p. 1110.) Of course, despite these repeals, the state's 1907 Pure Foods Act (Stats. 1907, ch. 181, p. 208 et seq.), which as noted above incorporated specific wine standards, and the regulations adopted under the 1907 Act (all described *ante*, pt. II.B.1.d.), remained in effect and prohibited the mislabeling of wine.

[37] Contrary to assertions in Bronco's supplemental briefs, there is no indication that the scope of the 1934 regulations was limited to wine sold to consumers in California and that the regulations did not address wines destined for interstate commerce.

[38] The regulation provided: "*Champagne* is a light white sparkling wine identical with champagne as made in the Champagne district in France in respect to composition and basic manufacturing principle. If the secondary fermentation is not within the bottle, there shall be stated in direct conjunction with the word 'Champagne' the words 'Secondary Fermentation in Bulk.' " (1934 Regs., at p. 2.) The regulations also provided specific labeling requirements for artificially carbonated wines: "The word 'carbonated' should be in the same color [and] style of type on the same colored background as the wine described." (*Ibid*.)

[39] The regulations also restricted the use, on wine labels, of statements of age and the word "old" (1934 Regs., at pp. 2–3), and further required that any product made from pomace be labeled "IMITATION WINE/ Made of Wine Pomace, Water and Sugar" (*id*., at p. 2).

Bronco insists that these various state regulations, viewed as a whole, “did not represent any innovation by California” **[***202]** and that “similar, albeit more detailed and comprehensive … standards already had been adopted nearly thirty years before by federal regulators.” As explained *ante*, part II.B.1.c, however, the historic record does not support Bronco's claim. The standards to which Bronco refers never were enforceable under federal law, but in fact, by 1907, they had become part of the substantive (and enforceable) law of California—and within a short time, of most other states as well. In other words, the touted innovation (enforceable wine labeling standards) was accomplished by California and other states, and not by the federal government.

f. *Initial (and short-lived) federal wine labeling regulations issued by* **[****57]** *the Federal Alcohol Control Administration*

As Bronco emphasizes, a few months after adoption of the 1934 California wine labeling regulations, federal wine labeling regulations (which, as explained below, proved to be short-lived and never became effective) were for the first time adopted in late March 1935 by the recently created Federal Alcohol Control Administration (FAC Administration), which had been established by executive order under the National Industrial Recovery Act (*15 U.S.C. § 703*). (See Harrison & Lane, After Repeal (1936) p. 24 (After Repeal).) The FAC Administration's regulations, like the numerous similar **[*973]** state food and beverage regulations that preceded them, were directed against, among other things, “misbranding”—the false or misleading labeling of alcoholic beverages. (See FAC Admin., Misbranding Regs., Series 7, Regs. Relating to the Labeling of Wine (Mar. 25, 1935) § 3(b)(3) (Misbranding Regulations) [a wine bottle is misbranded if its label “tends to create a misleading impression of the wine”]; see generally O'Neill, *Federal Activity in Alcoholic Beverage Control* (1940) 7 Law & Contemp. Probs. 570, 572; After Repeal, **[****58]** *supra*, at pp. 27–29.) Nowhere in these nascent federal regulations was there any suggestion that they preempted stricter state regulations. In any event, within two months of their adoption and prior to their effective date (see Misbranding Regs., *supra*, § 1(a)(3)), the federal regulations became unenforceable in late May 1935 after the United States Supreme Court invalidated as unconstitutional similar “fair competition” codes adopted under the National Industrial Recovery Act. (*Schechter Corp. v. United States (1935) 295 U.S. 495, 541–542 [79 L. Ed. 1570, 55 S. Ct. 837]*.)

g. *Continuing regulation by other states*

Despite the initial failure of federal regulation of wine labels, regulation by the states continued in and through 1935. In addition to California's then long-established general food and beverage regulations, and its then recent specific wine regulations, described *ante*, part II.B.1.d–e, the Ohio and Oregon wine labeling statutes, described above (*ante*, fns. 24 & 26), still were in effect [40] and most **[**441]** other states had food and beverage statutes, the majority of which regulated mislabeling or misbranding **[***203]** of beverages, including wine. As already explained, many **[****59]** of those statutes adopted specific and comprehensive wine standards that were enforceable only under state, and not federal, law—and as of 1935, many had been revised specifically to bar misrepresentations on labels concerning the place of manufacture or production. [41]

---

[40] The original Ohio wine law (1889 Ohio Laws, p. 96 et seq.) was, by 1938, codified in Page's Ohio Revised Code Annotated (Anderson 1938) title II, chapter 1, sections 5795–5805. Oregon's 1905 wine labeling statute (1905 Or. Laws, ch. 209, §§ 54–56, pp. 361–362) was reenacted a decade later (1915 Or. Laws, ch. 343, §§ 41–43, pp. 570–571) and apparently still was effective through mid-1937, when Oregon adopted post-Prohibition-repeal wine labeling regulations. (See also Or. Liquor Control Admin. (1937) reg. 5(c) [specifically enforcing the California wine regulations discussed above] & 6 [setting forth labeling requirements].)

[41] For example, the food and beverage labeling statutes of Massachusetts, North Dakota, and Washington, described *ante*, part II.B.1.a, each remained in force in 1935, as revised, and each defined as “misbranded” any food or drink label bearing “any statement, design or device” that was “false or misleading in any particular,” or any item “falsely branded as to the state or country where it was manufactured or produced,” or very similar words to that effect. (See *1932 Mass. Gen. Laws, ch. 94, §§ 186*, 187; 1923 N.D. Laws, ch. 222, §§ 4, 6, pp. 289–291; Rev. Stats. of Wash. (Remington 1932) tit. 40, §§ 6145, 6147; see also Rev. Stats. of Wash., *supra*, § 6137 [adopting the federal food standards, including wine standards, as minimum standards].)

[**60]**

[*974] 2. *Propriety of imposing a presumption against preemption in this case*

CA(6)[] **(6)** In light of the history set forth above, we disagree with Bronco's assertion, advanced in its original brief in this court, that federal regulation of wine labeling prior to Congress's adoption of the FAA Act in August 1935 was "well established," and that "[b]y contrast, the states' regulation of wine labeling … ranged from limited to none." Nor do we agree with the accusation of amici curiae Abundance Vineyards et al. that the Department and the NVVA have "suggested, *misleadingly*, that the States, and not the Federal government, historically played the dominant role in the regulation of the alcoholic beverage industry before enactment of the FAA Act." (Italics added.) Based upon our review of the relevant history, we conclude that from the mid to late 19th century until shortly after the repeal of Prohibition, the states' exercise of their traditional police power to regulate the labeling of food—including wine and other alcoholic beverages—was both extensive and dominant. This historic evidence demonstrates that ***HN9***[] when, as described below, Congress finally entered the specific field of **[****61]** wine label regulation in August 1935 by enacting the FAA Act, under which the federal regulation here at issue was promulgated, Congress was legislating in a field "traditionally regulated by the States." (*ARC America Corp., supra, 490 U.S. 93, 101*, and cases cited.) [42] Accordingly, a strong presumption **[***204]** against preemption applies, and a court should not find that the traditional police powers of the states to regulate wine labels (in order to prevent the deception of consumers) are superseded unless it is clear and manifest that Congress intended to preempt state law.

[*975] [**62]** We turn now to consider whether, as Bronco claims, there was, at the time of the **[**442]** enactment of the *FAA Act* or thereafter, a clear and manifest intent on the part of Congress to preempt wine labeling regulation by the states such as is found in *section 25241*. We find no such intent. We thereafter consider whether, as Bronco claims, *section 25241* is *impliedly* preempted by federal law because it "stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress." (*Hines, supra, 312 U.S. 52, 67*.) As we explain, we find no such implied preemption.

C.

1. *Whether Congress, when it enacted the FAA Act in 1935, intended to preempt state wine labeling regulation*

CA(7)[] **(7)** As explained below, contrary to Bronco's assertions ***HN10***[] the history of the 1935 FAA Act discloses no intent on the part of Congress to supplant or preempt state efforts to regulate wine labeling.

In late August 1935, Congress replaced the defunct FAC Administration with the Federal Alcohol Administration Act. (Pub.L. No. 74-401 (Aug. 29, 1935) 49 Stat. 977, presently *27 U.S.C. § 201 et seq.*) The essential aspects of the *FAA Act* exist **[****63]** today in substantially unamended form and remain the basis for federal regulation of wine labeling. (See Benson, *Regulation of American Wine Labeling: In Vino Veritas?* (1978) 11 U.C. Davis L.Rev. 115, 154 et seq. (*Regulation of American Wine Labeling*).)

In New York, Colorado, and Arkansas, the previous wine-specific labeling statutes described *ante*, part II.B.1.b, had given way, by 1935, to the states' respective general food and beverage mislabeling/misbranding regulations, all of which regulated both food and drink. (See N.Y. Agric. & Mkts. Law, ch. 1, art. 17, § 200 (Cahill 1930); Ann. Stats. of Colo., ch. 1, § 6 (Courtright 1930); Stats. of Ark., ch. 69, § 4823 (1919).) There is no indication, with respect to any of these changes in the various states' laws, that any diminution of state regulatory authority over the labeling of wines thereby was intended or effected.

[42] For the reasons set forth above, we also reject Bronco's related assertion, pressed in its supplemental briefs and at oral argument, that no presumption against preemption applies here because, Bronco claims, the states' regulatory activity was augmented in the early 20th century by a "significant federal presence." (See *Locke, supra, 529 U.S. 89, 108* [finding no presumption against preemption regarding regulation of maritime vessels].) As explained *ante*, part II.B.1, prior to adoption of the *FAA Act in 1935*, the federal role with respect to wine label regulation was neither dominant nor particularly significant in comparison with that of the states—and in any event, unlike the situation in *Locke*, federal activity in the field of wine label regulation certainly was not "manifest since the beginning of our Republic." (*Locke, supra, at p. 99*.)

HN11[] *CA(8)*[] **(8)** Substantively, the FAA Act in large measure emulated the main aspects of the invalidated FAC Administration. (After Repeal, *supra*, at p. 32; *Regulation of American Wine Labeling, supra,* 11 U.C. Davis L.Rev. 115, 165.) The *FAA Act* makes it illegal for any person to produce, sell, or ship wine in interstate or foreign commerce unless that person is licensed to do so by the Secretary of the Treasury. [43] (*27 U.S.C. § 203(a)* & *(b)*.) Title *27 United States Code section 205(e)*—the primary federal statutory provision **[*976]** for present purposes—directs the Secretary of the Treasury to promulgate such regulations "with respect to packaging, marking, branding, and *labeling* … (1) *as will prohibit deception of the consumer with respect to* [*alcoholic beverage*] *products … ;* [and] (2) *as will provide the consumer with adequate information as* **[****64]** *to the identity and quality of the products* … ." (Italics added.) To enforce these requirements, this section of the *FAA Act* also requires that any person who sells or ships **[***205]** wine in interstate or foreign commerce first obtain from the Secretary of the Treasury (or his or her designee) a certificate of label approval, or COLA, for each wine, and directs that no wine may be shipped or sold in interstate commerce unless it bears a label that has been reviewed and approved by the Secretary of the Treasury through issuance of a COLA. Finally, the section further provides that no wine label may be removed or altered "except as authorized by Federal law" or except pursuant to federal regulations "authorizing relabeling for purposes of compliance with the requirements of this subsection or of State law." (*Ibid*.)

[**65]** Testifying in support of the legislation that became the *FAA Act*, Joseph H. Choate, former Chairman of the FAC Administration, explained that the goal was to continue the work of the recently invalidated FAC Administration. Adverting to the regulations mentioned above that recently had been adopted by the FAC Administration (*ante*, pt. II.B.1.f.), Mr. Choate explained that the purpose of those regulations—and of the new *FAA Act*—was to "to provide such regulations, not **[**443]** laid down in statute, so as to be inflexible, but laid down under the guidance of Congress, under general principles, by a body which could change them as changes were found necessary. [¶] *These regulations were intended to insure that the purchaser should get what he thought he was getting, that the representations both on labels and in advertising should be honest and straightforward and truthful. …* [*The consumer*] *should be told what was in the bottle, and all the important factors which were of interest to him about what was in the bottle*." (Hearings before House Com. on Ways and Means on H.R. No. 8539, 74th Cong., 1st Sess., p. 10 (1935), testimony of Joseph H. Choate, italics added.) **[****66]** Similarly, Representative Thomas Cullen of New York, the author of the bill that became the *FAA Act* (see 79 Cong. Rec. (1935) 11713 et seq.), promoting his legislation on the floor of the House, asserted that the proposed bill was necessary in order to "do something to prevent the unfair trade activities of those in the industry who chisel and take advantage of the ignorance of the consumer by dishonest labeling … ." (Remarks of Rep. Cullen on H.R. No. 8539, 74th Cong., 1st Sess., 79 Cong. Rec. (1935) 11714; see generally *Regulation of American Wine Labeling, supra,* 11 U.C. Davis L.Rev. 115, 165–167.)

CA(9)[] **(9)** As with the 1906 federal Pure Food and Drugs Act, and by contrast to other legislation passed only days prior to adoption of the FAA Act in August **[*977]** 1935, [44] nothing in the body of the *FAA Act* reveals

---

[43] As originally enacted, the statute referred to the "Administrator" of the "Federal Alcohol Administration." That agency was abolished, and its functions were directed to be administered by the Secretary of the Treasury through the Bureau of Internal Revenue (now the Internal Revenue Service) in the Department of the Treasury. (See *27 U.S.C. § 201*, Transfer of Functions.) Thereafter, the Bureau of Alcohol, Tobacco and Firearms (BATF) was established in 1972 and given the pertinent functions of the Internal Revenue Service with regard to wine regulation. (*Ibid*.) Subsequently, the Homeland Security Act of 2002 (*6 U.S.C. § 101*) transferred responsibility for the regulation of interstate commerce in alcoholic beverages to a newly formed Alcohol and Tobacco Tax Trade Bureau within the Department of the Treasury. (68 Fed.Reg. 3744 (Jan. 24, 2003).) For convenience, and because the regulations here at issue were adopted by the BATF, we shall continue to refer in this case to the BATF as the responsible regulatory agency.

[44] In the Tobacco Inspection Act (Pub.L. No. 74-314 (Aug. 23, 1935) 49 Stat. 731)—enacted six days prior to adoption of the *FAA Act*—Congress used language making very clear its intent to adopt "uniform" national standards that would displace state regulation, thereby revealing that when the 74th Congress intended to make its regulation exclusive, it knew how to do so. As observed in *Florida Avocado, supra, 373 U.S. 132, 147*, with regard to the Tobacco Act, "Congress had declared 'uniform standards of classification and inspection' to be 'imperative for the protection of producers and others engaged in commerce and the public interest therein.' [Citation.] The legislative history was replete with references to a need for 'uniform' or 'official'

congressional intent to supersede concurrent (or more stringent) regulation of wine labeling by the states under their traditional police **[***206]** powers. As already explained, at the time Congress adopted the *FAA Act in August 1935, the* states, led by California (see *ante*, pt. II.B.1.d. & e.), were continuing to exercise their traditional police powers in this area. (See *ante*, **[****67]** pt. II.B.1.g., describing the then extant statutes of various states.)

[**68]** Consistently with this history and contemporaneous practice, the bill's author, Representative Cullen, while promoting the bill embodying the *FAA Act* on the floor of the House, emphasized the cooperative, as opposed to preemptive, nature of the federal legislation. He asserted: "[W]e must do something to *supplement* legislation by the States to carry out their own policies. The liquor industry is too big and the constitutional and practical limitations on the States are so considerable that *they alone cannot do the whole job*." (Remarks of Rep. Cullen on H.R. No. 8539, 74th Cong., 1st Sess., 79 Cong. Rec. (1935) 11714, italics added; accord, H.R. Rep. No. 1542, 74th Cong., 1st Sess., pp. 2–3 (1935).) [45] **[****69]** Representative Cullen also assured the House that by enactment of the bill, "[n]o power is taken away from the States to provide such safeguards **[**444]** as they deem best for their own protection." (79 Cong. Rec., *supra*, 11174.) [46]

[*978] [**70]** Based upon this legislative history, and in light of the backdrop against which Congress acted—the prior decades of state legislation regulating the labeling or "misbranding" of wine as a general food and beverage product, or of wine specifically—we conclude that Bronco has failed to establish **[***207]** that Congress, at the time it enacted the *FAA Act*, acted with the "clear or manifest" purpose of preempting state statutes regulating wine labels.

2. *Post-1935 congressional and regulatory agency intent to preempt state wine label regulation*

CA(10)[] **(10)** Bronco further suggests that *subsequent* to the enactment of *27 United States Code section 205(e)* in August 1935 and the adoption, by agencies within the Department of the Treasury, of implementing regulations, both Congress and the federal regulators manifested intent that the federal wine labeling regulations would preempt

---

standards, which could harmonize the grading and inspection of tobacco at all markets throughout the country. Under the statute a single set of standards was to be promulgated by the Secretary of Agriculture, 'and the standards so established would be the official standards of the United States for such purpose.' " No such language or comparable provision appears in the *FAA Act*, as adopted in 1935.

45 See also House of Representatives Report No. 1542 (74th Cong., 1st Sess.) pages 13–14 (July 17, 1935) (citing the *FAA Act*'s "relabeling" provision and noting that anticipated regulations would permit "appropriate additional labeling requirements imposed by a State pursuant to its own law not in conflict with the Federal requirements"). Bronco asserts that by this relabeling provision (see 27 C.F.R. § 4.30(b)(1)) and the cited comment, Congress had in mind only the authority of states, pursuant to the *Twenty-first Amendment*, to impose additional labeling requirements on alcoholic products imported for sale from other states, and did not contemplate that a state would be permitted to impose additional labeling requirements on wines destined for interstate commerce. We find no persuasive evidence of any such intent, however.

46 Although on occasion we have questioned reliance upon the views of individual legislators as a basis upon which to discern the intent of the state Legislature (e.g., *People v. Dennis (1998) 17 Cal.4th 468, 501, fn. 7 [71 Cal. Rptr. 2d 680, 950 P.2d 1035]*, and cases cited), in the present case Bronco does not challenge Representative Cullen's statements on that ground, and we recently observed in *Dowhal, supra, 32 Cal.4th 910*, that ***HN12***[] statements by a single member of Congress " 'can provide evidence of Congress' intent.' " (*Id., at p. 926, fn. 6*.) Moreover, in the present case there are strong reasons to rely upon the quoted statements. Representative Cullen was the author of the *FAA Act*, and was looked upon as an authority during the House debates, fielding many questions from his colleagues. (E.g., Remarks of Rep. Doughton, 79 Cong. Rec. (1935) 11713 [Rep. Doughton, author of a prior version of the bill, observing on the House floor that Rep. Cullen "is more familiar with the provisions of this bill than myself or perhaps any other member … . He has given much study to the bill and is better qualified to explain it than I am … ."]; *id*., pp. 11715–11718, 11727–11730, 11737, 11790, 11792–11793, 11797, 11799 [Rep. Cullen's various responses to questions, etc.].) In addition, Representative Cullen's comments essentially reiterated that which was set out in the House Report of the Ways and Means Committee, cited in the text above—and later incorporated into the Senate Report of the Committee on Finance on House Resolution No. 8870 (Fed. Alcohol Control Admin., Legis. History of Fed. Alcohol Admin. Act (Sept. 15, 1935) appen. IV, p. 166), and hence the cited comments did not amount merely to expressions of personal opinion. (*In re Marriage of Bouquet (1976) 16 Cal.3d 583, 590 [128 Cal. Rptr. 427, 546 P.2d 1371]*.)

more stringent state wine labeling regulations. Applying again, as we must, a presumption against preemption in this context, we inquire whether Congress or the regulatory arm established within the Department of the Treasury evinced a clear and manifest intent to preempt state wine labeling **[****71]** regulations such as California's *section 25241*. In so doing, we keep in mind the entire history of state regulation of wine labeling and the history and language of the *FAA Act* described above. As explained below, after reviewing (i) the early federal regulations and early state regulations that imposed standards higher than the federal regulations, (ii) subsequent federal regulations and pronouncements recognizing the applicability of state labeling law, and state wine regulations enacted in the mid-1970s (especially certain Oregon regulations, one of which is substantively similar to the challenged *section 25241*), and (iii) a 1988 amendment to the *FAA Act*, concerning health warnings on alcoholic beverages, we continue to find no evidence of any clear or manifest intent on the part of **[*979]** Congress or the responsible federal agency to preempt state wine labeling regulation such as *section 25241*. Indeed, the evidence demonstrates that the federal agency has long contemplated or at least acquiesced in concurrent and stricter state regulation.

a. *Federal and California regulations issued after passage of the FAA Act*

As noted above, prior to adoption of the *FAA Act*, California had in **[****72]** place, by December 1934, specific and detailed wine regulations restricting, among other things, the use of place names on wine labels. (See *ante*, pt. II.B.1.e.) In bulletins and reports issued in the years immediately thereafter, the California Department of Public Health touted its enforcement of those state regulations, **[**445]** which it described as requiring the “honest labeling of wines.”[47]

In late December 1935, four months **[****73]** after adoption of the *FAA Act*, and one year after California's adoption of its own post-Prohibition-repeal wine labeling regulations, valid federal wine labeling regulations were approved, and those regulations became effective on March 1, 1936. (U.S. Dept. Treas., Fed. Alcohol Admin., Regs. No. 4 Relating to Labeling and Advertising of Wine (Dec. 30, 1935) arts. I-VII, 1 Fed.Reg. 83 (Apr. 1, 1936) (hereafter Regulations No. 4); see, generally, *Controls Over Labeling*, *supra*, 7 Law & Contemp. Probs. 645, 652, fn. 25 et seq.)

[*208]** ***CA(11)***[] **(11)** The federal labeling regulations, as amended in 1938 (see 3 Fed.Reg. 2093 (Aug. 26, 1938)) and thereafter, presently are designated *27 Code of Federal Regulations, sections 4.20 through 4.39*. One key provision—Code of Federal Regulations *section 4.25(b)(1)(i) and (iii)*—***HN13***[] states that a wine is “entitled” to be described with an appellation of origin if “[a]t least 75 percent of the wine is derived from fruit … grown in the appellation area indicated” *and* “it conforms to the laws and regulations of the named appellation area governing the *composition*, *method of manufacture*, and *designation* of wines made **[****74]** in such place.” (Italics added.)[48]

---

[47] See California Department of Public Health, Weekly Bulletin (Feb. 19, 1938) page 14; *id.*, at page 13 (describing enforcement of the California wine quality standards and noting their adoption by the beverage control authorities in Oregon, Virginia, and Arizona); see also Thirty-sixth Biennial Report of the California Department of Public Health (Sept. 1940) page 177; Thirty-fifth Biennial Report of the California Department of Public Health (Sept. 1938) page 142; Thirty-fourth Biennial Report of the California Department of Public Health (Sept. 1936) page 100.

[48] “***HN14***[] Composition” refers to the ingredients used to make a wine (*27 C.F.R. § 4.34*) and generally consists simply of grapes. “Method of manufacture” refers to approved wine treatment materials and processes. (*27 C.F.R. § 24.175 et seq.*) “Designation of wines” is a concept distinct from brand name or appellation; it refers to the class or type of wine rather than the source or origin of the wine. (*27 C.F.R. §§ 4.32(a)(2), 4.34*.) For example, a wine may be designated by class as a grape wine, sparkling grape wine, or carbonated grape wine (*27 C.F.R. § 4.21*), or by the grape varietal. (*27 C.F.R. §§ 4.23, 4.24, 4.28*.)

As Bronco concedes, California long has enforced regulations that differ from the federal regulations with respect to method of manufacture. (See, e.g., *Cal. Code Regs., tit. 17, §§ 17005* [providing, concerning “cellar treatment,” that “[i]n case of conflict between Federal and State laws or regulations the California law or regulation shall take precedence”], *17010* [adopting regulations more restrictive than those contained in federal regulations concerning the use of sugar in the production or cellar treatment of wine].) Bronco contrasts what it asserts are these and similar permissible and specifically sanctioned departures

[**75]** **[*980]** Soon after the adoption of this federal provision in 1938, a California statute was enacted, and two regulations were adopted, all three of which imposed *more stringent* California wine labeling requirements. First, in 1939, the Legislature amended the state ABC Act (*Bus. & Prof. Code, § 23000 et seq.*) to prohibit the use on wine labels of the phrase "California Central Coast counties dry wine," unless the wine was in fact made *entirely* from grapes grown in specified Central Coast counties. (Stats. 1939, ch. 1033, §§ 1–4, p. 2838; see *Bus. & Prof. Code, §§ 25236–25238*.) Second, by 1942, a regulation had been adopted imposing a similar 100 percent grape origin requirement for any wine labeled as " 'California' or any geographical subdivision thereof." (See Cal. Dept. of Pub. Health, Regs. Establishing Stds. of Identity, Quality, Purity and Sanitation and Governing the Labeling and Advertising of Wine in Calif. (May 23, 1942) art. I, § 2(aa) [49] **[****77]** (hereafter 1942 Regulations), **[**446]** presently found at *Cal. Code Regs., tit. 17, § 17015, subd. (a)(1)*.) Third, by 1942 a California **[****76]** regulation barred the sale of **[***209]** wines labeled with so-called coined (or semi-generic) brand names if the "brand designation resembles an established wine type name such as … Madeira, … Port, … Claret, [or] Burgundy, etc. …" (See 1942 Regs., art. II, § 8.) Under this and subsequent versions of the same regulation, a label such as "Burgundy brand" was long barred in California. [50]

[*981] The first two California labeling rules described above plainly imposed (and still impose) a more stringent standard than the 75 percent requirement set forth in the federal appellation of origin regulation. (Regs. No. 4, § 25, as revd., 3 Fed.Reg. 2093, 2096 (Aug. 26, 1938), presently found at *27 C.F.R. § 4.25(b)(1)(i)*.) The third provision described above prohibited name types that the federal regulations have permitted since 1941 upon a proper showing. (See *27 C.F.R § 4.33(b)*, as revd., 6 Fed.Reg. 2874 (June 13, 1941) [disallowing such a geographic name *unless* a federal officer finds the name, either qualified by word "brand" or otherwise, "conveys no erroneous impressions as to the … origin … of the product"].)

Although the **[****78]** parties dispute whether the first two state rules cited above are sanctioned by title 27 Code of Federal Regulations *section 4.25(b)(1)(iii)*—the federal provision that expressly authorizes state regulation concerning the "composition" (the grape ingredients) or "designation" of wine (the class or type of wine, as distinct from its source or origin)—the third California regulation, the coined brand-name provision, cannot be so distinguished. That state regulation plainly controlled, more strictly than the federal rules, not the mere composition or designation of wines, but the brand-name labeling of wines.

CA(12)[] **(12)** In any event, there is no indication that any question previously has arisen concerning the authority or enforceability of the California statute [51] or of either regulation. Indeed, since mid-1939, the California Legislature has authorized state wine regulations that are stricter than federal wine regulations, [52] **[****80]** and for nearly the

---

from federal regulations with what it contends are impermissible deviations from federal *labeling* standards—especially federal regulations concerning the use of brand names on labels.

[49] This requirement may have gone into effect earlier than 1942. A predecessor to the regulations of 1942 had been adopted in April 1940. (See 1942 Regs., cover page ["These regulations supersede the Definitions and Standards—Wines, adopted December 1934, as amended, and Rules Governing California Vintage Wines, adopted April 6, 1940"].) The December 1934 regulations, as amended through January 18, 1936, have been described *ante*, part II.B.1.d. Despite the efforts of librarians throughout the state, we have been unable to locate the intervening *regulations*—if indeed there were any—or the 1940 Rules Governing California Vintage Wines.

Article III, section 12(1) of the 1942 Regulations also provided, consistently with many of the prior statutes and regulations described earlier, that wine labels "shall not contain [¶] (1) *any statement, design, device or representation which is false or misleading in any material particular*." (Italics added.)

[50] That California regulation, as adopted in the early 1940s, was in force until the mid-1980s. (See former Cal. Admin. Code, tit. 17, §§ 17001(a) & 17075(c)(2) (1978).) Oregon as well had a similar "coined" brand-name provision until the mid-1980s. (See Or. Admin. R. 845-10-285(3)(a) (1978).)

[51] The appellation "California Central Coast counties" has since fallen into disuse. (See *Regulation of American Wine Labeling, supra*, 11 U.C. Davis L.Rev. at p. 143.)

past 35 years, the Legislature expressly has authorized state wine regulations to "*differ* ***[***210]*** *from or be inconsistent with*" **[*982]** federal wine regulations (*Health & Saf. Code, § 110525*, italics added); [53] yet there is no **[****79]** indication the federal **[**447]** government has taken issue with this long-standing assertion of broad state authority. [54]

[**81]** The history of the early post-Prohibition-repeal California and federal wine labeling regulations reveals no evidence of any clear or manifest intent on the part of Congress, or the regulatory agency charged with executing the relevant law, to preempt state wine labeling regulation such as *section 25241*. This history suggests, instead, the opposite.

b. *Modification of federal regulations in the 1970s and 1980s, and adoption by Oregon of its more stringent wine labeling regulations*

Beginning in the mid-1970s, the BATF, which in 1972 had been delegated the task of creating and enforcing federal regulations (see *ante*, fn. 43), began to consider proposals to further define and regulate appellations of origin. In connection with that inquiry, the BATF also began to consider how better to regulate the use in brand names of terms of "geographic or viticultural significance." (42 Fed.Reg. 30517, 30518 (June 15, 1977).) [55] In 1978 the BATF adopted, but then postponed enforcement of, new brand-name rules, [56] **[****83]** **[***211]** and it also adopted new

---

[52] See Statutes 1939, chapter 60 (establishing the Health & Safety Code), page 992 (enacting former *§ 26541*, requiring that certain state food and distilled spirits regulations not impose a standard higher than certain federal regulations—but *not* requiring such conformity with regard to state *wine* regulations); Statutes 1941, chapter 1042, section 3, page 2698 (enacting former *§ 26540.2*, authorizing the State Board of Health to promulgate wine regulations), and section 4, page 2699 (amending *§ 26541* to specify that the section's general prohibition on imposition of higher state standards concerning food and distilled spirits "*shall not apply to wine*"). (Italics added.) Former *section 26541*'s exemption of state wine regulations from the general rule against imposition of higher state standards relating to other foods and distilled spirits continued through various amendments of that former section, until that exemption ultimately was recast in 1970 as a positive right of state regulators to "differ from or be inconsistent with" corresponding federal wine regulations. (Stats. 1970, ch. 1573, § 5, p. 3255; see *post*, fn. 53 [quoting current *Health & Saf. Code, § 110525*]; cf. *44 Ops.Cal.Atty.Gen. 122, 125 (1964)* [discussing similar history of Health & Saf. Code, former § 26542].)

[53] In 1970, Health and Safety Code former *section 26515* was amended to specify: "Standards of identity and quality for wine adopted pursuant to this section *may differ from or be inconsistent with* the standards promulgated by [the federal regulators in the Department of the Treasury]." (Stats. 1970, ch. 1573, § 5, p. 3255, italics added.) The statute today provides the same. (*Health & Saf. Code, § 110525* ***HN15***[] ["Standards of identity and quality for wine adopted pursuant to this section may differ from or be inconsistent with the standards promulgated by the Secretary of the Treasury pursuant to the *Federal Alcohol Administration Act*"].)

[54] Indeed, other jurisdictions, since 1976, expressly have recognized and incorporated California's more stringent "100 percent rule" into their own state wine regulations (see 16 Tex. Admin. Code, § 45.45(b) & (c) (eff. Jan. 1976) ["all grape wine bearing labels showing 'California' as the origin of such wine shall be derived 100 % from grapes grown and wine from such grapes fermented within the State of California"]; *Wash. Admin. Code, § 314-24-003(5)* [same]), and the federal regulating body itself has recognized California's "100 percent rule" as a valid exercise of state regulatory power. (See 58 Fed.Reg. 65295, 65297 (Dec. 14, 1993) [acknowledging "California's authority to enforce its own labeling requirements within the area of its jurisdiction"].)

[55] Under the then existing federal regulations, use of geographic brand names was permitted if (i) the word ?brand" appeared after the brand name (*27 C.F.R. § 4.33(b) (1976)*) or (ii) at least 75 percent of the grapes originated in the appellation suggested by the brand name (*id.*, *§ 4.25 (1976)*).

[56] Although the BATF in 1978 adopted new rules regulating the use in brand names of terms of geographic or viticultural significance, it delayed implementation of those rules, first until 1983 and ultimately until 1986. (43 Fed.Reg. 37672, 37674, 37678 (Aug. 23, 1978).) The brand-name rules that were adopted in 1978 (but never became effective) would have provided: "A brand name of viticultural significance may not be used unless the bottling winery is located within the geographical area used in the brand name, and the wine meets the appellation of origin requirements for the area named" (meaning at least 75 percent of

regulations concerning appellations of origin— **[*983]** including a new subcategory within appellations of origin known as "viticultural areas." **[****82]** (43 Fed.Reg. 37672, 37674, 37678 (Aug. 23, 1978).) [57] The 1978 federal appellations of origin regulation expressly recognized the enforceability of state laws in relation to placing a "viticultural area" designation on a wine label, making the right to so label a wine contingent on compliance **[**448]** with, among other things, "*the laws and regulations of all of the States contained in the viticultural area*." (27 C.F.R. former § 4.25a(e)(3)(iv) (1978–1981); *id.,* former § 4.25a(e)(3)(v) (1981–1986), italics added.) [58]

Prior to and during this same period of federal regulatory action and consideration of geographic brand-name regulations (see *ante*, fn. 56), in 1977 the State of Oregon departed from the federal labeling **[****84]** regulations in substantial ways, imposing more stringent state rules concerning matters such as percentage content of Oregon appellation wines, [59] **[****85]** use of "semi-generic" **[*984]** place names, [60] percentage content of varietal wines, [61] use of the term "estate bottled," [62] **[****86]** **[***212]** and the use of geographic brand names. [63] In each of

---

the grapes used to make the wine must be from that area). (43 Fed.Reg. 37672, 37678 (Aug. 23, 1978).) Alternatively, the 1978 regulation, as initially adopted, would have permitted use of a brand name of viticultural significance if "the brand name is qualified by the word 'brand' immediately following the brand name in the same size of type and as conspicuous as the brand name itself." (*Ibid*.)

As noted, implementation of the brand-name aspects of the rules repeatedly was delayed. (See 48 Fed.Reg. 2762 (Jan. 21, 1983); 50 Fed.Reg. 758 (Jan. 7, 1985).) Meanwhile, in 1984 the BATF retreated from its 1978 proposal concerning the use of brand names and proposed instead to address the issue by adopting either that plan, or one of three alternative plans. (49 Fed.Reg. 19330, 19331–19332 (May 7, 1984); see *post*, fn. 70 [describing the BATF's 1984 comments concerning proposed branding rules].) As explained below, based upon further review and the comments concerning its 1984 proposal, the BATF ultimately adopted, effective July 7, 1986, the regulation at issue in the present case. (51 Fed.Reg. 20480 (June 5, 1986).)

57 An "appellation of origin" was, and continues to be, defined as a political division or subdivision—for example, a state, or group of states, or a county, or group of counties—in which grapes used to make a wine are grown. (See *27 C.F.R. § 4.25(a)(1)(i)-(vi)*.) A "viticultural area," by contrast, is a special subcategory within an appellation of origin (see *27 C.F.R. § 4.25(a)(1)(vi)*) demarked not by political boundaries, but by geographic terms and characteristics.

58 The other requirements for "viticultural area appellation" labeling were (and remain) (i) that the area be recognized under part 9 of 27 Code of Federal Regulations; (ii) that the wine be made from at least 85 percent grapes grown in that viticultural area; and (iii) that the wine be fully "finished" within the state (or one of the states) of the viticultural area. (*27 C.F.R. § 4.25(e)(3)(i), (ii) & (iv)*.)

59 An administrative regulation of the Oregon Liquor Control Commission (former Or. Admin. R. 845-10-292(6)(c), eff. Mar. 1, 1977, currently Or. Admin. R. 845-010-0920(1) & (2) (2004)), requires: "(1) An appellation of origin must appear on every wine brand label in direct conjunction with, and in lettering as conspicuous as, the wine's class or type designation. The lettering must be at least two millimeters in height. [¶] (2) No person may sell or offer to sell a wine, claiming or implying a certain appellation of origin anywhere on its label, unless 100 percent of the grapes used in its production grew within the legal boundaries of that appellation of origin. …" The corresponding federal regulations, by contrast, impose only a 75 percent rule for appellations of origin (*27 C.F.R. § 4.25(b)(1)(i)*), an 85 percent rule for American viticultural areas (*27 C.F.R. § 4.25(e)(3)(ii)*), and a 95 percent rule for individual vineyard appellations (*27 C.F.R. § 4.39(m)*).

60 Compare Oregon Administrative Rule 845-10-292(5), effective March 1, 1977, currently Oregon Administrative Rule 845-010-0930 (2004) (barring use of "semi-generic" place names [such as Burgundy, Chablis, and Chianti] on Oregon wine labels) with *27 Code of Federal Regulations section 4.24(b)(2)* (permitting those same names on federally approved labels).

61 Compare Oregon Administrative Rule 845-10-292(3)(a), effective March 1, 1977, currently Oregon Administrative Rule 845-010-0915(1) (2004) (a varietal name [such as Chardonnay or Pinot Noir] may not be used on an Oregon wine label unless at least 90 percent of the wine's grapes are of that varietal) with *27 Code of Federal Regulations section 4.23(b)* (permitting use of a varietal name on federally approved labels if only 75 percent of the wine's grapes are of that varietal).

62 Compare Oregon Administrative Rule 845-10-292(4)(c), effective March 1, 1977, currently Oregon Administrative Rule 845-010-0925 (2004) (barring use of the term "estate bottled" on Oregon wine labels unless, among other things, the wine's grapes

these respects, Oregon reserved the right to *disapprove* wine labels that had been granted a valid federal certificate of label approval. [64]

For present purposes, the most relevant of these various departures from federal wine labeling regulations concerns Oregon's geographic brand-name rule.

Effective March 1, 1977, Oregon Administrative Rule 845-10-292(6)(e) provided that appellation names—including the names of Oregon counties, and the names of Oregon wine-producing regions Willamette Valley, Umpqua Valley, and Rogue Valley—"*shall not be used in a brand name, in the name of a winery or in any other manner on a label unless 100 percent of the grapes* **[****87]** *used to produce the wine were grown within the boundaries of that appellation of origin.*" (Italics added.) The regulation included a grandfather clause permitting "use by a winery of a brand name which has been in use *by that winery* on its approved labels prior to *January 1, 1977*." (Or. Admin. R. 845-10-292(6)(e) (1977), **[**449]** italics added.) [65] **[****88]** Like the other Oregon labeling rules that specifically exceed the federal regulations, this Oregon geographic **[*985]** brand regulation remains in force today, more than a quarter-century after its adoption. (See Or. Admin. R. 845-010-0920(4)(f) (2004)). [66]

We find these Oregon regulations relevant to our current inquiry in three interrelated respects. [67] First, the state regulations— **[***213]** especially the strict **[****89]** geographic brand-name rule, and the estate-bottled rule—

---

were grown within five miles of the winery) with [27 Code of Federal Regulations section 4.26](#) (permitting the term "estate bottled" on federally approved labels without requiring that the wine's grapes have been grown within five miles of the winery).

[63] See Oregon Administrative Rule 845-10-292(6)(e), effective March 1, 1977, currently Oregon Administrative Rule 845-010-0920(4)(f) (2004), discussed in the text, *post*.

[64] See Oregon Administrative Rule 845-10-290(2) (1977), currently Oregon Administrative Rule 845-010-0290(2) (2004) (providing that each wine label must (i) receive a federal COLA *and* (ii) comply with the more stringent Oregon rules concerning percentage contents for appellations of origin, semi-generic names, grape content of varietal wines, brand names, and use of the term "estate bottled").

[65] We note the narrowness of this grandfather provision compared with the federal grandfather clause that we consider in the present case. In addition to the earlier cutoff date (1977 under the state regulation, as compared with 1986 under the federal regulation), the phrasing of the provision suggests that the right of grandfathered use may not be transferred to another entity, as was done in the present case. (Cf. Comment, *On Vino Veritas Clarifying the Use of Geographic References on American Wine Labels* (2001) [89 Cal. L.Rev. 1881, 1912–1913](#).)

[66] As most recently amended, the regulation provides that appellation names—again including the names of Oregon counties, and the names of Oregon wine-producing regions Willamette Valley, Umpqua Valley, and Rogue Valley or "words that may be mistaken for an approved appellation of origin in a brand name [or] in a winery name, or in any other manner on a wine label" may not be used "unless the wine meets the requirements for use of that appellation of origin" (Or. Admin. R. 845-010-0920(4)(f) (2004)), that is, "100 percent of the grapes used in its production grew within the legal boundaries of that appellation of origin." (*Id*., 845-010-0920(2) (2004).) Like the original version of the regulation, the provision also retains a restrictive grandfather clause: "A winery may continue to use any brand name that *it has used* on its approved label since before *January 1, 1977*." (*Id*., 845-010-0920(4)(f) (2004), italics added.)

[67] We reject Bronco's preliminary argument, raised in its supplemental briefs, that Oregon Administrative Rule 845-010-0280 implicitly nullifies Oregon wine regulations discussed above, such as the estate-bottled provision and the geographic brand-name provision.

The cited rule addresses "Standards of Identity and Prohibited Practices Concerning Wine" and provides that Oregon regulations concerning those two topics, set forth in Oregon Administrative Rule "845-010-0905 [definitions] *and* 845-010-0940 [use of water, wine spirits and other sweetening agents]," shall prevail over any less stringent or restrictive federal law. (Or. Admin. R. 845-010-0280 (2004), italics added.) As Bronco observes, in an introductory sentence the regulation *also* states: "The Commission adopts, by reference, 27 CFR [parts] 4 [the federal wine labeling regulations] and 24[] [wineries and wine-making regulations] (1986). These regulations of the Bureau of Alcohol, Tobacco [] and Firearms of the United States Department of Treasury apply to all wine sold in Oregon by a Commission licensee." (*Ibid*.)

demonstrate that Oregon has long imposed labeling rules that are both (i) more stringent than the federal rules *and* (ii) go far beyond [27 Code of Federal Regulations section 4.25(b)(1)(iii)](#)'s authorization for states to regulate the "composition, method of manufacture, [or] designation of wines … ."

[**90]** Second, it is clear that the BATF has long been aware of these stricter Oregon rules and apparently views them as enforceable. The Oregon regulations had been in place for approximately 16 months at the time the BATF **[*986]** adopted its 1978 regulation concerning the use of "viticultural area" appellations on wine labels. That 1978 BATF regulation, as noted above, *expressly acknowledged and required compliance with* "*the laws and regulations of all the States contained in the viticultural area*." (27 C.F.R. former § 4.25a(e)(3)(iv) (1978–1981); *id*., former § 4.25a(e)(3)(v) (1981–1986), italics added.) By so providing, the BATF, as of 1978, acknowledged the propriety and enforceability of the more stringent labeling rules promulgated by the states.

Indeed, any doubt in this regard is dispelled by the BATF's action and comments seven years later (in late January 1986) when, in the course of repealing as a *federal* **[**450]** requirement 27 Code of Federal Regulations former section 4.25a(e)(3)(v)'s rule concerning compliance with state regulations relating to viticultural areas, the BATF expressly and repeatedly acknowledged both the existence and the *enforceability* of Oregon's "more **[****91]** stringent" wine labeling regulations. [68] **[****92]** The BATF explained **[***214]** that although it had decided, with regard to viticultural areas, to eliminate compliance with state laws *as a federal requirement*, the underlying substantive state law requirements relating to viticultural areas would remain, to be enforced solely by the respective states. The BATF observed: "*State laws and regulations of the* ***[*987]*** *state in which the wine was fermented or finished will, of course, continue to apply to the producing winery. These state laws and regulations are enforced by the state involved*." (51 Fed.Reg. 3773, 3774 (Jan. 30, 1986), italics added.) [69]

Bronco reads this language as adopting generally the federal regulations concerning, for example, the use of the term "estate bottled" and geographic brand names for all Oregon wines sold in that state—and hence as implicitly repealing or at least superseding those Oregon rules insofar as in-state sales of Oregon wines are concerned. Bronco's interpretation of the Oregon rules is belied by Oregon Administrative Rule 845-010-0910(2) (2004), which plainly states that Oregon Administrative Rules "845-010-0905 *through* 845-010-0940 [i.e., including Oregon's estate-bottled and geographic brand-name provisions] apply to all grape wines *produced or bottled in Oregon* …"—that is, regardless where such wines are *sold*—and that "[*t*]*hese rules prevail in any conflict between … other rules in Chapter 845, Division 010*." (Italics added.)

[68] As the BATF explained, prior to adoption of its 1978 appellation rules, appellations of origin relating to American wines generally were characterized as regions or places delimited by political boundaries, such as states or counties. As observed *ante*, at footnote 57, the 1978 appellation rules expanded the concept of appellations of origin by additionally including under that term "viticultural areas"—that is, grape-growing regions—defined by geographic features, and not political lines. Because some of these viticultural areas straddled states, a problem eventually arose concerning the federal requirement, then set out in 27 Code of Federal Regulations former section 4.25a(e)(3)(v) (1981–1986), that in order to employ a viticultural area designation, a winery must "conform[] to the laws and regulations of all the States contained in the viticultural area." Specifically, the BATF noted (51 Fed.Reg. 3773, 3774 (Jan. 30, 1986)), if a wine were to use the viticultural area designation "Columbia Valley" (a federally recognized viticultural area straddling Oregon and Washington), the winery producing the wine would be required to comply with Oregon's state regulations, even if the grapes were grown in the Washington part of the Columbia Valley and the wine was made and finished only in Washington. Moreover, the BATF observed, "regulations of Oregon and Washington differ greatly regarding the production *and labeling* of wine. *Oregon regulations are more stringent than Federal regulations*." (51 Fed.Reg. 3773, 3774 (Jan. 30, 1986), italics added.) The BATF observed that because former section "4.25a(e)(3)(v) required compliance with laws and regulations of all states within a multistate viticultural area, regardless of where the wine is fermented or finished, wine made from grapes originating and fermented in Washington, and finished and bottled within Washington was, nevertheless, subjected to Oregon law and regulations if the wine claimed a multistate viticultural area appellation such as Columbia Valley." (51 Fed.Reg. 3773, 3774 (Jan. 30, 1986).) And yet, the BATF determined, "[a] *Federal requirement* for compliance with State laws and regulations is both unnecessary and difficult for the Federal Government to enforce *due to the multitude of state and local laws and regulations*." (*Ibid*., italics added.) Accordingly, the BATF concluded, it did not "believe that Federal regulation should impose the State laws or regulations of one state upon transactions occurring in other states." (*Ibid*.)

[69] Underscoring this point, the BATF observed in the summary of its decision that although "the requirement to comply with State laws and regulations is removed as a Federal requirement," still, "[t]he State laws and regulations remain in effect and *will*

Third and finally, the Oregon geographic brand-name regulation, in particular, sheds light upon the BATF's apparent understanding of the grandfather clause at issue in this case. Almost 10 years after Oregon adopted its restrictive geographic brand-name labeling regulation, the BATF, after considering various options over the preceding decade (see *ante*, fn. 56, and *post*, fn. 70), amended *27 Code of Federal Regulations section 4.39(i)(1)* in the manner at issue in this case, to prohibit the use of labels with brand names implying that a wine was made with grapes grown in the area suggested by the brand name, unless at least 75 percent of the grapes used to make the wine were in fact from **[****93]** that area. But, as noted above, the new federal regulation also contained a grandfather clause that lies at the center of the controversy in this case, under which such otherwise misleading labels are not prohibited, so long as the label was in use prior to July 1986 *and* the label discloses the true appellation of origin of at least 75 percent of the grapes actually used to make the wine inside the bottle. (*Id*., *§ 4.39(i)(2)(ii)*.) [70]

[**94]** **[***215]** **[**451]** In view of the BATF's explicit acknowledgement, only four months prior to its adoption of the provision at issue in the present case, that the Oregon labeling regulations are proper and enforceable (see 51 Fed.Reg. 3773, 3774 (Jan. 30, 1986)), it is reasonable to assume that the BATF, when it adopted **[*988]** the grandfather clause, was aware of Oregon's "more stringent" geographic brand-name labeling rule. And yet the BATF said nothing in its new provision or in its discussion of that new rule to suggest that the new rule preempted Oregon's long-standing, closely related, and more stringent brand-name labeling rule.

CA(13)[] **(13)** Accordingly, contrary to Bronco's theory that the BATF itself viewed or views its wine labeling regulations as preempting more stringent state regulations, we conclude that the history of the federal and Oregon wine labeling regulations in the mid-1970s through the present reveals no evidence of any such intent. Instead, that history strongly indicates that the BATF has long contemplated that the states will enforce their own stricter labeling requirements, and that the agency did not and does not view its labeling regulations as preempting more stringent state **[****95]** regulations such as *section 25241*.

c. *Amendment of the FAA Act in 1988, and corresponding regulations, requiring health warning labels and expressly preempting state regulation of such labels*

In 1988, Congress amended the FAA Act to require that all wine labels (and the labels of other alcoholic beverages) contain a warning on the back label, as follows: "GOVERNMENT WARNING: (1) According to the Surgeon General, women should not drink alcoholic beverages during pregnancy because of the risk of birth defects. (2) Consumption of alcoholic beverages impairs your ability to drive a car or operate machinery, and may cause health problems." (*27 U.S.C. § 215(a)*.) Congress gave the BATF authority to issue appropriate regulations to enforce Congress's will (*27 U.S.C. § 215(b) & (d)*), and, stressing the perceived need in this particular area for Congress to "exercise the full reach of the Federal Government's constitutional powers in order to establish a comprehensive Federal program" (*27 U.S.C. § 213*), further provided expressly for federal preemption of such health warnings on alcoholic beverage labels: "No statement relating to alcoholic **[****96]** beverages and health, other than the statement required by *section 215* of this title, shall be required under State law to be placed on any container of an alcoholic beverage … ." (*27 U.S.C. § 216*.) The BATF responded by adopting implementing regulations (see *27*

---

continue to be enforced by the agencies of the states involved in winemaking." (51 Fed.Reg. 3773 (Jan. 30, 1986), italics added.)

[70] See *27 Code of Federal Regulations section 4.39(i)*, quoted in full *ante*, at footnote 7. As Bronco observes, in a notice of proposed rulemaking issued in 1984—two years prior to the BATF's adoption of the present brand-name provision and its grandfather clause—the BATF stated that it did not wish to adopt a regulation that "may be too restrictive." (49 Fed.Reg. 19330, 19331 (May 7, 1984).) After outlining four possible regulatory responses to the brand-name problem, the BATF stated, in reference to a possible rule strictly regulating the use of terms of viticultural significance in brand names, its "belie[f that] the wine industry should be allowed flexibility in selecting brand names under which to market their products *without having a whole class of brand names become totally unusable*." (*Id*., at pp. 19331–19332, italics added.) As explained *post*, part II.D.1, Bronco suggests that this language supports a conclusion that two years later, when the BATF adopted *27 Code of Federal Regulations section 4.39(i)(2)(ii)* and concluded that the new rule "will provide the industry with sufficient flexibility in designing their labels, while at the same time providing consumers with protection from any misleading impressions that might arise from the use of geographic brand names" (51 Fed.Reg. 20480, 20482 (June 5, 1986)), the BATF, in so acting, engaged in a "careful balancing of federal policy objectives" and intended to *allow* the kind of brand-name labeling here at issue.

C.F.R. § 16.20 et seq.) as well as a provision expressly reaffirming the preemptive effect of that regulation. (27 C.R.F. § 16.32.)

CA(14)[] **(14)** As the United States Supreme Court has observed, "**HN16**[] 'an express definition of the pre-emptive reach of a statute … supports a reasonable inference … that Congress did not intend to pre-empt **[***216]** other matters.' " (Lorillard Tobacco Co. v. Reilly (2001) 533 U.S. 525, 541 [150 L. Ed. 2d 532, 121 S. Ct. 2404], quoting Freightliner Corp. v. Myrick (1995) 514 U.S. 280, **[*989]** 288 [131 L. Ed. 2d 385, 115 S. Ct. 1483]; accord, *Bass River Associates v. Mayor, Tp. Com'r (3d Cir. 1984) 743 F.2d 159, 162* ["It is of some interest and no small significance that a provision in the same title does provide for federal preemption of state and local laws or regulations … ."].)

This inference and these observations are especially apt here, in light of the history **[**452]** described above, which strongly **[****97]** suggests (i) no intent on the part of Congress, in 1935 or thereafter, to preempt any *other* category of state wine label laws, and (ii) the BATF's acknowledgement of, and apparent acquiescence in, the more stringent wine labeling laws of the states, and specifically those of Oregon. Indeed if Congress, as Bronco asserts, by enactment of the FAA Act in 1935, already had generally preempted state regulation of wine labels, there would have been no need for any express preemption clause or preemption regulation with respect to the 1988 health warnings for wine labels.

Once again, this history reveals no evidence of any clear or manifest intent on the part of Congress or the BATF to preempt state wine labeling regulation such as section 25241. Instead, the history supports an opposite inference that neither Congress nor the BATF intended to preempt state wine labeling laws such as section 25241.

D.

Having concluded that Bronco has failed to carry its burden of establishing clear or manifest intent on the part of Congress, or congressional intent as interpreted by the BATF, to preempt the traditional exercise of state police power such as the wine labeling regulation found **[****98]** in section 25241, we proceed under the presumption that no such preemption was intended. We bear this presumption in mind when we consider below Bronco's assertion that section 25241, by imposing a labeling requirement that is more exacting than the federal requirement, is impliedly preempted by federal law.

1. *Does section 25241, by prohibiting, with respect to Napa County, what the federal grandfather clause does not prohibit, stand as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress?*

In support of its assertion that section 25241 frustrates the full purposes and objectives of federal law, Bronco cites various cases in which courts have made such (or similar) findings in other contexts. (Geier, supra, 529 U.S. 861, 881 [state tort action based upon failure to equip automobile with airbags would frustrate federal highway safety standards permitting car **[*990]** makers to employ passive restraint devices other than airbags]; Barnett Bank, supra, 517 U.S. 25, 31 [state statute barring national bank from selling insurance would obstruct federal statute that permitted, but did not require, national banks to sell **[****99]** insurance]; Lawrence County, supra, 469 U.S. 256, 260–268 [state law requiring certain method of distribution of federal funds held to obstruct federal statute that was designed to provide local governments freedom to spend those federal funds "as they saw fit"]; McDermott v. Wisconsin (1913) 228 U.S. 115, 129 [57 L. Ed. 754, 33 S. Ct. 431] [state statute that required removal of certain labels on syrup was preempted by federal statute under which such labels had been approved]; Dowhal, supra, 32 Cal.4th 910, **[***217]** 929, 935 [state law warnings concerning nicotine frustrated the purposes of the federal Food, Drug & Cosmetic Act].)

The Department and the NVVA, by contrast, distinguish each of these cases and rely instead primarily upon Sprietsma v. Mercury Marine (2002) 537 U.S. 51, 68–70 [154 L. Ed. 2d 466, 123 S. Ct. 518], in which the high court declined to find preemption of a state tort action seeking to impose standards for boat propeller guards, even in the face of a decision by federal authorities not to impose any general or universal propeller guard requirements. (See also, e.g., California Coastal Comm'n v. Granite Rock Co. (1987) 480 U.S. 572, 582–584 [94 L. Ed. 2d 577, 107 S. Ct. 1419] (Granite Rock Co.) **[****100]** [federal approval of mining project was not frustrated by California's stricter environmental requirements; indeed, the federal regulations assumed the applicability of the state regulations]; *Hillsborough County v. Automated Medical Labs. (1985) 471 U.S. 707, 720–721 [85 L. Ed. 2d 714, 105 S. Ct. 2371] (Hillsborough County)* [stricter local regulations concerning plasma donors posed no serious obstacle to related federal regulations]; cf. *Exxon Corp. v. Governor of Maryland (1978) 437 U.S. 117, 132 [57 L. Ed. 2d 91, 98 S. Ct. 2207] (Exxon)* [no preemption **[**453]** of state discriminatory pricing regulations barring conduct that triggered a limited defense under federal law].)

Bronco asserts that *section 25241* frustrates the purposes of Congress, or at least of the BATF's regulation establishing a grandfather clause (*27 C.F.R. § 4.39(i)(2)(ii)*), in "four interrelated ways." Bronco argues: (i) *Section 25241* prohibits precisely what the regulation establishing the grandfather clause "expressly and unambiguously authorizes"; (ii) the regulation establishing the grandfather clause "embodies a specific determination by federal regulators that the use of established **[****101]** geographical brand names for wines from a variety of appellation areas would not be misleading if the labels also featured the true appellation of origin"; (iii) the regulation establishing the grandfather clause "reflects a careful balancing of federal policy objectives" and a determination by the BATF that the regulations should not render a "whole class" of established brand names "totally unusable" (see *ante*, fn. 70); and (iv) the BATF, in adopting its rule and regulation establishing a grandfather **[*991]** clause, expressly rejected as "too restrictive" a general rule that would have confined the use of established geographic brand names to wines made from the region referred to in the brand name.

In reply, the Department and the NVVA assert that *section 25241* is in aid of, and consistent with, Congress's general and overriding purpose in adopting 27 United States Code *section 205(e)* in 1935—namely, the prevention of consumer deception relating to wine labeling. The Department and the NVVA claim that Bronco has failed to identify any congressional purpose with which *section 25241* interferes. In this respect, the NVVA argues, "[t]he assertion that the grandfather clause represents **[****102]** a 'deliberate federal policy determination' or 'regulatory balance' assumes that Congress or [the] BATF identified some affirmative reason that the government of the United States wanted Bronco to be able to sell wine made from non-Napa grapes under labels saying 'Napa.' " The Department asserts there is no support for the proposition that federal regulators have concluded that in all cases, the presence of a true appellation of origin dispels the effects of misrepresentations reflected in a brand name.

Both the Department and the NVVA acknowledge that in 1984 the BATF, in discussing various options for addressing **[***218]** the problems posed by geographic brand names, asserted that it did not believe it appropriate to issue regulations that "may be too restrictive" or render "totally unusable" a "whole class" of brand-name labels. (49 Fed. Red. 19330, 19331 (May 7, 1984) see *ante*, fn. 70.) But, the Department and the NVAA argue, those statements suggest at most that the BATF did not believe it prudent to impose a *national*, or total, ban on the use of existing brand-name labels that suggested an origin of wine different from the actual origin of the grapes used in making the wine. The Department and the NVVA argue that the circumstance **[****103]** that the BATF did not see fit "totally" to eliminate a "whole class" of existing labels on a national basis without regard to the policies of a particular state does not provide evidence establishing that *section 25241* frustrates any significant federal purpose. In this respect, the NVVA asserts that when, as here, the objectives of the state legislature are identical to the overriding purpose of section 205(e) of the FAA Act (protecting consumers from misleading wine labels), "in the absence of preemptive intent, the fact that [the] BATF may have balanced federal policies and arrived at a particular result does not prevent California from considering its own local policies and needs and passing its own [more stringent] laws." Finally, the Department and the NVVA observe that the BATF apparently never contemplated, much less rejected, any area-specific exemption from the federal grandfather clause, such as is found in *section 25241*'s special Napa County labeling rule. The NVVA concludes, "There is no evidence that [the] BATF considered the limited consumer protection provided by the grandfather clause to be sufficient to protect consumers in all cases, or intended to prevent **[****104]** states from **[*992]** preventing the kind of abuses which Bronco and other opportunistic winemakers could perpetuate under the grandfather clause."

[454]** In view of Bronco's repeated suggestions that we should be influenced in our assessment by the circumstance that the federal regulations at issue are part of a comprehensive scheme, in resolving these conflicting views concerning whether *section 25241* stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress we bear in mind the high court's admonition in *Hillsborough County,* supra, 471 U.S. 707, 717: "HN17[] We are even more reluctant to infer pre-emption from the comprehensiveness of regulations than from the comprehensiveness of statutes. As a result of their specialized functions, agencies normally deal with problems in far more detail than does Congress. To infer pre-emption whenever an agency deals with a problem comprehensively is virtually tantamount to saying that whenever a federal agency decides to step into a field, its regulations will be exclusive. Such a rule, of course, would be inconsistent with the federal-state balance embodied in our Supremacy Clause jurisprudence. See **[****105]** Jones[, supra], 430 U.S. [519] at 525. [¶] Moreover, *because agencies normally address problems in a detailed manner and can speak through a variety of means, including regulations, preambles, interpretive statements, and responses to comments, we can expect that they will make their intentions clear if they intend for their regulations to be exclusive*." (Italics added.)

In addition, we are guided by the high court's observation in Crosby, supra, 530 U.S. 363, 373, that HN18[] what constitutes a "sufficient obstacle [for a finding of implied preemption] *is a matter of judgment, to be informed by examining the federal statute as a whole and identifying its purpose* ***[***219]*** *and intended effects*." (Italics added.) The high court also has explained that our inquiry in this regard "requires us to consider the relationship between state and federal laws *as they are interpreted and applied, not merely as they are written*." (Jones, supra, 430 U.S. 519, 526, italics added.)

We question Bronco's characterization of the state statute as prohibiting "precisely what [the regulation establishing the grandfather clause] *authorizes*." **[****106]** (Italics added.) As the NVVA asserted at oral argument and as we observed in Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co. (1999) 20 Cal.4th 163, 183 [83 Cal. Rptr. 2d 548, 973 P.2d 527], "[t]here is a difference between (1) not making an activity unlawful, and (2) making that activity lawful." In our view it is more accurate to characterize the state statute as prohibiting—with respect to Napa County—what the federal regulation's grandfather clause *does not prohibit*.

CA(15)[] **(15)** In any event, Bronco's repeated emphasis upon an alleged federal "authorization" presents a myopic and oversimplified analysis. The crucial **[*993]** question is, instead, whether the state rule would stand as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress. Turning to *that* question, we agree with the Department and the NVVA that section 25241 HN19[] is consistent with Congress's overall purpose in enacting 27 United States Code section 205(e)—that is, to "insure that the purchaser should get what he thought he was getting, [and] that the representations both on labels and in advertising should be honest and straightforward and truthful." **[****107]** (Hearings before House Com. on Ways and Means on H.R. No. 8539, Fed. Alcohol Control Act, (1935), testimony of Joseph H. Choate, former Chairman of FAC Admin., 74th Cong., 1st Sess., at p. 10; H.R. Rep. No. 1542, 74th Cong., 1st Sess., p. 3 (1935) [highlighting deceptive labeling practices]; 79 Cong. Rec. (1935) 11714 [same].) The state statute also is consistent with the recognition that the FAA Act was necessary in order to "do something to supplement legislation by the States to carry out their own policies" because the states "alone cannot do the whole job." (Remarks of Rep. Cullen on H.R. No. 8539, 74th Cong., 1st Sess., 79 Cong. Rec. (1935) 11714.) For the reasons set forth above by the Department and the NVVA, we find that section 25241 does not stand as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress.

[455]** In reaching this determination, we also are persuaded by the apparent congressional and regulatory acquiescence in California's long-standing regulations applicable to the labeling of wines produced in California. This acquiescence militates against concluding that California's section 25241, enacted in 2000, constitutes **[****108]** a "sufficient obstacle" supporting a finding of implied preemption based upon a theory of frustration of federal purpose. Indeed, any doubt that we may have had in this regard is dispelled by the related history of Oregon's corresponding geographic brand-name labeling regulation, which, as explained above, since 1977 has imposed a rule far stricter than the federal rule that existed in the mid-1970s and, like the California statute now under review, also established a regulation far more stringent than that set forth, effective in 1986, under the federal grandfather clause. In other words, like the California statute, the Oregon brand-name regulation prohibits for certain Oregon names what the federal grandfather does not prohibit.

As explained above, the BATF long has been aware of these stricter state law brand-name labeling regulations, and, far **[***220]** from suggesting that their enforcement would frustrate any federal purpose, [71] the BATF expressly has stated its understanding that such labeling regulation will be enforced by the states. In this setting, the BATF's failure to question the enforcement of these **[*994]** more stringent state regulations—while instead acknowledging generally **[****109]** the propriety of such regulations—suggests that the BATF, the expert body charged with the enforcement of *27 United States Code section 205(e)*, does not view these state regulations as being preempted by federal law, and also does not view them as posing an obstacle to the accomplishment and execution of the full purposes and objectives of Congress. (See, e.g., *Hillsborough County, supra, 471 U.S. 707, 721* [because "the agency has not suggested that the county ordinances interfere with federal goals, we are reluctant in the absence of strong evidence to find a threat to the federal goal of ensuring sufficient plasma"]; accord, *Granite Rock Co., supra, 480 U.S. 572, 582–583* ["If, as Granite Rock claims, it is the federal intent that Granite Rock conduct its mining unhindered by state environmental regulation, one would expect to find the expression of this intent in these Forest Service regulations"].)

[**110]** ***CA(16)***[] **(16)** We find nothing in the history of the underlying federal statute or the federal regulations suggesting that, although the BATF may have determined that as a *general matter* its grandfather clause was appropriate so as to avoid destroying an "entire class" of brand-name labels, states would or should be precluded from adopting more stringent brand-name labeling requirements as necessary to address local concerns. (See *Olszewski, supra, 30 Cal.4th 798, 815* ***HN20***[] [the presumption against preemption " 'reinforces the appropriateness of a narrow reading of' " assertedly preempting language]; accord, *Cipollone v. Liggett Group, Inc. (1992) 505 U.S. 504, 518 [120 L. Ed. 2d 407, 112 S. Ct. 2608]*; *Medtronic, supra, 518 U.S. 470, 485*; cf. *Exxon, supra, 437 U.S. 117, 132* ["it is illogical to infer that by excluding certain competitive behavior from the general ban against discriminatory pricing, Congress intended to pre-empt the States' power to prohibit any conduct within that exclusion"].) For the reasons set forth above, we conclude that the state labeling rule in question does not frustrate Congress's intent or stand as an obstacle to the **[****111]** accomplishment and execution of the full purposes and objectives of Congress. [72]

[*995]

[456]** 2. *Does section 25241, by imposing additional conditions not required for the issuance of a federal COLA, stand as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress?*

Bronco also asserts that *section 25241* is impliedly preempted because, it is claimed, the statute imposes additional conditions **[****112]** not required by federal COLAs **[***221]** and thereby nullifies an asserted "right" or federal "license" to market wine in interstate and foreign commerce. In support, Bronco relies upon numerous cases holding, on the facts presented, that a state may not, by its own regulations, impair rights granted under a federal license or permit. (E.g., *Gibbons v. Ogden (1824) 22 U.S. 1 [6 L. Ed. 23]* [federal steamboat license preempted New York statute barring passage between New Jersey and New York]; *Ray, supra, 435 U.S. 151, 164–165* [federal permit authorizing a vessel to carry cargo in United States waters prevails over the contrary state judgment]; *Sperry v. Florida (1963) 373 U.S. 379, 385 [10 L. Ed. 2d 428, 83 S. Ct. 1322]* [state statute barring unauthorized practice of law could not be applied to nonlawyers licensed under federal law to prosecute patents]; *Leslie Miller, Inc. v. Arkansas (1956) 352 U.S. 187, 188–190 [1 L. Ed. 2d 231, 77 S. Ct. 257]* [state licensing law could not be applied so as to effectively allow state to declare "irresponsible" a contractor certified by the federal

---

[71] We note that the BATF has not been reluctant to commit its thoughts to public view through publication of proposed rules and related comments in the Federal Register.

[72] For similar reasons, we find unpersuasive the related arguments of amici curiae on behalf of Bronco that *section 25241* stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress, because the statute assertedly (i) "impairs the long-standing national policy favoring uniform and consistent federal wine labeling regulations," (ii) "impairs the consistent federal policy permitting continued use of established brands," and (iii) "will frustrate the United States' ability to protect established brands and trademarks in ongoing trade negotiations."

government as "responsible"]; *Castle v. Hayes Freight Lines, Inc. (1954) 348 U.S. 61, 64 [99 L. Ed. 68, 75 S. Ct. 191]* **[****113]** [state could not bar federally licensed truck driver from its roads for repeated violations of state traffic laws]; *First Iowa Coop. v. Power Comm'n (1946) 328 U.S. 152, 164–167 [90 L. Ed. 1143, 66 S. Ct. 906]* [federal permit issued for interstate utility project precluded state attempt to proscribe project].)

The Department and the NVVA, asserting that these cases are distinguishable, rely upon other high court cases holding that, in certain circumstances, possession of a federal license does not confer immunity "from the operation of the normal incidents of local police power." (*Huron Cement Co. v. Detroit (1960) 362 U.S. 440, 447 [4 L. Ed. 2d 852, 80 S. Ct. 813]* [upholding enforcement of city's smoke abatement ordinance against federally licensed vessels]; see also *Florida Avocado, supra, 373 U.S. 132, 141* [upholding California's right to enforce regulations prohibiting the sale of certain federally approved Florida avocados]; *Medtronic, supra, 518 U.S. 470, 492–494* [federal approval of medical device did not preempt state action claiming the approved device was defectively designed]; *Granite Rock Co., supra, 480 U.S. 572, 582–583* **[****114]** [federal approval of mining project did not preempt California's stricter environmental requirements]; *Pacific Gas & Elec. v. Energy Resources Comm'n (1983) 461 U.S. 190, 222–223 [75 L. Ed. 2d 752, 103 S. Ct. 1713]* [federal nuclear power plant license did not preempt stricter state licensing requirements].)

[*996] These licensing cases in essence present the same issue discussed above, namely, whether the state regulation stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress. But as both the Department and the NVVA observe, it is quite doubtful that a federal COLA issued pursuant to *27 United States Code section 205(e)* and the corresponding wine label certificate regulations (*27 C.F.R. § 4.50 et seq.*) are equivalent to the licenses or permits at issue in the cases upon which Bronco relies, and Bronco does not provide any convincing authority suggesting that a COLA constitutes a license or permit as understood in those cases. Indeed, ***HN21***[] it is apparent from the *FAA Act* itself, and from the corresponding regulations, that both Congress and the BATF well understand the distinction between a license or permit, on one **[****115]** hand, and a COLA, on the other. Congress requires wine importers, producers, and wholesalers to secure a "basic permit" (*27 U.S.C. § 203(a)–(c)*; see also *id*., *§ 204* **[***222]** [setting forth permit procedures]), and the BATF has adopted extensive corresponding regulations concerning such permits (*27 C.F.R. §§ 1.20–1.59*). By contrast, nowhere in the separate COLA procedures set forth in *27 United States Code section 205(e)*, or the extensive COLA regulations (*27 C.F.R. §§ 4.50–4.52, 13.1–13.92*), **[**457]** does Congress or the BATF even *imply* that a COLA constitutes a license or permit. Quite the contrary.

CA(17)[] **(17)** As explained above, it is evident that the BATF envisions that states will enforce their own labeling laws to the extent they impose more stringent requirements, and that BATF generally views its role as being confined to ensuring compliance with the bare terms of *federal* labeling law. (See, e.g., 51 Fed.Reg. 3773, 3774, discussed *ante*, at pt. II.C.2.b.) As the NVVA observes, the BATF itself has confirmed this view of its enforcement authority and of any resulting COLA that it issues by noting, on its COLA application form, that **[****116]** the BATF uses the form only for its own federal enforcement duties but that it may share the information supplied to *state regulators* "to aid in the performance of their duties." (Dept. of Treas., Alcohol and Tobacco Tax Trade Bur., Application for and Certification/Exemption of Label/Bottle Approval, TTB F 5100.31 (4/2004), p. 3 <*http://www.ttb.gov/forms/5000.htm* # alcohol> [as of Aug. 5, 2004].)

CA(18)[] **(18)** Nor, contrary to the assertions of Bronco and suggestions by the Court of Appeal below, can a COLA properly be viewed as conferring a "right" on the holder to market wines in interstate or foreign commerce so long as the bare BATF labeling regulations are satisfied. ***HN22***[] The BATF itself has observed that a "certificate of label approval was never intended to convey any type of proprietary interest to the certificate holder" and that a certificate " 'is issued for [B]ATF use only … .' The certificate of label approval is a statutorily mandated tool used to help the [B]ATF in its enforcement of the labeling requirements of the *FAA Act*." (64 Fed.Reg. 2122, 2123 (Jan. 13, 1999).) As the New Jersey Supreme Court observed in a related context, a **[*997]** COLA "goes no further than **[****117]** evidencing compliance with [federal regulatory] standards imposed only for the purposes mentioned in the valid exercise of federal authority." (*Boller Beverages, Inc. v. Davis (1962) 38 N.J. 138 [183 A.2d 64, 69]*.)

III.

Bronco has failed to carry its burden of demonstrating federal preemption of a long-established and legitimate exercise of state police power with respect to the subject regulated by *section 25241*. As we have seen, there is no express preemption in the present context, and Bronco's assertions of implied preemption are contradicted by the long history we have described of concurrent state and federal regulation of wine labels including, historically, the representations appearing on labels suggesting the place of origin of the grapes used to make wine. Nor has Bronco succeeded in providing any persuasive indication that this long-standing concurrent regulatory scheme no longer is compatible with Congress's overall purposes which have been to support the states' efforts to protect consumers from misleading labeling, not to permit the type of labeling at issue here. Finally, Bronco has not established that, by purchasing a brand name **[****118]** that had been used prior to 1986, it acquired a federally recognized right or license exempting it from stricter state regulation.

California is recognized as a preeminent producer of wine, and the geographic source of its wines reflecting the attributes of distinctive locales, particularly the **[***223]** Napa Valley—forms a very significant basis upon which consumers worldwide evaluate expected quality when making a purchase. We do not find it surprising that Congress, in its effort to provide minimum standards for wine labels, would not foreclose a state with particular expertise and interest from providing stricter protection for consumers in order to ensure the integrity of its wine industry.

For the reasons set forth above, we reverse the judgment of the Court of Appeal and remand the case to that court to enable it to address Bronco's remaining claims.

Kennard, J., Baxter, J., Chin J., Brown, J., Moreno, J., and Swager, J.,[*] concurred.

Petitioner's petition for a rehearing was denied October 13, 2004, and the opinion was modified to read as printed above. Werdegar, J., did not participate therein.

Opinion

ORDER GRANTING SUMMARY JUDGMENT IN PART, DENYING SUMMARY JUDGMENT IN PART, AND DENYING LEAVE TO MODIFY SCHEDULING ORDER AND TO AMEND COMPLAINT

I. INTRODUCTION

Plaintiff Consolidated Credit Agency ("CCA") brings this action against defendants Equifax, Inc., Equifax Credit Information Services, Inc., and Equifax Information Services, LLC (collectively "Equifax") alleging that Equifax has terminated its contractual relationship with CCA because CCA refused to enter into an agreement to fix the prices that CCA would charge to its customers for consumer credit reports it purchased from Equifax. Complaint at P 41. CCA alleges that Equifax sells such reports to resellers like CCA and to end-users who are CCA's customers and is thus both a provider of such reports to CCA and a competitor of CCA. Id. at P 22. CCA alleges that Equifax entered into an agreement with two other resellers and customers of Equifax, Automatic Data Processing, Inc. ("ADP") and First American CREDCO, Inc. ("CREDCO") to fix the prices they **[*3]** each charge to their end-user customers for Equifax-generated credit reports. Id. at P 26. CCA claims that when it cut the prices it charged to its customers for Equifax-generated credit reports below the price its competitors had agreed to charge, ADP complained to Equifax, and Equifax thereupon threatened CCA with termination unless CCA raised its prices. See CCA's Response to Defendants' Statement of Uncontroverted Facts and Conclusions of Law ("RSUF") Al, citing J. Briggs Decl., Ex. A (Esquinas Deposition) RT 47:6-12. When CCA refused to raise the prices it charged to its customers, Equifax terminated CCA as an authorized reseller of Equifax-generated credit reports. Id. at P 41. Thereafter, Equifax, ADP and CREDCO continued to sell their credit reports to end-users at agreed upon prices. Id. at P 26.

CCA filed this action in Los Angeles Superior Court, alleging claims for violations of the California Cartwright Act, *Cal. Bus. & Prof. Code §§ 16700 et seq.*, violations of the California Unfair Competition Law, *Cal. Bus. & Prof. Code § 17200*, breach of contract, breach of the implied covenant of good faith and fair dealing, tortious interference with contract and misrepresentation.

On **[*4]** February 21, 2003, the instant action was removed to this Court based on diversity of citizenship. [1]

Equifax brings this motion for summary judgment on the grounds that: (1) there is no admissible evidence that any price-fixing agreement was ever reached; (2) CCA lacks standing to sue defendants for any alleged price-fixing agreement and cannot establish "antitrust injury" flowing from such alleged agreement; (3) the contract between Equifax and CCA was terminable at will and Equifax did not breach its express terms or the implied covenant of good faith and fair dealing when **[*5]** it terminated CCA; and (4) CCA has failed to present any evidence that Equifax knew of CCA's contracts with its customers, and therefore CCA's tortious interference with contract claim fails. [2]

In addition to responding to defendants' motion for summary judgment on the merits, CCA seeks leave to amend its complaint to add a claim for monopolization under *Section 2* of the Sherman Act, *15 U.S.C. § 2*.

The Court has read and considered the parties' submissions and heard oral argument regarding these motions. For the reasons discussed below, the Court rules as follows: Equifax's motion for summary judgment is DENIED as to the first five claims for relief because genuine issues of fact exist as to whether an agreement to fix the prices of credit reports charged to end-users was entered into and whether CCA was terminated for refusing to participate in

---

[1] CCA is a California general partnership; its members, Jeffrey Briggs, Matthew Briggs, and Robert Edwards are all citizens of California. See Notice of Removal PP 5-8. CCA's principal place of business is California. Notice of Removal P 4. Defendants are two Georgia corporations and a Georgia limited liability company, each with principal places of business in Georgia. Notice of Removal PP 9-12. The sole member of defendant Equifax Information Services, LLC is Equifax, Inc., a Georgia corporation with its principal place of business in Georgia. Notice of Removal P 12. Subject matter jurisdiction is not in dispute.

[2] As explained below, CCA does not challenge the dismissal of its claim for misrepresentation. See, infra, at 36.

that agreement. For that reason, CCA's Cartwright Act and Unfair Competition Law claims cannot be dismissed at this stage of the proceedings. For the same reason, CCA's claim for wrongful termination of its contractual relationship **[*6]** with Equifax cannot be summarily adjudicated regardless of whether the contract is terminable at will. Likewise, genuine issues of fact exist as to whether Equifax knowingly disrupted CCA's contractual relationships with CCA's customers by having Equifax representatives instruct CCA's customers how to break their agreements with CCA. Because CCA raises no material issues of disputed fact and does not oppose Equifax's motion for summary adjudication of CCA's claim for misrepresentation, the Court GRANTS Equifax's motion as it pertains to CCA's misrepresentation claim.

For the reasons set forth below, CCA's motion for leave to amend the scheduling order and to add a claim for violation of *Section 2* of the Sherman Act is DENIED.

II. THE PARTIES' FILINGS

Equifax filed the motion for summary judgment ("Mot.") that is presently before the Court on March 1, 2004. On March 8, 2004, CCA filed a request for denial of summary judgment, or continuance, to allow discovery to be taken in opposition to the motion. On March 17, 2004, the Court granted the request and continued Equifax's motion for summary judgment to May 3, 2004. On April 13, 2004, CCA filed a motion to modify the scheduling order and **[*7]** for leave to amend its complaint ("CCA's Motion"). That motion is also before the Court.

The Court held a hearing on May 3, 2004, and permitted CCA and Equifax to file supplemental briefs as to whether CCA possesses antitrust standing, and to point to whatever evidence may exist as to the actual prices or price levels at which credit reports were sold. Equifax and CCA filed supplemental briefs on May 10, 2004.

III. LEGAL STANDARD FOR SUMMARY JUDGMENT

Summary judgment is appropriate where "there is no genuine issue as to any material fact" and "the moving party is entitled to a judgment as a matter of law." *Fed. R. Civ. P. 56(c)*. The moving party has the initial burden of identifying relevant portions of the record that demonstrate the absence of a fact or facts necessary for one or more essential elements of each cause of action upon which the moving party seeks judgment. See *Celotex Corp. v. Catrett, 477 U.S. 317, 323, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*.

If the moving party has sustained its burden, the nonmoving party must then identify specific facts, drawn from materials on file, that demonstrate that there is a dispute as to material facts pertaining to the elements that the moving party has contested. See *Fed. R. Civ. P. 56(c)*. **[*8]** The nonmoving party must not simply rely on the pleadings and must do more than make "conclusory allegations [in] an affidavit." *Lujan v. National Wildlife Fed'n, 497 U.S. 871, 888, 110 S. Ct. 3177, 111 L. Ed. 2d 695 (1990)*. See also *Celotex Corp., 477 U.S. at 324*. Summary judgment must be granted for the moving party if the nonmoving party "fails to make a showing sufficient to establish the existence of an element essential to that party's case, and on which that party will bear the burden of proof at trial." *Id. at 322*. See also *Abromson v. American Pacific Corp., 114 F.3d 898, 902 (9th Cir. 1997)*.

In light of the facts presented by the nonmoving party, along with any undisputed facts, the Court must decide whether the moving party is entitled to judgment as a matter of law. See *T.W. Elec. Serv., Inc. v. Pacific Elec. Contractors Ass'n, 809 F.2d 626, 631 & n.3 (9th Cir. 1987)*.

When deciding a motion for summary judgment, "the inferences to be drawn from the underlying facts . . . must be viewed in the light most favorable to the party opposing the motion." *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 587, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)* (citation omitted); *Valley Nat'l Bank of Ariz. v. A.E. Rouse & Co., 121 F.3d 1332, 1335 (9th Cir. 1997)*. **[*9]** Summary judgment for the moving party is proper when a rational trier of fact would not be able to find for the nonmoving party on the claims at issue. See *Matsushita, 475 U.S. at 587*.

IV. LEGAL STANDARD FOR LEAVE TO AMEND THE COMPLAINT AND TO MODIFY THE PRETRIAL SCHEDULING ORDER PURSUANT TO *FED. R. CIV. P. 15(a)* AND *16(b)*

Fed. R. Civ. P. 15(a) provides that "leave [to amend] shall be freely given when justice so requires." *Fed. R. Civ. P. 15(a)* "is to be applied with extreme liberality." *Morongo Band of Mission Indians v. Rose, 893 F.2d 1074, 1079 (9th Cir. 1990)*, citing *DCD Programs, Ltd. v. Leighton, 833 F.2d 183, 186 (9th Cir. 1987)*. The factors "commonly used to determine the propriety of a motion for leave to amend" are "bad faith, undue delay, prejudice to the opposing party, and futility of amendment." *DCD Programs, Ltd., 833 F. 2d at 186*, citing *Loehr v. Ventura County Community College Dist., 743 F.2d 1310, 1313 (9th Cir. 1984)*. "These factors, however, are not of equal weight in that delay, by itself, is insufficient to justify denial of leave to amend." Id., citing *United States v. Webb, 655 F.2d 977, 979 (9th Cir. 1981)*.

Fed. R. Civ. P. 16(b) provides that a scheduling order **[*10]** "shall not be modified except by leave of court and upon a showing of good cause." In determining whether good cause exists, courts may consider the importance of the amendment, potential prejudice to the opposing party, and the explanation for the failure to timely move for leave to amend. See *Johnson v. Mammoth Recreations, Inc., 975 F.2d 604, 609 (9th Cir. 1992)*. "The pretrial schedule may be modified 'if it cannot reasonably be met despite the diligence of the party seeking the extension.'" *Zivkovic v. Southern California Edison Co., 302 F.3d 1080, 1087 (9th Cir. 2002)*, quoting *Mammoth Recreations, Inc., 975 F.2d at 609* ("If the party seeking the modification was not diligent, the inquiry should end and the motion to modify should not be granted.") (internal citations omitted).

V. FACTUAL BACKGROUND

A. Market Structure

Equifax, Experian Information Solutions, Inc. ("Experian") and TransUnion LLC ("TransUnion") are the primary repositories of credit information and providers of credit reports to retailers in the United States. M. Briggs Decl. P 4. Retailers are the typical end-users of such reports and related services. Automobile dealerships, unlike certain other categories of end-users **[*11]** of consumer credit reports, typically purchase a single credit report per customer before processing a loan application. M. Briggs Decl. PP 3, 4. Consequently, in the credit reporting industry, the automobile dealership market is referred to as a "single-file market." Id. Curtis Knievel, CCA's Director of Sales, estimates that ninety percent of single-file credit reports purchased by automobile dealers in Alabama, Georgia, North Carolina and South Carolina were Equifax credit reports (as opposed to Experian or Transunion reports), and eighty percent of single-file credit reports in Florida, Oregon, Tennessee and Washington were generated by Equifax. [3] Knievel Decl., Ex. A.

Equifax sells its credit information services and credit reports directly to end-users, as well as through distributors. Equifax sells reports to two types of resellers: brokers and credit reporting agencies ("CRAs"). Lovvorn Declaration P 3. Brokers resell Equifax credit files to end-users but do not undertake any consumer disclosure obligations, and are not required to verify information contained in a credit report. Id. CRAs undertake obligations pursuant to the

---

[3] Equifax objects to this evidence, contending that "CCA cannot simply manufacture evidence on something as quantitative as nationwide market-share based on the 'personal experience' of its sales director.'" Equifax's Evid. Objections at 1. Likewise, Equifax objects to Knievel's statement that "[in] 2000 & 2001, I estimate the percentage of single file credit reports sold to auto dealers by Equifax direct vs. by Equifax through resellers was 50%." Knievel Decl. P 12. Knievel cites as a basis for his estimates of market **[*12]** share the knowledge he gained from his personal experience as CCA's Director of Sales over a four-year period, and the fact that "a very important part of my job is to know which credit bureau(s) are used by automobile dealers, as well as the pricing for credit reports by our competitors." Knievel Decl. P 6. Equifax's objection is overruled on the ground that the Knievel declaration is proper lay opinion testimony. See *Fed. R. Evid. 701* and *702*, cf. *Kumho Tire Co., 526 U.S. at 149*. While Knievel's estimate of market share may not be as reliable as expert testimony, such considerations apply to the weight if any, to be accorded the evidence by the jury, rather than admissibility.

Fair Credit Reporting Act ("FCRA"), *15 U.S.C. § 1681, et seq.*, **[*13]** and may add information to credit report files not provided by credit bureaus like Equifax. Id.

CCA served as an Equifax broker from April 1, 2000, until its termination by Equifax on November 14, 2001. Equifax simultaneously terminated two other resellers: National Credit Center ("NCC") and Consortium Group ("Consortium.)

CCA contends that ADP, an Equifax reseller, complained to Equifax about the discounting price-discounting practices of CCA, NCC and Consortium. CCA further argues that it was contacted by an Equifax sales representative who stated words to the effect of:

> "What are you doing in these markets? You cannot go into these markets and sell to end-users at a reduced price. Your sales in these markets is disrupting the pricing that is in place between Equifax and the national resellers in those areas, and you simply can't do it." [4]

See J. Briggs Decl., Ex. E (J. Briggs Deposition) RT 76:14-77:7. CCA further contends that ADP and another Equifax reseller, CREDCO, continue to purchase and resell Equifax reports at agreed upon price levels. See, e.g., M. Briggs Decl. P 9. CCA claims that Equifax conspired with ADP and CREDCO to fix the prices at which credit reports are sold to **[*14]** end-users, and that CCA, NCC and Consortium Group were terminated because they were selling credit reports at discounted prices.

According to CCA, the relevant geographic market at issue in this action includes nine states: Florida, Georgia, South Carolina, Alabama, North Carolina, Tennessee, Virginia, Oregon and Washington. J. Briggs Decl., Ex. B (G. Sackett Deposition) RT 10:13-14:12. CCA contends that the majority of lenders to automobile dealership end-users only accept Equifax reports -- as opposed to TransUnion or Experian reports -- because the dealerships' lenders require Equifax reports and that efforts by CCA to sell non-Equifax reports to these end-users were unsuccessful. M. Briggs Decl. PP 3-6, 10, J. Briggs Decl., Ex. B (Grayson Sackett Deposition) RT 10:13-14:12. [5]

CCA sets forth evidence that, of the resellers competing in the relevant market, ADP and CREDCO charged prices similar to those charged by Equifax. Opp. at 3, citing Knievel Decl. PP 2-7. In particular, CCA asserts that Equifax charged end-users in the market at issue $ 2.75 per report and above, ADP's pricing was $ 3.20 to $ 3.25 per report, and CREDCO's pricing was $ 2.90 per report and above. See CCA's Supp. Brief at 10, citing M. Briggs Decl. PP 14, 19, 21; Knievel Decl.; and J. Briggs Decl. P 30, Ex. U.

---

[4] Equifax objects to Jeffrey Briggs' testimony regarding what Equifax sales representative Kathy Weismann said to him as inadmissible hearsay. The Court overrules Equifax's objection on the ground that Weismann's statements are admissions of a party.

[5] Equifax objects to this evidence as inadmissible speculation on the ground that "none of these witnesses have ever seen any lender policies requiring Equifax reports **[*15]** and have never even spoken to lenders about these alleged requirements ... but base this statement on the fact that certain unnamed car dealers" told the witnesses that lenders required Equifax reports. Equifax's Evid. Objections at 2. Matthew Briggs states that the basis for his conclusion that lenders require Equifax reports is his "interaction and dealing with well over a thousand automobile dealers over the last four years, including review of invoices, review of systems which deliver credit reports, and conversations with general managers, sales managers, and finance managers." M. Briggs Decl. P 10.

The Court concludes that this evidence is admissible. Matthew Briggs provides adequate foundation for his testimony based on his experience and his conversations with multiple customers that lenders to his customers require Equifax reports. The Court concludes that this testimony is "rationally based on [Matthew Briggs'] perception[s]," "helpful to a ... determination of a fact in issue," and "not based on scientific technical, or other specialized knowledge within the scope of *Rule 702*." See *Fed. R. Evid. 701*. The testimony at issue is not dependent on "specialized observations, the specialized **[*16]** translation of those observations into theory ... or the application of such a theory in a particular case." Consequently, the testimony does not fall within the scope of *Fed. R. Evid. 702*. Cf. *Kumho Tire Co., Ltd. v. Carmichael, 526 U.S. 137, 149, 119 S. Ct. 1167, 143 L. Ed. 2d 238 (1999)*. Accordingly, Equifax's objections are overruled.

According to CCA, the prices charged by NCC, Consortium and CCA prior to their termination as Equifax resellers were significantly lower that those of Equifax, ADP and CREDCO. Consortium sold credit reports to end-users for $ 1.75 per report, while CCA and NCC priced credit reports at $ 1.90 to $ 2.50 per report. See **[*17]** CCA's Supp. Brief at 10, citing Knievel Decl., M. Briggs Decl. P 19.

Knievel states that, "the only competitors in the sale of Equifax reports and related products to automobile dealers in [the market at issue] were: Equifax (direct), ADP, CREDCO, NCC, Consortium and CCA" and that "[o]nly on a very rare occasion would I encounter an automobile dealer in these markets that was purchasing Equifax products from someone other than one of these 6 competitors." [6] Knievel Decl. P 14.

B. CCA's Entry Into the Market

CCA began negotiating to become a reseller of Equifax credit reports in early 2000. On February 1, 2000, Jeffrey Briggs sent a letter on behalf of CCA to **[*18]** a sales representative at Equifax, regarding pricing terms proposed by Equifax. Weismann Decl., Ex. C. The letter states in relevant part:

> The pricing which you have proposed is **significantly** [emphasis in original] higher (nearly double) the pricing [sic] offered to the CRA with which they are presently affiliated … [CCA is] optimistic that Equifax will agree to a volume pricing structure which will enable CAA [sic] to move forward with its enterprise and have a reasonable opportunity to make it profitable. Accordingly, we propose the following pricing schedule:
> 1 to 1000 reports: $ 2.95
> 1001 to 5000 reports: $ 2.50
> 5001 to 10,000 reports: $ 1.85
> 10,001 to 25,000 reports: $ 1.55
> 25,001 to 50,000 reports: $ 1.40
> $ 50,001 plus reports: $ 1.35
> Beacon [7]: $ .25
> Safescan: $ .10

In addition, the letter stated,

> Your pricing proposal indicates that the prices may 'change at Equifax's discretion.' Obviously it would be foolhardy for my clients to invest … significant capital, resources, time and energy … only to have the prices increase … Accordingly, we request confirmation that the pricing will remain in place for 2 years.

Weismann Decl., Ex. C.

On March 22, 2000, Kathy Weismann of Equifax sent an e-mail to CCA stating in full:

> I received your letter. The rates on Beacon and Safescan for the different levels were a little off.
> 20,000-100,000 report [sic] cost $ 1.90, Beacon .50, Safescan .15
> 100,000-250,000 report cost $ 1.80, Beacon .40, Safescan .10
> 250,000-500,000 report cost $ 1.70, Beacon .25, Safescan .08
> I will clarify your question on the cites in owned vs. affiliate sales points and about the cities that aren't included at all.

Weismann Decl., Ex D.

---

[6] Equifax objects to the admissibility of this evidence, arguing that no foundation has been laid to show that this testimony, and similar declaration testimony from Matthew Briggs, are based on personal knowledge. Evid. Objection at 3. The Court concludes that the declarations of Jeffrey Briggs and Matthew Brings are admissible for the purpose of establishing that the declarants only encountered the aforementioned resellers in the market. See *Fed. R. Evid. 602* and *Fed. R. Evid. 703*. Accordingly, Equifax's objections are overruled.

[7] The term "Beacon" refers to Equifax's credit-scoring service, **[*19]** while the term "Safescan" refers to an Equifax anti-fraud service designed to confirm a credit applicant's identity. See, e.g., Compl. P 31.

On April 1, 2000, CCA entered into an agreement (the "Agreement") with Equifax entitled "Agreement for Resale of Credit Reporting Files: Brokers." Weismann Decl., Ex. E. The Agreement contains a "Term and Termination" provision, stating in relevant part:

> This Agreement remains in force and effect until either party gives written notice of cancellation at least ten days prior to the cancellation date. However, if Broker is delinquent in the payment of charges or violates the terms of this Agreement, Equifax may, at its election, discontinue **[*20]** providing services to Broker and cancel this Agreement immediately by written notice to Broker. If this Agreement is terminated for any reason, the provisions of the foregoing paragraphs will remain in full force and effect as to all Equifax Credit Information which Broker has requested or received from Equifax prior to the cancellation date.

Weismann Decl., Ex. E. The Agreement also provides that:

> Broker will pay Equifax promptly for all Equifax Credit Information requested by Broker on behalf of Qualified Subscribers, or otherwise, according to the rate schedule of cash prices now or subsequently established by Equifax, and will pay any applicable taxes, and charges for any special telephone services or other services rendered by Equifax.

Id. Finally, the Agreement also contains an integration clause captioned "Entire Agreement," providing in full:

> This Agreement constitutes the entire Agreement between the parties and supersedes and cancels any and all prior agreement between the parties relating to its subject matter. No changes in this Agreement may be made except in writing signed by both parties.

Id.

CCA contends that the Agreement entered into on April 1, 2000, incorporated the separate **[*21]** schedule of prices confirmed by the March 22, 2000 e-mail from Kathy Weismann. Opp. at 18. In particular, CCA argues that the clause of the agreement stating, "Broker will pay… according to the rate schedule of cash prices now or subsequently established by Equifax" references the prices quoted by Kathy Weismann on March 22, 2000. CCA also argues in the alternative that pursuant to Georgia law, the implied covenant of good faith modifies and becomes part of the provisions of a contract, and therefore if a genuine issue of fact exists at to whether CCA's termination violated the Cartwright Act, a question of fact necessarily exists as to whether Equifax breached the implied covenant of good faith and fair dealing. See Opp. at 16. Equifax argues that the integration clause of the Agreement precludes CCA's interpretation of the contract, and that the March 22, 2000 e-mail was "nothing more than a quote of then-current Equifax prices from the date quoted." [8] Mot. at 17.

C. Equifax's Termination of CCA As a Reseller

According to CCA, Equifax began pressuring CCA to raise its prices once Equifax discovered that CCA was selling credit reports at prices below those charged by Equifax to end-users. Opp. at 3, citing J. Briggs Decl., Ex. E (Deposition of J. Briggs) RT 76:14-77:7, J. Briggs Decl., Ex. G (Deposition of M. Briggs) RT 118:17-119:4. CCA asserts that resellers Consortium and NCC also were subject to similar pressure to stop selling credit reports at prices lower than those charged by Equifax in the market area at issue. Opp. at 4, citing J. Briggs Decl. Exs. A, D and L (Depositions of R. Esquinas, J. Kaltenbach, J. Sackett).

CCA presents evidence indicating that ADP contacted Equifax and complained about Consortium's competitive sales practices in the market at issue. In particular, John Kaltenbach, an Equifax **[*23]** executive, told Robert Esquinas, a principal at Consortium, that ADP had contacted Equifax to discuss the activities of the discount resellers. See RSUF A-l, citing J. Briggs Decl., Ex. A (Esquinas Deposition) RT 47:6-12. Kaltenbach stated that

---

[8] Equifax also argues that even if the separate schedule of prices contained in the March 22, 2000 e-mail was made part of the agreement, Equifax was free to change those prices pursuant to the language in the April 1, 2000 **[*22]** agreement that "Broker will pay Equifax promptly … according to the rate schedule of cash prices now or subsequently established by Equifax." Plaintiff responds that the March 22, 2000 e-mail gives rise to a genuine issue of material fact as to whether the pricing schedule established by the earlier e-mail was to remain in place for two years.

ADP had complained to Equifax that Consortium "shouldn't be marketing to their dealers [automobile dealership end-users]." Id.

In October 2001, Equifax announced that it was eliminating volume discounts extended to CCA, NCC and Consortium, and would require these three resellers to pay $ 2.75 per report. See Loworn Decl. P 9, J. Briggs Decl., Ex. M (Deposition of C. Frankle) RT 23:6-25:4. NCC executives were told by Equifax that two other resellers, ADP and CREDCO, would not be subjected to this price increase, because they were not selling below the prices being charged by Equifax. Briggs Decl. Ex. D (Deposition of J. Sackett) RT 20:3-6. [9]

On October 29, 2001, CCA sent a letter to Equifax objecting to the price increases, stating that Equifax's actions violated its promises to CCA and violated the Sherman Act, and asserting that "[b]ased on the announced price increase, CCA's only option is litigation which, if necessary, will be pursued vigorously." Lovvorn Decl., **[*25]** Ex. B (Letter from Jeffrey Briggs, dated October 29, 2001).

On November 14, 2001, Equifax sent a letter to CCA stating in relevant part, "Equifax hereby provides you with notice of its cancellation of the Agreement pursuant to Section 20 thereof." Declaration of Lee D. Lovvorn, Ex. C. At the same time that Equifax terminated CCA, two other resellers, NCC and Consortium, were also terminated. J. Briggs Decl., Ex. I (Deposition of L. Lovvorn) RT 80:17-22. Equifax resellers ADP and CREDCO were not terminated, and continue to distribute Equifax credit reports to end-users.

During the period before and after CCA was terminated, the price that CREDCO charged consumers for Equifax reports remained approximately at $ 2.90 per report. See Knievel Decl. P 11, see also Equifax's Supp. Brief at 7 ("In fact, CREDCO testified that its price to automobile dealers has not changed since 1999 …"). Likewise, ADP sold Equifax credit reports to customers at prices higher than those charged by CCA. See, e.g., M. Briggs Decl. PP 2, 16, see also Equifax's Evid. Objections at 5 ("It is true that ADP charged … for example … $ 3.20 in Florida, Georgia and a few other Southeast states …") Equifax also sold credit **[*26]** reports directly to end-users at prices higher than CCA, before and after CCA was terminated. See Knievel Decl. P 13 (stating that CCA's price per report is "typically 10[%] to 30% less than the price charged by Equifax [directly to end-users] …"), see also M. Briggs Decl. P 21 (stating that Equifax provided price quotes ranging from $ 2.95 to $ 3.10 per report in the market at issue after CCA's termination). [10]

VI. DISCUSSION

A. Equifax's Motion for Summary Judgment

---

[9] Equifax contends that its decision to terminate its relationship with CCA was not the result of a price-fixing conspiracy, but rather a decision to overhaul its distribution strategy. According to Equifax, in mid-2001, it undertook a review of its pricing strategies regarding its various distribution channels. **[*24]** Equifax contends that during the fiscal year beginning April 1, 2000, CCA sold 209,322 credit reports, while resellers such as ADP and CREDCO sold over a million Equifax credit reports. Weismann Decl. P 8, Lovvorn Decl. P 13. Equifax asserts that CCA and other brokers were using volume discounts from Equifax to induce customers who were purchasing Equifax reports directly from Equifax to buy through brokers instead. Lovvorn Decl. P 7. Therefore, Equifax unilaterally implemented a pricing strategy in which it charged brokers a flat fee of $ 2.75 per report, with exceptions for "a limited number of large-volume brokers that offered added value to Equifax, such as expanding Equifax's market base." Lovvorn Decl. P 9. According to Equifax, "CCA was one of at least sixty brokers who received notice of the discontinuation of volume discounts." Lovvorn Decl. P 10.

[10] Equifax objects to this evidence as speculative, lacking foundation, and as violative of the best evidence rule. Matthew Briggs states that "after Equifax terminated CCA, in order to document the information I knew to be true from personal experience, I directed my staff to obtain simultaneous price quotes for a single-file credit report directly from Equifax for end users in the price inflated market …" Equifax price quotes are attached to the Declaration of Matthew Briggs as Exhibits F-J. The objections to the Briggs Declaration on the grounds of speculation and lack of foundation are overruled. Because the written price quotes are themselves admissible evidence, Equifax's objection that Briggs' summary of the price quote is inadmissible pursuant to the *Fed. R. Evid. 1002* **[*27]** (the "best evidence rule") is also overruled.

(i) CCA's Cartwright Act Claim

(a) Antitrust Injury and Antitrust Standing

Equifax argues that CCA has presented no evidence of antitrust injury and does not have standing to bring a claim pursuant to the Cartwright Act.

In *Brunswick Corp. v. Pueblo Bowl-O-Mat, 429 U.S. 477, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*, the Supreme Court held that in order to recover antitrust treble damages a plaintiff "must prove more than injury causally linked to an illegal presence in the market" -- instead, a plaintiff "must prove antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' unlawful." *Brunswick, 429 U.S. at 489*. [11] The Court further explained that "[t]he injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation" and that "[i]t should, in short, be the type of loss that the claimed violations would be likely to cause." Id. (internal citations omitted).

The plaintiffs in Brunswick alleged that through the acquisition of bowling alleys which would otherwise "have gone out business," plaintiffs were denied "an anticipated increase in market shares." *Brunswick., 429 U.S. at 484*. The Supreme Court concluded that plaintiffs had not suffered an antitrust injury, reasoning that:

> If the acquisitions [at issue] … were unlawful, it is because they brought a "deep pocket" parent into a market of "pygmies." Yet [the plaintiffs] injury -- the loss of income that would have accrued had the acquired centers gone bankrupt -bears no relationship to the size of either the acquiring company or its competitors. [Plaintiffs] would have suffered the identical "loss" -- but no compensable injury -- had the acquired centers instead obtained refinancing or been purchased by "shallow pocket" **[*29]** parents.

Brunswick, 429 U.S. at 487.

The doctrine of antitrust injury reflects the "general principle that treble-damages recoveries should be linked to the procompetition policy of the antitrust laws." *Blue Shield of Virginia v. McCready, 457 U.S. 465, 482, 102 S. Ct. 2540, 73 L. Ed. 2d 149 (1982)*. Therefore, even if a plaintiff's injury is "causally related to an antitrust violation," unless that injury is "attributable to an anti-competitive aspect of the practice under scrutiny," a plaintiff may not recovery antitrust damages. *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 334, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)*. However, "[c]ompetitors may be able to prove antitrust injury before they are driven from the market and competition is thereby lessened." [12] *McCready, 457 U.S. at 482*.

---

[11] In its motion papers, Equifax relies on case law interpreting and applying the Sherman Act, as does plaintiff. These **[*28]** authorities maybe persuasive, but are not necessarily controlling in a Cartwright Act case. See, e.g., *Knevelbaard Dairies v. Kraft Foods, Inc., 232 F.3d 979, 985 (9th Cir. 2000)* ("[F]ederal antitrust precedents [interpreting the Sherman Act] are properly included in a Cartwright Act analysis, but their role is limited: they are 'often helpful' but not necessarily decisive.").

[12] In McCready, the Court concluded that subscribers to a group health insurance plan suffered antitrust injury pursuant to an anticompetitive scheme in which they were unlawfully "compelled to choose between visiting a psychologist and forfeiting reimbursement, or receiving reimbursement by foregoing treatment by the practitioner of their choice." *McCready, 457 U.S. at 483*. The Court explained that such injury would have been either: (1) "borne in the first instance **[*30]** by the competitors of the conspirators, and inevitably -- though indirectly -- by the customers of the competitors in the form of suppressed competition in the psychotherapy market;" or (2) "as it happened … borne directly by the customers of the competitors" in the form of increase in the cost of psychologists' services. *McCready, 457 U.S. at 483*. The Supreme Court further elaborated that while "McCready was not a competitor of the conspirators, the injury she suffered was inextricably intertwined with the injury the conspirators sought to inflict on psychologists and the psychotherapy market." *McCready, 457 U.S. at 484*.

In Atlantic Richfield, the Supreme Court rejected the "suggestion that no antitrust injury need be shown where a per se violation [of the antitrust laws] is involved." [13] *Atlantic Richfield, 495 U.S. at 341*. The Supreme Court emphasized that "proof of a per se violation and of antitrust injury are distinct matters that must be shown independently." *Id. at 344*.

"A showing of antitrust injury is necessary, but not always sufficient" in order for a plaintiff to recover antitrust damages, because "a party may have suffered antitrust injury but may not be a proper plaintiff." *Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104, 110, n.5, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)*. "[T]he Court must make a further determination [as to] whether the plaintiff is a proper party to bring a private antitrust action." *Associated General Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. 519, 535, n. 31, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*. "The label 'antitrust standing' **[*32]** has traditionally been applied to some elements of this inquiry." Id. "[T]he focus of the doctrine of 'antitrust standing' is somewhat different from that of standing as a constitutional doctrine." Id. "Antitrust standing involves a case-by-case analysis of the plaintiff's harm, the alleged wrongdoing by the defendants, and the relationship between them." *Amarel v. Connell, 102 F.3d 1494, 1507 (9th Cir. 1997)*, citing Associated General. Some of the factors relevant to the antitrust standing inquiry include: (1) the nature of the plaintiff's alleged injury; (2) the directness of the injury; (3) the speculative nature of the harm; (4) the risk of duplicative recovery; and (5) complexity in apportioning damages. See *Amarel, 102 F.3d at 1507*, citing *Associated General, 459 U.S. at 535*. See also *American Ad Mgmt., Inc. v. General Tel. Co., 190 F.3d 1051, 1054-55 (9th Cir. 1999)*.

A plaintiff must demonstrate both antitrust injury and antitrust standing in order to recover damages under the California Cartwright Act. See *Knevelbaard Dairies v. Kraft Foods, Inc., 232 F.3d 979, 987 (9th Cir. 2000)*, citing *Kolling v. Dow Jones & Co., 137 Cal. App. 3d 709, 723, 187 Cal. Rptr. 797 (1982)*. The Cartwright Act's **[*33]** antitrust injury requirement is less stringent than that imposed by federal ***antitrust law***. The Cartwright Act expressly provides that:

> Any person who is injured in his or her business or property by reason of anything forbidden or declared unlawful by this chapter, may sue therefore … to recover three times the damages sustained by him or her … This action may be brought by any person who is injured in his or her business or property by reason of anything forbidden or declared unlawful by this chapter, regardless of whether such injured person dealt directly or indirectly with the defendant.

Cal. Bus. & Prof. Code § 16750(a). "The last clause was added by the California legislature following the Supreme Court's decision in *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*, which limited the ability of indirect purchasers to recover damages under the Sherman and Clayton Acts." *Knevelbaard Dairies, 232 F.3d at 991*.

The California Court of Appeal has characterized California's legislative response to Illinois Brick as relaxing the antitrust injury requirement. See *Cellular Plus, Inc. v. Superior Court, 14 Cal. App. 4th 1224, 1234, 18 Cal. Rptr. 2d 308 (1993)* (stating that, "the more restrictive definition of **[*34]** 'antitrust injury' under federal law does not apply" under the Cartwright Act). See also *Knevelbaard Dairies, 232 F.3d at 991* ("The extent to which antitrust injury is recognized under the Cartwright Act is enlarged, by statute, in comparison to federal law.") The court in Cellular Plus held that because the plaintiffs' sales agents of defendant U.S. West "were directly involved in U.S. West's chain of distribution," "the alleged price fixing by [defendants] would directly and inherently reduce the amount of sales [by plaintiffs]" making the sales agents proper plaintiffs. *Cellular Plus, 14 Cal. App. 4th at 1235*.

---

[13] In the context of a vertical, maximum resale price restraint, the Court reasoned that, while dealers and manufacturers may suffer antitrust injury, "[a] competitor is not injured by the *anticompetitive* effects **[*31]** of vertical maximum price-fixing, and does not have any incentive to vindicate the legitimate interests of a rival's dealer" because "the competitor would *benefit* from such a situation." *Atlantic Richfield., 495 U.S. at 345*. (emphasis in original). "Instead, a competitor will be motivated to bring suit only when the vertical restraint promotes interbrand competition between the competitor and the dealer subject to the restraint" such that "a competitor will be injured and hence motivated to sue only when a vertical, maximum-price-fixing arrangement has a *procompetitive* impact on the market." Id. (emphasis in original).

Equifax argues that CCA did not suffer an antitrust injury because as a seller of Equifax credit reports, CCA, like the plaintiffs in Atlantic Richfield, would stand to benefit from any price-fixing conspiracy. Mot. at 13. According to Equifax, CCA would effectively be able to charge higher prices to its customers under the umbrella of defendant's alleged price-fixing scheme. Id. CCA responds that Equifax's argument is a non sequitur because plaintiff is not complaining about the effect of the alleged price-fixing conspiracy on its ability to charge higher prices, but rather **[*35]** that it was terminated as a means of enforcing a price-fixing agreement. See Opp. at 10. The Court concludes that because CCA's injury is "attributable to an anti-competitive aspect of the practice under scrutiny," -- namely the alleged price-fixing agreement -- the injury in question may properly be characterized as antitrust injury. *Atlantic Richfield, 495 U.S. at 334*.

Secondly, Equifax argues that in order to demonstrate antitrust standing, CCA must show that its termination caused harm to competition, and that its termination was the result of a price-fixing agreement. Equifax's Mot. at 14, Supp. Brief at 2, citing Phillip E. Areeda and Herbert Hovenkamp, ***Antitrust Law*** P 459a (2003) (hereinafter "Areeda"). CCA responds that the Ninth Circuit has held that "[c]ompetitors … may have standing to challenge practices used to enforce a price-fixing conspiracy." CCA's Supp. Brief at 1, quoting *Big Bear Lodging Ass'n v. Snow Summit, Inc., 182 F.3d 1096, 1102 (9th Cir. 1999)*. [14] CCA argues that it was terminated because it was undercutting prices charged by ADP, CREDCO and Equifax, thereby undermining the effectiveness of the alleged price-fixing agreement. CCA's Supp. Brief at 8. CCA argues **[*36]** that there is a triable issue of fact as to whether CCA's termination as a broker was accomplished as a means of enforcing the alleged price-fixing agreement. See Opp. at 10-11, citing J. Briggs Decl., Ex. D (Sackett Deposition) 4:10-13, 25:6-26:2.

The Ninth Circuit has concluded that a plaintiff who is penalized for failing to join a price-fixing conspiracy possesses antitrust standing. In Big Bear, the plaintiff alleged that members of a resort association "engaged in a price-fixing conspiracy, agreeing on uniform rates and charges for lodge accommodations, ski packages and resort services." *Big Bear, 182 F.3d at 1100-1101*, cited by Areeda P 348 at 401, n. 70. The plaintiff alleged that the defendant Resort Association terminated plaintiff's membership in the Association when it refused to join the alleged conspiracy. See also Areeda P 1623 at 241-242 ("A manufacturer's **[*37]** price-fixing agreements are linked to the plaintiff's termination by the economic fact that high resale prices cannot be maintained if significant intrabrand competition exists at lower prices. One might, therefore, suppose that an implied term of minimum resale price maintenance agreements is that nonconformists will be terminated …").

Likewise, application of the multi-factor approach employed in Associated General and American Ad Management yields the same result. Plaintiff's injury was of "of the type the antitrust laws were intended to prevent," because plaintiff alleges that it was terminated in order to maintain the effectiveness of a price-fixing conspiracy. See *American Ad Management, 190 F.3d at 1055*, citing *Associated General, 459 U.S. at 538*, and *Atlantic Richfield, 495 U.S. at 334*. CCA's alleged injury, is therefore "the direct result of … allegedly anticompetitive conduct." *American Ad Management, 190 F.3d at 1058*, citing *Associated General, 459 U.S. at 540*. Because the harm alleged by CCA arises from CCA's termination as a reseller, such harm is not speculative. Cf. *American Ad Management, 190 F.3d at 1059* ("In Associated General, the Supreme Court found the damages claim **[*38]** in question to be speculative because (1) the alleged injury was indirect; and (2) the alleged effects may have been produced by independent factors.") (internal citations omitted). In addition, there is little risk of duplicative recovery in that such concerns typically arise in "suits by indirect purchasers to recover damages … which were the result of an antitrust violation higher up the distribution chain," whereas in this action, CCA is a reseller, seeking damages as a result of its termination. See *American Ad Management, 190 F.3d at 1059*. Finally, the Court concludes that there would be little complexity in apportioning damages, in that CCA is the sole plaintiff in this action. Therefore, all of the *Associated General* factors support the conclusion that CCA can demonstrate antitrust standing.

---

[14] CCA argues that it is settled law that a competitor driven out of the market by anticompetitive acts of another competitor has antitrust standing. CCA's Supp. Brief at 1, citing *Amarel v. Gover Connell, 102 F.3d 1494, 1508 (9th Cir. 1996)*, and *Glenn Holly Entertainment Inc. v. Tektronix Inc., 352 F.3d 367, 372 (9th Cir. 2002)*

Therefore, the Court concludes that by virtue of the evidence put forth by CCA regarding the price-fixing conspiracy and its enforcement mechanisms, CCA has a raised a genuine issue of material fact as to whether it has suffered antitrust injury and has antitrust standing to sue under the Cartwright Act.

(b) Sufficiency of Evidence to Raise a Question of Fact as to the Existence of an Agreement **[*39]** to Fix Prices

Equifax contends that "it is settled law that an antitrust plaintiff advancing an inference of conspiracy bears the burden of adducing evidence that tends to eliminate the possibility of unilateral conduct." Reply at 2-3, citing *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)*. Equifax asserts that a plaintiff alleging an illegal vertical price-fixing agreement must have evidence sufficient to prove an agreement to fix specific prices or price levels. Reply at 10, citing *Business Electronics Corp v. Sharp Electronics Corp., 485 U.S. 717, 108 S. Ct. 1515, 99 L. Ed. 2d 808 (1988)*.

Plaintiffs respond that "summary procedures should be used sparingly in complex antitrust litigation where motive and intent play leading roles, the proof is largely in the hands of the alleged conspirators and hostile witnesses thicken the plot," Opp. at 5, citing *Poller v. Columbia Broadcasting System, 368 U.S. 464, 473, 82 S. Ct. 486, 7 L. Ed. 2d 458 (1962)*.

The Cartwright Act, codified at *Cal. Bus. & Prof. Code § 16700 et seq.*, requires a plaintiff to prove the existence of a "trust," defined in part as "a combination of capital, skill or act by two or more persons" for the prohibited purposes enumerated by *Cal. Bus. & Prof. Code § 16720*, which include **[*40]** fixing the price of a product. "Under both California and federal law, agreements fixing or tampering with prices are illegal per se." *Knevelbaard Dairies, 232 F.3d at 986*

The California Supreme Court has noted that a plaintiff bringing a Cartwright Act claim "must often rely on inference rather than evidence since, usually, unlawful conspiracy is conceived in secrecy and lives its life in the shadows." *Aguilar v. Atlantic Richfield Co., 25 Cal. 4th 826, 868, 107 Cal. Rptr. 2d 841, 24 P.3d 493*, citing *Quelimane Co. v. Stewart Title Guaranty Co., 19 Cal. 4th 26, 48, 77 Cal. Rptr. 2d 709, 960 P.2d 513 (1998)*. However, an inference implying unlawful conspiracy must be reasonable, and "the inference is reasonable if, and only if, it implies unlawful conspiracy more likely than permissible competition." Id.

While denying it conspired with any other firm as to the prices to be charged to end-users, Equifax strenuously argues that plaintiffs' claim is properly analyzed as involving an alleged vertical price-fixing arrangement as opposed to a horizontal agreement among actual or potential competitors. [15] Equifax's practice of selling credit reports directly to end-users, and simultaneously distributing its reports through resellers to end-users, is characterized **[*41]** as "dual distribution." There is some uncertainty under the law as to how dual distribution agreements should be treated. See, e.g., *Dimidowich v. Bell, 803 F.2d 1473, 1482 (9th Cir. 1985)*. In Dimidowich, the court determined that in the context of a nonprice restraint, the relationship between a dual distributor and its customer-competitor should be characterized as vertical, and subject to rule of reason analysis. *Dimidowich, 803 F.2d at 1482* (criticizing *Guild Wineries v. J. Sosnick & Son, 102 Cal. App. 3d 627, 162 Cal. Rptr. 87 (1980)*, in which the California Court of Appeal applied the rule of per se illegality to a dual distributorship arrangement). [16]

---

[15] In particular, Equifax argues that its decision to eliminate volume pricing to brokers in October 2001 was "the result of a careful analysis of the costs and benefits of its reseller distribution channels and an attempt to impose greater consistency in those channels. Reply at 12. In particular, Equifax asserts that its decision to eliminate volume pricing was driven by the "perception that certain brokers, such as CCA and NCC, instead of expanding Equifax's customer base in markets or areas underserved by Equifax, were instead simply using their **[*42]** volume discounts to take customers that had already been cultivated by Equifax's direct sales efforts." Id. Equifax therefore argues that its actions were intended to make Equifax a more effective competitor against TransUnion and Experian.

[16] In Dimidowich, the Ninth Circuit determined that in the context of a dual distribution relationship, nonprice restraints were to be treated as vertical restraints, subject to rule of reason analysis. However, in so ruling, the court cautioned that: "[o]nly when there is a possibility that the restraint in the market in which there is a horizontal relationship will [have] significant procompetitive

However, because CCA seeks to prove the existence of a price-fixing conspiracy, the issue of whether the relationship between CCA and Equifax should be characterized as primarily vertical or primarily horizontal does not affect whether per se analysis applies. If the relationship between CCA and Equifax is characterized as horizontal, it is clear that per se analysis would apply. See *Knevelbaard Dairies, 232 F. 3d at 986* ("Foremost in the category of per se violations is horizontal price-fixing among **[*44]** competitors …"), citing *NYNEX Corp. v. Discon, Inc., 525 U.S. 128, 119 S. Ct. 493, 142 L. Ed. 2d 510 (1998)*. Likewise, if the Court were to characterize the relationship between CCA and Equifax as primarily vertical, per se analysis would also be applicable because CCA is claiming that Equifax entered into a minimum resale price-fixing conspiracy. See *Chavez v. Whirlpool Corp., 93 Cal. App. 4th 363, 369, 113 Cal. Rptr. 2d 175 (2001)* ("An agreement between a manufacturer or supplier and distributors and retailers to maintain minimum resale prices is per se unlawful under both the Cartwright Act and the Sherman Act"), citing *Business Electronics Corp., 485 U.S. at 726*. Therefore, per se analysis applies whether or not a price-fixing agreement between Equifax and its resellers were to be characterized as vertical or horizontal. [17]

In sum, if CCA can marshall sufficient evidence giving rise to a reasonable inference of a price-fixing conspiracy, Equifax's motion for summary judgment must be denied as to the Cartwright Act claim.

(c) Impact of a Rational Economic **[*45]** Motive to Conspire on the Legal Standard for Summary Judgment

Equifax argues that a plaintiff opposing summary judgment faces a greater burden when an alleged conspiracy simply makes no economic sense or when a defendant is able to offer a plausible and justifiable explanation for its conduct that is consistent with proper business practices. Reply at 11 and 13, citing Matsushita and *O.S.C. Corp. v. Apple Computer, 792 F.2d 1464, 1467 (9th Cir. 1986)*.

In Matsushita, the Supreme Court observed that:

> [T]he absence of any plausible motive to engage in the conduct charged is highly relevant to whether a 'genuine issue for trial' exists within the meaning of *Rule 56(e)*. Lack of motive bears on the range of permissible conclusions that might be drawn from ambiguous evidence.

Matsushita, 475 U.S. at 596-597. [18] Defendants contend that the alleged conspiracy makes no economic sense. They further contend that because there is only ambiguous evidence of a conspiracy to fix prices, that it would be unreasonable as a matter of law for a trier of fact to infer the existence of a conspiracy in light of its economic irrationality. However, *Matsushita* is a *Section 2* predatory pricing case that on its facts, **[*46]** sheds little light here. As explained below, if there is sufficient evidence of an agreement to fix prices, then it does not matter whether or not the conspiracy makes economic sense or what motivated the parties to enter into the price-fixing agreement.

(d) Existence of a Rational Economic Motive to Conspire

---

effects in the other market, as is the case when the markets are for the service and distribution of the same product, is rule of reason analysis appropriate." *Dimidowich, 803 F.2d at 1481*. Nonetheless, the Ninth Circuit's reasoning in Dimidowich and *Krehl v. Baskin-Robbins Ice Cream Co., 664 F. 2d 1348 (9th Cir. 1982)*, suggests that a restraint which would otherwise be viewed as vertical is not transformed into a horizontal restraint by virtue of the existence of a dual distribution arrangement. See Areeda P 1605(c) at 74 ("[I]f preventing free riding, **[*43]** assuring specialization or efficiency of scale, or precluding use of untrained subdealers justifies a conventional vertical restraint, it does so under dual distribution as well. In general, a manufacturer's presence at the dealer level merely changes the identity of one of the dealerships without altering, price, output, or other significant economic variables.") See also *Illinois Corporate Travel, Inc. v. American Airlines, Inc., 889 F.2d 751, 753 (7th Cir. 1989)* ("Dual distribution therefore does not subject to the per se ban a practice that would be lawful if the manufacturer were not selling direct to customers; antitrust laws encourage rather than forbid this extra competition").

[17] See also Areeda P 1605d at 77 ("Of course, resale price maintenance is unlawful per se, but the existence vel non of dual distribution rarely has any bearing on that determination.").

[18] See also Areeda P 308 at 98, cautioning that Matsushita "should not be read, however, to suggest that given evidence must be treated precisely the same way in all cases. On the contrary as the Court stated, the 'range of permissible conclusions' that a fact finder might draw becomes larger as the alleged conspiracy becomes more economically plausible."

Equifax contends that the alleged conspiracy is irrational in that "[i]t makes no economic sense that Equifax would require resellers to set prices for Equifax reports at artificially high levels, so as to make its rivals' prices more attractive." Mot. at 12.

CCA responds that the alleged price fixing conspiracy is rational. Opp. at 9-10. CCA rebuts Equifax's arguments that higher prices would make rivals' prices more attractive by pointing to evidence that "lending institutions -- for historical reasons -- require Equifax reports **[*47]** in the single-file markets at issue." Opp. at 10, citing M. Briggs Decl., C. Knievel Decl., J. Briggs Decl., Ex. A (Esquinas Deposition) RT 23:5-26:2, 28:22-29:16.

The Court concludes that CCA has presented evidence indicating that efforts by CCA and NCC to sell non-Equifax reports to end-users were unsuccessful, and that end-users told NCC representatives that many lenders only accepted Equifax reports. See M. Briggs Decl. PP 3-6, J. Briggs Decl., Ex. B (Grayson Sackett Deposition) RT 10:13-14:12. Assuming that lenders do require or favor Equifax reports, rather than TransUnion or Experian reports, a horizontal conspiracy to set prices at artificially high levels could make economic sense. Accordingly, Equifax has not shown there is an absence of evidence of motive to illegally conspire to fix prices, and thus the alleged absence of such motive does not restrict the "range of permissible conclusions that might be drawn from ambiguous evidence." *Matsushita, 475 U.S. at 596-597*.

(e) Evidence Supporting the Existence of a Price-Fixing Conspiracy

CCA alleges that "the brokers and affiliated companies that currently sell Equifax products in the specified markets have agreed with Equifax to **[*48]** fix prices in the specified markets," and that "[a]s a result, the end-user customer in the specified markets pays fixed, inflated prices and is not provided some or all of the products, services, solutions and support offered by Plaintiff." Compl. P 52. In particular, CCA asserts that "Equifax terminated all brokers who competed with Equifax in the specified markets, except those brokers who agreed with Equifax to fix report prices." Compl. P 26. In addition, CCA contends that "the brokers who agreed to fix prices with Equifax, and thus were not terminated, are the brokers which continue to sell Equifax products in the specified markets, including ADP and First American CREDCO." Id.

CCA contends that the following evidence supports a reasonable inference that Equifax agreed to fix prices with ADP and CREDCO and that the agreement was in effect at the time that CCA was terminated, and that CCA was terminated in furtherance of that agreement:

> (1) John Kaltenbach, an Equifax executive, told Robert Esquinas, a principal in Consortium, that ADP had contacted Equifax to discuss the activities of the discount resellers. RSUF A-l, citing J. Briggs Decl., Ex. A (Esquinas Deposition) RT 47:6-12. **[*49]** Kaltenbach stated that ADP had complained to Equifax that Consortium "shouldn't be marketing to our dealers [automobile dealership end-users]." [19]

---

[19] Equifax contends that CCA's evidence "is almost entirely inadmissible" and objects to much of the declarations and deposition testimony relied upon by CCA. See Equifax's Evid. Objs. at 1. In particular, Equifax argues that deposition testimony from third-party resellers, such as Consortium, describing statements by Equifax representatives about discussions between Equifax and ADP is inadmissible hearsay. Equifax's Evid. Objs. at 4. Equifax further argues that for this hearsay to be admissible pursuant to *Fed. R. Evid. 801(d)(2)(E)*, CCA has to prove by a preponderance of the evidence that a conspiracy exists. Equifax's Evid. Objs. at 3, citing *United States v. Bowman, 215 F.3d 951, 960-961 (9th Cir. 2000)*.

Fed. R. Evid. 801(d)(2)(E) provides that a statement is nonhearsay if it is made "by a coconspirator of a party during the course of and in furtherance of the conspiracy." The existence of a conspiracy and the participation of the declarant in the conspiracy are preliminary questions of fact that must be resolved by the judge alone. *Bourjaily v. United States, 483 U.S. 171, 175-176, 107 S. Ct. 2775, 97 L. Ed. 2d 144 (1987)*. "The court is not bound by the rules of evidence in assessing **[*52]** a proffered coconspirator statement," but the court may not consider evidence which would be barred on the grounds of privilege. 5 Jack Weinstein & Margaret Berger, Weinstein's Federal Evidence § 801.34[6][a] (Joseph McLaughlin, editor, Matthew Bender 2d ed. 2004). In addition, "[t]he Ninth Circuit has stated that evidence of the co-conspirator's statements may be [conditionally] admitted, subject to subsequent 'connecting up' through evidence establishing that there was a conspiracy, and the order of

(2) An Equifax executive asked NCC to sell at a higher price, thereby inviting "NCC to enter into a price-fixing agreement." RSUF A-1, citing J. Briggs Decl., Ex. B (G. Sackett Deposition) RT 4:16-24, 17:22-18:1. Equifax executives informed NCC that Equifax was increasing the price it charged NCC as a result of NCC's entry into the Southeastern U.S. markets. RSUF A-1, citing J. Briggs Decl., Ex. B (G. Sackett Deposition) RT 21:10-24.
(3) NCC principal Grayson Sackett had a conversation with Equifax executive John Harvey, in which Harvey stated that Equifax was going to "basically have an agreement with resellers that resellers were not allowed to beat Equifax's price at an existing dealer," but that one or two days later Equifax abandoned the idea. [20] RSUF A-1, citing J. Briggs Decl. Ex. B (G. Sackett Deposition) RT 67:4-18.

(4) CCA was contacted by an Equifax sales representative who stated words to the effect of: "What are you doing in these markets? You cannot go into these markets and sell to end-users at a reduced price. Your sales in **[*50]** these markets is disrupting the pricing that is in place between Equifax and the national resellers in those areas, and you simply can't do it." [21] RSUF A1, citing J. Briggs Decl., Ex. E (J. Briggs Deposition) RT 76:14-77:7.
(5) CCA was told by an Equifax manager that its Florida pricing "was way too low" in "this kind of market;" that CCA was "not playing ball" and that "you are not going to be around if you continue to go in [to Florida] and offer these kinds of rates." RSUF A1, citing J. Briggs Decl., Ex. G (M. Briggs Deposition) RT 118:17-119:4, 120:9-19.

(6) Equifax provided Certified, a reseller outside the market at issue, with credit reports at a rate of $ 1.65 to $ 1.85, after Equifax had notified CCA that its volume tiered pricing was being replaced with a flat rate of $ 2.75. [22] Supp. J. Briggs Decl., Ex. C. Kathy Weismann, an Equifax representative sent an e-mail to Certified, stating:

---

proof is a matter for the trial judge's discretion." 5 Weinstein & Berger, supra § 801.34[6][c], citing *United States v. Perez, 658 F.2d 654, 658 (9th Cir. 1981)*.

Therefore, on a motion for summary judgement the Court may conditionally consider hearsay evidence, subject to a subsequent determination as to whether plaintiffs can prove the existence of the conspiracy as well as the participation of the declarant in the conspiracy.

In addition, the Court concludes that the statement by Equifax executive Kaltenbach is admissible as an admission by a party. See *Fed. R. Evid. 801(d)(2)(D)*. A statement is not hearsay if that statement was made "by the party's agent or servant concerning a matter **[*53]** within the scope of the agency of employment, made during the existence of the relationship." Id. Therefore Equifax's objections on the grounds of hearsay, speculation, lack of personal knowledge, and lack of foundation are overruled.

[20] Equifax objects to the deposition testimony of Grayson Sackett on the grounds that it is hearsay, speculative and lacks foundation. The Court overrules this objection on the ground that Equifax executive John Harvey's statements constitute an admission of a party pursuant to *Fed. R. Evid. 801(d)(2)(D)*.

[21] Equifax objects to Jeffrey Briggs' testimony regarding what Equifax sales representative Kathy Weismann said to him as inadmissible hearsay. The Court overrules Equifax's objection on the ground that Weismann's statements are admissions of a party.

[22] Equifax objects to the Supplemental Briggs declaration as untimely pursuant to *Local Rule 7-9*. However, the Court, in its discretion, will accept this late-filed declaration. Equifax also objects to CCA's evidence of Equifax's pricing to a reseller outside the market at issue on the ground that such evidence violates *Fed. R. Evid. 1002* (the best evidence rule). The Court concludes that information regarding **[*54]** Equifax's pricing to Certified "was under the control of the party against whom offered," [i.e. Equifax] pursuant to *Fed. R. Evid. 1004(3)*, and is therefore admissible unless Equifax chooses to produce the original documents. See *Fed. R. Evid. 1004(3)*. In addition, because the Supplemental Briggs declaration summarizes Equifax's pricing to a reseller outside the market at issue (as opposed to pricing to end-users), the Court concludes that the evidence Equifax seeks to introduce "is not closely related to a controlling issue" such that pursuant to *Fed. R. Evid. 1004(4)*, the best evidence rule does not apply. See *Fed. R. Evid. 1004(4)* (evidence summarizing a written document is admissible if the written document concerns collateral matters). Accordingly, Equifax's objection is overruled.

"[Y]ou are only allowed to sell single files at $ 2.75 to the auto industry right now." [23] Supp. J. Briggs. Decl., Ex. D. Id.

(7) Circumstantial evidence that CCA, NCC, and Consortium, which were selling at lower prices than Equifax, were terminated, while ADP and CREDCO, selling at prices similar **[*51]** to Equifax, were not terminated.

Equifax contends that CCA's evidence provides an insufficient basis to reasonably infer that an illegal agreement existed and is based upon facts which "at best … suggest unilateral conduct" not violative of the Cartwright Act. Mot. at 9. In particular, Equifax characterizes testimony by Matthew Briggs of CCA that an Equifax sales representative told him "if we didn't play ball and keep our rates high that we weren't going to be in business," as unilateral conduct on the part of Equifax, rather than a proposal to enter into an illegal agreement. Mot. at 9, citing Molinski Decl., Ex. A (Deposition of Matthew Briggs) RT 108:24-109:6. In support of this contention, Equifax cites the deposition testimony of Jeffrey Briggs, stating "I don't honestly remember if Ms. Weismann [the Equifax sales representative] said there is a pricing arrangement or pricing agreement in place. I don't recall her specifically saying that." Molinksi Decl., Ex. B (J. Briggs Deposition) RT 79:7-12.

Second, Equifax asserts that CCA has failed to adduce any evidence of the resale prices or price **[*56]** levels that were allegedly fixed. Mot. at 10. Equifax contends that both CCA principals have admitted that they had no personal knowledge of an agreement to fix prices at specific levels between Equifax and ADP or Equifax and CREDCO. Mot. at 11, citing Molinski Decl. A (M. Briggs Deposition) RT 69:19-69:22, 77:9-81:5, 150:20-152:9, 144:5-12.

CCA contends that evidence exists supporting a reasonable inferences of price-fixing agreements between Equifax and ADP, as well as between Equifax and CREDCO. Opp. at 6. In particular, CCA contends that Equifax invited NCC to enter into a price-fixing agreement on separate occasions." [24]

Equifax replies that a supplier's announcement of a resale pricing policy and its refusal to deal with distributors who do not comply with that policy, coupled with a distributor's voluntary acquiescence in the policy, does not constitute an illegal agreement as a matter of law. Reply at 7, citing *Chavez v. Whirlpool Corp., 93 Cal. App. 4th at 372*. **[*57]** Equifax contends that in order to infer an illegal agreement from the testimony presented by CCA, the Court would have to infer that Equifax had similar conversations with ADP and other resellers, who entered into an agreement, rather than acquiescing to an announced policy. Reply at 7. Likewise, Equifax contends that alleged threats made to CCA that it would not "be around" if it failed to comply with the resale price policy announced by Equifax constitute permissible unilateral conduct. Reply at 8, citing *United States v. Colgate, 250 U.S. 300, 39 S. Ct. 465, 63 L. Ed. 992, 1919 Dec. Comm'r Pat. 460 (1919)*, *Chavez, 93 Cal. App. 4th at 373*.

Assuming that CCA must set forth "evidence that tends to exclude the possibility that the manufacturer and nonterminated distributors were acting independently" as is required by *Monsanto*, the Court concludes that CCA has met its burden. While CCA's evidence presents a close case, the Court concludes that CCA has provided additional evidence supporting a reasonable inference that a price-fixing conspiracy was entered into and acted upon. Among other things, CCA has offered evidence that Equifax informed a principal of NCC that Equifax was going to pursue an agreement in which resellers would be barred **[*58]** from charging lower prices than Equifax was charging end-users. J. Briggs Decl., Ex. B (G. Sackett Deposition) RT 67:4-18. While Equifax announced two days later that it was abandoning its plans to pursue this agreement, the trier of fact may disbelieve Equifax's statement that it abandoned its plans in light of the other evidence presented by plaintiffs. Equifax executives informed NCC's principals that its pricing from Equifax to NCC would increase as a result of NCC's practice of

---

[23] Equifax contends that the e-mail to Certified is "taken out of context" by CCA and that "Ms. Weismann was informing Certified that if Certified sold as a broker into the automotive channel, it would be charged by Equifax the same $ 2.75 that other such brokers, including CCA was charged." See Equifax's Reply to Supp. Decl. of J. Briggs at 1. Equifax also argues that the "e-mail describes at best -- **[*55]** and like all of CCA's other evidence -- only a unilateral direction given to Certified, not any form of agreement." Id.

[24] Equifax argues that this evidence, interpreted in a light most favorable to CCA, can only imply that "a potential unilateral price policy [was] being considered at Equifax and that no specific agreement, or even policy was ever proposed." Reply at 6.

selling reports in the market at issue. J. Briggs Decl., Ex. B (G. Sackett Deposition) RT 21:10-24. In addition, an Equifax executive told Jeffrey Briggs that CCA could not "go into these markets [the market area at issue] and sell to end-users at a reduced price" because CCA's sales were "disrupting the pricing that is in place by Equifax and ADP." J. Briggs Decl., Ex. E (J. Briggs Deposition) RT 76:14-77:7. Equifax representative Kathy Weismann sent an e-mail to Certified, a California-based reseller, stating that it was "only allowed to sell single files at $ 2.75 to the auto industry right now." Supp. J. Briggs Decl., Ex. C.

Finally, of the resellers that were terminated by Equifax, CCA and NCC priced **[*59]** single file reports from $ 1.90 to $ 2.50, and Consortium priced its reports at $ 1.75. Knievel Decl. P 13, M. Briggs Decl. P 19. By contrast, Equifax priced its reports at $ 2.75 and above, ADP priced it reports at $ 3.20 to $ 3.25, and CREDCO priced its reports at $ 2.90 and above. Knievel Decl. PP 3-6, 11, J. Briggs Decl. P 25, Ex. P.

The Court concludes that CCA's evidence is sufficient to raise a genuine issue of material fact as to the existence of a price-fixing agreement. [25] See, e.g., *James Jeans, 849 F.2d at 1157* (stating that in accordance with the approach employed by Monsanto, Matsushita and Business Electronics, "a court should be less concerned about subjective notions of motive and more concerned about the economic effects of challenged conduct."). [26] Because a price-fixing agreement is per se unlawful, no further inquiry is required regarding the reasonableness of the agreement. See *FTC v. Superior Court Trial Lawyers Ass'n, 493 U.S. 411, 435, 110 S. Ct. 768, 107 L. Ed. 2d 851 (1990)*:

---

[25] Equifax relies on *O.S.C. v. Apple Computer, Inc., 792 F.2d 1464, 1468-1469 (1986)*, in support of the contention that CCA has failed to set forth sufficient evidence to support an inference of a conspiracy. In Apple Computer, the Ninth Circuit concluded that "Apple's only concern with prices pertained to its dealers' capacity to withstand erosion of profit margins caused by having to carry 'free riding' mail order dealers." *Apple Computer, 792 F.2d at 1468*. In Apple Computer, the Ninth Circuit noted that while it was undisputed that Apple "received voluminous complaints from its dealers," there was "no evidence that Apple coerced dealers on advertising or pricing decisions" and there was "no evidence that price discounting was a formal topic of discussion at meetings attended by Apple **[*61]** representatives." *Apple Computer, 792 F.2d at 1468-1469*.

Equifax also relies upon the unpublished memorandum opinion in *Glacier Optical, Inc. v. Optique Du Monde, 1995 U.S. App. LEXIS 1108, 1995 WL 21565 (9th Cir. 1995)*. Putting aside the fact that this unpublished opinion cannot be relied upon by the Court or the parties pursuant to *Ninth Circuit Rule 36-3*, the case is distinguishable from the evidence presented here. Equifax argues that in Glacier, the plaintiff had set forth evidence of price fixing which consisted of (1) distributors' complaints to defendant about plaintiff's sales to discounters; (2) threats to terminate distributors who sold to discounters; (3) defendant's monitoring and investigation of possible sales to discounters; (4) meetings with distributors to discuss discounting; and (5) the unexplained termination of the plaintiff; and that the Ninth Circuit concluded that such evidence was insufficient to support an inference of price-fixing. See Equifax's Supp. Brief, Ex. B ("9th Circuit Case Comparison Chart"). The court in Glacier Optical reasoned that defendant had "proffered a legitimate business explanation" to explain its efforts to prevent sales to discount retailers -- namely, protecting **[*62]** the image of the designer eyeglasses that defendant was seeking to distribute -- and therefore the evidence did not support an inference of price-fixing. *Glacier Optical, 1995 U.S. App. LEXIS 1108, 1995 WL 21565 at * 5*. In addition, Glacier Optical noted that one of the alleged co-conspirators "actually cut prices significantly soon after its meetings with [defendant]." *Id.* By contrast, in this action, there is no evidence that price-discounting by CCA and other resellers harmed Equifax's image or, more importantly, that ADP or CREDCO reduced prices, either in response to CCA's pricing, or after CCA was terminated. In any event, the unpublished opinion in Glacier Optical may not be relied upon here.

Finally, *National Information Services, Inc., v. TRW Inc., 1992 U.S. Dist. LEXIS 22497, 1992 WL 715632 (D. Ore. 1992)*, is inapplicable to the Court's analysis of CCA's Cartwright Act claim, because in National Information Services, plaintiffs alleged a Section 1 claim based upon an alleged conspiracy to impose non-price restraints, which the court analyzed under a rule of reason analysis.

[26] In James Jeans, the Ninth Circuit summarized plaintiffs' evidence as consisting of complaints about price cutting coupled with the manufacturer's assurance **[*63]** that it would 'take care of things,' as well as the termination of a price cutting distributor without justification. Unlike the present case, there were no statements by the manufacturer in *James Jeans* that price cutters were "disrupting the pricing that is in place," or proposed agreements on pricing. See J. Briggs Decl., Ex. E (J. Briggs Deposition) RT 76:14-77:7. Rather, in James Jeans the evidence that the plaintiffs introduced at trial was consistent only with the defendant "putting pressure on a retailer to adhere to its pricing policy." *James Jeans, 849 F.2d at 1159*.

> Price-fixing agreements may or may not be aimed at the complete elimination of price competition … Whatever economic justification particular price-fixing agreements may be thought to have, the law does not permit an inquiry **[*60]** into their reasonableness. They are all banned because of their actual or potential threat to the central nervous system of the economy.

See also *Arizona v. Maricopa Co. Medical Society, 457 U.S. 332, 351, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982)*, quoting *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 60 S. Ct. 811, 84 L. Ed. 1129 (1940)*(internal citations omitted). Accordingly, Equifax's motion for summary judgment as to CCA's Cartwright Act claim must be denied.

(ii) Unfair Competition Law

Equifax contends that CCA's Unfair Competition Law claim pursuant to *Cal. Bus. & Prof. Code § 17200* must fail for the same reasons as CCA's Cartwright Act claim. Mot. at 14-16. Equifax also contends that CCA's complaint seeks actual and treble damages which are unavailable under *§ 17200*.

CCA responds that because genuine issues of material fact exist as to whether Equifax violated the Cartwright Act, genuine issues of material fact necessarily preclude summary judgment on its unfair competition claim. [27] Opp. at 14. As to the requested remedies, CCA argues that it requests injunctive relief **[*64]** and restitution as part of its prayer for such other and further relief as the Court deems proper. Opp. at 15.

The Court concludes that because a genuine issue of material fact precludes summary judgment on the Cartwright Act claim, summary judgment on the Unfair Competition Law claim is inappropriate.

(iii) CCA's Breach of Contract Claim and Breach of Implied Covenant of Good Faith and Fair Dealing Claims

Equifax also argues that CCA's breach of contract claim fails either under Georgia or California law. [28] Mot. at 16-21. In particular Equifax contends that: (1) pursuant to **[*65]** the plain language of the Agreement, Equifax was not obligated to maintain prices quoted to CCA prior to the execution of the Agreement; (2) the Agreement between the parties did not require uniform pricing; (3) the plain language of the Agreement allowed Equifax to terminate the Agreement at its election on ten-days' notice; (4) even if the Court were required to look beyond the express language of the Agreement, the admission of parol evidence would yield the same result; and (5) undisputed evidence of CCA's conduct illustrates an understanding of the contract inconsistent with its allegations in this action. Mot. at 16-21.

As to CCA's breach of implied covenant of good faith and fair dealing claim, Equifax argues that its Agreement with CCA "expressly allows Equifax to terminate [CCA] as it did." Mot. at 24. Equifax argues that the implied covenant of good faith and fair dealing may not be read to prohibit it from doing that which is expressly permitted by its Agreement with CCA. Id.

CCA responds that under Georgia law, the implied covenant of good **[*66]** faith modifies and becomes part of the provisions of every contract, and that a claim for breach of the implied covenant of good faith and dealing is not recognized as an independent cause of action. Opp. at 16, citing *Stuart Enters. Int'l, Inc. v. Peykan, Inc., 252 Ga. App. 231, 234, 555 S.E.2d 881 (Ga. Ct. App. 2003)*. Therefore, CCA argues that summary judgment on the breach

---

[27] In addition, CCA argues that it is not necessary for a business practice to be unlawful in order for it to be actionable under *§ 17200*. Opp. at 13, citing *Consumers Union of United States, Inc. v. Fisher Development, Inc., 208 Cal. App. 3d 1433, 1438, 257 Cal. Rptr. 151 (1989)*. CCA contends that summary judgment cannot be granted as to the unfair competition claim if "there is a triable issue as to whether the conduct alleged violated the spirit of the antitrust laws in general or significantly threatens or harms competition." Opp. at 15, citing *Cel-Tech Communications, Inc. v. Los Angeles Cellular Tel., 20 Cal. 4th 163, 187, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*.

[28] The Agreement provides that "[t]his Agreement will be governed by and construed in accordance with the laws of the state of Georgia."

of contract claim cannot be granted if there is a material issue of fact as to CCA's claim for breach of the implied covenant of good faith and dealing. Opp. at 16.

CCA contends that even if Equifax was entitled to cancel the contract for any reason, or no reason at all, it could not terminate the contract in furtherance of an illegal price-fixing agreement. Opp. at 16-17. Further, CCA argues that the contract is silent on the issue of whether or not cause is required to terminate, and as such, the implied covenant of good faith supplies a requirement of good cause. [29] Opp. at 17.

In light of the Court's conclusion regarding the Cartwright Act claim, summary judgment on the breach of contract claim is inappropriate.

(iv) Tortious Interference with Contract Claim

As to the tortious inference with contract claim, Equifax contends that no evidence exists of the actual breach or disruption of any **[*68]** contractual relationships between CCA and CCA's customers, or that Equifax knew of any contracts between CCA and its customers. Mot. at 22-24. Equifax further argues that CCA identified nine customer relationships in which CCA allegedly interfered, but has failed to produce contracts for eight of these customers, as required by order of the Magistrate Judge. Reply at 23.

CCA responds that is irrelevant whether Equifax's conduct resulted in a breach of contract by CCA or its customers, because disruption of a contractual relationship can give rise to a claim for tortious interference. Opp. at 20, citing *Della Penna v. Toyota Motor Sales, U.S.A., 11 Cal. 4th 376, 392, 45 Cal. Rptr. 2d 436, 902 P.2d 740 (1995)*. CCA contends that Equifax improperly "switch[ed] out the codes of some end-user automobile users who were CCA customers, causing them to deal with Equifax direct[ly]." Opp. at 19, citing J. Briggs Decl., Ex. E (J. Briggs Deposition) RT 51:16-52:20. CCA also argues that Equifax sales representatives advised CCA customers "about stories they could make up in order to try to get out of contractual obligations to CCA" and used a site inspection process improperly by "surreptitiously switching customers' codes from CCA." **[*69]** Opp. at 19-20.

A claim for intentional interference with contractual relations requires a plaintiff to demonstrate: "(1) a valid contract between plaintiff and a third party; (2) defendant's knowledge of this contract; (3) defendant's intentional acts designed to induce a breach or disruption of the contractual relationship; (4) actual breach or disruption of the contractual relationship; and (5) resulting damage." *Quelamine Co. v. Stewart Title Guaranty Co., 19 Cal. 4th at 55*. Jeffrey Briggs testified that:

> [W]ith respect to [end-users] that did [have a term contract] … Equifax would have a representative go to these dealers and do a variety of improper things. One things, as I recall, was without even telling the dealers, switching the codes back to Equifax. Another thing was that I recall is Equifax representatives instructing the dealers how to break their agreement with Consolidated by presenting a story, for lack of a better word, that there were misrepresentations that were made by our sales representatives during the sales process and that's why they were breaking their term agreement with us.

J. Briggs Decl., Ex. E (J. Briggs Deposition) 51:24 - 52:18. While Equifax contends **[*70]** that no evidence exists regarding Equifax's knowledge of any contractual relationship between CCA and its customers, the above-

---

[29] CCA further argues that the written contract dated April 1, 2000, did not set pricing terms. Opp. at 18. CCA maintains that paragraph 1.7 of the contract referred to schedules of prices "now or subsequently established by Equifax." See J. Briggs Decl., **[*67]** Ex. J. CCA asserts that it insisted pricing be established at the time of contract, and in accordance with CCA's demand, pricing was confirmed by Equifax on March 22, 2000, a week before the contract was signed. J. Briggs Decl., Ex. K (e-mail from Kathy Weismann of Equifax to J. Briggs), J. Briggs Decl. Ex. E (Deposition of J. Briggs) 121:5-122:7. CCA contends that it was told that the rates it paid were the same as the rates that other resellers selling the same volume of credit reports were paid. Opp. at 18. Finally, CCA argues that the integration clause in the April 1, 2000 document cannot restrict the rate schedule agreed upon on March 22, 2000, because the rate schedule was referenced in the April 1 document. Opp. at 19. Therefore, CCA argues that Equifax breached the terms of its contract with CCA by failing to maintain uniform pricing among the resellers. Opp. at 18.

excerpted testimony provides evidence that Equifax knew of the existence of contractual relationships between CCA and end-users and took steps to interefere with those relationships. Accordingly, a genuine issue of material fact exists as to whether Equifax intentionally disrupted valid contracts between CCA and end-users.

(v) CCA's Claim for Misrepresentation

Equifax argues that CCA's misrepresentation claim fails because CCA has produced no evidence supporting justifiable reliance upon Equifax's alleged misrepresentations that CCA's prices would be maintained at a uniform level. Mot. at 24-25. CCA fails to oppose Equifax's motion is in its opposition, and states that "CCA does not respond to the facts asserted by Equifax with respect to the misrepresentation cause of action, on the basis that this cause of action is being dismissed by CCA." RSUF at 49. Accordingly, the Court grants Equifax's motion for summary judgment as to CCA's misrepresentation claim.

B. Plaintiff's Motion to Modify Scheduling Conference Order and for Leave to Amend Complaint

On April 13, **[*71]** 2004, CCA filed a motion for leave to amend the complaint and to modify the scheduling order. CCA seeks to add a claim for violations of *Section 2* of the Sherman Act. See CCA's Proposed First Amendment Complaint ("Proposed FAC").

CCA argues that good cause exists to modify the Court's scheduling order pursuant to *Fed. R. Civ. P. 16(b)*. In particular, CCA contends that since it filed its complaint in Superior Court, it could not bring a federal antitrust claim because that Court has no jurisdiction over a Sherman Act claim. CCA's Mot. at 5. CCA maintains that it has been actively involved in a discovery dispute with Equifax and therefore was unable to proceed with third party witness depositions until February 26, 2004, five months after the deadline to add claims, as established by the scheduling order. CCA's Mot. at 6. CCA argues that deposition testimony obtained from the principals of Consortium and NCC strongly support a claim for violations of *Section 2* of the Sherman Act. CCA's Mot at 6-10. In particular, CCA points to deposition testimony by Jevin Sackett that Equifax has monopoly power in the specified market because lenders in that market require Equifax reports. CCA's Mot. **[*72]** at 8, citing Briggs Decl, Ex. 5 (J. Sackett Deposition). CCA further argues that because the proposed Sherman Act claim will not require additional discovery, and will not in any way cause delay of the proceedings, Equifax will not be prejudiced. Id. at 12-13.

Equifax responds that CCA "twice threatened to bring Sherman Act claims against Equifax" in two separate letters written in late 2001 after Equifax terminated CCA's broker agreement, such that CCA has not acted diligently in seeking leave to amend the complaint to add a proposed Sherman Act *Section 2* claim. [30] Opp. to CCA's Mot. at 1. Equifax argues that it filed a notice of removal of CCA's action on February 21, 2003, at which time CCA could have amended its complaint to include Sherman Act claims. Opp. to CCA's Mot. at 5. Equifax argues that information CCA gained through the depositions of NCC and Consortium is not new because CCA "has known for years the same 'facts' upon which it bases its proposed *Section 2* claim." Id. at 12.

Equifax also argues that leave to amend the complaint would cause Equifax undue prejudice and would be futile. Id. at 13-22. Equifax contends that it will be unduly prejudiced because it will have to reopen discovery regarding issues not relevant to CCA's existing Cartwright Act claim. [31] Id. at 15. Equifax argues that CCA's delay in seeking leave to amend justifies the denial of the motion. Id. at 17-18. In addition, Equifax argues that CCA's amendment is

---

[30] CCA responds that Equifax mischaracterizes its letters, in that CCA was referring to a Sherman Act *Section 1* claim, and "did not consider or discuss a claim under *Section 2* until information was discovered **[*73]** in recent depositions that supported the claim." Reply at 1. Equifax disputes this by stating the 2001 letter claimed that Equifax's conduct was illegal under the essential facilities doctrine, which would be relevant only as to a *Section 2* claim, thereby demonstrating that CCA considered bringing a *Section 2* claim against Equifax as early as 2001. Supp. Opp. at 1.

[31] In particular, Equifax asserts that CCA's proposed *Section 2* Sherman Act claim would necessitate discovery regarding issues such as market definition, monopoly power, predatory conduct and specific intent which are not relevant to CCA's existing Cartwright Act claim. Therefore, Equifax contends that it will have to notice additional depositions, and conduct discovery regarding the market shares maintained by TransUnion and Experian. Opp. to CCA's Mot. at 16.

offered in bad faith, because CCA has already taken discovery on the Sherman Act claims while withholding the filing of that claim to prejudice Equifax. Id. at 18. Equifax reasons that CCA's proposed *Section 2* claim is futile because "CCA's proposed Sherman Act claim has already been squarely rejected on identical facts in this same industry as alleged against Equifax's **[*74]** competitor, TRW (now Experian)." Id. at 19, citing National Information Services. [32]

Fed. R. Civ. P. 16(b) provides that a scheduling order "shall not be modified except by leave of court and upon a showing of good cause." In determining whether good cause exists, courts may consider the importance of the amendment, potential prejudice to the opposing party, and the explanation for the failure to timely move for leave to amend. *Mammoth Recreations, Inc., 975 F.2d at 609*. If a party seeking modification of a pretrial scheduling order "was not diligent, the inquiry should end and the motion to modify should not be granted." *Zivkovic, 302 F.3d at 1087* (internal citations omitted).

On August 4, 2003, the Court issued a scheduling order setting September 28, 2003, as the last day for motions to add claims or parties.

On March 2, 2004, CCA filed a motion to modify the pretrial scheduling order to add a *Section 2* claim. However, on March 4, 2004, CCA withdrew the motion.

CCA again filed a motion to modify the scheduling order to add a *Section 2* claim on April 13, 2004, over five months after the last date to add claims pursuant to the pretrial scheduling order.

The Court concludes **[*76]** that Equifax would be unduly prejudiced should CCA's motion to modify the scheduling order be granted. In particular, the addition of a *Section 2* claim would necessitate extending the discovery cutoff to allow Equifax to depose expert witnesses on issues such as national market share, market power and predatory conduct.

In addition, the Court concludes that CCA cannot show that it exercised diligence in seeking to add this claim. See *Zivkovic, 302 F.3d at 1087*. It is true that the parties have been engaged in an extensive discovery dispute, and CCA did not have an opportunity to depose witnesses until February 2004. However, on September 15, 2001, Jeffrey Briggs sent a letter to Equifax stating that, "[f]rom a legal standpoint, we believe that there are several federal laws which are important to the pricing relationship between Equifax and CCA," explaining in a footnote that "[t]hese statutes include the Sherman Act (as it relates to vertical restraints of trade and the essential facilities doctrine), as well as the Robinson-Patman Act." See April 19, 2004 Molinski Decl., Ex. G (under seal). Jeffrey Briggs sent a second letter to Equifax on October 29, 2001, stating "Equifax' [sic] **[*77]** actions violate (1) its promises to CCA and (2) federal law (including the Sherman Act and the Robinson-Patman Act)." See April 19, 2004 Molinski Decl., Ex. F. Briggs' reference to the essential facilities doctrine, which applies to a *Section 2* claim, indicates that CCA contemplated bringing a *Section 2* claim against Equifax as early as 2001, and therefore was not diligent in waiting until April 13, 2004, over five months after the last date to add claims pursuant to the pretrial scheduling order, in order to file the present motion to add a *Section 2* claim. [33] The fact that CCA may have gained

---

[32] The court in National Information Services concluded that:

> High market shares, standing alone, do not prove monopoly power ... Plaintiffs have not presented any evidence that TransUnion or Equifax cannot compete with TRW in regions where TRW holds a "dominant" share.

*National Information Services, 1992 U.S. Dist. LEXIS 22497, 1992 WL 715632 at *10*. CCA replies that the court's conclusion in National Information Services is distinguishable, because CCA has offered evidence that lenders in the market at issue in this case require end-users to purchase Equifax reports: Reply at 10. National Information Services does not, however, demonstrate that an amendment would be futile. The **[*75]** Court notes that the market facts existing more than ten years ago may not be dispositive in this case.

[33] Indeed, CCA's expert, Professor Comanor, relies on the essential facilities doctrine to support CCA's proposed *Section 2* claim. See April 20, 2004 **[*78]** Comanor Decl. at 8 ("The concept of an essential facility has bearing on antitrust cases

additional evidence in support of such a claim after the last date to add claims pursuant to the scheduling order does not excuse CCA's lack of diligence in failing to timely move for leave to amend the complaint. Accordingly, CCA's motion to modify the scheduling order pursuant to *Fed. R. Civ. P. 16(b)*, such that CCA may file a motion for a leave to the amend the complaint, must be denied on the ground that CCA has failed to exercise diligence.

Even if CCA's motion for leave to **[*79]** amend the complaint were timely, the Court concludes that despite the liberal standard for allowing amendments set forth in *Fed. R. Civ. P. 15(a)*, leave to amend must be denied. The factors "commonly used to determine the propriety of a motion for leave to amend" are "bad faith, undue delay, prejudice to the opposing party, and futility of amendment." *DCD Programs, Ltd., 833 F.2d at 186*, citing *Loehr v. Ventura County Community College Dist., 743 F.2d 1310, 1313 (9th Cir. 1984)*. While the Court does not conclude that CCA's proposed *Section 2* claim is futile, the evidence of undue delay and prejudice to Equifax, discussed above in connection with CCA's motion to modify the scheduling order pursuant to *Fed. R. Civ. P. 16(b)*, militates against granting CCA's motion for leave to amend pursuant to *Fed. R. Civ. P. 15(a)*.

Therefore, the Court denies CCA's motion to modify the scheduling conference order and for leave to amend the complaint.

VII. CONCLUSION

Equifax's motion for summary judgment is hereby DENIED as to CCA's claims for violations of the Cartwright Act, unfair competition, breach of contract, breach of the implied covenant of good faith and fair dealing, and tortious interference. **[*80]** Equifax's motion is GRANTED as to CCA's claim for misrepresentation. CCA's motion to modify the scheduling order and for leave to amend the complaint is DENIED.

IT IS SO ORDERED.

Dismissal under *Fed. R. Civ. P. 12(b)(6)* may be based either on the lack of a cognizable legal theory or on the absence of sufficient facts alleged under a cognizable legal theory.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Dismissal > Involuntary Dismissals > Failure to State Claims

HN3[] **Motions to Dismiss, Failure to State Claim**

The issue on a motion to dismiss for failure to state a claim is not whether the claimant will ultimately prevail but whether the claimant is entitled to offer evidence to support the claims asserted.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Dismissal > Involuntary Dismissals > Failure to State Claims

HN4[] **Motions to Dismiss, Failure to State Claim**

When evaluating a motion to dismiss for failure to state a claim, the court must accept all material allegations in the complaint as true and construe them in the light most favorable to the non-moving party. However, conclusory allegations of law and unwarranted inferences are insufficient to defeat a motion to dismiss for failure to state a claim.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN5[] **Regulated Practices, Trade Practices & Unfair Competition**

Under *Cal. Bus. & Prof. Code § 17200*, the plaintiff must assert any unlawful, unfair or fraudulent business act or practice.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN6[] **Regulated Practices, Trade Practices & Unfair Competition**

Cal. Bus. & Prof. Code § 17200 establishes three theories for finding illegal conduct: (1) unlawful, (2) unfair, or (3) fraudulent. Since *§ 17200* is written in the disjunctive, a plaintiff may allege solely one of the three theories to properly plead a claim under *§ 17200*.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Trademark Law > ... > Federal Unfair Competition Law > Trade Dress Protection > General Overview

HN7[] **Regulated Practices, Trade Practices & Unfair Competition**

To allege a fraudulent business practice under *Cal. Bus. & Prof. Code § 17200*, a plaintiff must allege that members of the public are likely to be deceived. Allegations of actual deception, reasonable reliance, and damage are unnecessary.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > General Overview

Trademark Law > ... > Federal Unfair Competition Law > Trade Dress Protection > General Overview

HN8[] **Pleadings, Amendment of Pleadings**

The United States Court of Appeals for the Ninth Circuit has long held that claims in the original complaint that are not re-alleged in the amended complaint are no longer before the court.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Criminal Law & Procedure > ... > Eyewitness Identification > Due Process Protections > Fair Identification Requirement

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

HN9[] **Regulated Practices, Trade Practices & Unfair Competition**

An unfair business practice occurs when a practice offends an established public policy or when the practice is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN10[] **Regulated Practices, Trade Practices & Unfair Competition**

Cal. Bus. & Prof. Code § 17200 has three distinct theories under which a claim of unfair competition may proceed.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN11[] **Regulated Practices, Trade Practices & Unfair Competition**

In order to successfully dismiss a *Cal. Bus. & Prof. Code § 17200* claim, a defendant must argue separately against all three theories using the relevant standards.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN12[] **Regulated Practices, Trade Practices & Unfair Competition**

Cal. Bus. & Prof. Code § 17000 is known as the Unfair Practices Act.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN13[] **Regulated Practices, Trade Practices & Unfair Competition**

The Unfair Practices Act, *Cal. Bus. & Prof. Code § 17000*, condemns specific conduct. It proscribes specific conduct such as price discrimination, sales below cost, locality discrimination, secret rebates, and use of loss leader sales.

Antitrust & Trade Law > ... > Intellectual Property > Bad Faith, Fraud & Nonuse > General Overview

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN14[] **Intellectual Property, Bad Faith, Fraud & Nonuse**

The Unfair Practices Act, *Cal. Bus. & Prof. Code § 17000*, is an offshoot of ***antitrust law***.

ORDER GRANTING IN PART AND DENYING IN PART DEFENDANT'S MOTION TO DISMISS AND VACATING HEARING

INTRODUCTION

After plaintiffs' trade-dress claim was dismissed, plaintiffs filed an amended complaint on June 9, 2004, alleging a claim of patent infringement and two claims under *Sections 17000and 17200* of the California Business and Professions Code. Defendant now moves to dismiss the *Section 17000and 17200* claims under *Rule 12(b)(6)*. Defendant's motion is **GRANTED IN PART** and **DENIED IN PART.** Plaintiffs' complaint is void of any allegation **[*2]** from which inferences can be drawn that it engaged in anti-competitive conduct under *Section 17000*. Plaintiffs, however, did allege sufficient facts to support a claim under *Section 17200*.

STATEMENT

The amended complaint alleges that plaintiff Martin Philip Hull is the inventor of two patents (Amd. Compl. P8-9). Both patents are related to training fin devices that assist in training and conditioning swimmers. Plaintiff Zoomers is the assignee of both patents. In the first claim, plaintiffs contend that defendant has infringed these two patents. In the second and third claims, plaintiffs allege that defendant's purported infringement of their patents constitute unfair competition. The second and third claims are based on *California Business & Professional Code Sections 17000and 17200*, respectively. According to plaintiffs, the alleged infringement by defendant of "plaintiffs Hull and Zoomers' '385 and '328 patents and imitation of plaintiffs' Hull and Zoomers training fin device constitutes unfair competition under California state law" (Amd. Compl. P22, 26). They also reallege and incorporate by reference the allegations made under the first claim **[*3]** of patent infringement.

Defendant filed this instant motion on July 9, 2004. This order notes that defendant did not file a reply brief. In the instant motion, defendant argues that plaintiffs' complaint fails to state a claim under *Section 17000and 17200*. More specifically, it contends that plaintiffs have failed to allege any facts to support an inference that defendant has attempted to palm off its goods as plaintiffs' or that members of the public are likely to be deceived (Br. 3).

ANALYSIS

1. LEGAL STANDARD.

HN1[] A motion to dismiss under *Federal Rule of Civil Procedure 12(b)(6)* tests for legal sufficiency of the claims alleged in the complaint. *See* *Parks Sch. of Business v. Symington, 51 F.3d 1480, 1484 (9th Cir. 1995)*. *HN2*[] Dismissal under *FRCP 12(b)(6)* may be based either on the "lack of a cognizable legal theory" or on "the absence of sufficient facts alleged under a cognizable legal theory." *Balistreri v. Pacifica Police Dep't, 901 F.2d 696, 699 (9th Cir. 1988)*. Hence, *HN3*[] the issue on a motion to dismiss for failure to state a claim is not whether the claimant **[*4]** will ultimately prevail but whether the claimant is entitled to offer evidence to support the claims asserted. *Gilligan v. Jamco Development Corp., 108 F.3d 246, 249 (9th Cir. 1997)*. *HN4*[] When evaluating such a motion, the court must accept all material allegations in the complaint as true and construe them in the light most favorable to the non-moving party. *Cahill v. Liberty Mut. Ins. Co., 80 F.3d 336, 337-38 (9th Cir. 1996)*. However, "conclusory allegations of law and unwarranted inferences are insufficient to defeat a motion to dismiss for failure to state a claim." *Epstein v. Washington Energy Co., 83 F.3d 1136, 1140 (9th Cir. 1996)*.

2. *CALIFORNIA BUSINESS & PROFESSIONS CODE SECTIONS 17000 AND 17200*.

Defendant moves to dismiss plaintiffs' claim that relies on *Section 17200* because they fail to allege that members of the public are likely to be deceived. *HN5*[] Under *Section 17200*, the plaintiff must assert "any unlawful, unfair or fraudulent business act or practice." *Cel-Tech Communications, Inc. v. Los Angeles Cellular Tel. Co., 20 Cal. 4th 163, 180, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*. Thus, *Section 17200* *HN6*[] establishes **[*5]** three theories for finding illegal conduct: (1) unlawful, (2) unfair, or (3) fraudulent. *See ibid.* Since *Section 17200* is written in the disjunctive, the plaintiff may allege solely one of the three theories to properly plead a claim under *Section 17200*. This order notes that defendant has not moved to dismiss under the theory of unlawful business practices. Thus, the two issues that remain are whether plaintiffs' claim may go forward under the theory of fraudulent or unfair business practices. [*]

HN7[] To allege a fraudulent business practice, a plaintiff must allege that "members of the public are likely to be deceived. Allegations of actual deception, reasonable reliance, and damage are unnecessary." *Comm. on Children's Television, Inc. v. Gen. Foods Corp., 35 Cal. 3d 197, 211, 197 Cal. Rptr. 783, 673 P.2d 660 (1983)*. **[*6]** Defendant argues that plaintiffs fail to allege that members of the public are likely to be deceived in their complaint. This order agrees. Conceivably, the allegations supporting the trade-dress claim in the original complaint could have served to fulfill the pleading requirement of the fraudulent business practices theory, since both claims require alleging that the public is likely to be deceived. Those allegations, however, are not made in the amended complaint. *HN8*[] "The Ninth Circuit has long held that claims in the original complaint that are not realleged in the amended complaint are no longer before the court." *Forsyth v. Humana, Inc., 99 F.3d 1504, 1511 (9th Cir. 1996)*. The amended complaint does not allege that members of the public are likely to be deceived. Nor do the exhibits attached to the amended complaint adequately fulfill the pleading requirement. The exhibits are comprised of plaintiff's two patents and defendant's website advertisement of the allegedly-infringing product. Based on a comparison of the exhibits, no reasonable inference can be made that a person would be deceived by defendant's product. Plaintiffs have not made sufficient allegations **[*7]** under fraudulent business practices. Thus, plaintiffs cannot go forward under the theory of fraudulent business practices under *Section 17200*.

As for the unfair business practices theory under *Section 17200*, defendant fails to successfully argue that this theory must be dismissed. Defendant does not argue the unfair business practices theory as a distinct and separate theory apart from fraudulent business practices, as required. It fails to make a distinction between the different standards required to allege fraudulent business practices and unfair business practices. Defendant correctly identifies the standard for unfair business practices when it cites *Podolsky v. First Healthcare Corp., 50 Cal. App. 4th 632, 58 Cal. Rptr. 2d 89 (1996)*. There, the court held that *HN9*[] an unfair business practice occurs when a

[*] In opposition, plaintiff makes an argument based on *Section 17500*. The Court is perplexed as to the relevance of this section, as it was never alleged in the complaint nor cited by defendant in its motion. The Court disregards this section.

practice "offends an established public policy or when the practice is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers." *Id. at 647*. But instead of arguing for dismissal of the unfair business practice theory under this standard, defendant then applies the "likely to be deceived" standard of fraudulent business practices for the **[*8]** unfair business practices theory as well. This is in error.

Section 17200 ***HN10***[] has three distinct theories under which a claim of unfair competition may proceed. ***HN11***[] In order to successfully dismiss a *Section 17200* claim, defendant must argue separately against all three theories using the relevant standards. Defendant has failed to do this. Thus, plaintiffs are allowed to go forward with their *Section 17200* claim under the unfair and unlawful business practices theories. Defendant's motion to dismiss the *Section 17200* claim is **DENIED.**

Defendant also moves to dismiss the *Section 17000* claim. *Section 17000* ***HN12***[] is known as the *Unfair Practices Act*. The Unfair Practices Act ***HN13***[] condemns specific conduct. *Cel-Tech, 20 Cal. 4th at 183*. It proscribes specific conduct such as price discrimination, sales below cost, locality discrimination, secret rebates, and use of loss leader sales. *Uneedus v. California Shoppers, Inc., 86 Cal. App. 3d 932, 937, 150 Cal. Rptr. 596 (1978)*. The stated purpose of the Act is to safeguard the public against the creation or perpetuation of monopolies and to foster and encourage competition. *Id. at 940*. Essentially, the Act ***HN14***[] is an offshoot of ***antitrust law***. This order **[*9]** holds that plaintiffs fail to allege facts to support a *Section 17000* claim. *Section 17000* is not applicable here because plaintiffs do not allege that defendant engages in anti-competitive conduct. Rather, plaintiffs' main allegations in the complaint relate to the patent-infringement claim, and do not relate at all to the prohibited conduct of the Act as listed above. Defendant's motion to dismiss the *Section 17000* claim is **GRANTED.**

CONCLUSION

For the reasons set forth above, defendant's motion to dismiss the second claim, *Section 17000*, is **GRANTED.** Defendant's motion to dismiss the third claim, *Section 17200*, is **DENIED.** Plaintiffs request leave to amend should their motion to dismiss be denied. Automatic leave will not be granted. Plaintiffs are hereby given until August 16th to file, if they choose, a detailed amendment and supporting memorandum and motion seeking leave to amend. The amendment and motion must fully set forth why a *Section 17000* **[*10]** claim is purposely pled.

The hearing is also hereby **VACATED.**

IT IS SO ORDERED.

Dated: August 6, 2004.

CIVIL MINUTES — GENERAL

PROCEEDINGS(In Chambers): Order Denying Defendant's motion to dismiss the third and fourth causes of action, Granting Motion to strike the first, second third and fourth causes of action and demand for restitution and disgorgement, Denying Motion for a more definite statement (F1d 6-7-04)

Minute Order re Defendants Motion to Dismiss Third and Fourth Causes of Action, Motion to Strike the First, Second, Third and Fourth Cause of Action and Demand for Restitution and Disgorgement and Motion for a More Definite Statement

I. Factual Background

Plaintiff Thales Avionics, Inc ("Thales") brings suit against Defendant Matsushita Avionics Systems Corporation ("MAS") alleging monopolization and attempted monopolization of the worldwide in-flight entertainment ("IFE") systems market by selling its IFE systems at prices below average variable costs and other conduct

The following factual description assumes, as the Court must, that all well-pled factual allegations are true

IFE systems consist of communications equipment and software **[*2]** applications that are installed on airplanes for the purpose of providing passengers with audio and video entertainment IFE systems are generally installed on planes flown on longer routes, typically twin-aisle planes, which are also referred to as "widebodies" IFE systems may also be installed in single-aisle or "narrowbody" planes with greater than 120 seats[1]

For the purposes of analyzing the viability of Thales' antitrust claims, the Court also accepts Thales' market definition the worldwide sale of IFE systems

The IFE systems market is comprised of three major manufacturers MAS, Thales, and Rockwell Collins ("Rockwell") MAS is the leading manufacturer Based on data from 2000 and 2002, Thales contends that there has been a dramatic shift in market shares between 2000 and 2003

Competitor	**2000**	**2002**
MAS	43%	62%
Rockwell	45%	33%
Thales	9%	4%
Others		<5%

MAS's increase in share is the result of capturing in excess of 90% of new sales for future **[*3]** shipments in 2003

The customers in the relevant market are primarily major airlines that fly long routes with widebody aircraft Approximately one-third of the IFE systems business is from United States airlines

Thales alleges that the drastic change in the competitive landscape, in particular the simultaneous rise of MAS and fall of both Thales and Rockwell, was the result of MAS's predatory pricing practices Thales contends that MAS's conduct will result in monopolization of the IFE systems market and allow for recoupment of the costs MAS incurred during the execution of its predatory strategy Thales alleges that MAS's pricing strategies violate both federal and state ***antitrust law*** and more specifically, violate Sherman Act *§ 2*, *15 U S C § 2*, as well as the Cartwright Act's prohibition on predatory practices, *Cal Bus & Prof Code § 17043* Thales seeks injunctive relief[2]

II. MAS's Alleged Predatory Conduct

Thales contends that its own average variable costs **[*4]** are approximately 25% lower than MAS's on the relevant IFE systems because MAS use a more costly architecture than the standardized Ethernet system employed by Thales Further, Thales alleges that MAS sold numerous IFE systems below its average variable costs, including sales to Japan Airlines, Thai Airways, Alitalia, and Emirates Complaint, ¶¶ 26-27 Thales alleges that MAS will successfully recoup the costs of its predatory pricing strategy by becoming the sole supplier of IFE systems

In terms of non-pricing anticompetitive conduct, Thales alleges that MAS representatives have made false representations regarding Thales' product to several customers Complaint, ¶ 28

III. Standard of Review

[1] Thales' Complaint suggests that installation in narrowbody aircraft is increasingly common as passengers have developed greater expectations for in-flight entertainment About 79% of new sales opportunities in narrowbody airplanes are with United States based airlines

[2] MAS also moves to strike Thales' request for restitution and disgorgement included in its Complaint Thales concedes to the granting of MAS's motion on these grounds as it seeks only injunctive relief Thales' prayer for restitution and disgorgement is stricken from the Complaint

Federal Rule of Civil Procedure 8(a) provides that a complaint shall contain "a short and plain statement" of the pleader's claim showing that the pleader is entitled to relief A motion to dismiss should not be granted unless it appears that the plaintiff can prove no set of facts in support of his claim that would entitle him to relief *Conley v Gibson, 355 U S 41, 45-46, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957)* In resolving a *Rule 12(b)(6)* motion, the Court must construe the complaint in the light most favorable to the plaintiff and must accept all well-pled factual allegations as true *Cahill v Liberty Mutual Ins Co, 80 F 3d 336, 337-38 (9th Cir 1996)*

IV. Thales' State Law Claims

A Jurisdiction **[*5]**

MAS first argues that Thales' California state law claims, Counts III and IV, must be dismissed for failure to state a claim because the Complaint is devoid of allegations that MAS's conduct occurred within the state or that Thales has suffered injury within the state Motion, at 2

"California law embodies a presumption against the extraterritorial application of its statutes" *Churchill Village, LLC v General Elec Co, 169 F. Supp. 2d 1119, 1126 (N D Cal 20000)*, aff'd, *361 F 3d 566 (9th Cir 2004)* California's Unfair Competition Law ("UCL") does not allow non-California residents to bring claims where the alleged misconduct or injuries did not occur in the state *Norwest Mortgage, Inc v Superior Court, 72 Cal App 4th 214, 222, 85 Cal. Rptr. 2d 18 (1999)*

MAS urges the Court to dismiss the case because Thales has failed to allege that any misconduct in the form of sales below cost, misrepresentations to customers, or otherwise, took place in California However, the Complaint is not without reference to California's relation to the action

First, the Complaint alleges that Thales maintains its IFE systems office in Irvine, California Complaint, ¶ 3

Second, the Complaint alleges that MAS controls a significant market share in the IFE systems market and that MAS does business in California Complaint, ¶¶ 2, 4

Third, Thales specifically alleges that the MAS decision-making body responsible for price **[*6]** quotations to commercial airlines is located in California Id

While Thales has therefore clearly pled that actionable conduct has occurred within the state, Thales has not pled the existence of any actual injury within the state In other words, Thales has not alleged the existence of any California IFE systems buyers, below cost sales in California, or actual Injury occurring within the state Thus, the question is whether the UCL applies to in-state conduct causing only out of state injury

MAS argues that the present dispute is controlled by *Norwest, 72 Cal App 4th at 225* & n 13 Norwest merely held that California statutory claims could not reach entirely out of state conduct causing out of state injuries As discussed, Thales has alleged that some portion of the conduct causing the alleged injuries took place in California To the contrary, Norwest bolsters Thales' position Plaintiffs in Norwest brought a Section 17200 action alleging that Norwest's "Forced Placement Insurance" program constituted an unfair business practice Norwest held that Category II plaintiffs, California non-residents complaining of injuries caused by conduct occurring in California, could proceed with Section 17200 claims *Id*, see also *Diamond Multimedia Systems, Inc v Superior Court, 19 Cal. 4th 1036, 1058-59, 80 Cal. Rptr. 2d 828, 968 P.2d 539 (1999)* Accordingly, Thales' **[*7]** allegations are sufficient to survive MAS's motion to dismiss

MAS's motion to dismiss Counts III and IV is denied

B. Preemption

In the alternative to its jurisdictional argument, MAS also argues that Counts III and IV are preempted by the *Commerce Clause of the United States Constitution* Motion, at 5

The *Commerce Clause* bars the exercise of state laws where the burden imposed on interstate commerce, and the ability of a national enterprise to function, outweighs any local benefits of applying state law See *Partee v San Diego Chargers Football Co, 34 Cal 3d 378, 383, 194 Cal. Rptr. 367, 668 P.2d 674 (1983)*, *Hebert v Los Angeles Raiders, Ltd, 23 Cal. App. 4th 414, 423, 29 Cal. Rptr. 2d 540 (1991)* MAS argues that application of California's antitrust laws to MAS's pricing would impose an impermissible burden on interstate commerce and is therefore preempted by the *Commerce Clause*

The crux of MAS's argument is that application of California's predatory pricing statutes to MAS's conduct in a worldwide market will result in conflicting rulings identifying the minimum price for MAS's IFE sales that will not expose MAS to antitrust hability The Court is not convinced

MAS appeals to language in a passage from *Flood v Kuhn, 443 F 2d 264 (2d Ctr 1971)*, aff'd, *407 U S 258, 92 S. Ct. 2099, 32 L. Ed. 2d 728 (1971)*, holding that state antitrust laws are not applicable to baseball because of the nature of that particular enterprise

> "[w]here the nature of an enterprise is such that differing state regulation, although not conflicting, requires the enterprise to comply **[*8]** with the strictest standard of several states in order to continue an interstate business extending over many states, the extraterritorial effect which the application of a particular state law would exact constitutes, absent a strong state interest, an impermissible burden on interstate commerce" *Id,*

Partee, 34 Cal 3d at 383 (applying the logic of Flood to the player-team-league relationships in the National Football League) Other cases considering the application of state ***antitrust law*** to professional sports leagues have applied the reasoning in Flood and similarly held *Flood, 443 F.2d at 267* (collecting cases)

MAS is not a professional sports league Rather, MAS is a business conducting a great deal of interstate commerce in a worldwide market Unlike professional sports leagues, entitles such as MAS are not uncommon, and do not depend on a nationally uniform set of rules for operation Outside of the world of professional sports leagues, courts have consistently ruled that the application of state antitrust laws is not preempted by the *Commerce Clause*, nor federal ***antitrust law*** See eg, *William Inglis & Sons Baking Co v ITT Continental Baking Co, 668 F.2d 1014, 1048-50 (9th Cir 1982)*, *Knevelbaard Dairies v Kraft Foods, Inc, 232 F 3d 979, 993-94 (9th Cir 2000)* In Knevelbaard, for example, the Ninth Circuit ruled that despite potential interstate effects, California could apply its antitrust and unfair competition statutes **[*9]** consistent with the *Commerce Clause*

Here, MAS has not shown the nature of its own business is, like the professional sports leagues, dependent on the uniform application of antitrust laws Further, it appears that California has a strong interest in enforcing its own antitrust laws *City of Oakland v Oakland Raiders, 174 Cal App 3d 414, 421-22, 220 Cal. Rptr. 153 (1985)*

Accordingly, Thales' state antitrust claims are not preempted by the *Commerce Clause*

C. Pleading MAS's Costs

MAS also challenges the sufficiency of Thales' *Section 17043* claim on the ground that Thales has failed to include allegations of MAS's cost of doing business Motion, at 13 MAS contends that a *Section 17043* plaintiff must plead not only the defendant's sale price, but also the defendant's cost of doing business MAS appeals to both *Independent Journal Newspapers v United Western Newspapers, Inc, 15 Cal App 3d 583, 587, 93 Cal. Rptr. 299 (1971)*, and *G H I I v MTS, Inc, 147 Cal App 3d 256, 275, 195 Cal. Rptr. 211 (1983)*, in support of this proposition

Both are readily distinguishable from the case at bar for several reasons Most importantly, neither *Independent Journal* nor *G H I I* applied the liberal notice pleading standards embodied in the Federal Rules Moreover, Independent Journal held only that a newspaper publisher selling weekly and daily newspapers, with the knowledge and easy access to the cost figure for advertising space in newspapers generally, failing to include such information in support of its below cost sales claim does not **[*10]** state a cause of action *Independent Journal Newspapers, 15 Cal App 3d at 587* G H I I held that similar allegations to those in Independent Journal were sufficient to state a cause of action because the plaintiff was in a "demonstrably poorer position than the plaintiffs in Independent Journal to speculate on a 'supposed' cost figure " *G H I I, 147 Cal App 3d at 276*

MAS contends that Thales' *Section 17043* claim fails because it does not include allegations regarding MAS's fully allocated or average total costs MAS argues that because Thales' Complaint notices that there are only three major manufacturers, Thales, MAS and Rockwell Collins, Thales should be privy to a competitors' cost information and therefore is not in the "demonstrably poorer position" to speculate that Justified the reversal of the dismissal of plaintiffs *Section 17043* claim in G H I I However, this argument is misplaced The informational advantage noted by Independent Journal was not a function of the number of competitors, but its own experience in publishing weekly newspapers similar to the defendants which would provide the basis for knowledge of a cost figure for advertising There is nothing to suggest that Thales was in such a position To the contrary, Thales' Complaint makes Thales' belief that it uses a relatively **[*11]** cheaper architecture than MAS Complaint, ¶ 24

Therefore, even under California's pleading standards, one might synthesize a rule suggesting that those privy to information that would support an educated guess as to the defendant's fully allocated costs must include that information in their pleadings in order to state a cause of action Even under that rule, however, Thales has satisfied its burden Thales' Complaint avers that MAS's average variable costs are approximately 25% higher than Thales on competing IFE systems Complaint, ¶ 24 Thales also details a number of MAS sales, and the percentage by which those sales undercut Thales' average variable costs For example, Thales alleges that Japan Airlines purchased an MAS system for $2 14 million per system, which was 15% lower than Thales' average variable cost Complaint, ¶ 26(a) From these figures, it is not difficult to derive that Thales' average variable costs on the relevant IFE system are $2 52 million and, assuming that MAS's average variable costs are 25% higher, MAS's average variable costs would be $3 15 million Fully allocated or average total cost is by definition equal or greater to average variable costs It follows that **[*12]** if MAS's bids undercut their own average variable costs, the sales also were below average total costs While analyzing the magnitude by which the alleged price undercut average variable cost may require a few elementary calculations, it cannot be said that the pleading is factually deficient even under California's more stringent pleading requirements

Accordingly, the Court finds that Thales has adequately pled its *Section 17043* claim

V. Federal *Rule 9(b)*

MAS also argues that each of Thales' four counts include allegations that fall under the ambit of *Federal Rule of civil Procedure 9(b)*'s specificity requirements Motion, at 8 MAS seeks to strike these allegations from the Complaint pursuant to *Federal Rule of civil Procedure 12(f)*.

MAS points to Thales' allegations of fraudulent conduct in the Complaint

> "MAS pays high commission rates with the knowledge, intention and direction that the agents will use a substantial portion of the money received from MAS to give valuable gifts and cash to government personnel, airline personnel and their relatives in exchange for the selection of the MAS Relevant IFE systems for purchase by the airline customers "

Complaint, ¶ 28 Thales also includes allegations that MAS sent an email message in a bid to Royal Brunei Airlines stating that the Thales **[*13]** TopSeries system had been removed from line fit offerability at Airbus, and that MAS also told another potential buyer, All Nippon Airways, that Royal Brunei was unsatisfied with Thales' product Complaint, ¶¶ 28(a), (b)

Rule 9(b) states in pertinent part

"In all averments of fraud or mistake, the circumstances constituting fraud or mistake shall be stated with particularly "

There can be no doubt as to the applicability of *Rule 9(b)* to both the state and federal causes of action *Vess v Ciba-Geigy Corp, 317 F 3d 1097, 1104-05 (9th Cir 2003)* It is also clear that *Rule 9(b)* applies to "averments of fraud" in all civil cases in federal district court even when fraud is not an essential element of the claim Where a plaintiff alleges a unified course of fraudulent conduct as the basis of a claim, the claim is said to be "grounded in fraud" or to "sound in fraud " In such a case, the entire pleading must satisfy the requirements of *Rule 9(b)* Id, see also *In re Stac Elecs Sec Litig, 89 F.3d 1399, 1404-05 (9th Ctr 1996)* On the other hand, where a plaintiff does not allege a unified course of fraudulent conduct, but rather alleges both fraudulent and non-fraudulent conduct as the basis for the claim, *Rule 9(b)* requires application only to those averments describing the former type of conduct *Vess, 317 F 3d at 1104* The purpose of requiring all averments of fraud to satisfy *Rule 9(b)* is to protect **[*14]** a defendant from the potential damage such allegations may cause to its reputation and goodwill See *In re Stac Elecs Litig, 89 F.3d at 1405*

Thales has alleged both fraudulent and non-fraudulent conduct as the basis for its claim Thales' Complaint asserts monopolization and attempted monopolization claims primarily based on the theory that MAS's sales below costs increased MAS's market power, and a larger course of conduct including commercial bribery and disparagement The crux of Thales' Complaint is MAS's alleged below cost sales MAS's opposing contention—that the thrust of Thales' Complaint are attempts to defraud Airlines into purchasing MAS IFE systems through misinformation, gifts and cash (Motion, at 9)—is misleading The alleged below-cost pricing scheme is not itself fraudulent, nor can it be fairly said to be part of a unified course of fraudulent conduct *Rule 9(b)* does not govern these allegations

MAS contends that other portions of MAS's conduct nevertheless do fall within *Rule 9(b)* MAS points to allegations of commercial bribery and disparagement Whether or not the particular allegations of bribery and disparagement require pleading fraud with particularly in this instance depends primarily on whether or not those allegations are **[*15]** fraud-based, not upon whether or not Thales has asserted these allegations as independent causes of action

After receiving supplemental briefing from the parties on the issue of whether commercial bribery and kickbacks fall under Rule 9's requirements, the Court concludes that they do See *Allwaste, Inc v Hecht, 65 F 3d 1523 (9th Cir 1995)* Thales' averments in Paragraph 28 do not satisfy Rule 9 The persons making and receiving the payments are not adequately identified Accordingly, MAS's motion to strike the allegations of commercial bribery is granted with leave to replead within ten days

With respect to the product disparagement allegations, Thales has alleged that MAS induced sales by knowingly misleading potential buyers into the belief that other customers were not satisfied with Thales' product Under California law, the "indispensable elements of a fraud claim include a false representation, knowledge of its falsity, intent to defraud, Justifiable reliance, and damages " *Moore v Brewster, 96 F 3d 1240, 1245 (9th Cir 1996)* (quoting *Bank of the West v Valley Nat'l Bank of Ariz, 41 F.3d 471, 477 (9th Cir 1994)* (quoting *Hackethal v Nat'l Cas Co, 189 Cal App 3d 1102, 234 Cal. Rptr. 853 (1987))* This averment is fraud based and must satisfy Rule 9

Rule 9(b) requires averments of fraud to identify "the who, what, when, where and how" of the misconduct charged *Cooper v Pickett, 137 F 3d 616, 627 (9th Cir 1997)* MAS objects to the allegations of misrepresentations to Royal Brunei Airlines and All Nippon Airways **[*16]** because Thales fails to allege the time, place and identities of the parties involved *Rule 9(b)* does not go so far as to require Thales to identify the name of each employee of Royal Brunet Airlines, All Nippon Airways, and MAS The Court finds the allegations sufficient in terms of identifying the parties involved However, the allegations do not completely satisfy the heightened pleading standards of *Rule 9(b)* because they fall to specify the time and place of the misrepresentations Accordingly, the Court partially grants MAS's motion to strike paragraphs 28(a) and 28(b) of the Complaint with leave ten days leave to replead

VI. Conclusion

MAS's motion to dismiss is denied

MAS's motion to strike is granted with leave to replead

MAS's motion for a more definite statement is dented in light of the grant to replead

Z-TEL Communs., Inc. v. SBC Communs., Inc.

United States District Court for the Eastern District of Texas, Texarkana Division

August 6, 2004, Decided ; August 6, 2004, Filed

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > General Overview

HN1[] **Motions to Dismiss, Failure to State Claim**

When considering a motion to dismiss under *Fed. R. Civ. P. 12(b)(6)*, a court must take the well-pleaded factual allegations of the complaint as true. All questions of fact and any ambiguities in the current controlling substantive law must be resolved in the plaintiff's favor. Given the Federal Rules' simplified standard for pleading, a court may dismiss a complaint only if it is clear that no relief could be granted under any set of facts that could be proved consistent with the allegations. Motions to dismiss for failure to state a claim are viewed with disfavor and are rarely granted. However, conclusory allegations or legal conclusions masquerading as factual conclusions will not suffice to prevent a motion to dismiss.

Communications Law > ... > Regulated Practices > Introducing Competition > Interconnection Agreements

HN5[] **Communications, Telecommunications Act**

To further its local-competition goal, the Telecommunications Act of 1996 imposes duties on incumbent local exchange carriers (ILECs) to provide access to their facilities and equipment to competing carriers. *47 U.S.C.S. § 251*. More particularly, in *§ 251(a)* and *(b)*, the 1996 Act imposes on every telecommunications carrier an affirmative duty to interconnect with other carriers, to follow stated rules regarding resale, and to provide nondiscriminatory access to telephone numbers and operator services, telephone poles, ducts, conduits, and rights-of-way. *§ 251(a)*, *(b)*. Under *§ 251(c)*, the ILEC bears additional duties, including the duty to negotiate interconnection agreements with any new carrier so requesting, to provide access to its network elements on an unbundled basis, to offer its retail telecommunications services for resale at wholesale rates, and to provide for collocation. *§ 251(c)*.

Communications Law > ... > Regulated Practices > Introducing Competition > Interconnection Agreements

HN6[] **Communications, Telecommunications Act**

47 U.S.C.S. § 252 governs negotiation and arbitration of interconnection agreements. Agreements voluntarily made may be entered into without regard to the specific duties imposed by *47 U.S.C.S. § 251(b)* and *(c)*. *47 U.S.C.S. § 252* identifies the procedure for agreements reached through mandatory arbitration, which are not exempted from the requirements outlined in *47 U.S.C.S. § 251*. In short, *47 U.S.C.S. §§ 251* and *252* of the Telecommunications Act of 1996 command incumbent local exchange carriers to interconnect with and assist new would-be competitors--obligations that telecommunications carriers did not previously have and would not have had under a free-market regime.

HN7[] **Communications, Telecommunications Act**

In the Telecommunications Act of 1996, Congress required network sharing with rivals.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN8[] Monopolies & Monopolization, Actual Monopolization

A monopolization claim has two elements: (1) the possession of monopoly power in the relevant market; and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident. Monopoly power is understood as the power to control prices or exclude competition. To safeguard the incentive to innovate, the possession of monopoly power will not be found unlawful unless it is accompanied by an element of anticompetitive conduct.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN9[] Monopolies & Monopolization, Attempts to Monopolize

The first step in any action brought under *15 U.S.C.S. § 2* of the Sherman Act is for the plaintiff to define the relevant product and geographic markets in which it competes with the alleged monopolizer, and with respect to the monopolization claim, to show that the defendant, in fact, possesses monopoly power.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN10[] Regulated Practices, Market Definition

In ascertaining the relevant product market for purposes of a *15 U.S.C.S. § 2* claim, courts consider the extent to which the seller's product is "interchangeable in use" and the degree of cross-elasticity of demand between the product itself and substitutes for it.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN11[] Relevant Market, Geographic Market Definition

For purposes of a *15 U.S.C.S. § 2* claim, a geographic market is defined as an "area of effective competition." This is the locale in which consumers of a product or service can turn to for alternative sources of supply.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN12[] Monopolies & Monopolization, Actual Monopolization

There are two ways to establish the first element of a monopolization claim, that is, that the defendant holds monopoly power. The first is by presenting direct evidence showing the exercise of actual control over prices or the actual exclusion of competitors. The second is by presenting circumstantial evidence of monopoly power by showing a high market share within a defined market.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN13[] Actual Monopolization, Anticompetitive & Predatory Practices

Modern monopolization litigation has focused on four types of conduct. The first genre concerns predatory pricing. The second genre concerns product innovation. Deliberate efforts to create incompatibility with a rival's products without offering performance enhancements or cost reductions for the monopolist's products might be actionable. The third genre concerns refusals to deal, including denials of access to essential facilities. The fourth genre concerns monopoly leveraging. Power gained through some natural and legal advantage such as a patent, copyright, or business acumen can give rise to liability if a seller exploits his dominant position in one market to expand his empire into the next.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN14[] Monopolies & Monopolization, Actual Monopolization

Exclusionary conduct is conduct, other than competition on the merits or restraints reasonably necessary to competition on the merits, that reasonably appears capable of making a significant contribution to creating or maintaining monopoly power. Generally, a finding of exclusionary conduct requires some sign that the monopolist engaged in behavior that--examined without reference to its effects on competitors--is economically irrational. When there is no other possible explanation for an action, there is a strong inference that it was taken for the purpose of harming competitors rather than otherwise advancing the monopolist's business.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN15[] Monopolies & Monopolization, Actual Monopolization

In a Sherman Act, *15 U.S.C.S. § 2*, case, only a thorough analysis of each fact situation will reveal whether a monopolist's conduct is unreasonably anti-competitive and thus unlawful. Legal presumptions that rest on formalistic distinctions rather than actual market realities are generally disfavored in ***antitrust law***. The United States Supreme Court has preferred to resolve antitrust claims on a case-by-case basis, focusing on the "particular facts" disclosed by the record.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN16[] Actual Monopolization, Anticompetitive & Predatory Practices

"Anticompetitive conduct" can come in too many different forms, and is too dependent upon context, for any court or commentator ever to have enumerated all the varieties.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN17[] Relevant Market, Geographic Market Definition

For purposes of a monopolization claim, where products are sold nationwide and transportation costs are insignificant, courts frequently define the geographic market as the entire nation. Although the geographic market in some instances may encompass the entire nation, under other circumstances it may be as small as a single metropolitan area.

Antitrust & Trade Law > Regulated Industries > Communications

Communications Law > Federal Acts > Telecommunications Act > General Overview

HN18[] Regulated Industries, Communications

Antitrust & Trade Law > Regulated Industries > Communications

Communications Law > Federal Acts > Federal Communications Act > Federal Preemption

Communications Law > Federal Acts > General Overview

Communications Law > Federal Acts > Telecommunications Act > General Overview

HN19[] Regulated Industries, Communications

The Telecommunications Act of 1996, Pub. L. No. 104-104, § 601(b)(1), 110 Stat. 56, is an antitrust-specific saving clause providing that nothing in the Act or the amendments made by the Act shall be construed to modify, impair, or supersede the applicability of any of the antitrust laws. 110 Stat. 143, *47 U.S.C.S. § 152* note. This bars a finding of implied immunity. The saving clause preserves those claims that satisfy established antitrust standards. But just as the 1996 Act preserves claims that satisfy existing antitrust standards, it does not create new claims that go beyond existing antitrust standards; that would be equally inconsistent with the saving clause's mandate that nothing in the Act modify, impair, or supersede the applicability of the antitrust laws.

Antitrust & Trade Law > Regulated Industries > Communications > Sherman Act

Communications Law > Federal Acts > Telecommunications Act > General Overview

Antitrust & Trade Law > Regulated Industries > Communications

HN20[] **Communications, Sherman Act**

Trinko does not admit to the proposition that the Telecommunications Act of 1996 displaces the Sherman Act, even when the two are covering precisely the same field.

Antitrust & Trade Law > Regulated Industries > Communications

HN21[] **Regulated Industries, Communications**

If an antitrust plaintiff's contention of voluntary (i.e., pre-statutory compulsion) telecommunications network sharing is substantiated, a viable cause of action may proceed in harmony with Trinko.

Antitrust & Trade Law > Regulated Industries > Communications

Antitrust & Trade Law > Regulated Industries > General Overview

HN22[] **Regulated Industries, Communications**

As a legal matter, Trinko instructs that antitrust liability is live and well in the context of regulated telecommunications.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN23[] **Actual Monopolization, Anticompetitive & Predatory Practices**

The refusal to deal legal theory is hardly novel. The basic rule is that in the absence of any purpose to create or maintain a monopoly, the Sherman Act does not restrict the long recognized right of a trader or manufacturer engaged in an entirely private business, freely to exercise his own independent discretion as to parties with whom he will deal.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN24[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Essential facilities is not a novel legal theory. The essential facilities doctrine has a long and respected history as part of U.S. ***antitrust law***. Essential facilities is a species of refusal to deal.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN25[] Actual Monopolization, Anticompetitive & Predatory Practices

The United States Supreme Court has acknowledged the "difficulty" manifest in its exclusionary conduct doctrine. The Court has stated that in part because it is sometimes difficult to distinguish robust competition from conduct with long-run anticompetitive effects, Congress authorized Sherman Act scrutiny of single firms only when they pose a danger of monopolization. Judging unilateral conduct in this manner reduces the risk that the antitrust laws will dampen the competitive zeal of a single aggressive entrepreneur. The Court and other courts have been careful to avoid constructions of *15 U.S.C.S. § 2* which might chill competition, rather than foster it. It is sometimes difficult to distinguish robust competition from conduct with long-term anticompetitive effects; moreover, single-firm activity is unlike concerted activity covered by *15 U.S.C.S. § 1*, which inherently is fraught with anticompetitive risk.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN26[] Sherman Act, Claims

In Aspen Skiing, the United States Supreme Court defines exclusionary conduct as that which (1) tends to impair the opportunities of rivals, but also (2) either does not further meritorious competition or does so in an unnecessarily restrictive way. In Eastman Kodak Co., the Supreme Court articulates a somewhat different formulation of exclusionary conduct. The second element of a *15 U.S.C.S. § 2* claim is the use of monopoly power to foreclose competition, to gain a competitive advantage, or to destroy a competitor.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN27[] Actual Monopolization, Anticompetitive & Predatory Practices

A genre of formulations of exclusionary conduct stresses that a firm does not engage in monopolization if its conduct is motivated by "valid business reasons," a "normal business purpose," or "legitimate competitive reasons." It is true that as a general matter a firm can refuse to deal with its competitors. But such a right is not absolute; it exists only if there are legitimate competitive reasons for the refusal.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN28[] Actual Monopolization, Anticompetitive & Predatory Practices

"Exclusionary" conduct is conduct, other than competition on the merits or restraints reasonably "necessary" to competition on the merits, that reasonably appears capable of making a significant contribution to creating or maintaining monopoly power. Exclusionary comprehends at the most behavior that not only (1) tends to impair the opportunities of rivals, but also (2) either does not further competition on the merits or does so in an unnecessarily restrictive way. To determine whether conduct is exclusionary, a court looks to the proffered business justification for the act.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN29[] **Actual Monopolization, Anticompetitive & Predatory Practices**

A monopolist is not forbidden to publicize its product unless the extent of this activity is so unwarranted by competitive exigencies as to constitute an entry barrier. The United States Court of Appeals for the Fifth Circuit has concluded that advertising that creates barriers to entry in a market constitutes predatory behavior of the type the antitrust laws are designed to prevent. The court has qualified this statement: without evidence of how advertising can act as a barrier to a plaintiff's participation in an industry, the court cannot conclude that the plaintiff is likely to succeed on this theory of predation.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Evidence > Inferences & Presumptions > General Overview

HN30[] **Actual Monopolization, Anticompetitive & Predatory Practices**

A plaintiff asserting a monopolization claim based on misleading advertising must overcome a presumption that the effect on competition of such a practice was de minimis. In its advertising, a producer is ordinarily permitted, much like an advocate at law, to bathe his cause in the best light possible. Advertising that emphasizes a product's strengths and minimizes its weaknesses does not, at least unless it amounts to deception, constitute anticompetitive conduct violative of *15 U.S.C.S. § 2*.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Evidence > Inferences & Presumptions > General Overview

HN31[] **Actual Monopolization, Anticompetitive & Predatory Practices**

The United States Court of Appeals for the Ninth Circuit has adopted a de minimus presumption concerning a monopolization claim based on misleading advertising and has laid out a six-part test that a plaintiff must satisfy to rebut the presumption: the statements at issue must be (1) clearly false; (2) clearly material; (3) clearly likely to induce unreasonable reliance; (4) made to unsophisticated parties; (5) continued for long periods; and (6) not readily cured by rivals. The Seventh Circuit is clear that all of these factors must be met for the case to survive summary judgment. The United States Court of Appeals for the Second Circuit has discussed this test favorably, but it is unclear whether the Second Circuit thinks each requirement is mandatory.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Evidence > Inferences & Presumptions > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Physicians

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

HN32[] **Actual Monopolization, Anticompetitive & Predatory Practices**

The United States Court of Appeals for the Sixth Circuit has noted that to survive summary judgment on the second prong of a monopolization claim premised primarily on allegedly false speech or advertising, the plaintiff is required to rebut a presumption that the impact on competition was de minimis, by showing two additional facts: (1) the advertising was clearly false, and (2) it would be difficult or costly for the plaintiff to counter the false advertising.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN33[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Misrepresentations and organized deception by a dominant firm may have *15 U.S.C.S. § 2* implications when used against a nascent firm just as it is entering the market. Such a firm has no established customer base and typically lacks the resources to answer the dominant firm's deception effectively. Of course, even honest advertising by a dominant firm can deter new entrants, but honest advertising is virtually always considered as competition on the merits.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN34[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Advertising creating barriers to entry in a market constitutes exclusionary conduct.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN35[] **Motions to Dismiss, Failure to State Claim**

On a motion to dismiss, the court is required to view all allegations in the light most favorable to the nonmovant.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

HN36[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

Noerr-Pennington immunity does not stem solely from the *First Amendment*; rather, it is inextricably associated with interpretations of the Sherman Act.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

HN37[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

The Noerr-Pennington doctrine confers immunity to private individuals seeking anticompetitive action from the government.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

Governments > Local Governments > Employees & Officials

HN38[] Exemptions & Immunities, Noerr-Pennington Doctrine

Noerr-Pennington immunity applies to any concerted effort to sway public officials regardless of the private citizen's intent.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN39[] Actual Monopolization, Anticompetitive & Predatory Practices

Predation by abuse of governmental procedures, including administrative and judicial processes, presents an increasingly dangerous threat to competition.

Communications Law > ... > Regulated Practices > Introducing Competition > Duties of Incumbent Carriers & Resellers

Communications Law > Federal Acts > Telecommunications Act > General Overview

Communications Law > ... > Telephone Services > Local Exchange Carriers > General Overview

Communications Law > ... > Regulated Practices > Introducing Competition > Interconnection Agreements

HN40[] Introducing Competition, Duties of Incumbent Carriers & Resellers

There is no doubt that under *47 U.S.C.S. § 251(c)* of the Telecommunications Act of 1996, the incumbent local exchange carrier bears, inter alia, the duty to negotiate interconnection agreements with any new carrier so requesting, to provide access to its network elements on an unbundled basis, to offer its retail telecommunications services for resale at wholesale rates, and to provide for collocation.

Antitrust & Trade Law > Regulated Industries > Communications

Communications Law > Federal Acts > Telecommunications Act > General Overview

Antitrust & Trade Law > Regulated Industries > General Overview

HN41[] Regulated Industries, Communications

The simple fact that one has duties under the Telecommunications Act of 1996 does not confer a grant of antitrust immunity relating thereto.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN42[] Actual Monopolization, Anticompetitive & Predatory Practices

Reputation is a very real capital asset to a business firm. Reputation is a basis for inducing others to engage in market or nonmarket transactions with a business. It cannot be said that, as a matter of law, a plaintiff's allegation that a defendant has harmed the plaintiff's reputation in the marketplace fails to come within the ambit of exclusionary conduct.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

HN43[] Regulated Practices, Private Actions

Courts should not tightly compartmentalize the varied factual components of an antitrust case.

Evidence > Admissibility > Procedural Matters > General Overview

HN44[] Admissibility, Procedural Matters

In the context of the adjudication of claims of insufficient evidence, aggregation is proper when a violation requires that a certain threshold be met and no claim standing alone is sufficient to meet the threshold. Aggregation is improper when cardinality is lacking or a plaintiff fails to prove an element essential to every claim.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN45[] Actual Monopolization, Anticompetitive & Predatory Practices

In a monopolization case conduct must always be analyzed "as a whole." A monopolist bent on preserving its dominant position is likely to engage in repeated and varied exclusionary practices. Each one viewed in isolation might be viewed as de minimis or an error in judgment, but the pattern gives increased plausibility to the claim. For example, a monopolist might accidentally file a single baseless infringement suit, but a pattern of such suits indicates willfulness.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN46[] Monopolies & Monopolization, Attempts to Monopolize

The basic rule is that in the absence of any purpose to create or maintain a monopoly, the Sherman Act does not restrict the long recognized right of trader or manufacturer engaged in an entirely private business, freely to exercise his own independent discretion as to parties with whom he will deal.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN47[] **Actual Monopolization, Anticompetitive & Predatory Practices**

The baseline rule regarding individual refusals to deal is that present law leaves the individual firm free to refuse to deal with others, unless the refusal is intended to support another illegal restraint or constitutes an attempt to monopolize.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Civil Procedure > Special Proceedings > Eminent Domain Proceedings > Jury Trials

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN48[] **Actual Monopolization, Anticompetitive & Predatory Practices**

No general nor absolute duty is imposed on a monopolist to deal with or cooperate with actual or would-be competitors; any of its actions may be condemned if the jury finds that the monopolist "willfully" acquired, maintained, or used monopoly power by anticompetitive or exclusionary means or for anticompetitive or exclusionary purposes. Such means or purposes are contrasted with "valid" or "legitimate business reasons." The United States Supreme Court's logic is apparently that legitimate business reasons prevent the characterization of a defendant's behavior or purpose as anticompetitive or exclusionary.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN49[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Aspen Skiing is at or near the outer boundary of *15 U.S.C.S. § 2* liability. The bottom line is that criticism notwithstanding, Aspen Skiing's holding about unilateral refusals to deal is good law.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN50[] **Actual Monopolization, Anticompetitive & Predatory Practices**

The unilateral termination of a voluntary (and thus presumably profitable) course of dealing suggests a willingness to forsake short-term profits to achieve an anticompetitive end.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN51[] **Actual Monopolization, Anticompetitive & Predatory Practices**

The exception in Aspen Skiing concerning unilateral refusals to deal is a narrow one.

Civil Procedure > Pleading & Practice > Motion Practice > Content & Form

HN52[] **Motion Practice, Content & Form**

It is a basic tenet of civil procedure that reply briefing may only respond to the allegations raised in the nonmovant's response. Affidavits may appropriately be produced with a reply brief when they respond to new issues which have arisen during briefing. A defendant certainly cannot raise an argument for the first time on a response to notice of supplemental briefing. To hold otherwise would countenance litigation by ambush.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Evidence > Burdens of Proof > General Overview

HN53[] **Actual Monopolization, Anticompetitive & Predatory Practices**

An antitrust plaintiff bears a heavy doctrinal burden to capture Aspen Skiing's narrow exception.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN54[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Essential facilities refers to a particular embodiment of the refusal to deal legal theory. The logical foundation of the refusals to deal legal concept applies with persuasive force to the essential facilities concept. The so-called "essential facility" doctrine is one of the most troublesome, incoherent and unmanageable of bases for Sherman Act, 15 U.S.C.S. § 2, liability.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN55[] **Actual Monopolization, Anticompetitive & Predatory Practices**

The essential facilities doctrine protects a competitor from having to enter an additional market with large capital requirements in order to compete. The core concern of the doctrine is that a monopolist possess a resource that is "essential" in some sense for the business of someone else, but that the monopolist refuses to share. By controlling the essential facility, a monopolist can potentially extend its monopoly power from one stage of production to another, and from one market to another.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN56[] **Actual Monopolization, Anticompetitive & Predatory Practices**

On at least three occasions, the United States Supreme Court has declined to recognize the essential facilities theory. The absence of Supreme Court recognition notwithstanding, every federal circuit court has interpreted this general monopolization standard to impose an antitrust duty to deal with rivals when sharing is feasible and a monopolist has developed a product that is so superior that it is "essential" for rivals to compete and cannot practicably be duplicated.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN57[] **Actual Monopolization, Anticompetitive & Predatory Practices**

An approach to the problem of a monopolist's refusal to deal is the so-called "bottleneck" theory. Under this approach, a monopolist who controls a facility or resource that is essential to competitive viability in the marketplace must grant access to it on reasonable terms to its competitors.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN58[] **Actual Monopolization, Anticompetitive & Predatory Practices**

To prevail on an essential facilities claim a plaintiff must show: (1) the defendant is a monopolist; (2) the facility is essential; (3) the defendant has the type of control over the facility that is forbidden by the Sherman Act; (4) duplication of the facility is unreasonable or impractical; (5) the defendant denied the plaintiff use of the facility; and (6) providing access to the plaintiff was feasible.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN59[] **Actual Monopolization, Anticompetitive & Predatory Practices**

The indispensable requirement for invoking the essential facilities doctrine is the unavailability of access to the "essential facilities"; where access exists the doctrine serves no purpose. Thus, it is said that essential facility claims should be denied where a state or federal agency has effective power to compel sharing and to regulate its scope and terms.

Antitrust & Trade Law > Regulated Industries > Communications

Communications Law > Federal Acts > Telecommunications Act > General Overview

HN60[] **Regulated Industries, Communications**

The Telecommunications Act of 1996's extensive provision for access makes it unnecessary to impose a judicial doctrine of forced access.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN61[] **Attempts to Monopolize, Elements**

To demonstrate attempted monopolization, a plaintiff must prove (1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize, and (3) a dangerous probability of achieving monopoly power. An attempted monopolization claim necessarily involves conduct which has not yet succeeded; otherwise, the plaintiff would bring an actual monopolization claim. Attempted monopolization under *15 U.S.C.S. § 2* is usually defined as an unsuccessful attempt to achieve monopolization.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Governments > Courts > Judicial Precedent

HN62[] **Actual Monopolization, Anticompetitive & Predatory Practices**

The United States District Court for the Eastern District of Texas, Texarkana Division, does not agree with the assertion that a monopoly leveraging claim is inconsistent with United States Supreme Court precedent under *15 U.S.C.S. § 2*.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN63[] **Price Fixing & Restraints of Trade, Tying Arrangements**

A "tying" arrangement is one in which a seller of a product or service refuses to sell a product desired by a buyer unless the buyer also agrees to purchase a second product which is not desired. The desired product is the "tying product," and the second product is the "tied product."

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN64[] **Price Fixing & Restraints of Trade, Tying Arrangements**

A tying arrangement exists when a seller refuses to sell one product, "the tying product," unless the buyer also purchases a second product, "the tied product."

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN65[] **Price Fixing & Restraints of Trade, Tying Arrangements**

A plaintiff must establish each of the following five elements for an illegal "tying" arrangement to exist: (1) there were two separate and distinct products, as opposed to components of a single product; (2) the two products were tied together, or customers were coerced into buying the tied product; (3) the seller possessed substantial economic power over the tying product; (4) the tie has an anticompetitive effect on the tied market; and (5) the tie affected more than an insubstantial volume of commerce.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN66[] Tying Arrangements, Sherman Act Violations

Tie-ins may be illegal under *15 U.S.C.S. § 1* of the Sherman Act. The United States District Court for the Eastern District of Texas, Texarkana Division, declines to read Trinko so as to lessen antitrust liability in contexts other than those addressed in that opinion.

Communications Law > Federal Acts > Telecommunications Act > General Overview

Communications Law > ... > Telephone Services > Local Exchange Carriers > General Overview

Communications Law > ... > Regulated Practices > Introducing Competition > Interconnection Agreements

HN67[] Federal Acts, Telecommunications Act

41 U.S.C.S. § 252 of the Telecommunications Act of 1996 establishes a remedial scheme for competitive local exchange carriers that believe they have been wronged by an incumbent local exchange carrier's failure to comply with the terms of an interconnection agreement.

Administrative Law > Judicial Review > Reviewability > Exhaustion of Remedies

HN68[] Reviewability, Exhaustion of Remedies

Federal courts must wait for regulatory agencies to perform their task.

Communications Law > Federal Acts > General Overview

Labor & Employment Law > Collective Bargaining & Labor Relations > Labor Arbitration > Enforcement

Communications Law > Federal Acts > Telecommunications Act > General Overview

Communications Law > ... > Regulated Practices > Introducing Competition > Interconnection Agreements

HN69[] Communications Law, Federal Acts

Under the Telecommunications Act of 1996, state regulatory bodies are charged with making the initial "determination" of any disputes between parties regarding the interpretation and enforcement of interconnection agreements. *47 U.S.C.S. § 252(e)(6)*. The Act provides that an interconnection agreement, reached either by negotiation or arbitration, must be submitted to the state commission for approval. This grant of power to state commissions necessarily includes the power to enforce the interconnection agreement.

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

Communications Law > Federal Acts > Telecommunications Act > General Overview

HN70[] **Reviewability, Jurisdiction & Venue**

See *47 U.S.C.S. § 252(e)(6)*.

Communications Law > Federal Acts > Telecommunications Act > General Overview

Energy & Utilities Law > Utility Companies > General Overview

HN71[] **Federal Acts, Telecommunications Act**

State regulatory agencies have the principal role in determining claims that arise under the Telecommunications Act of 1996. The Federal Communications Commission plainly expects state commissions to decide intermediation and enforcement disputes that arise after the approval procedures are complete.

Administrative Law > Judicial Review > Reviewability > Exhaustion of Remedies

Communications Law > Federal Acts > Telecommunications Act > Jurisdiction

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

Communications Law > Federal Acts > Telecommunications Act > General Overview

HN72[] **Reviewability, Exhaustion of Remedies**

Parties must first bring their claims of violations of *47 U.S.C.S. § 251* to the state public services commission before a federal court has jurisdiction over the matter.

Communications Law > Federal Acts > Telecommunications Act > General Overview

Contracts Law > Breach > General Overview

HN73[] **Federal Acts, Telecommunications Act**

A plaintiff cannot call a *47 U.S.C.S. § 252* violation by another name (i.e., breach of contract) and avoid the controlling legal standards.

Communications Law > ... > Telephone Services > Local Exchange Carriers > General Overview

HN74[] **Telephone Services, Local Exchange Carriers**

47 U.S.C.S. § 251 describes the interconnection duties required of incumbent local exchange carriers.

Administrative Law > ... > Formal Adjudicatory Procedure > Hearings > General Overview

Civil Procedure > Pleading & Practice > Pleadings > Supplemental Pleadings

HN75[] Formal Adjudicatory Procedure, Hearings

The Federal Communication Commission (FCC) rules state that when a party makes the election under 47 C.F.R. § 1.722 to request that the FCC bifurcate liability and damage questions, the damages proceeding is separate from and subsequent to the liability complaint. It does not follow that the damages proceeding is to be heard in federal court. This point is made clear in § 1.722(i)(1)(i), (ii).

Administrative Law > Agency Adjudication > Presiding Officers > Administrative Law Judges

Civil Procedure > Pleading & Practice > Pleadings > Supplemental Pleadings

Administrative Law > ... > Formal Adjudicatory Procedure > Hearings > General Overview

HN76[] Presiding Officers, Administrative Law Judges

See 47 C.F.R. § 1.722(i)(1).

Communications Law > Federal Acts > Telecommunications Act > General Overview

HN77[] Federal Acts, Telecommunications Act

See 47 U.S.C.S. § 208.

Administrative Law > Judicial Review > Reviewability > General Overview

Communications Law > Federal Acts > Federal Communications Act > Jurisdiction

Administrative Law > Judicial Review > General Overview

Administrative Law > Judicial Review > Remedies > Injunctions

Communications Law > Federal Acts > Federal Communications Act > General Overview

HN78[] Judicial Review, Reviewability

47 U.S.C.S. § 208(b)(3) references appeals under 47 U.S.C.S. § 402. Section 402 is entitled, "Judicial review of Commission's orders and decisions." The first sentence reads, "Any proceeding to enjoin, set aside, annul or suspend any order of the Commission under this Act." In other words, as the title of § 402 suggests, the rule envisages ordinary appeals. It is fairly obvious that an appeal is very different from a fresh action for damages in a district court.

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

Civil Procedure > ... > Pleadings > Amendment of Pleadings > General Overview

Communications Law > ... > Orders & Hearings > Complaints & Charges > Procedural Matters

Communications Law > Federal Acts > Federal Communications Act > General Overview

HN79[] **Reviewability, Jurisdiction & Venue**

The language of *47 U.S.C.S. § 207* is unambiguous: A complainant can file a complaint either with the Federal Communications Commission (FCC) or in federal district court, but not in both. *Section 207* draws no distinction between formal and informal complaints, and the fact that the FCC has decided to provide both formal and informal complaint proceedings does not alter the clear language of the statute. In the Fifth Circuit, regardless of whether a plaintiff filed a formal or informal complaint, *§ 207* is controlling.

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

Communications Law > Federal Acts > Federal Communications Act > General Overview

HN80[] **Reviewability, Jurisdiction & Venue**

47 C.F.R. § 1.722 does not envisage bifurcated damages/liability proceedings between the Federal Communications Commission and federal district courts.

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

Communications Law > Federal Acts > Federal Communications Act > General Overview

Communications Law > ... > Orders & Hearings > Complaints & Charges > Procedural Matters

HN81[] **Reviewability, Jurisdiction & Venue**

47 U.S.C.S. § 207 bars action in federal district court once an aggrieved party files a complaint with the Federal Communications Commission. This result obtains upon the filing of both formal and informal complaints.

Communications Law > Federal Acts > Federal Communications Act > General Overview

HN82[] **Federal Acts, Federal Communications Act**

See *47 U.S.C.S. § 202*.

Communications Law > Federal Acts > Federal Communications Act > General Overview

Communications Law > ... > Telephone Services > Local Exchange Carriers > General Overview

Communications Law > ... > Telephone Services > Long Distance Telephone Services > General Overview

HN83[] **Federal Acts, Federal Communications Act**

No Federal Communications Commission (FCC) decision has been cited in which the FCC has altered its view that billing and collection services provided by local exchange carriers to unaffiliated long-distance providers fall outside the scope of Title II of the Communications Act. Billing and collection services are subject to Title II, but only as to a carrier's own billing and collections.

Communications Law > Federal Acts > Federal Communications Act > Tariffs

Communications Law > Federal Acts > Federal Communications Act > General Overview

HN84[] **Federal Communications Act, Tariffs**

Although carrier billing and collection for a communication service that it offers individually or as a joint offering with other carriers is an incidental part of a communication service, carrier billing or collection for the offering of another unaffiliated carrier is not a communication service for purposes of Title II of the Communications Act. A plaintiff's reliance on the existence, or lack thereof, of a contractual relationship carries no weight in assessing this fundamental holding.

Communications Law > Federal Acts > Telecommunications Act > General Overview

HN85[] **Federal Acts, Telecommunications Act**

That a carrier's provision of services to itself can be used to judge service quality under *47 U.S.C.S. § 202(a)* is fairly undebatable. However, the focus on "quality" is only relevant as to the provision of service to other customers. Courts determining whether a carrier has unlawfully discriminated utilize a tripartite test analyzing: (1) whether the services are "like"; (2) if so, whether the carrier is offering the service to other customers at a "different" price or under "different" conditions than those offered to the petitioner; and (3) if such difference exists, whether that difference is unreasonable.

Communications Law > Federal Acts > Telecommunications Act > General Overview

HN86[] **Federal Acts, Telecommunications Act**

The bottom line is that the focus of a *47 U.S.C.S. § 202* inquiry is on discrimination among customers.

Communications Law > Federal Acts > Telecommunications Act > General Overview

Communications Law > ... > Regulated Practices > Introducing Competition > Resale of Services

HN87[] **Federal Acts, Telecommunications Act**

See *47 U.S.C.S. § 222*.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN88[] **Motions to Dismiss, Failure to State Claim**

Conclusory allegations or legal conclusions masquerading as factual conclusions will not suffice to prevent a motion to dismiss.

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN89[] Racketeering, Racketeer Influenced & Corrupt Organizations Act

To state a claim under the RICO statute, *18 U.S.C.S. § 1962*, a plaintiff must allege (1) the conduct (2) of an enterprise (3) through a pattern (4) of racketeering activity.

Evidence > Admissibility > Circumstantial & Direct Evidence

Torts > Business Torts > Fraud & Misrepresentation > General Overview

HN90[] Admissibility, Circumstantial & Direct Evidence

Since intent to defraud is generally not susceptible to direct proof, it usually must be proven by circumstantial evidence.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

Criminal Law & Procedure > ... > Fraud Against the Government > Mail Fraud > Elements

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > General Overview

Criminal Law & Procedure > ... > Fraud Against the Government > Mail Fraud > General Overview

Torts > Business Torts > Fraud & Misrepresentation > General Overview

HN91[] Heightened Pleading Requirements, Fraud Claims

Fed. R. Civ. P. 9 requires that the circumstances constituting wire and mail fraud be stated with particularity. However, *Rule 9* should be read together with *Fed. R. Civ. P. 8*, which requires only a short and plain statement of the claim showing that the pleader is entitled to relief.

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

Torts > Business Torts > Fraud & Misrepresentation > General Overview

Torts > ... > Causation > Proximate Cause > General Overview

HN92[] Racketeering, Racketeer Influenced & Corrupt Organizations Act

The "by reason of" language of RICO has been interpreted by the United States Supreme Court and to require a showing that the fraud was the "but for" cause and "proximate" cause of the injury. For a misrepresentation to cause an injury, there must be reliance. Knowledge of the truth defeats a claim of fraud because it eliminates the deceit as the "but for" cause of the damages.

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN93[] Racketeering, Racketeer Influenced & Corrupt Organizations Act

See *18 U.S.C.S. § 1962(b)*.

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN94[] Racketeering, Racketeer Influenced & Corrupt Organizations Act

In *18 U.S.C.S. § 1962(b)*, the words "acquire" and "maintain" are separated by the disjunctive word "or."

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

HN95[] Motions to Dismiss, Failure to State Claim

A complaint does not need to make a large number of allegations relating to the injury suffered. At the pleading stage, general factual allegations of injury resulting from the defendant's conduct may suffice, for on a motion to dismiss a court presumes that general allegations embrace those specific facts that are necessary to support the claim.

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN96[] Pleadings, Rule Application & Interpretation

Relatively few allegations are needed to state an injury under RICO.

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > Elements

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN97[] Racketeer Influenced & Corrupt Organizations Act, Elements

A parent and its wholly owned subsidiaries no more have sufficient distinctness to trigger RICO liability than to trigger liability for conspiring in violation of the Sherman Act, unless the enterprise's decision to operate though subsidiaries rather than divisions somehow facilitated its unlawful activity.

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN98[] Racketeering, Racketeer Influenced & Corrupt Organizations Act

The doctrine of distinctiveness instructs a court to be hesitant to cut off RICO plaintiffs before they have an opportunity to adduce "enterprise" evidence.

Antitrust & Trade Law > Exemptions & Immunities > Filed Rate Doctrine > Common Carriers

Communications Law > Federal Acts > Federal Communications Act > Tariffs

Antitrust & Trade Law > Exemptions & Immunities > Filed Rate Doctrine > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Filed Rate Doctrine > Public Utilities & Telecommunications Carriers

Communications Law > Federal Acts > General Overview

Communications Law > Federal Acts > Telecommunications Act > General Overview

Communications Law > Federal Acts > Telecommunications Act > Tariffs

Communications Law > ... > Telephone Services > Local Exchange Carriers > General Overview

Communications Law > ... > Orders & Hearings > Complaints & Charges > Rates

Communications Law > ... > Telephone Services > Local Exchange Carriers > Tariffs

HN99[] Filed Rate Doctrine, Common Carriers

47 U.S.C.S. § 203(a) of the Telecommunications Act of 1996 requires local exchange carriers to file with the Federal Communications Commission (FCC) tariffs showing all charges and showing the classifications, practices, and regulations affecting such charges. Under the filed rate doctrine, once a carrier's rate is approved by the FCC, the terms of the federal tariff are considered to be "the law" and to therefore conclusively and exclusively enumerate the rights and liabilities as between the carrier and the customer. The filed rate doctrine precludes the plaintiff in an antitrust suit from claiming speculative damages involving a hypothetical lower rate that would have been charged in the absence of the anticompetitive conduct and the acceptability of those rates to the appropriate regulatory agency. However, the filed rate doctrine does not apply to cases not involving rates or rate setting. The filed rate doctrine is inapplicable in a breach of contract dispute.

Business & Corporate Compliance > ... > Federal Unfair Competition Law > False Designation of Origin > Elements of False Designation of Origin

Contracts Law > ... > Sales of Goods > Breach, Excuse & Repudiation > General Overview

Trademark Law > ... > Federal Unfair Competition Law > Trade Dress Protection > General Overview

Antitrust & Trade Law > Consumer Protection > False Advertising > Lanham Act

Trademark Law > ... > Unfair Competition > Federal Unfair Competition Law > General Overview

Trademark Law > ... > Federal Unfair Competition Law > False Advertising > General Overview

HN100[] **False Designation of Origin, Elements of False Designation of Origin**

For purposes of the Lanham Act, courts have noted that the terms "advertising" and "promotion" should be given their plain and ordinary meanings. The courts are also in agreement, however, that the Lanham Act's reach is broader than merely the classic advertising campaign. In order for representations to constitute "commercial advertising or promotion" under § 43(a)(1)(B) (*15 U.S.C.S. § 1125(a)(1)(B)*), they must be: (1) commercial speech; (2) by a defendant who is in commercial competition with the plaintiff; (3) for the purpose of influencing consumers to buy the defendant's goods or services. While the representations need not be made in a "classical advertising campaign," but may consist instead of more informal types of "promotion," the representations (4) must be disseminated sufficiently to the relevant purchasing public to constitute "advertising" or "promotion" within that industry.

Antitrust & Trade Law > Consumer Protection > False Advertising > General Overview

Torts > ... > Defamation > Defenses > Fair Comment & Opinion

Trademark Law > ... > Federal Unfair Competition Law > Trade Dress Protection > General Overview

Trademark Law > ... > Federal Unfair Competition Law > False Advertising > General Overview

Business & Corporate Compliance > ... > Federal Unfair Competition Law > False Designation of Origin > Elements of False Designation of Origin

HN101[] **Consumer Protection, False Advertising**

The viability of any claim under § 43(a) (*15 U.S.C.S. § 1125(a)*) of the Lanham Act is a determination of whether the challenged statement is one of fact--actionable under § 43(a)--or one of general opinion--not actionable under § 43(a). Bald assertions of superiority or general statements of opinion cannot form the basis of Lanham Act liability. The statements at issue must be a specific and measurable claim, capable of being proved false or of being reasonably interpreted as a statement of objective fact. A statement of fact is one that (1) admits of being adjudged true or false in a way that (2) admits of empirical verification.

Antitrust & Trade Law > Consumer Protection > False Advertising > General Overview

Evidence > Types of Evidence > Circumstantial Evidence

Trademark Law > Likelihood of Confusion > Consumer Confusion > Surveys as Evidence of Confusion

Civil Procedure > Remedies > Damages > Monetary Damages

HN102[] **Consumer Protection, False Advertising**

Plaintiffs looking to recover monetary damages for false or misleading advertising that is not literally false must prove actual deception. Plaintiffs attempting to prove actual deception have to produce evidence of actual consumer reaction to the challenged advertising or surveys showing that a substantial number of consumers were actually misled by the advertisements. Actual consumer confusion often is demonstrated through the use of direct evidence, e.g., testimony from members of the buying public, as well as through circumstantial evidence, e.g., consumer surveys or consumer reaction tests.

Opinion

[*517] TABLE OF CONTENTS: ORDER ON DEFENDANTS' MOTION TO DISMISS

SECTION

ORDER

Before the Court is Defendants' Motion to Dismiss. (Doc. No. 7). A hearing was held on this motion April 8, 2004. After **[**3]** considering the motion and all subsequent briefing thereto, and the applicable law, the Court **grants in part and denies in part.**

Defendants' motion is **GRANTED** as to A) Plaintiffs Essential Facilities claim (Count No. 2), B) Breach of Contract claim (Count No. 11), and C) Telecommunications Act claims (Count Nos. 8, 9, and 10). Plaintiffs Essential Facilities Claim is **DISMISSED with prejudice.** By contrast, Plaintiff's "Breach of Contract" and Telecommunications Act claims are **DISMISSED without prejudice to repleading.**

The Court draws special attention to the Tying claim. (Count No. 5). As explained in Part XIII, E.4, *infra,* Defendants' motion is denied as to the Tying claim with a tying market defined as DSL service. Through its use of the disjunctive word "alternatively" Plaintiff's Complaint indicates that an alternative market for broadband internet access need not be considered. So as to avoid any confusion, Plaintiff's Tying claim involving a tying market for broadband internet access is **DISMISSED without prejudice to repleading.**

[*518] If Plaintiff chooses to replead any of the claims which are being dismissed without prejudice, it shall do so within **[**4]** thirty (30) days of the entry of this Order.

On all other claims, Defendants' motion is **DENIED.** Defendants urge dismissal of the state law claims if the federal causes of action fail. Not all of the federal causes of action having been found to fail, the state law claims receive no discussion in the Court's analysis.

I. INTRODUCTION

SBC Communications, Inc. (hereinafter referred to with its subsidiaries as "Defendant" or "Defendants") filed its Motion to Dismiss on November 24, 2003. (Doc. No. 7). Plaintiff filed its Response on January 6, 2004. (Doc. No. 22). On January 13, 2004, the Supreme Court handed down its decision in *Verizon Communications, Inc. v. Law Offices of Curtis V Trinko, LLP, 540 U.S. 398, 157 L. Ed. 2d 823, 124 S. Ct. 872 (2004)* (hereinafter, *"Trinko").* Justice Scalia delivered the Court's Opinion; Justice Stevens authored a concurrence joined by Justices Souter and Thomas. *Trinko* is a landmark case. In this order, the holding and implications of *Trinko* will be discussed at length. Briefly, the Court said that consumers could not make an antitrust claim against Verizon, the nation's largest regional bell operating company ("RBOC"), because **[**5]** it allegedly violated a requirement to share its network with rivals, as required by the 1996 Telecommunications Act. The linchpin of the *Trinko* opinion was the issue of anticompetitive intent.

There are obvious parallels between the issues the Supreme Court addressed in *Trinko* and the issues presented by the case at bar. Not surprisingly, in the briefs filed after the Supreme Court handed down its opinion, Defendants are emphatic that *Trinko* compels the conclusion that dismissal is warranted. Plaintiff is equally emphatic that *Trinko* bears only a facial similarity to the instant set of facts. At the April 8 hearing, arguments addressing the impact of *Trinko* occupied nearly all of the time allotted to the motion to dismiss.

II. 12(b)(6) STANDARD

HN1[] When considering a motion to dismiss under *Fed. R. Civ. P. 12(b)(6)*, the court must take the well-pleaded factual allegations of the complaint as true. "All questions of fact and any ambiguities in the current controlling substantive law must be resolved in the plaintiffs favor." *Lewis v. Fresne, 252 F.3d 352, 357 (5th Cir. 2001)*. "Given the Federal Rules' **[**6]** simplified standard for pleading, [a] court may dismiss a complaint only if it is clear that no relief could be granted under any set of facts that could be proved consistent with the allegations." *Swierkiewicz v. Sorema N.A., 534 U.S. 506, 514, 152 L. Ed. 2d 1, 122 S. Ct. 992 (2002)* (quotation omitted). Motions to dismiss for failure to state a claim are viewed with disfavor and are rarely granted. *See* *Southern Christian Leadership Conference v. Supreme Court, 252 F.3d 781, 786 (5th Cir. 2001)*. "However, 'conclusory allegations or legal conclusions masquerading as factual conclusions will not suffice to prevent a motion to dismiss.'" *Id.* (quoting *Fernandez-Montes v. Allied Pilots Ass'n, 987 F.2d 278, 284 (5th Cir. 1993))*.

HN2[] A plaintiff need not plead its antitrust claims with particularity. *See* *MCM Partners, Inc. v. Andrews-Bartlett & Assocs., 62 F.3d 967, 976 (7th Cir. 1995)* ("an antitrust plaintiff need not include 'the particulars of [its] claim' to survive a motion to dismiss") (citations omitted). *FED. R. CIV. P. 8(a)*, ***HN3***[] requiring plaintiff to provide a short and plain statement of **[**7]** its claim showing that it is entitled to relief, "applies with equal force in antitrust cases." *Delaware Health Care v. MCD Holding Co., 893 F. Supp. 1279, 1284 (D. Del. 1995)*. **[*519]** The Supreme Court has stated, ***HN4***[] "in antitrust cases, where the proof is largely in the hands of the alleged conspirators, dismissals prior to giving the plaintiff ample opportunity for discovery should be granted very sparingly." *Hospital Bldg. Co. v. Trustees of Rex Hosp., 425 U.S. 738, 746, 48 L. Ed. 2d 338, 96 S. Ct. 1848 (1976)* (citations and internal quotations omitted).

III. THE TELECOMMUNICATIONS ACT OF 1996

HN5[] To further its local-competition goal, the Telecommunications Act imposes duties on incumbent local exchange carriers ("ILECs") to provide access to their facilities and equipment to competing carriers. *47 U.S.C. § 251*. More particularly, in *§ 251(a)and (b)*, the 1996 Act imposes on every telecommunications carrier an affirmative duty to interconnect with other carriers, to follow stated rules regarding resale, and to provide nondiscriminatory access to telephone numbers and operator services, telephone poles, ducts, conduits, and rights-of-way. **[**8]** *Id.* *§ 251(a), (b)*. Under *§ 251(c)*, the incumbent local exchange carrier bears additional duties, including the duty to negotiate interconnection agreements with any new carrier so requesting, to provide access to its network elements on an unbundled basis, to offer its retail telecommunications services for resale at wholesale rates, and to provide for collocation. *Id.* *§ 251(c)*.

Section 252 ***HN6***[] governs negotiation and arbitration of interconnection agreements. *Id.* *§ 252*. Agreements voluntarily made may be entered into without regard to the specific duties imposed by *§ 251(b)and (c)*. *Section 252* identifies the procedure for agreements reached through mandatory arbitration, which are not exempted from the requirements outlined in *§ 251*. In short, *§§ 251and 252* of the 1996 Act command incumbent local exchange carriers to interconnect with and assist new would-be competitors -- obligations that telecommunications carriers did not previously have and would not have had under a free-market regime.

IV. OVERVIEW OF PLAINTIFF'S COMPLAINT

A. Plaintiff's Business Model

1. Introduction

Founded in 1998, Z-TEL (hereinafter, "Plaintiff') **[**9]** is a Tampa, Florida based competitive local exchange carrier (hereinafter, "CLEC"). Plaintiffs business model has two main parts.

2. Basic Services

First, Plaintiff is engaged in the business of repackaging and reselling telecommunications services provided by incumbent local exchange carriers ("ILECs"), such as Defendant. To perform this aspect of its business, Plaintiff leases access to the essential portions of Defendant's network. The capital investment in this fixed asset is so immense that it is practically infeasible to duplicate. It naturally and logically follows that access to the network is essential if competition in the market for retail telecommunications services is to ensue. ***HN7***[] In the Telecommunications Act of 1996, Congress required network sharing with rivals.

At this point some terminology is in order. "Switches" at a central office route incoming calls based on the number dialed, taking the place of telephone operators who manually connected a caller with the recipient of the call. When a call is made to a customer not connected directly to the caller's central office, the call is transported from the caller's central office to the intended recipient's central **[**10]** office. "Transport" refers to the transmission facilities that make this connection possible, including hard assets such as telephone poles, conduits, ducts, and rights of way. **[*520]** If the central offices are not directly connected by transport, then the call is transported to one or more "tandem switches," which are generally contained in intermediary central offices that join central offices and allow a call to eventually be transported to the intended recipient's central office, where it is then connected to the recipient's local loop. "Operations support systems" are the services and equipment necessary to operate, maintain, and repair switches, transport facilities, and tandem switches.

3. Enhanced Services

Second, the seemingly more dynamic aspect of Plaintiff's business consists of its "enhanced services" such as voice mail that may be accessed over the Internet, "find me" call-forwarding, which directs calls to multiple numbers when the first number dialed is not answered, and a unified voice-recognition messaging service that allows subscribers, simply by using their voice, to make calls or retrieve contact information from the email program used on their personal computer. **[**11]** Plaintiff first explains that Defendant does not offer these services. Plaintiff further explains that Defendant is hostile to the provision of enhanced services by others because (unlike the basic services described in Part TV, A.2, *supra)* enhanced services represent a salient marketplace opportunity to earn supra-competitive profits.

4. Baseline Complaint

As will be explained immediately below, Plaintiff cannot provide most of these enhanced services without access to Defendant's Advanced Intelligent Network ("AIN"). Plaintiff asserts that access is technologically feasible and can be provided without affecting Defendant's ability to serve its own customers.

B. Plaintiff's Baseline Complaint

Plaintiff's baseline complaint is that Defendant has denied Plaintiff (and other competitors) access to the AIN. "To compete in the enhanced services market, Z-TEL needs to interconnect its software databases and network with SBC's AIN facilities, including SBC's AIN and signaling databases." (Doc. No. 1, p. 16). In addition, Plaintiff briefly summarizes the following instances of allegedly wrongful conduct. Plaintiff maintains that Defendant has:

> 1) Completely **[**12]** denied access to and interconnection with essential network facilities that are required to provide customers enhanced services;

2) Completely denied access to and interconnection with essential network facilities that are required to provide customers basic local service;
3) Barred customers who use its DSL internet service from switching to Plaintiff or any other competitor;
4) Refused to allow its essential facilities to be used for the provision of local toll calls, despite express state and federal regulatory orders to do so, thereby requiring Plaintiff to purchase unnecessary additional facilities from long-distance carriers at a cost above that which is economically feasible;
5) Deliberately failed to provide timely information about customers who terminate their service with Plaintiff
6) Deliberately supplied false bills to Plaintiff for items it has not ordered or received, or at rates expressly rejected by state agencies;
7) Embarked on a malicious public campaign of disparagement, misrepresenting the products and services that Plaintiff and other competitors provide to the public; and

(Id, p. 3-4).

[*521] 8) Abused government processes. **[**13]**

(Id., p. 33).

V. MONOPOLIZATION: PREVALENT LEGAL STANDARDS

A. *Grinnell's* Two-Pronged Test

HN8[] A monopolization claim has two elements: 1) the possession of monopoly power in the relevant market; and 2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident. *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)*. "Monopoly power is understood as 'the power to control prices or exclude competition,'" *Stewart Glass & Mirror, Inc. v. U.S. Auto Glass Discount Ctrs., Inc., 200 F.3d 307, 315 (5th Cir. 2000)* *(quoting United States v. E. I. Du Pont de Nemours & Co., 351 U.S. 377, 391, 100 L. Ed. 1264, 76 S. Ct. 994 (1956))*, *reh'g denied, 2000 U.S. App. LEXIS 4258 (5th Cir. 2000)*. "To safeguard the incentive to innovate, the possession of monopoly power will not be found unlawful unless it is accompanied by an element of anticompetitive conduct." *Trinko, at 879*.

B. Product Markets and Geographic Markets

HN9[] The first step in any action brought under *§ 2 of the Sherman Act* **[**14]** is for the plaintiff to define the relevant product and geographic markets in which it competes with the alleged monopolizer, and with respect to the monopolization claim, to show that the defendant, in fact, possesses monopoly power. *See, e.g., Conwood Co., L.P. v. U.S. Tobacco Co., 290 F.3d 768, 782 (6th Cir. 2002)*; *see also Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263, 268-69 (2d Cir. 1979)*.

HN10[] In ascertaining the relevant product market, courts consider the extent to which the seller's product is "interchangeable in use" and the degree of "cross-elasticity of demand between the product itself and substitutes for it." *Apani Southwest, Inc. v. Coca-Cola Enters., 300 F.3d 620, 626 (5th Cir. 2002)*; *see also C.E. Servs., Inc. v. Control Data Corp., 759 F.2d 1241, 1245 (5th Cir. 1985)* *(citing Brown Shoe Co. v. United States, 370 U.S. 294, 325, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962))*.

HN11[] A geographic market is defined as an "area of effective competition." *Apani, 300 F.3d at 626* *(citing Jim Walter Corp. v. Federal Trade Com., 625 F.2d 676, 682 (5th Cir. 1980).* **[**15]** This is the locale in which consumers of a product or service can turn to for alternative sources of supply. *Re/Max Int'l, Inc. v. Realty One, Inc., 173 F.3d 995, 1016 (6th Cir. 1999)*.

C. Two Ways of Demonstrating That Defendant Holds Monopoly Power

HN12[] There are two ways to establish the first element, that is, that the defendant holds monopoly power. The first is by presenting direct evidence "showing the exercise of actual control over prices or the actual exclusion of competitors." *Id. (citing Byars v. Bluff City News Co., 609 F.2d 843, 850 (6th Cir. 1979))*. The second is by presenting circumstantial evidence of monopoly power by showing a high market share within a defined market. *See Coastal Fuels of Puerto Rico, Inc. v. Caribbean Petroleum Corp., 79 F.3d 182, 196-97 (1st Cir. 1996)*; *Rebel Oil Co. v. Atlantic Richfield Co., 51 F.3d 1421, 1434 (9th Cir. 1995)*.

D. Exclusionary Conduct Defined: An Overview

The indeterminate nature and logic of "exclusionary conduct" will be discussed at length in Part VIII, C., *infra.* In this section and the next, the Court offers only a brief overview. **[**16]** ***HN13***[] Modern monopolization litigation has focused on four types of conduct. The first genre concerns predatory **[*522]** pricing. *See Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 227, 125 L. Ed. 2d 168, 113 S. Ct. 2578 (1993)* (noting the "general implausibility of predatory pricing"). The second genre concerns product innovation. *See Northeastern Tel. Co. v. Am. Tel. & Tel. Co., 651 F.2d 76 (2d. Cir. 1981)* (holding that deliberate efforts to create incompatibility with a rival's products without offering performance enhancements or cost reductions for the monopolist's products might be actionable). The third genre concerns refusals to deal, including denials of access to essential facilities. *See Trinko.* The fourth genre concerns monopoly leveraging. *See Eastman Kodak Co. v. Image Technical Servs., 504 U.S. 451, 479 n. 29, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992)* ("The Court has held many times that power gained through some natural and legal advantage such as a patent, copyright, or business acumen can give rise to liability if 'a seller exploits his dominant position in one market to expand his empire into the next.'") *(quoting Times-Picayune Publishing Co. v. United States, 345 U.S. 594, 611, 97 L. Ed. 1277, 73 S. Ct. 872 (1953)).* **[**17]**

HN14[] Exclusionary conduct is conduct, other than competition on the merits or restraints reasonably necessary to competition on the merits, that reasonably appears capable of making a significant contribution to creating or maintaining monopoly power. *Taylor Publ'g Co. v. Jostens Inc., 216 F.3d 465, 475 (5th Cir. 2000)*. In *Stearns Airport Equip. Co. v. FMC Corp.,* the Fifth Circuit further explained:

> Generally, a finding of exclusionary conduct requires some sign that the monopolist engaged in behavior that--examined without reference to its effects on competitors--is economically irrational. When there is no other possible explanation for an action, there is a strong inference that it was taken for the purpose of harming competitors rather than otherwise advancing the monopolist's business.

170 F.3d 518, 523 (5th Cir. 1999).

HN15[] In a *Sherman Act § 2* case, only a thorough analysis of each fact situation will reveal whether the monopolist's conduct is unreasonably anti-competitive and thus unlawful. *Eastman Kodak Co. v. Image Technical Servs., 504 U.S. 451, 467, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992)* ("Legal presumptions that rest on formalistic **[**18]** distinctions rather than actual market realities are generally disfavored in ***antitrust law***. This Court has preferred to resolve antitrust claims on a case-by-case basis, focusing on the 'particular facts' disclosed by the record.").

E. Anticompetitive Conduct Takes Numerous Forms

HN16[] "'Anticompetitive conduct' can come in too many different forms, and is too dependent upon context, for any court or commentator ever to have enumerated all the varieties." *Caribbean Broad. Sys., Ltd. v. Cable & Wireless PLC, 331 U.S. App. D.C. 226, 148 F.3d 1080, 1087 (D.C. Cir. 1998)* (reversing in part the district court's dismissal of complaint and holding that radio station's claim that defendants made misrepresentations to advertisers and the government in order to protect its monopoly stated *§ 2 Sherman Act* claim). *See also Conwood Co., L.P. v. U.S. Tobacco Co., 290 F.3d 768, 784 (6th Cir. 2002) (quoting Caribbean Broad. Sys.).*

VI. THE FIRST PRONG OF GRINNELL IS SATISFIED

A. Plaintiff's Monopolization Claim

Plaintiffs Monopolization claim (Count One) reads as follows:

> SBC has monopoly power in both the basic local and enhanced **[**19]** services markets in each relevant geographic market **[*523]** and in the entirety of the SBC Region. Among other things, SBC owns and controls the only ubiquitous physical local telecommunications and enhanced services network within the SBC Region.

(Doc. No. 1, p. 36, P97)

> SBC has engaged in the anticompetitive conduct described above with the specific intent to maintain and extend its monopoly power and position in the basic local services and enhanced services markets. SBC's conduct has delayed and prevented Z-TEL's entry into these markets in one or more relevant geographic markets. SBC continues to dominate these markets through exclusionary conduct, to the detriment of consumers and competition.

(Id., P98).

B. Defendant Possesses Monopoly Power

1. Product Market

The relevant product market encompasses the exchange and sale of 1) basic local and 2) enhanced services telephony services.

2. Geographic Market

HN17[] Where products are sold nationwide and transportation costs are insignificant, courts frequently define the geographic market as the entire nation. *See Brown Shoe Co. v. United States, 370 U.S. 294, 336-37, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962)* **[**20]** ("Although the geographic market in some instances may encompass the entire Nation, under other circumstances it may be as small as a single metropolitan area."); *see also Apani Southwest, Inc. v. Coca-Cola Enters., 300 F.3d 620, 626 (5th Cir. 2002) (quoting Brown Shoe).* In the case at bar, the geographic market reaches the full scope of Defendant's service region. This service region includes many major population centers in the United States.

3. Defendant Offers No Resistance to Plaintiff's Allegation of Monopoly Power

Defendant's first argument in support of its motion to dismiss is captioned "Z-TEL Has Failed to Allege that Defendants Engaged in Exclusionary Conduct in Violation of *Section 2 of the Sherman Act*." (Doc. No. 7, p. 8). Since Defendant offers no resistance to Plaintiff's allegation of monopoly power, the Court finds the first element of *Grinnell* satisfied. The viability of Plaintiff's monopolization claim (Count One) therefore depends on the appropriate characterization of the allegedly anticompetitive conduct attributable to Defendant.

VII. THE INTERSECTION OF ANTITRUST LIABILITY AND TELECOMMUNICATIONS REGULATION: DEFENDANT'S MOST [21] SWEEPING ARGUMENT FOR DISMISSAL**

A. Defendant Attacks the Vitality of Antitrust Liability in This Area of Law

As an initial matter, the Court must address an issue at the intersection of antitrust liability and telecommunication regulation. Defendant relies on *Cavalier Tel., LLC v. Verizon Va., Inc., 330 F.3d 176 (4th Cir. 2003)*, *pet'n for cert. denied by Cavalier Tel., LLC v. Verizon Va., Inc., 540 U.S. 1148, 157 L. Ed. 2d 1041, 124 S. Ct. 1144 (Jan. 20, 2004)* and *Goldwasser v. Ameritech Corp., 222 F.3d 390 (7th Cir. 2000)* for the proposition that antitrust liability is highly circumspect in light of the regulatory framework enacted by Congress in the 1996 Telecommunications Act. (Doc. No. 7, p. 8-10). Defendant maintains that Plaintiffs allegations are "indistinguishable" from those found unavailing as a matter of law in these two cases. *Id. at 8*. In addition, on June 28, Defendant submitted a notice of supplemental authority **[*524]** (Doc. No. 155) bringing to the Court's attention a recent opinion from the Eleventh Circuit, *Covad Communications Co. v. Bellsouth Corp., 374 F.3d 1044, 2004 U.S. App. LEXIS 12861 (11th Cir. 2004).* **[**22]**

At the hearing, Plaintiff loudly resisted this argument by directing the Court to the 1996 Telecom Act's Savings Clause, Section 601(b)(1): **HN18**[] "Nothing in this Act or the amendments made by this Act shall be construed to modify, impair, or supersede the applicability of any of the antitrust laws." *(See also* Doc. No. 22, p. 4).

B. Defendant's Argument

In its Motion to Dismiss, Defendant declares that all of Plaintiffs *§ 2* claims fail because Plaintiff fails to sufficiently allege exclusionary conduct.

> Allegations like those asserted by Z-TEL fail to state a claim under *Section 2* because the antitrust laws do not require firms, including lawful monopolists, to dismantle themselves for the benefit of competitors - which is exactly what Z-TEL demands.

(Doc. No. 7, p. 8).

On the opening page of its Reply, Defendant is emphatic, *"Trinko* definitely bars all of Z-TEL's antitrust claims related to disputes over access to defendants' local telephone networks." (Doc. No. 29, p. 1).

C. Plaintiff's Argument

In its Sur-Reply, Plaintiff explains:

> Of course, ***antitrust law*** has long recognized that a monopolist can violate 'established antitrust **[**23]** standards' in a variety of ways, including the refusal to deal and essential facilities doctrine that the plaintiff relied on in *Trinko.* But here Z-TEL has alleged numerous forms of exclusionary conduct, apart from these two doctrines.

(Doc. No. 37, p. 2).

Plaintiff directs the Court to Exhibit A of its Sur-Reply. Exhibit A is a summary comparison of the factual allegations at issue in *Trinko* and those facts alleged in the case at bar.

D. *Trinko* Addressed the Scope of its Holding

In *Trinko's* introductory paragraph, the Supreme Court explained, "In this case we consider whether a complaint alleging breach of the incumbent's duty under the 1996 Act to share its network with competitors states a claim under *§ 2 of the Sherman Act*, 26 Stat 209." *124 S. Ct. at 875*. In addition, the Court spoke at length about the antitrust Saving Clause:

> Section 601(b)(1) of the Telecommunications Act of 1996 (1996 Act), *Pub. L. No. 104-104, 110 Stat. 56*, **HN19**[] is an antitrust-specific saving clause providing that nothing in the Act or the amendments made by the Act shall be construed to modify, impair, or supersede the applicability of any of the antitrust **[**24]** laws. 110 Stat. 143, *47 U.S.C.S. § 152*, note. This bars a finding of implied immunity. The saving clause preserves those claims that satisfy established antitrust standards. But just as the 1996 Act preserves claims that satisfy existing antitrust standards, it does not create new claims that go beyond existing antitrust standards; that would be equally inconsistent with the saving clause's mandate that nothing in the Act modify, impair, or supersede the applicability of the antitrust laws.

Trinko, at 878 (citations omitted).

E. Defendant's Reliance on *Goldwasser* Is Misplaced

1. The First Section of *Goldwasser* Successfully Anticipated Arguments Found to be Availing in *Trinko*

In *Goldwasser,* a class action, the plaintiff consumers alleged that the defendant, **[*525]** a local telephone service provider, improperly used its monopoly power to engage in exclusionary practices which prevented competitors from entering the market. For analytical purposes, the Court will divide the structure of *Goldwasser* into two (2) sections. In the first part of the opinion, the Seventh Circuit held that, while the plaintiffs had standing to **[**25]** assert their antitrust claims, the plaintiffs failed to allege any wrongful conduct independent of defendant's alleged failure to comply with the requirements of the 1996 Act.

> Only if *Section 2* somehow incorporates the more particularized statutory duties the 1996 Act has imposed on ILECs like Ameritech would Ameritech's alleged failure to comply with the 1996 Act be, in itself, also an antitrust violation.

222 F.3d, at 396.

It is clear that in the first part of *Goldwasser,* the Seventh Circuit successfully anticipated the arguments which were adopted four years later by the Supreme Court in *Trinko.*

2. The Second Section of *Goldwasser* Is Dissonant With the Holding of *Trinko*

In the second part of *Goldwasser,* the Seventh Circuit was clear. "The 1996 Act is, in short, more specific legislation that must take precedence over the general antitrust laws, where the two are covering precisely the same field." *222 F.3d 390, 401 (7th Cir. 2000)*. In *Trinko,* the Supreme Court held to the contrary. "The 1996 Act preserves claims that satisfy existing antitrust standards . . ." *Trinko, at 878*. Moreover, *Trinko* ***HN20***[] does **[**26]** not admit to the proposition that the 1996 Act displaces the *Sherman Act*, even when the two are covering precisely the same field. To the opposite, the principal holding of *Trinko* rests on the Supreme Court's conclusion that Verizon's conduct respecting network access did not usefully speak to its monopolistic aspirations.

> The complaint does not allege that Verizon voluntarily engaged in a course of dealing with its rivals, or would ever have done so absent statutory compulsion. **Here, therefore, the defendant's prior conduct sheds no light upon the motivation of its refusal to deal upon whether its regulatory lapses were prompted not by competitive zeal but by anticompetitive malice.** The contrast between the cases is heightened by the difference in pricing behavior. In *Aspen Skiing,* the defendant turned down a proposal to sell at its own retail price, suggesting a calculation that its future monopoly retail price would be higher. Verizon's reluctance to interconnect at the cost-based rate of compensation available under *§ 251(c)(3)* tells us nothing about dreams of monopoly.

Trinko, at 879-880 (emphasis added) (citations omitted).

In the case at **[**27]** bar, Plaintiff seeks to show that Defendant voluntarily shared its network before the enactment of the 1996 Act. This argument will be more fully addressed in Part IX, D. 2., *infra.* For present purposes, the Court simply notes that, as a matter of logic, ***HN21***[] if an antitrust plaintiffs contention of voluntary (i.e., pre-statutory compulsion) network sharing is substantiated, a viable cause of action may proceed in harmony with *Trinko.* The second part of *Goldwasser* would preclude this possibility.

F. *Cavalier* is Distinguishable

1. *Cavalier* Anticipated Arguments Later Adopted in *Trinko*

In *Cavalier Tel., LLC v. Verizon Va., Inc., 330 F.3d 176 (4th Cir. 2003)*, the plaintiff, a competitive local exchange carrier, alleged that the defendant, an incumbent **[*526]** local exchange carrier, deliberately created problems in the implementation of the interconnection agreement to exclude the plaintiff as a competitor. *Id. at 179-181* (detailing seven major problematic areas alleged by the plaintiff). The Fourth Circuit determined that the district court properly granted the defendant's motion to dismiss. The Court's reasoning was that the **[**28]** conduct alleged would not, independent of the Telecommunications Act of 1996, violate duties imposed under the Sherman Act.

> Thus, when we focus on the conduct alleged by Cavalier in the complaint before us to determine whether it amounts to breaches of duties imposed for the first time and only by the Telecommunications Act, we conclude

> that the conduct alleged would not, independent of the Telecommunications Act, violate duties imposed under the Sherman Act.

Id. at 190.

In this respect, *Cavalier* perfectly anticipates the arguments adopted by the Supreme Court in *Trinko.* However, for the reasons explained immediately below, Cavalier is inapposite to the facts in the case at bar.

2. The Plaintiff in *Cavalier* Alleged Only Breaches of Duties That Did Not Exist Prior to the Enactment of the Telecommunications Act of 1996

In *Cavalier,* the court was clear, "Cavalier's complaint alleges only breaches of duties that did not exist prior to the enactment of the Telecommunications Act. . . ." *Id.* The reasoning articulated in the immediately foregoing section concerning *Goldwasser v. Ameritech Corp.* is equally applicable here. **[**29]** The Court will briefly review. If Plaintiff's contention of voluntary (i.e., pre-statutory compulsion) network sharing is substantiated, a viable antitrust claim could stand in harmony with *Trinko. Cavalier* is in harmony with *Trinko.* However, over a relevant range, *Cavalier* is inapposite to the case at bar since Plaintiff seeks to demonstrate violations of duties which did exist prior to the enactment of the 1996 Act.

G. *Covad* is Distinguishable

In *Covad Communications Co. v. Bellsouth Corp.,* the plaintiffs' claims were grouped into three forms of alleged anticompetitive conduct: refusal to deal, essential facilities, and price squeezing. The refusal to deal claim was dismissed because the relationship between the parties was mandated by the Telecommunications Act; it was not a voluntary agreement between customers. The essential facilities claim was dismissed because access to the telephone provider's infrastructure could be compelled under the Telecommunications Act. However, the price squeezing claim survived because it was based on traditional antitrust doctrine and was not specifically barred by judicial precedent outlining the relationship between **[**30]** the Telecommunications Act and the Sherman Act.

Speaking about the onus placed on ILECs by the 1996 Act, Judge Barkett explained:

> Trinko, however, treats the interconnection agreement between AT&T and Verizon as a mandatory accord between competitors, not a voluntary agreement between customers. Trinko, 124 S. Ct. at 880. That Verizon also supplies wholesale unbundled network elements at a cost-based rate to AT&T does not, in the Court's view, make the relationship a non-competitive one. Moreover, Trinko emphasizes the coercive effect of the FTCA on incumbent LECs such as Verizon who - but for the FTCA - would not be required to make their network elements (including OSS) available to **[*527]** third parties such as AT&T. In short, Covad's refusal-to-deal claims do not survive Trinko and must be dismissed.

374 F.3d 1044, 2004 U.S. App. LEXIS 12861, *12-13 (11th Cir. 2004).

Regarding the status of *Aspen's* refusal to deal doctrine after *Trinko,* Judge Barkett stated, "Trinko now effectively makes the unilateral termination of a voluntary course of dealing a requirement for a valid refusal-to-deal claim under Aspen." 2004 U.S. App. LEXIS 12861 at *12.

Unlike the plaintiff in **[**31]** Covad, Plaintiff in the case at bar adduces evidence that Defendant shared its network before it was legally required to do so. It follows that *Covad* is not perfectly apposite precisely because of this distinction in the pleadings.

H. Conclusion

HN22[] As a legal matter, *Trinko* instructs that antitrust liability is live and well in the context of regulated telecommunications. The issue to be decided by this Court is whether or not Plaintiff's complaint sufficiently alleges violations of doctrinally established antitrust standards.

VIII. MONOPOLIZATION: ANALYSIS OF PLAINTIFF'S ALLEGATIONS OF EXCLUSIONARY CONDUCT FALLING INTO CATEGORIES NOT ADDRESSED IN *TRINKO*

A. The Court Does Not Adopt Plaintiff's Nomenclature

1. An Area of Potential Confusion

As an initial matter, the Court will clear up an area of potential confusion.

Plaintiff explains:

> Z-Tel's Complaint, therefore, unlike Trinko's, alleges conduct constituting violations of 'established antitrust standards' sufficient to state a claim. It does so under the refusal to deal and essential facilities doctrines that were at issue in *Trinko* and under **general § 2 [**32] standard for exclusionary conduct.**

(Doe. No. 37, p. 3) (emphasis added).

2. The Refusal to Deal Legal Theory

The Court declines to adopt Plaintiff's nomenclature. The refusal to deal legal theory will be addressed at length in Part IX, *infra.* However, for present purposes, the Court notes that ***HN23***[] this theory is hardly novel. In *United States v. Colgate & Co.,* the Supreme Court stated the basic rule that "in the absence of any purpose to create or maintain a monopoly, the act does not restrict the long recognized right of trader or manufacturer engaged in an entirely private business, freely to exercise his own independent discretion as to parties with whom he will deal." *250 U.S. 300, 307, 63 L. Ed. 992, 39 S. Ct. 465, 1919 Dec. Comm'r Pat. 460 (1919)*.

3. The Essential Facilities Legal Theory

Essential facilities will be addressed at length in Part X, *infra.* For present purposes, the Court simply notes that ***HN24***[] essential facilities is also not a novel legal theory. The former chairman of the Federal Trade Commission, Professor Pitofsky, explains, "the essential facilities doctrine has a long and respected history as part of U.S. ***antitrust law***." Robert Pitofsky, et al., *The Essential Facilities* **[**33]** *Doctrine Under U.S.* ***Antitrust Law****,* 70 ANTITRUST L.J. 443, 445 (2002).

Essential facilities is a species of refusal to deal. As Professor Hovenkamp explains, the two are close cousins:

> But the defendant's duty to deal in the essential facility cases appears to have about the same scope as the defendant's duty to deal in the *Aspen* case, where the Court did not rely on the essential facility doctrine.

HERBERT HOVENKAMP, FEDERAL ANTITRUST POLICY, THE LAW OF COMPETITION AND ITS PRACTICE 307 (2d ed. 1999) (hereinafter, "HOVENKAMP").

[*528] In Parts IX and X, *infra,* the Court will devote considerable attention to *Trinko* and its impact on the doctrines of 1) refusals to deal and 2) essential facilities. However, in its analysis, the Court does not elevate these two types of exclusionary conduct above the level of importance assigned to those types of exclusionary conduct Plaintiff refers to as "general." The discussion immediately below is devoted to an analysis of Plaintiff's allegations of exclusionary conduct falling into certain categories not addressed in *Trinko.* The distinction is simply for purposes of methodological convenience.

B. [34] Plaintiff Alleges Four Clusters of Exclusionary Conduct**

1. Product Disparagement Through Public Advertising

Plaintiff's allegations concerning defamation and disparagement are contained in paragraphs 89-91. (Doc. No. 1, p. 34). The crux of these allegations are that Defendant refers to itself "as a real phone company" while mockingly referring to Plaintiff in public advertising as a "flashy" imposter.

2. Abuse of Government Processes

Plaintiff's abuse of government process allegations are contained in paragraphs 85-88 of the Complaint. (Doc. No. 1, p. 33-34). The gestalt of these allegations is that Defendant seeks to force competitors to expend time and resources contesting Defendant's noncompliance with the orders of state utility commissions. Plaintiff claims that this conduct is not shielded by *Noerr-Pennington. Id.* at p. 34.

3. Provision of Faulty Line Loss Information

Plaintiff's allegations concerning the provision of faulty "line loss" information are presented in paragraphs 70-78 of its Complaint. (Doc. No. 1, p. 27-29). Plaintiff relies on Defendant's operational support systems to inform it when one of Plaintiff's customers switches service providers. **[**35]** Plaintiff alleges, "Customer records were mislabeled at rates in excess of 60% in some months and were not timely delivered under SBC's own standards at rates approaching 90% in several months." *Id.* at p. 28. "Between December 2000 and February 2002, Z-TEL complained to SBC about problems with the line loss notification more than 75 times." *Id.* Plaintiff quotes a Bank of America Securities report for the proposition that this conduct reflects a deliberate strategy on Defendant's part to increase the "churn rate" of its rivals. *Id.* at p. 27.

4. Allegations of 1) Increased Costs and 2) Harm to Reputation Through Defendant's Submission of False Bills

Plaintiff's allegations concerning Defendant's habitual refusal to provide 1) accurate billing for the leased network facilities and 2) call records are contained in paragraphs 79-84 of the Complaint. (Doc. No. 1, p. 30-32). "As a result, Z-TEL had literally hundreds of billing disputes with SBC and was forced to expend undue resources on deciphering SBC's bills." *Id.* at p. 30. Plaintiff quotes one of Defendant's former employees who states that he was instructed to prepare false bills. *Id.* at p. 32.

C. [36] Analysis**

1. The Second Prong of *Grinnell:* the Indeterminate Nature and Logic of Exclusionary Conduct

a. The Supreme Court Has Recognized the Difficulty in Differentiating 1) Robust Competition from 2) Conduct With Long-Term Anticompetitive Effects

On at least two occasions, ***HN25***[] the Supreme Court has acknowledged the "difficulty" **[*529]** manifest in its exclusionary conduct doctrine.

In *Copperweld Corp. v. Independence Tube Corp.,* the Court stated:

> In part because it is sometimes difficult to distinguish robust competition from conduct with long-run anticompetitive effects, Congress authorized Sherman Act scrutiny of single firms only when they pose a danger of monopolization. Judging unilateral conduct in this manner reduces the risk that the antitrust laws will dampen the competitive zeal of a single aggressive entrepreneur.

467 U.S. 752, 767, 81 L. Ed. 2d 628, 104 S. Ct. 2731 (1984).

In *Spectrum Sports v. McQuillan,* the Court further explained:

> This Court and other courts have been careful to avoid constructions of *§ 2* which might chill competition, rather than foster it. It is sometimes difficult to distinguish robust competition from conduct with long-term **[**37]** anticompetitive effects; moreover, single-firm activity is unlike concerted activity covered by *§ 1*, which 'inherently is fraught with anticompetitive risk.'

506 U.S. 447, 458, 122 L. Ed. 2d 247, 113 S. Ct. 884 (1993) *(citing Copperweld).*

b. The *Aspen* Formulation

HN26[] In *Aspen Skiing Co. v. Aspen Highlands Skiing Corp.,* the Supreme Court defined exclusionary conduct as that which 1) tends to impair the opportunities of rivals, but also 2) either does not further meritorious competition or does so in an unnecessarily restrictive way. *472 U.S. 585, 605 n.32, 86 L. Ed. 2d 467, 105 S. Ct. 2847 (1985)* (quoting III PHILLIP AREEDA & DONALD F. TURNER, ***ANTITRUST LAW***: AN ANALYSIS OF ANTITRUST PRINCIPLES AND THEIR APPLICATION 78 (1978)).

c. The *Kodak* Formulation

In *Eastman Kodak Co. v. Image Technical Servs.,* the Supreme Court articulated a somewhat different formulation of exclusionary conduct. "The second element of a *§ 2* claim is the use of monopoly power 'to foreclose competition, to gain a competitive advantage, or to destroy a competitor.'" *504 U.S. 451, 482-83, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992) (quoting United States v. Griffith, 334 U.S. 100, 107, 92 L. Ed. 1236, 68 S. Ct. 941 (1948))*.

d. The [38] 'Business Purpose' Formulation**

HN27[] Another genre of formulations stresses that a firm does not engage in monopolization if its conduct is motivated by "valid business reasons," a "normal business purpose," or "legitimate competitive reasons." *See Kodak, 504 U.S. 451, 483, 119 L. Ed. 2d 265, 112 S. Ct. 2072* ("Liability turns, then, on whether 'valid business reasons' can explain Kodak's actions."); *Id.* at n. 32 ("It is true that as a general matter a firm can refuse to deal with its competitors. But such a right is not absolute; it exists only if there are legitimate competitive reasons for the refusal."); *Aspen, 472 U.S., at 608* ("[Defendant] did not persuade the jury that its conduct was justified by any normal business purpose.").

e. Fifth Circuit Doctrine

As mentioned in Part V. D., *supra,* the two hallmark Fifth Circuit cases defining exclusionary conduct are *Taylor Publ'g Co. v. Jostens Inc., 216 F.3d 465 (5th Cir. 2000)* and *Stearns Airport Equip. Co. v. FMC Corp., 170 F.3d 518 (5th Cir. 1999)*. In *Taylor,* the court spoke in greater detail than it did in *Stearns Airport.*

> **HN28**[] 'Exclusionary' conduct **[**39]** is conduct, other than competition on the merits or restraints reasonably 'necessary' to competition **[*530]** on the merits, that reasonably appears capable of making a significant contribution to creating or maintaining monopoly power.
>
> Exclusionary comprehends at the most behavior that not only (1) tends to impair the opportunities of rivals, but also (2) either does not further competition on the merits or does so in an unnecessarily restrictive way.
>
> To determine whether conduct is exclusionary, we look to the proffered business justification for the act.

216 F.3d, at 475 (citations omitted).

2. Product Disparagement

a. Defendant's Argument

> Z-Tel's claims of 'defamation and disparagement (Compl. P89-91) similarly fails to identify conduct that could form the basis for a claim under *Section 2*. In fact, any such misrepresentations are 'presumptively de minimis' absent 'cumulative proof that the representations were clearly false, clearly material, clearly likely to induce reasonable reliance, made to buyers without knowledge of the subject matter, continued for prolonged periods, and not readily susceptible to neutralization or other offset **[**40]** by rivals.' Z-TEL stumbles at the very first hurdle- it has failed even to identify an allegation that can be called false.

(Doc. No. 7, p. 16) (citations omitted).

b. Advertising That Creates Barriers to Entry May Constitute Exclusionary Conduct

In *Berkey Photo, Inc. v. Eastman Kodak Co.,* the court stated, ***HN29***[] "A monopolist is not forbidden to publicize its product unless the extent of this activity is so unwarranted by competitive exigencies as to constitute an entry barrier." *603 F.2d 263, 287 (2d Cir. 1979) (citing American Tobacco Co. v. United States, 328 U.S. 781, 797, 90 L. Ed. 1575, 66 S. Ct. 1125 (1946))*. In *Phototron Corp. v. Eastman Kodak Co.,* the Fifth Circuit extrapolated this exact portion of the *Berkey* holding in reaching the conclusion that, "advertising that creates barriers to entry in a market constitutes predatory behavior of the type the antitrust laws are designed to prevent." *842 F.2d 95, 100 (5th Cir. 1988)*. Immediately thereafter, the court qualified this statement: "without evidence of how advertising in the wholesale photofinishing industry can act as a barrier to Phototron's participation in the industry, **[**41]** we cannot conclude that Phototron is likely to succeed on this theory of predation." *Id. at 101*.

c. A Presumption That The Effect on Competition Through Advertising is *de Minimis*

i. Introduction

Several opinions ruling on motions for summary judgment frame the legal landscape. Obviously, this Court is not presently considering a motion for summary judgment. However, the following set of cases are overviewed for their doctrinal principles.

ii. Hallmark Cases From the Second, Sixth, and Ninth Circuits

In *National Assoc. of Pharmaceutical Mfrs., Inc. v. Ayerst Labs.,* the Second Circuit held that ***HN30***[] "[a] plaintiff asserting a monopolization claim based on misleading advertising must overcome a presumption that the effect on competition of such a practice was *de minimis." 323 F.3d 366, 370 (2d Cir. 1988)* (citing *Berkey, 603 F.2d, at 288 n.41*). In *Berkey,* the court held as follows with regard to advertising:

> In its advertising, a producer is ordinarily permitted, much like an advocate at law, to bathe his cause in the best light possible. Advertising that emphasizes a product's strengths and minimizes **[**42]** its weaknesses does not, at least **[*531]** unless it amounts to deception, constitute anticompetitive conduct violative of *§ 2*.

Id. at 287-88 (footnote omitted).

In *American Professional Testing Serv. v. Harcourt Brace Jovanovich Legal & Prof'l Publ'ns,* ***HN31***[] the Ninth Circuit also adopted a *de minimus* presumption and laid out a six-part test that a plaintiff must satisfy to rebut the presumption: the statements at issue must be (1) clearly false; (2) clearly material; (3) clearly likely to induce unreasonable reliance; (4) made to unsophisticated parties; (5) continued for long periods; and (6) not readily cured by rivals. *108 F.3d 1147, 1152 (9th Cir. 1997)*. [1] In *American Professional,* the court was clear that all of these factors must be met for the case to survive summary judgment. In *Ayerst,* the Second Circuit also discussed this test favorably, but it is unclear whether the court thought each requirement was mandatory. *850 F.2d 904, 916-17*.

[43]** In *Am. Council of Certified Podiatric Physicians & Surgeons v. Am. Board of Podiatric Surgery, Inc.,* the Sixth Circuit rejected the claim of the plaintiff, a podiatrists' certification association, that the defendant's alleged false advertising could support a claim under *Section 2*. *323 F.3d 366, 369 (6th Cir. 2003)*. ***HN32***[] The court noted that to survive summary judgment on the second prong of a monopolization claim premised primarily on allegedly false speech or advertising, the plaintiff is required to rebut a presumption that the impact on competition was *de minimis,* by showing two additional facts: "(1) the advertising was clearly false, and (2) it would be difficult or costly for the plaintiff to counter the false advertising." *Id. at 371*. Concluding that the plaintiff had failed to meet either showing, the court affirmed the grant of summary judgment to the defendant. *Id. at 372*.

iii. *Aldridge v. Microsoft*

In *David L. Aidridge Co. v. Microsoft Corp.,* Judge Lake was presented with a motion for summary judgment. *995 F. Supp. 728 (S.D. Tex. 1998)* (Lake, J.). The product disparagement claim trained on **[**44]** messages found in the

[1] This test was first suggested in 3 PHILLIP AREEDA & DAVID TURNER, ***ANTITRUST LAW*** P 738a, at 278-79 (1978).

Microsoft Windows "help box." Relying heavily on *American Professional, Berkey,* and *Ayerst,* Judge Lake granted defendant's motion as to the product disparagement claim since the plaintiff failed to show that "any of the four messages continued for extended periods or that they were not readily susceptible to explanation or neutralization. . . ." *Id. at 751*.

d. Organized Deception By A Dominant Firm May Have Anticompetitive Conduct Implications When Used Against A Nascent Firm

Professors Areeda and Hovenkamp explain:

> ***HN33***[] Misrepresentations and organized deception by a dominant firm may have *§ 2* implications when used against a nascent firm just as it is entering the market. Such a firm has no established customer base and typically lacks the resources to answer the dominant firm's deception effectively. Of course, even honest advertising by a dominant firm can deter new entrants, but we virtually always consider honest advertising as competition on the merits.

IIIA AREEDA AND HOVENKAMP, ***ANTITRUST LAW***, § 782a.

[*532] e. Plaintiff Fits Areeda and Hovenkamp's Description of "A Nascent Firm"

The analysis offered **[**45]** by Professors Areeda and Hovenkamp in the immediately preceding section is an especially good fit to describe Plaintiffs market situation. In *Phototron Corp. v. Eastman Kodak Co.,* the Fifth Circuit was clear that ***HN34***[] advertising creating barriers to entry in a market constitutes exclusionary conduct. *842 F.2d 95, 100 (5th Cir. 1988)*. ***HN35***[] On a motion to dismiss, the Court is required to view all allegations in the light most favorable to the nonmovant. At this point, the Court cannot say that Plaintiffs product disparagement claim involving false advertising fails as a matter of law.

3. Abuse of Government Processes

a. Defendant's Argument

> Z-Tel concedes that such litigation efforts were directed at reducing Defendant's regulatory burdens under the 1996 Act (specifically Defendants' obligation to provide 'shared transport,' *see* Compl. P 85). And because Defendants have no antitrust duty to unbundle their networks for the benefit of competitors, it violates no duty by attempting to forestall the imposition of such regulatory obligations.

(Doc. No. 7, p. 16).

b. Noerr-Pennington

i. Overview of the Doctrine

HN36[] *Noerr-Pennington* **[**46]** immunity does not stem solely from the *First Amendment*; rather, it is inextricably associated with interpretations of the Sherman Act. *See Coastal States Marketing, Inc. v. Hunt, 694 F.2d 1358 (5th Cir. 1983)*.

HN37[] The *Noerr-Pennington* doctrine confers immunity to private individuals seeking anticompetitive action from the government. *See Eastern R.R. Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 5 L. Ed. 2d 464, 81 S. Ct. 523 (1961)* and *United Mine Workers v. Pennington, 381 U.S. 657, 14 L. Ed. 2d 626, 85 S. Ct. 1585 (1965)*. *See also California Motor Transport Co. v. Trucking Unlimited, 404 U.S. 508, 510-11, 30 L. Ed. 2d 642, 92 S. Ct. 609 (1972)* (extending *Noerr-Pennington* protection to petitioning activities aimed at state and federal agencies and courts); *City of Columbia v. Omni Outdoor Advertising, Inc., 499 U.S. 365, 113 L. Ed. 2d 382, 111 S. Ct. 1344 (1991)* (granting *Noerr-Pennington* immunity for efforts to influence local governments). ***HN38***[] *Noerr-Pennington* immunity applies to any concerted effort to sway public officials regardless of the private citizen's intent. *See Pennington, 381 U.S. at 670*.

ii. Defendant [47] Fails to Raise this Argument**

Plaintiff declares, "this pattern of abusive conduct falls outside any petitioning privilege under the *Noerr-Pennington* doctrine. However, Defendant's Motion to Dismiss does not raise the *Noerr-Pennington* affirmative defense. Accordingly, the Court will not address it.

c. An Increasingly Dangerous Threat to Competition

Judge Bork has stated, ***HN39***[] "predation by abuse of governmental procedures, including administrative and judicial processes, presents an increasingly dangerous threat to competition." ROBERT H. BORK, THE ANTITRUST PARADOX 347 (1993).

d. Defendant's Argument Is Misplaced

First, Defendant claims that is has no antitrust duty to unbundle it network for the benefit of its competitors. Putting aside for the moment Plaintiffs essential facilities claim, ***HN40***[] there is no doubt that under **[*533]** *§ 251(c) of the 1996 Act*, the incumbent local exchange carrier bears, *inter alia,* the duty to negotiate interconnection agreements with any new carrier so requesting, to provide access to its network elements on an unbundled basis, to offer its retail telecommunications services for resale at wholesale rates, and to provide for collocation.

[48]** Second, even if Defendant is correct that no antitrust liability may attach for failing to allow interconnection, it is an entirely different matter if Defendant has "initiated and maintained baseless regulatory proceedings" relating to its 1996 Act duties. (Doc. No. 1, p. 34). *Trinko* was clear: ***HN41***[] the simple fact that one has duties under the 1996 Act does not confer a grant of antitrust immunity relating thereto.

e. Defendant Does Not Prevail on this Point

The Court does not accept Defendant's assertion that Plaintiff's allegations concerning the initiation of baseless regulatory proceedings fail as a matter of law.

4. Line Loss Information

a. Defendant's Argument

> Z-TEL complains that it lacks accurate line-loss information, but such information relates only to customers that Z-TEL has *already* lost (through no alleged fault of Defendants); Z-TEL does not explain how tardy access to such information affects competition.

(Doc. No. 7, p. 15) (italics in original).

b. Defendant's Misstates Plaintiff's Complaint

In contrast to Defendant's characterization, Plaintiff explains in some detail how competition is allegedly harmed by Defendant's **[**49]** conduct concerning the provision of faulty line loss information.

> First, accurate and timely information on disconnections by customers is necessary for Z-Tel to audit the charges of SBC for the essential facilities that Z-TEL leases because many of these charges are measured on a per-customer basis. Such audits are necessary to ensure that SBC does not charge Z-TEL for facilities used to serve customers who are no longer Z-TEL customers.
>
> A second negative consequence to Z-Tel of erroneous and untimely provision of line loss notification relates to customers complaints.
>
> Such complaints cause Z-Tel to incur costs in responding to these complaints and damage Z-Tel's reputation with former, present, and prospective customers.

(Doc. No. 1, p. 28).

C. Reputation is A Capital Asset

HN42[] Reputation is a very real capital asset to a business firm. RICHARD A. POSNER, ECONOMIC ANALYSIS OF LAW 230 (1998) ("Reputation is a basis for inducing others to engage in market or nonmarket transactions with you.").

The crux of this allegation is that Defendant has harmed Plaintiff's reputation in the marketplace. The Court cannot say that, as a matter of law, Plaintiff's allegation **[**50]** of this sort of activity fails to come within the ambit of exclusionary conduct, as that term was defined in Part VIII, C.1, *supra.*

5. False Billing

a. Defendant's Argument

> Z-Tel's claim that Defendant's bills are inaccurate *(see* Compl. PP 79-84) is unconnected to any alleged effect on competition. *See also* *Associated Radio Service Co. v. Page Airways, Inc., 624 F.2d 1342, 1355 (5th Cir. 1980)* ("The concept of 'exclusionary' practice would become totally unmanageable unless the judges are willing . . . to ignore those **[*534]** practices that seem unlikely to have made a substantial impact upon the achievement, maintenance, or expansion of monopoly power.").

(Doc. No. 7, p. 16).

b. Defendant's Argument is Conclusory

Plaintiff complains, "Z-TEL had literally hundreds of billing disputes with SBC and was forced to expend undue resources on deciphering SBC's bills." (Doc. No. 1, p. 30). Viewed in isolation, Plaintiffs allegation of false billing might not predicate a monopolization claim. However, as explained more fully in Part VIII D., *infra,* in *Continental Ore,* the Supreme Court instructed that ***HN43***[] courts should not tightly **[**51]** compartmentalize the varied factual components of an antitrust case. *Continental Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 699, 8 L. Ed. 2d 777, 82 S. Ct. 1404 (1962)*. The gestalt of Plaintiff's story is that Defendant undertook a concerted scheme of conduct to disrupt Plaintiff's viability as a competitor. Viewed in combination with Plaintiff's other allegations, the allegation of false billing does not fail to state a claim as a matter of law.

D. Aggregation of Separate Instances of Allegedly Exclusionary Conduct

1. *Continental Ore*

Plaintiff cites *Continental Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 699, 8 L. Ed. 2d 777, 82 S. Ct. 1404 (1962)* for the proposition that the law rejects a tight compartmentalization of the varied factual components of an antitrust case. (Doc. No. 37. p. 8). Professor Hovenkamp advises, "the Supreme Court's *Continental Ore* language that proof should not be tightly compartmentalized has been cited numerous times by antitrust plaintiffs, sometime properly, sometime improperly." II AREEDA AND HOVENKAMP, ***ANTITRUST LAW***, § 310c, p. 140-41. In the discussion immediately below, the Court will explain why **[**52]** it aligns with the former rather than the latter.

2. The Broader Context: Claims of Insufficient Evidence

This Court first addresses the legal principles which control ***HN44***[] in the broader context of the adjudication of claims of insufficient evidence. In this context, aggregation is proper when the violation "requires that a certain threshold be met and no claim standing alone is sufficient to meet the threshold." *Id.* at 141. Aggregation is improper when cardinality is lacking or a plaintiff fails to prove an element essential to every claim. *Id.*

3. The Narrower Context: Exclusionary Conduct

This Court now turns to the prevalent legal principles governing aggregation of conduct in the narrower context of exclusionary conduct. Professor Hovenkamp explains:

> ***HN45***[] In a monopolization case conduct must always be analyzed 'as a whole.' A monopolist bent on preserving its dominant position is likely to engage in repeated and varied exclusionary practices. Each one viewed in isolation might be viewed as *de minimis* or an error in judgment, but the pattern gives increased plausibility to the claim. For example, a monopolist might accidentally file a single baseless **[**53]** infringement suit, but a pattern of such suits indicates wilfulness.

Id. at 147.

In *United States v. Microsoft,* the Court concluded that several monopolistic acts considered individually violated *Section 2*. In addition,

> Microsoft's campaign to protect the applications barrier from erosion by network-centric middleware can be broken down into discrete categories of activity, **[*535]** several of which on their own independently satisfy the second element of a *§ 2* monopoly maintenance claim. But only when the separate categories of conduct are viewed, as they should be, as a single, well-coordinated course of action does the full extent of the violence that Microsoft has done to the competitive process reveal itself.

87 F. Supp. 2d 30, 33 (D.D.C. 2000) (citing Continental Ore) (rev'd on other grounds by United States v. Microsoft Corp., 346 U.S. App. D.C. 330, 253 F.3d 34 (D.C. Cir. 2001)).

4. Conclusion: Plaintiff Alleges a Patterned Course of Action Which the Court Views in the Aggregate

The Court views Plaintiff's allegations of the provision of I) product disparagement, 2) abuse of government processes, 3) provision of faulty line **[**54]** loss information, and 4) false billing as a patterned course of action. Viewed as a whole, these allegations negate Defendant's contention that Plaintiff's Monopolization claim fails as a matter of law. The Court hastens to add that it passes no judgment on the ultimate validity of these accusations. Defendant is free to question the weight and credibility of the evidence offered in support thereof in a future motion for summary judgment.

E. Conclusion: Plaintiff's Monopolization Claim concerning Conduct Not at Issue in *Trinko* Survives the Motion to Dismiss

Defendant's Motion to Dismiss Plaintiff's Monopolization claim (Count No. 1) is **DENIED** with respect to Plaintiff's allegations of 1) product disparagement, 2) abuse of government processes, 3) provision of faulty line loss information, and 4) false billing.

IX. MONOPOLIZATION: REFUSALS TO DEAL

A. General Legal Principles

1. The Freedom To Organize Business Affairs is Limited By Monopolistic Aspirations

In *United States v. Colgate & Co.,* the Supreme Court stated ***HN46***[] the basic rule that "in the absence of any purpose to create or maintain a monopoly, the act does not restrict the long **[**55]** recognized right of trader or manufacturer engaged in an entirely private business, freely to exercise his own independent discretion as to parties with whom he will deal." *250 U.S. 300, 307, 63 L. Ed. 992, 39 S. Ct. 465, 1919 Dec. Comm'r Pat. 460 (1919)*; *see also Reeves, Inc. v. Stake, 447 U.S. 429, 439, 65 L. Ed. 2d 244, 100 S. Ct. 2271 (1980) (citing Colgate).*

Judge Bork has succinctly stated ***HN47***[] the baseline rule regarding individual refusals to deal:

> Present law leaves the individual firm free to refuse to deal with others, unless the refusal is intended to support another illegal restraint or constitutes an attempt to monopolize.

ROBERT H. BORK, THE ANTITRUST PARADOX 344 (1993).

2. *Aspen Skiing*

a. The Fundamental Holding of *Aspen*

The hallmark case in the doctrine of unilateral refusals to deal is *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 86 L. Ed. 2d 467, 105 S. Ct. 2847 (1985)*. Professors Areeda and Hovenkamp summarize the holding of this case:

> In sum, ***HN48***[] no general nor absolute duty was imposed on a monopolist to deal with or cooperate with actual or would-be competitors, any of its actions might be condemned if the jury finds **[*536]** that the monopolist **[**56]** 'willfully' acquired, maintained, or used monopoly power 'by anticompetitive or exclusionary means *or* for anticompetitive or exclusionary purposes.' Such means or purposes were contrasted with 'valid' or 'legitimate business reasons.' The **Court's logic was apparently that legitimate business reasons prevent the characterization of the defendant's behavior or purpose as anticompetitive or exclusionary.**

IIIA AREEDA & HOVENKAMP, ***ANTITRUST LAW*** 186 (2d ed.) (1998) (emphasis added).

b. Criticism of *Aspen Skiing*

Aspen has been the subject of much scholarly criticism. Professor Hovenkamp explains, "the difficult question for those supporting *Aspen* is finding a way of applying its principle, without losing control, of it." HOVENKAMP 295. Professor Graglia makes the point, "one may be generally skeptical of the validity of a rule that makes it illegal to terminate what one is not legally required to begin." Lino A. Graglia, *The Burger Court and Economic Rights, 33 TULSA L.J. 41, 62 (1997)*.

In *Trinko,* the Court explained, *"Aspen Skiing **HN49***[] is at or near the outer boundary of *§ 2* liability." *Trinko, at 879 (2004)*. The bottom line **[**57]** is that criticism notwithstanding, the Supreme Court reaffirmed that *Aspen Skiing's* holding about unilateral refusals to deal is good law.

B. Defendant's Refusal to Deal Argument Trains on Voluntary Engagement

Discussing *Trinko's* treatment of *Aspen* Skiing, Defendant explains:

> The defendant in *Aspen* had 'voluntarily engaged in a [prior] course of dealing with rivals' and refused to provide the precise 'product that it *already sold at retail'* to its rival at full retail price.
>
> By contrast here, defendants do not voluntarily provide DSL service on a stand-alone basis and have not set a retail price for providing DSL service over lines controlled by CLEC's (whose permission they must obtain before offering the service). Mandating such an arrangement would require 'considerable expense and effort' including designing and implementing 'new systems' - for ordering, provisioning, billing, and maintenance- to accommodate Z-TEL'S demand. *Id. Trinko* makes clear that ***antitrust law*** imposes no such duty.

(Doc. No. 29, p. 5).

C. Plaintiffs Response

Plaintiff reads *Trinko* as establishing two circumstances which must exist **[**58]** in order for a refusal to deal claim to be properly made out:

> Interpreting *Aspen, Trinko* identified two circumstances that shed light and thus are sufficient to state a refusal to deal claim: (1) when the defendant's prior conduct involved voluntary provision of the product ('voluntariness') and (2) when the defendant has made the product available to non-competitors, but not competitors ('discrimination').

(Doc. No. 37, p. 4) *(citing Trinko,* p. 879-80).

D. Analysis

1. In *Trinko,* Plaintiff's "Discrimination" Terminology is Not Stated As Such

Defendant's "voluntariness" argument is well taken. Discussing *Aspen,* the *Trinko* Court wrote, ***HN50***[] "the unilateral termination of a voluntary (and thus presumably profitable) course of dealing suggested a willingness to forsake short-term profits to achieve an anticompetitive end." *Trinko, at 880*.

However, the Supreme Court did use the term "discrimination" in the sense Plaintiff uses the word at present:

> **[*537]** In *Otter Tail Power Co. v. United States,* the defendant was already in the business of providing a service to certain customers (power transmission over its network), and refused **[**59]** to provide the same service to certain other customers. In the present case, by contrast, the services allegedly withheld are not otherwise marketed or available to the public.

Trinko, at 880 (citations omitted).

In other words, Plaintiff is correct that *Trinko* addressed the concept of "discrimination" in the context of a refusal to deal with one set of customers versus a different set of customers. But the Supreme Court did not use the word "discrimination." To avoid any confusion, this Court clarifies that it interprets Plaintiff's use of the word "discrimination" to refer to the portion of *Trinko* quoted immediately above.

2. Evidence That Defendant Voluntarily Shared its Network Before the Enactment of the 1996 Act

Plaintiff brings forth some evidence that, prior to the enactment of the 1996 Act, Defendant voluntarily offered to share its network. (Doc. No. 37, p. 4-6). Viewed in an unfavorable light to plaintiff, this "voluntary" sharing was driven less by the profit motive than it was driven by a desire to satisfy regulators looking at the proposed merger of SBC and Ameritech. However, on a motion to dismiss, a district court must view all allegations **[**60]** in the light most favorable to the non-movant. Viewed in the most favorable light, this Court cannot say that Plaintiff has failed to allege that Defendant has ceased a profitable business practice in which it voluntarily engaged prior to onset of statutory compulsion.

3. Evidence That Defendant Discriminatorily Offers Access at Present

Plaintiff asserts that Defendant offers access to local service providers in areas Defendant does not serve. Particularly, Plaintiff alleges that Defendant offers access to Valor Telecom, the local service provider in Texarkana. (Doc. No. 37, p. 6). Plaintiff also alleges that Defendant allows its non-competitor, Intrado, interconnection for purposes of 911 emergency calls. Viewed in the light most favorable to the non-movant, the Court cannot conclude that Plaintiff has failed to allege a discriminatory business practice, as that term was addressed by the Supreme Court in *Trinko* and *Otter Tail.*

4. Stein v. Pacific Bell

a. Introduction

On March 23, 2004, Defendant filed a Notice of Supplemental Authority bringing to the Court's attention an unpublished order from the Northern District of California, *Stein v. Pacific* **[**61]** *Bell.* In *Stein,* Judge Illston granted the defendant's motion for summary judgment as to plaintiff's refusal to deal, essential facilities, and monopoly leveraging claims. Defendant first notes that Judge Illston ruled on a motion for summary judgment. By contrast, this Court is obviously presented with a motion to dismiss. Defendant maintains that this distinction is immaterial because Judge Illston reached her conclusion without reaching the issue of evidentiary sufficiency.

Second, Defendant is emphatic that *Stein* and the case at bar are strongly correlative. For the reasons explained immediately below, the Court disagrees.

b. Differently Situated Plaintiffs

In *Stein,* the plaintiff brought suit on behalf of himself and others similarly situated consumers of DSL service. In the **[*538]** opening paragraph, Judge Illston explained, "Stein claims that this anticompetitive conduct has denied consumers a competitive choice in DSL service providers." *Stein,* p. 2. In the case at bar, Plaintiff does not claim to be a consumer in the conventional sense. Defendant's own legal posture illustrates this point; the gestalt of Defendant's refusal to deal argument is that it conducts **[**62]** business with Plaintiff only because of the telecommunications laws' fiat.

c. The Fundamental Holding of *Stein*

As explained in Part IX, D. 2 and 3, *supra,* Plaintiff's core argument that its refusal to deal claims fits within the *Aspen Skiing* exception (re-enunciated in *Trinko)* is that Defendant shared its network before it was statutorily required to do so. In *Stein,* the analogous voluntary behavior was described as follows: "defendants in the instant case voluntarily agreed to provide competitors with loop qualification information." *Stein,* p. 10. Judge Illston found the plaintiff's argument to be availing for the following reason: "This Court disagrees, but also finds that defendants were statutorily obligated to provide the loop qualification information under *§ 251(c)(3) of the Telecommunications Act*." *Id.* p. 10-11. Therefore, the fundamental holding of *Stein* is that the plaintiff made allegations analytically identical to those made by the plaintiff in *Trinko,* insofar as those allegations concerned a failure to perform a duty only recently prescribed by law.

d. The *Stein* Court's Commentary in Dicta is Highly Distinguishable [63] From the Allegations in the Case at Bar**

> Even assuming *arguendo* that defendants voluntarily obligated themselves to provide competitors with loop qualification information, this case does not fit within the very narrow confines of the refusal to deal doctrine . . .

Stein, p. 13.

> In *Aspen Skiing,* the formerly dominant partner terminated the joint venture, whereas in the case at hand, defendants simply failed to comply exactly with the requirements of a regulatory scheme.

Id. p. 14.

This Court first notes that Judge Illston's "arguendo" analysis follows her statement of *Stein's* fundamental holding. Nevertheless, the portion of her order quoted immediately above conclusively demonstrates that the plaintiff in *Stein* rested its argument on the failure to comport with recently enacted regulatory duties. By contrast, in the case at bar, Plaintiff alleges termination of a voluntary course of dealing undertaken before the imposition of statutory compulsion.

e. Conclusion

This Court agrees with Judge Illston (and the academic commentary overviewed in Part IX, A.2. b, *supra)* that ***HN51***[] the exception in *Aspen Skiing* is a narrow **[**64]** one. To be sure, Plaintiff must perform a difficult doctrinal task. However, unlike the allegations in *Stein,* Plaintiff has alleged that Defendant discontinued a voluntary course of dealing which it initiated free from any legal responsibility to commence.

5. Defendant Belatedly Raises an Argument Which Misreads *Trinko*

a. The Belated Argument

On July 21, 2004, Defendant filed a Reply to Z-Tel's Response to Defendants' Notice of Supplemental Authority. (Doc. No. 177). Speaking about Plaintiff's allegations of pre-compulsory network sharing, Defendant stated:

> *Trinko* expressly held that 'the other boundary of § 2 liability' under *Aspen* ***[*539]*** *Skiing* requires proof that the defendant terminated a preexisting voluntary business arrangement *with the plaintiff* (not other companies) . . .

Id. at p. 2-3 (italics in original).

This Court first notes that this argument was not raised in the original motion to dismiss. That motion relied almost exclusively on *Goldwasser* and *Cavalier.* (Doc. No. 7, p. 8-11). Nor was this argument raised in Defendant's *post-Trinko* reply. (Doc. No, 29, p. 1-2).

HN52[] It is a basic tenet of civil procedure **[**65]** that reply briefing may only respond to the allegations raised in the nonmovant's response. *See Hartley v. Wisconsin Bell, 930 F. Supp. 349, 352 (E.D. Wis. 1996)*; *see also Graning v. Sherburne Cty., 172 F.3d 611, 614 n. 2 (8th Cir. 1999)* ("Affidavits may appropriately be produced with a reply brief when they respond to **new** issues which have arisen during briefing.") (emphasis added). A defendant certainly cannot raise an argument for the first time on a response to notice of supplemental briefing. To hold otherwise would countenance litigation by ambush. The discussion which follows immediately below is offered only by way of commentary.

b. Defendant Misreads *Trinko*

In Defendant's belatedly raised argument, the words "with the plaintiff" are not in quotations marks. Defendant cites to pages 879-80 of the *Trinko* opinion. It is of vital importance to this Court's analysis that the text on those two pages do not support Defendant's contention that a cessation of voluntary business activity must have been with a § 2 plaintiff in order to satisfy the standard of *Aspen Skiing.*

For example, "The leading case for § 2 liability **[**66]** based on refusal to cooperate with a **rival,** and the case upon which respondent understandably places greatest reliance, is *Aspen Skiing." Id. at 879* (emphasis added). The complaint does not allege that Verizon voluntarily engaged in a course of dealing with its rivals, or would ever have done so absent statutory compulsion. *Id. at 880* (emphasis added). "We conclude that Verizon's alleged insufficient assistance in the provision of service to rivals is not a recognized antitrust claim under this Court's existing refusal-to-deal precedents." *Id.* (emphasis added).

The bottom line is that the Supreme Court's repeated use of the generic terms "rival" in both the singular and the plural negatives Defendant's contention that only termination of a cooperative venture with a § 2 plaintiff, rather than other market participants, suffices.

E. Conclusion

HN53[] Plaintiff bears a heavy doctrinal burden to capture *Aspen Skiing's* narrow exception. However, because Plaintiff avers to pre-compulsory sharing of the network constituting a cooperative venture with rivals, the Court cannot conclude that Plaintiff has alleged no set of facts which would come within the ambit **[**67]** of that exception. Accordingly, Defendant's Motion to Dismiss Plaintiff's Monopolization claim (Count No. 1) is **DENIED** with respect to Plaintiff's refusal to deal allegation.

As the Court concluded in Part VIII. E., *supra,* Defendant's Motion to Dismiss Plaintiff's Monopolization claim (Count No. 1) was denied with respect to Plaintiff's allegations of exclusionary conduct not at issue in *Trinko.* For these reasons, Defendant's Motion to Dismiss Plaintiff's Monopolization claim (Count No. 1) is **DENIED** in its entirety.

X. ESSENTIAL FACILITIES

A. General Legal Principles

1. Essential Facilities is A Species of the Refusal to Deal Legal Theory

HN54[] Essential facilities refers to a particular embodiment of the refusal to deal **[*540]** legal theory. Professor Hovenkamp explains that the logical foundation of the refusals to deal legal concept applies with persuasive force to the essential facilities concept.

> The so-called 'essential facility' doctrine is one of the most troublesome, incoherent and unmanageable of bases for Sherman *§ 2* liability. The antitrust world would almost certainly be a better place if it were jettisoned, with a little fine **[**68]** tuning of the general doctrine of the monopolist's refusal to deal to fill in the resulting gaps.

HOVENKAMP, p. 305.

2. The Focus is on Markets With Large Capital Requirements

HN55[] The doctrine protects a competitor from having to enter an additional market with large capital requirements in order to compete. *Fishman v. Estate of Wirtz, 807 F.2d 520, 540 (7th Cir. 1986)*. Professors Areeda and Hovenkamp explain, "the core concern of the doctrine is that a monopolist possess a resource that is 'essential' in some sense for the business of someone else, but that the monopolist refuses to share." IIIA AREEDA & HOVENKAMP, P 772a (2d ed. 2002). By controlling the "essential facility, a monopolist can potentially extend its monopoly power "from one stage of production to another, and from one market to another." *MCI Communications Corp. v. American Tel. & Tel. Co., 708 F.2d 1081, 1132 (7th Cir. 1983)*.

3. Doctrinal Support

HN56[] On at least three occasions, the Supreme Court has declined to recognize the essential facilities theory. "We have never recognized such a doctrine, *see Aspen Skiing Co., 472 U.S. 585 at 611, n. 44, 86 L. Ed. 2d 467*,; **[**69]** *AT&T Corp. v. Iowa Utils. Bd., 525 U.S. 366, 428, 142 L. Ed. 2d 834, 119 S. Ct. 721* (opinion of Breyer, J.), and we find no need either to recognize it or to repudiate it here." *Trinko, at 881*.

Professor Elhauge explains that, the absence of Supreme Court recognition notwithstanding, "every federal circuit court has interpreted this general monopolization standard to impose an antitrust duty to deal with rivals when sharing is feasible and a monopolist has developed a product that is so superior that it is 'essential' for rivals to compete and cannot practicably be duplicated." Einer Elhauge, *Defining Better Monopolization Standards, 56 STAN. L. REV. 253, 261 (2003)* (citing cases).

In *Mid-Texas Communications Sys. v. AT&T,* the Fifth Circuit recognized the essential facilities doctrine:

> ***HN57***[] The second approach to the problem of a monopolist's refusal to deal is the so-called "bottleneck" theory. Under this approach, a monopolist who controls a "facility or resource that is essential to competitive viability in the marketplace must grant access to it on reasonable terms to (its) competitors."

615 F.2d 1372, 1387 n.12 (5th Cir.), **[**70]** *cert. denied, 449 U.S. 912, 66 L. Ed. 2d 140, 101 S. Ct. 286 (1980)* (citations omitted).

4. Elements of an Essential Facilities Claim

HN58[] To prevail on an essential facilities claim a plaintiff must show:

> 1) the defendant is a monopolist;
>
> 2) the facility is essential;
>
> 3) the defendant has the type of control over the facility that is forbidden by the Sherman Act;
>
> 4) duplication of the facility is unreasonable or impractical;
>
> 5) the defendant denied the plaintiff use of the facility; and
>
> 6) providing access to the plaintiff was feasible.

[*541] *David L. Aldridge Co. v. Microsoft Corp., 995 F. Supp. 728, 752 (S.D. Tex. 1998)* (citing cases).

B. The Fundamental Holding of *Trinko*

> It suffices for present purposes to note that ***HN59***[] the indispensable requirement for invoking the doctrine is the unavailability of access to the 'essential facilities'; where access exists the doctrine serves no purpose. Thus, it is said that 'essential facility claims should . . . be denied where a state or federal agency has effective power to compel sharing and to regulate its scope and terms.' P. AREEDA & H. HOVENKAMP, ***ANTITRUST LAW***, p 150, P 773e **[**71]** (2003 Supp.). Respondent believes that the existence of sharing duties under the 1996 Act supports its case. We think the opposite: ***HN60***[] The 1996 Act's extensive provision for access makes it unnecessary to impose a judicial doctrine of forced access. To the extent respondent's 'essential facilities' argument is distinct from its general *§ 2* argument, we reject it.

Trinko, at 881.

C. Plaintiff Attempts to Distinguish *Trinko's* Fundamental Holding

> Z-Tel has also asserted claims under the essential facilities doctrine. *Trinko* emphasizes the importance of the 'unavailability of *access'* to the essential facility and notes that the theory cannot apply if 'a state or federal agency has effective power to compel sharing and to regulate its scope and terms.' *Trinko, 124 S. Ct. at 881*. This limitation has no bearing on Z-Tel's claims. SBC ignores that Z-Tel's AIN allegations relate to the enhanced services market, a market that the unbundled access provisions of the Telecom Act do not purport to regulate. Likewise, Z-Tel's allegations make plain that there was no effective power to compel access to shared transport; despite repeated orders **[**72]** of state and federal agencies over a period of several years, SBC still refused to provide it.

(Doc. No. 37, p. 7) (emphasis in original).

D. Analysis

1. In Plaintiff's Value-Added Process, Network Access Precedes the Creation of Enhanced Services

Plaintiff's Complaint is unambiguous: "these enhanced services are software-based systems that rely in part on the infrastructure necessary to provide basic local service but which also include additional programs and equipment." (Doc. No. 1, p. 12). Plaintiff may be correct that the Telecom Act does not purport to regulate enhanced services. If so, this fact likely reflects the fact that enhances services did not exist, as such, in 1996. In any event, since network access is largely indispensable to (and therefore precedes the creation of) enhanced services, Plaintiff's attempt to differentiate *Trinko* is unavailing.

2. "Effective Power" is an Argument Better Addressed to the Legislature

Moreover, the strength of the "effective power" wielded by the relevant regulatory agencies is not of immediate concern to this Court. This argument is better addressed to the appropriate legislative bodies.

[73] E. Conclusion**

Defendant's Motion to Dismiss Plaintiff's Essential Facilities claim (Count No. 2) is **GRANTED.** Plaintiffs Second Cause of Action is **DISMISSED with prejudice.**

XI. ATTEMPTED MONOPOLIZATION

A. Legal Standards

HN61[] To demonstrate attempted monopolization, a plaintiff must prove 1) that the **[*542]** defendant has engaged in predatory or anticompetitive conduct with 2) a specific intent to monopolize, and 3) a dangerous probability of achieving monopoly power. *Spectrum Sports v. McQuillan, 506 U.S. 447, 456, 122 L. Ed. 2d 247, 113 S. Ct. 884 (1993)*; *see also* *Taylor Publ'g Co. v. Jostens Inc., 216 F.3d 465, 474 (5th Cir. 2000)* *(citing Spectrum Sports).* An attempted monopolization claim necessarily involves conduct which has not yet succeeded; otherwise, the plaintiff would bring an actual monopolization claim. *Taylor Publ'g, 216 F.3d at 474*; *see also* *Multiflex v. Samuel Moore & Co., 709 F.2d 980, 990 (5th Cir. 1983)* ("Attempted monopolization under *section 2* is usually defined as an unsuccessful attempt to achieve monopolization.").

B. Defendant Does Not Particularize an Argument Trained [74] on Attempted Monopolization**

In neither 1) the Motion to Dismiss (Doc. No. 7) or 2) Defendant's Reply in Support of its Motion to Dismiss (Doc. No. 29) does Defendant particularly address attempted monopolization. It follows that Defendant's argument concerning attempted monopolization is limited to the legal sufficiency of Plaintiff's allegations concerning anticompetitive conduct. Plaintiff's allegations of exclusionary conduct were discussed at length in Parts VIII and IX, *supra.* Defendant's arguments were found to be unavailing.

Since Defendant raises no arguments concerning a specific intent to monopolize and/or a dangerous probability of achieving monopoly power, the Court does not devote any analysis thereto.

C. Conclusion

Defendant's Motion to Dismiss Plaintiff's Attempted Monopolization claim (Count No. 3) is **DENIED.**

XII. MONOPOLY LEVERAGING

A. Defendant's Argument

> The [Trinko] Court also expressly rejected the "monopoly leveraging" theory Z-Tel espouses in this case as inconsistent with Supreme Court precedent under *Section 2*.

(Doc. No. 29, p. 1-2).

B. *Trinko* Rejected A Claim of Monopoly Leveraging [75] Only Once It Abjured the Plaintiff's Refusal to Deal Argument**

> The Court of Appeals also thought that respondent's complaint might state a claim under a 'monopoly leveraging' theory (a theory barely discussed by respondent, see Brief for Respondent 24, n 10). We disagree. To the extent the Court of Appeals dispensed with a requirement that there be a 'dangerous probability of success' in monopolizing a second market, it erred. *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 459, 122 L. Ed. 2d 247, 113 S. Ct. 884 (1993)*. In any event, leveraging presupposes anticompetitive conduct, which in this case could only be the refusal-to-deal claim we have rejected.

Trinko, at 883.

C. Monopoly Leveraging is Not Inconsistent With Supreme Court Precedent

Professor Hovenkamp explains this somewhat murky area of antitrust jurisprudence:

> In a footnote in its 1992 *Kodak* decision, the Supreme Court seemed to breathe new life into the leverage theory:
>
> > The Court has held many times that power gained through some natural and legal advantage such as a patent, copyright, or business acumen can give rise to liability if 'a seller exploits **[**76] [*543]** his dominant position in one market to expand his empire into the next.'
>
> That statement seemed calculated to resurrect a dubious theory whose main effect had been to preserve the Sherman Act as a small business protection statute. However, less than a year later, in *Spectrum Sports,* the Court seemed to reject the theory altogether.
>
> > *§ 2* [of the Sherman Act] makes the conduct of a single firm unlawful only when it actually monopolizes or dangerously threatens to do so. The concern that *§ 2* might be applied so as to further anticompetitive ends is plainly not met by inquiring only whether the defendant has engaged in 'unlawful' or 'predatory tactics.'
>
> The statements in *Kodak* and *Spectrum Sports* were both dicta, and neither case involved a leverage claim as such.

HOVENKAMP, 318.

For these reasons, ***HN62***[] this Court does not agree Defendant's assertion that a monopoly leveraging claim is inconsistent with Supreme Court precedent under *§ 2*.

D. Defendant Limited its Argument to the Specific Analysis Presented in *Trinko*

Defendant chose to limit its argument concerning monopoly leveraging to the particular analysis presented in **[**77]** *Trinko.* In that case, the absence of legally cognizable anticompetitive conduct animated the Court's decision. In the case at bar, the Court finds that most of Plaintiffs allegations of anticompetitive conduct do not fail as a matter of law at the motion to dismiss stage. Under the logic of *Trinko,* Plaintiffs monopoly leveraging claim will not fail. Since Defendant presents no other arguments concerning monopoly leveraging, the Court does not proceed further.

E. Conclusion

Defendant's Motion to Dismiss Plaintiffs Monopoly Leveraging claim (Count No. 4) is **DENIED.**

XIII. TYING

A. Plaintiff's Tying Claim

In relevant part, Plaintiffs Tying claim reads as follows:

> SBC requires customers of its DSL service to agree to purchase basic local service only from SBC and not from any competitive carrier in a deliberate effort to preserve and maintain its monopoly in the basic local and enhanced services market. If an SBC DSL subscriber attempts to change carriers from SBC to Z-Tel, SBC will either terminate the customer's DSL access, or will deny Z-Tel the ability to provide basic local service to that customer.
>
> The relevant tying market **[**78]** is the market for DSL service or, alternatively, the market for broadband internet access. The relevant tied markets are the basic local services market and the enhanced services market.
>
> SBC's tying scheme imposes prohibitively higher switching costs on customers in order for SBC to maintain or expand its monopoly power in the basic local and enhanced services. Were it not for SBC's illegal tying arrangement, some customers would purchase basic local and enhanced services from carriers other than SBC.
>
> In addition, SBC has tied its basic local service to its enhanced services, and its enhanced services to its basic local service.
>
> SBC will not sell basic local service to customers unless they agree not to buy enhanced services from Z-Tel and other competing carriers (and, indeed, SBC makes such purchases impossible by refusing **[*544]** to provide access to AIN and Z-Tel and other competing carriers). SBC, likewise, will not sell enhanced services to customers unless they agree to purchase their basic local service from SBC.

(Doc. No. 1, p. 41-42).

B. Legal Standards

1. Definition

HN63[] A 'tying" arrangement is one in which a seller of a product or service refuses **[**79]** to sell a product desired by a buyer unless the buyer also agrees to purchase a second product which is not desired. *Eastman Kodak Co. v. Image Technical Servs., 504 U.S. 451, 461, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992)*; *United Farmers Agents Ass'n, Inc. v. Farmers Ins. Exch., 89 F.3d 233, 236 n.2 (5th Cir. 1996)*, *cert. denied, 519 U.S. 1116, 136 L. Ed. 2d 846, 117 S. Ct. 960 (1997)*. The desired product is the "tying product," and the second product is the "tied product." *Id.*

Professor Leslie explains, ***HN64***[] "[a] tying arrangement exists when a seller refuses to sell one product, 'the tying product,' unless the buyer also purchases a second product, 'the tied product.'" Christopher R. Leslie, *Unilaterally Imposed Tying Arrangements and Antitrust's Concerted Action Requirement, 60 OHIO ST. L.J. 1773, 1773 (1999)*.

2. Elements of the Claim

HN65[] Plaintiff must establish each of the following five elements for an illegal "tying" arrangement to exist: (1) there were two separate and distinct products, as opposed to components of a single product; (2) the two products were tied together, or customers were coerced into buying the tied **[**80]** product; (3) the seller possessed substantial economic power over the tying product; (4) the tie has an anticompetitive effect on the tied market; and (5) the tie affected more than an insubstantial volume of commerce. *United Farmers Agents, 89 F.3d at 236 n.2 (citing Kodak, 504 U.S. at 461-62* and *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 11-28, 80 L. Ed. 2d 2,* 104 S. Ct. 1551(1984)); Bob Maxfield, Inc. v. American Motors Corp., 637 F.2d 1033, 1037 (5th Cir. 1981), *cert. denied, 454 U.S. 860, 70 L. Ed. 2d 158, 102 S. Ct. 315 (1981)*.

C. Defendant's Argument Is Threefold

1. Defendant Asserts That it Cannot be Held Liable for Declining to Offer Service Over A Line that Plaintiff Exclusively Controls

a. Arguments Presented in the Motion and Reply

> When Z-Tel wishes to provide voice service, it does so by leasing (among other things) the local loop over which Defendants have been providing *both* voice *and* DSL service. *See* Compl. P 29. Pursuant to FCC regulations, Defendant no longer have any right to provide any service - voice or data - over that line, **[**81]** because they are required to give up control of the *actual copper wire,* not some part or all of the usable bandwidth within it. *Local Competition Order, 11 F.C.C.R. at 15693, P 385*. Thus, Z-Tel gains 'exclusive control over network facilities dedicated to particular end users,' a policy choice that the FCC determined would 'provide[] such carriers the maximum flexibility to offer new services to such end users.' *Id.;* 47 C.F.R. § 51.319(a)(1).

(Doc. No. 7, p. 18) (italics in original).

Defendant further develops this argument in its Reply:

> Z-Tel's 'tying' claim- that is, its claim that defendants violate the antitrust laws by failing to. offer DSL service to Z-Tel's voice customers- fails because SBC's ILECs have no right to use the **[*545]** lines that Z-Tel leases to offer any service to Z-Tel's customers. Z-Tel does not and cannot in good faith contest that defendants require Z-Tel's permission to provide DSL service over the lines that Z-Tel leases.

(Doc. No. 29, p. 3).

b. *Levine v. Bellsouth*

Defendant directs the Court's attention to *Levine v. Bellsouth Corp.,* No. 03-20274-CIV. This unpublished **[**82]** order, which Defendant attaches as Exhibit A to its original motion, dismissed a tying claim similar to the one presented in the case at bar.

In *Levine,* the district court was presented with the defendant's motion to dismiss, *inter alia,* the plaintiffs tying claim. In the plaintiffs view, the defendant's provision of DSL service (the tying product) on the condition that the customer also bought local service (the tied product) predicated a legally cognizable claim. The defendant took the position that "in cases where a CLEC leases a loop for providing service, BellSouth is 'required to surrender the entire loop to the CLEC.'" *Id.* at p. 12. In other words, the defendant argued that it was physically impossible for it to effectuate the alleged tie.

The court described the plaintiff's response as follows:

> Plaintiff argues there is no basis for suggesting that a CLEC would prevent BellSouth from providing DSL service to a CLEC customer, that BellSouth's practices are based on its own internal decisions and not restrictions imposed by CLECs or regulators, and that BellSouth 'almost always has more than one loop connecting a customer's premises to BellSouth's network. **[**83]** '

Id.

The court rejected the plaintiffs argument:

> Plaintiff has not, however, alleged sufficient facts to support its conclusions regarding feasability. Its arguments disputing BellSouth's contentions are not supported by sufficient allegations that a CLEC would not prevent

> BellSouth from providing DSL service to a CLEC customer, nor are there sufficient allegations supporting Plaintiffs argument that BellSouth could provide DSL service over the same or a standalone loop.

Id. at p. 13.

2. In its Reply, Defendant Adds A New Argument That *Trinko* Bars Z-Tel's Claims

In its Reply, Defendant offers several doctrinal and prudential arguments for reading *Trinko* so as to warrant dismissal of Plaintiffs tying claim.

> Defendants do not voluntarily provide DSL service on a stand-alone basis and have not set a retail price for providing DSL service over lines controlled by CLECs (whose permission they must obtain before offering the service). Mandating such an arrangement would require 'considerable expense and effort' including designing and implementing 'new systems' - for ordering, provisioning, billing, and maintenance - to accommodate **[**84]** Z-Tel's demand. *Id. Trinko* makes clear that ***antitrust law*** imposes no such duty.

(Doc. No. 29, p. 5).

3. Defendant Maintains that Plaintiff's Claim is Inconsistent With A Controlling FCC Review Order

> The FCC carefully considered the position (espoused by Z-Tel here) and rejected it. The FCC, in fact, went further: in a closely related context, it made clear that the type of duty Z-Tel seeks to impose would undermine competitors' incentives to innovate and thereby hurt consumers. In light of the **[*546]** FCC's ruling, Z-Tel's claim cannot proceed.

(Doc. No. 7, p. 19; *see also* Doc. No. 29, p. 4-7 (making similar arguments)).

D. Plaintiff's Response

1. The Feasability on the Part of Defendant to Provide Both DSL and Local Services

a. Defendant Could Sell DSL to Plaintiff's Basic Local Customers If it So Desired

Plaintiff begins by stating its version of *Levine's* fundamental holding concerning tying arrangements:

> [The consumers'] arguments disputing BellSouth's contentions are not supported by sufficient allegations that a CLEC would not prevent BellSouth from providing DSL service to a CLEC customer.

(Doc. **[**85]** No. 22, p. 14) *(quoting Levine,* p. 13)

Plaintiff then seeks to distinguish *Levine:*

> The lack of such allegations is not a problem in this case. Rather than seeking to take advantage of potentially greater profits from sales of DSL to non-SBC customers, SBC forgoes that profit to preserve its basic local service monopoly. When SBC customers with DSL call Z-Tel and seek to switch to Z-Tel's basic local service, Z-Tel is not able to provide the service: SBC will either refuse to allow Z-Tel to provide basic local service to the customer or it will allow the switch, but will cut off the customer's DSL service. Comp. P 50.

Id. at p. 14-15.

b. Plaintiff Further Develops its "Potentially Greater Profits" Allegation in its Sur-Reply

In its Sur-Reply, Plaintiff further develops its allegation concerning Defendant's alleged abnegation of profits.

> SBC has refused to provide DSL service to its own DSL customers when they switch to Z-Tel for basic local service. SBC refuses these DSL profits merely to make it more difficult for Z-Tel to compete in the basic local services market. When SBC refuses to provide DSL service to lines leased by Z-Tel, **[**86]** SBC contents itself with only the wholesale revenue it receives from Z-Tel, when it could instead receive both that wholesale

> revenue *and* the retail DSL revenues from the customer. In other words, SBC could make *more* money on the sale of DSL to non-SBC basic local exchange customers than it can from its own customers because it can collect both wholesale and retail profits.

(Doc. No. 37, p. 9) (emphasis in original).

> **c. In the Sur-Reply, Plaintiff Also Includes An Argument That Defendant Provides DSL Service to Some of its Customers Through A Separate Subsidiary**
> SBC repeats its meritless argument that it cannot provide DSL to Z-Tel's customers because the line has been leased to Z-Tel. SBC, however, provides DSL not through the SBC entity that owns the lines, but through a separate subsidiary.

Id.

2. FCC Review Order

> SBC was required, as a condition of its merger with Ameritech, to form a subsidiary competitive DSL provider, and the very paragraph of the Triennial Review Order SBC cites specifically authorized 'partnering with a second competitive LEC [such as SBC's affiliate] that will offer xDSL service.' Triennial **[**87]** Review Order P 270.

(Doc. No. 22, p. 16)

Note that "xDSL" is as written in Plaintiffs brief. It is unclear if "x DSL" differs **[*547]** from ordinary DSL. The Court operates on the assumption that any difference is immaterial.

E. Analysis

1. Plaintiff Alleges A Cognizable Claim Concerning the Feasabiity of Defendant's Provision of DSL to Z-Tel's Local Service Customers

The crux of Defendant's argument is that once Plaintiff elects to use a line for voice service, FCC regulations remove from Defendant any right to provide service - voice or data - over that line. This is so because Defendant is required to give up control of the actual copper wire. For this reason, Defendant maintains that it has no choice but to cut-off its DSL customers who wish to switch to Plaintiff for basic local services.

Plaintiff's response concerning Defendant's alleged decision to forgo profits assumes the answer to the question. It is fairly tautological that Defendant can only forgo profits if profit opportunities exist. Without more, Defendant would prevail. However, Plaintiff alleges that Defendant furnishes DSL through "a separate subsidiary." If this separate subsidiary is the vehicle **[**88]** by which Defendant seizes these profit opportunities, then such opportunities must exist. For this reason, Defendant's first argument to dismiss Plaintiff's Tying claim fails.

2. Defendant's Reliance on *Trinko* Is Misplaced

The impact of *Trinko* in the context of *§ 2* violations was addressed at length in Parts VII-X, *supra.* To briefly review, *Trinko's* second sentence reads as follows: "In this case we consider whether a complaint alleging breach of the incumbent's duty under the 1996 Act to share its network with competitors states a claim under *§ 2 of the Sherman Act*, 26 Stat 209." *Trinko, at 875*. In other words, *Trinko* was a *§ 2* case at heart. It is with that thought in mind that this Court notes that the words "tying" or "tie" do not readily appear in *Trinko's* text. ***HN66***[] Tie-ins may be illegal under *§ 1 of the Sherman Act*. [2] The Court declines to read *Trinko* so as to lessen antitrust liability in contexts other

[2] For sake of completeness, the Court also notes that tie-ins may be illegal under *Section 3 of the Clayton Act*. However, the *Clayton Act* only applies to goods. In this case, the focus is obviously on services, not goods.

than those addressed in that opinion. For this reason, Defendant's second argument to dismiss Plaintiff's Tying claim fails.

[89] 3. Review Order**

The crux of Defendant's argument concerning the *Triennial Review Order* reads as follows:

> In its *Triennial Review Order,* the FCC has already examined possible competitive benefits of requiring ILECs to provide retail DSL service over lines leased by CLECs and determined not only that such a regulatory requirement would bring no benefit but also that it would discourage investment and innovation and thus *harm* consumers.

(Doc. No. 29, p. 6).

As explained in Part XIII, E. 1, *supra,* Plaintiff alleges that Defendant furnishes DSL through "a separate subsidiary." Provision of DSL service through such a separate subsidiary is the obverse of "ILECs to providing retail DSL service over lines leased by CLECs." For this reason, Defendant's third argument to dismiss Plaintiff's Tying claim fails.

4. A Potential Issue of Confusion: the Market for DSL Versus Broadband Services

In its Complaint, Plaintiff is clear, "the relevant tying market is the market for **[*548]** DSL service or, alternatively, the market for broadband internet access." (Doc. No. 1, p. 41). In its Opposition to Defendant's Motion to Dismiss, Plaintiff emphatically declares, **[**90]** "SBC challenges only the DSL allegations." (Doc. No. 22, p. 13). In other words, Plaintiff maintains that Defendant does not contest the tying claim as concerns the tying market for broadband internet services.

The Court does not agree. The word "alternatively" is disjunctive. The Court has analyzed Plaintiff's Tying claim on the basis of a tying market for DSL service. Plaintiff's Complaint indicates that an alternative market for broadband internet access need not be considered. So as to avoid any confusion, Plaintiff's Tying claim involving a tying market for broadband internet access is **DISMISSED without prejudice to repleading.**

F. Conclusion

Defendant's Motion to Dismiss Plaintiff's Tying Claim (Count No. 5) is **DENIED**, except insofar as Plaintiff seeks to pursue a Tying claim involving a tying market for broadband internet access. Since Plaintiff's complaint uses the disjunctive word "alternatively," the Tying claim involving a tying market for broadband internet access is **DISMISSED without prejudice to repleading.**

XIV. SUBJECT MATTER JURISDICTION AND THE BREACH OF CONTRACT CLAIM

A. Defendant's Argument Regarding Plaintiff's Breach [91] of Contract Claim**

1. Introduction

Defendant seeks dismissal of Plaintiff's breach of contract claim (Count No. 11) on the grounds that it "fall[s] outside of the Court's subject matter jurisdiction." (Doc. No. 7, p. 22). Particularly, Defendant advances the argument that the Telecommunications Act requires these claims be addressed by "appropriate regulatory agencies." *Id.*

If Defendant successfully pierces the breach of contract claim, it feels that the other claims arising out of the alleged breaches of the interconnection agreement ineluctably fail as a matter of course. *See* Doc. No. 7, p. 24 ("These allegations - and all of the causes of action that depend on them - thus implicate the expertise of the expert state commissions no less than Z-Tel's breach of contract claim."). For this reason, the Court addresses the breach of contract claim first. The contract at issue is the interconnection agreement. (Doc. No. 1, p. 50).

2. Defendant's Argument is Twofold

a. *Southwestern Bell Tel. Co. v. PUC*

Section 252 of the Telecommunications Act ***HN67***[] establishes a remedial scheme for CLECs that believe they have been wronged by an ILEC's failure **[**92]** to comply with the terms of an interconnection agreement. Defendant cites *Southwestern Bell Tel. Co. v. PUC* for the proposition that "'a dispute… seeking interpretation and enforcement of the agreement,… falls within a state's responsibilities under *Section 252*.' *208 F.3d 475, 480-81 (5th Cir. 2000)*." (Doc. No. 7, p. 23).

b. Doctrinal Support From Federal District Courts

Defendant relies on six (6) district court decisions for its conclusion that "Z-Tel's contract claims must be addressed to the appropriate state commissions in the first instance, not in federal court." *Id.* n. 15.

B. Plaintiff's Response

Plaintiff's response seeks to characterize Defendant's argument as follows: "SBC makes the remarkable claim that **[*549]** *§ 252(e)(6)* divests federal courts of jurisdiction granted by *28 U.S.C. §§ 1331* and*1367*." (Doc. No. 22, p. 17). First, Plaintiff offers a reading of *Southwestern Bell* different from that offered by Defendant.

> SBC cannot rely on *Southwestern Bell Tel. Co. v. PUC, 208 F.3d 475 (5th Cir. 2000)*, for its mistaken claim that jurisdiction over breach of contract claims **[**93]** based on interconnection agreements is vested *exclusively* in state commissions. The Fifth Circuit did not rule that contract claims under interconnection agreements *must* be presented to a state commission before such claims may be asserted in federal district court, but only that such claims *may* be presented to the commission first.

Id. at 17-18.

Second, Plaintiff cites three Supreme Court cases, *Ben. Nat'l Bank v. Anderson, 539 U.S. 1, 156 L. Ed. 2d 1, 123 S. Ct. 2058 (2003)*, *Gulf Offshore Co., Div. of Pool Co. v. Mobil Oil Corp., 453 U.S. 473, 478, 69 L. Ed. 2d 784, 101 S. Ct. 2870 (1981)*, and *Russello v. United States, 464 U.S. 16, 78 L. Ed. 2d 17, 104 S. Ct. 296 (1983)* for the proposition "that a grant of exclusive jurisdiction must be explicitly stated in the statute; it will not be inferred." *Id.* at p. 18.

C. Defendant's Response

First, Defendant notes that "Z-Tel does not discuss or even acknowledge any of six federal cases identified in Defendants' opening brief squarely holding that claims alleging breach of the 1996 Act interconnection agreements must be addressed to state commissions in the first instance, not to federal **[**94]** courts." (Doc. No. 29, p. 7).

Second, Defendant is emphatic that its argument is not that federal district courts have been stripped of the federal question jurisdiction. Rather, "the 1996 Act 'strips federal district courts of their federal question jurisdiction as to questions that have not been presented first to a state PSC'; federal court review is confined to *review* of state-commission determinations." *Id.* (italics in original).

D. Plaintiff's Sur-Reply Argument Adds a New Case, But Nothing New

Plaintiff's Sur-Reply quotes *United States v. American Tel. & Tel. Co., 461 F. Supp. 1314, 1329 n. 45 (D.D.C. 1978)* for the proposition that "[a] referral under [primary jurisdiction] doctrine does not oust a court of jurisdiction; it merely serves as means for requesting a regulatory agency to make preliminary factual and legal determinations while reserving to the court the authority to decide the ultimate questions."

E. Analysis

1. Plaintiff's Reliance on *AT&T* is Misplaced

As an initial matter, the Court notes that Plaintiff's reliance on *United States v. American Tel. & Tel. Co.* is misplaced. The quoted portion **[**95]** of the *AT&T* order explains that ***HN68***[] federal courts must wait for regulatory agencies to perform their task. This is precisely the point Defendant seeks to make.

2. The Telecommunications Act Assigns Enforcement Authority to State Commissions

HN69[] Under the Telecommunications Act, state regulatory bodies are charged with making the initial "determination" of any disputes between parties regarding the interpretation and enforcement of interconnection agreements. *47 U.S.C. § 252(e)(6)*; *see also* *Southwestern Bell Tel. Co. v. Connect Communications. Corp., 225 F.3d 942, 946 (8th Cir. 2000)* ("The Act provides that an interconnection agreement, reached either by negotiation or arbitration, must be submitted to the **[*550]** state commission for approval … this grant of power to state commissions necessarily includes the power to enforce the interconnection agreement.").

3. Once A Party Has Been "Aggrieved" By A State Commission, it May File Suit in Federal Court

A section of the Telecommunications Act entitled, "Review of State commission actions" reads as follows:

> ***HN70***[] In any case in which a State commission makes a determination under this **[**96]** section, **any party aggrieved** by such determination may bring an action in an appropriate Federal district court to determine whether the agreement or statement meets the requirements of *section 251* [*47 USCS § 251*] and this section.

47 U.S.C. § 252(e)(6) (emphasis added).

4. Plaintiff Misreads The Fifth Circuit's Holding in *Southwestern Bell*

Contrary to Plaintiff's characterization of the opinion, in *Southwestern Bell Tel. Co. v. PUC,* the Fifth Circuit held that ***HN71***[] state regulatory agencies have the principal role in determining claims that arise under the Act. "We believe that the FCC plainly expects state commissions to decide intermediation and enforcement disputes that arise after the approval procedures are complete." *208 F.3d 475, 480 (5th Cir. 2000)*.

5. Substantial Doctrine Correlates With *Southwestern Bell*

Other courts have followed the Fifth Circuit's lead. *See* *Intermedia Comm., Inc. v. BellSouth Telecomm., Inc., 173 F. Supp. 2d 1282, 1287 (M.D. Fla. 2000)* (holding that ***HN72***[] parties "must first bring their claims of violations of *§ 251* to the state **[**97]** PSC before a federal court has jurisdiction over the matter"). In *Contact Communications. v. Qwest Corp.,* the district court was presented with an action for breach of two interconnection agreements brought pursuant to diversity jurisdiction. *246 F. Supp. 2d 1184 (D. Wyo. 2003)*. In dismissing the claim, the court also explained, "it is clear to this Court that absent a prior determination of the issue by the state PSC, no federal court jurisdiction exists." *Id. at 1189* *(citing Southwestern Bell Tel. Co. v. PUC* and *Intermedia Communications).*

6. Conclusion

In the section of its complaint detailing its various causes of action, Plaintiff does not allege a violation of *§ 252* by name. However, the contract at issue in Plaintiff's Breach of Contract action is the interconnection agreement about which *§ 252* speaks. ***HN73***[] Plaintiff cannot call a *§ 252* violation by another name (ie., breach of contract) and avoid the controlling legal standards. For these reasons, Defendant's Motion to Dismiss Plaintiff's Breach of Contract claim (Count No. 11) is **GRANTED without prejudice.** If Plaintiff chooses to replead, it must show that a determination **[**98]** has been made by the state regulatory agency. Furthermore, Plaintiff must show that it has been "aggrieved" by this determination as required by *47 U.S.C. § 252(e)(6)*.

XV. SUBJECT MATTER JURISDICTION AND THE *§ 251* CLAIM

A. Arguments of the Parties

1. Defendant's Argument

Section 251 ***HN74***[] describes the interconnection duties required of ILECs. First, Defendant argues that this particular complaint was previously adjudicated by the FCC and is now on appeal in the D.C. Circuit. (Doc. No. 7, p. 36). Furthermore, Defendant maintains that this is **[*551]** relevant because the plain text of *Section 207* states that parties may file a complaint with the FCC or in federal district court, but not both. *Id.*

Second, Defendant argues that general principles of claim preclusion bar Plaintiff's claim. *Id.* at 37.

2. Plaintiff's Response

Plaintiff responds that Defendant's reliance on *Section 207* is misplaced; *Section 207* controls claims for damages, whereas Plaintiff's FCC claim was brought pursuant to *Section 208*, which controls complaints to the FCC in general. In Plaintiffs view, a claim brought pursuant to *Section 208* avoids the exclusionary **[**99]** language of *Section 207*. Moreover, Plaintiff's FCC complaint expressly indicated that no damages were being sought. (Doc. No. 22, p. 36).

Plaintiff also maintains that claim preclusion has no applicability to the *Section 251* claim because the case at bar represents "supplemental relief." *Id.* at 37.

3. Defendant's Reply

In reply, Defendant first reiterates its prior argument that *Section 207* disposes of the *Section 251* claim. Second, Defendant directs the Court's attention to paragraph 99 of the FCC complaint, where Plaintiff expressed an intent to "seek damages including, but not limited to, damages for lost customers, profits, goodwill, and increased costs." (Doc. No. 29, p. 17, n. 15).

4. Plaintiff's Sur-Reply

Plaintiff is emphatic that its FCC complaint did not seek damages. (Doc. No. 37, p. 17). Plaintiff also clarifies its argument that the situation at hand is a "bifurcated determination of liability and damages." *Id.* at p. 18, n. 23. Viewed in this light, the cases cited by Defendant are inapposite because "they involve claimants who received determinations as to both liability and damages and then filed identical claims in court." *Id.*

[100] B. Analysis**

1. The FCC Rules Do Not Discuss Bifurcation in the Sense in Which Plaintiff Uses the Term

a. *Section 1.722*

Plaintiff relies on *47 C.F.R. § 1.722* for the proposition that "under FCC rules, a party may request that the FCC bifurcate liability and damage questions. ***HN75***[] The FCC rules state that when a party makes this election, the damages proceeding is 'separate from and subsequent to' the liability complaint." (Doc. No. 37, p. 18). It does not follow that the damages proceeding is to be heard in federal court. This point is made clear in the relevant section of this regulation:

> ***HN76***[] (i) Where a complainant files a supplemental complaint for damages in accordance with paragraph (e) of this section, the following procedures may apply:
> (1) Issues concerning the amount, if any, of damages may be either designated by the Enforcement Bureau for hearing before, or, if the parties agree, submitted for mediation to, a Commission Administrative Law Judge. Such Administrative Law Judge shall be chosen in the following manner:
> (i) By agreement of the parties and the Chief Administrative Law Judge; or
>
> (ii) In the absence **[**101]** of such agreement, the Chief Administrative Law Judge shall designate the Administrative Law Judge.

b. *Section 208*

Plaintiff argues that its claim is not subject to the dictates of *Section 207* because its FCC complaint was predicated under *Section 208*. *Section 208* reads as follows:

> **[*552]** *§ 208*. ***HN77***[] Complaints to Commission; investigations; duration of investigation; appeal of order concluding investigation
>
> (a) Any person, any body politic or municipal organization, or State commission, complaining of anything done or omitted to be done by any common carrier subject to this Act, in contravention of the provisions thereof, may apply to said Commission by petition which shall briefly state the facts, whereupon a statement of the complaint thus made shall be forwarded by the Commission to such common carrier, who shall be called upon to satisfy the complaint or to answer the same in writing within a reasonable time to be specified by the Commission. If such common carrier within the time specified shall make reparation for the injury alleged to have been caused, the common carrier shall be relieved of liability to the complainant only for the particular violation of **[**102]** law thus complained of. If such carrier or carriers shall not satisfy the complaint within the time specified or there shall appear to be any reasonable ground for investigating said complaint, it shall be the duty of the Commission to investigate the matters complained of in such manner and by such means as it shall deem proper. No complaint shall at any time be dismissed because of the absence of direct damage to the complainant.
> (b)(1) Except as provided in paragraph (2), the Commission shall, with respect to any investigation under this section of the lawfulness of a charge, classification, regulation, or practice, issue an order concluding such investigation within 5 months after the date on which the complaint was filed.
> (2) The Commission shall, with respect to any such investigation initiated prior to the date of enactment of this subsection [enacted Nov. 3, 1988], issue an order concluding the investigation not later than 12 months after such date of enactment.
>
> (3) Any order concluding an investigation under paragraph (1) or (2) shall be a final order and may be appealed under *section 402(a)* [*47 USCS § 402(a)*].

The Court's attention **[**103]** is particularly drawn to subpart three (3), ***HN78***[] which references appeals under *Section 402*. *Section 402* is entitled, "Judicial review of Commission's orders and decisions." The first sentence reads, "Any proceeding to enjoin, set aside, annul or suspend any order of the Commission under this Act…". In other words, as the title of *Section 402* suggests, the rule envisages ordinary appeals. It is fairly obvious that an appeal is very different from a fresh action for damages in a district court. The bottom line is that Plaintiff's reliance on *Section 208* is misplaced.

2. Fifth Circuit Doctrine Abjures the Formal/Informal Complaint Distinction Plaintiff Relies Upon

Plaintiff cites *Cancall PCS, LLC v. Omnipoint Corp., 2000 U.S. Dist. LEXIS 2830 (S.D. N.Y. 2000)* (Schwartz, J.) for the proposition that the filing of an "informal complaint" with the FCC does not bring the complainant within the ambit of *Section 207*. (Doc. No. 29, p. 36). This Court respectfully reads the law differently than does Judge Schwartz. The section of *Cancall* Plaintiff refers to reads as follows:

> *Section 207* thus 'precludes a complainant from filing suit in federal court once she **[**104]** has initiated the administrative complaint process with the FCC either by filing a formal or informal complaint.' *Stiles v. GTE Southwest Inc., 128 F.3d 904, 906 (5th Cir. 1997)*. However, only those claims and remedies sought by the plaintiffs in their informal complaint are barred from being brought in federal **[*553]** court. *See RCA Global Communications, Inc. v. Western Union Telegraph Co., 521 F. Supp. 998, 1005 - 1006 (S.D.N.Y. 1981)* ('Accordingly, we find that [the plaintiff] has not presented its claim for damages… to the FCC, and conclude that the FCC does not have exclusive jurisdiction over the claim under *§ 207*.').

Stiles v. GTE Southwest is the case on which Defendant places primary emphasis. In *Stiles,* the Court was clear:

> In this case, ***HN79***[] the language of the statute is unambiguous: A complainant can file a complaint either with the FCC or in federal district court, but not in both. Contrary to Stiles's arguments, *§ 207* draws no distinction between formal and informal complaints and the fact that the FCC has decided to provide both formal and informal complaint proceedings does not alter the clear language of the statute. **[**105]**

128 F.3d 904, 907 (5th Cir. 1997).

Whatever the state of the law elsewhere, this Court is guided by the clear teaching of *Stiles.* In the Fifth Circuit, regardless of whether Plaintiff filed a formal or informal complaint, *Section 207* is controlling.

3. Plaintiff's FCC Complaint Presents an Issue of Some Confusion

Arguably, Plaintiff's complaint in this action could proceed if it is not predicated upon the same issues as the prior FCC action. This issue goes to Defendant's claim preclusion argument. The FCC complaint is therefore highly relevant. Plaintiff attaches the FCC complaint as Exhibit H to its original opposition to Defendant's motion to dismiss. Plaintiff is clear, "this complaint, however, was not brought for damages and Z-Tel expressly indicated that damages were not being sought in the proceeding." (Doc. No. 22, p. 36) *(citing* page 2 of Exhibit H). The second page of Exhibit H is entitled "Formal Complaint Intake Form." In very small print, a checklist on this form reads "If damages are sought in this Complaint, the Complaint comports with the specifications prescribed by *47 C.F.R. Section 1.722 (a)*,*(c)*." Written **[**106]** next to this sentence is a notation, "N/A". However, the text of the complaint itself does not readily divulge the Plaintiff's "express indication that damages were not sought in the proceeding." Moreover, as explained in Part XV, B. 1, *supra, Section 1.722* ***HN80***[] does not envisage bifurcated damages/liability proceedings between the FCC and federal district courts.

In its Reply, Defendant quotes paragraphs 14 and 99 of the FCC complaint for language concerning "damages." This language would tend to cut at the heart of Plaintiff's argument. However, Exhibit H to Plaintiff's Opposition (i.e., the FCC complaint) is not numbered by paragraph. The Court is not clear what document Defendant quotes from.

4. Conclusion

Section 207 ***HN81***[] bars action in federal district court once an aggrieved party files a complaint with the FCC. *Stiles* directs that this result obtains upon the filing of both formal and informal complaints. Arguably, Plaintiff's complaint in this action could proceed if it is not predicated upon the same issues as the prior FCC action. There seems to be some confusion as to which document represents Plaintiff's FCC complaint.

For these reasons, Defendant's Motion to Dismiss **[**107]** Plaintiff's *§ 251* claim (Count No. 8) is **GRANTED without prejudice to repleading.** If Plaintiff chooses to replead, it should demonstrate how Plaintiff's complaint in the case at bar is predicated upon different issues vis-a-vis the prior FCC action. Having granted Defendant's motion on the more fundamental **[*554]** grounds of subject matter jurisdiction, the Court need not address Defendant's argument concerning claim Preclusion.

XVI. *TELECOMMUNICATIONS ACT § 202*

A. Plaintiff's Complaint

Plaintiff's Complaint regarding the *Telecommunications Act § 202* violation (Count No. 9) reads as follows:

> SBC's course of conduct, as described above, is systematically biased to advantage customers if they purchase their basic local service from SBC rather than Z-Tel, by depriving Z-Tel of complete, timely, and accurate line loss information and accurate billing information, while simultaneously providing for itself the same information. As a consequence, SBC's customers perceive SBC's service differently than Z-Tel's, purely based on the deliberate discrimination among the different class of customers by SBC. As such, SBC has violated *47 U.S.C. § 202*. **[**108]**

(Doc. No. 1, p. 49).

B. Defendant's Argument

1. *§ 202*

Section 202 reads as follows:

> ***HN82***[] (a) Charges, services, etc. It shall be unlawful for any common carrier to make any unjust or unreasonable discrimination in charges, practices, classifications, regulations, facilities, or services for or in connection with like communication service, directly or indirectly, by any means or device, or to make or give any undue or unreasonable preference or advantage to any particular person, class of persons, or locality, or to subject any particular person, class of persons, or locality to any undue or unreasonable prejudice or disadvantage.
> (b) Charges or services included. Charges or services, whenever referred to in this Act, include charges for, or services in connection with, the use of common carrier lines of communication, whether derived from wire or radio facilities, in chain broadcasting or incidental to radio communication of any kind.

2. Defendant's First Argument: The Activities About Which Plaintiff Complains Are Not Subject to *Section 202*

Defendant advances two arguments in support of its motion to dismiss Plaintiff's *§ 202* claim. **[**109]** Defendant's first argument trains on the denotation of the words "communication services." (Doc. No. 7, p. 38). Defendant places heavy emphasis on the Fifth Circuit's opinion in *Brittan Communications. Int'l Corp. v. Southwestern Bell Tel. Co., 313 F.3d 899 (5th Cir. 2002)*. In *Brittan,* the plaintiff, a switchless reseller of long-distance telephone services, appealed the district court's order granting the defendant's motion for judgment on the pleadings on, *inter alia,* its *§ 202* claim. The Fifth Circuit affirmed Judge Kent's finding that, long distance "billing and collection services that do not utilize communications over the common carriers wire or radio facilities are not 'communications services' regulated by *Title II of the Communications Act*." *Id. at 904*.

3. Defendant's Second Argument: Plaintiff Fails to Allege Discrimination Among Similarly Situated Classes of Customers

Defendant's second argument is that Plaintiff fails to allege disparate treatment among classes of customers. (Doc. No. 7, p. 39). Defendant cites two cases from the D.C. Circuit, *American Message Ctrs. v. F.C.C., 311 U.S. App. D.C. 64, 50 F.3d 35, 40 (D.C. Cir. 1995)* **[**110]** and *Competitive Telecommunications Ass'n v. F.C.C., 302 U.S. App. D.C. 423, 998 F.2d 1058, 1061 (D.C. Cir. 1993)*, and a FCC order for the proposition that a **[*555]** *§ 202* claim trains on disparate treatment of similarly situated customers, rather than other parties. Defendant reads Plaintiff's complaint as alleging only that Defendant has treated "[itself] better than [it] has treated Z-Tel." *Id.*

C. Plaintiff's Response

1. Plaintiff's First Argument: *Brittan* is Distinguishable

Plaintiff's first argument trains on *Section 202*'s use of the words "in connection with" and seeks to distinguish *Brittan* for the following reason:

> 'Brittan and SWBT did not have a contractual relationship,' and the charges at issue were Brittan's charges to consumers, which SBC included on its bill to the consumer. Thus, in *Brittan,* SBC was not providing a 'communication service' to Brittan 'in connection with' the billing service at issue.

(Doe. No. 22, p. 39) (citation omitted).

2. Plaintiff's Second Argument: A Carrier's Provision of Services to Itself can be Used to Judge Service Quality

Defendant cites *Telecom Int'l Am., Ltd. v. AT&T Corp., 67 F. Supp. 2d 189, 211 n.22 (S.D.N.Y. 1999)* **[**111]** for the proposition that a carrier's provision of services to itself can be used to judge service quality under *§ 202(a)*. (Doc. No. 22, p. 40).

D. Analysis

1. The Court Does Not Accept Plaintiff's Reading of *Brittan*

In *Brittan,* the Court explained:

> Although it may be true that the FCC has moved away from the position that billing and collection services are financial and administrative services, this does not persuade us to conclude that the billing and collection services at issue in this case fall within Title II. Brittan ***HN83***[] has cited no FCC decision in which the FCC has altered its view that billing and collection services provided by LECs to unaffiliated long-distance providers fall outside the scope of Title II. *See In the Matter of Federal-State Joint Board on Universal Service, 13 F.C.C.R. 24,744, P 70 & n.87 (1998)* (finding that billing and collection services are subject to Title II, but only as to a carrier's own billing and collections). Likewise, Brittan has cited to no case holding that billing and collection services fall within the scope of Title II.

313 F.3d, at 904.

> ***HN84***[] Although carrier **[**112]** billing and collection for a communication service that it offers individually or as a joint offering with other carriers is an incidental part of a communication service, we believe that carrier billing or collection for the offering of another unaffiliated carrier is not a communication service for purposes of *Title II of the Communications Act*.

Id. at. 905 (quoting *In the Matter of Detariffing of Billing and Collection Services, 102 F.C.C.2d 1150, p. 31 (1986)*).

Plaintiff's reliance on the existence, or lack thereof, of a contractual relationship carries no weight in assessing *Brittan's* fundamental holding. Since Plaintiff's allegations of billing and line-loss services are of a type far different from the "financial and administrative services" spoken about in *Brittan,* Plaintiff has failed to state a *Section 202* claim as matter of law.

2. Plaintiff Reads *Telecom Int'l Am.* Out of Context

Plaintiff cites *Telecom Int'l Am.* for the proposition ***HN85***[] that a carrier's provision of services to itself can be used to judge service quality under *§ 202 (a)*. This is fairly undebatable. However, the focus on **[*556]** "quality" is only relevant as to the provision of **[**113]** service to other customers. Plaintiff fails to note that immediately above the section it cites, the court in *Telecom Int'l Am.* explained:

> Courts determining whether a carrier has unlawfully discriminated utilize a tripartite test analyzing: (1) whether the services are 'like;' (2) if so, whether the carrier is offering the service to **other customers** at a 'different' price or under 'different' conditions than those offered to the petitioner; and (3) if such difference exists, whether that difference is unreasonable.

67 F. Supp. 2d 189, 210 (S.D.N.Y. 1999) (emphasis added).

This Court notes that *Telecom Int'l Am.* cites the same D.C. Circuit cases Defendant relies on in the case at bar. ***HN86***[] The bottom line is that the focus of a *§ 202* inquiry is on discrimination among customers. Plaintiff's complaint fails to make such an allegation. Herein lies an additional grounds for the Court's dismissal of Plaintiff's *Section 202* claim.

E. Conclusion

Defendant's motion to dismiss Plaintiff's *Section 202* claim (Count No. 9) is **GRANTED**. Plaintiff's *Section 202* claim is **DISMISSED without prejudice to repleading.**

XVII. TELECOMMUNICATIONS [**114] ACT *§ 222*

A. Plaintiff's Complaint

> In its capacity as a carrier customer of SBC, Z-Tel provided SBC's wholesale operations with proprietary information concerning its customers and potential customers. SBC was required under *47 U.S.C. § 222* to use that information only to provide the wholesale services Z-Tel ordered, and, not for its own marketing efforts. SBC misused that information, in violation of *Section 222 of the Act*, in order to solicit those customers as SBC's own retail customers. Some of those solicited customers canceled their orders with Z-Tel and became SBC customers.

(Doc. No. 1, p. 49).

B. Text of *§ 222*

> The text of *§ 222* reads as follows:
>
> ***HN87***[] (a) In general. Every telecommunications carrier has a duty to protect the confidentiality of proprietary information of, and relating to, other telecommunication carriers, equipment manufacturers, and customers, including telecommunication carriers reselling telecommunications services provided by a telecommunications carrier.
>
> (b) Confidentiality of carrier information. A telecommunications carrier that receives or obtains proprietary information **[**115]** from another carrier for purposes of providing any telecommunications service shall use such information only for such purpose, and shall not use such information for its own marketing efforts.

C. Defendant's Argument

Defendant's argument trains on the words "another carrier" found in *§ 222 (b)*.

> As relevant here, *Section 222* prevents carriers (such as SBC's ILECs) from 'using… for its own marketing purposes' any 'proprietary information' that a 'telecommunications carrier… receives or obtains… from *another* carrier for purposes of providing any telecommunications service." *47 U.S.C. § 222 (b)* (emphasis added). The information Z-Tel places at issue in Count 10- the fact that a customer has left an SBC ILEC to take service from another carrier, along with a 'detailed summary' of the services the customer previously received from the SBC ILEC, *see* ***[*557]*** Compl. P 78-is Defendants' *own* information, which they possess by virtue of their own prior relationship with the customer.

(Doc. No. 7, p. 40) (italics in original).

Defendant expounds on this argument in its Reply:

> Z-Tel alleges that defendants used **[**116]** *their own* information- the fact that a customer had stopped purchasing services from one of the defendants-in its marketing efforts. But carriers are permitted to use *their own* information, and this allegation thus does not state a claim under *47 U.S.C. § 222 (b)*.
>
> Z-Tel… merely rehashes the language of *section 222* without providing notice of the proprietary information Z-Tel might be referring to.

(Doc. No. 29, p. 20) (italics in original).

D. Analysis

HN88[] "Conclusory allegations or legal conclusions masquerading as factual conclusions will not suffice to prevent a motion to dismiss." *Jones v. ALCOA, Inc., 339 F.3d 359, 362 (5th Cir. 2003)*. Plaintiff fails to allege, in even the vaguest of terms, what sort of data in the furnished information Defendant allegedly misused. Even viewing all allegations in the light most favorable to the non-movant, the Court cannot conclude that Plaintiff has alleged a legally cognizable claim.

E. Conclusion

Defendant's Motion to Dismiss Plaintiff's *Section 222* claim (Count No. 10) is **DISMISSED** without prejudice to repleading.

XVIII. RICO

A. Plaintiff's [**117] Complaint

The crux of Plaintiff's RICO claim is that Defendant's submission of false and fraudulent invoices and defective line loss information constitutes predicate acts of racketeering activity, particularly mail and wire fraud. (Doc. No. 1, p. 42-46). Plaintiff further alleges that Defendants aid and abet each one another in this scheme. Lastly, Plaintiff alleges that the subsidiary Defendants also assume a distinct role in facilitating and masking the underlying fraud. *Id.* at p. 45.

B. Defendant's Argument

1. Introduction

HN89[] To state a claim under the RICO statute, *18 U.S.C. § 1962*, a plaintiff must allege (1) the conduct (2) of an enterprise (3) through a pattern (4) of racketeering activity. *See Elliott v. Foufas, 867 F.2d 877, 880 (5th Cir. 1989) (citing Sedima, S.P.R.L. v. Imrex Co., 473 U.S. 479, 496, 87 L. Ed. 2d 346, 105 S. Ct. 3275 (1985))*. Defendant argues that Plaintiff has failed to allege elements (2) and (4).

2. Racketeering Activity

a. No Intent to Deceive

Defendant argues that Plaintiff fails to allege an intent to deceive. Defendant cites *Mazandarani v. American Express Travel Related Services. Co., 1996 U.S. Dist. LEXIS 13753 (N.D. Tex. 1996)* **[**118]** for the proposition that a simple failure to perform legal obligations (i.e., lease the network as required under the interconnection agreement) does not constitute *a priori* evidence of an intent not to perform. (Doc. No. 7, p. 26-28).

b. No Reasonable Reliance

Defendant cites *In re Mastercard Int'l Internet Gambling Litig., 313 F.3d 257 (5th Cir. 2002)* for the proposition that a civil RICO plaintiff must also allege facts showing that it reasonably relied on the allegedly false and fraudulent statements. (Doc. No. 7, p. 28). Defendant asserts Plaintiff did not so rely, as evidenced by **[*558]** Plaintiff's actions in lodging many complaints with Defendant about its service, or faulty provision thereof. In other words, Defendant maintains that Plaintiff's claim fails because Plaintiff knew about the lack of truth about which it now complains.

c. No Acquisition or Maintenance

> But plaintiff does not offer even a conclusory allegation, let alone well-pleaded facts, suggesting that SBC *acquired* its subsidiaries by virtue of the alleged scheme to defraud Z-Tel; rather, the complaint acknowledges that SBC acquired its subsidiaries years *before* the **[**119]** alleged scheme was hatched in 1999.

(Doc. No. 7, p. 29) (italics in original).

Defendant also directs the Court's attention to a case involving an "analogous complaint," *Discon, Inc. v. NYNEX Corp., 93 F.3d 1055 (2d Cir. 1996)*. *Id. at 30*.

3. No Distinct Enterprise

First, Defendant cites authority for the proposition that a corporation cannot be both the enterprise and the RICO perpetrator. For this reason, the Defendant subsidiaries are wrongly conflated with RICO persons. Defendant seeks to distinguish this Court's order in *Office Outfitters v. A.B. Dick Co., 83 F. Supp. 2d 772 (E.D. Tex. 2000)* from a recent Seventh Circuit opinion holding that subsidiaries and their parent companies are insufficiently distinct to trigger RICO liability. (Doc. No. 7, p. 31-33).

C. Plaintiff's Response

1. Intent May Be Averred Generally

First, Plaintiff points out that under *FED. R. CIV. P. 9 (b)*, intent may be averred generally. (Doc. No. 22, p. 24). Plaintiff also adduced authority for the proposition that intent to commit fraud is usually a question of fact.

2. Simply "Raising Questions" [120] Does Not Vitiate Reliance**

> Raising questions regarding representations in some invoices is hardly synonymous with actual knowledge of fraudulent statements in those invoices, much less with other invoices as to which Z-Tel had no knowledge of falsity at the time they were paid.

(Doc. No. 22, p. 26).

3. Defendant Misreads *Office Outfitters*

Plaintiff reads *Office Outfitters* as having rejected the restrictive view of the maintenance requirement adopted by the Second Circuit in *Discon.* Plaintiff asserts that an allegation that one took steps to enhance or protect value is sufficient. (Doc. No. 22, p. 28).

4. The Subsidiaries Played "Distinct Roles"

Plaintiff points to several places where it alleged conduct unique to the subsidiary Defendants. (Doc. No. 22, p. 30-31). Plaintiff also cites *Williams v. Ford Motor Co., 11 F. Supp. 2d 983 (N.D. Ill. 1998)* in support of its association-in-fact allegations. *Id.* at p. 31.

D. Analysis

1. Racketeering Activity

A. Intent to Deceive

In *Coffel v. Stryker Corp.,* the court explained, ***HN90***[] "since intent to defraud is generally not susceptible to direct proof, it **[**121]** usually must be proven by circumstantial evidence." *284 F.3d 625, 634 (5th Cir. 2002)*. *Rule 9 of the Federal Rules of Civil Procedure* ***HN91***[] requires that the circumstances constituting wire and mail fraud be stated with particularity. However, *Rule 9* should be read together with *Rule 8*, which requires only a "short and plain statement **[*559]** of the claim showing that the pleader is entitled to relief." *Landry v. Air Line Pilots Ass'n Int'l, AFL-CIO, 901 F.2d 404, 430 (5th Cir.)*, *cert. denied, 498 U.S. 895, 112 L. Ed. 2d 203, 111 S. Ct. 244 (1990)*.

For these reasons, the Court cannot say Plaintiff has failed to allege any set of circumstances that Defendant held an intent to deceive at the initiation of the interconnection agreement. Moreover, at the motion to dismiss stage, Plaintiff has not yet had an opportunity adduce evidence, direct or circumstantial, of intent to defraud on the part of Defendant.

b. Reasonable Reliance

HN92[] The "by reason of" language of RICO has been interpreted by the Supreme Court and to require a showing that the fraud was the "but for" cause and "proximate" cause of the injury. *Holmes v. Securities Investor Protection Corp., 503 U.S. 258, 117 L. Ed. 2d 532, 112 S. Ct. 1311 (1992).* **[**122]** "For a misrepresentation to cause an injury, there must be reliance. Knowledge of the truth defeats a claim of fraud because it eliminates the deceit as the 'but for' cause of the damages." *Sandwich Chef v. Reliance Nat'l Indem. Ins. Co., 319 F.3d 205, 218-19 (5th Cir. 2003)*.

> Plaintiff presents a highly persuasive argument:
>
> Raising questions regarding representations in some invoices is hardly synonymous with actual knowledge of fraudulent statements in those invoices, much less with other invoices as to which Z-Tel had no knowledge of falsity at the time they were paid.

(Doc. No. 22, p. 26).

Moreover, objections were lodged only as to some fraction of the total number of bills and invoices. Plaintiff has raised a credible allegation that the condition of falsity was (arguably) present as to some of the other bills. Viewed in the light most favorable to the non-movant, the fact that no objection was raised demonstrates that this falsity was unknown to Plaintiff. For these reasons, the Court cannot agree with Defendant that Plaintiff has raised no allegation of reasonable reliance as to at least some critical mass of the bills at **[**123]** issue.

c. Acquisition or Maintenance

The RICO statute reads as follows:

HN93[] (b) It shall be unlawful for any person through a pattern of racketeering activity or through collection of an unlawful debt to acquire or maintain, directly or indirectly, any interest in or control of any enterprise which is engaged in, or the activities of which affect, interstate or foreign commerce.

Defendant first argues that Plaintiff fails to allege that it acquired its subsidiaries by virtue of the alleged RICO violations. Plaintiff does not seem to particularly resist this argument. Since the subsidiaries were acquired before Plaintiff began to operate as a company, Plaintiff's "acquisition" argument is lacking. Were "acquisition" a necessary condition to a RICO claim, this would likely be the end of the story. However, ***HN94***[] in the section of the statute quoted immediately above, the words "acquire" and "maintain" are separated by the disjunctive word "or."

Defendant states, "While the complaint does contain a conclusory assertion that the alleged RICO scheme helped SBC 'enhance or protect the value' of its subsidiaries, it does not assert that the alleged scheme allowed SBC to *maintain* **[**124]** ownership of its subsidiaries." (Doc. No. 7, p. 29-30) (italics in original). Plaintiff's maintenance allegation is contained in paragraph 124 of its complaint. In *Office Outfitters v. A.B. Dick Co.,* this Court explained:

> **[*560]** Plaintiffs allege that GEC and GEC, Inc.--the RICO persons--took steps that enhanced or protected A.B. Dick's cash-in value and that such measures were injurious to Plaintiffs. Such an allegation is sufficient under *§ 1962(b)*.

83 F. Supp. 2d 772, 779 (E.D. Tex. 2000).

Plaintiff's theory is that Defendant's conduct allowed it to arrogate illegal profits it would not otherwise have been able to capture. The discounted value of illicit profits is reflected in shareholder equity to the same extent as are legitimate profits. Insofar as Defendant's alleged conduct was accretive to the value of these business firms, it cannot be said that the alleged RICO-violating conduct fails the maintenance requirement.

d. Maintenance Injury

Defendant argues that Plaintiff has not alleged an acquisition or maintenance injury separate from the injuries resulting from the predicate acts. (Doc. No. 7, p. 30-31). Defendant's argument is unavailing. **[**125]** ***HN95***[] A complaint does not need to make a large number of allegations relating to the injury suffered. "At the pleading stage, general factual allegations of injury resulting from the defendant's conduct may suffice, for on a motion to dismiss we 'presume that general allegations embrace those specific facts that are necessary to support the claim.'" *Lujan v. Defenders of Wildlife, 504 U.S. 555, 561, 119 L. Ed. 2d 351, 112 S. Ct. 2130 (1992)* (quoting *Lujan v. National Wildlife Fed'n, 497 U.S. 871, 889, 111 L. Ed. 2d 695, 110 S. Ct. 3177 (1990))*. In *Nat'l Org. for Women v. Scheidler,* the Supreme Court reversed a decision by the lower court to dismiss a complaint for lack of standing to bring a RICO action. In doing so, the Supreme Court indicated that ***HN96***[] relatively few allegations are needed to state an injury under RICO:

> [Plaintiffs] alleged in their complaint that respondents conspired to use force to induce clinic staff and patients to stop working and obtain medical services elsewhere. [Plaintiffs] claimed that this conspiracy 'has injured the business and/or property interests of the [plaintiffs].' In addition, [plaintiffs] claimed that [a defendant] threatened [its] **[**126]** clinic administrator with reprisals if she refused to quit her job at the clinic. . . . Nothing more is needed to confer standing on [plaintiffs] at the pleading stage.

510 U.S. 249, 256, 127 L. Ed. 2d 99, 114 S. Ct. 798 (1994).

For these reasons, the Court also rejects Defendant's argument that Plaintiff's RICO damages are indistinct from its Tariff/Contract damages. (Doc. No. 7, p. 29). Defendant's Filed Tariff Doctrine argument will be discussed in more detail in Part XIX, *infra.* For present purposes, the Court notes that Defendant had not adduced sufficient authority for the proposition that the Filed Tariff Doctrine circumscribes a civil RICO plaintiff's damages.

e. Conclusion

Plaintiff has alleged a cognizable claim as to racketeering activity.

2. The "Enterprise" Element

a. Distinct Roles

Defendant cites *Parker & Parsley Petroleum Co. v. Dresser Indus., 972 F.2d 580, 583 (5th Cir. 1992)* for the proposition that "a corporation cannot be both the enterprise and the RICO perpetrator." Defendant is correct in this statement of the law. *See also* *Bishop v. Corbitt Marine Ways, Inc., 802 F.2d 122, 123 (5th Cir. 1986)* ("the 'person' **[**127]** and the 'enterprise must be distinct."); *see also* *Yellow Bus Lines, Inc. v. Local Union 639, 280 U.S. App. D.C. 60, 883 F.2d 132, 139 (D.C. Cir. 1989)* ("Logic alone dictates that **[*561]** one entity may not serve as the enterprise and the person associated with it because…you cannot associate with yourself.").

However, Defendant misapplies the law to the Plaintiff's allegations. Plaintiff does not allege that Defendant SBC is both the enterprise and the RICO perpetrator. To the contrary, under the title, "SBC's Subsidiaries Assume A Distinct Role in Facilitating And Masking Defendants' Fraud, Plaintiff alleges that, for at least some part of the allegedly illicit conduct, the subsidiary Defendants are the perpetrators. (Doc. No. 1, p. 45 (detailing distinct roles attributable to the subsidiaries)).

Both sides direct the Court to its order in *Office Outfitters v. A.B. Dick Co.* In that case, this Court explained, "plaintiffs allege that A.B. Dick was used to make 'most of the misrepresentations and fraudulent omissions toward distributors. . . .' Such an allegation is sufficient to withstand a motion to dismiss." *83 F. Supp. 2d, at 780*. For obvious reasons, **[**128]** Plaintiff feels that *Office Outfitters* is strongly correlative to the facts in the case at bar, while Defendant feels that the present set of facts are highly distinguishable.

In support of its argument, Defendant directs the Court to a recent opinion by Judge Posner, *Bucklew v. Hawkins, Ash, Baptie & Co., LLP, 329 F.3d 923 (7th Cir. 2003)*. The Seventh Circuit explained:

> ***HN97***[] A parent and its wholly owned subsidiaries no more have sufficient distinctness to trigger RICO liability than to trigger liability for conspiring in violation of the Sherman Act, *see* *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 777, 81 L. Ed. 2d 628, 104 S. Ct. 2731 (1984)*, unless the enterprise's decision to operate though subsidiaries rather than divisions somehow facilitated its unlawful activity, which has not been shown here.

Id. at 934.

The Court's first observation about *Bucklew* is that the plaintiff charged copyright infringement, fraud, conversion, and violation of RICO. The district judge dismissed all but the copyright claim, which was tried to a jury, resulting in a verdict for $ 660,000, which the judge remitted to $ 395,000. **[**129]** Even though the Circuit's review was *de novo* as to the pre-trial dismissal, the appellate court obviously had the benefit of a trial record to inform the totality of its analysis.

Second, *Bucklew* clearly holds out a flag for Plaintiff to capture, "unless the enterprise's decision to operate though subsidiaries rather than divisions somehow facilitated its unlawful activity…". In the case at bar, Plaintiff does in fact make such an allegation. "SBC's subsidiaries' actions are all aimed at concealing, masking, and facilitating the Defendants' fraudulent scheme." (Doc. No. 1, p. 45). The Court hastens to add that it passes no judgment as to the ultimate truth of this allegation. Nor does the Court foreclose the possibility that credible summary judgment evidence may not provide sufficient factual support. However, at the motion to dismiss stage, Plaintiff's allegation is sufficient to come within the ambit of *Bucklew's* exception.

b. Association-in-Fact

Defendant directs the Court's attention to an Eighth Circuit case, *Fogie v. THORN Ams., Inc., 190 F.3d 889 (8th Cir. 1999)* in which the court found a lack of sufficient distinction between the parents **[**130]** and subsidiary to warrant RICO liability. The Court's first observation is that, in *Fogie,* the Eighth Circuit was presented with a district court's order on a motion for summary judgment. In the case at **[*562]** bar, this Court is presented with a motion to dismiss.

The Court's second observation about *Fogie* is that the holding was not as broad as Defendant asserts.

> But we must consider whether a subsidiary may be sufficiently distinct from its parent or other related subsidiaries so as to satisfy *§ 1962(c)*'s distinctiveness requirement. We believe it cannot. A parent company and a subsidiary are separate legal entities, but this is not enough. Nor is it enough that the parent and subsidiary corporations have different roles in the alleged enterprise, as would be typical of every parent-subsidiary relationship. Rather, there must be a greater showing that the parent and subsidiary are distinct than the mere fact that they are separate legal entities. To conclude otherwise would be to read the distinctiveness requirement out of RICO.
>
> Turning our attention to the present case, the plaintiffs have not shown sufficient distinctiveness between THORN Americas; TEMINAH; THORN **[**131]** EMI, plc; or any of the other related business entities that allegedly comprise the RAC enterprise. All these entities are part of one corporate family operating under common control. Therefore, we affirm the District Court's granting of summary judgment to the defendants on the plaintiffs' *§ 1962(c)* claim.

Id. at 898.

In response, Plaintiff points out that *Fogie* is not a Fifth Circuit case. Plaintiff also indicates that it "has not located a single case in this circuit precluding a finding of distinctiveness under 1962 (c), where a subsidiary is identified as the RICO person, with an association-in-fact enterprise existing among the subsidiary and its parent." (Doc. No. 22, p. 31).

One such case is *Atkinson v. Anadarko Bank & Trust Co., 808 F.2d 438 (5th Cir. 1987)*. In *Atkinson,* the plaintiffs appealed the district court's decision to grant the defendant's motion for judgment notwithstanding the verdict regarding a RICO claim. Discussing the concept of distinctiveness, the Court explained:

> The record here contains no evidence that the bank, its holding company, and the three employees were associated in any manner apart **[**132]** from the activities of the bank. Plaintiffs wholly failed to establish the existence of any entity separate and apart from the bank. In this case, the alleged racketeering activity forming the predicate of the RICO charge was mail fraud -- the mailing of false statements requesting payment of interest in excess of the agreed amount. The mailing of loan statements was an activity of the bank There is no evidence of any other activity on the part of the alleged enterprise.
> In addition, there was no evidence presented that the five associates functioned as a continuing unit or formed an ongoing association. No connection was shown between the three individuals and the holding company. The only fact implicating the holding company in the alleged association was its purchase of shares of plaintiffs' notes from the bank. Reasonable jurors could not have found the existence of an enterprise separate and apart from the bank. The district court correctly set aside the jury's finding of a RICO violation.

Id. at 440.

The bottom line is that Plaintiff has its work cut out if it seeks to distinguish its case from the doctrine overviewed immediately above. However, ***HN98***[] the **[**133]** doctrine instructs the Court to be hesitant to cut off RICO plaintiffs before they have an opportunity to adduce "enterprise" evidence.

[*563] E. Conclusion

In Defendant's view, a simple contract dispute may not be elevated into a RICO violation. This is certainly a correct statement of the law. However, on a motion to dismiss, the Court is required to view all allegations in the light most favorable to the non-movant. In that light, Plaintiff has alleged a pattern of intentional wrongful conduct on the part of Defendant to misuse its network and submit false business material in such a way as to seriously hamper Plaintiff's ability to compete in the market. The Court hastens to add that it passes no judgment on the ultimate truth of these allegations.

Defendant would have the Court view Plaintiff's allegations in the light most favorable to Defendant. In that light, this is "simply a contract dispute." However, the Court concludes that, when the allegations are viewed in the light most favorable to Plaintiff, Plaintiff has alleged that Defendant breached its contract by way of conduct far more deleterious than that constituting the breach itself.

For these reasons, Defendant's **[**134]** Motion to Dismiss Plaintiff's RICO claim (Count No. 6) is **DENIED**.

XIX. FILED TARIFF DOCTRINE

A. Introduction

Defendant advances a separate argument in support of its motion to dismiss 1) the RICO claim (Count 6) and 2) the Telecommunications Act claims (Count Nos. 8, 9, 10, and 11). As an initial matter, the Court notes that the relationship between the Filed Tariff Doctrine and Plaintiff's RICO claim was discussed more fully in Part XVIII, D.1.d, *supra.* At that point, the Court explained why the Filed Tariff Doctrine argument was found to be unavailing with respect to the RICO claim. The analysis to follow is particularly, though not exclusively, directed to the Telecommunication Act claims.

B. Legal Standards

Section 203(a) of the Telecommunications Act ***HN99***[] requires local exchange carriers to file with the FCC tariffs "showing all charges" and "showing the classifications, practices, and regulations affecting such charges." *47 U.S.C. § 203(a)*. Under the filed rate doctrine, "once a carrier's rate is approved by the FCC, the terms of the federal tariff are considered to be 'the law' and to therefore 'conclusively and exclusively **[**135]** enumerate the rights and liabilities' as between the carrier and the customer." *Evanns v. AT&T Corp., 229 F.3d 837, 840 (9th Cir. 2000)* (citation omitted). "The filed rate doctrine precludes the plaintiff in an antitrust suit from claiming speculative damages….[involving] a hypothetical lower rate that would have been charged in the absence of the [anticompetitive conduct] and the acceptability of those rates to the appropriate regulatory agency." *County of Stanislaus v. Pacific Gas & Elec. Co., 1995 U.S. Dist. LEXIS 21411, *10* *(citing* *Keogh v. Chicago & N.R. Co., 260 U.S. 156, 164, 67 L. Ed. 183, 43 S. Ct. 47 (1922))*. However, the filed rate doctrine does not apply to cases not involving rates or rate setting. *See Central Office Telephone, Inc. v. AT&T, 108 F.3d 981 (9th Cir. 1997)* (holding that the filed rate doctrine is inapplicable in a breach of contract dispute); *Columbia Steel Casting Co. v. Portland General Elec. Co., 103 F.3d 1446 (9th Cir. 1996)*.

C. Analysis

At one point, Defendant appears to seek to extend its Filed Tariff Doctrine argument to Plaintiff's entire complaint, "these allegations **[**136]** - and all of the causes of action that depend on them - thus implicate the expertise of the expert state commissions no less than Z-Tel's breach of contract claim." (Doc. No. 7, p. 24). However, **[*564]** the section heading under which the Filed Tariff Doctrine argument appears indicates that the propositions contained therein are directed solely at the RICO claim and Telecommunications Act claims. (Doc. No 7, p. 22).

Defendant's Filed Tariff Doctrine argument is primarily directed at the Telecommunications Act claims. Since the Telecommunications Act claims were dismissed on narrower grounds, the Court does not reach the Filed Tariff Doctrine argument as to these claims. However, should Plaintiff choose to replead the Telecommunications Act claims in such as way as to correct the indicated errors, Defendant is free to advance this argument again on a future dispositive motion.

XX. LANHAM ACT

A. Plaintiff's Complaint

> SBC, in connection with its provision of basic local and enhanced services, caused to be used in interstate commerce false and misleading descriptions or misleading representations of fact. The false and misleading descriptions or misleading representations **[**137]** of fact, in commercial promotion, misrepresented the nature, characteristics, and qualities of Z-Tel's services, in violation of *15 U.S.C. § 1125(a)*. In particular, SBC has misrepresented the nature, characteristics, and qualities of both SBC's and Z-Tel's basic local and enhanced services. For example, by providing line loss information to itself before providing it to Z-Tel and by falsely and fraudulently billing Z-Tel on a regular basis, SBC creates a false impression of the nature, characteristics, and qualities of the customer service Z-Tel provides, which it uses as the basis for its false and misleading descriptions or misleading representations of fact in commercial advertising or promotion.
>
> In addition, SBC has run advertisements on television that refers to competing carriers as Z-Tel such as 'parasites' who 'give nothing back' and who 'invest nothing in the networks.' Other advertisements state that SBC is 'real phone company,' implying that competing carriers are not, and calling competing carriers 'middlemen.' Further advertisements accuse competing carriers of 'go[ing] for short term profits at the expense of what's good for their customers' **[**138]** and making 'flashy moves for Wall Street" as compared to SBC 'making multi-year, multi-billion dollar commitments to develop new technologies for Main Street.' All of these statements constitute false or misleading statements or misleading representations of fact in commercial advertising or promotion.

(Doc. No. 1, p. 46-47).

B. Defendant's Argument

Defendants advances three (3) arguments. First, the alleged provision of faulty line loss information and fraudulent billing fails to identify false or misleading statements of fact about a product in the context of commercial advertising or promotion. (Doc. No. 7, p. 34). Second, the allegations concerning "parasites" and "middlemen" are statement of opinion rather than fact. Third, even if the first two arguments are found to be unavailing, Plaintiff's allegation of influence on consumer purchasing decisions is a legally insufficient allegation of fact for purposes of a motion to dismiss. *(Id.* p. 35.)

C. Analysis

1. Defendant's First Argument is Unavailing

a. *Seven-Up* is Not Well Tailored to Defendant's Argument

Defendant cites *Seven-Up Co. v. Coca-Cola Co., 86 F.3d 1379 (5th Cir. 1996)* **[**139]** for **[*565]** the proposition that only those statements made in the context of commercial advertising or promotion come within the ambit of the Lanham Act. As an initial matter, the Court notes that *Seven-Up* is not a terribly good fit for Defendant's argument. In that case, the court took a fairly broad view of these terms:

> ***HN100***[] Courts have noted that we should give the terms 'advertising' and 'promotion' their 'plain and ordinary meanings.' *American Needle & Novelty, Inc. v. Drew Pearson Marketing, Inc., 820 F. Supp. 1072, 1077 (N.D.Ill.1993)*; *see also* *Alfred Dunhill Ltd. v. Interstate Cigar Co., 499 F.2d 232, 236 (2d Cir.1974)* ('Notwithstanding that *§ 43(a)* applies to a broad range of misrepresentations, it does not have boundless application … but is limited to false advertising as that term is generally understood.') (internal quotation marks omitted). The courts are also in agreement, however, that "the Act's reach is broader than merely the classic advertising campaign.' *Gordon & Breach Science Publrs. S.A. v. American Inst. of Physics, 859 F. Supp. 1521, 1534* (citing cases). In *Gordon & Breach,* the court summed up the principles found in the case law and the Act's legislative **[**140]** history as follows:
>
> In order for representations to constitute 'commercial advertising or promotion' under *Section 43(a)(1)(B)*, they must be: (1) commercial speech; (2) by a defendant who is in commercial competition with plaintiff; (3) for the purpose of influencing consumers to buy defendant's goods or services. While the representations need not be made in a 'classical advertising campaign,' but may consist instead of more informal types of 'promotion,' the representations (4) must be disseminated sufficiently to the relevant purchasing public to constitute 'advertising' or 'promotion' within that industry.
>
> We find this summary of the requirements for establishing 'commercial advertising or promotion' under *§ 43(a) of the Lanham Act* to be both accurate and sound.

86 F.3d, at 1384 (citation omitted).

b. Defendant Ignores Plaintiff's Second Paragraph

Second, Defendant's first argument ignores the second of the two paragraphs of Plaintiff's Lanham Act complaint (quoted above). In the second paragraph, Plaintiff alleges conventional advertising coming within the ambit of the definition enunciated in *Seven-Up.* The two paragraphs are not unrelated. **[**141]** In the final sentence of the first paragraph, Plaintiff identifies the context in which the second paragraph is to be read.

> SBC creates a false impression of the nature, characteristics; and qualities of the customer service Z-Tel provides, **which it uses as the basis** for its false and misleading descriptions or misleading representations of fact in commercial advertising or promotion.

(Doc. No. 1, p. 47) (emphasis added).

2. Defendant's Second Argument: Statements of Fact Versus Statements of Opinion

a. Legal Standards

HN101[] The viability of any claim under *section 43(a) of the Lanham Act* is a determination of whether the challenged statement is one of fact--actionable under *section 43(a)*--or one of general opinion--not actionable under *section 43(a)*. Bald assertions of superiority or general statements of opinion cannot form the basis of Lanham Act liability. *See* *Presidio Enters., Inc. v. Warner Bros. Distrib. Corp., 784 F.2d 674, 685 (5th Cir. 1986)*. The statements at issue must be a "specific and measurable claim, capable of being proved false or of **[*566]** being reasonably interpreted as a statement of objective fact." *Coastal Abstract Serv., Inc. v. First Am. Title Ins. Co., 173 F.3d 725, 731 (9th Cir. 1999).* **[**142]** In *Presidio,* the court explained: "[A] statement of fact is one that (1) admits of being adjudged true or false in a way that (2) admits of empirical verification." *784 F.2d at 679*.

b. Plaintiff Sufficiently Alleges Facts Capable of Empirical Verification

Plaintiff alleges that Defendant had advertised that Plaintiff "give[s] nothing back" and "invest[s] nothing in the networks." Plaintiff's investment in its network, or at least the facilities it has erected on Defendant's network, is certainly capable of empirical verification. The Court assumes that such verification would examine Plaintiff's investment vis-a-vis that of similarly situated telecommunications companies. Similarly, Plaintiff's support for community causes (to take one possible hypothetical) could be offered as empirical support that it fails to "give nothing back."

c. Conclusion

For these reasons, Defendant's second argument is unavailing.

3. Defendant's Third Argument: Impact on Purchasing Decisions

a. Legal Standards

> Plaintiff seeks actual damages. In *Pizza Hut v. Papa John's Int'l,*, the court explained:
>
> ***HN102***[] Plaintiffs looking to recover monetary **[**143]** damages for false or misleading advertising that is not literally false must prove actual deception. *See* *Balance Dynamics Corp. v. Schmitt Ind., 204 F.3d 683, 690 (6th Cir. 2000)*; *Resource Developers, Inc. v. Statue of Liberty-Ellis Island Foundation, Inc., 926 F.2d 134, 139*. Plaintiffs attempting to prove actual deception have to produce evidence of actual consumer reaction to the challenged advertising or surveys showing that a substantial number of consumers were actually misled by the advertisements. *See, e.g.,* *PPX Enters. v. Audiofidelity Enters., 818 F.2d 266, 271 (2d Cir. 1987)* ('Actual consumer confusion often is demonstrated through the use of direct evidence, e.g., testimony from members of the buying public, as well as through circumstantial evidence, e.g., consumer surveys or consumer reaction tests.').

227 F.3d 489, 497 (5th Cir. 2000).

b. Analysis

The Court cannot usefully require Plaintiff to adduce evidence of actual consumer confusion, and yet not allow Plaintiff the opportunity to obtain evidence of actual consumer confusion. In any event, Plaintiff's allegations of being called a "parasite" who seeks only "short term profits" are the **[**144]** type of allegations which would tend to wrongfully and negatively shift inward the demand curve Plaintiff faces in the marketplace.

c. Conclusion

For these reasons, Defendant's third argument is unavailing.

D. Conclusion

Defendant's Motion to Dismiss Plaintiff' Lanham Act claim (Count No. 7) is **DENIED.**

XXI. CONCLUSION

Defendant's motion is **GRANTED** as to A) Plaintiff's Essential Facilities claim (Count No. 2), B) Breach of Contract claim (Count No. 11), and C) Telecommunications **[*567]** Act claims (Count Nos. 8, 9, and 10). Plaintiff's Essential Facilities Claim is **DISMISSED with prejudice.** By contrast, Plaintiff's "Breach of Contract" and Telecommunications Act claims are **DISMISSED without prejudice to repleading.**

The Court draws special attention to the Tying claim. (Count No. 5). As explained in Part XIII, E.4, *supra,* Defendant's motion is denied as to the Tying claim with a tying market defined as DSL service. Through its use of the disjunctive word "alternatively" Plaintiff's Complaint indicates that an alternative market for broadband internet access need not be considered. So as to avoid any confusion, Plaintiff's Tying claim involving **[**145]** a tying market for broadband internet access is **DISMISSED without prejudice to repleading.**

If Plaintiff chooses to replead any of the claims which are being dismissed without prejudice, it shall do so within thirty (30) days of the entry of this Order.

On all other claims, Defendant's motion is **DENIED**. Defendant urges dismissal of the state law claims if the federal causes of action fail. Not all of the federal causes of action having been found to fail, the state law claims receive no discussion in the Court's analysis.

SIGNED this 6th day of August, 2004.

DAVID FOLSOM

UNITED STATES DISTRICT JUDGE

Business & Corporate Compliance > ... > Electric Power Industry > Federal Power Act > Federal Rate Regulation

Energy & Utilities Law > Electric Power Industry > State Regulation > General Overview

Governments > Federal Government > US Congress

Transportation Law > Interstate Commerce > Federal Powers

HN3[] **Commerce Clause, Interstate Commerce**

As an initial matter, it is clear that the Federal Power Act (FPA) grants Federal Energy Regulatory Commission (FERC) exclusive authority to regulate the transmission and sale at wholesale of electric energy in interstate commerce. Through the FPA, Congress meant to draw a bright line easily ascertained, between state and federal jurisdiction. This was done in the FPA by making FERC jurisdiction plenary and extending it to all wholesale sales in interstate commerce except those which Congress has made explicitly subject to regulation by the States. This power includes the exclusive authority to determine the reasonableness of wholesale rates. To the extent that it bars states from acting within the zone of FERC's authority, this exclusive jurisdiction is grounded in the *Supremacy Clause of the Constitution*.

Constitutional Law > Supremacy Clause > General Overview

HN4[] **Constitutional Law, Supremacy Clause**

Field preemption occurs when the federal statutory scheme is sufficiently comprehensive to infer that Congress left no room for supplementary regulation by the states. When the federal government completely occupies a given field or an identifiable portion of it the test of preemption is whether the matter on which the state asserts the right to act is in any way regulated by the federal government. When considering preemption, no matter which type, the purpose of Congress is the ultimate touch-stone.

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

Constitutional Law > The Judiciary > Jurisdiction > General Overview

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

Constitutional Law > Supremacy Clause > General Overview

Energy & Utilities Law > Administrative Proceedings > Preemption

HN5[] **Subject Matter Jurisdiction, Jurisdiction Over Actions**

Questions of exclusive federal jurisdiction and ouster of jurisdiction of state courts are, under existing jurisdictional legislation, not determined by ultimate substantive issues of federal law. The answers depend on the particular claims a suitor makes in a state court--on how he casts his action.

Constitutional Law > Supremacy Clause > General Overview

Energy & Utilities Law > Regulators > US Federal Energy Regulatory Commission > Authorities & Powers

Constitutional Law > Congressional Duties & Powers > Commerce Clause > General Overview

Energy & Utilities Law > Administrative Proceedings > Preemption

Energy & Utilities Law > Regulators > US Federal Energy Regulatory Commission > General Overview

Energy & Utilities Law > ... > US Federal Energy Regulatory Commission > Civil Actions > Jurisdiction

Energy & Utilities Law > Electric Power Industry > Federal Power Act > General Overview

HN6[] **Constitutional Law, Supremacy Clause**

When Congress has established an exclusive form of regulation, there can be no divided authority over interstate commerce. Congress here has granted exclusive authority over rate regulation to the Federal Energy Regulatory Commission.

Energy & Utilities Law > Regulators > US Federal Energy Regulatory Commission > Authorities & Powers

Governments > Legislation > Effect & Operation > Retrospective Operation

Energy & Utilities Law > Administrative Proceedings > Preemption

Energy & Utilities Law > Regulators > US Federal Energy Regulatory Commission > General Overview

Energy & Utilities Law > ... > US Federal Energy Regulatory Commission > Civil Actions > Jurisdiction

Energy & Utilities Law > Utility Companies > Rates > General Overview

HN7[] US Federal Energy Regulatory Commission, Authorities & Powers

Congress has granted exclusive authority over rate regulation to the Federal Energy Regulatory Commission. In so doing, Congress withheld the authority to grant retroactive rate increases or to permit collection of a rate other than the one on file. It would surely be inconsistent with this congressional purpose to permit a state court to do through a breach-of-contract action what the Commission itself may not do.

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

Energy & Utilities Law > ... > US Federal Energy Regulatory Commission > Civil Actions > Jurisdiction

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

Energy & Utilities Law > Administrative Proceedings > General Overview

Energy & Utilities Law > Administrative Proceedings > Preemption

Energy & Utilities Law > Regulators > US Federal Energy Regulatory Commission > General Overview

Energy & Utilities Law > Utility Companies > Rates > General Overview

HN8[] Jurisdiction, Subject Matter Jurisdiction

The Federal Energy Regulatory Commission does not pre-approve specific market-based rates, the shift to such rates may mean that prospective refunds are an inadequate remedy. But this fact, by itself, does not change the scope of preemption regarding FERC exclusive jurisdiction over wholesale rates.

Constitutional Law > Supremacy Clause > General Overview

Energy & Utilities Law > Administrative Proceedings > Preemption

HN9[] Constitutional Law, Supremacy Clause

So-called conflict preemption exists if there is an actual conflict between federal and state law, or where compliance with both is impossible. Conflict preemption exists where state law stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress. Under the obstruction strand of conflict preemption, an aberrant or hostile state rule is preempted to the extent it actually interferes with the methods by which the federal statute was designed to reach its goal.

Antitrust & Trade Law > Exemptions & Immunities > Filed Rate Doctrine > General Overview

Constitutional Law > Supremacy Clause > General Overview

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > General Overview

Energy & Utilities Law > Administrative Proceedings > General Overview

Energy & Utilities Law > Administrative Proceedings > Preemption

Energy & Utilities Law > Regulators > US Federal Energy Regulatory Commission > General Overview

Energy & Utilities Law > ... > US Federal Energy Regulatory Commission > Hearings & Orders > Judicial Review

HN10[] **Exemptions & Immunities, Filed Rate Doctrine**

Closely related to these preemption issues is the filed rate doctrine. This doctrine, applied in a variety of contexts, is grounded in an agency's exclusive rate-setting authority. At its most basic, the filed rate doctrine provides that state law, and some federal law (e.g. ***antitrust law***), may not be used to invalidate a filed rate nor to assume a rate would be charged other than the rate adopted by the federal agency in question. The filed rate doctrine has prohibited not just a state court (or a federal court applying state law) from setting a rate different from that chosen by Federal Energy Regulatory Commission, but also from assuming a hypothetical rate different from that actually set by FERC.

Energy & Utilities Law > Electric Power Industry > Federal Power Act > General Overview

Energy & Utilities Law > Administrative Proceedings > Preemption

Energy & Utilities Law > Regulators > US Federal Energy Regulatory Commission > General Overview

Energy & Utilities Law > Utility Companies > Rates > General Overview

HN11[] **Electric Power Industry, Federal Power Act**

The market-based rate regime established by Federal Energy Regulatory Commission (FERC) continues FERC's oversight of the rates charged. FERC only permits power sales at market-based rates after scrutinizing whether the seller and its affiliates do not have, or have adequately mitigated, market power in generation and transmission and cannot erect other barriers to entry. These conditions assure that the market-based rates charged comply with the Federal Power Act's requirement that rates be just and reasonable.

Civil Procedure > ... > Declaratory Judgments > Federal Declaratory Judgments > General Overview

Energy & Utilities Law > Utility Companies > Rates > General Overview

Civil Procedure > Judgments > Declaratory Judgments > General Overview

Energy & Utilities Law > Regulators > US Federal Energy Regulatory Commission > General Overview

Energy & Utilities Law > ... > US Federal Energy Regulatory Commission > Civil Actions > Jurisdiction

HN12[] **Declaratory Judgments, Federal Declaratory Judgments**

A complaint that merely seeks declaratory relief as to contract formation issues would not necessarily intrude upon the rate-setting jurisdiction of Federal Energy Regulatory Commission.

Business & Corporate Compliance > ... > Contract Formation > Mistake > Mutual Mistake

Constitutional Law > Supremacy Clause > General Overview

Contracts Law > Defenses > Ambiguities & Mistakes > Unilateral Mistake

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

Contracts Law > Defenses > Ambiguities & Mistakes > Mutual Mistake

HN13[] **Mistake, Mutual Mistake**

Questions of exclusive federal jurisdiction and ouster of jurisdiction of state courts depend on the particular claims a suitor makes in a state court--on how he casts his action.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > General Overview

HN14[] **Pleadings, Amendment of Pleadings**

Leave to amend shall be freely given when justice so requires.

Civil Procedure > ... > Declaratory Judgments > State Declaratory Judgments > Appellate Review

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

Civil Procedure > ... > Pleadings > Amendment of Pleadings > General Overview

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

Civil Procedure > ... > Declaratory Judgments > Federal Declaratory Judgments > General Overview

Civil Procedure > ... > Declaratory Judgments > Federal Declaratory Judgments > Appellate Review

Civil Procedure > Appeals > Standards of Review > De Novo Review

HN15[] **State Declaratory Judgments, Appellate Review**

Dismissal with prejudice and without leave to amend is not appropriate unless it is clear on de novo review that the complaint could not be saved by amendment. Any amended complaint must be narrowly drafted to seek declaratory relief only as to issues of contract formation.

Opinion by: PREGERSON

Opinion

[*644] PREGERSON, Circuit Judge:

This dispute arises out of the West Coast's recent energy crisis. The case involves contract-related claims against energy wholesalers by a public utility which contends it was forced to pay exorbitant prices for electricity. The utility's case was dismissed by the district court because its claims were found to be preempted. For the reasons discussed below, we affirm in part and remand.

[*645] BACKGROUND [1]

[2]** Appellant Public Utility District No. 1 of Grays Harbor County, Washington ("Grays Harbor") is a public utility district that provides retail electric power services to residential, commercial, and government customers within Grays Harbor County, Washington. Appellees Idaho Power Company and IDACORP Energy L.P. market and sell electric power in the wholesale markets of the Pacific Northwest. Appellee IDACORP Inc. is the holding company for both Idaho Power Company and IDACORP Energy L.P., and it is also the general partner of IDACORP Energy L.P.

At the center of this dispute is a contract for power. On or about March 19, 2001, Grays Harbor entered into a 20 mega-watt purchase transaction with Idaho Power Company for the purchase of electric power from October 1, 2001 through March 31, 2002, at the "market rate," which turned out to be $ 249 per megawatt hour. In or around June 2001, Idaho Power Company assigned all of its rights and obligations under the contract to IDACORP Energy L.P. Subsequently, IDACORP Energy L.P. delivered the power under the contract, and Grays Harbor paid IDACORP Energy L.P. $ 21,757,620 for the power.

This contract was negotiated during a time--the summer **[**3]** and winter of 2000-2001--when the West Coast was experiencing extreme power shortages and price volatility. These shortages resulted in numerous blackouts in California and threatened blackouts in the Northwest. According to Grays Harbor, this situation was allegedly caused by "dysfunctional markets, market manipulation and the intentional withholding of generation capacity from the market."

On or about October 10, 2002, Grays Harbor filed suit against IDACORP, Inc.; Idaho Power Company; and IDACORP Energy L.P. in Washington state court. In the complaint, Grays Harbor sought rescission or reformation of the contract based on four theories--mutual mistake, unilateral mistake, duress, and unconscionability. The complaint also asserted a claim for unjust enrichment against IDACORP Inc. and IDACORP Energy L.P. [2] In essence, the complaint alleges that the market rate of $ 249 per megawatt hour price was agreed to only because

---

[1] Because this is an appeal of a dismissal pursuant to *Federal Rule of Civil Procedure 12(b)(6)*, the facts set forth here assume the truth of the allegations in the complaint.

[2] In support of this particular claim, Grays Harbor alleges that the assignment of the contract was "illegal, void and unenforceable . . . ." Grays Harbor presses the issue of the assignment in its opening brief but essentially abandons the issue in its reply. The issue was settled when, after the filing of the complaint, FERC officially approved the assignment. *Idaho Power Company, IDACORP Energy, L.P. , 102 F.E.R.C. P 61,213, 2003 WL 933594, at *1 (Feb. 26, 2003)*.

Grays Harbor believed that the rate was based on a properly functioning market, when in fact the price resulted from a dysfunctional, manipulated market.

[4]** As to the unjust enrichment claim, the complaint seeks restitution from IDACORP Inc. and IDACORP Energy L.P. in an amount "equal to the difference between $ 249 per mega-watt hour and the fair value for the electric power delivered by IDACORP Energy L.P." pursuant to the contract. Alternatively, the complaint seeks rescission or reformation of the contract "to a price that reflects a fair price absent dysfunction, manipulation and the intentional withholding of electric power and restitution from defendants jointly and severally in an amount equal to the difference **[*646]** between $ 249 per mega-watt hour and the fair value for the electric power" delivered under the contract.

On November 4, 2002, the defendants removed the case to the United States District Court for the Western District of Washington. On November 12, 2002, the defendants filed a motion to dismiss, which was ultimately heard on January 24, 2003. At the hearing on January 24, 2003, the district court issued an oral ruling dismissing the complaint. The district court concluded that it did not have jurisdiction to resolve the issues raised in the complaint. The court explained that the relief sought would require the court **[**5]** to determine a fair price and that "[the Federal Energy Regulatory Commission] has preempted the field of determining fair value of power . . . ." The judge stated, "all of the relief requested in the complaint would require this Court to undermine the Congressional scheme of uniform regulation of rates." [3] On January 28, 2003, the court issued a minute order and a judgment, dismissing the complaint. Grays Harbor filed a timely notice of appeal on February 27, 2003.

ANALYSIS

A. *Standard of Review*

HN1[] A dismissal for failure to state a claim pursuant to *Federal Rule of Civil Procedure 12(b)(6)* **[**6]** is reviewed de novo. *Libas Ltd. v. Carillo, 329 F.3d 1128, 1130 (9th Cir. 2003)*. A dismissal for failure to state a claim may be affirmed on any basis supported in the record. *Ove v. Gwinn, 264 F.3d 817, 821 (9th Cir. 2001)*. Review is limited to the contents of the complaint and all allegations of material fact are taken as true and construed in the light most favorable to the nonmoving party. *Id.*

HN2[] Denial of leave to amend, which we discuss hereafter, is reviewed for abuse of discretion, *United States ex rel. Lee v. SmithKline Beecham, Inc., 245 F.3d 1048, 1051 (9th Cir. 2001)*; "dismissal with prejudice and without leave to amend is not appropriate unless it is clear on de novo review that the complaint could not be saved by amendment," *Eminence Capital, L.L.C. v. Aspeon, Inc., 316 F.3d 1048, 1052 (9th Cir. 2003)*.

B. *Discussion*

The arguments raised on appeal all involve the scope of preemption in the energy context and how that preemption applies to Grays Harbor's contract claims. [4] ***HN3***[] As an initial matter, it is clear that the *Federal Power Act* (the "FPA") grants FERC "'*exclusive* authority to regulate **[**7]** the transmission and sale at wholesale of electric energy in interstate commerce.'" *Transmission Agency of N. Cal. v. Sierra Pac. Power Co., 295 F.3d 918, 928 (9th Cir. 2002)* ("*TANC*") (quoting *New England Power Co. v. New Hampshire, 455 U.S. 331, 340, 71 L. Ed. 2d 188, 102 S.*

[3] In so ruling, the district court cited with approval *Pub. Util. Dist. No. 1 v. Dynegy Power Mktg., Inc.(In re Cal. Wholesale Elec. Antitrust Litig.), 244 F. Supp. 2d 1072 (S.D. Cal. 2003)*. That opinion addresses issues that are essentially identical to those raised in this case. *See id.* The appeal in that case was argued to another panel of this court on June 14, 2004, in San Francisco.

[4] In a footnote at the end of their brief, the appellees request that, should the panel find that Grays Harbor's claims are not preempted, the panel should nevertheless affirm dismissal of the complaint based on the failure to state a claim under state law. But neither party seriously addresses these arguments on appeal.

Ct. 1096 (1982)); *see also* 16 U.S.C. §§ 824-824m. Through the FPA, " 'Congress meant to draw a bright line easily ascertained, between state and federal jurisdiction . . . . This was done in the Power Act by making [FERC] jurisdiction plenary **[*647]** and extending it to all wholesale sales in interstate commerce except those which Congress has made explicitly subject to regulation by the States.' " Nantahala Power & Light Co. v. Thornburg, 476 U.S. 953, 966, 90 L. Ed. 2d 943, 106 S. Ct. 2349 (1986) (quoting Fed. Power Comm'n v. S. Cal. Edison Co., 376 U.S. 205, 215-16, 11 L. Ed. 2d 638, 84 S. Ct. 644 (1964)). This power includes the exclusive authority to determine the reasonableness of wholesale rates. *See* Miss. Power & Light Co. v. Miss. ex rel. Moore, 487 U.S. 354, 371, 101 L. Ed. 2d 322, 108 S. Ct. 2428 (1988); *see also* 16 U.S.C. § 824e(a) **[**8]** (stating that FERC shall determine the just and reasonable rate when it finds that "any rate, charge, or classification, demanded, observed, charged, or collected by any public utility for any transmission or sale subject to the jurisdiction of the Commission, or that any rule, regulation, practice, or contract affecting such rate, charge, or classification is unjust, unreasonable, unduly discriminatory or preferential . . . ."). To the extent that it bars states from acting within the zone of FERC's authority, this exclusive jurisdiction is grounded in the Supremacy Clause of the Constitution. *See* Miss. Power & Light Co., 487 U.S. at 371; U.S. Const. art. VI, cl. 2; *see also* Duke Energy Trading & Mktg., L.L.C. v. Davis, 267 F.3d 1042, 1055 (9th Cir. 2001) (noting that a preemption claim involving state actions that conflict with the Federal Power Act are properly understood as predicated on the Supremacy Clause).

[9]** There are three preemption-related theories that require this case to be dismissed. They are: field preemption, conflict preemption, and the filed rate doctrine. [5] We address them separately below.

1. *Field Preemption*

HN4[] "Field preemption occurs when the federal statutory scheme is sufficiently comprehensive to infer that Congress left no room for supplementary regulation by the states." Gadda, 363 F.3d at 869. "When the federal government completely occupies a given field or an identifiable portion of it . . ., the test of preemption is whether 'the matter on which the state asserts the right to act is in any way regulated by the federal government.' " Pac. Gas & Elec. Co. v. State Energy Res. Conservation & Dev. Comm'n, 461 U.S. 190, 212-13, 75 L. Ed. 2d 752, 103 S. Ct. 1713 (1983) (quoting **[**10]** Rice v. Santa Fe Elevator Corp., 331 U.S. 218, 236, 91 L. Ed. 1447, 67 S. Ct. 1146 (1947)). "When considering preemption, no matter which type, 'the purpose of Congress is the ultimate touch-stone.'" Ting v. AT&T, 319 F.3d 1126, 1136 (9th Cir. 2003) (quoting Cipollone v. Liggett Group, Inc., 505 U.S. 504, 516, 120 L. Ed. 2d 407, 112 S. Ct. 2608 (1992)).

Grays Harbor's basic argument in this respect is that its complaint merely alleges facts that under state common law would allow the court to grant the equitable remedies of rescission or reformation and that the FPA does not necessarily grant FERC exclusive jurisdiction over all power-related contract disputes. Grays Harbor emphasizes the fact that its complaint is not about rates charged for power but rather about contract *formation*. Moreover, Grays Harbor argues, the congressional intent to preempt its action is especially lacking in the deregulated power markets, where prices are negotiated between parties and the rates are not filed **[*648]** and approved in advance by FERC. FERC is only authorized to provide refunds plus interest for a *prospective* period, 16 U.S.C. § 824e(b); [6] this type **[**11]** of relief, Grays Harbor contends, is inadequate in a deregulated market where the prices are not set in advance. [7]

---

[5] Field and conflict preemption stand in contrast to express preemption. *See* Gadda v. Ashcroft, 363 F.3d 861, 869-71 (9th Cir. 2004). Express preemption is not at issue in this appeal.

[6] The relevant provision allows FERC to establish a "refund effective date" when adjusting rates in order to make them just and reasonable. 16 U.S.C. § 824e(b). This date "shall not be earlier than the date 60 days after the filing of [the] complaint nor later than 5 months after the expiration of such 60-day period." *Id.* "At the conclusion of any proceeding under this section, the Commission may order the public utility to make refunds of any amounts paid, *for the period subsequent to the refund effective date*. . ., in excess of those which would have been paid under the just and reasonable rate . . . ." *Id.* (emphasis added).

[7] Grays Harbor also argues that there is a presumption against preemption. "We apply a presumption against federal preemption unless the state attempts to regulate an area in which there is a history of significant federal regulation." Gadda, 363 F.3d at 869. This presumption is almost certainly not applicable here because the federal government has long regulated wholesale

[12]** The Supreme Court has provided some support for Grays Harbor's argument: ***HN5***[] "questions of exclusive federal jurisdiction and ouster of jurisdiction of state courts are, under existing jurisdictional legislation, not determined by ultimate substantive issues of federal law. The answers depend on the particular claims a suitor makes in a state court--on how he casts his action." *Pan Am. Petroleum Corp. v. Superior Court, 366 U.S. 656, 662, 6 L. Ed. 2d 584, 81 S. Ct. 1303 (1961)*. Here, Grays Harbor has "cast its action" as a simple question of contract formation. But Grays Harbor's arguments ignore the fundamental thrust of its complaint. In its current form, Grays Harbor's complaint seems to require the district court, at some point, to determine the fair price of the electricity that was delivered under the contract. This determination is clearly within FERC's jurisdiction for determining the reasonableness of wholesale rates. *Miss. Power & Light Co., 487 U.S. at 371*; *see also* 16 U.S.C. § 824e(a). At the very least, the requested relief intrudes on an "identifiable portion" of a field that the federal government has occupied and addresses **[**13]** a matter that is "in any way regulated by the federal government." *See* *Pac. Gas & Elec. Co., 461 U.S. at 212-13*.

It may be true that the district court could decide simply whether, for instance, there was duress or mutual mistake such that reformation or rescission may be appropriate, i.e., whether there was a contract formation problem. In fact, FERC has stated that such a determination, by itself, may be more appropriately resolved in the courts. *See* *Villages of Edgerton & Montpelier, Ohio v. Ohio Power Co., 49 F.E.R.C. P 61,306, 1989 WL 263107 (Dec. 11, 1989)* ("Unlike most contractual disputes that come before us, this case involves a question not of contract interpretation but of whether there is a contract. With respect to the issue of whether Ohio Power made a legally enforceable commitment to supply the Villages' full requirements service, we believe that generally the courts would be the appropriate forum for deciding whether two parties entered into a contract."). But the district court could do no more without intruding into an area of exclusive FERC authority. *See* *In re Cal. Wholesale Elec. Antitrust Litig., 244 F. Supp. 2d at 1077* **[**14]** ("In order to resolve Plaintiff's claims and provide it the damages it seeks, the **[*649]** Court would be expressly required to assume a hypothetical rate different from that actually set by FERC. This, the Court cannot do.") (quotation marks and citation omitted). Thus, the situation is analogous to that in *Arkansas Louisiana Gas Co. v. Hall, 453 U.S. 571, 580, 69 L. Ed. 2d 856, 101 S. Ct. 2925 (1981)*, where the Supreme Court held: ***HN6***[] "the mere fact that respondents brought their suit under state law [does] not rescue it, for when Congress has established an exclusive form of regulation, there can be no divided authority over interstate commerce. Congress here has granted exclusive authority over rate regulation to the Commission." (quotation marks and citation omitted). [8]

[15]** The fact that the rates at issue in this case are market based does not alter this conclusion. Idaho Power Company's authority to charge market-based rates comes from FERC. Before allowing Idaho Power Company to charge market-based rates, FERC first confirmed that Idaho Power Company did not have, or had adequately mitigated, market power in generation and transmission and could not erect other barriers to entry. *Idaho Power Co., 78 F.E.R.C. P 61,343, 1997 WL 139585, at *1 (Mar. 27, 1997)*. Further, the ability to charge market-based prices comes with certain filing requirements, including providing FERC with individual service agreements for contracts such as the one at issue here. *See* *78 F.E.R.C. 61343, [WL] at *3*. Even in the context of market-based rates, FERC actively regulates and oversees the setting of rates. Thus there is no indication--and Grays Harbor has provided no authority to support the contention--that market-based rates are not within FERC's exclusive jurisdiction over wholesale rates.

The fact that FERC can only grant prospective refunds similarly fails to alter the conclusion that Grays Harbor's claims are preempted. As the Supreme Court has stated:

> ***HN7***[] Congress **[**16]** here has granted exclusive authority over rate regulation to the Commission. In so doing, Congress withheld the authority to grant retroactive rate increases or to permit collection of a rate other

---

electricity rates. *See* *Fed. Power Comm'n v. S. Cal. Edison Co., 376 U.S. 205, 213, 11 L. Ed. 2d 638, 84 S. Ct. 644 (1964)* (discussing the development of the Federal Power Act of 1935).

[8] *Arkansas Louisiana Gas Co.* arose under the *Natural Gas Act*. But because the FPA and the Natural Gas Act are "substantially identical," there is an "established practice of citing interchangeably decisions interpreting the pertinent sections of the two statutes." *Ark. La. Gas Co., 453 U.S. at 577 n.7*.

than the one on file. It would surely be inconsistent with this congressional purpose to permit a state court to do through a breach-of-contract action what the Commission itself may not do.

Ark. La. Gas Co., 453 U.S. at 580. True, because ***HN8***[] FERC does not pre-approve specific market-based rates, the shift to such rates may mean that prospective refunds are an inadequate remedy. But this fact, by itself, does not change the scope of preemption regarding FERC's exclusive jurisdiction over wholesale rates. [9] *See Ark. La. Gas Co., 453 U.S. at 584* ("A finding that federal law provides a shield for the challenged conduct will almost always leave the state-law violation unredressed.").

[17]** Therefore, we find that Grays Harbor's claims are barred because of field preemption.

2. *Conflict Preemption*

HN9[] So-called "conflict preemption" exists "if there is an actual conflict between **[*650]** federal and state law, or where compliance with both is impossible." *Gadda, 363 F.3d at 871*; *Pac. Gas & Elec. Co., 461 U.S. at 204* ("Even where Congress has not entirely displaced state regulation in a specific area, state law is preempted to the extent that it actually conflicts with federal law."). Perhaps most relevant to the case at hand, conflict preemption exists "where state law 'stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress.'" *Ting, 319 F.3d at 1136* (quoting *Hines v. Davidowitz, 312 U.S. 52, 67, 85 L. Ed. 581, 61 S. Ct. 399 (1941))*. "Under the obstruction strand of conflict preemption, an aberrant or hostile state rule is preempted to the extent it actually interferes with the 'methods by which the federal statute was designed to reach [its] goal.'" *Ting, 319 F.3d at 1137* (quoting *Int'l Paper Co. v. Ouellette, 479 U.S. 481, 494, 93 L. Ed. 2d 883, 107 S. Ct. 805 (1987)).* **[**18]**

Grays Harbor argues that no actual conflict exists in this case that would require a finding of conflict preemption. But, by asking the court to set a fair price, Grays Harbor is invoking a state rule (specifically, contract law) that would interfere with the method by which the federal statute was designed to reach it goals (specifically, FERC regulation of wholesale electricity rates). [10] To permit Grays Harbor to receive in its court action what is essentially a refund would create a conflict with FERC's authority over wholesale rates. And such a result would make state law stand as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress under the FPA.

[19]** Therefore, we find that conflict preemption applies here.

3. *The Filed Rate Doctrine*

HN10[] Closely related to these preemption issues is the "filed rate doctrine." [11] This doctrine, applied in a variety of contexts, is grounded in an agency's exclusive rate-setting authority. *TANC, 295 F.3d at 929-30*. "At its most

[9] The district court alluded to this practical problem in the oral ruling: "It sounds to me like FERC's scheme, which is where the remedy should lie here, may be some what broken and not very practical in order to get relief . . . under the circumstances that the plaintiffs allege in their complaint . . . ."

[10] In fact, FERC has investigated and rejected the possibility of refunds for "spot market" bilateral sales in the Pacific Northwest. *See Puget Sound Energy, Inc. v. All Jurisdictional Sellers of Energy and/or Capacity at Wholesale into Elec. Energy and/or Capacity Mkts. in the Pac. N.W., 103 F.E.R.C. P 61,348, 2003 WL 21480253, at *6-11 (June 25, 2003)*. It appears as though Grays Harbor took part in these FERC proceedings and attempted to have the contract at issue in this suit included within the definition of the "spot market" transactions for which refunds were considered. *See* ***Puget Sound Energy, Inc. v. All Jurisdictional Sellers of Energy and/or Capacity at Wholesale into Elec. Energy and/or Capacity Mkts. in the Pac. N.W., 96 F.E.R.C. P 63,044, 2001 WL 1116440, at *9, *38 n.94, *44 (Sept. 24, 2001)***. FERC rejected refunds because it concluded, after weighing a number of factors, that "the directing of refunds in this proceeding would not result in an equitable resolution of the matter." *Puget Sound Energy, 103 F.E.R.C. 61348, 2003 WL 21480253, at *11*.

[11] In fact, "when the filed rate doctrine applies to state regulators, it does so as a matter of federal pre-emption through the *Supremacy Clause*." *Entergy La., Inc. v. La. Pub. Serv. Comm'n, 539 U.S. 39, 47, 156 L. Ed. 2d 34, 123 S. Ct. 2050 (2003)*.

basic, the filed rate doctrine provides that state law, and some federal law (e.g. ***antitrust law***), may not be used to invalidate a filed rate nor to assume a rate would be charged other than the rate adopted by the federal agency in question." *Id. at 929*; *see also* *Ark. La. Gas Co., 453 U.S. at 577* (under the filed rate doctrine, "no court may substitute its own judgment on reasonableness for the judgment of the Commission."). "The filed rate doctrine has prohibited not just a state court (or a federal court applying state law) from setting a rate different from that chosen by FERC, but also from assuming **[*651]** a hypothetical rate different from that actually set by FERC." *TANC, 295 F.3d at 930*.

[20]** The relief sought by Grays Harbor would require the court to set damages by assuming a hypothetical rate, the "fair value," in violation of the filed rate doctrine. *See TANC, 295 F.3d at 933* (finding that claim that rates were procured by fraud are barred under the filed rate doctrine because any award of damages would interfere with FERC's authority).

Grays Harbor describes at length the reasons why the filed rate doctrine should not apply here, but its arguments all center on the market-based nature of the rates at issue in this case. Grays Harbor contends that the $ 249 per megawatt hour that was charged was not "filed" with FERC and approved by FERC before it was charged. In short, according to Grays Harbor, FERC simply did not set any rates. Grays Harbor contends that to apply the filed rate doctrine to market-based rates that have not been filed with FERC would be an unwise and unprecedented expansion of the doctrine.

But, as described above, ***HN11***[] the market-based rate regime established by FERC continues FERC's oversight of the rates charged. FERC only permits power sales at market-based rates after scrutinizing whether "the seller and its affiliates do not have, **[**21]** or have adequately mitigated, market power in generation and transmission and cannot erect other barriers to entry." *Idaho Power Co., 78 F.E.R.C. 61343, 1997 WL 139585, at *1*. According to FERC, these conditions assure that the market-based rates charged comply with the FPA's requirement that rates be just and reasonable. *Cal. ex rel. Bill Lockyer v. British Columbia Power Exch. Corp., 99 F.E.R.C. P 61,247, 2002 WL 32035504, at *11 (May 31, 2002)*; *see also* *16 U.S.C. § 824d(a)*. This oversight is ongoing, in this case requiring Idaho Power Company to provide notice of any change in status, to file an updated market analysis every three years, and to file various sales agreements and transaction summaries. *Idaho Power Co., 78 F.E.R.C. 61343, 1997 WL 139585, at *3*. Further, FERC contends that such procedures effectively constitute review of rates prior to their implementation. *See* *British Columbia, 99 F.E.R.C. 61247, 2002 WL 32035504, at *12* ("Prior review consists, however, not of the particular prices agreed to by willing buyers and sellers. Rather, it consists of analysis to assure that the seller lacks or has mitigated market power so that its **[**22]** prices will fall within a zone of reasonableness."). FERC has clearly stated its belief that these procedures "satisfy the filed rate doctrine for market-based rates . . . ." *Id.*; *see also* *San Diego Gas & Elec. Co. v. Sellers of Energy & Ancillary Serv. into Mkts. Operated by the Cal. Indep. Sys. Operator Corp. & the Cal. Power Exch., 96 F.E.R.C. P 61,120, 2001 WL 1704964, at *9 n.31 (July 25, 2001)* ("The rationales underlying the filed rate doctrine apply to market-based rates."; "Thus, the filed rate doctrine and its corollary, the rule against retroactive rate-making, apply to market-based rates."). Grays Harbor, on the other hand, provides no persuasive authority that the filed rate doctrine does not apply to market-based rates. *Cf.* *In re Cal. Wholesale Elec. Antitrust Litig., 244 F. Supp. 2d at 1079* ("Most damning to Plaintiff's argument is the simple fact that case law does not support its contentions that the market-based rate system circumvents the filed rate doctrine.").

Therefore, while market-based rates may not have historically been the type of rate envisioned by the filed rate doctrine, we conclude that they do not fall outside of **[**23]** the purview of the doctrine. Therefore, **[*652]** the relief sought by Grays Harbor is barred under the filed rate doctrine.

4. *Leave to Amend*

In dismissing the case, the district court concluded: "It's hard for me to see now how a repleading would make any difference . . . ." We disagree. ***HN12***[] A complaint that merely seeks declaratory relief as to contract formation issues would not necessarily intrude upon the rate-setting jurisdiction of FERC. *Cf.* *Pan Am. Petroleum, 366 U.S. at 662* ***HN13***[] ("Questions of exclusive federal jurisdiction and ouster of jurisdiction of state courts . . . depend on the particular claims a suitor makes in a state court--on how he casts his action."). For instance, the district court could determine that, because of wide-spread market manipulation and dysfunction, the contract was formed under circumstances of unilateral or mutual mistake. [12] As noted above, even FERC has acknowledged that such questions may be resolved by a court. *See* Villages of Edgerton & Montpelier, 49 F.E.R.C. 61306, 1989 WL 263107 ("With respect to the issue of whether Ohio Power made a legally enforceable commitment to supply the Villages' full requirements service, we believe that **[**24]** generally the courts would be the appropriate forum for deciding whether two parties entered into a contract.").

[25]** Therefore, we grant Grays Harbor leave to amend. *See* Fed. R. Civ. P. 15(a) ***HN14***[] ("Leave [to amend] shall be freely given when justice so requires."); Eminence Capital, 316 F.3d at 1052 ***HN15***[] ("Dismissal with prejudice and without leave to amend is not appropriate unless it is clear on de novo review that the complaint could not be saved by amendment."). Any amended complaint must be narrowly drafted to seek declaratory relief only as to issues of contract formation. [13] More specifically, it **[*653]** must not require the district court to make a determination as to what the "fair" rate would have been. Should Grays Harbor eventually prevail and receive a determination that no valid contract exists, Grays Harbor may not turn to the district court for monetary relief. Grays Harbor's only avenue for relief at that point, if any exists, would be with FERC.

[26] CONCLUSION**

We affirm district court's dismissal of Grays Harbor's complaint. We remand to allow Grays Harbor the opportunity to amend its complaint.

AFFIRMED IN PART; REMANDED.

Dissent by: CALLAHAN (In Part)

Dissent

---

[12] In supplemental briefing, the appellees argue that seeking such declaratory relief here would represent an improper collateral attack on a FERC decision. Under the FPA, a party aggrieved by a FERC order must obtain review of that order by petitioning the court of appeals; that party cannot attack the order by way of a new lawsuit in federal court. *See* 16 U.S.C. § 825*l*(b); *see also* City of Tacoma v. Taxpayers of Tacoma, 357 U.S. 320, 335-36, 2 L. Ed. 2d 1345, 78 S. Ct. 1209 (1958). The appellees premise their argument on the fact that Grays Harbor advanced arguments regarding contract formation before FERC in proceedings in which FERC declined to provide refunds. *See* ***Puget Sound Energy, 96 F.E.R.C. 63044, 2001 WL 1116440, at *9, *38 n.94, *44***; Puget Sound Energy, 103 F.E.R.C. 61348, 2003 WL 21480253, at *11. At oral argument, the appellees attempted to direct the Court to a portion of the *Puget Sound Energy* proceedings in which contract formation claims made by Grays Harbor were explicitly considered and rejected. But a review of the document cited, paragraph 68 of FERC's order of November 10, 2003, Puget Sound Energy, Inc. v. All Jurisdictional Sellers of Energy and/or Capacity at Wholesale into Elec. Energy and/or Capacity Mkts. in the Pac. N.W., 105 F.E.R.C. P 61,183, 2003 WL 22680031 (Nov. 10, 2003), reveals no such finding. A finding such as that quoted by the appellees at oral argument appears in paragraph 68 of FERC's order of November 10, 2003, in Nevada Power Company v. Enron Power Marketing, Inc., 105 F.E.R.C. P 61,185 (Nov. 10, 2003), but it does not appear that Grays Harbor was a party to the *Nevada Power Company* proceedings.

In the absence of a finding by FERC in the *Puget Sound Energy* proceedings such as it made in the *Nevada Power Company* proceedings, we do not believe that declaratory relief as to contract formation is an impermissible collateral attack on FERC's order in the *Puget Sound Energy* proceedings. A finding that no contract existed between the parties here does not contradict, and would not call into question, FERC's conclusion that it could not equitably provide refunds for spot market transactions in the Pacific Northwest.

[13] Because such a complaint would go solely to issues of contract formation, the so-called *Mobile-Sierra* standards, which relate to post-hoc contract modification by FERC, are not relevant. *See* United Gas Pipe Line Co. v. Mobile Gas Serv. Corp., 350 U.S. 332, 100 L. Ed. 373, 76 S. Ct. 373 (1956); Fed. Power Comm'n v. Sierra Pac. Power Co., 350 U.S. 348, 100 L. Ed. 388, 76 S. Ct. 368 (1956); *see also* Nev. Power Co. v. Enron Power Marketing, Inc., 103 F.E.R.C. P 61,353, 2003 WL 21485862, at *2 (June 26, 2003).

CALLAHAN, Circuit Judge, dissenting, in part:

I agree with the majority's opinion, but for the decision to allow Grays Harbor to amend its complaint.

My colleagues carefully and correctly show that Grays Harbor's contract-related claims are preempted because they trigger the exclusive jurisdiction of FERC. They explain that the Federal Power Act ("FPA") delegates to FERC "exclusive authority to regulate the transmission and sale at wholesale of electric energy in interstate commerce." *New England Power Co. v. New Hampshire, 455 U.S. 331, 340, 71 L. Ed. 2d 188, 102 S. Ct. 1096 (1982)*. They, however, would permit Grays Harbor to amend its complaint because offering declaratory relief as to contract formation "would not necessarily intrude upon the rate-setting jurisdiction of FERC."

I question the factual basis of this assertion. Grays Harbor cannot escape preemption by restating a claim that is based on "dysfunctional markets, market manipulation and the intentional **[**27]** withholding of generation capacity from the market." We recently held that a lawsuit by the State of California to enforce its unfair competition laws against producers that engaged in fraudulent energy transactions was preempted because California sought "to impose judicial remedies in addition to those that FERC may impose." *People of California v. Dynegy, 375 F.3d 831, 2004 U.S. App. LEXIS 13813 (9th Cir. 2004)*. In addition, we have also rejected a suit for money damages "allegedly resulting from the operation of an interstate electricity intertie expressly approved by FERC, where the manner of operation was necessarily contemplated at the time of approval." *Transmission Agency of Northern California v. Sierra Pacific Power Company, 295 F.3d 918, 928 (9th Cir. 2002)*.

It is true that claims that are strictly contractual in nature are not preempted by the FPA, and that FERC has often declined jurisdiction over contractual matters that do not involve FERC's expertise. *See* *Gulf States Utilities v. Alabama Power Co., 824 F.2d 1465 (5th Cir. 1987)* (stating that "The FPA would preempt a claim that frustration [of purpose of a contract] occurs because of high rates; the FPA **[**28]** would not preempt a claim that frustration occurs by buying electricity from Southern at any price."); *see also* *National Fuel Gas Supply Corporation, 27 F.E.R.C. P 63,074 (June 15, 1984)*.

Nonetheless, here, the issues of contract formation are tightly intertwined with complex matters of federal energy regulation. This case calls to mind the famous ontological debate of whether the chicken begat the egg. Like the scrambled relationship of the chicken and the egg, it is **[*654]** impossible to sever the issues of state contract formation in this case from matters of federal energy regulation that are purely within the province of FERC.

Grays Harbor's claims of unilateral and mutual mistake are rooted in an allegation that the Pacific Northwest energy market was not functioning properly at the time of contract formation. [1] Even if the amended complaint would not require the court to set a fair rate, it would still require an inquiry into the functioning of the energy market. This is the kind of technical inquiry that is best left to FERC's expertise.

[29]** Furthermore, considering that we are an appellate court, it is wrong to hold that the district court abused its discretion in denying leave to amend the complaint when neither the plaintiff nor the district court itself were able to conceive of any meaningful claim that was not preempted. Grays Harbor did not request leave to amend to seek declaratory relief until after the possibility of such relief was proffered by the panel.

[1] I note that these allegations conflict with the findings of the administrative law judge whose recommendations were considered by FERC in prior proceedings relating to these energy transactions. The judge determined that "evidence demonstrates that the Pacific Northwest market for spot sales of electricity was competitive and functional during the relevant period of time . . . ." *See* *Puget Sound Energy, Inc. v. All Jurisdictional Sellers of Energy and/or Capacity at Wholesale Into Electric Energy and/ or Capacity Markets in the Pacific Northwest, Including Parties to the Western Systems Power Pool Agreement, 103 F.E.R.C. P 61,348 (June 25, 2003)*. Therefore, it would be impossible for a court to take judicial notice of the market's dysfunction as this fact is apparently a matter that is disputed.

In sum, as the contract formation issues involved in the present case cannot be unscrambled from matters that fall within the sole jurisdiction of FERC, I dissent.

United States v. LSL Biotechnologies

HN14[] **International Aspects, Foreign Trade Antitrust Improvements Act**

The Foreign Trade Anti-trust Improvements Act of 1982, *15 U.S.C.S. § 6a*, provides the standard for establishing when subject matter jurisdiction exists over a foreign restraint of trade.

Counsel: Steven J. Mintz, U.S. Department of Justice, Antitrust Division, Washington, D.C., for the plaintiff-appellant.

Thomas F. Connell and Jeffrey D. Ayer, Wilmer, Cutler & Pickering, Washington, D.C., for defendants-appellees LSL Biotechnologies, Inc. and LSL Plantscience LLC.

Sabina Bhalla, Milbank, Tweed, Hadley & McCloy LLP, Los Angeles, California, for defendant-appellee Seminis Vegetable Seeds, Inc.

Judges: Before: Ruggero J. Aldisert,* Richard C. Tallman, and Johnnie B. Rawlinson, Circuit Judges. Opinion by Judge Tallman; Dissent by Judge Aldisert.

Opinion by: RICHARD C. TALLMAN

Opinion

[*674] TALLMAN, Circuit Judge:

We must decide whether the district court erred by deter-mining that it lacked subject matter jurisdiction over this anti-trust action. The United States alleged that an agreement between the defendants (collectively, "LSL") and an Israeli company, Hazera Quality Seeds, Inc., violates the *Sherman **[**2]** Act*. Because the challenged agreement does not have a direct, substantial, and reasonably foreseeable effect on United States commerce, we affirm the district court's dismissal.

I

This dispute grows out of a joint business venture--always a fertile ground for litigation--that sought to solve the dilemma of how to bring fresher, tastier tomatoes to Americans who live in the northern part of the nation and therefore suffer from a lack of fresh tomatoes in the winter months.

In the early 1980s, LSL Biotechnologies, Inc., an American corporation that develops and markets seeds, entered into a relationship with Hazera. LSL began working with Hazera in the hope of developing a genetically-altered tomato seed that would produce tomatoes with a longer shelf-life. LSL and Hazera wanted to create such a tomato because, until recently, tomatoes had a very short shelf-life if they were picked from the vine already ripened. This means that tomato growers can only sell their product in a limited geographic area. Because most of the American climate cannot produce tomatoes during the winter months, consumers are unable to access vine-ripened tomatoes for much of the year. Instead, most United **[**3]** States consumers are relegated to eating foreign tomatoes that are picked before they are ripe, so they will still be fresh after shipping. Tomatoes picked in this fashion have a poor flavor compared to vine-ripened tomatoes.

To solve this dilemma, LSL and Hazera sought to develop a tomato with enough shelf-life after reddening on the vine to travel from growing locations primarily in Mexico to the rest of the American market before spoiling. On January 1, 1983, LSL and Hazera signed a contract that regulated their relationship in this joint endeavor. The contract allocated to each party exclusive territories in which they could sell the seeds they developed together and seeds that each party developed on its own. The contract provided that LSL would have the exclusive rights to the North American market.

LSL and Hazera eventually bred a ripening-inhibitor ("RIN") gene into tomato seeds to be grown in open fields. The RIN gene caused tomatoes to remain fresh longer after being picked. LSL obtained a patent for tomatoes and seeds containing the RIN gene; Hazera obtained no rights to the patent. The RIN gene tomatoes proved to be exceptionally successful when grown in Mexican climates, **[**4]** but failed to take in cooler American climates. As a result, Mexican growers now dominate the fresh winter-tomato market. To date, Hazera has not developed a long shelf-life tomato seed.

---

* Honorable Ruggero J. Aldisert, Senior United States Circuit Judge for the Third Circuit, sitting by designation. 1007.

The relationship between LSL and Hazera soon withered. Litigation ensued. In **[*675]** 1987, Hazera sued LSL in an Israeli court. This foreign litigation led to mediation in Israel that produced the renegotiation of and addendum to the contract. The addendum included a Restrictive Clause, which is the device the United States now claims violates the Sherman Act. The Restrictive Clause originally stated:

> Subsequent to the termination of the Agreement hereunder, Hazera shall not engage, directly or indirectly, alone, with others and/or through third par-ties, in the development, production, marketing or other activities involving tomatoes having any long shelf life qualities. However, in the event that Hazera shall be requested by any third party to produce seeds of tomatoes having long shelf life qualities, Hazera may engage in such activities only if all of the following conditions are met: (A) the subject tomatoes do not have or involve long shelf life qualities which are included in LSL's proprietary **[**5]** rights; (B) Hazera shall not engage in such production prior to the year 2000 or prior to the expiration of 5 years following the termination of the Agreement, which-ever occurs later, and (C) Hazera has obtained LSL's advanced written consent, which shall not be unreasonably withheld . . . . LSL shall determine whether or not the proposed cooperation may involve any of its proprietary rights and shall not unreasonably withhold its consents to such production.

LSL and Hazera continued working together after adopting the Restrictive Clause, despite frequent returns to the legal system. In 1992, the parties modified the contract a final time and requested that an Israeli arbitrator "incorporate their final contract modifications into a stipulated arbitration order." The arbitration settlement affirmed the Restrictive Clause's ban on Hazera selling long shelf-life tomato seeds in North America. But the Restrictive Clause was amended to allow Hazera to sell other seeds (*e.g.*, tomato seeds for growing in green-houses) to North American consumers, provided that Hazera disclose the details of such sales to LSL.

The contract between Hazera and LSL expired on January 1, 1996, and the **[**6]** Restrictive Clause became effective.

On September 15, 2000, the United States filed its antitrust complaint. The government alleged that the Restrictive Clause is "so overbroad as to scope and unlimited as to time as to constitute a naked restraint of trade in violation of *Section 1 of the Sherman Act*." The government also alleged that the Restrictive Clause is illegal because "it has harmed and will continue to harm American consumers by unreasonably reducing competition to develop better seeds for fresh-market, long shelf-life tomatoes for sale in the United States."

The government alleged that "[b]ut for the [Restrictive Clause], Hazera would likely be a significant competitor of [LSL] in North America." The Complaint stated that the defen-dants [1] collectively held more than 70 percent of the market for "fresh market tomato seeds." Nonetheless, LSL's competitors control a significant percentage of the market for "fresh market tomato seeds": Novartis and Monsanto together possess around twenty percent of the market, while several other companies together account for the remaining ten percent.

[7]** **[*676]** The portion of the Complaint titled "Anticompetitive Effects" alleged that the exclusion of Hazera from the North American market eliminated "one of the few firms with the experience, track record and know-how likely to develop seeds that will allow United States and other North American farmers to grow better fresh-market tomatoes for United States consumers during winter months." The government also alleged that the "Restrictive Clause may also allow defendants to charge more for their seeds (or more for a license to use seeds with the RIN gene) than they otherwise would."

LSL filed a motion to dismiss the Complaint, arguing that

the government failed to state a cause of action and that the district court lacked subject matter jurisdiction. In support of their positions regarding subject matter jurisdiction, the par-ties submitted declarations and other evidence. After hearing oral argument, the district court granted LSL's motion.

---

[1] The Complaint names as defendants LSL, Seminis Vegetable Seeds, Inc., and LSL Plantscience LLC. At the time of the Complaint, Seminis and LSL each owned half of Plantscience; Plantscience was the repository for all of LSL's tomato seed assets, including the Restrictive Clause.

The district court's approach was to divide the Complaint into separate domestic and foreign components, because the area of restraint (North America) covered both domestic and foreign markets.

The district court first concluded that the Complaint **[**8]** failed to state a cause of action regarding conduct in the United States and dismissed that aspect of the action without prejudice under *Federal Rule of Civil Procedure 12(b)(6)*. The court concluded that the Complaint's market definition was so poor that the Complaint failed to establish anti-competitive effects. The United States chose not to amend its defective complaint.

The district court then held that it lacked jurisdiction over the claim that the restriction on the sale of seeds to Mexico violated the Sherman Act and dismissed that aspect of the Complaint *with* prejudice under *Rule 12(b)(1)*. In order to seek immediate appellate review, the government, rather than replead the domestic conduct aspect of the Complaint, requested that the district court dismiss the entire action with prejudice. The request was granted and the government perfected its appeal to this court under *28 U.S.C. § 1291*.

II

As an initial structural matter we must decide whether it was proper for the district court to divide the consideration of the Complaint into domestic and foreign components.

LSL moved to dismiss the Complaint, arguing **[**9]** primarily that the district court lacked subject matter jurisdiction. The

motion very briefly urged that the whole Complaint--not just the domestic aspect--also failed to state a cause of action. LSL's attack on the Complaint is not split into distinct "domestic" and "foreign" aspects. Likewise, the government's opposition to LSL's motion does not defend the Complaint in this fashion. The government concentrated the bulk of its response on the district court's subject matter jurisdiction, while briefly answering LSL's assertion that the entire Complaint failed to state a cause of action.

The district court evaluated different parts of the Complaint under different standards. On the one hand, the court considered whether the allegations in the Complaint concerning the restriction on selling seeds to the United States stated a cause of action under *Rule 12(b)(6)*. The district court was satisfied that it had subject matter jurisdiction over this component of the Complaint. On the other hand, the district court analyzed whether the court had subject matter jurisdiction over the portion of the Complaint alleging a restraint on the sale of seeds to Mexico **[*677]** under *Rule 12(b)(1)* and the Foreign **[**10]** Trade Anti-trust Improvements Act of 1982, *15 U.S.C. § 6a* ("FTAIA").

Of course, the parties' arguments did not prevent the district court from separately considering the Complaint's domestic and foreign allegations. Nonetheless, we think this two-pronged approach was not the most appropriate way to analyze the motion to dismiss. The threshold question in this case is whether the district court had subject matter jurisdiction. That inquiry pervades the entire Complaint; the government alleged only one cause of action, which lumped together the Restrictive Clause's ban on distributing certain modified tomato seeds to Mexico and the resulting fruit in the United States.

HN1[] Where, as here, a Complaint alleges a restraint of trade on a foreign corporation, that restraint was executed in a foreign nation as the result of litigation in that foreign nation, and the defendants file a *Rule 12(b)(1)* motion to dismiss the

entire Complaint for lack of subject matter jurisdiction, a court should determine its subject matter jurisdiction to entertain the entire Complaint. Accordingly, we consider whether the district court had subject matter jurisdiction over the entire Complaint, **[**11]** including the "domestic" allegations.

III

HN2[] We review de novo the district court's dismissal for lack of subject matter jurisdiction. *La Reunion Francaise SA v. Barnes, 247 F.3d 1022, 1024 (9th Cir. 2001)*. Factual findings made in support of the dismissal are reviewed for clear error. *Id.*

IV

The Sherman Act ***HN3***[] prohibits "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations . . . ." *15 U.S.C. § 1*. Federal courts have struggled for decades to determine when United States courts have jurisdiction over allegations of foreign restraints of trade. *See* Areeda & Hovenkamp, ***ANTITRUST LAW***, P 272 (2d ed. 2000); *see also Den Norske Stats Oljeselskap As v. Heere-Mac v.o.f., et al.*, *241 F.3d 420, 423-24 (5th Cir. 2001)* ("The history of this body of case law is confusing and unsettled.").

Prior to the passage of the FTAIA, courts applied varying tests to determine when foreign conduct fell within the purview of the Sherman Act. The most widely used standard was the "effects test," which was developed by Judge Learned Hand in **[**12]** *United States v. Aluminum Co. of Am., 148 F.2d 416, 444 (2d Cir. 1945)* ("*Alcoa*"). [2] The *Alcoa* court considered whether Congress intended the Sherman Act to impose liability for conduct outside of the United States and whether the Constitution allowed Congress to do so. Judge Hand rejected the idea that Congress meant "to punish all whom [United States] courts can catch, for conduct which has no consequences within the United States." *Id. at 443*. Instead, the court held that the Sherman Act was meant to reach foreign conduct only if it was intended to and did affect United States commerce. *Id.* In *Hartford Fire Ins. Co. v. California*, the Supreme Court summarized the effects test, stating that "it is well established by now that the Sherman Act applies to foreign conduct that was meant to produce and did in fact produce some substantial **[*678]** effect in the United States." *509 U.S. 764, 796, 125 L. Ed. 2d 612, 113 S. Ct. 2891 (1993)* (citing *Alcoa*).

[13]** Application of the effects test, however, has proved difficult and the precise extraterritorial reach of the Sherman Act remains less than crystal clear. In an effort to address this uncertainty, Congress enacted the FTAIA in 1982. The FTAIA ***HN4***[] "was intended to exempt from the Sherman Act export transactions that did not injure the United States economy." *Hartford Fire, 509 U.S. at 796-97 n.23*. According to the House Report, another significant purpose of the FTAIA was to fix the problem that arose because "courts differ in their expression of the proper test for determining whether United States antitrust jurisdiction over international transactions exists." H.R. Rep. No. 97-686 (1982), *reprinted in* 1982 U.S.C.C.A.N. 2487 ("House Report") at 2487. The FTAIA tackled this issue by ***HN5***[] "clarifying the Sherman Act . . . to make explicit [its] application only to conduct having a 'direct, substantial and reasonably foreseeable effect' on domestic commerce." *Id.* Specifically, the FTAIA states:

Sections 1 to 7 of this title [including the Sherman Act] shall not apply to conduct involving trade or commerce (other than import trade or import commerce) with foreign **[**14]** nations unless --

> (1) such conduct has a direct, substantial, and reasonably foreseeable effect --
> (A) on trade or commerce which is not trade or commerce with foreign nations, or on import trade or import commerce with foreign nations; or
> (B) on export trade or export commerce with foreign nations, of a person engaged in such trade or commerce in the United States; and
>
> (2) such effect gives rise to a claim under the provisions of *sections 1 to 7* of this title, other than this section.

15 U.S.C. § 6a.

Federal courts did not shower the FTAIA with attention for the first decade after its enactment. But in the last ten years, and in particular the last five years, the case reporters have steadily filled with decisions interpreting this previously obscure statute. As a threshold matter, many courts have debated whether the FTAIA established a new jurisdictional standard or merely codified the standard applied in *Alcoa* and its progeny.

Several courts have raised this question without answering it. The Supreme Court did as much in *Hartford Fire*. The *Hartford Fire* Court considered the jurisdictional status of an alleged conspiracy among London-based **[**15]** re-

[2] The *Alcoa* court sat as a court of last resort pursuant to *15 U.S.C. § 29*, which at the time authorized the designation of a court of appeal as the final stop in certain antitrust actions. *Alcoa, 148 F.2d at 421*.

insurers to manipulate the American insurance market by not offering certain types of re-insurance. The Court introduced its jurisdictional analysis by noting that the effects test is well established. Hartford Fire, 509 U.S. at 796. In a footnote, the Court stated that it is not clear "whether the [FTAIA's] 'direct, substantial, and reasonably foreseeable effect' standard amends existing law or merely codifies it. We need not address these questions here." Id. at 796 n.23. [3]

[*679] **HN6**[] It is manifest that our role is to apply the laws that Congress passes and the executive branch enforces unless those laws violate the Constitution. There is no suggestion that the FTAIA is unconstitutional. **[**16]** Thus, we must adhere to the FTAIA in determining whether a district court has subject matter jurisdiction over an alleged foreign restraint of trade. The government contends that the FTAIA merely codified the existing common law regarding when the Sherman Act applies to foreign conduct and that we should continue to employ the Alcoa effects test. We reject this contention.

HN7[] Our task when interpreting legislation is to give meaning to the words used by Congress; we strive to avoid constructions that render words meaningless. *See* United States v. Fiorillo, 186 F.3d 1136, 1153 (9th Cir. 1999). The FTAIA **HN8**[] states that the Sherman Act shall not apply to foreign conduct unless it has a "direct, substantial, and reasonably foreseeable effect" on domestic commerce. 15 U.S.C. § 6a(1). **HN9**[] The Supreme Court reads the *Alcoa* test as conferring jurisdiction so long as the conduct creates "some substantial effect in the United States." Hartford Fire, 509 U.S. at 796. Unlike the FTAIA, the *Alcoa* test does not require the effect to be "direct." Adopting the government's argument and applying the *Alcoa* test would render meaningless the **[**17]** word "direct" in the FTAIA. [4] We are not willing to rewrite a statute under the pre-tense of interpreting it.

Moreover, applying *Alcoa* instead of the FTAIA would contravene the FTAIA's purpose. The FTAIA **HN10**[] created its jurisdictional test because the "enactment of a single, objective test--the 'direct, substantial, and reasonably foreseeable effect' test--will serve as a simple and straightforward clarification of existing American law." House Report at 2487-88. The House Report goes on to state: "The specific purpose of the Sherman Act modification is: to more clearly establish when antitrust liability attaches to international business activities." *Id.* at 2492.

It would be a serious departure from the goal of achieving clarity for us to conclude that Congress meant only "some substantial effect," Hartford Fire, 509 U.S. at 796, **[**18]** when it said "direct, substantial, and reasonably foreseeable effect." Clarity is not achieved by employing three modifiers ("direct," "substantial," and "reasonably foreseeable") as the standard for the required effect of the challenged conduct and then telling businesses that only one modifier ("substantial") is relevant to Sherman Act liability.

Our precedent supports the conclusion that the FTAIA **HN11**[] provides the guiding standard for jurisdiction over foreign restraints of trade. Most notably, in McGlinchy v. Shell Chem. Co., 845 F.2d 802 (9th Cir. 1988), we considered an antitrust claim that the defendants' refusal to deal in pipe-manufacturing products "in various foreign markets" violated the Sherman Act. Id. at 813. The district court dismissed the claim because it failed to satisfy the FTAIA's test for subject matter jurisdiction. We determined without difficulty that "we are bound to apply [the FTAIA]," id. at 813 n.8, and affirmed the district court, concluding that "appellants have failed to allege that the defendants' conduct has a 'direct, substantial, and reasonably foreseeable effect' on domestic commerce or import trade. **[**19]** " Id. at **[*680]** 815. [5]

---

[3] The Court devoted very little attention to whether jurisdiction existed. After concluding that the bare minimums were met, the Court quickly turned to a more robust discussion of whether principles of international comity should have prevented the exercise of jurisdiction. Id. at 797.

[4] Applying *Alcoa* might also ignore the words "reasonably foreseeable," although we recognize that foreseeability might be a concept inherent in any scheme that seeks to impose liability.

[5] Other circuits have also treated the FTAIA as the binding test for deter-mining jurisdiction over foreign restraints of trade. For example, in *United Phosphorous, Ltd. v. Angus Chem. Co.*, the Seventh Circuit thoroughly analyzed the FTAIA and concluded

[20]** As in *McGlinchy*, we conclude that the FTAIA controls in this case. Therefore, we must affirm the district court's dismissal for lack of subject matter jurisdiction unless we deter-mine that the Restrictive Clause operates to have a direct, substantial, and reasonably foreseeable effect on domestic com-merce. [6]

[21]** V

Before discussing whether there is a direct effect here, we must consider what Congress meant by "direct." A dictionary published contemporaneously with the enactment of the FTAIA ***HN12***[] defined "direct" as "proceeding from one point to another in time or space without deviation or interruption." WEBSTER'S THIRD NEW INTERNATIONAL DICTIONARY 640 (1982).

Further, our efforts at understanding the meaning of "direct" are aided by the Supreme Court's interpretation of a nearly identical term in the *Foreign Sovereign Immunities Act* ("FSIA"). The FSIA ***HN13***[] states that immunity does not extend to commercial conduct "outside the territory of the United States . . . that [] causes a direct effect in the United States." *28 U.S.C. § 1605(a)(2)*. After the lower federal courts struggled for years to define "direct effect," the Supreme Court unanimously declared that an effect is "direct" if it follows as an immediate consequence of the defendant's activity. *Republic of Argentina v. Weltover, Inc., 504 U.S. 607, 618, 119 L. Ed. 2d 394, 112 S. Ct. 2160 (1992)*. Settling on this definition, the Court "reject[ed] the suggestion that ['direct'] contains any unexpressed requirement **[**22]** of 'substantiality' or 'foreseeability.' " *Id.*

Having defined "direct," we next consider what effects the government asserts. As the district court recognized, the Complaint alleges that the Restrictive **[*681]** Clause causes two effects: (1) the agreement makes less likely possible innovations from Hazera in the creation of heartier tomato seeds "that will allow consumers to enjoy higher quality, better tasting winter tomatoes and that will allow United States farmers to grow long shelf-life tomatoes," and (2) the Restrictive Clause "may also allow defendants to profitably charge more for their seeds (or more for a license to use seeds with the RIN gene) than they otherwise could."

Neither of these effects is "direct." The delay of possible "innovations" does not have a direct effect on American commerce. Even if Hazera were free to distribute new types of long shelf-life seeds in North America, there is no indication that Hazera has yet figured out a different way to produce such a seed without violating LSL's intellectual property rights to the RIN gene. Moreover, there is no indication that Hazera is in a stronger (or as strong a) position to develop such a new seed as Monsanto and **[**23]** Novartis, which the Complaint alleges already account for 20 percent of the tomato seed market. Thus, any innovation that Hazera would bring to American consumers is speculative at best and doubtful at worst. An effect cannot be "direct" where it depends on such

---

that "the legislative history shows that jurisdiction stripping is what Congress had in mind in enacting FTAIA." *322 F.3d 942, 951 (7th Cir. 2003)* (en banc). The court then applied the FTAIA jurisdictional standards and affirmed the district court's dismissal for lack of subject matter jurisdiction. *Id. at 952-53*; *see also* *Turicentro, S.A. v. Am. Airlines, Inc., 303 F.3d 293, 304-05 (3d Cir. 2002)* (affirming dismissal because the FTAIA's test was not satisfied); *Den Norske, 241 F.3d at 425-29* (applying the FTAIA to determine whether subject matter jurisdiction existed); *Caribbean Broad. Sys., Ltd. v. Cable & Wireless PLC, 331 U.S. App. D.C. 226, 148 F.3d 1080, 1085 (D.C. Cir. 1998)* ("It does seem clear, however, that we should use the standard set forth in the FTAIA to analyze whether conduct related to international trade has had an effect of the nature and magnitude necessary to provide us with subject matter jurisdiction.").

[6] Unlike the government, the dissent does not argue that the effects need not be direct, but rather that the directness requirement has *always* been part of the "effects test." Thus, the panel agrees on the standard; we merely disagree about its source. We say it is the FTAIA, while the dissent says the common law. We all recognize that conduct related to international trade is exempt from the Sherman Act unless it has a "direct, substantial, and reasonably foreseeable effect" on domestic commerce. Under either approach, the dispositive question is whether the Restrictive Clause operates to have a direct effect on U.S. commerce. We think the allegations in the government's complaint, even if taken to be true on a motion to dismiss, are insufficient to establish the effect required under the FTAIA. As currently pleaded, it is sheer speculation as to whether Hazera will ever be able to develop its own version of long shelf-life tomatoes suitable for growing in North America during the winter.

uncertain intervening developments. In this case, Hazera's delivery of long shelf-life seeds to North American growers depends on Hazera first creating such seeds, a development that is certainly not guaranteed. [7]

[24]** We can imagine a situation where the exclusion of a potential foreign competitor would satisfy the "direct" requirement.

Likewise, the government maintains that it demonstrated that Hazera can produce a long shelf-life seed that does not infringe on LSL's patents. But the document to which the government cites--a declaration from Hazera's president--speaks in purely forward-looking terms: "Hazera is now *developing* seeds for a winter tomato variety . . . . Hazera *intends* to develop a seed that produces a tomato that tastes better while staying firm without gassing or the RIN gene . . . . Hazera *will also launch* a program to develop improved extended shelf-life tomatoes for growers in California." (emphasis added). We find no express allegation that Hazera has actually produced a modified seed that can be successfully grown in North America for long shelf-life winter tomatoes. In sum, the record reveals that such seeds do not yet exist and the prospect of Hazera developing seeds that do not infringe LSL's patent is at best speculative. As a matter of common sense, regardless which of the many definitions of "direct" one adopts, this fact is crucial to the "direct effect" **[**25]** calculus.

One such scenario might be where the foreign competitor already has the good in hand. It might also be possible for a "direct" effect to exist where the potential foreign competitor does not yet have the product in hand. A potential foreign competitor might be able to demonstrate that its exclusion already has an effect on the American market. For example, the competitor might be able to demonstrate that its exclusion is causing existing market players to invest less in the research and development of new products. Although it might be possible in such situations for a **[*682]** "direct" effect to exist, the United States has not presented us with sufficient evidence to conclude that the district court clearly erred in ruling on the existing pleadings that Hazera's exclusion does not yet have a direct effect on domestic commerce.

The district court also held that the effect of the Restrictive Clause on prices paid by American consumers is not "direct." This ruling was not clearly erroneous. The government has presented no evidence that LSL has or will artificially inflate the prices it charges to Mexican farmers for LSL's long shelf-life seeds.

Perhaps more importantly, the government's **[**26]** argument about the directness of the effect of seed prices on tomato prices is undermined by the United States' recent agreement with Mexican farmers to set a floor on the price of tomatoes shipped from *Mexico to the United States. SUSPENSION OF ANTIDUMPING INVESTIGATION: FRESH TOMATOES FROM MEXICO, 67 Fed. Reg. 77044 (Dec. 16, 2002)*. The agreement covers all "fresh or chilled tomatoes (fresh tomatoes) which have Mexico as their origin." *Id. at 77046*. The agreement fixes mini-mum prices that Mexican tomato growers must charge for their product. *Id. at 77045-50*. The agreement was necessary to "eliminate completely the injurious effect of exports to the United States of the subject merchandise and prevent the suppression or undercutting of price levels of domestic fresh tomatoes by imports of that merchandise from Mexico." *Id. at 77045*. The government initiated the investigation that led to the agreement because it was determined that Mexican tomato growers were selling their product "in the United States at less than fair value." *Id.* This agreement, and the concerns that gave rise to it, belie the United States' argument **[**27]** that LSL could raise the prices ultimately paid by American tomato consumers.

The government cites two cases in support of its argument that the Restrictive Clause has a "direct" effect on American commerce. First, the government points to *Hartford Fire*. However, the defendants in *Hartford Fire*

[7] The dissent consistently refers to Hazera's seeds as though they actually exist; it fails to appreciate that Hazera has not yet developed its own long shelf-life tomato seeds capable of cultivation in North America. *See* Dissent at 11048 ("First, the Complaint squarely alleged causation in fact: but for the restraint, United States consumers would have the important potential of better winter tomatoes grown from Hazera seeds."); *id.* at 11048 ("Consumers in the United States are the persons injured by the Restrictive Clause, as they are the ones deprived of the superior tomatoes that competition from Hazera could bring."); *id.* at 11050 (". . . ignoring the effect of that conduct, which is to deprive the United States consumers of winter tomatoes from Hazera seeds."). We do not read the allegations of PP 38-39 of the government's Complaint as generously as our colleague in dissent. *See* Dissent at 11049-50 n.6.

"apparently con-cede[d]" that the district court had jurisdiction; rather than challenge the existence of jurisdiction, the defendants argued that the district court should decline to exercise jurisdiction because of comity concerns. *509 U.S. at 795*. Also, the *Hart-ford Fire* defendants' foreign conduct--not offering reinsurance--had a demonstrated impact on the American insurance market: certain types of primary insurance were made unavailable because primary insurers could not obtain necessary re-insurance. Here, the product "loss" suggested by the government is entirely speculative: but for the Restrictive Clause, Hazera might someday create a long shelf-life tomato seed suitable for growing by North American farmers that does not violate LSL's existing patents. While the Restrictive Clause in this case removes nothing from American consumers except the vague possibility **[**28]** that Hazera might create a new type of seed before Novartis or Monsanto or one of the other smaller competitors, conduct by the defendants in *Hart-ford Fire* actually deprived American consumers of a wider array of an existing product, primary insurance.

The government also relies on the Fifth Circuit's decision in *Den Norske*. Like *Hartford Fire*, *Den Norske* differs in at least one critical way from this case. In *Den Norske*, the plain-tiff alleged that the defendants caused Americans to pay $ 165 million in higher oil prices because the defendants' conspiracy raised the prices paid by off-shore oil producers for heavy-lift services in the Gulf of Mexico and the **[*683]** producers passed on the higher prices to American oil consumers. *241 F.3d at 426* & n.21. By contrast, here the government cannot demonstrate an existing effect on American tomato consumers. At most, the government can demonstrate that the Restrictive Clause removes the *possibility* of future innovation from Hazera and "*may* also allow defendants to profit-ably charge more for their seeds."

In assailing the district court's jurisdictional ruling, the dissent invokes the general notice pleading **[**29]** standard. *See*, *e.g.*, Dissent at 11046 n.5 ("Here, the government sufficiently averred that the adverse effect on the United States' domestic commerce of tomatoes has been an immediate consequence of the Restrictive Clause governing tomato seeds . . . ."); *id.* at 11048 ("First, the Complaint squarely alleged causation in fact: but for the restraint, United States consumers would have the important potential of better winter tomatoes grown from Hazera seeds."). However, while federal complaints are generally construed liberally, in this case the district court correctly scrutinized the government's Complaint more closely in order to make the necessary threshold determination of whether it had subject matter jurisdiction. This scrutiny involved taking preliminary evidence, weighing that evidence, and deciding as a matter of law whether the facts alleged sup-ported jurisdiction. Here, the district court properly found that the operation of the Clause does not have the required direct effect on U.S. commerce. We agree and hold that as a matter of law the FTAIA does not confer jurisdiction. [8]

[30]** VI

HN14[] The FTAIA provides the standard for establishing when subject matter jurisdiction exists over a foreign restraint of trade. This standard was not met here because the government cannot demonstrate that the district court clearly erred by determining that the alleged effects of the Restrictive Clause are not direct.

Because we conclude that the district court lacked subject matter jurisdiction over the entire Complaint, we do not consider the district court's *Rule 12(b)(6)* dismissal of the domes-tic aspect of the Complaint. **AFFIRMED.**

Dissent by: Ruggero J. Aldisert

Dissent

ALDISERT, Circuit Judge, Dissenting:

---

[8] In other words, the question of fact is whether, accepting the allegations of the Complaint as true, there is a "direct, substantial, and reason-ably foreseeable effect," while the question of law is whether the FTAIA provides a basis for jurisdiction. The legal question here is relatively straightforward; because the district court's finding of no direct effect survives clearly erroneous appellate review, affirmance of its jurisdictional finding necessarily follows.

This is a case of first impression. The panel is unanimous in agreeing that this appeal requires us to interpret critical language in the Foreign Trade Antitrust Improvements Act (FTAIA or "Act"), *15 U.S.C. § 6a (1994)*. We must express a judicial interpretation to a single word, "direct," in the FTAIA's provision of "direct, substantial, and reasonably foreseeable effect" on United States trade or commerce when foreign activity is involved. The flash point of controversy, however, is whether the word "direct" in the FTAIA is a new dimension added to traditional **[**31]** ***antitrust law*** that involves trade or commerce with foreign nations, as the majority concludes, as did the district court, or, as urged by the government in this appeal, is merely a codification of ***antitrust law*** in place prior to the enactment of FTAIA. I agree with the government's interpretation, **[*684]** and accordingly, respectfully dissent. I would reverse the judgment of the district court. [1]

I.

Our analysis, perforce, must begin with the statutory language of FTAIA:

> *Section 1 to 7* of this title shall not apply to conduct involving trade or commerce (other than import trade or import commerce) with foreign **[**32]** nations unless--
>
> (1) such conduct has a *direct*, substantial, and reasonably foreseeable effect--
> (A) on trade or commerce which is not trade or commerce with foreign nations, or on import trade or import commerce with foreign nations; or
> (B) on export trade or export commerce with foreign nations, of a person engaged in such trade or commerce in the United States; and
>
> (2) such effect gives rise to a claim under the provisions of *sections 1 to 7* of this title, other than this section.

15 U.S.C. § 6a (emphasis added).

Although other appellate courts have dodged the critical issue on which this appeal turns, [2] this panel has decided to face the dragon in his teeth and stop tap dancing around the meaning of the word "direct." As did the district court in this case, the majority adopts the view that something new has been added by Congress in 1994 in enacting FTAIA -- some-thing that restricts the operation of the *Sherman Act* when foreign conduct is involved, a new ingredient requiring proof of a "direct" effect on American commerce.

[33]** I take a contrary view. I believe that the new statute merely codified existing ***antitrust law*** in the use of the word "direct." And so interpreted, under the facts in this case, which I adopt as laid down by the majority, a result contrary to that of the district court is mandated for the reasons that follow in detail.

II.

The district court erred in dismissing the Complaint for lack of jurisdiction under the FTAIA by determining that the government failed to allege a "direct, substantial, and reason-ably foreseeable effect" on United States commerce.

"We review de novo a district court's dismissal for lack of subject matter jurisdiction. . . . The district court's findings of fact relevant to its determination of subject matter jurisdiction are reviewed for clear error." *La Reunion Francaise SA v. Barnes, 247 F.3d 1022, 1024 (9th Cir. 2001)* (citations omitted).

---

[1] The district court also entered judgment against the United States for failure to state a claim for which relief could be granted. *Rule 12(b)(6), Federal Rules of Civil Procedure.* Because the majority affirms the dismissal under *Rule 12(b)(1)* it does not meet this issue. In light of the view I take, it will be necessary for me to discuss this question, *infra.*

[2] *See, e.g.*, *Hartford Fire Ins. Co. v. California, 509 U.S. 764, 789 n.23, 125 L. Ed. 2d 612, 113 S. Ct. 2891* ("Also unclear is whether the Act's 'direct, substantial, and reasonably foreseeable effect' standard amends existing law or merely codifies it . . . . We need not address these questions here.") (citation omitted); *see also* *Dee-K Enters. v. Heveafil Sdn. Bhd, 299 F.3d 281, 287 (4th Cir. 2002)*; *Kruman v. Christie's Int'l P.L.C., 284 F.3d 384, 399 n.5 (2d Cir. 2002)*; *Den Norske Stats Oljeselskap As v. HeereMac Vof, 241 F.3d 420, 428 (5th Cir. 2001)*.

The leading Supreme Court case discussing the FTAIA is *Hartford Fire Insurance Co. v. California, 509 U.S. 764, 125 L. Ed. 2d 612,* ***[*685]*** *113 S. Ct. 2891 (1993)*. Although jurisdiction was conceded by both parties in that case and the Court was only interested in issues of comity, [3] it engaged in a significant **[**34]** discussion of the FTAIA's import:

> Under § 402 of the Federal Trade Antitrust Improvements Act of 1982 (FTAIA), 96 Stat. 1246, *15 U.S.C. § 6a*, the Sherman Act does not apply to con-duct involving foreign trade or commerce, other than import trade or import commerce, unless "such con-duct has a direct, substantial, and reasonably foresee-able effect" on domestic or import commerce. *§ 6a(1)(A)*.

Hartford Fire, 509 U.S. at 796 n.23.

[35]** In so stating the Court resolved any tension between the teachings of *American Banana Co. v. United Fruit Co., 213 U.S. 347, 53 L. Ed. 826, 29 S. Ct. 511 (1909)* and *United States v. Aluminum Co. of America, 148 F.2d 416 (2d Cir. 1945)* (*Alcoa*). In *United States v. Nippon Paper Industries Co., 109 F.3d 1 (1st Cir. 1997)*, the court explained:

> Any perceived tension between *American Banana* and *Alcoa* was eased by the Supreme Court's most recent exploration of the Sherman Act's extraterritorial reach. In *Hartford Fire* . . . the Justices endorsed *Alcoa*'s core holding, permitting civil antitrust claims under Section One to go forward despite the fact that the actions which allegedly violated Section One occurred entirely on British soil. While noting *American Banana*'s initial disagreement with this proposition, the *Hartford Fire* Court deemed it "well established by now that the Sherman Act applies to foreign conduct that was meant to produce and did in fact produce some substantial effect in the United States." *Id. at 796*. The conduct alleged, a London-based conspiracy to alter the American insurance market, met that **[**36]** benchmark. *See id.*

109 F.3d at 3-4 (footnote omitted).

I now turn to the issue that divides this panel. Does "direct" in the phrase "direct, substantial, and reasonably foreseeable effect" reflect a statutory restriction of the operation of the Sherman Act, or does it merely codify existing case law?

A.

For over a century, at least since 1898, the jurisprudence of ***antitrust law*** has required that for *Section 1 of the 1890 Sherman Act to* apply there must be a "direct effect" on interstate commerce. Congress' enactment of the FTAIA in 1982 -- promulgating the statutory language "direct, substantial, and reasonably foreseeable effect" on United States trade or commerce when foreign activity is involved -- merely codified the direct effects requirement that has been set forth in teachings of (1) antitrust case law for over 100 years, (2) the *Restatement (Second) of Foreign Relations Law of the United States* (1965), (3) leading **[*686]** treatises of distinguished academics, (4) the *Antitrust Guide for International Operations* of the United States Department of Justice, Antitrust Division, January 26, 1977 and (5) the *Report to Accompany Resolutions Concerning* **[**37]** *Legislative Proposals to Promote Export Trading* of the American Bar Association, Section of ***Antitrust Law***, October 26, 1981.

We thus learn from the legislative history of the FTAIA:

---

[3] The opposite situation is presented here. The contested issue is subject matter jurisdiction, not comity. "The general understanding [is] that the Sherman Act covers foreign conduct producing a substantial intended effect in the United States, and that concerns of comity come into play, if at all, only after a court has determined that the acts complained of are subject to Sherman Act jurisdiction." *Hartford Fire, 509 U.S. at 797 n.24*. Thus, the list of factors relating to moderating enforcement powers of the United States in the interest of comity set forth in *Timberlane Lumber Co. v. Bank of America, N.T. and S.A., 549 F.2d 597, 614 (9th Cir. 1976)*, do not necessarily speak to the issue before us. Nor do my personal observations set forth in Ruggero J. Aldisert, "Federal Courts and Extraterritorial ***Antitrust Law***: Enlightened Self Interest or Yankee Imperialism?," 5 *J.L. & Com.* 415 (1985).

> Following the lead of *Alcoa* and its subsequent judicial interpretations, the Department of Justice announced its view in 1977 that the United States antitrust laws should be applicable to an international transaction "when there is a substantial and foreseeable effect on the United States commerce," and that it would be a miscarriage of Congressional intent to apply the Sherman Act to "foreign activities which have no direct or intended effect on United States consumers or export opportunities. . . ." United States Department of Justice, Antitrust Division, *Antitrust Guide to International Operations* 6-7 (1977) . . . .
>
> An ABA Antitrust Section analysis has concluded that, despite the variations in wording, "there is, with rare exception, no *significant* inconsistency between judicial precedents and the Justice Department's view of the effects test." Antitrust Section Report at 10 (emphasis in original).

H.R. Rep. No. 97-686 at 5-6 (1982), *reprinted in* 1982 U.S.C.C.A.N. 2487, **[**38]** 2490-2491 (House Report).

The use of "direct effect" is historically an integral part of ***antitrust law***. "As Professors Areeda and Turner have said, the federal courts have been invested 'with a jurisdiction to create and develop an "***antitrust law***" in the manner of the common law courts.' I Areeda & Turner, ***Antitrust Law*** P 106, at 15 (1978)." *Nippon Paper, 109 F.3d at 9* (Lynch, J. concurring). I first turn to the antitrust cases of the Supreme Court announcing or explicitly endorsing the "direct effects" test.

B.

My starting point is the seminal cases in 1898. After some very broad language in *United States v. Trans-Missouri Freight Ass'n, 166 U.S. 290, 41 L. Ed. 1007, 17 S. Ct. 540 (1897)*, that would seem "to reach every minor restraint . . . the Court cut back the *§ 1* dragnet in *Hopkins [v. United States, 171 U.S. 578, 43 L. Ed. 290, 19 S. Ct. 40, (1898)]*. . . ." 4 Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** P 1501, at 339 (2d ed. 2000). The Court in *Hopkins* declared that the Sherman Act

> must have a reasonable construction, or else there would scarcely be an agreement or contract among business [persons] that could not be said to have, indirectly **[**39]** or remotely, some bearing upon interstate commerce, and possibly to restrain it.

171 U.S. at 600.

Earlier the same year the Court had held:

> An agreement entered into for the purpose of promoting the legitimate business of an individual or corporation, with no purpose to thereby affect or restrain interstate commerce, and which does *not directly* restrain such commerce, is not . . . covered by the act, although the agreement may indirectly and remotely affect that commerce.

United States v. Joint-Traffic Ass'n, 171 U.S. 505, 568, 43 L. Ed. 259, 19 S. Ct. 25 (1898) (emphasis added).

These clear statements by the Court enunciated the direct effects test in actions brought under *Section 1 of the Sherman Act*. In the words of the prominent commentators Areeda and Hovenkamp: "The **[*687]** Court then excepted from the statute indirect or remote restraints." Areeda & Hovenkamp, *supra*, P 1501, at 339.

Then in 1945 came Learned Hand's formulation in *Alcoa*: "the ingot fabricated by 'Alcoa,' *necessarily had a direct effect* upon the ingot market." *148 F.2d at 424* (emphasis added). To say, as does the majority, that "unlike the FTAIA, **[**40]** the *Alcoa* test does not require the effect to be "direct[,]" (Maj. Op. at 11020), runs counter to the explicit teachings of *Alcoa*. My view is endorsed by the authoritative commentators, Areeda and Hovenkamp:

> As Judge Hand made clear in his *Alcoa* opinion, the Sherman Act would govern the world unless significant/*direct*/intended effects were required, for American commerce is affected in some degree by every force affecting the world's markets in which we buy or sell . . . .

4 Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** P 277 at 363 (2d ed. 2000) (emphasis added).

The "direct effects" test has thus been part and parcel of ***antitrust law*** before and after the passage of FTAIA in 1982. Indeed it was an integral part of antitrust jurisprudence for at least 84 years before Congress used the word "direct" in its formula on what constitutes foreign conduct affecting United States commerce in the FTAIA. After over 100 years of anti-trust cases, the Supreme Court has not diluted the "direct effects" requirement. On the contrary, in 1951 the Court approved the district court's use of this explicit test in a case, similar to the one at bar, in which there **[**41]** was a foreign restraint on commerce in the United States.

In *United States v. Timken Roller Bearing Co., 83 F. Supp. 284 (N.D. Ohio 1949)*, the district court had before it evidence that the defendant and two foreign manufacturers had made and sold for over 20 years a substantial portion of the world's production of anti-friction bearings by engaging in market allocation, price fixing and other illegal restraints of trade. As part of its defense, Timken argued that the cartel agreements had been made in foreign countries and that the Sherman Act could not be applied extraterritorially. In rejecting the argument the court held:

> Nor does the fact that the cartel agreements were made on foreign soil relieve defendant from responsibility. . . . They had a *direct* and influencing effect on trade in tapered bearings between the United States and foreign countries.

Timken, 83 F. Supp. at 309 (emphasis added, citation omitted). When the defendant repeated the same argument on appeal, the Court rejected its contention, stating: "[T]he trial judge after a patient hearing carefully analyzed the evidence in an opinion prepared with obvious **[**42]** care. Appellant's lengthy brief has failed to establish that there was error in making any crucial, or even important, ultimate or subsidiary finding." *Timken Roller Bearing Co. v. United States, 341 U.S. 593, 597, 95 L. Ed. 1199, 71 S. Ct. 971 (1951)* (footnote omitted).

That there is not a host of cases emphasizing this very point attests to the requirement that showing a direct effect on inter-state commerce is a *sine qua non* of antitrust liability. Other-wise, as the Court stated, "there would scarcely be an agreement or contract among business [persons] that could not be said to have, indirectly or remotely, some bearing upon interstate commerce, and possibly to restrain it." *Hopkins, 171 U.S. at 600*.

C.

In any event, the American Law Institute, composed of the leading judges, academics and lawyers, included the "direct effects" requirement in the relevant *Restatement* ***[*688]*** *(Second) of Foreign Relations Law of the United States* (1965) that was in effect at the time the Congress enacted the FTAIA in 1982.

Section 18, of the *Restatement (Second) of Foreign Relations Law of the United States* (1965) provided in relevant part:

> A state has jurisdiction **[**43]** to prescribe a rule of law attaching legal consequences to conduct that occurs outside its territory and causes an effect within its territory, if . . .
>
> (b) (I) the conduct and its effect are constituent elements of activity to which the rule applies; (ii) the effect within the territory is *substantial*: (iii) it occurs as a *direct* and *foreseeable* result of the conduct outside the territory; and (iv) the rule is not inconsistent with the principles of justice generally recognized by states that have reasonably developed legal systems.

§ 18 (emphasis added).

In light of the foregoing, it cannot be said that in its 1982 enactment the Congress intended to promulgate a new standard for restricting the operation of the Sherman Act by using the language "direct, substantial, and reasonably foreseeable effect," when in fact the existing case law had been using the identical formulation, to wit, "(ii) the effect within its territory is *substantial*: (iii) it occurs as a *direct* and *foreseeable* result of the conduct outside the territory." *Id.* Indeed, the Court of Appeals for the Third Circuit cited Section 18 of the *Restatement* as reflecting the components **[**44]** of the "intended effects" test in extraterritorial Sherman Act cases. *Mannington Mills, Inc. v. Congoleum Corp., 595 F.2d 1287, 1292 (3d Cir. 1979)*.

In 1986, when the bench, bar and professoriat promulgated the *Restatement (Third) of Foreign Relations Law of the United States*, the same formulation was retained, albeit in succinct form:

> Whether exercise of jurisdiction over a person or activity is unreasonable is determined by evaluating all relevant factors, including, where appropriate:
>
> (a) the link of the activity to the territory of the regulating state, *i.e.*, the extent to which the activity takes place within the territory, or has *substantial, direct, and foreseeable effect* upon or in the territory.

§ 403(2) (emphasis added).

D.

The treatises on ***antitrust law*** also reiterate that the "direct effects" test was integral to ***antitrust law*** when Congress enacted the FTAIA.

In Volume 1 of James Atwood, Kingman Brewster & Spencer W. Waller, *Antitrust and American Business Abroad* (3d ed. 2002), the commentators analyze leading antitrust cases preceding the 1982 Congressional action that discussed "direct and substantial effect upon trade" **[**45]** and " 'direct' effect on United States commerce." § 6, at 18 (quoting *United States v. Gen. Elec. Co., 82 F. Supp. 753, 884 (D.N.J. 1949)* and *Occidental Petroleum Corp. v. Buttes Gas & Oil Co., 331 F. Supp. 92, 103 (C.D. Cal 1971))*.

In *General Electric Co.*, District Judge Forman explained that "the second requirement for the finding of a violation on the part of Philips [is] that its activities must have had a direct and substantial effect upon trade. . . ." *82 F. Supp. at 891*.

In *Occidental Petroleum*, the court set forth views of two leading commentators:

> See Beausang, The Extraterritorial Jurisdiction of the Sherman Act, 70 Dick.L.Rev. 187, 191 (1966): "An '[e]ffect' is a necessary element of *jurisdiction* **[*689]** ***; a direct and substantial '[e]ffect' is necessary for Sherman Act *violations*. The problem arises when the standards of illegality (which might be modified to promote foreign trade) are confused with the jurisdictional feature of the '[e]ffect on foreign commerce' " (emphasis in original).
>
> In reviewing the cases, Von Kalinowski notes the confusion evident therein: "The cases that used **[**46]** the word "[e]ffect" have said that a restraint must (1) "directly affect," or (2) "substantially affect," or (3) "directly and substantially affect," or (4) simply "affect" the flow of foreign commerce. 1 J. Von Kalinowski, [Antitrust Laws and Trade Regulation] § 5.502[2], at 5-120 (footnotes omitted). He concludes that "[t]he better view would seem to be that any effect that is not both insubstantial and indirect will support federal jurisdiction under *Section 1*." *Id.* at 5-121-22.

331 F. Supp. at 102-103 (emphasis in original); *see also* *Todhunter--Mitchell & Co. v. Anheuser--Busch, Inc., 383 F. Supp. 586, 587 (E.D. Pa. 1974)* ("Restraints which directly affect the flow of foreign commerce into or out of this country are subject to the provisions of *Section 1 of the Sherman Act*. Von Kalinowski, *Antitrust Laws and Trade Regulations*, Vol.

1. § 5.02(2) (1971).").

Again turning to Areeda and Hovenkamp, the distinguished commentators jump into the new-law-versus-codification-of-the-old fray and persuasively argue that codification is the "better view":

> The most interesting question about the new statute is whether its standard for **[**47]** appraising export restraints differs from that for appraising import restraints or whether it merely "codifies" a general

> understanding of when American ***antitrust law*** should be concerned about restraints abroad that might affect United States interests only indirectly, insubstantially, or in ways that could not be foreseen. Although the "codification" reading would make the statute's distinction between import and export trade unnecessary, that distinction might simply reflect the new legislation's sole focus on export trade. In favor of the "codification" reading is *Alcoa* itself, which emphasized "significant" and "direct" effects on the United States, with intended effects as a possible alternative.
>
> Also supporting that reading is the policy that con-duct abroad whose primary effects are also abroad is not a fit subject for regulation by American domestic law. As Judge Hand made clear in his *Alcoa* opinion, the Sherman Act would govern the world unless significant/direct/intended effects were required, for American commerce is affected in some degree by every force affecting the world's markets in which we buy or sell . . . .
>
> If the new statute is not seen as a "codification" **[**48]** of the "better view" of the existing standard for jurisdiction, it might fail to have its intended effect even on export trade. It amends only the Sherman Act and the *Federal Trade Commission Act*, not the *Clayton Act*. Because some joint ventures can be reached under the latter statute, such a venture might be subjected to American ***antitrust law*** even though its effects would not satisfy the new statute.

Areeda & Hovenkamp, *supra*, P 272, at 362-363 (footnotes omitted).

E.

I now turn to the legislative history of the FTAIA for two distinct purposes. First, I emphasize that in formulating the expression specifically set forth in Section 18 of the *Restatement (Second) of Foreign Relations Law of the United States* (1965), **[*690]** "such conduct has a direct, substantial, and reasonably foreseeable effect," Congress intended to voice its disagreement with some lower court decisions that did not require a "substantial" effect. My second purpose is to emphasize the conclusions sent to Congress by the United States Department of Justice and the American Bar Association, Section of Anti-trust Law that "direct," "substantial" and "foreseeable" constituted a correct formulation of existing **[**49]** law.

What concerned Congress was twofold: first, that in some private actions a few *lower* courts seemed to discuss a *de minimus* effect, a much lesser standard than that of the "substantial effects" test; [4] and, second, to make explicit the requirement that the effect be "reasonably foreseeable" rather than based on "intent." House Report, *supra*, at 2494.

In this regard, what the House Report may have suggested as "new" law is what the Department of Justice reported to Congress as *existing* law:

> . . . U.S. law in general, and the U.S. antitrust laws in particular, are not limited to transactions which take place within our borders. When foreign transactions have a substantial and foreseeable effect on U.S. commerce, they are subject to U.S. law regard-less of where they take place.

Antitrust Division, *Antitrust Guide for International Operations* 6 (1977) (footnotes omitted).

The House Report acknowledged this view: **[**50]** "The Justice Department in its *Antitrust Guide* takes the position that only 'foreseeable' effects on U.S. commerce should result in U.S. antitrust jurisdiction." House Report, *supra*, at 2493.

Moreover, the American Bar Association Section of Anti-trust Law submitted a report to Congress in October of 1981 commenting on the purpose and effect of the various pending legislative proposals on extraterritorial ***antitrust law***. The ABA Antitrust Section concluded that "any business uncertainty as to the applicability of the antitrust laws to foreign trade would seem to be an overreaction, for there is, with rare exception, no *significant* inconsistency between judicial precedents and the Justice Department's view of the 'effects' test." American Bar Ass'n, Sec. of

---

[4] *See* cases cited in House Report, *supra*, at 2490.

Antitrust Law, *Report to Accompany Resolutions Concerning Legislative Proposals to Promote Export Trading* 10 (1981) (emphasis in original). The *Antitrust Section Report* explained further:

> [I]t is clear . . . that a showing of something more than any effect on United States interstate, export, or import commerce would be required to establish subject matter jurisdiction. In this fundamental respect, the recent **[**51]** court decisions seem essentially consistent with the Justice Department's enforcement policy and with the state of the law generally, although courts and commentators may not always see eye to eye on what constitutes "substantiality" or "foreseeability."

Id. at 13 (footnotes omitted). The ABA Antitrust Section, in a footnote, quoted another 1981 report it authored that states:

> The cases decided since *Alcoa* likewise recognize a need for limiting antitrust subject matter jurisdiction to something less than all conduct having any impact on American commerce. The approach generally taken . . . has been to make jurisdiction dependent upon whether the effect on U.S. commerce in each case is **[*691]** *direct, substantial and reasonably foresee-able*.

Id. (quoting American Bar Ass'n, Sec. of ***Antitrust Law***, *U.S.* ***Antitrust Law*** *in International Patent and Know-How Licensing* 4-5 & nn.16-18 (1981)) (emphasis added). It is from this conclusion that the *Antitrust Section Report* recommended to Congress the language "direct, substantial, and foreseeable effect" -- to succinctly codify, for the purpose of clarification, existing antitrust case law.

When originally introduced **[**52]** in Congress, the FTAIA included only the words: "direct and substantial effect." H.R. 2326, 97th Cong. (1981). This indicates that the debate centered on the concept of foreseeability, not direct effects. But even then, the legislation as proposed did not reflect a change in existing case law, as the *Antitrust Section Report* explained: "H.R. 2326 [and its companion bill S. 795] is intended, *with-out changing the law substantively*, to use the 1977 Justice Department [Antitrust] Guide's wording to clarify the 'effects' test to be applied in foreign commerce cases." *Anti-trust Section Report, supra*, at 29-30 (emphasis added) (citing Hearing on S. 795, 97th Cong. 4 (1981) (Statement of William F. Baxter, Esq.) ("We understand that this bill is not intended to work any significant changes in the law, but rather to restate current enforcement policy and judicial interpretations governing the applicability of the antitrust laws to joint export activity.")).

In commenting on the *Antitrust Section Report*, the House Report noted: "An ABA Antitrust Section analysis has concluded that, despite the variations in wording, 'there is, with rare exception, no *significant* inconsistency **[**53]** between judicial precedents and the Justice Department's view of the effects test.' Antitrust Section Report at 10 (emphasis in the original)." House Report, *supra*, at 2490-2491.

F.

In sum, the promulgation of the statutory language "direct, substantial, and reasonably foreseeable effect" on United States trade or commerce when foreign activity is involved was merely a codification of the direct effects requirement that had been set forth in teachings of ruling case law, the Restatements of Foreign Relations Law, leading treatises of distinguished academics, the Department of Justice's 1977 *Antitrust Guide* and the American Bar Association's 1981 *Antitrust Section Report*. Although the panel agrees on the standard to be applied, the "direct effects test," I respectfully disagree with the contrary view expressed by my colleagues of the majority that the word "direct" in the FTAIA is a new dimension of ***antitrust law***. Whereas the majority interprets the term "direct" from scratch, I am guided by contemporary definitions of the term as well as relevant precedent, including that which preexisted the FTAIA, and therefore I diverge from my colleagues' interpretation of the "direct **[**54]** effects test" as applied to this case.

III.

The United States sufficiently alleged that the Restrictive Clause has a "direct" effect on United States commerce under the most useful and sensible interpretation of that term. The district court did not attempt to define direct, but instead simply accepted LSL's argument that the effect of the Restrictive Clause was not direct because the clause "involves the development of seeds, not tomatoes." This ruling was simply wrong.

It was as if to say that restricting vanadium ore, which was processed into vanadium oxide in Canada and then into ferrovanadium, had no direct effect in the United **[*692]** States markets, whereas here it was purchased by American steel companies for use as an alloy in hardening steels. *See* *Continental Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 8 L. Ed. 2d 777, 82 S. Ct. 1404 (1962)*. Likewise, we could not say that restricting sisal, the fiber of the henequen plant that is native to Mexico, had no effect on American commerce, because here the fabricated Mexican hemp amounted to more than 80 percent of the binder twine used for harvesting grain in the United States. *See* *United States v. Sisal Sales Corp., 274 U.S. 268, 71 L. Ed. 1042, 47 S. Ct. 592 (1927).* **[**55]** Neither could we say that restricting competition for the purchase of cattle was insufficient to support an intention to monopolize commerce in fresh meat. *See* *Swift Co. v. United States, 196 U.S. 375, 49 L. Ed. 518, 25 S. Ct. 276 (1905)*.

"Courts properly assume, absent sufficient indication to the contrary, that Congress intends the words in its enactments to carry 'their ordinary, contemporary, common meaning.' " *Pioneer Inv. Serv. Co. v. Brunswick Assoc. Ltd. P'ship, 507 U.S. 380, 388, 123 L. Ed. 2d 74, 113 S. Ct. 1489 (1993)* (quoting *Perrin v. United States, 444 U.S. 37, 42, 62 L. Ed. 2d 199, 100 S. Ct. 311 (1979))*. "Direct" has many meanings, in fact, only one of which is drawing direct lines on paper or geographically "from point to point without deviation" -- the definition used by the district court and accepted by the Majority. The same dictionary source contains seven main meanings in the adjective form, encompassing 31 more specific subsidiary meanings. *Webster's Third New International Dictionary* 640 (1981). All of those meanings are contemporary with the FTAIA, enacted in 1982, and many are both ordinary and common.

It would be arbitrary simply to pick one definition **[**56]** and declare it the "plain meaning" in the abstract. Determining the meaning of "direct" requires the consideration of definitions as informed by the FTAIA's context and history. In this light, I believe that the most pertinent and sensible definition of "direct" for current purposes is: "3a. characterized by or giving evidence of a close especially logical, causal, or consequential relationship." *Id*.

And, if we go to the granddaddy of all English dictionaries, *The Oxford Dictionary of the English Language*, the straight line definition is described as an adjective arising in LME (Late Middle English, 1350-1460). But the definition which I perceive to be most relevant here is "c. LOGIC. Proceeding immediately from consequent to antecedent, from cause to effect. Etc. 'E19' " (1800-1829). This comports with the dictionary definition urged by the United States before us, in its neat comparison with the law of torts' familiar phrase "proximate cause."

Just as well, this is how the Supreme Court interpreted the term "direct" in the Foreign Sovereign Immunities Act (FSIA), as the majority concedes: "an effect is 'direct' 'if it follows as an *immediate consequence* of the defendant's **[**57]** activity." Maj. Op. at 11023 (emphasis added) (quoting *Republic of Argentina v. Weltover, Inc., 504 U.S. 607, 618, 119 L. Ed. 2d 394, 112 S. Ct. 2160 (1992)* (holding that Argentina's bond payment rescheduling had a "direct effect" in the United States, where Argentina was to perform its ultimate contractual obligations, even though the bond holders were foreign corporations)). [5]

[58]** **[*693]** A definition of "direct" that focuses on consequential relationships draws support from another area of ***antitrust law*** -- private plaintiffs' antitrust standing. In *Blue Shield of Virginia v. McCready, 457 U.S. 465, 73 L.*

---

[5] The majority points out that the Court in *Weltover* "reject[ed] the suggestion that ['direct'] contains any unexpressed requirement of 'substantiality' or 'foreseeability.' " *504 U.S. at 618*. This simply indicates, however, that "direct" requires something less than substantial and fore-seeable. *Id.* Indeed, a "direct" effect, or immediate consequence, on domestic commerce is the baseline -- the *sine qua non* -- of extraterritorial jurisdiction. Althoughthe FSIA requires this baseline, the FTAIA requires that the immediate consequence be substantial and foreseeable. Here, the government sufficiently averred that the adverse effect on the United States' domestic commerce of tomatoes has been an immediate consequence of the Restrictive Clause governing tomato seeds, and given Defendants' "market power," this "direct effect" has been, as well, "reasonably foreseeable" and "substantial." *See* discussion *infra*.

Ed. 2d 149, 102 S. Ct. 2540 (1982), the Court faced the issue of which persons sustained injuries too remote from an anti-trust violation to give them standing to sue for damages under Section 4 of the Clayton Act. In answering this question, the Court observed that, historically, some antitrust cases formulated a test that equated "remoteness" with "directness" and suggested that both terms are analogous to the common law concept of "proximate cause." Id. at 478 nn.12-13.

To be sure, proximate cause itself is not easily defined. Id. at 478 n.13. But it is still useful and important here for two reasons. First, it rightly focuses the inquiry about the meaning of "direct" into a relationship of logical causation rather than of something else such as time or geography. Second, it is a reminder that public policy undergirds concepts such as "proximate cause" and "direct effects." The "policy unequivocally laid down by the [Sherman] **[**59]** Act is competition[,]" N. Pac. Ry. Co. v. United States, 356 U.S. 1, 4-5, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958), and the FTAIA, which is part of the Sherman Act, should therefore be interpreted in light of its fundamental purpose to protect United States consumers from the consequences of anticompetitive conduct.

Indeed, even the master wordsmith Benjamin N. Cardozo had his fling with attempting to define "direct" in deciding what was required in the context of Congress' Commerce Clause power. He warned of confining a constitutional principle -- namely the power of one sovereign to regulate the commerce of another -- to a strict construction of a pair of opposing adjectives, for:

> 'the law is not indifferent to considerations of degree'. . . . Perhaps, if one group of adjectives is to be chosen in preference to another, 'intimate' and 'remote' will be found as good as any. At all events, 'direct' and 'indirect,' even if accepted as sufficient, must not be read too narrowly. . . . A survey of the [Commerce Clause] cases shows that the words have been interpreted with suppleness of adaptation and flexibility of meaning. The power is as broad as the need that evokes it.

Carter v. Carter Coal Co., 298 U.S. 238, 327-328, 80 L. Ed. 1160, 56 S. Ct. 855 (1936) **[**60]** (Cardozo, J., dissenting) (citations omitted). After reviewing relevant Commerce Clause cases Cardozo concluded:

> What the cases really mean is that the causal relation in such circumstances is so close and intimate and obvious as to permit it to be called direct without subjecting the word to an unfair or excessive strain.

Id. at 328.

When directness is seen as a synonym for proximate cause, it is relevant that there are two types of causation: causation in fact, otherwise known as "but for" causation; and legal causation, the public policy imperative of cutting off liability **[*694]** when a causal chain of events becomes excessively complex or attenuated. *See, e.g.*, *Prosser and Keeton on Torts* § 42, at 272-73 (5th ed. 1984). It is evident here that the United States sufficiently alleged that the Restrictive Clause had a "direct," or proximate cause, effect on United States commerce in both senses.

First, the Complaint squarely alleged causation in fact: but for the restraint, United States consumers would have the important potential of better winter tomatoes grown from Hazera seeds. The Restrictive Clause, and indeed the entire LSL-Hazera relationship, **[**61]** was aimed at United States consumers. The United States tomato market drives the long shelf-life seed business. LSL sells its tomato seeds to farmers in Mexico and those farmers raise the seeds into tomatoes for the purpose of supplying grocery stores in the United States. Consumers in the United States are the persons injured by the Restrictive Clause, as they are the ones deprived of the superior tomatoes that competition from Hazera could bring.

Second, the causal link between seeds and tomatoes is very close and intimate. If seeds are allowed to grow (and other-wise they would be worthless), they quickly and inevitably become tomatoes. Because the principal use of tomato seeds is to grow tomatoes, tomatoes are more properly described as a different stage of the *same* product rather than as a related but downstream product. The seed, when planted, becomes the plant and the fruit that is yielded. Accordingly, LSL's contention, adopted by the district court, that the seed is only an input into the finished tomato, does not preclude a "direct" effect on United States consumers.

Moreover, the causal connection between the Restrictive Clause and its effect on United States consumers **[**62]** is extremely close and intimate. The United States alleged a restraint on the very tomato seeds that grow into tomatoes in Mexico expressly for shipment to the United States. The consequences to the commerce of tomatoes in the United States are immediate, as there are no diversions or other intermediate stops for either the seeds or the resulting tomatoes. Short of a restraint on import commerce (to which the FTAIA does not apply), it is difficult to imagine foreign conduct that would have a more direct effect on United States commerce.

Most obviously, in *Hartford Fire* the Supreme Court treated the plaintiffs' allegations as satisfying *both* the common law and the FTAIA's tests for subject matter jurisdiction as to a conspiracy involving the market for *reinsurance*, particularly in London, but ultimately targeting the United States domestic market for *primary* insurance. *509 U.S. at 795-796*. The two products, the London-based reinsurance and the United States primary insurance, were closely related -- in a proximate cause sense -- because primary insurers depend on reinsurance for their own protection and "the London reinsurance market [is] an important **[**63]** provider of reinsurance for North American risks." *Id. at 775*.

The district court's distinction between seeds and tomatoes, endorsed by the majority, is fundamentally inconsistent with *Hartford Fire.* If a restraint on reinsurance in the United Kingdom has a sufficiently "direct" effect on primary insurance in the United States under the FTAIA, it is impossible to see how a restraint on tomato seeds in Mexico does not have an equally direct effect on the resulting tomatoes in the United States -- particularly when the district court's order concedes that seeds and tomatoes are related and it is undisputed that Mexico is a significant **[*695]** provider of winter tomatoes for the United States. [6]

[64]** The United States alleged here that a contractual bar against Hazera selling seeds in Mexico adversely affected the domestic commerce of tomatoes, the inevitable outgrowth of the seeds, in the United States. *Hartford Fire* shows that the FTAIA is satisfied by these facts, and the district court's treatment of the distinction between seeds and tomatoes as dispositive was therefore error. Fundamentally, the district court confused *conduct* with *effect* under the FTAIA by focusing on what the Restrictive Clause bars -- Hazera selling seeds in Mexico -- and ignoring the effect of that conduct, which is to deprive United States consumers of winter tomatoes from Hazera seeds. But "it is the effect and not the location of the conduct that determines whether the antitrust laws apply," even under the FTAIA. *Kruman v. Christie's Intern. PLC, 284 F.3d 384, 395 (2d Cir. 2002)*.

Inasmuch as the Congress did not define the term "direct" by statute, this court should give the term its ordinary meaning within the context of Congress' *Commerce Clause* power. In the words of Cardozo, the "causal relation" between the restraints on the development and production of tomato seeds **[**65]** in Mexico and the marketing, price and consumption of the resulting tomatoes in the United States "is so close and inti-mate and obvious as to permit it to be called direct without subjecting the word to an unfair or excessive strain." *Carter, 298 U.S. at 328*.

Accordingly, I am convinced that there is no persuasive reason why a restraint on selling seeds in Mexico cannot have a "direct" effect on United States domestic commerce in toma-toes. [7]

---

[6] The majority emphasizes that Hazera has not yet developed its own long term shelf-life tomato seeds and suggests that the Restrictive Clause cannot have a direct effect on United States commerce because the prospect of Hazera developing such a seed without infringing on LSL's patent is speculative. (*See* Maj. Op. at 11024 n.7). All of this flies in the face of the government's declarations in its Complaint that: (1) Hazera is one of the world's leading tomato seed producing companies, (2) Hazera sells more seeds than any other company in many important tomato producing countries, including Spain, Italy, Israel and Turkey, (3) For the European and Mediterranean regions, Hazera has bred long shelf-life tomatoes by traditional plant-breeding processes that do not incorporate the RIN gene (and accordingly do not implicate LSL's patent rights), (4) Hazera is one of the few firms with experience and know-how to develop seeds that will allow farmers from the United States and Mexico to grow better fresh-market tomatoes for United States consumers during winter months, (E.R. at 11-12, PP 37, 39), and but for the Restrictive Clause, Hazera would be a significant competitor to Appellees in North America. Indeed, LSL would have had little reason to impose the Restrictive Clause on Hazera if it believed that Hazera's prospect in developing its own long term shelf-life tomato seed was "speculative at best," as the majority suggests. Hazera cannot be faulted for not producing seeds in Mexico or the United States, as it has done elsewhere, because the Restrictive Clause prohibits it from doing so.

[66]** **[*696]** Although the district court determined there was no subject matter jurisdiction, it went further in its analysis and decided that the United States' Complaint failed to state a claim for which relief can be granted. *Rule 12(b)(6)*, Federal Rules of Civil Procedure. In so doing the court participated in an exercise of determining the relevant market definition for ***antitrust law***, and accordingly stepped beyond its bounds, "[f]or a court to pronounce upon the meaning or the constitutionality of a state or federal law when it has no jurisdiction to do so is, by very definition, for a court to act ultra vires." *Steel Co. v. Citizens for a Better Env't, 523 U.S. 83, 101-102, 140 L. Ed. 2d 210, 118 S. Ct. 1003 (1998)*.

Moreover, the court erred in its treatment of the two components of defining a market in ***antitrust law***: first, identifying the relevant product for the service market, and, second, identifying the relevant geographic area. It is to this issue that I will now turn. The majority held that there was no subject matter jurisdiction and, following the teachings of *Steel Company*, it properly declined to address the *Rule 12(b)(6)* issue: "Jurisdiction is power to declare the law, **[**67]** and when it ceases to exist, the only function remaining to the court is that of announcing the fact and dismissing the cause." *523 U.S. at 94* (quoting *Ex Parte McCardle, 74 U.S. 506, 7 Wall. 506, 514, 19 L. Ed. 264 (1868))*. Because I conclude that there is subject matter jurisdiction, and the district court elected to decide the merits, so must I.

IV.

First, it is of import to provide a brief overview of market power, an underlying principle of ***antitrust law***. *Section 1 of the Sherman Act* reads in part:

> Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal.

15 U.S.C. § 1 (1994).

Antitrust is concerned with the power of market participants to distort the competitive process. This distortion can misallocate resources, transfer wealth from consumers and other protected groups or, as in this case, by means of the non-compete agreement, stifle new entry or innovation and commercialization.

The power relevant to antitrust is market power, or as some economists put it "monopoly power." **[**68]** [8] This power is, at its core, linked to elasticity of demand. Although a participant can exercise market power either as a seller or as a buyer, it is usually defined from the point of view of the seller: Market power is the seller's ability to

---

[7] The majority argues that an agreement with farmers in Mexico to set a floor on prices of tomatoes shipped from Mexico to the United States supports its position. *Suspension of Antidumping Investigation: Fresh Tomatoes From Mexico, 67 Fed. Reg. 77044-02 (Dec. 16, 2002*). The agreement covers all "fresh or chilled tomatoes (fresh tomatoes) which have Mexico as their origin . . . ." *Id. at 77046*. The agreement fixes mini-mum prices that tomato growers in Mexico must charge for their product. *Id. at 77045-77050*. The majority argues that this agreement, and the concerns that gave rise to it, belie the United States' argument that LSL could raise the prices ultimately paid by American tomato consumers. I disagree, and endorse completely the United States' reply to this argument:

> First, as the United States argued in its briefs, the primary effect of the Restrictive Clause on U.S. commerce is to limit innovation that improves tomato quality. The Restrictive Clause excludes Hazera's current and future long shelf-life seeds from North America and thereby ensures that no tomatoes grown from those seeds can reach U.S. grocery stores. The official anti-dumping agreement cited by LSL has nothing to do with this effect.
>
> Second, the very existence of the anti-dumping agreements confirms that the importation of fresh tomatoes from Mexico, and the pricing of those tomatoes, have a substantial effect on U.S. domestic commerce. But it is impossible to determine, at least at this stage of the proceedings, whether the agreement prevents the Restrictive Clause from affecting prices in the United States.

[8] Frederic M. Sherer and David Ross, *Industrial Market Structure and Economic Performance* 17 (3d ed. 1990).

raise and sustain a price increase without losing so many sales that it must rescind the increase. William M. Landes & Richard A. Posner, "Market Power in **[*697]** Antitrust Cases," 94 *Harv. L. Rev.* 937, 939 (1981). [9]

[69]** Elasticity of demand is a concept used to signify the relationship between changes in price and responsive changes in demand. In monopolization cases, the Court has said that the existence of market power can be determined by examining elasticities. *United States v. E.I. DuPont de Nemours & Co., 351 U.S. 377, 400, 100 L. Ed. 1264, 76 S. Ct. 994 (1956)* ("[t]he responsiveness of the sales of one product to price changes of the other").

V.

Under the rule of reason, or a market analysis of the circumstances presented in this case, the United States satisfied pleading requirements to withstand a motion to dismiss for failure to state an antitrust claim.

"Ordinarily, whether particular concerted activity violates *§ 1 of the Sherman Act* is determined through case-by-case application of the so-called rule of reason -- that is, 'the fact-finder weighs all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition.' " *Bus. Elecs. Corp. v. Sharp Elecs. Corp., 485 U.S. 717, 723, 99 L. Ed. 2d 808, 108 S. Ct. 1515 (1988)* (quoting *Cont'l T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 49, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977))*. "Certain **[**70]** categories of agreements, however, have been held to be *per se* illegal, dispensing with the need for case-by-case evaluation." *Id.* "Such agreements are those that always or almost always tend to restrict competition and decrease output." *United States v. Brown, 936 F.2d 1042, 1045 (9th Cir. 1991)* (internal quotations and citations omitted). In general, "[a] market allocation agreement between competitors at the same market level is a classic *per se* anti-trust violation." *Id.*

Given the binding precedent of this court, however, the United States may not rely on a *per se* theory of a Sherman Act violation in this case. *Metro Indus., Inc. v. Sammi Corp., 82 F.3d 839, 844-845 (9th Cir. 1996)* ("application of the per se rule is not appropriate where the conduct in question occurred in another country"). [10] **[**71]** Instead, we must examine whether there are **[*698]** intended and substantial effects in the United States -- an inquiry that must be conducted through a market analysis and the rule of reason. [11]

A.

---

[9] Judge Posner has restated this definition in various opinions. *In re Brand Name Prescription Drugs Antitrust Litigation, 123 F.3d 599, 603 (7th Cir. 1997)* (market power or monopoly power is "the power to raise price above cost without losing so many sales as to make the price rise unsustainable") *cert. denied*, *522 U.S. 1153, 140 L. Ed. 2d 186, 118 S. Ct. 1178 (1998)*; *Olympia Equip. Leasing Co. v. Western Union Tel. Co., 797 F.2d 370, 373 (7th Cir. 1986)* (market power is "the power to raise prices without losing so much business that the price increase is unprofitable"), *cert. denied*, *480 U.S. 934, 94 L. Ed. 2d 765, 107 S. Ct. 1574 (1987)*; *Valley Liquors, Inc. v. Renfield Importers, Ltd., 678 F.2d 742, 745 (7th Cir. 1982)* (market power is the "power to raise prices significantly above the competitive level without losing all of one's business").

[10] This is not to say that I personally agree with this holding, but it nevertheless binds this panel in this judicial circuit. Like the United States, I am concerned that it runs counter to teachings of the Supreme Court that long ago held that international conduct such as price fixing and territorial allocations among horizontal competitors is *per se* unreasonable and hence *per se* unlawful under *Section 1* of the Sherman Act. *Timken, 341 U.S. at 599*, *aff'g* *Timken, 83 F. Supp. 284, 310 (N.D. Ohio. 1949)* ("In view of settled law and the facts, defendants' contention that the restraints were reasonable must be rejected as untenable. The restraints on commerce, here proved by abundant evidence, have been denounced as unreasonable per se."); *see also* *Nippon, 109 F.3d at 7* ("[t]he instant case falls within [the per se illegal] rubric") and Areeda & Hovenkamp, *supra*, P 273, at 379 (1997).

[11] The district court treated the domestic affairs of LSL as the backdrop of facts upon which to assess the *12(b)(6)* motion and used the foreign affairs as the backdrop for the *12(b)(1)* motion. I agree with the majority that this analysis improperly divided a course of conduct that is interrelated and comprised of an impetus in a foreign location and an alleged direct effects in a domestic one. The entire course of conduct must be analyzed to determine its effects and this can only be done with the rule of reason. A division of activities into domestic and foreign categories was improper.

"We review *de novo* the district court's order of dismissal for failure to state a claim." Knevelbaard Dairies v. Kraft Foods, Inc., 232 F.3d 979, 984 (9th Cir. 2000). "A motion to dismiss for failure to state a claim may not be granted 'unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief.' " *Id.* (quoting Conley v. Gibson, 355 U.S. 41, 45-46, 2 L. Ed. 2d 80, 78 S. Ct. 99 (1957)). Both the district **[**72]** court and this Court are required to "presume all factual allegations of the complaint to be true and draw all reasonable inferences in favor of the non-moving party." *Id.* (citation omitted).

Here the district court ignored the Complaint's unanswered allegation that the Restrictive Clause is a horizontal non-compete agreement that amounts to a "naked restraint of trade." This was reversible error.

The district court demanded a level of detail at the pleading stage that the Federal Rules do not require in antitrust cases involving conduct subject to the rule of reason. "The complaint need not set out the facts in detail; what is required is a 'short and plain statement of the claim showing that the pleader is entitled to relief.' " Id. at 984 (quoting Rule 8(a), Federal Rules of Civil Procedure). "[N]otice pleading is all that is required for a valid antitrust complaint[,]" and thus "the complaint need only 'give the defendant fair notice of what the plaintiff's claim is and the grounds upon which it rests.' " Quality Foods de Centro Am., S.A. v. Latin Am. Agribusiness Dev. Corp., 711 F.2d 989, 995 (11th Cir. 1983) **[**73]** (quoting Conley, 355 U.S. at 47), *accord* Hunt-Wesson Foods, Inc. v. Ragu Foods, Inc., 627 F.2d 919, 924 (9th Cir. 1980) ("There is no special rule requiring more factual specificity in antitrust pleadings.").

Moreover, in recent decisions the Supreme Court has been extremely emphatic on this issue. In Swierkiewicz v. Sorema N.A., 534 U.S. 506, 152 L. Ed. 2d 1, 122 S. Ct. 992 (2002), the Court made clear that "Rule 8(a)'s simplified pleading standard applies to *all civil actions,* with limited exceptions. Rule 9(b), for example, provides for greater particularity in all averments of fraud or mistake." Id. at 513 (emphasis added).

In so proclaiming, the Court reaffirmed the teachings of Leatherman v. Tarrant County Narcotics Intelligence & Coordination Unit, 507 U.S. 163, 122 L. Ed. 2d 517, 113 S. Ct. 1160 (1993):

> Rule 8(a)(2) requires that a complaint include only "a short and plain statement of the claim showing that the pleader is entitled to relief." In *Conley* . . . we said in effect that the Rule meant what it said:
>
> [T]he Federal Rules of Civil Procedure do not require a claimant to set out in detail the facts **[**74]** upon which he bases his claim. To the contrary, all the Rules require is 'a short and plain **[*699]** statement of the claim' that will give the defendant fair notice of what the plaintiff's claim is and the ground upon which it rests.
>
> [355 U.S.] at 47 . . . (footnote omitted).

Id. at 168.

What the United States averred in its Complaint was all that is necessary under the teachings of *Swierkiewicz* and *Leatherman*. "Such a statement must simply 'give the defendant fair notice of what the plaintiff's claim is and the grounds upon which it rests.' " Swierkiewicz, 534 U.S. at 512 (quoting Conley, 355 U.S. at 47). The United States alleged that the Restrictive Clause, which "bars Hazera from ever competing to develop tomato seeds specifically adapted for North American climates," violates the Sherman Act because it was so "overbroad as to scope and unlimited as to time as to constitute a naked restraint of trade . . . ." The Complaint specified, in a short and plain statement, that "[t]he relevant market consists of seeds designed to grow fresh-market tomatoes in North America during the winter months." [12]

---

[12] Defendants do not deny that they have market power in the market for "seeds designed to grow fresh-market tomatoes in North America during the winter months," or in any part thereof. In particular, they do not deny the Complaint's allegation that they control a 70+ share of the relevant market, which must be taken as correct for Rule 12(b)(6) purposes. Rather, they appear to deny market power in a market of their own definition, not alleged by the United States -- "the sale of long-shelf life tomato

[75]** These averments gave the defendants notice that the government's Sherman Act claim would focus on the Restrictive Clause's effect on competition with respect to (1) seeds designed to grow fresh-market tomatoes (thus excluding tomatoes destined for processing), (2) tomatoes grown in North America (thus including both the United States and Mexico), and (3) tomatoes that are grown in the winter months. The United States' Complaint was more than sufficient to put the defendants on fair notice of the claim and relevant market and enable them to frame responsive pleadings. *See, e.g.*, *Caribbean Broad. Sys., Ltd. v. Cable & Wireless PLC, 331 U.S. App. D.C. 226, 148 F.3d 1080, 1086 (D.C. Cir. 1998)* (alleged "market for English-language radio broadcast advertising in the Eastern Caribbean" was sufficient); *Quality Foods, 711 F.2d at 996* ("United States market for frozen vegetables" was sufficient). The district court erred in finding fault with the product and geographical dimensions of the relevant market as set forth in the government's complaint.

B.

The court based its finding of fault with the product component of the relevant market on a premise **[**76]** of overbreadth: "by including seeds designed to grow in greenhouses, cherry tomato seeds, open-field seeds and seeds with long-shelf-life qualities," the Complaint's market included "different types of seeds [that] are not interchangeable."

By asserting that these seeds are not interchangeable, an assertion not made by LSL or Seminis, the court in effect participated in its own fact finding. The nature of *Rule 12(b)(6)* does not allow courts to reach "matters outside the pleading" without following the summary judgment procedures of *Rule 56*. *San Pedro Hotel Co., Inc. v. City of Los Angeles, 159 F.3d 470, 477 (9th Cir. 1998)*. ("[i]f matters outside the pleadings are considered, the motion to dismiss is to be treated as one for summary **[*700]** judgment"). [13] The district court here did not invoke *Rule 56* procedures, and was thus precluded from relying on matters outside the four corners of the United States' Complaint. Moreover, the court may not make fact findings of a controverted matter when ruling on a *Rule 12(b)(6)* motion. *Roberts v. Corrothers, 812 F.2d 1173, 1177 (9th Cir. 1987)*.

[77]** Even if the court's unsupported supposition of overbreadth as to the product market definition was correct, the competitive analysis of the case would not change. [14] The Restrictive Clause, as interpreted by LSL, excludes Hazera from developing, marketing, or selling *any* kind of tomato seed that has *any* long shelf-life qualities, whether referred to as greenhouse, open-field, long shelf-life, extended shelf-life, or something else. The analysis would thus be the same in the smaller markets that the district court suggested as preferable. Aggregating these various tomato seed products was a reasonable convenience, and it certainly does not foreclose the United States' case.

[78]** But the court's error did not stop there. It committed reversible error also in finding fault with the geographical metes and bounds of the relevant market.

C.

---

seeds for open-field cultivation in winter in the United States" -- a market in which they insist there is no commerce. (LSL Br. at 15-17).

[13] When a district court rules on a *Rule 12(b)(1)* motion, unlike a 12(b)(6) motion, it may consider affidavits or other extra-pleading evidence. *St. Clair v. City of Chico, 880 F.2d 199, 201 (9th Cir. 1989)*.

[14] *Tanaka v. University of Southern California, 252 F.3d 1059 (9th Cir. 2001)*, on which the district court relied, differs from this case with respect to the sufficiency of the plaintiff's market, and anticompetitive effects allegations. In that case a former collegiate soccer player challenged an intercollegiate athletic association rule that discouraged her from an intraconference transfer to a single athletic program, but she apparently did not even attempt to allege geographic or product markets on the basis of any economic facts. Instead, she based her allegations simply on her own subjective personal preferences: she alleged that "the relevant [geographic] market is Los Angeles because she wanted to be close to her family," *id. at 1063* (internal quotations and brackets omitted), and that the relevant product market was UCLA because of her "strictly personal preference" that she wanted to play for UCLA's soccer team. *Id.* These market allegations were obviously defective, and Tanaka "failed to allege that the transfer rule has had significant anticompetitive effects within a relevant market, however defined." *Id. at 1064*.

As to the geographic scope of the relevant market, the crux of the district court's objection to the Complaint was also premised on overbreadth, as it reasoned: "open field winter tomatoes can only potentially be grown in Mexico and some Southern U.S. States" rather than throughout North America. The district court's approach misapprehends ***antitrust law*** dealing with the geographic market definition.

If Hazera was excluded with respect to all of North America, it necessarily was excluded with respect to Mexico and the southern U.S. States. And if all the relevant tomatoes were grown in those areas, then a market consisting of those areas would be equivalent, for purposes of this case, to a market encompassing all of North America, because it would include precisely the same tomatoes.

In any event, neither the district court nor the Appellees have cited any case that dismissed a complaint because of an allegedly *overbroad* market definition. The cases cited were dismissals in which the market was defined too narrowly. **[**79]** My own research has not unearthed any authority supporting the district court's decision in this respect. [15]

[80] [*701]** In a footnote, the court went further, reasoning that because tomato seeds are designed for microclimates, "[i]t seems to the Court that separate relevant markets exist for each growing region that requires a distinct seed variety." But Hazera was excluded from each of the court's suggested microclimate markets, and its exclusion from each eliminated a potent force for enhanced competition. Because the likely anticompetitive effect of the Restrictive Clause was basically the same for all the relevant microclimate markets, treating them as a single aggregate market cannot be a valid basis for dismissing the United States' Complaint.

In addition, the district court erred in holding that every microclimate for different tomato seeds is a separate market. This approach assumes, without logical underpinning or case law support, that any substitution had to occur at the level of the farmer when selecting seeds. The Complaint placed seeds for different microclimates in the same market because the tomatoes grown in the different microclimates compete at the level of grocery store shelves. It is the grocery store-level competition of tomatoes, not the farmers' selection of seeds with which **[**81]** to grow them, that goes to the heart of the United States' Complaint and constitutes the geographic contours of the market.

* * * * *

For all the foregoing reasons I would reverse the judgment of the district court that determined that there was no subject matter jurisdiction under *Rule 12(b)(1)* and that the Complaint failed to state a claim for which relief could be granted under *Rule 12(b)(6)*.

With respect, I dissent.

End of Document

---

[15] Rather, this case resembles one Justice Holmes described concerning the product and geographic scope of a domestic meat packing monopoly in 1905: "The scheme alleged is so vast that it presents a new problem in pleading . . . . Its size makes the violation of the law more conspicuous, and yet the same thing makes it impossible to fasten the principal fact to a certain time and place." *Swift & Co. v. United States, 196 U.S. 375, 395, 49 L. Ed. 518, 25 S. Ct. 276 (1905)*. Like Justice Holmes, I conclude here that

> the scheme as a whole seems to . . . be within the reach of the law. The constituent elements . . . are enough to give the scheme a body and, for all that we can say, to accomplish it. . . . Although the combination alleged embraces restraint and monopoly of trade within a single State, its effect upon commerce among the States is not accidental, secondary, remote, or merely probable . . . .

Id. at 396-397.

Jung v. Ass'n of Am. Med. Colleges

United States District Court for the District of Columbia

August 12, 2004, Decided ; August 12, 2004, Filed

Civil Action No. 02-0873 (PLF)

Reporter
339 F. Supp. 2d 26 *; 2004 U.S. Dist. LEXIS 16099 **; 2004-2 Trade Cas. (CCH) P74,517

PAUL JUNG, M.D., et al., Plaintiffs, v. ASSOCIATION OF AMERICAN MEDICAL COLLEGES, et al., Defendants.

Subsequent History: Subsequent appeal at *Jung v. Ass'n of Am. Med. Colleges, 2005 U.S. App. LEXIS 554 (D.C. Cir., Jan. 11, 2005)*

Affirmed by *Jung v. Ass'n of Am. Med. Colleges, 2006 U.S. App. LEXIS 14079 (D.C. Cir., June 1, 2006)*

Prior History: *Jung v. Ass'n of Am. Med. Colleges, 300 F. Supp. 2d 119, 2004 U.S. Dist. LEXIS 1826 (D.D.C., 2004)*

Disposition: Defendants' motion for judgment on pleadings with respect to 14 defendants that filed answers, granted under *Rule 12(c) of the Federal Rules of Civil Procedure*; with respect to remaining 15 movants, motion treated as motion for failure to state claim under *Rule 12(b)(6)* and granted. All other pending motions denied. Final judgment entered.

15 U.S.C.S. § 37b does not exclude all price-fixing claims related to resident compensation; it only excludes price-fixing claims that allege agreements between two or more institutional defendants to fix resident stipends and other benefits.

Antitrust & Trade Law > Exemptions & Immunities > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > General Overview

HN16[] Antitrust & Trade Law, Exemptions & Immunities

Application of 15 U.S.C.S. § 37b merely forbids invocation of the Graduate Medical Resident Matching Program as evidence in any antitrust suit, including one involving allegations of price-fixing; but price-fixing claims unrelated to the Match Program as described in § 37(b)(3) are not affected.

Governments > Legislation > Interpretation

HN17[] Legislation, Interpretation

Absent a valid constitutional challenge to a law passed by Congress and signed by the President, the responsibility of the courts is to interpret and apply the statute, not to second-guess.

Constitutional Law > Congressional Duties & Powers > Lower Federal Courts

Governments > Courts > Courts of Claims

Constitutional Law > Separation of Powers

HN18[] Congressional Duties & Powers, Lower Federal Courts

Congress is prohibited from prescribing a rule for a decision of a cause in a particular way in cases pending before the judicial department of the government.

Constitutional Law > Congressional Duties & Powers > Lower Federal Courts

Governments > Legislation > Interpretation

Constitutional Law > Separation of Powers

HN19[] Congressional Duties & Powers, Lower Federal Courts

Whatever the precise scope of Klein, later decisions have made clear that its prohibition does not take hold when Congress amends applicable law. When a statute compels changes in the law, not findings or results under old law, it merely amends the underlying law, and therefore is not subject to a Klein challenge.

Governments > Legislation > Interpretation

HN20[] **Legislation, Interpretation**

The title of a statute is of use only when it sheds light on some ambiguous word or phrase in the statute itself.

Constitutional Law > Separation of Powers

Governments > Legislation > Interpretation

HN21[] **Constitutional Law, Separation of Powers**

The line between a statute that provides the standard to which courts must adhere and a statute that compels a specific result in a pending action at times is difficult to draw.

Antitrust & Trade Law > Exemptions & Immunities > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > General Overview

HN22[] **Antitrust & Trade Law, Exemptions & Immunities**

15 U.S.C.S. § 37b precludes both claims challenging the antitrust status of the Graduate Medical Resident Matching Program itself, and the consideration of evidence related to the Match Program in actions brought under the antitrust laws.

Constitutional Law > Bill of Rights > Fundamental Rights > Eminent Domain & Takings

HN23[] **Fundamental Rights, Eminent Domain & Takings**

Plaintiffs have no property interest in their pending claim. Causes of actions only become actionable property interests upon the entry of final judgment.

Constitutional Law > Bill of Rights > Fundamental Rights > Eminent Domain & Takings

HN24[] **Fundamental Rights, Eminent Domain & Takings**

It is a denial of due process to create a cause of action in which parties have a property right and then to allow the state to take that right away without providing the party with any judicial forum.

Antitrust & Trade Law > Exemptions & Immunities > General Overview

Constitutional Law > Bill of Rights > Fundamental Rights > Eminent Domain & Takings

Healthcare Law > Healthcare Litigation > Antitrust Actions > General Overview

HN25[] **Antitrust & Trade Law, Exemptions & Immunities**

15 U.S.C.S. § 37b does not deny plaintiffs a forum in which to bring their claim. Instead, the statute restricts the basis for an antitrust cause of action, which is not an unconstitutional restriction so long as there is a rational basis for the law.

Constitutional Law > Bill of Rights > Fundamental Freedoms > Freedom to Petition

HN26[] **Fundamental Freedoms, Freedom to Petition**

The constitutional right of access is predicated on the existence of an underlying claim, however. If the cause of action no longer exists, the right to access cannot save the claim.

Constitutional Law > Bill of Rights > Fundamental Freedoms > Freedom to Petition

HN27[] **Fundamental Freedoms, Freedom to Petition**

Whether an access claim turns on a litigating opportunity yet to be gained or an opportunity already lost, the very point of recognizing any access claim is to provide some effective vindication for a separate and distinct right to seek judicial relief for some wrong. However unsettled the basis of the constitutional right of access to courts, the cases rest on the recognition that the right is ancillary to the underlying claim, without which a plaintiff cannot have suffered injury by being shut out of court.

Constitutional Law > Congressional Duties & Powers > Commerce Clause > General Overview

Governments > Legislation > Interpretation

HN28[] **Congressional Duties & Powers, Commerce Clause**

There is a strong deference accorded legislation in the field of national economic policy, and Congress has considerable leeway to fashion economic legislation.

Constitutional Law > ... > Fundamental Rights > Procedural Due Process > Scope of Protection

Governments > Legislation > Interpretation

HN29[] **Procedural Due Process, Scope of Protection**

Legislative acts adjusting the burdens and benefits of economic life come to a court with a presumption of constitutionality, and the burden is on one complaining of a due process violation to establish that a legislature has acted in an arbitrary and irrational way.

Antitrust & Trade Law > Exemptions & Immunities > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Healthcare Law > Healthcare Litigation > Antitrust Actions > General Overview

HN30[] **Antitrust & Trade Law, Exemptions & Immunities**

See *15 U.S.C.S. § 37b(a)(1)(E)*.

Governments > Legislation > Effect & Operation > Prospective Operation

Governments > Legislation > Effect & Operation > General Overview

Governments > Legislation > Effect & Operation > Retrospective Operation

HN31[] **Effect & Operation, Prospective Operation**

A court must ask whether the retroactive application of a statute is supported by a legitimate legislative purpose furthered by rational means.

Constitutional Law > Equal Protection > Nature & Scope of Protection

Governments > Legislation > Interpretation

Constitutional Law > Equal Protection > General Overview

Constitutional Law > Equal Protection > Judicial Review > Standards of Review

HN32[] **Equal Protection, Nature & Scope of Protection**

In areas of social and economic policy, a statutory classification that neither proceeds along suspect lines nor infringes fundamental constitutional rights must be upheld against equal protection challenge if there is any reasonably conceivable state of facts that could provide a rational basis for the classification. Where there are plausible reasons for Congress' action, a court's inquiry is at an end.

Constitutional Law > Equal Protection > Judicial Review > Standards of Review

Governments > Legislation > Interpretation

HN33[] **Judicial Review, Standards of Review**

Rational-basis review in equal protection analysis is not a license for courts to judge the wisdom, fairness, or logic of legislative choices. Courts are compelled under rational-basis review to accept a legislature's generalizations even when there is an imperfect fit between means and ends.

Judges: PAUL L. FRIEDMAN, United States District Judge.

Opinion by: PAUL L. FRIEDMAN

Opinion

[*31] This matter is before the Court for consideration of Defendants' Motion for Judgment on the **[**3]** Pleadings. Plaintiffs in this putative class action are medical school graduates currently or formerly enrolled in resident physician "residency" programs. The defendants can be categorized into two groups: the organizational defendants (organizations and associations that participate in the administration of graduate medical education in the United States) and the institutional defendants (universities, medical schools, foundations, hospitals, health systems and medical centers that sponsor medical residency programs). Plaintiffs filed suit charging that the defendants have violated Section 1 of the Sherman Act, *15 U.S.C. § 1*. Specifically, plaintiffs allege that the defendants have contracted, combined and conspired among themselves to "displace competition in the recruitment, hiring, employment and compensation of resident physicians, and to impose a scheme of restraints which have the purpose and effect of fixing, artificially depressing, standardizing and stabilizing resident physician compensation and other terms of employment." Complaint ("Compl.") P2.

On February 11, 2004, the Court issued an Opinion and Order addressing certain defendants' motions to **[**4]** dismiss this action on various grounds. See *Jung v. Association of American Medical Colleges, 300 F. Supp. 2d 119 (D. D.C. 2004)* ("February 11 Opinion and Order"). After the Court issued this Opinion and Order, Congress enacted and President George W. Bush signed into law the Pension Funding Equity Act of 2004, *Pub. L. No. 108-218, 118 Stat. 596* (2004), which includes a provision entitled "Confirmation of Antitrust Status of Graduate Medical Resident Matching Programs," an amendment to the antitrust laws that has been codified as *15 U.S.C. § 37b*. Certain defendants now move under *Rule 12(c) of the Federal Rules of Civil Procedure* for judgment on the pleadings on the ground that the action must be dismissed in light of this new legislation which creates or confirms an antitrust exemption for graduate medical education residency matching programs.

I. BACKGROUND

A. Plaintiffs' Allegations

In their class action complaint in this case, plaintiffs assert that there are three intertwining prongs to the antitrust conspiracy they allege. The first prong of the alleged conspiracy concerns the annual assignment **[**5]** of fourth-year medical students to the institutional defendants' residency **[*32]** programs by the National Resident Matching Program ("NRMP"). The NRMP, an Illinois not-for-profit corporation, is managed and operated by defendant American Association of Medical Colleges ("AAMC") from AAMC's principal office in Washington, D.C. See Compl. P15. The AAMC also is an Illinois not-for-profit corporation, whose membership includes all 125 accredited medical schools, including those medical schools named in the complaint, and approximately 375 major teaching hospitals and health systems, some of which also are named in the complaint. These hospitals and health systems are member hospitals of a subsection of the AAMC, the Council of Teaching Hospitals and Health Systems ("COTH") Section. See id. P17.

Plaintiffs further allege that in order to effectuate the assignment, or the "Match," as it is commonly called, prospective medical residents enter into contracts with and submit to the NRMP a ranked list of desired medical resident positions with various institutions ("Student Match Contract"). The institutions themselves also enter into contracts with the NRMP and submit ranked lists of the **[**6]** medical students whom they are interested in hiring ("Institutional Match Contract"). On a date certain, the NRMP through an algorithm "matches" the students' lists against the institutions' rankings, resulting in the assignment of each prospective medical resident to one residency program. See Compl. PP 15, 83-86. Plaintiffs allege that this system eliminates a free and competitive market and substitutes a centralized, anticompetitive allocation system that assigns prospective resident physicians to a single, specific and mandatory residency program. Plaintiffs further allege that the defendants designed and implemented this system and collectively agreed to comply with it in violation of the antitrust laws. See id. P83.

Several specific features of this assignment system allegedly serve to impose anticompetitive restraints on medical residency hiring. Plaintiffs allege that a medical student is required to enter into the Match if he or she wishes to gain employment in a residency program accredited by defendant Accreditation Council for Graduate Medical Education ("ACGME"). See Compl. P71. An individual's participation in an ACGME-accredited residency program in turn **[**7]** allegedly is a prerequisite for specialty certification by a member board of defendant American Board of Medical Specialties ("ABMS"), an Illinois not-for-profit corporation consisting of 24 recognized medical specialty certification boards, upon completion of the residency. See id. PP 20, 69. Plaintiffs allege that eventual specialty certification by an ABMS board is considered critical to prospective residents inasmuch as they desire to be "certified" to practice within a specialty following the completion of their residencies. The practical effect of this structure, plaintiffs charge, is that the vast majority of medical students are compelled to participate in the Match, which is a substitute for all aspects of competitive individual negotiations and requires applicants to commit contractually to any assigned position as a condition of enrolling in the Match Program. See id. PP 69, 86. Furthermore, certain implementing policing mechanisms of the Match allegedly compel compliance with the foregoing restraints. These alleged mechanisms include the requirement that program participants immediately report suspected policy violations to the NRMP and advise the relevant organizational **[**8]** authorities of institution or resident physician violations. See id. P86(c).

In the second prong of the alleged conspiracy, plaintiffs assert that certain aspects of the aforementioned ACGME accreditation standards, with which the **[*33]** institutional defendants allegedly voluntarily comply, function to further restrict residency employment. Specifically, plaintiffs allege that the ACGME (1) has the authority to regulate the number of employment positions in a residency program; (2) imposes substantial obstacles to the ability of a resident to transfer employment from one employer to another during the period of a residency, thereby effectively making NRMP assignments permanent for the duration of a residency; (3) encourages and/or requires participation in the Match by an institution as a condition of accreditation; and (4) directly reviews compensation and other terms of employment with the purposes of fixing and depressing them. See Compl. P88.

The third prong of the alleged conspiracy concerns the exchange by defendants of information on resident compensation and other terms of employment through surveys and databases that plaintiffs allege has the purpose and effect of standardizing **[**9]** and stabilizing compensation and other terms of employment. See Compl. PP 73-

82. This exchange allegedly occurs in two ways. First, the AAMC annually surveys members of its COTH Section seeking compensation levels for the employment year, aggregates the results into various categories and distributes its findings in an annual report (the "COTH Survey" or "Survey"). See id. PP 74-79. Second, hospitals and health systems access similar information through an electronic database known as the Fellowship and Residency Electronic Interactive Database ("FREIDA"), which is maintained by defendant American Medical Association ("AMA"). See id. P80. Plaintiffs allege that this exchange of information allows institutional defendants to fix resident salaries and benefits each year at depressed, anticompetitive levels.

Plaintiffs charge that the execution of the Match program, the enforcement of the ACGME-accreditation standards, and the coordinated collection and distribution of residency program compensation information together produce a significant depression of residents' salaries and working conditions by removing residents' ability to achieve enhanced salaries and working conditions **[**10]** through competition. See Compl. PP 92-96. Plaintiffs allege that defendants have violated *Section 1 of the Sherman Act* by contracting, combining and conspiring to unreasonably restrain trade and commerce. Plaintiffs filed this antitrust action as a proposed class action and have moved to certify both plaintiff and defendant classes. See Motion for Class Certification, filed November 3, 2003.

B. The February 11 Opinion and Order

In its February 11 Opinion and Order, the Court (1) denied certain institutional defendants' motion to dismiss for lack of personal jurisdiction; (2) granted the motion to dismiss for lack of personal jurisdiction of defendants Washington University Medical Center, the American Board of Medical Specialties and the Council of Medical Specialty Societies; (3) denied defendant National Resident Matching Program's motion to dismiss for lack of subject matter jurisdiction under *Rule 12(b)(1) of the Federal Rules of Civil Procedure* and its motion to compel arbitration, and denied the motion to compel arbitration filed by the American Medical Association; (4) denied the motions to dismiss for failure to state a **[**11]** claim upon which relief can be granted filed by the Association of American Medical Colleges and the Accreditation Council for Graduate Medical Education; and (5) granted the motions to dismiss for failure to state a claim filed by the American Hospital Association, the **[*34]** American Medical Association and Yeshiva University.

Specifically, the Court first concluded that it had personal jurisdiction over certain institutional defendants under the "conspiracy theory" of personal jurisdiction. The Court found that plaintiffs adequately had alleged "a conspiracy to depress resident compensation between, *inter alia*, those institutional defendants that participated in the Match and the NRMP" and that certain acts in furtherance of the conspiracy had taken place in the District of Columbia. See *Jung v. Association of American Medical Colleges, 300 F. Supp. 2d at 142*. The Court further concluded that it did not have personal jurisdiction over those moving defendants that plaintiffs had not adequately alleged participated in the conspiracy. See *id. at 143*. Second, the Court denied defendant NRPM's motion to compel arbitration of those elements of the conspiracy **[**12]** claim that concerned the Match, concluding that the Supreme Court's decision in *Continental Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 8 L. Ed. 2d 777, 82 S. Ct. 1404 (1962)*, and its progeny manifested "a clear and compelling countervailing interest in the comprehensive adjudication of conspiracy claims brought under the *Sherman Act*." *Jung v. Association of American Medical Colleges, 300 F. Supp. 2d at 156*. The Court denied the motion of the American Medical Association to compel arbitration on similar grounds. See id.

Third, the Court denied the motions to dismiss for failure to state a claim filed by the Association of American Medical Colleges and the Accreditation Council for Graduate Medical Education, concluding that "plaintiffs adequately have alleged a common agreement to displace competition in the recruitment, hiring, employment and compensation of resident physicians and to impose a scheme of restraints that has the purpose and effect of fixing, artificially depressing, standardizing and stabilizing resident physician compensation and other terms of employment among certain defendants" and that the moving defendants participated in that **[**13]** conspiracy. *Jung v. Association of American Medical Colleges, 300 F. Supp. 2d at 173-74*. In considering the *Rule 12(b)(6)* motions, the Court assessed the conspiracy allegations holistically rather then parsing out and considering those allegations that expressly related to the individual moving defendants. See *id. at 160-61* (citing *Continental Ore Co.*

v. Union Carbide & Carbon Corp., 370 U.S. at 699, and American Tobacco Co. v. United States, 328 U.S. 781, 809, 90 L. Ed. 1575, 66 S. Ct. 1125 (1946)). [1]

C. The New Legislation

On April 10, 2004, President Bush signed into law the Pension Funding Equity Act of 2004, *Pub. L. No. 108-218, 118 Stat. 596* (2004), which includes Section 207 entitled "Confirmation of **[**14]** Antitrust Status of Graduate Medical Resident Matching Programs," now codified as 15 U.S.C. § 37b ("Section 207"). At its core, Section 207 provides that HN1[] "[it] shall not be unlawful under the antitrust laws to sponsor, conduct, or participate in a graduate medical education residency matching program, or to agree to sponsor, conduct, or participate in such a program." 15 U.S.C. § 37b(b)(2) (the "substantive" provision). In addition, HN2[] the statute provides that "evidence of any of the conduct described in the preceding sentence shall not be admissible in Federal **[*35]** court to support any claim or action alleging a violation of the antitrust laws." Id. (the "evidentiary prohibition"). HN3[] The stated purposes of the law are to "confirm that the antitrust laws do not prohibit sponsoring, conducting, or participating in a graduate medical education residency matching program, or agreeing to do so; and …[to] ensure that those who sponsor, conduct or participate in such matching programs are not subjected to the burden and expense of defending against litigation that challenges such matching programs under the antitrust laws." 15 U.S.C. § 37b(a)(2)(A)-(B) **[**15]** . Section 207 HN4[] creates a price-fixing exemption for a certain class of antitrust claims, providing that "nothing in this section shall be construed to exempt from the antitrust laws any agreement on the part of 2 or more graduate medical education programs to fix the amount of the stipend or other benefits received by students participating in such programs." 15 U.S.C. § 37b(b)(3).

Section 207 HN5[] took effect on April 10, 2004, and applies "to conduct whether it occurs prior to, on, or after such date of enactment" and "to all judicial and administrative actions or other proceedings pending on such date of enactment." 15 U.S.C. § 37b(c). Defendants argue that judgment must be entered on their behalf because Section 207 precludes plaintiffs from pursuing their claim in light of the Court's conclusion in the February 11 Opinion and Order that plaintiffs allege a single overarching conspiracy with three interrelated prongs with the Match program at its center. Section 207 requires this conclusion, defendants argue, both by expressly exempting the Match program and its participants from the antitrust laws and by forbidding the consideration **[**16]** of evidence related to any entities' sponsorship, conduct, or participation in a graduate medical education residency matching program, or agreement to sponsor, conduct, or participate in such a program, in support of any antitrust claim. See Defendants' Motion for Judgment on the Pleadings ("Defs. 'Mot.") at 5-6. Defendants further argue that the legislation expressly applies to this action and that the "price-fixing" clause does not save plaintiffs' claim. See id. at 6-7.

II. DISCUSSION

A. Procedural Posture of Defendants' Motion

Plaintiffs first argue that defendants' motion for judgment on the pleadings is premature because fifteen of the moving defendants have not yet answered the complaint. See Plaintiffs' Response Opposing Defendants' Rule 12(c) Motion for Judgment on the Pleadings ("Pls. 'Opp.") at 2-3. Rule 12(c) of the Federal Rules of Civil Procedure states that HN6[] "after the pleadings are closed but within such time as not to delay the trial, any party may move for judgment on the pleadings." FED. R. CIV. P. 12(c). This argument must fail, however, because HN7[] if a party files a **[**17]** Rule 12(c) motion before its answer, the Court may treat it as a motion to dismiss under Rule 12(b)(6) for failure to state a claim. See Dale v. Executive Office of the President, 164 F. Supp. 2d 22, 24 (D. D.C. 2001) (citing Seber v. Unger, 881 F. Supp. 323, 325 n. 2 (N. D. Ill. 1995)); Moran v. Peralta Community College Dist., *825 F. Supp. 891, 894 (N. D. Cal. 1993)* (considering Rule 12(c) motion even though all defendants had not yet answered because otherwise plaintiff could avoid Rule 12(c) motion simply by not serving one defendant).

[1] The Court concluded that plaintiffs failed to allege adequately that defendants AHA, AMA and Yeshiva University participated in the conspiracy. See Jung v. Association of American Medical Colleges, 300 F. Supp. 2d at 173-74.

HN8[] No prejudice to any party results from treating a Rule 12(c) motion as a Rule 12(b)(6) motion because the standard of review for motions for judgment on the pleadings under Rule 12(c) of the Federal Rules of Civil Procedure **[*36]** is essentially the same as that for motions to dismiss under Rule 12(b)(6). See Ramirez v. Dep't of Corrections, 222 F.3d 1238, 1240-41 (10th Cir. 2000); Haynesworth v. Miller, 261 U.S. App. D.C. 66, 820 F.2d 1245, 1254 (D. C. Cir. 1987); Transworld Products Co. v. Canteen Corp., 908 F. Supp. 1, 2 (D. D.C. 1995). **[**18]** On either motion, the Court may not rely on facts outside the pleadings and must construe the complaint in the light most favorable to the non-moving party. See Kowal v. MCI Communications Corp., 305 U.S. App. D.C. 60, 16 F.3d 1271, 1276 (D. C. Cir. 1994). **HN9**[] Granting judgment on the pleadings pursuant to Rule 12(c) or a motion to dismiss for failure to state a claim under Rule 12(b)(6) is warranted only if it appears beyond doubt, based on the allegations contained in the complaint, that "the plaintiff can prove no set of facts in support of his claim which would entitle him to relief." Conley v. Gibson, 355 U.S. 41, 45-46, 2 L. Ed. 2d 80, 78 S. Ct. 99 (1957). See also Alicke v. MCI Communications Corp., 324 U.S. App. D.C. 150, 111 F.3d 909, 912 (D. C. Cir. 1997).

Fourteen of the moving defendants have filed answers. [2] The remaining 15 movants have not filed an answer or a motion to dismiss pursuant to Rule 12(b)(6). **HN10**[] Although certain defendants in this latter group filed motions to dismiss for lack of personal jurisdiction under Rule 12(b)(2), such motions do not preclude them from later filing motions to dismiss for failure to state a claim. **[**19]** See FED. R. CIV. P. 12(g) ("If a party makes a motion under this rule but omits therefrom any defense or objection then available to the party which this rule permits to be raised by motion, the party shall not thereafter make a motion based on the defense or objection so omitted, *except a motion as provided in subdivision (h)(2) hereof on any of the grounds there stated."*) (emphasis added). Rule 12(h)(2) expressly mentions a motion to dismiss for failure to state a claim.

Based on the foregoing authorities, the Court concludes that it is appropriate for it to proceed with consideration of defendants' motion under Rule 12(c) for those defendants that have answered the complaint and under Rule 12(b)(6) for those defendants that have not. The motion is not premature as to any defendant.

B. The Impact of Section 207

Defendants first argue that "Congress **[**20]** has now made clear through Section 207 that it is not unlawful under the antitrust laws to sponsor, conduct, or participate in the Match or to agree to sponsor, conduct or participate in the Match." Defs. 'Mot. at 6. While that may be true, that alone is insufficient because plaintiffs do not allege in their complaint that the existence of and/or participation in the Match is a *per se* violation of the antitrust laws. Instead, plaintiffs argue that the Match, in combination with the dissemination of the COTH Survey and the enforcement of the ACGME accreditation standards, functions to suppress competition in resident hiring and compensation, resulting in depressed salaries and benefits. See Jung v. Association of American Medical Colleges, 300 F. Supp. 2d at 161-62, 167. [3] This is a critical distinction, **[*37]** because, as the Court noted in its February 11 Opinion and Order, **HN11**[] if lawful acts are used as the means to effectuate an antitrust conspiracy, the conspiracy itself is still unlawful. See id. at 160-61. The Supreme Court has concluded that **HN12**[] "it is not of importance whether the means used to accomplish the unlawful objective are in themselves **[**21]** lawful or unlawful. Acts done to give effect to the conspiracy may be in themselves wholly innocent acts. Yet, if they are part of the sum of the acts which are relied upon to effectuate the conspiracy which the statute forbids, they come within its prohibition." American Tobacco Co. v. United States, 328 U.S. at 809. See also Continental Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. at 707 ("acts which are in and of themselves legal lose that character when they become constituent elements of an unlawful scheme."). Accordingly, congressional confirmation that the Match program or participation in the Match program does not constitute a *per se* violation of the antitrust laws in the substantive provision of Section 207 does not defeat plaintiffs' antitrust claim.

---

[2] Contrary to the allegations in plaintiffs' brief, defendants ACGME and AAMC have filed answers to the complaint.

[3] Interestingly, in an effort to make out long-arm jurisdiction, plaintiffs did attempt to suggest at oral argument on defendants' motion to dismiss that the tortious injury (if not the antitrust injury) to plaintiffs was the Match itself but, in view of plaintiffs' complaint, the Court rejected the argument. See Jung v. Association of American Medical Colleges, 300 F. Supp. 2d at 136.

[22]** The second sentence of *Section 207(b)(2)* goes on to provide, however, that ***HN13***[] "evidence of any of the conduct described in the preceding sentence shall not be admissible in Federal court to support any claim or action alleging a violation of the antitrust laws." *15 U.S.C. § 37b(b)(3)*. Defendants argue that this provision prohibits plaintiffs from "using allegations related to the Match to support any antitrust claim, price-fixing or otherwise. Because plaintiffs' 'single' claim depends on evidence that defendant sponsored, conducted, or participated in the Match, *Section 207* is fatal to their complaint, and it should be dismissed." Defs. 'Mot. at 7. Plaintiffs respond to this charge in two ways.

First, plaintiffs argue that "[the February 11 Order and Opinion] upheld plaintiffs' price-fixing conspiracy claim without significant reliance on the allegations regarding the Match." Pls. 'Opp. at 9-10. Accordingly, plaintiffs argue, the evidentiary prohibition does not defeat plaintiffs' claim. In support of this assertion, plaintiffs cite those portions of the February 11 Opinion in which the Court assessed the conspiracy claim as it relates to the AAMC and the **[**23]** ACGME and the allegations regarding the defendants' wage information and exchange and accreditation activities. See id. at 9. They argue that the Court focused not on the Match, but on the other prongs of the alleged conspiracy almost entirely. See id. at 9-10. In so arguing, however, plaintiffs fail to consider that the Court's conspiracy analysis entailed two steps, the first of which relied greatly on allegations related to the Match.

In considering the original *Rule 12(b)(6)* motions, the first question the Court asked was whether plaintiffs adequately had alleged that an antitrust conspiracy existed. In concluding that they had, the Court focused on the highly intertwined, three-pronged nature of the alleged conspiracy, and relied in large part on the primary role the Match allegations played in the conspiracy claim. See *Jung v. Association of American Medical Colleges, 300 F. Supp. 2d at 162* (concluding that "plaintiffs adequately have alleged a common agreement … among a number of the named organizational defendants *and those institutional defendants that participated in the Match Program"*) (emphasis added). In the second prong of the *Rule 12(b)(6)* **[**24]** analysis the Court assessed whether plaintiffs had alleged adequately that the individual defendants participated in the conspiracy. While the Court did then focus on the allegations of the individual defendant at issue -- in the case of the AAMC, the allegations concerning the **[*38]** COTH Survey; with respect to the ACGME, the allegations that related to that defendant's accreditation standards -- such "individualized" analysis does not change the fact that the Court first had concluded that plaintiffs had alleged an intertwining three-pronged conspiracy with the Match at its core. Plaintiffs' assertion that the Court considered the claims of the AAMC and the ACGME without reference to the Match is simply incorrect.

Second, plaintiffs argue that "even without the Match allegations" the complaint satisfies "the three elements of a properly pleaded claim under *Section 1 of the Sherman Act*," Pls. 'Opp. at 10-11, and that even without the Match-related allegations, the complaint still alleges a price-fixing conspiracy. See id. at 11. This argument is unsupported by the complaint that plaintiffs filed in this case, however. The complaint does not allege a price-fixing conspiracy but a single **[**25]** overarching integrated antitrust conspiracy with the Match as its centerpiece. See Compl. PP 3 (alleging three-pronged conspiracy), 58 (defendant class is defined in part by "all NRMP Institutional Participants"), 83-86 (alleging anticompetitive function of Match). Even the allegations that pertain to the ACGME accreditation standards rely in part on Match-related allegations. See id. P88(c) ("the ACGME encourages and/or requires participation in the NRMP as a condition of accreditation"). Plaintiffs' argument also is inconsistent with the Court's characterization of plaintiffs' claim in the February 11 Opinion and Order. See *Jung v. Association of American Medical Colleges, 300 F. Supp. 2d at 161-62*; see *id. at 166-67*. In fact, plaintiff's current position is inconsistent with plaintiffs' own previous position as set forth in their earlier filings. In opposing NRMP's motion to compel arbitration, for example, plaintiffs asserted that they allege:

> a single, overarching conspiracy and the gravamen of plaintiffs' claim against NRMP is that it combined and conspired with others to displace competition in the market for resident services **[**26]** and to fix and stabilize residents' wages. The conspiracy which plaintiffs allege involves conduct significantly beyond particular features of the operation of the match program. While plaintiffs refer to certain conduct related to the operation of the match and its effects as some evidence of how the defendants carry out their overarching conspiracy to depress residents' wages, the complaint makes clear that the anticompetitive conduct related to the Match is not limited solely to the NRMP and that *the anticompetitive conduct related to the match necessarily interrelates with the other anticompetitive conduct alleged* ….

Plaintiffs' Consolidated Brief Opposing Defendants' Motion to Dismiss and to Compel Arbitration at 5 (underscore in original, italics added). See also Plaintiffs' Brief in Support of Their Motion for Certification of a Plaintiff Class and Certification of a Defendant Class at 2, 5.

Finally, while arguing with reference to the allegations related to the other two prongs of the alleged conspiracy that the conspiracy claim is legally sufficient without consideration of the Match-related claims, plaintiffs make no attempt to demonstrate that absent **[**27]** the Match allegations, the Court in fact would have come to the same conclusion that a conspiracy existed based solely on the remaining prongs. Moreover, the burden cannot be on the Court to effectively rewrite the complaint and consider it, as reconfigured, without the central Match-related allegations in order to evaluate plaintiffs' argument here. [4] **[**28]** **[*39]** While there may be a "tree … without the Match limb," Pls. 'Opp. at 14-15, plaintiffs' conclusory argument does not convince the Court that it is so. [5] The Court concludes that the allegations concerning the Match and the institutional defendants' participation in the Match are so interdependent that the Court cannot separate them from the remaining allegations. Because Congress has prevented this or any other Federal court from considering evidence of Match-related conduct, the Court necessarily concludes that plaintiffs' complaint must be dismissed under *15 U.S.C. § 37b(b)(3)*.

C. The "Savings" Clause

Plaintiffs next argue that notwithstanding **[**29]** the "evidentiary" prohibition of *Section 207*, the clause exempting price-fixing claims preserves their complaint. *Section 207* provides that ***HN14***[] "nothing in this section shall be construed to exempt from the antitrust laws any agreement on the part of 2 or more graduate medical education programs to fix the amount of the stipend or other benefits received by students participating in such programs." *15 U.S.C. § 37b(f)*. Plaintiffs interpret this clause to exclude from the antitrust exemption all claims that allege the price-fixing of resident wages, including their own. See Pls. 'Opp. at 23. Plaintiffs construe this exclusion too broadly. *Section 207* ***HN15***[] does not exclude all price-fixing claims related to resident compensation; it only excludes price-fixing claims that allege agreements between two or more institutional defendants to fix resident stipends and other benefits. There is a difference, and plaintiffs' complaint demonstrates that difference. Their pleading does not allege an agreement among residency programs to fix wages paid to residents. It alleges that an agreement exists between institutional defendants and numerous organizational defendants to suppress **[**30]** competition and depress compensation, and the allegations related to the organizational defendants -- the Match Program, the AAMC dissemination of information, and the ACGME accreditation standards -- comprise the heart of plaintiffs' claim. See *Jung v. Association of American Medical Colleges, 300 F. Supp. 2d at 161-62*.

In an attempt to save their claim, plaintiffs also maintain that the Court must conclude that the savings clause is exempt from the evidentiary prohibition of *Section 207*, arguing that the restrictions on the admissibility of certain evidence in *subsection (b)(2)* cannot apply to price-fixing suits provided for in *subsection (b)(3)* because the subsection states that "nothing" in *Section 207* shall provide exemptions **[*40]** from price-fixing claims. See Pls. 'Opp. at 26. Again, plaintiffs misread the statute. Application of the evidentiary provision to the savings clause does

---

[4] Nor would such an endeavor by the Court be consistent with the February 11 Opinion and Order. See *Jung v. Association of American Medical Colleges, 300 F. Supp. 2d at 155* ("conspiracy allegations in antitrust cases cannot be compartmentalized and considered in isolation 'as if they were separate lawsuits, thereby overlooking the conspiracy claim itself'") (quoting *In re Fine Paper Antitrust Litigation, 685 F.2d 810, 822 (3d Cir. 1982))*.

[5] The Court's dismissal of the AMA in the February 11 Opinion and Order is irrelevant. Plaintiffs argue that "the Order shows -- indeed establishes as the law of this case -- that legal failure of one component of defendants' alleged conspiracy may lead to the dismissal of any defendant only involved in that component, but does *not* lead to the dismissal of the defendants involved in the remaining components." Pls. 'Opp. at 13 (emphasis in original). Plaintiffs base this argument on the Court's conclusion that the single allegation regarding the FREIDA database, in the absence of any other allegations relating to AMA participation in the conspiracy, "[did] not lend support to an inference that the AMA participated in the alleged conspiracy." See *Jung v. Association of American Medical Colleges, 300 F. Supp. 2d at 169*. The allegations concerning the Match program, by contrast, permeate the complaint and, as the Court concluded, serve as a cornerstone of the conspiracy. See *id. at 162*.

not function to preclude the excepted price-fixing claims. ***HN16***[] Application of the provision merely forbids invocation of the Match program as evidence in any antitrust suit, including one involving allegations of price-fixing; but price-fixing claims unrelated to the Match as described **[**31]** in *Section 207(b)(3)* are not affected.

D. Constitutional Challenges to Section 207

Plaintiffs understandably are frustrated. They won a significant victory in court; Congress now has snatched it away. As a result, they have spent a significant portion of their brief discussing the "highly peculiar" legislative path *Section 207* took before its passage. Pls' Opp. at 17. They point out that there were no hearings, no testimony, no significant debate, and vigorous opposition from those few Senators and Representatives who cared enough or were importuned enough to focus on the Match legislation. See id. at 16-22. "By furtively attaching the Match Legislation as a rider to an unrelated bill on the eve of imminent passage rather than introducing legislation through normal procedures, defendants were able to avoid public and Congressional awareness and avoid opposition to their scheme." Id. at 21. As Bismarck suggested, "the making of laws, like the making of sausage, is something from which the fastidious person would often be well advised to avert his or her gaze." *ACLU v. Capitol Square Review Advisory Board, 243 F.3d 289, 309 n.21 (6th Cir. 2001)*; *Community Nutrition Institute v. Block, 242 U.S. App. D.C. 28, 749 F.2d 50, 51 (D.C. Cir. 1984)* **[**32]** (same). ***HN17***[] Absent a valid constitutional challenge to a law passed by Congress and signed by the President, however, the responsibility of the courts is to interpret and apply the statute, not to second-guess. See *Mistretta v. United States, 488 U.S. 361, 384, 102 L. Ed. 2d 714, 109 S. Ct. 647 (1989)* ("When this Court is asked to invalidate a statutory provision that has been approved by both Houses of Congress and signed by the President, ... it should only do so for the most compelling constitutional reasons.") (quoting *Bowsher v. Synar, 478 U.S. 714, 736, 92 L. Ed. 2d 583, 106 S. Ct. 3181 (1986)* (Stevens, J., concurring)); *Nuclear Energy Inst., Inc. v. EPA, No. 01-1258, 362 U.S. App. D.C. 204, 373 F.3d 1251, 2004 U.S. App. LEXIS 14186, *144 (D. C. Cir. July 9, 2004)* ("Congress has settled the matter, and we, no less than the parties, are bound by its decision.").

Plaintiffs challenge the constitutionality of *Section 207* on several grounds. Upon consideration of the parties' arguments, the Court concludes that none of plaintiffs' arguments saves plaintiffs' conspiracy claim.

1. Separation of Powers

Plaintiffs charge that interpreting *Section 207* to require disposition of this action in defendants' **[**33]** favor would amount to "a legislative adjudication of this pending case" in violation of "bedrock separation of powers principles" because "Congress may not ... direct decisions in pending cases." Pls. 'Opp. at 28. Plaintiffs rely primarily on the Supreme Court's decision in *United States v. Klein, 80 U.S. 128, 20 L. Ed. 519, 7 Ct. Cl. 240 (1871)*. Klein concerned a suit seeking proceeds from cotton seized from a Confederate sympathizer and sold by the Union army during the Civil War. The petitioner filed the suit pursuant to a federal statute that allowed recovery of seized property by owners if they provided proof of loyalty to the Union, which loyalty, the Court previously had determined, could be proven by evidence of a presidential pardon of the owner for any support he offered to the **[*41]** Southern rebellion. See *id. at 142-43*. The owner of the cotton had received such a pardon. After petitioner had recovered in the Court of Claims, however, Congress passed another statute that precluded the use of any pardons given to those who participated in the rebellion to demonstrate proof of loyalty, and provided that acceptance of such a pardon in fact demonstrated *disloyalty* **[**34]** . Congress also directed that upon presentation of proof of such a pardon, the Court of Claims and the Supreme Court must dismiss the property claim for want of jurisdiction. See *id. at 143-44*.

The Supreme Court found the statute unconstitutional in two respects. First, the Court determined that ***HN18***[] Congress is prohibited from "prescribing a rule for the decision of a cause in a particular way" in cases "pending before [the Judicial department of the government]." *United States v. Klein, 80 U.S. at 146*. As noted, the Court of Claims had already rendered judgment for the claimant, and an appeal had been taken to the Supreme Court. The Supreme Court found the statute at issue unconstitutional because it had the effect of forbidding the Supreme Court (and for the future, the Court of Claims) from "giving effect to the evidence which, in [the Court's] judgment, such evidence should have, and ... direct[ing it] to give it an effect precisely [to] the contrary." *Id. at 147*. In so concluding, the Court distinguished those cases in which "new circumstances" are created under the statute that have the effect of determining the outcome **[**35]** of the case. Id. Second, the statute impaired the effect of the Presidential pardon and therefore infringed upon the constitutional power of the Executive. It was clear to the Supreme Court that "the legislature cannot change the effect of such a pardon any more than the executive can change a law [passed by the legislature]." *Id. at 147-48*. [6]

Plaintiffs argue that the evidentiary prohibition enacted by Congress with respect to the Match cannot stand under Klein because Congress "may not constitutionally **[**36]** assume the judicial function of determining the effect or weight to be given to evidence in a pending case" by altering the rules of decision such that the alteration directs disposition of the action in defendants' favor. [7]See Pls. Opp. at 32. [7] As the D.C. Circuit has noted, "Klein's exact meaning is far from clear." *National Coalition to Save Our Mall v. Norton, 348 U.S. App. D.C. 92, 269 F.3d 1092, 1096 (D. C. Cir. 2001)*. One thing is certain, however, and that is that ***HN19***[] "whatever the precise scope of Klein ... later decisions have made clear that its prohibition does not take hold when Congress 'amends applicable law.'" *Plaut v. Spendthrift Farm, Inc., 514 U.S. 211, 218, 131 L. Ed. 2d 328, 115 S. Ct. 1447 (1995)*. When "a statute 'compels changes in the law, not findings or results under old law, 'it merely amends the underlying law, and therefore is not subject to a Klein challenge." **[*42]** *Imprisoned Citizens Union v. Prasse, 169 F.3d 178, 187 (3d Cir. 1999)* (quoting *Robertson v. Seattle Audubon Society, 503 U.S. 429, 438, 118 L. Ed. 2d 73, 112 S. Ct. 1407 (1992))*. See also *Benjamin v. Jacobson, 124 F.3d 162, 174 (2d Cir. 1997)* **[**37]** ("if legislation can be characterized as changing the underlying law rather than as prescribing a different outcome under pre-existing law, it will not violate the separation of powers principle formulated in Klein").

The Court concludes that by enacting the statute Congress changed the scope of permissible antitrust claims that may be resolved by the Federal courts. Congress exempted from antitrust prosecution all claims that directly challenge the legality of the Match and participation in the Match program by institutional defendants under the antitrust laws, and prohibited the use in antitrust actions of evidence concerning the Match **[**38]** Program and its participants. The plain language of the statute add a new antitrust exemption to the antitrust laws and new procedural or evidentiary restrictions on the prosecution of certain antitrust actions. See *15 U.S.C. § 37b(b)(2)*. [8] This change in or amendment to applicable ***antitrust law*** does not, however, prescribe a different finding, conclusion or result in the outcome of this or any other particular antitrust case. It therefore does not run afoul of Klein.

[39]** ***HN21***[] The line between a statute that provides the standard to which courts must adhere and a statute that compels a specific result in a pending action at times is difficult to draw. See *Benjamin v. Jacobson, 124 F.3d at 174* ("The distinction may in some cases be hard to discern."); *Axel Johnson, Inc. v. Arthur Andersen & Co., 6 F.3d 78, 81 (2d Cir. 1993)* ("The conceptual line between a valid legislative change in law and an invalid act of adjudication is often difficult to draw."). In this case, however, the line is clear, and the fact that *Section 207* has application to actions beyond this lawsuit only bolsters the Court's conclusion that the statute was amended.

---

[6] As later explained by the Supreme Court, the statute at issue in Klein was unconstitutional in two respects: First, "it prescribed a rule of decision in a case pending before the courts, and did so in a manner that required the courts to decide a controversy in the Government's favor." Second, the statute infringed the constitutional power of the President to issue pardons. *United States v. Sioux Nation of Indians, 448 U.S. 371, 404-05, 65 L. Ed. 2d 844, 100 S. Ct. 2716 (1980)*.

[7] Plaintiffs also argue that interpreting the substantive provision of *Section 207* to require the disposition of this lawsuit in defendants' favor is unconstitutional. See Pls. Opp. at 30-31. In light of the Court's conclusion that *Section 207* by its own terms does not direct judgment for defendants, see Section II. B, *supra*, the Court does not reach this argument.

[8] Despite arguments to the contrary, the statute is not merely a confirmation of prior existing law, the titles of *Section 207*, "Confirmation of Antitrust Status of Graduate Medical Resident Matching Programs," and of *subsection (b)(2)*, "Confirmation of Antitrust Status," and the articulated purpose of *subsection (a)(2)(A)* notwithstanding. ***HN20***[] "The title of a statute '[is] of use only when [it] sheds light on some ambiguous word or phrase' in the statute itself." *Carter v. United States, 530 U.S. 255, 267, 147 L. Ed. 2d 203, 120 S. Ct. 2159 (2000)* (quoting *Pennsylvania Dep't of Corrections v. Yeskey, 524 U.S. 206, 212, 141 L. Ed. 2d 215, 118 S. Ct. 1952 (1998)* (internal quotation omitted)) (brackets in original). Here, the statute is unambiguous.

Section 207 **HN22**[] precludes both claims challenging the antitrust status of the Match Program itself, and the consideration of evidence related to the Match Program in actions brought under the antitrust laws. Accordingly, the Court concludes that plaintiffs can find no refuge in Klein and its articulation of the separation of powers doctrine.

2. Unconstitutional Taking

Plaintiffs next argue that dismissal of their complaint under the evidentiary prohibition of Section 207 would constitute an **[**40]** unlawful taking in violation of the Fifth Amendment. Specifically, plaintiffs argue that with dismissal they will lose their property interest in their future wages and working conditions. See Pls. 'Opp. at 36. These lost increased wages and bettered working conditions can only be considered "lost," however, if plaintiffs succeed in this action and wages in fact are increased. Otherwise, there is no basis on which to assume that compensation would increase in the future. The court of appeals has made it clear that **HN23**[] plaintiffs have no property interest in their pending **[*43]** claim. Causes of actions only become actionable property interests upon the entry of final judgment. *Adams v. Hinchman, 332 U.S. App. D.C. 98, 154 F.3d 420, 424 (D. C. Cir. 1998)* (a cause of action "affords no definite or enforceable property right until reduced to a final judgment"); *Grimesy v. Huff, 876 F.2d 738, 744 (9th Cir. 1989)* ("a party's property right in any cause of action does not rest until a final *unreviewable* judgment is obtained.") (internal quotations and citation omitted) (emphasis in original). Similarly, to the extent that plaintiffs implicitly assert that dismissal **[**41]** of their complaint would constitute a taking in the form of past wage loss stemming from defendants' anticompetitive behavior, those asserted losses likewise are compensable, if at all, only upon entry of a final judgment.

3. Additional Constitutional Arguments

Plaintiffs also argue that dismissal of their antitrust claim through the evidentiary restriction of Section 207 would violate their right to due process, their right to access to the courts and their right to equal protection of the laws. Plaintiffs first raise a due process claim under *Logan v. Zimmerman Brush Co., 455 U.S. 422, 71 L. Ed. 2d 265, 102 S. Ct. 1148 (1982)*, asserting that "exclusion of this concededly relevant evidence would result in summary dismissal of plaintiffs' entire claim at the *pleading* stage," thereby denying them the right to adjudication on the merits. Pls. 'Opp. at 33 (emphasis in original). The Supreme Court in Logan did not conclude that litigants have a due process right to an adjudication on the merits, however. Instead, the Court concluded that **HN24**[] it was a denial of due process to create a cause of action in which parties have a property right and then to allow the state to take that right **[**42]** away without providing the party with any judicial forum. See *id. at 429-30*. This case does not present the same situation, and plaintiffs' reliance on *Logan* therefore is misplaced. Section 207 **HN25**[] does not deny plaintiffs a forum in which to bring their claim. Instead, the statute restricts the basis for an antitrust cause of action, which is not an unconstitutional restriction so long as there is a rational basis for the law, as the Court discusses, *infra* at Section II. D. 3.

Plaintiffs similarly argue that the evidentiary prohibition unconstitutionally prescribes their right to access to the courts under the First Amendment. **HN26**[] The constitutional right of access is predicated on the existence of an underlying claim, however. If the cause of action no longer exists, the right to access cannot save the claim. As the Supreme Court concluded in *Christopher v. Harbury, 536 U.S. 403, 153 L. Ed. 2d 413, 122 S. Ct. 2179 (2002)*:

> **HN27**[] Whether an access claim turns on a litigating opportunity yet to be gained or an opportunity already lost, the very point of recognizing any access claim is to provide some effective vindication for a separate and distinct right to seek **[**43]** judicial relief for some wrong. However unsettled the basis of the constitutional right of access to courts, our cases rest on the recognition that the right is ancillary to the underlying claim, without which a plaintiff cannot have suffered injury by being shut out of court.

Id. at 414-15. Here, plaintiffs assert that dismissal of the complaint under Section 207 effectively denies plaintiffs access to the courts to adjudicate their claim. A more proper construction of the effect of the statute is that it effectively eliminates the cause of action in the first instance. Plaintiffs' "access to the courts" argument therefore is misplaced. Whether the congressional act was constitutional is a separate question, to be discussed, *infra* at Section II. D. 3.

[*44] Plaintiffs next argue that the evidentiary prohibition fails to comport with due process because "a special evidentiary rule that applies only to litigants who seek to include in their cases evidence relating to a matching program -- one that applies regardless of the merit of those litigants' claims -- is an archetype of irrational legislation." Pls. 'Opp. at 36. As a preliminary matter, the Court notes **[**44]** that ***HN28***[] there is a "strong deference accorded legislation in the field of national economic policy," *Pension Benefit Guaranty Corp. v. R.A. Gray & Co., 467 U.S. 717, 729, 81 L. Ed. 2d 601, 104 S. Ct. 2709 (1984)*, and "Congress has considerable leeway to fashion economic legislation." *Eastern Enterprises v. Apfel, 524 U.S. 498, 528, 141 L. Ed. 2d 451, 118 S. Ct. 2131 (1998)*. As the Supreme Court has concluded, ***HN29***[] "legislative Acts adjusting the burdens and benefits of economic life come to the Court with a presumption of constitutionality, and … the burden is on one complaining of a due process violation to establish that the legislature has acted in an arbitrary and irrational way." *Eastern Enterprises v. Apfel, 524 U.S. at 524* (quoting *Usery v. Turner Elkhorn Mining Co., 428 U.S. 1, 15, 49 L. Ed. 2d 752, 96 S. Ct. 2882 (1976))*. Accordingly, the Court must assess whether the Congress acted in an arbitrary and irrational way in enacting the evidentiary prohibition of *Section 207*. Upon review of the policies expressly articulated in the statute, the Court concludes that it did not.

Subsection (a) of Section 207 articulates the congressional findings, purposes and intent **[**45]** justifying the exclusion of the Match Program and participation in the Match from the purview of the antitrust laws, both in actions against the program and its participants and in actions that more generally seek to demonstrate violation of the antitrust laws by making allegations concerning the Match. The subsection first references the historical impetus for the creation of the Match, which include a desire for efficiency, for fairness and for protection of students' early years of medical school. See *15 U.S.C. § 37b(a)(1)(A)-(D)*. The statute then provides:

> ***HN30***[] Antitrust lawsuits challenging the matching process, regardless of their merit or lack thereof, have the potential to undermine this highly efficient, pro-competitive, and long-standing process. The costs of defending such litigation would divert the scarce resources of our country's teaching hospitals and medical schools from their crucial missions of patient care, physician training, and medical research. In addition, such costs may lead to abandonment of the matching process, which has effectively served the interests of medical students, teaching hospitals, and patients for over half a century. **[**46]**

15 U.S.C. § 37b(a)(1)(E). The intent behind the enactment of *Section 207* was to secure the continuation of the Match itself, which Congress found is an efficient, valuable placement system, and to protect the financial resources of teaching hospitals and programs from costs of antitrust litigation that concern the Match program. The Court cannot conclude that this protection, effectuated by exempting the Match or its participants from antitrust prosecution, is an irrational or arbitrary act on the part of Congress.

Furthermore, if Congress's specific intent was to prevent use of funds in lawsuits that challenge the Match either directly or indirectly under the antitrust laws, the evidentiary prohibition is a rational means of actualizing that protection of resources. The fact that application of the statute effectively will end this litigation does not make the law irrational or arbitrary. See *National Coalition to Save Our Mall v. Norton, 269 F.3d at 1097* **[*45]** (Congress may enact legislation that affects pending actions so long as it does so by amending the relevant law); *Deck v. Peter Romein's Sons, Inc., 109 F.3d 383, 386 (7th Cir. 1997)* **[**47]** ("Congress' power to effect a change in the law and to make that change controlling as to pending cases is beyond peradventure."); *National Juvenile Law Center, Inc. v. Regnery, 238 U.S. App. D.C. 61, 738 F.2d 455, 465 (D. C. Cir. 1984)* ("Pending cases are often affected by the actions of coordinate branches of government. For instance, the general rule is that, if Congress changes the law while a case is pending, the courts are obligated to apply the law as they find it at the time of judgment (including appellate judgment).").

This reasoning also disposes of any additional argument that retroactive application of the statute to this action violates plaintiffs' due process rights. It cannot be disputed that Congress intended that *Section 207* apply to this action. See *15 U.S.C. § 37b(c)* ("this section … shall apply to all judicial and administrative actions or other proceedings pending on [the] date of enactment"). ***HN31***[] The Court therefore must ask whether "the retroactive application of a statute [is] supported by a legitimate legislative purpose furthered by rational means." *Pension Benefit Guaranty Corp. v. R.A. Gray & Co., 467 U.S. at 729.* **[**48]** The policies articulated by Congress in *Section*

207 (a) ("Findings and Purposes") provide the bases for the conclusion that retroactive application of the statute is a rational means to effect these purposes. With Section 207, Congress intended to protect the Match Program and its participants from the cost of defending antitrust actions that challenge the Match. Clearly, this lawsuit is such an action, and application of the statute to this action accomplishes Congress's goal of conserving the resources of the medical education community. While plaintiffs disagree with many of the "findings" of Congress, particularly because they were made without the benefit of any congressional hearings, see *supra* at Section II. D, and question the policies underlying the statute, the findings themselves are not irrational and there is a rational connection between the findings made and the policies enacted. See *Hammond v. United States, 786 F.2d 8, 13 (1st Cir. 1986)* (plaintiff has not met burden of showing that statute is "arbitrary and irrational in purpose and effect" and not "reasonably related to a legitimate congressional purpose").

Plaintiffs raise a similar claim **[**49]** that Section 207 violates their equal protection rights. As the Supreme Court provided in *FCC v. Beach Communications, Inc., 508 U.S. 307, 124 L. Ed. 2d 211, 113 S. Ct. 2096 (1993)*, however, ***HN32***[] "in areas of social and economic policy, a statutory classification that neither proceeds along suspect lines nor infringes fundamental constitutional rights must be upheld against equal protection challenge if there is any reasonably conceivable state of facts that could provide a rational basis for the classification. … Where there are 'plausible reasons' for Congress' action, 'our inquiry is at an end. '" *Id. at 313* (internal quotations and citations omitted). In the absence of any argument that plaintiffs are members of a suspect class or that their claim asserts infringement of a constitutional right, plaintiffs' equal protection argument fails on the same basis as did their due process claim. See *Calloway v. District of Columbia, 342 U.S. App. D.C. 110, 216 F.3d 1, 8-9 (D. C. Cir. 2000)* (where plaintiffs are not members of suspect class, equal protection challenge is reviewed under rational basis standard); *Hammond v. United States, 786 F.2d at 15* **[**50]** (failing to allege a suspect class, plaintiffs' equal protection argument fails on same basis as due process **[*46]** analysis). And ***HN33***[] "rational-basis review in equal protection analysis 'is not a license for courts to judge the wisdom, fairness, or logic of legislative choices. '… Courts are compelled under rational-basis review to accept a legislature's generalizations even when there is an imperfect fit between means and ends." *Heller v. Doe, 509 U.S. 312, 319, 321, 125 L. Ed. 2d 257, 113 S. Ct. 2637 (1993)* (quoting *FCC v. Beach Communications, Inc., 508 U.S. at 318*).

III. CONCLUSION

For the foregoing reasons, in view of the enactment of Section 207 by Congress, the Court concludes that with respect to the 14 defendants that have filed answers it must grant their motion for judgment on the pleadings under *Rule 12(c) of the Federal Rules of Civil Procedure*, and, with respect to the remaining 15 movants it must treat their motion as a motion for failure to state a claim under *Rule 12(b)(6)* and grant that motion. The Court will deny all other pending motions as moot. [9] A separate Order consistent with this Opinion will issue this same **[**51]** day.

SO ORDERED.

PAUL L. FRIEDMAN

United States District Judge

DATE:

ORDER AND JUDGMENT

For the reasons stated in the separate Opinion issued this same day, it is hereby

ORDERED that the motion for judgment on the pleadings under *Rule 12(c) of the Federal Rules of Civil Procedure* [259] is GRANTED with respect to the 14 defendants that have filed answers; it is

---

[9] Had the Court not granted the instant motion, it would have granted the motion of certain defendants to certify an immediate appeal under *28 U.S.C. § 1292(b)*.

FURTHER ORDERED that with respect to the remaining 15 movants that have not yet filed answers, the motion for judgment on the pleadings shall be treated as a motion to dismiss for failure to state a claim under *Rule 12(b)(6) of the Federal Rules of Civil Procedure*, and it is GRANTED; it is

FURTHER ORDERED that defendant National Resident Matching Program's motion to strike **[**52]** plaintiffs' statement [190] is DENIED as moot; it is

FURTHER ORDERED that defendant National Resident Matching Program's motion to strike plaintiffs' response opposing defendant NRMP's motion for protective order [191] is DENIED as moot; it is

FURTHER ORDERED that the consent motion for entry of a stipulated order on experts' discovery [201] is DENIED as moot; it is

FURTHER ORDERED that plaintiffs' motion for class certification [205] is DENIED as moot; it is

FURTHER ORDERED that defendants' motion to compel class discovery [223], [225] is DENIED as moot; it is

FURTHER ORDERED that plaintiffs' motion to amend or correct order staying class discovery [234] is DENIED as moot; it is

FURTHER ORDERED that plaintiffs' motion for a protective order [235] is DENIED as moot;

FURTHER ORDERED that plaintiffs' amended motion for class certification [238] is DENIED as moot; it is

FURTHER ORDERED that defendant National Resident Matching Program's motion to stay proceedings pending appeal [239] is DENIED as moot; it is

FURTHER ORDERED that certain defendants' motion for a certificate of appealability [241] is DENIED as moot; it is

[*47] FURTHER ORDERED that defendants' **[**53]** motion to stay proceedings pending appeal [243] is DENIED as moot; it is

FURTHER ORDERED that plaintiffs' motion to amend the complaint [248] is DENIED as moot; it is

FURTHER ORDERED that certain defendants' motion to reconsider the *Rule 12(b)(2)* jurisdiction ruling [260] is DENIED as moot; it is

FURTHER ORDERED that judgment on the pleadings is entered for defendants and the case is DISMISSED for failure to state a claim; and it is

FURTHER ORDERED that this Order and Judgment shall constitute a FINAL JUDGMENT in this case. This is a final appealable order. See *Rule 4(a), Fed. R. App. P.*

SO ORDERED.

HN1[] **Inequitable Conduct, Effect of Inequitable Conduct**

Inequitable conduct in the United States Patent and Trademark Office (PTO) requires: (1) a failure to disclose material information to the PTO or the submission of false information to the PTO; done with (2) an intent to deceive the PTO.

Patent Law > Jurisdiction & Review > Subject Matter Jurisdiction > Appeals

Patent Law > ... > Inequitable Conduct > Effect, Materiality & Scienter > General Overview

HN2[] **Subject Matter Jurisdiction, Appeals**

The United States Court of Appeals for the Federal Circuit has stated that there is nothing improper, illegal or inequitable in filing a patent application for the purpose of obtaining a right to exclude a known competitor's product from the market; nor is it in any manner improper to amend or insert claims intended to cover a competitor's product the applicant's attorney has learned about during the prosecution. Any such amendment or insertion must comply with all statutes and regulations, of course, but, if it does, its genesis in the marketplace is simply irrelevant and cannot of itself evidence deceitful intent.

Patent Law > Jurisdiction & Review > Subject Matter Jurisdiction > Appeals

Patent Law > ... > Inequitable Conduct > Effect, Materiality & Scienter > General Overview

HN3[] **Subject Matter Jurisdiction, Appeals**

The United States Court of Appeals for the Federal Circuit decision in Kingsdown stands for the proposition that filing claims with the United States Patent and Trademark Office in order to cover a competitor's product, standing alone, is not a sufficient basis for finding deceitful intent.

HN8[] **Specifications, Description Requirement**

Under *35 U.S.C.S. § 112* the specification shall contain a written description of the invention.

Patent Law > ... > Specifications > Description Requirement > General Overview

HN9[] **Specifications, Description Requirement**

In order to satisfy the written description requirement of *35 U.S.C.S. § 112*, any claims contained in subsequently filed amendments, continuation, or divisional applications must be supported by the original specification.

Patent Law > Jurisdiction & Review > Subject Matter Jurisdiction > Appeals

Patent Law > ... > Inequitable Conduct > Effect, Materiality & Scienter > General Overview

HN10[] **Subject Matter Jurisdiction, Appeals**

The United States Court of Appeals for the Federal Circuit's decision in Kingsdown and its progeny stand for the unremarkable proposition that amending a patent application to cover a competitor's product is not, in and of itself, sufficient to show deceptive intent or bad faith under the patent laws. In addition, the cases stand for the proposition that prosecuting a patent in order to cover a competitor's product is not an illegitimate practice under the patent laws, provided that the patent applicant otherwise complies with the law.

Patent Law > US Patent & Trademark Office Proceedings > Continuation Applications > Copendency & Disclosure

Patent Law > US Patent & Trademark Office Proceedings > Continuation Applications > Divisionals & Restrictions

HN11[] Examinations, Amendments & New Matter

Under *35 U.S.C.S. § 112*, a patent specification must, among other requirements, contain a "written description" of the invention. Under *35 U.S.C.S. § 112*, the specification also must convey with reasonable clarity to those skilled in the art that, as of the filing date, the patent holder was "in possession of the invention" now claimed in the patent. As a corollary, by virtue of *35 U.S.C.S. § 132(a)*, any amendment to a patent application must not contain any "new matter," that is, matter that describes a different invention or adds to or changes the nature of the invention disclosed in the specification. Likewise, to enjoy the priority date of the original application, any continuation or divisional application must also meet these requirements. *35 U.S.C.S. §§ 120* and *121*.

Patent Law > ... > Specifications > Description Requirement > General Overview

HN12[] Specifications, Description Requirement

The purpose of the written description requirement in *35 U.S.C.S. § 112* is to prevent an applicant from later asserting that he invented that which he did not; the applicant for a patent is therefore required to recount his invention in such detail that his future claims can be determined to be encompassed within his original creation.

Patent Law > ... > Specifications > Enablement Requirement > General Overview

Patent Law > ... > Specifications > Description Requirement > General Overview

Patent Law > ... > Specifications > Description Requirement > Standards & Tests

HN13[] Specifications, Enablement Requirement

The written description requirement under *35 U.S.C.S. § 112* requires a patent applicant to convey with reasonable clarity to those skilled in the art that, as of the filing date sought, he or she was in possession of the invention. The invention is, for purposes of the "written description" inquiry, whatever is now claimed.

Patent Law > Jurisdiction & Review > Subject Matter Jurisdiction > Appeals

Patent Law > ... > Inequitable Conduct > Effect, Materiality & Scienter > General Overview

HN14[] Subject Matter Jurisdiction, Appeals

In the background of the United States Court of Appeals for the Federal Circuit's decision in Kingsdown and its progeny is the notion that the patent applicant's observation of the competing product simply occurred in the market. In none of the cases did the patent holder learn of the later-added inventions through its participation in a standard-setting organization.

Patent Law > Jurisdiction & Review > Subject Matter Jurisdiction > Appeals

Patent Law > ... > Inequitable Conduct > Effect, Materiality & Scienter > General Overview

HN15[] **Subject Matter Jurisdiction, Appeals**

In Kingsdown, the United States Court of Appeals for the Federal Circuit circumscribed the rule there announced by explaining that the genesis of an amendment to a patent application in the marketplace is simply irrelevant and cannot of itself evidence deceitful intent. Thus, Kingsdown itself dealt with what is already in the marketplace, not with an industry standard that is under development. More importantly, Kingsdown clearly says that the genesis of the amendment in the marketplace, standing alone, cannot evidence deceitful intent. Kingsdown thus does not foreclose consideration of the effect of the genesis of the idea together with evidence of other conduct, particularly not conduct that is unlawful under applicable statutes. Indeed, Kingsdown makes clear that the amendment must comply with all statutes and regulations. These circumscribing factors are not, in any way, eliminated in the ensuing decisions interpreting Kingsdown.

Patent Law > ... > Inequitable Conduct > Effect, Materiality & Scienter > General Overview

Patent Law > Jurisdiction & Review > Subject Matter Jurisdiction > Appeals

Patent Law > Remedies > General Overview

HN16[] **US Department of Justice Actions, Criminal Actions**

The United States Court of Appeals for the Federal Circuit's decision in Kingsdown stands for the proposition that the patent laws are not offended if a patent applicant amends a pending application to cover a product that it observed in the market. The rule of Kingsdown cannot reasonably be extended to mean that it is appropriate or lawful to amend a pending patent application to secure patents when the act of doing so is part of conduct that violates other non-patent laws, for instance, 15 U.S.C.S. § 2. Otherwise, Kingsdown would operate to give unscrupulous persons an incentive to violate a panoply of civil and criminal laws knowing that the behavior will yield financial success by way of a valid patent. Indeed, such a patent could be sold for a profit to an innocent purchaser for value and thus placed beyond the reach of remedies that would apply to deal with the wrongdoer.

Antitrust & Trade Law > Sherman Act > General Overview

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN17[] **Antitrust & Trade Law, Sherman Act**

The offense of monopoly under *15 U.S.C.S. § 2* has two principal elements: (1) the possession of monopoly power in the relevant market; and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

Patent Law > Subject Matter > General Overview

HN18[] **Patent Law, Subject Matter**

An "open standard" is a standard that a manufacturer can practice without infringing any patents or intellectual property. In other words, a product manufactured in conformance with an open standard is non-royalty bearing.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN19[] **Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints**

Standard-setting organizations (SSOs) allow industry players to meet as a group and exercise influence on their particular industry. It almost goes without saying, therefore, that the collusive atmosphere of an SSO presents a very real opportunity for anticompetitive behavior. Agreement on a product standard is, after all, implicitly an agreement not to manufacturer, distribute, or purchase certain types of products. Accordingly, private standard-setting associations have traditionally been objects of antitrust scrutiny. Nonetheless, because of the need for interoperability in certain industries, SSOs are tolerated.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN20[] **Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints**

Far from being anticompetitive or merely benign, standard-setting organizations (SSOs) generally have beneficial effects on competition. Product uniformity through standardization, especially in technological markets, facilitates the comparison of competing products, which benefits consumers in the short run and provides incentives for engineers to develop the next generation of compatible products, thereby providing longer-term consumer benefits. Likewise, new producers have easier entry into a market when standards exist, thus also increasing competition. In addition, a future product will have the additional benefit of a longer product life if it revolves around an existing standard; a standardized technology core also lowers a company's cost of developing a next generation product. Finally, producers have lower marketing costs in bringing products to a predefined, standardized market. For all these reasons, when they operate correctly, SSOs foster competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN21[] **Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints**

"Interoperability" is simply the ability of one manufacturer's product to interface with other manufacturers' products.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN22[] Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints

The fact remains that standard-setting organizations (SSOs) inherently are rife with opportunities for anticompetitive activity. An SSO affords the potential for industry players to act together and exert their anticompetitive conduct throughout the remainder of the industry. Moreover, even if the SSO itself is not corrupt, the subversion of an SSO by a single industry player or by a limited subset of SSO members can result in anticompetitive outcomes. Thus, ***antitrust law*** historically has been concerned with the risk of one or a small number of participants capturing the economic power of an industry-wide standard and turning the SSO into a source of exclusionary power. Simply put, by hijacking or capturing an SSO, a single industry player can magnify its power and effectuate anticompetitive effects on the market in question.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN23[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

The "rule of reason" requires the finder of fact to weigh the anticompetitive effects of the at-issue conduct against the procompetitive effects the conduct might have had. Stated otherwise, it requires the fact finder to determine whether the challenged conduct, on balance, promotes or suppresses competition.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Scope

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN24[] Exemptions & Immunities, Noerr-Pennington Doctrine

The Noerr-Pennington doctrine holds that a concerted action consisting solely of activity aimed at influencing public officials does not violate the antitrust laws. In other words, it is a *First Amendment* gloss on the antitrust laws.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN25[] Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints

The United States Supreme Court has recognized the obvious fact that, when commandeered by a subset of industry players or, by obvious extension, a single industry player, conduct at a standard-setting organization (SSO) may violate the antitrust laws. Private standard-setting by associations comprising firms with horizontal and vertical relations is permitted at all under the antitrust laws only on the understanding that it will be conducted in a nonpartisan manner offering procompetitive benefits. Thus, if an SSO is conducted (or subverted) in a partisan manner that results in anticompetitive results, such activity may run afoul of the antitrust laws.

Patent Law > ... > Inequitable Conduct > Effect, Materiality & Scienter > General Overview

HN26[] **Inequitable Conduct, Effect, Materiality & Scienter**

The patent statutes and the decisional law implementing them do not exist or operate in isolation. Rather, they are a part of the legal fabric of a society that imposes on its citizens, individual and corporate, other legal constraints that cannot be rendered meaningless or marginalized by the distorted application of a principle of patent law that, in context and in its place, is no doubt valid. Indeed, the patent laws must, and certainly can, coexist with the other statutes that control the conduct of commerce.

Opinion

[*681] MEMORANDUM OPINION

This matter is before the Court on Rambus, Inc.'s ("Rambus") Motion in *Limine* No. 2, to Exclude Evidence or Argument that Plaintiff's **[**2]** Amendment of Patent Claims was Based on Stolen Ideas or was Otherwise Wrongful or Illegal (Docket No. 576). The Defendants are Infineon Technologies AG, Infineon Technologies North America Corporation, and Infineon Technologies Holding North America, Incorporated (hereinafter collectively "Infineon"). By way of this motion in *limine,* Rambus asks the Court to preclude Infineon from introducing evidence or presenting argument that Rambus' amendment of its patent claims was based on ideas acquired from documents produced and discussions conducted during the process of the development of an industry standard by a standard-setting organization, the Joint Electronics Devices Engineering Council ("JEDEC"). Infineon offers that conduct as one component of its proof to show that Rambus violated the federal ***antitrust law***, *15 U.S.C. § 2*, and the California unfair trade practice statute, *Cal. Bus. & Prof. Code § 17200*. Relying on the decision of the United States Court of Appeals for the Federal Circuit in *Kingsdown Med. Consultants, Ltd. v. Hollister, Inc., 863 F.2d 867 (Fed. Cir. 1988)*, and its progeny, Rambus asserts that **[**3]** Infineon is entirely foreclosed from offering such evidence or making any such arguments. [1] For the reasons explained below, the motion *in limine* will be denied.

[1] Quite obviously, if the evidence is not admissible, Infineon cannot present argument about it. Hence, the real issue is whether the evidence is admissible.

STATEMENT OF FACTS

Founded in March 1990, Rambus develops, secures patents on, and licenses technologies to companies that manufacture semiconductor memory devices. Rambus is not a manufacturing company and thus it relies on the licensing of its patent portfolio for revenue.

[*682] In 1990, Rambus filed United States Patent Application Serial Number 07/510,898 (the "898 application") with claims directed to dynamic random access memory, or "DRAM" technology. The United States Patent and Trademark Office ("PTO") determined that the application covered several independent inventions. Consequently, the PTO issued an eleven-way restriction requiring Rambus to elect one invention to pursue in **[**4]** its application. In response, Rambus filed numerous divisional and continuation applications assertedly based on its original application. Thereafter, Rambus was awarded numerous DRAM patents. According to Rambus, these patents are directed to several DRAM-related technologies: Rambus DRAM ("RDRAM"), Synchronous Dynamic Random Access Memory ("SDRAM"), and Double Data Rate Synchronous Dynamic Random Access Memory ("DDR-SDRAM"). [2] Among those patents are the four patents-in-suit: United States Patent Nos. 5,954,804 (the "'804 patent"), 6,034,918 (the "'918 patent"), 5,953,263 (the "'263 patent"), and 6,032,214 (the "'214 patent"). [3] These patents were issued in 1999 and 2000.

[5]** In August 2000, Rambus filed a complaint against Infineon, alleging infringement of all four of those patents. Before trial, the Court issued a Memorandum Opinion pursuant to *Markman v. Westview Instruments. Inc., 52 F.3d 967 (Fed. Cir. 1995)* (en banc), aff'd *517 U.S. 370, 134 L. Ed. 2d 577, 116 S. Ct. 1384 (1996)*, construing the disputed claim terms of the patents-in-suit. Thereafter, Rambus abandoned, before trial, the charge of infringement as to the '804 patent.

Thus, at trial, Rambus proceeded against Infineon as to the '263 patent, the '214 patent, and the '918 patent. During the trial, however, judgment as a matter of law ("JMOL") was granted in Infineon's favor respecting the alleged infringement of those patents. Consequently, a number of Infineon's affirmative defenses and counterclaims were no longer relevant, and therefore, some were abandoned, and others were dismissed without prejudice.

Among the counterclaims that went to verdict were those for actual and constructive fraud. The fraud claims were predicated, in part, on the theory that Rambus had violated certain patent disclosure policies of JEDEC [4] **[**7]** during the process by which JEDEC was establishing **[**6]** an industry standard for SDRAMs and later DDR-SDRAMs. As part of the evidence offered in connection with its fraud claims, Infineon introduced evidence that Rambus attended the JEDEC meetings first to try to get its RDRAM technology adopted as an industry standard and later for the purpose of learning about the proposed DRAM standards being developed there and then using that information to amend its pending patent applications and to file continuation and divisional applications intended to produce patents that, when issued, would encompass any technology made in compliance with the JEDEC **[*683]** SDRAM and DDR-SDRAMs standards. In other words, at trial, Infineon offered evidence that Rambus clandestinely used information that it had acquired at, and in connection with, JEDEC meetings to guide its patent prosecution so as to capture products made pursuant to the JEDEC standard and deliberately waited until

---

[2] These technologies are described in some detail at *Rambus, Inc. v. Infineon Techs. Ag., 318 F.3d 1081, 1085 (Fed. Cir. 2003)*. See also *Rambus, Inc. v. Infineon Techs. AG., 164 F. Supp. 2d 743, 747-48 (E.D. Va. 2001)*. Broadly, a DRAM is a high-speed, shortterm memory device where information being used by the central processing unit of a computer is temporarily stored.

[3] As a result of the 2001 trial of this matter, as well as a motion for summary judgment of noninfringement on remand, the '804 patent and the '214 patent are no longer in play and will not be at issue at the upcoming trial.

[4] JEDEC is affiliated with the Electronics Industries Association ("EIA"). *Rambus, Inc. v. Infineon Techs. AG, 318 F.3d 1081, 1086 (Fed. Cir. 2003)*.

after the DRAM industry had become "locked in" to producing products that complied with the JEDEC SDRAM and DDR-SDRAM standards to announce that the patents it had thusly procured covered the JEDEC standards. [5]

During closing arguments, Infineon's counsel argued, inter alia: "If they had invented it, it would have been in the patent in the first place, but they didn't. They stole it. They stole it from the industry standards bodies." [6] Counsel further argued: "They [Rambus] go to … [JEDEC] meetings, they see the presentations …. They go meet with their patent lawyer, they start amending the claims." [7] And: "Did Rambus attend standards bodies meetings and change their patents to cover what they saw at the standards meetings? You can't reach any other conclusion." [8]

[8]** To rebut this evidence and defuse this line of argument, Rambus proffered a jury instruction based on *Kingsdown Med. Consultants, Ltd. v. Hollister, Inc., 863 F.2d 867 (Fed. Cir. 1988)*. In particular, Rambus offered an instruction based on the following language from that case:

> It should be made clear … that there is nothing improper, illegal or inequitable in filing a patent application for the purpose of obtaining a right to exclude a known competitor's product from the market; nor is it in any manner improper to amend or insert claims intended to cover a competitor's product the applicant's attorney has learned about during the prosecution.

Kingsdown, 863 F.2d at 874.

Finding that the instruction was neither accurate nor complete as respected the facts in evidence, the Court declined to give the jury instruction as tendered. Instead, the Court offered instead to give an instruction based on Kingsdown that made it apparent that, although it is not per se improper to amend patent claims in order to cover a competitor's product, it is not proper to violate the law in the course of obtaining the information that facilitates **[**9]** the amended filings. Specifically, the alternate instruction read as follows:

> It is not improper to amend or add patent claims intended to cover a competitor's product about which the applicant has learned during the prosecution of the patent application, including a continuation or divisional patent application, provided that the claims are supported by the original patent application … [and] provided that the added or amended claims are not based on information obtained by engaging in wrongful conduct.

Rambus, Inc. v. Infineon Techs. AG, 164 F. Supp. 2d 743, 774 (E.D. Va. 2001). Rambus, however, declined the Court's offer to give this alternate instruction. Id.

Ultimately, the jury found Rambus liable on Infineon's counterclaim for actual and constructive fraud. The Court granted **[*684]** Rambus' post-trial motion for JMOL as to the constructive fraud claim and as to that part of the actual fraud verdict that related to the DDR-SDRAM standard of JEDEC. *Rambus, Inc., 164 F. Supp. 2d at 767*. Rambus' post-verdict motion for JMOL on the fraud verdict as it related to the SDRAM standard was denied and judgment was entered on that verdict.

[10]** On appeal, the United States Court of Appeals for the Federal Circuit affirmed in part and reversed in part. *Rambus, Inc. v. Infineon Techs. AG, 318 F.3d 1081, 1106 (Fed. Cir. 2003)*. Respecting the fraud verdict, the court held that the JEDEC patent disclosure policy applied only to patent claims that reasonably read on or covered the standard under consideration by JEDEC and that, although Rambus wanted to obtain claims covering SDRAM standards, it did not in fact obtain any SDRAM patent claims while it was a member of JEDEC. *Rambus, Inc., 318 F.3d at 1103-04*. In reaching this conclusion, the Federal Circuit stated:

---

[5] That same evidence was offered as part of Infineon's monopolization counterclaim that, for reasons not here pertinent, was dismissed without prejudice after JMOL was granted on the claims of Rambus that Infineon had infringed the patents-in-suit. That counterclaim is now back in the case on remand.

[6] Trial Transcript, Vol. VIII, Rambus, Inc. v. Infineon Tech. AG, No. 3:00CV524, May 8, 2001, at 161.

[7] Id. at 74.

[8] Id. at 93.

> The record shows that Rambus's claimed technology did not fall within the JEDEC disclosure duty. The record shows at most that Rambus wanted to obtain claims covering the SDRAM instead. Some of that evidence does not put Rambus in the best light. Rambus thought it could cover the SDRAM standard and tried to do so while a member of an open standards-setting committee. While such actions impeach Rambus's business ethics, the record does not contain substantial evidence that Rambus breached its duty under the EIA/JEDEC policy.

[11]** *Id. at 1104*. The Federal Circuit thereafter set aside the fraud verdict, reversed this Court's construction of five of the disputed claim terms contained in the patents-in-suit, and remanded the case for further proceedings.

The motion in *limine* under consideration is predicated on the fact that, in its Second Amended Answer and Counterclaims ("SAC"), filed after the remand, Infineon again alleges that Rambus improperly acquired the information that it used in amending its applications to secure the patents-in-suit and that the acquisition of that information was a part of Rambus' monopolistic conduct and unfair business practices. For instance, Infineon alleges that:

> Rambus utilized its participation in the JEDEC SDRAM standardization process to learn the direction of the SDRAM standardization, and to learn about the next generation DRAM called DDR-SDRAM. Unbeknownst to JEDEC and its members, Rambus then used that confidential information to amend its existing patent portfolio and to file new patent applications, which were divisions or continuations of its existing pending applications. This allowed Rambus to draft new claims that if interpreted **[**12]** as contended by Rambus covered the very SDRAM standards Rambus was helping JEDEC to standardize, and to cover the next generation DDR-SDRAM chips as well.

SAC, at 30 P94. The SAC states further:

> Rambus was slowly, secretly seeking to acquire an illegal monopoly by: secretly incorporating in its patent applications what it was learning at JEDEC meetings thereby building a patent portfolio to cover JEDEC's SDRAM and later DDR-SDRAM standards.

SAC, at 44 P146. In other words, Infineon continues to allege (and, notably, the evidence of record, if credited by a jury, herein would support a finding) that, after Rambus' efforts to have JEDEC adopt its RDRAM as the industry standard were unsuccessful, Rambus attended JEDEC meetings for the purpose of learning the standards that were to be adopted by the **[*685]** DRAM industry and then steered its patent prosecution in such a way as to encompass products made in compliance with those standards. As proffered by Infineon, these contentions are pertinent to Infineon's counterclaim for monopolization, *15 U.S.C. § 2*, as well as its counterclaim for unfair business practices under *Cal. Bus. & Prof. Code § 17200* **[**13]** . They also are relevant to some of Infineon's defenses.

Now, however, that the Federal Circuit has rejected the finding of fraud on the part of Rambus at JEDEC, Rambus argues that Infineon has no basis for arguing that Rambus' amendment of its patent claims was improper, wrongful, or illegal, whether standing alone or as part of Rambus' other conduct. In other words, by way of its Motion *in Limine* No. 2, Rambus argues that, now that fraud, on which this Court previously distinguished Kingsdown [9] and its

---

[9] In a post-trial Memorandum Opinion rejecting Rambus' contention that the failure to give its proffered Kingsdown instruction was in error, the Court analyzed Kingsdown generally and compared Rambus' proposed instruction with the instruction that the Court had offered to give:

> The distinction offered in the Court's proffered version of the instruction is analogous to the exception mentioned in Kingsdown: "any such amendment or insertion must comply with all statutes and regulations." *Kingsdown, 863 F.2d at 874*. That text teaches that the instruction permitted by Kingsdown cannot be based on information obtained by engaging in wrongful conduct because that conduct is in violation of the law of fraud .... Even though Rambus is allowed, at some general level, to draft claims to cover a competitor's product, it cannot do so when that action would breach a duty it incurred as result of being a member of a standard-setting body. The breach of that duty was based on a failure to disclose pending patent applications, not on Rambus choice to amend its patents.

application to this case is no longer in play, Infineon should be precluded from offering evidence that Rambus acquired, during the JEDEC standard-setting process, the information that it used to acquire its patents and to acquire monopoly power and to violate the unfair business practices law. Rambus also asks that Infineon's counsel be precluded from arguing that Rambus stole the ideas that it used to acquire the patents-in-suit. In sum, says Rambus, any such argument or evidence would run afoul of the rule announced in Kingsdown (as interpreted by Rambus) and would undermine seriously Rambus' right to a fair trial. For the reasons stated below, Rambus' motion *in limine* **[**14]** will be denied.

[15] DISCUSSION**

An understanding of Kingsdown, as well as its progeny, is necessary to resolution of Rambus' motion. Thus, the analysis of the motion will begin with an analysis of Kingsdown, as well as the four subsequent decisions of the Federal Circuit in which the at issue portion of the Kingsdown decision has been applied.

I. The Decision in Kingsdown

Kingsdown Medical Consultants ("KMC") filed a patent infringement action against Hollister, Inc. ("Hollister"), alleging that Hollister had infringed KMC's patents that covered a two-piece colostomy appliance. KMC filed its original application with the PTO in 1978. Over the next **[*686]** six years, a complex prosecution ensued, involving multiple submissions, rejections, amendments, and continuation applications.

At some point during this six year prosecution, KMC's patent attorney saw, apparently in the marketplace, [10] a two-piece colostomy device manufactured by Hollister, a competitor in the market. Thereafter, KMC filed a continuation application. In filing this continuation application, KMC submitted a two-column list, one column listing the claim numbers of twenty-two previously allowed claims and the **[**16]** other column listing the claim numbers of twenty-one new claims in the continuation application that corresponded to those previously allowed claims. In filing this list, however, KMC indicated, incorrectly, that claim 43 in the continuation application corresponded to claim 50 in the parent application (claim 50 in the parent application had already been allowed by the PTO). In reality, claim 43 in the continuation application corresponded to another claim that the PTO previously had rejected for indefiniteness. The PTO did not notice this error; and, eventually, a patent issued as a result of the continuation application. Thereafter, KMC sued Hollister for infringing this patent.

As a defense to KMC's infringement case, **[**17]** Hollister raised the defense of inequitable conduct in the PTO. [11] And, the district court found that, by representing that claim 43 in the continuation application corresponded to allowable claim 50 in the parent application, KMC had provided false information to the PTO. The district court

---

Rambus, Inc. v. Infineon Techs. AG, 164 F. Supp. 2d 743, 775 (E.D. Va. 2001). That discussion reflected the fact that, at trial, the instruction offered by Rambus pertained to only to the fraud claim. Infineon's monopolization claim had been dismissed without prejudice because JMOL had been granted on Rambus' patent infringement claims. See Unpublished Memorandum Opinion, Rambus v. Infineon, 3:00CV524, (E.D. Va. July 21, 2004) (Docket No. 813). The monopolization claim is once again part of the case and, due to amendments on remand, so is a unfair business practices claim under California law. *Rambus, Inc. v. Infineon Techs. AG, 304 F. Supp. 2d 812 (E.D. Va. 2004)*.

[10] The opinion does not specify where the competitor's product was seen. Rather, it says only that the "attorney saw [the competitor's product]." *Kingsdown, 863 F.2d at 870*. Later, however, the opinion refers to "its genesis in the marketplace." *Id. at 874*.

[11] ***HN1***[] Inequitable conduct in the PTO requires (1) a failure to disclose material information to the PTO or the submission of false information to the PTO, done with (2) an intent to deceive the PTO. *J.P. Stevens & Co., Inc. v. Lex Tex Ltd., 747 F.2d 1553, 1559 (Fed. Cir. 1984)*. Pursuant to a motion for summary judgment filed by Rambus, the Court, by way of Memorandum Opinion entered on July 21, 2004, dismissed Infineon's defenses of invalidity and unenforceability of the patents-in-suit for inequitable conduct in the PTO.

further found that KMC had submitted this information with the requisite deceitful intent, in part, because KMC's lawyer had viewed the Hollister device before filing the continuation application.

[18]** On appeal, the Federal Circuit reversed, in part, because it rejected the district court's finding of deceitful intent. In so doing, ***HN2***[] the Court of Appeals stated:

> It should be made clear … that there is nothing improper, illegal or inequitable in filing a patent application for the purpose of obtaining a right to exclude a known competitor's product from the market; nor is it in any manner improper to amend or insert claims intended to cover a competitor's product the applicant's attorney has learned about during the prosecution. Any such amendment or insertion must comply with all statutes and regulations, of course, but, if it does, its genesis in the marketplace is simply irrelevant and cannot of itself evidence deceitful intent.

Kingsdown, 863 F.3d at 874 (citing *State Indus., Inc. v. A.O. Smith Corp., 751 F.2d 1226 (Fed. Cir. 1985))*. [12] ***HN3***[] The Kingsdown **[*687]** decision, therefore, stands for the proposition that filing claims with the PTO in order to cover a competitor's product, standing alone, is not a sufficient basis for finding deceitful intent.

[19] II. Federal Circuit Decisions Subsequent to Kingsdown**

After 1988, the Federal Circuit has returned on four occasions to the part of Kingsdown that is at issue here. First, a year after Kingsdown, the court decided *Texas Instruments, Inc. v. United States Int'l Trade Comm'n, 871 F.2d 1054 (Fed. Cir. 1989)*. Texas Instruments, Inc. ("TII") filed an administrative complaint with the United States International Trade Commission ("ITC") against Samsung Company, Ltd. ("Samsung") for importing into the United States various products which TII alleged to infringe certain of its patents. After a hearing, the administrative law judge ("ALJ") decided, among other things, that certain Samsung products did not infringe United States Patent No. 4,533,843 (the "' 843 patent"). Subsequently, a full commission of the ITC affirmed this ruling. It was this full commission ruling that the parties appealed to the Federal Circuit.

The finding of non-infringement respecting the '843 patent largely obtained because of the ALJ's interpretation of the claim term "selected voltage." In reviewing the ALJ's decision, the Federal Circuit recounted somewhat the prosecution **[**20]** history of the '843 patent, specifically, the insertion of the claim term "selected voltage" by TII during the patent prosecution.

In TII's original patent application, TII did not employ the term "selected voltage," but rather the term "said voltage." *Texas Instruments, Inc., 871 F.2d at 1064*. After, however, TII filed the original application, MOSTEK Electronics ("MOSTEK") began manufacturing a competing product similar to that claimed by TII in its application. Thereafter, seeking broader claim coverage that would reach MOSTEK's competing product, TII filed a continuation application that substituted the words "selected voltage" for "said voltage." In so doing, TII informed the patent examiner that the original specification disclosed this newly claimed technology. Indeed, thereafter, the examiner did not object to the claims as interjecting "new matter" and issued eventually the '843 patent. *Texas Instruments, Inc., 871 F.2d at 1065*; see also *35 U.S.C. § 132* (***HN4***[] "No amendment shall introduce new matter into the disclosure of the invention.") (emphasis added).

The ALJ ruled that, in amending its claims, TII had in fact **[**21]** added "new matter" not supported by the original specification. The ALJ, however, preserved the validity of the claim by construing the amendment which changed "said voltage" to "selected voltage" as limited to a smaller subset of the claimed technology. *Texas Instruments,*

[12] Although not cited by the Federal Circuit in Kingsdown, several district courts courts previously had made similar statements. See *Micro-Acoustics Corp. v. Bose Corp., 493 F. Supp. 356, 367 (S.D.N.Y. 1980)* ("There is nothing wrong with broadening the claims to cover competitive devices about which the applicant … learns after the application is filed, so long as the claims are supported by the specification."); *Penn Yan Boats, Inc. v. Sea Lark Boats, Inc., 359 F. Supp. 948, 954-55 (S.D. Fla. 1972)* ("There is nothing inherently wrong or dishonest in amending claims in a pending application during the course of prosecution before the United States Patent Office in order to insure that the claims which ultimately appear in the issued patent will cover the commercial activity of third parties, whose potentially infringing activities are discovered subsequent to the filing of a patent application, so long as the claims are supported by the original patent application disclosure.").

Inc., 871 F.2d at 1065. The Federal Circuit reversed the ALJ's decision, ruling that, although claims, whenever possible, should be read so as to preserve their validity, the ALJ, in imposing a preserving construction on TII's claim, impermissibly had rewritten the claim in order to add a limitation that the patentee had not included. Id. (***HN5***[] "It was not permissible for the ALJ, in order to preserve the validity of the claims, to rewrite them to add a limitation that the **[*688]** patentee had eliminated … and then to hold that the challenged devices … did not infringe the rewritten claims.").

However, before making that ruling (which is the holding in the case respecting the '843 patent), the Federal Circuit explained TII's conduct and the prosecution history of the '843 patent and then observed:

> Here Texas Instruments broadened the claim during prosecution to cover the competing MOSTEK [product]. **[**22]** It is not "improper to amend or insert claims intended to **[*689]** cover a competitor's product the applicant's attorney has learned about during the prosecution of a patent application."

Id. (quoting *Kingsdown, 863 F.3d at 874*). It is not entirely clear why that statement was made because, at least as respects the '843 patent, the discussion of which contains the foregoing text, [13] TII's conduct in obtaining the patent was not challenged as wrongful. Nonetheless, in Texas Instruments, Inc., albeit in dictum, the Federal Circuit reiterated the Kingsdown language here at issue and indicated again, as a broad proposition relating to patent law, that there is nothing inherently improper in amending patent claims in order to cover competitors' products.

The Federal Circuit next returned to the at-issue **[**23]** Kingsdown language in *Multiform Desiccants, Inc. v. Medzam, Ltd., 133 F.3d 1473 (Fed. Cir. 1998)*, wherein Multiform Desiccants, Inc. ("Multiform") added certain language to its claims during the patent prosecution of the patent-in-suit. Subsequently, in defending against Multiform's claims of patent infringement, Medzam, Ltd. ("Medzam") uncovered evidence supportive of a finding that Multiform had added that language to its claims specifically in order to cover Medzam products of which Multiform had learned during the pendency of its patent application.

The district court entered judgment of non-infringement, finding that Medzam's product did not infringe Multiform's patent. The district court, however, refused to grant Medzam's request for attorneys fees under *35 U.S.C. § 285*, in part, because it rejected Medzam's argument that Multiform acted in bad faith by adding a claim to try to cover Medzam's accused product. *133 F.3d at 1475*. [14] Multiform appealed the finding of non-infringement, and Medzam cross-appealed, inter alia, the trial court's denial of attorneys fees.

[24]** On appeal, the Federal Circuit upheld the district court's finding that Medzam's accused product did not infringe Multiform's patent, either literally or under the doctrine of equivalents. *Multiform Desiccants, Inc., 133 F.3d at 1480-81*. The Court of Appeals also upheld the district court's refusal to grant attorneys fees in Medzam's favor. Among Medzam's asserted bases for an award of attorneys fees was an argument that, in amending its claims, Multiform had engaged in bad faith. The Federal Circuit rejected that contention with a cite to Kingsdown:

> Medzam also argues that it was an act of bad faith for Multiform to add … claims to the '266 patent in an attempt to cover Medzam's products. However, it is neither illegal nor bad faith for an applicant to amend the claims in view of a competitor's product. See Kingsdown … ("Nor is it in any manner improper to amend or insert claims intended to cover a competitor's product the applicant's attorney has learned about during the prosecution.") …

Multiform Desiccants, Inc., 133 F.3d at 1482. Thus, ***HN7***[] in the context of deciding whether a case was "exceptional" for purposes of the **[**25]** awarding of attorney fees under *35 U.S.C. § 285*, the Federal Circuit, in Multiform Desiccants, Inc., reiterated the here at issue Kingsdown language.

---

[13] Texas Instruments, Inc. involved many patents and patent claims and implicated many legal doctrines; the statement quoted above, however, pertains to no other issue in the case.

[14] ***HN6***[] Under *35 U.S.C. § 285*, a "court in exceptional cases may award reasonable attorney fees to the prevailing party" in a patent infringement suit.

In 2002, the Federal Circuit again cited that portion of Kingsdown in deciding PIN/NIP, Inc. v. Platte Chem. Co., 304 F.3d 1235 (Fed. Cir. 2002), wherein Platte Chemical Company ("Platte") alleged that products manufactured by PIN/NIP, Incorporated ("PIN/NIP") infringed multiple claims of a patent to which Platte was an assignee. [15] Among other defenses to these allegations of infringement, PIN/NIP contended that claim 33 of the '912 patent, which Platte alleged PIN/NIP to have infringed, was invalid for failing to satisfy the written description requirement of 35 U.S.C. § 112. PIN/NIP, Inc., 304 F.3d at 1237; see also 35 U.S.C. § 112 (**HN8**[] "The specification shall contain a written description of the invention."). [16] The evidence showed that claim 33 was added after the inventors learned that subsequent to the filing of the initial application, PIN/NIP had publicly disclosed a method for treating potatoes in which the **[**26]** separate chemicals were added in spaced, sequential applications rather than in a mixture.

PIN/NIP argued that claim 33 was invalid under 35 U.S.C. § 112 because the claim extended beyond the invention as described in the originally **[**27]** filed application. PIN/NIP, Inc., 304 F.3d at 1247. Specifically, PIN/NIP asserted that claim 33, which, as mentioned, defined a spaced, sequential application of the utilized chemicals, extended beyond the invention as described in the originally filed specification, which described an application of the chemicals in a unitary mixture. Id. In response, Platte argued that, although claim 33 was admittedly broader than the original application, the subject matter of claim 33 was actually and adequately disclosed in the original specification.

The jury, among other findings not here relevant, agreed with Platte, finding that claim 33 satisfied the written description requirement. On appeal, however, the Federal Circuit reversed this finding, holding that nothing in the specification indicated that the invention claimed anything other than a mixture of chemicals whereas the claim-in-suit described an invention intended to encompass separate unitary applications of the chemicals to the potatoes. The Federal Circuit stated:

> Platte even admits that "claim 33, as written, is arguably broader than the examples disclosed in the '912 patent." While it is legitimate **[**28]** to amend claims or add claims to a patent application purposefully to encompass devices or processes of others, there must be support for such amendments or additions in the originally filed application. See Kingsdown ... ("Nor is it in any manner improper to amend or insert claims intended to cover a competitor's product **[*690]** the applicant's attorney has learned about during the prosecution of a patent application. Any such amendment or insertion must comply with all statutes and regulations, of course, but, if it does, its genesis in the marketplace is simply irrelevant."). In this case, the originally filed application, which is devoid of any mention or even implication that the two chemicals can be applied in a spaced, sequential manner, does not support the later-added claim 33.

PIN/NIP, Inc., 304 F.3d at 1247-48. Thus, in PIN/NIP, Inc., the Court of Appeals took no issue with the fact that the inventor had filed an additional claim apparently based on ideas gained from a competitor's product; rather, it held that the later claim was invalid because the claim lacked support in the specification.

Lastly, earlier this year, the Federal Circuit returned **[**29]** to the pertinent Kingsdown language in Liebel-Flarsheim Co. v. Medrad, Inc., 358 F.3d 898 (Fed. Cir. 2004), wherein the Liebel-Flarsheim Company ("Liebel") alleged that products manufactured by Medrad, Inc. ("Medrad") infringed various of its patents. The patents related to certain methods and devices for use in connection with powered fluid injectors, which are used to inject fluids into patients during medical procedures. Medrad, Inc., 358 F.3d at 900.

---

[15] The patent-in-suit, United States Patent No. 5,622,912 (the "'912 patent") was directed to a composition and method for inhibiting sprout growth in potatoes and other tubers.

[16] As discussed in more detail infra, **HN9**[] in order to satisfy the written description requirement, any claims contained in subsequently filed amendments, continuation, or divisional applications must be supported by the original specification. Cooper Cameron Corp. v. Kvaerner Oilfield Prods., 291 F.3d 1317, 1323 (Fed. Cir. 2002); Lockwood v. Am. Airlines, Inc., 107 F.3d 1565, 1571-72 (Fed. Cir. 1997); Applied Materials v. Advanced Semiconducter Materials Am., 98 F.3d 1563, 1579 (Fed. Cir. 1996) (Mayer, J. concurring).

On summary judgment, the district court granted summary judgment of non-infringement and Medzam appealed. For reasons not here pertinent, the Federal Circuit reversed the summary judgment ruling. However, in an attempt to give meaning to several claim terms, the Federal Circuit, as had the district court, examined the prosecution history of the patents. In so doing, the Federal Circuit noted that, during the pendency of the patent prosecution, Liebel learned about a "jacketless" injector made by Medrad and filed additional claims which omitted any reference to a jacket "in order to encompass Medrad's injector." *Medrad, Inc., 358 F.3d at 909*. Immediately after making this statement, **[**30]** the court dropped a footnote that made reference to Kingsdown:

> The district court recognized that it is not improper for an applicant to broaden his claims during prosecution in order to encompass a competitor's product, as long as the disclosure supports the broadened claims. See Kingsdown … (holding that it is not improper "to amend or insert claims intended to cover a competitor's product the applicant's attorney has learned about during the prosecution of a patent application"). If the disclosure does not support the broadened claims, the applicant will not be accorded priority based on the original disclosure, and the claims may be invalidated.

Medrad, Inc., 358 F.3d at 909 n.2. It is not readily apparent why that language was cited because there was no challenge to the broadened claim. Nonetheless, although again in dictum, the Federal Circuit in Medrad, Inc. reiterated the notion that, as a matter of patent law, there is nothing improper about prosecuting a patent in such a way as to encompass competitors' products.

Understood in the context in which they were decided,***HN10***[] *Kingsdown* and its progeny stand for the unremarkable proposition **[**31]** that amending a patent application to cover a competitor's product is not, in and of itself, sufficient to show deceptive intent or bad faith under the patent laws. In addition, the cases stand for the proposition that prosecuting a patent in order to cover a competitor's product is not an illegitimate practice under the patent laws, provided that the patent applicant otherwise complies with the law. Against this background, it is now appropriate to resolve Rambus' motion *in limine.*

[*691] III. Kingsdown and its Progeny do not Support Rambus' Motion *in Limine*

Rambus contends that, in light of Kingsdown and the other decisions discussed above in DISCUSSION Section II, any proof or argument by Infineon that Rambus "stole," misappropriated, or misused ideas from JEDEC would be improper and would serve solely to inflame unfairly the jury. Also, relying on Kingsdown and its progeny, Rambus argues that, even if Infineon's factual allegations respecting Rambus' conduct at JEDEC are true, those decisions by the Federal Circuit clearly permit the alleged conduct and, therefore, those decisions foreclose the admission of evidence respecting how Rambus acquired the information **[**32]** that it used to secure the patents-in-suit.

To be sure, Rambus agrees that it would be rather odd if the law were to allow patent applicants to misappropriate the ideas and inventions of others and then secure patents on them. According to Rambus, however, the patent law itself provides the sole and sufficient protection against the absurdity of an outcome where an "inventor" is awarded a patent covering an invention acquired wrongfully from someone else. Specifically, Rambus argues that the provisions of *35 U.S.C. §§ 112*,*120*,*121* and*132* foreclose that result, and that, because of Kingsdown, the evidence that Infineon seeks to introduce in support of its monopolization and unfair business practices claims and any of its defenses is likewise foreclosed.

HN11[] Under *35 U.S.C. § 112*, a patent specification must, among other requirements, contain a "written description" of the invention. Under *35 U.S.C. § 112*, the specification also must convey with reasonable clarity **[*692]** to those skilled in the art that, as of the filing date, the patent holder was "in possession of the invention" now claimed in the patent. *Vas-Cath Inc. v. Mahurkar, 935 F.2d 1555, 1560-61 (Fed. Cir. 1991).* **[**33]** As a corollary, by virtue of *35 U.S.C. § 132(a)*, any amendment to a patent application must not contain any "new matter," that is, matter that describes a different invention or adds to or changes the nature of the invention disclosed in the specification. *Regents of Univ. of N.M. v. Knight, 321 F.3d 1111, 1121 (Fed. Cir. 2003)*. Likewise, to enjoy the priority date of the original application, any continuation or divisional application must also meet these requirements. *35 U.S.C. §§ 120*,*121*; see also *Applied Materials v. Advanced Semiconductor Materials Am.., 98 F.3d 1563, 1579 (Fed. Cir. 1996)* (Mayer, J. concurring); *Mahurkar, 935 F.2d at 1560*. [17]

According to Rambus, the requirement of support in the original application for any later-issued claims, along with the prohibition against newly added material, are the **[**34]** mechanisms, and indeed, says Rambus, are the only mechanisms that fetter the conduct of patent applicants when making patent claims. This contention is based largely on the decision in *Amgen Inc. v. Hoechst Marion Roussel, Inc., 314 F.3d 1313 (Fed. Cir. 2003)*, wherein the Federal Circuit explained that:

> ***HN12***[] The purpose of the written description requirement is to prevent an applicant from later asserting that he invented that which he did not; the applicant for a patent is therefore required to recount his invention in such detail that his future claims can be determined to be encompassed within his original creation.

314 F.3d at 1330; see also *Mahurkar, 935 F.2d at 1563-64* (holding that ***HN13***[] the written description requirement requires patent applicant to "convey with reasonable clarity to those skilled in the art that, as of the filing date sought, he or she was in possession of the invention. The invention is, for purposes of the 'written description' inquiry, whatever is now claimed") (emphasis in original).

Rambus, of course, is correct that, as Amgen explains, the patent system itself provides a mechanism **[**35]** to confine patent applicants to the structures of lawful conduct in prosecuting patents and to prevent the outright stealing or misappropriation of inventions. The problem with Rambus' position is that it would leave the above surveyed patent law as the only check on, and remedy for, abuse. At bottom, Rambus reads Kingsdown for the proposition that, so long as any later-added claims are adequately disclosed in the original application, it makes absolutely no difference whether the applicant violated any other law when acquiring the information that is added later. [18] Rambus' contention is wrong for several reasons.

[36]** First, Kingsdown itself simply does not reach to the extreme that Rambus urges. Rather, ***HN15***[] in Kingsdown, the Federal Circuit circumscribed the rule there announced by explaining that the "genesis [of the amendment] in the marketplace is simply irrelevant and cannot of itself evidence deceitful intent." *Kingsdown, 863 F.2d at 874* (emphasis added). Thus, Kingsdown itself dealt with what is already in the marketplace, not with an industry standard that is under development. More importantly, Kingsdown clearly says that the genesis of the amendment in the marketplace, standing alone, cannot evidence deceitful intent. Kingsdown thus does not foreclose consideration of the effect of the genesis of the idea together with evidence of other conduct, particularly not conduct that is unlawful under applicable statutes. Indeed. Kingsdown makes clear that the amendment "must comply with all statutes and regulations." [19] These circumscribing factors are not, in any way, eliminated in the ensuing decisions interpreting Kingsdown. Yet, under Rambus' theory, those factors would no longer circumscribe the application of Kingsdown.

[37]** Second, if given the effect for which Rambus presses, the rule of Kingsdown would lead to absurd results. For instance, under Rambus' theory, if an individual, who has a pending patent application with the PTO, commits

---

[17] Here, all the patents-in-suit claim priority to the '898 application, filed in 1990.

[18] In Kingsdown, and indeed in the subsequent Federal Circuit cases, the Federal Circuit did not discuss in any depth how the patent-applicant learned of the competing product. ***HN14***[] In the background of the cases, however, is the notion that the patent-applicant's observation of the competing product simply occurred in the market. For instance, in PIN/NIP, Inc., the court stated that the inventors filed additional claims after "PIN/NIP had publicly disclosed" a new method. *304 F.3d at 1239*. Similarly, in Kingsdown itself the court recounted that, "Kingsdown's patent attorney saw a two-piece ostomy appliance manufactured by Hollister," *863 F.3d at 870*, suggesting that the lawyer simply viewed a device that had been released into the market. Suffice it to say that, in none of the cases, did the patent holder learn of the later-added inventions through its participation in a standard-setting organization.

[19] Rambus suggests that this means "all patent statutes and regulations." That, however, is not what the Federal Circuit said: the rule is that the amendment "must comply with all statutes and regulations." *863 F.2d at 874* (emphasis added).

industrial espionage, bribery, breaking and entering, or outright threats and intimidation, and thereby obtains concepts that he later uses to amend his patent application, Kingsdown confers legitimacy on the patent that is thereafter issued, and no evidence of those facts can be introduced for any purpose. Transcript of Hearing, Rambus, Inc. v. Infineon Tech. AG, No. 3:00CV524, July 16, 2004, at 7-10. To Rambus, the aggrieved party's remedy **[*693]** lies in the fact that the individual engaging in such conduct could be pursued in a separate action, either civilly or criminally, for the act of bribery, espionage, breaking and entering, or assault. But, according to Rambus, because of Kingsdown, a jury would need to be told that the unlawful methods through which the applicant obtained the concepts underlying the later-added claims cannot be considered in determining whether the ultimately issued patents were valid or for any other purpose legitimately in the **[**38]** case. [20]

[39]** ***HN16***[] Kingsdown stands for the proposition that the patent laws are not offended if a patent applicant amends a pending application to cover a product that it observed in the market. The rule of*Kingsdown* cannot reasonably be extended to mean that it is appropriate or lawful to amend a pending patent application to secure patents when the act of doing so is part of conduct that violates other non-patent laws, for instance, *15 U.S.C. § 2*. Otherwise, Kingsdown, as posited by Rambus, would operate to give unscrupulous persons an incentive to violate a panoply of civil and criminal laws knowing that the behavior will yield financial success by way of a valid patent. Indeed, such a patent could be sold for a profit to an innocent purchaser for value and thus placed beyond the reach of remedies that would apply to deal with the wrongdoer. [21]

[40]** **[*694]** Further, and more importantly for this case, Rambus also argues that Kingsdown establishes the proposition that prosecuting a patent in the PTO in such a way as to cover the products of others can simply never be wrongful or illegal, under any set of facts or precepts of law. And, according to Rambus, that is so even if Infineon proves that Rambus' actions were wrongful and monopolistic under the Sherman Act or an "unfair business practice" under *Cal. Bus. & Prof. Code § 17200*.

The Federal Circuit, however, has never taken such an extreme position. Nor has the Federal Circuit ever held that it is always legitimate, no matter what the factual or legal context, for a patent applicant to add patent claims

---

[20] Although the Court will deny Rambus' motion *in limine,* it may well be that the term "stolen," even under Infineon's theory of the case, is an inappropriate term to use in describing Rambus' conduct. There are disputes of fact respecting whether proposed JEDEC standards were available to non-JEDEC members and whether, and, to what extent, they were to remain confidential. Although it is undisputed that minutes of JEDEC meetings were available to non-JEDEC members, it is unclear what these minutes consisted of. According to Infineon, proposed standards offered at JEDEC were supposed to remain confidential. Regardless, even under Infineon's theory of the case, Rambus did not come into possession of the information wrongly. Rather, as a member of JEDEC, it was entitled to know of the proposed standards; thus, it is difficult to understand how Rambus can be said to have "stolen" the information. In other words, although Infineon uses the term "stolen" in describing Rambus' actions, the import of Infineon's allegations is more that Rambus misappropriated the information learned at JEDEC, using it to guide its patent prosecution in order to effectuate a monopoly and in a way that constituted an unfair business practice. This issue will need to be sorted out after the factual record is developed at trial.

[21] Infineon further argues that its equitable defense of prosecution laches allows it to introduce evidence and argument on Rambus' use of information gleaned at JEDEC in the prosecution of the patents-in-suit. Infineon contends that, notwithstanding Kingsdown, amending a patent application to cover a competitor's product can be pertinent under the doctrine of prosecution laches. See *Webster Elec. v. Splitdorf Elec. Co., 264 U.S. 463, 68 L. Ed. 792, 44 S. Ct. 342, 1924 Dec. Comm'r Pat. 520 (1924)*; *Woodbridge v. United States, 263 U.S. 50, 68 L. Ed. 159, 44 S. Ct. 45, 59 Ct. Cl. 952, 1924 Dec. Comm'r Pat. 534 (1923)*; *Chiron Corp. v. Genentech, Inc., 268 F. Supp. 2d 1139 (E.D. Cal. 2002)*. Specifically, referencing its prosecution laches defense, Infineon contends that Rambus deliberately stood by while the DRAM industry grew up around the JEDEC standards and, as a component of this effort, amended its claims in order to capture the JEDEC standard. There is evidence to support that theory and, interestingly, in response, Rambus does not really argue that Infineon's proposed use of the JEDEC evidence is not probative of its prosecution laches defense. Rather, Rambus challenges the merits of Infineon's prosecution laches defense. Stated otherwise, in responding to Infineon's argument on this score, Rambus more-or-less raises a summary judgment challenge to Infineon's ability to proceed on the defense of prosecution laches. This, of course, is improper. Summary judgment motions have already been filed, briefed, argued, and ruled on. It is simply too late for Rambus to move, especially in stealth form, for summary judgment on Infineon's prosecution laches defense.

covering a competitor's product. Indeed, the court, in Kingsdown itself, held that a patent applicant must, of course, "comply with all statutes and regulations." Accordingly, under the explicit text of Kingsdown, if Rambus' actions violated the Sherman Act or *Cal. Bus. & Prof. Code § 17200*, the general rule of Kingsdown does not protect Rambus. Indeed, an examination of the counterclaims at issue in this case, **[**41]** and Rambus' Kingsdown-based responses thereto, shows the incorrectness of Rambus' interpretation of Kingsdown. [22]

[42]** Third, the factual setting in which the*Kingsdown* text on which Rambus relies is far different than the facts on which this action will be tried. In this case, Infineon proffers Rambus' conduct of attending JEDEC meetings for the purpose of obtaining information to guide its prosecution in the PTO as a component of its monopolization counterclaim and of its unfair business practices counterclaim under *Cal. Bus. & Prof. Code § 17200*. Def. Mem. Regarding Kingsdown, June 18, 2004, at 17. [23] Infineon argues that Rambus' **[*695]** amendment of its patent applications based on information it obtained at JEDEC was part of Rambus' anticompetitive scheme and wrongful acquisition of monopoly power in the worldwide DRAM market. Further, Infineon maintains that Rambus' actions constituted an unlawful business practice under the California statute. And, there is evidence to support those allegations. As the fulsome recounting undertaken above illustrated, Kingsdown and its progeny did not involve alleged violations of such statutes.

[43]** Notwithstanding these distinguishing factors, Rambus asserts that Kingsdown and its progeny forecloses any evidence, or argument, that, by amending its claims in order to cover the JEDEC standards, Rambus was engaged in monopolistic conduct or in an unfair business practice. In other words, Rambus is attempting to use Kingsdown for the proposition that a company, without running afoul of the Sherman Act, Section 17200, or any other law, can join a standard-setting organization ("SSO"), which is dedicated to the adoption of open standards, [24] for the purpose of learning about proposed standards, and then can use the knowledge thereby gained to guide its patent applications with the PTO in order to cover the standards issued by the SSO. Nor, according to Rambus, can such evidence be used in defense of a patent infringement claim.

---

[22] Further, Infineon's non-patent law based counterclaims aside, as a matter of the patent-law regime surveyed above, Rambus' motion *in limine* is misplaced. For instance, under *35 U.S.C. § 112*, the patent specification must "convey with reasonable clarity to those skilled in the art that, as of the filing date [the patent holder] was in possession of the invention." ***Vas-Cath Inc. v. Mahurkar, 935 F.2d 1555, 1563 (Fed. Cir. 1991)***. Here, Infineon asserts (and there is evidence to show) that, as of the filing of the '898 application, Rambus was not in possession of the inventions claimed by the patents-in-suit. Rather, according to Infineon, Rambus only thought to expand its patents to cover those technologies after it learned about them at JEDEC. And, under Federal Circuit decisional law, the evidence that Rambus is here seeking to preclude is probative to the *35 U.S.C. § 112* inquiry. *Gentry Gallery, Inc. v. Berkline Corp., 134 F.3d 1473, 1479 (Fed. Cir. 1998)* ("Finally, although not dispositive, because one can add claims to a pending application directed to adequately described subject matter, Sproule admitted at trial that he did not consider placing the controls outside the console until he became aware that some of Gentry's competitors were so locating the recliner controls. Accordingly, when viewed in its entirety, the disclosure is limited to sofas in which the recliner control is located on the console."). In other words, as a part of its *35 U.S.C. § 112* defense, Infineon, in its attempt to show that Rambus was not in possession of the disputed inventions at the time it filed the '898 application, can offer evidence and argument that, far from disclosing the invention in the '898 application, Rambus in fact only learned of the inventions from its attendance at JEDEC. Thus, as part of its written description defense, Infineon can show that Rambus used information learned at JEDEC to guide its patent prosecution in order to cover technologies that it did not actually invent and that were not disclosed in the '898 application. This fact alone requires denial of Rambus' motion *in limine.*

[23] ***HN17***[] The offense of monopoly under *15 U.S.C. § 2* has two principal elements: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident. *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)*. To the extent that Infineon's *Section 17200* claim is based on the California statute's "unlawful" prong, Infineon's *Section 17200* claim also turns on these two elements.

[24] ***HN18***[] An "open standard" is a standard that a manufacturer can practice without infringing any patents or intellectual property. In other words, a product manufactured in conformance with an open standard is non-royalty bearing.

[44]** There are several problems with Rambus' arguments. Most basically, neither the Kingsdown decision itself, nor any of the subsequent cases, involved facts remotely similar to those presented here. In Kingsdown and the subsequent cases, the Federal Circuit stated that it is not "improper to amend or insert claims intended to cover a competitor's product the applicant's attorney has learned about during the [patent's] prosecution." That, however, according to Infineon's theory of the case and indeed the evidence, is not at all what happened here.

Here, there is evidence to support Infineon's contention that Rambus amended its claims not to cover a "product," but rather to cover a contemplated industry standard with a view toward capturing the entire DRAM market in its patent snare. Moreover, this standard (rather than "product") was not really that of a "competitor," as the Federal Circuit in Kingsdown and its progeny used the term, but was that of an SSO dedicated to the adoption of open standards. In other words, rather than the two manufacturers competing in the market as in*Multiform Desiccants, Inc.,* this case involves an organization of horizontal competitors **[**45]** who were acting in unison to develop an open standard. And, according to Infineon's allegations, this is not a case wherein a patent applicant simply "learned about" a "competitor's product," but rather a situation where a patent applicant joined an SSO, at least in part, for the express purpose of learning about contemplated standards in order to guide its patent prosecution as part of its effort to achieve a monopoly. [25]

In sum, the Kingsdown rule was not made, and has never been applied, in the context of an industry wide standard or an SSO. Rather, Kingsdown and subsequent cases involved the amending of a patent application to add claims intended to cover a single competitor's product of which the **[*696]** applicant had learned by simply monitoring the market.

HN19[] Standard-setting organizations allow industry players to meet as a group and exercise influence on **[**46]** their particular industry. It almost goes without saying, therefore, that the collusive atmosphere of an SSO presents a very real opportunity for anticompetitive behavior. See *Allied Tube & Conduit Corp. v. Indian Head, Inc., 486 U.S. 492, 500, 100 L. Ed. 2d 497, 108 S. Ct. 1931 (1988)* ("Agreement on a product standard is, after all, implicitly an agreement not to manufacturer, distribute, or purchase certain types of products. Accordingly, private standard-setting associations have traditionally been objects of antitrust scrutiny."); *American Soc'y of Mech. Eng'rs v. Hydrolevel Corp., 456 U.S. 556, 571, 72 L. Ed. 2d 330, 102 S. Ct. 1935 (1982)* ("[A] standard-setting organization … can be rife with opportunities for anticompetitive activity."); see also David M. Schneck, Setting the Standard: Problems Presented to Patent Holders Participating in the Creation of Industry Uniformity Standards, 20 Hastings Comm. & Ent. L.J. 641, 655 (1998) ("Standardization involves agreements among horizontal competitors, which draws antitrust scrutiny.").

Nonetheless, because of the need for interoperability [26] in certain industries, SSOs are tolerated. Indeed, ***HN20***[] far from being **[**47]** anticompetitive or merely benign, SSOs generally have beneficial effects on competition. David A. Balto, Standard Setting in the 21st Century Network Economy, 18 No. 6 Computer & Internet L. 5, 7 (2001). Product uniformity through standardization, especially in technological markets, facilitates the comparison of competing products, which benefits consumers in the short run and provides incentives for engineers to develop the next generation of compatible products, thereby providing longer-term consumer benefits. James C. De Vellis, Patenting Industry Standards: Balancing the Rights of Patent Holders with the Need for Industry-Wide Standards, 31 AIPLA Q.J. 301, 316 (2003). Likewise, new producers have easier entry into a market when standards exist, thus also increasing competition. In addition, a future product will have the additional benefit of a longer product life if it revolves around an existing standard; a standardized technology core also lowers a company's cost of developing a next generation product. Finally, producers have lower marketing costs in bringing products to a predefined, standardized market. David M. Schneck, Setting the Standard: Problems **[**48]** Presented to Patent

[25] There are, as mentioned, disputes of fact respecting the general public availability of the proposed JEDEC standards. See supra, footnote 20.

[26] ***HN21***[] "Interoperability" is simply the ability of one manufacturer's product to interface with other manufacturers' products. Mark A. Lemley, *Standardizing Government Standard-Setting Policy for Electronic Commerce, 14 Berkeley Tech. L.J. 745, 746 (1999)*.

Holders Participating in the Creation of Industry Uniformity Standards, 20 Hastings Comm. & Ent. L.J. 641, 642 (1998). For all these reasons, when they operate correctly, SSOs foster competition.

Notwithstanding these benefits, ***HN22***[] the fact remains that SSOs inherently are "rife with opportunities for anticompetitive activity." *American Soc'y of Mech. Eng'rs, 456 U.S. at 571*. An SSO affords the potential for industry players to act together and exert their anticompetive conduct throughout the remainder of the industry. Moreover, even if the SSO itself is not corrupt, the subversion of an SSO by a single industry player or by a limited subset of SSO members can result in anticompetive outcomes. Thus, **[**49]** ***antitrust law*** historically has been concerned with the risk of one or a small number of participants capturing the economic power of an industry-wide standard and turning the SSO into a source of exclusionary power. Simply put, by hijacking or capturing **[*697]** an SSO, a single industry player can magnify its power and effectuate anticompetitive effects on the market in question. That, of course, is what Infineon proposes to prove that Rambus has done.

The decision in *Allied Tube & Conduit Corp. v. Indian Head, Inc., 486 U.S. 492, 100 L. Ed. 2d 497, 108 S. Ct. 1931 (1988)*, is instructive. The National Fire Protection Association ("NFPA") is an SSO which publishes, among other things, the National Electrical Code ("NEC"). The NEC establishes product and performance requirements for the design and installation of electrical wiring systems; these standards are revised every three years. A substantial number of state and local governments routinely adopt the NEC wholesale into law. Moreover, private certification laboratories often will not list or label an electrical product unless it complies with NEC standards. Likewise, many electrical contractors and distributors will not use or sell a product **[**50]** that is not NEC compliant. *Indian Head, 486 U.S. at 496*. For these reasons, it is in a manufacturer's obvious interest to produce NEC compliant goods.

Among the types of products covered by the NEC is "electrical conduit," that is, the hollow tubing used to carry electrical wires through the walls, floors, and ceilings of buildings. In the 1970s, the NEC only certified electrical conduit made of steel. Starting in 1980, however, Indian Head, Inc. ("Indian Head") began offering electrical conduit made of polyvinyl chloride. Thereafter, Indian Head initiated a proposal with NFPA to include polyvinyl chloride conduit as an approved type of electrical conduit in the NEC. Following approval by one of the NFPA's panels, Indian Head's proposal was scheduled for consideration at the 1980 annual NFPA meeting, where it could be rejected or adopted by a simple majority of the members present. *Indian Head, 486 U.S. at 496*.

Allied Tube and Conduit Corporation ("Allied Tube"), which, at that point in time, was the nation's largest producer of steel conduit, became worried that Indian Head's polyvinyl chloride product would cut into its market. Allied Tube, therefore, **[**51]** along with several other electrical conduit manufacturers and distributers, agreed to pack the 1980 NFPA meeting with new members whose only function would be to vote against Indian Head's proposal. Thus, Allied Tube recruited over 150 persons, including employees, executives, sales agents, the agents' employees, and the wife of a sales director, for this scheme. Allied Tube paid for the NFPA memberships for these individuals, as well as for their registration and attendance expenses for the 1980 meeting. The vast majority of these individuals did not have the technical expertise or background necessary to understand the discussions held at the meeting; indeed, none of them spoke at the meeting or participated in any manner save voting. With Allied Tube's ringers in place, Indian Head's proposal was easily defeated. *Indian Head, 486 U.S. at 497*.

Thereafter, Indian Head brought a federal antitrust action alleging that Allied Tube unreasonably had restrained trade in the electrical conduit market in violation of federal law. The jury, instructed under the "rule of reason," [27] found Allied Tube liable. In so finding, the jury returned special interrogatories that, **[**52]** inter alia, Allied **[*698]** Tube had not violated any of NFPA's rules. Nonetheless, the jury indicated that Allied Tube, by packing the meeting, had "subverted" the consensus standard-making process of the NFPA and thereby illegally restrained trade. *Indian Head, 486 U.S. at 498*. The district court, however, overturned this verdict because it found that the

---

[27] ***HN23***[] The "rule of reason" requires the finder of fact to weigh the anticompetive effects of the at-issue conduct against the procompetive effects the conduct might have had. Stated otherwise, it requires the fact finder to determine whether the challenged conduct, on balance, promotes or suppresses competition. *National Soc'y of Prof'l Eng'rs v. United States, 435 U.S. 679, 691, 55 L. Ed. 2d 637, 98 S. Ct. 1355 (1978)*.

NFPA was akin to a governmental legislature and thus Allied Tube's actions were protected under the Noerr-Pennington doctrine. [28]

[53]** On appeal to the United States Court of Appeals for the Second Circuit and later the Supreme Court of the United States, the key issue was whether Allied Tube was entitled to Noerr-Pennington immunity. Ultimately, the Second Circuit, and then the Supreme Court, rejected the district court's holding that the NFPA was akin to a legislature, and held that the district court's application of Noerr-Pennington was in error, as was its attendant reversal of the jury's verdict. *Indian Head, 486 U.S. at 510*.

The Supreme Court's principal holding in Indian Head, which turned on an interpretation of the Noerr-Pennington doctrine, is, of course, not directly relevant to this case. In deciding the case, however, the Court embraced the notion that an entity's conduct at an SSO may run afoul of the antitrust laws even if that entity did not violate the SSO's express rules. *Id. at 509* ("The antitrust validity of these efforts is not established, without more, by petitioner's literal compliance with the rules of the association."). [29] And, addressing SSOs generally, the Court stated that the antitrust laws tolerate SSOs because, when functioning **[**54]** properly, such entities benefit competition. ***HN25***[] The Court, however, recognized the obvious fact that, when commandeered by a subset of industry players or, by obvious extension, a single industry player, conduct at an SSO may violate the antitrust laws:

> Private standard-setting by associations comprising firms with horizontal and vertical relations is permitted at all under the antitrust laws only on the understanding that it will be conducted in a nonpartisan manner offering procompetitive benefits.

486 U.S. at 506-7 (emphasis added). Thus, if an SSO is conducted (or subverted) in a partisan manner that results in anticompetive results, such activity may run afoul of the antitrust laws. *Id. at 511*.

Application of these concepts negates Rambus' arguments that its alleged conduct at JEDEC, **[**55]** if proven, was appropriate or lawful. Rather, if, as Infineon says it can prove, Rambus joined an SSO dedicated to open standards, learned of standards and proposed standards through that membership, and then prosecuted its patents with the PTO to cover the standards, a jury could find that Rambus acted in a profoundly anticompetitive manner. In particular, a jury could find that, by guiding its patent applications to cover the JEDEC standards, Rambus was able to exert a tremendous amount of influence over the unaware DRAM industry; an industry comprised of manufacturers who had developed JEDEC-compliant products **[*699]** in the belief that such products would not be royalty bearing and who, if they wished to remain JEDEC compliant and manufacture the goods they had developed, thus needed to obtain Rambus licenses or suffer prosecution. In other words, a jury could find, on the record evidence if given credence, that Rambus' conduct allowed it to obtain its market power, not through superior products, historical accident, or business acumen, but through unlawful behavior. Any sensible interpretation of *15 U.S.C. § 2* would recognize that this conduct, if proven, is behavior **[**56]** violative of the monopoly law. Similarly, under California jurisprudence, the alleged conduct, if proven, would constitute an unfair business practice under *Cal. Bus. & Prof. Code § 17200*. *Cel-Tech Communications, Inc. v. Los Angeles Cellular Tel. Co., 20 Cal. 4th 163, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (Cal. 1999)*.

Moreover, Rambus' contentions to the contrary notwithstanding, the Kingsdown line of cases says absolutely nothing about the antitrust or unfair business practices liability of a corporate patent applicant which acts to hijack a SSO; the Kingsdown line of cases--all of which were decided solely under the patent law--all involved a patent

[28] ***HN24***[] The Noerr-Pennington doctrine, predicated on the cases of *Eastern R.R. Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 5 L. Ed. 2d 464, 81 S. Ct. 523 (1961)*, and *United Mine Workers of Am. v. Pennington, 381 U.S. 657, 14 L. Ed. 2d 626, 85 S. Ct. 1585 (1965)*, holds that a concerted action consisting solely of activity aimed at influencing public officials does not violate the antitrust laws. *City of Columbia v. Omni Outdoor Advertising, 499 U.S. 365, 379-80, 113 L. Ed. 2d 382, 111 S. Ct. 1344 (1991)*. In other words, it is a *First Amendment* gloss on the antitrust laws.

[29] This, of course, means that, standing alone, the fact that Rambus did not violate JEDEC's patent disclosure policy does not insulate it absolutely from antitrust liability.

holder which amended its application in order to cover a single competitor's product. And, none of those decisions involved alleged monopolistic behavior or conduct alleged to have violated an unfair business practice statute. Hence, neither Kingsdown nor its progeny have been applied to the circumstances or the legal theories at issue in this action.

HN26[] The patent statutes and the decisional law implementing them do not exist or operate in isolation. Rather, they are a part of the legal fabric of a society **[**57]** that imposes on its citizens, individual and corporate, other legal constraints that cannot, as Rambus would have it, be rendered meaningless or marginalized by the distorted application of a principle of patent law that, in context and in its place, is no doubt valid. Indeed, the patent laws must, and certainly can, coexist with the other statutes that control the conduct of commerce. See generally Herbert Hovenkamp, Mark D. Janis, & Mark A. Lemley, Intellectual Property & Antitrust: An Analysis of Antitrust Principles Applied to Intellectual Property Law (2004). In the context of this litigation, appropriate instructions can be crafted to facilitate that kind of coexistence. To be sure, such instructions must be tailored to fit the evidence and to account for the controlling law, patent and otherwise. That effort, of course, is better accomplished later in perspective of the case as it develops at trial. Followed to its conclusion, however, the logic offered by Rambus in support of its motion in *limine* would foreclose completely an outcome wherein patent law is given its rightful holistic place within the law as a whole.

CONCLUSION

For the reasons stated above, **[**58]** the Court declines Rambus' invitation to apply Kingsdown in an extreme manner never authorized by the Federal Circuit and in a way that elevates a valid precept of patent law to a position of jurisprudential primacy for which there is no precedent. Accordingly, Plaintiff's Motion *in Limine* No. 2, to Exclude Evidence or Argument that Plaintiff's Amendment of Patent Claims was Based on "Stolen" Ideas or was Otherwise Wrongful or Illegal (Docket No. 576) will be denied.

The Clerk is directed to send a copy of this Memorandum Opinion to all counsel of record.

It is so ORDERED.

Antitrust & Trade Law > Robinson-Patman Act > Claims

HN2[] Anticompetitive & Predatory Practices, Predatory Pricing

The United States Court of Appeals for the Fifth Circuit follows the United States Supreme Court and other circuits in making a distinction between primary-line injury and secondary-line injury in claims under the Robinson-Patman Act. Primary-line injury occurs at the level of direct competition and customarily results when a seller uses predatory pricing policies to enhance his market position over competitors, thereby diminishing competition and increasing market concentration. Secondary-line injury occurs when a large purchaser uses its vast purchasing power to obtain low prices from the manufacturers or distributors whose products it stocks, thereby enabling it to undersell competitors. A secondary-line injury occurs when competition between favored and disfavored purchasers of a discriminating seller is unlawfully affected. A plaintiff alleging secondary-line injury must prove that a seller made a sale to two different buyers at the same functional level of competition charging different prices to each.

Antitrust & Trade Law > Regulated Practices > Price Discrimination > Buyer Liability

HN3[] Price Discrimination, Buyer Liability

To establish illegal secondary-line price discrimination between purchasers, a plaintiff must prove the following elements by a preponderance of the evidence: (1) sales made in interstate commerce; (2) the commodities sold to the purchaser were of the same grade and quality as those sold to other purchasers; (3) that seller discriminated in price between purchasers; and (4) that the discrimination had a prohibited effect on competition. A plaintiff who meets the above requirements establishes a prima facie case of price discrimination. In addition to the above requirements, the plaintiff has the burden of proving the extent of his actual injuries to recover damages.

Antitrust & Trade Law > Regulated Practices > Price Discrimination > Buyer Liability

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > Secondary & Tertiary Line Injuries

Antitrust & Trade Law > Robinson-Patman Act > Claims

HN4[] Price Discrimination, Buyer Liability

A price discrimination within the meaning of *15 U.S.C.S. § 13(a)* is merely a "price difference." More specifically, price discrimination is defined as charging different buyers different prices for the same items. A plaintiff in a secondary-line injury action must prove actual instances of price discrimination. If the challenged lower price is in fact, and not merely theoretically, made available to the allegedly disfavored purchaser, the seller cannot be held liable under the Robinson-Patman Act.

Antitrust & Trade Law > Robinson-Patman Act > Coverage > General Overview

HN5[] **Robinson-Patman Act, Defenses**

In the context of the Robinson-Patman Act, the "prohibited effect on competition" element is usually defined by courts by directly quoting the language of the statute which says "may be substantially to lessen competition or tend to create a monopoly in any line of commerce, or to injure, destroy, or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination, or with customers of either of them." This language focuses on two general effects under this portion of the Robinson-Patman Act--the effect on the general competitive market and the effect on the individual competitors or the disfavored purchaser. With respect to the effect on the general competitive market, the Robinson-Patman Act does not require that the discrimination in fact have harmed competition. Instead, the Robinson-Patman Act requires the plaintiff show there is a reasonable possibility that the price difference may harm competition. This reasonable possibility of harm is usually referred to as competitive injury. Once the plaintiff proves a discrimination in price, the burden then shifts to the defendant to negate competitive injury. Unless rebutted by one of the Robinson-Patman Act's affirmative defenses, a showing of competitive injury as part of a prima facie case is sufficient to establish a claim under the Robinson-Patman Act.

Antitrust & Trade Law > Regulated Practices > Price Discrimination > Buyer Liability

Antitrust & Trade Law > Robinson-Patman Act > General Overview

Antitrust & Trade Law > Robinson-Patman Act > Claims

Antitrust & Trade Law > Robinson-Patman Act > Remedies > General Overview

Antitrust & Trade Law > Robinson-Patman Act > Remedies > Damages

HN6[] **Price Discrimination, Buyer Liability**

In the context of the Robinson-Patman Act, to recover treble damages, a plaintiff must make some showing of actual injury attributable to something the antitrust laws were designed to prevent. It must prove more than a violation of the Act, since such proof establishes only that injury may result. According to the United States Court of Appeals for the Fifth Circuit, the United States Supreme Court standard requires a plaintiff to demonstrate by a preponderance of the evidence that an actual antitrust violation has caused his damages. The "prohibited effect on competition" element of the prima facie case requires a showing that the discrimination have caused an actual injury to the disfavored purchaser as a prerequisite for recovery under the federal antitrust laws.

Antitrust & Trade Law > Robinson-Patman Act > Claims

Antitrust & Trade Law > Regulated Practices > Price Discrimination > Buyer Liability

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > Secondary & Tertiary Line Injuries

Antitrust & Trade Law > Robinson-Patman Act > Coverage > General Overview

HN7[] **Robinson-Patman Act, Claims**

In the context of the Robinson-Patman Act, causation under the "prohibited effect on competition" element is established by examining two things: whether the favored and disfavored buyers were in actual competition with each other and proof of injury. Thus, to establish competitive injury in a secondary-line case, the disfavored purchaser must prove that it was engaged in actual competition with the favored purchasers at the time of the price discrimination. This actual competition requirement is satisfied by showing the competitors competed at the same functional level and within the same geographic market.

Antitrust & Trade Law > Robinson-Patman Act > Claims

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > Regulated Practices > Price Discrimination > General Overview

Antitrust & Trade Law > Regulated Practices > Price Discrimination > Buyer Liability

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > Secondary & Tertiary Line Injuries

HN8[] **Robinson-Patman Act, Claims**

In the context of the Robinson-Patman Act, to establish illegal secondary-line price discrimination between purchasers, a plaintiff must prove the following elements: (1) sales made in interstate commerce; (2) the commodities sold to the purchaser were of the same grade and quality as those sold to other purchasers; (3) that the seller discriminated in price between purchasers; and (4) that the discrimination had a prohibited effect on competition. A price discrimination within the meaning of *15 U.S.C.S. § 13(a)* is an actual price difference. The "prohibited effect on competition" element of the prima facie case requires that the discrimination have caused an actual injury to the disfavored purchaser. Causation is established by examining whether the favored and disfavored buyers were in actual competition with each other and proof of injury. Actual competition requires that the plaintiff prove a relevant product and geographic market to be defined. Proof of injury to competition is established prima facie by proof of a "substantial" price discrimination between competing purchasers over time.

Antitrust & Trade Law > Robinson-Patman Act > Claims

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > Regulated Practices > Price Discrimination > Buyer Liability

Antitrust & Trade Law > Robinson-Patman Act > General Overview

Antitrust & Trade Law > Robinson-Patman Act > Coverage > General Overview

HN9[] **Robinson-Patman Act, Claims**

In the context of the Robinson-Patman Act, it is well settled that the relevant product and geographic markets must be defined with some degree of precision to enable the trier of fact to determine if federal antitrust laws have been violated.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Evidence > ... > Testimony > Expert Witnesses > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN10[] **Relevant Market, Product Market Definition**

Courts consistently require that expert testimony adequately define the relevant geographic and product markets in antitrust cases.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Evidence > ... > Testimony > Expert Witnesses > General Overview

Antitrust & Trade Law > Robinson-Patman Act > General Overview

HN11[] **Regulated Practices, Market Definition**

Defining a relevant market requires expert identification of both the product at issue and the geographic market for that product.

HN13[] **Robinson-Patman Act, Defenses**

15 U.S.C.S. § 13(b) expressly establishes certain prerequisites for the successful assertion of the meeting competition defense. The seller-defendant has the burden of proving four requirements in order to establish his defense: (1) to rebut the prima facie case thus made by showing that his lower price was made; (2) in good faith; (3) to meet an equally low price; and (4) of a competitor.

Criminal Law & Procedure > Defenses > Burdens of Proof

Evidence > Burdens of Proof > General Overview

HN14[] **Contract Conditions & Provisions, Exculpatory Clauses**

In the context of the Robinson-Patman Act, the meeting competition defense is an absolute defense. The seller has the burden of bringing himself within the exculpating provision of § 2(b), which has been interpreted to afford an absolute defense to a charge of violating § 2(a), notwithstanding the existence of the statutorily prohibited anticompetitive effect. The seller also has the burden of proving the meeting competition defense. Under *15 U.S.C.S. § 13(b)*, the seller charged with a violation has the burden of rebutting a prima facie case of discrimination in price or services or facilities by demonstrating that its lower price or the furnishing of services or facilities to any purchaser or purchasers was made in good faith to meet an equally low price of a competitor, or the services or facilities furnished by a competitor. Courts have held that, to meet its burden, a defendant who knowingly discriminated in price or services or facilities furnished to a customer must demonstrate the existence of facts that would lead a reasonable and prudent person to believe that granting the lower price or service or facility would meet a competitor's equally low price.

Antitrust & Trade Law > Robinson-Patman Act > Defenses

Antitrust & Trade Law > Clayton Act > Defenses

Antitrust & Trade Law > ... > Price Discrimination > Defenses > General Overview

Antitrust & Trade Law > ... > Price Discrimination > Defenses > Meeting Competition Defense

Antitrust & Trade Law > Robinson-Patman Act > Claims

HN15[] **Robinson-Patman Act, Defenses**

When proved, the meeting-competition defense of § 2(b) (*15 U.S.C.S. § 13(b)*) exonerates a seller from Robinson-Patman Act liability. The meeting-competition defense at least requires the seller, who has knowingly discriminated in price, to show the existence of facts which would lead a reasonable and prudent person to believe that the granting of a lower price would in fact meet the equally low price of a competitor. Further, the seller is required show that under the circumstances, it was reasonable to believe that the quoted price or a lower one was available to the favored purchaser or purchasers from the seller's competitors.

Antitrust & Trade Law > ... > Price Discrimination > Defenses > General Overview

HN16[] **Price Discrimination, Defenses**

When demonstrating the reasonableness requirement in the meeting competition defense, in most situations, a showing of facts giving rise to a reasonable belief that equally low prices were available to the favored purchaser from a competitor will be sufficient to establish that the seller's lower price was offered in good faith to meet that price. In others, however, despite the availability from other sellers of a low price, it may be apparent that the defendant's low offer was not a good faith response.

Antitrust & Trade Law > Robinson-Patman Act > Defenses

Antitrust & Trade Law > Clayton Act > Defenses

Antitrust & Trade Law > ... > Price Discrimination > Defenses > General Overview

Antitrust & Trade Law > ... > Price Discrimination > Defenses > Meeting Competition Defense

HN17[] **Robinson-Patman Act, Defenses**

When demonstrating the reasonableness requirement in the meeting competition defense, at the heart of § 2(b) (*15 U.S.C.S. § 13(b)*) is the concept of "good faith." This is a flexible and pragmatic, not a technical or doctrinaire, concept. The standard of good faith is simply the standard of the prudent businessman responding fairly to what he reasonably believes is a situation of competitive necessity. Whether this standard is met depends upon the facts and circumstances of the particular case, not abstract theories or remote conjectures. The strict requirement of good faith is illustrated throughout federal jurisprudence and secondary sources.

Antitrust & Trade Law > Robinson-Patman Act > Defenses

Antitrust & Trade Law > Clayton Act > Defenses

Antitrust & Trade Law > ... > Price Discrimination > Defenses > General Overview

Antitrust & Trade Law > ... > Price Discrimination > Defenses > Meeting Competition Defense

Antitrust & Trade Law > Robinson-Patman Act > General Overview

HN18[] **Robinson-Patman Act, Defenses**

When demonstrating the reasonableness requirement in the meeting competition defense, good faith, rather than absolute certainty, is the key requirement. Thus, as long as the seller acts in good faith, it may even inadvertently undercut the competitor's price without forfeiting this defense. The good faith aspect of the defense can be summarized in the following way: In general, the basic requirement of the § 2(b) (*15 U.S.C.S. § 13(b)*) good faith defense is that the seller's conduct must be a reasonable response to the price discrimination of a competitor; if the seller acts reasonably, good faith will likely be found.

Antitrust & Trade Law > ... > Price Discrimination > Defenses > General Overview

HN19[] **Price Discrimination, Defenses**

When demonstrating the reasonableness requirement in the meeting competition defense, if the seller's actions are inappropriate, unnecessary, or unreasonable with respect to the threat posed by its competitor, the seller is not in good faith and will not be allowed to assert the meeting competition defense.

Antitrust & Trade Law > ... > Price Discrimination > Defenses > General Overview

HN20[] **Price Discrimination, Defenses**

When demonstrating the reasonableness requirement in the meeting competition defense, the "meet and not beat" requirement provides that a seller's response must be defensive, in the sense that the lower price must be calculated and offered in good faith to meet not beat the competitor's low price.

Contracts Law > Contract Formation > General Overview

Contracts Law > Contract Interpretation > General Overview

Contracts Law > Defenses > Ambiguities & Mistakes > General Overview

HN21[] **Contracts Law, Contract Formation**

A contract is an agreement by two or more parties whereby obligations are created, modified, or extinguished. *La. Civ. Code Ann. art. 1906*. A contract has the effect of law between the parties, and courts are bound to give legal effect to the parties' agreements. A contract may be in writing or made orally as long as the law does not require specific form requirements to be met. If the agreement has been reduced to writing, and the words of the contract are clear and explicit and lead to no absurd consequences, no further interpretation may be made in search of the parties' intent. *La. Civ. Code Ann. art. 2046*. This rule does not authorize a perversion of language, or the exercise of inventive powers for the purpose of creating an ambiguity where none exists, nor does it authorize the court to make a new contract for the parties. In fact, courts generally find that the meaning and intent of the parties to a written instrument should be determined within the four corners of the document. Its terms normally cannot be explained or contradicted by extrinsic evidence.

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Integration Clauses

Evidence > Types of Evidence > Documentary Evidence > Parol Evidence

Contracts Law > Breach > Breach of Contract Actions > General Overview

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Oral Agreements

HN22[] Contract Conditions & Provisions, Integration Clauses

In order to sustain a cause of action for breach of an oral agreement for value in excess of $ 500, a party must prove its existence by at least one witness and corroborating circumstances. *La. Civ. Code Ann. art. 1846*.

Contracts Law > Contract Interpretation > Parol Evidence > General Overview

HN23[] Contract Interpretation, Parol Evidence

See *La. Civ. Code Ann. art. 1848*.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Oral Agreements

Evidence > Admissibility > Statements as Evidence > Parol Evidence

Contracts Law > Contract Interpretation > Parol Evidence > General Overview

Contracts Law > Types of Contracts > General Overview

Evidence > Types of Evidence > Documentary Evidence > Parol Evidence

HN24[] Types of Contracts, Oral Agreements

Louisiana courts consistently hold that an oral agreement may not be admitted to vary the terms of a written contract except under the circumstances enumerated by *La. Civ. Code Ann. art. 1848*. Thus, because oral agreements do not fall within the ambit of *La. Civ. Code Ann. art. 1848*, contemporaneous oral agreements or understandings between the parties which are not made part of the written contract do not qualify as an exception to the parol evidence rule. Similarly, parol evidence is not admissible to show prior oral agreements that contradict the terms of a written contract.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Oral Agreements

Contracts Law > Defenses > Ambiguities & Mistakes > General Overview

Evidence > Types of Evidence > Documentary Evidence > Parol Evidence

Evidence > Admissibility > Statements as Evidence > Parol Evidence

HN25[] Types of Contracts, Oral Agreements

There are some judicially carved exceptions that permit courts to admit parol evidence when a written contract is at issue. Under Louisiana law, parol evidence is admissible to show fraud, mistake, illegality, want or failure of consideration, and to explain an ambiguity when such explanation is not inconsistent with the written terms. One of the most discussed exceptions to the parol evidence rule is the principle that parol evidence is admissible to show that a writing is only part of an oral contract.

Contracts Law > Contract Interpretation > Parol Evidence > General Overview

Evidence > Types of Evidence > Documentary Evidence > Parol Evidence

HN26[] Contract Interpretation, Parol Evidence

The parol evidence rule does not make evidence of prior negotiations irrelevant; the new agreement in writing makes evidence of prior negotiations irrelevant, but only if the written agreement is a complete and accurate statement of all of the terms agreed upon by the parties.

Contracts Law > Contract Interpretation > Parol Evidence > General Overview

Evidence > Types of Evidence > Documentary Evidence > Parol Evidence

HN27[] Contract Interpretation, Parol Evidence

Parol evidence may be admitted to show a subsequent, new and independent agreement that was intended to modify the original contract.

HN28[] Contract Conditions & Provisions, Integration Clauses

The United States Court of Appeals for the Fifth Circuit, applying Louisiana law, has held that a merger clause precludes evidence of agreements made outside of the written contract.

Business & Corporate Compliance > ... > Contract Formation > Consideration > Detrimental Reliance

Contracts Law > ... > Consideration > Enforcement of Promises > General Overview

Contracts Law > Contract Formation > Consideration > General Overview

HN29[] Consideration, Detrimental Reliance

La. Civ. Code Ann. art. 1967 provides that a party may be obligated by a promise when he knew or should have known that the promise would induce the other party to rely on it to his detriment and the other party was reasonable in so relying. This article of the Louisiana Civil Code sets forth Louisiana's version of the doctrine known as detrimental reliance, and is designed to prevent injustice by barring a party from taking a position contrary to his prior acts, admissions, representations, or silence. Some Louisiana courts have characterized detrimental reliance as being a disfavored doctrine and have held that it should be applied sparingly because it bars the normal assertion of rights otherwise present. While some courts may be reluctant to apply the doctrine, it is clear that the Louisiana jurisprudence has approved its use in appropriate cases.

Business & Corporate Compliance > ... > Contract Formation > Consideration > Detrimental Reliance

Contracts Law > ... > Consideration > Enforcement of Promises > General Overview

Contracts Law > Contract Formation > Consideration > General Overview

HN30[] **Consideration, Detrimental Reliance**

Louisiana law requires a plaintiff to prove the following to recover for a claim of detrimental reliance: (1) a representation was made; (2) there was justifiable reliance thereon; and (3) there was a change of position to one's detriment because of the reliance. The plaintiff bears the burden of proving each of these elements by a preponderance of the evidence.

Business & Corporate Compliance > ... > Contract Formation > Consideration > Detrimental Reliance

Contracts Law > ... > Consideration > Enforcement of Promises > General Overview

Contracts Law > Contract Formation > Consideration > General Overview

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Integration Clauses

HN31[] **Consideration, Detrimental Reliance**

In determining if the party claiming detrimental reliance was justified in his reliance thereon, the courts generally look to whether the reliance was reasonable under the circumstances. Under Louisiana law, reasonableness is determined by examining factual circumstances like the commercial sophistication of the party claiming detrimental reliance and the negotiations and/or documents the party relied on. In some cases, courts have found that the presence of an integration clause in a contract is a factual circumstance that makes one's reliance unreasonable.

Business & Corporate Compliance > ... > Contract Formation > Consideration > Detrimental Reliance

Contracts Law > ... > Consideration > Enforcement of Promises > General Overview

Contracts Law > Contract Formation > Consideration > General Overview

HN32[] **Consideration, Detrimental Reliance**

In order for plaintiffs to prove that they changed their position to their detriment in reliance on a representation from defendant, the Louisiana courts require proof that the plaintiffs suffered damages not adequately compensated by the defendant. Essentially, this means that damages must be proven in order for a claim of detrimental reliance to be sustained.

Business & Corporate Compliance > ... > Contract Formation > Consideration > Detrimental Reliance

Contracts Law > ... > Consideration > Enforcement of Promises > General Overview

Contracts Law > Contract Formation > Consideration > General Overview

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Integration Clauses

HN33[] **Consideration, Detrimental Reliance**

A per-se rule that an integration clause nullifies any claim for detrimental reliance contradicts the very nature of a claim for detrimental reliance.

Business & Corporate Compliance > ... > Contract Formation > Consideration > Detrimental Reliance

Contracts Law > Remedies > Equitable Relief > General Overview

Contracts Law > Contract Formation > Consideration > General Overview

Contracts Law > ... > Consideration > Enforcement of Promises > General Overview

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Integration Clauses

HN34[] **Consideration, Detrimental Reliance**

The existence of a promise and reasonable reliance on that promise to one's detriment are the only requirements needed to sustain a claim for detrimental reliance.

Civil Procedure > Remedies > Damages > Monetary Damages

Contracts Law > ... > Affirmative Defenses > Fraud & Misrepresentation > General Overview

Torts > ... > Types of Damages > Compensatory Damages > General Overview

Torts > Business Torts > Fraud & Misrepresentation > General Overview

HN35[] **Damages, Monetary Damages**

Louisiana recognizes a cause of action for intentional fraudulent misrepresentation as to present or past facts. A party who is injured by the fraud and deceit of another has a cause of action for damages. The action for fraudulent misrepresentation may be brought either as a breach of contract or tort action. If the cause of action is under contract, the plaintiff's damages are limited to actual pecuniary loss proven by a preponderance of the evidence. If the action lies in tort, the plaintiff may recover non-pecuniary losses as well, but only if he proves such losses by a preponderance of the evidence.

Torts > Business Torts > Fraud & Misrepresentation > General Overview

HN36[] **Business Torts, Fraud & Misrepresentation**

The Louisiana Civil Code defines fraud as a misrepresentation or a suppression of the truth made with the intention either to obtain an unjust advantage for one party or to cause a loss or inconvenience to the other. *La. Civ. Code Ann. art. 1953*. Fraud does not vitiate consent when the party against whom it is directed could have ascertained the truth without difficulty, inconvenience, or special skill. However, this exception does not apply when a relation of confidence reasonably induced a party to rely on the other's assertions or representations. *La. Civ. Code Ann. art. 1954*. The commercial sophistication of the parties is considered by the court when determining if a party could have ascertained the truth without difficulty, inconvenience, or special skill.

Contracts Law > ... > Consideration > Enforcement of Promises > General Overview

Torts > Business Torts > Fraud & Misrepresentation > General Overview

Contracts Law > Contract Formation > Consideration > General Overview

HN37[] **Consideration, Enforcement of Promises**

The United States Court of Appeals for the Fifth Circuit has set forth the following elements to sustain a claim for fraud under Louisiana law: (1) a misrepresentation of material fact; (2) made with the intent to deceive; and (3) causing justifiable reliance with resultant injury. The requirement that a party justifiably rely on the alleged fraudulent misrepresentation is required to sustain the claim. To determine whether or not plaintiffs' reliance was justifiable, the court must conduct the same reasonableness inquiry it previously made on the detrimental reliance claim. A fraud claim based on unfulfilled promises or statements as to future events will not satisfy the justifiable reliance requirement. However, a claim of fraud may be predicated on promises made with the intention not to perform at the time the promise is made.

Opinion by: FRANK J. POLOZOLA

Opinion

[*526] RULING

Water Craft Management, L.L.C. ("Water Craft"), Douglas Wayne Glascock ("Glascock"), and Nick Martrain, III ("Martrain") have filed this suit against Mercury Marine (A Division Of Brunswick Corporation) ("Mercury") alleging violations of federal ***antitrust*** **[**2]** ***law*** under *15 U.S.C. § 13(a)* and various state law claims, including breach of contract, detrimental reliance, fraud, and misrepresentation claims. [1] With the consent of the parties, the claims were trifurcated. The Court tried the antitrust claims and state law claims separately. A trial on the issue of damages will be held at a later date.

The antitrust claims were tried by the Court without a jury. [2] After hearing the evidence in this case, considering the credibility of the witnesses who testified in person at trial, and reviewing the briefs, deposition transcripts, and other arguments presented by the parties, the Court finds that plaintiffs failed to prove all of the elements of their federal antitrust claims by a preponderance of the evidence. [3] The Court further finds in the alternative, that even if plaintiffs did prove their antitrust claim, Mercury has proved as a matter of law under the facts of this **[**3]** case its meeting competition defense by a **[*527]** preponderance of the evidence which serves as a complete bar to plaintiffs' federal antitrust claims.

The state law claims were also tried before this Court without a jury. [4] **[**4]** After hearing the evidence on this claim, [5] the Court finds that: (1) plaintiffs have failed to prove all of the elements of their state law breach of contract claims by a preponderance of the evidence, and (2) plaintiffs have proven all of the elements of their state law claims based on detrimental reliance, fraud, and misrepresentation by a preponderance of the evidence. Accordingly, it is necessary for the Court to proceed with the trial of damages to determine the extent, if any, of the plaintiffs' damages sustained based on their state law detrimental reliance, fraud, and misrepresentation claims.

The state law counter-claims brought by Mercury were also tried before this Court without a jury. [6] The Court finds that Mercury has proven the following claims by a preponderance of the evidence:

(1) The sum of $ 79,117.32 plus interest and attorneys fees against Glascock and Martrain;
(2) The sum of $ 11,379.75 plus interest and attorneys fees against Water Craft, Glascock and Martrain;
(3) The sum of $ 3,855.12 against Water Craft, Glascock and Martrain;
(4) The sum of $ 6,076.67 against Glascock and Martrain;
(5) The sum of $ 26,576.94 against Glascock

Mercury is also entitled to recover interest from the date of judgment until paid on each of these claims.

[5]** The Court now proceeds to give reasons for the Court's rulings.

I. Factual Background [7]

This case involves transactions between the manufacturers and dealers in the boating industry. Both of the plaintiffs, Glascock and Martrain, are experienced businessmen and marine dealers. Since 1986, Glascock owned six separate marine dealerships before opening LA Boating Center ("LA Boating") which did business as the Water

---

[1] The plaintiffs will sometimes be referred to collectively as Water Craft.

[2] Rec. Doc. Nos. 315, 317, 319, and 320.

[3] The Court issued a short opinion on the antitrust claim on March 9, 2004. See Rec. Doc. No. 365.

[4] Rec. Doc. Nos. 366, 367, and 369.

[5] In reaching its decision the Court considered the credibility of the witnesses who testified in person at trial, and reviewed the briefs, trial and deposition transcripts, and the other arguments presented by the parties.

[6] Rec. Doc. Nos. 366, 367, and 369.

[7] The factual findings made by the Court apply to all claims unless the Court notes otherwise. All of the claims and contentions of the parties have been fully considered by the Court whether specifically discussed in this opinion or not.

Craft store in Baton Rouge. These dealerships were located in various parts of Louisiana. In some of these dealerships, Glascock had business partners. Glascock owned Hammond Boating Centre in Hammond, Louisiana, which opened in 1986 and operated as a Mercury dealership carrying Mariner motors. During the time Water Craft was a going concern, Glascock **[**6]** continued to run his Mercury dealership in Hammond, Louisiana. Glascock also owned other Mercury dealerships which were Tracker Marine ("Tracker") dealerships. During this time, he served on the Tracker Dealer Council and had been one of its top ten dealers for ten years. Thus, Glascock had been actively and successfully involved in the marine dealership industry for approximately twelve years at the time he and Martrain opened LA Boating in January 1997. The evidence also reveals that Glascock had served on several manufacturer-dealer councils in connection with the marine **[*528]** products industry and was a member of several trade associations. In addition to Glascock's extensive experience in the marine product industry, Glascock owned and managed several other successful businesses and by his own admission, has become a millionaire because of his business activities and experience.

Martrain had over twenty years experience in the marine dealer industry before opening LA Boating in Baton Rouge. He also had served on numerous industry boards throughout that time, including the Advisory Council for Stratos Boat Company and the National Dealer Council for Outboard Marine Corporation ("OMC"). **[**7]** Before opening the Water Craft store, Martrain owned and managed a Baton Rouge OMC dealership, Martrain Marine, which opened in 1983. Martrain closed this dealership on October 31, 1996. It is clear that one of the primary reasons Martrain closed Martrain Marine was because of the extensive and robust competition in the Baton Rouge marine product marketplace. In October 1996, Martrain had agreed that he would sell his dealership's assets in Martrain Marine to Kenny Hebert ("Hebert") who owned Plaquemine Marine. It was also agreed that Hebert would lease the former Martrain Marine building from Martrain and his family.

Both Glascock and Martrain knew the Baton Rouge marine business market was highly competitive. Glascock had operated a Baton Rouge Mercury dealership carrying Mariner motors, and had closed the dealership in the early 1990's because the Baton Rouge market was too competitive. He sold that dealership to Travis Boating Center ("Travis"), which was an OMC dealer at the time. Travis would later become a very important party in this litigation.

A. The Initial Negotiations

Both Glascock and Martrain testified that because they previously had bad experiences with **[**8]** the Baton Rouge marine market, they had no desire to open a Baton Rouge Mercury dealership. Though the motivation is disputed, Glascock and Martrain began to discuss the possibility of the two partnering to open a Mercury dealership in Baton Rouge in September 1996. Glascock contends he was approached by David Rohrbach, a sales representative for Mercury, in 1996 to discuss the possibility of opening a Baton Rouge Mercury dealership. Rohrbach eventually signed Water Craft d/b/a LA Boating to be a Mercury dealer. Rohrbach was assigned to the Louisiana territory from approximately April 1996 until he left his employment with Mercury in May 1997. During the course of Glascock's initial discussions with Mercury, he testified that he was very negative about opening a Baton Rouge Mercury dealership. However, in later discussions, Glascock testified that the Mercury representatives said they could make the offer very attractive, and put him in contact with Martrain to discuss a joint venture. At about the same time, Martrain testified that he was approached by Rohrbach and/or Glascock to discuss the possibility of entering into a joint venture with Glascock for a Baton Rouge Mercury dealership.

[9]** During their testimony, Glascock and Martrain contended that one of the initial and primary concerns they had about going into business again in Baton Rouge was the presence of Travis in the Baton Rouge market. [8] Both knew that Travis was receiving deep discounts from OMC and also knew it would be difficult for them to compete with Travis price-wise **[*529]** unless certain price concessions could be obtained from Mercury. Glascock and Martrain were also concerned about the number of Mercury dealers already doing business in the Baton Rouge

---

[8] As noted above, Glascock sold his prior Baton Rouge dealership to Travis, which was then an OMC dealer. As will be noted later in this opinion, Travis became a Mercury dealer after plaintiffs opened the Baton Rouge store and signed their agreement with Mercury.

area. Finally, Glascock and Martrain stated that they both knew about Bill Seeley and John Randolph and their method of operation, and testified they had expressed this concern to Rohrbach personally. Both Glascock and Martrain expressed a concern that both Seeley and Randolph were Mercury executives, but had previously worked for OMC and were instrumental in signing Travis as an OMC dealer. Glascock and Martrain feared that Mercury now intended to make Travis a Mercury dealer because Travis was a fast-growing multi-location dealer for OMC, and Seeley and Randolph had been responsible for signing Travis to be an OMC dealer.

[10]** Glascock and Martrain claim that Rohrbach was quick to dispel these fears. According to plaintiffs, Rohrbach expressly advised them that Mercury would be providing LA Boating with the deepest possible discounts, and they would be able to buy boat motors as cheap or cheaper than anyone in the Baton Rouge market, including Travis. In addition, Glascock and Martrain claim Rohrbach made other promises to them concerning advertising co-op money and discounts on parts and supplies. Finally, Glascock and Martrain claim that Rohrbach and other Mercury representatives assured them that Travis would never be made a Mercury dealer. Throughout both bench trials, Glascock and Martrain testified that Mercury representatives had referred to Travis as being "public enemy number one," a statement Mercury emphatically denies Rohrbach, or any of its representatives, ever made.

Glascock and Martrain, also claim that Rohrbach made representations to them that Mercury planned to reduce the total number of dealerships in the Baton Rouge market, and wanted to consolidate its business into one strong dealer who could effectively compete against Travis and allow Mercury to recapture its market share from **[**11]** OMC.

During the discussions with Glascock and Martrain, Mercury revealed that it was also adding Kenny Hebert of Plaquemine Marine as a dealer in the Baton Rouge market. However, Glascock and Martrain claim that this did not dissuade them from continuing negotiations with Rohrbach because they were advised by Mercury that Hebert would not become a "full-line dealer," but instead would be principally a "package" dealer. A full-line dealer is a dealer that purchases Mercury motors directly from Mercury and receives discounts off of a net dealer cost. Package dealers do not buy loose engines from Mercury, but rather obtain their inventory from boat dealers who sell them packaged units with the boat and motor already installed, or at least included, in the sale of the boat price. In Louisiana, a large share of the marine business is for loose engines since so many engines are sold to "re-power" older or homemade boats. [9] A full-line dealer is one that can buy package units and loose engines and is free to create or set up his own package.

[12]** During the testimony, Mercury representatives presented an entirely different picture of these initial negotiations between Rohrbach, Glascock and Martrain. Mercury claims that it was Glascock who first expressed interest and approached Rohrbach about opening a Baton Rouge dealership. Rohrbach testified in his deposition that Glascock even told him about the location he was considering for the dealership. Rohrbach noted that the first time that he ever met Martrain was at a breakfast meeting and that he did not **[*530]** suggest that Glascock approach Martrain about opening a Baton Rouge Mercury dealership. Although Rohrbach admits that Mercury was excited about Glascock and Martrain opening a Baton Rouge dealership, he testified that the opening of a Baton Rouge dealership was not tied to any special deal. To the contrary, Rohrbach and other Mercury representatives testified that Rohrbach did not have the authority to offer any special deals that were not in the standard dealer program, and to do so would have required approval from his superiors. [10]

[13]** Rohrbach testified that Travis did not play a major role in the negotiations he had with Glascock and Martrain regarding the Baton Rouge agreement. During the time he worked at Mercury, Rohrbach testified that he never learned that Mercury was considering entering into a contract with Travis to be a Mercury dealer. Thus, Rohrbach testified he would not have told any of the dealers he serviced whether or not there were discussions occurring between Travis and Mercury. Rohrbach claims he did not tell Glascock and Martrain that Mercury would reduce the number of Mercury dealerships in the Baton Rouge area, nor did he mention there were Baton Rouge dealerships which would be phased out by Mercury.

---

[9] This is partially caused by the salt water in the Louisiana marsh area.

[10] There were obvious antitrust concerns about favoring one dealer.

Mercury argues that the true motivating factor which caused Glascock to open another Baton Rouge dealership was to protect his Tracker dealership in Hammond. As noted above, Glascock's other Mercury dealerships were Tracker dealerships. Defendants contend that Tracker boat packages are outfitted with Mercury Motors. Thus, in order to sell Tracker boat packages, a Tracker dealer must also be a Mercury dealer. Mercury presented evidence that from late 1995 to early 1996, Tracker representatives, **[**14]** including David Camp and his supervisor Nick Vann, discussed the possibility of opening a Tracker store in Baton Rouge with Glascock. Tracker allegedly told Glascock that it would open another Baton Rouge dealership with another company if Glascock did not wish to do so. Mercury contends that Glascock's true motivation was to protect his then-current status of having the only Tracker dealership in the Baton Rouge area. This contention is supported by the evidence in the case.

B. The Sales & Service Agreements

Despite the conflicting contentions set forth above regarding the initial negotiations between Rohrbach, Glascock and Martrain, it appears that an agreement was eventually reached. On October 31, 1996, Glascock and Martrain signed the lease for the building where they would operate LA Boating. On November 25, 1996, Glascock and Martrain formed Water Craft, and on November 28, 1996, Martrain, in his capacity as "President," signed a Mercury Marine Sales & Service Agreement ("the 1997 Sales & Service Agreement") on behalf of Water Craft, doing business as LA Boating in Baton Rouge. It is a stipulated fact that both Glascock and Martrain were familiar with the terms contained **[**15]** in the 1997 Sales & Service Agreement because of their prior experience in the marine business. It is also clear and undisputed that both Glascock and Martrain understood from their prior experience in the marine product industry that non-exclusive dealerships were the standard practice for marine engine dealers.

The parties have stipulated that the 1997 Sales & Service Agreement is non-exclusive. Further, the 1997 Sales & Service Agreement noted that the price determination of Mercury products would be based on price lists published by Mercury **[*531]** from time to time, reserving to Mercury the right to revise the price lists and applicable discounts at any time. Finally, the 1997 Sales & Service Agreement contained an integration clause that provided that it was the "entire agreement" between the parties and "replaced all prior agreements between the parties." Additionally, this integration clause stated the 1997 Sales & Service Agreement could be amended or modified "only by written instrument signed by Mercury Marine and Dealer." Both Glascock and Martrain testified at trial that based on this agreement and their prior marine product experience, they did not believe that Water Craft would **[**16]** be the exclusive Mercury dealer in the Baton Rouge area.

Water Craft, doing business as LA Boating, began its operation as a marine dealership in January 1997. Martrain was the managing partner of Water Craft, and ran the day-to-day business, operations, and accounting of LA Boating. Glascock was not present in the LA Boating store very often and did not take an active role in the day-to-day management of the dealership. After the Water Craft Baton Rouge store had been opened for approximately eight months, Glascock, on behalf of himself, Martrain, and Water Craft, executed a renewal contract with Mercury ("the 1998 Sales & Service Agreement") on August 3, 1997. The terms of the 1998 Sales & Service Agreement are identical to those contained in the 1997 Sales & Service Agreement. [11]

As Glascock and Martrain were opening their Baton Rouge Mercury dealership, Kenny **[**17]** Hebert opened "Boats Unlimited," another Mercury dealership in Baton Rouge. Both Baton Rouge dealerships began operation around January 1, 1997 as full-line Mercury dealers approximately five miles from each other and approximately five to six miles from the Travis location. Hebert testified that he was not told by Rohrbach that both he and Glascock and Martrain would become Mercury dealers. Instead, he claims only one - not both - of them would be signed as a Mercury dealer. As noted above, Glascock and Martrain also did not think they would be competing with Hebert as full-line dealers in the Baton Rouge market. Mercury contends that both Glascock and Martrain knew they would be competing with Hebert prior to signing the 1997 Sales & Service Agreement. Rohrbach testified that he never made the "full-line" and "dual-line" distinctions to Glascock and Martrain, and Mercury produced emails at

---

[11] Because the terms of the agreements are identical, the Court will address arguments related to the validity of these agreements collectively.

trial from Rohrbach to Mercury representatives indicating that both Hebert and Glascock and Martrain knew that both would be operating Baton Rouge Mercury dealerships.

C. Negotiations Subsequent to the 1997 Sales & Service Agreement

Despite the fact that a signed sales and service agreement **[**18]** was entered into, Glascock and Martrain testified it was unclear at the outset of the agreement the precise "program" that Water Craft's Baton Rouge store would be operating under. There were numerous discussions and communications between Glascock and Martrain and Mercury representatives from January to April of 1997. Glascock and Martrain contend it was not until April that the ultimate program was agreed to. These discussions were presented during both bench trials, including during the testimony of Glascock, Martrain, and Randolph. Glascock and Martrain argue that these ongoing discussions were made part of the overall contract with Water Craft concerning the purchase **[*532]** of Mercury engines, and constituted a modification and extension of the earlier written agreement. In the alternative, Glascock and Martrain argue that these negotiations with Mercury representatives constituted separate agreements from those contained in the 1997 Sales & Service Agreement, and these subsequent agreements were not fully integrated into either the 1997 or 1998 Sales & Service Agreements.

In approximately March or April 1997, Glascock and Martrain met with Rohrbach, Randolph [12] and Bill Burns, the **[**19]** regional sales representative, for dinner at Juban's Restaurant and thereafter for cocktails at the Hilton Hotel bar. According to plaintiffs, the supposed purpose of this meeting was to resolve the issues left unaddressed in the 1997 Sales & Service Agreement and to visit the new dealership. Mercury disputes this contention and denies this was the purpose of the meeting. Glascock and Martrain testified that during dinner and at the hotel Randolph reassured both of them that Mercury did not intend to make Travis a Mercury dealer, and he would make sure they received the deepest possible discounts from Mercury to help Glascock and Martrain be the number one Mercury dealer in Baton Rouge. Martrain testified specifically that he "flat-out" asked Randolph at this meeting if Mercury was trying to make Travis one of its dealers, considering Randolph's prior dealings with Travis when he worked for OMC. Martrain testified that Randolph emphatically advised him in response to that question that Travis would not become a Mercury dealer, and that Mercury's plan was to compete directly with Travis in order to regain market share from OMC. Randolph, on the other hand, never fully denied making **[**20]** these promises to Glascock and Martrain as the Court expected him to do. During his testimony at the antitrust trial, Randolph was very noncommittal in testifying whether or not he had led Glascock and Martrain to believe that Mercury would not make Travis a Mercury dealer.

During this time period, Glascock and Martrain claim that Mercury, with the full knowledge and assistance of Randolph, was actively pursuing Travis. Eventually, Travis did become a Mercury dealer, and these alleged misrepresentations are pivotal to Water Craft's contract, detrimental reliance, fraud, and misrepresentation claims. This conflicting testimony is irrelevant to the Court's determination that plaintiffs failed to prove the required elements of their antitrust claim.

D. Operation of LA Boating and Its Eventual Demise

LA Boating began its operations **[**21]** and its relationship with Mercury. It received free interest from Mercury for the first nine months it was in business, as do all new Mercury dealerships. However, LA Boating finished its first year of operation with more than a $ 70,000 loss. Glascock and Martrain claim that this was the projected loss for their first year of operation while Mercury takes the position that the store should have made a profit during its first year. The testimony and other evidence presented during the trials revealed that LA Boating should have made a profit during its first year according to its pro rata plan. Mercury presented evidence that almost immediately after opening, LA Boating fell behind on its floor-plan financing payments, and by the spring of 1998, LA Boating was on

[12] Randolph was Rohrbach's boss and Mercury's national sales director. As noted earlier, he had formerly worked for OMC and recruited Travis to sign an agreement with OMC.

a COD basis with its suppliers. Mercury also presented evidence that, by 1998, LA Boating was "Sold **[*533]** and Unpaid" ("SAU") or sold out of trust on all its lines including Mercury Marine Acceptance Corporation ("MMAC"), Deutsche Financial, Tracker, Bayliner, and Bombardier. Mercury contends that LA Boating was selling product, and instead of paying its lenders and floor financiers, was diverting the proceeds to meet other obligations.

[22]** Because LA Boating had fallen behind in its payments to Mercury and MMAC, Mercury claims it had Glascock and Martrain sign a promissory note on April 14, 1998 in its favor in the amount of $ 29,519.90 to address LA Boating's outstanding debt. Additionally, by August 1998, LA Boating owed MMAC over $ 177,000, which began to send demand letters to LA Boating. Around this time, Glascock and Martrain testified that they were ready to close LA Boating because of these financial problems. In addition, Glascock and Martrain testified that there were rumors circulating in the marine industry that Mercury was going to make Travis a Mercury dealer. Glascock and Martrain stated they did not want to remain in business as a Mercury dealer if they had to compete with Travis. However, Glascock and Martrain claim that conversations with Jeanne Koenen of MMAC and Kurt Schmiedel, the Mercury zone representative who had replaced Rohrbach, convinced them otherwise. Specifically, Glascock and Martrain claim that Schmiedel assured them Travis would not become a Mercury dealer, and that Koenen promised them extra financing. Despite making these assurances to the plaintiffs in response to their direct question **[**23]** on the issue, Schmiedel testified that he knew during his contacts and conversations with Glascock and Martrain that Mercury was negotiating with Travis to become a Mercury dealer. According to Schmiedel, Mercury representatives had told him to just give the other Baton Rouge dealers "lip service" when questioned about a possible Mercury deal with Travis. Additionally, Glascock and Martrain testified about a meeting at a bank in which Glascock and Martrain were about to close the store. During this meeting, plaintiffs received a cellular telephone call from Koenen promising them extra financing from Mercury which convinced plaintiffs to keep the business open. Based on these specific assurances from Schmiedel and Koenen, Glascock testified that he put up an additional $ 50,000 in capital, and that he and Martrain decided not to close the Baton Rouge dealership.

In October 1998, the existence of a business relationship between Mercury and Travis became well-known to both Glascock and Martrain. On October 16, 1998, Travis signed its letter of intent to become a Mercury dealership. The testimony and other evidence presented at the trial established that some Mercury products were already **[**24]** at the Baton Rouge Travis dealership at this time although Travis did not officially become a Mercury dealer until January 1999. Glascock and Martrain claim that this was a direct contradiction to the reassurances they had received from Rohrbach, Randolph, and Schmiedel. Glascock also testified that Schmiedel apologized to them when Travis became a Mercury dealer. Mercury disputes the testimony set forth above and denies ever making any promise to Glascock and Martrain that it would not sign Travis as a Mercury dealer.

After Travis officially became a Mercury dealer, relations between Mercury and Glascock and Martrain began to sour, and Mercury engaged in a series of discussions and meetings with Glascock and Martrain in an attempt to save the financially troubled LA Boating and the relationship between the parties. The first of these meetings occurred on October 29, 1998 between Schmiedel, Glascock and Martrain. **[*534]** At this meeting, Glascock and Martrain claim they asked for extra financing to keep LA Boating afloat. Mercury's proffered evidence claims they discussed LA Boating's poor financial situation at this meeting and discovered that gross sales were down, and LA Boating was losing **[**25]** $ 40,000 a month in overhead while paying $ 20,000 a month in interest alone. Glascock and Martrain claim they made it abundantly clear that if LA Boating did not receive additional working capital quickly, the Baton Rouge dealership was going to close.

The second meeting and additional telephone negotiations occurred during November 1998. At a meeting held on November 17, 1998 between Koenen and Martrain, a non-interest bearing loan from Mercury for $ 350,000 was requested. The testimony regarding this request and meeting is highly disputed. Koenen testified Martrain requested the loan, and she made no promises that the loan would be approved because the loan request was unprecedented. She noted that the request essentially asked that Mercury assist plaintiffs in paying off delinquent debts that the plaintiffs owed to Mercury and other lenders. Koenen also testified that she would never, in these negotiations or in any of the other negotiations she had with Glascock and Martrain, have had the authority to bind Mercury or MMAC to make any loan to them. Glascock and Martrain testified that Koenen had suggested the loan request, and that in his experience as a marine dealer, loans like **[**26]** that requested were commonplace. In fact, Martrain testified at the antitrust trial that he told Koenen he was in no position to suggest interest rates, and it was Koenen who specifically suggested a zero interest rate.

The loan request was subsequently denied by Mercury, and on December 7, 1998, Water Craft closed its LA Boating store. Mercury denies any of its actions or inactions caused the losses sustained by LA Boating. It argued and also presented evidence to show that absenteeism on the part of Glascock and Martrain, too much inventory, a general downturn in the marine products market, and LA Boating's inability to meet lawful competition all contributed to LA Boating's failure. Glascock and Martrain disagree, and argued and presented evidence that the losses sustained by LA Boating and its ultimate closure were attributed to Mercury's anticompetitive behavior in allegedly promising plaintiffs that Travis would not become a Mercury dealer [13] and the misrepresentations made by Mercury representatives to Glascock and Martrain during the formation and operation of LA Boating.

[27] E. The Slidell and Hammond Stores**

Because the principal claim and counter-claim relate to Glascock's other stores in Slidell and Hammond, the Court must address the Slidell and Hammond stores owned by Glascock before applying the law to the facts of this case. With regard to the principal claim, Glascock and Martrain claim that Glascock's "Hammond Boating Center" and their Slidell store were both affected by the closure of LA Boating. Basically, the plaintiffs claim these stores sustained severe credit problems because of the extra slack they had to pick up during the liquidation and debt collection processes related to LA Boating's closure.

In its counter-claim, Mercury claims that the debts owed to it by the Slidell store are Water Craft debts recoverable in this lawsuit. In January 1998, Water **[*535]** Craft acquired the assets of another dealership, Boating Centres, Inc. d/b/a Slidell Boating Centre, which was owned in part by Glascock. Glascock owned the building in which the Slidell dealership was located, and Water Craft leased the building from Glascock. To accomplish the transfer from Boating Centres, Inc., Martrain paid $ 125,000 to Glascock, and Glascock transferred **[**28]** the assets of Boating Centres, Inc. d/b/a Slidell Boating Centre to Water Craft d/b/a Slidell Boating Centre. On February 11, 1998, Martrain signed a Sales & Service Agreement with Mercury on behalf of Water Craft, doing business as "Slidell Boating Centre," in Slidell. The terms of this Sales & Service Agreement are virtually identical to the Sales & Service Agreements that LA Boating signed with Mercury.

At the time LA Boating was closing and liquidating, the Slidell store showed a profit of $ 77,682.68 in 1998. Further, the parties have stipulated that Slidell was not part of the Baton Rouge marine products market area, and the Baton Rouge Travis dealership had no influence on the Slidell market. In July 1999, Water Craft sold the Slidell dealership to a third-party, SS Marine, Inc.

II. Law and Analysis

A. Antitrust Claims

The plaintiffs have filed this secondary-line injury antitrust claim pursuant to *15 U.S.C. § 13(a)* which provides in part:

> ***HN1***[] It shall be unlawful for any person engaged in commerce, in the course of such commerce, either directly or indirectly, to discriminate in price between different purchasers of commodities **[**29]** of like grade and quality, where either or any of the purchases involved in such discrimination are in commerce, where such commodities are sold for use, consumption, or resale within the United States . . . and where the effect of such

---

[13] In essence, plaintiffs are arguing that Mercury was going to violate the antitrust laws against Travis to give plaintiffs the entire market and keep Travis out. The court assumes it would then be trying an antitrust suit filed by Travis.

> discrimination may be substantially to lessen competition or tend to create a monopoly in any line of commerce, or to injure, destroy, or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination, or with customers of either of them: *Provided,* That nothing herein contained shall prevent differentials which make only due allowance for differences in the cost of manufacture, sale, or delivery resulting from the differing methods or quantities in which such commodities are to such purchasers sold or delivered: . . . *And provided further,* That nothing herein contained shall prevent persons engaged in selling goods, wares, or merchandise in commerce from selecting their own customers in bona fide transactions and not in restraint of trade: *And provided further,* That nothing herein contained shall prevent price changes from time to time where in response to changing conditions affecting the **[**30]** market for or the marketability of the goods concerned, such as but not limited to actual or imminent deterioration of perishable goods, obsolescence of seasonal goods, distress sales under court process, or sales in good faith in discontinuance of business in the goods concerned.

HN2[] The Fifth Circuit follows the United States Supreme Court and other circuits in making a distinction between primary-line injury and secondary-line injury in claims under the Act. [14] Primary-line injury occurs at the level of direct competition and customarily results when a seller uses predatory pricing policies to enhance his market position over competitors, **[*536]** thereby diminishing competition and increasing market concentration. [15] Secondary-line injury occurs when a large purchaser uses its vast purchasing power to obtain low prices from the manufacturers or distributors whose products it stocks, thereby enabling it to undersell competitors. [16] A secondary-line injury occurs when competition between favored and disfavored purchasers of a discriminating seller is unlawfully affected. [17] The parties agree, and the Court finds, that this case is clearly a secondary-line injury case. A plaintiff alleging **[**31]** secondary-line injury must prove that a seller made a sale to two different buyers at the same functional level of competition charging different prices to each. [18]

HN3[] To establish illegal secondary-line price discrimination between purchasers, a plaintiff must prove the following elements by a preponderance of the evidence: (1) sales made in interstate commerce; (2) the commodities **[**32]** sold to purchaser were of the same grade and quality as those sold to other purchasers; (3) that seller discriminated in price between purchasers; and (4) that the discrimination had a prohibited effect on competition. [19] A plaintiff who meets the above requirements establishes a prima facie case of price discrimination. In addition to the above requirements, the plaintiff has the burden of proving the extent of his actual injuries to recover damages. [20]

HN4[] A price discrimination within the meaning of *§ 13(a)* is merely a "price difference." [21] More specifically, price discrimination is defined as charging different buyers different prices for the same items. A plaintiff in a secondary-line injury action must prove actual instances of price discrimination. If the challenged lower price is in

fact, and not merely theoretically, made available to the allegedly disfavored purchaser, the seller cannot **[**33]** be held liable under the Act. [22]

HN5[] The "prohibited effect on competition" element is usually defined by courts by directly quoting the language of the statute which says ". . .may be substantially to lessen competition or tend to create a monopoly in any line of commerce, or to injure, destroy, or prevent competition with any person who either grants or knowingly receives the benefit **[**34]** of such discrimination, or with customers of either of them." [23] This language focuses on two general effects under this portion of the Act - the effect on the general competitive market and the effect on the individual competitors or the disfavored purchaser. With respect to the effect on the general competitive market, the Act does not require **[*537]** that the discrimination in fact have harmed competition. Instead, the Act requires the plaintiff show there is a reasonable possibility that the price difference may harm competition. This reasonable possibility of harm is usually referred to as competitive injury. Once the plaintiff proves a discrimination in price, the burden then shifts to the defendant to negate competitive injury. Unless rebutted by one of the *Robinson-Patman Act*'s affirmative defenses, a showing of competitive injury as part of a prima facie case is sufficient to establish a claim under the Act. [24]

[35]** Where the plaintiff claims the effect is on the individual competitors or the disfavored purchaser, the burden of proof is greater. This standard was set forth by the United States Supreme Court and the Fifth Circuit Court of Appeals in *Chrysler Credit Corp. v. J. Truett Payne.* [25] In *Chrysler,* the United States Supreme Court held ***HN6***[] "to recover treble damages[,]. . .a plaintiff must make some showing of *actual injury* attributable to something the antitrust laws were designed to prevent. It must prove more than a violation of [the Act], since such proof establishes only that injury may result." [26] On remand, the Fifth Circuit held that Chrysler had not violated the Act under the Supreme Court's standard by offering the product at different prices based on incentives. According to the Fifth Circuit, the Supreme Court standard requires a plaintiff to demonstrate by a preponderance of the evidence that an actual antitrust violation has caused his damages. The plaintiff in *Chrysler* simply had not done this because there was a question as to whether discrimination even existed because the challenged plan was available to all dealers. The Fifth Circuit further held that **[**36]** conclusory statements by the plaintiff, without evidentiary support of actual causation, was not sufficient to meet the burden of proof. [27] This case is extremely important because it illustrates what is now required of a plaintiff to prove a "prohibited effect on competition." The "prohibited effect on competition" element of the prima facie case requires a showing that the discrimination have *caused* an *actual injury* to the disfavored purchaser as a prerequisite for recovery under the federal antitrust laws.

HN7[] Causation under the "prohibited effect on competition" element is established by examining two things: whether the favored and disfavored buyers **[**37]** were in actual competition with each other and proof of injury. Thus, to establish competitive injury in a secondary-line case, the disfavored purchaser must prove that it was engaged in actual competition with the favored purchasers at the time of the price discrimination. This actual

[22] *Metro Ford Truck Sales, Inc. v. Ford Motor Co., 145 F.3d 320, 326 (5th Cir. 1998)*, *cert. denied,* ***525 U.S. 1068, 119 S. Ct. 798, 142 L. Ed. 2d 660 (1999)***. In *Metro Ford,* a vehicle dealership claimed price discrimination under the Act because of a competitive price assistance program used as a discount incentive for all of its dealers. The plaintiff dealer failed to demonstrate that the same level of discount was not available to all dealers, and the court concluded the dealership was treated the same as all other dealers with respect to discounts.

[23] *15 U.S.C. § 13(a)*.

[24] *Falls City Industries, Inc. v. Vanco Beverage, Inc., 460 U.S. 428, 434-35, 103 S. Ct. 1282, 1288-89, 75 L. Ed. 2d 174 (1983)*.

[25] *Chrysler Credit Corp. v. J. Truett Payne Co., 451 U.S. 557, 101 S. Ct. 1923, 68 L. Ed. 2d 442 (1981)*.

[26] *Id. at 562, 101 S. Ct. at 1927*.

[27] *Chrysler Credit Corp. v. J. Truett Payne Co., 670 F.2d 575, 581 (5th Cir. 1982)*, *cert. denied,* ***459 U.S. 908, 103 S. Ct. 212, 74 L. Ed. 2d 169 (1982)***.

competition requirement is satisfied by showing the competitors competed at the same functional level and within the same geographic market. [28] Plaintiffs rely on *FTC v. Morton Salt Co.,* [29] in support of their argument that plaintiffs have a lesser burden of proof on the second component of causation, proof of injury. Under *Morton Salt,* **[*538]** an injury to competition is established by proof of a "substantial" price discrimination between competing purchasers over time. However, the Court finds that *Morton Salt* is not applicable under the facts of this case. [30]

[38]** Thus, in summary, ***HN8***[] to establish illegal secondary-line price discrimination between purchasers, a plaintiff must prove the following elements: (1) sales made in interstate commerce; (2) the commodities sold to purchaser were of the same grade and quality as those sold to other purchasers; (3) that the seller discriminated in price between purchasers; and (4) that the discrimination had a prohibited effect on competition. A price discrimination within the meaning of *§ 13(a)* is an actual price difference. The "prohibited effect on competition" element of the prima facie case requires that the discrimination have *caused* an *actual injury* to the disfavored purchaser. Causation is established by examining whether the favored and disfavored buyers were in actual competition with each other and proof of injury. Actual competition requires that the plaintiff prove a relevant product and geographic market to be defined. Proof of injury to competition is established prima facie by proof of a "substantial" price discrimination between competing purchasers over time.

The Court finds that plaintiffs have failed to establish liability under the Robinson-Patman Act. Specifically, plaintiffs **[**39]** failed to satisfy their prima facie case because they have not shown an actual injury to a disfavored purchaser because of a violation of the federal antitrust laws. Also, plaintiffs did not prove that they were in actual competition with Travis. The Court also finds that a relevant geographic and product market was not established by the testimony and evidence presented in this case. Finally, the Court finds, in the alternative, that Mercury satisfied the elements of the meeting competition defense which precludes liability in a claim filed under the Robinson-Patman Act. The Court now turns to a more detailed discussion of the evidence to set forth why plaintiffs failed to satisfy their burden of proof on the antitrust claims.

1. Failure to Establish Causation or Injury to Competition

The Court discussed the causation element set forth in *Chrysler Credit Corp. v. J. Truett Payne Co.* [31] earlier in this opinion. Because of its importance and applicability to this case, the Court believes further discussion is required. In *Chrysler,* the manufacturer, Chrysler, offered nineteen sales incentive programs to its Birmingham dealers in which the dealers would receive bonuses **[**40]** based on either the number of retail sales or wholesale purchases in excess of an objective set by Chrysler. The dealer, J. Truett Payne, was the long-time dominant dealer in Birmingham, and consequently, Payne's objective was set higher by Chrysler. [32] Payne failed to meet its objective, received less bonuses than other area dealers, and eventually went out of business. As a result, it claimed the disparity in bonus payments constituted price discrimination that had resulted in its loss of profits, and sued Chrysler under *Section 4* and *2(a) of the Clayton Act*, as amended by Robinson-Patman Act. [33] In response to plaintiffs' **[*539]** contentions, Chrysler argued that the sales incentive programs were nondiscriminatory, had no effect on competition, and did not injure Payne because the programs were available to all dealers on a

[30] *See* *Borden Company v. FTC, 381 F.2d 175 (5th Cir. 1967)*, which required a competitive advantage by which competition could be injured and that one customer be favored over another.

[31] *670 F.2d 575 (5th Cir. 1982)*, *cert. denied,* ***459 U.S. 908, 103 S. Ct. 212, 74 L. Ed. 2d 169 (1982)***.

[32] *Chrysler, supra at 579*.

[33] *Id. at 577, 579*.

nondiscriminatory basis. [34] In an earlier opinion, the Fifth Circuit had ruled in favor of Chrysler at the directed verdict stage, [35] and reasoned that Payne had failed to introduce evidence of an injury attributable to Chrysler's alleged price discrimination. In that same opinion, the Fifth Circuit had also found that price discrimination which threatens competition, **[**41]** but does not cause actual competitive injury, will not support an action for damages. On review, the United States Supreme Court vacated and remanded the case for further proceedings. The Supreme Court ordered the Fifth Circuit to review the record for specific evidence in the record of violations of the price discrimination law, injury, or damages using the following standard: To recover treble damages, a plaintiff must make some showing of actual injury attributable to something the antitrust laws were designed to prevent; it must prove more than a violation of *Section 2(a)*, since such proof establishes only that injury may result. [36]

In determining **[**42]** if a violation of the Robinson-Patman Act occurred on remand, the Fifth Circuit first concluded that in order to recover treble damages under *Section 4 of the Clayton Act*, a plaintiff must prove (1) a violation of the antitrust laws; (2) cognizable injury attributable to the violation; and (3) at least the approximate amount of the damage. [37] **[**43]** Next, the Court identified this as a secondary-line injury case, and found the plaintiff must demonstrate the likely effect of the alleged price discrimination was to allow a favored competitor to draw significant sales or profits away from the disfavored competitor. [38] Considering these standards, the Court next turned to Payne's evidence and found that speculative and unsupportive testimony during the trial did not link the incentive programs to Payne's failure to compete with dealers in the Birmingham area. The Court further found that Payne could not benefit from the *Morton Salt* inference because it was not available to a plaintiff who had not proven the elements that support the inference. [39] Thus, the Court held that no violation of the Robinson-Patman Act had occurred. [40]

The Court then turned to the cognizable injury requirement, and held that a plaintiff must demonstrate an antitrust injury by a preponderance of the evidence in addition to the violation of the Act requirement. The Court also found that the plaintiff had the burden of establishing this standard "as a matter of fact and with a fair degree of certainty." The Fifth Circuit specifically held that conclusory statements alone, without evidentiary support, will not satisfy this standard. After reviewing the record, the Court characterized Payne's evidence as speculative and unsupportive, and found the evidence insufficient to demonstrate actual injury attributable to something **[**44]** the antitrust laws were designed to prevent. [41] Thus, the "prohibited effect on competition" element **[*540]** of the prima facie case requires a showing that the discrimination has caused an actual injury to the disfavored purchaser that is attributable to an alleged violation of the antitrust laws before treble damages under the Robinson-Patman Act may be awarded.

This Court finds that the testimony and evidence presented in this case is speculative and conclusionary as to Mercury's alleged violation of the antitrust laws. Plaintiffs have not presented any evidence to demonstrate an actual injury attributable to something the antitrust laws were designed to prevent. Even under a liberal

[41] *Id. at 581-82*.

interpretation of the legal standard and facts of this case, Travis did not enter the marketplace as a competing Mercury dealer until two months before the plaintiffs' Baton Rouge dealership closed. Travis signed the letter of intent to become a Mercury dealer on October 16, 1998, and the testimony **[**45]** supports a finding that there were Mercury products on the site of the Baton Rouge Travis dealership at this time. Travis officially became a Mercury dealer under the contract effective January 1999. LA Boating closed its doors on December 7, 1998 and began its liquidation process. These dates illustrate that LA Boating only competed with the Baton Rouge Travis dealership for this short two month period if it competed at all. Even if Mercury had violated the antitrust laws by offering greater discounts to Travis, it would be difficult to conclude that the losses sustained by Water Craft were attributable to such a violation when it had competed with Travis for such a short period of time.

It is even more difficult to prove that Water Craft's losses were attributable to Mercury's alleged violation of the antitrust laws because the testimony and evidence presented at the trial supports a finding that other reasons led to the eventual demise of the LA Boating store. LA Boating operated its first year without Travis as a competing Mercury dealer, and still sustained a $ 70,000 loss. This outcome occurred despite the business's pro rata business plan which had projected a profit of over **[**46]** $ 370,000 for the first year. Correspondence dated before Travis became a Mercury dealer was offered into evidence made references to a "bad year" for LA Boating, and also contained references to hurricanes and a general downturn in the market as reasons for Water Craft's economic troubles. Glascock himself admitted during his testimony that there had been a downturn in the market at the same time that LA Boating revenues were declining. Finally, the evidence establishes that the LA Boating store was in serious trouble by August 1998, months before Travis had even signed the letter of intent to become a Mercury dealer. By this time, Glascock and Martrain had already decided to shut down their failing dealership, even without any competition from Travis as a Mercury dealer. In addition, financial specialists were already very concerned about the fact that LA Boating was classified as being SAU. This meant they were selling products out of inventory, but using the proceeds to pay off other creditors instead of the creditor which had provided the inventory.

Considering these facts, the Court finds that Water Craft's injuries and the closing of the LA Boating store were not attributable **[**47]** to Mercury's offering deeper discounts to Travis. The period of competition between Travis and LA Boating was too short to support a finding that all of the injuries Water Craft alleges it sustained are attributable to Mercury's alleged violation of the antitrust laws. There are simply too many other reasons that caused the eventual closing of Water Craft. Thus, plaintiffs have not established causation between the actual injury sustained by Water Craft and Mercury's alleged violation of the antitrust laws.

[*541] 2. Failure to Establish a Geographic and Product Market

Plaintiffs also failed to prove a prima facie Robinson-Patman claim because they failed to offer testimony or other evidence that adequately defined the relevant geographic and product markets as well as the product itself.***HN9***[] It is well settled that the relevant product and geographic markets must be defined with some degree of precision to enable the trier of fact to determine if federal antitrust laws have been violated. [42] In this case not only did plaintiff fail to establish the requisite geographic markets, it failed to establish what product was involved. As noted earlier, there are dealers which just sell engines, **[**48]** there are package dealers, and dealers which act as full-line dealers. [43] Plaintiff failed to establish which, if any, of these products constituted the relevant product market.

In *Apani Southwest, Inc. v. Coca-Cola Enterprises, Inc.,* [44] a purified water manufacturer filed suit seeking damages for violations of several antitrust statutes including the *Clayton Act,* the *Sherman Act*, and Texas ***antitrust law***. The

[43] *See* Section I(A) of this opinion, *supra.*

[44] *300 F.3d 620 (5th Cir. 2002)*.

district court dismissed the antitrust claims because the manufacturer had failed to prove a relevant geographic market. The Fifth Circuit affirmed. [45]

[49]** In affirming the district court, the Fifth Circuit required that a relevant geographic and product market be proven in order for a prima facie case of Clayton and Sherman Act violations to be established. [46] The Court also set forth the standards required to properly prove what the relevant product and geographic markets were. With regard to product market, the Court considered the extent to which the seller's product is "interchangeable in use" and the degree of "cross-elasticity" of the demand between the product itself and its substitutes. Factors used in this analysis include public recognition of a submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors. [47]

In defining the relevant geographic market, the Court stated the standard was the area of effective competition charted **[**50]** by careful selection of the market area in which the seller operates and to which the purchaser can practicably turn for supplies. Also, the relevant geographic market should correspond to the commercial realities of the industry and be economically significant. The geographic market can be the entire nation, or it could be as small as a single metropolitan area. [48] **[**51]** The factors to consider in determining the economic significance of the relevant geographic market include the size, cumbersomeness, and other characteristics of the relevant product; regulatory constraints impeding the free flow of competing goods into the area; perishability of products; and transportation barriers. [49] The economic **[*542]** significance of the relevant geographic market does not depend on singular elements such as population, income, political boundaries, or geographic extent. Rather, it depends on the relationship between these elements and the characteristics of competition in the relevant product market within a particular area. [50]

After setting forth the requirements for an antitrust plaintiff to prove the relevant geographic and product markets, the Fifth Circuit dismissed all of the antitrust claims in *Apani* because the plaintiff had failed to define a relevant geographic market. According to the Court, where a plaintiff fails to define a relevant market or alleges one that is insufficient, the antitrust claims must be dismissed. [51] The decision in *Apani* illustrates that failure to adequately define the relevant geographic and product markets is fatal to an antitrust claim in the Fifth Circuit.

HN10[] Courts consistently require that expert testimony adequately define the relevant geographic and product markets in antitrust cases. Plaintiffs failed to present such expert testimony in this case. In *Surgical Care Center of Hammond, L.C. v. Hospital Service District* **[**52]** *No. 1 of Tangipahoa Parish,* [52] the Fifth Circuit affirmed a district court's dismissal of antitrust monopolization and tying claims because the plaintiff had failed to define a relevant geographic market. [53] In determining that the plaintiff failed to define a relevant geographic market, the

[52] *309 F.3d 836 (5th Cir. 2002)*.

Court held that the preliminary inquiry in an antitrust case is whether the defendant possesses market power in a relevant market. This inquiry requires a clear definition of the relevant geographic market. [54] Geographic evidence must take into account where consumers can practicably go, not where they actually go. Thus, a plaintiff cannot rely solely on a competitor's service area to compose the geographic market. This is exactly what the Fifth Circuit found the plaintiff had done. Instead, the Court said a plaintiff would fail to meet its burden of establishing a geographic market unless it showed where a consumer could practicably go. [55]

[53]** In *Surgical Care,* the reason why the plaintiff had failed to show the elements necessary to prove geographic market was attributed to the inadequate testimony of the expert. In noting the expert had failed to define a relevant geographic market, the Court stated:

> Nevertheless, St. Luke's expert did not attempt to identify the hospitals or clinics that may be deemed competitors of North Oaks. He relied solely on what he defined as North Oaks's service area to compose the geographic market. Absent a showing of where people could practicably go for inpatient services, St. Luke's failed to meet its burden of presenting sufficient evidence to define the relevant geographic market. Without a proper market definition, St. Luke's could not establish the predicate of a monopolistic leveraging claim, i.e., market power in the market for inpatient hospital services, and thus could not show a dangerous probability that North Oaks would gain monopoly power in the outpatient surgery market. The district court, after carefully analyzing the reports presented by experts for both St. Luke's and North Oaks, found that St. Luke's had not adduced sufficient evidence to delineate the relevant **[**54]** geographic **[*543]** market. St. Luke's counters that a detailed analysis of the relevant geographic market is not necessary . . .We hold that the district court did not err in dismissing St. Luke's claims of attempted monopolization because St. Luke's failed to meet its burden of presenting sufficient evidence to define the geographic market. [56]

Similarly, in *Lantec, Inc. v. Novell, Inc.,* [57] the Tenth Circuit affirmed a district court's dismissal of antitrust claims because the relevant geographic and product markets had not been established by proper expert testimony. [58] The Court first noted that a relevant market had to be established in order for the plaintiff to prevail in an antitrust suit. A relevant market is made up of the product at issue and available substitutes for that product. In defining the relevant market, [59] two aspects must be considered: the product market and the geographic market. [60] In reviewing the expert testimony, the Court found that the expert **[**55]** used unreliable data; failed to understand the product or the product market; did not conduct or cite surveys revealing consumer preferences; did not calculate the cross-elasticity of demand to determine which products were substitutes; gave a different opinion from that he gave in an earlier expert report; and failed to address changes in the product market. [61]

[53] *Id. at 840, 842*.

[54] *Id. at 839*.

[55] *Id. at 840*.

[56] *Id.* (Citations omitted.)

[57] *306 F.3d 1003 (10th Cir. 2002)*.

[58] *Id. at 1027, 1030-31*.

[59] The Court divided its analysis into the evidence presented by both expert and lay testimony when it determined that no relevant geographic market had been defined.

[60] *Id. at 1024*.

[61] The expert was also criticized for relying heavily on his own personal experiences and personal conversations with consulting firms in a limited geographic area to define a worldwide market. *Id. at 1025-26*.

The Court also rejected the plaintiff's after-the-fact attempts to use the record to define a geographic market because **[**56]** of flaws in the expert's testimony. The Court held that "skimpy evidence" of one's own experiences in the market was not sufficient to support a worldwide geographic market. [62] The Tenth Circuit's analysis illustrates that courts place a high value on expert testimony and reports in determining whether the relevant geographic and product markets have been proven. It is also clear that the Court in *Lantec* refused to permit a plaintiff to use facts in the record to establish the relevant geographic and product market where the expert has failed to do so.

In *Bailey v. Allgas, Inc.,* [63] the Eleventh Circuit also adopted a requirement that adequate expert testimony is required to define the relevant geographic and product market to a claim brought under the Robinson-Patman **[**57]** Act. In *Bailey,* the plaintiff brought a primary-line price discrimination lawsuit under the Robinson-Patman Act. The district court found that the expert's methodology failed to meet the *Daubert* standard and granted the defendant's motion for summary judgment. [64]

The Eleventh Circuit held, as does the Fifth Circuit, that ***HN11***[] defining a relevant market requires expert identification of both the product at issue and the geographic market for that product. According to the **[*544]** Eleventh Circuit, construction of the relevant market requires expert testimony, [65] and where an expert fails to provide a sufficient basis upon which a relevant market can be defined, a Robinson-Patman claim fails. [66] The Eleventh Circuit found that the expert failed to define the product because he failed to analyze substitutes for the relevant product, conduct surveys of homes in the geographic area, or determine the cross-elasticity of the product. **[**58]** [67] The Court also found that the expert had failed to identify the relevant geographic market because he only defined it as the intended area of service instead of properly assessing all of the factors that must be considered when measuring the relevant geographic market. [68]

[59]** Applying the above jurisprudence to the facts of this case, the Court finds that the expert testimony offered by plaintiffs did not properly establish a relevant geographic and product market.

Dr. Stuart Wood was tendered as an expert by the plaintiffs in this case, and he openly admitted the deficiencies in his opinion and analysis during cross-examination. It is clear that Dr. Wood did not analyze or set forth the necessary factors required by the jurisprudence to prove a geographic market. Specifically, Dr. Wood did not examine where the consumers of the product went to purchase outboard motors or where exactly the consumers were buying their product. Instead, Dr. Wood testified that he felt the geographic market was tacit in this case because LA Boating was located only a short distance from the Baton Rouge Travis dealership. This tacit finding is not supported by the jurisprudence. The relevant cases clearly illustrate that the determination of a geographic market is more complex than the mere distance between two competitors. Thus, the Court finds that Dr. Wood's assumption that the geographic market in this case was tacit is an incorrect assumption as a matter of law. This **[**60]** incorrect finding fails to support a critical element plaintiff must prove in their antitrust claim.

---

[62] Despite factual evidence in the record that illustrated where the product was sold, the Court held the plaintiff had failed to establish a worldwide geographic market with this mere evidence in the record. *Id. at 1026-27*.

[63] *284 F.3d 1237 (11th Cir. 2002)*.

[64] *Id. at 1239*.

[65] This statement by the Court affirmed the reasoning of the District Court in *Bailey v. Allgas, Inc., 148 F. Supp.2d 1222 (N.D.Ala. 2000)* (Blackburn, J.) that (a) an essential element of any Robinson-Patman claim is the definition of a relevant geographic market and (b) defining such a market may only be accomplished with expert testimony. *Id. at 1242*.

[66] *Bailey, supra at 1246-47*. This is the Eleventh Circuit *Bailey* opinion.

[67] *Id. at 1247*.

[68] According to the Court, such factors include "price data and such corroborative factors as transportation costs, delivery limitations, customer convenience and preference, and the location and facilities of other producers and distributors." *Id. at 1247*.

Dr. Wood also failed to conduct the analyses required by the jurisprudence to properly establish a product market. Dr. Wood failed to determine if the product was just the motors or boats and motors, or if the boats and motors were sold as part of a package. Dr. Wood also failed to take into account that the product market could go beyond the scope of Mercury engines. It is clear that Dr. Wood failed to consider the distinction between being a full-line or package dealer. The evidence presented in this case established that Mercury had other competitors in the boat engine market, but Dr. Wood's focus was only on Mercury engines. Dr. Wood's failure to conduct the proper legal and factual analyses and his decision to define the product narrowly contributed to the plaintiffs' failure to adequately define the product market under settled jurisprudence.

[*545] Although the jurisprudence requires adequate expert testimony to define the geographic market and product, the Court finds in the alternative that, even if factual evidence could establish the geographic and product markets, the evidence **[**61]** produced in this case failed to prove these required factors.

Plaintiffs argue the market was obvious because LA Boating was only five to six miles away from the Baton Rouge Travis dealership. Plaintiffs also argue that Mercury representatives admitted in testimony that LA Boating and Travis were in the same geographic market. The Court finds these arguments are without merit. In the deposition and trial testimony presented, there were discrepancies regarding the size of the geographic market that ranged from 25 to 100 miles. Such discrepancies forces the Court to conclude that the relevant geographic market in this case is not as obvious as the plaintiffs contend. The Court acknowledges that the distance between LA Boating and the Baton Rouge Travis dealership would have fallen within any of these ranges. However, this fact is meaningless because the factual evidence offered in this case fails to establish the remaining factors required by the jurisprudence to prove a geographic market.

The testimony and evidence offered in this case never distinguished if the product in this case was limited to the product offered by full-line dealers, or both full-line and package dealers. Further, **[**62]** the facts fail to prove whether the market was limited to Mercury products alone, or if it also extended to Mercury competitors such as Yamaha or OMC.

Therefore, the Court finds that the expert testimony and the factual evidence in this case fails to prove a product or product market as required by the jurisprudence.

3. The Meeting Competition Defense

The defendant also asserts as an affirmative defense the meeting competition defense.

The meeting competition defense to a Robinson-Patman claim is set forth in *15 U.S.C. § 13(b)* as follows:

> ***HN12***[] Upon proof being made, at any hearing on a complaint under this section, that there has been discrimination in price or services or facilities furnished, the burden of rebutting the prima-facie case thus made by showing justification shall be upon the person charged with a violation of this section, and unless justification shall be affirmatively shown, the Commission is authorized to issue an order terminating the discrimination: *Provided, however,* That nothing herein contained shall prevent a seller rebutting the prima-facie case thus made by showing that his lower price or the furnishing of services or **[**63]** facilities to any purchaser or purchasers was made in good faith to meet an equally low price of a competitor, or the services or facilities furnished by a competitor.

HN13[] This section expressly establishes certain prerequisites for the successful assertion of the meeting competition defense. The seller-defendant has the burden of proving four requirements in order to establish his defense: (1) to [rebut] the prima facie case thus made by showing that his lower price was made; (2) in good faith; (3) to meet an equally low price; and (4) of a competitor. [69]

---

[69] EARL C. KINTNER ET AL., FEDERAL ***ANTITRUST LAW***, § 24.5 (1983).

HN14[] The meeting competition defense is an absolute defense. "The seller has the burden of bringing himself within the exculpating provision of § 2(b), which has been interpreted to afford an absolute defense to a charge of violating § 2(a), notwithstanding **[*546]** the existence of the statutorily prohibited anticompetitive effect." [70]

[64]** The seller also has the burden of proving the meeting competition defense. "Under *[section 13(b)]*, the seller charged with [a violation] has the burden of rebutting a prima facie case of discrimination in price or services or facilities by demonstrating that its lower price or the furnishing of services or facilities to any purchaser or purchasers was made in good faith to meet an equally low price of a competitor, or the services or facilities furnished by a competitor. Courts have held that, to meet its burden, a defendant who knowingly discriminated in price or services or facilities furnished to a customer must demonstrate the existence of facts that would lead a reasonable and prudent person to believe that granting the lower price or service or facility would meet a competitor's equally low price." [71]

[65]** The United States Supreme Court set forth defendant's requisite burden in proving the meeting competition defense in *Falls City Industries v. Vanco Beverage, Inc.* [72] Here, the Court reiterated its meeting competition defense standard by stating, ***HN15***[] "when proved, the meeting-competition defense of § 2(b) exonerates a seller from Robinson-Patman Act liability." [73] The Court reaffirmed the standard discussed above and held that the meeting-competition defense "at least requires the seller, who has knowingly discriminated in price, to show the existence of facts which would lead a reasonable and prudent person to believe that the granting of a lower price would in fact meet the equally low price of a competitor." [74]

[66]** Further, the Court requires a seller to show that under the circumstances, it was reasonable to believe that the quoted price or a lower one was available to the favored purchaser or purchasers from the seller's competitors. [75]

Falls City addresses what facts are required to ***HN16***[] demonstrate the reasonableness requirement in the meeting competition defense: "In most situations, a showing of facts giving rise to a reasonable belief that equally low prices were available to the favored purchaser from a competitor will be sufficient to establish that the seller's lower price was offered in good faith to meet that price. In others, however, despite the availability from other sellers of a low price, it may be apparent that the defendant's low offer was not a good faith response." [76]

Falls City also **[**67]** discusses the requirement of good faith on the part of the defendant: ***HN17***[] "At the heart of Section 2(b) is the concept of 'good faith.' This is a flexible and pragmatic, not a technical or doctrinaire, concept. The standard of good faith is simply the standard of the prudent businessman responding fairly to what he reasonably believes is a situation of competitive necessity." [77] Whether this standard is met depends upon "the

[75] *Id.*

[76] *Id. at 439, 103 S. Ct. at 1291*.

facts and **[*547]** circumstances of the particular case, not abstract theories or remote conjectures." [78] **[**69]** The strict requirement of good faith is illustrated throughout federal jurisprudence and secondary sources:

> The only question in any meeting competition defense is whether the seller has acted in good faith in response to a competitive encroachment. Where a seller has good reasons to believe that a competitor is charging lower prices throughout a particular region, it must be allowed to respond accordingly. While 'good faith' is not defined by the Act, the Federal Trade Commission has developed guidelines which now govern the good faith inquiry. Despite these definitions, the good faith element of the meeting competition defense has proved difficult to apply. **[**68]** Thus far, no pattern has emerged for determining whether a given conduct will satisfy the *section 2(b)* good faith requirement. At best, some broad guidelines may be constructed from past decisions. The question of whether a given pricing response is valid remains a factual determination based on the reasonableness of the conduct. The same is true for area-wide pricing. Where there is reasonable proof from past conduct that a competitor is systematically going after a seller's market, the seller should be free to defend its market by meeting the anticipated competition. Because good faith is a flexible and pragmatic concept, a case-by case approach is almost inevitable. [79]

HN18[] Good faith, rather than absolute certainty, is the key requirement. Thus, as long as the seller acts in good faith, it may even inadvertently undercut the competitor's price without forfeiting this defense. [80]

The good faith [81] aspect of the defense can be summarized in the following way: "In general, the basic requirement of the Section 2(b) good faith defense is that the seller's conduct must be a reasonable response to the price discrimination of a competitor; if the seller acts reasonably, good faith will **[**70]** likely be found."

HN19[] If, however, the seller's actions are inappropriate, unnecessary, or unreasonable with respect to the threat posed by its competitor, the seller is not in good faith and will not be allowed to assert the meeting competition defense. [82]

[71]** **[*548]** There are two other facts concerning the meet the competition defense that are relevant in this case. First, there is ***HN20***[] a "meet and not beat" requirement which provides that: ". . .a seller's response must be defensive, in the sense that the lower price must be calculated and offered in good faith to 'meet not beat' the

---

[77] *Falls City Industries, supra at 441, 103 S. Ct. at 1292* *citing* *In the matter of Continental Baking Co., 63 F.T.C. 2071, 2163 (1963)*.

[78] *Id. citing* *United States v. United States Gypsum Co., supra at 454, 98 S. Ct. at 2882*. Note that Kintner and Bauer agree that the basic standard of the meeting competition defense is reasonable and prudent conduct. "Good faith for the purposes of the meeting competition defense is conduct based on 'the existence of facts which would lead a reasonable and prudent person to believe that the granting of a lower price would in fact meet the equally low price of a competitor' or 'the standard of the prudent businessman responding fairly to what he reasonably believes is a situation of competitive necessity.'" EARL C. KINTNER ET AL., FEDERAL ***ANTITRUST LAW***, § 24.8 (1983).

[79] Nwaneri, Angela. *The Good Faith Meeting Competition Defense to a Section 2(a) Violation of the Robinson-Patman Act: Area-Wide Pricing as a Valid Response to Competition,* 14 Wm. Mitchell L. Rev. 759, 859 (Fall 1998).

[80] HOLMES, WILLIAM C., ***ANTITRUST LAW*** HANDBOOK § 4.4 (2004) *citing* *Falls City Industries v. Vanco Beverage, Inc., 460 U.S. 428, 103 S. Ct. 1282, 75 L. Ed. 2d 174 (1983)*.

[81] The Fifth Circuit case *Jones v. Borden Co., 430 F.2d 568 (5th Cir. 1970)* is an example of where good faith was found. The Fifth Circuit noted that although "summary judgment judgments in antitrust cases often are inadvisable," it was proper because the plaintiff failed to introduce the evidence to question or contradict the defendant's asserted good faith defense. *Id.* at note 84, *citing* *Jones, supra at 569, 574*.

[82] *Id. at 390*. *See also* *McWhirter v. Monroe Calculating Machine Co., 76 F. Supp. 456 (W.D. Mo. 1948)* (Duncan, J.) as an example of conduct which led to the denial of the defense.

competitor's low price." [83] Second, the Supreme Court found this defense applies to both retaining old customers and gaining new ones when it stated: "Section 2(b) . . .does not distinguish [84] between one who meets a competitor's lower price to retain an old customer and one who meets a competitor's lower price in an attempt to gain new customers." [85]

The Court finds that, under the testimony and other evidence **[**72]** presented in this case, Mercury has proved the required elements of the meeting competition defense by more than a preponderance of the evidence. The evidence presented shows that it was reasonable for Mercury to believe that the discounts it gave to Travis were necessary to meet its competitor, OMC. In addition, the evidence presented shows that Mercury acted in good faith when it negotiated the discounts available to Travis. Mercury's intent at the time was not to drive Water Craft or any of its other dealers into debt and out of business. To the contrary, the testimony shows that Mercury benefitted when its dealers were able to compete with its competition. Mercury wanted to provide Travis with the same discounts it was receiving from OMC so that Mercury could adequately compete with OMC. The evidence also reveals that Mercury was losing its dealers to OMC, a fact that caused it to try to keep the dealers it had as well as allowing its dealers to compete with OMC.

The testimony and evidence also reveal that Mercury was reasonable in believing that it had to provide Travis with these specific discounts to compete with OMC. Even Glascock testified that it was well known within the **[**73]** marine industry that Travis was receiving substantial discounts from OMC. Further, the Mercury employees who testified or were deposed stated that the caliber of the discount that Travis was receiving from OMC was common, though speculative, knowledge in the marine industry. Also, the Court cannot overlook the fact that former OMC employees went to work for Mercury, and it is very possible and indeed probable that substantial information regarding the agreement Travis had with OMC was made known to Mercury. Finally, the low prices that Travis was able to provide to its consumers as an OMC dealer should have and indeed did support Mercury's reasonable and supported belief that it had to provide Travis with the discount that it did in order to secure it as a dealer and to compete with OMC.

The evidence presented in this case also shows that Mercury acted in good faith when it negotiated its discounts with Travis. The dealership scheme existing between Mercury and its dealers clearly shows that it was not in Mercury's best interest to drive its own dealers out of business. In reaching this conclusion on the meeting competition defense, the Court does not find and indeed cannot conclude **[**74]** that Mercury always had the best interest of its dealers at heart when negotiating with Travis. However, under the **[*549]** evidence presented, the Court finds that Mercury had no intent to drive LA Boating out of business by signing Travis as a dealer. Instead, the evidence showed that Travis was dealing with OMC both before and during the time that it was negotiating with Mercury. Travis was putting OMC engines instead of Mercury engines on its boats. At the same time, Travis was rapidly expanding its presence in the marine industry, and this expansion was occurring with OMC engines. Consequently, Mercury was losing its market share and was forced to take action. Thus, Mercury had to sign Travis in order to compete with OMC. These facts illustrate that Mercury was acting reasonably and in good faith in negotiating a discounts with Travis. Thus, Mercury has proven the meeting competition defense by a preponderance of the evidence. Therefore, plaintiffs' federal antitrust claims would be barred even had plaintiffs been able to prove the elements required to support an antitrust claim, which it clearly failed to do under the facts of this case.

B. State Law Claims

---

[83] *Falls City Industries, supra at 1294, referencing United States v. United States Gypsum Co., supra at 454, 98 S. Ct. at 2882*.

[84] The Court stated that such a distinction would be inconsistent with the section's language and logic.

[85] *Id.* (Citations omitted.)

The Court now turns **[**75]** to a discussion of the plaintiffs' state law claims based on breach of contract, detrimental reliance, fraud, and misrepresentation. The Court has jurisdiction over these claims pursuant to *28 U.S.C. § 1332*. Under the *Erie* doctrine, [86] the Court must apply Louisiana substantive law in reaching its decision in this case.

1. Breach of Contract

As noted earlier, plaintiffs have asserted a breach of contract claim under Louisiana law. This claim is governed by provisions of the Louisiana Civil Code and applicable Louisiana jurisprudence.

HN21[] A contract is an agreement by two or more parties whereby obligations are created, modified, or extinguished. [87] A contract has the effect of law between the parties, and courts are bound to give legal effect to the parties' agreements. [88] A contract may be in writing or made orally as long as the law does not require specific form requirements **[**76]** to be met. If the agreement has been reduced to writing, and the words of the contract are clear and explicit and lead to no absurd consequences, no further interpretation may be made in search of the parties' intent. [89] "[This] rule. . .does not authorize a perversion of language, or the exercise of inventive powers for the purpose of creating an ambiguity where none exists, nor does it authorize the court to make a new contract for the parties. . ." [90] In fact, courts generally find that the meaning and intent of the parties to a written instrument should be determined within the four corners of the document. Its terms normally cannot be explained or contradicted by extrinsic evidence. [91]

[77]** **[*550]** The determination of whether a contract is clear or ambiguous is a question of law. [92] The Fifth Circuit, applying Louisiana law, explained this distinction in *Texas Eastern Transmission Corp. v. Amerada Hess Corp.* [93] According to the Court, a contract provision is not ambiguous where only one of two competing interpretations is reasonable or merely because one party can create a dispute in hindsight. However, a contract provision is considered ambiguous when it is uncertain what the parties' intentions were and its provisions are susceptible to more than one reasonable meaning under the circumstances and applicable rules of construction. [94]

Although the agreement between the plaintiffs and Mercury was reduced to writing, the plaintiffs base their breach of contract and detrimental **[**78]** reliance claims on oral misrepresentations and promises allegedly made by Mercury representatives prior to and after the written Sales and Service Agreements were executed. Mercury has not claimed that the alleged oral agreements made between it and the plaintiffs were required to be in writing under

Louisiana law. However,*HN22*[] in order to sustain a cause of action for breach of an oral agreement for value in excess of $ 500, a party must prove its existence by at least one witness and corroborating circumstances. [95] **[**79]** It is clear that the plaintiff claiming that an oral agreement exists may himself meet the requirement that there be at least "one credible witness." [96] Because there is a written contract in this case, the Court must address whether the facts of this case permit it to use parol evidence and whether the integration clause in the contract at issue precludes the Court from going outside the four corners of the contract to even consider whether there was a valid oral agreement between the parties.

The parties dispute whether or not parol evidence should be admitted to allow the plaintiffs to present evidence to establish the various oral promises allegedly made by Mercury. *Article 1848 of the Louisiana Civil Code*, which sets forth Louisiana's rule on admitting parol evidence in contract disputes, provides:

> *HN23*[] Testimonial or other evidence may not be admitted to negate or vary the contents of an authentic act or act under private signature. Nevertheless, in the interest of justice, that evidence may be admitted to prove such circumstances as vice of consent, or a simulation, or to prove that the written act was modified by a subsequent and valid oral agreement. [97]

HN24[] Louisiana courts consistently hold that an oral agreement may not be admitted to vary the terms of a written contract except under the circumstances enumerated by *article 1848*. [98] Thus, because oral agreements do not fall within the ambit of *article 1848*, "contemporaneous oral **[**80]** agreements or understandings between the parties which are not made part of the written contract" do not qualify as an exception to the parol evidence rule. [99] Similarly, parol evidence is not admissible to **[*551]** show prior oral agreements that contradict the terms of a written contract. [100]

HN25[] There are some judicially carved exceptions to the above rule that permit courts **[**81]** to admit parol evidence when a written contract is at issue. Under Louisiana law, parol evidence is admissible "to show fraud, mistake, illegality, want or failure of consideration, [and] to explain an ambiguity when such explanation is not inconsistent with the written terms. . ." [101] One of the most discussed exceptions to the parol evidence rule is the principle that parol evidence is admissible to show that a writing is only part of an oral contract. [102] This exception was explained in *Stokes v. Georgia-Pacific Corp.,* [103] wherein the plaintiff sued Georgia-Pacific under the theory of detrimental reliance. Plaintiff alleged that Georgia-Pacific had made an oral contract to purchase a certain amount of wood chips a week in exchange for the plaintiff's investing in a large woodchipper. These purchases were memorialized by 30-day written contracts. These contracts set forth the volume of chips to be delivered, the price

[103] *Stokes, supra.*

per ton, and the time period involved. The court found that parol evidence of additional oral agreements allegedly made between the plaintiff and Georgia-Pacific was admissible because the 30-day written contracts did not encompass the complete and entire agreement **[**82]** between the parties. [104]

The Louisiana Fourth Circuit Court of Appeal summarized this exception that parol evidence is admissible to show that a writing is only part of an oral contract in *Kirsch v. Pier Orleans, Inc.:* [105]

> ***HN26***[] The parol evidence rule does not make [evidence of prior negotiations] irrelevant; the new agreement in writing makes [evidence of prior negotiations] irrelevant, but only if the written **[**83]** agreement is a complete and accurate statement of all of the terms agreed upon by the parties. [106]

In *Kirsch,* the court admitted evidence of prior negotiations into the record to show that the written agreement at issue was not the complete agreement made between the parties. The court reasoned that parol evidence is admissible to show that the parties did not intend to substitute one written contract for all of their prior negotiations and agreements. [107]

HN27[] Parol evidence may also be admitted to show a subsequent, new and independent agreement that was intended to modify the original contract. [108]

[84] [*552]** Under the law applicable to the facts of this case, the Court finds that parol evidence may be admitted in this case to prove the following issues: (1) fraud, misrepresentation, or error in their negotiations with Mercury; (2) a subsequent agreement between the parties that was independent of the disputed written agreement or intended to modify the original contract; (3) the written agreement only represented part of the entire agreement between the parties; and (4) a subsequent and valid oral agreement was entered into between the parties.

The parties also argue over whether the integration clause contained in the disputed Sales and Service Agreements precludes the use of parol evidence. The presence of a merger clause in a contract does not preclude the use of parol evidence *per se.* Instead, the court must look at the facts of the individual case to determine if the merger clause "compel[s] a conclusion that [it] correctly reflected the parties' intentions and should thus be enforced as written." [109] ***HN28***[] The Fifth Circuit, applying Louisiana law, has held that a merger clause precludes evidence of agreements made outside of the written contract. Thus, in *Omnitech Intern.* **[**85]** *, Inc. v. Clorox Co.,* [110] the Fifth Circuit precluded the use of parol evidence to prove alleged oral representations and subsequent oral

---

[104] These contracts only regulated the volume and movement of the wood chips. Thus, parol evidence of other agreements made between the parties was admissible. *Id. at 768*.

[105] *362 So.2d 1182 (La.App. 4 Cir. 1978)*.

[106] *Id. at 1184*.

[107] *Id. at 1185*.

[108] *Anzalone v. Gregory, 334 So.2d 504, 506 (La.App. 1 Cir. 1976)*. In *Anzalone v. Gregory,* the general and electrical contractors filed suit under the *Private Works Act* against the homeowner. The original plans called for an elaborate electrical system. After further negotiations, the parties agreed on a basic electrical system. The court rejected the homeowner's argument that parol evidence of this subsequent agreement was inadmissible. The court held that parol evidence is admissible to show a subsequent, new and independent agreement.

[109] *Omnitech, supra at 1328*.

[110] *Omnitech, supra.*

modifications because the disputed contract at issue contained a merger clause that only allowed it to be modified in writing. [111]

[86]** In contrast to the *Omnitech* case, the Fifth Circuit did hold in *Stokes v. Georgia-Pacific Corp.* that "parol evidence is admissible to prove a non-integrated side agreement." [112] In *Stokes,* the court found that parol evidence is admissible, even when a written contract contains an integration clause, if the facts showed the parties did not intend to substitute one written contract for all of their prior negotiations and agreements and the written agreement was not assented to as a complete integration. [113]

The integration clause contained in the disputed Sales and Service Agreement entered into between Water Craft and Mercury provided that the agreement could only be "amended or modified. . . by written instrument." [114] Though parol evidence could be used to show this agreement **[**87]** did not represent the full agreement **[*553]** between plaintiffs and Mercury Marine, this integration clause clearly shows that the parties intended this written agreement to be the complete understanding between them and could only be amended or modified in writing. The *Omnitech* and *Talbert-Siebert* cases, as well as the Fifth Circuit's recent decision in *Drs. Bethea,* all support a decision not to consider parol evidence in this case, especially in light of the integration clause's specific instruction on how amendments and modifications were to be made to this agreement. However, *Stokes* supports this Court's decision to allow parol evidence to be admitted to establish that a non-integrated side agreement existed between the plaintiffs and Mercury.

Considering the above legal principles, the Court cannot consider the parol evidence submitted by the plaintiff which related to the preliminary discussions between Glascock, Martrain and Rohrbach. The integration clause contained **[**88]** in the Sales and Service Agreements clearly shows that the parties intended for this document to supercede all prior agreements between Water Craft and Mercury Marine. The Court also finds that it cannot consider any evidence of the alleged promises made by Rohrbach prior to the execution of the Sales and Service Agreements because the integration clause effectively superceded any discussions that Glascock and Martrain had with Rohrbach. In short, the Court finds that the agreement entered into between Water Craft and Mercury was a comprehensive document meant to cover virtually every facet of the relationship between the parties.

The Court must now determine whether the subsequent representations made to Glascock and Martrain by Randolph, Koenen, Schmiedel, and other Mercury representatives after approximately March or April 1997, can be admitted into evidence. Specifically, the Court finds that discussions between Glascock and Martrain with Mercury representatives regarding certain discounts and incentives that they would receive as Mercury dealers are not admissible because the Sales and Service Agreements determined the discounts and incentives that Glascock and Martrain were **[**89]** to receive. The integration clause specifically set forth a method to subsequently modify these

---

[111] The Court did not admit parol evidence here because the merger clause had defined the agreed-upon means by which the parties' obligations could be modified. *Id. at 1328*. Recently, the Fifth Circuit applied *Omnitech* in the context of a claim for detrimental reliance in *Drs. Bethea v. St. Paul Guardian Ins. Co., 376 F.3d 399, 2004 WL 1464637 (5th Cir. 2004)*. This decision did not deal directly with parol evidence or a breach of contract claim; however, it did use an integration clause to preclude claims for detrimental reliance and unjust enrichment. *Drs. Bethea* illustrates the importance that the Fifth Circuit places on only looking at a contract dispute in the context of the four corners of the document whenever the disputed document is an unambiguous, fully-integrated agreement. *See also* *Talbert-Siebert Ent., Inc. v. Shell Oil Company, 1992 U.S. Dist. LEXIS 8033, 1992 WL 119916, *2 (M.D.La. 1992)* (Parker, J.), *aff'd,* *995 F.2d 224 (5th Cir. 1993)* (Refused to allow parol evidence in when "the integration clause [forbade] consideration of any oral agreement either before or after execution of [the written agreement].").

[112] *Stokes, supra at 768*.

[113] The Fifth Circuit required the integration clause to be "complete written integration" and an "accurate statement of all the terms agreed upon by the parties. *Id.*

[114] Rec. Doc. No. 326 at 9.

discounts and incentives. No evidence has been presented to show that this required procedure was followed to revise that section of the written agreements which pertained to discounts and incentives.

However, the Court does find that the representations made to Glascock and Martrain regarding whether or not Travis would be made a Mercury dealer are admissible under the parol evidence rule. The Court finds that the representations made by Randolph to Glascock and Martrain at the Hilton Hotel bar and Juban's Restaurant and the representations made by Schmiedel throughout his dealings with Water Craft were nonintegrated side agreements which were not included within the scope of the Sales and Service Agreements. These agreements were nonintegrated because the Sales and Service Agreements did not contain or represent the complete integration of subsequent representations made to Glascock and Martrain regarding Travis. Thus, the Court finds that the Sales and Service Agreements were not a complete and accurate statement of all the terms agreed upon by the parties. The representations and agreement **[**90]** by Mercury representatives to not make Travis a Mercury dealer, unlike the Rohrbach negotiations, was an agreement not contemplated under nor included within the language of the Sales and Service Agreements. These important facts distinguish these later representations from Rohrbach's representations which were integrated into the 1997 Sales **[*554]** and Service Agreement. Specific questions were asked by plaintiffs. In response thereto, specific promises were made by Mercury in response to these questions. Mercury's specific responses and promises that it was not going to make Travis a Mercury dealer constitute separate contracts. Under the unique facts of this case, the Court finds that plaintiffs have a right to introduce parol evidence to prove that these nonintegrated but very important and pertinent promises formed contracts separate and apart from the Sales and Service Agreements.

The Court further finds that the conversations between Glascock and Martrain and Koenen regarding extra financing can also be admitted as parol evidence under the facts of this case. Although it can be argued that details regarding financing may be covered by the Sales and Service Agreements, the Court concludes **[**91]** that these specific conversations and promises were made at a very important time and circumstance and constitute nonintegrated and separate agreements under the facts of this case. Specifically, the facts indicate that the circumstances were substantially different at this crucial time when Water Craft was engaged in very serious negotiations with Mercury regarding whether it should close and whether it would get financing to remain open. The evidence reveals that these conversations with and representations by Mercury did occur. Glascock and Martrain were ready to close LA Boating. However, the testimony indicates that something important occurred which made them change their decision to close LA Boating. The Court finds the representations by Koenen that extra financing would be available from Mercury to keep the LA Boating store afloat were the catalyst which caused Glascock and Martrain to decide not to close LA Boating at that time. At this point, the cause of the agreement was to keep the entire entity of Water Craft running despite the economic troubles facing LA Boating. Another cause of the agreement at this critical stage of the case was to keep LA Boating running so that **[**92]** it would eventually become the powerhouse Mercury dealer in the Baton Rouge market which Mercury desired. These causes are entirely different from the cause that existed for Glascock and Martrain when they entered the Sales and Service Agreements. Thus, the Court will permit the introduction of parol evidence of the financing negotiations between Glascock and Martrain and Koenen as a nonintegrated side agreement.

Having determined what parol evidence is admissible, the Court now turns to a discussion of whether the, plaintiffs have proven their breach of contract claims by a preponderance of the evidence. The Court finds that Mercury did not breach any contractual obligation it had to the plaintiffs under the Sales and Service Agreements. This preliminary finding is an easy decision for the Court to make because the plaintiffs did not introduce any evidence to prove that the obligations required under these agreements were not fulfilled or breached. Instead, the plaintiffs chose to introduce evidence of promises made by Mercury representatives to give them the best discounts, not to make Travis a Mercury dealer, and promises of extra financing into evidence. Since all of this evidence **[**93]** has either been declared inadmissible under the parol evidence rule or declared to be a nonintegrated side agreement, separate from the Sales and Service Agreements, the Court finds that the Sales and Service Agreements entered into between Mercury and Water Craft were not violated.

The Court also finds that plaintiffs' claim that Mercury breached an oral contract with Water Craft by making Travis a Mercury dealer is without merit. The Court concludes that no such contract existed **[*555]** under the facts presented in this case. The Court does find that representations were made to Glascock and Martrain in early 1997 by Mercury representatives that Travis would not be made a Mercury dealer. This important finding and determination is very relevant to plaintiffs' detrimental reliance claim and will be discussed in great detail later in this opinion when the Court considers the detrimental reliance claim. While this finding is important to the detrimental reliance claim, it does not prove that a valid contract existed between the plaintiffs and Mercury that Travis would not be made a Mercury dealer. The evidence and testimony presented fail to show that there was ever a meeting of the minds **[**94]** between the parties that Mercury was obligated not to make Travis a dealer. Instead, Randolph's assertions that Travis would not become a Mercury dealer were misrepresentations that prompted Glascock and Martrain to continue operating LA Boating in the Baton Rouge market. While these misrepresentations cannot be sanctioned by the Court, they did not constitute a complete and valid contract between the parties that would support a claim for breach of contract.

Similarly, the representations made by Schmiedel to Glascock and Martrain that Travis would not become a Mercury dealer were largely based on misinformation. The Court finds that Schmiedel was initially just reporting what he had heard from his Mercury superiors - that Travis was not going to be made a Mercury dealer. However, once Schmiedel began giving Glascock and Martrain "lip service" at the direction of his Mercury superiors, this misinformation became a misrepresentation. While Schmiedel's misrepresentations are important on the detrimental reliance claim, they do not support plaintiffs' breach of contract claim.

The Court also finds the promises of Koenen and other Mercury representatives to keep a sinking LA Boating **[**95]** afloat did not amount to a complete and valid contract that could be breached between the plaintiffs and Mercury. These representations of extra financing are relevant to the detrimental reliance claim and will be discussed in more detail later in this opinion. Though Martrain may have relied on Koenen's optimism and promises of financing to the plaintiffs' detriment, a contract was never formed.

Because the Court finds that Mercury did not breach the Sales and Service Agreements and that no valid oral contract was ever formed between Mercury and the plaintiffs for additional interest free financing or to not make Travis a Mercury dealer, the Court finds that the plaintiffs have failed to satisfy their required burden to prove their breach of contract claims by a preponderance of the evidence. Therefore, the Court dismisses plaintiffs' state law contract claims.

2. Detrimental Reliance

The plaintiffs have also filed a claim based on detrimental reliance. Plaintiffs argue that they relied to their detriment on various misrepresentations and promises made by Mercury and their representatives during the course of their relationship with Mercury in opening and operating a Baton **[**96]** Rouge dealership. Thus, plaintiffs contend they are entitled to damages under a theory of detrimental reliance.

HN29[] *Article 1967 of the Louisiana Civil Code* provides that "[a] party may be obligated by a promise when he knew or should have known that the promise would induce the other party to rely on it to his detriment and the other party was reasonable in so relying." [115] This article of the **[*556]** Louisiana Civil Code sets forth Louisiana's version of the doctrine known as detrimental reliance, and is "designed to prevent injustice by barring a party from taking a position contrary to his prior acts, admissions, representations, or silence." [116] **[**97]** Some Louisiana courts have characterized detrimental reliance as being a disfavored doctrine and have held that it should be

---

[115] *La. Civ. Code art. 1967*.

[116] *Andrus v. Andrus, La. App. 93-856, 634 So. 2d 1254, 1258 (La. App. 3 Cir. 3/2/94)*.

applied sparingly because it bars the normal assertion of rights otherwise present. [117] While some courts may be reluctant to apply the doctrine, it is clear that the Louisiana jurisprudence has approved its use in appropriate cases.

HN30[] Louisiana law requires a plaintiff to prove the following to recover for a claim of detrimental reliance: (1) a representation was made; (2) there was justifiable reliance thereon; and (3) there was a change of position to one's detriment because of the reliance. [118] **[**98]** The plaintiff bears the burden of proving each of these elements by a preponderance of the evidence. [119]

HN31[] In determining if the party claiming detrimental reliance was justified in his reliance thereon, the courts generally look to whether the reliance was reasonable under the circumstances. Under Louisiana law, reasonableness is determined by examining factual circumstances like the commercial sophistication of the party claiming detrimental reliance and the negotiations and/or documents the party relied on. [120] In some cases, courts have found that the presence of an integration clause in a contract is a factual circumstance that makes one's reliance unreasonable. For example, the Fifth Circuit, applying Louisiana law, held in *Omnitech* that it is unreasonable as a matter of law for a party to rely on representations or promises made outside of a written agreement if the agreement has been reduced to writing, contains an integration clause, and such representations or promises were made outside of the scope of the fully-integrated written agreement. [121] Recently, the Fifth Circuit, relying on *Omnitech,* **[**99]** found that a plaintiff's reliance on promises made outside of an unambiguous, fully-integrated agreement was unreasonable as a matter of law in *Drs. Bethea v. St. Paul Guardian Ins. Co.* [122] **[**100]** Similarly, in *Talbert-Siebert Ent., Inc. v. Shell Oil Company,* [123] Judge John V. Parker found that an integration clause barred a claim for detrimental reliance since the reliance was on alleged representations not memorialized in the written contract. [124] It is noteworthy that in each **[*557]** of these cases the courts required complete and full integration of all of the agreements made between the parties into the disputed documents for the integration clause to effectively preclude a claim for detrimental reliance. Complete integration is a factual issue and is not an automatic finding the courts generally make. [125]

HN32[] In order for the plaintiffs to prove that they changed their position to their detriment in reliance on a representation from Mercury, the Louisiana courts require proof that the plaintiffs suffered damages not adequately

[125] *See e.g. Stokes, supra at 768*. The *Stokes* decision and its illustration of how the Fifth Circuit has found the existence of non-integrated, side agreements in certain factual settings is discussed fully in Section II(B)(1) of this opinion, *supra.*

compensated by the defendant. [126] Essentially, this means that damages must be proven in order for a claim of detrimental reliance to be sustained. [127]

[101]** Thus, to sustain their claim for detrimental reliance against Mercury, the plaintiffs must prove by a preponderance of the evidence that (1) Mercury made oral representations that it would not contract with other dealers, specifically Travis, and would supply plaintiffs with financing; (2) the plaintiffs justifiably relied on these representations; and (3) the plaintiffs' positions changed to their detriment because of this reliance. Further, the plaintiffs must prove that their reliance on these alleged misrepresentations made by Mercury was reasonable under the facts and circumstances of this case.

The Court finds that the plaintiffs have proven their claim for detrimental reliance by a preponderance of the evidence. As a preliminary matter, the Court finds that the presence of an integration clause in the Sales and Service Agreements entered into between Water Craft and Mercury does not make Glascock and Martrain's reliance on Mercury's representations automatically unreasonable under the unique facts of this case. ***HN33***[] A per-se rule that an integration clause nullifies any claim for detrimental reliance contradicts the very nature of a claim for detrimental reliance. This is particularly **[**102]** true under the facts of this case where it is clear that plaintiffs asked specific questions about matters of particular importance and representatives of Mercury intentionally gave false and misleading answers to these questions which clearly caused the plaintiffs to take a different course of action to their detriment. The purpose of this remedy is to afford a party relief whenever no contract is found. ***HN34***[] The existence of a promise and reasonable reliance on that promise to one's detriment are the only requirements needed to sustain a claim for detrimental reliance. [128] **[**104]** Based on the unique facts of this case and the remedies available to plaintiffs, the equitable nature of detrimental reliance should be applied herein and the integration clause in the contract does not automatically make plaintiffs' reliance unreasonable on this claim for detrimental reliance. Further, the Court finds that the *Omnitech, Talbert-Siebert,* and *Drs. Bethea* cases did not fix a per-se unreasonable rule. Rather, the courts in these cases relied on the presence of an integration clause to determine that the parties' reliance was unreasonable under the factual circumstances of those cases. A careful **[**103]** reading of the three opinions reveals that they do not **[*558]** mandate a court to find that a claim for detrimental reliance is barred in every case where there is an integration cause in a contract. [129] Instead, these decisions only preclude detrimental reliance claims when the disputed contract was a fully integrated document. As noted earlier in this opinion, this Court has found that the Sales and Service Agreements were not fully integrated documents that contained **all of the agreements** made between plaintiffs and Mercury representatives. This Court's decision to apply the detrimental reliance doctrine is not only appropriate under the facts of this case, but is further supported by the Court's conclusion that there were nonintegrated agreements made by the parties. Thus, the Court finds that plaintiffs' detrimental reliance claim is not barred because there was only an integration clause in **some of the agreements** which exist in this case.

The applicable law set forth above and the facts of this case clearly support a finding that Glascock and Martrain relied to their detriment upon representations made by Randolph, Schmiedel, and other Mercury representatives that Travis would not be made a Mercury dealer. The Court further finds that the promises and statements upon which the plaintiffs relied were made in early 1997 when plaintiffs met with Randolph and Bill Burns at the Hilton Hotel bar, and Juban's Restaurant. At these meetings, Randolph and Burns did specifically promise the plaintiffs

that Travis would not be made a Mercury dealer in response to direct questions plaintiffs asked on this important factor. It is also clear that Glascock and Martrain relied on these promises **[**105]** and were reasonable in doing so. Glascock and Martrain consistently testified that they were well aware of the powerful presence of Travis in the marine industry and what Travis would do in the Baton Rouge area. The Court finds these experienced businessmen would not have invested the amount of money and other resources they did in their Baton Rouge dealership had they known that Travis would be competing with them in selling Mercury engines. To hold otherwise would cause this Court to sanction the inappropriate and misleading statements, actions and inactions of Mercury and its authorized representatives. This Court is not prepared to do so under the facts of this case.

The Court finds the Hilton and Juban meetings to be very important evidence to support the plaintiffs' detrimental reliance, fraud and misrepresentation claims for two reasons. First, these meetings were conducted with Mercury executives. Unlike the Rohrbach negotiations, the plaintiffs were being told in a very specific and direct way that Travis would not be made a Mercury dealer from the "horse's mouth." Second, the evidence shows that both Randolph and Bill Seely caused Glascock and Martrain to be concerned about **[**106]** the possibility of Travis becoming a Mercury dealer. It was well-known that Randolph and Seely had worked for OMC and they had been responsible for bringing Travis to OMC. It was only reasonable and indeed understandable for the plaintiffs to speculate and be concerned that Seely and Randolph would use their prior relationship with Travis to convince Travis to become a Mercury dealer. Thus, when Glascock and Martrain heard from Randolph that Travis would not become a Mercury dealer, Glascock and Martrain gained the confidence to proceed with their Baton Rouge dealership and make the necessary **[*559]** investments knowing that Travis would not become a Mercury dealer in Baton Rouge. Plaintiffs were justified in relying on these statements and acted appropriately under the facts of this case.

The credibility of the witnesses who testified was taken into consideration by the Court in reaching its findings of fact in this case. The Court has no doubt that Randolph made these promises to Glascock and Martrain in early 1997 considering the manner that Randolph testified at trial and the Court's belief that Randolph was not a credible witness during these proceedings. Randolph's failure to deny that **[**107]** he told the plaintiffs Travis would not be a Mercury dealer is difficult to understand. He did testify that he was "not sure" if Glascock and Martrain had even asked him about Travis. Considering the evidence, the Court simply does not believe that Randolph was "not sure" about this very important fact since the evidence reveals that Glascock and Martrain consistently testified that they had voiced their concerns about Travis being a Mercury dealer from the very beginning of their negotiations with Rohrbach. Whether Travis would become a Mercury dealer, and how Glascock and Martrain would react to such an event was the subject of numerous emails admitted in evidence before the Court. For Randolph to testify that he could not remember the crucial detail of whether Glascock and Martrain ever asked him about Travis supports the Court's decision to discount his credibility.

During his later testimony, Randolph again testified he was "not sure" what he had told Glascock and Martrain about Travis. Because the Court became so concerned with Randolph's carefully crafted testimony and his inability to recall important details about his discussions with Glascock and Martrain, the Court asked **[**108]** Randolph to specifically tell the Court what he had told Glascock and Martrain about Travis:

> Q. MR. RANDOLPH, DID YOU TELL THEM AT ANY TIME DURING THAT MEETING THAT MERCURY WAS ALSO PLANNING AND DEVELOPING A STRATEGY TO CONVERT TRAVIS TO A MERCURY DEALER?
> A. I AM NOT SURE IF THAT CONVERSATION CAME UP AT THAT PARTICULAR TIME, BUT THAT WAS AN ONGOING CONVERSATION WITHIN MERCURY AND HAD BEEN FOR, AT THIS POINT, TEN YEARS.
> Q. I UNDERSTAND THAT, BUT DID YOU TELL THAT TO MR. GLASCOCK AND MR. MARTRAIN?
> A. I AM NOT SURE I WOULD HAVE, IT WOULD HAVE BEEN A POINT FOR ME BRINGING THAT UP TO THEM.
> Q. MR. RANDOLPH, DO YOU REMEMBER SITTING AT THE HILTON IN THE BAR AND HAVING A DRINK WITH MR. MARTRAIN THE SAME NIGHT Y'ALL WENT TO DINNER AT JUBAN'S RESTAURANT, AND HE EXPRESSED SOME CONCERN TO YOU ABOUT ARE YOU GOING TO BE MAKING TRAVIS A DEALER, BECAUSE I COMPETED AGAINST THEM WHEN THEY WERE AN OMC DEALER? DO YOU REMEMBER HIM ASKING YOU DIRECTLY, ARE Y'ALL GOING TO MAKE THEM A DEALER?

A. THAT MAY HAVE BEEN A CONVERSATION. I DON'T RECALL EXACTLY WHAT WAS SAID THAT NIGHT. I DO RECALL THE EVENING. YES.

Q. AND YOU NOW MAY RECALL THAT HE EVEN ASKED THAT QUESTION TO **[**109]** YOU?

[*560] A. IF HE HAD ASKED ME THAT QUESTION, MY RESPONSE AT THAT TIME WOULD HAVE BEEN THAT YOU ARE THE DEALER THAT WE ARE SIGNING FOR MERCURY TODAY.
Q. AND YOU DIDN'T TELL HIM THERE WAS A PLAN IN PLACE TO MAKE TRAVIS A DEALER, DID YOU?
A. I DON'T KNOW THAT IT WOULD HAVE COME UP IN THE CONTEXT OF THE CONVERSATION.
THE COURT: WELL, THAT ISN'T THE QUESTION. THE QUESTION IS DID YOU TELL HIM?
A. I DON'T RECALL. [130]

The above testimony is just one example of the evasive manner in which Randolph testified and supports the Court's decision to question Randolph's credibility and testimony at the trial. Even after the Court questioned Randolph about his representations, he could not recall what he had told Glascock and Martrain about Travis. The Court does not believe this testimony. The testimony presented and the other evidence admitted during the trial clearly shows that Randolph was very instrumental in convincing Travis to become a Mercury dealer. Randolph covered up the possible deal with Travis to the plaintiffs. Because of the false promise and misrepresentations Randolph made to the plaintiffs, the plaintiffs invested a lot of money into their Baton Rouge **[**110]** dealership without being told the true facts by Mercury.

The Court further finds that the plaintiffs' claim for detrimental reliance is also supported by the representations that Schmiedel made to Glascock and Martrain. Because of his dealings with Glascock and Martrain and his knowledge of their business, Schmiedel testified that he thought that the Travis deal was clearly unfair to Glascock and Martrain despite his employment by Mercury. Schmiedel denied the existence of a Travis deal with Mercury to most of his dealers at the direction of Mercury representatives even though he knew a deal between Travis and Mercury was in the making. In fact, Schmiedel testified that Mercury representatives had told him to give "lip service" to Mercury dealers when questioned about the possibility of a deal between **[**111]** Mercury and Travis. Schmiedel's testimony also reflects that he was accused by Mercury representatives of not being a "team player" for questioning the Travis deal and the effect that it would have on other Mercury dealers.

Though Schmiedel was cross examined thoroughly concerning these damaging statements, the Court believes that such statements were made. The Court also finds that the plaintiffs relied on Schmiedel's promises and misrepresentations to their detriment. Glascock and Martrain continued to invest capital into the Baton Rouge dealership based on their reasonable and justified belief that these investments would pay off without the Travis presence in the Baton Rouge market. It is clear that Glascock and Martrain invested in and opened their Baton Rouge dealership because they had relied to their detriment on the misleading promises that Mercury representatives had made to them that Travis would not be a Mercury dealer.

Finally, the Court finds that the representations made to Glascock and Martrain by Koenen around the August 1998 time frame when Glascock and Martrain were considering closure of the Baton Rouge **[*561]** dealership, also support the plaintiffs' claim for detrimental **[**112]** reliance. The Court finds that, in August 1998, Glascock went to the bank with every intent of closing the Baton Rouge dealership because it was in financial trouble. [131] Further, the Court finds that the efforts and statements of Schmiedel and Koenen were instrumental in Glascock and Martrain deciding not to close the Baton Rouge dealership at this time. The testimony about various meetings, telephone conversations, and emails admitted into evidence clearly support the Court's finding. Further, the Court finds that Martrain's version of his discussion with Koenen regarding the need for financing is the most accurate version of what occurred between Koenen and Martrain. The Court believes that Koenen brought up the zero-interest

---

[130] Trial Transcript at 103:12-104:19, Water Craft Management, L.L.C., *et. al.* v. Mercury Marine (A Division of Brunswick Corporation), *et. al.* (Civ. Action No. 99-1031-B-M1) (M.D.La. August 19, 2003).

[131] The Court knows that other factors have also caused the financial losses of LA Boating. The issue of what damages were caused by Mercury will be decided at a later date.

financing proposal in an effort to keep Glascock and Martrain from closing the Baton Rouge dealership. The Court further finds that Koenen's careful testimony to the contrary is somewhat suspect, especially since she testified under the watchful eyes of her Mercury superiors. The Court also finds that the only reason that Glascock and Martrain kept the Baton Rouge dealership open at this time was because of the insistence of Koenen and Schmiedel and the promises **[**113]** of extra financing Koenen made to keep the Baton Rouge dealership open. When Mercury failed to provide this financing, Glascock and Martrain sustained some damages, though the determination of the amount of damages is not before the Court at this time. Thus, the discussions regarding extra financing to keep the Baton Rouge dealership open in August 1998 support the plaintiffs' claim for detrimental reliance.

In conclusion, the Court finds that the plaintiffs have proven their claim for detrimental reliance by a preponderance of the evidence. This conclusion is based upon: (1) the testimony regarding the meetings at the Hilton Hotel bar and Juban's Restaurant; (2) representations made by Schmiedel to the plaintiffs; and, (3) the efforts of Koenen and Schmiedel to convince Glascock and Martrain not to close the Baton Rouge dealership in August **[**114]** 1998. It is also important to note that the Court's decision to find that plaintiffs have proven their detrimental reliance claim was not based on any alleged misrepresentations made by Rohrbach or other acts or statements made before the meetings held at the Hilton Hotel bar and Juban's Restaurant.

Before the Court turns to a discussion of plaintiffs' other claims, the Court believes it is necessary to address one additional argument made by Mercury on the detrimental reliance claim. Mercury has argued that the plaintiffs' reliance on its alleged promises not to enter into contracts with other dealerships, such as Travis, was unreasonable because such an agreement would have violated state law, and specifically *article 1968 of the Louisiana Civil Code and the Louisiana Used Motor Vehicle Dealers and Marine Product Dealers Act*. [132] Mercury contends that a contract is null if it is based on an unlawful cause. [133] Louisiana courts have interpreted this principle to mean that contracts with a cause that violates a state statute are null. [134] **[**116]** Mercury says that the **[*562]** 1996 version of the Louisiana Used Motor Vehicle Dealers and Marine Product Dealers Act [135] prohibited it from agreeing **[**115]** not to enter into contracts with other dealers to sell Mercury products. Though Mercury has presented several cases saying that a cause that violates a state statute could make a contract null, it has not presented any cases that say that reliance on such assertions is *per se* unreasonable in a claim for detrimental reliance. Mercury's argument also fails to acknowledge the well settled legal principle that a valid contract is not necessary to sustain a claim for detrimental reliance. Because of Mercury's failure to fully develop this argument outside of the context of a breach of contract claim, the Court finds this argument to be without merit on the detrimental reliance claim.

3. Fraudulent Misrepresentations

The plaintiffs also contend that the oral misrepresentations and promises made by Mercury were fraudulent under Louisiana law. Although the Court has previously dismissed all tortious misrepresentation claims, [136] **[**117]** it still must decide whether Mercury made fraudulent misrepresentations to the plaintiffs which caused plaintiffs to sustain

damages.*HN35*[] Louisiana recognizes a cause of action for intentional fraudulent misrepresentation as to present or past facts. A party who is injured by the fraud and deceit of another has a cause of action for damages. [137] The action for fraudulent misrepresentation may be brought either as a breach of contract or tort action. If the cause of action is under contract, the plaintiff's damages are limited to actual pecuniary loss proven by a preponderance of the evidence. If the action lies in tort, the plaintiff may recover non-pecuniary losses as well, but only if he proves such losses by a preponderance of the evidence. [138]

HN36[] The Louisiana Civil Code defines fraud as "a misrepresentation or a suppression of the truth made with the intention either to obtain an unjust advantage for one party or to cause a loss or inconvenience to the other." [139] Fraud does not vitiate consent when the party against whom it is directed could have ascertained the truth without difficulty, inconvenience, or special skill. However, this exception does not apply when a relation of confidence reasonably induced a party to rely on the other's assertions or representations. **[**118]** [140] The commercial sophistication of the parties is considered by the Court when determining if a party could have ascertained the truth without difficulty, inconvenience, or special skill. [141]

HN37[] The Fifth Circuit has set forth the following elements to sustain a claim for fraud under Louisiana law: (1) a misrepresentation of material fact; (2) made with the intent to deceive; and (3) causing justifiable reliance with resultant injury. [142] **[*563]** The requirement that a party justifiably rely on the alleged fraudulent misrepresentation is required to sustain the claim. [143] To determine whether or not plaintiffs' reliance was justifiable, the Court must conduct the same reasonableness inquiry it previously made on the detrimental reliance claim. A fraud claim based on unfulfilled promises or statements as to future events will not satisfy the justifiable reliance requirement. **[**119]** However, a claim of fraud may be predicated on promises made with the intention not to perform at the time the promise is made. [144] Thus, in order for the Court to determine whether Mercury made fraudulent misrepresentations to the plaintiffs, the Court must examine the facts and decide whether Mercury simply made unfulfilled promises, or whether Mercury never intended to honor the alleged misrepresentations it made to plaintiffs.

To prove their **[**120]** claim for fraudulent misrepresentation against Mercury, the plaintiffs are required to prove that (1) Mercury made misrepresentations of material fact to them during their business relationship; (2) such representations were made by Mercury Marine with the intent to deceive the plaintiffs; and (3) the plaintiffs justifiably relied on these misrepresentations and such reliance caused them injury. The plaintiffs must also prove that these misrepresentations were fraudulent. In other words, the plaintiffs must show that Mercury misrepresented facts to them or suppressed the truth in order to obtain an unjust advantage over plaintiffs or to cause plaintiffs loss

[144] *Sun Drilling, supra* at 1152.

or inconvenience. The plaintiffs must also show they could not have ascertained the truth without difficulty, inconvenience, or special skill based on their commercial sophistication. Finally, the plaintiffs must show that their reliance on the alleged misrepresentations was justifiable and reasonable under Louisiana law.

The Court finds that the plaintiffs have proven their claim for fraudulent misrepresentation by a preponderance of the evidence. Many of the factual findings the Court made in deciding the detrimental reliance **[**121]** claim earlier in this ruling are also applicable to the plaintiffs' claim for fraudulent misrepresentations. These prior findings are adopted by reference and will not be repeated in detail in this part of the opinion. The Court finds that Randolph did know of the possibility that Travis would become a Mercury dealer at the time that he told Glascock and Martrain the exact opposite during the meetings held at the Hilton Hotel bar and Juban's Restaurant. This conclusion is supported by the fact that Randolph was later extensively involved in signing Travis to be a Mercury 'dealer. He also testified that there had been talk of making Travis a Mercury dealer in the Mercury circle for the past ten years. Randolph also failed to tell Glascock and Martrain the truth once negotiations did begin with Travis. The Court finds that the statements regarding Travis were false when made because the testimony and evidence presented throughout this case supports a finding that Mercury intended to make Travis one of its dealers even when it was negotiating with plaintiffs. The testimony of Schmiedel also establishes that Mercury executives encouraged Schmiedel to give "lip service" to Mercury dealers, **[**122]** like Glascock and Martrain, when questioned about the possibility of Travis becoming a Mercury dealer. These facts clearly show that Mercury never intended to honor its representations **[*564]** to Glascock and Martrain that Travis would not become a Mercury dealer. The Court finds as a matter of fact and law that the representations Mercury representatives made to Glascock and Martrain about Travis were not merely unfulfilled promises, but were fraudulent misrepresentations.

The Court also finds that Mercury made misrepresentations of material fact to the plaintiffs when Randolph, Schmiedel, and other Mercury representatives told plaintiffs that Travis was not going to be made a Mercury dealer or was not in the process of becoming a Mercury dealer. It is clear that these misrepresentations were made with the intent to deceive the plaintiffs. The Court's finding is supported by the evidence which established that Mercury representatives took affirmative steps to shield the truth about a possible Travis deal from Glascock and Martrain. Finally, the Court finds that the plaintiffs were justified in relying upon the misrepresentations made by the Mercury representatives. [145] Plaintiffs were also **[**123]** justified in believing that Mercury wanted to put all of their market power into one super-dealer who would then compete with Travis, which at the time was an OMC dealer, a big competitor of Mercury. Mercury was then able to secretly pursue Travis with the hope and expectation that the powerful marine dealer would eventually be a Mercury dealer, while at the same time, having the plaintiffs locked up as a Mercury dealer and investing time, money, and efforts to become Mercury's only dealer in the Baton Rouge market. Glascock and Martrain justifiably and properly believed Mercury's promises under the facts of this case. Thus, the plaintiffs were reasonable in relying on the misrepresentations made to them by Mercury representatives. Therefore, the Court finds that the plaintiffs have proven their claim based on fraudulent misrepresentation by a preponderance of the evidence.

[**124] C. The Counterclaims

Mercury has filed two counterclaims against Glascock and Martrain. Each of Mercury's claims will be discussed separately.

1. Counterclaim I

Counterclaim I consists of several claims Mercury has filed against the plaintiffs. The plaintiffs have not presented any credible evidence in opposition to Mercury's claims.

---

[145] This is particularly so under the facts of this case because the plaintiffs asked specific and direct questions about whether Travis would be made a Mercury dealer. Despite knowing plaintiffs wanted to know the true status of Travis' negotiations with Mercury, Mercury representatives chose to misrepresent the truth.

Mercury's first claim is based on a promissory note signed by Glascock and Martrain in the amount of $ 79,117.32. The record shows Mercury is entitled to recover this amount plus attorneys fees in the amount of 10%. Mercury also seeks interest on this amount. Mercury is entitled to recover prejudgment interest from April 11, 1999 at the rate of 18% to the date of judgment. Interest from date of judgment shall be awarded as permitted by federal law.

Mercury also asserts a claim in the sum of $ 11,379.75 against Water Craft, Glascock and Martrain. The Court finds Mercury is subrogated to the rights of MMAC and is entitled to recover this sum from Water Craft, Glascock and Martrain. The Court also finds that Mercury is entitled to interest at the rate of 6% from the date the sum was due until the date of judgment. Interest from date **[**125]** of judgment until the sum is paid shall be in accordance with federal law. The Court also finds **[*565]** Mercury is entitled to attorneys fees in the sum of 10% on this claim.

Mercury seeks the sum of $ 3,855.12 under the 1997 and 1998 Sales and Service Agreements of Water Craft d/b/a Louisiana Boating and its guarantors, Glascock and Martrain. Mercury is entitled to recover this amount from Water Craft d/b/a Louisiana Boating, Glascock and Martrain.

Finally, Mercury seeks to collect the sum of $ 6,076.67 due on an open account. The Court finds Mercury is entitled to recover this sum from Glascock and Martrain.

2. Counter-Claim II

There is a second counterclaim asserted against Boating Centres, Inc. d/b/a Slidell Boating debt of $ 26,576.94 and Glascock. This sum can only be collected against Glascock under the law and facts of this case. Any claim against Boating Centres, Inc. d/b/a Slidell Boating must be asserted in a separate action. The Court finds Mercury is entitled to recover $ 26,576.945 with interest from the date of judgment until paid from Glascock.

III. Summary and Conclusions

Based on the factual and legal conclusions set forth above, the Court finds that: **[**126]** (1) the plaintiffs have failed to prove the antitrust claims by a preponderance of the evidence; (2) even if the plaintiffs have proven their antitrust claims, Mercury has proven the meeting competition defense by a preponderance of the evidence, which absolves it of any antitrust liability; (3) plaintiffs have failed to prove their state law breach of contract claims by a preponderance of the evidence; (4) plaintiffs did prove their state law detrimental reliance, fraud, and misrepresentation claims by a preponderance of the evidence; and (5) Mercury has proven that it is entitled to recover on its counterclaim against the plaintiffs.

Finally, the Court finds it will be necessary to proceed to trial to determine the amount of damages, if any, plaintiffs are entitled to recover from Mercury. However, the Court will allow the parties to advise the Court within fifteen (15) days whether they jointly wish the Court to enter a judgment under *Rule 54(b) of the Federal Rules of Civil Procedure* to allow the parties to appeal the Court's decision on the liability issues at this time or whether the parties wish to proceed with the trial on damages.

Should the parties wish to now proceed with **[**127]** a trial to determine the extent of the plaintiffs' damages, a trial date shall be scheduled by the Court after consultation with the parties.

HN1[] Evidence, Burdens of Proof

Section 7 of the Clayton Act, *15 U.S.C.S. § 18*, prohibits a merger between two companies where in any line of commerce or in any activity affecting commerce in any section of the country, the effect of such acquisition may be substantially to lessen competition, or tend to create a monopoly. Section 7 deals in probabilities, not certainties. To warrant injunctive relief under the Clayton Act, a challenged acquisition must be likely substantially to lessen competition. Although certainty is not required, § 7 does demand that a plaintiff demonstrate that the substantial lessening of competition will be sufficiently probable and imminent to warrant relief.

Mergers & Acquisitions Law > Antitrust > General Overview

HN2[] Grounds for Injunctions, Public Interest

The Federal Trade Commission (FTC) is empowered to seek preliminary injunctive relief preventing parties from consummating a merger until it has had an opportunity to adjudicate the merger's legality. *15 U.S.C.S. § 53(b)* provides for the grant of a preliminary injunction where such action will be in the public interest, as determined by a weighing of the equities and a consideration of the FTC's likelihood of success on the merits. The FTC is not required to prove, nor is a court required to find, that a proposed merger would in fact violate § 7 of the Clayton Act. The FTC need only show that there is a reasonable probability that the acquisition may substantially lessen competition. Proof of actual anticompetitive effects is not required. The FTC must show an appreciable danger of future coordinated interaction based on a predictive judgment. While proof of prior cooperative behavior is relevant, it is not a necessary element of likely future coordination in violation of § 7. The FTC must raise questions going to the merits so serious, substantial, difficult and doubtful as to make them fair ground for its thorough investigation, study, deliberation and determination in the first instance and ultimately by an appeals court. The FTC's burden is not insubstantial, and a showing of a fair or tenable chance of success on the merits will not suffice for injunctive relief.

HN3[] **Injunctions, Preliminary & Temporary Injunctions**

Because the public interest in effective enforcement of the antitrust laws is of primary importance, a showing of likely success on the merits will presumptively warrant an injunction. Conversely, absent a likelihood of success on the merits, equities alone will not justify an injunction.

HN4[] **Antitrust Statutes, Clayton Act**

The Federal Trade Commission (FTC) may establish a *15 U.S.C.S. § 18* violation by showing that a merger will produce a firm controlling an undue share of the relevant market and will result in a significant increase in the concentration of the market. Such a showing establishes a presumption that the merger will substantially lessen competition. Defendants can then rebut the presumption by producing evidence that market-share statistics produce an inaccurate account of the merger's probable effects on competition in the relevant market. If a defendant successfully rebuts the presumption of illegality, the burden of producing additional evidence of anticompetitive effect shifts to the government, and merges with the ultimate burden of persuasion which remains with the government at all times. Accordingly, plaintiffs have the burden on every element of their *§ 18* challenge, and a failure of proof in any respect will mean the transaction should not be enjoined.

Mergers & Acquisitions Law > Antitrust > General Overview

HN5[] **Relevant Market, Product Market Definition**

Only examination of a particular market, its structure, history, and probable future, can provide the appropriate setting for judging the probable anticompetitive effects of a merger. Hence, antitrust theory and speculation cannot trump facts, and even *15 U.S.C.S. § 53(b)* cases must be resolved on the basis of the record evidence relating to the market and its probable future. Analysis of the likely competitive effects of a merger requires determinations of: (1) the relevant product market in which to assess the transaction; (2) the geographic market in which to assess the transaction; and (3) the transaction's probable effect on competition in the relevant product and geographic markets.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Evidence > Burdens of Proof > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN6[] **Market Definition, Relevant Market**

The definition of the relevant market is necessary to identify that area of trade within which a defendant allegedly has acquired or will acquire an illegal monopolistic or oligopolistic position. A relevant market has two dimensions. First, the relevant product market identifies the product and services with which the defendants' products compete. Second, the relevant geographic market identifies the geographic area in which the defendant competes in marketing its products or service. The Federal Trade Commission bears the burden of proof and persuasion in defining the relevant market.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN7[] **Regulated Practices, Market Definition**

In determining relevant product markets, courts have traditionally emphasized two factors: the reasonable interchangeability of use by consumers and the cross-elasticity of demand between the product itself and substitutes for it. The general question is whether two products can be used for the same purpose, and if so, whether and to what extent purchasers are willing to substitute one for the other. Relevant markets will generally include producers who, given product similarity, have the ability to take significant business from each other. Determining interchangeability is relatively straightforward. Courts compare the use or function of a defendant's product with other products, and assess the degree to which buyers are willing to substitute those similar products for the test product. If consumers can substitute the use of one for the other, then the products in question will be deemed functionally interchangeable. Courts will generally include functionally interchangeable products in the same product market unless factors other than use indicate that they are not actually part of the same market.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN8[] **Regulated Practices, Market Definition**

After finding interchangeability in determining relevant product markets, courts look for cross-elasticity of demand. If a slight decrease in the price of product A causes a considerable number of customers of product B to switch to A, that would indicate that a cross-elasticity of demand exists between A and B and that they compete in the same product market. In defining relevant product markets, courts should exclude any other product to which, within reasonable variations in price, only a limited number of buyers will turn.

Mergers & Acquisitions Law > Merger Guidelines

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Mergers & Acquisitions Law > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

Mergers & Acquisitions Law > Antitrust > Market Definition

HN9[] **Antitrust, Horizontal Mergers**

The Federal Trade Commission's (FTC) Horizontal Merger Guidelines set forth an analytical framework for considering the issues of interchangeability and cross-elasticity of demand by defining a product market as a product or group of products such that a hypothetical profit-maximizing firm that was the only present and future seller of those products (monopolist) likely would impose at least a small but significant and nontransitory increase in price (SSNIP). In most contexts, the FTC considers a price increase of five percent to constitute a SSNIP. Courts also rely on several practical indicia to help identify the relevant product market. A relevant product market can exist within a larger market. Although courts sometimes refer to this as a "submarket," the term "submarket" can be used interchangeably with "relevant product market," and the analysis is the same regardless of which term is used. The indicia used to help identify the relevant product market include: industry or public recognition of a submarket as a separate economic entity, a product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized venders. Examination of such factors is helpful to augment the assessment of interchangeability and cross-elasticity of demand when determining the relevant product market.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Mergers & Acquisitions Law > Antitrust > Market Definition

Mergers & Acquisitions Law > Antitrust > General Overview

HN10[] **Regulated Practices, Market Definition**

Relevant market analysis is based on the narrowest market principle and begins by examining the most narrowly-defined product or group of products sold by merging firms to ascertain if the evidence and data support the conclusion that this product or group of products constitutes a relevant market. If not, the analysis shifts to the next broadest product grouping to test whether that is a relevant market. The process continues until a relevant market is identified. In a relevant market analysis, the hypothetical monopolist test is generally used to identify whether a small but significant price increase for the product tested would be profitable. The test assumes a five to ten percent price increase on the identified test product in the hands of a hypothetical monopolist and examines whether there will be a sufficient diversion or loss of sales to producers of another product to make that price increase unprofitable. If so, the market is too narrowly delineated. The market is appropriately defined when the price increase will be profitable to a hypothetical monopolist. To measure the volume of diverted sales needed to make a particular price increase unprofitable under the hypothetical monopolist test, economists generally perform a critical loss analysis, which is mathematically informative of the percentage of lost sales needed to defeat the hypothetical price increase.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN11[] **Regulated Practices, Market Definition**

A determination of the competitive market for commodities depends on how different from one another are the offered commodities in character or use, how far buyers will go to substitute one commodity for another. In determining interchangeability, therefore, a court must consider the degree to which buyers treat the products as interchangeable, but need not find that all buyers will substitute one commodity for another.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Mergers & Acquisitions Law > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

HN12[] **Relevant Market, Geographic Market Definition**

The relevant geographic market in which to examine the effects of a merger is the region in which the seller operates, and to which the purchaser can practicably turn for supplies. The relevant geographic market must both correspond to the commercial realities of the industry and be economically significant. The Federal Trade Commission's Horizontal Merger Guidelines also provide guidance for determining the relevant geographic market. The geographic market should be delineated as a region such that a hypothetical monopolist that was the only present or future producer of the relevant product at locations in that region would profitably impose at least a small but significant and nontransitory increase in price, holding constant the terms of sale for all products produced elsewhere. If buyers will respond to a small but significant and nontransitory increase in price (SSNIP) by shifting to products produced outside the proposed geographic market, and this shift is sufficient to render the SSNIP unprofitable, then the proposed geographic market will be too narrow. The relevant geographic market depends on interchangeability and cross-elasticity of demand.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Evidence > Burdens of Proof > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

HN13[] **Antitrust Statutes, Clayton Act**

The theory of merger law is that in a market with few rivals, firms are able to coordinate behavior, either by overt collusion or implicit understanding, to restrict output and achieve anticompetitive profits. The Federal Trade Commission (FTC) has the burden of showing that challenged transactions will result in undue concentration in the market. Increases in concentration exceeding certain levels raise a likelihood of interdependent anticompetitive conduct. Market concentration is a function of the number of firms in a market and their respective market shares. Market shares are calculated by the United States Department of Justice and the FTC using the best indicator of firms' future competitive significance. Dollar sales, shipments, and unit sales can be used to calculate market shares, depending on the nature of the firms and their products. Physical capacity or reserves generally will be used as an indicator of firms' future competitive significance if these are the measures that most effectively distinguish those firms.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Mergers & Acquisitions Law > Antitrust > Market Definition

Mergers & Acquisitions Law > Merger Guidelines

Mergers & Acquisitions Law > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

HN14[] **Regulated Practices, Market Definition**

Other things being equal, market concentration affects the likelihood that one firm, or a small group of firms, could successfully exercise market power. The Herfindahl-Hirschman Index (HHI) of market concentration is used by the Federal Trade Commission to interpret market data. The HHI is calculated by summing the squares of the individual market shares of all the participants in the market. The spectrum of market concentration as measured by the HHI is divided into three regions. Under the Federal Trade Commission's Horizontal Merger Guidelines, a market with an HHI of less than 1000 is unconcentrated, a market with an HHI between 1000 and 1800 is moderately concentrated, and a market with an HHI above 1800 is highly concentrated. An increase in HHI of greater than 100 points in a post-merger moderately concentrated market potentially raises significant competitive concerns. Likewise, an increase in the HHI of 50 points or more in a post-merger highly concentrated market may raise significant competitive concerns. It is presumed that mergers producing an increase in HHI of greater than 100 points in a highly concentrated market are likely to create or enhance market power or facilitate its exercise. Other things being equal, cases falling just above and just below a threshold present comparable competitive issues.

Mergers & Acquisitions Law > Merger Guidelines

Mergers & Acquisitions Law > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

HN15[] **Regulated Practices, Market Definition**

If Herfindahl-Hirschman Index (HHI) figures are sufficiently large, they will establish a prima facie case of an anticompetitive merger. Thus, where the HHI calculation potentially raises significant competitive concerns or indicates a merger to be presumptively illegal, the factors set forth in §§ 2 through 5 of the Federal Trade Commission's Horizontal Merger Guidelines become relevant in undertaking a more comprehensive and holistic assessment of whether the proposed merger is likely to create or enhance market power or facilitate its exercise. These factors broadly include: the potential adverse competitive effects of a merger, entry analysis, efficiencies, and failure and exiting assets.

Energy & Utilities Law > Oil, Gas & Mineral Interests > Purchase Contracts > Price Terms

Energy & Utilities Law > Oil, Gas & Mineral Interests > Purchase Contracts > General Overview

HN16[] **Regulated Practices, Market Definition**

Market shares are calculated by the United States Department of Justice and the Federal Trade Commission using the best indicator of firms' future competitive significance. Evidence of market shares and market concentration should provide a proper picture of a company's future ability to compete. Reserves are a valid measure of market concentration, albeit an imperfect one. Although a court will look primarily to market concentration as measured by reserves, it will also consider other measures. Those other measures can also be expected to provide some indication of the projected increase in market concentration resulting from the challenged transactions. Loadout capacity is a helpful measure of market concentration, but it is likewise imperfect. Production and practical capacity are less useful measures, although they can still be informative. Both are, like loadout capacity, static measures that are not stable predictors of a producer's ability to deliver in the future in the form of sales or contracts. In a market where the availability and price of coal are set by long-term contracts rather than immediate or short-term purchases and sales, reserves rather than past production are the best measure of a company's ability to compete.

Antitrust & Trade Law > Clayton Act > General Overview

Evidence > Burdens of Proof > General Overview

HN17[] **Antitrust & Trade Law, Clayton Act**

Less of a showing is required from defendants to rebut a plaintiff's less-than-compelling prima facie case of increased market concentration. The more compelling the prima facie case, the more evidence a defendant must present to rebut it successfully.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN18[] **Regulated Practices, Market Definition**

Rebuttal evidence to the government's prima facie case of increased market concentration may take the form of nonstatistical market evidence raising doubts about the persuasive quality of the Federal Trade Commission's statistics or economic circumstances undermining the predictive validity of the government's statistical presentation.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Mergers & Acquisitions Law > Merger Guidelines

HN19[] **Regulated Practices, Market Definition**

Although significant, statistics concerning market share and concentration are not conclusive indicators of anticompetitive effects. A broad analysis of the market to determine any effects on competition is required. That the government can establish a prima facie case through evidence on only one factor, market concentration, does not negate the breadth of this analysis. Evidence of market concentration simply provides a convenient starting point for a broader inquiry into future competitiveness.

Mergers & Acquisitions Law > Antitrust > Market Definition

Mergers & Acquisitions Law > Merger Guidelines

Mergers & Acquisitions Law > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

HN20[] **Regulated Practices, Market Definition**

The Federal Trade Commission's Horizontal Merger Guidelines define coordinated interaction as actions by a group of firms that are profitable for each of them only as a result of the accommodating reactions of the others. This behavior includes tacit or express collusion, and may or may not be lawful in and of itself. A market is conducive to tacit coordination, then, where producers recognize their shared economic interests and their interdependence with respect to price and output decisions. Successful coordination requires two factors: (1) reaching terms of coordination that are profitable to the firms involved; and (2) an ability to detect and punish deviations that would undermine the coordinated interaction. Coordination need not be complex or complete. Instead, the terms of coordination may be imperfect and incomplete and still result in significant competitive harm. The Merger Guidelines provide, moreover, that the punishment of deviation will not always be direct and specific. Credible punishment may not need to be any more complex than temporary abandonment of the terms of coordination by other firms in the market. But where detection or punishment is likely to be slow, incentives to deviate are enhanced and coordinated interaction is unlikely to be successful.

Mergers & Acquisitions Law > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

Mergers & Acquisitions Law > Antitrust > Market Definition

HN23[] **Antitrust, Horizontal Mergers**

An important consideration when analyzing possible anticompetitive effects is whether an acquisition will result in the elimination of a particularly aggressive competitor in a highly concentrated market. For purposes of a coordinated effects analysis, the Federal Trade Commission's (FTC) Horizontal Merger Guidelines define a "maverick" firm as one possessing a greater economic incentive to deviate from the terms of coordination than those of its rivals. FTC officials have noted that, in the context of an auction market, to be a maverick a firm must consistently compete aggressively when it bids, causing other firms to bid more aggressively when it is present.

Antitrust & Trade Law > Clayton Act > Defenses

Mergers & Acquisitions Law > Antitrust > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Penalties

HN24[] Clayton Act, Defenses

The United States Supreme Court has not sanctioned the use of an efficiencies defense in a case brought under § 7 of the Clayton Act, *15 U.S.C.S. § 18*. However, the trend among lower courts is to recognize the defense. A defendant may rebut the government's prima facie case with evidence showing that the merger would create significant efficiencies in the relevant market.

Healthcare Law > Business Administration & Organization > Covenants not to Compete > General Overview

Mergers & Acquisitions Law > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

Mergers & Acquisitions Law > Antitrust > Market Definition

HN25[] Antitrust, Horizontal Mergers

The Federal Trade Commission's Horizontal Merger Guidelines recognize that mergers have the potential to generate significant efficiencies by permitting a better utilization of existing assets, enabling the combined firm to achieve lower costs in producing a given quantity and quality than either firm could have achieved without the proposed transaction. Hence, efficiencies generated through merger can enhance the merged firm's ability and incentive to compete, which may result in lower prices, improved quality, enhanced service, or new products. However, the government will only consider those efficiencies that are merger-specific and verifiable by reasonable means. The higher the market concentration present in a given case, moreover, the more extraordinary the efficiencies that a defendant must show. When there are high market concentration levels, a court must undertake a rigorous analysis of the kinds of efficiencies being urged by the parties in order to ensure that those efficiencies represent more than mere speculation and promises about post-merger behavior. However, even where evidence of efficiencies in the relevant market will not support an outright defense to an anticompetitive merger, such evidence is relevant to the competitive effects analysis of the market required to determine whether the proposed transaction will substantially lessen competition.

Mergers & Acquisitions Law > Merger Guidelines

Mergers & Acquisitions Law > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

HN26[] **Robinson-Patman Act, Defenses**

The appropriate focus under § 7 of the Clayton Act, *15 U.S.C.S. § 18*, is on a merging firm's probable future ability to compete, rather than its past production. Under the "failing" or even "flailing" company defense a presumption of illegality based on market concentration alone can be rebutted if defendants can prove that the acquired firm's current market shares overstate its future competitive significance due to its weak financial condition. A weak financial condition, or limited reserves, may mean that a company will be a far less significant competitor than current market share, or production statistics, appear to indicate. The evidence of financial or other weakness must genuinely undercut the statistical showing of anticompetitive market concentration. Indeed, financial weakness, while perhaps relevant in some cases, is probably the weakest ground of all for justifying a merger, and certainly cannot be the primary justification for permitting one. Thus, financial difficulties are relevant only where they indicate that market shares will decline in the future and by enough to bring a merger below the threshold of presumptive illegality.

Opinion by: JOHN D. BATES

Opinion

[*114] **MEMORANDUM OPINION**

Coal is the primary fuel that produces electric power for residential and business consumers across the United States. It is mined in various regions across the country, in either surface or underground mining operations, after which the coal is transported by rail, truck or barge to electrical generating plants. One-third of the coal produced annually in the United States -- over 360 million tons -- is produced from large-scale surface mining operations in the Southern Powder River Basin ("SPRB") region of Wyoming. Seven companies operate fourteen mines in the SPRB at this time.

In May of 2003, Arch Coal, Inc. ("Arch"), the owner and operator of two SPRB mines (Black Thunder and Coal Creek) as well as other mining operations across the United States, and New Vulcan Coal Holdings, LLC ("New Vulcan"), **[**3]** the owner of two SPRB mines (North Rochelle and Buckskin), which it operates through its subsidiary Triton Coal Company, LLC ("Triton"), entered into a merger and purchase agreement under which Arch would acquire Triton and its two SPRB mines. Hart-Scott-Rodino pre-merger notification was provided to the Federal Trade Commission ("FTC"), which in august 2003 requested additional information from Arch and New Vulcan. Arch subsequently informed the FTC that it intended to divest one of the acquired mines (Buckskin) to Peter Kiewit Sons, Inc. ("Kiewit"), a large company with some mining interests outside the SPRB, and in January 2004 a firm asset purchase agreement was entered by Arch and Kiewit.

After a nine-month review, the FTC voted on March 30, 2004, to commence this action seeking to enjoin the proposed acquisition under section 13(b) of the Federal Trade Commission Act, *15 U.S.C. § 53(b)*, as violative of section 7 of the Clayton Act, *15 U.S.C. § 18*. The FTC seeks to preliminarily enjoin Arch's proposed acquisition of Triton until an administrative FTC proceeding challenging the transaction under *Section 7* can be completed. A parallel **[**4]** suit was also filed on April 1, 2004, by the states of Missouri, Arkansas, Kansas, Illinois, Iowa, and Texas (the "States") seeking both preliminary and permanent injunctive relief. The two actions were consolidated by this court on April 21, 2004. [1]

The court held a two-week trial commencing on June 28, 2004, during which it heard from more than twenty witnesses and received hundreds of exhibits, many of them lengthy, including deposition and affidavit testimony of several additional witnesses. The parties have submitted well over 700 pages of post-hearing proposed findings of fact and briefs. The court has reviewed that substantial body of evidence and argument in assessing the FTC's challenge **[**5]** to the proposed acquisition of the **[*115]** North Rochelle and Buckskin mines by Arch, and the simultaneous transfer of Buckskin to Kiewit, and the probable effect of those transactions on competition in the SPRB. [2] **[**6]** The case is complex, and represents an attempt by the FTC to enjoin transactions that do not reduce the number of competitors and only modestly increase the concentration in what has been a very competitive market. Moreover, the case rests on a novel FTC theory of likely future "tacit coordination" among competitors to restrict production, as opposed to direct coordination of prices. In the end, the court concludes that the FTC and the States have not met their burden under *Section 7 of the Clayton Act and* (for the FTC) *Section 13(b)* of the FTC Act to show a likelihood that the challenged transactions will substantially lessen competition in the SPRB. The requested preliminary injunctive relief will therefore be denied. [3]

I. APPLICABLE LAW

Section 7 of the Clayton Act, *15 U.S.C. § 18*, ***HN1***[] prohibits a merger between two companies "where in any line of commerce or in any activity affecting commerce in any section of the country, the effect of such acquisition …may be substantially to lessen competition, or tend to create a monopoly." The Supreme Court has observed that *Section 7* "deals in probabilities, not certainties." *United States v. General Dynamics Corp., 415 U.S. 486, 505, 39*

---

[1] Hereinafter, the plaintiffs in the two actions will collectively be referred to as "plaintiffs" or as "the FTC," unless specific reference to the states is necessary. The defendants in these actions are Arch, Triton and New Vulcan (collectively "defendants"), while Kiewit is participating only as an *amicus curiae*.

[2] On July 7, 2004, the court issued a decision concluding that Arch's sale of the Buckskin mine to Kiewit would be considered as part of the challenged transactions along with Arch's acquisition of Triton.

[3] The renewed motion of defendants to consolidate the request for preliminary and permanent injunctive relief will also be denied at this time. This opinion was provided to the parties in final form on August 13, 2004, but public release was delayed to ensure that no confidential business information that had been submitted under seal was being released. Based on defendants' input, some minor adjustments to the opinion have been made.

L. Ed. 2d 530, 94 S. Ct. 1186 (1974); see also Brown Shoe Co. v. United States, 370 U.S. 294, 323, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962); United States v. El Paso Natural Gas Co., 376 U.S. 651, 658, 12 L. Ed. 2d 12, 84 S. Ct. 1044 (1964). **[**7]** as defendants also correctly stress, however, "section 7 deals in probabilities not ephemeral possibilities." FTC v. Tenet Health Care, Inc., 186 F.3d 1045, 1051 (8th Cir. 1999). To warrant injunctive relief under the Clayton Act, the challenged acquisition must be likely substantially to lessen competition. Although certainty is not required, section 7 does demand that a plaintiff demonstrate that the substantial lessening of competition will be "sufficiently probable and imminent" to warrant relief. United States v. Marine Bancorporation, 418 U.S. 602, 618, 41 L. Ed. 2d 978, 94 S. Ct. 2856 (1974); see United States v. Baker Hughes, Inc., 285 U.S. App. D.C. 222, 908 F.2d 981, 984 (D.C. Cir. 1990) (" Section 7 involves *probabilities*, not certainties or possibilities.").

HN2[] Congress has empowered the federal trade commission to seek preliminary injunctive relief preventing parties from consummating a merger until the FTC has had an opportunity to adjudicate the merger's legality. Section 13(b) of the FTC Act "provides for the grant of a preliminary injunction where such action would be in the public interest -- as determined by a weighing of the **[**8]** equities and a consideration of the commission's likelihood of success on the merits." FTC v. H.J. Heinz Co., 345 U.S. App. D.C. 364, 246 F.3d 708, 714 (D.C. Cir. 2001); see 15 U.S.C. § 53(b). The FTC "is not required to prove, nor is the court **[*116]** required to find, that the proposed merger would in fact violate Section 7 of the Clayton Act." FTC v. Staples, Inc., 970 F. Supp. 1066, 1070 (D.D.C. 1997) (citations omitted); see FTC v. University Health, Inc., 938 F.2d 1206, 1218 (11th Cir. 1991) (court's task is to make preliminary assessment of impact on competition). Rather, the FTC "need only show that there is a 'reasonable probability' that the acquisition may substantially lessen competition." Staples, 970 F. Supp. at 1072. proof of actual anticompetitive effects is not required; instead, the FTC must show "an appreciable danger" of future coordinated interaction based on a "predictive judgment." HEINZ, 246 F.3D at 719 (quoting Hosp. Corp. of Am. v. FTC, 807 F.2d 1381, 1389 (7th Cir. 1986)). While proof of prior cooperative behavior is relevant, it is not **[**9]** a necessary element of likely future coordination in violation of Section 7. The FTC, then, must raise "questions going to the merits so serious, substantial, difficult and doubtful as to make them fair ground for thorough investigation, study, deliberation and determination by the FTC in the first instance and ultimately by the court of appeals." id. at 714-15 (citations omitted).

Given the stakes, the FTC's burden is not insubstantial, and "[a] showing of a fair or tenable chance of success on the merits will not suffice for injunctive relief." Tenet Health Care, 186 F.3d at 1051; see Fruehauf Corp. v. FTC, 603 F.2d 345, 351 (2d Cir. 1979) ("mere possibility" will not justify preliminary injunction). **HN3**[] because the public interest in effective enforcement of the antitrust laws is of primary importance, a showing of likely success on the merits will presumptively warrant an injunction. see Heinz, 246 F.3d at 726; University Health, 938 F.2d at 1225; Staples, 970 F. Supp. at 1091. Conversely, absent a likelihood of success on the merits, equities alone will not justify an injunction. see FTC v. PPG Indus., Inc., 255 U.S. App. D.C. 69, 798 F.2d 1500, 1508 (D.C. Cir. 1986). **[**10]**

This circuit has articulated an analytical approach by which **HN4**[] the FTC may establish a Section 7 violation. First, the FTC must show that the merger would produce a firm controlling an undue share of the relevant market and would result in a significant increase in the concentration of the market. Heinz, 246 F.3d at 715 (citations omitted). "Such a showing establishes a presumption that the merger will substantially lessen competition." Id. (citing Baker Hughes, 908 F.2d at 982). Defendants can then rebut the presumption by producing evidence that market-share statistics produce an inaccurate account of the merger's probable effects on competition in the relevant market. Id.; See also United States v. Citizens & S. Nat'l bank, 422 U.S. 86, 120, 45 L. Ed. 2d 41, 95 S. Ct. 2099 (1975). "If the defendant successfully rebuts the presumption [of illegality], the burden of producing additional evidence of anticompetitive effect shifts to the government, and merges with the ultimate burden of persuasion which remains with the government at all times." Heinz, 246 F.3d at 715 (quoting Baker Hughes, 908 F.2d at 983). **[**11]** Accordingly, plaintiffs have the burden on every element of their Section 7 challenge, and a failure of proof in any respect will mean the transaction should not be enjoined.

The Supreme Court has observed that **HN5**[] "'only examination of the particular market -- its structure, history, and probable future -- can provide the appropriate setting for judging the probable anticompetitive effects of the merger.'" General Dynamics, 415 U.S. at 498 (quoting Brown Shoe, 370 U.S. at 322 n. 28). Hence, antitrust theory and speculation cannot trump facts, and even *Section 13(b)* cases must be resolved on the basis of the record evidence relating **[*117]** to the market and its probable future. See *Eastman Kodak Co. v. Image Technical Servs., 504 U.S. 451, 460-67, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992)*; *FTC v. Weyerhaeuser Co., 214 U.S. App. D.C. 254, 665 F.2d 1072, 1080 (D.C. Cir. 1981)* ("Hearings on preliminary injunctions [under *Section 13(b)*] necessarily look to the future and decisions must rest on comparative, tentative assessments of the course of events if the injunction is issued, and if it is not."); *Verizon Communications., Inc. V. Law Offices of Curtis V. Trinko, 540 U.S. 398, 157 L. Ed. 2d 823, 124 S. Ct. 872, 882 (2004)* **[**12]** (focus on actual rather than theoretical guards against false condemnation that may chill conduct that antitrust laws are designed to protect). Analysis of the likely competitive effects of a merger requires determinations of (1) the relevant product market in which to assess the transaction, (2) the geographic market in which to assess the transaction, and (3) the transaction's probable effect on competition in the relevant product and geographic markets. See *Marine Bancorporation, 418 U.S. at 618-23*; *General Dynamics, 415 U.S. at 510-11*.

II. ANALYSIS

A. The Coal Industry

Coal is the base fuel for over fifty percent of the electricity generated in the United States. Bales Tr. (6/21 afternoon) at 33:7-8. [4] It is mined from underground or surface mining operations, depending on the location and reserves, then delivered by truck, barge, or rail to generating sites where it is typically stored and then fed into boilers to generate electricity. Id. at 33:6-13. The coal available in the United States falls into three general categories: lignite, subbituminous, and bituminous. Subbituminous coal has a Btu [5] content that typically **[**13]** ranges from 8000 to 9500 Btus per pound, and is principally located in Montana and Wyoming. It has become the fuel of choice for a large number of electric utility companies in the United States. Id. at 33: 14-25.

The Powder River Basin ("PRB") refers to a large coal-bearing geological formation located in Montana and Wyoming. DX 9007 at 001. Coal in the Southern Powder River Basin ("SPRB") **[**14]** of northeastern Wyoming is located close to the surface, and can be mined by largescale surface operations as opposed to underground mining techniques. Lang Tr. (6/24 afternoon) at 46:6-49:2; See DX 1024 at 24648; DX 9000. The estimated reserves of coal in the SPRB exceed 7.8 billion tons. DX 9005 at 002. Currently, approximately 360 million tons of coal are produced annually in the SPRB, which represents approximately one-third of the coal produced annually in the United States. FTC Compl. P 13; States Compl. P 15.

SPRB coal is known for its low sulfur content. Bales Tr. (6/21 afternoon) at 35:7-9. Sulfur content first became a critical factor when the *Clean Air Act* was passed in 1970. Id. at 35:2-9. SPRB coal is the most economical source of fuel that complies with Clean Air Act sulfur limitations. Id. SPRB coal also has a moderately high heat content and low ash content. **[*118]** heat content (measured in Btu) affects the amount of energy a user can extract from a unit of coal; ash content affects the grindability of the coal and the performance of air quality equipment, and thus customers prefer coal with low ash content. The SPRB provides a critical source of plentiful, inexpensive **[**15]** coal having a strong combination of these important characteristics. PX 0021 p 8 (Rea Decl.); PX 0042 pp 4-11; PX 0012 pp 5, 11-15 (Panzarino Decl.); PX 0010 pp 3-7 (flippin Decl.).

Coal resources in the SPRB are controlled primarily by the federal government, and the vast majority of SPRB production is from lands subject to federal coal leases, with a small amount from state and private lands. DX 1024-

---

[4] Citations to the trial record are in the following form: for testimony -- "[Witness] Tr. (date) at page: line"; for plaintiffs' exhibits -- "PX ____"; for defendants' exhibits --"DX ____"; for plaintiffs' proposed findings of fact -- "PFF ____"; for defendants' proposed findings of fact -- "DFF ____." the following abbreviations are employed in citations: "Decl." for declaration, "Dep." for deposition, "I.H." for investigational hearing, and "W.D." for written direct testimony.

[5] A British Thermal Unit (Btu) is the amount of heat required to raise the temperature of one pound of water one degree Fahrenheit.

24648. The SPRB mines can be divided into three tiers based on coal quality, heat content, and mine location. Bales Tr. (6/21 afternoon) at 40: 1-41:2; PX 0312 at 018; DX 1024 at 24648. Tier 1 mines typically produce a high Btu (8600-8900) coal and include the Antelope, Black Thunder, Jacobs Ranch, North Antelope/Rochelle, and North Rochelle mines. Bales Tr. (6/21 afternoon) at 40: 2-7; PX 0011 at 013-014; PX 0012 p 5 (Panzarino Decl.); DX 1024 at 24650. Tier 2 mines produce coals ranging from 8300 to 8550 Btu, and include Belle Ayr, Caballo/North Caballo, Coal Creek, and the Cordero Rojo complex. PX 0772 at 36, 66; PX 0011 at 013-014; PX 0012 p 5 (Panzarino Decl.); DX 1024 at 24650. Tier 3 mines produce relatively low Btu coal (7900-8450) and **[**16]** include the Buckskin, Dry Fork, Eagle Butte, Fort Union, Rawhide, and Wyodak mines. PX 0011 at 013-014; PX 0012 p 5 (Panzarino Decl.); DX 1024 at 24650.

Seven companies currently operate the fourteen mines in the SPRB. DX 1024 at 24670. Four companies, each operating a Tier 1 mine, are considered the major producers of SPRB coal: Arch, Triton, Kennecott Energy Co. ("Kennecott"), and Peabody Holding Co. ("Peabody"). Arch operates the Black Thunder and Coal Creek mines; Triton operates the North Rochelle and Buckskin mines; Kennecott operates the Antelope, Jacobs Ranch and Cordero-Rojo mines; and Peabody operates the North Antelope/Rochelle, Caballo, and Rawhide mines. PX 5675 at 002. RAG American ("RAG") is another significant producer in the SPRB, but it only operates mines in Tiers 2 and 3 (Belle Ayr And Eagle Butte). PX 3308 at 002. Two small mining entities, Western Fuels and Wyodak, generally do not compete for business in the region and, therefore, are not recognized by most customers as feasible supply alternatives to the five larger producers. PX 0010 pp 8-9 (Flippin Decl.); PX 0042 p 10 (Luksan Decl.); PX 0022 p 3 (Stolwyk Decl.); PX 0012 p 14 **[**17]** (Panzarino Decl.).

Virtually all SPRB coal is purchased by electric power companies for use in their coalfired steam generating units. FTC Compl. P 13; States Compl. P 15. There are approximately 150 generating plants that presently consume coal from the SPRB, DX 0086 p 21, located throughout the United States ranging from Montana to Texas, and Washington to New York, DX 9007 at 004. SPRB coal is shipped via railroad for the most part, and the SPRB is served by two railroads: the Union Pacific ("UP") and the Burlington Northern/Santa Fe ("BNSF"). Shalah Tr. (6/25 afternoon) at 28:13-18. The "joint line" is a railroad line that is jointly owned by BNSF and the UP. It is dispatched by the BNSF and serves the SPRB mines south of Gillette, Wyoming: Antelope, North Antelope/Rochelle, North Rochelle, Black Thunder, Jacobs Ranch, Coal Creek, Cordero-Rojo, Belle Ayr, and Caballo. Id. at 22:2-6. The "single line" is a railroad line owned and operated by the BNSF, **[*119]** which serves the mines north and east of Gillette: Buckskin, Eagle Butte, Dry Fork, Fort Union, and Wyodak. Id. at 22:7-20.

The SPRB is the fastest growing coal producing region in **[**18]** the United States, with demand projected to grow from a present level of over 360 million tons per year to over 500 million tons per year during the next ten years. PX 8605 at 005-006; DX 1024 at 24756. Industry analysts attribute the expectation for growth in demand for SPRB coal to low-cost production and compliance with recent environmental legislation. PX 0123 at 002-003. The SPRB coal industry has experienced some consolidation in recent years, as the number of SPRB producers has decreased. PX 8605 at 005-006.

B. The Coal Market

HN6[] The definition of the relevant market is necessary to identify that area of trade within which a defendant allegedly has acquired or will acquire an illegal monopolistic or oligopolistic position. See *Marine Bancorporation, 418 U.S. at 618* (determination of relevant market "necessary predicate" to deciding whether *Section 7* violation). A relevant market has two dimensions. first, the "relevant product market" identifies the product and services with which the defendants' products compete. Second, the "relevant geographic market" identifies the geographic area in which the defendant competes in marketing its products or service. **[**19]** the FTC bears the burden of proof and persuasion in defining the relevant market. *United States v. Sungard Data Sys., 172 F. Supp. 2d 172, 182-83 (D.D.C. 2001)*.

1. Relevant Product Market

HN7[] In determining relevant product markets, courts have traditionally emphasized two factors: "the reasonable interchangeability of use [by consumers] and the cross-elasticity of demand between the product itself and substitutes for it." Brown Shoe, 370 U.S. at 325; See also United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 395, 100 L. Ed. 1264, 76 S. Ct. 994 (1956). The general question is "whether two products can be used for the same purpose, and if so, whether and to what extent purchasers are willing to substitute one for the other." Staples, 970 F. Supp. at 1074 (quoting Hayden Publ'g Co. v. Cox Broad. Corp., 730 F.2d 64, 70 n. 8 (2d Cir. 1984)). Relevant markets will generally include producers who, given product similarity, have the ability to take significant business from each other. See Smithkline Corp. v. Eli Lilly & Co., 575 F.2d 1056, 1063 (3d Cir. 1978); Staples, 970 F. Supp. at 1075. **[**20]**

Determining interchangeability is relatively straightforward. Courts compare the use or function of defendant's product with other products, and assess "the degree to which buyers are willing to substitute those similar products for the [test] product." Sungard Data, 172 F. Supp. 2d at 182. If consumers can substitute the use of one for the other, then the products in question will be deemed "functionally interchangeable." See, E. G., Staples, 970 F. Supp. at 1074 (finding that office supplies sold by an "office superstore" like staples are functionally interchangeable with office supplies sold at "mass merchandisers" like Wal-Mart); E.I. du pont de Nemours, 351 U.S. at 399 (recognizing "functional interchangeability" between cellophane and other flexible wrappings). Courts will generally include functionally interchangeable products in the same product market unless factors Other than use indicate that they are not actually part of the same market. See, E. G., United States v. Archer-Daniels-Midland Co., **[*120]** 866 F.2d 242, 246 (8th Cir. 1988) (even though beet sugars and high-fructose corn sugars **[**21]** were functionally interchangeable, they did not belong to the same product market because government price support for beet sugars meant that prices for corn sugars could be raised substantially without feeling the competitive impact of beet sugar prices).

HN8[] After finding interchangeability, courts look for cross-elasticity of demand. If a slight decrease in the price of product A causes a considerable number of customers of product B to switch to A, that would indicate that a cross-elasticity of demand exists between A and B and that they compete in the same product market. See E.I. du Pont de Nemours, 351 U.S. at 400. In defining relevant product markets, courts should "exclude any other product to which, within reasonable variations in price, only a limited number of buyers will turn." Times-picayune Publ'g Co. v. United States, 345 U.S. 594, 612 n. 31, 97 L. Ed. 1277, 73 S. Ct. 872 (1953). HN9[] the FTC's Horizontal Merger Guidelines set forth an analytical framework for considering the issues of interchangeability and cross-elasticity of demand by defining a product market as "a product or group of products such that a hypothetical profit-maximizing firm that was **[**22]** the only present and future seller of those products ('monopolist') likely would impose at least a 'small but significant and nontransitory' increase in price" (SSNIP). U.S. Dep't of Justice & Fed'l Trade Comm'n, Horizontal Merger Guidelines § 1.11 (1992), as revised (1997) (hereinafter "Merger Guidelines § ____"). In most contexts, the FTC considers a price increase of five percent to constitute a SSNIP. Id. Courts have also relied on several "practical indicia" to help identify the relevant product market. [6] these indicia include: industry or public recognition of a submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized venders. Brown Shoe, 370 U.S. at 325. Examination of such factors is helpful to augment the assessment of interchangeability and cross-elasticity of demand when determining the relevant product market.

[23]** HN10[] Relevant market analysis is based on the "narrowest market" principle. Guerin-Calvert Tr. (6/30 afternoon) at 44:5-7. The analysis begins by examining the most narrowly-defined product or group of products sold by the merging firms to ascertain if the evidence and data support the conclusion that this product or group of products constitutes a relevant market. If not, the analysis shifts to the next broadest product grouping to test whether that is a relevant market. This process continues until a relevant market is identified. Id. at 44:8-17. In a relevant market analysis, the hypothetical monopolist test is generally used to identify whether a small but

[6] In Brown Shoe, the Supreme Court found that a relevant product market could exist within a larger market. Although courts have sometimes referred to this as a "submarket," the term "submarket" can be used interchangeably with "relevant product market" and the analysis is the same regardless of which term is used. Staples, 970 F. Supp. at 1080 n. 11.

significant price increase for the product tested would be profitable. [7] Morris Tr. (6/23 afternoon) at 48: 24-49: 9; **[*121]** Guerin-Calvert Tr. (6/30 afternoon) at 44:24-45:11.

[24]** The parties agree that SPRB coal is a relevant product market within which to examine the competitive effects of the proposed transactions. DFF 57; PFF 60. Plaintiffs' expert concluded, after applying the hypothetical monopolist test, that the relevant market is no broader than SPRB coal. Morris Tr. (6/23 afternoon) at 43:11-25; Morris Tr. (6/24 morning) at 56. Plaintiffs also argue that 8800 Btu SPRB coal is a distinct and narrower relevant product market within which to assess the proposed transaction. Defendants' expert, applying the same test, concluded that the relevant market is no narrower than SPRB coal. Guerin-Calvert Tr. (6/30 afternoon) at 40:13-15. However, defendants have not set forth a viable argument, supported by evidence, for consideration of all PRB coal as a broader relevant market. The court, therefore, rejects the proposition that the entire PRB coal market is the relevant product market for analysis of the proposed transactions.

With respect to plaintiffs' contention that the relevant product market is narrower than SPRB coal, plaintiffs' expert did state his belief that 8800 Btu SPRB coal is a distinct relevant market, but did so only very reluctantly when **[**25]** pressed by the court. Dr. Morris first stated that he was unable "to state with a reasonable degree of certainty that 8800 Btu coal is a relevant antitrust market," PX 4300 p 39; Morris Tr. (6/23 afternoon) at 44:19-21, then testified that "the relevant market …could be as narrow as 8800 Btu coal," Morris Tr. (6/24 morning) at 56:9-15. Later, he opined that "8800 Btu coal is likely to be a relevant market," and finally, when prompted by the court, asserted that 8800 Btu coal is a separate relevant market. Id. at 57:16-58:7. Nonetheless, the clear impression left by Dr. Morris is that he is not entirely sure that 8800 Btu SPRB coal is a relevant product market, and that he would prefer to undertake further analysis before so concluding. The court thus finds unconvincing his reluctant conclusion that 8800 Btu SPRB coal is a relevant product market.

In order for 8800 Btu coal to be considered a separate relevant market, plaintiffs must show that 8800 Btu coal is not interchangeable with 8400 Btu coal. The testimony of dr. Morris does not satisfy that burden, because he does not account for the substantial evidence regarding the purchasing practices of **[**26]** utilities, which establishes that 8800 and 8400 Btu coal are substitutable. In both trial testimony and depositions, virtually all the utilities acknowledged that they can and do purchase and consume both 8800 and 8400 Btu coal, and that they actively solicit and consider both in their coal bidding procedures. Guerin-Calvert Tr. (6/30 afternoon) at 57:18-58:5, 60:5-11; DX 0086 at p 22; DX 2006 at pp 19-20; Holloway Tr. (6/22 afternoon closed) at 77:24-78:14 (OG&E's facilities were designed to burn, and have burned coals ranging from 8400 to 8800 **[*122]** Btu); Freund Tr. (6/21 afternoon) at 80:25-81:2 ("Q: Are you able to burn both 8,400 and 8,800 SPRB coal at your facilities? A: Yes we are."); Orme Tr. (6/22 morning) at 13:18-14:9; Kelly Tr. (6/22 morning) at 56:17-20; Herndon Tr. (6/22 afternoon) at 23:13-18; Carr Tr. (6/23 afternoon) at 10:17-20; Thede Dep. at 43:11-22; Rackers Dep.. at 105:16-106: 22; Flippin Dep. at 105:25-107:3 (LCRA has purchased both 8400 and 8800 coal in the past five years); McGowan Dep. at 155:3-10, 167: 4-9, 180:21-24; Stolwyk Tr. (6/23 morning) at 67:20-24; DX 0919; DX 0920; DX 0921; DX 0926; Werner Tr. (6/23 morning) at 8:19-9:10, 26:9-11; Lapplander Tr. (7/7 morning) **[**27]** at 8:7-18; Stuchal Tr. (7/7 morning) at 67:21-22; DX 0919 at 0022359; DX 0853 at 0021480-504; DX 0951 at 0023232; DX 0953 at 0023389-90; DX 0955 at 0023399; DX 0897; DX 0898; DX 0899; DX 0716 at 0018525. Some customers did indicate that they prefer 8800 Btu coal to 8400 Btu coal, but the evidence also shows that customers having that preference nonetheless can use and have used other Btu coals, and benefit from the competition between 8800 and 8400 Btu coal. Kelly Tr. (6/22 morning) at 48:1-5, 62:10-13; Stuchal Tr. (7/7 morning) at 73:21-74:3 (the Nebraska Public Power District's plant

---

[7] The test assumes a five to ten percent price increase on the identified test product in the hands of a hypothetical monopolist, and examines whether, in such circumstances, there would be a sufficient diversion or loss of sales to producers of another product to make that price increase unprofitable. Morris Tr. (6/23 afternoon) at 49:2-9; Guerin-Calvert Tr. (6/30 afternoon) at 44:24-45:16. If so, the market is too narrowly delineated. The market is appropriately defined when the price increase would be profitable to the hypothetical monopolist. Morris Tr. (6/23 afternoon) at 48:24-49:9; Guerin-Calvert Tr. (6/30 afternoon) at 44:24-45:11. To measure the volume of diverted sales needed to make a particular price increase unprofitable under the hypothetical monopolist test, economists generally perform a critical loss analysis. Morris Tr. (6/23 afternoon) at 49:16-50:11; Guerin-Calvert Tr. (6/30 afternoon) at 46:20-47:1; DX 0086 p 28 n. 24. The critical loss analysis is mathematically informative of the percentage of lost sales needed to defeat the hypothetical price increase. Guerin-Calvert Tr. (6/30 afternoon) at 47:2-5.

managers prefer 8800 Btu coal but purchase 8400 to 8800 Btu coal depending on which coal has the best evaluated price); Guerin-Calvert Tr. (6/30 afternoon) at 73:15-20. Plaintiffs do not dispute that for most SPRB customers "purchasing decisions [between 8800 Btu and 8400 Btu SPRB coal] are based on economics." Bales Tr. (6/21 afternoon) at 42:17-43:21. The evidence also shows, however, that some customers can only purchase either 8800 or 8400 Btu SPRB coal, but not both, regardless of the economics. Rahm Tr. (6/21 morning) at 89:7-90:11; Orme Tr. (6/22 morning) at 7:11-20. [8] The Supreme Court **[**28]** has stated that ***HN11***[] the "[d]etermination of the competitive market for commodities depends on how different from one another are the offered commodities in character or use, how far buyers will go to substitute one commodity for another." *E.I. Du Pont de Nemours, 351 U.S. at 393*. in determining interchangeability, therefore, the court must consider the degree to which buyers treat the products as interchangeable, but need not find that all buyers will substitute one commodity for another.

Plaintiffs contend that defendants, in arguing against 8800 Btu coal as a relevant market, have failed to consider both the extent to which buyers are unwilling to substitute between 8800 and 8400 Btu coal and the extent of the price increase that would be necessary before significant substitution would occur. Pls. Post-Hearing Reply Br. at 20. The burden, however, is squarely on plaintiffs to establish **[**29]** that 8800 Btu coal is a separate relevant market. See *Sungard Data, 172 F. Supp. at 182-83*. Based on the reluctance of plaintiffs' own expert to conclude that 8800 Btu SPRB coal is a separate relevant market, and the evidence of significant interchangeability between 8800 Btu and 8400 Btu coal, the court declines to find that 8800 Btu coal is a separate relevant market. Both Dr. Morris and Ms. Guerin-Calvert concluded, after applying the hypothetical monopolist test and critical loss analysis, that SPRB coal is a relevant market. Plainly, SPRB coal is considered a unique and preferred product by customers. See Kelly Tr. (6/22 morning) at 41:21-25; Holloway Tr. (6/22 afternoon) at **[*123]** 76:1-7; Werner Tr. (6/22 afternoon) at 116:1-22. The court therefore concludes that the relevant product market is no broader and no narrower than SPRB coal. Defendants' half-hearted argument for a market of all PRB coal is totally unpersuasive, and plaintiffs have not carried their burden of establishing that 8800 Btu SPRB coal is a distinct relevant product market.

2. Relevant Geographic Market

HN12[] The relevant geographic market in which to examine the effects of a merger is "the **[**30]** region in which the seller operates, and to which the purchaser can practicably turn for supplies." *FTC v. Cardinal Health, Inc., 12 F. Supp. 2d 34, 49 (D.D.C. 1998)* (citing *Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 5 L. Ed. 2d 580, 81 S. Ct. 623 (1961))*. The Supreme Court has emphasized that the relevant geographic market must both "correspond to the commercial realities of the industry and be economically significant." *Brown Shoe, 370 U.S. at 336-37* (internal citations omitted). The Merger Guidelines also provide guidance for determining the relevant geographic market. the geographic market should be delineated as "a region such that a hypothetical monopolist that was the only present or future producer of the relevant product at locations in that region would profitably impose at least a 'small but significant and nontransitory' increase in price, holding constant the terms of sale for all products produced elsewhere." Merger Guidelines § 1.21. If buyers would respond to the SSNIP by shifting to products produced *outside* the proposed geographic market, and this shift were sufficient to render the SSNIP unprofitable, **[**31]** then the proposed geographic market would be too narrow. Id.

As with the relevant product market, the relevant geographic market depends on interchangeability and cross-elasticity of demand. Here, however, because the relevant product market is defined in geographic terms as SPRB coal, which is produced and sold in that region, the product market and geographic market analysis are really the same. See Morris Tr. (6/23 afternoon) at 67:14-22. The parties agree that the relevant geographic market has the same scope as the relevant product market -- the SPRB -- and hence the court concludes that the SPRB is the relevant geographic market.

C. Market Concentration

---

[8] Specific boilers may be constructed or configured to burn 8800 rather than 8400 coal, or vice versa.

As recognized by the D.C. Circuit in Heinz, *HN13*[] the theory of merger law is that in a market with few rivals, firms are able to coordinate behavior, "either by overt collusion or implicit understanding," to restrict output and achieve anticompetitive profits. *246 F.3d at 715*; See also *PPG Indus., 798 F.2d at 1503*. The FTC has the burden of showing that the challenged transactions will result in "undue concentration in the market." *Baker Hughes, 908 F.2d at 982*. Increases **[**32]** in concentration exceeding certain levels raise a likelihood of "interdependent anticompetitive conduct." *Heinz, 246 F.3d at 715-16* (quoting *General Dynamics, 415 U.S. at 497*).

Market concentration is a function of the number of firms in a market and their respective market shares. Merger Guidelines § 1.5. Market shares are calculated by the department of justice and the FTC using the best indicator of firms' future competitive significance. Dollar sales, shipments, and unit sales can be used to calculate market shares, depending on the nature of the firms and their products. Physical capacity or reserves generally will be used as an indicator of firms' future competitive significance if these are the **[*124]** measures that most effectively distinguish those firms. Id. § 1.41. Assessing the coal industry in the late 1960's, which was then dominated by long-term supply contracts, the Supreme Court in General Dynamics rejected statistical evidence of coal production as a valid measure of competitive power in the market: "a more significant indicator of a company's power effectively to compete with other companies lies in the state of a company's **[**33]** uncommitted reserves of recoverable coal." *415 U.S. at 502*.

HN14[] other things being equal, market concentration affects the likelihood that one firm, or a small group of firms, could successfully exercise market power. Merger Guidelines § 2.0. The Herfindahl-Hirschman Index ("HHI") of market concentration is used by the FTC to interpret market data. The HHI is calculated by summing the squares of the individual market shares of all the participants in the market. See *Heinz, 246 F.3d at 716 n. 9*.

The spectrum of market concentration as measured by the HHI is divided into three regions. A market with an HHI of less than 1000 is "unconcentrated," a market with an HHI between 1000 and 1800 is "moderately concentrated," and a market with an HHI above 1800 is "highly concentrated." Merger Guidelines § 1.5. An increase in HHI of greater than 100 points in a post-merger moderately concentrated market potentially raises significant competitive concerns. Likewise, an increase in the HHI of 50 points or more in a post-merger highly concentrated market may raise significant competitive concerns. It is presumed that mergers producing an increase in HHI of greater **[**34]** than 100 points in a highly concentrated market are likely to create or enhance market power or facilitate its exercise. Merger Guidelines § 1.51; see generally *Heinz, 246 F.3d at 716* & n. 9. Other things being equal, cases falling just above and just below a threshold present comparable competitive issues. Merger Guidelines § 1.5.

HN15[] If HHI figures are sufficiently large, they will establish a prima facie case of an anticompetitive merger. See *Heinz, 246 F.3d at 716*; *Baker Hughes, 908 F.2d at 982-83* & n. 3. Thus, where the HHI calculation potentially raises significant competitive concerns or indicates a merger to be presumptively illegal, the factors set forth in sections 2 through 5 of the Merger Guidelines become relevant in undertaking a more comprehensive and holistic assessment of whether the proposed merger is likely to create or enhance market power or facilitate its exercise. these factors broadly include: the potential adverse competitive effects of a merger, entry analysis, efficiencies, and failure and exiting assets.

1. Competitors in the SPRB

There are currently five significant producers of SPRB **[**35]** coal: Peabody, Kennecott, Arch, RAG, and Triton. PX 5675 at 1; PX 1040 at 1; Morris Tr. (6/23 afternoon) at 44:6-7; Morris Tr. (6/24 morning) at 16:12-15. Post-merger, there will still be five significant producers of SPRB coal, with Kiewit replacing Triton as an SPRB producing entity. The percentages of the firms' market shares will change, to be sure, as Arch will acquire the North Rochelle mine and Kiewit will take over only Triton's Buckskin mine. However, Arch will remain third among the five producers. PX 5675 at 3-4.

Based on the HHI calculation for the current SPRB coal market, it is highly concentrated. Morris Tr. (6/23 morning) at 43: 11-44:7, 67:23-68:9. Whether market concentration is measured in terms of practical capacity, loadout capacity, production, or reserves, the post-merger market **[*125]** remains highly concentrated. PX 5675 at 3. [9] the post-merger increase in HHI ranges from 49 points to 224 points, depending on which measure is used to calculate market concentration. Set forth in the table below is an abridged summary of the different market concentration measurements derived from PX 5675 at 3, based on Arch's acquisition of the North Rochelle mine and Kiewit's acquisition **[**36]** of Buckskin:

SPRB coal market concentration (HHI)

HHI	Practical	Loadout	Production	Reserves
Current market	2152	2068	2201	2054
Post-merger	2346	2292	2365	2103
Post-merger Increase	193	224	163	49

[37] 2. Proper Basis to Calculate Concentration**

HN16[] Market shares are calculated by the department of justice and the FTC using the best indicator of firms' future competitive significance. In General Dynamics, the Supreme Court stated that evidence of market shares and market concentration should provide a "proper picture of a company's future ability to compete." *415 U.S. at 501*. Defendants urge the court to use reserves as the basis for calculating concentration,

Reserves are a valid measure of market concentration, albeit an imperfect one. According to defendants' expert, the conclusion that recoverable reserves are the best measure of a producer's future capability is consistent with the economic literature on exhaustible resources. Guerin-Calvert Tr. (6/30 afternoon) at 97:3-15. at current production rates, Triton's North Rochelle mine, for example, has only seven-and-a-half years of reserves and has long-term contracts already in place that commit a significant percentage of the mine's production over that period. Hake Tr. (6/29 closed) at 28:19-20; 29:2-8; DX 9005 at 002; DX 0274; DX 0281. The Supreme Court in General Dynamics rejected statistical evidence **[**38]** of coal production as a valid measure of competitive power in the market in favor of a company's uncommitted reserves of recoverable coal. The court reasoned that

> the bulk of the coal produced is delivered under long-term requirement contracts, and such sales thus do not represent the exercise of competitive power but rather the obligation to fulfill previously **[*126]** negotiated contracts at a previously fixed price. The focus of competition in a given time frame is not on the disposition of coal already produced but on the procurement of new long-term supply contracts. ... a more significant indicator of a company's power effectively to compete with other companies lies in the state of a company's uncommitted reserves of recoverable coal.

415 U.S. at 502.

Here, however, the reserves data defendants urge the court to use include both committed and uncommitted reserves of coal. Closing Argument Tr. (7/20) at 37:17-21. Those are the reserves that plaintiffs present as well. Id. at 37:20-21. Furthermore, the long-term contracts under which coal was sold before 1974, when*General Dynamics* was decided, extended for many years and mines effectively could not **[**39]** obtain additional reserves. Morris Tr. (6/23 afternoon) at 74:23-75:8. The current contracting trend in the SPRB is towards contracts of shorter duration,

---

[9] Capacity may be an appropriate measure of market share because expanding a mine's capacity can be expensive, slow, and difficult. PX 0347 at 002; PX 8302 at 202:10-204:20 (Lien Dep.); PX 0016 p 10 (Conn Decl.). Practical capacity is considered by customers to be the measurement used to determine a mine's ability to supply them with coal. PX 8601 p 8 (Bales W.D.). It refers to the capacity available given the current physical equipment at the mines and the expected overburdens in mine plans. PX 8611 at 15. Loadout capacity refers to the capacity while the FTC argues that the court should look to other factors as well, and to loadout capacity in particular, to measure concentration. To process coal that has been removed from the pit, crush it, accumulate it for shipment, and load it onto trains. PX 8611 at 15. Current production (whether by mine or by mine operator) may not be a stable predictor of future competitiveness, or a producer's ability to deliver in the future in the form of sales or contracts. Guerin-Calvert Tr. (6/30 afternoon) at 88: 7-21; Lang Tr. (6/24 afternoon) at 62:11-63:19. Producers recognize that current production can lead to mistaken perceptions regarding a mine or mine operator's competitive significance. DX 0162.

PX 8623 at 001, often lasting three years or less, Morris Tr. (6/23 afternoon) at 75:9-10; PX 8611 at 021 p 68 (Morris W. D.); See also Stuchal Tr. (7/7 morning) at 74:9-14, although they can also be longer. Rahm Tr. (6/21 afternoon) at 7:25-10:1 (Westar has supply agreements through 2020 for most of its coal and other supply agreements through 2007 and 2009); Kelly Tr. (6/22 morning) at 44:2-10; PX 8606 at 3-4; Lien Dep at 195:1-14 (RAG has signed recent contracts of 2 to 3 year duration and utilities sometimes ask for longer terms); Herndon Tr. (6/22 afternoon) at 5:10-6:23, 42:21-43: 5; PX 8604 at 3; Stuchal Tr. (7/7 morning) at 74:9-14 (NPPD's typical coal purchase agreements are 3 to 5 years in length; NPPD has 9-year contracts currently). Contracts that last over three years, which still exist, often include re-opener clauses, PX 4613 at 003, 004-007; Guerin-Calvert Tr. (7/1) at 67:14-17, that allow a customer at certain points over the course of the contract period to solicit competing bids from other suppliers **[**40]** and afford the existing supplier an opportunity to match the competitor's bid. Morris Tr. (6/24 morning) at 48:7-16. Furthermore, in the SPRB today, mines have the ability to acquire more reserves. Morris Tr. (6/23 afternoon) at 75:19-21; PX 8611 at 017 p 57 (Morris W.D.). When SPRB mines need to acquire more reserves, they apply to the Bureau Of Land Management ("BLM") to lease additional reserves. Id. at 73:16-75:21. All the major mine owners in the SPRB today have applications (known as "LBAs") pending with the BLM to acquire additional reserves. Id. at 75:15-18; See PX 8446; PX 8447. Today in the SPRB, mines can even make sales for periods beyond the life of the mine based on current reserves because they are able to acquire these additional reserves. Morris Tr. (6/24 morning) at 89:25-90: 13. These considerations, in combination, undermine exclusive reliance on reserves to measure market concentration.

Nevertheless, in other contexts the federal antitrust agencies still espouse the view that reserves provide the proper measure for determining concentration levels in the coal industry. See DX 0033 at 000295 (Federal Trade **[**41]** Commission Staff Report on the Structure of the Nation's Coal Industry) (concluding that "a company's holdings of coal reserves are an important indicator of its present and future competitive position, and coal reserve concentration ratios are a very important measure of market power"); DX 0034 (United States department of justice, Competition in the Coal Industry). In 1996, in connection with amendments to the *Hart-Scott-Rodino Act*, the FTC recognized that, in assessing acquisitions in the coal industry, concentration levels are **[*127]** impacted by firms' reserves. See DX 0035 (commenting that "holdings of [coal] reserves ... are widely dispersed, and individual acquisitions have had minimal effect on concentration"). The FTC points out, however, that when using reserves to measure concentration, the DOJ has stated that a market share of 15 percent or more is prima facie inconsistent with the antitrust laws; Arch currently has 16 percent of SPRB reserves and acquiring North Rochelle would increase Arch's SPRB reserves to almost 20 percent. See PX 8611-018 p 59 (Morris W.D.).

Notwithstanding the Supreme Court's reliance on reserves in General Dynamics, exclusive **[**42]** reliance on that measure to determine market concentration in the SPRB today does not appear warranted. The present SPRB coal market is different from the relevant coal market in General Dynamics -- particularly in the use of more short-term contracts. [10] Moreover, the parties have presented statistics based on all reserves, but only uncommitted reserves were considered in General Dynamics and are particularly relevant to assessing future competitiveness. The greater availability of additional reserves through LBAs has also not been fully accounted for in the parties' presentations based on present reserves. Hence, although the court will look primarily to market concentration as measured by reserves, it will also consider other measures. Plaintiffs agree that it is appropriate to do so. See Closing Argument Tr. (7/20) 53:16-54:1. Those other measures can also be expected to provide some indication of the projected increase in market concentration resulting from the challenged transactions.

[43]** Loadout capacity is a helpful measure of market concentration, but it is likewise imperfect. As discussed above, plaintiffs argue that loadout capacity is the most appropriate measure of future competitiveness and thus market concentration because expanding a mine's capacity can be an expensive, slow, and difficult process. See PX 0347 at 002 (expanding Arch's Black Thunder mine by an additional 10 million tons would cost $ 55 million and take two years); PX 8302 at 202:10-204:20 (Lien Dep.); PX0016 at p 10 (Conn Decl.) (to expand RAG's Eagle Butte mine beyond its current capacity of 28 million tons would require the addition of another rail loop, the installation of crushers, conveyor, and silos and would cost approximately $ 45 to $ 50 million and take up to two years). But it

---

[10] The continued use of longer-term contracts in the SPRB market does, however, support the use of reserves as one important measure of market concentration.

has been demonstrated that loadout capacity can also be expanded fairly quickly and inexpensively. Arch steadily expanded Black Thunder's capacity from 50 million to 70 million tons per year without any significant capital expenditure, Leer Tr. (6/28 morning) at 20:17-21:16; Lang Tr. (6/24 afternoon) at 60:17-62:10, and RAG expanded loadout capacity by 6 million tons between 2000 and 2002, DX 2006 at **[**44]** p 25. Moreover, as a static measure that does not reflect future capacity, Guerin-Calvert Tr. (6/30 afternoon) at 93: 12-95:3, loadout capacity does not take into account the constraints that limited reserves may place on a mine's ability to compete in the future. For example, regardless of the loadout capacity at the North Rochelle mine, given the present rate of production, it currently has reserves of only approximately seven-and-a-half years, which will make North Rochelle less of a competitive player in the future unless it acquires additional reserves. [11] **[*128]** Still, loadout capacity does provide some insight as to competitiveness, and thus is of some value in measuring market concentration.

Production and practical capacity are less useful measures, although they can still **[**45]** be informative. Both are, like loadout capacity, static measures that are not stable predictors of a producer's ability to deliver in the future in the form of sales or contracts. Guerin-Calvert Tr. (6/30 afternoon) at 88: 7-21; Lang Tr. (6/24 afternoon) at 62:11-63:19. The Supreme Court specifically rejected past production figures as a measure of future ability to compete in General Dynamics: "[i]n a market where the availability and price of coal are set by long-term contracts rather than immediate or short-term purchases and sales, reserves rather than past production are the best measure of a company's ability to compete." *415 U.S. at 502*. And practical capacity is not generally as sound a predictor of future competitiveness in the SPRB coal market as is loadout capacity.

Because these different measures of concentration are all informative to some degree, yet remain imperfect indicators of future ability to compete, the court has considered all of the measures in assessing whether plaintiffs have established a prima facie case of an anticompetitive merger. See *Heinz, 246 F.3d at 716*; *Baker Hughes, 908 F.2d at 982-83* & n. 3. **[**46]** plaintiffs agree with that approach, See PFF p 239, which is also consistent with the general admonition that all aspects of the relevant market should be examined to determine whether a proposed transaction is likely to produce any anticompetitive effects.

3. Post-Merger Increase in HHI

The court concludes, however, that reserves remain the best of these imperfect measures, and that using reserves as the primary tool to assess concentration and calculate post-merger increases in HHI is also consistent with the Supreme Court's analysis in General Dynamics. The reserves data provided to the court, See PX 5675 at 3, establish that the current market concentration (HHI) is 2054, and that post-merger it will be 2103, for an increase in HHI of 49. According to the Merger Guidelines, an increase in HHI of 50 points or more in a post-merger highly concentrated market raises "significant competitive concerns." Merger Guidelines § 1.51(c). Although the HHI increase calculated on the basis of reserves is only 49, the Merger Guidelines state that: "the numerical divisions suggest greater precision than is possible with the available economic tools and information. **[**47]** other things being equal, cases falling just above and just below a threshold present comparable competitive issues." Id. § 1.5. Based on reserves, then, the proposed transaction may raise significant competitive concerns -- although just barely.

Loadout capacity is a novel but fairly logical basis for calculating market concentration and assessing future competitiveness because it does act as a constraint, although perhaps not as rigid a constraint as plaintiffs have asserted, on a coal company's ability to compete for future contracts. The post-merger increase in HHI based on loadout capacity is 224. In a highly concentrated post-merger market, according to the Merger Guidelines, with an increase in HHI above 100 it is "presumed that … [the merger is] likely to create or enhance market power or facilitate its exercise." Id. § 1.51(c). The post-merger increases in HHI calculated based on production and practical capacity are **[*129]** 163 and 193 respectively, both of which also trigger a presumption of the likelihood of creating or enhancing market power or facilitating its exercise.

---

[11] The uncommitted reserves at North Rochelle are even less, since a significant percent of reserves are already committed through long-term contracts. Hake Tr. (6/29 closed) at 28:19-20; 29:2-8; DX 9005 at 002; DX 0274; DX 0281.

The various measures of market concentration in the SPRB presented by the parties thus **[**48]** reflect an increase in HHI ranging from 49 to 224. Considering all these measures of market concentration, therefore, at a minimum the proposed transactions raise significant competitive concerns and if, as the court believes may be appropriate, one departs from a strictly reserves based approach adopted in General Dynamics because of changes that have occurred in the coal market over the last thirty years, then there may even be a presumption of an anticompetitive increase in market power. Ignoring altogether the other measures of market concentration in favor of an exclusively reserves-based assessment seems unwarranted. The FTC has, therefore, satisfied its prima facie case burden.

Nevertheless, it is important to note that this case is not one in which the post-merger increase in HHI produces an overwhelming statistical case for the likely creation or enhancement of anticompetitive market power. Indeed, the single best available measure of market concentration -- reserves -- produces an increase in HHI of only 49, which is actually below the level for significant concern in the highly concentrated SPRB market. The measure plaintiffs urge -- loadout capacity -- only produces **[**49]** an HHI increase of 224. Such HHI increases are far below those typical of antitrust challenges brought by the FTC and DOJ. For example, in Heinz the HHI increase was 510 based on a pre-merger HHI of 4775. See *246 F.3d at 716*. In Baker Hughes the HHI increase was 1425, from 2878 pre-merger to 4303 post-merger. See *908 F.2d at 983 n. 3*. In Staples the average HHI increase in the several markets under consideration was 2715. See *970 F. Supp. at 1082*. And in *FTC v. Libbey, Inc., 211 F. Supp. 2d 34, 51 (D.D.C. 2002)*, the impact of the original merger agreement (used by the court for its analysis) was an HHI increase of 1052. all of these levels of HHI increase dwarf even the highest increase arguably present here. [12] Indeed, between 1999 and 2003, only twenty-six merger challenges out of 1,263 (two percent) occurred in markets with comparable concentration levels to those argued here. See DX 0833 (Federal Trade Comm'n & United States Dep't of Justice, Merger Challenges Data, Fiscal Years 1999-2003 (Dec. 18, 2003)).

[50]** Thus, although the FTC has satisfied its prima facie case burden, the FTC's prima facie case is not strong. ***HN17***[] certainly less of a showing is required from defendants to rebut a less-than-compelling prima facie case. See *Heinz, 246 F.3d at 725*; *Baker Hughes, 908 F.2d at 991* ("[t]he more compelling the prima facie case, the more evidence the defendant must present to rebut it successfully"). Even assuming that the FTC's showing of an increase in HHI, and thus market concentration, warrants a presumption that the transactions will lessen competition, defendants have pointed out the shortcomings of statistics based on capacity or production, rather than on reserves, in providing the best assessment of the proposed merger's likely future effect on competition. Defendants have, therefore, successfully rebutted the presumption that the merger will substantially lessen competition and the court will proceed to examine the issue of the likely competitive effects of the proposed merger **[*130]** in the relevant market, for which plaintiffs bear the ultimate burden of persuasion. *Heinz, 246 F.3d at 715* (citing *Baker Hughes, 908 F.2d at 983*). **[**51]** as discussed below, an analysis of the SPRB market confirms that defendants have produced sufficient evidence to further rebut the FTC's prima facie case and that, ultimately, plaintiffs have not carried their burden of persuasion. See *Baker Hughes, 908 F.2d at 985* (rebuttal evidence may include factors relating to competition in relevant market and financial or market weakness of acquired company.) [13]

[52] C. Likelihood of Coordinated Interaction In This Market**

In General Dynamics, the Supreme Court cautioned that, ***HN19***[] although significant, statistics concerning market share and concentration are "not conclusive indicators of anticompetitive effects." *415 U.S. at 498*; See also

---

[12] So, too, do the pre-and post-merger market concentration figures present in those cases far exceed the figures for the SPRB market, which barely place the SPRB market in the "highly concentrated" market range.

[13] In Heinz the court noted that ***HN18***[] rebuttal evidence may take the form of nonstatistical market evidence raising doubts about the persuasive quality of the FTC's statistics or, as was the case in General Dynamics, economic circumstances undermining the predictive validity of the government's statistical presentation. See *246 F.3d at 715 n. 7*. Here, defendants have produced both types of rebuttal evidence -- as in General Dynamics, an alternative statistical assessment based on reserves undermines plaintiffs' prima facie case, and in addition a close examination of competition in the relevant market (both presently and post-merger) undermines the claim of significant anticompetitive effects.

Brown Shoe, 370 U.S. at 321-22; *Heinz, 246 F.3d at 717 n. 12*. Indeed, this circuit has cautioned against relying too heavily on a statistical case of market concentration alone, and that instead a broad analysis of the market to determine any effects on competition is required. "that the government can establish a prima facie case through evidence on only one factor, market concentration, does not negate the breadth of this analysis. Evidence of market concentration simply provides a convenient starting point for a broader inquiry into future competitiveness." *Baker Hughes, 908 F.2d at 984*; see Merger Guidelines § 2.0. Judge Posner has described the need to examine the evidence relating to competition in the market as follows:

> … the Supreme Court, echoed by the lower courts, has said repeatedly that the economic concept of competition, **[**53]** rather than any desire to preserve rivals as such, is the lodestar that shall guide the contemporary application of the antitrust laws …. Applied to cases brought under *Section 7*, this principle requires the district court … to make a judgment whether the challenged acquisition is likely to hurt consumers, as by making it easier for the firms in the market to collude, expressly or tacitly, and thereby force price above or farther above the competitive level.

Hosp. Corp. of Am., 807 F.2d at 1386.

Plaintiffs may seek to show that a merger will diminish competition by showing that it will facilitate coordinated interaction. That is, in fact, the thrust of plaintiffs' case here. ***HN20***[] the Merger Guidelines define coordinated interaction as "actions by a group of firms that are profitable for each of them only as a result of the accommodating reactions of the others. This behavior includes tacit or express collusion, and may or may not be lawful in and of itself." Merger Guidelines § 2.1; See also *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 227, 125 L. Ed. 2d 168, 113 S. Ct. 2578 (1993)* (tacit coordination is a "process, not in itself **[**54]** unlawful, by which firms in a concentrated market might in effect share monopoly power, setting their prices at a profit-maximizing, supra-competitive level **[*131]** by recognizing their shared economic interests and their interdependence with respect to price and output decisions"). [14] Indeed, antitrust policy seeks particularly to inhibit "the creation or reinforcement by merger of … oligopolistic market structures in which tacit coordination can occur." *Heinz, 246 F.3d at 725* (quoting 4 Phillip E. Areeda, Herbert Hovenkamp & John L. Solow, ***Antitrust Law*** p 901b2, at 9 (rev. ed. 1998)).

A market is conducive to tacit coordination, then, where producers recognize their "shared **[**55]** economic interests and their interdependence with respect to price and output decisions." *Brooke Group, 509 U.S. at 227*. Successful coordination requires two factors: (1) reaching terms of coordination that are profitable to the firms involved and (2) an ability to detect and punish deviations that would undermine the coordinated interaction. Merger Guidelines § 2.1. coordination need not be complex or complete -- "[i] nstead, the terms of coordination may be imperfect and incomplete … and still result in significant competitive harm." Id. at § 2.11. The Merger Guidelines provide, moreover, that the punishment of deviation will not always be direct and specific: "credible punishment … may not need to be any more complex than temporary abandonment of the terms of coordination by other firms in the market." Id. at § 2.12. But "where detection or punishment is likely to be slow, incentives to deviate are enhanced and coordinated interaction is unlikely to be successful." Id.

1. The FTC's Novel Theory

The FTC brings this action for a preliminary injunction under the theory that the mechanism of tacit coordination that is most strongly **[**56]** supported by the evidence is a form of output restriction in which the major coal producers in the SPRB market would constrain their production so that increases in supply would lag behind increases in demand, thereby creating an upward pressure on price. See, e.g., Pls. Post-hearing Br. at 8. What this means is

---

[14] The FTC has stressed that its challenge here, based on concerns that the major firms in the SPRB may coordinate to restrict output, is founded on the premise that output would be less than it would be absent the merger. FTC post-hearing reply brief at 6 n. 8; See *Staples, 970 F. Supp. at 1082 n. 14*.

that the FTC must show projected future tacit coordination, which itself may not be illegal, which is speculative and difficult to prove, and for which there are few if any precedents.

As defendants have noted, prior coordinated effects challenges to mergers based on alleged output coordination have invariably been accompanied by a coordinated effects theory grounded on Price coordination. See, e. g., *Univ. Health, 938 F.2d at 1219*; *FTC v. Elders Grain, Inc., 868 F.2d 901, 905-06 (7th Cir. 1989)*; *Hosp. Corp. of Am. v. FTC, 807 F.2d 1381, 1387 (7th Cir. 1986)*; *FTC v. Bass Bros. Enterprises, Inc., 1984 U.S. Dist. LEXIS 16122, 1984-1 Trade Cas. (CCH) P 66,041 at 68,612 (N.D. Ohio 1984)*. Similarly, although not a merger case, *In re High Fructose Corn Syrup, 295 F.3d 651 (7th Cir. 2002)*, involved a coordinated **[**57]** effects theory where the product was highly standardized, completely fungible, and did not vary from producer to producer. See *295 F.3d at 656-57*; *In re High Fructose Corn Syrup, 156 F. Supp. 2d 1017, 1021 (C.D. Ill. 2001)*, rev'd mem., *295 F.3d 651 (7th Cir. 2002)*, cert. denied, *537 U.S. 1188, 154 L. Ed. 2d 1019, 123 S. Ct. 1254 (2003)*. There, coordination among producers needed to take account of only one fact -- price -- see *295 F.3d at 657*, and price transparency was virtually complete, with producers publishing prices in advance of **[*132]** their becoming effective, See *156 F. Supp. at 1037*. Deviations from coordination were immediately detectable, the other producers could quickly deprive the cheater of any benefit, and there was evidence of a history of anticompetitive behavior in the market. *295 F.3d at 666*. as discussed further below, none of these factors is present here. SPRB coal has a wide range of heat level (8800 to 8400 Btu), quality (e. g., sulfur and ash content) and ultimately price, information regarding prices is far from transparent, there is no historical evidence of actual price or output coordination, **[**58]** and the SPRB market does not lend itself to ready detection and punishment of deviations from coordination. Moreover, the number of competitors in the SPRB pre-and postmerger remains the same.

The novel approach taken by the FTC in this case makes its burden to establish anticompetitive effects in the post-merger SPRB market more difficult. In support of their case, plaintiffs cannot simply seek to show that the proposed transactions will decrease production in the SPRB market. As plaintiffs have noted, a coordinated restriction in production will not necessarily decrease total SPRB coal production, but rather, will likely cause the output of SPRB coal to be "less than it would have been absent the [a]cquisition." Pls. Post-hearing br. at 8. Instead, plaintiffs must establish that the proposed transactions will increase the risk of coordinated output restriction and decrease the likelihood of deviation in the SPRB market. This requires a sophisticated attempt to show a developing propensity towards this form of tacit coordination in the SPRB market supported by an ability of the SPRB firms to monitor each other's behavior.

Plaintiffs thus seek to demonstrate that the proposed **[**59]** transactions will substantially increase the risk that SPRB producers will engage in coordinated output-constraining behavior because the transactions will: increase the gains from coordination; place most of the excess capacity in the hands of firms most likely to restrict production; eliminate a significant, independent competitor (Triton); substantially weaken the post-merger competitive fringe (RAG and Kiewit); and generally enhance Arch's ability to lead the industry toward an anticompetitive outcome. The court will proceed by examining the competitive state of the SPRB market today, determining whether coordinated interaction is feasible and, if so, whether there is evidence that actual or tacit coordination has occurred, and then examining the structure and dynamics of the SPRB market, the competitive strength of Triton, and the likely roles that RAG and Kiewit would play in a post-merger market. This broad analysis of the SPRB market is necessary to determine whether the FTC has carried its burden to persuade the court that the proposed transactions increase the risk of coordinated interaction that will likely substantially lessen competition in the SPRB market.

2. Competition [60] in the Current Market**

HN21[] An oligopolist market is one having a modest to a relatively few number of players and is distinguished from either perfect competition or monopoly. Guerin-Calvert Tr. (6/30 afternoon) at 113:20-114:18. The SPRB coal market, with five significant producers, is an oligopoly. A non-cooperative oligopolist market (or non-coordinated oligopolist market) is recognized in the economic literature to be a market characterized by competitive outcomes even though there are relatively few firms. Guerin-Calvert Tr. (6/30 afternoon) at 113:20-114:18. The evidence shows that the SPRB market is currently a competitive non-cooperative oligopolist market.

[*133] SPRB producers appear to follow different competitive strategies depending on their own economic self-interest. DX 9004 at 003; DX 0154; DX 0155; DX 0158. Numerous witnesses from electric utilities testified that the SPRB marketplace presently is "competitive" and that recent bid processes have been "competitive." Rahm Tr. (6/21 afternoon) at 5:12-18, 11:5-7; Holloway Tr. (6/22 afternoon) at 88:5-8; Luksan Tr. (7/7 morning) at 42:5-8; Stuchal Tr. (7/7 morning) at 67:14-20; PX 8309 at 164:12-15 (Panzarino Dep.); PX 8303 at **[**61]** 136:22-137:2 (Richards Dep.); PX 8302 at 208: 22-209:1 (Lien Dep.)("the Powder River Basin is extremely competitive."). When a utility issues a request for proposal ("RFP"), all five major SPRB producers typically respond. Bales Tr. (6/21 afternoon) at 62:14-63:5. Responses by SPRB producers to rfps evidence the absence of any coordinated behavior. As one customer testified, there is almost always one "surprise" SPRB producer -- invariably a different one -- that offers a price lower than expected as a result of unique circumstances facing that particular producer at the time of the bid. Bales Tr. (6/21 afternoon) at 63:15-64: 3; See PX 8601 at 8. Customers have the ability to solicit bids from more than the five main SPRB producers, and they often do, soliciting and receiving spot bids from brokers/traders. Herndon Tr. (6/22 afternoon) at 16:3-18:5; DX 0951 at 023232; DX 0953 at 233390; Luksan Tr. (7/7 morning) at 42:1-4; Stuchal Tr. (7/7 morning) at 64:24-65:3; PX 8307 at 107:12-109:15 (Rackers Dep..). Defendants' economic expert concluded, based on her thorough analysis of the SPRB market, that the market is competitive today. Guerin-Calvert Tr. (6/30 afternoon) at 109:12-14; **[**62]** DX 0086 p 36. The FTC's economic expert was not asked to analyze the current state of competition in the SPRB and testified that he therefore had no opinion on the competitiveness of the SPRB today. Morris Tr. (6/24 morning) at 58:22-25. Hence, the FTC does not contend that the current SPRB market is not competitive because there has been actual coordination on price or supply by producers in the SPRB market in the past.

a. The 2001 Price Spike

In 2001, spot prices for SPRB coal spiked. See Bales Tr. (6/21 afternoon) at 44:21-46:11; Rahm Tr. (6/21 afternoon) at 17:23-18:2; *DX 0935 at 7 Colo. 100, 2 P. 5*. Rather than being an indication of anticompetitive coordination, however, the 2001 price spike was a short-term phenomenon that is largely explained by several factors other than tacit coordination in the marketplace, including reduced stockpiles, severe weather conditions, and higher prices for natural gas, all of which unexpectedly increased the demand for coal. Guerin-Calvert Tr. (7/1) at 13:5-24; Rahm Tr. (6/21 afternoon) at 17:22-20: 7; Luksan Tr. (7/7 morning) at 39:1-40:6; DX 0935 at 2. buyers reacted to these various factors by resorting to **[**63]** panic buying, primarily in the over-the-counter market, which drove up spot prices. Rahm Tr. (6/21 afternoon) at 19:4-9; DX 0086 p 11. Coal prices in other regional markets across the country also rose in 2001 for the same reasons. Prices for SPRB coal are well below prices for coal from other regions and have remained stable over the last several years following the 2001 spike in spot prices. See PX 4309.

Utility stockpiles were unusually low in 2001. Rahm Tr. (6/21 afternoon) at 18:25-19:23; PX 8303 at 243:15-245:3 (Richards Dep.); DX 0935 at 2. Weather also played a significant role in the spike; the summer and fall of 2000 were mild, Bales Tr. (6/21 afternoon) at 46:19-47:9; PX 8306 at 256:21-257:12 (McGowan Dep.), but the winter of 2000-2001 was unusually cold, causing **[*134]** over-utilization of coal reserves and leaving inventories depleted going into the spring and summer of 2001, Rahm Tr. (6/21 afternoon) at 18:23-20:1; DX 0935 at 2.

The price spike was also preceded by a run-up in the prices of alternative fuels. DFF 112. There was a shortage of supply for eastern coal due in part to several mine closures and bankruptcies. Rahm Tr. (6/21 afternoon) at 18:6-19; **[**64]** 19:17-19; Freund Tr. (6/21 afternoon) at 111:13-15. Demand and prices for coal increased in all regions, with eastern coal prices increasing even more than SPRB prices. Luksan Tr. (7/7 morning) at 38:16-21; PX 8306 at 256:21-257: 12 (McGowan Dep.). Natural gas prices also increased in the winter of 2000-2001. Rahm Tr. (6/21 afternoon) at 20:2-7; Luksan Tr. (7/7 morning) at 39:21-23; PX 8302 at 58:19-59:12 (Lien Dep.); DX 0935 at 2. at the time, California was experiencing an energy crisis. Luksan Tr. (7/7 morning) at 39:14-16; DX 0935 at 2. The price adjustment for so 2 emission allowances also increased during this time period. PX 8306 at 257:24-258:4, 258:21-259:21 (McGowan Dep.).

These factors explain the 2001 price spike without any anticompetitive or coordinated activity by SPRB producers. SPRB spot prices following the 2001 price spike have declined to near pre-spike levels, and have shown no signs of climbing again. See DX 9007 at 013-014; PX 1510; PX 1511; PX 1514. This is consistent with the pattern for prices for coal in other regions. See PX 4309. Moreover, to the extent a difference can be seen in the spot prices before and after the spike, increased costs largely **[**65]** account for those differences. Guerin-Calvert Tr. (7/1) at 13:25-14:9; 14:22-15:1; Luksan Tr. (7/7 morning) at 40: 7-10. A comparison of price levels in other regions shows that, in general, prices in the SPRB are at the same level as they would be if they had increased at the rate of other coal regions. Guerin-Calvert Tr. (7/1) at 14:10-21.

b. Reduced Output and Mine Closures

Plaintiffs contend that SPRB producers have been moving in the direction of industry-wide production discipline since 1999-2000. According to plaintiffs, Peabody and Kennecott have, at various times, recognized the utility of constraining production in order to obtain improved pricing, and have issued public announcements stating that they curtailed production or delayed expansion because current prices did not provide adequate returns. However, defendants have offered evidence of credible, legitimate reasons for the reduced output among SPRB producers in 1999-2000, including the closure of the Cordero-Rojo mine by Kennecott, the closure of the Rawhide mine by Peabody, and Arch's closure of the Coal Creek mine.

Arch idled its Coal Creek mine beginning in mid-2000. Lang Tr. (6/24 afternoon) at 69: **[**66]** 5-10. Coal Creek had been closed by its previous owners more than once, and was losing money when the mine was acquired by Arch. Lang Tr. (6/24 afternoon) at 68:5-12. Arch tried to make the mine profitable by expanding production but that effort failed. Leer Tr. (6/28 morning) at 21:17-22: 6; Lang Tr. (6/24 afternoon) at 67:13-68:4, 70: 3-12. Arch managers and its board of directors carefully considered the options available for Coal Creek. DX 1066; DX 0803; DX 0782; DX 0783. Mr. Lang and his staff prepared detailed economic analyses regarding idling Coal Creek. See DX 0774; DX 0088; DX 1067. at the time that Coal Creek was struggling, Arch had implemented several changes to the Black Thunder mine that increased the efficiency of that mine and expanded its production. **[*135]** Lang Tr. (6/24 afternoon) at 68:13-69: 4. Entering 2000, Arch was exceeding its production operations at Black Thunder. Id. at 71:17-72: 4; DX 0783 at 020276. Arch management determined that it could supply the volume of coal committed by contract for the balance of the year for both mines from the Black Thunder mine alone. Lang Tr. (6/24 afternoon) at 72:22-73:8; DX 0783.

Ultimately, the court finds **[**67]** Arch's decision to idle the Coal Creek mine in 2000 was prompted by legitimate business reasons, not anticompetitive motives. Many of plaintiffs' witnesses testified that they understood the Coal Creek closing to be for legitimate business reasons and did not regard it as an attempt at coordination. Freund Tr. (6/21 afternoon) **[*136]** at 113:24-114:7; Bales Tr. (6/21 afternoon) at 48:5-10; PX 8302 at 72:22-73:4; 151:10-154: 17, 160:20-22 (Lien Dep.); Carr Tr. (6/23 afternoon) at 18: 14-17; Warner Tr. (6/23 morning) at 31:11-19, 34:10-14; PX 8304 at 111:16-112:12 (Flippin Dep.). The few customers who speculated otherwise acknowledged that they had no knowledge regarding the financial performance of the mine and were unable to say how Coal Creek's closure affected prices and production at other mines. Orme Tr. (6/22 morning) at 33:6-34:1.

In 1999, Kennecott reduced production at its Cordero-Rojo mine due to geological problems. PX 7141 at 15:4-16:10 (Randen Dep.); DX 1024 at 024799. The decision was an independent one based on Kennecott's operational needs and circumstances. PX 7141 at 32:18-24 (Randen Dep.). In April 1999, Peabody idled its Rawhide mine due to production failures and a lack **[**68]** of customer demand. DX 1024 at 024836. at that time, Peabody switched its Rawhide customers to its North Antelope or Caballo mines and continued to serve them without any shortfall in production. Id.

Thus, the evidence shows that there were independent, legitimate business reasons for the mine closures by Arch, Kennecott and Peabody in 1999 and 2000. Like the factors that credibly explain the price spike of 2001, these reasonable explanations for the mine closures by the "big three" SPRB producers preclude the reduced output during this period from serving as evidence of coordinated or anticompetitive activity in the SPRB market.

c. Increased Production Over Time

SPRB production has increased consistently over the past ten years even though the number of SPRB producers has declined. [15] DX 9007 at 016; PX 4335 at 001; Carr Tr. (6/23 afternoon) at 23:24-24:12; Shalah Tr. (6/25 afternoon) at 35:9-25; Luksan Tr. (7/7 morning) at 47:8-15; Kelly Tr. (6/22 morning) at 63:20-25. Defendants' expert examined the competitive environment and found that the decisions made by the different producers as to production levels, the contracts on which they bid, and the costs they elected **[**69]** to incur were independently derived based on each producer's particular business strategy. See Guerin-Calvert Tr. (7/1) at 12:18-13:4. For example, Arch's "market driven" strategy was adopted to minimize costs without sacrificing customer contract needs, and the closure of Coal Creek was an independent decision based on a legitimate business assessment. See Leer Tr. (6/28 morning) at 25: 13-18, 26:17-22, 27:17-28:1, 50:2-6; Lang Tr. (6/24 afternoon) at 80:4-12; Freund Tr. (6/21 afternoon) at 113:24-114:7; See also Bales Tr. (6/21 afternoon) at 48:5-10 (decision was independent of other mine closures and intended to cut costs); PX 8302 at 72:22-73:4, 151:10-154:17, 160:20-22 (Lien Dep.)(market would need to improve before opening Coal Creek would make sense; SPRB producers were losing money in 2000 and needed to change business practices); Carr Tr. (6/23 afternoon) at 18:14-17 (closure not due to agreement among competitors); Warner Tr. (6/23 morning) at 31:11-19, 34:10-14 ("we did not view [closure] as a signal to the market at the time"); PX 8304 at 111:16-112: 12 (Flippin Dep.)(in mid-2000, LCRA was informed by an Arch representative that the Coal Creek mine was being **[**70]** idled due to high operating costs). [16]

[71]** Peabody's business strategy for the last several years has been actively to expand production at its several mines without taking into account the decisions and activities of the other SPRB producers. DX 0154; Rahm Tr. (6/21 afternoon) at 15:19-16: 5; DX 0150 at 5533. Kennecott brought production at the Cordero-Rojo mine back to near pre-2000 levels, when it temporarily reduced the mine's operations, and is also expanding production at its Antelope and Jacobs Ranch mines. PX 7141 at 11:5-24, 13:20-24, 15:4-16:10, 16:19-17:17, 19:17-25, 20:10-21:10, and 32: 18-24 (Randen Dep.); DX 1024 at 024799; Guerin-Calvert Tr. (7/1) at 12:4-17; PX 0090 at 2. RAG also claims to be poised to expand and it pays no attention to either the actual production or the announcements relating to production of its competitors. PX 8302 at 37:2-8, 42:19-22, 314:12-13; 229:15-230:1, 180: 16-185:3, 42:12-18, 61:18-62: 15,316:22-317:7, 317:11-318: 4, 85:3-87:22, 328:2-18 (Lien Dep.); DX 0163.

Based on the sealed bid system in place for SPRB coal contracts, the views of customers who solicit bids from the SPRB producers, the conclusions of the experts, the fact that legitimate reasons other than the existence **[**72]** of production coordination account for the 2001 price spike and for the decisions of certain producers to close mines between 1999 and 2000, and the fact that production has been consistently increasing in the SPRB, the court finds that the SPRB market is currently competitive. Indeed, it is fair to say that the speb has in the past operated as a very competitive market for the sale of coal to electric utility customers. The next question, however, is whether, notwithstanding the historical and present competitiveness of the SPRB market, coordinated interaction in the form of tacit output reduction is likely to occur in this market as a result of the proposed transactions.

3. Possibility of Coordinated Interaction

a. Interest in Production Discipline

---

[15] SPRB production has increased from 230 million tons ten years ago to 360 million tons today. Rahm Tr. (6/21 afternoon) at 16:24-17:21; PX 8306 at 123:7-18 (McGowan Dep.); PX 8304 at 213:24-214:3 (Flippin Dep.); See PX 1040 (production increases over the last five years).

[16] Arch is unlikely to coordinate in reducing production if it would jeopardize the reopening of its Coal Creek mine. Arch is required under its federal lease to resume production at Coal Creek by 2007, Lang Tr. (6/24 afternoon) at 76:5-12; DX 0803 at 0020521, and stands to lose a very substantial investment if it forfeits that lease, DX 2001. Based on current mine planning, Arch anticipates restarting production at Coal Creek before the 2007 deadline. DX 2002. Arch intends to produce enough coal at Coal Creek before the end of 2007 to recoup much of its investment. Lang Tr. (6/24 afternoon) at 75:15-76:4, 91:31-92:2; DX 2000. Mr. Lang testified that he is confident that Coal Creek will again be up and running before the November 2007 forfeiture date. Id.

Producers in the SPRB have certainly evinced some past interest in price or production discipline. On April 25, 2000, Irl Engelhardt, Chairman and CEO of Peabody, gave a speech before the Western Coal Transportation Association, a meeting **[*137]** attended by SPRB coal producers and customers, in which he remarked on disciplining production in the coal industry. PX 0658 at 001. Engelhardt noted that "[o]ne example [of approaches **[**73]** in the coal industry] is making capital investments to improve productivity and lower costs. Nothing wrong here. Lower costs mean higher margins, right? They do unless the incremental production that results contributes to an oversupply situation." PX 0658 at 002. Engelhardt then commented that "[i]f coal producers would use growth in returns as their performance metric, we believe more discipline would be applied to investments that would otherwise lead to oversupply situations." Id. Engelhardt detailed the actions that Peabody was taking to address oversupply in the market:

> Peabody is focusing on profitability and high return investments in the powder river basin. Here are some recent steps that they have taken:
>
> . In early 1999, Peabody suspended the 10-million-ton-per-year Rawhide mine, one of the most productive mines in the United States;
>
> . Also in 1999, the company delayed a 30-million-ton-per-year capacity expansion at North Antelope/Rochelle until margins generate the proper returns; and
>
> . In April 2000, it idled a truck/shovel fleet at Caballo, producing 8 million tons per year, until market conditions improve.

Id. at 004.

[74]** A month later, on May 23, 2000, Steven Leer, chairman and CEO of Arch, addressed the Western Coal Council's 2000 Spring Coal Forum, attended by SPRB coal producers and customers. PX 0253; PX 0795; PX 0603. Leer posed the question "what can we do about oversupply?" his answer was "produce less coal." in identifying a response to low coal prices, he provided the following information:

> subliminal messages
>
> . If you produce it, they will buy it
>
> . Outcome: prices have suffered
>
> . Solution: produce less coal.

PX 0253 at 013; PX 0795 at 012; PX 0603 at 012; Leer Tr. (6/28 morning) at 84:20-21 (citing DX 1069). Leer also identified "produce less coal" as the solution to low prices resulting from the evaporating export market and huge stockpiles. PX 0253 at 013; PX 0795 at 012; PX 0603 at 012; Leer Tr. (6/28 morning) at 84: 20-21 (citing DX 1069).

Plaintiffs view these statements from SPRB producers as strong evidence of the type of production coordination that is likely if Arch's acquisition of Triton is allowed. Defendants have explained, however, that Leer's comments are simply an articulation of Arch's "market driven" business strategy, under which Arch will restrict **[**75]** its production when it believes that, due to oversupply, it cannot obtain returns it considers adequate. Leer Tr. (6/28 morning) at 62:21-63:7; 86:11-15. This approach is consistent with the accepted business objective of obtaining an adequate rate of return to fund expansion. Nonetheless, statements of the type made by Leer and englehardt in 2000 are indicative of possible producer coordination to limit production, and warrant close scrutiny in an assessment of the likelihood of anticompetitive coordination in the SPRB market.

b. Feasibility of Coordinated Interaction

There is evidence that coordination in the SPRB market is Feasible. The differences that distinguish coal produced at one SPRB mine from that at another SPRB mine, such as Btu content, sulfur content, moisture and ash content, are similar to **[*138]** differences that distinguish crude oil produced from different wells. Guerin-Calvert Tr. (7/1) at 95:5-23. Standard adjustments are made in pricing to account for any specific differences that do exist in the coal from different SPRB mines. Orme Tr. (6/22 morning) at 20:4-17; Bales (6/21 afternoon) at 41:9-22; Freund Tr. (6/21 afternoon) at 102:4-103:22. Furthermore, **[**76]** plaintiffs' expert concluded that the demand for SPRB coal is inelastic, i.e., the elasticity of demand is less than one. Morris Tr. (6/23 afternoon) at 50:21-51:14. This means that a modest price increase in the highly concentrated SPRB market would be very profitable to producers because it would increase revenues, and therefore profits, even before taking into account the additional profits that would be realized from reductions in total costs as a result of any reduction in output. Id at 51:6-14.

Barriers to entry into the SPRB coal market increase the likelihood of coordinated interaction. Morris Tr. (6/23 afternoon) at 117: 15-21. Certainly there are appreciable start-up costs associated with becoming an SPRB coal producer. The small and frequent transactions for SPRB coal also increase the likelihood of coordinated interaction, decrease the incentive to deviate from coordinated interaction, and increase the likelihood that deviations from coordinated interaction will be quickly detected. Morris Tr. (6/24 morning) at 6:13-8:21, 49:5- 24. A typical transaction size in the SPRB coal market is less than one percent of the total market. Id. at 6:23-24.

Key market information **[**77]** relating to the other competitors in the SPRB coal market is available from numerous sources, which would theoretically permit the sharing of information among producers. These sources include: trade reports and conferences, PX 5614 at 001, industry analysts and consultants who publish reports containing annual production, production capacity, and cost-of-production by mine information for the SPRB coal market, DX 1024 at 24662, 24698; PX 0012 pp 22-23 (Panzarino Decl.); governmental filings such as the form 423 monthly reports required by the federal energy regulatory commission ("FERC") stating the quantity and quality of coal purchased and the delivered price for each source, PX 1424 at 007 at 012; PX 0012 p 23 (Panzarino Decl.); PX 0005 p 16 (Rackers Decl.); coal company announcements that inform the public on market conditions, production costs, mine productivity, and whether a company is gaining an adequate return for its coal, PX 1821 at 001; PX 1035 at 021; PX 1408 at 014-016; PX 0097 at 020; PX 5614 at 001; PX 7141; the bidding process which, even though sealed under confidentiality provisions, nevertheless allows some information to be transmitted **[**78]** to producers from customers regarding how their bids compared to other bids from producers, PX 0118; PX 0161; PX 1433 at 015; PX 3307 at 005; PX 3316 at 004; and merger and joint venture negotiations which may allow for limited transfer of certain competitive information between producers, PX 0118 at 001; PX 0161; PX 0609 at 002; PX 0660 at 004; PX 0633 at 001; PX 1405 at 003.

Given a stated interest by some SPRB producers in production discipline, these general features of the SPRB market would not appear to preclude coordinated interaction having anticompetitive effects. However, even though these factors and conditions make post-merger coordinated activity to limit production in the SPRB market feasible, whether anticompetitive coordination is likely requires closer examination of such factors as the past history of coordinated interaction, the SPRB market structure and dynamics, and the roles of "fringe" or "maverick" producers.

[*139] ***c. Existence of Actual Coordinated Interaction***

There is insufficient evidence to conclude that express or even tacit coordination has taken place in the SPRB market. Traditional factors that industrial organization economists consider when **[**79]** assessing the susceptibility of a market to coordinated interaction include whether producers recognize their mutual interest in competing less aggressively and whether producers with incentives to compete less aggressively communicate their intentions to one another. PX 8611 p 62. Plaintiffs' expert concluded that he would need to do additional analysis before he could offer conclusive testimony on whether coordinated interaction is occurring in the SPRB coal market. Morris Tr. (6/24 morning) at 15:3-20. Plaintiffs have not produced sufficient evidence that such coordination to limit production has actually occurred.

Based on a review of the evidence over time, it is unlikely that coordination has taken place in the SPRB, especially since the evidence through which the FTC attempts to show the existence of coordination is focused primarily on 2000 and 2001. The lynchpin of the FTC's position is the comments and actions of Arch with respect to "production discipline." through 1999, Arch sold coal on an incremental basis, which meant it sold coal for anything more than the cost of producing it. Leer Tr. (6/28 morning) at 57:15-58:5. Under what Arch calls its "market driven" **[**80]** approach, however, Arch will restrict its production when it believes that, due to oversupply, it cannot obtain returns that it considers adequate. Leer Tr. (6/28 morning) at 62:21-63:7; 86:11-15. On May 17, 2000, Arch announced that it planned to reduce production at its Coal Creek mine by as much as 10 million tons annually. PX 0214 at 001. Arch announced that it would no longer expand capacity to keep pace with growing demand for SPRB coal until SPRB price and margin increased to an acceptable level. Id. at 002. Arch informed the industry that "moves such as the one we are taking today … should have a positive impact on prices," in light of the "supply/demand fundamentals" for SPRB coal. Id.

On May 23, 2000, Arch's CEO Steven Leer drew attention to the fact that "Arch has been conscientious" and illustrated the statement by observing that Arch was idling the Coal Creek mine and had limited expansion at Black Thunder. PX 0253 at 014; PX 0795 at 013; PX 0603 at 013. Jon Kelly of Tuco (a utility) recalled that he found Leer's comments disturbing because there were representatives from Triton, Peabody, and Kennecott in the room. PX 8606 p 12 (Kelly W. D.); PX **[**81]** 5303. The speech was reported by the trade press to the coal industry as calling for reductions in coal production. See PX 5680 at 003. A year later, on April 17, 2001, Leer gave an address at the western coal transportation association in Santa Fe, New Mexico, during which he presented a slide depicting the following information:

What's different today?
Supply/demand balance
Southern PRB
. Fewer producers, so greater potential for discipline
. Loadout and rail capacity create constraints
. Adding incremental production more expensive.

PX 0656 at 015. The next year, Arch announced in a March 17, 2002 press release that it had recently cut production by seven percent. See PX 0602 at 001. Arch announced the production cuts in 2002 despite the fact that the cuts would have a negative impact on earnings: "we are committed to being a market-driven producer. **[*140]** we believe it would be a mistake to sell coal into an oversupplied market, at prices that will not provide an adequate return." Id.

Although Arch made public announcements about cutting production and its commitment to being a market-driven producer, other SPRB producers chose not to follow Arch's **[**82]** strategy. Other producers may have contemplated following suit, but there is no evidence that any of them chose to adopt Arch's approach. Indeed, between 2001 and 2003, Arch itself believed that it detected indications that its competitors (Kennecott, Peabody and Triton) were selling coal at incremental costs, and thus not on the same basis that Arch was advocating. PX 0090 at 002 (Kennecott); PX 0165 at 002 (vulcan/Triton); PX 0105 (Peabody). Leer testified that public statements by various SPRB producers regarding their mining operations were made to advise the investor community and customers of independent and unilateral business decisions being taken by each company in response to general supply and demand conditions and to the unique business challenges faced by each company -- not to signal any sort of coordinated activity. Leer Tr. (6/28 morning) at 8:20-9:10, 42:15-22. Consistently, SPRB producers have denied that there has been any effort among suppliers to coordinate production output. PX 8302 at 149:4-14 (Lien Dep.); PX 7141 at 32:3-24 (Randen Dep.); Leer Tr. (6/28 morning) at 52:19-53:10; hake Tr. (6/29 morning) at 10:21-11: 22. Over the past ten years, SPRB production **[**83]** has expanded considerably even though the number of SPRB producers has declined. DX 9007 at 016; PX 4335 at 001; Carr Tr. (6/23 afternoon) at 23:24-24:12; Shalah Tr. (6/25 afternoon) at 35:9-25; Luksan Tr. (7/7 morning) at 47:8-15; Kelly Tr. (6/22 morning) at 63:20-25.

Furthermore, there is no evidence that Arch sought to "punish" the producers who declined to restrict production, even if it had the means to do so. According to defendants' expert, public announcements about production made by Peabody, Kennecott, and Arch did not trigger a coordinated output reduction by coal producers, Guerin-Calvert Tr. (7/1) at 9:10-25, and were instead followed by enhanced output in the SPRB market, Id. at 10: 20-11:2; DX 9007 at 031; See also DX 9007 at 022-030. The totality of the evidence, then, establishes that although production restrictions were advocated and even practiced by Arch during 2000-2002, and broader coordination by SPRB producers to limit supply was feasible, no express or tacit coordination to limit production has actually occurred among the major SPRB coal producers.

d. Market Structure and Dynamics

That observed conclusion is consistent with an assessment **[**84]** of the SPRB coal market. The structure and dynamics of the SPRB market may permit coordination, but do not make coordination likely. While barriers to entry into the SPRB market exist, PX 8611 p 119 (Morris W.d.), and such barriers may facilitate the creation or enhancement of market power or its exercise, Merger Guidelines § 3.0, a substantial number of firms actively compete in the marketplace. Furthermore, heterogeneity of products and producers limit or impede the ability of firms to reach terms of coordination. See Merger Guidelines § 2.11. The evidence establishes that products in the SPRB market are heterogeneous; SPRB coal is different from one mine to another, Rahm Tr. (6/21 afternoon) at 12:13-15, 22:8-23:1; Freund Tr. (6/21 afternoon) at 103:9-16; DX 0853 at 7; Orme Tr. (6/22 morning) at 19:16-22; DX 0199 at 000342, and the SPRB mines and coal companies differ in many important **[*141]** respects, including their production costs, cost structures, contractual commitments, level of reserves, and financial viability, Guerin-Calvert Tr. (7/1) at 6:21-7:3, 6:25-7:10; DX 1024 at 0024728; PX 4353 at 001.

It is true that industry publications make some market **[**85]** information available among producers. However, the information published in those sources is limited, imperfect, and largely unreliable and untimely. Public data on coal pricing, capacity, and production levels are historical, not particularly comprehensive, and tend to lag behind the market by several months, if not more. Guerin-Calvert Tr. (7/1) at 15:8-21; DX 2006 at p 38. MSHA data is a good example. It provides on a quarterly or annual aggregated basis a snapshot of historic shipments, but provides no information about future shipments, long-term mine commitments, or the nature of any contracts a supplier may have with utilities, let alone the nature or date of the specific contract under which the reported shipments were made. Guerin-Calvert Tr. (7/1) at 15: 22-16:12; Lapplander Tr. (7/7 morning) at 10:11-19; DX 0935 at p 4. FERC 423 reports suffer similar deficiencies in that they, too, report only historic shipments, and the data only become available months after the reported shipments were made. Hake Tr. (6/29 open) at 13:1-8; Guerin-Calvert Tr. (7/1) at 16:13-20; Lapplander Tr. (7/7 morning) at 10:9-17; Stuchal Tr. (7/7 morning) at 66:3-6; PX 1255 at 152:20-153:9 (Pettibone **[**86]** I. H.); PX 8302 at 122:8-12 (Lien Dep.); PX 8303 at 194:10-195: 13 (Richards Dep.); PX 8307 at 247:6-247:22 (Rackers Dep..); PX 8309 at 221:4-221:17 (Panzarino Dep.). Moreover, the shipments reflected in FERC reports are (like MSHA data) tied to contracts that were entered into years earlier. Carr Tr. (6/23 afternoon) at 11:15-25; Hake Tr. (6/29 open) at 13:1-8. Thus, if a supplier signs a contract today for deliveries commencing in 2005, FERC data will not be reported until several months after the first shipment is sent in 2005. Guerin-Calvert Tr. (7/1) at 16:21-17:4. [17] FERC data are reported on a delivered basis (i.e., the combined cost of the coal and transportation) and do not break out the cost of the coal alone. Hake Tr. (6/29 open) at 13:1-12; Kelly Tr. (6/22 morning) at 40:24-41:8; Carr Tr. (6/23 afternoon) at 11:7-14; PX 8302 at 122:3-7 (Lien Dep.); Stuchal Tr. (7/7 morning) at 66:1-7. Because utilities treat their transportation costs as confidential, Herndon Tr. (6/22 afternoon) at 25:19-24; Kelly Tr. (6/22 morning) at 40:5-8, 75:15-19, it is impossible accurately to determine the cost of the coal at the mine-mouth.

[87]** FERC statistics (and MSHA data) also do not address a number of critical items and provide no information on most of the competitively significant terms and conditions of coal contracts. Guerin-Calvert Tr. (7/1) at 17:2-4. For example, FERC data do not capture the various terms and conditions of coal contracts that affect the overall value of the contract to the producer. PX 8302 at 114:10-115:14, 117:8-16, 119:7-122:7 (Lien Dep.)(" I would say that the FERC price represents the - the cost that the utility has incurred by purchasing and transporting the coal. I don't think anything else would be in there."). Also, unregulated utilities (representing twenty percent of SPRB customers) are not even required to report their data, and hence will not show up in the FERC reports. Hake Tr. (6/29 open) at 13:1-12; Guerin-Calvert Tr. (7/1) at 17:5-7. For these **[*142]** many reasons, it simply is not possible to estimate current coal prices by looking at FERC (or MSHA) data. Hake Tr. (6/29 open) at 13: 1-21; Freund Tr. (6/21 afternoon) at 107:17-21 ("it won't tie to what they would be bidding today"); Stuchal Tr. (7/7 morning) at 65:25-66:6; PX 8307 at 248:6-9 (Rackers Dep..) (stating that he would not **[**88]** look to FERC data to determine what market prices should currently be). [18]

Available spot market data (OTC data) also are of only marginal usefulness. OTC data are based on a few transactions, primarily coal purchases for delivery within one year, and do not include sales made pursuant to long-

---

[17] Pricing data that is even three months old is considered "stale" in the industry. Freund Tr. (6/21 afternoon) at 107:8-13.

[18] COALdat data are no more useful, relying heavily on FERC data and, while attempting to derive some fob mine prices from delivered prices, suffering from the same shortcomings as FERC data. Guerin-Calvert Tr. (7/1) at 17:8-19. Information that mine operators provide to the railroads for planning purposes concerns short-term shipments and provides no insight into a mine's future contracting plans. Guerin-Calvert Tr. (7/1) at 17:20-18:8. The resulting data from the national coal transportation association (total tonnage and total trains for the upcoming month) is provided on an aggregated basis -- no mine specific data are available to customers or producers. Lapplander Tr. (7/7 morning) at 10:20-12:1.

term contracts. **[**89]** Leer Tr. (6/28 morning) at 35:23-36:4; Hake Tr. (6/29 open) at 13:13-21; Hake Tr. (6/30 closed) at 9:20-10:2; Kelly Tr. (6/22 morning) at 65: 8-22; PX 8306 at 261:2-24 (McGowan Dep.)(stating only 10% of coal trades are reported). Producers and customers alike testified that they would not be able to estimate coal prices for long-term contracts by looking at current OTC prices. Hake Tr. (6/29 open) at 13:13-21; Hake Tr. (6/30 closed) at 9:20-10:2; Freund Tr. (6/21 afternoon) at 107:22-108:1; Orme Tr. (6/22 morning) at 26:13-19; Carr Tr. (6/23 afternoon) at 12:1-20; PX 8307 at 125:20-127:16 (Rackers Dep..). Moreover, OTC prices do not dictate the prices producers bid. PX 7741 at 43:5-19 (Pettibone dep.). In fact, at the time of the price spike in 2001, there was little change in the negotiated price for long-term coal contracts. See DX 9007 at 013-014.

HN22[] A market is conducive to tacit coordination where producers recognize their "shared economic interests and their interdependence with respect to price and output decisions." *Brooke Group, 509 U.S. at 227*. Successful coordination requires both that firms reach terms of coordination that are profitable and that they **[**90]** be able detect and punish deviations from the coordinated interaction. See Merger Guidelines § 2.1. in order for producers to be able to coordinate production, they would need a reliable reference point to attain agreement as to a lag in production. Supply and demand estimates in this marketplace, however, have been historically inaccurate and uncertain.

Demand for SPRB coal is not predictable either in the short-or the long-term. Guerin-Calvert Tr. (7/1) at 37:19-38:10; DX 9008a. The two largest demand drivers for coal consumption are the weather and the economy, and neither can accurately be predicted. Hake Tr. (6/29 open) at 11:6-13; Kelly Tr. (6/22 morning) at 66:10-20. Unexpected weather and changes in economic conditions can result in utilities delaying receipt of coal under contract, advancing receipt of coal, choosing to increase or decrease inventories, or buying and selling coal on the spot market to meet immediate, unanticipated demand. PX 8304 at 159:3-14 (Flippin Dep.).

The opaqueness of utility inventories also makes it difficult to predict the demand for SPRB coal from year to year. When utilities draw down inventories, they **[*143]** defer coal purchases, resulting in **[**91]** reduced demand; conversely, when utilities build up inventories, they drive up demand. Utilities do not disclose their inventory levels to suppliers. Luksan Tr. (7/7 morning) at 38:6-15. There are thus many different forecasts of future inventories, none of which is very accurate. Hake Tr. (6/29 open) at 11:7-12:1. As a result, predictions of future demand for coal vary dramatically, with no real consensus as to what future usage of electricity might be. See Guerin-Calvert Tr. (7/1) at 22:25-23:9, 25:5-16; Leer Tr. (6/28 morning) at 38:18-22; Lapplander Tr. (7/7 morning) at 12:12-20; DX 0848 at 0021359. Customers are no better at projecting demand. As mr. Bales testified, he takes his own company's estimates of coal consumption "with a grain of salt." Bales Tr. (6/21 afternoon) at 71:19-72:1. Demand estimates, particularly as they relate to coal prices, "would be pure speculation." Orme Tr. (6/22 morning) at 31:16-21; See also Carr Tr. (6/23 afternoon) at 22:20-23:7; DX 0506 at 3 (coal prices "are extremely difficult to predict"); DX 0937 at p 20 ("future coal pricing is difficult to predict."). Long-term, variable contracts further complicate efforts to forecast the demand **[**92]** for coal from year to year. Guerin-Calvert Tr. (6/30 afternoon) at 109:21-110:1; DX 0086 at p 49.

Similarly, supply is hard to predict because suppliers and other would-be sources of supply side intelligence seldom publicize reliable statistics regarding production levels and decisions. Most public statements made by suppliers contain little meaningful information about actual market conditions or the likely actions of market participants. For instance, RAG does not make public its decisions regarding pricing or production and does not reveal its uncommitted tonnage or its proprietary mine models. PX 8302 at 46:22-47:15, 137:17-20, 259:14-260:2, 291:14-292:14 (Lien Dep.). Similarly, Triton does not discuss its committed and uncommitted sales with third parties. PX 7785 at 202:17-24 (Wilkerson dep.). Buckskin's mine manager has never seen committed or uncommitted sales figures for Arch or Peabody. Id. at 202:25-203:6. Kennecott, likewise, testified that the limited "hearsay" about other mines is generally related to safety issues, not production decisions. PX 7141 at 35:6-17 (Randen Dep.). Arch, too, shares such information with no producer, and receives it from none. Leer Tr. **[**93]** (6/28 morning) at 50:2-6, 50:25-51:5; Lang Tr. (6/24 afternoon) at 80:4-7.

Statements made in analyst calls and at industry conferences, or contained in financial reports, are of little informative value as they tend to be infrequent, not systematic, and purposefully vague and incomplete. When coal producers make statements as to their uncommitted future tons, they "very rarely" provide data specific to the

SPRB but rather provide their position company-wide. PX 8302 at 256:16-257:2 (Lien Dep.); Leer Tr. (6/28 morning) at 31:10-32:4; DX 1068; DX 0972. As midamerican's representative explained, "they're pretty clever at hiding how much of it's PRB versus eastern coal." Freund Tr. (6/21 afternoon) at 106: 24-107:4. In addition, the statements usually differ greatly from actual performance. For example, publicly available reports do not accurately reflect RAG's expansion plans or mining costs. PX 8302 at 34:1-7, 34:19-36:11 (Lien Dep.). And as one utility explained, "I've heard producers tell me they're going to increase production in the past and then ultimately don't." Freund Tr. (6/21 afternoon) at 115:3-4. [19]

[94]** **[*144]** The emphasis on sealed bids and confidentiality is an important aspect of the market structure and dynamics that would frustrate coordination among producers. Utilities purchase the great majority of their coal through the issuance of an RFP. Kelly Tr. (6/22 morning) at 55:3-8; Carr Tr. (6/23 morning) at 81:19-22; Luksan Tr. (7/7 morning) at 35:15-19; Stuchal Tr. (7/7 morning) at 64:12-15; PX 8306 at 214:8-13 (McGowan Dep.). The RFP bidding process is conducted on a strictly confidential basis. Rahm Tr. (6/21 afternoon) at 6:25-7:14; Bales Tr. (6/21 afternoon) at 63:6-14; Kelley Tr. (6/22 morning) at 55:3-12; Herndon Tr. (6/22 afternoon) at 13:20-14:16; Werner Tr. (6/23 morning) at 19:16-22; Lapplander Tr. (7/7 morning) at 10:6-8; Stuchal Tr. (7/7 morning) at 65:12-24; Luksan Tr. (7/7 morning) at 10:6-8; DX 0940; PX 8302 at 106:21-107:17 (Lien Dep.); PX 8303 36:17-19, 37: 3-6, 37:10-38:2, 38:10-39:8 (Richards Dep.); PX 8306 215: 21-216:10 (McGowan Dep.); PX 8307 at 20:17-20, 83:2-6 (Rackers Dep..); PX 8304 at 169:2-17 (Flippin Dep.); PX 8309 at 160: 2-22 (Panzarino Dep.). Hence, producers are not aware of who else is bidding or the bids of the other producers. Rahm Tr. (6/21 afternoon) **[**95]** at 7:6-11; Bales Tr. (6/21 afternoon) at 63: 6-14; Kelly Tr. (6/22 morning) at 55:25-56:5; Werner Tr. (6/23 morning) at 19:23-20:2; Luksan Tr. (7/7 morning) at 37:11-19; Stuchal Tr. (7/7 morning) at 65:12-24; PX 8302 at 160:10-20 (Lien Dep.); DX 0001; DX 1038; DX 0935. Triton, like other SPRB producers, has never told another producer what it bid; nor has it been told by another producer what that company bid. Hake Tr. (6/29 open) at 12:17-25. Confidential bidding gives an incentive to producers to offer a low price because "the vendors have the understanding that those offers that they turned in will not be viewed by their competition." Kelly Tr. (6/22 morning) at 55:20-24; DX 0026.

Even after the bidding process is completed and there is a winner, utilities typically do not reveal the successful bidder, the winning bid price, exactly how far off the other bidders were, the ranking of the bids or how the utility determined the winner. Bales Tr. (6/21 afternoon) at 64:4-6; Freund Tr. (6/21 afternoon) at 105:11-15; PX 8302 at 19:18-20:3 (Lien Dep.); PX 8306 223:12-16 (McGowan Dep.); Luksan Tr. (7/7 morning) at 37:20-24. Confidentiality provisions typically included in coal supply contracts **[**96]** prohibit the winner from revealing the terms as well. Hake Tr. (6/29 open) at 12:17-21; Rahm Tr. (6/21 afternoon) at 7:15-21; Stuchal Tr. (7/7 morning) at 66: 25-67:9; PX 8303 at 234:1-237:15 (Richards Dep.); PX 8307 at 83:7-84:3 (Rackers Dep..); DX 0016; DX 0896 p 18. The few references to specific contracts in the trade press are highly generalized and do not include specific contract terms. Guerin-Calvert Tr. (7/1) at 18:24-19:2.

Utilities are careful not to divulge other information that might be useful to suppliers. For example, utilities treat their transportation costs as confidential. Herndon Tr. (6/22 afternoon) at 25:19-24; Kelly Tr. (6/22 morning) at 41:5-8, 75:15-19; PX 8309 at 29:4-20 (Panzarino Dep.). They also keep their inventory levels confidential. Luksan Tr. (7/7 morning) at 38:6-15; DX 0523 at 1 ("little real time data exists relative to utility coal inventory"). They frequently do not publicize the results **[*145]** of test burns. Herndon Tr. (6/22 afternoon) at 26:23-27:7. Utilities divulge even less information today than they did in the past because, as a result of deregulation, virtually all utilities compete with each other, and they therefore are particularly **[**97]** intent on guarding information about how much coal they are purchasing and at what price. PX 1255 at 149:22-151: 2 (pettibone i.h.). Utilities generally solicit bids without disclosing in the RFP the particular plant for which they are purchasing the coal so as to protect themselves against price discrimination. Carr Tr. (6/23 afternoon) at 6:1-7; PX 8306 at 232:21-233:15 (McGowan Dep.). They may also

---

[19] Information from coal industry news services varies from source-to-source and is frequently unreliable. As one customer put it, the coal rags are of limited usefulness because they are known to "have bollixed up some of [their] stories." PX 8307 at 101:1-6 (Rackers Dep..). As explained above, industry consultants vary in their assessments of supply and demand. Hake Tr. (6/29 open) at 11:6-13; PX 8302 at 35:3-36:1 (Lien Dep.). Information provided by consulting firms, forecasting supply and demand, are similarly not regarded as reliable. PX 8307 at 250:14-18 (Rackers Dep..).

wait to decide the plant to which they send the coal until after seeing the bids or even after the contract is signed. Carr Tr. (6/23 afternoon) at 6:8-19; Freund Tr. (6/21 afternoon) at 104:22-105:4.

Tacit agreement would also be difficult to coordinate in this marketplace because the terms of agreement would be hard to communicate between producers, even though tacit agreement only requires producers to adopt a uniform strategy that is consistent with less aggressive competition. Moreover, there is no effective mechanism in the SPRB to discipline any producer that would deviate from the terms of coordination. Plaintiffs' economic expert posited no theory for punitive discipline among producers. Due to the nature of the confidential bidding and contracting process that gives producers **[**98]** incentives to submit aggressive bids to capture long term contracts, cheating would not be detected until well after the fact, if ever, and any punishment would come well after the fact as well. Guerin-Calvert Tr. (6/30 afternoon) at 42:19-23. Such delays in detection or punishment generally mean that deviations are likely and that coordinated interaction is unlikely to succeed. See Merger Guidelines § 2.12.

Finally, plaintiffs rely heavily on testimony from utility customers expressing concern about the increased consolidation in the SPRB market that will result from the proposed transaction. Herndon Tr. (6/22 morning) at 74:9-16 ("we think that a continuation of a consolidation of the number of suppliers in the powder river basin is not beneficial to the customers who use that coal"); PX 0030 p 9 (Herndon Decl.); Holloway Tr. (6/22 afternoon) at 54:18-25 ("my biggest concern is that I will have one less person to do contract business with to purchase coal from in the southern powder river basin" and that "concentration of ownership in the PRB coal market would translate to higher prices."); Bales Tr. (6/21 afternoon) at 55:5-13 (concern about "the concentration **[**99]** of market power, the consolidation and the fear that I had that by having one less competitor in the market we would see prices rise"); Freund Tr. (6/21 afternoon) at 96:4-24 ("my biggest concern just ties to fewer suppliers. It's my belief that as you reduce the number of suppliers, it will have a negative impact on price ...."); Werner Tr. (6/22 afternoon) at 122: 4-25; Orme Tr. (6/22 morning) at 12:13-22; PX 0003 at 013-014 (Richards Decl.); PX 0010 pp 11-12 (Flippin Decl.); PX 0021 pp 14-17 (Rea Decl.); PX 0012 pp 24-26 (Panzarino Decl.); PX 0005 pp 21-24 (McGowan Decl.); PX 0036 pp 17-18 (Kotara Decl.). In many contexts, however, antitrust authorities do not accord great weight to the subjective views of customers in the market. See 2a Areeda, et al., ***Antitrust Law*** p 538b, at 239 ("[l]east reliable [evidence] is 'subjective' testimony by customers ...though not irrelevant, such statements are often unreliable."); *FTC. v. Owens-Illinois, Inc., 681 F. Supp. 27, 38 (D.D.C.)*, vacated as moot, *271 U.S. App. D.C. 1, 850 F.2d 694 (D.C. Cir. 1988)* ("opinions of purchasers must be viewed in light of their actual behavior"). furthermore, while the court does not **[**100]** doubt the sincerity of the **[*146]** anxiety expressed by SPRB customers, the substance of the concern articulated by the customers is little more than a truism of economics: a decrease in the number of suppliers may lead to a decrease in the level of competition in the market. Customers do not, of course, have the expertise to state what will happen in the SPRB market, and none have attempted to do so. The court therefore concludes that the concern of some customers in the SPRB market that the transactions will lessen competition is not a persuasive indication that coordination among SPRB producers is more likely to occur.

Having concluded that the structure and dynamics of the SPRB market are not conducive to an increased likelihood of tacit coordination as a result of the proposed transaction, the court proceeds to a consideration of whether there will be an increased likelihood of coordination because a significant and independent competitor will be eliminated from the SPRB market.

e. Triton as a Market "Maverick"

HN23[] "'An important consideration when analyzing possible anticompetitive effects' is whether the acquisition 'would result in the elimination of a particularly **[**101]** aggressive competitor in a highly concentrated market ....'" *Libbey, 211 F. Supp. 2d at 47* (quoting *Staples, 970 F. Supp. at 1083*). For purposes of a coordinated effects analysis, the Merger Guidelines define a "maverick" firm as one possessing a greater economic incentive to deviate from the terms of coordination than those of its rivals. Merger Guidelines § 2.12. FTC officials have noted that, in the context of an auction market, to be a maverick a firm must "consistently compete aggressively when it bids, causing other firms to bid more aggressively when it is present." David T. Scheffman & Mary Coleman, Quantitative Analyses of Potential Competitive Effects from a Merger, June 9, 2003 at 6, available at *www.ftc.gov/be/quantmergeranalysis*. pdf. The "loss of a firm that does not behave as a maverick is unlikely to lead to increased coordination." William J. Kolasky, deputy Assistant Attorney General, Antitrust Division, United States

Dep't of Justice, Coordinated Effects in Merger Review: from Dead Frenchmen to Beautiful Minds and Mavericks, Address Before the ABA Section of ***Antitrust Law*** Spring Meeting (Apr. 24, 2002), available **[**102]** at *http://www.usdoj.gov/atr/public/speeches/11050*. htm (citing Jonathan B. Baker, former Director, Bureau of Economics, FTC, Mavericks, Mergers, and Exclusion: Proving Coordinated Competitive Effects Under the Antitrust Laws, *77 N.Y.U.L. Rev. 135 (2002)*).

The evidence here does not support the proposition that Triton is, or will likely become, a maverick in the SPRB market. Triton is not presently a maverick in the market, particularly not over the last two to three years. Triton's North Rochelle mine is one of the highest cost mines in the SPRB. DX 1024 at 24708-24709; Hake Tr. (6/29 closed) at 51:20-22. As a consequence, Triton has been forced to adopt a "last mine standing" sales strategy for its North Rochelle coal. Hake Tr. (6/29 closed) at 50:23-51: 5, 51:20-23. Pursuant to this strategy, Triton bids its North Rochelle coal at a price that covers its cost plus a profit and waits for the market to come to that price as other mines in the SPRB sell out. Hake Tr. (6/29 closed) at 50:23-51:10. ("we have to wait until others sell out of their production until we get the price which would cover our cost at a profit."). This strategy is driven for the most part **[**103]** by Triton's debt financing obligations, which require Triton to obtain a sufficient return on its coal sales to meet bank commitments as they come due. Id. at 22:18-23:6. Thus, Triton would rarely **[*147]** deviate from the "last mine standing" strategy. Id. at 52:1-13; See also DX 0510 (Triton "intends to hold to its strategy, which is to be 'the last man standing'" despite market weakness).

Because of these circumstances, Triton is wholly indifferent to competitors' production levels or their likely uncommitted tonnage in pricing its North Rochelle coal. Hake Tr. (6/29 closed) at 51:15-25. Triton's goal is not to increase its market share by pricing under its competitors. Hake Tr. (6/29 open) at 9: 18-10:2. Rather, Triton seeks to cover its cost and make a profit on each sale by waiting out the competition and obtaining the highest price possible. Hake Tr. (6/29 open) at 9:18-10:2, 50:23-51:10, 86:5-87:5; PX 0623; DX 0644 at 17417 (" Triton's marketing strategy… is to hold its unsold tonnage as long as possible"). Given North Rochelle's high cost structure, therefore, Triton has been unable in recent years to be at all competitive on contract bids. Guerin-Calvert Tr. (7/1) at **[**104]** 33: 17-25; See also DX 9005 at 003. The result, the court concludes, is that Triton does not lead or even influence pricing in the market, does not compete aggressively, and does not have a history of bidding on contracts consistent with the behavior of a maverick in the SPRB market.

Nor does Triton's excess production or loadout capacity provide a significant constraint on the market because Triton is unable effectively to deploy that capacity at a reasonable cost. Guerin-Calvert Tr. (7/1) at 34:1-5. If Triton remains an independent company, its continuing high production costs will eliminate all prospects that it can become a more competitive bidder in the marketplace in the future, let alone operate as a maverick. Hake Tr. (6/29 closed) at 57:20-24; Guerin-Calvert Tr. (7/1) at 33:7-16; DX 2006 p 36. The testimony of utility customer witnesses established that, in bid after bid, Triton was not competitive and often finished "dead last" in terms of competitiveness for the contract. Rahm Tr. (6/21 afternoon) at 11:20-24; Bales, Tr. (6/21 afternoon) at 50:5-13; 64:24-65:4, 67:6-8; Kelly Tr. (6/22 morning) at 62:14-20, 63:2-6, 70:14-24; DX 0107; PX 8606 at 8; Herndon **[**105]** Tr. (6/22 afternoon) at 19:18-23:11; DX 0955 at 23399; DX 0953 at 23389; Stolwyk Tr. (6/23 morning) at 61:23-62:21; 77:3-6; DX 0919; Lapplander Tr. (7/7 morning) at 16:7-9; Stuchal Tr. (7/7 morning) at 76:14-18, 77:1-6. There is no convincing evidence that the situation would change in the future given Triton's high costs and very weak financial condition, which is discussed further in section II-E Infra. Triton is the only SPRB producer not to increase production over the past five years, and its financial condition and other weaknesses, including the high strip ratio at North Rochelle and its need for extensive loans and increased reserves (the satisfaction of which are highly questionable), make it unlikely that Triton will become any more competitive in the marketplace than it is right now. It has no pricing strategy available to it that would increase competition in the marketplace and no other likely buyer for Triton has been identified. See discussion in section ii-e Infra.

4. RAG and Kiewit in the Post-Merger Market

It is defendants' burden to show that the "fringe" of the SPRB market would expand sufficiently to defeat any merger-induced price increase. **[**106]** See *FTC v. H.J. Heinz Co., 345 U.S. App. D.C. 364, 246 F.3d 708, 715*. RAG and Kiewit fall in the category of fringe producers in the SPRB market. both are strong companies with credible plans to expand production significantly and lessen the risk of coordination in the market. The record evidence establishes that they could, and likely would, **[*148]** expand production to meet any production constraint by the major SPRB producers.

Given sufficient future demand, Kiewit intends to increase production at Buckskin by several million tons per year. DX 1089. Kiewit will promptly begin the permitting process required to effect that expansion if the proposed transaction is consummated and Kiewit will reach out to customers to determine demand for this new coal on "day one" after the acquisition goes through. Id. at 52:3-18.

In valuing the Buckskin mine, Kiewit used the same sophisticated modeling techniques the company uses for all of its major investments. These models showed that increasing production by several million tons was "very, very attractive" financially. Id. at 49: 2-51:5; DX 2011. Mr. Grewcock testified that he was "very pleased" to see the results of these models, and that the **[**107]** company "absolutely" intends to pursue the avenue of significant expansion once the acquisition is complete. Grewcock Tr. (6/28 afternoon) at 50: 21-23, 52:3-7. Kiewit believes that it could achieve this expansion, which would increase Buckskin's loadout capacity, within two years of the acquisition. Id. at 52:19-24; DX 1089.

Kiewit sees the acquisition of additional reserves through the west hay creek LBA as a further significant expansion opportunity. Grewcock Tr. (6/28 afternoon) at 51:6-23. The West Hay Creek LBA offers 150 million recoverable tons of coal, which will last 7.5 years at current production rates, and is not near any other existing mines. The acquisition of this lease would allow Kiewit to continue to operate a very low cost coal mine because of the favorable overburden ratios in the West Hay Creek area. Kiewit also plans to upgrade Buckskin's loadout, plant and equipment, which will significantly improve Buckskin's productivity and facilitate future expansion. Id. at 54: 16-55:11; DX 1089 at 3. With Buckskin's increased production, overall production within the SPRB would be virtually the same as it is today even if Arch were to refuse to mine a single ton **[**108]** of North Rochelle's uncommitted coal. This expansion would also represent twice the projected estimated growth for SPRB coal of 7.7 million tons per year. See Morris Tr. (6/24 afternoon) at 16:13-18:14. Whether Kiewit operates Buckskin with or without the west hay creek reserves, Kiewit's plans to upgrade Buckskin's loadout, plant, and equipment will likely significantly improve Buckskin's productivity and facilitate future expansion, allowing Buckskin to become a more active competitor in the SPRB market.

RAG, under its new management, is a viable competitor that also intends to expand its operations in the SPRB. RAG currently has detailed plans to expand its output from 44 to 60 million tons per year by january 1, 2006. PX 8302 at 37:2-8, 42:19-22, 314:12-13 (Lien Dep.); DX 0163. Referring to its intention to expand, RAG noted in a recent business document that

> We are positioned and ready to act swiftly. Belle Ayr is the PRB's sleeping giant which has been written off by our competition and the outside consultants reports, such as hill because of our issues in 2000-2001. They flat line us going forward for the next ten years and they are as wrong as they can be.

DX **[**109]** 0162 at 2. According to its plans, RAG intends to expand Belle Ayr from 19 to 30 million tons and Eagle Butte from 25 million to 30 million tons without requiring "a major capital investment." PX 8302 at 29:22-30:6, 37:2-8; 59:20-60:1, 314:6-13 (Lien Dep.); DX 0162; DX 0163. This expanded output represents more than the entire uncommitted output of the North Rochelle mine. Hake Tr. (6/29 closed) at 52:19-22. The only regulatory **[*149]** prerequisite for RAG's expansion is the need to submit a new mine plan to the Wyoming department of environmental quality ("DEQ"), which RAG does not consider to be an obstacle. PX 8302 at 128:14-130:8 (Lien Dep.). This is because RAG's mines are "fully permitted, with respect to having gone through all the archeological, wildlife, vegetation, air quality, all those issues." Id. at 183: 8-16. RAG has already engaged in "preliminary discussions" with the deq regarding its expansion plans. Id. at 229:15-230: 1. As a result, RAG expects that it would receive approval to expand its mines to 60 million tons of annual production within a year, even if subjected to a formal review by the state. Id. at 180:16-185:3. Indeed, RAG could accelerate the date **[**110]** for its planned expansion to a date earlier than january 2006. Id. at 187:4-189:15, 215:14-216:9, 225:1-12. "the time frames are relatively short. We're not talking about having to develop a new mine. That's essentially expanding existing operations that have had a successful performance record for three decades." Id. at 232:13-17. RAG has sufficient reserves to implement this plan and "the company views the plans positively." Id. at 42:15-43:14, 130:9-20, 232:5-12 (quotation), 263:2-5.

RAG's expansion plan derives from its overall strategy in the SPRB. RAG designs its mines to have the ability to expand quickly as market opportunities develop. Id. at 49:19-50: 1, 52:5-9. Its SPRB mines thus can rapidly expand to their permitted capacity of 70-80 million tons of annual production. Id. at 92:11-93:16. Mr. Lien testified that he would be comfortable ordering equipment and signing contracts even before a new permit is approved, Id. at 302:7-303:4, and that RAG has the ability to shift assets and workers between its mines for immediate increases in production, Id. at 81: 21-83:3. Thus, RAG can and would expand production in response to a price increase. **[**111]** Id. at 42:12-18, 61:18-62:15, 316: 22-317:7, 317:11-318:4. RAG has a demonstrated history of expanding production in response to market demand. In 2001, RAG responded to higher demand by bidding for contracts and expanding production. Id. at 85: 3-87:22. RAG was able to expand production in 2001 even though the equipment needed was not in the budget. Id. at 172: 9-176:22. Consummation of the proposed transaction would not affect RAG's decision to expand if attractive coal prices were available. Id. at 328:2-18.

The presence in the marketplace of RAG and Kiewit, strong companies with concrete plans to expand production significantly, lessens the risk of anticompetitive coordination in the SPRB market. Defendants have shown that the post-merger fringe capacity in the SPRB would be more than sufficient to absorb any increase in demand caused by any production lag coordinated by the "big three" producers -- Peabody, Kennecott, and Arch -- over the next three years. The profitability model of defendants' expert economist establishes that, based on a published demand forecast, available fringe expansion would be sufficient to defeat any output restriction, thereby resulting **[**112]** in no demand shortfall or price increase in the post-merger scenario. Guerin calvert Tr. (7/1) at 28:4-24; DX 9015. Hence, fringe expansion by Kiewit and RAG would be enough to cover a demand shortfall (assuming coordinated output limitation by the three large producers) and defeat any price increase. Id. RAG and Kiewit would both be better able to play the role of maverick in the post-merger market than would Triton if no merger occurred, even though neither will possess 8800 Btu coal, which tends to lead prices in the SPRB.

* * * * *

[*150] the court therefore concludes that the SPRB market is competitive today. Although producers have shown an interest in production discipline and coordination is feasible, there is no evidence that express or tacit coordination has occurred in the SPRB market. Furthermore, an examination of the structure and dynamics of the market, including the significant number of competitors, the heterogeneity of SPRB coal and the mines and firms that produce the coal, the imperfection of pricing information available in the market, the difficulty in obtaining accurate or current supply and demand information, the emphasis on confidentiality in the bidding system, **[**113]** and the difficulty firms would face in identifying and punishing cheaters, leads the court to conclude that this market is not one in which coordination would be likely if Arch acquires North Rochelle and Kiewit acquires Buckskin. Moreover, Triton is not, nor is it likely to become, a maverick in the SPRB market and, therefore, the proposed transactions will not make coordination more likely by eliminating Triton from the marketplace. Finally, the evidence also establishes that the fringe in the SPRB (consisting of RAG and Kiewit) will be a viable constraint on producer coordination in the post-merger SPRB market.

D. Efficiencies

HN24[] the Supreme Court has not sanctioned the use of an efficiencies defense in a case brought under *Section 7 of the Clayton Act*. See *FTC v. Procter & Gamble Co., 386 U.S. 568, 580, 18 L. Ed. 2d 303, 87 S. Ct. 1224 (1967)* ("possible economies cannot be used as a defense to illegality. Congress was aware that some mergers which lessen competition may also result in economies but it struck the balance in favor of protecting competition."). However, "the trend among lower courts is to recognize the defense." *Heinz, 246 F.3d at 720* (citing **[**114]** cases). In *Univ. Health, 938 F.2d at 1222*, the court held that "a defendant may rebut the government's prima facie case with evidence showing that the merger would create significant efficiencies in the relevant market." similarly, in Staples the court considered the defendant's claimed efficiencies, even though it ultimately decided that they were not sufficient to rebut the FTC's case. *970 F. Supp. at 1090*. Likewise, this circuit in Heinz examined (but rejected) evidence of efficiencies, requiring "proof of extraordinary efficiencies" in light of the highly concentrated market there. See 246 F.3d at 720-21.

In 1997, the department of justice and the FTC revised their HN25[] Horizontal Merger Guidelines to recognize that "mergers have the potential to generate significant efficiencies by permitting a better utilization of existing assets, enabling the combined firm to achieve lower costs in producing a given quantity and quality than either firm could have achieved without the proposed transaction." Merger Guidelines § 4. Hence, "[e]fficiencies generated through merger can enhance the merged firm's ability and incentive to compete, **[**115]** which may result in lower prices, improved quality, enhanced service, or new products." Id. However, the government will only consider those efficiencies that are merger-specific and verifiable by reasonable means. Id. The higher the market concentration present in a given case, moreover, the more extraordinary the efficiencies that a defendant must show. See Univ. Health, 938 F.2d at 1223; Merger Guidelines § 4 ("[e]fficiencies almost never justify a merger to a monopoly or near-monopoly"). When there are high market concentration levels, "the court must undertake a rigorous analysis of the kinds of efficiencies being urged by the parties in order to ensure that those 'efficiencies' **[*151]** represent more than mere speculation and promises about post-merger behavior." Heinz, 246 F.3d at 721. However, even where evidence of efficiencies in the relevant market will not support an outright defense to an anticompetitive merger, such evidence is relevant to the competitive effects analysis of the market required to determine whether the proposed transaction will substantially lessen competition. See Tenet Health Care, 186 F.3d at 1054; **[**116]** Staples, 970 F. Supp. at 1088.

Defendants claim that the proposed transaction will realize between $ 130 and $ 140 million in efficiencies over the 2004-2008 period. Mr. Lang, president and general manager of thunder basin coal company, was admitted as an expert in these proceedings on the subjects of surface mining operations, mine engineering, and mine planning. Lang Tr. (6/24 afternoon) at 107:11-14. He prepared a series of mine plans, including a 2004 budget and a five-year plan, based on a combination of the North Rochelle and Black Thunder mines, as well as with Black Thunder as a stand-alone mine. Lang Tr. (6/25 morning) at 10:25-11:21; DX 1123; DX 1124; DX 2004. In Mr. Lang's supplemental report, he claims that the acquisition will realize $ 134.8 million in savings over the 2004-2008 time period. DX 1111 at 25758. Of this amount, $ 27.4 million is general and administrative expenses, which mr. Lang himself acknowledges is not merger-specific because "another coal company" without an adjacent mine could achieve it. Lang Tr. (6/25 morning) at 18:11-16. This leaves $ 107.4 million in claimed merger-specific savings from the combination. See DX 1111 at 25758.

[117]** Even as to that remaining amount, however, defendants have not made a strong case on efficiencies. Plaintiffs have systematically pointed out deficiencies in defendants' estimates of efficiencies and shown that defendants have not been able to quantify with precision the savings netted by the proposed transaction. Some of the efficiencies identified by defendants are not merger-specific while others are undercut or reduced on the basis of the evidence.

For example, Arch claims that it can recover 8.9 million tons of upper seam coal at North Rochelle for a five-year efficiency of $ 15.2 million. DX 1111 at 25773. Triton, historically, has chosen not to recover that coal because of the thin seam and poor quality of the coal. However, the quality has improved substantially as Triton has moved further into the north roundup lease area, PX 7875 at 115, and Triton is now mining it, See Kostic Tr. (6/25 afternoon) at 82. Accordingly, Triton intends to recover all that coal. PX 7875-031 at 115-117 (deppe dep.). Mr. Lang concedes that if Triton were to recover this upper seam coal at North Rochelle on its own accord, independent of the merger, then the alleged efficiency would not exist **[**118]** and its value would be zero. Lang Tr. (6/25 morning) at 63-64.

Arch also claims that it will save $ 11.5 million over the 2004-2008 time period and recover an additional 3.8 million tons of coal by moving a dragline from the current Black Thunder west pit to the adjacent north roundup lease area of the North Rochelle mine. The relocated dragline would operate in its new location for a two-year period, running in an eastwest orientation, before returning to the west pit. It would operate in addition to Triton's existing north-south oriented dragline. However, Arch concedes that Triton will recover this coal on its own accord, independent of the merger -- just not as quickly as Arch would be able to in the combined operation. Lang Tr. (6/25 morning) at 66; Kostic Tr. (6/25 afternoon) at 84-85; PX 4405 at 133-34 (Lang dep.); painter Tr. (7/7 **[*152]** afternoon) at 33. Arch did not attempt to adjust the value of the savings from reconfiguring Triton's dragline pits to reflect the fact that Triton would likely mine this coal at a later time. Lang Tr. (6/25 morning) at 65-66; Kostic Tr. (6/25 afternoon) at 99. The correct value of this savings, therefore, is simply the time value of money, which **[**119]** would be only a fraction of the $ 11.5 million claimed by Arch. PX 4501 p 62 (painter report). This saving is therefore overstated. Id.; See painter Tr. (7/7 afternoon) at 33. Moreover, there is no indication that actual sales will increase to reflect the additional production resulting from this efficiency. To the contrary, the combined output of Black Thunder and North Rochelle is projected at a constant 93.5 million tons, which is merely the sum of the pre-merger planned output of the mines. DX 1123.

Arch claims that it received quotes for insurance to cover Triton's property, including the risk of business interruption, at no additional cost to it, and thus that savings would be achieved. Arch alleges that this efficiency flows from its size, diversified portfolio of assets and excellent safety record. DX 0770 at 19715 p 8 (Lang report). Only a fraction of these savings are merger specific, however. Insuring Triton's property under Arch's policy would change the coverage terms of the insurance, and had Triton accepted those same terms, it would be able to realize over 80% of those savings on its own. Painter Tr. (7/7 afternoon) at 36. Arch's claimed **[**120]** savings, therefore, represent merely the assumption of the additional risk of self-insurance. Id. at 36:19-23. Moreover, another potential purchaser of Triton might be able to achieve the same savings, and therefore they are not merger specific. Id. at 37.

Arch also claims a one-time $ 3.5 million inventory reduction from the combination of Arch and Triton based on the elimination of North Rochelle's repair parts inventory. DX 0770 at 19715 p 10. But this claim is really just a conversion of an inventory asset to a cash asset. Painter Tr. (7/7 afternoon) at 38. Mr. Lang also claims carrying cost savings of $ 1.6 million for the period 2004-2008, for the alleged reduction of duplicate parts inventory from the combination of Arch and Triton. DX 0770 at 19776 (Lang report). These savings derive from the elimination of Triton's entire stock of repair parts, but no evidence was submitted comparing the pre-merger repair parts inventories of Arch and Triton and, therefore, there is insufficient evidence that the acquisition will enable Arch to eliminate all of North Rochelle's supply inventory. PX 4656 at 007 p 16 (painter w.d. **[**121]**).

Arch further claims that $ 26.2 million in savings will flow from the elimination of one tractor, one drill, one grader, and one loader as a result of the merger. The claimed savings are derived from more fully utilizing existing capital equipment. Mr. Lang concedes that he estimated equipment needs based in part on his subjective opinion. Lang Tr. (6/25 morning) at 75; PX 1009 at 34 (Lang I. H.); PX 4501 at 012 p 24 (painter report). Mr. Kostic testified that a quantitative study could have been done in three weeks, but it was not. Kostic Tr. (6/25 afternoon) at 68:6-15. The claimed savings amount, therefore, is questionable.

According to Arch, another $ 18.8 million in savings can be effected over five years because three fewer haul trucks will be needed than would be required had the North Rochelle mine remained with Triton. However, no documents support mr. Lang's estimates regarding these savings. See PX 1009 at 37, 42. The document on which mr. Lang's estimate purports to be based, the combined mine plan, contains **[*153]** no haul truck detail. DX 1123; Painter Tr. (7/7 afternoon) at 44:11-14. Another plan (which assumes a close three months later) does contain such **[**122]** detail, PX 4654 at 37, but predicts a significantly larger number of trucks for 2006-2008 than the number estimated by Mr. Lang. Compare DX 770 at 19766 With PX 4654 at 37. No explanation has been provided as to why pushing the closing date back three months would significantly change the savings calculation.

The court concludes that most -- perhaps $ 100 million -- of the purported savings from the acquisition originally claimed by Mr. Lang have been called into question as either nonexistent or overstated. Hence, defendants' efficiencies defense cannot by itself defeat plaintiffs' claim of anticompetitive effects resulting from the transactions. It is apparent, nonetheless, that Some efficiencies will naturally result from the transactions, particularly in the area of lower costs because North Rochelle is adjacent to Black Thunder, which Arch already owns and operates. It also appears that some savings from dragline efficiencies, inventory reduction, and equipment sharing between the two mines will be realized. The realized efficiencies are more likely to be in the $ 35 to $ 50 million, rather than the $ 130 to $ 140 million, range over the five year period from 2004 **[**123]** through 2008.

Such savings do not, the court concludes, provide a complete defense to plaintiffs' prima facie case, and defendants have failed to carry their burden of proving a specific amount of efficiencies or showing the impact of the alleged savings on competitiveness in the market. Nevertheless, even if the savings are neither as great as defendants have claimed nor capable of precise quantification based on the evidence presented by defendants, it is apparent that combining the adjacent Black Thunder and North Rochelle mines will inevitably allow Arch to achieve some measure of lower costs and higher productivity. The existence of such efficiencies, therefore, remains relevant to an assessment of the post-merger market and the potential benefits to consumers from cost reductions and increased competition. Efficiencies resulting from the transactions, then, provide some limited additional evidence to rebut the claim of post-merger anticompetitive effects.

E. Failing Firm Defense

A "failing" or even "flailing" company defense has evolved from the Supreme Court's decision in General Dynamics. There, the court observed that ***HN26***[] the appropriate focus under *Section 7* is on **[**124]** the merging firm's "probable future ability to compete -- rather than … [its] past production." *415 U.S. at 503*. As crystallized here by the FTC, under the defense "a presumption of illegality based on market concentration alone can be rebutted if defendants can prove that the acquired firm's current market shares overstate its future competitive significance due to its weak financial condition." FTC post-hearing br. at 42. A weak financial condition, or limited reserves, may mean that a company will be a far less significant competitor than current market share, or production statistics, appear to indicate. See *General Dynamics, 415 U.S. at 503*; *Dr. Pepper/Seven-Up Cos. v. FTC, 301 U.S. App. D.C. 150, 991 F.2d 859, 864-65 (D.C. Cir. 1993)*. Following General Dynamics, several courts have relied on the weak and worsening position of the proposed acquired company as a significant factor in declining to enjoin a proposed merger. See, e. g., *Lektro-Vend Corp. v. Vendo Co., 660 F.2d 255, 276 (7th cir. 1981)*; *FTC v. National Tea Co., 603 F.2d 694, 699-700 (8th Cir. 1979)*.

[*154] However, the evidence **[**125]** of financial or other weakness must genuinely undercut the statistical showing of anticompetitive market concentration. As the eleventh circuit has noted:

> [w]e view General Dynamics as standing for the unremarkable proposition that a defendant may rebut the government's prima facie case by showing that the government's market share statistics overstate the acquired firm's ability to compete in the future and that, discounting the acquired firm's market share to take this into account, the merger would not substantially lessen competition. The weakness of the acquired firm is only relevant if the defendant demonstrates that this weakness undermines the predictive value of the government's market share statistics.

Univ. Health, 938 F.2d at 1221 (citations omitted; emphasis added); See also *FTC v. Warner Communications, Inc., 742 F.2d 1156, 1164 (9th Cir. 1984)*. indeed, "[f]inancial weakness, while perhaps relevant in some cases, is probably the weakest ground of all for justifying a merger," and "certainly cannot be the primary justification" for permitting one. *Kaiser Aluminum & Chemical Corp. v. FTC, 652 F.2d 1324, 1339, 1341 (7th Cir. 1981).* **[**126]** thus, financial difficulties "are relevant only where they indicate that market shares would decline in the future and by enough to bring the merger below the threshold of presumptive illegality." 4 Areeda, et al., ***Antitrust Law*** p 963(a)(3), at 13.

HN27[] A merger is not likely to create or enhance market power or facilitate its exercise if the following circumstances are met: 1) the allegedly failing firm would be unable to meet its financial obligations in the near future; 2) it would not be able to reorganize successfully under Chapter 11 of the Bankruptcy Act; 3) it has made unsuccessful good-faith efforts to elicit reasonable alternative offers of acquisition of the assets of the failing firm that would both keep its tangible and intangible assets in the relevant market and pose a less severe danger to competition than does the proposed merger; and 4) absent the acquisition, the assets of the failing firm would exit the relevant market. Merger Guidelines § 5.1. Defendants concede that Triton's financial condition is not so weak as to support a failing company defense under these requirements. See defs. Post-Hearing Reply Br. at 13. Instead, they offer evidence of Triton's **[**127]** shaky financial status and future prospects as part of the overall record that must be examined in determining whether substantial anticompetitive effects are likely from the transactions. See *Weyerhaeuser Co., 665 F.2d at 1080* ("hearings on preliminary injunctions [under *Section 13(b)*] necessarily look to the future and decisions must rest on comparative, tentative assessments of the course of events if the injunction is issued, and if it is not."). They stress that "'only examination of the particular market -- its structure, history, and probable future -- can provide the appropriate setting for judging the probable anticompetitive effects of the merger.'" *General Dynamics, 415 U.S. at 498* (quoting *Brown Shoe, 370 U.S. at 322 n. 28*). even if not weakened or failing to the point of constituting a full defense, then, defendants contend that the financial condition of the prospective acquired company may reveal that its future competitive significance in the relevant market has been overstated.

The FTC contends that Triton is a strong company, citing Triton's showings of positive EBITDA (earnings before interest, taxes, depreciation, **[**128]** depletion, and amortization), the viability of both of its mines in the present marketplace, and its plans to continue seeking refinancing options and acquiring additional reserves **[*155]** should the proposed transaction be enjoined. The FTC points out that Triton's mines have posted "operating profits" in each of the past two years. In 2002, for example, Triton had ebitda of $ 53.4 million and profits from operations of $ 31.4 million. PX 0881 at 004. In 2003, Triton's ebitda was $ 51 million and its operating income was $ 23.2 million. Hake Tr. (6/29 afternoon) at 61:25-62:12; PX 0882 at 003. Triton's first quarter 2004 consolidated earnings reveal a consolidated ebitda of $ 9.9 million and operating income of $ 5 million. PX 0902 at 010; hake Tr. (6/29 afternoon) at 65:12-23.

Nevertheless, EBITDA is not cash and, for a mining company, ignores a significant factor affecting a mine's financial performance -- depreciation/depletion. Hake Tr. (6/29 closed) at 18:15-20: 03. Unlike other corporate settings where depreciation is primarily an accounting and tax proposition and does not affect the actual productive capacity of the subject asset, depletion at a mining company directly reduces its **[**129]** future earnings capacity. Id. at 19: 17-20:03. Once depleted, reserves are gone and if not replaced will terminate a mine's operation; thus, any earnings measure such as ebitda that does not account for depletion seriously misstates the financial performance of a mining company such as Triton. Id. at 18:15-20:03. A mining company with positive EBITDA but negative net income is not sustainable for the long-term. Hake Tr. (6/30 open) at 29:10-14. Since its inception in 1998, Triton has consistently lost money; total losses to date are between $ 100 and $ 150 million. Hake Tr. (6/29 closed) at 15: 17-16:24; DX 9002; DX 1093. The only year in which Triton made money, 2002, resulted from contracts signed during the 2001 price spike. Hake Tr. (6/29 closed) at 16:13-18. Without the benefit of the long-term higher price contracts it signed during the 2001 price spike, Triton would have lost much more. Id. at 49:10-50:4.

Still, the FTC contends that Triton's mines are viable in the market today and will likely remain so over the upcoming years. The "viability" of the mines, however, is not inconsistent with the difficulties Triton faces in owning and operating its mines. The mines **[**130]** may continue to operate, but Triton may become less and less of an active competitor in the SPRB market. For example, Buckskin currently produces approximately 20 million tons, but its output will soon begin to decline unless the mine receives additional capital. Hake Tr. (6/29 closed) at 29:19-20. Buckskin's mining operations are moving away from the loadout facility and will eventually move to a higher overburden area. Id. at 29:21-30:8. Without additional trucks and an overburden loader, which Triton cannot afford, annual production will drop to 16-18 million tons. Id. at 29:21-30:16, 57:2-6; See also PX 7785 at 205:21-208:13.

Triton's North Rochelle mine is one of the highest cost mines in the SPRB. DX 1024 at 24708-24709; hake Tr. (6/29 closed) at 51:20-22. The cash cost to mine a ton of North Rochelle coal today is significantly greater than the current spot market price for that coal ($ 5 to $ 5.50 per ton). Hake Tr. (6/29 closed) at 31:2-7; DX 9005. As North Rochelle's mining operations continue to move away from its loadout facility, its costs will continue to increase even though the overburden ratio may improve somewhat over the next few years. Hake Tr. (6/29 closed) **[**131]** at 83:19-84:11.

North Rochelle is also currently facing a significant shortfall in sales. The mine's budgeted production for 2004 is just 24 million tons. Id. at 20:4-7. In the first six months of 2004, North Rochelle's sales were two million tons under budget. Id. at 20:8-10, 21:4-6. That volume cannot be **[*156]** made up later in the year because of the capacity of the mine and its current equipment. Id. at 21:7-15. North Rochelle also has a few million tons of coal as yet unsold for the second half of the year, and Triton is not optimistic about selling that remaining tonnage in the current marketplace. Id. at 21:16-18, 22:2-5. If North Rochelle ends the year under budget, Triton's budgeted net income for 2004 will turn into a loss. Id. at 21:19-22:1; DX 1092 at 25623. North Rochelle faces a similar sales shortfall for 2005. Hake Tr. (6/29 closed) at 52:14-22. Even these 14 million tons are uncertain, because two contracts representing 5.2 million tons in 2005 production are currently undergoing reopeners, which could result in the termination of the contracts or reduced revenues going forward. Id. at 29:9-13, 50:5-22.

Although Triton has represented that it is **[**132]** seeking additional funds for capital expenditures and reserve lease acquisitions, PX 7859 at 11:2-8, 82:2-13 (hake dep.); Hake Tr. (6/30 afternoon) at 12:12-24, Triton faces substantial hurdles in obtaining those additional funds. North Rochelle will exhaust its reserves in seven and a half years and, absent refinancing, Triton will be unable to acquire additional reserves. DFF 192. To date, Triton's prospects for refinancing are questionable. Hake Tr. (6/29 closed) at 56: 18-57:6, 58:3-13; DX 0506 at 5. Triton has nominated an LBA contiguous to the North Rochelle mine called west roundup and an LBA contiguous to Buckskin called West Hay Creek. Hake Tr. (6/29 closed) at 31:23-32:12. The BLM will put these leases up for bid at the end of 2004. Id. at 32:13-20. Triton estimates that it would need over $ 50 million in cash the first year to bid and win both LBAs. Id. at 32:21-34:5. But Triton does not have the money to acquire these LBAs and would need to obtain additional capital, either through further borrowings or equity infusions, in order to do so. Id. at 34:6-15, 58:3-6.

Because of Triton's credit profile, it cannot obtain bank financing and must instead look to **[**133]** the junk bond markets for financing. DFF 203. Triton has approached two financial institutions to discuss such an offering. Hake Tr. (6/29 closed) at 34:16-35: 1. To float a junk bond offering, however, Triton would need to have a moody's rating above a ccc, which it has never been able to achieve. Id. at 35:2-23. Despite ongoing discussions, Triton has received no commitment for a refinancing. Id. at 35:24-36:1. Triton also has no commitment from its investors for additional capital to fund the LBAs. Id. at 36:2-7. Even if Triton were to obtain the requisite financing, there is no guarantee that it would win the West Roundup LBA, and even if Triton were to acquire west roundup, its production costs would be substantially more than for the original North Rochelle reserves. Hake Tr. (6/29 closed) at 39:21-40:16; DX 0506 at 4. at the end of the second quarter of 2004, Triton failed to satisfy the fixed charge ratio, which is a covenant in Triton's current loan agreement that measures the ability to repay that loan out of current cash flow. Hake Tr. (6/29 closed) at 46:22-47:16; DX 1092 at 25624.

Although the FTC insists that other buyers exist for Triton's mines, the prospects **[**134]** for identifying and securing another buyer are dim. Over the past three years, Triton has engaged in a comprehensive search for a buyer of its two mines, retaining rothschild, inc., the preeminent investment banking firm in the coal industry. Oehlberg Tr. (6/28 afternoon) at 89:2-12, 91:23-92:5. Vulcan had engaged Rothschild in late 2000 or early 2001 to create a transaction that would permit the investors to exit the investment in whole or in part. Id. at 94:24-95: 25. After discussions **[*157]** with the four parties submitting final bids, vulcan selected the most attractive proposal because it created the most value to the vulcan investors. Id. at 105: 2-106:3, 151:23-152:5. Despite a four-to-five month effort, the necessary capital could not be raised and the transaction was terminated in july 2002. Id. at 107:7-108:4.

Vulcan re-engaged Rothschild in the fall of 2002 for a similar effort. Oehlberg Tr. (6/28 afternoon) at 109:8-25, 152:18-153: 1. The firm contacted potentially interested parties, provided an information memorandum to companies that signed a confidentiality agreement, solicited preliminary indications of interest, and opened a data room. Id. at 110:1-116: **[**135]** 3. Ultimately, three companies submitted binding proposals: Arch, Peabody and Kiewit. Id. at 116:4-11; Hake Tr. (6/29 closed) at 48:13-20. Peabody and Arch proposed to acquire all of Triton; Kiewit proposed to acquire Buckskin only. Oehlberg Tr. (6/28 afternoon) at 116: 4-18; Hake Tr. (6/29 closed) at 48:13-20.

For both sales efforts, rothschild developed a list of, and then contacted, every potential purchaser worldwide, including SPRB coal companies, other coal companies, utilities and foreign mining companies and private equity investors. Oehlberg Tr. (6/28 afternoon) at 96:1-99:3, 99:4-15, 108:11-109:1, 110: 1-114:19, 115:10-12, 146:8-147:8; DX 0941. Triton's interest in a sale or refinancing was also publicized in various coal industry publications. Oehlberg Tr. (6/28 afternoon) at 108: 17-109:1, 120:25-122:7. As a result of rothschild's extensive contact efforts, "it's highly unlikely" that any potentially interested party was unaware of the opportunity to acquire Triton from 2001 to 2003. Id. at 108:5-109:7, 122:14-24, 167:16-20.

Although not a failing firm in the technical sense, Triton is plainly a relatively weak competitor in the current SPRB market, with no convincing **[**136]** prospects for improvement. The evidence establishes that it faces high costs, has low reserves, has at best uncertain prospects for loans or new reserves, is in a weakened financial condition, and has no realistic prospects for other buyers. The evidence also suggests that Kiewit, as owner and operator of the Buckskin mine, will be a stronger competitive force in a post-merger market than Triton has been or will be if no merger occurs. See section ii-c-4 Supra at xx. Although defendants cannot avail themselves of a failing firm defense to defeat the FTC's antitrust challenge, Triton's weak competitive status remains relevant to an examination of whether substantial anticompetitive effects are likely from the transactions. The court concludes that based on the evidence before it, plaintiffs' claims of Triton's past and future competitive significance in the SPRB market has been far overstated.

F. Plaintiffs Have Not Met Their Burden on the Likelihood of Success

To repeat, in this action under *Section 7* of the Clayton Act and *Section 13(b)* of the FTA act, plaintiffs bear the burden of showing a "reasonable probability" that the challenged transactions may substantially **[**137]** lessen competition, but they need not prove an actual *Section 7* violation -- instead, they must raise such "serious, substantial, difficult and doubtful" questions going to the merits that further investigation and deliberation by the FTC and the court of appeals are warranted. *Heinz, 246 F.3d at 714-15*. Once plaintiffs have established a prima facie case that there will be a significant increase in market concentration, close examination of the particular market -- here the SPRB -- is required to assess the likely anticompetitive **[*158]** effects of the challenged transactions. Id.; *Baker Hughes, 908 F.2d at 982-83*.

The court has found that plaintiffs have shown a prima facie case, but that defendants have successfully rebutted, in two ways, the resulting presumption that the transactions will substantially lessen competition. First, plaintiffs' statistical case of increased market concentration is far from compelling, and indeed is much weaker than other FTC antitrust challenges, when, consistent with General Dynamics and as urged by defendants, reserves are used to calculate the HHI increase that reflects the likely increase in SPRB market concentration. **[**138]** this case, then, begins as a fairly weak prima facie case, which requires less of a rebuttal showing by defendants. See *Heinz, 246 F.3d at 725*; *Baker Hughes, 908 F.2d at 991*. second, and more importantly, the considerable evidence before this court with respect to the particulars of the SPRB coal market confirms that it is unlikely that the challenged transactions will substantially lessen competition, and thus rebuts plaintiffs' marginal prima facie case of increased market concentration and the accompanying presumption that the transactions will substantially lessen competition in the SPRB.

Among the conclusions reasonably drawn from an examination of the record evidence relating to the operation of the SPRB coal market are the following. Although the tacit coordination on production by major SPRB producers feared by the FTC is feasible, and some producers have indicated an interest in greater production discipline in the market, the SPRB has been (and remains) a competitive market with no historical evidence of actual express or tacit anticompetitive coordination. Production in the SPRB has increased steadily over the past decade. Neither the 2001 **[**139]** price spike (which is explained by factors other than tacit coordination to limit production) nor occasional mine closures in 1999 and 2000 (which are explained by legitimate, independent business reasons) constitute evidence of anticompetitive coordination among SPRB coal producers. When Arch made statements in 2000 supporting production discipline in the SPRB and thereafter curtailed its coal production, other coal producers did not adopt Arch's approach, and instead continued to produce and sell coal at incremental cost. The absence of evidence of tacit coordination to limit production is fully consistent with the structure and dynamics of the SPRB market, in which sufficient supply and pricing information to facilitate coordination is generally not available, and which is dependent upon an extremely competitive sealed bid contracting process. These features of the SPRB market make tacit agreement difficult to coordinate and demonstrate both that it would be hard to identify deviations from any agreement to limit production and that there is no effective mechanism in the SPRB to discipline producers who deviate from the terms of coordination.

Although defendants have not presented **[**140]** sufficient evidence to support a full defense based either on efficiencies from the proposed transactions or on Triton's weak financial and competitive condition, these are relevant considerations supporting the conclusion that the transactions are not likely to substantially lessen competition in the SPRB. Defendants' evidence on efficiencies does not sustain the claimed savings in excess of $ 100 million, but does establish that some cost reductions, primarily related to the adjacent positions of the Black Thunder and North Rochelle mines, would benefit competition in the SPRB. Triton has not been, and is not likely to be, a maverick in the SPRB market, given its non-aggressive "last mine standing" bidding strategy, high production **[*159]** costs, and extremely weak financial condition. Although not technically a "failing" company, it is unlikely to be a strong competitor in the SPRB if the transactions are enjoined, having no concrete prospects for a needed cash infusion or a new buyer. Both RAG and Kiewit, on the other hand, would be strong "fringe" competitors in a postmerger SPRB market. Kiewit promises to expand production at Buckskin and compete vigorously, and has the financial strength **[**141]** and mining experience to do so, and RAG also pledges to expand production under its new management consistent with its strategy to expand quickly as market opportunities develop. Together, their fringe expansion is more than enough to cover any demand shortfall and defeat any price increase assuming coordinated output limitation by the three large SPRB producers, and each is better positioned to play the role of a maverick competitor in the SPRB market than Triton would be.

Based on these and the other findings and conclusions discussed above, the court concludes that defendants have successfully rebutted plaintiffs' fairly weak prima facie case of a *Section 7* violation. Plaintiffs have not shown a "reasonable probability" that the challenged transactions may substantially lessen competition in the SPRB. Moreover, the court concludes based on the record evidence that plaintiffs have not raised such serious and substantial questions going to the merits of the *Section 7* claim that a preliminary injunction is warranted under *Section 13(b)* of the FTA act to permit further review by the FTC. In short, plaintiffs are not likely to succeed on the merits of their claim of a Clayton Act violation **[**142]** based on the novel theory of prospective tacit coordination on production limits.

G. Weighing the Equities

Section 13(b) ***HN28***[] "provides for the grant of a preliminary injunction where such action would be in the public interest -- as determined by a weighing of the equities and a consideration of the commission's likelihood of success on the merits." *Heinz, 246 F.3d at 714*; See *15 U.S.C. § 53(b)*. The primary public interest favoring preliminary injunctive relief in a *Section 13(b)* case, which congress specifically contemplated, is the effective enforcement of the antitrust laws. *Heinz, 246 F.3d at 726*. Absent a likelihood of success on the merits, however, equities alone will not justify an injunction. See *PPG Indus., Inc., 798 F.2d at 1508*. therefore, here the requested preliminary injunction must be denied for that reason alone.

In any event, the equities here do not support enjoining the transactions in the public interest. Plaintiffs argue that a preliminary injunction would protect the public from antitrust injury in two ways: first, an injunction would ensure that an effective remedy is possible **[**143]** at the end of the case, and second, it would protect the public against the exercise of market power by the combined firms in the interim, until the permanent injunction proceeding before the FTC is decided. Plaintiffs point out that the merger will be difficult, if not impossible, to undo and that a preliminary injunction would prevent "scrambling the eggs" -- the transfer of trade secrets, degradation of the acquired firm's capabilities, combination of the Black Thunder and North Rochelle mines, and any other actions whose results would be difficult to reverse. Absent a preliminary injunction, Arch will sell Buckskin to Kiewit, which will be difficult to recover, Leer Tr. (6/28 morning) at 14:25-15:2, and will integrate Triton's North Rochelle mine with Arch's Black Thunder mine, which may be impossible to reverse after time passes. See DX 1111 at 757, 765, 767, **[*160]** 769, 770-71, 775-77. The FTC also argues that the public interest in the enforcement of the antitrust laws will be served by enjoining the proposed transaction because public utilities pass on fuel input increases to their utility customers. See PX 0007 at 9 p 17 (Rahm decl.) ("any increase in the price **[**144]** of wyoming PRB coal would immediately impact our electricity customers because we would need to pass on any price increase to end users of electricity generated with wyoming coal."). According to the FTC, an injunction will benefit all the utilities and consumers of electricity who rely on SPRB coal to provide electric power.

The court is skeptical that much harm would be incurred by denying the preliminary injunction, however, given the modest level of the projected increase in market concentration and the brief period (presumably less than a year) before FTC proceedings are completed. If this court issues a preliminary injunction, on the other hand, Arch and Triton will abandon the transaction rather than undergo an administrative proceeding, and any cost savings and output enhancements that the transactions will create will be lost. Hake Tr. (6/29 open) at 13:22-14:17 (Triton will abandon); Leer Tr. (6/28 morning) at 14:17-24 (it is "very likely" that Arch will abandon). Defendants therefore argue that a preliminary injunction would effectively deprive the market of pro-competitive savings, efficiencies, and a new strong competitor. Based on the evidence presented, the court concludes **[**145]** that the equities, which cannot alone justify an injunction, do not weigh strongly in favor of plaintiffs.

CONCLUSION

For all the reasons stated above, the requests for a preliminary injunction by the FTC and the states in these consolidated cases will be denied. A separate order has been issued on this date.

/s/ john d. Bates

John D. Bates

United States District Judge

date: August 16, 2004

ORDER - August 13, 2004

Upon consideration of the motions for preliminary injunction filed in these consolidated cases by plaintiffs Federal Trade Commission ("FTC") and the states of Missouri, Arkansas, Kansas, Illinois, Iowa, and Texas ("States")(together "plaintiffs") against the merger proposed by defendants Arch Coal, Inc., New Vulcan Holdings Co., LLC, and Triton Coal Co., LLC ("defendants"), the evidence and argument in support and in opposition submitted to the court through briefing and at the evidentiary hearing in this matter, which commenced on June 21, 2004, and the entire record herein, and upon consideration of the renewed motion of defendants to consolidate the preliminary and permanent injunction proceedings, it is this 13th day of August, 2004, for **[**146]** the reasons stated in the court's memorandum opinion issued on this date, hereby

Ordered that plaintiffs' request for a preliminary injunction is denied; and it is further

Ordered that defendants' motion to consolidate the preliminary and permanent injunction proceedings, renewed by defendants at the close of the hearing on July 7, 2004, is denied.

Opinion

MEMORANDUM AND ORDER

Pending before the court are Defendant, Gulf Coast Pipeline Partners, L.P.'s Motion to Exclude Testimony of Plaintiff's Expert, Thomas A. Graves (Docket Entry No. 81) and Defendant Houston Pipe Line's Motion to Exclude Evidence of Any Diminution in Sale Price Damages or, in the Alternative, to Exclude the Reports and Opinion Testimony of Stephen C. Collins (Docket Entry No. 84) For the reasons set forth below, both motions will be denied.

I. Relevant Procedural History

Plaintiff, Thornberry Oil Field Services, Inc. ("Thornberry"), brought this action against defendants, Gulf Coast Pipeline Partners, L.P. ("Gulf Coast"), Houston Pipeline Company a/k/a Houston Pipe Line **[*2]** LP ("HPL"), and

Danex Energy Company, Inc. ("Danex"), alleging a *per se* violation of *15 U.S.C. § 1*, the Sherman Antitrust Act, and breach of contract claims. [1] On April 9, 2004, the court entered an Order (Docket Entry No. 68) granting Plaintiff's Motion for Partial Summary Judgment on Antitrust Claim (Docket Entry No. 40) on the issue of antitrust liability, granting in part and denying in part Defendant Houston Pipe Line Company LP's Motion for Summary Judgment (Docket Entry No. 37), denying the Plaintiff's Motion for Summary Judgment Filed by Defendant Gulf Coast Pipeline Partners, L.P. (Docket Entry No. 36), and denying Plaintiff's Motion for Partial Summary Judgment: Breach of Contract Claim against Houston Pipe Line Co. (Docket Entry No. 39). The court also granted partial summary judgment in favor of Thornberry against Danex on Thornberry's breach of contract claim.

II. Defendants' Motions to Exclude

The defendants' motions to exclude the plaintiff's experts' testimony are based on the Supreme Court's holdings in *Daubert v. Merrell Dow Pharms., 509 U.S. 579, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)* and its progeny, which require that opinion **[*3]** testimony meet all relevant requirements of *Federal Rule of Evidence 702*. The district court, therefore, must act as "gatekeeper," ensuring that expert testimony meets basic standards of relevance and reliability before a jury may use it in making factual determinations. *Daubert, 113 S. Ct. at 2795*; *Seatrax, Inc. v. Sonbeck Int'l, Inc., 200 F.3d 358, 371 (5th Cir. 2000)*.

A. Antitrust Damages and the Relevance of Thornberry's Models

The court has already concluded that Gulf Coast and HPL are liable for a *per se* violation of section 1 of the Sherman Act, *15 U.S.C. § 1* as a result of an illicit agreement to fix the price paid for gathering gas at HPL Meter No. 4555 on the Marshall lease and transporting it less than two miles along the Humble Pipeline to HPL's large gas transportation system. The issue remaining at trial is the extent to which this illicit conduct damaged Thornberry.

Thornberry seeks damages based on two distinct models. First, Thornberry seeks the difference between the actual, excessive gathering rates that Gulf Coast charged Thornberry to transport its gas from HPL's meter over the Humble Pipeline to HPL's pipeline system, rates memorialized in the Gulf Coast/HPL contract, **[*4]** and what a "reasonable rate" would have been for performing that particular service during the relevant period (from May of 2001 through August of 2003). Second, Thornberry seeks the diminution of the value of its Marshall lease holdings that resulted from the excessive costs of transporting the gas produced from those holdings to market as of the date when that property was sold. [2]

The defendants argue that neither of these damages models is material in a price-fixing case. The threshold issue before the court, therefore, is whether Thornberry, as an antitrust plaintiff, is required to adopt a specific damages model.

The Fifth Circuit has repeatedly emphasized that damages in antitrust cases tend to be case-specific. See, e.g., *Bell Atlantic Corp. v. AT&T Corp., 339 F.3d 294, 302 (5th Cir. 2003)*. Once a plaintiff has established "some 'element of actual damages caused by the defendant's violation of the antitrust laws[,]'" then "a more relaxed burden of proof obtains for the amount of damages than would justify an award in other civil cases." Id. (quoting *Eleven Line, Inc. v. North Texas State Soccer Assoc., Inc., 213 F.3d 198, 206-07 (5th Cir. 2000))*. **[*5]** Moreover, the Fifth Circuit instructs that

> the nature of an antitrust claim means that "some plaintiffs can only hypothesize about what the state of their affairs would have been absent the wrong," . . . and we have, therefore, declined to hold antitrust plaintiffs to the same burden of proof of damages as demanded of plaintiffs in other civil cases. . . . Such leniency

[1] See Plaintiff's Amended Complaint, Docket Entry No. 12 at PP 14-25.

[2] Thornberry sold its Marshall lease holdings in August of 2003.

> notwithstanding, an antitrust plaintiff may not merely rely on "guesswork or speculation" to establish damages. . . . Rather, our cases indicate that the plaintiff must provide a "just and reasonable estimate of the damage based on relevant data." . . . And we have accordingly rejected claims where the plaintiff's proposed method of calculating damages failed to reasonably approximate actual economic losses.

Bell Atlantic, 339 F.3d at 302 (citations omitted).

The court concludes that Thornberry's two theories of damages are neither wholly speculative nor divorced from Thornberry's alleged actual economic losses. The law does not require absolute precision in proving antitrust damages because of the inherent difficulty and uncertainty that generally exists in the antitrust context. See, e.g., Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 89 S. Ct. 1562, 1576, 23 L. Ed. 2d 129 (1969) **[*6]** (explaining that damage issues in antitrust actions "are rarely susceptible of the kind of concrete, detailed proof of injury which is available in other contexts. [Thus, t]he Court has repeatedly held that in the absence of more precise proof, the factfinder may 'conclude as a matter of just and reasonable inference from the proof of defendants' wrongful acts and their tendency to injure plaintiffs' business, and from the evidence of the decline in prices, profits and values, not shown to be attributable to other causes, that defendants' wrongful acts had caused damage to the Plaintiffs.'") (citations omitted). In other words, "it is only necessary that plaintiff present reasonable evidence as to the amount of those damages." Heatransfer Corp. v. Volkswagenwerk, A.G., 553 F.2d 964, 984 (5th Cir. 1977).

The court is therefore not persuaded by defendants' relevance arguments. First, the issue of whether Gulf Coast's rates were excessive has already been resolved. [3] The issue remaining for trial is how and to what degree Thornberry was damaged by the fact that Gulf Coast and HPL illicitly agreed to set an excessive rate to gather gas that they knew in advance would be passed back to captive, **[*7]** upstream producers and that Gulf Coast knew would be exempt from the regulatory reach of the Texas Railroad Commission. Gulf Coast's argument that it was free to charge "whatever it wanted to" for use of the Humble Pipeline is simply erroneous. Gulf Coast could charge whatever it wanted to -- as long as in doing so it did not violate the antitrust laws. [4] A damages model that purports to measure the degree to which Gulf Coast's rate was excessive is therefore relevant.

Second, HPL incorrectly characterizes the diminution of the sales price for Thornberry's lease as equivalent to lost future profits or the "future value" of the lease. [5] The sales price of Thornberry's lease reflects the degree to which Gulf Coast's rates affected the present market value of that lease.

Moreover, HPL's reliance on Sciambra v. Graham News Co., 841 F.2d 651 (5th Cir. 1988) is misplaced. Sciambra involved a claim that the plaintiff had been illegally excluded from a market by the two defendants who were suppliers of products that plaintiff sold. The plaintiff had been awarded a preliminary **[*8]** injunction that enabled him to continue receiving supplies after only a 70-day hiatus; and "prevailing on the merits would have assured his future supplies as well." Id. at 657. Meanwhile, the plaintiff opted to enter into a settlement agreement with one of the antitrust co-conspirators. The settlement entailed an agreement that plaintiff would sell his business to that co-conspirator and covenant not to compete with that entity. Id.

The Fifth Circuit concluded that the district court had erroneously based its subsequent calculation of damages on the "going concern" value of the plaintiff's business because plaintiff's loss of the concern was the result of a voluntary sale, not of defendants' antitrust violations. Id. Indeed, Sciambra emphasizes that "[g]oing concern value is an alternative to lost profits as a measure of antitrust damages only in cases where the antitrust victim was actually forced out of business." Id. (citations omitted) (emphasis in original).

---

[3] See Memorandum and Order, Docket Entry No. 68.

[4] See id. at p. 39.

[5] HPL's Motion to Exclude, Docket Entry No. 84 at p. 4.

Thornberry is not seeking damages based on the loss of a going concern per se. Instead, Thornberry argues that the inherent value of an asset, its land, was diminished because of Gulf Coast's excessive rates and that its land **[*9]** would have been worth more, on the date it was sold, "but for" the illegal contract between Gulf Coast and HPL. There is no categorical imperative in antitrust jurisprudence that damages in overcharge cases be based solely on the difference between the price charged and the fair market value for the product or service. See, e.g., ABA SECTION OF ***ANTITRUST LAW***, ***Antitrust Law*** *Developments* 874-75 (5th ed. 2002) ("The appropriate measure of damages depends on the nature of the violation shown. In price fixing cases and cases involving monopolistic overcharges, the measure of damages in a suit by a purchaser normally is the difference between the price the plaintiff paid and the price he would have paid absent the violation.") (emphasis added). [6]

None of the cases upon which HPL relies for the proposition that damages in a price-fixing case must be limited to the difference between the price paid and the fair market price, i.e., the overcharge, actually state such a proposition. [7] Each of these cases merely starts with the amount of overcharge as a logical measure of damages because it fits the facts of the particular case. Certainly, in **[*10]** antitrust cases involving a price-fixing conspiracy the most obvious measure of damages is the difference between the prices actually paid by a conspirator's customers and the prices that would have been paid absent the conspiracy. See, e.g., *Hanover Shoe, Inc. v. United Shoe Machinery Corp., 392 U.S. 481, 88 S. Ct. 2224, 2228-29, 20 L. Ed. 2d 1231 (1968)*; *Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263, 297 (2d Cir. 1979)*, cert. denied, *444 U.S. 1093, 100 S. Ct. 1061, 62 L. Ed. 2d 783 (1980)*; *Burlington Industries, Inc. v. Milliken & Co., 690 F.2d 380, 385-86 (4th Cir. 1982)*, cert., denied, *461 U.S. 914, 103 S. Ct. 1893, 77 L. Ed. 2d 283 (1983)*.

But neither these cases nor the cases cited in HPL's briefs suggest that it is impermissible to use other means to measure damages that are directly and reasonably related to defendants' antitrust violation against Thornberry. Moreover, none of the cases cited above or in HPL's briefs involved evidence that plaintiff owned a tangible asset (such as land) whose value was directly diminished as a result of the illicit price-fixing agreement in question. In fact, the cases cited by HPL actually support Thornberry's contention that it may seek damages for the overcharge and the present diminution in **[*11]** the value of its lease (to the extent that that diminution was directly caused by the fact of Gulf Coast's excessive rates). Both of Thornberry's proffered models of damages are built on the premise that, "but for" the Gulf Coast-HPL contract, Thornberry would have been in a different economic position.

Having concluded that Thornberry's two damages theories are both viable as a matter of law because they are relevant to determining the actual economic damages that Thornberry sustained as a result of defendants' antitrust conduct, the court next considers the defendants' specific objections to the qualifications and methodologies of two of Thornberry's experts.

B. Thomas A. Graves

Thornberry has offered Thomas Graves as an expert who will testify that the gas transportation rates that Gulf Coast charged HPL, which were ultimately passed back to Thornberry, were excessive, reflecting neither the market value nor the cost of the actual service provided. Graves was retained to opine about the degree to which the rates in question were excessive. [8] Graves contends that a reasonable rate would not have exceeded $ .05-.10 per MMBtu. [9]

Gulf Coast argues that Graves is not qualified and that his opinions are not based on a reliable foundation.

1. Sufficient Qualifications

[6] Cited in HPL's Reply, Docket Entry No. 98 at p. 8.

[7] See cases cited in id. at pp. 7-8.

[8] Thornberry's Response, Docket Entry No. 97 at P 17.

[9] Gulf **[*12]** Coast's Motion to Exclude, Docket Entry No. 81, Exhibit A, Report of Thomas A. Graves at p. 1.

The court should exclude the testimony of an expert witness who is not sufficiently qualified by knowledge, skill, experience, training, or education. *FED. R. EviD. 104 (a)* Gulf Coast objects that Graves is merely a "rate consultant" in the "narrow field of public utility and oil and gas matters." [10] Gulf Coast emphasizes that Graves' experience has been limited to rate consulting in matters regarding regulated utilities, not unregulated, non-utilities like Gulf Coast's pipeline. [11] Gulf Coast acknowledges that Graves "is no doubt a competent utility rate consultant[,]" but contends that the methodology he employed reveals that he is unqualified to address the reasonableness of rates affecting pipelines that are not utilities. [12]

Graves' report and curriculum vitae indicate that he has been professionally involved in the natural gas business since 1968 and that he has vast experience determining **[*13]** appropriate rates for gas gathering and transportation. [13] The court, therefore, concludes that Graves has sufficient credentials to testify. It will be up to the jury to decide what weight to give his testimony in light of those credentials.

2. Reliability of Methodology and Underlying Data

Even the testimony of a highly qualified expert may be excluded if the expert's conclusions are based on an unreliable methodology. See *Kumho Tire Co. v. Carmichael, 526 U.S. 137, 119 S. Ct. 1167, 1175, 143 L. Ed. 2d 238 (1999)*; *Daubert v. Merrill Dow Pharm., Inc., 113 S. Ct. 2786, 2796-97 (1993)*. Courts are to use factors articulated in *Daubert* and subsequently incorporated into *Federal Rule of Evidence 702* to determine whether a given expert's testimony is admissible. These factors are whether the expert's testimony is (1) based on reliable facts or data, (2) the product of reliable principles and methods, and (3) the result of applying those principles and methods reliably to the facts of the case. *FED. R. EVID. 702*, see also *Black v. Food Lion, Inc., 171 F.3d 308, 311 (5th Cir. 1999)*.

Gulf Coast argues that "(i) [Graves] has not conducted any studies or analyses to substantiate **[*14]** his opinions, (ii) his opinions are not based on sufficient facts or data, (iii) his opinion contains only unsupported assertions as to his foundations, (iv) he assumed numerous facts that have no relationship to the actual facts of this case, (v) his opinion was generated solely for the pending litigation." [14] Gulf Gulf Coast does not, however, substantiate these conclusions with any specific citations to Graves' report or deposition. Gulf Coast merely emphasizes that Graves did not spend much time preparing his report (or billing for his time), and thus Gulf Coast concludes that his opinion is not based on "an informed analysis." [15] Gulf Coast also suggests that what it views as a scant analysis did not involve applying the cost-of-service model to the facts of this case. [16]

According to Gulf Coast, Graves' cost-of-service model is flawed because he does not discuss "what Thornberry would have paid for gathering, absent the contract between Gulf Coast and [HPL]." [17] Moreover, Gulf Coast contends that the "cost of service" model used in proceedings to set rates for utilities has no application to the unregulated pipeline business. **[*15]** [18] HPL adds that Graves' cost-of-service model fails to take into account

specific market conditions, such as "the bargaining power of the participants in the market, or their actual negotiations[.]" [19]

Thornberry acknowledges that Gulf Coast is not a regulated utility, but emphasizes that the court has already concluded that Gulf Coast nevertheless performs a utility-like service. Thornberry contends that the rate that would have been charged in the utility context, which is indisputably based on a "cost-of-service" analysis, is a fair indicator of what a "reasonable rate" would have been for the service that Gulf Coast provided. [20] Furthermore, Thornberry argues that the "cost of service" methodology, used in the utility arena, is used to "secure a rate that fairly compensates the pipeline owner for its investment, while not destroying the value of the hydrocarbon producer's holdings." [21] In other words, both Thornberry and its expert contend that the "cost -of -service" methodology is based on the fair market principles for which defendants claim Graves did not account.

The court agrees that the cost-of-service model, upon which regulators and gas transportation consultants rely, incorporates market principles, including the desirability of balancing the economic interest of pipeline owners and captive gas producers. Defendants have not cited any case that suggests that analogizing from a method used to determine fair rates for regulated pipelines is unsound or unreliable. Furthermore, the court recognizes the unique nature of the Humble Pipeline and the circumstances that permitted Gulf Coast to acquire ownership of that pipeline and, with HPL's assistance, to charge excessive rates. It is unreasonable to suggest that the only qualified expert would be one familiar with gas gathering/ transportation rates in the unique circumstances presented by this case. Such an argument belies the fact that this dispute arose from, and this court's rulings rely upon, the peculiar confluence of facts that enabled the anti-competitive conduct for which defendants have been found liable. See *Tanner v. Westbrook, 174 F.3d 542, 548 (5th Cir. 1999)* (holding that, while admissibility of expert testimony is guided by Daubert factors, **[*17]** "[t] he test of reliability is flexible and bends according to the particular circumstances of the testimony at issue") (superseded by 2000 amendment to *FED. R. EvzD. 103(a)* on a different point of law).

C. Stephen Collins

Thornberry contends that when Thornberry was unsuccessful in enlisting the aid of the Texas Railroad Commission in restricting Gulf Coast's ability to charge excessive gathering fees, Thornberry sold its interest in the Marshall lease. Thornberry argues that the sales price it ultimately received had to be discounted because of the excessive gathering costs encumbering the lease. Thornberry has offered Collins as an expert as to the degree to which Thornberry, in selling its property, was damaged by the excessive rates.

Collins is the Senior Vice-President and Operations Engineer of Wellspring Partners, L.L.C. ("Wellspring"). [22] Wellspring is "a consultant in the oil and gas industry in the areas of oil and gas reserve and economic valuation, market value determinations, reservoir engineering studies and the sale of oil and gas prospects." [23] Thornberry originally retained Wellspring to evaluate and market Thornberry's Marshall lease. Collins, on behalf of Wellspring, **[*18]** ultimately concluded that "the transportation issues associated with the Gulf Coast line and the transportation charges imposed by Gulf Coast and HPL caused the ultimate fair market value" of Thornberry's property "to be reduced by $ 200,000 - $ 240, 000." [24]

---

[19] HPL's Reply, Docket Entry No. 98 at p. 8.

[20] Thornberry's Response, **[*16]** Docket Entry No. 97 at P 16.

[21] Id. at P 17.

[22] HPL's Motion to Exclude, Docket Entry No. 84, Exhibit A at P. 1.

[23] Id.

[24] Id. at p. 2.

Aside from the relevance issue addressed above, HPL argues that Collins is unqualified and that his opinions lack reliability.

1. Sufficient Qualifications

HPL argues that Collins is not qualified because he is not an expert in the field of antitrust economic damages. [25] HPL emphasizes that Collins does not live in Harris County, nor has he ever operated properties in Harris County or along the Gulf Coast. [26] HPL also contends that Collins is unqualified because he is a seller of oil and gas properties, not a buyer. Therefore, "he has no special expertise relating to how buyers set about to determine value." [27] These features of Collins' history and experience of details that courts have cited as demonstrating that a proffered expert lacks sufficient specialized knowledge to mandate exclusion. See, e.g., *Pipitone v. Biomatrix, Inc., 288 F.3d 239, 247 (5th Cir. 2002)* **[*19]** (explaining that an expert may be sufficiently qualified as a result of personal observations, professional experience, education, and/or training).

Collins is a principal and owner of a firm that specializes in valuing oil and gas properties. His report indicate that he has over thirty years' experience in the oil and gas industry and that he has acted as an expert on oil and gas valuation in approximately 150 transactions. [28] The court concludes that he is sufficiently qualified to testify as to the value of Thornberry's lease when it was sold in August of 2003 and the degree to which its value was directly affected by Gulf Coast's gathering/transportation rates.

2. Reliability of Methodology and Underlying Data

Even if Collins is qualified to address the damages issues described above, his conclusions must be based on reliable methodology. *General Elec. Co. v. Joiner, 522 U.S. 136, 118 S. Ct. 512, 519, 139 L. Ed. 2d 508 (1997)*. In evaluating the reliability of a proffered expert's methodology the court must focus on the "reasonableness **[*20]** of using such an approach, along with [the expert's] particular method of analyzing the data thereby obtained, to draw a conclusion regarding the particular matter to which the expert testimony was directly relevant." *Kumho Tire, 119 S. Ct. at 1177* (emphasis in original).

HPL argues that Collins' testimony should be excluded because his "analysis omitted salient facts[.]" [29] Specifically, HPL objects that Collins' analysis did not disaggregate the diminished value of Thornberry's property attributable to lawful conduct. [30] HPL does not, however, identify the lawful factors that Collins failed to account for. Second, HPL objects that Collins' methodology is not based on established principles of comparative data but relies instead on "imprecise rules of thumb and, at worst, mere gut instinct." [31] HPL further objects to Collins' failure to ground his 42-month rule of thumb analysis to a "yardstick comparative method or any other method recognized by the industry" or to provide any basis for his $ 1.1 million initial assessment of the value of Thornberry's lease. [32]

---

[25] HPL's Motion to Exclude, Docket Entry No. 84 at p. 8.

[26] Id.

[27] HPL's Reply, Docket Entry No. 98 at p. 10.

[28] HPL's Motion to Exclude, Docket Entry No. 84, Exhibit A, Collins' Report at p. 1.

[29] Id., Docket Entry No. 84 at p. 9.

[30] Id.

[31] Id. at p. 10.

[32] Id. at p. 13.

Thornberry's response emphasizes that Collins was not **[*21]** initially engaged as a paid witness, but got involved with this matter a year before this action was filed. [33] Thornberry engaged Collins to prepare an evaluation study and to market Thornberry's Marshall lease. [34] Therefore, according to Thornberry, Collins' conclusions are particularly reliable because they were not reached with this litigation in mind, but were achieved to provide Thornberry with meaningful advice about marketing its property. [35]

Thornberry also notes that Collins relied on gas-pricing assumptions based on different gas transport fees, inferences regarding the present market value of the lease based on the PDP value and PVD value of the reserves, and actual monthly average gas sales. [36] What Collins refers to as a "rule of thumb" is a 42-month assumption regarding the reserve life of the lease, which Collins claims is commonly used in an industry in which he has extensive experience. [37] Thornberry also contends that Collins did not merely assume the **[*22]** $ 1.1 million starting point for the value of the Marshall lease as HPL suggests. Instead, Collins based that price on the sales price he believed that the lease could command in an arm's-length transaction by considering various reserve projections, commonly used PDP, PDNP, and PUD reserve variables, the production histories of the wells, lease operating expenses, and engineering logistics issues. [38]

Because Collins' testimony demonstrates that it is based on underlying data commonly employed in the oil and gas industry to valuate gas leases and because Collins' use of that data to arrive at his conclusions was not achieved through mere "ipse dixits," the defendants have not demonstrated that Collins' methodology is unreliable and that it must therefore be excluded under either *Daubert* or the Federal Rules of Evidence. See *Joiner, 118 S. Ct. at 519*.

III. Conclusion and Order

For the foregoing reasons, Defendant, Gulf Coast Pipeline Partners, L.P.'s Motion to Exclude Testimony of Plaintiff's Expert, Thomas A. Graves **[*23]** (Docket Entry No. 81) and Defendant Houston Pipe Line's Motion to Exclude Evidence of Any Diminution in Sale Price Damages or, in the Alternative, to Exclude the Reports and Opinion Testimony of Stephen C. Collins (Docket Entry No. 84) are **DENIED.**

SIGNED at Houston, Texas, on this the 16th day of August, 2004.

LexisNexis® Headnotes

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

Criminal Law & Procedure > Preliminary Proceedings > Pretrial Motions & Procedures > Dismissal

Criminal Law & Procedure > ... > Accusatory Instruments > Informations > General Overview

HN1[] **Pleadings, Rule Application & Interpretation**

A motion to dismiss tests whether a criminal information sufficiently charges an offense. A criminal information must contain a plain, concise and definite written statement of the essential facts constituting the offense charged.

Criminal Law & Procedure > ... > Dismissal > Grounds for Dismissal > Defective Instrument

Criminal Law & Procedure > ... > Accusatory Instruments > Informations > General Overview

Criminal Law & Procedure > Preliminary Proceedings > Pretrial Motions & Procedures > Dismissal

HN2[] **Grounds for Dismissal, Defective Instrument**

In the context of a motion to dismiss, the court's analysis must extend beyond determining whether the criminal information contains the core elements of the charged crime. A criminal information should be dismissed if its factual allegations, even if proven beyond a reasonable doubt, fail to constitute the crimes charged. If the infirmity in the prosecution is essentially one of law, the court may, on a motion to dismiss, decide whether the criminal information charges a crime.

Criminal Law & Procedure > Preliminary Proceedings > Pretrial Motions & Procedures > Dismissal

Criminal Law & Procedure > ... > Accusatory Instruments > Indictments > General Overview

HN3[] **Pretrial Motions & Procedures, Dismissal**

Ordinarily, in deciding a motion to dismiss, the indictment must be tested solely on the basis of the allegations made on its face, and such allegations are to be taken as true.

Governments > Legislation > Interpretation

HN4[] **Legislation, Interpretation**

In interpreting a statute, the court must first begin with the text. The starting point for the interpretation of a statute is always its language. Courts must presume that a legislature says in a statute what it means and means in a statute what it says there. In analyzing a statute, the court begins by examining the text, not by psychoanalyzing those who enacted it.

Governments > Legislation > Interpretation

Governments > Legislation > Interpretation > Rule of Lenity

HN5[] **Legislation, Interpretation**

The United States Supreme Court commonly interprets statutory terms according to their common meaning. If the plain language does not settle the question, then the court looks to other sources, such as the legislative history, to decipher the meaning of the ambiguous language. In a criminal case, ambiguous language must be interpreted in defendant's favor under the rule of lenity.

HN17[] Conspiracy to Defraud, Elements

The Sherman Act requires that the government show that defendants had an effect on interstate or foreign commerce but not an effect on the government. For fraud, under *18 U.S.C.S. § 371*, the government is required to show that defendants defrauded the government. *Section 371* does not require that the government show that the defendants alleged fraud had an effect on commerce.

Counsel: For Plaintiff: Hays Gorey, Jr. Esquire, Daniel L. Zelenko, Esquire, Mark W. Pletcher, Esquire, Craig Y. Lee, Esquire, United States Department of Justice, Washington, DC.

Rule, Esquire, Anthony V. Nanni, Esquire, Abram J.Pafford, Esquire, Franklin M. Rubinstein, Esquire, Tommy P. Braudreau, Esquire, Fried, Frank, Harris, Shriver & Jacobson, Washington, DC.

Judges: Gerald Bruce Lee, United States District Judge.

Opinion by: Gerald Bruce Lee

Opinion

[*498] **MEMORANDUM OPINION**

THIS MATTER is before the Court on Defendant Gosselin World Wide Moving N.V.'s ("Gosselin") Motion to Dismiss the Information for Failure to State an Offense, and Defendant Pasha Group's ("Pasha") Motion to Dismiss Criminal Information. This is a criminal case, **[**2]** which arises out of Defendants' alleged antitrust violations. The Government alleges that Defendants violated *15 U.S.C. § 1*, conspiracy to restrain trade (Count I), and *18 U.S.C. § 371*, conspiracy to defraud the United States (Count II). Both Gosselin and Pasha have entered into a plea agreement with the Government, conditioned upon the outcome of the Court's ruling on these motions.

Five issues exist before this Court. First, whether Defendants alleged conduct falls within an exception to the antitrust laws as specified in Section 1706(a)(4) (codified at 46 U.S.C. app. § 1706(a)(4)) of the Shipping Act of 1984 ("Shipping Act"). Second, whether the language of Section 1706(a)(4) of the Shipping Act is so ambiguous as to warrant the Court's application of the rule of lenity, mandating dismissal of the criminal information. Third, independent of the issues raised by Section 1706(a)(4) of the Shipping Act, does Section 7(a) (2) (codified at 46 U.S.C. app. § 1706(a)(2)) of the Shipping Act further exempt Defendants' conduct from the antitrust laws. Fourth, if the Court finds that antitrust **[**3]** immunity does not apply to Defendants in this case, whether Section 7(c)(1) **[*499]** (codified at 46 U.S.C. app. § 1706(c)(1)) of the Shipping Act provides Defendants retroactive immunity. Fifth, does the Government state an independent basis for fraud independent of the Sherman Act violation.

The Court holds that under a plain reading of Section 1706(a)(4) of the Shipping Act, Defendants' activity does "concern" the foreign inland segment of through transportation. As such, Defendants alleged conduct is not within the purview of the antitrust laws pursuant to the Shipping Act's antitrust immunity provisions.

Second, even assuming *arguendo,* that Defendants alleged conduct was not immune from the antitrust laws under a plain reading of Section 1706(a)(4), the Court holds that as a matter of law, the statutory and common law rules of lenity mandate dismissal of the pending criminal information.

Third, the Court holds that, independent of antitrust immunity Defendants enjoy pursuant to a plain reading of Section 1706(a)(4) of the Shipping Act, Defendants shipping activity involving military household goods is exempt from the Federal Maritime Commission's tariff **[**4]** filing and publication requirements, and thus is immunized from antitrust scrutiny under Section 1706(a)(2) of the Shipping Act.

Fourth, the Court holds that under Section 7(c)(1) of the Shipping Act (codified at 46 U.S.C. app. § 1706(c)(1)), Defendants are entitled to retroactive immunity under the Shipping Act. However, this argument is moot because the Court finds that Defendants have immunity under a plain reading of Section 1706(a)(4), and alternatively under the statutory and common law rules of lenity.

Fifth, the Court holds that the Government states a basis for fraud against Defendants, independent of the Sherman Act violations. Where the same conduct violates two different criminal statutes, the Government can prosecute and punish it under both statutes, as long as each statutory provision requires proof of a fact which the other does not.

Therefore, the Court holds that Defendant Gosselin's Motion to Dismiss the Information for Failure to State an Offense is PARTIALLY GRANTED, and Defendant Pasha's Motion to Dismiss Criminal Information is PARTIALLY GRANTED. The Court DISMISSES Count One of the Criminal Information.

BACKGROUND

Basic **[**5]** Facts

This case arises out of an alleged antitrust "price-fixing" case that the Government has brought against two companies, Gosselin, a Belgian company headquartered in Antwerp, Belgium, and Pasha, a United States company headquartered in Corte Madera, California. Count I of the Indictment alleges conspiracy to restrain trade in violation of Title *15, United States Code, Section 1*. Count II of the Indictment alleges conspiracy to defraud the United States, in violation of Title *18, United States Code, Section 371*.

Gosselin and Pasha are both in the business of shipping the household goods of U.S. military personnel from their European homes to foreign ports. In November 2003, Gosselin and its Managing Director Marc Smet were indicted for violating the Sherman Act and conspiring to defraud the United States. The Government has since dismissed the Indictment against Mr. Smet. The November 2003 Indictment was superceded by a Criminal Information, which the Government filed on February 13, 2004. The Criminal Information charged Gosselin and its alleged co-conspirator, Pasha. Defendants entered a conditional plea of guilty to the Criminal **[**6]** **[*500]** Information, in which they expressly reserved the right to file this motion to dismiss.

The International Through Government Bill of Lading Program

The alleged price fixing conspiracy revolves around the International Through Government Bill of Lading ("ITGBL") program. The Department of Defense ("DOD") pays for this program, whose purpose is to transport military and civilian personnel household goods to and from foreign countries. The ITGBL is administered by the Military Traffic Management Command ("MTMC"). MTMC solicits bids from U.S. freight forwarders (also called carriers). Freight forwarders are the companies that shoulder the ultimate responsibility for the military household goods shipment between the U.S. and foreign countries. *See* Statement of Facts at 5.

Freight forwarders subcontract with other service providers for each component of the transportation. The other service providers are (1) local foreign moving and storage companies, (2) foreign port agents, (3) ocean carriers, (4) U.S. port agents, and (5) U.S. moving and storage companies. Criminal Information P 10; Statement of Facts P 7. Freight forwarders obtain rate commitments from the service providers **[**7]** for each of the components, add their own markup, and combine these bids into what is called a "through rate." In putting together their through rates, U.S. freight forwarders must consider the costs for each of these services, plus the costs of a booking agent to monitor shipments, physical inputs, such as liftvans and warehouses, and finally, overhead and profit. The through rate is then submitted to the MTMC.

The MTMC conducts bidding twice a year for six-month cycles in a two-step bidding process. *See* Statement of Facts PP 4, 13. In the first step, or "initial filing," U.S. freight forwarders file their "through rates" in each route - called a "channel." [1] The lowest bidder in the initial filing sets what is called the "prime rate." The carrier that sets the prime rate for a channel is guaranteed a predetermined percentage of the shipments for that particular channel. A carrier may instead file an "administrative high" rate to indicate its intent not to file competitively at the initial filing

[1] Each "channel" is a route to or from a particular state and a specific foreign country. For instance, a channel originating from a U.S. military base in Germany to the servicemember's new home in Virginia would be designated "Germany-Virginia."

stage, while reserving the right to file again at the second stage, known as the "me-too" stage. *See* Statement of Facts P 15.

[8]** After the initial filing, MTMC publishes a list of the lowest five bids received by MTMC for each channel. Statement of Facts P 16. During the "me-too" bidding period, carriers that did not set the "prime rate" may match, or "me-too" the lowest rate and receive a guaranteed fraction of the shipments moved on that particular channel. *Id.* Alternatively, carriers can file a rate higher than the low rate; however, MTMC will ship household goods using carriers with higher filed rates only after all carriers with lower rates on file exhaust their capacity.

Gosselin and Pasha have two roles within the ITGBL program. First, Pasha and Gosselin act as exclusive co-agents of an association of freight forwarders called the International Shippers' Association ("ISA"). Statement of Facts P 10. Pasha and Gosselin negotiate a "service contract" on behalf of ISA with the Trans Atlantic American Flag Line Operators ("TAAFLO"), an immunized conference of U.S. **[*501]** ocean common carriers. Statement of Facts PP 9-10. ISA members receive discounted ocean rates from TAAFLO in exchange for committing to ship a specified volume of cargo over a set period of time. As compensation for acting as ISA's agents, **[**9]** Pasha and Gosselin receive a set commission fee. Statement of Facts P 10.

Second, Pasha and Gosselin act as General/Booking Agents for many of their customers. MTMC requires each carrier to appoint a General/Booking Agent to serve as its local representative in Germany to receive bookings. Statement of Facts P 7. As a General/Booking Agent, Defendants offer their customers the option to purchase ocean transportation together with foreign inland services (packing, trucking, and port services) that the Defendants procure from local foreign agents. Statement of Facts P 12. Defendants then bill the carriers the rate fixed by the ISA-TAAFLO service contract for ocean transportation (which includes Defendants set commission) plus the rate for the foreign inland services. *Id.* This combined rate is referred to as the "landed rate." *Id.* A "landed rate" is essentially an offer to obtain foreign inland services for the carrier and then to bill those services together with the ISA-TAAFLO service contract rate for the ocean shipping. *Id.*

<u>The Alleged Price Fixing Conspiracy</u>

The Government states that in the initial filing for the summer of 2002 (which occurred in 2001), a **[**10]** U.S. freight forwarder (or carrier - referred to hereinafter as "FF-1") filed the prime rate in 26 of 52 channels from Germany to the United States. Statement of Facts P 18. FF-1 did not use the landed rate of either Defendant. *Id.* In 12 of these 26 channels, FF-1's through rates were at least $ 3.00 per hundredweight lower than those carriers using Defendants' landed rates. *Id.* In December 2001, MTMC published FF-1's bids, along with those of the next four lowest bidders. U.S. carriers then had until January 16, 2002 to file their second round "me-too" bids. Statement of Facts P 19.

On December 26, 2001, Gosselin's managing director sent an email to a landed rate competitor, an unindicted co-conspirator, identifying the 12 channels. Statement of Facts PP 20, 21. Gosselin's managing director prepared a spreadsheet targeting those channels for elimination and sent it to the unidentified co-conspirator, saying that, by "not taking the low into consideration we would increase the rate level with an average of 3.63 USD … This is the only thing that in my mind can happen." *Id.* The head of the unindicted co-conspirator organization responded, "Agree to your position … You **[**11]** know if we do not reach and give [the] industry a clear message which rate to base the m/2 [me-too] on, then everyone will use the low [prime] rate and later expect us [the landed rate providers] to reduce our rates so those carriers can work under their m/2 rates." *Id.*

Gosselin sent these emails to the chief executive of Pasha with the note, "I don't know where you are at this moment with [the landed rate to a Pasha freight forwarder] but what rate levels would you be able to support if those [12] states would go to the second level? I think it is important we move rather quickly now. Maybe when you have a chance we can talk in the next days." Statement of Facts P 21. Pasha thereafter allegedly agreed with Gosselin to act to eliminate the prime through rates in 12 of the 26 channels and replace them with higher rates at the second-low level. Statement of Facts P 24.

To implement the agreement, Gosselin's managing director agreed to pay a specified rate to twelve of the largest German packing and hauling agents in return for **[*502]** their agreement not to "handle business" for carriers in the 12 channels unless those carriers filed "me-too" rates at or above the second-low **[**12]** level. Statement of Facts P 22.

On January 8, 2002, in a fax letter edited and approved by Gosselin's managing director, the agents informed U.S. freight forwarders that they "will offer their capacity only to those carriers me-tooing the second rate level into the [enumerated 12] states .... It was emphasized strongly that business to these states will only be handled at the second low rate level, so, me-too can only happen at this level." Statement of Facts P 23. Gosselin sent a copy of this fax to Pasha on January 9, 2002. Id.

Through correspondence with FF-1 in the United States, Defendants agreed with FF-1 that it would cancel its prime rates in the 12 targeted channels, on the understanding that no other U.S. freight forwarder would me-too those prime through rates or file a rate below the second-low level. Statement of Facts P 27. To deliver on their promise to FF-1, Defendants obtained the agreement of most of the other U.S. freight forwarders not to me-too the prime through rates in those 12 channels, but instead to file me-too rates at or above the second-low level. *Id.* The carriers overwhelmingly filed me-too through rates at or above the second low level in the **[**13]** 12 targeted channels. Statement of Facts P 28. In the few instances where the carriers either ignored or misunderstood the instructions and filed me-too rates lower than the second-low level, Defendants directed them to agree to cancel those lower rates, and they did. Statement of Facts PP 29-30. Defendants also supplied misleading information to DOD personnel in Germany to ensure that DOD did not tender any shipments to a freight forwarder with a me-too rate on file below the second-low level. Statement of Facts PP 29, 31.

The Government contends that as a result of the Defendants alleged conspiracy, DOD overpaid for the transportation of military household goods by approximately $ 1 million during the summer of 2002. Statement of Facts P 33.

<u>The Parties Arguments</u>

The Defendants argue that the facts as stated above (as agreed to in the Statement of Facts) are a direct consequence of an initial agreement among local German agents to fix the terms and conditions under which they would provide packing services and local trucking services in Germany to U.S. carriers. According to Defendants, the German agents agreed among themselves, in advance of the ITGBL carriers' decision **[**14]** regarding what rates to file with MTMC, not to provide service for any carrier that filed rates with MTMC below a certain level. The German agents thereafter undertook to inform the industry of their agreement and acted to ensure that it would be carried out within the framework of MTMC's regulatory program. See Mem. of the Pasha Group in Supp. of Mot. to Dismiss Criminal Information (hereafter referred to as "Pasha Memorandum") at 6. Defendants contend that they had a duty to inform their ITGBL carrier customers of the German Agents' actions, which comprise the Government's charge of conspiracy.

Defendants maintain that Section 1706(a)(4) of the Shipping Act (46 U.S.C. app. § 1706(a)(4)) provides that the antitrust laws allow them an exemption, because their business "concerned the foreign trade segment of through transportation." Section 1706(a)(4) of the Shipping Act provides:

> The antitrust laws do not apply to -
>
> **[*503]** (4) any agreement or activity concerning the foreign inland segment of through transportation that is part of transportation provided in a United States import or export trade.

Defendants contend that this statutory language is broad, **[**15]** with little definition of the terms. Defendants further argue that United *States v. Tucor, 35 F. Supp. 2d 1172 (N.D. Cal. 1998)*, *aff'd,* *189 F.3d 834 (9th Cir. 1999)*, has facts analogous to those at hand, and supports the Defendants' statutory interpretation.

Regardless, even if the Court found that Section 1706(a)(4) of the Shipping Act did not apply to Defendants, because the statute is so ambiguous, Defendants were not given a "fair warning" of criminal conduct, and the statutory and common law rules of lenity mandate that the Court dismiss the pending Criminal Information. Defendants note that they relied upon the holding in *Tucor* in making the determination that their conduct was legal.

Defendants also assert that, independent of Section 1706(a)(4) of the Shipping Act, Section 1706(a)(2) of the Shipping Act also gives Defendants immunity from the antitrust laws. Section 1706(a)(2)(B) states that the antitrust laws do not apply to:

> "any activity or agreement within the scope of this chapter, whether permitted under or prohibited by this chapter, undertaken or entered into with a reasonable basis to conclude that … it is exempt under **[**16]** Section 1715 of this title from any filing or publication requirement of this chapter." See 46 U.S.C. app. § 1706(a)(2)(B).

Defendants contend that Subsection(a)(2)(B) references Section 1715 of the Shipping Act, which empowers the Federal Maritime Commission ("FMC") to exempt any class of agreements or any specified activity from application of the tariff filing requirements under the Shipping Act. Defendants opine that in order to show that the conduct in the Criminal Information is covered by Section 1706(a)(2)(B) immunity, they must show that (a) the FMC has exempted carriers such as Defendants from a filing or publication requirement pursuant to its authority under Section 1715 and (b) Defendants' conduct as described in the Statement of Facts constituted activities or agreements for which there was a reasonable basis to conclude that such activities or agreements fell within the scope of the Section 1715 exemption.

Defendants argue that one of the exemptions granted under Section 1715 covers the filing and publication requirements for tariffs in connection with "transportation of used military household goods and personal effects by ocean transportation **[**17]** intermediaries." *See* *46 C.F.R. § 520.13(c)*. "Ocean transportation intermediaries" include non-vessel owning common carriers ("NVOCC") and freight forwarders. *See* 46 U.S.C. app. § 1702(17). According to Defendants, they are classified in the Statement of Facts as a NVOCC and therefore they fall within the FMC's Section 1715 exemption from publishing tariffs for military household goods. Statement of Facts P 9. Based on their status as a NVOCC and the resulting exception from having to publish tariffs, Defendants are afforded by statute broad immunity against the antitrust laws.

Defendants also assert that they have immunity against the antitrust laws through Section 7(c)(1) of the Shipping Act. This Section reads:

> Any determination by an agency or court that results in the denial or removal of the immunity to the antitrust laws set forth in subsection (a) of this section shall not remove or alter the antitrust **[*504]** immunity for the period before the determination.

Defendants opine that if the Court were to find that they did not have immunity in this case, this section prevents the Government from prosecuting them for **[**18]** antitrust violations, because they had antitrust immunity for the period before the Court determined that immunity did not apply.

Defendants also assert that the alleged fraud violation is premised on the same conduct that allegedly constitutes the charged antitrust violation. Therefore, Defendants argue, if the Court finds that it has antitrust immunity, it must also dismiss the fraud count.

The Government argues that the Defendants story regarding the German agents conspiracy is outside the scope of the Criminal Information and the Plea Agreement, which all parties agreed to. Therefore, the Government maintains that the Court cannot consider any of these assertions by Defendants.

In addition, the Government contends that *Tucor* does not apply in this case. The Government argues that *Tucor* involved Filipino shippers who shipped only within the Philippines and thus concerned *only* the foreign inland segment of through transportation. The Government maintains that Defendants conduct constituted a conspiracy that not only focused on the foreign inland segment of the transportation - from military bases in Germany to the German port - but extended to the United States.

[19]** The Government argues that Defendants reading of the statute raises a perverse escape valve for many antitrust violators doing business overseas that Congress could not have intended. The Government opines that Defendants main argument - that even if they were involved in through transportation, their conduct did "[concern] the foreign inland segment of through transportation" - is over broad.

The Government also argues that the Shipping Act's 1706(a)(4) immunity does not apply to Defendants. The Government contends that the antitrust immunities provided for in Section 7 apply only to agreements "by or among ocean common carriers" and "marine terminal operators" as set forth in Section 4 of the Act. The Government submits that this case does not concern ocean common carriers or marine terminal operators. Therefore, the Government concludes, immunity is not applicable here.

The Government also opines that Defendants' argument for lenity is misguided. Specifically, the Government maintains that the Court should only adhere to the rule of lenity when a statute is so ambiguous that the Court can make no sensible interpretation of it. In addition, the Government argues that most statutes **[**20]** are ambiguous to a degree, and the Court would create bad precedent by finding this particular statute ambiguous.

In addition, the Government contends that the Court should fully read Section 1715 of the Shipping Act, which permits the FMC to exempt from filing, "by order or rule … any class of agreements between persons subject to this chapter or any specified activity of those persons from any requirement of this chapter if it finds that the exemption will not result in substantial reduction in competition or be detrimental to commerce." The Government opines that the agreement between Defendants referenced in the Criminal Information directly flies in the face of this rule because it fixes the market and is detrimental to both competition and commerce.

The Government also maintains that the exemption authority that Defendants cite, **[*505]** *46 C.F.R. §§ 531* and 536, only exempt Defendants from filing tariffs. It does not extend to any activity associated with the filing of that tariff - in this instance the antitrust violation. The Government contends that the FMC concluded that "existing tariff filings no longer served any regulatory purpose" because MTMC had its own competitive bidding **[**21]** program. 46 Fed. Reg. at 35092. The Government asserts that the FMC's reliance upon competitive bidding in its actions to exempt carriers such as Defendants from filing tariffs only proves that its intent was not to also exempt antitrust, anti-competitive behavior.

The Government also claims that Section 7(c) (1) immunity does not apply in this situation because Defendants never had any form of antitrust immunity. The Government further contends that Section 7(c) (1) applies to agreements that have been filed with the FMC, and have been effective under the Act or have otherwise been entitled to immunity. The Government asserts that Defendants agreements were never filed with the FMC, and thus, are not covered under this statutory provision. The Government further maintains that the legislative history states that the provisions of Section 7(c) (1) are to protect agreements filed in good faith and valid on their face, while a Court or other tribunal makes a determination as to whether immunity applies or not.

Finally, the Government opines that even if the Court grants antitrust immunity in this case, it can prosecute Defendants under the fraud statute. The Government **[**22]** postulates that where the same conduct violates two different criminal statutes, it can prosecute and punish under both statutes, as long as each statutory provision requires proof of a fact which the other does not.

DISCUSSION

Standard of Review

HN1[] A motion to dismiss tests whether the Criminal Information sufficiently charges an offense. *United States v. Brandon, 150 F. Supp. 2d 883, 884 (E.D. Va. 2001)*, aff'd, *298 F.3d 307 (4th Cir. 2002)* (citing *United States v. Sampson, 371 U.S. 75, 78-79, 9 L. Ed. 2d 136, 83 S. Ct. 173 (1962))*. A Criminal Information must contain "a plain, concise and definite written statement of the essential facts constituting the offense charged. *Id.* (citing *Fed. R. Civ. p: 7(c)(1))*.

HN2[] A Court's analysis must extend beyond determining whether the Criminal Information contains the core elements of the charged crime. *Brandon, 150 F. Supp. 2d at 885*. A Criminal Information should be dismissed if its factual allegations, even if proven beyond a reasonable doubt, fail to constitute the crimes charged. *Id.* If the "infirmity in the prosecution is essentially one of law," the Court may, on a motion **[**23]** to dismiss, decide whether the Criminal Information charges a crime. *United States v. Solomon, 266 F. Supp. 2d 1367, 1373 (M.D. Fla. 2003)*.

ANALYSIS

A) Defendants Version of the Alleged Conspiracy

The Court holds that it cannot consider in its analysis of this case the additional facts that Defendants supply, concerning an initial price-fixing agreement among German agents. This agreement was not within the Statement of Facts. All of the parties, Gosselin, Pasha, and the Government, have agreed that the Statement of Facts and the Criminal Information form the entire factual record for purposes of the Defendants' Motions to Dismiss. *See* Plea Agreement P 3.

HN3[] **[*506]** Ordinarily, in deciding a motion to dismiss, the "indictment must be tested solely on the basis of the allegations made on its face, and such allegations are to be taken as true." *United States v. Hall, 20 F.3d 1084, 1087 (10th Cir. 1994)*; *accord* *Boyce Motor Lines v. United States, 342 U.S. 337, 343 n.16, 96 L. Ed. 367, 72 S. Ct. 329 (1952)*.

In this case before the Court, the parties have agreed upon a Statement of Facts. Defendants have, in their pleadings, suggested a number **[**24]** of facts involving another agreement with German agents that influenced their actions. These facts are outside the factual record and this Court cannot consider them in its analysis. *See also* *United States v. Critzer, 951 F.2d 306, 307 (11th Cir. 1992)*.

B. 1706(a)(4) Immunity Under the Shipping Act and Lenity

Even without considering the additional facts that Defendants supply in their Motions to Dismiss, the Court holds that Section 1706(a)(4) of the Shipping Act gives antitrust immunity to the Defendants. In the alternative, the statute is so ambiguous, that the rule of lenity mandates that the Court construe the statute in favor of Defendants.

HN4[] In interpreting a statute, the Court must first begin with the text. "The starting point for [the] interpretation of a statute is always its language." *Community for Creative Non-Violence v. Reid, 490 U.S. 730, 739, 104 L. Ed. 2d 811, 109 S. Ct. 2166 (1989)*. "Courts must presume that a legislature says in a statute what it means and means in a statute what it says there." *Connecticut Nat. Bank v. Germain, 503 U.S. 249, 253-254, 117 L. Ed. 2d 391, 112 S. Ct. 1146 (1992)*. "In analyzing a statute, we begin by examining **[**25]** the text, not by psychoanalyzing those who enacted it." *Carter v. United States, 530 U.S. 255, 271, 147 L. Ed. 2d 203, 120 S. Ct. 2159 (2000)* (Thomas, J.) (citing *Estate of Cowart v. Nicklos Drilling Co., 505 U.S. 469, 475, 120 L. Ed. 2d 379, 112 S. Ct. 2589 (1992))* and (quoting *Bank One Chicago, N.A. v. Midwest Bank & Trust Co., 516 U.S. 264, 279, 133 L. Ed. 2d 635, 116 S. Ct. 637 (1996)* (Scalia, J., concurring in part and concurring in judgment)). Neither the Supreme Court nor any court in this judicial circuit, has interpreted the sections of the Shipping Act at issue here.

HN5[] The Supreme Court commonly interprets statutory terms according to their common meaning. *See generally* William N. Eskridge, Jr., et al., *Legislation and Statutory Interpretation* 253 (2000) (discussing ordinary meaning canons of statutory construction). If the plain language does not settle the question, then the Court looks to other sources, such as the legislative history, to decipher the meaning of the ambiguous language. In a criminal case, ambiguous language must be interpreted in defendant's favor under the rule of lenity. *See* *Bifulco v. United*

States, 447 U.S. 381, 387, 65 L. Ed. 2d 205, 100 S. Ct. 2247 (1980); **[**26]** United States v. Plaza Health Laboratories, Inc., 3 F.3d 643, 649 (2d Cir. 1993).

Examining the plain meaning of the statute, Section 1706(a)(4) of the Shipping Act states:

> ***HN6***[] The antitrust laws do not apply to -
>
> (4) any agreement or activity concerning the foreign inland segment of through transportation that is part of transportation provided in a United States import or export trade.

Unfortunately, "concerning" is not defined within the Shipping Act. However, ***HN7***[] "[a] fundamental canon of statutory construction is that, unless otherwise defined, words will be interpreted as taking their ordinary, contemporary, common meaning." **[*507]** *Perrin v. United States, 444 U.S. 37, 42, 62 L. Ed. 2d 199, 100 S. Ct. 311 (1979)*. The common definition of concerning, which Defendants cite, is "to relate to; to be about; to bear on." Merriam-Webster Online Dictionary, available at *http://www.merriam-webster.com* (last visited August 1, 2004). A "foreign inland segment" is designed as the foreign non-ocean part of transportation. 46 U.S.C. app. § 1702 (12). ***HN8***[] "Through transportation" means continuous transportation between origin and destination **[**27]** for which a single rate is charged and which is performed by one of more carriers between the United States and a foreign port. 46 U.S.C. app. § 1702 (24) (2003).

Applying the plain meaning of the statute, the Statement of Facts is clear that Defendants' activity did "concern" the "foreign inland segment" of the through transportation. For example, Defendants provided local agent service in Germany. Criminal Information at P 3. Local German agents provided services in Germany. *Id.* at P 10. Defendants arranged for local German agent services, European port agent services, and ocean transport. *Id.* at P 12.

In addition, one other court, although not the Supreme Court and not a court within the Fourth Circuit, has interpreted this issue on a set of facts somewhat similar to those now before the Court. *United States v. Tucor Int'l, Inc., 35 F. Supp. 2d 1172 (N.D. Cal. 1998)*, *aff'd,* *189 F.3d 834 (9th Cir. 1999)*, remains the only judicial interpretation of the Shipping Act's antitrust exemption as applied to shipping household goods for Government personnel. In *Tucor,* the defendants transported military household goods **[**28]** in the Philippines. In that case, the Government charged the defendant with agreeing to eliminate the low prices bid by freight forwarders to the Government and to cause freight forwarders to cancel their low rates. The indictment at issue in *Tucor* charged that defendants "caused U.S. freight forwarders to cancel their low rates filed with the U.S. for the transportation of military shipments of household goods between the Philippines and the United States." *Tucor* Indictment P 4(c).

After reviewing the structure of the Shipping Act, the *Tucor* court concluded that Section 1706(a)(4) immunity "means what it says." *Tucor, 35 F. Supp. 2d at 1180*, and held that the antitrust laws do not apply to an agreement or activity to raise prices or boycott freight forwarders that *concerns* the foreign inland segment of through transportation.

The Court also reviewed the legislative history of the Act for any evidence of Congressional intent that might be contrary to the plain language of the statute. The *Tucor* court found none. *See* *id. at 1181-82*. Specifically, the *Tucor* court held

> "Most notably, there is no discussion in the 98th **[**29]** Congress of the scope of the foreign inland segment immunity. Accordingly, the Court is left to draw inferences from earlier legislative history on previous unenacted versions of the bill. Certainly these inferences, even if on balance they favored the government's position, which they do not, would be insufficient to overcome the plain meaning of the Act." *Id. at 1182*.

The Ninth Circuit unanimously affirmed the decision of the District Court. In particular, the court held that "section 1706(a)(4) clearly applies to any agreement - without limitation - concerning the foreign inland segment of through transportation." *United States v. Tucor Intern. Inc., 189 F.3d 834, 837 (9th Cir. 1999)*.

The Government argues that Defendants reliance on *Tucor* is unfounded. The Government argues that *Tucor* dealt **[*508]** with Filipino movers who moved items internally within the Philippines. The Government contends that because Defendants' alleged conspiracy involved contact with carriers and contacts with the United States, the holding in *Tucor* is inapplicable here. The Government also argues that 1706(a)(4) immunity does not apply to Defendants because the antitrust **[**30]** immunities provided for in Section 7 apply only to agreements "by or among ocean common carriers" and "marine terminal operators" as set forth in Section 4 of the Act. Government argues that this case does not concern ocean common carriers or marine terminal operators - therefore immunity is not applicable here.

The Government's arguments that this exemption only applies to ocean common carriers and marine terminal operators carries little weight. This is the exact same argument that the *Tucor* court addressed. *Tucor* recognized that section 1706(a)(4) clearly, on its face, was not limited to ocean-common carriers. *Tucor, 35 F. Supp. 2d at 1178, 1180*. Because the statutory language was clear, the court concluded that legislative history was necessary only "to determine whether there [was a] clearly expressed legislative intent that is contrary to the plain language." *Id. at 1181*. The court found that the Shipping Act's legislative history actually favored the defendants' position. *Id. at 1181-82*.

Under a basic reading of the statute, Defendants' actions do "concern" the foreign inland segment of through transportation and **[**31]** should be exempted. The case is somewhat similar to the facts in *Tucor.* In *Tucor,* the defendants transported military household goods in the Philippines, and the Government indicted them on violations of the Sherman Act, charging a price fixing conspiracy that affected the United States. The difference between*Tucor* and this case is that in *Tucor,* the Defendants' actions stopped at the edge of the Philippines. The *Tucor* defendants only moved goods within the country itself. In this case, Defendants' respective companies are involved in all aspects of the move - both the foreign inland segment as well as the entire trip. However, a basic reading of the statute concludes that Defendants' business "concerns" the foreign inland segment.

Even assuming *arguendo,* that Defendants were not immune from the antitrust laws pursuant to Section 1706(a)(4) of the Shipping Act, the rule of lenity mandates that the Court construe the statute in favor of the Defendants. *See United States v. Plaza Health Laboratories, Inc., 3 F.3d 643, 649 (2d Cir. 1993)* (holding that the court must decide ambiguities in the statute in the defendants favor).

The Court finds **[**32]** that this statute is clear. Defendants' behavior did concern a foreign inland segment of through transportation. However, the Court does acknowledge that different definitions of "concern" exist. This Court uses the common definition of concern, which means "to relate to; to be about; to bear on." Merriam-Webster Online Dictionary, available at *http://www.merriam-webster.com* (last visited August 1, 2004); *see also Perrin v. United States, 444 U.S. 37, 42, 62 L. Ed. 2d 199, 100 S. Ct. 311 (1979)*.

The Government could argue that Congress's intent was a heightened definition of the word "concern" - such that in order to enjoy antitrust immunity Defendants' conduct would have needed to be exclusively - or significantly - relating to the foreign inland segment of through transportation. There is no indication in the legislative history that Congress meant this. In fact, there is no legislative discussion regarding the scope of the foreign inland segment immunity. *See Tucor, 35* ***[*509]*** *F. Supp. 2d at 1182*. However, this ambiguity, to the extent it even exists, only favors the Defendants.

Although the Government is correct in pointing out that all statutes, to an extent, are **[**33]** ambiguous, *see Muscarello v. United States, 524 U.S. 125, 138, 141 L. Ed. 2d 111, 118 S. Ct. 1911 (1998)*, the rule of lenity applies only if "after seizing everything from which aid can be derived … we can make 'no more than a guess as to what Congress intended." *Id.* This is the case here. Congress failed to define what "concerning" means. Specifically, whether "concerning" should be given a broad or narrow definition. This Court uses the common definition of the word. There is no doubt that *Tucor* held that any conduct dealing with the foreign inland segment of through transportation is immune under the Shipping Act. Based upon this holding, it is not unreasonable for the Court to conclude that Defendants conducted their business in accordance with the Ninth Circuit's holding. Therefore, to the extent that an ambiguity exists in the immunity clause under Section 1706(a)(4) of the Shipping Act, this Court must construe it in favor of the Defendants.

C. Shipping Act Immunization Under Section 1706(a)(2)

The Court holds that independent of the antitrust immunity Defendants enjoy pursuant to a plain reading of Section 1706(a)(4) of the Shipping Act, Defendants shipping **[**34]** activity involving military household goods is exempt from the Federal Maritime Commission's tariff filing and publication requirements, and thus is immunized from antitrust scrutiny under Section 1706(a)(2) of the Shipping Act.

Once again, the Court's starting point in analyzing this statute is with its plain language. *See* *Community for Creative Non-Violence, 490 U.S. at 739*. Section 1706(a)(2) of the Shipping Act provides that ***HN9***[] the antitrust laws do not apply to:

> any activity or agreement within the scope of this chapter, whether permitted under or prohibited by this chapter, undertaken or entered into with a reasonable basis to conclude that (A) it is pursuant to an agreement on file with the Commission and in effect when the activity took place, or (B) it is exempt under section 1715 of this title from any filing or publication requirement of this chapter.

Subsection (a)(2)(A) is inapplicable to this case because Defendants' agreement is not on file with the Federal Maritime Commission. Within the scope of the chapter is Section 1707 of the Shipping Act, which requires common carriers to publish tariffs. [2] However, subsection (a)(2)(B) references Section **[**35]** 1715 of the Shipping Act, ***HN10***[] which empowers the Federal Maritime Commission to exempt any class of agreements or any specified activity from application of the tariff.

HN11[] The Federal Maritime Commission, in rules entitled "Carrier Automated Tariffs," exempts used military household goods transported by ocean transportation intermediaries from publishing a tariff. Defendants also fall within the definition of an ocean transportation intermediary. 46 U.S.C. app. § 1702(17). The exemption states:

> (c) ***HN12***[] The following cargo types are not subject to the requirements of this part [automated tariffs]: …
>
> **[*510]** (3) *Used military household goods.* Transportation of used military household goods and personal effects by ocean transportation intermediaries.

[36]**

46 C.F.R. § 520.13(c)(3) (2003) (emphasis in original)

The Court holds that Defendants have a "reasonable basis to conclude," based upon a reading of the above statutes, that they are immune from the antitrust laws because the publication exemption is explicit.

The Government argues two major points against this theory, both of which the Court finds unpersuasive. First, the Government argues that Section 1706(a)(2) immunizes only agreements "within the scope of this chapter." In turn, the Government contends that Section 4 of the Shipping Act "makes clear that the only agreements within the scope of this chapter are agreements among ocean carriers or marine terminal operators." Mem. of the United States in Opp. to Gosselin World Wide Moving N.V.'s and the Pasha Group's Mots. to Dismiss the Criminal Information at 22. The Government contends that neither Defendant is an ocean carrier or a marine terminal operator. This argument carries no weight, and is simply a rehash of the Government's argument before the District Court in Tucor.

Section 4 of the Shipping Act, entitled "Agreements Within Scope of Act," states that the Shipping Act applies to certain agreements "by or among **[**37]** ocean common carriers," and "among marine terminal operators and one

---

[2] A common carrier is defined in the Shipping Act as including non-vessel operating common carriers, which both Gosselin and Pasha are. *See* Statement of Facts P 9; *see also* 46 U.S.C. §§ 1702(6) and(17)(B).

or more ocean common carriers." See 46 U.S.C. app. § 1702(a) (ocean common carriers), § 1702(b) (marine terminal operators). The Government's argument, in essence, is that this language means that the Shipping Act applies to certain agreements among only ocean common carriers and marine terminal operators.

As in Tucor, the Court finds that the Government has misinterpreted the "gap" filled by Section 1704(a) of the Shipping Act. Section1704(a) ***HN13***[] exempts Federal Maritime Commission from filing "agreements related to transportation to be performed within or between foreign countries ..." See 46 U.S.C. app. § 1704(a). As in Tucor, "the government's argument ignores the fundamental distinction between 'transportation to be performed within or between foreign countries' and 'the inland segment of through transportation.'" *Tucor, 35 F. Supp. 2d at 1180*. ***HN14***[] The Shipping Act cannot apply, as the Government argues, to certain agreements among *only* ocean common carriers and marine terminal operators because under such a theory, the statute under 1704(a) would **[**38]** be illogical. Ocean common carriers and marine terminal operators do not operate *within a* foreign country. It is obvious that this language deals with internal transportation, which would preclude ocean common carriers and marine terminal operators.

The Government also argues that Defendants' agreement is not exempted by Section 1715 of the Shipping Act. Section 1715 ***HN15***[] permits the Federal Maritime Commission to exempt from filing, "by order or rule," "any class of agreements between persons subject to this chapter if it finds that the exemption will not result in substantial reduction in competition or be detrimental to commerce." However, again the Government misinterprets the statute. The statute does not say that the only way Defendants could seek a tariff exemption is through an order or rule by the Federal Maritime Commission. The plain language of the statute states that the Federal Maritime Commission may issue this order or rule exempting a party from the tariff requirement. This Section does not reference Section 1706(a)(2) of the Shipping Act, which Defendants rely upon.

[*511] Based upon the above statutory and case law analysis, the Court holds that independent of antitrust **[**39]** immunity Defendants enjoy pursuant to a plain reading of Section 1706(a)(4) of the Shipping Act, Defendants' shipping activity involving military household goods is exempt from the Federal Maritime Commission's tariff filing and publication requirements, and thus is immunized from antitrust scrutiny under Section 1706(a)(2) of the Shipping Act.

D. Immunity Under Shipping Act Section 1706(c)(1)

The Court holds that under Section 7(c)(1) of the Shipping Act (codified at 46 U.S.C. app. § 1706(c)(1)), Defendants are entitled to retroactive immunity under the Shipping Act. However, this argument is moot because the Court finds that Defendants already have immunity under a plain reading of Section 1706(a)(4), and alternatively under the statutory and common law rules of lenity.

As described above, Defendants have immunity from the antitrust laws. However, even assuming *arguendo,* that Defendants did not have immunity under the antitrust laws, Section 1706(c)(1) would grant Defendants retroactive immunity. Section 1706(c)(1) reads:

> Any determination by an agency or court that results in the denial or removal of the immunity to the antitrust **[**40]** laws set forth in subsection (a) of this section shall not remove or alter the antitrust immunity for the period before the determination.

Once again, the Court's starting point in analyzing this statute is with its plain language. See *Community for Creative Non-Violence, 490 U.S. at 739*. In examining the plain language of this statute, it is apparent that the purpose of this section is to not penalize parties who in good faith believe that they have antitrust immunity, if a Court takes that immunity away.

The Court finds that, based upon the Ninth Circuit's decision in *Tucor,* that the Defendants acted in good faith in considering their actions immune from the antitrust laws. Based upon the Ninth Circuit's holding in *Tucor,* the Defendants could have reasonably concluded that they had antitrust immunity in their activities abroad. This statute expressly prohibits the retroactive application of the removal or denial of immunity under the statute. *Tucor, 35 F. Supp. 2d at 1181-82*. Based upon these factors, Defendants would enjoy retroactive immunity.

E. Independent Basis for Fraud

The Court holds that the Government states a basis **[**41]** for fraud against Defendants, independent of the Sherman Act violations. "The applicable rule is that ***HN16***[] where the same act or transaction constitutes a violation of two distinct statutory provisions, the test to be applied to determine whether there are two offenses or only one, is whether each provision requires proof of a fact which the other does not." *Blockburger v. United States, 284 U.S. 299, 304, 76 L. Ed. 306, 52 S. Ct. 180 (1932)*. In *Whalen v. United States, 445 U.S. 684, 691, 63 L. Ed. 2d 715, 100 S. Ct. 1432 (1980)*, the Supreme Court held that courts are to apply this "rule of statutory construction," described in *Blockburger,* "to determine whether Congress has in a given situation provided that two statutory offenses may be punished cumulatively." *Id.*

In this case, the Sherman Act count and the fraud count both require proof of a fact that the other does not. ***HN17***[] The Sherman Act count requires that the Government show that Defendants had an effect on interstate or foreign commerce **[*512]** but not an effect on the Government. The fraud count, under *18 U.S.C. § 371*, requires that the Government show that Defendants defrauded the Government. *Section 371* **[**42]** does not require that the Government show that Defendants alleged fraud had an effect on commerce. *See generally* *United States v. Ashley Transfer & Storage Co., 858 F.2d 221, 223-24 (4th Cir. 1988)*. The Court has held that Defendants' conduct enjoys antitrust immunity under the Sherman Act. However, applying the *Blockburger* test, the Court concludes that Congress has provided that the Government can prosecute both the Sherman Act count and the fraud count cumulatively. The fact that the Court has found Defendants' conduct under the Sherman Act immune is irrelevant. The Government must, under the fraud count, prove that Defendants defrauded the United States. This is conduct that the Government need not prove under the Sherman Act count.

Defendants argue that conduct that is immune under one law cannot properly serve as the basis of a legal violation under another statute. Defendants contend that this principle is articulated in *Bath Petroleum Storage, Inc. v. Market Hub Partners, L.P., 129 F. Supp. 2d 578 (W.D.N.Y.)*, *aff'd, 229 F.3d 1135 (2d Cir. 2000)*, *cert. denied, 532 U.S. 1037, 149 L. Ed. 2d 1001, 121 S. Ct. 1998 (2001)*. The **[**43]** Court disagrees. *Bath Petroleum* was a civil action involving a claim against competitors for making false statements to federal and state administrative agencies that caused plaintiff's business venture to fail. The plaintiff in this case sued the defendants for violating*Section 2 of the Sherman Act* and the *Racketeer Influenced and Corrupt Organizations Act ("RICO").* The *Bath Petroleum* court dismissed the Sherman Act claim based on the Noerr-Pennington doctrine, which immunizes conduct from the antitrust laws that is directed toward influencing governmental action, such as lobbying or litigation. Defendants argue that since the RICO claim was based upon the same allegedly false statement immunized from antitrust liability by the Noerr-Pennington doctrine, the court also barred the RICO claim. This is not the holding of *Bath Petroleum.* In *Bath Petroleum,* that court held that the Noerr-Pennington immunity applies equally to RICO claims. *See also* *International Broth. of Teamsters v. Philip Morris, 196 F.3d 818, 825 (7th Cir. 1999)*. In other words, although the Noerr-Pennington doctrine originated in ***antitrust law***, its rationale is equally applicable to **[**44]** RICO suits. *Id. at 826*.

Defendants also rely on the Tenth Circuit's holding in *United States v. Beachner Constr. Co., 729 F.2d 1278, 1284 (10th Cir. 1984)*. In *Beachner,* the court held that the *double jeopardy clause* barred a second trial of mail fraud and antitrust claims against a defendant where the retrial involved the same conspiracy for which the defendant had already been acquitted. *Beachner* did not suggest that the Government would have been foreclosed from prosecuting defendants for mail fraud at the first trial if the antitrust charges had been dismissed. Therefore, the Court holds that the Government states a basis for fraud against Defendants, pursuant to *18 U.S.C. § 371*, that is independent of the Sherman Act count.

CONCLUSION

In conclusion, Defendant Gosselin's Motion to Dismiss the Information for Failure to State an Offense is partially granted, and Defendant Pasha's Motion to Dismiss Criminal Information is also partially granted.

First, the Court holds that under a plain reading of Section 1706(a)(4) of the Shipping Act, Defendants' activity does "concern" **[*513]** the foreign inland segment of through **[**45]** transportation. As such, Defendants' alleged conduct is immune from the antitrust laws pursuant to the Shipping Act's antitrust immunity provisions.

Second, even assuming *arguendo,* that Defendants' alleged conduct was not immune from the antitrust laws under a plain reading of Section 1706(a)(4), the Court holds that as a matter of law, the statutory and common law rules of lenity mandate partial dismissal of the pending criminal information.

Third, the Court holds that independent of Defendants' antitrust immunity pursuant to a plain reading of Section 1706(a)(4) of the Shipping Act, Defendants' shipping activity involving military household goods is exempt from the Federal Maritime Commission's tariff filing and publication requirements, and thus is immunized from antitrust scrutiny under Section 1706(a)(2) of the Shipping Act.

Fourth, the Court holds that under Section 7(c)(1) of the Shipping Act (codified at 46 U.S.C. app. § 1706(c)(1)), Defendants are entitled to retroactive immunity under the Shipping Act. However, this argument is moot because the Court finds that Defendants have immunity under a plain reading of Section 1706(a)(4), and alternatively **[**46]** under the statutory and common law rules of lenity.

Fifth, the Court holds that the Government states a basis for fraud against Defendants, independent of the Sherman Act violations. Where the same conduct violates two different criminal statutes, the Government can prosecute and punish it under both statutes, as long as each statutory provision requires proof of a fact which the other does not.

For the foregoing reasons, it is hereby ORDERED that Defendant Gosselin World Wide Moving N.V.'s Motion to Dismiss the Information for Failure to State an Offense is PARTIALLY GRANTED.

It is FURTHER ORDERED that Defendant Pasha Group Inc.'s Motion to Dismiss Criminal Information is PARTIALLY GRANTED.

The Court DISMISSES Count One of the Criminal Information.

The Clerk is directed to forward a copy of this Order to counsel.

Entered this 16th day of August, 2004.

Constitutional Law > ... > Case or Controversy > Standing > General Overview

Civil Procedure > Preliminary Considerations > Justiciability > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

HN3[] **Standing, Burdens of Proof**

A party invoking federal jurisdiction has the burden of proof and persuasion to satisfy the constitutional requirements of U.S. Const. art. III standing.

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN4[] **Subject Matter Jurisdiction, Jurisdiction Over Actions**

A court must grant a motion to dismiss for lack of subject matter jurisdiction when the plaintiff can prove no set of facts in support of the claim which would entitle the plaintiff to relief. Although the court is required to assume nonjurisdictional factual allegations to be true, the burden of establishing subject matter jurisdiction rests with the plaintiff.

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN5[] **Subject Matter Jurisdiction, Jurisdiction Over Actions**

When deciding a motion to dismiss for lack of subject matter jurisdiction, pursuant to U.S. Ct. Fed. Cl. R. 12(b)(1), a court may examine relevant evidence in order to resolve any factual disputes.

Civil Procedure > ... > Justiciability > Standing > General Overview

Constitutional Law > ... > Case or Controversy > Standing > General Overview

Public Contracts Law > Dispute Resolution > Bid Protests

HN6[] **Justiciability, Standing**

The United States Court of Appeals for the Federal Circuit holds that, in bid protest cases, because the question of prejudice goes directly to the question of standing, the prejudice issue must be reached before addressing the merits. To establish prejudice, a plaintiff must show that, absent the error, there was a substantial chance it would have received the contract award.

Public Contracts Law > Dispute Resolution > Bid Protests

HN7[] **Dispute Resolution, Bid Protests**

When a party contends that the procurement procedure in a sole-source case involved a violation of a statute, regulation, or procedure, it must establish prejudice by showing that it would have had a substantial chance of receiving the award.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Civil Procedure > ... > Summary Judgment > Motions for Summary Judgment > General Overview

Constitutional Law > ... > Case or Controversy > Standing > General Overview

HN9[] Entitlement as Matter of Law, Appropriateness

Since standing inherently concerns facts relevant to the particulars of a case, it is more appropriately resolved at the summary judgment stage. A plaintiff must set forth by affidavit or other evidence specific facts, *Fed. R. Civ. P. 56(e)*, which for purposes of the summary judgment motion will be taken to be true. When the suit is one challenging the legality of government action, the nature and extent of facts must be averred (at the summary judgment stage) . . . in order to establish standing depends considerably upon whether the plaintiff is an object of the action at issue. If so, there is ordinarily little question that the action has caused him injury, and that a judgment requiring the action will redress it. When, however, the plaintiff's asserted injury arises from the government's allegedly unlawful regulation of someone else, much more is needed. In that circumstance, causation and redressability ordinarily hinge on the response of the regulated third party to the government action. Thus, when the plaintiff is not the object of the government action, standing is not precluded, but is ordinarily substantially more difficult to establish.

Business & Corporate Compliance > ... > Environmental Law > Solid Wastes > Resource Recovery & Recycling

Environmental Law > Solid Wastes > Disposal Standards

Environmental Law > Hazardous Wastes & Toxic Substances > Resource Conservation & Recovery Act > General Overview

Environmental Law > Solid Wastes > Permits > General Overview

HN10[] Solid Wastes, Resource Recovery & Recycling

Under the Resource Conservation and Recovery Act of 1976, specifically *42 U.S.C.S. § 6961*, federal agencies must comply with local solid waste management regulations. As such, exclusive franchise agreements, certificates, or authority granted by a state, county, or municipality to an entity prevents federal agencies from competing the contract requirements.

Business & Corporate Compliance > ... > Transportation Law > Carrier Duties & Liabilities > Hazardous Materials

Environmental Law > Solid Wastes > Disposal Standards

Environmental Law > Solid Wastes > Disposal Standards

Environmental Law > Hazardous Wastes & Toxic Substances > Resource Conservation & Recovery Act > General Overview

Environmental Law > Solid Wastes > Permits > General Overview

HN12[] **Solid Wastes, Resource Recovery & Recycling**

The Resource Conservation and Recovery Act of 1976 requires that all federal agencies engaged in any activity resulting, or which may result, in the disposal or management of solid waste or hazardous waste shall be subject to, and comply with, all federal, state, interstate, and local requirements, both substantiative and procedural, including any requirement for permits. *42 U.S.C.S. § 6961(a)*.

Environmental Law > Solid Wastes > Permits > General Overview

HN13[] **Solid Wastes, Permits**

See *Wash. Rev. Code § 81.77.040* (1996).

Environmental Law > Solid Wastes > Disposal Standards

Public Contracts Law > Bids & Formation > General Overview

Real Property Law > Construction Law > General Overview

Public Contracts Law > Bids & Formation > Offer & Acceptance > Acceptances & Awards

Public Contracts Law > Bids & Formation > Sealed Bids > General Overview

Public Contracts Law > Bids & Formation > Sealed Bids > Invitations for Bids

Public Contracts Law > Costs & Prices > General Overview

HN14[] **Solid Wastes, Disposal Standards**

The Competition in Contracting Act, specifically *10 U.S.C.S. § 2305(b)(3)*, requires award of a federal contract to the responsible bidder whose bid conforms to the solicitation and is most advantageous to the United States, considering only price and other price-related factors included in the solicitation.

Environmental Law > Solid Wastes > Permits > General Overview

HN15[] **Solid Wastes, Permits**

The legal duties imposed by *Wash. Rev. Code § 81.77.040* apply exclusively to solid waste contractors and require only that a certificate of convenience and necessity be obtained and in hand at the time solid waste hauling commences operation.

Civil Procedure > ... > Justiciability > Standing > General Overview

Constitutional Law > ... > Case or Controversy > Standing > General Overview

Public Contracts Law > Dispute Resolution > Bid Protests

HN16[] **Justiciability, Standing**

The United States Court of Appeals for the Federal Circuit holds that if a bid protest is allowed because of an arbitrary and capricious responsibility determination by the contracting officer, the government is obligated to rebid the contract, and the challenging bidder can compete for the contract once again. Under these circumstances, the challenging bidder has a substantial chance of receiving the award and an economic interest and has standing to challenge the award.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Governments > Federal Government > Claims By & Against

Antitrust & Trade Law > Exemptions & Immunities > General Overview

Governments > State & Territorial Governments > Legislatures

HN17[] **Exemptions & Immunities, Parker State Action Doctrine**

The United States Supreme Court holds that a statute enacted by a state legislature is exempt from federal antitrust scrutiny under the state action doctrine, based on principles of federalism and state sovereignty. However, a two-part test clarifies that state action antitrust immunity is not absolute. In determining the applicability of the doctrine the state regulation must be clearly articulated and affirmatively expressed as state policy; second, the policy must be actively supervised by the state.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN18[] **Exemptions & Immunities, Parker State Action Doctrine**

The purpose of the active supervision inquiry in apply the state action doctrine is not to determine whether a state has met some normative standard, such as efficiency, in its regulatory practices. Its purpose is to determine whether the state has exercised sufficient independent judgment and control so that the details of the rates or prices have been established as a product of deliberate state intervention, not simply by agreement among private parties. Much as in causation inquiries, the analysis asks whether the state has played a substantial role in determining the specifics of the economic policy. The question is not how well state regulation works but whether the anticompetitive scheme is the state's own.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Environmental Law > Solid Wastes > Permits > General Overview

Business & Corporate Compliance > ... > Transportation Law > Carrier Duties & Liabilities > Hazardous Materials

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > General Overview

HN19[] **Public Enforcement, State Civil Actions**

Washington's solid waste collection law, *Wash. Rev. Code § 81.77.040*, creates a regulated monopoly, in which only one certificate holder can serve a given territory, unless the existing carrier will not serve to the satisfaction of the Washington Utilities and Transportation Commission.

Administrative Law > Agency Adjudication > Alternative Dispute Resolution

Governments > Courts > Courts of Claims

Opinion

[*549] MEMORANDUM OPINION REGARDING PLAINTIFF'S STANDING AND ORDER TO SHOW CAUSE

BRADEN, *Judge*

This post-award bid protest case presents what appears to be a simple jurisdictional issue:

> Whether plaintiff has standing to protest the award of a sole-source contract by the Air Force, even though the plaintiff did not have a certificate of convenience and necessity required by state law to perform the contract?

The more important and controlling questions, however, are:

> Whether the Air Force knowingly misconstrued and misapplied both federal and state statutes to avoid compliance with the congressionally established historically underutilized business zones program; and
>
> Whether the state law at issue has been utilized in violation of federal **[**2]** antitrust laws?

The contract at issue concerns a $ [] award that runs from April 1, 2004 - September 30, 2004, as well as approximately $ [] for four additional option years. *See* AR at 852, 856. The resolution of this case, however, has far ranging competitive significance, which one counsel for defendant-intervenor Waste Management of Washington, Inc. ("Waste Management-Washington"), [1] accurately has identified as whether:

> **[*550]** ***Any federal facility*** located in a territory for which Waste Management holds an *exclusive*. . . *franchise right* is ***required* to use** [**Waste Management**] for solid waste collection services.

AR at 486 (emphasis added).

[3] RELEVANT FACTS AND PROCEDURAL BACKGROUND** [2]

---

[1] Waste Management, Inc. is a Delaware corporation with its principal office in Houston, Texas. *See United States and State of Florida* v. *Waste Management, Inc.*, No. 1:03CV02076 (D.D.C. Oct. 14, 2003) (complaint issued under *15 U.S.C. §§ 18*, *25* for injunctive relief to block the proposed acquisition of Allied Waste Industries, Inc. by Waste Management, Inc.) at P9. Waste Management, Inc. is the nation's largest waste hauling company, providing waste collection and disposal services throughout the United States. *Id.* In 2002, Waste Management, Inc. reported total revenues of approximately $ 11.1 billion. *Id.* Waste Management, Inc. is a holding company that conducts all of its operations through subsidiaries. *See* 2003 Waste Management, Inc. Annual Report at 32 (financial information at 1). Waste Management-Washington is one of those subsidiaries organized in 1999 under the laws of the State of Delaware.

It is a matter of public record that the Antitrust Division of the Department of Justice has filed four complaints during the period February 15, 1996 to October 14, 2003 in federal district courts alleging that Waste Management-Washington's parent and affiliated corporations in other states have engaged in actions that violated federal ***antitrust law***, including monopolization in violation of the Sherman Act, *15 U.S.C. § 2*. In three of these actions, State Attorneys General also were plaintiffs. *See United States* v. *Waste Management of Georgia, Inc., d/b/a Waste Management of Savannah, and Waste Management of Louisiana, Inc., d/b/a Waste Management of Central Louisiana, and Waste Management, Inc.*, No. CV496-35 (S.D. Ga. Feb. 15, 1996) (complaint alleging monopolization in violation of Section 2 of the Sherman Act, *15 U.S.C. § 2*, in small containerized hauling services in the states of Georgia and Louisiana); *United States, State of New York, Commonwealth of Pennsylvania, and State of Florida* v. *Waste Management, Inc., Ocho Acquisition Corp., and Eastern Environmental Services, Inc*., No. 98CV1768-FB-MDG (E.D.N.Y. Nov. 17, 1998) (complaint alleging that the acquisition of Eastern Environmental Services Inc. will lessen competition substantially and tend to create a monopoly in violation of Section 7 of the Clayton Act, *15 U.S.C. § 7*, in municipal solid waste in the states of New York, Pennsylvania, and Florida); *United States and State of New Jersey* v. *Waste Management, Inc., and Allied Waste Industries, Inc*., No. 1:03CV01409 (D. D.C. June 27, 2003) (complaint alleging that the acquisition of Allied Waste Industries, Inc. will lessen competition substantially and tend to create a monopoly in violation of Section 7 of the Clayton Act, *15 U.S.C. § 7*, in small container commercial waste collection service in Pitkin County, Colorado; Garfield County, Colorado; Augusta, Georgia; Myrtle Beach, South Carolina; Morris County, New Jersey; and Bergen and Passaic Counties, New Jersey and municipal solid waste in Bergen and Passaic Counties, New Jersey, and Tulsa and Muskogee, Oklahoma); *United States and State of Florida* v. *Waste Management, Inc*., No. 1:03CV02076 (D.D.C. Oct. 14, 2003) (complaint alleging that the acquisition of Allied Waste Management Industries, Inc. will lessen competition substantially and tend to create a monopoly in violation of Section 7 of the Clayton Act, *15 U.S.C. § 7*, in small container commercial hauling in Broward County, Florida).

[2] The relevant facts recited herein are derived primarily from documents in the April 21, 2004 Administrative Record ("AR") which, at the request of the Government and concurrence of plaintiff, is subject to an April 19, 2004 protective order. Certain of

A. 2002 Proceedings Before The Small Business Administration Concerning The Department Of Air Force's Solicitation F45613-02-Q-A027.

On May 29, 2002, the Contracting Officer for the 92d Civil Engineer Squadron of the United States Air Force ("Air Force") issued Solicitation F45613-02-Q-A027 to procure recycling and solid waste **[**4]** management services for Fairchild Air Force Base in the State of Washington ("Fairchild AFB"). *See* AR at 1-18, 187. Solicitation F45613-02-Q-A027 was set-aside for companies that are located within historically underutilized business zones ("HUBZone"). *See* AR at 1-7; see *also* 15 U.S.C. § 632(p)(3). Although Blue Dot Energy Company, Inc. of Junction City, Kansas ("Blue Dot") was the incumbent and prime contractor on Contract No. F45613-01-D-A001, the Air Force decided not to renew the first option year, because it was not satisfied with Blue Dot's performance. *See* AR at 212-21, 234-35. Nevertheless, Blue Dot decided to bid on Solicitation F45613-02-QA027 . *See* AR at 150-77.

Blue Dot and [] other firms submitted bids on Solicitation F45613-02-Q-A027. *See* AR at 234-36. The Government claims that Blue Dot submitted a technically marginal proposal and therefore was excluded from being a viable bidder. *See* Gov't Mot. to Dismiss at 5 (citing AR at 411-12); *see also* 212-21, 234-35. On August 22, 2002, the Air Force informed Blue Dot that Olgoonik Logistics, L.L.C. ("Olgoonik") was awarded Contract No. F45613-02D-A001. *See* AR at **[**5]** 241, 303. Blue Dot filed a timely protest with the Small Business Administration ("SBA") challenging Olgoonik's status as a small business and as a qualified HUBZone business. *See* AR at 322-34. On September 26, 2002, the SBA ruled that Olgoonik was a HUBZone business, but agreed with Blue Dot that it was not a "small business," because it turns out that Olgoonik was affiliated with Waste Management-Washington. *See* AR at 329-32, 340. On November 22, 2002, the Air Force advised Blue Dot that the contract with Olgoonik would be terminated, however, Blue Dot would not be substituted as the awardee because its bid was "not 'number two' or the best value offeror, as their technical proposal and past performance ratings were only marginal." AR 411-12. On December 12, 2002, the Air Force terminated the contract with Olgoonik. *See* AR at 483-84, 511.

B. 2002-2004 Proceedings Before The General Accounting Office Concerning The Department Of Air Force's Solicitations 45613-03-Q-A027 And 45613-03-Q-A028 And Sole-Source Solicitation No. FA5613-03-Q-A068.

On November 18, 2002, Waste Management-Washington faxed the Air Force page one and page eighteen of an undated certificate **[**6]** of convenience and necessity, apparently issued by the Washington Utilities and Transportation Commission ("WUTC"), indicating that Waste Management-Washington had an exclusive license to collect solid waste in the Fairchild AFB area. *See* AR at 407-10. [3] Thereafter, the Air Force awarded Waste Management-Washington a "short-term" **[*551]** sole-source contract for the period March 1, 2003 - September 30, 2003. *See* AR at 565-66.

---

these documents, however, are necessary to explain the rationale of this memorandum opinion. Therefore, the court has issued herewith an order amending the April 19, 2004 protective order to place those documents on the public record. Herein, the court has deleted specific price information and any business information which legitimately is of a confidential nature.

[3] On December 14, 1999, Washington Waste Hauling & Recycling, Inc. of Kirkland, Washington was issued a certificate of convenience and necessity by the WUTC. *See* AR 489-510. This certification, however, "was obtained by transfer of Certificate No. G-140 from Waste Management of Seattle, Inc., d/b/a Waste Management of Ellensburg/Waste Management of Kennewick." *See* AR at 408, 489.

This appears to be the predecessor certificate of convenience and necessity issued to Waste Management-Washington, which also appears as well to apply to a number of other Waste Management-Washington related companies d/b/a: Washington Waste Hauling & Recycling Inc.; Recycle America; Rural Skagit Sanitation; Federal Way Disposal; Nick Raffo Garbage; R.S.T. Disposal; Tri-Star Disposal; Western Refuse; North Cascade Disposal; Stanwood Camano Disposal; Waste Management; Waste Management-Northwest; Waste Management-Rainier; Waste Management of Ellensburg; Waste Management of Greater Wenatchee; Waste Management of Kennewick; Waste Management of Seattle; Waste Management of Skagit County; Waste Management of Spokane; Waste Management of Yakima; Waste Management of Sno-King; Valley Garbage Service; and Olson's Sanitation Service. *See* AR at 408.

[7]** On December 2, 2002, Blue Dot filed a protest with the General Accounting Office ("GAO") challenging the Air Force's decision to cancel Solicitation 45613-03-Q-A027 and allow Olgoonik to continue to perform, rather than awarding the contract to Blue Dot. *See* AR at 414-23. On December 20, 2002, the Air Force requested that Blue Dot's protest be denied because Waste Management-Washington was the only company that possessed the certificate of convenience and necessity required under Washington state law to perform services required under the contract. *See* AR at 569-75. On February 13, 2003, the GAO dismissed Blue Dot's protest because the Air Force agreed to re-solicit the contract to HUBZone companies, rather than entering a sole-source contract with Waste Management-Washington. *See* AR at 679-80.

On March 13, 2003, the Air Force issued a pre-solicitation notice for HUBZone companies, but Waste Management filed a protest with the GAO. *See* AR at 688, 690-94. On May 27, 2003, GAO dismissed Waste Management-Washington's protest as premature because the solicitation had not been issued. *See* AR at 709-14. On June 19, 2003, the Air Force issued a pre-solicitation notice **[**8]** for a solid waste collection and disposal Contract No. F45613-03-Q-A028 and indicated that it was a HUBZone set-aside. *See* AR at 716-18; *see also* *48 C.F.R. § 19.1305(a)*. On July 23, 2003, the Air Force issued Solicitation F45613-03-Q-A028 for HUBZone qualified companies. *See* AR at 719-46. Again, Waste Management protested. *See* AR at 747-54. On August 6, 2003, the Air Force announced that it was taking "corrective action" by cancelling the pre-solicitation and suspending the due date. *See* AR at 756, 758. Waste Management-Washington then withdrew its protest. *See* AR at 759.

On September 22, 2003, the Air Force cancelled Solicitation No. F45613-03-Q-A028 and issued a pre-solicitation notice No. F45613-03-Q-A068 announcing that it intended to sole-source the solid waste collection and disposal services contract to Waste Management-Washington. *See* AR at 764-65. On December 2, 2003, the Air Force issued a "modification" to the pre-solicitation notice requiring that the awardee have a certificate of convenience and necessity issued pursuant to *Wash. Rev. Code § 81.77.040*. *See* AR at 772-73. On December 18, 2003, the **[**9]** Air Force awarded a sole-source solicitation to Waste Management-Washington. *See* AR 779-820. On December 29, 2003, Blue Dot filed a protest with GAO arguing that Solicitation F45613-03-Q-A068 was not awarded in compliance with the requirements of the HUBZone set-aside. *See* AR at 779-80, 829-35. On March 1, 2004, the GAO dismissed Blue Dot's protest as untimely. *See* AR at 846-48. [4] On March 24, 2004, Waste Management-Washington was awarded Contract No. FA4620-04-D-A2003, based on Solicitation F45613-03-Q-A068, to provide solid waste collection and disposal services for Fairchild AFB. *See* AR at 850. Waste Management-Washington commenced performance on April 1, 2004. *See* AR at 857, 884.

[10] C. Proceedings Before The United States Court Of Federal Claims.**

On April 12, 2004, Blue Dot filed a complaint in the United States Court of Federal **[*552]** Claims alleging a "violation of statute and regulation [and] arbitrary and capricious action by [a] contracting officer." Compl. (Count I). In this court, Blue Dot seeks: "preliminary and permanent injunctions enjoining the Air Force from awarding a sole-source contract to Waste Management, Inc.," *see* Compl. P1 (Prayer for Relief); and an "order that the Air Force award the contract to Blue Dot Energy Company," *see* Compl. P3 (Prayer for Relief), or an "order that the solicitation be re-opened and that the procurement be set-aside for HUBZone small business concerns only." *See* Compl. P4 (Prayer for Relief).

On April 20, 2003, Waste Management-Washington filed a motion to appear as defendant-intervenor in this case. On April 21, 2004 the Administrative Record was filed with the court. A telephone status conference was convened by the court on April 22, 2004, at which time the parties agreed to first address the issue of standing. During that conference, the court orally granted Waste Management's motion to intervene, **[**11]** which was confirmed by a written order on April 27, 2004.

---

[4] Blue Dot was required to protest Solicitation 45613-03-Q-A028 within 10 days after the basis of the protest was known or should have been known, *i.e.*, the date of the pre-solicitation notice issued on September 22, 2003. *See* AR at 848; *see also* *4 C.F.R. § 21.2 (a)(2) (2004)*.

On May 3, 2004, the defendant ("the Government") filed a motion to dismiss, pursuant to *RCFC 12(b)(1)*. On May 18, 2004, Waste Management-Washington filed a "supplement" to the Government's motion to dismiss. On May 27, 2004, Blue Dot filed a response. On June 14, 2004, the Government filed a reply. On July 1, 2004, Blue Dot filed a notice of supplemental filing. The Government filed a response on July 19, 2004. [5]

DISCUSSION

A. Jurisdiction.

HN1[] Pursuant to the *Tucker Act*, as amended by the Administrative Dispute Resolution Act of 1996, *Pub. L. No. 104-320 § 12, 110 Stat. 3870, 3874-75 (1996)*, the United States Court of Federal Claims has "jurisdiction **[**12]** to render judgment on an action by an interested party *objecting to a solicitation by a Federal agency* for bids or proposals for a proposed contract or to a proposed award . . . or any alleged violation of statute or regulation in connection with a procurement or a proposed procurement." *28 U.S.C. § 1491(b)(1)*; *see also Khan v. United States, 201 F.3d 1375, 1377 (Fed. Cir. 2000)* (requiring the plaintiff to identify and plead an independent contractual relationship, constitutional provision, federal statute, and/or executive agency regulation that provides a substantive right to money damages for the court to have jurisdiction).

The court has determined that Blue Dot's complaint properly alleges a claim over which the court has jurisdiction. *See* Compl. at PP4, 34-42.

B. The Requirements Of Article III Standing.

HN2[] The lower federal courts have been advised to "decide standing questions at the outset of a case. That order of decision (first jurisdiction then the merits) helps better to restrict the use of the federal courts to those adversarial disputes that Article III defines as the federal judiciary's business." *Steel Co. v. Citizens for a Better Env't, 523 U.S. 83, 111, 140 L. Ed. 2d 210, 118 S. Ct. 1003 (1998)* **[**13]** (Breyer, J. concurring). ***HN3***[] As the party invoking federal jurisdiction, the plaintiff has the burden of proof and persuasion to satisfy the constitutional requirements of Article III standing. *See FW/PBS, Inc. v. Dallas, 493 U.S. 215, 231, 107 L. Ed. 2d 603, 110 S. Ct. 596 (1990)*.

C. Relevant Standards Of Review.

1. *RCFC 12(b)(1)*-Motion To Dismiss.

HN4[] The court must grant a motion to dismiss for lack of subject matter jurisdiction when plaintiff "can prove no set of facts in support of [the] claim which would entitle [plaintiff] to relief." *Conley v. Gibson, 355 U.S. 41, 45-46, 2 L. Ed. 2d 80, 78 S. Ct. 99 (1957)*. Although the court is required to assume nonjurisdictional **[*553]** factual allegations to be true, the burden of establishing subject matter jurisdiction rests with plaintiff. *See McNutt v. Gen. Motors Acceptance Corp., 298 U.S. 178, 189, 80 L. Ed. 1135, 56 S. Ct. 780 (1936)*. ***HN5***[] When deciding a motion to dismiss for lack of subject matter jurisdiction, pursuant to *RCFC 12(b)(1)*, the court may examine relevant evidence in order to resolve any factual disputes. *See, e.g., Moyer v. United States, 190 F.3d 1314, 1318 (Fed. Cir. 1999)*; *Cedars-Sinai Med. Ctr. v. Watkins, 11 F.3d 1573, 1584 (Fed. Cir. 1993),* **[**14]** *cert. denied sub nom.*, *Cedars-Sinai Med. Ctr. v. O'Leary, 512 U.S. 1235, 129 L. Ed. 2d 859, 114 S. Ct. 2738 (1994)*.

---

[5] All of these documents were filed under seal. The court has determined that none of the information and legal analysis therein requires confidential treatment other than certain information on pages 5 (lines 2 and 5) and 9 (lines 10 and 12) of the Government's May 3, 2004 motion to dismiss.

2. The "Substantial Chance" Standing Test Applies To A Post-Award Bid Protest.

HN6[] The United States Court of Appeals for the Federal Circuit also has held that in bid protest cases "because the question of prejudice goes directly to the question of standing, the prejudice issue must be reached before addressing the merits." *Info. Tech. & Applications Corp. v. United States., 316 F.3d 1312, 1319*. To establish prejudice, a plaintiff must show that "absent the error, 'there was a substantial chance it would have received the contract award.'" *Emery Worldwide Airlines, Inc. v. United States, 264 F.3d 1071, 1086* (quoting *Alfa Laval Separation, Inc. v. United States, 175 F.3d 1365, 1367 (Fed. Cir. 1999))*; *see also* *Banknote Corp. of Am., Inc. v. United States, 365 F.3d 1345, 1351 (Fed. Cir. 2004)* (post-award bid case); *Statistica, Inc. v. Christopher, 102 F.3d 1577, 1581 (Fed. Cir. 1996)* ("To establish competitive prejudice, a protestor must demonstrate that but for the alleged error, there was a *substantial chance* that [it] would receive **[**15]** an award -- that it was within the zone of active consideration.") (internal citations omitted).

In addition, our appellate court requires, *HN7*[] "when a party contends that the procurement procedure in a sole-source case involved a violation of a statute, regulation, or procedure, it must establish prejudice by showing that it would have had a substantial chance of receiving the award." *Myers Investigative & Sec. Servs., Inc. v. United States, 275 F.3d 1366, 1370 (Fed. Cir. 2002)* (quoting *Statistica Inc., 102 F.3d at 1582*). Panels of the United States Court of Appeals for the Federal Circuit, however, have taken different approaches to what is required to evidence a "substantial chance." *Compare* *Info. Tech., 316 F.3d at 1319* (a protestor must establish "that its chance of winning the award was 'greater than . . . insubstantial . . . if successful on the merits of the bid protest.'"); *Data General Corp. v. Johnson, 78 F.3d 1556, 1562-63 (Fed. Cir. 1996)* (holding "the appropriate standard is that, to establish prejudice, a protestor must show that, had it not been for the alleged error in the procurement process, **[**16]** there was a reasonable likelihood that the protestor would have been awarded the contract. This is a refinement and clarification of the 'substantial chance' language[.]") *with* *United States v. Int'l Bus. Machines Corp., 892 F.2d 1006, 1011 (Fed. Cir. 1990)* ("Only the second-lowest bidder has a direct economic interest in the award of the contract. Therefore, only the second-lowest bidder is an interested party entitled to protest the award of the contract, . . . because only it stands to receive the contract in lieu of the challenged awardee[.]") (internal citation omitted).

D. Resolution Of The Government's Motion To Dismiss.

1. Blue Dot's Complaint Is A Post-Award Bid Protest.

On March 24, 2004, the Air Force executed a sole-source contract with Waste Management-Washington for "solid waste management services" at Fairchild AFB. *See* AR at 850. Blue Dot did not file suit in this court until April 12, 2004, after the contract had already been awarded. *See* *Coco Bros., Inc. v. Pierce, 741 F.2d 675, 677 (3d. Cir. 1984)* (holding *HN8*[] bid protest suits filed after a written notice has been sent to the contract recipient **[**17]** are post-award protests); *see also* *Advanced Seal Technology v. Perry, 873 F. Supp. 1144, 1149 (N.D. Ill. 1995)* (determining that the claim was post-award since it was filed one month after contract was awarded and plaintiff was seeking solely equitable relief). Therefore, despite plaintiff's allegation to the contrary, *see* Compl. at 1, this case concerns a post-award protest.

[*554] 2. Blue Dot's Standing Should Not Be Resolved On A Motion To Dismiss. *HN9*[]

Since standing inherently concerns facts relevant to the particulars of a case, it is more appropriately resolved at the summary judgment stage, as the United States Supreme Court instructed in *Lujan v. Defenders of Wildlife, 504 U.S. 555, 119 L. Ed. 2d 351, 112 S. Ct. 2130 (1992)*:

> [plaintiff must] "set forth" by affidavit or other evidence "specific facts," *Fed. Civ. Proc. 56(e)*, which for purposes of the summary judgment motion will be taken to be true . . . When the suit is one challenging the

legality of government action . . . the nature and extent of facts must be averred (at the summary judgment stage) . . . in order to establish standing depends considerably upon whether the plaintiff is . . . an **[**18]** object of the action . . . at issue. If [so], there is ordinarily little question that the action . . . has caused him injury, and that a judgment . . . requiring the action will redress it. When, however, as in this case, a plaintiff's asserted injury arises from the government's allegedly unlawful regulation . . . of *someone else*, much more is needed. In that circumstance, causation and redressability ordinarily hinge on the response of the regulated . . . third party to the government action . . . . Thus, when the plaintiff is not . . . the object of the government action . . . standing is not precluded, but is ordinarily "substantially more difficult" to establish.

Id. at 561-62.

Likewise, the United States Court of Appeals for the Federal Circuit has examined plaintiff's standing, either in the context of reviewing a final decision on the merits or on a motion for summary judgment, but not on a motion to dismiss. *See, e.g., Information Technology & Applications Corporation v. United States, 316 F.3d 1312, 1319 (Fed. Cir. 2003)* (standing determined on summary judgment); *Emery Worldwide Airlines, Inc. v. United States, 264 F.3d 1071, 1086-88 n.14 (Fed. Cir. 2001)* **[**19]** (same); *Impresa Construzioni Geom. Domenico Garufi v. United States, 238 F.3d 1324, 1333-34 (Fed. Cir. 2001)* (same). Therefore, Blue Dot's standing should not be resolved on a motion to dismiss, pursuant to *RCFC 12(b)(1)*.

3. The Parties Are Ordered To Show Cause Why The Court Should Not Rule That Blue Dot Has A "Substantial Chance" of Receiving Contract No. FA4620-04-D's Option Years, Since The Air Force Has Admitted That Its Interpretation Of *42 U.S.C. § 6961(a)* And *Wash. Rev. Code § 81.77.040* Knowingly Was Contrary To Law.

On December 10, 2003, the Air Force issued a "REVISED/FINAL JUSTIFICATION AND APPROVAL FOR OTHER THAN FULL AND OPEN COMPETITION" ("FINAL JUSTIFICATION") regarding a "new contract for solid waste and disposal service [to] be awarded on a restrictive basis to Waste Management of WA[.]" AR at 774. The FINAL JUSTIFICATION states at "Section 5 DEMONSTRATION THAT THE CONTRACTOR'S UNIQUE QUALIFICATIONS OR NATURE OF THE ACQUISITION REQUIRES THE USE OF ONLY ONE RESPONSIBLE SOURCE AUTHORITY:"

> ***HN10***[] Under Resource Conservation and Recovery Act of 1976 (RCRA), *42 U.S.C. § 6961* **[**20]** (Application of Federal, State, and local law to Federal facilities), federal agencies must comply with local solid waste management regulations. As such, exclusive franchise agreements, certificates, or authority granted by a state, county, or municipality to an entity prevents federal agencies from competing the contract requirements. ***HN11***[] The WUTC has the authority to grant companies certificates of public convenience and necessity, which grant them authority to operate solid waste collection services within a prescribed geographic area. Waste Management holds Certificate No. G-156 dated 12-14-99 for the area surrounding and including Fairchild AFB. In matter of: *Red River Service Corporation*, B-279250, May 26, 1998, 98-1 Comp. Gen. Proc. Dec. P142, at footnote 2, GAO specifically held that RCRA was an express requirement under *10 U.S.C. § 2304(c)(5)*. Although GAO cited *10 U.S.C. § 2304(c)(5)*, **[*555]** that authority does not identify the specific entity involved. Therefore, we are using *10 U.S.C. § 2304(c)(1)* as the statutory authority for this procurement.
> AR at 775.
>
> RCRA ***HN12***[] requires that all federal **[**21]** agencies "engaged in any activity resulting, or which may result, in the disposal or management of solid waste or hazardous waste shall be subject to, and comply with, all Federal, State, interstate and local requirements, both substantiative and procedural (including any requirement for permits[.]" *42 U.S.C. § 6961(a)*.
> In 1961, the State of Washington enacted a law providing that:
>
> ***HN13***[] [*n]o solid waste collection company shall hereafter operate* for the hauling of solid waste for compensation without first having obtained from the commission a certificate declaring that public

convenience and necessity require such operation[.] . . . Issuance of the certificate of necessity shall be determined upon, but not limited to, the following factors: The present service and cost thereof for the contemplated area to be served; an estimate of the cost of the facilities to be utilized in the plant for solid waste collection and disposal; . . . a statement of prior experience, if any, in such field by the petitioner; . . . and sentiment in the community contemplated to be served as to the necessity for such a service.

Wash. Rev. Code § 81.77.040 **[**22]** (1996) (emphasis added).

The court is informed that, as of March 24, 2004, the date the contract at issue was awarded in this case, Waste Management-Washington was the only company that had a certificate of convenience and necessity to operate at the Fairchild AFB and adjacent area. *See* AR at 408-10.

There is no language in *42 U.S.C. § 6961(a)* or *Wash. Rev. Code § 81.77.040* which mandates that a federal agency must solicit bids only from or award a contract exclusively to a solid waste disposal contractor with a WUTC certification. Indeed, such a requirement would violate ***HN14***[] the Competition in Contracting Act, *10 U.S.C. § 2305(b)(3)* (requiring award of federal contracts "to the responsible bidder whose bid *conforms* to the solicitation and is most *advantageous* to the United States, *considering only price* and other price-related factors included in the solicitation[.]") (emphasis added). ***HN15***[] The legal duties imposed by *Wash. Rev. Code § 81.77.040* apply exclusively to solid waste contractors and require only that a certificate of convenience and necessity be obtained **[**23]** and in hand at the time solid waste hauling commences operation. *See* *Wash. Rev. Code § 81.77.040* ("[*n]o solid waste company* shall hereafter *operate*.") (emphasis added).

HN16[] The United States Court of Appeals for the Federal Circuit has held that if a "bid protest were allowed because of an arbitrary and capricious responsibility determination by the contracting officer, the government would be obligated to rebid the contract, and [the challenging bidder] could compete for the contract once again. Under these circumstances, the [challenging bidder] has a 'substantial chance' of receiving the award and an economic interest and has standing to challenge the award." *Impresa, 238 F.3d at 1334* (citing *Alfa Laval, 175 F.3d at 1367*). In this case, the Air Force has admitted that its interpretation of *42 U.S.C. § 6961(a)* and *Wash. Rev. Code § 81.77.040* (1996) knowingly was contrary to law. *See* AR at 757 ("Fairchild AFB agrees with Waste Management's position [that] *under RCRA, the contracting agency is required to use only Waste Management* for solid waste **[**24]** disposal . . . *This conclusion holds even though it conflicts with the Federal Acquisition Regulations (FAR), most specifically subpart 19.5, as well as the full and open competition requirements of the Competition in Contracting Act of 1984 (CICA)*.") (emphasis added). *See* AR at 235. [6] Therefore, under **[*556]** these circumstances, the

---

[6] Solicitation F45613-03-Q-A028 stated that the contract would be awarded as a "competitive best value acquisition in which competing offeror's past and present performance history will be evaluated on a basis significantly more important than cost or price consideration." AR at 735. Although Blue Dot received a "marginal" overall performance rating for the period December 1, 2001-March 2002, almost all of the negative comments concerned the recycling center. *See* AR at 213-16, 218, 235 ("Although the refuse collection (subcontracted to Waste Management) is acceptable, their [Blue Dot's] overall performance rating is marginal."). On January 9, 2002, Blue Dot received a "cure notice." *See* AR at 219-21. The Integrated Assessment Best Value Decision for F45613-02-Q-A027 indicates that "[Blue Dot's] Improvement to the recycling center operation did not occur until 7 months into the contract performance, when a new management team assumed control." AR at 235. In addition, the Contracting Officer notes that Blue Dot received a satisfactory rating for refuse removal at McConnell AFB in Kansas and a very good rating for refuse removal from the Veterans Medical and Regional Office in Kansas. *See* AR at 235. The Contracting Officer, however, appears completely to have disregarded these favorable ratings, as well as Blue Dot's efforts to cure prior problems, in evaluating Blue Dot's performance history. *Id.*

Waste Management-Washington also argues that Blue Dot cannot satisfy the "responsible prospective contractor" requirements of the Competition in Contracting Act, *10 U.S.C. § 2305(b)(3)*, *(4)* and *48 C.F.R. § 9.103(a), (b)*, because Blue Dot does not have sufficient financial resources to perform the contract, evidenced by its apparent failure to satisfy a $ 261,326.32 judgment owed to Waste Management-Washington for subcontracting work. *See* Def.-Intervenor's Supp. at 4-5. The court is unable to discern from the record or briefs filed to date whether that judgment is final or subject to appeal or whether it concerned any of the parties are hereby ordered to show cause why the court should not rule that Blue Dot has a substantial chance of receiving Contract No. FA4620-04-D's option years commencing on September 30, 2004, particularly since Blue Dot submitted the [] on Solicitation F45613-02-Q-A027.

[25]**

4. The Parties Are Ordered to Show Cause Why The Court Should Not Rule That Blue Dot Has A "Substantial Chance" Of Obtaining Contract No. FA46020-02-04-D's Option Years, Since *Wash. Rev. Code § 81.77.040* Has Been Utilized In Violation Of Federal *Antitrust Law*.

In *Parker v. Brown, 317 U.S. 341, 87 L. Ed. 315, 63 S. Ct. 307 (1943)*, ***HN17***[] the United States Supreme Court held that a statute enacted by a state legislature is exempt from federal antitrust scrutiny under the "state action doctrine," based on principles of federalism and state sovereignty. *Id. at 351*. In *California Retail Liquor Dealers Ass'n v. Midcal Aluminum, Inc., 445 U.S. 97, 63 L. Ed. 2d 233, 100 S. Ct. 937 (1980)*, however, a unanimous Court established a two-part test to clarify that state action antitrust immunity is not absolute. In determining the applicability of the doctrine the state regulation must be "'clearly articulated and affirmatively expressed as state policy;'" second, the policy must be "'actively supervised'" by the state. *Id. at 105* (quoting *City of Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 410, 55 L. Ed. 2d 364, 98 S. Ct. 1123 (1978))*. More recently, **[**26]** in *FTC v. Ticor Title Ins. Co., 504 U.S. 621, 119 L. Ed. 2d 410, 112 S. Ct. 2169 (1992)*, the United States Supreme Court provided detailed guidance as to what is expected from the state to demonstrate the active supervision requirement:

HN18[] The purpose of the active supervision inquiry is not to determine whether the State has met some normative standard, such as efficiency, in its regulatory practices. Its purpose is to determine whether the State has exercised sufficient independent judgment and control so that the details of the rates or prices have been established as a product of deliberate state intervention, not simply by agreement among private parties. Much as in causation inquiries, the analysis asks whether the State has played a substantial role in determining the specifics of the economic policy. The question is not how well state regulation works but whether the anticompetitive scheme is the State's own.

Id. at 634-35.

On its face, *Wash. Rev. Code § 81.77.040* does not include a "clearly articulated and affirmatively expressed state policy" to displace competition with what in effect are geographic franchises that appear to have been **[**27]** granted in perpetuity. *See* AR at 625-26 ("The commission . . . may issue the requested certificate only if the existing solid **[*557]** waste collection company 'will not' provide service to the satisfaction of the commission.") In addition, the "sentiment of the community" standard in *Wash. Rev. Code § 81.77.040*, required before a second certificate will be issued within a geographic area appears to be sufficiently vague and arbitrary as to give rise to due process concerns under both federal and state constitutional law. Moreover, the record is devoid of any evidence that the state "has exercised sufficient independent judgment and control" over rates and prices, despite the Government's unsupported assertion that "WUTC strictly regulates solid waste collection companies, establishes rates and tariffs, requires compliance with local solid waste management plans, and monitors company performance." Gov't Mot. to Dismiss at 19. The fact that Blue Dot apparently was performing such work at Fairchild AFB under a prior contract without a certification best evidences that the state clearly does not "strictly regulate[] solid waste collection companies." *Id.* **[**28]** This apparent lack of active supervision is further evidenced by the fact that the certifications appear to be transferred from one company or related companies to another in perpetuity without any due diligence or significant inquiry. *See* AR at 407-10, 489. [7] Thus, the proposition

---

services that were the primary focus of the Air Force's "marginal" performance rating regarding Blue Dot. The court notes that in evaluating Blue Dot's August 2, 2002 bid on F45613-02-Q-A027, however, the Contracting Officer did not indicate any concern about Blue Dot's financial ability to perform the contract. *See* AR at 234-35.

that WUTC "supervises and regulates every solid waste collection company in the state of Washington by fixing and altering its rates and charges . . . to use rate structures and billing systems consistent with local solid waste management priorities and plans" is an issue that is far from resolved to the court's satisfaction in this case. *See* AR at 768.

[29]**
For example, the Air Force's December 10, 2003 FINAL JUSTIFICATION regarding Contract No. FA4620-04-D provides:

It is anticipated that the *cost of the contract will be fair and reasonable*. Waste Management has performed solid waste collection and disposal at Fairchild AFB as the prime contractor from FY 97 through FY 01 and in FY 03, and also as a subcontractor in FY 02 and FY 03. The costs have remained relatively stable through competitive bidding from FY 97 through the award to Olgoonik in August 2002. In February 2003 when the sole source, seven (7) month, contract was awarded to Waste Management, the price was *determined fair and reasonable through price analysis comparing Waste Management prices with Olgoonik*, which was a competitive bid contract. Waste Management's prices in FY 03 [were] also compared to the then current Tariff Agreement No. 13 rates. The prices being charged by Waste Management for this short-term contract were actually lower [than] the allowable rates reflected in Tariff (allowable rates as reflected in the Tariff are actual costs plus a profit of 5 to 7%). Waste Management's prices for this sole source acquisition will be compared not only **[**30]** to past CLIN pricing, but also to the now current Tariff No. 14 rates *to ensure the Government is receiving a fair and reasonable price*. The costs Fairchild has paid for bulk containers per ton and collection of refuse costs per unit since FY 97 are illustrated in the following table:

[*558]

	WM	**WM**	**WM**	**WM**	**WM**	**Blue Dot**	**Olgoonik**	[8] **WM**
	FY97	**FY98**	**FY99**	**FY00**	**FY01**	**FY02**	**FY03**	**FY03**
							(5 month)	**(7 month)**
Bulk containers Price/ton	$	$	$	$	$	$	$	$
Housing price/ unit/month	$	$	$	$	$	$	$	$

[31]** AR at 776 (emphasis added).

The Air Force's due diligence comparing Waste Management's prices with Olgoonik's to determine whether they were "fair and reasonable" is plainly arbitrary and capricious--they are the same company, as the Air Force well knows. *See* AR at 483-84, 511. Second, a comparison of the base year with option years 1-4 does not evidence that the "cost of the contract [is] fair and reasonable." AR at 776. The cost for the estimated base year April 1, 2004 - September 30, 2004 is $ []**.** For October 1, 2004 - September 30, 2005, however, the cost is estimated at $ [], or

---

[7] *See* Timothy H. Butler, 23 WASH. PRAC. ENVIRONMENTAL LAW AND PRACTICE § 13.22 (updated 2003 Pocket Part) ***HN19***[] ("The solid waste collection law [*Wash. Rev. Code § 81.77.040*] creates a regulated monopoly, in which only one certificate holder can serve a given territory, *unless the existing carrier will not serve to the satisfaction of WUTC*. This explains why so few certificates have been issued and why entry applications generally result in hotly-contested hearings.") (emphasis added).

[8] The Air Force admits: "The bulk container price per ton reflects a significant increase for the current contract between 2002 and 2003[, *i.e.*, []%]. A price fair and reasonable determination was accomplished on 27 January 2003 that identifies the cause for this increase. The factors included increases in disposal fees, labor, materials, equipment; and increases in cost of purchasing dumpsters." AR at 768.

an increase of []%, for one year, even though the unit increase is only approximately 51%. *Id.* Moreover, although the unit requirements remain essentially the same in the following three years, an additional price increase is built in for each year:

October 1, 2005 - September 30, 2006 -- $ [];

October 1, 2006 - September 30, 2007 -- $ []; and

October 1, 2007 - September 30, 2008 -- $ [].

Id. Therefore, the parties are ordered to show cause why the court should not rule that *Wash. Rev. Code § 81.77.040* has **[**32]** been utilized in violation of *15 U.S.C. § 2* under the circumstances presented in this case. *See* *28 U.S.C. § 1491(b)(1)* ***HN20***[] ("The United States Court of Federal Claims . . . shall have jurisdiction to render judgment on an action by an interested party objecting to a solicitation by a Federal agency for bids or proposals for a proposed contract or to a proposed award or the award of a contract or *any alleged violation of statute*. . . in connection with a procurement or the proposed procurement.") (emphasis added).

5. The Parties Are Ordered To Show Cause Why The Court Should Not Enjoin The Air Force From Awarding Waste Management-Washington Option Years 1-4 On Contract No. FA4620-04-D-A2003, But Instead Be Required To Re-Solicit The Contract.

In light of the fact that the Air Force appears knowingly to have interpreted *42 U.S.C. § 6961(a)* and *Wash Rev. Code § 81.77.040* contrary to law, *Wash. Rev. Code § 81.77.040* appears to have been used to violate federal ***antitrust law***, and Waste Management-Washington appears to be on the verge of imposing **[**33]** monopoly rents on the public, albeit with the approval of the Air Force, the parties are hereby ordered to show cause why the court should not enjoin the Air Force from awarding Waste Management-Washington option years 1-4 on Contract No. FA4620-04-D-A2003, but instead be required to re-solicit the contract.

The parties' briefs are due to be filed no later than the close of business September 13, 2004. Such briefs will be filed on the public record, unless the sponsoring party files a motion for a protective order and can demonstrate that the information is appropriate for the entry of such an order. *See, e.g.,* *28 C.F.R. § 50.9* (Department of Justice Policy with Regard to Open Judicial Proceedings). A hearing will be conducted on September 17, 2004 at 10:00 a.m. EDT, at the United States Court of Federal Claims, 717 Madison Place, N.W., Washington, D.C., 20005, at which time the court will entertain oral argument and the proffering of testimony or other relevant evidence.

In addition, the Clerk of the Court will serve the following entities with a copy of this Memorandum Opinion Regarding Plaintiff's Standing and Order to Show Cause, **[*559]** together with notice **[**34]** of the above-referenced deadlines, in the event they may wish to participate as an intervenor or *amicus*:

International Resource Recovery, Inc. [9]

Selrico Services [10]

SI-NOR [11]

---

[9] The Government is hereby ordered to provide the Clerk of the Court with the name of the CEO and address of this potential bidder. The Clerk will *only* serve a copy of the *published version* of this memorandum opinion on this company.

[10] The Government is hereby ordered to provide the Clerk of the Court with the name of the CEO and address of this potential bidder. The Clerk will *only* serve a copy of the *published version* of this memorandum opinion on this company.

[11] The Government is hereby ordered to provide the Clerk of the Court with the name of the CEO and address of this potential bidder. The Clerk will *only* serve a copy of the *published version* of this memorandum opinion on this company.

HN1[] **Sherman Act, Remedies**

In reviewing a Fed. R. Civ. P. 12(b)(6) motion, courts must accept as true the factual allegations of the complaint, and draw all inferences in favor of the pleader. However, legal conclusions, deductions or opinions couched as factual allegations are not given a presumption of truthfulness. The complaint may only be dismissed when it appears beyond doubt that the plaintiff can prove no set of facts in support or his claim which would entitle him to relief. This rule applies with no less force to a Sherman Act claim.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Evidence > Judicial Notice > General Overview

HN2[] **Motions to Dismiss, Failure to State Claim**

In determining a motion to dismiss, only the facts alleged in the pleadings, documents attached as exhibits or incorporated by reference in the pleadings and matters of which judicial notice may be taken are considered. A court's task in ruling on a *Fed. R. Civ. P. 12(b)(6)* motion is merely to assess the legal feasibility of the complaint, not to assay the weight of the evidence to which might be offered in support thereof.

HN3[] **Civil Procedure, Discovery & Disclosure**

No heightened pleading requirements apply in antitrust cases. A short plain statement of a claim for relief which gives notice to the opposing party is all that is necessary in antitrust cases, as in other cases under the Federal Rules. The discovery process is designed to provide whatever additional sharpening of the issues is necessary. In antitrust cases in particular, the United States Supreme Court has stated that dismissals prior to giving the plaintiff ample opportunity for discovery should be granted very sparingly.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN4[] **Attempts to Monopolize, Elements**

Section 2 of the Sherman Act makes it unlawful to attempt to monopolize any part of the trade or commerce among the several States. *15 U.S.C.S. § 2*. To establish a claim for attempted monopolization, a plaintiff must prove: (1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power.

Antitrust & Trade Law > Sherman Act > General Overview

HN5[] **Antitrust & Trade Law, Sherman Act**

While the hiring of employees alone generally cannot give rise to antitrust liability, the hiring of a competitor's employees in conjunction with other wrongful acts, such as those alleged in the complaint, can constitute anticompetitive conduct in violation of the Sherman Act, *15 U.S.C.S. 1 et seq.*

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN6[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Regarding antitrust liability and the hiring of a competitor's employees, the evidence must be evaluated in the context of the pending employer/employee relationships between the competitor and plaintiff's former employees. As a general policy matter, one firm's hiring of its competitor's employees does not present a "compelling case for antitrust intervention."

HN9[] **Entitlement as Matter of Law, Appropriateness**

U.S. Dist. Ct., S.D.N.Y. R. 56.1 provides that papers opposing summary judgment shall include a separate, short and concise statement the material facts as to which it is contended there exists a genuine issue to be tried. U.S. Dist. Ct., S.D.N.Y., R. 56.1(b). Accordingly, summary judgment is appropriate because the facts contained in defendant's statement of facts must be "deemed to be admitted. U.S. Dist. Ct., S.D.N.Y., R. 56.1(c).

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN10[] **Monopolies & Monopolization, Attempts to Monopolize**

To withstand a motion for summary judgment, on an attempted monopolization claim, a plaintiff must identify a plausible antitrust market and establish that defendant has sufficient market power in that market to create a dangerous probability of obtaining monopoly power. The United States Court of Appeals for Second Circuit has consistently interpreted both monopoly and the attempt to monopolize as requiring some measure of market power.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN11[] **Monopolies & Monopolization, Actual Monopolization**

Monopoly power has been defined by the United States Supreme Court as the power to control prices or exclude competition.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN12[] Regulated Practices, Market Definition

Absent an adequate market definition, it is impossible for a court to assess the anticompetitive effect of challenged practices.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN13[] Monopolies & Monopolization, Actual Monopolization

The United States Court of Appeals for the Second Circuit has laid out the standards for determining whether the relevant market has been adequately defined for monopolization purposes: The relevant market for purposes of antitrust litigation is the "area of effective competition" within which the defendant operates. The relevant market is composed of products that have reasonable interchangeability for the purposes for which they are produced - price, use and qualities considered. Thus, products or services need not be identical to be part of the same market. In economists' terms, two products or services are reasonably interchangeable where there is sufficient cross-elasticity of demand. Cross-elasticity of demand exists if consumers would respond to a slight increase in the price of one product by switching to another product.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN14[] Monopolies & Monopolization, Actual Monopolization

For monopolization purposes, the relevant market product must be identified, and the plaintiff must allege how the net economic effect of the alleged violation is to restrain trade in the relevant market, and that no reasonable alternate source is available' to consumers in that market.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN15[] Monopolies & Monopolization, Actual Monopolization

The law in the United States Court of Appeals for the Second Circuit is clear that a 19 percent market share cannot sustain a monopolization or attempt to monopolize claim. Even market shares of approximately 50 percent are insufficient to demonstrate market power where other factors such as low barriers to entry and strong competition exist.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN16[] Monopolies & Monopolization, Actual Monopolization

Market share is just a way of estimating market power, which is the ultimate consideration for monopolization claims. When there are better ways to estimate market power, the court should use them. These ways include a contemporaneous rise in price with increased market share.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN17[] **Monopolies & Monopolization, Actual Monopolization**

Barriers to entry in the voice brokerage market are low, and as such, there can be no dangerous probability of monopolization. It is well-settled that market share analysis, while essential, is not necessarily determinative in the calculation of monopoly power and other market characteristics must also be considered including the barriers to entry.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Mergers & Acquisitions Law > Antitrust > Market Definition

Mergers & Acquisitions Law > Merger Guidelines

Mergers & Acquisitions Law > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

HN18[] **Monopolies & Monopolization, Actual Monopolization**

The Department of Justice Antitrust Division's Merger Guidelines adopt a two-year test for determining whether there are barriers to entry in a market: if successful entry is likely within two years, there are no significant entry barriers and the government will not challenge mergers in that market.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN19[] **Monopolies & Monopolization, Actual Monopolization**

There can be no violation of the antitrust laws unless the challenged conduct has harmed consumers, or at least has the potential to harm consumers, by increasing price and/or decreasing output. A showing of market power, while necessary to show adverse effect indirectly, is not sufficient. There must be other grounds to believe that a defendant's behavior will harm competition market-wide.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN20[] **Monopolies & Monopolization, Actual Monopolization**

Market power means the ability to injure consumers by curtailing output and raising price; no possible injury, no market power, no market power, no violation; injury to the consumers is therefore an essential ingredient of liability.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN21[] **Monopolies & Monopolization, Actual Monopolization**

In the context of monopoly analysis, when customers are not tied to particular sellers each seller may perceive the demand as highly elastic (meaning the customers will quickly switch if any one supplier raises price, which makes the increase unprofitable). The existence of price sensitive consumers prohibits any competitor from obtaining the power to control prices.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Civil Procedure > Judgments > Summary Judgment > General Overview

Civil Procedure > ... > Summary Judgment > Motions for Summary Judgment > General Overview

Civil Procedure > ... > Summary Judgment > Opposing Materials > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN22[] **Entitlement as Matter of Law, Appropriateness**

The absence of discovery alone does not necessarily bar summary judgment. Where a non-movant simply relies on bare allegations, dismissal is appropriate prior to discovery. A bare assertion that evidence to support a fanciful allegation lies within the exclusive control of the defendants, and can be obtained only through discovery, is not sufficient to defeat a motion for summary judgment. An opposing party's facts must be material and of a substantial nature, not fanciful, frivolous, gauzy, spurious, irrelevant, gossamer inferences, conjectural, speculative, nor merely suspicions.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Civil Procedure > Judgments > Summary Judgment > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

HN23[] **Entitlement as Matter of Law, Appropriateness**

Regarding summary judgment, if the nonmoving party does not set forth specific facts showing there is a genuine issue of material fact summary judgment will be entered against him. Summary judgment may properly be granted in antitrust cases and regularly is, where there is no viable claim based on the undisputed facts.

Civil Procedure > ... > Summary Judgment > Supporting Materials > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

HN27[] **Jurisdiction, Jurisdictional Sources**

According to *28 U.S.C.S. § 1367(c)(3)*, a district court may decline to exercise supplemental jurisdiction over state law claims if the court dismisses all claims over which it has original jurisdiction.

Counsel: [1]** KASOWITZ, BENSON, TORRES & FRIEDMAN, Attorneys for Plaintiff, New York, NY, By: DANIEL B. GOLDMAN, ESQ., GARY W. DUNN, ESQ., Of Counsel.

EPSTEIN BECKER & GREEN, Attorneys for Defendants, New York, NY, By: PETER L. ALTIERI, ESQ., LAURI F. RASNICK, ESQ., Of Counsel.

Judges: ROBERT W. SWEET, U.S.D.J.

Opinion by: ROBERT W. SWEET

Opinion

[*629] Sweet, D.J.

The defendants have moved under *Fed. R. Civ. P. 12(b) (6)* to dismiss the complaint of Natsource LLC ("Natsource") and under *Fed. R. Civ. P. 56* for summary judgment. For the reasons set forth below, the motion to dismiss the complaint is denied, and the motion for summary judgment is granted.

The Parties

Natsource is an inter-dealer broker of electrical power.

GFI Group, Inc. ("GFI") is the parent of non-party GFI Brokers LLC, and is also an inter-dealer of electrical power. GFI Brokers LLC is the employer of Patrick Curley ("Curley") Christopher D'Ambrosi ("D'Ambrosi"), Richard Heffernan ("Heffernan"), John Prendergast ("Prendergast"), Angelo Primavera ("Primavera"), Joshua Slansky ("Slansky"), and Gregory Woyshner ("Woyshner") (collectively the **[**2]** "Individual Defendants") . The Individual Defendants are brokers of electrical power formerly employed by Natsource who have been hired by GFI.

Prior Proceedings

Natsource filed its complaint in this action on December 18, 2003, seeking redress for damages that it suffered as the result of, *inter alia,* GFI's unlawful attempt to monopolize the voice brokerage of electric power in the "Eastern Market," which includes the New England states, New York, Pennsylvania, New Jersey, Maryland and the "ANC business," which "involves the buying and selling of electrical line capacity, as it is conducted in the Eastern market and other markets." Complaint. P19. Natsource alleged that in an attempt to obtain monopoly power, GFI, through wrongful means, induced a large group of Natsource's brokers to leave the employ of Natsource and to join GFI, effectuating the transfer of the vast majority of Natsource's customers in the Eastern Market to GFI. Complaint P28-52.

To achieve its goal of attaining monopoly power, Natsource has alleged that GFI misappropriated confidential information from Natsource, see id. at PP 28-32), breached a confidentiality agreement with Natsource **[**3]** and used confidential information protected by that agreement in furtherance of its plan to co-opt Natsource's customers, see id., aided and abetted breaches of the fiduciary duties of Natsource's former brokers, see id. at PP 33-38, and tortuously interfered with the employment contracts between Natsource and such brokers, see id. at PP 33-38, 44-45.

As the result of this wrongdoing, GFI achieved a market share in excess of 60% of the Eastern Market, and Natsource, suffering millions of dollars in damages, can no longer effectively compete in that market. See id. at PP 39-43, 47-48.

No discovery has been conducted. The instant motion was heard and marked fully submitted on April 28, 2004.

The Facts

The facts are set forth in the *Rule 56.1* Statement of GFI and have not been challenged by Natsource and consequently are not contested except as noted.

GFI and Natsource are both inter-dealer brokerage firms which engage in voice-based **[*630]** brokerage, id. at P18, and function as intermediaries, matching the bids and offers for various products, including financial products and energy-related products. These bids and offers are made by institutions, primarily **[**4]** large banks and utility companies (the "dealers" or "customers"). Id. at P21.

Electric power, which is one of the products brokered by the Individual Defendants, is a highly homogeneous product, differentiated primarily by the region in which it is traded. Id. at P20. Customers of electric power do not necessarily use the power that is bought and sold. Id. at P21. Some customers, such as financial institutions, merely engage in speculative trading of the product. Other customers, such as utilities, may buy or sell electric power depending upon the needs of their respective companies. Id. at P20. Regardless of the purpose behind the purchase, customers of inter-dealer brokerage firms want one thing -- to efficiently get the best price for the purchase or sale of electric power. Id. at P18.

As the customers of inter-dealer brokerage firms which broker electric power are large financial institutions and utility companies, they are readily identifiable by all brokers of electric power and can be easily located in public sources such as OPIS/-Stalsby's Who's Who in Natural Gas & Power. Neither trade secrets nor proprietary information are involved in the identification **[**5]** of possible customers. The relationships between brokers and traders, by necessity, are personal, and they can only be developed over many years in both a business and, often, a non-business context. Id. at P4. Traders in the Eastern Market allow a select few brokers with whom they regularly do business to establish a direct phone line to traders, which operate like an intercom in which traders and brokers can instantly communicate with each other by simply touching a button and talking into a speaker. Id. at P25. The traders allow only a few of these lines to be installed at their desks. Only the brokers who have the closest relationship with them secure this privilege.

Each institutional customer routinely utilizes the services of competing inter-dealer brokerage firms simultaneously. No inter-dealer brokerage firm possesses a proprietary interest in any of these customers concerning the buying and/or selling of electric power. While an inter-dealer broker can act as an intermediary between or among customers regarding the negotiation of a price, the broker does not take a proprietary position during the transactional process, nor does (or can) he or she set the price or **[**6]** have any particular interest in whether prices of the electricity are higher or lower. In exchange for successfully completing transactions, inter-dealer brokerages earn commissions from both counter-parties to the trade.

The Motion To Dismiss The Complaint Is Denied

The complaint has stated a claim for attempted monopolization. ***HN1***[] In reviewing a 12(b) (6) motion, courts must "accept as true the factual allegations of the complaint, and draw all inferences in favor of the pleader." *Mills v. Polar Molecular Corp., 12 F.3d 1170, 1174 (2d Cir. 1993)* (citing *IUE AFL-CIO Pension Fund v. Herrmann, 9 F.3d 1049, 1052 (2d Cir. 1993)*. However, "legal conclusions, deductions or opinions couched as factual allegations are not given a presumption of truthfulness." *L'Europeene de Banque v. La Republica de Venezuela, 700 F. Supp. 114, 122 (S.D.N.Y. 1988)*. The complaint may only be dismissed when it appears beyond doubt that the plaintiff can prove no set of facts in support or his claim which would entitle him to relief." *Conley v. Gibson, 355 U.S. 41, 45-46,* 2 [*631] L. Ed. 2d 80, 78 S. Ct. 99 (1956); see also Bernheim v. Litt, 79 F.3d 318, 321 (2d Cir. 1996). **[**7]** "This rule applies with no less force to a Sherman Act claim . . . ."' McLain v. Real Estate Board of New Orleans, Inc., 444 U.S. 232, 246, 100 S. Ct. 502, 62 L. Ed. 2d 441 (1980).

HN2[] In determining a motion to dismiss, "only the facts alleged in the pleadings, documents attached as exhibits or incorporated by reference in the pleadings and matters of which judicial notice may be taken are considered." Samuels v. Air Transp. Local 504, 992 F.2d 12, 15 (2d Cir. 1993). "A court's task in ruling on a Rule 12(b) (6) motion is 'merely to assess the legal feasibility of the complaint, not to assay the weight of the evidence to which might be offered in support thereof.'" Levitt v. Bear Stearns & Co., Inc., 340 F.3d 94, 101 (2d Cir. 2003) (quoting Cooper v. Parsky, 140 F.3d 433, 440 (2d Cir. 1998)).

HN3[] "No heightened pleading requirements apply in antitrust cases. ' [A] short plain statement of a claim for relief which gives notice to the opposing party is all that is necessary in antitrust cases, as in other cases under the Federal Rules.'" Todd v. Exxon Corp., 275 F.3d 191, 198 (2d Cir. 2001) (quoting George C. Frey Ready-Mixed Concrete, Inc. v. Pine Hill Concrete Mix Corp., 554 F.2d 551, 554 (2d Cir.1977). **[**8]** "The discovery process is designed to provide whatever additional sharpening of the issues is necessary." George C. Frey, 554 F.2d at 554. "In antitrust cases in particular, the Supreme Court has stated that 'dismissals prior to giving the plaintiff ample opportunity for discovery should be granted very sparingly.'" Todd, 275 F.3d at 198 (quoting George Haug Co. v. Rolls Royce Motor Cars Inc. 148 F.3d 136, 139 (2d Cir. 1998).

Natsource has pleaded a claim for attempted monopolization. HN4[] Section 2 of the Sherman Act makes it unlawful to "attempt to monopolize . . . any part of the trade or commerce among the several States . . . " 15 U.S.C. § 2 (1997). "To establish a claim for attempted monopolization, a plaintiff must prove: (1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize [1] and (3) a dangerous probability of achieving monopoly power." Tops Markets, Inc. v. Quality Markets, Inc. 142 F.3d 90, 99-100 (2d Cir. 1998).

[9]** Natsource has alleged, *inter alia,* that GFI tortiously interfered with its contracts and business relationships, that it aided and abetted certain Natsource employees in breaching their fiduciary duties, that it intentionally breached a confidentiality agreement for the purposes of co-opting Natsource's business, and that it misappropriated Natsource's trade secrets. Id. at PP 28-65, 75-83).

HN5[] While the hiring of employees alone generally cannot give rise to antitrust liability, the hiring of a competitor's employees in conjunction with other wrongful acts, such as those alleged in the complaint, can constitute anticompetitive conduct in violation of the Sherman Act.

In Int'l Distribution Ctrs., Inc. v. Walsh Trucking Co., 812 F.2d 786 (2d Cir. 1987), the Second Circuit reversed the denial of a motion for a judgment as a matter of law following a jury verdict in favor of plaintiff. The jury had found that plaintiff's competitor, Walsh, and certain of plaintiff's former employees conspired in restraint of trade when the former employees, prior to leaving plaintiff's employ for jobs with Walsh, met with Walsh and purportedly agreed to assist in Walsh's plan **[**10]** to wage a predatory **[*632]** price war. Id. at 794. Finding the jury's verdict with respect to this claim to have been improperly based on speculation, the court emphasized "thatHN6[] the evidence must be evaluated in the context of the pending employer/employee relationships between the competitor and plaintiff's former employees." Id. at 795. The court noted that "as a general policy matter, one firm's hiring of its competitor's employees does not present a 'compelling case for antitrust intervention.'" Id. at 795 n.7 (citing 3 P. Areeda & D. Turner, ***Antitrust Law,*** § 702b at 109 (1978)). Finding the plaintiff had not met its burden of proof, the court held that "the pre-employment meetings between [Walsh] and [plaintiff's employees] were just as likely held to discuss their future employment relationship as to hatch a predatory pricing scheme." Id. at 795. The court stated that:

---

[1] GFI has not challenged Natsource's complaint on the grounds that Natsource has not sufficiently pleaded that GFI had a specific intent to monopolize.

> our conclusion might be altered had the [former employees] misappropriated trade secrets from [plaintiff] in the course of working for [the competitor]. The jury, however, found that [plaintiff] possessed no such trade secrets. **[**11]**

Id. at 795 n.7.

While Walsh Trucking states that ***HN7***[] the hiring of a competitor's employees alone generally cannot result in an antitrust violation, it supports the proposition that the hiring of a competitor's employees in conjunction with other wrongful acts -- such as misappropriation of trade secrets or aiding or abetting breaches of loyalty -- can result in such violations. *812 F.2d at 795 n.6* & 7; [2] see also 1 Callmann on Unfair Competition, Trademarks and Monopolies § 421 (4th Ed. West 2003) (Under *§ 2 of the Sherman Act*, 'procuring a breach of the fiduciary duty owed to a competitor by its employees can be a predatory tactic. So can conspiring with a competitor's employees to obtain the competitor's trade secrets.") (footnotes omitted). Since Natsource alleges, *inter alia,* that GFI aided and abetted breaches of fiduciary duty and that it misappropriated trade secrets, Natsource clearly has alleged the additional wrongdoing necessary to state a valid antitrust claim.

[12]** **Summary Judgment Is Granted**

HN8[] "When a motion for summary judgment is made . . . an adverse party may not rest upon the mere allegations . . . of the adverse party's pleading, but the adverse party's response, by affidavits or as otherwise provided in this rule, must set forth specific facts showing that there is a genuine issue for trial, if the adverse party does not so respond, summary judgment, if appropriate, shall be entered against the adverse party." *Fed. R. Civ. P. 56(e)*. Here, Natsource has relied solely on the allegations of the complaint and did not oppose GFI's motion for summary judgment, either by raising issues of fact or **[*633]** controverting the *Rule 56.1* Statement in any way.

HN9[] *Rule 56.1* provides that "papers Opposing [summary judgment] shall include a separate, short and concise statement the material facts as to which it is contended there exists a genuine issue to be tried." Local Civil *Rule 56.1(b)*. Accordingly, summary judgment is appropriate because the facts contained in defendant's statement of facts must be "deemed to be admitted." Local Civil *Rule 56.1(c)*. See *Dusanenko v. Maloney, 726 F.2d 82 (2d Cir. 1984)* **[**13]** (finding that facts set forth in movant's statement of undisputed facts were properly deemed admitted where the non-movant failed to serve any opposing statement); *Naantaanbuu v. Abernathy, 816 F. Supp. 218, 222 (S.D.N.Y. 1993)* (where the party failed to submit an opposing statement of material facts, "all facts in the defendants' [*Rule 56.1* Statement] [were] deemed admitted").

HN10[] To withstand a motion for summary judgment, on an attempted monopolization claim, a plaintiff must identify a plausible antitrust market and establish that defendant has sufficient market power in that market to create a dangerous probability of obtaining monopoly power. *PepsiCo., Inc. v. Coca-Cola Co., 315 F.3d 101, 106 (2d Cir. 2002)*; *Tops Mkts., Inc. 142 F.3d at 100*. The Second Circuit has "consistently interpreted both monopoly and the attempt to monopolize as requiring some measure of market power." *Walsh Trucking, 812 F.2d at 791*.

HN11[] Monopoly power has been defined by the Supreme Court as "the power to control prices or exclude competition." *United States v. E.I. Du Pont de Nemours & Co. 351 U.S. 377, 391, 100 L. Ed. 1264, 76 S. Ct. 994*

---

[2] Other cases cited by GFI are similarly unavailing. In *Adjusters Replace-A-Car, Inc. v. Agency Rent-A-Car, Inc., 735 F.2d 884 (5th Cir. 1984)*, a case in which the court affirmed judgment as a matter of law, the court stated that a valid antitrust claim can be predicated "on the basis of evidence that the defendant had induced the plaintiff's employee to act disloyally . . ." *Id. at 884* (emphasis added). However, the court found that plaintiff's former employee did not act disloyally under the specific facts of this case. Id.

In *Abcor Corp. v. AM Int'l, Inc., 916 F.2d 924 (4th Cir. 1990)*, the court considered the appeal of a grant of summary judgment dismissing an antitrust case predicated in part on the defendant's hiring of two of plaintiff's employees. *Id. at 930*. The court affirmed, finding, based on the unique facts of that case, that nothing suspicious taint[ed] the hiring of the two employees." Id. Thus in Abcor, after being allowed to conduct discovery, plaintiff failed to marshal evidence in support of its claim. Nothing in this case supports the proposition that Natsource's claims now should be dismissed as a matter of law.

(1956). **[**14]** Thus, to succeed on its "Attempted Monopolization" claim, Natsource must be able to demonstrate that GFI's hiring of former Natsource brokers has created a dangerous probability that GFI will be able to raise prices above competitive levels, or to exclude competition in the relevant market defined in the complaint.

Natsource has failed to establish that the hiring of seven employees gives GFI the ability to raise its commissions. Commission rates are established through negotiations with customers who use multiple brokers and who have other avenues for trading electric power. Natsource has not advanced any plausible antitrust theory to explain how GFI possibly could exclude competition as a result of the hires at issue, especially since Natsource, along with at least ten other entities, now compete with GFI in voice-brokering.

In assessing whether GFI has a dangerous probability of achieving monopoly power, four elements must be considered: (1) whether Natsource has adequately alleged the relevant market; (2) market shares within the market; (3) barriers to entry in the relevant market; and (4) whether market power has or can be obtained.

The Relevant Market

Natsource **[**15]** has defined the relevant market in relying on the "Eastern Market" as the applicable one. ***HN12***[] "Absent an adequate market definition, it is impossible for a court to assess the anticompetitive effect of challenged practices." *Re-Alco Indus., Inc. v. National Ctr. for Health Educ., 812 F. Supp. 387, 392 (S.D.N.Y. 2001)* (citation omitted).

In *AD/SAT, Div. of Skylight, Inc. v. Associated Press, 181 F.3d 216, (2d Cir. 1999)*, ***HN13***[] the Second Circuit laid out the standards for determining whether the relevant market has been adequately defined:

> The relevant market for purposes of antitrust litigation is the "area of effective **[*634]** competition" within which the defendant operates. *Tampa Electric Co. v. Nashville Coal Co., 365 U.S. 320, 327-28, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961)*. As the Court explained in *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*: "The ... [relevant] market is composed of products that have reasonable interchangeability for the purposes for which they are produced - price, use and qualities considered. *Id. at 404, 76 S. Ct. 994*. Thus, **[**16]** products or services need not be identical to be part of the same market. See *id. at 394, 76 S. Ct. 994* ("Where there are market alternatives that buyers may readily use for their purposes, illegal monopoly does not exist merely because the product said to be monopolized differs from others."). In economists' terms, two products or services are reasonably interchangeable where there is sufficient cross-elasticity of demand. Cross-elasticity of demand exists if consumers would respond to a slight increase in the price of one product by switching to another product.

Id. at 227. Further, ***HN14***[] "the relevant market product must be identified, and the plaintiff must 'allege how the net economic effect of the alleged violation is to restrain trade in the relevant market, and that no reasonable alternate source is available' to consumers in that market." *Granite Partners, L.P. v. Bear, Stearns & Co. Inc., 58 F. Supp. 2d 228, 238 (S.D.N.Y. 1999)* (internal quotations and citations omitted).

Here, Natsource has alleged that the relevant market is limited to voice brokerage in a geographic area described as the "Eastern Market," which Natsource defines **[**17]** as including "the geographic regions known as NEPOOL (New England), New York, PJM (Pennsylvania, New Jersey and Maryland) and ANC." Complaint P16. Natsource does not explain what ANC is beyond stating that it involves the buying and selling of electrical line capacity, as it is conducted in the Eastern market and other markets." Complaint. P19. Natsource further asserts in a conclusory fashion "there is little or no cross elasticity of demand . . . between the Eastern Market and other voice brokerage markets." Id. at P23. Natsource has asserted that the power grids are physically distinct, and the individual brokers only have relationships with individuals who trade within their limited areas.

Notwithstanding Natsource's demarcation of the Eastern Market, many transactions are undertaken by national customers that do not trade electric power for their own use, see id. at P21, and accordingly are not bound by any grid system or otherwise limited geographically to when they can buy or sell electric power.

Although Natsource has alleged that there is no cross-elasticity of demand between voice brokerage and electronic brokerage because electronic brokerage is appropriate only **[**18]** for less complex deals, GFI has established by factual assertion that the majority of the deals completed through voice brokers are considered to be less complex deals.

Although Natsource claims that direct deals between customers are rare and confined to short term trades, see id. at P27, inter-dealer brokers are not privy to the internal deals conducted by and among the customers. Peter Wise ("Wise"), the head of the Energy Division at GFI, stated in a sworn affidavit that, based on his experience in the energy brokerage business, "some very complex deals are negotiated directly between customers." Wise Affidavit, P17. GFI has established as a factual matter that voice brokerage is used by customers of electric power when they believe it offers the best prices as a result of the efficiencies involved.

[*635] Even if it is assumed that Natsource had correctly defined the relevant market, it cannot demonstrate that GFI has or could obtain the necessary market share from which a finding of market power can be inferred. ***HN15***[] "The law in the Second Circuit is clear that a 19% market share cannot sustain a monopolization or attempt to monopolize claim." *Cohen v. Primerica Corp., 709 F. Supp. 63, 66 (E.D.N.Y. 1989)* **[**19]** (citing *Nifty Foods Corp. v. Great Atlantic and Pacific Tea Co., 614 F.2d 832, 841 (2d Cir. 1980))*. Even market shares of approximately 50% are insufficient to demonstrate market power where other factors such as low barriers to entry and strong competition, both of which are present here, exist. *U.S. v. Waste Mgmt., Inc., 743 F.2d 976, 984 (2d Cir. 1984)*; see also *Domed Stadium Hotel, Inc. v. Holiday Inns, Inc., 732 F.2d 480, 490 (5th Cir. 1984)*.

Natsource has alleged that GFI has obtained a 60% market share as a result of the employment of the Individual Defendants, but there are no publicly available figures to indicate the market shares of voice brokerage firms in any geographic area, calculated either by gross or net revenues, or even numbers of transactions.

In addition to GFI and Natsource, there are at least ten other competitors engaged in the voice brokerage of electric power and capacity within the area described by Natsource as the Eastern Market. In the aggregate, GFI's competitors collectively employ approximately sixty-five to seventy-five brokers in the so-called "Eastern Market." According to the evidence on the **[**20]** record, GFI's market share has not been established by the undisputed facts presented in this record. The rough measure of market share proposed by GFI is to determine the proportion of GFI's brokers in relations to the total number of brokers in the Eastern Market alleged by Natsource, which yields a figure of approximately 20%. As Natsource points out, this method is likely to be inaccurate because an accurate "calculation will include the volume of revenues or commissions generated by GFI and by its brokers." Natsource Opp. Brief at 21 n.10. However, Natsource has provided no evidence to show that the 60% figure could be established, and has only made the conclusory assertion that "GFI's brokers generate the vast majority of the revenues and commissions in the Eastern Market." Id. On a motion for summary judgment, this failure to present any evidence is dispositive.

In any event, ***HN16***[] "market share is just a way of estimating market power, which is the ultimate consideration. When there are better ways to estimate market power, the court should use them." *Ball Mem'l Hosp., Inc. v. Mutual Hosp. Ins., Inc., 784 F.2d 1325, 1336 (7th Cir. 1986)* (citing Waste Mgmt. **[**21]** , Inc.). These ways include a contemporaneous rise in price with increased market share. *Menasha Corp. v. News America Marketing In-Store, Inc., 354 F.3d 661, 666 (7th Cir. 2004)*. Natsource has not established showing market share sufficient to wield the market power required to raise prices to exclude competition.

In addition, ***HN17***[] barriers to entry in the voice brokerage market are low, and as such, there can be no dangerous probability of monopolization. *Tops Mkts., Inc., 142 F.3d at 99*. It is well-settled that "market share analysis, while essential, is not necessarily determinative in the calculation of monopoly power . . . [and] other market characteristics must also be considered . . . [including] the barriers to entry . . ." *Walsh Trucking, 812 F.2d at 791-92* (citations omitted). See *American Prof'l Testing Service, Inc. v. Harcourt Brace Jovanovich Legal and Prof'l Publications, Inc., 108 F.3d 1147, 1154 (9th Cir. 1997)* **[*636]** (citing *Rebel Oil Co. v. Atlantic Richfield Co., 51 F.3d 1421, 1439 (9th Cir. 1995)* (stating " even if [defendant] has a high market share, neither monopoly power nor a **[**22]** dangerous probability of achieving monopoly power, can exist absent evidence of barriers to new entry or expansion. "); III P. Areeda & H. Hovenkamp, ***Antitrust Law*** P 807g (2d ed. 2002).

To enter the voice brokerage market, there is little impediment, if any. There are no regulatory requirements, and very little capital is needed to engage in the voice brokerage of electric power, or other commodities. Nothing more is required than office space, telephone lines, and the brokers themselves, who can be employed at relatively low base salaries, as Natsource's contracts with the Individual Defendants amply demonstrate.

In contrast to Natsource's allegations, the undisputed facts establish that individual brokers are far from unique. Significantly, six of the seven Individual Defendants were employed at-will and could have left at any time, the majority with only a months' notice. Also, Natsource's employment agreements with six of the seven Individual Defendants did not specify that the brokers' responsibilities were limited to the brokerage of electric power in the so-called "Eastern Market," nor did they limit their employment responsibilities to the brokerage of electric power.

[23]** New brokers are hired, trained and are conducting business in a matter of months and experienced brokers have the ability to change product areas and can handle different trading responsibilities as the market dictates. Also, experienced brokers frequently are hired from one market competitor to another.

HN18[] The Department of Justice Antitrust Division's Merger Guidelines adopt a two-year test for determining whether there are barriers to entry in a market: if successful entry is likely within two years, there are no significant entry barriers and the government will not challenge mergers in that market. See generally, U.S. Dep't of Justice and FTC, 1997 Horizontal Merger Guidelines § 3.2; see also *F.T.C. v. Cardinal Health, Inc., 12 F. Supp. 2d 34, 55-58 (D.D.C. 1998)* (recognizing the Merger Guideline's two year test); *U.S. v. Syufy Enters., 903 F.2d 659, 666 (9th Cir. 1990)* (recognizing that there were no barriers to entry where competitors entered market within two years). [3] Thus, to establish sufficiently high entry barriers, Natsource would have to show that it would take at least two years for a competitor to enter the market and compete **[**24]** with GFI once it had obtained monopoly power. Here, however, finding brokers to service this market, whether by training, switching product areas or hiring brokers, and establishing phone lines and customer relationships, can be done in a matter of months.

Natsource does not allege that it would take years to enter the market, and Natsource's own employment agreements make clear, "timing" is not a serious concern in this market. Specifically, **[**25]** Natsource's non-compete clauses in the employment agreements at issue are for far less than two years -- indicating that it takes less than two years to use experienced brokers hired from competitors or **[*637]** to train new brokers in order to enter or expand in the market.

HN19[] There can be no violation of the antitrust laws unless the challenged conduct has harmed consumers, or at least has the potential to harm consumers, by increasing price and/or decreasing output.

> Even assuming that [plaintiff's] market share evidence were sufficient to create a triable issue as to market power, [plaintiff's] claim could not withstand summary judgment. "[A] showing of market power, while necessary to show adverse effect indirectly, is not sufficient. There must be other grounds to believe that the defendant's behavior will harm competition market-wide . . . ."

CDC Technologies, Inc. v. IDEXX Laboratories, Inc., 186 F.3d 74, 81 (2d Cir. 1999) (quoting *K.M.B. Warehouse Distribs., Inc. v. Walker Mfg. Co., 61 F.3d 123, 129 (2d Cir.1995))*. As explained by Judge Easterbrook, ***HN20***[] "market power means the ability to injure consumers by curtailing output and raising **[**26]** price; no possible injury, no market power, no market power, no violation; injury to the consumers is therefore an essential ingredient of liability." *Flip Side Prods., Inc. v. Jam Prods., Ltd., 843 F.2d 1024, 1032 (7th Cir. 1988)* (citations omitted). See *F.T.C. v. Indiana Fed'n of Dentists, 476 U.S. 447, 460-61, 90 L. Ed. 2d 445, 106 S. Ct. 2009 (1986)* (stating that "'proof of actual detrimental effects, such as reduction of output,' can obviate the need for an inquiry into market

---

[3] Although the Merger Guidelines do not carry the force of law, the courts note that they are helpful in providing an analytical framework for evaluating antitrust cases. See *New York v. Kraft General Foods, Inc. 926 F. Supp. 321, 359 (S.D.N.Y. 1995)* (relying on the Merger Guidelines to determine the relevant product market); see also *Waste Mgmt., Inc. 743 F.2d at 982* (using Merger Guidelines to evaluate ease of market entry); *Ball Mem'l Hosp., Inc., 784 F.2d at 1336* (utilizing Merger Guidelines to calculate market share).

power, which is but a 'surrogate for detrimental effects.'" (quoting 7 P. Areeda, ***Antitrust Law*** P 1511, p. 429 (1986).

Here, there has been no reduction in output or change in price. There are multiple inter-dealer brokers currently doing business in the geographic market defined by Natsource, including Natsource. That has not changed by the movement of some brokers from one company to another. GFI has not increased prices, nor could it and still remain competitive. ***HN21***[] "When customers are not tied to particular sellers each seller may perceive the demand as highly elastic (meaning the customers will quickly switch if any one supplier raises price, which makes the increase unprofitable) **[**27]** *Ball Mem'l Hosp. Inc., 784 F.2d at 1332*. The existence of price sensitive consumers prohibits any competitor from obtaining the power to control prices. Id. In fact, in the complaint, Natsource concedes that the customers of "power brokers expect that brokers will attempt to match offers and bids as closely as possible to obtain what is known as the 'best price.'" Id. at P18). If customers purchasing electric power desire the best prices, their multiple relationships with a variety of inter-dealer brokers permits them to shop for the best prices for the underlying commodities and the commissions both before or after the employment of the Individual Defendants by GFI.

Significantly, Natsource does not allege that prices have increased, or that they will increase, as a result of the employment changes. Paragraph 46 of the Complaint alleges, upon information and belief, that GFI has hired the Individual Defendants "in expectation that it will be able to raise, directly or indirectly, the prices that it charges its customers in the Eastern Market," without conclusory and self-serving allegations are insufficient to withstand the instant motion. See e.g., *Three Crown Ltd. P'ship v. Salomon Bros., Inc., 906 F. Supp. 876, 887-88 (S.D.N.Y. 1995).* **[**28]**

Natsource has sought to resist summary judgment because there has been no discovery. However, ***HN22***[] the absence of discovery alone does not necessarily bar summary judgment. *Connecticut Nat'l Bank v. Trans World Airlines, Inc., 762 F. Supp. 76, 79 (S.D.N.Y. 1991)* (holding that the court was not precluded from **[*638]** entering summary judgment due to the fact that no discovery had been conducted). Where a non-movant simply relies on bare allegations, dismissal is appropriate prior to discovery. *Eastway Constr. Corp. v. City of New York, 762 F.2d 243, 251 (2d Cir. 1985)*. For example, the Eastway court dismissed an antitrust claim, stating that "[a] bare assertion that evidence to support a fanciful allegation lies within the exclusive control of the defendants, and can be obtained only through discovery, is not sufficient to defeat a motion for summary judgment." *762 F.2d at 251* (citations omitted). An "opposing party's facts must be material and of a substantial nature, not fanciful, frivolous, gauzy, spurious, irrelevant, gossamer inferences, conjectural, speculative, nor merely suspicions." 6 J. Moore, Federal Practice P 56.15(3) at 56-486 to **[**29]** 65-487 (2d ed. 1976) (cited by *Contemporary Mission Inc. v. U.S. Postal Serv., 648 F.2d 97, 107 n. 14 (2d Cir. 1981)*.

HN23[] "If the nonmoving party does not [set forth specific facts showing there is a genuine issue of material fact] summary judgment will be entered against him." *Ying Jing Gan v. City of New York, 996 F.2d 522, 532 (2d Cir. 1993)*. Here, Natsource not only admitted the facts contained in Defendants' *Rule 56.1* Statement, but failed to set forth any disputed substantial facts whatsoever, relying solely on allegations in an unverified complaint. Summary judgment may properly be granted in antitrust cases and regularly is, where, as here, there is no viable claim based on the undisputed facts. See *AD/SAT, Div. of Skylight, Inc. v. Associated Press, 181 F.3d 216, 229-30 (2d Cir. 1999)*; *CDC Techs., Inc. v. IDEXX Lab., Inc., 186 F.3d 74, 81(2d Cir. 1999)*.

In any event, Natsource failed to submit a *Rule 56(f)* affidavit which is required where discovery is allegedly needed to oppose a summary judgment motion. See *Fed. R. Civ. P. 56(f)*. ***HN24***[] Pursuant to well-settled law, even "[a] reference to *Rule 56(f)* and to the need **[**30]** for additional discovery in a memorandum of law in opposition to a motion for summary judgment is not an adequate substitute for a *Rule 56(f)* affidavit, and the failure to file an affidavit under *Rule 56(f)* is itself sufficient grounds to reject a claim that the opportunity for discovery was inadequate." *Paddington Partners v. Bouchard, 34 F.3d 1132, 1137 (2d Cir. 1994)* (citations omitted); *Gurary v. Winehouse, 190 F.3d 37 (2d Cir. 1999)* (affirming Judge Stanton's grant of summary judgment and denying opportunity for discovery in securities case where plaintiff failed to satisfy *Rule 56(f)* test). This is clearly insufficient under the law:

> *HN25*[] If facts essential to support opposition to the summary judgment motion are not available, the nonmoving party may seek a continuance under *Rule 56(f)* to permit affidavits to be obtained or discovery to be had, but may not rely simply on conclusory statements or on contentions that the affidavits supporting the motion are not credible, or upon the mere allegations or denials of the moving party's pleading.

Gan, 996 F.2d at 532 (citations and quotations omitted).

HN26[] To be a sufficient **[**31]** affidavit, it "must include the nature of the uncompleted discovery; how the facts sought are reasonably expected to create a genuine issue of material fact; what efforts the affiant had made to obtain those facts; and why those efforts were unsuccessful." *Paddington, 34 F.3d at 1138*. Nor does Natsource, even in its legal memorandum, explain how discovery would lead to evidence to create material issue of fact. See *Hudson River Sloop Clearwater, Inc. v. Department of the Navy, 891 F.2d 414, 422 (2d Cir. 1989)* (denying request for discovery to oppose summary judgment because "even if plaintiffs had obtained what they **[*639]** stated would be uncovered, the information would have been insufficient to defeat summary judgment"). Accordingly, Natsource's request for discovery to avoid summary judgment must be denied.

Because Natsource has failed to allege a relevant market, has not shown that GFI has a sufficient market share to demonstrate market power, has not shown that there are significant barriers to entry, and has not shown that the challenged conduct would harm consumers, it has not demonstrated that GFI actions create a dangerous probability of obtaining **[**32]** monopoly power. Accordingly, Natsource's claim for attempted monopolization under *Section 2 of the Sherman Act* is dismissed.

Natsource's Remaining New York Law Claims Will Be Dismissed For Lack Of Subject Matter Jurisdiction

HN27[] According to *28 U.S.C. § 1367(c) (3)*, a district court may decline to exercise supplemental jurisdiction over state law claims if the court dismisses all claims over which it has original jurisdiction. See *United Mine Workers v. Gibbs, 383 U.S. 715, 726, 16 L. Ed. 2d 218, 86 S. Ct. 1130 (1966)* (holding "certainly if the federal claims are dismissed before trial, even though not insubstantial in a jurisdictional sense, the state claims should be dismissed as well"); *Jordan Inv. Co. v. Hunter Green Inv., Ltd., 154 F. Supp. 2d 682, 695 (S.D.N.Y. 2001)* (after dismissing RICO claim, dismissing state law claims without prejudice);*Yellow Page Solutions, Inc. v. Bell Atlantic Yellow Pages, 2001 U.S. Dist. LEXIS 18831, No. 00 Civ. 5663, 2001 WL 1468168, at * 15 (S.D.N.Y. Nov. 19, 2001)* (after dismissing antitrust claim, dismissing state law claims without prejudice); *Purgess v. Sharrock, 33 F.3d 134, 138 (2d Cir. 1994).* **[**33]**

The Court declines to exercise supplemental jurisdiction over its New York law based claims, dismissing the complaint against all defendants in its entirety.

Conclusion

For the reasons stated above, GFI's *Rule 12(b) (6)* motion to dismiss Natsource's complaint is denied. The motion for summary judgment dismissing Natsource's claims for attempted monopolization under *Section 2 of the Sherman Act* is granted, and the remaining New York State law claims are dismissed without prejudice for lack of subject matter jurisdiction.

It is so ordered.

New York, NY

August 18, 2004

ROBERT W. SWEET

U.S.D.J.

JamSports & Entm't, LLC v. Paradama Prods.

United States District Court for the Northern District of Illinois, Eastern Division

August 19, 2004, Decided ; August 23, 2004, Docketed

Case No. 02 C 2298

Reporter

336 F. Supp. 2d 824 *; 2004 U.S. Dist. LEXIS 16508 **; 2004-2 Trade Cas. (CCH) P74,524

JAMSPORTS AND ENTERTAINMENT, LLC, Plaintiff, v. PARADAMA PRODUCTIONS, INC., et al., Defendants.

Subsequent History: Motion denied by *JamSports & Entm't, LLC v. Paradama Prods., 2004 U.S. Dist. LEXIS 23561 (N.D. Ill., Nov. 22, 2004)*

Prior History: *JamSports & Entm't, LLC v. Paradama Prods., 2003 U.S. Dist. LEXIS 6100 (N.D. Ill., Apr. 15, 2003)*

Disposition: The Court denied Plaintiff's motion for partial summary judgment on its antitrust claims. The court granted in part and denied in part Plaintiff's motion for summary judgment against defendant, AMA Pro/Paradama; defendant's, AMA Pro/Paradama motion for summary judgment and defendant's Clear Channel motion for summary judgment. Plaintiff's motion to strike venue affidavits and defendant's, Clear Channel motion to exclude the Baade's testimony were denied.

HN2[] **Summary Judgment, Evidentiary Considerations**

The court upon a motion for summary judgment evaluates admissible evidence in the record in the light most favorable to the nonmoving party. The court's function is not to weigh the evidence but merely to determine if there is a genuine issue for trial. The nonmovant will successfully oppose summary judgment only when it presents definite, competent evidence to rebut the motion. Neither the mere existence of some alleged factual dispute between the parties nor the existence of some metaphysical doubt as to the material facts is sufficient to defeat a motion for summary judgment.

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

HN3[] **Antitrust & Trade Law, Sherman Act**

In complex antitrust cases, summary judgment should be used sparingly, unless the record is clear that the antitrust claims cannot succeed. If the claims cannot succeed, then judicial administration is served better by disposition prior to trial.

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

HN4[] **Clayton Act, Claims**

Section 4 of the Clayton Act creates a right of action for any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws. *15 U.S.C.S. § 15*. The United States Supreme Court has interpreted this to mean that for a private plaintiff to have a right of action under § 4, the plaintiff must prove the existence of antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. In other words, it is not enough for a plaintiff to show injury in fact; the plaintiff must show injury that reflects the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation. The purpose of the antitrust injury requirement is to ensure that the harm claimed by the plaintiff corresponds to the rationale for finding a violation of the antitrust laws in the first place, and it prevents losses that stem from competition from supporting suits by private plaintiffs for either damages or equitable relief.

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

HN5[] **Clayton Act, Claims**

The antitrust injury requirement can be understood as an element of a private plaintiffs standing to sue under § 4 of the Clayton Act. A showing of antitrust injury is a necessary but insufficient condition of antitrust standing.

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN6[] **Standing, Clayton Act**

The United States Court of Appeals for the Seventh Circuit has stressed that ***antitrust law*** is designed to protect consumers from producers, not to protect producers from each other or to ensure that one firm gets more of the business. Several Seventh Circuit opinions have provided that to show antitrust injury, the plaintiff must show harm to consumers in the form of decreased output or increased prices. To this end, the antitrust injury doctrine requires every plaintiff to show that its loss comes from acts that reduce output or raise prices to consumers. These consistent statements that antitrust injury is limited to decreased output and increased prices finds support in the United States Supreme Court's understanding of why Congress created a private right of action in antitrust cases. The legislative history of the language codified as § 4 of the Clayton Act shows that Congress was primarily interested in creating an effective remedy for consumers who were forced to pay excessive prices by the giant trusts and combinations that dominated certain interstate markets.

If no consumer interest can be discerned even remotely in a suit brought by a competitor - if, a victory for the competitor can confer no benefit, certain or probable, present or future, on consumers - a court is entitled to question whether a violation of ***antitrust law*** is being charged.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN9[] **Private Actions, Standing**

The United States Supreme Court has rejected the view that competition between parties to acquire a natural monopoly is not protected by the antitrust laws because substitution of one competitor for another would not injure competition. Specifically, the Supreme Court has held that use of monopoly power to preclude competition to acquire a natural monopoly violates the Sherman Act. While ***antitrust law*** may be moving in the direction of being construed as a "pure" consumer protection measure, in the natural monopoly area, at least, the Supreme Court has not embraced this approach. The antitrust laws seek to protect competition, as well as to protect those activities that will promote competition. The antitrust laws are concerned with the competitive process, and their application does not depend in each particular case upon the ultimate demonstrable consumer effect. A healthy and unimpaired competitive process is presumed to be in the consumer interest. Part of the problem with requiring a plaintiff to pinpoint just how the public is harmed by a short-circuited competitive process is that the plaintiff has never been given an opportunity to compete freely and win the monopoly. The fact that the precise impact of a defendant's conduct on the broad consuming public has remained unfocused does not prevent a finding that the antitrust laws have been violated.

Antitrust & Trade Law > Sherman Act > General Overview

HN10[] **Antitrust & Trade Law, Sherman Act**

The so-called "essential facilities doctrine" imposes upon a firm controlling an essential facility - that is, a facility that cannot reasonably be duplicated and to which access is necessary if one wishes to compete - the obligation to make that facility available to competitors on nondiscriminatory terms. A refusal to deal in the context of an essential facility violates *15 U.S.C.S. § 2* because control of an essential facility can extend monopoly power from one stage of production to another, and from one market into another.

Antitrust & Trade Law > Sherman Act > General Overview

HN11[] **Antitrust & Trade Law, Sherman Act**

To establish *15 U.S.C.S. § 2* liability under the essential facilities doctrine, the plaintiff must show: (1) control of the essential facility by a monopolist; (2) a competitor's inability practically or reasonably to duplicate the essential facility; (3) the denial of the use of the facility to a competitor; and (4) the feasibility of providing the facility.

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > Preliminary Considerations > Venue > Corporations

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > State Regulation

Civil Procedure > Preliminary Considerations > Venue > General Overview

HN12[] **Antitrust & Trade Law, Sherman Act**

Essential for purposes of ***antitrust law***, means essential; it does not mean the most economical. Nor does it mean "best" or "preferable." A facility is not essential for purposes of establishing liability under the Sherman Act, *15 U.S.C.S. § 2*, and the essential facilities doctrine, even if it is widely preferred by consumers and producers in the market, as long as there is an alternative (albeit inferior) venue.

Antitrust & Trade Law > Regulated Industries > Communications > Sherman Act

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN13[] **Sherman Act, Penalties**

The offense of monopoly under the Sherman Act, *15 U.S.C.S. § 2*, has two elements: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN14[] **Market Definition, Relevant Market**

Determining whether a relevant market exists for antitrust purposes involves a deeply fact- intensive inquiry. The boundaries of a market or submarket are determined 'by examining such practical indicia as industry or public recognition of the submarket [or market] as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors.

Evidence > ... > Testimony > Expert Witnesses > General Overview

Evidence > Admissibility > Expert Witnesses

HN15[] **Expert Witnesses, Daubert Standard**

The United States Supreme Court has held that reliability is the touchstone for expert testimony based on "scientific, technical, or other specialized knowledge." *Fed. R. Evid. 702*. As such, the court must act as a gatekeeper to ensure that scientific testimony is supported by appropriate validation -- i.e., good grounds, based on what is known. The Supreme Court has extended this gatekeeping function to all expert testimony.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN16[] **Regulated Practices, Market Definition**

Though studies based on cross-elasticities of demand are certainly helpful in identifying a relevant market, they are not essential to demonstrating the existence of a relevant market.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN17[] **Sherman Act, Claims**

The United States Supreme Court has characterized the second element of a *15 U.S.C.S. § 2* claim as the use of monopoly power to foreclose competition, to gain a competitive advantage, or to destroy a competitor.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN18[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Firms "intend" to do all the business they can, to crush their rivals if they can. Intent to harm without more offers too vague a standard in a world where executives may think no further than "Let's get more business." Rivalry is harsh, and consumers gain the most when firms slash costs to the bone and pare price down to cost, all in pursuit of more business. Few firms cut price unaware of what they are doing; price reductions are carried out in pursuit of sales at others' expense. Entrepreneurs who work hardest to cut their prices will do the most damage to their rivals, and they will see good in it. You cannot be a sensible business executive, without understanding the link among prices, your firm's success, and other firms' distress. If courts use the vigorous, nasty pursuit of sales as evidence of a forbidden "intent," they run the risk of penalizing the motive forces of competition.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN19[] **Actual Monopolization, Anticompetitive & Predatory Practices**

The United States Supreme Court has found that intent should not be a basis for liability in predatory pricing cases. Rather the court favors a test that looks at the firm's possibility of recouping its profits from cutting prices.

Contracts Law > Personal Property > Personalty Leases > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

HN20[] **Personal Property, Personalty Leases**

The United States Court of Appeals for the Seventh Circuit has said that when it comes to liability under the Sherman Act, *15 U.S.C.S. § 2*, if conduct is not objectively anticompetitive the fact that it was motivated by hostility to competitors is irrelevant.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Contracts Law > Personal Property > Personalty Leases > General Overview

HN21[] **Monopolies & Monopolization, Actual Monopolization**

Intent is relevant to the offense of monopolization.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN22[] **Monopolies & Monopolization, Actual Monopolization**

The "intent" to achieve or maintain a monopoly is no more unlawful than the possession of a monopoly. Indeed, the goal of any profit-maximizing firm is to obtain a monopoly by capturing an ever increasing share of the market. Virtually all business behavior is designed to enable firms to raise their prices above the level that would exist in a perfectly competitive market. Economic rent -- the profit earned in excess of the return a perfectly competitive market would yield -- provides the incentive for firms to engage in and assume the risk of business activity. Monopolies achieved through superior skill are no less intentional than those achieved by anticompetitive means, so the intent relevant to a claim under the Sherman Act, 15 U.S.C.S. § 2, is only the intent to maintain or achieve monopoly power by anticompetitive means. Section 2 forbids not the intentional pursuit of monopoly power but the employment of unjustifiable means to gain that power.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

HN23[] Monopolies & Monopolization, Actual Monopolization

Conduct that tends to exclude competitors may survive antitrust scrutiny if the exclusion is the product of a "normal business purpose," for the presence of a legitimate business justification reduces the likelihood that the conduct will produce undesirable effects on the competitive process. But whether the defendant had "valid business reasons" for its conduct is a question of fact. And the trier of fact can look to the defendant's intent to determine whether its conduct had a purpose other than excluding competition.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN24[] Monopolies & Monopolization, Actual Monopolization

When courts consider the "intent" of a firm charged with monopolization, they look not to whether the firm intended to achieve or maintain a monopoly, but to whether the underlying purpose of the firm's conduct was to enable the firm to compete more effectively. Did the firm engage in the challenged conduct for a legitimate business reason? Or was the firm's conduct designed solely to insulate the firm from competitive pressure? Intent is relevant, then, because intent determines whether the challenged conduct is fairly characterized as "exclusionary" or "anticompetitive." When courts speak of a firm's intent in a monopolization case, they refer to the legitimacy of the firm's conduct as measured by its intended effect on the competitive process.

Civil Procedure > Judgments > Summary Judgment > Partial Summary Judgment

HN25[] Summary Judgment, Partial Summary Judgment

Summary judgment is not contemplated or authorized for any portion of a claim less than the whole.

Opinion by: MATTHEW F. KENNELLY

Opinion

[*827] **MEMORANDUM OPINION AND ORDER**

MATTHEW F. KENNELLY, District Judge:

This case involves the promotion of Supercross, a championship dirt track stadium motorcycle racing. JamSports and Entertainment, LLC, a sporting events promoter, sued Paradama Productions, Which does business as AMA Pro Racing, **[**2]** for allegedly breaching a contract that would have given JamSports the right to produce and promote the AMA Supercross Series for 2003-2009. [1] JamSports also alleges that by entertaining a competing proposal from a subsidiary of Clear Channel Communications while negotiations were ongoing with JamSports and by imposing conditions for approval that had not been discussed with JamSports, AMA Pro breached a written

[1] "AMA" stands for the American Motorcyclist Association.

agreement to negotiate with JamSports exclusively and in good faith. JamSports also has Sued Clear Channel Communications and two subsidiaries (all of which will be referred to as Clear Channel) for tortious interference with contract for allegedly enticing AMA Pro to contract with Clear Channel to produce the AMA Supercross Series for the 2003-2009 seasons. Finally, JamSports alleges that Clear Channel's methods for obtaining the AMA contract constituted violations of *§§ 1and 2* of the Sherman Act.

More than a year ago, the Clear Channel defendants **[**3]** moved to dismiss JamSports' amended complaint. The Court dismissed Counts 9 and 10, which raised antitrust market allocation claims. *JamSports and Entertainment, LLC, v. Paradama Productions; Inc., 2003 U.S. Dist. LEXIS 6100, No. 02 C 2298, 2003 WL 1873563, at *14 (N.D. Ill. Apr. 15, 2003)*. The Court also dismissed Counts 5, 7, 11, 13 and 14 to the extent that they alleged monopolization or monopoly leveraging in a geographic submarket, as opposed to a national market for the promotion of Supercross. *2003 U.S. Dist. LEXIS 6100, 2003 WL 1873563, at *8, * 13*. JamSports then amended its complaint for a second time and restated Counts 5, 7, 9, 10, 11, 13 and 14. AMA Pro argues that the Court should dismiss Counts 9 and 10 of the Second Amended Complaint. These claims are identical to claims we dismissed in the Amended Complaint, and for this reason the Court dismisses them for the reasons previously stated. Clear Channel argues that Counts 7, 8, 11, 13 and 14 no longer remain in the case either because they allege monopolization of geographic submarkets only. Clear Channel Mot. for Summ. J. at n.2. JamSports has failed to respond to this argument. After reviewing the Second Amended Complaint, the Court **[**4]** agrees with Clear Channel that Counts 7, 8, 11, 13 and 14 are based on the geographic Submarket theory that we have rejected. Therefore, those Counts are dismissed and are no longer a part of this case.

Clear Channel now moves for summary judgment on all of JamSports' remaining claims. AMA Pro seeks summary judgment on the breach of contract claims. JamSports seeks summary judgment on two issues that are part of its antitrust claims and on its breach of contract claims against AMA Pro. For the reasons stated **[*828]** below, the Court denies JamSports' motion regarding the antitrust claims and grants in part and denies in part the remaining motions.

Background

AMA Pro began sanctioning supercross races in the 1970s. Clear Channel entered the supercross promotion market through acquisitions. In 1996, PACE Motor Sports promoted all but one of the races in the AMA-sanctioned supercross series. SFX Entertainment bought PACE in 1998, and Clear Channel acquired SFX in 2000, With the acquisition of PACE and SFX, Clear Channel succeeded to their contract to produce the AMA-sanctioned supercross series for the 1997 to 2002 seasons. The contract required Clear Channel to hold the races from January **[**5]** to May. Since 1998, sixteen supercross races have been held each year, except for in 2001, when only fifteen races were held.

In May 1999, AMA Pro and Clear Channel began negotiating a new promotion contract for the 2003 season and beyond. While these negotiations were in process, AMA Pro began discussions with three other promoters, including JamSports in 2001. On November 2, 2001, AMA Pro and JamSports signed a letter of intent regarding the promotion of the AMA- sanctioned supercross series for the 2003-2009 Seasons. The portions of the letter of intent that are relevant to the Court's decision read as follows:

> AMA Pro Racing, owner of the Supercross Series, and JamSports hereby express their intent to enter into an agreement to promote AMA Supercross events and undertake related sales and marketing matters....
>
> 1. Framework. AMA Pro Racing and JamSports shall agree to produce and promote nor less than fourteen (14) and up to a mutually agreed upon number of AMA Supercross events per season (currently January 1 through the first week of May) for a seven (7) year period beginning January 1, 2003, with an opportunity to extend the term based on criteria such as operating issues, **[**6]** financial issues, brand development and event attendance and such other criteria as to be further clarified by the parties hereto....
>
> 12. Confidentiality. AMA Pro Racing and JamSports each agree that the terms of this letter agreement, and, in particular, its financial terms, are private and confidential. Neither party hereto Shall divulge the terms of this

> letter of intent to any other persons in any manner, except each party may so inform its attorneys, accountants and financial consultants as reasonably necessary for the performance of its obligations hereunder and under the Promotion Agreement, who, however, shall be instructed not to divulge its terms to any other persons except and unless as they may be finally required by law or court process. In the event of a breach of the foregoing, the damaged party may seek recovery of all damages as allowed by law, including, without limitation, injunctive relief.
>
> 13. Exclusivity. Each of the parties agrees that for a period of ninety (90) days after the date this letter is fully executed by the parties hereto and for a period of [sic], AMA Pro Racing and JamSports shall negotiate exclusively and in good faith with one another, **[**7]** and neither party shall enter into any discussion or negotiations with any third party with respect to the subject matter hereof. If a party hereto shall receive any offer from a third party with respect to the subject matter hereof, the receiving party shall promptly notify the other party hereto of the offer, the name of the offeror and the terms thereof. The. **[*829]** parties shall use their best efforts, negotiating in good faith, to enter into the Promotion Agreement within thirty (30) days from the date this letter is fully executed by the parties hereto.
>
> 14. Final Contract. Except for the obligations set forth in Sections 12, 13 and 16, this letter of intent is not binding in any way upon the parties hereto. This letter of intent is expressly conditioned upon the parties entering into the Promotion Agreement. JamSports' counsel shall prepare and submit to AMA Pro Racing, and its counsel a draft of the Promotion Agreement as soon as is reasonably possible after the date upon which this letter of intent is fully executed by the parties hereto.
>
> 15. Closing. The transaction contemplated hereby shall close no later than ninety (90) days from the date this letter is fully executed **[**8]** by the parties hereto and at such time and place as the parties hereto shall agree upon, subject to the satisfaction or waiver of any conditions precedent to closing which are agreed upon by the parties.
>
> 16. Publicity. Neither party hereto shall issue any press releases or other announcements regarding this letter of intent or the transaction contemplated hereby unless such release or announcement first shall be approved by the other party or shall be: required by law.

2d Am. Compl., Ex. A.

Three days after signing the letter of intent, AMA Pro sent a letter to facilities managers advising them that AMA Pro "has entered into an agreement with JamSports, a division of Chicago-based Jam Productions, for the exclusive promotion of AMA Supercross events for the 2003-2009 seasons." 2d Am. Compl., Ex. B. The letter "authorized JamSports and/or Jam Productions to negotiate with your facility, on an exclusive basis, regarding the organization and production of future AMA Supercross events." *Id*. The following day, AMA Pro announced on its website that it had "selected JamSports and Entertainment as its new promoter partner for the AMA U.S. Supercross Championship Series commencing **[**9]** with the 2003 seasons and extending through the 2009 season." 2d Am. Compl., Ex. C. The website further explained that "the decision was made by the Board of Directors of AMA Pro Racing after evaluating proposals from several companies, including Clear Channel Entertainment, the current promoter of AMA Supercross events." *Id*. On November 21, 2001, AMA Pro's attorney, Kevin Shoemaker, sent JamSports' attorney, Vicki Baue, a draft of the sanctioning agreement, accompanied by a letter stating he had provided "a copy of this agreement to Tim Owens, counsel for the American Motorcyclist Association ("AMA")," stating that, "the final agreement is subject to approval by Timand the AMA." Defs.' Ex. Jam 23. Owens and AMA Pro CEO Scott Hollingsworth were "cc'd" on the letter.

In late December 2001, AMA Pro's website announced that the 2003 AMA supercross series would include events in New York, Los Angeles, Atlanta, Dallas, Houston, Phoenix, Indianapolis, Las Vegas, Washington, D.C., San Francisco, Boston, New Orleans, Charlotte, Tampa and Daytona. 2d Am. Compl., Ex. F. In the online press release, Hollingsworth was quoted as saying:

> I am delighted With the new relationship with JamSports. **[**10]** The next era of growth Of AMA Supercross is dependent upon live television and nationwide markets. We were excited to announce this month a live

> television package with Speed Channel, and now we have markets in place that will ensure AMA Supercross is seen by fans coast-to-coast.

[*830] Id. John Farris, AMA Pro Racing's vice president of commercial development, stated:

> The announcement of these markets comes as a result of extensive conversations with our participants our television parmers who help us promote the series and its stars, and current and prospective sponsors of both the Championship and the teams. . . . In 2003, we will deliver a superior marketing platform that will take AMA Supercross across the country into a great list of major markets.

Id.

Clear Channel, however, did not abandon its effort to keep the supercross series. According to the minutes from the November 12, 2001, meeting of the AMA Pro Board of Directors, Clear Channel had sent letters to all the Board members "just prior to the meeting" indicating it wanted to continue negotiations for the AMA contract. Pl.'s Ex. S at 2. "Mr. Hollingsworth reminded the Board that further negotiations **[**11]** with CCE were prohibited by the terms of a letter of intent between AMA Pro and JamSports. Those terms required the AMA not to talk with any other parties on this subject until either an agreement had been reached or a 90- day confidentiality period had elapsed." Id. But a week later, Clear Channel sent a proposal to P.J. Harvey, a member of AMA Pro's Board, accompanied by a letter, which stated in part:

> On November 9, 2001, we sent a letter to you expressing our interest in continuing negotiations with the AMA concerning a long-term agreement, provided that the AMA is still in a position to do so. As of this date, we have not received any response from the AMA, and we are uncertain as to whether the lack of response indicates an unwillingness to continue our negotiations.
>
> In our last communication with you, we indicated Clear Channel Entertainment - Motor Sports division's willingness to pay the increased financial consideration that you last requested on behalf of the AMA. In order to further clarify our position, I have revised the Proposal that was provided to you on October 5, 2001 to indicate the terms that Clear Channel is willing to accept. The revised Proposal incorporates **[**12]** all of the language changes requested by you along with confirmation of the requested increase in financial consideration. The Proposal, which has been signed by me on behalf of Clear Channel Entertainment - Motor Sports' division, is enclosed herein for your review.
>
> You should understand that we are only submitting this Proposal to you if the AMA is in a position to consider it. If not, please disregard the Proposal:
>
> While we are hopeful that there remains a window of opportunity for us to attempt to reach an agreement with the AMA we do not want to interfere with any binding agreement that the AMA may have reached with Jam or any third parties. Thus our Proposal is contingent upon AMA being free of contractual obligations that would restrict its ability to deal with Clear Channel at this point.

AMA-CCE Ex. 30. The letter also indicated that Clear Channel intended to produce a supercross series with or without AMA's sanctioning. The parties dispute whether Clear Channel knew at the time about the exclusivity clause of AMA Pro and JamSports' letter of intent.

When AMA Pro and JamSports failed to reach an agreement within the 90 day deadline set by the letter of intent, **[**13]** AMA Pro sent JamSports a letter extending the deadline to 12 a.m. February 6, 2002 and stating that "we look forward to continuing **[*831]** the good faith efforts both parties have shown in attempting to conclude the agreement contemplated under the Letter of Intent," 2d Am. Compl., Ex. G. On February 5, 2002, the AMA Pro Board of Directors met several times to discuss the proposed promotion agreement with JamSports. According to the minutes of the meeting, when the board convened for the first time that day, two board members - Harvey and Rick Gray - expressed their dissatisfaction with JamSports' insistence that the promotion agreement include a provision making its $ 3 million up-front payment to AMA Pro refundable even though the letter of intent described the $ 3 million payment as non-refundable. Defs.' Ex. Jam 55. Harvey and Gray said "they could not consider approval of the agreement as long as such language was included." Id. Another board member discussed that Clear Channel had obtained sanctioning of a supercross series from the Federation Internationale de Motocyclisme ("FIM") and Dorna, the firm that promotes FIM-sanctioned races. Id. The members then voted on accepting the revised **[**14]** language to the JamSports' agreement, but the motion was defeated 3 to 2. Id. "The remaining Board members directed Mr. Hollingsworth to go back to the negotiating table with JamSports and propose a deal based on the Letter of Intent that would include no refundability provision." Id. The meeting then adjourned.

After the meeting adjourned, Hollingsworth spoke with JamSports. As a result of that conversation, JamSports sent Hollingsworth a letter dated February 5, stating: "You have informed us of the requirement by your Board that the $ 3 million advance must be nonrefundable. We agree to a nonrefundable $ 3 million advance with terms consistent with the Letter of Intent." 2d Am. Compl., Ex. H. On the evening of February 5, the board reconvened. According to the minutes of the executive session of the meeting, one of the directors advised the others

> that the newly formed alliance between Clear Channel [("CCE")], Dorna and the FIM had serious' implications on the survivability of a JamSports-promoted AMA Supercross series running in direct competition with a CCE-promoted supercross series. He reminded the Directors that Dorna owns and operates the G.P. Road Race **[**15]** World Championships, which are series of critical importance to the motorcycle factories. He said that the close working relationship between Dorna and the manufacturers in that series could prompt a decision by the manufacturers, at the factory level, to compete in the CCE Supercross series rather than in the AMA/JamSports series. He asked the Directors if, given that possibility, they really wanted to attempt a Supercross series without participation by the OEMs, $ 3 million cash influx or not. He said that a Supercross series without OEM participation would be disastrous for the AMA and for the sport of motorcycling in general.

Defs.' Ex. Jam 56. The minutes reflect that the "Directors agreed that this was a serious issue warranting further discussion pending receipt of information arising from" a meeting the next day with representatives from Clear Channel, Dorna and the FIM. Id.

The meeting went back into regular session, at which time Hollingsworth informed the board that "he had gotten verbal confirmation from Jerry Mickelson of JamSports to agree to language that was more consistent with the Letter of Intent. This included the removal of all references to a refund **[**16]** of the $ 3 million up-front payment, as well as elimination of the Revised Marketing Plan and the Termination Clause." Defs.' Ex. Jam 57. The AMA's lawyer, Owens, and AMA Pro's lawyer; Shoemaker, **[*832]** joined the teleconference. After discussing whether AMA wanted to vote on the revised contract before the midnight deadline expired or wait for JamSports to make the changes in writing, the board moved to "call upon JamSports to provide, in writing, specific language that removed the aforementioned provisions and clauses, and that the Board agree to deliver a definite, final decision to JamSports in no more than 7 days." Id. When the clock struck midnight on February 6, an agreement between JamSports and AMA Pro had not been signed.

On February 8, JamSports' attorney sent a letter to AMA Pro reiterating JamSports' agreement that its $ 3 million advance to AMA Pro would be non-refundable and attaching a revised promotion agreement reflecting the change. 2d Am. Compl., Ex. I. But on February 6, AMA Pro had contacted Clear Channel to reopen negotiations, which Clear Channel agreed to do after receiving written assurance from AMA Pro that it was free to negotiate. Clear Channel sent a proposal **[**17]** to AMA Pro on February 14. At the AMA Pro board's February 14 meeting, the acting chairman asked the group to consider Clear Channel's latest proposal. Defs.' Ex. Jam No. 60. The group then debated the merits of the Clear Channel proposal in comparison with JamSports' proposal. Id. The board voted to "forward both the CCE and the JamSports proposals to the AMA Board, accompanied by a study of the pros and cons of both, with a recommendation by AMA Pro to ratify, the JamSports proposal." Id.

After the AMA Board met on February 16, it directed AMA Pro to enter into an agreement with Clear Channel. On April 12, 2002, AMA Pro announced on its website that it had signed a promotion agreement with Clear Channel for the 2003-2009 seasons. 2d Am. Compl., Ex. J. JamSports alleges that Clear Channel wrested the AMA Pro contract away from it by: requiring venues hosting Clear Channel supercross races to agree not to book other motor sports events within 60 to 90 days of a Clear Channel event; offering original equipment manufacturers ("OEMs") and supercross star athletes financial incentives for participating in Clear Channel's series; and seeking endorsement from an alternative sanctioning **[**18]** body (FIM) that could limit the AMA's sanctioning activities.

Analysis

HN1[] Summary judgment is proper when "the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law." *Fed. R. Civ. P. 56(c)*. HN2[] The Court evaluates admissible evidence in the record in the light most favorable to the nonmoving party. *Bennett v. Roberts., 295 F.3d 687, 694 (7th Cir. 2002)*. The Court's "function is not to weigh the evidence but merely to determine if 'there is a genuine issue for trial.'" Id. (citation omitted). "The nonmovant will successfully oppose summary judgment only when it presents 'definite, competent evidence to rebut the motion.'" *Vukadinovich v. Bd. of Sch. Trs. of N. Newton Sch. Corp., 278 F.3d 693, 699 (7th Cir. 2002)* (citation omitted). "Neither the mere existence of some alleged factual dispute between the parties nor the existence of some metaphysical doubt as to the material facts is sufficient to defeat a motion for summary **[**19]** judgment." *Chiaramonte v. FashiOn Bed Group, Inc., 129 F.3d 391, 395 (7th Cir. 1997)* (citations and internal quotation marks omitted). However, HN3[] "in complex antitrust cases, summary judgment should be used sparingly, unless the record is clear that the antitrust claims cannot succeed. If the claims cannot succeed, **[*833]** then judicial administration is served better by disposition prior to trial." *Wigod v. Chicago Mercantile Exchange, 981 F.2d 1510, 1514-15 (7th Cir. 1992)* (citations omitted).

Antitrust Claims

Clear Channel raises two general arguments for why JamSports cannot succeed on its antitrust claims. First, it argues that JamSports' cannot show that Clear Channel's allegedly anticompetitive behavior has caused the type of injury that the *Clayton* and Sherman Acts were intended to combat. Second, Clear Channel argues the claims based on the essential facilities doctrine (all the remaining antitrust claims except Count 15) must fail because the stadiums to which JamSports' access was blocked were not essential facilities. Clear Channel also argues it is entitled to summary judgment on Count 15 because JamSports cannot show that Clear Channel's conduct **[**20]** was anticompetitive. We will review each of Clear Channel's arguments in turn. 1.

Antitrust Injury

HN4[] Section 4 of the Clayton Act creates a right of action for "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws." *15 U.S.C. § 15*. The Supreme Court has interpreted this to mean that for a private plaintiff to have a right of action under *§ 4*, the "plaintiff must prove the existence of 'antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful.'" *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 334, 109 L. Ed. 2d 333, 110 S. Ct. 1884 (1990)* (emphasis in original; quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977))*. In other words, it is not enough for a plaintiff to show injury in fact; the plaintiff must show injury that "reflects the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation." *Brunswick Corp., 429 U.S. at 489*. The purpose of the antitrust **[**21]** injury requirement is to ensure that "the harm claimed by the plaintiff corresponds to the rationale for finding a violation of the antitrust laws in the first place, and it prevents losses that stem from competition from supporting suits by private plaintiffs for either damages or equitable relief." *Atlantic Richfield Co., 495 U.S. at 342*. HN5[] The antitrust injury requirement can be understood as an element of a private plaintiffs standing to sue under *§ 4* of the Clayton Act. *Midwest Gas Services, Inc. v. Indiana Gas Co., 317 F.3d 703, 710 (7th Cir. 2003)* (citing *Brunswick Corp., 429 U.S. at 489*). See also, e.g., *City of Pittsburgh v. West Penn PowerCo., 147 F.3d 256, 265 (3d Cir. 1998)* ("[A] showing of antitrust injury is a necessary but insufficient condition of antitrust standing.").

HN6[] The Seventh Circuit has "stressed that ***antitrust [law***] is designed to protect consumers from producers, not to protect producers from each other or to ensure that one firm gets more of the business." *Ehredt Underground, Inc. v. Commonwealth Edison Co., 90 F.3d 238, 240 (7th Cir. 1996)* (citations omitted). Clear Channel reads this to mean that **[**22]** to show antitrust injury, the plaintiff must show harm to consumers in the form of decreased output or increased prices. Several Seventh Circuit decisions authored by Judge Easterbrook adopt this definition of antitrust injury. Writing for the court, Judge Easterbrook has explained that "the antitrust injury doctrine of *Atlantic Richfield Co. . . . ; Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104, 93 L. Ed. 2d 427, 107 S. Ct. 484 (1986)*; and BrunsWick Corp . . . . ; requires every plaintiff to show that its loss comes **[*834]** from acts that reduce output or raise prices to consumers." *Chicago Professional Sports Ltd.Partnership v. Nat'l Basketball Ass 'n, 961 F.2d 667, 670 (7th Cir. 1992)* (citations omitted). See also *U.S. Gypsum Co. v. Indiana Gas Co., 350 F.3d 623,626-27 (7th Cir. 2003)*; *Stamatakis Industries, Inc. v. King, 965 F.2d 469, 471 (7th Cir. 1992)*; *Ball Memorial Hospital Inc. v. Mutual Hospital Insurance, Inc., 784 F.2d 1325, 1334 (7th Cir. 1986)*. Judge Easterbrook's consistent statements that antitrust injury is limited to decreased output and increased prices finds support in the Supreme Court's **[**23]** understanding of why Congress created a private right of action in antitrust cases. The Court has explained that the legislative history of the language currently codified as *§ 4 of the Clayton Act* "shows that Congress was primarily interested in creating an effective remedy for consumers who were forced to pay excessive prices by the giant trusts and combinations that dominated certain interstate markets." *Associated General Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. 519, 530, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983)* (footnote Omitted).

Clear Channel argues that JamSports cannot show that reduced output or increased prices resulted from Clear Channel's conduct because the number of promoters of the AMA-sanctioned supercross series has remained unchanged. Clear Channel reasons as follows: JamSports claims Clear Channel kept it out of the market for promoting the AMA, sanctioned supercross series; because there is only one promoter of the AMA-sanctioned series, JamSports was attempting to replace Clear Channel as the sole promoter of the series; because there would be only one promoter of that series whether Clear Channel or JamSports won the **[**24]** AMA Pro contract, the award of the contract had no effect on output or prices. Clear Channel contends that as a matter of law, no antitrust injury can be found when one monopolist prevents another firm from replacing it as the monopolist.

This legal theory has support in the Seventh Circuit's cases. ***HN7***[] The Seventh Circuit has stated that conduct that "merely shifts a lawful monopoly into different hands.., has no antitrust significance, although it hurts the lawful owner of the monopoly power." *Brunswick Corp. v. Riegel Textile Corp., 752 F.2d 261, 266 (7th Cir. 1984)*. In Riegel Textile Corp., the plaintiff claimed that the defendant had violated *§ 2 of the Sherman Act* by fraudulently patenting the antistatic yarn that the plaintiff had invented and reaping the benefits of the patent-created monopoly to which the plaintiff thought it was entitled. Judge Posner said the court could not find the "consumer interest" in the case because consumers would not care who held the patent and thereby became a monopolist in the antistatic yarn market. The court concluded that ***HN8***[] "if no consumer interest can be discerned even remotely in a suit brought by a competitor - if, as here, **[**25]** a victory for the competitor can confer no benefit, certain or probable, present or future, on consumers - a court is entitled to question whether a violation of ***antitrust law*** is being charged." *Id. at 266-67* (citing Frank Easterbrook, The Limits of Antitrust, *63 Tex. L. Rev. 1, 33-39 (1984)*). See also *West Penn Power Co., 147 F.3d at 269* (merger of electric companies did not cause antitrust injury because regulation had prevented competition in the market for electricity prior to the merger).

But a case decided by the Seventh Circuit two years after Riegel Textile Corp. expressly rejects the legal theory on which Clear Channel's argument is based. In *Fishman v. Estate of Wirtz, 807 F.2d 520 (7th Cir. 1986)*, the Seventh Circuit was asked to determine whether anticompetitive **[*835]** conduct in the vying for a natural monopoly could cause antitrust injury. Fishman involved the sale of the Chicago Bulls basketball franchise. The owner of the Bulls agreed to sell the team to the plaintiffs, but the NBA Board of Governors scuttled the deal when a competing bidder, who owned the Chicago Stadium, said that the Bulls could not play in **[**26]** the Stadium if sold to the plaintiffs. As a result, the defendants were able to buy the Bulls. After a bench trial, the judge concluded that the defendants had violated *§§ 1and 2* of the Sherman Act. On appeal, the defendants argued that the competition between the parties ***HN9***[] "to acquire a natural monopoly was not protected by the antitrust laws because substitution of one competitor for another would not injure competition." *Id. at 532*. The court rejected this view. Relying on *Otter Tail Power Co. v. United States, 410 U.S. 366, 35 L. Ed. 2d 359, 93 S. Ct. 1022 (1973)*, the court said "use of monopoly power to preclude [competition to acquire a natural monopoly] violated the Sherman Act." *Fishman, 807 F.2d at 533*. The court similarly rejected the defendants' claim that "even if some natural monopoly cases are within the purview of the Sherman Act, this one is not because the plaintiffs have failed to articulate just how the ultimate consumers - Chicago fans - will be hurt by this violation," Id. at 535. The court explained:

> We have found no cases (and none has been cited to us) in which the Supreme Court has put the burden **[**27]** on a plaintiff to isolate and demonstrate the consumer impact of a particular purported antitrust violation not directed at the consumer level. While ***antitrust law*** may be moving in the direction of being construed as a "pure" consumer protection measure, cases such as Otter Tail strongly suggest that in the natural monopoly area, at least, the Supreme Court has not embraced this approach. The Court has instead stressed that the antitrust laws seek to protect competition, as well as to protect those activities that will promote competition. The antitrust laws are concerned with the competitive process, and their application does not depend in each particular case upon the ultimate demonstrable consumer effect. A healthy and unimpaired competitive process is presumed to be in the consumer interest.

Id. at 536 (citations and footnotes omitted; emphasis in original). The court further stated that "the Court has never given us to believe that anything save unfettered competition is the key to consumer well-being" and that "part of the problem with requiring the plaintiff to pinpoint just how the public is harmed by a short-circuited competitive process is **[**28]** that the plaintiff has never been given an opportunity to compete freely and win the monopoly." Id. at 537-38 (citation omitted). The court distinguished Riegel Textile Corp. on the ground that "there would never have been competition between Brunswick or Riegel, with or without Riegel's misconduct" so the competitive process was never jeopardized. Id. at 538. In conclusion, the court stated that "the fact that the precise impact of defendants' conduct on the broad consuming public has remained unfocused here does not prevent a finding that the antitrust laws have been violated." Id

Judge Easterbrook dissented in Fishman, explaining that the defendant's "choice of tactics had no effect on consumers. ***Antitrust law*** condemns results harmful to consumers; it condemns bad means to the extent they have a tendency to bad results. Bad means that injure only business rivals - that is to say, business torts - are outside the scope of ***antitrust law***." Fishman, 807 F.2d at 564 (Easterbrook, J., dissenting in part) (emphasis in original). Clear Channel argues **[*836]** that the portion of Fishman discussed above is no longer good law **[**29]** because Judge Easterbrook's dissent in Fishman has been cited by the majority in subsequent cases. For example, in Flip Side Productions, Inc. v. Jam Productions, Inc., 843 F.2d 1024 (7th Cir. 1988), the court quoted Judge Easterbrook's Statement that "'injury to the consumers is therefore an essential ingredient of liability'" under §§ 1and 2 of the Sherman Act. Id. at 1032 (quoting Fishman, 807 F.2d at 568 (Easterbrook, J., dissenting in part)). And, as discussed above, Judge Easterbrook's position that antitrust injury is defined by decreased output or increased prices has certainly prevailed in the Seventh Circuit's more recent decisions discussing antitrust injury. But the Seventh Circuit has never explicitly overruledFishman, and we are reticent to find that it has done so sub silento. As Judge Flaum has noted:

> Whether harm to consumers is the sine qua non of antitrust injury is an issue over which there is currently a split in this circuit. Some of our cases hold that a plaintiff, to satisfy the antitrust injury requirement, must demonstrate that the challenged practice causing him harm also harms consumers **[**30]** by reducing output or raising prices.Stamatakis Indus., Inc., 965 F.2d [at 471]; Chicago Professional Sports Ltd. Partnership, 961 F.2d [at 670]. Others hold that application of the antitrust laws "does not depend in each particular case upon the ultimate demonstrable consumer effect." Fishman, 807 F.2d [at 536]; see also Chicago Professional Sports, 961 F.2d at 677 (Cudahy, J., concurring).

Banks v. NCAA, 977 F.2d 1081, 1097 (7th Cir. 1992) (Flaum, J.; concurring in part and dissenting in part). Ultimately however, we need not determine whether the Seventh Circuit would follow Fishman today or otherwise try to reconcile Fishman with the court's more recent cases, because a jury could find Clear Channel's conduct resulted in antitrust injury even under the narrower definition urged by Clear Channel.

If Clear Channel were correct that JamSports claims only that it was prevented from replacing Clear Channel as the monopolist in the relevant market, then whether JamSports could survive summary judgment would depend on whether Fishman was still good law. But that is an unfairly crabbed characterization of JamSports' theory **[**31]** of the case. Though it is true that JamSports did not continue to promote its supercross schedule after it lost the

AMA's endorsement, it is inaccurate to say that JamSports was trying to enter only the business of promoting the AMA-sanctioned supercross series. Rather, JamSports contends that it saw the AMA contract as a way of entering the wider market for promoting supercross events; it "was credibility, an established portal." Tr. of Oral Argument (Aug. 9, 2004) at 35. Though JamSports certainly would have liked for Clear Channel to stop promoting supercross entirely if JamSports won the AMA contract, a jury could find that Clear Channel would have promoted a supercross series to compete with JamSports' AMA-sanctioned series. [2] More pointedly, a reasonable jury could find that had Clear Channel not prevented JamSports from promoting the AMA-sanctioned supercross series, both firms would have promoted competing series, resulting **[*837]** in increased output and, potentially, decreased ticket prices. Accordingly, Clear Channel's conduct reasonably could be found to have harmed the competitive process (the Fishman definition of antitrust injury) and decreased output or increased prices **[**32]** (Clear Channel,s proposed definition of antitrust injury). Clear Channel has thus failed to show that JamSports cannot prove antitrust injury.

2. Essential Facilities

Counts 5, 6 and 12 of the Second Amended Complaint are based on the essential facilities doctrine. The Seventh Circuit has explained that

> ***HN10***[] the so-called "essential facilities doctrine" imposes upon a firm controlling an essential facility - that is, a facility that cannot reasonably be duplicated and to which access is necessary if one wishes to compete - the obligation to make that facility **[**33]** available to competitors on nondiscriminatory terms. A refusal to deal in the context of an essential facility violates *section 2* because control of an essential facility can "extend monopoly power from one stage of production to another, and from one market into another."

Fishman, 807 F.2d at 539 (citing *MCI Communications Corp. v. American Telephone & Telegraph Co., 708 F.2d 1081, 1132 (7th Cir. 1983))*. ***HN11***[] "To establish liability under the essential facilities doctrine," the plaintiff must show: "(1) control of the essential facility by a monopolist; (2) a competitor's inability practically or reasonably to duplicate the essential facility; (3) the denial of the use of the facility to a competitor; and (4) the feasibility of providing the facility." *MCI Communications Corp., 708 F.2d at 1132-33* (citations omitted). Clear Channel argues that JamSports cannot satisfy any of the four elements necessary to establish an essential facilities case. Because the Court agrees with Clear Channel that JamSports has failed to show it was denied access to "essential" facilities, the Court need not inquire whether it can satisfy the remaining **[**34]** three-elements.

JamSports contends that Clear Channel denied it access to eleven venues: Edison Field (Anaheim), Rice-Eccles Stadium (salt Lake City), the Metrodome (Minneapolis), Bank One Ballpark (Phoenix); America's Center/Edward Jones Dome (St. Louis), Qualcomm Stadium (San Diego), Sam Boyd Stadium (Las Vegas), the Georgia Dome (Atlanta), Texas Stadium (Dallas), the Pontiac Silverdome (Detroit), and Reliant Stadium (Houston). JamSports and its expert witness, economist Robert Baade, argue these facilities taken together were essential to. promoting supercross. They contend that these facilities were preferred, by Clear Channel, AMA Pro and the OEMs that send teams to compete in supercross events because they are in communities with a proven fan base for supercross and are unlikely to be affected by inclement weather during the January through May supercross season. JamSports admits that no one facility is essential but argues that a combination of the above stadiums is essential to a profitable supercross series.

Clear Channel argues that even if it denied JamSports access to these stadiums, JamSports cannot prevail because these facilities are not essential to promoting supercross. **[**35]** Clear Channel challenges both the factual and legal assumptions on which JamSports and Baade's essential facilities arguments are based. As a factual matter, Clear Channel argues that the eleven facilities named by JamSports are not essential because they have substitutes. Both parties agree that the United States has at least 130 stadiums, not including speedways, that have a capacity of at least 35,000 spectators. The parties further agree that supercross events have **[*838]** been held in

---

[2] Clear Channel contends that JamSports' expert witness has conceded that only one entity could survive promoting supercross. But what the expert actually said was that eventually a competitive market would resolve itself into a single series. This is not the same thing as saying competition could never occur. Even if the market were able to sustain competition for one year, that would benefit consumers by increased output during that year.

forty-three different venues in thirty-eight cities and thirty-two distinct metropolitan areas: Edison Field (Anaheim), the Georgia Dome (Atlanta), Turner Field (Atlanta), Rich Stadium (Buffalo), Memorial Stadium (Charlotte), Charlotte Motor Speedway (Charlotte), Browns Stadium (Cleveland), the Cotton Bowl (Dallas), Texas Stadium (Dallas), Daytona International Speedway (Daytona), Invesco Field (Denver), the Pontiac Silverdome (Detroit), Foxborough Stadium (Foxborough, Massachusetts), the Astrodome (Houston), Reliant Stadium (Houston), the RCA Dome (Indianapolis), Route 66 Motor Speedway (Joliet), Arrowhead Stadium (Kansas City), Sam Boyd Stadium (Las Vegas), Los Angeles Memorial Coliseum (Los Angeles), **[**36]** the Orange Bowl (Miami), Pro Player Stadium (Miami), the Metrodome (Minneapolis), Superdome (New Orleans), Giants Stadium (East Rutherford, New Jersey), Network Associates Coliseum (Oakland), the Oklahoma City Fairgrounds (Oklahoma City), the Citrus Bowl (Orlando), the Rose Bowl (Pasadena), JFK Memorial Stadium (Philadelphia), Bank One Ballpark (Phoenix), Pac Bell Park (San Francisco), Sun Devil Stadium (Tempe), Three Rivers Stadium (Pittsburgh), Sacramento Stadium (Sacramento), Rice-Eccles Stadium (Salt Lake City), Qualcomm Stadium (San Diego), Spartan Stadium (San Jose), the Kingdome (Seattle), the Edward Jones Dome (St. Louis), the Suncoast Dome (St. Petersburg), Alabama International Speedway (Talladega), and RFK Stadium (Washington, D.C.).

By our count, five of the metropolitan areas -Anaheim/Los Angeles, Atlanta, Dallas, Houston and Phoenix/Tempe - with venues from which JamSports claims to have been excluded had alternative venues where supercross races had been held. And even taking into account the problems inclement weather could pose to a series held during the winter, there are at least sixteen facilities [3] **[**38]** to which JamSports was not denied access that have hosted supercross **[**37]** races in the past and are either in warm-weather states or have domes. The Court also counts five stadiums [4] in cold-weather cities that have been used before and could be used during the last month of the supercross season when the weather has improved, even if the major league baseball season has started, because they do not house major league baseball teams. Furthermore, JamSports' expert Baade points out that there are seventeen domed stadiums [5] in the United States with seating capacity in excess of 35,000 -- and JamSports claims Clear Channel denied it access only to seven of them.

With so many venues that have been used for supercross events in the past, are located in communities with strong fan **[*839]** bases, and/or are relatively unaffected by weather, JamSports cannot show that it was denied access to facilities "essential" to its ability to put on a supercross series. JamSports' claim that it was denied access to essential facilities is further belied by the fact that as of January 24, 2002, it believed it had secured access for the 2003 season to the Georgia **[**39]** Dome (Atlanta), CMGI Field (Foxboro), Ericsson Stadium (Charlotte), the Cotton Bowl (Dallas), the RCA Dome (Indianapolis), Dodger Stadium (Los Angeles), Adelphia Coliseum (Nashville), Giants Stadium (East Rutherford), Network Associates Coliseum (Oakland), Sun Devil Stadium (Phoenix/Tempe), Safeco Field (Seattle), Raymond James Stadium (Tampa), and either FedEx Field or RFK Stadium (Washington, D.C.).

JamSports and Baade contend that the availability of substitutes does not necessarily defeat its essential facilities claim, because the facilities from which JamSports was allegedly barred were preferable to the facilities that were available to it. Clear Channel argues that JamSports and Baade's arguments are based on a misapprehension of the relevant law. The Court agrees. Accordingly to JamSports and Baade, the facilities to which Clear Channel denied JamSports access must be essential because Clear Channel has chosen repeatedly to hold its supercross

---

[3] Turner Field (Atlanta), Memorial Stadium (Charlotte), the Cotton Bowl (Dallas), the Astrodome (Houston), the RCA Dome (Indianapolis), Los Angeles Memorial Coliseum, the Orange Bowl (Miami), Pro Player Stadium (Miami), the Superdome (New Orleans), Network Associates Coliseum (Oakland), the Citrus Bowl (Orlando), the Rose Bowl (Pasadena), Pac Bell Park (San Francisco), Sun Devil Stadium (Tempe), Spartan Stadium (San Jose) and the Suncoast Dome (St. Petersburg). The Court is not counting speedways or stadiums that are no longer in operation.

[4] Rich Stadium (Buffalo), Browns Stadium (Cleveland), Invesco Field (Denver), Arrowhead Stadium (Kansas City), and RFK Stadium (Washington, D.C.).

[5] The Astrodome (Houston), Texas Stadium (Dallas), the Superdome (New Orleans), the Silverdome (Detroit), the Carrier Dome (Syracuse), the Metrodome (Minneapolis), the RCA Dome (Indianapolis), Tropicana Field (St. Petersburg), the Georgia Dome (Atlanta), the Alamodome (San Antonio), Edward Jones Stadium (St. Louis), Bank One BallPark (Phoenix), Safeco Field (Seattle), Minute Maid Park (Houston), Miller Park (Milwaukee), Ford Field (Detroit) and Reliant Stadium (Houston).

series in them. This contention assumes that "essential" means "best," "most profitable" or "preferable." But that is not what essential means for purposes of ***antitrust law***. ***HN12***[] Essential means essential; it does not mean "the most economical. **[**40]** " *Midwest Gas Services, Inc., 317 F.3d at 714* (citing *Endsley v. City of Chicago, 230 F.3d 276, 283 (7th Cir. 2000))*. Nor does it mean "best" or "preferable." A facility is not essential even if it is widely preferred by consumers and producers in the market, as long as there is an alternative (albeit inferior) venue. In *Flip Side Productions v. Jam Productions, Ltd.,* Flip Side sued Jam (a related entity of JamSports) and Tempo, another promotion company, claiming they had excluded other concert promoters from producing shows at the facility then known as the Rosemont Horizon. Flip Side argued that even though it had access to the older International Amphitheatre and two newer venues, the Horizon was essential to the promotion of arena-level concerts in the Chicago area, because artists preferred to perform there and "the International Amphitheatre was more expensive and not suited for staging concerts in light of the fact that the 'Amphitheatre was considered a "toilet" by JAM itself.'" *Flip Side Productions, 843 F.2d at 1033*. The Seventh Circuit rejected this claim, reasoning that even if artists preferred to perform at the Horizon, at different **[**41]** times Flip Side had access to four other venues where concerts were held: the Ampitheatre, Pavilion, Chicago Stadium and Poplar Creek. *Id. at 1034*. Under the Seventh Circuit's reasoning in *Flip Side,* even if JamSports was denied access to the most desirable facilities, that is not enough to make out an essential facilities claim. Accordingly, the Court grants Clear Channel summary judgment on Counts 5, 6 and 12. [6] Because the Court previously dismissed Counts 7-11 and 13-14, of the antitrust claims, only Count 15 remains. [7]

[*840] *3. Monopolization*

In Count 15 of **[**42]** the Second Amended Complaint, JamSports alleges that Clear Channel monopolized the market for supercross promotion in violation of *§ 2 of the Sherman Act* by pressuring venues not to book JamSports' races, offering incentives to OEMs and athletes to participate in Clear Channel's series, seeking sanctioning from the FIM, and attempting to derail JamSports' deal with the Speed Channel, a cable television network. ***HN13***[] "The offense of monopoly under *§ 2 of the Sherman Act* has two elements: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *MCI Communications Corp., 708 F.2d at 1106* (citing *United States v. Grinnell, 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966))*. Clear Channel argues it is entitled to summary judgment on Count 15 because JamSports has failed to raise a genuine issue of fact that a relevant market exists and cannot show that Clear Channel's conduct was anticompetitive. We will discuss each contention separately.

a. Relevant Market

As the Court **[**43]** stated when confronted with Clear Channel's motion to dismiss JamSports' amended complaint, ***HN14***[] determining whether a relevant market exists "involves a deeply fact- intensive inquiry." *JamSports, 2003 U.S. Dist. LEXIS 6100, 2003 WL 1873563, at *6* (citations omitted). "The boundaries of a market or submarket are determined 'by examining such practical indicia as industry or public recognition of the submarket [or market] as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors.'" *2003 U.S. Dist. LEXIS 6100, [WL] at *5* (quoting *Brown Shoe Co. v. United States, 370 U.S. 294, 325, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962))*. Clear Channel argues that JamSports has failed to raise a genuine issue of fact that a relevant market exists, because its only evidence of the market's existence is the report of an expert witness whose testimony should be excluded.

---

[6] Because we do not rely on the affidavits of venue managers submitted by Clear Channel, JamSports' Motion to Strike Portions of Venue Affidavits is dismissed as moot.

[7] JamSports voluntarily dismissed Count 16. *See* JamSports' Consolidated Discovery Mot. (docket # 73) at n.15 ("JamSports has advised Clear Channel that it will not proceed with its alternative product market allegation of specialized motor sports.").

Clear Channel has grossly understated JamSports' evidentiary support for its claim that a national market for the promotion of supercross exists. JamSports filed a motion seeking partial summary judgment on the issue of whether a relevant **[**44]** market existed. Although we deny JamSports motion as procedurally improper, *see infra* at 33, and therefore pass no judgment on the merits of its arguments, we do recognize that it was chock full of facts in support of JamSports' position. But in any event, the Court rejects Clear Channel's argument that we should exclude the expert report and testimony of JamSports' expert witness Dr. Robert Baade, an economist who specializes in the economics of sports, on the relevant market issue. Baade arrived at the conclusion that a distinct market for supercross exists by comparing characteristics of supercross, such as ticket price, attendance, venue size, average revenue and elements of the competition, to those of related motor sports. He found that supercross had more than double the average attendance of motocross, which involves off-road motorcycle racing on natural terrain, and four times the average attendance of arenacross, which like supercross involves racing on indoor tracks with man-made obstacles but is held in significantly smaller venues with lesser known, regional competitors. Although he found that ticket prices for supercross and motocross were similar (but more than $ **[**45]** 10 higher than tickets for arenacross), the average revenue from supercross ticket sales was **[*841]** more that double what it was for motocross (and more than seven times what it was for arenacross). Baade also analyzed whether producers, riders, OEMs, track designers and builders, and sanctioning bodies regarded supercross as distinct from related motor sports, concluding that they did.

Clear Channel has moved to exclude Baade's testimony pursuant to *Federal Rule of Evidence 702* and *Daubert v. Merrell Dow Pharmaceuticals, Inc., 509 U.S. 579, 125 L. Ed. 2d 469, 113 S. Ct. 2786 (1993)*. In *Daubert*, ***HN15***[] the Supreme Court held that "reliability is the touchstone for expert testimony based on 'scientific, technical, or other specialized knowledge.'" *Elliott v. CFTC, 202 F.3d 926, 933 (7th Cir. 2000)* (quoting *Fed. R. Evid. 702*). The court must act as a gatekeeper to ensure that scientific testimony is "supported by appropriate validation -- i.e., good grounds, based on what is known." *Id.* (quoting *Daubert, 509 U.S. at 590*; internal quotation marks omitted). The Supreme Court has "extended **[**46]** this gatekeeping function to all expert testimony." *Id.* (citing *Kumho Tire Co. v. Carmichael, 526 U.S. 137, 143 L. Ed. 2d 238, 119 S. Ct. 1167 (1999))*. "The focus, of course, must be solely on the principles and methodology, not on the conclusions that they generate." *Daubert, 509 U.S. at 595*. And adversary testing rather than exclusion may be the proper response to allegedly questionable testimony: "vigorous cross-examination, presentation of contrary evidence, and careful instruction on the burden of proof are the traditional and appropriate means of attacking shaky but admissible evidence." *Id. at 596* (citing *Rock v. Arkansas, 483 U.S. 44, 61, 97 L. Ed. 2d 37, 107 S. Ct. 2704 (1987))*.

Clear Channel does not question Baade's qualifications. Rather, Clear Channel primarily questions Baade's methodology and conclusions relating to JamSports' essential facilities claims. Because the Court has rejected JamSports' essential facilities claims on other grounds, most of Clear Channel's motion to exclude is moot. But Clear Channel also argues -- albeit only briefly -- that Baade's conclusion that supercross constitutes a relevant market has not been **[**47]** reliably derived. Clear Channel contends Baade's analysis was not scientific enough because he did not conduct a study of the cross-elasticities of demand for various motor sports. In so arguing, Clear Channel attempts to belittle Baade's analysis with gratuitous comments such as, "one important feature of his analysis was to count the number of wheels on motorcycles and cars," and disregards his explanation for not performing a study of cross-elasticities. Clear Channel's Mot. to Exclude at 19. First of all, ***HN16***[] though studies based on cross-elasticities of demand are certainly helpful in identifying a relevant market. *United States v. E.I. DuPont de Nemours & Co., 351 U.S. 377, 393, 100 L. Ed. 1264, 76 S. Ct. 994 (1956)*, they are not essential to demonstrating the existence of a relevant market. *Nobody in Particular Presents, Inc. v. Clear Channel Communications, 311 F. Supp. 2d 1048, 1082 (D. Colo. 2004)* (listing cases). Furthermore, Clear Channel's potshots do not raise a serious challenge to Baade's methodology, which involved analyzing characteristics of motor sports other than the number of wheels on the vehicles. Cross-examination, not exclusion, is the appropriate vehicle for **[**48]** advancing the sort of incredulity that Clear Channel urges. A genuine issue of fact exists regarding the parameters of the relevant market.

b. Anticompetitive conduct

HN17[] The Supreme Court has characterized the second element of a *§ 2* claim as "the use of monopoly power 'to foreclose competition, to gain a competitive advantage, or to destroy a competitor.'" *Eastman **[*842]** Kodak Co. v. Image Technical Services, Inc., 504 U.S. 451,482-83, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992)* (citing *United States v. Griffith, 334 U.S. 100, 107, 92 L. Ed. 1236, 68 S. Ct. 941 (1948))*. As with the antitrust injury requirement, the parties disagree on the law relevant to determining whether Clear Channel engaged in such behavior. Clear Channel argues that the intent of its principals to "lock up" the stadiums Clear Channel uses for supercross and their desire for JamSports to be regarded as "poison," *see* Ex. CCE 1106, are irrelevant to proving a *§ 2* claim. In support. Clear Channel relies primarily on *A.A. Poultry Farms, Inc. v. Rose Acre Farms, Inc., 881 F.2d 1396, 1401-02 (7th Cir. 1989)*, in which the court stated:

> ***HN18***[] Firms "intend" to do all the business they can, to crush their rivals if **[**49]** they can. Intent to harm without more offers too vague a standard in a world where executives may think no further than "Let's get more business." Rivalry is harsh, and consumers gain the most when firms slash costs to the bone and pare price down to cost, all in pursuit of more business. Few firms cut price unaware of what they are doing; price reductions are carried out in pursuit of sales at others' expense. Entrepreneurs who work hardest to cut their prices will do the most damage to their rivals, and they will see good in it. You cannot be a sensible business executive, without understanding the link among prices, your firm's success, and other firms' distress. If courts use the vigorous, nasty pursuit of sales as evidence of a forbidden "intent," they run the risk of penalizing the motive forces of competition.

Id. Accordingly, the court found ***HN19***[] intent should not be a basis for liability in *predatory pricing* cases, favoring instead a test that looks at the firm's possibility of recouping its profits from cutting prices. Despite the decision's lengthy discussion of why focusing on intent can mislead the examiner, its rejection of intent evidence was limited to *§ **[**50]** 2* predatory pricing cases. Because JamSports does not allege Clear Channel engaged in predatory pricing,*A.A. Poultry Farms* is not directly on point.

Clear Channel points out that ***HN20***[] the Seventh Circuit has said more generally that when it comes to liability under *§ 2 of the Sherman Act*, "if conduct is not objectively anticompetitive the fact that it was motivated by hostility to competitors. . . is irrelevant." *Olympia Equipment Leasing Co. v. Western Union Telegraph Co., 797 F.2d 370, 379 (7th Cir. 1986)* (citing *Ball Memorial Hospital, 784 F.2d at 1338-39*). In *A.A. Poultry Farms,* the court cited *Olympia Equipment Leasing* for the proposition that "liability under *§ 2* for abuse of monopoly power stems from anti-competitive effects and not intent." *A.A. Poultry Farms, 881 F.2d at 1402*. But Clear Channel is wrong to assume that*Olympia Equipment Leasing* should be read to mean evidence of intent to monopolize is always irrelevant to proving a *§ 2* claim. The Supreme Court has unambiguously stated that intent to monopolize is "relevant to the question of whether the challenged conduct is fairly characterized as 'exclusionary' **[**51]** or 'anticompetitive' -- to use the Words in the trial court's instructions -- or 'predatory, 'to use a word that scholars seem to favor." *Aspen Skiing Co. v. Aspen Highlands Siding Corp., 472 U.S. 585, 602, 86 L. Ed. 2d 467, 105 S. Ct. 2847* (1985). And *citing Aspen Skiing,* the Seventh Circuit, subsequent to *Olympia Equipment Leasing* and *A.A. Poultry Farms,* has recognized that ***HN21***[] '"intent *is* relevant to the offense of monopolization." *State of Illinois v. Panhandle Eastern Pipeline Co., 935 F.2d 1469, 1481 (7th Cir. 1991)* (emphasis in original; *citing* *Aspen Siding Co., 472 U.S. at 602*). The *Panhandle* court seemingly **[*843]** reconciled *Olympia Equipment Leasing* with *Aspen Skiing,* recognizing the continuing relevance of intent:

> ***HN22***[] The "intent" to achieve or maintain a monopoly is no more unlawful than the possession of a monopoly. Indeed, the goal of any profit-maximizing firm *is* to obtain a monopoly by capturing an ever increasing share of the market. Virtually all business behavior is designed to enable firms to raise their prices above the level that would exist in a perfectly competitive market. Economic rent -- the profit **[**52]** earned in excess of the return a perfectly competitive market would yield -- provides the incentive for firms to engage in and assume the risk of business activity. Monopolies achieved through superior skill are no less intentional than those achieved by anticompetitive means (as Learned Hand observed, "no monopolist monopolizes unconscious of what he is doing"), so the intent relevant to a *§ 2 Sherman Act* claim is only the intent to maintain or achieve monopoly power by *anticompetitive means. Section 2* forbids not the intentional pursuit of monopoly power but the employment of unjustifiable means to gain that power.

Id. (emphasis in original; citations omitted).

Clear Channel maintains that its allegedly anticompetitive conduct had a legitimate business justification. ***HN23***[] "Conduct that tends to exclude competitors may . . . survive antitrust scrutiny if the exclusion is the product of a 'normal business purpose,' for the presence of a legitimate business justification reduces the likelihood that the conduct will produce undesirable effects on the competitive process." *Id. at 1481-82* (quoting *Aspen Skiing, 472 U.S. at 608-10*). But whether the defendant **[**53]** had "valid business reasons" for its conduct is a question of fact. *Id. at 1482*. And the trier of fact can look to Clear Channel's intent to determine whether its conduct had a purpose other than excluding competition. As the court explained in *Panhandle Eastern Pipeline:*

> ***HN24***[] When courts consider the "intent" of a firm charged with monopolization, they look not to whether the firm intended to achieve or maintain a monopoly, but to whether the underlying purpose of the firm's conduct was to enable the firm to compete more effectively. Did the firm engage in the challenged conduct for a legitimate business reason? Or was the firm's conduct designed solely to insulate the firm from competitive pressure? Intent is relevant, then, because intent determines "whether the challenged conduct is fairly characterized as 'exclusionary' or 'anticompetitive.'"*Aspen Skiing, 472 U.S. at 602*. When courts speak of a firm's intent in a monopolization case, they refer to the legitimacy of the firm's conduct as measured by its intended effect on the competitive process.

Panhandle Easter Pipeline Co., 935 F.2d at 1481. A jury ultimately may find that **[**54]** Clear Channel's conduct had a legitimate business justification, but as we explain, JamSports has raised a genuine issue that Clear Channel engaged in conduct aimed solely at hindering competition.

JamSports has presented evidence that Clear Channel threatened stadiums that it would pull all of its events (including non-supercross events) from the stadiums if they booked JamSports' supercross race. [8] On October 4, 2000, Charlie Mancuso, Clear Channel's president of the motor sports division, e-mailed Eric Cole, vice **[*844]** president of booking motor sports events, stating that Cole needed to quietly "lock up' our key supercross stadiums for 2002 through at least 2005" to protect Clear Channel in case the AMA began contacting "our stadiums." Ex. CCE 32561. Mancuso instructed Cole to get protection clauses -- that is, guarantees that the venues would not host other motor sports events within a certain number of days or months of Clear Channel's events -- in all the contracts. *Id.* In an e-mail to Mancuso on November 6, 2001, Cole wrote that he had "made it crystal clear" to the director of America's Center in St. Louis that Clear Channel "intended to produce a SX event as usual in 2003, **[**55]** 2004, 2005 and beyond in St. Louis." Ex. CCE 32070. Cole said that when the director said he would allow JamSports to book a race 45 days before or after Clear Channel's race, Cole "reminded him that another booking could cost him our events because we might consider it too crowded in the marketplace." *Id.* Clear Channel's booking notes for November 12, 2001 also indicate that when the America's Center suggested JamSports had a hold on a date, Clear Channel told the venue that any attempt to book another supercross event "would have serious implications not only for our supercross, but on our January monster truck event as well." Ex. CCE 39014.

JamSports also has presented evidence that Clear Channel took a threatening posture with the Astrodome and Reliant Field. The booking notes for November 20, 2001 and **[**56]** an e-mail to Mancuso state that when told that JamSports was inquiring about dates at the Astrodome and Reliant Park, Cole reminded the venues' general manager that "we have been producing motor sports s events in that facility for 30 years" and that it was "unacceptable" for the facility book a JamSports' race. Exs. 293-94 and 39017. Cole demanded 90 day protection periods for all Clear Channel motor events. *Id.* Cole followed up with a letter to the general manager, stating in relevant part:

> In response to our conversation yesterday, I am writing to inform you that I am deeply troubled by the way it appears our future business is being handled at Reliant Park and the Reliant Astrodome. Your booking practices are creating reasons for us to be very concerned about the future viability and profitability of our

[8] Although the Court has determined JamSports cannot proceed under the essential facilities doctrine. Clear Channel's alleged methods of preventing venues from hosting JamSports events are relevant to Count 15.

> events at these facilities. We have been producing our motorsports events in the Astrodome for over thirty years. The investment we have made in these events at your facility is measurable in the tens-of-millions of dollars and far exceeds our investment in any other stadium in the world. Your apparent concern for "missing out on future shows" that some brand new motorsports **[**57]** company alleges to be intending to produce raises considerable doubt as to your commitment to. protecting and growing our events -- and our investment -- in your stadiums. If you are even considering adding another event to what is already the most prolific stadium motorsports calender on earth, it will cause us to wonder whether the Reliant Astrodome and Reliant Park can remain as sustainable venues for Clear Channel Entertainment's touring motorsports events in future years.
> …
> To my even greater astonishment, you said you hoped to give a hold to another motorsports event on the January 11, 2003 date in question. That is entirely unacceptable….
>
> As I mentioned above, the 45-day "protection period" you typically offer is inadequate, especially in this unique market situation. . . . In the future, we require, at a minimum, 90 days protection for all motorsports events prior to **[*845]** any of our dates, and 60 days afterwards.

Ex. CCE 2713. Cole sought approval from Ken Hudgens, Clear Channel's vice president of marketing for the motor sports division, to send the letter. Hudgens approved the letter, stating: "we need to be scaring people -- not the other way around. We have done **[**58]** over 100 shows in this building. Probably 150." Ex. 2557. And in an e-mail to Mancuso on December 19, 2001, Cole said he had "made crystal clear" to a venue that if they allowed JamSports to hold a race that interfered with a Clear Channel Monster Jam, the venue "may be forcing [Clear Channel] to look elsewhere." Ex.CCE31718. Similarly, on August 13, 2002, Cole wrote "let's see after I threaten to move FMX" in response to a colleague's concerns that a venue would rent to JamSports if Clear Channel did not produce its supercross event at the venue. Ex. CCE 25535.

JamSports has presented evidence that Clear Channel tried to use its other motor sport events and concerts to entice venues to exclude JamSports. For example. Cole sent an e-mail to Mancuso on November 7, 2001, indicating that JamSports would approach Sun Devil Stadium and proposing to try to get an exclusive deal with the stadium for all events, using the fact that Clear Channel's music division was planning a concert there. Ex. CCE 2610. On December 3, 2001, Mancuso wrote an e-mail to Cole suggesting that he promise a venue one or two Monster Jam events in addition to supercross, explaining "we just might have to bite the **[**59]** bullet and do two more events in the market in 2003 than we want to protect ourselves." Ex. CCE 5397.

JamSports argues it had a legitimate business reason for seeking protection periods. Perhaps so, but that is for a jury to decide. A reasonable jury could conclude that Clear Channel used its market power to pressure stadiums not to host competing events with the sole intent of restraining the competitive process. JamSports argues Clear Channel employed several other tactics to suppress competition in the market, but we need not consider them at this time because the evidence regarding Clear Channel's conduct with venues is sufficient to create a genuine issue of fact. [9] Accordingly, the Court denies Clear Channel's motion for summary judgment as to Count 15.

4. JamSports' motion for partial summary judgment

JamSports **[**60]** has moved for "partial summary judgment" on its antitrust claims. Its motion seeks findings in its favor on three elements of its claims: the relevant market, Clear Channel's possession of market power, and Clear Channel's possession of monopoly power. The short answer is that this is not an appropriate basis for a motion for summary judgment under *Rule 56*. ***HN25***[] "Summary judgment is not contemplated or authorized for any portion of a claim less than the whole." *Biggins v. Oltmer Iron Works, 154 F.2d 214, 217 (7th Cir. 1946)*; *see also, e.g.. United States ex rel. Ramm Plumbing Co. v. Wil-Freds Construction, Inc., 1997 U.S. Dist. LEXIS 9614, No. 96 C 793, 1997 WL 391456, at *4 (N.D. Ill. July 7, 1997)*; *Arado v. General Fire Extinguisher Corp., 626 F. Supp. 506, 508-09 (N.D. Ill. 1985)*. This case is not controlled by *Wilson v. Sundstrand, 2003 U.S. Dist. LEXIS 14356, No. 99 C*

[9] If it wishes to seek an order excluding the other matters at trial, Clear Channel should file a motion *in limine* in connection with preparation of the final pretrial order.

6944, 2003 WL 21961359, at * 4 (N.D. Ill. Aug. 18, 2003), in which this Court permitted consideration of a summary judgment motion the goal of which was to eliminate certain affirmative defenses. In the circumstances **[*846]** of that case, the motion was, practically speaking, the equivalent of one seeking summary judgment on an entire **[**61]** claim. Largely for this reason, there is authority permitting consideration of such a motion in those circumstances. *See generally* Fidelity Nat'l Title Ins. Co. of New York v. Intercounty Nat'l Title Ins. Co., 2002 U.S. Dist. LEXIS 16002, No. 00 C 5658, 2002 WL 1466806, at * 12 (N.D. Ill. July 8, 2002). The same is not true here. JamSports' motion for partial summary judgment is denied.

State law claims

1. Breach of contract (Count 1)

Count 1 is JamSports' claim against AMA Pro for breach of contract. It is based on two distinct theories of liability: a claim that the November 2001 letter of intent was a binding contract entitling JamSports to promote AMA Pro's supercross series and that AMA Pro breached the contract by later contracting with Clear Channel; and a claim that AMA Pro breached the letter of intent's terms requiring confidentiality and exclusivity. On the former claim, AMA Pro has moved for summary judgment. On the latter claim, JamSports has moved for summary judgment on liability; AMA Pro has not moved for summary judgment on liability but rather seeks summary judgment only as to certain aspects of JamSports' damage claim.

AMA Pro is entitled to summary judgment on **[**62]** JamSports' claim that the letter of intent was itself a binding promotion agreement. In this regard, the letter of intent could hardly be clearer: it stated that except for the confidentiality, exclusivity, and publicity provisions, "this letter of intent is not binding in any way upon the parties hereto" and that it was "expressly conditioned upon the parties entering into the Promotion Agreement" that they hoped to negotiate. 2d Am. Compl., Ex.A, P14. ***HN26***[] A letter of intent is unenforceable as a contract when it specifically contemplates a later agreement as a condition precedent to a binding contract. *See* Quake Construction, Inc. v. American Airlines, Inc., 141 Ill. 2d 281, 287-88, 565 N.E.2d 990, 993, 152 Ill. Dec. 308 (1990); Chicago Inv. Corp. v. Dolins, 107 Ill. 2d 120, 126-27, 89 Ill. Dec. 869, 481 N.E.2d 712, 715 (1985); Magnus v. Lutheran General Health Care System, 235 Ill. App. 3d 173, 181, 176 Ill. Dec. 209, 601 N.E.2d 907, 913 (1992).

JamSports has moved for summary judgment as to liability on its claim for breach of the letter of intent's exclusivity and confidentiality provisions. The exclusivity provision required AMA Pro to negotiate "exclusively, and **[**63]** in good faith" with JamSports for 90 days after the letter was signed; prohibited AMA Pro from entering into any discussion with any third party; and required AMA Pro and JamSports each to advise the other promptly if it received an offer, 2d Am. Compl. Ex. A, P13. The confidentiality provision prohibited both parties from divulging the letter of intent's terms to anyone other than its attorneys, accountants, and financial consultants. *Id.,* P12. As to these provisions, the letter of intent was indisputably a binding contract between JamSports and AMA Pro. ***HN27***[] "The parties' intent determines whether a letter of intent is an enforceable contract," Quake Construction, 141 Ill. 2d at 296, 565 N.E.2d at 998, and in this case, their intent that these terms be enforceable was clearly expressed.

JamSports contends that AMA Pro breached these provisions by failing to advise JamSports of a proposal AMA Pro received from Clear Channel in early November 2001, and by failing to negotiate in good faith with JamSports. JamSports' summary judgment motion addresses both of these contentions. We deal with each in turn.

[*847] AMA Pro does not dispute that Clear Channel representatives had **[**64]** a number of communications with members of AMA Pro's board after becoming aware that AMA Pro had signed a letter of intent with JamSports. There is evidence that one of AMA Pro's board members, Ray Blank, advised Clear Channel that certain board members favored Clear Channel over JamSports and urged Clear Channel to communicate with the board and make its proposal known. Clear Channel did so: it advised the board's members in writing in early November 2001 of its willingness to make an improved offer, and it sent two separate written offers to at least one board member. The board as a whole was advised on or about November 30, 2001 (and perhaps earlier) that Clear Channel had made a proposal, though it is unclear whether the entire board was advised of the proposal's terms. On that same date, one board member, Richard Gray, reminded the others that AMA Pro was obligated to share Clear Channel's proposal with JamSports: It is undisputed, however, that JamSports was not advised of Clear Channel's proposal.

Based on these undisputed facts, JamSports has established as a matter of law that AMA Pro breached its obligation under paragraph 13 of the letter of intent to advise JamSports of its **[**65]** receipt of the Clear Channel proposal. It remains to be seen, however, whether this breach entitles JamSports to recover any damages. AMA Pro contends that the Clear Channel proposal went nowhere, and as evidence it points to, among other things, the fact that even after receiving Clear Channel's proposal, AMA Pro's Board voted to recommend making a deal with JamSports. For its part, JamSports says that AMA Pro's breach of its obligation to disclose the Clear Channel offer, and the continued discussions that certain AMA Pro board members had with Clear, Channel representatives, permitted Clear Channel to keep its foot in the door, prevented JamSports from countering Clear Channel's efforts vis-a-vis AMA Pro, and ultimately enabled Clear Channel to carry the day. These contentions involve genuinely disputed factual issues. Thus although the Court finds, pursuant to *Federal Rule of Civil Procedure 56(d)*, that JamSports has established a breach of the exclusivity provision, final resolution of the claim will have to await trial.

JamSports also seeks summary judgment as to liability on its claim that AMA Pro breached its contractual obligation to **[**66]** negotiate in good faith toward the execution of a final promotion agreement. The letter of intent was a binding agreement to negotiate in good faith. *See, e.g., A/S Apothekernes Laboratorium for Specialpraeparater v. I.M.C. Chemical Group, Inc., 873 F.2d 155, 158 (7th Cir. 1989)*. This obligation barred both sides from "'renouncing the deal, abandoning the negotiations, or insisting on conditions that [did] not conform to the preliminary agreement.'" *Id.* (quoting *Teachers Ins. and Annuity Ass'n v. Tribune Co., 670 F. Supp. 491, 498 (S.D.N.Y. 1987))*. "For instance, ***HN28***[] a party might breach its obligation to bargain in good faith by unreasonably insisting on a condition outside the scope of the parties' preliminary agreement, especially where such insistence is a thinly disguised pretext for scotching the deal because of an unfavorable change in market conditions." *Id.*

JamSports' claim, as argued in its motion for summary judgment, is that AMA Pro's breach of good faith consisted of its insistence that it obtain approval of the final deal from the board of trustees of AMA Pro's parent entity, the AMA. JamSports says that this condition was outside **[**67]** the scope of the letter of intent and essentially served as a smokescreen for AMA Pro's change of heart about making a deal **[*848]** with JamSports. AMA Pro argues that the issue of bad faith is genuinely disputed; among other things, it points to evidence that it advised JamSports around the time the letter of intent was signed, and afterward, that AMA's approval would be required.

HN29[] "The full extent of a party's duty to negotiate in good faith can only be determined . . . from the terms of the letter of intent itself." *A/S Apothekernes, 873 F.2d at 158*. In this case, the letter of intent included a provision that unambiguously stated that any prior representations and understandings were superseded:

> 18. Entire Agreement. This letter includes provisions which shall be included in any agreement between the parties and supercedes [sic] all prior oral or written agreements, understanding, representations and warranties, and courses of conduct and dealings between the parties on the subject matter hereof. Except as otherwise provided herein, this letter may be amended or modified only by a writing executed by each of the parties hereto.

2d Am. Compl., Ex. A, P **[**68]** 18. Based on this provision, AMA Pro's insistence on material contractual terms or conditions beyond those stated in the letter of intent could constitute a breach of its contractual duty to negotiate in good faith.

Determination of the precise contours of the duty to negotiate in good faith is complicated by the fact that there is precious little Illinois law on the subject. As Judge Posner noted for the court in *Venture Associates Corp. v. Zenith Data Systems Corp., 96 F.3d 275, 278 (7th Cir. 1996)*, most of the decisions purporting to describe Illinois law in this area have been issued by federal courts. But at least one Illinois court appears to have adopted *A/S Apothekernes'* formulation of the applicable standard, *see Milex Products, Inc. v. Alra Laboratories, Inc., 237 Ill. App. 3d 177, 189, 603 N.E.2d 1226, 1234, 177 Ill. Dec. 852 (1992)*, so for the time being we are comfortable following the federal formulation of the presumed Illinois standard.

Based on our reading of the decisional law on the topic, the fact that AMA Pro insisted upon a significant condition that was not included in the letter of intent is not by itself sufficient to **[**69]** demonstrate AMA Pro's lack of good faith. The concept of good faith appears also to require an inquiry into the breaching party's intent. As one Illinois court noted in a different context, a "practical, commonsense construction" of good faith is the absence of bad faith or bad intent. *See Dotson v. Former Shareholders of Abraham Lincoln Land & Cattle Co., 332 Ill. App. 3d 846, 855-56, 773 N.E.2d 792, 801, 266 Ill. Dec. 57 (2002)*; *cf. 810 ILCS 5/1-201(19)* (Uniform Commercial Code definition of good faith: "honesty in fact in the conduct or transaction concerned"). In *Venture Associates,* the court likewise equated the lack of good faith with bad faith and stated that "bad faith is deliberate misconduct." *Venture Assocs., 96 F.3d at 279*.

The evidence submitted by JamSports in support of its motion for summary judgment is insufficient to show AMA Pro's bad intent as a matter of law; the issue is genuinely disputed. JamSports argues that based on the parol evidence rule and the terms of the letter of intent, AMA Pro should be precluded from relying on evidence of the purported understandings and discussions regarding the AMA's approval that are **[**70]** said to have occurred around and after the time the letter of intent was executed. This argument is well taken to the extent that AMA Pro is contending that approval by AMA was an express or implied part of the parties' contract. *See* 2d Am. Compl., Ex. A, P 18; *J&B Steel Contractors, Inc. v. C. Iber & Sons, Inc., 162 Ill. 2d 265, 269, 642 N.E.2d 1215, 1217,* ***[*849]*** *205 Ill. Dec. 98 (1994)* (parol evidence rule "generally precludes evidence of understandings, not reflected in a writing, reached before or at the time of its execution which would vary or modify its terms"). But the Court is less certain that this evidence is inadmissible on the issue of AMA Pro's intent. Because JamSports raised the parol evidence rule in its reply brief (in reply to AMA Pro's reliance on the alleged discussions and understandings), AMA Pro has not yet addressed the point. We can, however, safely defer final determination of the admissibility issue for a motion *in limine,* for in seeking summary judgment, JamSports has relied on nothing other than AMA Pro's insistence on AMA's approval, which as we have noted is an aspect of proof of bad faith but insufficient by itself to prove the point. **[**71]** ***HN30***[] Because good faith is a question of fact, *see Venture Assocs., 96 F.3d at 280*, and one that is genuinely disputed at this point, it can be resolved only at trial. JamSports' motion for summary judgment is therefore denied as to the claim of breach of the contractual obligation of good faith.

With regard to Count 1, AMA Pro seeks to bar JamSports' claim of lost profits, arguing that the so-called "new business rule" precludes JamSports, as a prospective new entrant into the supercross promotion business, from recovering the profits it claims it would have made. As the Court noted in ruling on the defendants' motions to dismiss, lost profits may, in appropriate circumstances, be recovered based on a party's breach of a contractual obligation to negotiate in good faith. *See Venture Assocs., 96 F.3d at 278-79*. ***HN31***[] Under Illinois law, as a general rule, a new business cannot recover lost profits. *See, e.g., Stuart Park Assocs. Ltd. Partnership v. Ameritech Pension Trust, 51 F.3d 1319, 1328 (7th Cir. 1995)*. This rule appears to be a specific application of the general rule that speculative damages are not recoverable. *See, e.g., Hill v. Brown, 166 Ill. App. 3d 867, 875, 520 N.E.2d 1038, 1043, 117 Ill. Dec. 687 (1988)* **[**72]** (cited in *Stuart Park*). There are, however, exceptions to the rule. *See, e.g., Malatesta v. Leichter, 186 Ill. App. 3d 602, 621, 542 N.E.2d 768, 782, 134 Ill. Dec. 422 (1989)*. The Court agrees with JamSports that because discovery on damages was deferred, a ruling that its not-yet-declared damages theory is legally inadequate would be premature. [10]

2. *Breach of contract (Count 2) and promissory estoppel (Count 17)*

In Count 2, JamSports says that it reached a final promotion agreement with AMA Pro but that AMA Pro refused to perform and instead granted the promotion rights for its supercross series to Clear Channel. Count 17 is an alternative claim of promissory estoppel in which JamSports alleges that it incurred significant expenses in

[10] Any attempt by the defendants to renew this issue following discovery on damages will have to come by way of a motion *in limine* to preclude evidence regarding lost profits, as the deadline for filing summary judgment motions has passed.

reliance **[**73]** on AMA Pro's allegedly unambiguous promise to confer on JamSports the right to promote the series. [11]

AMA Pro seeks summary judgment on both of these claims on the ground that the parties reached no final promotion agreement. **[*850]** Because the agreement contemplated by the parties was to cover a seven year period, *see* 2d Am. Compl., Ex. A, P 1, under Illinois' statute of frauds "the promise or agreement upon which [JamSports'] action shall be brought, or some memorandum or note thereof, [must] be in writing, and signed by the party to be charged therewith, **[**74]** or some other person thereunto by him lawfully authorized." *740 ILCS 80/1*. The statute of frauds likewise applies to JamSports' promissory estoppel claim. *See Fischer v. First Chicago Capital Markets, Inc., 195 F.3d 279, 284 (7th Cir. 1999)*; *McInerney v. Charter Golf, Inc., 176 Ill. 2d 482, 492, 680 N.E.2d 1347, 1352, 223 Ill. Dec. 911 (1997)*.

It is undisputed that AMA Pro did not execute a promotion agreement as such. In opposing summary judgment, JamSports relies on the rule that to satisfy the statute of frauds, the writing need not be a single document but rather may consist of several documents as long as they collectively contain a sufficient description of the agreement's subject matter and terms, one of the documents is signed by the party to be charged, and that document refers to the other writings or they are connected sufficiently to show that they relate to the same contract. *See, e.g., Prodromos v. Howard Savings Bank, 295 Ill. App. 3d 470, 474-75, 692 N.E.2d 707, 710, 229 Ill. Dec. 718 (1998)*. In arguing that this requirement has been met, JamSports relies on the red-lined version of the promotion agreement that its **[**75]** attorney sent after (JamSports claims) the parties had reached final agreement on all its terms; minutes from a meeting of AMA Pro's board of directors at which it is claimed to have approved that version of the agreement; and deposition testimony by an AMA Pro representative regarding the board's actions. Because the minutes in question were approved by the board and were signed by the corporate secretary, they are the types of documents that may suffice to constitute the signed writing required by the statute of frauds. *See Chapman v. Freeport Securities Co., 174 Ill. App. 3d 847, 854, 529 N.E.2d 6, 11, 124 Ill. Dec. 289 (1988)*. The deposition testimony in question was also signed and thus likewise may qualify as a signed writing. *See Bower v. Jones, 978 F.2d 1004, 1009 (7th Cir. 1992)*.

AMA Pro points out that neither the minutes nor the deposition testimony state that the agreement with JamSports was approved. Rather they reflect that AMA Pro's board recommended that the agreement be approved by AMA. JamSports, as noted earlier, contends that this action by AMA Pro constituted a breach of its obligations under the letter of intent, but for purposes **[**76]** of the statute of frauds, signed evidence that the board *recommended* the agreement to its parent entity does not satisfy the requirement of a signed writing evidencing that an agreement was reached.

JamSports argues, however, that AMA Pro is equitably estopped from asserting a statute of frauds defense. AMA Pro contends that this argument is barred because JamSports' equitable estoppel "claim" is not alleged in its complaint, but that contention stems from a misunderstanding of the role of equitable estoppel vis-a-vis the statute of frauds. In this context, equitable estoppel is not a separate claim; rather, it is a doctrine that may bar AMA Pro's assertion of a statute of frauds defense. Because the Federal Rules of Civil Procedure do not require a plaintiff to reply to a defendant's affirmative defense, *see Fed. R. Civ. P. 7(a)*, JamSports was not required to assert equitable estoppel in a pleading. Because this is AMA Pro's only response to the assertion of equitable estoppel, AMA Pro is not entitled to summary judgment based on its statute of frauds defense.

[*851] *3. Tortious interference claims (Counts 3, 4, and 18)*

JamSports has **[**77]** asserted three state law tort claims against Clear Channel: Count 3, a claim that Clear Channel tortiously interfered with the letter of intent between JamSports and AMA Pro; Count 4, a claim that Clear

[11] It is unclear whether success on a promissory estoppel theory would limit JamSports to recovery of the expenses it incurred in reliance on the alleged promise or whether JamSports would be able to seek lost profits. *See, e.g., Gerson Electric Constr. Co. v. Honeywell, Inc., 117 Ill. App. 3d 309, 312, 453 N.E.2d 726, 728, 72 Ill. Dec. 851 (1983)*; *see also Goldstick v. ICM Realty, 788 F.2d 456, 463-64 (7th Cir. 1986)*.

Channel tortiously interfered with the alleged final promotion agreement; and Count 18, an alternative claim for interference with prospective advantage. Clear Channel has moved for summary judgment on these claims.

Two of Clear Channel's arguments parallel those the Court has already addressed with regard to AMA Pro's and JamSports' summary judgment motions. Clear Channel argues that Count 3 cannot be sustained based on a theory that the letter of intent was itself an agreement for promotion of AMA Pro's supercross series; the Court agrees for the reasons previously discussed. Clear Channel argues that Count 4 is deficient because the statute of frauds bars JamSports from claiming there was a final promotion agreement; for the reasons previously discussed, summary judgment is denied on this claim.

Returning to Count 3, Clear Channel argues that JamSports has no evidence that Clear Channel knew about the exclusivity requirement contained in the letter of intent, an element of a claim **[**78]** of tortious interference with a contract. *See generally* *HPI Health Care Services, Inc. v. Mt. Vernon Hospital, Inc., 131 Ill. 2d 145, 154-55, 545 N.E.2d 672, 676, 137 Ill. Dec. 19 (1989)* (identifying elements of tortious interference claim). The Court disagrees. JamSports cites evidence from which a jury could find that one of AMA Pro's board members told at least one executive of Clear Channel about the particulars of the exclusivity requirement.

Clear Channel also argues that the proposal that it sent to AMA Pro during the exclusivity period stated that it was being made contingent on AMA Pro's right to consider it, and thus there could not have been an intentional inducement of a breach of the exclusivity clause. A jury reasonably could find that this statement, made at the end of the letter containing the offer - which was tendered only after Clear Channel was made aware of AMA Pro's agreement to deal only with JamSports - contained boilerplate language that was put in merely to cover Clear Channel's tracks rather than as a serious *caveat.* And we note that if the acquiescence of the contracting party were sufficient to defeat a tortious interference claim, **[**79]** for all practical purposes the tort would no longer exist - as a breach by the contracting party is *required* to prove such a claim. *See* *HPI Health Care Services, 131 Ill. 2d at 154-55, 545 N.E.2d at 676*.

Finally, Clear Channel argues that JamSports cannot prove damages arising from AMA Pro's rejection of a deal with JamSports because AMA Pro did not reject the deal, and, in any event, AMA Pro walked away for reasons unrelated to Clear Channel's making of a proposal. The latter point is genuinely disputed, making summary judgment inappropriate. The former argument makes no sense: JamSports' claim is that Clear Channel's alleged interference caused AMA Pro to impose AMA approval as a condition of a deal, knowing full well that the AMA would not approve. Thus the fact that AMA Pro "recommended" the deal to AMA does not defeat JamSports' claim.

Finally, Clear Channel seeks summary judgment on JamSports' claim of tortious interference with prospective advantage, based on the so-called "competition privilege." ***HN32***[] Under this rule, "'the privilege to engage in business and to compete allows one to divert business from one's competitors generally as well as from **[*852]** one's particular **[**80]** competitors provided one's intent is, at least in part, to further one's business and is not solely motivated by spite or ill will.'" *Cromeens, Holloman, Sibert, Inc. v. AB Volvo, 349 F.3d 376, 398 (7th Cir. 2003)* (quoting *Soderlund Bros., Inc. v. Carrier Corp., 278 Ill. App. 3d 606, 615, 663 N.E.2d 1, 8, 215 Ill. Dec. 251 (1995))*. But a defendant is entitled to the protection of this privilege only if it "has not employed a wrongful means or is not motivated solely by malice or ill will." *Id. Soderlund Bros.* cites with approval *section 768* of the Restatement (Second) of Torts, which states that the privilege does not apply if the defendant "employ[s] wrongful means" or its action "create[s] or continue[s] … an unlawful restraint of trade." Restatement (Second) of Torts *§ 768*, at 39 (1979), *quoted in* *Soderlund Bros., 278 Ill. App. 3d at 616, 663 N.E.2d at 8*. Because the Court has ruled that JamSports' claim of monopolization must go to trial, and because there is evidence from which a jury could find that Clear Channel employed "wrongful means" - specifically **[**81]** the type of conduct relied upon to support the monopolization claim - summary judgment based on the competition privilege is inappropriate.

Conclusion

For the reasons stated above, the Court denies JamSports' motion for partial summary judgment on its antitrust claims [docket # 118]; and grants in part and denies in part JamSports' motion for summary judgment against AMA

Pro/Paradama [docket # 119], AMA Pro/Paradama's motion for summary judgment [docket # 123], and Clear Channel's motion for summary judgment [docket # 135]. JamSports' motion to strike venue affidavits [docket # 149] and Clear Channel's motion to exclude the Baade's testimony [docket # 110] are denied. Trial on the remaining claims (Counts 1, 2, 3, 4, 15, 17 and 18) remains set for November 15, 2004. The final pretrial order is to be filed by October 15, 2004, and the final pretrial conference is set for November 4, 2004 at 2:00 p.m. The case is set for a status hearing on September 8, 2004 at 9:30 a.m. for the purpose of discussing the format of the final pretrial order and setting an overall page limit for motions *in limine* and opposing memoranda.

HN1[] **Removal, Specific Cases Removed**

Generally, a defendant may remove a civil action filed in state court if a federal court would have had original jurisdiction. *28 U.S.C.S. § 1441(a)*.

Civil Procedure > ... > Removal > Procedural Matters > General Overview

HN2[] **Removal, Procedural Matters**

A removing party bears the burden of establishing that federal jurisdiction exists at the time of removal.

Civil Procedure > ... > Removal > Specific Cases Removed > Federal Questions

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

Civil Procedure > ... > Removal > Procedural Matters > General Overview

HN3[] Specific Cases Removed, Federal Questions

Because the exercise of removal jurisdiction raises significant federalism concerns, a district court must construe the removal statutes strictly.

Civil Procedure > ... > Jurisdiction > Jurisdictional Sources > Constitutional Sources

Constitutional Law > ... > Jurisdiction > Subject Matter Jurisdiction > Federal Questions

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Federal Questions > General Overview

HN4[] Jurisdictional Sources, Constitutional Sources

Federal district courts have jurisdiction over cases arising under the Constitution, laws, or treaties of the United States. *28 U.S.C.S. § 1331*. Whether a claim arises under federal law must be determined by referring to the "well-pleaded complaint." That means that the federal question must appear on the face of the complaint.

Civil Procedure > ... > Removal > Specific Cases Removed > Federal Questions

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Federal Questions > General Overview

Civil Procedure > ... > Removal > Specific Cases Removed > General Overview

Civil Procedure > ... > Pleadings > Counterclaims > General Overview

HN5[] Specific Cases Removed, Federal Questions

Because a defendant may remove a case to federal court only if the plaintiff could have brought the action in federal court from the outset, the question for removal jurisdiction must also be determined by reference to the "well-pleaded complaint." That a federal question arises in defense of the plaintiff's allegations is insufficient to establish removal jurisdiction. Likewise, that a federal question arises in a defendant's counterclaim also is insufficient to establish removal jurisdiction.

Civil Procedure > ... > Subject Matter Jurisdiction > Federal Questions > General Overview

Constitutional Law > Congressional Duties & Powers > Contracts Clause > General Overview

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

HN6[] Subject Matter Jurisdiction, Federal Questions

For purposes of federal question jurisdiction, by unimpeachable authority, a suit brought upon a state statute does not arise under an act of Congress or the Constitution of the United States because prohibited thereby.

Antitrust & Trade Law > Sherman Act > Defenses

Civil Procedure > ... > Removal > Specific Cases Removed > General Overview

Antitrust & Trade Law > Sherman Act > Jurisdiction

HN7[] Sherman Act, Defenses

A defendant cannot remove an action to federal court on the basis of a defense--even if that defense is anticipated by a plaintiff's complaint, and even if the defense is ultimately the only question in the case.

Antitrust & Trade Law > Sherman Act > Defenses

Civil Procedure > ... > Removal > Specific Cases Removed > Federal Questions

Civil Procedure > ... > Subject Matter Jurisdiction > Federal Questions > General Overview

Civil Procedure > ... > Removal > Specific Cases Removed > General Overview

Civil Procedure > ... > Pleadings > Counterclaims > General Overview

HN8[] Sherman Act, Defenses

For removal to be proper, a federal question must be presented by a plaintiff's complaint as it stands at the time the petition for removal is filed. It is insufficient that a federal question has been raised as a matter of defense or as a counterclaim.

Civil Procedure > ... > Removal > Specific Cases Removed > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Federal Questions > General Overview

HN9[] Removal, Specific Cases Removed

A corollary to the well-pleaded complaint doctrine is the complete preemption doctrine. That doctrine permits removal where federal law so completely preempts a plaintiff's state law claims that the plaintiff's complaint is considered, from the outset, a federal claim arising under federal law.

Civil Procedure > ... > Removal > Specific Cases Removed > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Federal Questions > General Overview

HN10[] **Removal, Specific Cases Removed**

Complete preemption by a federal law provides removal jurisdiction. Complete preemption is different from the more common "ordinary preemption," which does not.

Civil Procedure > ... > Removal > Specific Cases Removed > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Federal Questions > General Overview

HN11[] **Removal, Specific Cases Removed**

Ordinarily, the term federal preemption refers to ordinary preemption, which is a federal defense to a plaintiff's suit and may arise either by express statutory term or by a direct conflict between the operation of federal and state law. Being a defense, it does not appear on the face of a well-pleaded complaint, and, thus, does not authorize removal to federal court. By way of contrast, complete preemption is jurisdictional in nature rather than an affirmative defense to a claim under state law. As such, it authorizes removal to federal court even if the complaint is artfully pleaded to include solely state law claims for relief or if the federal issue is initially raised solely as a defense.

Civil Procedure > ... > Subject Matter Jurisdiction > Federal Questions > General Overview

Governments > Federal Government > Employees & Officials

Civil Procedure > ... > Removal > Specific Cases Removed > General Overview

Governments > Legislation > Interpretation

HN12[] **Subject Matter Jurisdiction, Federal Questions**

Complete preemption is a narrow exception to the well-pleaded complaint rule. To establish complete preemption, defendants must show that (1) the statute contains a civil enforcement provision that creates a cause of action that both replaces and protects the analogous area of state law; (2) there is a specific jurisdictional grant to the federal courts for enforcement of the right; and (3) there is a clear congressional intent that the federal action be exclusive. Few federal statutes can meet such an exacting standard. Also, the United States Supreme Court has sanctioned complete preemption in only two areas: ERISA and federal labor relations.

Business & Corporate Compliance > ... > Transportation Law > Interstate Commerce > State Powers

Transportation Law > Interstate Commerce > Federal Preemption

Transportation Law > Intrastate Commerce

HN13[] **Interstate Commerce, State Powers**

See 49 U.S.C.S. § 14501(b)(1).

Business & Corporate Compliance > ... > Transportation Law > Interstate Commerce > State Powers

Transportation Law > Interstate Commerce > Federal Preemption

Transportation Law > Carrier Duties & Liabilities > Freight Brokers & Forwarders

HN14[] **Interstate Commerce, State Powers**

See 49 U.S.C.S. § 14501(c)(1).

Civil Procedure > ... > Removal > Specific Cases Removed > General Overview

Transportation Law > Interstate Commerce > Federal Preemption

Civil Procedure > ... > Subject Matter Jurisdiction > Federal Questions > General Overview

HN15[] **Removal, Specific Cases Removed**

For purposes of removal, a private cause of action is a necessary element of complete preemption.

Business & Corporate Compliance > ... > Transportation Law > Interstate Commerce > State Powers

Transportation Law > Interstate Commerce > Federal Preemption

Transportation Law > Carrier Duties & Liabilities > Freight Brokers & Forwarders

HN16[] **Interstate Commerce, State Powers**

The Interstate Commerce Act provides only that states and their political subdivisions will not enact or enforce any law, rule, regulation, standard, or other provision that relates to certain areas of motor carrier and freight forwarder and broker services. There is no civil enforcement provision in the statute.

Antitrust & Trade Law > Sherman Act > Defenses

Constitutional Law > Supremacy Clause > General Overview

Antitrust & Trade Law > ... > Private Actions > Costs & Attorney Fees > General Overview

Antitrust & Trade Law > ... > Private Actions > Costs & Attorney Fees > State Regulation

Antitrust & Trade Law > Sherman Act > Jurisdiction

HN17[] **Sherman Act, Defenses**

The federal antitrust laws do not preempt state law.

Civil Procedure > ... > Costs & Attorney Fees > Costs > General Overview

Civil Procedure > ... > Removal > Postremoval Remands > General Overview

Civil Procedure > Remedies > Costs & Attorney Fees > General Overview

HN18[] **Costs & Attorney Fees, Costs**

A district court has discretion to award payment of just costs and any actual expenses, including attorney's fees, incurred as a result of removal under *28 U.S.C.S. § 1447(c)*.

Civil Procedure > ... > Costs & Attorney Fees > Costs > General Overview

Civil Procedure > ... > Removal > Postremoval Remands > General Overview

Civil Procedure > Remedies > Costs & Attorney Fees > General Overview

HN19[] **Costs & Attorney Fees, Costs**

28 U.S.C.S. 1447(c) applies only to those costs and expenses incurred in federal court as a result of removal.

Civil Procedure > ... > Removal > Postremoval Remands > General Overview

HN20[] **Removal, Postremoval Remands**

In applying *28 U.S.C.S. § 1447(c)*, a district court should consider the propriety of a removing party's actions based on an objective view of the legal and factual elements as they stood at the time of removal.

Civil Procedure > ... > Removal > Postremoval Remands > General Overview

HN21[] **Removal, Postremoval Remands**

In applying *28 U.S.C.S. § 1447(c)*, a district court inquires only into the propriety of removal, not the alleged or apparent motive of a removing party.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > ... > Removal > Postremoval Remands > General Overview

Civil Procedure > Remedies > Costs & Attorney Fees > General Overview

HN22[] **Standards of Review, Abuse of Discretion**

In applying *28 U.S.C.S. § 1447(c)*, an award of fees is not an abuse of discretion when the basis for removal is expressly contrary to established precedent.

Antitrust & Trade Law > Sherman Act > Jurisdiction

Opinion

ORDER AND REASONS

Plaintiff moves the Court to remand this matter to the state court in St. Tammany Parish under *28 U.S.C. § 1447(c)*. Defendants oppose the motion. For the following reasons, the Court GRANTS plaintiff's motion to remand.

I. BACKGROUND

Defendants Scott Buras, Barrett Mccreary, Todd Nienaber, Carlos Rodriguez, Jr., and Wayne Tedesco are former employees of plaintiff M, G, & B Services. Defendants signed agreements not to compete with MGB after they stopped working for MGB. On April 29, 2004, MGB sued defendants in state court for breach of contract. MGB alleges that defendants violated the non-compete provisions **[*2]** in their employment contracts. On June 1, 2004, defendants removed the action to this Court. On May 28, 2004, defendants' new company, Laginappe Logistics sued MGB in this Court in Civil Action No. 04-1509. The cases were consolidated and are currently before this Court.

II. MOTION TO REMAND

HN1[] Generally, a defendant may remove a civil action filed in state court if a federal court would have had original jurisdiction. *See 28 U.S.C. § 1441(a)*. ***HN2***[] "The removing party bears the burden of establishing that federal jurisdiction exists" at the time of removal. *De Aguilar v. Boeing Co., 47 F.3d 1404, 1408 (5th Cir. 1995)*. ***HN3***[] Because the exercise of removal jurisdiction raises significant federalism concerns, the Court must construe the removal statutes strictly. *See Eastus v. Blue Bell Creameries, L.P., 97 F.3d 100, 106 (5th Cir. 1996)*. Defendants removed the action under federal question jurisdiction and complete preemption.

A. The Well-Pleaded Complaint

(1) Law

HN4[] Federal district courts have jurisdiction over cases "arising under the Constitution, laws, or treaties of the United States." *28 U.S.C. § 1331*. **[*3]** Whether a claim arises under federal law must be determined by referring to the "well-pleaded complaint." *Merrell Dow Pharm. Inc. v. Thompson, 478 U.S. 804, 808, 92 L. Ed. 2d 650, 106 S. Ct. 3229 (1986)* (citing *Franchise Tax Bd. v. Constr. Laborers Vacation Trust, 463 U.S. 1, 9-10, 77 L. Ed. 2d 420, 103 S. Ct. 2841 (1983))*; *Howery v. Allstate Ins. Co., 243 F.3d 912, 916 (5th Cir. 2001)*. This means that the federal question must appear on the face of the complaint. *See* *Torres v. Southern Peru Copper Corp., 113 F.3d 540, 542 (5th Cir. 1997)*. ***HN5***[] Because a defendant may remove a case to federal court only if the plaintiff could have brought the action in federal court from the outset, "the question for removal jurisdiction must also be determined by reference to the 'well-pleaded complaint.'" *Merrell Dow, 478 U.S. at 808* (citation omitted). That a federal question arises in defense of the plaintiff's allegations is insufficient to establish removal jurisdiction. *Metro Ford Truck Sales, Inc. v. Ford Motor Co., 145 F.3d 320, 327 (5th Cir. 1998)*. Likewise, that a federal question arises in a defendant's counterclaim also is insufficient **[*4]** to establish removal jurisdiction. The *Holmes Group v. Vornado Circulation Sys., 535 U.S. 826, 831, 153 L. Ed. 2d 13, 122 S. Ct. 1889 (2002)*.

(2) Analysis

Defendants assert that MGB's complaint raises a federal question under the *Sherman Antitrust Act*. Defendants reason that MGB's attempt to enforce the non-compete agreements is an effort to restrain trade, and contracts to restrain trade are illegal under the Sherman Act. Therefore, defendants argue that MGB has to prove affirmatively that the non-compete agreements do not violate federal ***antitrust law*** as an essential element of their claim for breach of contract.

MGB's complaint presents a state-law claim for breach of contract. Contrary to defendants' reasoning, proving that the contracts do not violate the Sherman Act is not an essential element of MGB's breach of contract claim. As the Supreme Court has explained, ***HN6***[] "'by unimpeachable authority, a suit brought upon a state statute does not arise under an act of Congress or the Constitution of the United States because prohibited thereby.'" *Franchise Tax Bd., 463 U.S. at 13* (quoting *Gully v. First Nat. Bank, 299 U.S. 109, 116, 81 L. Ed. 70, 57 S. Ct. 96 (1936))*.

That defendants **[*5]** plan to use the Sherman Act and the Constitution as defenses does not supply a basis for removal jurisdiction. *Metro Ford Truck, 145 F.3d at 327*. ***HN7***[] Defendants cannot remove the action to federal court on the basis of a defense-even if that defense is anticipated by the plaintiff's complaint, and even if the defense is ultimately the only question in the case. *Franchise Tax Bd., 463 U.S. at 14*. Likewise, defendants' counterclaim under the Sherman Act does not supply a basis for removal jurisdiction. *See* *Holmes Group, 535 U.S. at 830*; *Metro Ford Truck, 145 F.3d at 326-27* (explaining that ***HN8***[] for removal to be proper, "the federal question must be presented by the plaintiff's complaint as it stands at the time the petition for removal is filed … It is insufficient that a federal question has been raised as a matter of defense or as a counterclaim"). *See also* *Metro. Life Ins. Co. v. Balinas, 2002 U.S. Dist. LEXIS 10830, 2002 WL 1298774, at *3 (E.D. La. June 10, 2002)* (remanding the action to state court because the defendant's Sherman Act counterclaim was an insufficient basis to support removal). Thus, defendants' federal law defense **[*6]** and counterclaim under the Sherman Act do not create federal removal jurisdiction. [1]

---

[1] Defendants cite two federal cases for the proposition that the Sherman Act creates federal removal jurisdiction in this case. *See* *General Inv. Co. v. Lake Shore & M. S. R. Co., 260 U.S. 261, 67 L. Ed. 244, 43 S. Ct. 106, 1 Ohio Law Abs. 162 (1922)*; *Miller v. Granados, 529 F.2d 393 (5th Cir. 1976)*. Those cases are inapposite. The plaintiffs in both of those cases alleged violations of the Sherman Act. Therefore, federal claims arose on the face of the plaintiffs' complaints. *General Inv. Co., 260 U.S. at 270-71*; *Miller, 529 F.2d at 394-95*. Unlike the plaintiffs in *Lake Shore* and *Miller,* MGB has not alleged any violations of the Sherman Act. Defendants also cite two Louisiana case to support their argument that the Sherman Act provides a basis for removal jurisdiction. *See* *Loew's Inc. v. Don George, Inc., 237 LA. 132, 110 So. 2d 553 (La. 1959)*; *Burgess v. Hogan, 175 So.2d 924 (La. App. Ct. 1965)*. Neither of those cases dealt with removal jurisdiction. Instead, they addressed the state courts' inability to resolve Sherman Act claims because the Sherman Act gives federal courts exclusive jurisdiction over Sherman Act claims. *Loew's, 110 So.2d at 137-38*; *Burgess, 175 So.2d at 925*. A state court's lack of jurisdiction over certain claims does not create a

[*7] B. Complete Preemption

(1) Law

HN9[] A corollary to the well-pleaded complaint doctrine is the complete preemption doctrine. *Johnson v. Baylor University, 214 F.3d 630, 632 (5th Cir. 2000)*. This doctrine permits removal where federal law so completely preempts a plaintiff's state law claims that the plaintiff's complaint is considered, from the outset, a federal claim arising under federal law. *Rivet v. Regions Bank of Louisiana, 522 U.S. 470, 475, 139 L. Ed. 2d 912, 118 S. Ct. 921 (1998)*. *See also Johnson, 214 F.3d at 632* (quoting *Metro. Life Ins. Co. v. Taylor, 481 U.S. 58, 63, 95 L. Ed. 2d 55, 107 S. Ct. 1542 (1987))* (noting that "'Congress may so completely preempt a particular area that any civil complaint raising this select group of claims is necessarily federal in character'"). Therefore, HN10[] complete preemption by a federal law provides removal jurisdiction. Complete preemption is different from the more common "ordinary preemption," which does not. *See Johnson, 214 F.3d at 632*. The Fifth Circuit has distinguished between the two types of preemption:

> HN11[] Ordinarily, the term federal preemption refers to ordinary preemption, **[*8]** which is a federal defense to the plaintiff's suit and may arise either by express statutory term or by a direct conflict between the operation of federal and state law. Being a defense, it does not appear on the face of a well-pleaded complaint, and, thus, does not authorize removal to federal court. By way of contrast, complete preemption is jurisdictional in nature rather than an affirmative defense to a claim under state law. As such, it authorizes removal to federal court even if the complaint is artfully pleaded to include solely state law claims for relief or if the federal issue is initially raised solely as a defense.

Id. (quoting *Heimann v. Nat'l Elevator Indus. Pension Fund, 187 F.3d 493, 500 (5th Cir. 2000)*, *overruled on other grounds by Arana v. Ochsner Health Plan, 338 F.3d 433, 440 (5th Cir. 2003))*.

HN12[] Complete preemption is a narrow exception to the well-pleaded complaint rule. *See id.* To establish complete preemption, defendants must show that "(1) the statute contains a civil enforcement provision that creates a cause of action that both replaces and protects the analogous area of state law; (2) there is a specific jurisdictional **[*9]** grant to the federal courts for enforcement of the right;" and (3) there is a clear Congressional intent that the federal action be exclusive. *Hoskins v. Bekins Van Lines, 343 F.3d 769, 775-76 (5th Cir. 2003)*. As the Fifth Circuit has noted, "'few federal statutes can meet such an exacting standard.'" *Johnson, 214 F.3d at 632*. Significantly, the Supreme Court has sanctioned complete preemption in only two areas: ERISA and federal labor relations. *Id.*

(2) The Interstate Commerce Act

Defendants argue that the ICA completely preempts MGB's state law claims. *See 49 U.S.C. § 14501*. The sections of the Interstate Commerce Act on which defendants rely provide:

> HN13[] No State or political subdivision thereof and no intrastate agency or other political agency of 2 or more States shall enact or enforce any law, rule, regulation, standard, or other provision having the force and effect of law relating to intrastate rates, intrastate routes, or intrastate services.
>
> HN14[] [A] State, political subdivision of a State, or political authority of 2 or more States may not enact or enforce a law, regulation, or other provision having **[*10]** the force and effect of law related to a price, route, or service of any motor carrier … or freight forwarder with respect to the transportation of property.

49 U.S.C. § § 14501(b)(1),*14501(c)(1)*. As a threshold matter, defendants have neither explained how the ICA applies to an action to enforce non-compete agreements nor cited any authority to that effect. It is far from clear

---

basis for federal removal jurisdiction. The Supreme Court and the Fifth Circuit have clearly established the standard for asserting removal jurisdiction.

how a state's enforcement of private contracts amounts to enactment or enforcement of a law, rule, regulation, standard, or other provision. The Airline Deregulation Act is similar to the ICA and prohibits States from enforcing any "law, rule regulation, standard, or other provision having the force and effect of law relating to rates, routes, or services of any air carrier." 49 U.S.C. App. § 1305(a)(repealed 2004). The Supreme Court expressly held that state enforcement of private contracts did not amount to an enactment or enforcement of a law, rule, or regulation or other provision having the force of law under the ADA. *American Airlines, Inc. v. Wolens, 513 U.S. 219, 228-29, 130 L. Ed. 2d 715, 115 S. Ct. 817 (1995)*. Since the ADA and the ICA **[*11]** share much of the same language, the Supreme Court's interpretation of the ADA would be persuasive in this context. Additionally, it is likewise not apparent that an action for breach of a non-compete agreement "relate [s] to" prices, routes, or services.

Defendants fail to establish that the Interstate Commerce Act completely preempts MBG's claims. To begin with, the Act does not contain a civil enforcement provision that creates a private cause of action. ***HN15***[] A private cause of action is a necessary element of complete preemption. *See* *Hoskins, 343 F.3d at 775*. The ICA ***HN16***[] provides only that states and their political subdivisions will not enact or enforce any law, rule, regulation, standard, or other provision that relates to certain areas of motor carrier and freight forwarder and broker services. There is no civil enforcement provision in the statute. Without a civil enforcement provision, the ICA cannot completely preempt MGB's state law claims. *See* *Commercializadora Portimex, S.A. de C.V. v. Thionville Labs., Inc., 2004 U.S. Dist. LEXIS 10947, 2004 WL 1336407 at *6 (E.D. La. June 14, 2004)* (determining that the *Grain Standards Act* does not completely preempt state law because **[*12]** the statute does not create a private cause of action).

MGB's claim implicates the ICA only to the extent that defendants may use it as a defense to their breach of contract claim. As explained *supra,* "the assertion of a defense of federal preemption of state law is insufficient to invoke federal-question jurisdiction." *Beers v. North American Van Lines, Inc., 836 F.2d 910, 913 (5th Cir. 1988)*(holding that the defendant's assertion of a defense under the ICA was insufficient to support federal removal jurisdiction). Thus, defendants' possible assertion of a defense under the ICA does not create removal jurisdiction.

Accordingly, the Court concludes that the Interstate Commerce Act does not completely preempt the state law in this area, and MGB's complaint does not establish federal question jurisdiction on the ground of federal preemption.

(3) The Sherman Act

The defendants also argue that the Sherman Act preempts MGB's state law breach of contract claim. The defendants allege that MGB seeks to enforce a contract that restrains trade, which implicates federal ***antitrust law***. Defendants contend that since MGB in essence seeks to "enforce" an antitrust violation, **[*13]** the antitrust laws supply jurisdiction.

Defendants' argument that the contract plaintiff seeks to enforce is illegal under the federal antitrust laws is simply a defense. As noted, a defense does not confer removal jurisdiction. Further, ***HN17***[] the federal antitrust laws do not preempt state law. *See* *Terrebonne Homecare, Inc. v. SMA Health Plan, Inc., 271 F.3d 186, 189 (5th Cir. 2001)* (holding that federal antitrust laws do not preempt state antitrust laws). Accordingly, the Court does not have jurisdiction by virtue of the Sherman Act.

C. Attorneys' Fees and Costs

MGB requests attorneys' fees and costs. ***HN18***[] The Court has discretion to award "payment of just costs and any actual expenses, including attorney's fees, incurred as a result of removal" under *28 U.S.C. § 1447(c)*. *See also* *Miranti v. Lee, 3 F.3d 925, 929 (5th Cir. 1993)* (noting that the district court has discretion to award fees only if defendant's removal was improper). *Section 1447(c)* ***HN19***[] applies only to those costs and expenses incurred in federal court as a result of removal. *W. H. Avitts v. Amoco Production Co., 111 F.3d 30, 32 (5th Cir. 1997)*. ***HN20***[] In applying **[*14]** *section 1447(c)*, "the court should consider the propriety of the removing party's actions based on an objective view of the legal and factual elements" as they stood at the time of removal. *Valdes v. Wal-Mart Stores, Inc., 199 F.3d 290, 293 (5th Cir. 2000)*. ***HN21***[] The court inquires only into the propriety of removal, not the alleged or apparent motive of the removing party. *Id. at 292*. ***HN22***[] An award of fees is not an abuse of discretion when the basis for removal is expressly contrary to established precedent. *Garcia v. Amfels, Inc., 254 F.3d 585, 588 (5th Cir. 2001)*.

The Court declines to award attorney's fees and costs to MGB. Defendants' argument that their Sherman Act counterclaim and defense creates federal question jurisdiction is clearly contrary to established law. On the other hand, defendants' ICA preemption argument, while incorrect on the merits, presents a less clear-cut issue. Defendants' misguided reliance on preemption in this context is arguably reasonable in light of the complex nature of preemption. Therefore, their error does not justify an award of attorneys' fees and costs in this case. *See Valdes, 199 F.3d at 294* **[*15]** (affirming the district court's denial of attorney's fees when defendant removed on objectively reasonable, albeit incorrect, grounds). Accordingly, the Court denies MGB's request for attorneys' fees and costs.

III. SEVERANCE OF DEFENDANTS' SHERMAN ACT COUNTERCLAIM

The Court remands the action for lack of subject matter jurisdiction under *28 U.S.C. 1447(c)*. Defendants ask the Court to sever their Sherman Act counterclaim and consider it on its own merits. The Court does not have jurisdiction over this action. ***HN23***[] The Court cannot assert its jurisdiction to sever claims when it does not have jurisdiction over the action at all. *See Holmes Group, 535 U.S. at 831* (noting that counterclaims cannot serve as a basis for federal question jurisdiction). [2] Accordingly, the Court will not sever defendants' Sherman Act counterclaim. Defendants allege that they will be prejudiced if this Court does not hear their Sharman Act counterclaim. Defendants' argument is without merit. Pending before the Court is Civil Action number 04-1509 in which defendants' company, Lagniappe Logistics, sues MGB, among others, for Sherman Act violations.

[*16] IV. CONCLUSION

For the above reasons, the Court GRANTS MGB's motion to remand Civil Action No. 04-1512 to state court and DENIES MGB's request for fees and costs.

New Orleans, Louisiana this 19th day of August, 2004.

SARAH S. VANCE

UNITED STATES DISTRICT JUDGE

End of Document

[2] Defendants cite several cases for the proposition that the court can entertain their counterclaims if there is an independent basis of jurisdiction to support them. *See Pioche Mines Consol, Inc. v. Fidelity-Philadelphia Trust Co., 206 F.2d 336 (9th Cir. 1953)*; *Isenberg v. Biddle, 75 U.S. App. D.C. 100, 125 F.2d 741 (D.C. Cir. 1941)*; *Lion Mfg. Corp. v. Chi. Flexible Shaft Co., 106 F.2d 930 (7th Cir. 1939)*; *Jackson v. Simmons, 98 F. 768 (7th Cir. 1900)*. Defendants' cases are inapposite because none is in the removal context. All of those cases addressed the situation in which the courts dismissed the plaintiffs' claims for lack of jurisdiction, but retained the defendants' counterclaims when an independent basis for federal jurisdiction supported them. None of the actions was removed from state court.

HN1[] **Removal, Specific Cases Removed**

Pursuant to *28 U.S.C.S. § 1441*, any civil action brought in a state court of which the district courts of the United States have original jurisdiction, may be removed by the defendant to the corresponding district court. The propriety of removal is determined as of the time of removal, and the party seeking removal bears the burden of proving that the requirements for federal jurisdiction have been met. Removal jurisdiction raises significant federalism concerns, and as a result, must be strictly construed. Where federal jurisdiction is doubtful, therefore, a remand is necessary.

Civil Procedure > ... > Subject Matter Jurisdiction > Federal Questions > General Overview

Civil Procedure > ... > Jurisdiction > Diversity Jurisdiction > General Overview

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

HN2[] **Subject Matter Jurisdiction, Federal Questions**

Federal jurisdiction lies when an action falls within the provisions of either *28 U.S.C.S. § 1331* or *28 U.S.C.S. § 1332*.

Civil Procedure > ... > Subject Matter Jurisdiction > Federal Questions > Substantial Questions

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Federal Questions > General Overview

HN3[] **Federal Questions, Substantial Questions**

In deciding whether an action presents a federal question pursuant to *28 U.S.C.S. § 1331*, a court must first determine whether the cause of action is created by federal or state law. If the cause of action is created by federal law, federal jurisdiction unquestionably exists. If the cause of action is created by state law, the question is whether making a determination on plaintiff's claim necessarily depends on resolution of a substantial question of federal law.

Civil Procedure > ... > Diversity Jurisdiction > Amount in Controversy > Determination

Constitutional Law > The Judiciary > Jurisdiction > Diversity Jurisdiction

Civil Procedure > Dismissal > Voluntary Dismissals > General Overview

Civil Procedure > ... > Voluntary Dismissals > Notice of Dismissal > General Overview

Civil Procedure > ... > Pretrial Judgments > Nonsuits > Voluntary Nonsuits

HN8[] **Pleadings, Answers**

Fed. R. Civ. P. 41(a)(1) provides that a plaintiff may dismiss an action without order of the court by filing a notice of dismissal at any time before service by the adverse party of an answer or of a motion for summary judgment.

Civil Procedure > Dismissal > Voluntary Dismissals > General Overview

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN9[] **Dismissal, Voluntary Dismissals**

A motion to dismiss is neither an answer, nor a motion for summary judgment, and does not, therefore, operate to terminate the right of dismissal by notice. The United States Supreme Court has held that courts must give the Federal Rules of Civil Procedure their plain meaning, so while it may be "especially tempting" to deny a plaintiff his right to dismiss in a given case, courts are obligated to adhere to the plain language of *Rule 41(a)(1)*.

Civil Procedure > ... > Class Actions > Class Members > General Overview

Governments > Fiduciaries

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

Civil Procedure > Special Proceedings > Class Actions > Voluntary Dismissals

Civil Procedure > Dismissal > General Overview

Civil Procedure > Dismissal > Voluntary Dismissals > General Overview

Civil Procedure > ... > Voluntary Dismissals > Court Order > General Overview

HN10[] **Class Actions, Class Members**

Fed. R. Civ. P. 41(a)(1) states that the right of voluntary dismissal is subject to the provisions of *Fed. R. Civ. P. 23(e)*, which requires court approval of the dismissal of any class action. The United States Court of Appeals for the Fourth Circuit, however, has held that *Rule 23(e)* does not apply to pre-certification dismissals. Nonetheless, the court must be alert to the possibility that a class representative might violate his fiduciary obligation to putative class members, and that dismissal and/or settlement might prejudice the rights of absent class members such that denial of the motion for dismissal or notice to putative class members might be required.

Opinion

[*892] MEMORANDUM

Plaintiff Birdsong Tractor and Supply, Inc. ("Birdsong") has brought this action on behalf of itself and others similarly situated against defendant Microsoft Corporation ("Microsoft"). The complaint alleges: 1) monopolistic practices and price fixing in violation of the *Arkansas Deceptive Trade Practices Act* ("ADTPA"), 2) negligence, and 3) unjust enrichment. Pending before me are several motions briefed by the parties before this case was transferred to this district pursuant to *28 U.S.C. § 1407* in December 2003. Plaintiff has filed a motion to remand and a motion for voluntary non-suit. [1] **[**3]** Microsoft has filed **[**2]** a motion to dismiss. [2] For the reasons stated below, plaintiff's motion to remand is denied and plaintiff's motion for voluntary non-suit is granted. I need riot reach the merits of Microsoft's motion to dismiss.

I.

A.

Microsoft removed this case to federal court on June 18, 2003. Plaintiff filed a motion to remand on June 25, 2003, arguing that the case should be remanded because federal jurisdiction does not exist over its complaint. *28 U.S.C. § 1447*.

HN1[] Pursuant to *28 U.S.C. § 1441*, "any civil action brought in a State court of which the district courts of the United States have original jurisdiction, may be removed by the defendant" to the corresponding district court. The propriety of removal is determined as of the time of removal, *Nolan v. Boeing Co., 919 F.2d 1058, 1064 n.5 (5th Cir. 1990)*, and the party seeking removal bears the burden of proving that the requirements for federal jurisdiction have been met. *St. Paul Reins. Co. v. Greenberg, 134 F.3d 1250, 1253-54 (5th Cir. 1998)*. Removal jurisdiction raises significant federalism concerns, and as a result, must be strictly construed. *Shamrock Oil & Gas Corp. v. Sheets, 313 U.S. 100, 61 S. Ct. 868, 85 L. Ed. 1214 (1941).* **[**4]** Where federal jurisdiction is doubtful, therefore, a remand is necessary. *Mulcahey v. Columbia Organic Chems. Co., Inc., 29 F.3d 148, 151 (4th Cir. 1994)*.

HN2[] Federal jurisdiction lies when an action falls within the provisions of either *28 U.S.C. § 1331* or *28 U.S.C. § 1332*. ***HN3***[] In deciding whether an action presents a federal question pursuant to *28 U.S.C. § 1331*, a court must first determine whether the cause of action is created by federal or state law. *Id.* If the cause of action is created by federal law, federal jurisdiction unquestionably exists. *Merrell Dow Pharms., Inc. v. Thompson, 478 U.S. 804, 809, 106 S. Ct. 3229, 3233, 92* ***[*893]*** *L. Ed. 2d 650 (1986)*. If the cause of action is created by state law, the question is whether making a determination on plaintiff's claim "necessarily depends on resolution of a substantial question of federal law." *Franchise Tax Bd. v. Constr. Laborers Vacation Trust, 463 U.S. 1, 28, 103 S. Ct. 2841, 2856, 77 L. Ed. 2d 420 (1983)*. ***HN4***[] In deciding whether diversity jurisdiction exists pursuant to *28 U.S.C. § 1332*, **[**5]** a court must determine whether the parties are completely diverse, and whether the amount in controversy exceeds $ 75,000.

B.

Plaintiff's complaint alleges three state law causes of action, and seeks relief in the form of damages and restitution. Microsoft contends that this action falls within the provisions of both *28 U.S.C. § 1331* and *28 U.S.C. § 1332*. First, Microsoft argues that the first two counts of plaintiff's complaint, the claim under the ADTPA and the negligence claim, "arise under" federal law and that jurisdiction therefore exists under *28 U.S.C. § 1331*. Secondly, Microsoft argues that this case qualifies for diversity jurisdiction under *28 U.S.C. § 1332*, as the parties are of diverse citizenship, and plaintiff's claim for restitution exceeds the required amount in controversy.

---

[1] Plaintiff's motion to remand was filed on June 25, 2003. Plaintiff's motion for voluntary non-suit was filed on October 16, 2003. Plaintiff also filed two motions to amend its complaint on June 25, 2003 and July 3, 2003. Microsoft consented to, and the Arkansas District Court granted, the July 3rd motion to the extent it sought to add an additional named representative, however, the court declined to rule on any substantive changes. I need not reach these motions as I am granting plaintiffs motion for voluntary non-suit. However, I do note that, with the exception of the amendment noted above, it is plaintiff's original complaint that I have considered in connection with the motion to remand, because, as indicated below, the propriety of removal is determined at the time of removal, which, in this case, was June 18, 2003. *See* *Nolan v. Boeing Co., 919 F.2d 1058, 1064 n.5 (5th Cir. 1990)*.

[2] Microsoft's motion to dismiss was filed on June 25, 2003.

1.

In support of its contention that plaintiff's complaint arises under federal law, Microsoft first points out that complaints in Arkansas courts are construed in light of the "facts alleged," without regard to the legal theories set forth in the complaint. Therefore, Microsoft contends, plaintiffs **[**6]** express invocation of federal antitrust laws and reliance on the fact findings of the district court in the government cases brought under the *Sherman Act* demonstrate that plaintiffs complaint asserts claims under federal law. However, the sole case cited by Microsoft concerns exclusively state law. *See* *McQuay v. Guntharp, M.D., 331 Ark. 466, 963 S.W.2d 583 (Ark. 1998)*(considering whether the facts in a complaint stated a claim for outrage or battery). While it is conceivable that an Arkansas court might decide that plaintiff's facts more appropriately state a claim under state statutes other than the ADTPA [3], there is no case law to suggest that an Arkansas state court would construe plaintiff's complaint to state federal claims.

[7]** Secondly, Microsoft contends that no private right of action allowing indirect-purchaser recovery exists under Arkansas law "for the types of unilateral abuse of monopoly power alleged by Birdsong." The question of whether Arkansas law provides for such a right of action is "an issue of state law and does not involve a substantial question of federal law." *See* *Thorp v. Centura Bank, 200 F. Supp.2d 559, 560 (E.D. N.C. 2001)*. Moreover, even if plaintiffs indirect purchaser claim fails under state law, it cannot be recast as a federal claim. It is well-established that ***HN5***[] federal ***antitrust law*** does not completely preempt state antitrust statutes, *California v. Arc America Corp., 490 U.S. 93, 109 S. Ct. 1661, 104 L. Ed. 2d 86 (1989)*. [4]

[8]** **[*894]** Relying on my opinion in *In re Microsoft Corp. Antitrust Litigation, 127 F. Supp.2d 702, 722 (D.Md. 2001)*, Microsoft contends that because Arkansas law does not provide a private right of action for indirect purchasers, it is "inferable" that Birdsong is stating a federal claim. However the complaint at issue in the earlier case is distinguishable from the instant complaint There, the plaintiffs did not plead any specific causes of action, the state antitrust statute was clearly limited to intrastate conduct, and the prayer for relief requested treble damages and unjust enrichment, neither of which were available to plaintiff under the relevant state law. By contrast, Birdsong specifically pleads state law causes of action, and does not make any request for treble damages. Under these circumstances, I am not persuaded that it is "inferable" that plaintiff is stating a federal claim.

Finally, Microsoft contends that plaintiff's invocation of federal ***antitrust law*** as a basis for its negligence claim creates federal question jurisdiction. This contention is unavailing. ***HN6***[] The Fourth Circuit has held that the mere reference to federal statutes that provide a private cause **[**9]** of action is not enough to show congressional intent to exercise federal jurisdiction. *See* *Mulcahey, 29 F.3d at 153*. Federal jurisdiction may be properly exercised only when: "1) the federal statute cited in the complaint provides for a private right of action, and 2) the plaintiff is not barred from utilizing the private right of action." *Healthtek Solutions, Inc. v. Fortis Benefits Ins. Co., 274 F. Supp.2d 767, 774 (E.D. Va. 2003)*. In *Mulcahey*, the court concluded that no federal question was presented by plaintiffs' reference to federal environmental statutes in a state law negligence per se claim where: 1) the relief sought by plaintiffs, compensatory damages, was not available under the statutes, and 2) plaintiffs were procedurally or substantively barred from proceeding under any of the statutes. *29 F.3d at 153*. In the instant case, plaintiff would be similarly barred from proceeding under the federal antitrust laws by *Illinois Brick*. Accordingly, federal jurisdiction would not be proper.

---

[3] Microsoft contends plaintiff's claims would be more appropriately brought under the Arkansas ***Antitrust Law*** of 1905 (codified at *Ark. Code §§ 4-75-301 to 4-75-320*) or the Arkansas Unfair Practices Act (codified at *Ark. Code §§ 4-75-201 to 4-75-217*) because these are the Arkansas laws governing alleged antitrust violations. Moreover, plaintiff's claims of price-fixing under the ADTPA must fail, Microsoft argues, because price-fixing requires action in concert with another party. *See* Black's Law Dictionary (5th ed. 1979). Of course, claims under the Arkansas antitrust laws would similarly fail, according to Microsoft, because the Arkansas Attorney General allegedly has the sole authority under both acts to sue on behalf of indirect purchasers.

[4] Of course, another reason that plaintiff's claim cannot be recast as a federal claim is that I have held that the *Illinois Brick* rule prevents persons situated like plaintiff from asserting a claim for monetary damages under federal law. *See* *In re Microsoft Corp. Antitrust Litig., 127 F. Supp.2d 702, 708-09 (D. Md. 2001)*.

The Fourth Circuit noted that its conclusion was further supported by the Supreme Court's decision in *Christianson v. Colt Industrial Operating Corporation, 486 U.S. 800, 108 S. Ct. 2166, 100 L. Ed. 2d 811 (1988).* **[**10]** *Mulcahey, 29 F.3d at 153*. *Christianson*, the court said, "teaches" that ***HN7***[] where federal statutes provide "only one of plaintiff's numerous theories of recovery for a particular claim, the federal issue raised thereby is not substantial." *Id. at 154*. In the instant case, plaintiff alleges negligence by Microsoft based on violations of state and federal law. Therefore, federal law provides only an "alternative theory of negligence," and federal subject matter jurisdiction does not exist as to this claim. *Id.*

2.

Microsoft also contends that federal jurisdiction exists because diversity jurisdiction has been established. It is undisputed that plaintiff and Microsoft are completely diverse. The disputed issue is whether plaintiff's claims satisfy the amount in controversy requirement.

Microsoft asserts that plaintiff's claim for disgorgement of profits satisfies the amount in controversy requirement pursuant to my decision in *In re Microsoft Corp. Antitrust Litigation, 127 F. Supp.2d at 720-721*. In that case, I held that diversity **[*895]** jurisdiction was appropriate where plaintiffs claimed disgorgement in addition to their claims for **[**11]** damages, as plaintiff has done in the instant case. Plaintiff argues that the Eighth Circuit's decision in *Crawford v. F. Hoffman-La Roche, Ltd., 267 F.3d 760 (2001)*, holding that plaintiffs' restitution claims did not support diversity jurisdiction, should control. However, that case is not binding authority on this court, and although I respect its reasoning, I was aware of other cases which had reached the same conclusion when I reached my earlier decision. Plaintiff provides no compelling reason why I should depart from my view. Therefore, I find that the amount in controversy requirement has been met, and diversity jurisdiction exists in this case. Consequently, plaintiff's motion for remand is denied.

II.

Next, I must consider plaintiff's motion for voluntary non-suit. *Federal Rule of Civil Procedure 41(a)(1)* ***HN8***[] provides that a plaintiff may dismiss an action without order of the court by "filing a notice of dismissal at any time before service by the adverse party of an answer or of a motion for summary judgment." Microsoft does not claim to have filed an answer or a motion for summary judgment. However, it contends that **[**12]** plaintiff's motion should be denied because since the filing of flu's action, plaintiffs have filed eight motions and Microsoft itself has filed a motion to dismiss that is fully briefed. According to Microsoft, to allow plaintiff to dismiss now would "not only condone plaintiff's blatant forum shopping, but would also waste judicial resources and prejudice both the class and Microsoft."

HN9[] A motion to dismiss is "neither an answer, nor . . . a motion for summary judgment," and does not, therefore, operate to "terminate the right of dismissal by notice." Federal Practice and Procedure § 2363. [5] The Supreme Court has held that courts must give the Federal Rules of Civil Procedure their plain meaning, *Pavelic & LeFlore v. Marvel Entertainment Group, Div. of Cadence Indus. Corp., 493 U.S. 120, 123, 107 L. Ed. 2d 438, 110 S. Ct. 456 (1989)*, so while it may be "especially tempting" to deny plaintiff his right to dismiss in a given case, courts are obligated to adhere to the plain language of *Rule 41(a)(1)*. *See* *Marex Titanic, Inc. v. The Wrecked and Abandoned Vessel, 2 F.3d 544, 547 (4th Cir. 1993)*.

[13]** Plaintiff seeks court approval of its motion because *Rule 41(a)(1)* ***HN10***[] states that the right of voluntary dismissal is subject to the provisions of *Rule 23(e)*, which requires court approval of the dismissal of any class action. The Fourth Circuit, however, has held that *Rule 23 (e)* does not apply to pre-certification dismissals. *See* *Shelton v. Pargo, Inc., 582 F.2d 1298, 1303-14 (4th Cir. 1978)*. Nonetheless, I must be alert to the possibility that a class representative might violate his fiduciary obligation to putative class members, and that dismissal and/or

---

[5] A motion to dismiss may be converted into a motion for summary judgment when matters outside the pleading are presented to and not excluded by the court, however, this provision is not relevant to the instant case. *Fed. R. Civ. P. 12(b)(6)*.

settlement might prejudice the rights of absent class members such that denial of the motion for dismissal or notice to putative class members might be required. *Id.*

Although Microsoft posits that "the class" would be prejudiced by a voluntary dismissal, it does not offer any reasons why such prejudice would result Unlike*Shelton*, this case involves voluntary dismissal only, without an accompanying settlement of claims. Therefore, I need not be concerned, for example, that the class representative might be wrongfully leveraging **[*896]** putative class member's claims to achieve a more desirable settlement for himself. **[**14]** There is no indication that plaintiff has violated any fiduciary obligation to the putative class.

Likewise, there is no basis for finding that the voluntary non-suit would waste judicial resources, as Microsoft contends. The pending motions are the first ones I have been called upon to decide, and the work that was done in the Eastern District of Arkansas before this action was transferred to this court was not extensive in nature. As for the motion to dismiss that Microsoft has filed, no court has considered or decided it. Although the parties have expended their resources in briefing the motion, if this action is re-instituted, undoubtedly Microsoft will again move to dismiss and the work that was done in preparing the briefs here will be put to use.

For the foregoing reasons, plaintiff's motion to remand is denied. Plaintiffs motion for voluntary non-suit is granted. A separate order to that effect is being entered herewith.

HN1[] **Motions to Dismiss, Failure to State Claim**

On a motion to dismiss pursuant to *Fed. R. Civ. P. 12(b)(6)* for failure to state a claim, the allegations of a complaint must be accepted as true and are to be construed in the light most favorable to the nonmoving party. A *Rule 12(b)(6)* motion tests the legal sufficiency of the claims asserted in the complaint. Thus, if the complaint states a claim under any legal theory, even if the plaintiff erroneously relies on a different legal theory, the complaint should not be dismissed. On the other hand, dismissal is proper where it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief. Where a motion to dismiss is granted, a district court should provide leave to amend unless it is clear that the complaint could not be saved by any amendment.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN2[] **Motions to Dismiss, Failure to State Claim**

Generally, a district court may not consider any material beyond the pleadings in ruling on a *Fed. R. Civ. P. 12(b)(6)* motion. However, material which is properly submitted as part of the complaint may be considered on a motion to dismiss. Similarly, documents whose contents are alleged in a complaint and whose authenticity no party questions, but which are not physically attached to the pleading, may be considered in ruling on a *Rule 12(b)(6)* motion to dismiss without converting the motion to dismiss into a motion for summary judgment. If the documents are not physically attached to the complaint, they may be considered if their authenticity is not contested and the plaintiff's complaint necessarily relies on them. The district court will not accept as true pleading allegations that are contradicted by facts that can be judicially noticed or by other allegations or exhibits attached to or incorporated in the pleading.

HN3[] **Sherman Act, Claims**

Section 1 of the Sherman Act, *15 U.S.C.S. § 1*, states in part that every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal. The elements required to allege a *§ 1* violation are: (1) an agreement or conspiracy among two or more persons or distinct business entities; (2) by which the persons or entities intend to harm or restrain competition; and (3) which actually injures competition. Although *§ 1* claims are not subject to a heightened pleading standard, a plaintiff must plead facts to support each element of the claim. The pleader may not evade these requirements by merely alleging a bare legal conclusion; if the facts do not at least outline or adumbrate a violation of the Sherman Act, the plaintiffs will get nowhere merely by dressing them up in the language of antitrust.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

HN4[] **Clayton Act, Claims**

Section 4 of the Clayton Act, *15 U.S.C.S. § 15*, authorizes a private individual to bring suit under the antitrust laws if that individual has been injured in his business or property by reason of anything forbidden in the antitrust laws. The United States Supreme Court has interpreted this language to mean that plaintiffs must prove antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes a defendant's acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation. These requirements are referred to as "antitrust standing." There is no antitrust violation if the injury flows from aspects of the defendant's conduct that are beneficial or neutral to competition. An act is deemed anticompetitive only when it harms both allocative efficiency and raises the prices of goods above competitive levels or diminishes their quality.

Antitrust & Trade Law > Sherman Act > General Overview

HN5[] **Antitrust & Trade Law, Sherman Act**

There is nothing inherently conspiratorial about a "bottom-up" policy development process that considers or even solicits input from advisory groups. "Participation" is not enough to give rise to antitrust liability; control is required.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Opinion by: A. Howard Matz

Opinion

INTRODUCTION AND PROCEDURAL HISTORY

On February 26, 2004, VeriSign filed a complaint against Defendant Internet Corporation for Assigned Names and Numbers ("ICANN") alleging causes of action for: (1) violation of *Section 1 of the Sherman Act*, (2) injunctive relief for breach of contract, (3) damages for breach **[*2]** of contract, (4) interference with contractual relations, (5) specific performance of contract and injunctive relief, (6) damages for breach of contract, and (7) declaratory judgment. Subject matter jurisdiction was premised on federal questions arising under the *Sherman Act* and the *Declaratory Judgment Act.* Compl. P 8.

On May 18, 2004, the Court granted ICANN's motion to dismiss the Complaint. The Court held that VeriSign had failed to sufficiently allege an antitrust conspiracy and an injury of the type the antitrust laws were designed to protect. The Court stated that if VeriSign failed to plead a viable antitrust claim in any First Amended Complaint ("FAC") or chose not to file an FAC, the Court would dismiss the Sherman Act claim with prejudice and decline to exercise supplemental jurisdiction over the state law claims. The Court also vacated ICANN's special motion to strike the state law claims as strategic lawsuits against public participation, pursuant to *Cal. Civ. Proc. Code Section 425.15*, subject to renewal at a later date if VeriSign did file a FAC alleging a viable federal claim.

On June 14, 2004, VeriSign filed a FAC, adding nearly 30 pages **[*3]** of allegations to its Sherman Act claim, *see PP* 85-182. Now ICANN moves to dismiss claims one through six of the FAC pursuant to *Fed. R. Civ. P. 12(b)(6)*, and also renews its motion to strike the second through sixth claims. The Court GRANTS ICANN's motion to dismiss the antitrust claim, this time with prejudice, and declines to exercise supplemental jurisdiction over the remaining state law claims.

FACTUAL ALLEGATIONS

ICANN is a non-profit corporation that was organized in 1998 "in response to a plan by the [Department of Commerce] to introduce competition into the field of domain name registration, among other objectives." FAC P 17. The Internet is comprised of numerous top level domains ("TLDs"). Some are generic TLDs ("gTLDs") like .com, .net, .gov, and .biz, while others are country code TLDs ("ccTLDs") such as .uk and .ca. [1] *Id.* P 11. Each TLD has a "registry" or operator, a single entity responsible for keeping the records and a directory of all the domain names registered within that TLD. *Id. P* 14. A person seeking to register a domain name within any given TLD must do so through a "registrar" for that TLD. *Id.* **[*4]** P 15. There are approximately 250 TLDs throughout the world that compete with each other, through their respective registries, to attract registrars and registrants. *Id. PP* 11, 31.

One of ICANN's functions is to enter into registry agreements that authorize an entity to act as the registry for a particular gTLD. *Id. P* 19. The FAC describes how ICANN functions:

> ICANN is governed by and acts through an international Board of Directors that is elected by members of various constituent groups and supporting organizations within ICANN. As more specifically alleged below, among the members of these groups are operators of gTLDs that compete with each other and with VeriSign; domain name registrars that are present or potential competitors of each other and of VeriSign **[*5]** for certain services; and foreign governments and foreign registries that have ccTLDs that compete with the gTLD registries operated by VeriSign. ICANN frequently carries out its activities, including the conduct alleged herein, through the collective action of its supporting organizations (which, in turn, are comprised of various constituent groups). In fact, in certain circumstances, ICANN was bound by its By-Laws to follow the actions of its supporting organizations.

Id. P 17.

ICANN is an unusual organization. It is not like a typical association, because it has numerous "constituencies" that explicitly acknowledge that they have commercial interests that sometimes are at odds or in conflict with the interests of other constituents. Indeed, one of ICANN's rather formidable challenges is to promote coherent policies that accommodate, or at least take into account, the differing objectives of competing interests in the business of "cyberspace." ICANN is essentially comprised of a Board of Directors and three advisory bodies called "supporting organizations." Each of the supporting organizations has primary responsibility for developing and recommending policy in its area **[*6]** of expertise. Those areas are: (1) Domain Name Supporting ("DNSO"); (2) Address Supporting ("ASO"); and (3) Protocol Supporting ("PSO"). *Id. P* 91; Def.'s Supplemental Req. for Judicial Notice, Exh. L (Bylaws), Art. VI, §§ 1(a),2(b). [2]

In 2001, VeriSign and ICANN entered into a registry agreement authorizing VeriSign to act as the sole registry for the ".com" gTLD. FAC PP 21-22. Under the agreement, VeriSign must provide certain "registry services" to accredited registrars in accordance with ICANN's specifications. *Id. P* 23. The core of this dispute is that ICANN

---

[1] ICANN does not claim to have any power to regulate ccTLDs. *Id.* P 78. Nonetheless, 11 of the approximately 240 ccTLDs have entered into registry agreements with ICANN. Id. P 81. "ccTLDs" compete with other TLD registries. Id. P 19.

[2] Over Plaintiff's objection, the Court takes judicial notice of Exhibit L, ICANN's bylaws. The bylaws are a proper subject of judicial notice because VeriSign references them in the FAC *(e.g., PP* 17, 86, 95, 102) and their authenticity is not disputed. *Branch v. Tunnell, 14 F.3d 449, 454 (9th Cir. 1994)*.

allegedly has taken actions to: (1) prohibit or otherwise restrict VeriSign from offering services valuable to Internet **[*7]** users, [3] (2) impose improper conditions on the offering of such services by VeriSign, (3) regulate and set the prices at which such services may be offered, and/or (4) delay the introduction of new services. *Id. P* 1. Because ICANN has allegedly blocked, delayed, and restricted the "value-added" services VeriSign has sought to offer its customers, VeriSign is "at a competitive disadvantage" since other TLD registries have been able to introduce similar services without restriction or delay. *Id. PP* 77-78. VeriSign claims that ICANN's various actions have breached their 2001 registry agreement, *id. PP* 188-200, 207-222; interfered with a contract VeriSign had with an unidentified third party, *id. PP* 201-206; and violated the antitrust laws, id. PP 83-187.

[*8] APPLICABLE LEGAL STANDARD

HN1[] On a motion to dismiss pursuant to *Rule 12(b)(6) of the Federal Rules of Civil Procedure* for failure to state a claim, the allegations of the complaint must be accepted as true and are to be construed in the light most favorable to the nonmoving party. *Wyler Summit P'ship v. Turner Broad. Sys., Inc., 135 F.3d 658, 661 (9th Cir. 1998)*. A *Rule 12(b)(6)* motion tests the legal sufficiency of the claims asserted in the complaint. Thus, if the complaint states a claim under any legal theory, even if the plaintiff erroneously relies on a different legal theory, the complaint should not be dismissed. *Haddock v. Bd. of Dental Examiners, 777 F.2d 462, 464 (9th Cir. 1985)*. On the other hand, dismissal is proper where "it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief." *Conley v. Gibson, 355 U.S. 41, 45-46, 2 L. Ed. 2d 80, 78 S. Ct. 99 (1957)*; *Moore v. City of Costa Mesa, 886 F.2d 260, 262 (9* Cir. 1989)* (employing *Conley v. Gibson* standard). Where a motion to dismiss is granted, a district court should **[*9]** provide leave to amend unless it is clear that the complaint could not be saved by any amendment. *Chang v. Chen, 80 F.3d 1293, 1296 (9th Cir. 1996)*.

HN2[] "Generally, a district court may not consider any material beyond the pleadings in ruling on a *Rule 12(b)(6)* motion. . . . However, material which is properly submitted as part of the complaint may be considered" on a motion to dismiss. *Hal Roach Studios, Inc. v. Richard Feiner & Co., 896 F.2d 1542, 1555 n.19 (9th Cir. 1990)* (citations omitted). Similarly, "documents whose contents are alleged in a complaint and whose authenticity no party questions, but which are not physically attached to the pleading, may be considered in ruling on a *Rule 12(b)(6)* motion to dismiss" without converting the motion to dismiss into a motion for summary judgment. *Branch, 14 F.3d at 454 (9th Cir. 1994)* (*citing* *Romani v. Shearson Lehman Hutton, 929 F.2d 875, 879 n.3 (1st Cir. 1991))*. If the documents are not physically attached to the complaint, they may be considered if their "authenticity . . . is not contested" and "the plaintiff's complaint necessarily relies" on them. *Parrino v. FHP, Inc., 146 F.3d 699, 705-06 (9th Cir. 1998).* **[*10]** "The district court will not accept as true pleading allegations that are contradicted by facts that can be judicially noticed or by other allegations or exhibits attached to or incorporated in the pleading." 5C Wright & Miller, *Fed. Prac. and Pro.* § 1363 (3d. ed. 2004).

DISCUSSION

I. First Cause of Action: Antitrust Violation

Verisign's antitrust claim is brought under *Section 1 of the Sherman Act*, ***HN3***[] which states, in pertinent part, that "every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." *15 U.S.C. § 1*. The elements required to allege a *Section 1* violation are: "(1) an agreement or conspiracy among two or more persons or distinct business entities; (2) by which the persons or entities intend to harm or restrain competition; and (3) which actually injures competition." *Les Shockley Racing, Inc. v. Nat'l Hot Rod Ass'n, 884 F.2d 504, 507 (9th Cir. 1989)*. [4] Although

---

[3] In particular, the services to which VeriSign refers are Site Finder (described at PP 32-33 of the FAC), Wait Listing Service PP 39-40), ConsoliDate (PP 47-49), Internationalized Domain Names (PP 55-57), and the Incentive Marketing Program (P65).

Section 1 claims are not subject to a heightened pleading standard, the plaintiff must plead facts to support each **[*11]** element of the claim. Von Kalinowski, Sullivan & McGuirl, ***Antitrust Law*** *and Trade Regulation* § 164.01 (Matthew Bender 2002). "The pleader may not evade these requirements by merely alleging a bare legal conclusion; if the facts 'do not at least outline or adumbrate' a violation of the Sherman Act, the plaintiffs will get nowhere merely by dressing them up in the language of antitrust.'" *Rutman Wine Co. v. E. & J. Gallo Winery, 829 F.2d 729, 736 (9th Cir. 1987)*.

Section 4 of the Clayton Act, pursuant to which VeriSign seeks to recover treble damages for the alleged Sherman Act violation, ***HN4***[] authorizes a private individual to bring suit under the antitrust laws if that individual has been "injured in his business **[*12]** or property by reason of anything forbidden in the antitrust laws." *15 U.S.C. § 15*. The Supreme Court has interpreted this language to mean that "Plaintiffs must prove antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*. These requirements are referred to as "antitrust standing." *See, e.g., Pool Water Prods, v. Olin Corp., 258 F.3d 1024, 1034 (9th Cir. 2001)*. There is no antitrust violation "if the injury flows from aspects of the defendant's conduct that are beneficial or neutral to competition . . . An act is deemed *anticompetitive . . .* only when it harms both allocative efficiency *and* raises the prices of goods above competitive levels or diminishes their quality." *Rebel Oil Co., Inc. v. Atl Richfield Co., 51 F.3d 1421, 1433 (9th Cir. 1995)*, *cert. denied*, *516 U.S. 987, 133 L. Ed. 2d 424, 116 S. Ct. 515 (1995)* **[*13]** (emphasis in original).

VeriSign alleges that "the conduct of ICANN in restricting and purporting to 'regulate' non-Registry Services offered or proposed to be offered by VeriSign, and in delaying the introduction and setting the prices or terms of those services, represents the collective and conspiratorial acts of ICANN and existing and potential competitors of VeriSign, including competitors who are members of the constituent groups and supporting organizations of ICANN, in the relevant markets and submarkets as defined below." FAC P 84. The specific services to which VeriSign refers in its antitrust claim are the Wait Listing Service ("WLS"), the Site Finder Service ("SFS"), and Internationalized Domain Names ("IDN"). *Id. P* 88. VeriSign alleges that ICANN's conduct "has deprived consumers of a beneficial new service and VeriSign of revenues and profits it would generate . . ." *Id.* P 38; *see also PP* 46, 54, 64, 67. By making "the registration of domain names within the .com gTLD more desirable and attractive," these new services are alleged to be important to enable "VeriSign to compete more effectively with operators of competitive gTLD and ccTLD registries that are **[*14]** offering or intend to offer a similar service." *Id. P* 67; *see also P* 31. While VeriSign has been blocked, delayed, or restricted from offering these new services, other gTLD registries regulated by ICANN "have been allowed to offer and market similar, competitive services . . ." *Id. P* 77; *see also PP* 34, 44, 64, 67. In particular, VeriSign alleges that ICANN has facilitated ".museum," one of its gTLD competitors, in offering a service similar to Verisign's Site Finder. *Id.* P 34. In addition, most ccTLD registries, which constitute some 240 out of 250 of all TLDs, are not regulated by ICANN and "are free to offer, and are offering, new and improved services to registrars and registrants. . ." *Id. PP* 11, 19, 78.

A. Conspiracy Allegations

ICANN argues that VeriSign has not properly pled a conspiracy because it has not alleged that its competitors controlled the relevant ICANN decision-makers: the Board of Directors and ICANN's President.

VeriSign recognizes that in order to sufficiently plead a conspiracy, it must allege that ICANN's decision-making process was controlled by economic competitors who have conspired to injure VeriSign. But what VeriSign **[*15]** alleges is different: that certain named competitors have conspired to control *advisory groups* that report to ICANN's ultimate decision-maker, the Board of Directors. Paragraph 85 of the FAC alleges that "the constituent groups and supporting organizations of ICANN . . . are substantially controlled by existing and potential competitors of VeriSign

---

[4] The parties both treat this case under the "rule of reason" standard rather than the "per se" rule reserved for presumptively illegal practices such as price-fixing, and the Court does the same. *See McGlinchy v. Shell Chem. Co., 845 F.2d 802, 811 n.3 (9th Cir. 1988)*.

. . ." *See, e.g., id. PP* 92-102 (Domain Name Supporting Organization ("DNSO") controlled by competitors and issued policy paper and report to Board regarding WLS), PP 130-135 (Security and Stability Advisory Committee ("SECSAC") controlled by competitors and issued recommendation to Board regarding regulation of SFS); PP 158-161 (Registry Implementation Committee ("RIC") controlled by competitors and proposed guidelines to Board for IDN).

Moreover, the FAC acknowledges that the final decision to regulate each of the VeriSign services at issue was made by either the Board or the President, not the advisory bodies. *See, e.g., id. PP* 98, 102 (Board adopted DNSO proposals to regulate WLS); P 138 (Board "never adopted a lawful resolution regulating Site Finder"); [5] P 163 (Board adopted IDN guidelines proposed by RIC).

[*16] Verisign's theory seems to be that the advisory bodies were the *de facto* decision-makers because the Board essentially rubber-stamped all of their recommendations. VeriSign alleges that Board approval was a foregone conclusion because of:

> . ICANN's unique bottom-up policy development process by constituency groups of competitors (P 86);. . .
> . . . .the requirement of ICANN's Bylaws that the constituency groups' policy decisions be followed by the Board of Directors of ICANN (PP 86, 95, 102);
> . . . .ICANN's dependence on Verisign's competitors for its funding (P 93). . .
> . . . .[and] specific admissions by ICANN's President that the policy development process at ICANN was subject to capture for precisely the reasons stated above and that competitors working through ICANN used its processes to "hamstring their competitors." (PP 86, 90, 95).

Pl.'s Opp'n, 2:7-19.

Verisign's contentions are deficient. First, ***HN5***[] there is nothing inherently conspiratorial about a "bottom-up" policy development process that considers or even solicits input from advisory groups. *See Hahn v. Or. Physicians' Serv., 868 F.2d 1022, 1029 (9th Cir. 1989) (en* **[*17]** *banc); Barry v. Blue Cross of Cal., 805 F.2d 866, 868-69 (9th Cir. 1986)* (advisory committee's comments and suggestions did not establish requisite control over Board's decisions). "Participation" is not enough to give rise to antitrust liability; *control* is required.

Second, the Bylaws in effect at the time of these events, which the Court judicially notices, do *not* require the Board to accept the advisory bodies' policy recommendations. Rather, the Bylaws provide that:

> the Board [of Directors] shall accept the recommendations of a Supporting Organization if the Board finds that the recommended policy (1) furthers the purposes of, and is in the best interest of, the Corporation; (2) is consistent with the Articles and Bylaws; (3) was arrived at through fair and open processes (including participation by representatives of other Supporting Organizations if requested); and (4) is not reasonably opposed by any other Supporting Organization. *No recommendation of a Supporting Organization shall be adopted unless the votes in favor of adoption would be sufficient for adoption by the Board without taking account of either the Directors selected by the* **[*18]** *Supporting Organization or their votes.* [6]

Exh. L, Art. VI, § 2(e) (emphasis added). If the Board rejects a policy recommendation, Section 2(f) provides the procedure for returning it to the Supporting Organization for further consideration. If after reconsideration the Supporting Organization still does not provide an acceptable recommendation, "the Board may initiate, amend or modify and then approve a specific policy recommendation" if prompt action is necessary. *Id.* § 2(f). Article VI, Section 2 of the bylaws does not "require" the Board to approve the proposals and ***HN6***[] "the district court will

---

[5] ICANN's President, rather than the Board, sent VeriSign a letter requiring it to close its Site Finder Service ("SFS"). FAC P 36. The Court takes judicial notice of this October 3, 2003 letter, which VeriSign refers to as the "Suspension Ultimatum." Def.'s Req. for Judicial Notice, Exh. F. The letter is a proper subject of judicial notice because it is referenced in the FAC and its authenticity is not disputed. *Branch, supra.* Since the Board never took action regarding SFS, the allegation that one of the SFS "co-conspirators" held a seat on the Board is irrelevant. *Id. P* 138.

[6] According to these Bylaws, each of the three Supporting Organizations selects three Directors. Exh. L, Art. 5, § 4.

not accept as true pleading allegations that are contradicted by facts that can be judicially noticed . . ." *5C* Wright & Miller, *Fed. Prac. and Pro.* § 1363 (3d. ed. 2004).

Third, VeriSign alleges in Paragraph 93 that ICANN "has been seriously underfunded," that members of the **[*19]** Registrar Constituency "have provided the single largest source of ICANN's funding," and that "one or more of the WLS co-conspirators have offered to fund expenses of ICANN in defense of the claims made in this litigation." VeriSign alleges that the "WLS co-conspirators" are part of the Registrar Constituency, which provides the majority of ICANN funding. FAC P 93. There are approximately 175 registrars in the United States, *id. P* 15, yet only six are alleged to be "WLS co-conspirators." *Id.* P 90. Nowhere does VeriSign allege that these six conspirators provide the majority of ICANN's funding. Nor has VeriSign alleged that ICANN accepted the alleged offer to defray the cost of this litigation.

Fourth, VeriSign makes too much of the fact that the President of ICANN stated in his February 2002 report that ICANN's consensus decision-making process was "too exposed to capture by special interests" and that the supporting organizations pushed ICANN "to perform only those policy functions that hamstring their competitors." *Id.* P 86; *see also P* 95. That statement did not refer to any of the particular competitors or registry services at issue in this lawsuit. In addition, **[*20]** it was made several months before VeriSign was prepared to offer WLS, in August 2002 *(id. P* 44), well before VeriSign received the Suspension Ultimatum regarding SFS, in October 2003 *(id. P* 36), and before the Board., enacted IDN regulations harming VeriSign, in June 2003 *(id. P* 164). However applicable the President's concerns still may have been at those later times, what is most deficient about these allegations is that the President's statements were about lower-level processes. *Nowhere does the FAC allege that he admitted that the Board itself had been captured.* Moreover, there is no allegation (much less factual support for one) that the Board of ICANN actually conspired with any of VeriSign's competitors. VeriSign does not allege any specific facts to support its theory that the Board complied with the conspirators' alleged attempt to "hamstring" VeriSign -- no allegations regarding how much time the Board spent deliberating, how many meetings the Board held or how many objections or comments the Board considered. That the Board ultimately may have adopted an advisory group's policy recommendation, or that it was common practice for the Board to do so, does not **[*21]** mean that the Board merely "rubber stamped" the proposals and allowed itself to be controlled by Verisign's competitors. *See* *County of Tuolumne v. Sonora Cmty. Hosp., 236 F.3d 1148, 1156-57 (9th Cir. 2001)* ("As the Eleventh Circuit has noted, simply because the 'board is likely to follow the recommendations of the medical staff does not establish, or even reasonably suggest, the existence of a conspiracy.' . . . Even though the Board has never disagreed with [the competitors'] recommendation . . . the Board did not merely 'rubber stamp' [the competitor's] recommendation.") (citation deleted; emphasis added).

In an attempt to overcome the foregoing defects in the FAC's factual allegations, VeriSign cites language from several cases that are either distinguishable or inapposite. The case VeriSign relies on most is *Am. Soc'y of Mech. Eng'rs v. Hydrolevel Corp., 456 U.S. 556, 72 L. Ed. 2d 330, 102 S. Ct. 1935 (1982)*. There, plaintiff was one of more than 90,000 members of defendant, a non-profit membership corporation that promulgated codes for engineering and manufacturing standards. Defendant sent a letter to a competitor of plaintiff. The letter was on the association's **[*22]** stationery and was signed by one of its employees. It basically declared plaintiff's product to be unsafe. The competitor then used the letter to dissuade third parties from buying plaintiff's product. The association's subcommittee that approved the letter had as its vice-chairman someone who just happened to be the vice-president of the competitor; indeed, that person orchestrated the preparation and mailing of the letter by the association. Plaintiff's *Sherman Act Section 1* case against the association-defendant went to trial. Plaintiff requested that the jury be instructed that defendant could be liable for its agents' conduct if they acted within the scope of their apparent authority. The court rejected plaintiff's request. Nevertheless, the jury returned a verdict for plaintiff and on appeal, the Supreme Court held that plaintiff's proffered instruction was sound.

VeriSign cites *Hydrolevel* for the propositions that "an organization could be liable for conspiring with plaintiff's competitor, notwithstanding that the organization itself did not compete with plaintiff and that "it did not matter that the decision-maker was not the Board of the association . . ." Pl's Opp'n, **[*23]** 13:10-25. *Hydrolevel* is really about the appropriate instruction for the derivative liability of an employer for antitrust violations committed by its employees. Moreover, *Hydrolevel* is distinguishable on its facts. First, unlike what is alleged here, the defendant-association's subcommittee was clearly "captured" by the plaintiff's competitor whose vice-president manipulated the association into approving and circulating the terribly injurious attack on plaintiff's product. Second, it is not correct that *Hydrolevel* holds that Board action is irrelevant. Indeed, if the association had not expressly delegated final decision-making authority to the subcommittee, the letter would not have been issued. In short, the association's conduct was a *sine qua non* to the case and the Supreme Court's opinion. Third, *Hydrolevel* went to trial; standards for pleading a conspiracy claim were not at issue.

In *Hahn, supra,* the district court granted summary judgment to defendant, an association of physicians. The issue on appeal was whether those members of the association's board who were physicians and who did not compete directly with the podiatrist-plaintiffs **[*24]** nevertheless "shared similar economic interests with [other] board members and . . . physicians who did compete directly," so as to permit the trier of fact to conclude that the "board as a whole may have acted in the anticompetitive interests of . . . [the] member physicians. . . ." *Hahn, 868 F.2d at 1030*. To answer that question the Ninth Circuit articulated this test: ***HN7***[] "The proper inquiry is whether [decision-makers] sharing substantially similar economic interests collectively exercised control of [the organization] under whose auspices they have reached agreements which work to the detriment of competitors." *Id. at 1029*. The court found that plaintiff had adduced enough such evidence. I apply the *Hahn* test here, yet reach the opposite conclusion, because *Hahn* is factually distinguishable in a critical respect. In *Hahn,* the plaintiff adduced evidence which established that physicians, many of whom competed with podiatrists, "formed a majority of the [defendant's] board." *Id. at 1029*. There is no such allegation here. *See Podiatrist Ass'n v. La Cruz Azul De Puerto Rico, Inc., 332 F.3d 6, 14 (1st Cir. 2003)* **[*25]** (upholding summary judgment for defendant in a *Sherman Act Section 1* case where plaintiffs could not establish that their competitors controlled the defendant's board and noting "The corporate bylaws make manifest that board action requires a majority vote and the . . . [competitors, who held eight out of nineteen seats on the board] simply do not constitute a majority.")

Finally, in *Allied Tube & Conduit Corp. v. Indian Head, Inc., 486 U.S. 492, 100 L. Ed. 2d 497, 108 S. Ct. 1931 (1988)*, the trade association involved in the underlying facts was not a party and the opinion does not even deal with the elements of a *Sherman Act Section 1* claim; the issue and the holding concern the scope of the *Noerr* doctrine. *Allied Tube* has no bearing here.

To summarize, VeriSign has not alleged, and cannot allege, that the co-conspirators comprised a majority of the ICANN Board of Directors. It has not alleged and, given that the bylaws provide otherwise, it cannot allege that the "supporting organizations" within ICANN's structure that do include competitors of VeriSign dominated the Board. *See Barry, supra.* Nor has VeriSign pled with requisite specificity facts that, even circumstantially, **[*26]** establish that ICANN's Board was a "rubber stamp." *County of Tuolumne, supra.* For all these reasons, VeriSign has not sufficiently alleged a *Section 1* conspiracy.

B. Antitrust Standing

Given the foregoing conclusion, which requires dismissal of the antitrust claim, I need not analyze whether VeriSign has pled facts establishing "antitrust injury" and standing, and I choose not to.

II. Second Through Seventh Causes of Action; Breach of Contract, Interference With Contractual Relations, and Declaratory Judgment

Because the Court dismisses Plaintiff's antitrust claim, the only cause of action arising under federal law, the Court declines to exercise supplemental jurisdiction over the remaining state law claims. *28 U.S.C. § 1367(c)(3)*. Thus, the breach of contract causes of action (claims 2, 3, 5, and 6), the interference with contractual relations cause of action (claim 4), and the request for a declaratory judgment (claim 7) [7] are DISMISSED without prejudice to being

---

[7] VeriSign also asserts that the Court has subject matter jurisdiction pursuant to *28 U.S.C. § 2201* (the Declaratory Judgment Act). FAC P 7. ***HN8***[] The Declaratory Judgment Act "merely creates a remedy in cases otherwise within federal jurisdiction," and "is not an independent basis of federal question jurisdiction." *See* Schwarzer, Tashima & Wagstaffe, *Cal. Prac. Guide: Fed. Civ. Pro. Before Trial* § 2:132 (The Rutter Group 2004); *Franchise Tax Bd. v. Constr. Laborers Vacation Trust, 463 U.S. 1, 27-*

filed in state court. Judicial resources will not be wasted as the case is in its early stages and the Court has not had occasion to address any **[*27]** of the state law claims. Plaintiff will not be prejudiced since the statute of limitations is tolled during the time the state law claims were pending in federal court and for an additional period of at least 30 days. *28 U.S.C. § 1367(d)*; Schwarzer, Tashima & Wagstaffe, *Cal. Prac. Guide: Fed. Civ. Pro. Before Trial* § 2:161 (The Rutter Group 2004).

[*28] CONCLUSION

For the foregoing reasons, the Court hereby GRANTS Defendant's motion to dismiss claim one of the FAC, with prejudice. [8] The Court declines to exercise supplemental jurisdiction and DISMISSES the second through seventh claims, without prejudice to their being filed in state court. The Court VACATES Defendant's renewed motion to strike claims two through six. [9]

In light of this ruling, the Court need not rule on the parties' various remaining requests for judicial notice and related disputes.

Within seven calendar days of this Order, Defendant shall serve and lodge a proposed judgment.

IT IS SO ORDERED.

DATE: August 26 2004

A. Howard Matz

United Stakes District Judge

End of Document

28, 77 L. Ed. 2d 420, 103 S. Ct. 2841 (1983). The test is whether the underlying claim that the defendant has threatened to pursue in litigation and that plaintiff seeks to avoid through a declaratory judgment arises under federal law. *Id.* Here, it does not. VeriSign merely seeks the Court's interpretation of certain key provisions of the parties' 2001 registry agreement, presumably to avoid a breach of contract claim from ICANN.

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Motions to Dismiss, Failure to State Claim**

In response to a pleading, a defense of failure to state a claim upon which relief can be granted may be raised by motion. *Fed. R. Civ. P. 12(b)(6)*. In considering a motion to dismiss under *Rule 12(b)(6)*, a court must take all well pleaded facts in the complaint as true and view them in the light most favorable to the plaintiff. Only those facts alleged in the complaint may be considered in deciding such a motion. A complaint should be dismissed if it is clear that no relief could be granted under any set of facts that could be proved consistent with the allegations.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim
